This seminar offers a survey of medieval and early modern German literature and culture from ca.800 to 1600. This year we will focus primarily on heroic epic and tales of fortune. Most texts are available only in German. Advanced reading knowledge of German required. Discussion in English.

Same as: GERMAN 320

**GERMAN 221. German Literature 2: Selfhood and History. 1-5 Unit.**

How the literature of the period between 1750 and 1900 gives voice to new conceptions of selfhood and articulates the emergent self understanding of modernity. Responses to unprecedented historical experiences such as the French Revolution and the ensuing wars, changes in the understanding of nature, the crisis of foundations, and the persistence of theological motifs. Lessing, Herder, Goethe, Schiller, Holderlin, Kleist, Heine, Buchner, Keller, and Fontane. Taught in English, readings in German. (Note: Fulfills DLCL 325 for AY 1415 for the PhD Minor in the Humanities).

Same as: COMPLIT 321A, GERMAN 321

**GERMAN 222. German Literature 3: Myth and Modernity. 1-5 Unit.**

Masters of German 20th- and 21st-Century literature and philosophy as they present aesthetic innovation and confront the challenges of modern technology, social alienation, manmade catastrophes, and imagine the future. Readings include Nietzsche, Freud, Rilke, Musil, Brecht, Kafka, Doebelin, Benjamin, Juenger, Arendt, Musil, Mann, Adorno, Celan, Grass, Bachmann, Bernhardt, Wolf, and Kluge. Taught in English. Undergraduates enroll in 222 for 5 units, graduate students enroll in 322 for 8 units.

Same as: COMPLIT 222A, GERMAN 322

**GERMAN 223. GERMANY BETWEEN EAST AND WEST. 3-5 Units.**

A consideration of German political culture and its contradictory orientations toward alternative poles: the Russian East and the American West. How historical traditions inform current debates, such as the response to the Ukraine crisis. Conflicts between liberal and populist paradigms, enlightenment and romantic legacies. Germany and its geopolitical imagination. The German image of Russia. Texts such as Th. Mann, *„The German Republic,“* Carl Schmitt, *Land and Sea*, Wolf, *Divided Heaven*, and documents of contemporary popular culture.

**GERMAN 239. Queer Theory. 1-5 Unit.**

This course is designed to introduce graduate students and advanced undergraduates to the core texts of queer theory. Topics will include: the relationship between queer theory and feminism, between queer theory and psychoanalysis, and between queer theory and gay and lesbian history. At the same time, the course will investigate how queer theory has been put to use in literary study, musicology and art history.

Same as: FEMGEN 239

**GERMAN 240. Short Fiction as Genre. 3-5 Units.**

Exploration of various short fictional forms in German literature and their narrative capacities. Selections from the eighteenth century to the present.

**GERMAN 245. German Idealist and Romantic Aesthetics. 3-5 Units.**

Focus on influential theories of aesthetic experience as an autonomous cultural domain that supplements science and morality. How the discovery of beauty and sublimity in nature led to an unprecedented celebration of art as the highest form of human activity. The problem of the relation between aesthetic experience and conceptual understanding. Readings by Kant, Schiller, Friedrich Schlegel, Schelling, Hegel, and more recent responses to their works. Taught in English.

**GERMAN 246. Hegel's Phenomenology of Spirit. 3-5 Units.**

Hegel's groundbreaking work models the mind's efforts to understand itself and tells a historically rich story of the evolution of social forms of life. The book begins with basic sensory awareness and ends with the recognition that thought is not finite and constrained by an inert reality but absolutely free, the only source of authority for modern subjects. Topics include the question of whether the human standpoint is inherently limited and fixed, the role of history, knowledge and agency, political conflict and power, rationality and religion, the ancient and the modern world.

**GERMAN 250. Humanities Education in the Changing University. 3 Units.**

Advanced study in the humanities faces changes within fields, the university and the wider culture. Considers the debate over the status of the humanities with regard to historical genealogies and current innovations. Particular attention on changes in doctoral education. Topics include: origins of the research university; disciplines and specialization; liberal education in conflict with professionalization; literature and literacy education; interdisciplinarity as a challenge to departments; education policy; digital humanities; accountability in education, assessment and student-centered pedagogies.

Same as: COMPLIT 275, DLCL 320

**GERMAN 251. Youth Culture. 1-5 Unit.**

Beginning after World War I, the seminar discusses youth as a special phase in life course in the context of political, social and cultural change. Which tasks and problems did society, schools, and parents submit to youth, and how did that change throughout the history of the twentieth century? Youth cultures of different social classes in Germany, and German youth literature will be analyzed. In the seminar, it will also be discussed if youth and youth culture became of more importance for the growing ups throughout the twentieth century. It will be analyzed, if the generational conflicts in society and families have increased in the twentieth century. The impact of political regimes, economy and media on youth and youth cultures will be discussed, too. The seminar starts with the *Bündische Jugend* in the Weimar Republic, continues with the *Hitler-Jugend* in Nazi-Germany and the *Halbstarke* in the 1950ies and goes to the movement of 1968 at the German universities.

**GERMAN 252. F. W. J. Schelling. 1-5 Unit.**

Schelling is the most enigmatic figure of German idealism, whose works have influenced a host of theoretical paradigms from existentialism through materialism to psychoanalysis. We will read selections from Schelling's early writings on transcendental philosophy, his philosophy of art and his philosophy of nature. Close attention will be paid to the *Treatise on the Essence of Human Freedom*, the *Weltalter* fragments and the late Berlin lectures. Readings and discussion in English, though those who can are invited to read the original.

**GERMAN 258. Song Collections as a Reflection of Social and Political Practices at the Hapsburg Court ca. 1500. 3-5 Units.**

Artistic endeavors were of crucial importance for Emperor Maximilian's self-conception and his notion of an emerging German nation. Up to now it has been investigated particularly by looking at literary and visual artworks commissioned by him. In the seminar musical products of the Imperial court, especially songs will be surveyed as expressions of courtiers, urban patricians and humanists in the German lands. A manuscript collection, which was prepared for the Diet in Augsburg 1518 will be at the core of the course, complemented by an early print from 1512. Besides a panegyric on Maximilian as defender of Christendom against the Turks there are standard lyrics, mostly on the theme of love and some merry topics, punctuated by a considerable amount of politically conceived texts, complaining about grievances and social evils at court. Recent approaches have tried to decipher courtly love poems of pre-conversational times as a method of launching social or political opinions in a disguised way. Thus the anthology can be checked as a vehicle of political communication. Philological aspects of source description, material, layout and handwriting will also be examined. Additionally, excursions to Early Modern High German and to musical procedures will be undertaken.

**GERMAN 262. The Total Work of Art. 5 Units.**

Frequently associated with the work of Richard Wagner, The Total Work of Art (or Gesamtkunstwerk) is a genre that aims to synthesize a range of artistic forms into an organic unity, a unity that both models and helps to forge an ideal state. This seminar will examine the history of the Gesamtkunstwerk from its roots in German Romanticism to the present day, focusing on the genre's relations with technology and mass culture across a wide range of media. Creations we will consider include Wagner's Festival Theatre at Bayreuth, Walter Gropius' plans for a Totaltheater, Bertolt Brecht and Kurt Weill's radio-oratorio *The Lindbergh Flight*, Leni Riefenstahl's *Triumph of the Will*, Walt Disney's theme parks, Andy Warhol's *Exploding Plastic Inevitable*, and Bill Gates' "home of the future." Taught in English.

Same as: TAPS 262S

**GERMAN 262A. Explosions of Enlightenment. 3-5 Units.**

Eighteenth-century culture seen as permeated by intellectual and artistic practices and plays pushing principles of reason and rationality to an extreme that becomes self-undercutting. Such obsessions and practices are becoming more visible and prominent now, as the traditional concept of "Enlightenment" (synonymous with the 18th century) is undergoing a profound transformation. Among the protagonists of this seminar will be: Diderot as a philosopher and novelist; Lichtenberg as a scientist and writer of everyday notes; Goya, accusing violence and obsessed with nightmarish visions; Mozart as the excessive master of repetition and variation.

Same as: COMPLIT 262A

**GERMAN 264. Post-Cold War German Foreign Policy. 3-5 Units.**

This course is devoted to Germany's role and policy in international relations since 1990. It is based on the premise that Germany's post-Cold War foreign policy was shaped by two potentially conflicting impulses which is historical learning versus the country's economic role and geopolitical position. The course's objective is to make students familiar with the overall conditions of German Foreign Policy in the post-Cold War era and to analyze related tensions and dilemmas. Empirical examples are Germany's role in the Yugoslavian wars in the first half of the 1990s, the transatlantic crisis over the Iraq war of 2003 and Germany's engagement in Afghanistan and German Foreign Policy during the country's tenure as a non-permanent member of the UN Security Council 2011-2012. Discussion in English; German reading knowledge required.

**GERMAN 264A. Walter Benjamin. 3-5 Units.**

Walter Benjamin's work as cultural historian, critic, literary author and philosopher, seen from the trajectory of a German-Jewish intellectual life in the context of the first half of the 20th century. Providing such a historical perspective will be the condition for an actively critical reading of Benjamin's works; a reading that – counter to the predominant Benjamin-reception – will try to distinguish between works of purely biographical and historical interest and those Benjamin texts that prove to be of great and lasting intellectual value. Taught in English.

Same as: COMPLIT 264

**GERMAN 271. Futurity: Why the Past Matters. 3-5 Units.**

Drawing on literature, the arts, political discourse, museums, and new media, this course asks why and how we take interest in the watershed events of the modern era; how does contemporary culture engage with modern, made-made disasters such as the World Wars or 9/11? Readings and viewings include the literature of G. Grass, W. G. Sebald, Ian McEwan, Toni Morrison and Cormac McCarthy; the cinema of Kathryn Bigelow and Steven Spielberg; speeches by Barak Obama; and the theoretical writing of Walter Benjamin, Hayden White, Fredric Jameson, among others. Taught in English.

Same as: COMPLIT 271A

**GERMAN 282. Martin Heidegger. 3-5 Units.**

Working through the most systematically important texts by Martin Heidegger and their historical moments and challenges, starting with *Being and Time* (1927), but emphasizing his philosophical production after World War II. The philological and historical understanding of the texts function as a condition for the laying open of their systematic provocations within our own (early 21st-century) situations. Satisfies the capstone seminar requirement for the major tracks in Philosophy and Literature. Taught in English.

Same as: COMPLIT 213A, COMPLIT 313A, GERMAN 382

**GERMAN 283. Brecht. 3-5 Units.**

Arguably the most influential theatrical artist of the twentieth century, Bertolt Brecht continues to be a lightning rod for debates over art and politics. This course will consider Brecht as playwright, director, and theorist. Alongside reading and discussing texts such as *Threepenny Opera*, *Mother Courage*, and *Galileo*, students will also be expected to participate in occasional in-class performances in order better to grapple with his plays and theories. No previous theatrical experience is necessary.

Same as: TAPS 382

**GERMAN 284. The Nervous Age: Neurosis, Neurology, and Nineteenth-century Theatre. 5 Units.**

The nineteenth century witnessed profound developments in neurological and psychological sciences, developments that fundamentally altered conceptions of embodiment, agency, and mind. This course will place these scientific shifts in conversation with theatrical transformations of the period. We will read nineteenth-century neuropsychologists such as Charles Bell, Johannes Müller, George Miller Beard, Jean-Martin Charcot, and Hippolyte Bernheim alongside artists such as Percy Shelley, Georg Büchner, Richard Wagner, Émile Zola, and August Strindberg.

Same as: HUMBIO 162, TAPS 354

**GERMAN 285. Environmentalism, Literature and Cultural Criticism. 3-5 Units.**

Concern for environmental threats increasingly draw on traditions of cultural and civilizational criticism. This course explores literary and cultural dimensions of environmentalist discourse, especially in German-speaking Europe but with opportunities for comparative treatments of ecological tendencies in other countries. Topics include: Environmentalism as progressive or as conservative; ambivalence toward technology; sustainability and the critique of growth; humans and animals. Authors such as F. Jünger, Jahn, Wolf, C. Amery, Dath, with comparisons to Leopold, Atwood, Ghosh, Latouche and others. Reading knowledge of German or permission of instructor.

**GERMAN 289. Buechner and Wedekind. 3-5 Units.**

Modern theatre owes an incalculable debt to two German playwrights: Georg Büchner (1813-1837) and Frank Wedekind (1864-1918). We will read their still-shocking portraits of sex, madness, and social brutality in plays such as *Woyzeck* and *Spring's Awakening*, and explore the international journeys these works have made from stage to film and from opera to musical theatre.

Same as: TAPS 289

**GERMAN 298. Writing Workshop. 1-12 Unit.**

Open only to German majors and to students working on special projects, including written reports for internships. Honors students use this number for the honors essay. May be repeated for credit.

**GERMAN 310A. Music and Critical Theory. 3-5 Units.**

The seminar provides an opportunity to study some of the seminal texts of Critical Theory dealing with music. Concentrating on Theodor Adorno's writings on music, we will also include key philosophers who informed Adorno's thinking (in particular Kant, Hegel and Nietzsche), influential nineteenth-century aesthetics of music (Hoffmann, Schopenhauer and Hanslick), other contemporaries of Adorno (for example, Ernst Bloch), and some later authors whose work was influenced by the Frankfurt School (such as Carl Dahlhaus). We will also consider the impact of Critical Theory on recent scholarship. Weekly meetings will be organized around various topics, ranging from central concepts such as "Enlightenment" and "musical material" to individual composers. Music by Wagner, Mahler, Schoenberg, Stravinsky and Weill will feature prominently on the syllabus.

Same as: MUSIC 310A

**GERMAN 320. German Literature 1: How Stories are Told (ca. 1170-1600). 1-5 Unit.**

This seminar offers a survey of medieval and early modern German literature and culture from ca.800 to 1600. This year we will focus primarily on heroic epic and tales of fortune. Most texts are available only in German. Advanced reading knowledge of German required. Discussion in English.

Same as: GERMAN 220

**GERMAN 321. German Literature 2: Selfhood and History. 1-5 Unit.**

How the literature of the period between 1750 and 1900 gives voice to new conceptions of selfhood and articulates the emergent self understanding of modernity. Responses to unprecedented historical experiences such as the French Revolution and the ensuing wars, changes in the understanding of nature, the crisis of foundations, and the persistence of theological motifs. Lessing, Herder, Goethe, Schiller, Holderlin, Kleist, Heine, Buchner, Keller, and Fontane. Taught in English, readings in German. (Note: Fulfills DLCL 325 for AY 1415 for the PhD Minor in the Humanities).

Same as: COMPLIT 321A, GERMAN 221

**GERMAN 322. German Literature 3: Myth and Modernity. 1-5 Unit.**

Masters of German 20th- and 21st-Century literature and philosophy as they present aesthetic innovation and confront the challenges of modern technology, social alienation, manmade catastrophes, and imagine the future. Readings include Nietzsche, Freud, Rilke, Musil, Brecht, Kafka, Doebelin, Benjamin, Juenger, Arendt, Musil, Mann, Adorno, Celan, Grass, Bachmann, Bernhardt, Wolf, and Kluge. Taught in English. Undergraduates enroll in 222 for 5 units, graduate students enroll in 322 for 8 units.

Same as: COMPLIT 222A, GERMAN 222

**GERMAN 354. Poetic Thinking Across Media. 4 Units.**

Even before Novalis claimed that the world must be romanticized, thinkers, writers, and artists wanted to perceive the human and natural world poetically. The pre- and post-romantic poetic modes of thinking they created are the subject of this course. Readings include Ecclesiastes, Zhaozhou Congshen, Montaigne, Nietzsche, Kafka, Benjamin, Arendt, and Sontag. This course will also present poetic thinking in the visual arts—from the expressionism of Ingmar Bergman to the neo-romanticism of Gerhard Richter.

Same as: COMPLIT 154B, COMPLIT 354B, GERMAN 154, JEWISHST 144B

**GERMAN 369. Introduction to the Profession of "Literary Studies" for Graduate Students. 1-2 Unit.**

A history of literary theory for entering graduate students in national literature departments and comparative literature.

Same as: COMPLIT 369, DLCL 369, FRENCH 369, ITALIAN 369

**GERMAN 382. Martin Heidegger. 3-5 Units.**

Working through the most systematically important texts by Martin Heidegger and their historical moments and challenges, starting with *Being and Time* (1927), but emphasizing his philosophical production after World War II. The philological and historical understanding of the texts function as a condition for the laying open of their systematic provocations within our own (early 21st-century) situations. Satisfies the capstone seminar requirement for the major tracks in Philosophy and Literature. Taught in English.

Same as: COMPLIT 213A, COMPLIT 313A, GERMAN 282

**GERMAN 390. German Capstone: Reading Franz Kafka. 3-5 Units.**

This class will address major works by Franz Kafka and consider Kafka as a modernist writer whose work reflects on modernity. We will also examine the role of Kafka's themes and poetics in the work of contemporary writers. (Meets Writing-in-the-Major requirement).

Same as: COMPLIT 111, COMPLIT 311C, GERMAN 190, JEWISHST 147, JEWISHST 349

**GERMAN 397. Graduate Studies Colloquium. 1 Unit.**

Colloquium for graduate students in German Studies. Taught in English.

**GERMAN 398. Dissertation Prospectus Colloquium. 1-12 Unit.**

Repeatable for Credit.

**GERMAN 399. Individual Work. 1-12 Unit.**

Repeatable for Credit. Instructor Consent Required.

**GERMAN 802. TGR Dissertation. 0 Units.****Health Research & Policy Courses****HRP 28SI. Alternative Spring Break: Prevention, Treatment, and Policy Perspectives on Alzheimer's Disease. 1 Unit.**

Examines four aspects of Alzheimer's disease. Goal is to give participants a clearer sense of the struggle that patients actually feel and experience during the progression of the disease. Also explores difficulties and issues that many relatives face in assuming the responsibility of full-time caregiver for an Alzheimer's patient. Addresses ethical considerations on genetic testing, should these advances be embraced or should we be wary of the knowledge they may bring? Finally, explores the notion of service through engaged scholarship by exposing oneself to cutting-edge discoveries as researchers attempt to unravel the puzzle.

**HRP 89Q. Introduction to Cross Cultural Issues in Medicine. 3 Units.**

Preference to sophomores. Introduction to social factors that impact health care delivery, such as ethnicity, immigration, language barriers, and patient service expectations. Focus is on developing a framework to understand culturally unique and non-English speaking populations in the health care system.

**HRP 198. Unite, Empower, Experience: Understanding the Universality of Women's Health. 1 Unit.**

Directed reading course reading. Focus is on the impact of the unique challenges women face in the healthcare system on women and their communities. Examines the current state of women's health from global perspective, considering: community health, health policy, and the medical technology sector.

**HRP 199. Undergraduate Research. 1-18 Unit.**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

**HRP 201A. Health Policy PhD Core Seminar I--First Year. 2 Units.**

Seminar series is the core tutorial for first-year Health Policy and Health Services Research graduate students. Major themes in fields of study including health insurance, healthcare financing and delivery, health systems and reform and disparities in the US and globally, health and economic development, health law and policy, resource allocation, efficiency and equity, healthcare quality, measurement and the efficacy and effectiveness of interventions. Blocks of session led by Stanford expert faculty in particular fields of study.

Same as: MED 215A

**HRP 201B. Health Policy PhD Core Seminar II--First Year. 2 Units.**

Second in a three-quarter seminar series is the core tutorial for first-year Health Policy and Health Services Research graduate students. Major themes in fields of study including health insurance, healthcare financing and delivery, health systems and reform and disparities in the US and globally, health and economic development, health law and policy, resource allocation, efficiency and equity, healthcare quality, measurement and the efficacy and effectiveness of interventions. Blocks of session led by Stanford expert faculty in particular fields of study. Same as: MED 215B

**HRP 201C. Health Policy PhD Core Seminar III--First Year. 2 Units.**

Third in a three-quarter seminar series is the core tutorial for first-year Health Policy and Health Services Research graduate students. Major themes in fields of study including health insurance, healthcare financing and delivery, health systems and reform and disparities in the US and globally, health and economic development, health law and policy, resource allocation, efficiency and equity, healthcare quality, measurement and the efficacy and effectiveness of interventions. Blocks of session led by Stanford expert faculty in particular fields of study. Same as: MED 215C

**HRP 206. Meta-research: Appraising Research Findings, Bias, and Meta-analysis. 3 Units.**

Open to graduate, medical, and undergraduate students. Appraisal of the quality and credibility of research findings; evaluation of sources of bias. Meta-analysis as a quantitative (statistical) method for combining results of independent studies. Examples from medicine, epidemiology, genomics, ecology, social/behavioral sciences, education. Collaborative analyses. Project involving generation of a meta-research project or reworking and evaluation of an existing published meta-analysis. Prerequisite: knowledge of basic statistics. Same as: CHPR 206, MED 206, STATS 211

**HRP 207. Introduction to Concepts and Methods in Health Services and Policy Research I. 2 Units.**

Primarily for medical students in the Health Services and Policy Research scholarly concentration. Topics include health economics, statistics, decision analysis, study design, quality measurement, cost benefit and effectiveness analysis, and evidence based guidelines.

**HRP 208. Introduction to Concepts and Methods in Health Services and Policy Research II. 3 Units.**

Primarily for medical students in the Health Services and Policy Research scholarly concentration; continuation of 207. Topics include health economics, statistics, decision analysis, study design, quality measurement, cost benefit and effectiveness analysis, and evidence based guidelines. Recommended: 207.

**HRP 209. Health Law: The FDA. 2-3 Units.**

(Same as LAW 458) Open to law and medical students; other graduate students by consent of instructor. The FDA's regulatory authority over drugs, biologics, medical devices, and dietary supplements. The nature of the pharmaceutical, biotech, medical device, and nutritional supplement industries.

**HRP 210. Health Law and Policy. 3 Units.**

(Same as Law 313) Open to law, medicine, business, and graduate students. Focus this term is on the physician/patient relationship, medical ethics, and public health law.

**HRP 211. Law and the Biosciences: Neuroscience. 3 Units.**

(Same as LAW 368) Legal, social, and ethical issues arising from advances in neuroscience, including effects upon law and society through improvements in predicting illnesses and behaviors, reading minds through neuroimaging, understanding responsibility and consciousness, treating criminal behavior, and cognitive enhancement.

**HRP 212. Cross Cultural Medicine. 3 Units.**

Developing interviewing and behavioral skills needed to facilitate culturally relevant health care across all population groups. Discussions focus on explicit and implicit cultural influences operating in formal and informal medical contexts.

**HRP 213. Writing in the Sciences. 2-3 Units.**

Primarily for medical students in the Clinical Research Scholarly concentration; open to graduate students except Epidemiology graduate students. Development of research questions and plans for statistical analysis. Study design, sample size and power calculations, and statistical analysis of study data. Analytic methods to carry out statistical power and sample size calculations. Prerequisites: 225, and 258 or 259, or consent of instructor.

**HRP 214. Scientific Writing. 2-3 Units.**

Step-by-step through the process of writing and publishing a scientific manuscript. How to write effectively, concisely, and clearly. Preparation of an actual scientific manuscript. Students are encouraged to bring a manuscript on which they are currently working to develop and polish throughout the course.

**HRP 215. Scientific Writing for Basic and Translational Scientists. 2-3 Units.**

Teaches students in the basic sciences how to write clearly, concisely, and effectively. Focuses on the process of writing and publishing a scientific manuscript. 3 unit option requires work on a manuscript. Not intended for epidemiology graduate students.

**HRP 216. Analytical and Practical Issues in the Conduct of Clinical and Epidemiologic Research. 2-3 Units.**

Topics include: advanced aspects of study design and data analyses; evaluating confounding and interaction; modeling continuous characteristics of exposure; building prediction models; methods of summarizing literature and quantifying effect sizes (meta-analysis); handling missing data; and propensity score methods. 3 units requires a data analysis project. Prerequisites: 258 or 261, or consent of instructor.

**HRP 218. Methods for Health Care Delivery Innovation, Implementation and Evaluation. 2 Units.**

Preference given to postgraduate fellows and graduate students. Focus is on implementation science and evaluation of health care delivery innovations. Topics include implementation science theory, frameworks, and measurement principles; qualitative and quantitative approaches to designing and evaluating new health care models; hybrid design trials that simultaneously evaluate implementation and effectiveness; distinction between quality improvement and research, and implications for regulatory requirements and publication; and grant-writing strategies for implementation science and evaluation. Students will develop a mock (or actual) grant proposal to conduct a needs assessment or evaluate a Stanford/VA/community intervention, incorporating concepts, frameworks, and methods discussed in class. Priority for enrollment for CHPR 212 will be given to CHPR master's students. Same as: CHPR 212, MED 212

**HRP 219. Evaluating Technologies for Diagnosis, Prediction and Screening. 3 Units.**

New technologies designed to monitor and improve health outcomes are constantly emerging, but most fail in the clinic and in the marketplace because relatively few are supported by reliable, reproducible evidence that they produce a health benefit. This course covers the designs and methods that should be used to evaluate technologies to diagnose patients, predict prognosis or other health events, or screen for disease. These technologies can include devices, statistical prediction rules, biomarkers, gene panels, algorithms, imaging, or any information used to predict a future or a previously unknown health state. Specific topics to be covered include the phases of test development, how to frame a proper evaluation question, measures of test accuracy, Bayes theorem, internal and external validation, prediction evaluation criteria, decision analysis, net-utility, ROC curves, c-statistics, net reclassification index, decision curves and reporting standards. Examples of technology assessments and original methods papers are used. Software used in the course is R or Stata. Open to graduate students with a solid understanding of introductory biostatistics, epidemiologic and clinical research study design, and of medical conditions and related technologies required. Basic understanding of Stata or R is also required. Undergraduates may enroll with consent of instructor.

**HRP 220. BIOTECHNOLOGY LAW AND POLICY. 3 Units.**

(Same as LAW 440) Open to all law or medical students; other graduate students by consent of the instructor. Focuses on the biotechnology industry, with some discussion of the "med tech" or medical device industry and the pharmaceutical industry. The life cycle of a biotech firm, from a good idea to a start-up company to FDA approval and beyond. Guest speakers. In addition to a final exam, students are required to participate in a group project during the term, making law and business recommendations about a biotech firm.

**HRP 221. Law and the Biosciences: Genetics. 3 Units.**

(Same as LAW 480) Open to all law or medical students; other graduate students by consent of the instructor. Focus is on ethical, legal, and social issues arising from advances in our knowledge of human genetics. Includes forensic uses of genetics, genetic testing, widespread whole genome sequencing, the consequences of genetics for human reproduction, and the ethics of genomic biobanks for research. Research paper required.

**HRP 222A. Advising Congress on Health Policy. 1 Unit.**

(Same as LAW 413L) Focus on conducting research on national health policy problems for the Medicare Payment Advisory Commission, or MedPAC. Students work in teams with lawyers and PhD economists from MedPAC, resident and fellow physicians from Stanford Hospital, and other students from throughout the University on expanding the healthcare workforce through reform of states' scope of practice regulation or designing antitrust policy to achieve the benefits of coordination and avoid the costs of consolidation. Application required.

**HRP 222B. Advising Congress on Health Policy. 2 Units.**

(Same as LAW 413L) Focus on conducting research on national health policy problems for the Medicare Payment Advisory Commission, or MedPAC. Students work in teams with lawyers and PhD economists from MedPAC, resident and fellow physicians from Stanford Hospital, and other students from throughout the University on expanding the healthcare workforce through reform of states' scope of practice regulation or designing antitrust policy to achieve the benefits of coordination and avoid the costs of consolidation. Application required.

**HRP 223. Introduction to Data Management and Analysis in SAS. 2 Units.**

Provides hands-on introduction to basic data management and analysis techniques using SAS. Data management topics include: Introduction to SAS and SAS syntax, importing data, creating and reading SAS datasets, data cleaning and validation, creating new variables, and combining data sets. Analysis techniques include: basic descriptive statistics (e.g., means, frequency) and bivariate procedures for continuous and categorical variables (e.g., t-tests, chi-squares).

**HRP 225. Design and Conduct of Clinical and Epidemiologic Studies. 3-4 Units.**

Intermediate-level. The skills to design, carry out, and interpret epidemiologic studies, particularly of chronic diseases. Topics: epidemiologic concepts, sources of data, cohort studies, case-control studies, cross-sectional studies, sampling, measures of association, estimating sample size, and sources of bias. Prerequisite: A basic/introductory course in statistics or consent of instructor.

**HRP 226. Advanced Epidemiologic and Clinical Research Methods. 3-4 Units.**

The principles of measurement, measures of effect, confounding, effect modification, and strategies for minimizing bias in clinical and epidemiologic studies. Students enrolled for 4 units complete an additional assignment or paper. Prerequisite: 225 or consent of instructor.

**HRP 228. Genetic Epidemiology. 2 Units.**

Provides framework for physicians, epidemiologists, and other scientists to interpret the literature and incorporate genetic information into human disease research. Topics include: common genetic measures, approaches to finding disease genes, study design and analysis issues, genome-wide association studies, meta-analysis of genetic studies, genetic risk prediction, and applications of new genomic technologies. Includes reading seminal papers in genetic epidemiology.

**HRP 229. Spectrum Scholars Seminar. 1 Unit.**

Preference to trainees awarded Stanford internal KL2, TL1 grants. Focus is on students and junior faculty who have received a Spectrum KL2 or TL1 Award. Discussions include progress and challenges involved in starting and conducting clinical research, current courses, time management and resources; support from peers; education and professional development. All scholars are required to attend a weekly seminar series meeting throughout the year that will cover an array of cross-cutting methodological topics with published examples of implementation. Prerequisite: Awarded a Spectrum KL2, TL1 Grant or Spectrum UL1.

**HRP 230. Cancer Epidemiology. 2-3 Units.**

Descriptive epidemiology and sources of incidence/mortality data; the biological basis of carcinogenesis and its implications for epidemiologic research; methodological issues relevant to cancer research; causal inference; major environmental risk factors; genetic susceptibility; cancer control; examples of current research; and critique of the literature. 3 units requires paper or project. Prerequisite: 225, or consent of instructor.

**HRP 231. Epidemiology of Infectious Diseases. 3 Units.**

Principles of the transmission of the infectious agents (viruses, bacteria, rickettsiae, mycoplasma, fungi, and protozoan and helminth parasites). The role of vectors, reservoirs, and environmental factors. Pathogen and host characteristics that determine the spectrum of infection and disease. Endemicity, outbreaks, and epidemics of selected infectious diseases. Principles of control and surveillance.

**HRP 235. Designing Research-Based Interventions to Solve Global Health Problems. 3-4 Units.**

The excitement around social innovation and entrepreneurship has spawned numerous startups focused on tackling world problems, particularly in the fields of education and health. The best social ventures are launched with careful consideration paid to research, design, and efficacy. This course offers students insights into understanding how to effectively develop, evaluate, and scale social ventures. Using TeachAIDS (an award-winning nonprofit educational technology social venture used in 78 countries) as a primary case study, students will be given an in-depth look into how the entity was founded and scaled globally. Guest speakers will include world-class experts and entrepreneurs in Philanthropy, Medicine, Communications, Education, and Technology. Open to both undergraduate and graduate students. Same as: AFRICAST 135, AFRICAST 235, EDUC 135, EDUC 335, HUMBIO 26, MED 235

**HRP 236. Epidemiology Research Seminar. 1 Unit.**

Weekly forum for ongoing epidemiologic research by faculty, staff, guests, and students, emphasizing research issues relevant to disease causation, prevention, and treatment. May be repeated for credit.

**HRP 237. Practical Approaches to Global Health Research. 3 Units.**

Enrollment limited to graduate students; undergraduates in their junior or senior year may enroll with consent of instructor only. Introduces research methods for conducting studies involving health in low-income context. Focuses on developing a concept note to support a funding proposal. Addressing research question of student's interest. Skills developed include developing a compelling research question; synthesizing a focused literature review; selecting and adapting appropriate study design, target population, sampling methods, data collection and analysis; addressing human subject issues; developing productive cross-collaboration.

Same as: IPS 290, MED 226

**HRP 238. Genes and Environment in Disease Causation: Implications for Medicine and Public Health. 2-3 Units.**

The historical, contemporary, and future research and practice among genetics, epidemiology, clinical medicine, and public health as a source of insight for medicine and public health. Genetic and environmental contributions to multifactorial diseases; multidisciplinary approach to enhancing detection and diagnosis. The impact of the Human Genome Project on analysis of cardiovascular and neurological diseases, and cancer. Ethical and social issues in the use of genetic information. Prerequisite: basic course in genetics; for undergraduates, Human Biology core or equivalent or consent of instructor.

Same as: HUMBIO 159

**HRP 239. Statistical Methods for Group Comparisons and Causal Inference. 3 Units.**

Critical examination of statistical methods in social science and life sciences applications, especially for cause and effect determinations. Topics: mediating and moderating variables, potential outcomes framework, encouragement designs, multilevel models, matching and propensity score methods, analysis of covariance, instrumental variables, compliance, path analysis and graphical models, group comparisons with longitudinal data. See <http://rogosateaching.com/stat209/>. Prerequisite: intermediate-level statistical methods.

Same as: EDUC 260A, STATS 209

**HRP 251. Design and Conduct of Clinical Trials. 3 Units.**

The rationale for phases 1-3 clinical trials, the recruitment of subjects, techniques for randomization, data collection and endpoints, interim monitoring, and reporting of results. Emphasis is on the theoretical underpinnings of clinical research and the practical aspects of conducting clinical trials.

**HRP 252. Outcomes Analysis. 4 Units.**

Methods of conducting empirical studies which use large existing medical, survey, and other databases to ask both clinical and policy questions. Econometric and statistical models used to conduct medical outcomes research. How research is conducted on medical and health economics questions when a randomized trial is impossible. Problem sets emphasize hands-on data analysis and application of methods, including re-analyses of well-known studies. Prerequisites: one or more courses in probability, and statistics or biostatistics.

Same as: BIOMEDIN 251, MED 252

**HRP 255. Observational Studies. 2-3 Units.**

This course will cover statistical methods for the design and analysis of observational studies. Topics for the course will include the potential outcomes framework for causal inference; randomized experiments; methods for controlling for observed confounders in observational studies; sensitivity analysis for hidden bias; instrumental variables; tests of hidden bias; coherence; and design of observational studies.

Same as: STATS 355

**HRP 256. Economics of Health and Medical Care. 5 Units.**

Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: demand for medical care and medical insurance; institutions in the health sector; economics of information applied to the market for health insurance and for health care; measurement and valuation of health; competition in health care delivery. Graduate students with research interests should take ECON 249. Prerequisites: ECON 50 and either ECON 102A or STATS 116 or the equivalent. Recommended: ECON 51.

Same as: BIOMEDIN 156, BIOMEDIN 256, ECON 126

**HRP 258. Introduction to Probability and Statistics for Clinical Research. 3 Units.**

Open to medical and graduate students; required of medical students in the Clinical Research Scholarly Concentration. Tools to evaluate medical literature. Topics include random variables, expectation, variance, probability distributions, the central limit theorem, sampling theory, hypothesis testing, confidence intervals, correlation, regression, analysis of variance, and survival analysis.

**HRP 259. Introduction to Probability and Statistics for Epidemiology. 3-4 Units.**

Topics: random variables, expectation, variance, probability distributions, the central limit theorem, sampling theory, hypothesis testing, confidence intervals. Correlation, regression, analysis of variance, and nonparametric tests. Introduction to least squares and maximum likelihood estimation. Emphasis is on medical applications. Differential between 3 and 4 units is the amount of out-of-class work required.

**HRP 260A. Workshop in Biostatistics. 1-2 Unit.**

Applications of statistical techniques to current problems in medical science. To receive credit for one or two units, a student must attend every workshop. To receive two units, in addition to attending every workshop, the student is required to write an acceptable one page summary of two of the workshops, with choices made by the student.

Same as: STATS 260A

**HRP 260B. Workshop in Biostatistics. 1-2 Unit.**

Applications of statistical techniques to current problems in medical science. To receive credit for one or two units, a student must attend every workshop. To receive two units, in addition to attending every workshop, the student is required to write an acceptable one page summary of two of the workshops, with choices made by the student.

Same as: STATS 260B

**HRP 260C. Workshop in Biostatistics. 1-2 Unit.**

Applications of statistical techniques to current problems in medical science. To receive credit for one or two units, a student must attend every workshop. To receive two units, in addition to attending every workshop, the student is required to write an acceptable one page summary of two of the workshops, with choices made by the student.

Same as: STATS 260C

**HRP 261. Intermediate Biostatistics: Analysis of Discrete Data. 3 Units.**

Methods for analyzing data from case-control and cross-sectional studies: the 2x2 table, chi-square test, Fisher's exact test, odds ratios, Mantel-Haenzel methods, stratification, tests for matched data, logistic regression, conditional logistic regression. Emphasis is on data analysis in SAS. Special topics: cross-fold validation and bootstrap inference.

Same as: BIOMEDIN 233, STATS 261

**HRP 262. Intermediate Biostatistics: Regression, Prediction, Survival Analysis. 3 Units.**

Methods for analyzing longitudinal data. Topics include Kaplan-Meier methods, Cox regression, hazard ratios, time-dependent variables, longitudinal data structures, profile plots, missing data, modeling change, MANOVA, repeated-measures ANOVA, GEE, and mixed models. Emphasis is on practical applications. Prerequisites: basic ANOVA and linear regression.

Same as: STATS 262

**HRP 263. Advanced Decision Science Methods and Modeling in Health. 3 Units.**

Advanced methods currently used in published model-based cost-effectiveness analyses in medicine and public health, both theory and technical applications. Topics include: Markov and microsimulation models, model calibration and evaluation, and probabilistic sensitivity analyses. Prerequisites: a course in probability, a course in statistics or biostatistics, a course on cost-effectiveness such as HRP 392, a course in economics, and familiarity with decision modeling software such as TreeAge.

Same as: MED 263

**HRP 267. Life Course Epidemiology. 2 Units.**

The focus of this course is on understanding the evidence for how exposure at multiple levels and at multiple ages influences an individual's health at any given time. The course emphasizes the primary theories used to examine life course determinants of health and how these theories both facilitate and impede research. A secondary focus is on understanding the methodological challenges to studying health from a life course perspective, as well as how knowledge of life course determinants of health can inform interventions to improve health from a population perspective.

**HRP 268. Genetics and Reproductive Technologies. 2 Units.**

(Same as LAW 568) Examines the complex interrelationship among legal, political, ethical, and social issues shaping the intersection of genetics, reproductive technologies and reproductive rights. Issues discussed may include, but are not limited to: the commercialization and sale of reproductive materials like sperm, ovum, and surrogacy services; genetic technologies, prenatal genetic screening, and diagnostic testing of offspring; criminalization of reproductive decision-making such as sex-selection and genetic enhancement; stem cells, cloning, and abortion; DNA databanks and collection of genetic information; in vitro fertilization and other emerging reproductive technologies.

**HRP 274. Design for Service Innovation. 4 Units.**

(Same as OIT 343/01) Open to graduate students from all schools and departments. An experiential project course in which students work in multidisciplinary teams to design new services to address the needs of medically patients. Project teams partner with "safety net" hospitals and clinics to find better ways to deliver care to the low income and uninsured patients these institutions serve. Students learn proven innovation processes from experienced GSB, d. school, and SoM faculty, interface with students from across the university, and have the opportunity to see their ideas translated into improvements in the quality and efficiency of healthcare in the real world. Prerequisite: admission to the course is by application only. Applications available at <http://DesignForService.stanford.edu>. Applications must be submitted by November 16, 2011.

Same as: BIOE 372, MED 274

**HRP 280. Spanish for Medical Students. 2-3 Units.**

First quarter of three-quarter series. Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on taking the medical history. Topics include the human body, hospital procedures, diagnostics, food, and essential doctor-patient phrases when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge. Offered to undergraduates for 3 units(2 units for medical students).

Same as: SPANLANG 121M

**HRP 281. Spanish for Medical Students. 2 Units.**

Second quarter of three-quarter series. Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on performing a physical examination. Topics include the human body, hospital procedures, diagnostics, food, and essential doctor-patient phrases when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge. Offered to undergraduates for 3 units(2 units for medical students).

Same as: SPANLANG 122M

**HRP 282. Spanish for Medical Students. 2-3 Units.**

Third quarter of three-quarter series. Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on different specialties and medical conditions. Topics include the human body, hospital procedures, diagnostics, food, and essential doctor-patient phrases when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge. Offered to undergraduates for 3 units(2 units for medical students).

Same as: SPANLANG 123M

**HRP 283. Health Services Research Core Seminar. 1 Unit.**

Presentation of research in progress and tutorials in the field of health services research.

**HRP 290. Advanced Medical Spanish Oral Communication. 2 Units.**

Enrollment limited to medical students. Designed to further develop linguistic skills, covering all medical specialties according to student needs. Sessions also include topics on patient education and diseases, such as diabetes, asthma, TB, and CVDs.

**HRP 295. Advanced Topics in Epidemiologic and Clinical Research. 2 Units.**

Topics include alternative study designs, causal inference methods, instrumental variables, time-varying confounding, registry-based research, missing data, and repeated events. Weekly readings and discussions will consider how these methods apply to numerous substantive areas including pharmacoepidemiology, reproductive and perinatal epidemiology, and many areas of chronic disease epidemiology. Prerequisite: HRP 225 and HRP 226 or permission of instructor.

**HRP 296. Current Topics in Bioethics. 3 Units.**

(Same as LAW 596) Explores the ethical, legal, and public policy issues arising from recent advances in biomedicine and the biosciences. Approaches to bioethical reasoning including casuistry, social justice, resource allocation, and individual rights in areas such as refusal of treatment conception. Topics include: the use of forensic genetics in criminal law, neuroscience and national security, race and ethnicity in genetic research, experimentation on human subjects and prisoners, privacy of medical and genetic information in the information age, synthetic biology, and do-it-yourself medical and genetic testing. No prior knowledge in science, medicine, philosophy or related disciplines is required.

**HRP 299. Directed Reading in Health Research and Policy. 1-18 Unit.**

Epidemiology, health services research, preventive medicine, medical genetics, public health, economics of medical care, occupational or environmental medicine, international health, or related fields. May be repeated for credit. Prerequisite: consent of instructor.

**HRP 370. Medical Scholars Research. 4-18 Units.**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

**HRP 391. Health Law: Finance and Insurance. 3 Units.**

(SAME AS LAW 348, MGTECON 331) Provides the legal, institutional, and economic background necessary to understand the financing and production of health services in the U.S. Potential topics include: health reform, health insurance (Medicare and Medicaid, employer-sponsored insurance, the uninsured), medical malpractice and quality regulation, pharmaceuticals, the corporate practice of medicine, regulation of fraud and abuse, and international comparisons.

Same as: PUBLPOL 231

**HRP 392. Analysis of Costs, Risks, and Benefits of Health Care. 4 Units.**

(Same as MGTECON 332) For graduate students. How to do cost/benefit analysis when the output is difficult or impossible to measure. How do M.B.A. analytic tools apply in health services? Literature on the principles of cost/benefit analysis applied to health care. Critical review of actual studies. Emphasis is on the art of practical application.

Same as: BIOMEDIN 432

**HRP 399. Graduate Research. 1-18 Unit.**

Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

**HRP 801. TGR Project. 0 Units.****HRP 802. TGR Dissertation. 0 Units.**

## History Courses

**HISTORY 1A. Global History: The Ancient World. 3-5 Units.**

World history from the origins of humanity to the Black Death. Focuses on the evolution of complex societies, wealth, violence, and hierarchy, emphasizing the three great turning points in early history: the evolution of modern humans, the agricultural revolution, and the rise of the state. Same as: CLASSICS 76

**HISTORY 1B. Global History: The Early Modern World, 1300 to 1800. 3-5 Units.**

Topics include early globalization and cross-cultural exchanges; varying and diverse cultural formations in different parts of the world; the growth and interaction of empires and states; the rise of capitalism and the economic divergence of "the west"; changes in the nature of technology, including military and information technologies; migration of ideas and people (including the slave-trade); disease, climate, and environmental change over time. Designed to accommodate beginning students, non-majors, and more advanced history students.

**HISTORY 1C. Global History: Empires, Technology, and Modernity. 3-5 Units.**

How did the power of states evolve around the globe during the modern period? And how did it shape global experiences of modernity? In this course we will examine the development of technologies of rule from the eighteenth to the twenty-first century, from the age of empires and revolutions, through the world wars, the Cold War, and the war on terror. We will look at the political, social, cultural, and intellectual roots behind their invention and their results on the ground. In doing so, we will attempt to grasp the way they have shaped the history and experience of modernity. The course offers a broad overview not of a particular region but of the wider set of processes and technologies that connected the historical experiences of far-flung human communities. Topics include the evolution of government bureaucracies and classificatory schemes; the industrial revolution; technologies of rebellion and revolution; technologies of trade, including maps, ships, guns, and railroads; liberalism's urban technologies; airpower; the history and practice of development; camps and borders; and anti-colonial critiques of these various tools of empire. Through these, we will attempt to make sense of how the technologies of imperial power have shaped the bonds and inequalities of global capitalism and the world of nation-states. We will focus on different case studies each week to trace the unfolding of large-scale processes. Students will read primary sources (produced in the period) and historians' analyses of the events from a distance. The class is appropriate for beginning students, non-majors, and more advanced history students, and may be taken for different levels of credit.

**HISTORY 3. The Historical and Geographical Background of Current Global Events. 1 Unit.**

This one-unit lecture course aims to provide the historical and geographical context necessary for understanding the most important global issues of the day. Weekly lectures will explore two or more major issues in some detail, illustrating them with maps, timelines, photographs, and other images. Topics are not planned in advance, but will instead reflect stories currently in the news.

**HISTORY 3B. Trans History: The Long View. 1 Unit.**

This mini-course explores the history of gender crossing and transgressions, broadly defined. A series of Stanford faculty and one visitor will present historical interpretations of who, why, and how individuals have crossed gender boundaries, as well as how different societies have reacted to gender crossing. The topics range across time from medieval to modern times and across geographic regions from Europe, China, and Iran to the Americas. Short reading assignments will be made available for each class meeting; students must attend all five sessions, complete the readings, and write a summary paper to receive one unit of credit for the series.

Same as: FEMGEN 3B

**HISTORY 4. Introduction to Geospatial Humanities. 3-5 Units.**

This course introduces undergraduate students to the theory and methods of the geospatial humanities, understood broadly as the application of GIS techniques and other quantitative methods in the humanistic study of social and cultural patterns in past and present settings.

Same as: HISTORY 104

**HISTORY 4N. A World History of Genocide. 3-5 Units.**

Reviews the history of genocide from ancient times until the present. Defines genocide, both in legal and historical terms, and investigates its causes, consequences, and global dimensions. Issues of prevention, punishment, and interdiction. Main periods of concern are the ancient world, Spanish colonial conquest; early modern Asia; settler genocides in America, Australia, and Africa; the Armenian genocide and the Holocaust; genocide in communist societies; and late 20th century genocide.

Same as: JEWISHST 4N

**HISTORY 4S. Crimes Against Humanity. 5 Units.**

What is a crime against humanity and how can it be punished? Starting with the Nuremberg Trials, this seminar will consider how the juridical category of crimes against humanity came into existence and has evolved over the past half century. Thinking through core questions posed by Hannah Arendt, we will consider how crimes against humanity are to be understood in the context of modern jurisprudence, who perpetrates such crimes, and what relationship exists between crimes against humanity and modernity. Priority given to history majors and minors.

Same as: GERMAN 45

**HISTORY 5C. Human Trafficking: Historical, Legal, and Medical Perspectives. 3 Units.**

(Same as History 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution and labor exploitation, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning. Students interested in service learning should consult with the instructor and will enroll in an additional course.

Same as: FEMGEN 5C, HUMBIO 178T, SOMGEN 205

**HISTORY 5W. Human Trafficking Service Learning. 2 Units.**

Continuation of service learning for students who completed History 105C.

**HISTORY 6S. Wealth, Empire, and the Making of the Modern Economy, 1800 to Present. 5 Units.**

What is the history behind our modern economy? What counts as national wealth, and who decides? More than a measure of GDP, the modern economy is the product of some of history's most divisive social, political, and cultural struggles. This seminar surveys two hundred years of European and often global history in order to explore the historical relationships among wealth, empire, the nation-state and statistics, Big Data, and the modern economy. As an introduction to the methods of historical analysis and historical perspective, this seminar focuses on the use of primary sources. Sources include the writings of crucial thinkers from Adam Smith to Karl Polanyi; novels and literature from the 19th century; press materials and political speeches; historical maps; private letters; art and architecture; as well as digital sources such as radio and film. Students from all majors are encouraged to enroll. Priority given to history majors and minors.

**HISTORY 6W. Service-Learning Workshop on Human Trafficking Part I. 3 Units.**

Two-quarter service-learning workshop to accompany course, "Human Trafficking: Historical, Legal, and Medical Perspectives." Considers purpose and practice of service learning. Provides training for students' work in community. Examines current scope of human trafficking in Bay Area, pressing concerns, capacity and obstacles to effectively address them. Students work with community partners dedicated to confronting human trafficking and problems it entails on a daily basis.

Same as: FEMGEN 6W

**HISTORY 7E. Islamic Routes: Archaeology and Heritage of Muslim Societies. 3-5 Units.**

How has archaeology changed our knowledge of the spread of Islam and past Muslim societies? How does archaeology shape heritage debates, conflicts and ideas about Islam today? Topics include the city and urban change, secular and religious life, gender, economy, and globalization. These topics are explored using archaeological and critical heritage approaches. Focus is on examples drawn from Syria-Palestine, Egypt, Iraq, Arabian Peninsula, India, and Africa. Sources include archaeological data and material culture, historical texts in translation, and photography. Same as: ANTHRO 13A, ARCHLGY 13, HISTORY 107E

**HISTORY 7W. Service-Learning Workshop on Human Trafficking Part II. 3 Units.**

Prerequisite: History 6W. Two-quarter service-learning workshop to accompany course, "Human Trafficking: Historical, Legal, and Medical Perspectives." Considers purpose and practice of service learning. Provides training for students' work in community. Examines current scope of human trafficking in Bay Area, pressing concerns, capacity and obstacles to effectively address them. Students work with community partners dedicated to confronting human trafficking and problems it entails on a daily basis. Must currently be enrolled in or have previously taken History 5C/105C ((FEMGEN 5C/105C, HUMBIO 178T, SOMGEN 205, INTNLREL 105C).

Same as: FEMGEN 7W

**HISTORY 8N. Women Against War!. 4 Units.**

Course examines the presumed connection between women and peace and the political activity and authority this has inspired from the time of the ancient Greeks to the present. Begins with theoretical issues and historical origins of women's peace movements. Analyzes the changing forms of women's activism, exploring questions of motivation, legitimization, methods, values, goals, results, limitations, linkages to other issues of social justice, and the public reception of women's activist response to war.

**HISTORY 10B. Survey of Early Modern Europe. 3 Units.**

(Same as HISTORY 110B. History majors and others taking 5 units, register for 110B.) From 1350 to 1789, Europe went from being a provincial backwater to a new global center of power. This course surveys the profound changes of the period that shape our world today: the spread of humanism and science, religious reformation, new styles of warfare, the rise of capitalism and a new global economy, the emergence of the state, and revolution which sought to overthrow established governments.

**HISTORY 10C. The Problem of Modern Europe. 3 Units.**

(SAME as HISTORY 110C. History majors and others taking 5 units, register for 110C.) From the late 18th century to the present. How Europeans responded to rapid social changes caused by political upheaval, industrialization, and modernization. How the experience and legacy of imperialism and colonialism both influenced European society and put in motion a process of globalization that continues to shape international politics today.

**HISTORY 10N. Thinking About War. 3 Units.**

This course examines classic approaches to war as an intellectual problem, looking at how a matter of such great physical violence and passions can be subjected to understanding and used in philosophy, political theory, and art. Questions to be examined include the definition of war, its causes, its moral value, the nature of its participants, its use in the self-definition of individuals and societies, its relation to political authority, warfare and gender, and the problem of civil war.

**HISTORY 10SC. Biography in History, Fiction, and Elsewhere. 2 Units.**

How biographers, novelists, critics and others have written about the rhythms of life the lives of the famous as well as the obscure - will be explored in this course. Biographical writing can be frivolous, but at its best it has the capacity to undercover so much of life's richness, complexity, and confusions. We'll study biography with the use of some of the most resonant, compelling examples of the genre. Together we'll read books about poets Sylvia Plath and Ted Hughes, Henry James Aspern Papers, the brilliant novel on biographical writing, A. S. Byatt's Possession, and Norman Mailer on Marilyn Monroe. How one chooses one topic over another; the differences and similarities between the representation of lives in fiction and biography; the benefits and pitfalls of an intense identification with one's own subjects these and other matters will be examined. We'll meet in San Francisco with local writers wrestling with issues of this sort, and students will be encouraged to try their hands at writing about lives based on research, personal observation, or both.

**HISTORY 11N. The Roman Empire: Its Grandeur and Fall. 4 Units.**

(Formerly CLASSHIS 24N.) Preference to freshmen. Explore themes on the Roman Empire and its decline from the 1st through the 5th centuries C.E.. What was the political and military glue that held this diverse, multi-ethnic empire together? What were the bases of wealth and how was it distributed? What were the possibilities and limits of economic growth? How integrated was it in culture and religion? What were the causes and consequences of the conversion to Christianity? Why did the Empire fall in the West? How suitable is the analogy of the U.S. in the 21st century?. Same as: CLASSICS 26N

**HISTORY 11SC. How Is a Buddhist. 2 Units.**

Buddhism as a system of thought, a culture, a way of life, a definition of reality, a method for investigating it, and a mental, physical, and social practice. Buddhism as a total phenomenon. Readings, films, music, and art. How Buddhist practices constitute the world of the Buddhist.

**HISTORY 11W. Service-Learning Workshop on Issues of Education Equity. 1 Unit.**

Introduces students to a variety of issues at stake in the public education of at-risk high school youth in California. Participants will hear from some of the leading faculty in the School of Education as well as the Departments of Psychology, Sociology, and others, who will share perspectives on the problems and challenges of educating a diverse student body in the state's public school system. The service-learning component of the workshop is a mentoring project (Stanford Students for Educational Equity) with junior class history students from East Palo Alto Academy High School, a Stanford charter school.  
Same as: CSRE 11W

**HISTORY 12. Medicine and Disease in the Ancient World. 3 Units.**

(Same as HISTORY 112. History majors and others taking 5 units, register for 112.) This course explores medicine and disease through case studies from civilizations of the ancient world such as Egypt, Greece, and Peru. We will discuss how these cultures conceptualized disease, and in turn, how they contended with illnesses. Lectures will address different forms of illness through medical texts, art, and human remains. Weekly discussion will incorporate evidence from these sources to explore both their potential and their limitations.

**HISTORY 12N. The Early Roman Emperors: History, Biography, and Fiction. 3 Units.**

Preference to freshmen. The politics, drama, and characters of the period after the fall of the Roman Republic in 49 B.C.E. Issues of liberty and autocracy explored by Roman writers through history and biography. The nature of history writing, how expectations about literary genres shape the materials, the line between biography and fiction, and senatorial ideology of liberty. Readings include: Tacitus' *Annals*, Suetonius' *Lives of the Caesars*, and Robert Graves' *I Claudius* and episodes from the BBC series of the same title.

**HISTORY 13. The Historical and Geographical Background of Current Global Events. 3 Units.**

This three-unit course is designed to complement History 3, which aims to provide the historical and geographical context necessary for understanding important global issues of the day. Students taking the three-unit course will, in addition to attending the weekly lectures, participate in a weekly seminar in which the same topics addressed in lecture will be examined in greater depth. Students will also be required to write a research paper on a generally neglected news topic of their own choosing.

**HISTORY 15D. The Civilization and Culture of the Middle Ages. 3-5 Units.**

This course provides an introduction to Medieval Europe from the fall of Rome to the Renaissance. While the framework of the course is chronological, we'll concentrate particularly on the structure of medieval society. Rural and urban life, kingship and papal government, wars and plagues provide the context for our examination of the lives of medieval people, what they believed, and how they interacted with other, both within Christendom and beyond it.

Same as: HISTORY 115D, RELIGST 115X

**HISTORY 15N. Inequality: the Last 100,000 Years. 3 Units.**

(Formerly CLASSHIS 13N.) This seminar traces the evolution of resource inequality from the Stone Age to the present. Only this long-term perspective reveals the forces that drive inequality and allows us to address two key questions: what causes inequality, and what factors have been capable of reducing it, at least for a while? We are going to confront challenging arguments: that inequality has been closely tied up with overall economic and human development, and that over the long course of history, war, revolution and pestilence were the most effective equalizers of income and wealth. This class will help you appreciate contexts and complexities that are usually obscured by partisan polemics and short-term thinking. Seminar participants will be directly involved in the instructor's current research project on the history of inequality.

Same as: CLASSICS 28N

**HISTORY 16N. Heloise: Love, Learning, and Desire (for God?) in the Twelfth Century. 3 Units.**

Few medieval women have been so often studied and yet so little understood as Heloise, abbess of the Paraclete (d. 1164). Her life, known primarily through the letters that she exchanged with her former husband, the philosopher Peter Abelard (d. 1142), offers a study in contradiction: she was an educated woman at a time when women were supposedly barred from education; a nun who, though dedicated to God, battled sexual desire; a mother, whose spiritual daughters seemingly displaced her one biological son; and a wife, whose husband became her brother in Christ. Traditional accounts have flattened these rich and various contradictions, presenting Heloise primarily as a tragic heroine. Seduced by her much older teacher, this Heloise conceives and bears a child, seeks a love unfettered by bonds of wedlock, and ultimately accepts enclosure in the monastery as her last desperate act of obedience to her lover, Abelard. This seminar revises the traditional image of Heloise, dignifying her as a scholar, monastic reformer, and administrator as well as a lover, wife, mother, and friend.  
Same as: FEMGEN 16N

**HISTORY 17N. Intimacy, Secrets and the Past: Biography in History and Fiction. 3-4 Units.**

Biography is one of the most popular- and controversial- modes of writing about the past and perhaps its greatest draw is in its promise to reveal the otherwise sequestered details of life, its everyday secrets otherwise sequestered from view. This, of course, is also at the heart of most modern fiction, and the two modes of writing have many other similarities as well as, needless to say, differences. The rhythms of life writing in biography as well as fiction will be explored in this class, along with the difficulties (factual, ethical, and otherwise) of ferreting out the secrets of individual lives. Among the figures explored in the course will be Sigmund Freud, Sabina Spielrein, Sylvia Plath, Hannah Arendt, and Woody Allen.  
Same as: JEWISHST 17N

**HISTORY 20A. The Russian Empire, 1450-1800. 3 Units.**

(Same as HISTORY 120A. History majors and others taking 5 units, register for 120A.) Explores rise of Russian state and expanse of empire; patterns of governance of a Eurasian empire; strategies and institutions of governance; survey of various ethnic and religious groups in empire and their varied cultures and political economies; gender and family; serfdom; Russian Orthodox religion and culture; reforms and Europeanization of 18th century.

**HISTORY 20N. Russia in the Early Modern European Imagination. 4 Units.**

Preference to freshmen. The contrast between the early modern image of Europe as free, civilized, democratic, rational, and clean against the notion of New World Indians, Turks, and Chinese as savage. The more difficult, contemporary problem regarding E. Europe and Russia which seemed both European and exotic. Readings concerning E. Europe and Russia from the Renaissance to the Enlightenment; how they construct a positive image of Europe and conversely a negative stereotype of E. Europe. Prerequisite: PWR 1.

**HISTORY 25. St. Petersburg: A Cultural Biography. 1 Unit.**

This course explores the rich cultural heritage of St. Petersburg: art, architecture, urban planning, literature, dance, music, theater. Lectures will be extensively slide-illustrated, particularly on architecture and art. The course will meet Thursday evenings 7:00-9:00 pm as part of the Continuing Studies Program (CSP) for adult students; undergraduate students are welcome to participate by enrolling in this 1-unit History course. Readings will be posted in Coursework for CSP participants and will be available but optional for undergraduate students. Satisfactory credit for undergraduates will be earned by attending 80% of the lectures and by submitting a 5-page paper on a topic of the student's choice utilizing the CSP assigned readings and sources suggested by the instructor.

**HISTORY 25N. Stalin's Europe, 1944-1948. 3 Units.**

This freshman seminar explores the history of wartime and postwar Europe through the lenses of the communist parties of Europe, the anti-Soviet forces on the continent, the devastation of the civilian population, and the intentions and actions of the Soviet Union on the one hand, and the United States on the other. We will analyze issues of resistance and collaboration under the Nazis, Allied occupation, and the division of Europe. We will also consider the forcible displacement of peoples and the fate of Jewish survivors. The idea is to understand the harsh and complex realities of European life and politics in this crucial time frame spanning war and peace. One can discover the beginnings of the Cold War in this period, the first signs of the "Iron Curtain," and the origins of the European Union. Our sources for the reconstruction of European life at this crucial time include documents, memoirs, literature, film, and various collections at the Hoover Archives. In addition to analyzing written and visual materials in discussion, presentations, and short essays, you will engage in a quarter long project on one thematic or country study during this period.

**HISTORY 25SC. Vikings, Mongols and Cossacks: Hisotry in Myth and Reality. 2 Units.**

This course looks at the production of historical myths by taking the example of the early history of Russia and Ukraine. We survey two eras: the founding of the Kiev Rus' state (9th-11th centuries) which both Russia and Ukraine as modern day nations take to be their foundation, and the early modern era of emerging Ukrainian national consciousness and Russian imperial expansion (17th and 18th centuries).  
 Myths have arisen around these two historical epochs for two reasons: first, relations between these two cultures became politically very charged over time (especially now under Putin), and second, the historical cast is full of dashing, exotic and romantic elements (from the point of view of settled European societies). They include the Vikings, the Silk Road, steppe nomads, steppe empires from Scythians to the Mongols (all of which had a role in creating the Kiev Rus' state), Cossacks and world historical individuals such as Bohdan Khmelnytsky, Peter the Great and Ivan Mazepa (who all shaped the early modern period). This material also opens up a wide range of historical debates, particularly differing interpretations of national identity and historical autonomy that resonate today. Our course will contrast myth to "reality" through readings and research.  
 Class sessions will focus on the "reality." Over the summer we will read a survey textbook to give you the context. Each class will be devoted to discussion of common reading, a mini-lecture where appropriate, and your working in teams to prepare and present small reading assignments of primary sources or historical debates. Outside of class, you will team up someone else to work on a major project to be presented in the last week of class and submitted as written form (in most cases a 6-8 page paper, but video presentations and other formats might work for your topic).  
 Topics for that larger presentation include: the 9th-century Viking world of the Rus' and debates about their importance; the Khazars on the Volga (8th c.) and debates about their Jewish identity; romantic myths about the Silk Road over the millennia; the nature of steppe nomadic empires (Scythians, Huns, Mongols); nomadic society on the Eurasian steppe; the much misunderstood phenomenon of Cossackdom in Eurasia (Ukrainian, Zaporozhian, Don and other Cossacks); religious conflicts between Protestantism, Counter-Reformation and Orthodoxy in seventeenth-century Ukraine; whether either Russia or Ukraine had a sense of "national" identity in the early modern period; the mystery of authorship of the *History of the Rus'*.  
 Projects on these themes might take an interdisciplinary approach using literary and/or visual sources. Good examples include: the life and image of Cossack Hetman Bohdan Khmelnytsky in literature, in movies or TV; the image of Hetman Ivan Mazepa in literature (Byron, Pushkin, Victor Hugo) and music (Liszt, Tchaikovsky), or in movies and TV; paintings of the Cossack in Polish (Ludwig Gedlek, Joseph Brandt), Ukrainian (Mykola Ivasiuk) and Russian (Ilya Repin) art; Henryk Sienkiewicz's great trilogy of novels about the Khmelnytsky wars in print, or in movies; the image of the Vikings, the Jewish Khazars or the Mongols in TV and/or cinema; Cossackdom in Nikolai Gogol's novella *Taras Bulba*.  
 Our seminar might include a field trip to Fort Ross in far northern California (a reconstruction of the Russian fortress and village that was the farthest south outpost of Russian colonization in California in the nineteenth century); a visit to a Ukrainian Uniate Church, dinner at a Russian or Ukrainian restaurant; movie showings. Sophomore College Course: Application required, due noon, April 5, 2016. Apply at <http://soco.stanford.edu>.

**HISTORY 30C. Culture and Society in Reformation England. 3 Units.**

(Same as History 130C. History majors and others taking 5 units, register for 130C.) Focuses on the appeal of both Reformed and Catholic ideas in the political and cultural contexts of early modern Europe. Topics include: the Lutheran revolt; the spread of Protestant ideas; Calvin's Geneva; the English Reformation; Tridentine reform and the Jesuits; toleration and the underground churches; wars and religious violence; and the making of European confessional identities. Sources include sermons, religious polemic, autobiographies, graphic prints, poetry, and music.

**HISTORY 30N. Eighteen-Year-Olds Go to War: Global Experiences of World War I. 4 Units.**

Exactly one hundred years ago, eighteen-year-olds like you went to war, imagining a romantic, life-changing experience. They found instead an apocalyptic nightmare, senseless mass death, unending stalemate, mud, rats, and endless trauma. In this course we will revisit the journeys of young men and women who lived through the First World War in Europe, India, the Middle East, and Africa. We will explore the causes, unfolding, legacy, and memory of the war, using diaries, letters, memoirs, novels, poetry, films, and works of historical analysis. Witness the birth of the modern world.

**HISTORY 31. Leonardo's World: Science, Technology, and Art in the Renaissance. 3-5 Units.**

What did Leonardo actually know? How did he acquire that knowledge? Explores Leonardo's interests and accomplishments in such fields as painting, architecture, engineering, physics, mathematics, geology, anatomy, and physiology, and more generally the nature of Renaissance science, art, and technology. Considers the relationship between the society of fifteenth century Italy and the work of the man from Vinci: why did this world produce a Leonardo? How might we use him to understand creativity, innovation, and invention in the Renaissance and beyond? What was his legacy and how did he become a myth? Designed both for students interested in the history of science, medicine, and technology and for students interested in the history and art of Renaissance Italy.

Same as: HISTORY 131

**HISTORY 34A. European Witch Hunts. 3 Units.**

(Same as HISTORY 134A. History majors and others taking 5 units, register for 134A.) After the Reformation, in the midst of state building and scientific discovery, Europeans conducted a series of deadly witch hunts, violating their own laws and procedures in the process. What was it about early modernity that fueled witch hunting? Witch trials and early modern demonology as well as historians' interpretations of events to seek answers to this question.

**HISTORY 34S. Newspapers, Salons and Coffeehouses: The Rise of the Public in Early Modern Europe. 5 Units.**

Between Twitter and the NSA, it seems that every aspect of our lives can, voluntarily or involuntarily, be made public with a tap on a screen. But what exactly is the public and where did it come from? In this course, we will explore the rise of the public in 17th and 18th century Europe, through paintings, engravings, newspapers, memoirs, poetry, plays, political cartoons and song. At stake was—and still is—the very nature of sovereignty, power, and knowledge. Priority given to history majors and minors.

**HISTORY 36N. Gay Autobiography. 4 Units.**

Preference to freshmen. Gender, identity, and solidarity as represented in nine autobiographies: Isherwood, Ackerley, Duberman, Monette, Louganis, Barbin, Cammermeyer, Gingrich, and Lorde. To what degree do these writers view sexual orientation as a defining feature of their selves? Is there a difference between the way men and women view identity? What politics follow from these writers' experiences?.

Same as: FEMGEN 36N

**HISTORY 37S. Voyagers to Tourists: Travel and Modern European Identity. 5 Units.**

Engaging travel accounts left by Cook, Darwin, Flaubert, and others, this course will investigate the history of European identity through the eyes of those that journeyed abroad. Beginning with the explorers of the eighteenth century and ending with the advent of mass tourism, we will delve into the myriad effects of international travel and intercultural interaction upon notions of class, race, sex, nationality, and personality. How and why did the journey become crucial to the formation of our identity? Priority given to history majors and minors.

**HISTORY 38A. Germany and the World Wars. 3 Units.**

(Same as HISTORY 138A. Majors and others taking 5 units, enroll in 138A.) Germany's tumultuous history from the Second Empire through the end of the Cold War. International conflict, social upheaval, and state transformation during Bismarck's wars of unification, World War One, the Weimar Republic, the rise of Nazism, World War Two, the Holocaust, the division of communist East and capitalist West Germany, and the fall of the Iron Curtain.

Same as: JEWISHST 38A

**HISTORY 39. Modern Britain and the British Empire. 3 Units.**

(Same as HISTORY 139. History majors and others taking 5 units, register in 139.) From American Independence to the latest war in Iraq. Topics include: the rise of the modern British state and economy; imperial expansion and contraction; the formation of class, gender, and national identities; mass culture and politics; the world wars; and contemporary racial politics. Focus is on questions of decline, the fortunes and contradictions of British liberalism in an era of imperialism, and the weight of the past in contemporary Britain.

**HISTORY 40. World History of Science. 3 Units.**

(Same as HISTORY 140. History majors and others taking 5 units, register for 140.) The earliest developments in science, the prehistoric roots of technology, the scientific revolution, and global voyaging. Theories of human origins and the oldest known tools and symbols. Achievements of the Mayans, Aztecs, and native N. Americans. Science and medicine in ancient Greece, Egypt, China, Africa, and India. Science in medieval and Renaissance Europe and the Islamic world including changing cosmologies and natural histories. Theories of scientific growth and decay; how science engages other factors such as material culture and religions.

**HISTORY 40A. The Scientific Revolution. 3 Units.**

(Same as History 140A. History majors and others taking 5 units, register for History 140A.) What do people know and how do they know it? What counts as scientific knowledge? In the 16th and 17th centuries, understanding the nature of knowledge engaged the attention of individuals and institutions including Copernicus, Galileo, Descartes, Newton, the early Royal Society, and less well-known contemporaries. New meanings of observing, collecting, experimenting, and philosophizing, and political, religious, and cultural ramifications in early modern Europe.

**HISTORY 41Q. Madwomen: The History of Women and Mental Illness in the U.S.. 3 Units.**

Explores how gender and historical context have shaped the experience and treatment of mental illness in U.S. history. Why have women been the witches and hysterics of the past, and why have there historically been more women than men among the mentally ill? Topics include the relationship between historical ideas of femininity and insanity, the ways that notions of gender influence the definition and treatment of mental disorder, and the understanding of the historically embedded nature of medical ideas, diagnoses, and treatments.

**HISTORY 42S. The Circle of Life: Visions of Nature in Modern Science, Religion, Politics and Culture. 5 Units.**

A new understanding of nature emerged in the 1700s that fundamentally altered our perception of the living world and humanity's relationship with it. By tracing the evolution of this understanding forward, we gain insight into the interactions among science, religion, politics and culture. Topics include: nature in Romantic science, poetry and art; Darwin's theory of evolution and its afterlife in science, literature and popular culture; the science and politics of the 20th-century environmental movement; and the philosophical presuppositions underlying modern debates about biodiversity. In addition to close readings of canonical texts and contemporary commentaries, students will be introduced to digital history methods. Students will design their own final projects in consultation with the instructor.

**HISTORY 44. Women and Gender in Science, Medicine and Engineering. 3 Units.**

(Same as HISTORY 144. Majors and others taking 5 units, enroll in HISTORY 144.) Men's and women's roles in science, medicine, and engineering over the past 200 years with a focus on the present. What efforts are underway globally to transform research institutions so that both men's and women's careers can flourish? How have science and medicine studied and defined males and females? How can we harness the creative power of gender analysis to enhance knowledge and spark innovation?.

**HISTORY 44Q. Gendered Innovations in Science, Medicine, Engineering, and Environment. 4-5 Units.**

Section 1 focuses on the history of women in science, medicine, and engineering. Section 2 looks at transforming research institutions so that both men and women can flourish. Section 3 explores how sex and gender analysis can enhance creativity. We discuss concrete examples of how taking gender into account has yielded new research results. Stanford University currently has a multiple year collaboration with the European Commission for Gendered Innovations, and this class will be part of that project. This course fulfills the second level Writing and Rhetoric Requirement (WRITE 2) and will emphasize oral and multimedia presentation.

**HISTORY 45B. Africa in the Twentieth Century. 3 Units.**

(Same as HISTORY 145B. History majors and others taking 5 units, register for 145B.) The challenges facing Africans from when the continent fell under colonial rule until independence. Case studies of colonialism and its impact on African men and women drawn from West, Central, and Southern Africa. Novels, plays, polemics, and autobiographies written by Africans.

**HISTORY 46N. Science and Magic in History. 4-5 Units.**

Preference to freshmen. This course explores the intertwined histories of science and magic. We will begin with the emergence of experimental modern science from natural magic during the Renaissance and will look closely at the apparatus of the natural magician – magic lanterns and other optical devices, magnets, siphons and other tricky gadgets – which supplied the first experimental philosophers with their instruments. We will follow the development of scientific performances through the electrical and pneumatic amusements of the 18th century and the founding of "modern magic" in the 19th. Finally, we will look at the legacy of this joint history for both magic and science today. You may think magic and science sound like opposites, but by the light of history – presto! – you will see them merge in surprising ways.

**HISTORY 47. History of South Africa. 3 Units.**

(Same as HISTORY 147. History majors and others taking 5 units, register for 147.) Introduction, focusing particularly on the modern era. Topics include: precolonial African societies; European colonization; the impact of the mineral revolution; the evolution of African and Afrikaner nationalism; the rise and fall of the apartheid state; the politics of post-apartheid transformation; and the AIDS crisis.

Same as: AFRICAAM 47

**HISTORY 47N. Global History of Death and Dying. 4 Units.**

Does death have a history? Explores the changing realities of, attitudes towards and ways of coping with death. The role of death in shaping the modern world via the global slave trades, imperial conquests, pandemics, wars and genocides. Ways people have made sense of death in extraordinary circumstances and during calmer times. Continuities and transformations in death rituals, intellectual and philosophical debates about the personal and social meanings of death, and the consequences of ways and patterns of dying.

**HISTORY 48. The Egyptians. 3-5 Units.**

Overview of ancient Egyptian pasts, from predynastic times to Greco-Roman rule, roughly 3000 BCE to 30 BCE. Attention to archaeological sites and artifacts; workings of society; and cultural productions, both artistic and literary. Participation in class is required.

Same as: AFRICAAM 30, CLASSICS 82, HISTORY 148

**HISTORY 48Q. South Africa: Contested Transitions. 4 Units.**

Preference to sophomores. The inauguration of Nelson Mandela as president in May 1994 marked the end of an era and a way of life for South Africa. The changes have been dramatic, yet the legacies of racism and inequality persist. Focus: overlapping and sharply contested transitions. Who advocates and opposes change? Why? What are their historical and social roots and strategies? How do people reconstruct their society? Historical and current sources, including films, novels, and the Internet.

Same as: AFRICAAM 48Q

**HISTORY 48S. History of Health, Science and Medicine in 20th Century Africa. 5 Units.**

This course will examine the impact of colonial policies and post-colonial development on patterns of sickness, wellness and health care in twentieth century sub-Saharan Africa. Some topics will include: the role of colonial science in the formulation of ideas about race, colonial epidemics, labor migration and disease, urban health, encounters between African healers and biomedicine, histories of HIV/AIDS, the impact of debt and Structural Adjustment Programs on public health, and the politics of humanitarian interventions in African health. Priority given to history majors and minors.

Same as: AFRICAST 48S, ANTHRO 48S

**HISTORY 49C. THE SLAVE TRADE. 3 Units.**

(Same as HISTORY 149C. History majors and others taking 5 units, enroll in 149C.) Slave trades and forms of slavery in W. Africa from 1000 to 1885; impacts on lives, social organization, and political structures. Slavery in Islam, the slave market in the Mediterranean and Middle East, and the Saharan slave trade. Slavery within Africa, growth of the Atlantic trade, the Middle Passage, and war and trade that produced slaves. Impact of the Industrial Revolution and European abolition movements on the use of slaves and warfare in Africa. The relationship between slaving and the European conquest of Africa.

**HISTORY 50A. Colonial and Revolutionary America. 3 Units.**

(Same as HISTORY 150A. History majors and others taking 5 units, register for 150A.) Survey of the origins of American society and polity in the 17th and 18th centuries. Topics: the migration of Europeans and Africans and the impact on native populations; the emergence of racial slavery and of regional, provincial, Protestant cultures; and the political origins and constitutional consequences of the American Revolution.

**HISTORY 50B. 19th Century America. 3 Units.**

(Same as HISTORY 150B. History majors and others taking 5 units, register in 150B.) Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture.

Same as: AFRICAAM 50B

**HISTORY 50C. The United States in the Twentieth Century. 3 Units.**

(Same as HISTORY 150C. History majors and others taking 5 units, register for 150C.) Major political, economic, social, and diplomatic developments in the U.S. Themes: the economic and social role of government (Progressive, New Deal, Great Society, and Reagan-Bush eras); ethnic and racial minorities in society (mass immigration at the turn of the century and since 1965, the civil rights era of the 50s and 60s); the changing status of women since WW II; shifting ideological bases, institutional structures, and electoral characteristics of the political system (New Deal and post-Vietnam); determinants of foreign policy in WW I and II, and the Cold War.

**HISTORY 50K. John F. Kennedy: Fifty Years Later. 1 Unit.**

November 22, 2013 marks the 50th anniversary of President John F. Kennedy's assassination. Half a century on, our visually saturated culture remains besotted with images of the youthful president and his strikingly photogenic family. But the passage of time has also yielded new perspectives on Kennedy's presidency and on his era. November 22, 1963 may well come to be remembered not only as the day when the life of a promising young leader was violently cut short, but also as the pivot between two distinct eras in American history. Ironically, though Kennedy was the first World War II veteran to reach the White House, his death heralded the end of the long postwar season of national pride, optimism, confidence, and widely shared prosperity, and may have opened the road to the great catastrophe that was the Vietnam War. His passing also helped to pry open the portals to historic changes in the lives of millions of African Americans, as witnessed by Lyndon Johnson's artful invocation of the fallen president to bring about passage of the epic civil rights legislation of the late 1960s. This course will examine the postwar domestic and international settings in which Kennedy rose to and exercised power. It will probe our continuing fascination with his character and with his family; his role as a Cold Warrior, especially in the tense confrontation known as the Cuban Missile Crisis; and his relation to the African American struggle to bury Jim Crow. We will conclude with an assessment of the longer-term historical consequence of his brief moment in the arenas of celebrity and power. Guest speakers will include noted Kennedy biographer Robert Dallek; Johnson biographer Bruce Schulman; Taylor Branch, acclaimed biographer of Martin Luther King, Jr.; and Stanford's own Jennifer Burns, historian of modern America.

**HISTORY 50N. Who Killed Jane Stanford?. 4 Units.**

In 1905 Jane Stanford died of strychnine poisoning. Who may have killed her remains unknown. You will, in effect, be a grand jury. Like most of your real life intellectual work, the class will be collaborative. Together you will identify suspects and examine the often odd actions of central figures in the case: her personal secretary, physicians, and David Starr Jordan, the president of Stanford.

**HISTORY 54N. African American Women's Lives. 3-4 Units.**

Preference to freshmen. The everyday lives of African American women in 19th- and 20th-century America in comparative context of histories of European, Hispanic, Asian, and Native American women. Primary sources including personal journals, memoirs, music, literature, and film, and historical texts. Topics include slavery and emancipation, labor and leisure, consumer culture, social activism, changing gender roles, and the politics of sexuality.

Same as: AFRICAAM 54N, AMSTUD 54N, CSRE 54N, FEMGEN 54N

**HISTORY 54Q. African American Women's Lives. 3-4 Units.**

Preference to sophomores. African American women have been placed on the periphery of many historical documents. This course will encourage students to think critically about historical sources and to use creative and rigorous historical methods to recover African American women's experiences. Drawing largely on primary sources such as letters, personal journals, literature and film, this course explores the everyday lives of African American women in 19th- and 20th-century America. We will begin in our present moment with a discussion of Michelle Obama and then we will look back on the lives and times of a wide range of African American women including: Charlotte Forten Grimké, a 19th-century reformer and teacher; Nella Larsen, a Harlem Renaissance novelist; Josephine Baker, the expatriate entertainer and singer; and Ida B. Wells and Ella Baker, two luminaries of civil rights activism. We will examine the struggles of African American women to define their own lives and improve the social, economic, political and cultural conditions of black communities. Topics will include women's enslavement and freedom, kinship and family relations, institution and community building, violence, labor and leisure, changing gender roles, consumer and beauty culture, social activism, and the politics of sexuality.

Same as: AFRICAAM 54Q, AMSTUD 54Q, FEMGEN 54Q

**HISTORY 54S. The American Civil War. 5 Units.**

Few events in American history match the significance of the Civil War, a conflict that freed 4 million people held in bondage and left 750,000 men dead. This course will explore the war from a range of perspectives, including those of Union and Confederate soldiers, African Americans, women, and Native Americans. Based on the documents these different groups left behind, as well as the histories they inspired, we will seek to understand how the Civil War was experienced and commemorated. Priority given to history majors and minors.

**HISTORY 55N. Social Movements through Song in Modern America. 3-4 Units.**

This discussion class will explore a series of social movements in modern America through the songs produced to support efforts to achieve labor unions, civil rights and racial justice, peace, and women's rights. For each class we will read short historical texts to provide contexts for the movements and then concentrate on the role of music within them. We will listen to and discuss several core songs for each topic. Biographical and autobiographical readings on a key set of musicians (including Joe Hill, Woody Guthrie, Pete Seeger, Malvina Reynolds, and Bernice Johnson Reagon) will provide personal accounts of the relationship of songs to social movement. The music we include in class will range from ballads to anthems, from oral traditions to the work of singer-songwriters.

Same as: AMSTUD 55N

**HISTORY 55Q. The Origins of the Modern American City, 1865-1920. 3 Units.**

Are we living in a new Gilded Age? To answer this question, we go back to the original Gilded Age, as well as its successor, the Progressive Era. How did urban Americans around the turn of the twentieth century deal with stark inequalities of class, race, ethnicity, gender, and sexuality? And what can we learn from their struggles for our own time? Students use primary and secondary sources in digital and print formats. Possible field trip to San Francisco.

Same as: AMSTUD 25Q, URBANST 25Q

**HISTORY 57E. State of the Union 2014. 1 Unit.**

This course will examine major themes that contribute to the health, or disease, of the US body politic. Challenges and opportunities abound: we live in an age of rising inequality, dazzling technological innovation, economic volatility, geopolitical uncertainty, and the accumulating impact of climate change. These conditions confront our political leaders and us as citizens of a democracy plagued by dysfunction. What are the implications for the body politic? Led by Rob Reich (Political Science, Stanford), David Kennedy (History, Stanford), and James Steyer (CEO, Common Sense Media), the course will bring together distinguished analysts of American politics. Together, we will examine the following topics: inequality; energy and the environment; media and technology; the economy; and the 2014 midterm elections. The course is designed for the entire Stanford community: jointly offered for undergraduate and graduate students at Stanford (through listings in Political Science and History) and for community members through the Continuing Studies Program. For students, the course is available for 1 credit. This course may not be taken for a Letter Grade.

Same as: POLISCI 57E

**HISTORY 60N. Revolutionaries and Founders. 3 Units.**

Americans remain fascinated by the revolutionary generation which secured independence and established a national constitutional republic. Books about the founders come steadily from the presses, some describing the lives of individual revolutionaries, others trying to analyze and explain what made these events possible. This seminar will approach the Revolution through both a biographical and analytical framework, relying both on scholarly writings and the massive array of primary sources that are readily available through letterpress editions and on-line. The course will rely on the instructor's own recent book, *Revolutionaries: A New History of the Invention of America*, which carries the story from the crisis around the Boston Tea Party of 1773 through the end of President Washington's first administration. The course will be divided evenly between modern scholarship and the careful reading of original materials, and students will write short essays that will involve the analysis of explanatory problems, the close interpretation of documents, and the crafting of historical narratives. Topics to be discussed will include the outbreak of the revolution, constitution-making at both the state and national levels of government, the conduct of the war, and the legacies that Americans particularly associate with Thomas Jefferson, James Madison, and Alexander Hamilton.

**HISTORY 63N. The Feminist Critique: The History and Politics of Gender Equality. 3-4 Units.**

This course explores the emergence of concepts of gender equality in world history. It asks how gender inequality relates to racial, ethnicity, and sexual identities, how men engage with feminism, whether gender equality is purely a western cultural tradition, and much more. We approach the long history of ideas about gender and equality by reading primary historical documents from around the world, moving from the 15th century to the present. Topics include education, the body, sexuality, violence, labor, and politics.

Same as: AMSTUD 63N, CSRE 63N, FEMGEN 63N

**HISTORY 64. Racial and Ethnic Diversity in Modern America. 4-5 Units.**

How ethnicity influenced the American experience and how prevailing attitudes about racial and ethnic groups over time have affected the historical and contemporary reality of the nation's major minority populations. Focus is on the past two centuries.

Same as: CSRE 64

**HISTORY 65D. The Pacific World. 3 Units.**

(Same as HISTORY 165D. Majors and others taking 5 units, enroll in 165D.) Taking the Pacific and the regions of the world that touch the ocean as the unit of analysis, we will explore geographic, social, cultural, and political interactions that created what we now call the Pacific World. Ranging over four hundred years of history, we will examine human migrations, explorations, interactions and conflicts, and human ecology. The course is not nation-focused but is transnational and international in approach.

**HISTORY 66. Introduction to African American History - the Modern Freedom Struggle. 3-5 Units.**

Using the unique documentary resources and publications of Stanford's Martin Luther King Jr. Research and Education Institute, this course will utilize multi-media materials to shed light on the relationship between grassroots activism and King's visionary leadership.

Same as: AFRICAAM 166, AMSTUD 166, HISTORY 166

**HISTORY 69Q. On the Road: A Cultural History of Travel in 20th Century America. 4-5 Units.**

From Mark Twain's *Roughin' It* to Cheryl Strayed's *Wild*, this seminar explores epic road trips of the twentieth century. Travel is a cultural practice through which Americans have constructed ideas about the self, society, race, the past, and the future. Engaging historical and literary texts, film, autobiography, photography, and music, we will consider how writers have explored the theme of travel and what the differences in their texts tell us about American writing, American history, and American life.

Same as: AMSTUD 109Q

**HISTORY 69S. Race, Science, and Medicine in U.S. History. 5 Units.**

How have scientific ideas about race been shaped by their historical contexts, and what effects do these ideas have on people, institutions, law, and medicine? Is racial science always racist science? How do ideas about race intersect with ideas about gender, class, and disability? This course explores how natural philosophers and scientists have defined, used, and sometimes challenged ideas about race from the eighteenth century to today. Topics include medicine and slavery, eugenics, sociology, psychiatry, race-based medicine, and genetic ancestry. This course fulfills the departmental Sources and Methods requirement.

Priority given to history majors and minors.

Same as: CSRE 69M, FEMGEN 69S

**HISTORY 70. Culture, Politics, and Society in Latin America. 3 Units.**

(Same as HISTORY 170B. History majors and others taking 5 units, enroll in HISTORY 170B.) The course of Latin American history from the colonial era to the present day. Key issues such as colonialism, nationalism, democracy, and revolution will be examined critically in light of broad comparative themes in Latin American and world history. Sources include writings in the social sciences as well as primary documents, fiction, and film.

**HISTORY 70A. Colonial Latin America, 1400-1830. 3 Units.**

(Same as HISTORY 170. History majors and others taking 5 units, register for HISTORY 170.) This survey course covers the history of Latin America from 1400 to 1830. Topics covered include Iberian overseas expansion, the conquest of Mexico and Peru, critiques of conquest, indigenous resistance and collaboration; interactions between Europe and the Americas, including the Columbian Exchange, religious syncretism, trans-Atlantic economies, and the role of race and gender in new colonial societies; we will conclude with the Bourbon reforms and the Latin American Wars of Independence. Readings include primary and secondary sources.

**HISTORY 71S. American Political Thought from the Civil War to the Cold War. 5 Units.**

This course explores America's most important political tradition: liberalism. What does liberalism mean? Does it mean something different today than it did in the past? Using multiple textual and visual sources, students will grapple with how Americans remade liberalism in the 19th and 20th centuries and how political thinkers have understood its meaning over time. We will see how American liberalism was shaped by factors of race, gender, and class and by competing ideologies like conservatism and socialism.

**HISTORY 73. Mexican Migration to the United States. 3-5 Units.**

This class examines the history of Mexican migration to the United States. In the United States we constantly hear about Obama's immigration plan, the anti-immigrant laws in Arizona, and the courage of DREAM Activists; in Mexico news sources speak about the role of remittances, the effect of deportations, and the loss of life at the border. Unfortunately, few people truly understand the historical trends in these migratory processes, or the multifaceted role played by the United States in encouraging individuals to head there. Moreover, few people have actually heard the opinions and voices of migrants themselves. This course seeks to provide students with the opportunity to place migrants' experiences in dialogue with migratory laws as well as the knowledge to embed current understandings of Latin American migration in their meaningful historical context.

Same as: HISTORY 173

**HISTORY 73S. History of the Police in the United States: Slave Patrols to Ferguson. 5 Units.**

How did police come to have the power to use violence? Themes: growth of professional policing, creation of private police forces and vigilantism, and public portrayals of police—by Hollywood and the press. The historical relationship between race and the administration of policing is a central question. Students will hone the methodology necessary to examine primary sources such as police memoirs, court records, police files, detective novels, music videos and photographs. The course fulfills the departmental Sources and Methods requirement. Priority given to history majors and minors.

**HISTORY 74. Mexico Since 1876: History of a "Failed State"?. 3 Units.**

This course is an introduction to the history and diverse peoples of modern Mexico from 1876 to the present. Through lectures, discussions, primary and secondary readings, short documentaries, and written assignments, students will critically explore and analyze the multiplicity of historical processes, events and trends that shaped and were shaped by Mexicans over the course of a century. The course will cover some of the social and political dimensions of rural social change, urbanization and industrialization, technological innovation and misuse, environmental degradation and conservation, education, ideology, culture and media, migration, and the drug trade.

**HISTORY 74S. Sounds of the Century: Popular Music and the United States in the 20th Century. 5 Units.**

What can popular music teach us about the past? What can we learn about music if we study it historically? This course grapples with these two questions by examining various examples of American music in the 20th century, as well as more conventional historical sources, scholarly books, and essays. Will pay special attention to how issues of race, gender, sexuality, class, and nation were reflected in and produced by people's interactions with music, inside and outside American borders.

**HISTORY 78N. Film and History of Latin American Revolutions and Counterrevolutions. 3 Units.**

In this course we will watch and critique films made about Latin America's 20th century revolutions focusing on the Mexican, Cuban, Chilean and Nicaraguan revolutions. We will analyze the films as both social and political commentaries and as aesthetic and cultural works, alongside archivally-based histories of these revolutions.

**HISTORY 78Q. Film and History of Latin American Revolutions and Counterrevolutions. 3 Units.**

In this course we will watch and critique films made about Latin America's 20th century revolutions focusing on the Mexican, Cuban, Chilean and Nicaraguan revolutions. We will analyze the films as both social and political commentaries and as aesthetic and cultural works, alongside archivally-based histories of these revolutions.

**HISTORY 81B. Formation of the Contemporary Middle East. 2 Units.**

The history of the Middle East since WW I, focusing on the eastern Arab world, Egypt, the Fertile Crescent, and the Arabian Peninsula, with attention to Turkey, Iran, and Israel.

**HISTORY 82C. Making of the Islamic World, 600-1500. 3 Units.**

(Same as HISTORY 182C. Majors and other taking 5 units, register for 182C.) The History of Islam and Muslim peoples from 600-1500. Topics include Muhammad and his community; the early Arab conquests and empires; sectarian movements; formation of Islamic belief, thought, legal culture and religious institutions; transregional Sufi and learned networks; family and sexuality; urban, rural and nomadic life; non-Muslim communities; the development of Mediterranean and Indian Ocean trade; relations with Byzantium, the Latin West, China; the Crusades and the Mongols.

**HISTORY 83S. Refugees of Palestine and Syria: History, Identity, and Politics of Exile in the Middle East. 5 Units.**

Mass displacements of Palestinians (1948, 1967) and Syrians (2011-) remain crucial to our understanding of history and politics of the modern Middle East. The course topics include the media's role in alleviating or worsening refugee crises, the Palestinian "right of return," and the place of religion in the Syrian civil war. By looking at autobiographies, graffiti, revolutionary posters, and music, we will study the construction of refugee identities, through the prism of race, ethnicity, statelessness, gender, and sexual orientation. Priority given to history majors and minors.

**HISTORY 84. Zionism and the State of Israel. 3 Units.**

(Same as HISTORY 184. History majors and others taking 5 units, register for 184.) Hotly contested still, this course will open up the movement's ideas, practices, achievements and crises in such a way as to allow students to hear the fullest range of voices - Jewish, Arab, religious, secular, etc. It will track the movement from its appearance in the late nineteenth century until the establishment of State of Israel in 1948, and beyond.

Same as: CSRE 84, JEWISHST 84, REES 84

**HISTORY 85B. Jews in the Contemporary World: Faith and Ethnicity, Visibility and Vulnerability. 3 Units.**

(Same as HISTORY 185B. History majors and others taking 5 units, register for 185B.) This course explores the full expanse of Jewish life today and in the recent past. The inner workings of religious faith, the content of Jewish identity shorn of belief, the interplay between Jewish powerlessness and influence, the myth and reality of Jewish genius, the continued pertinence of antisemitism, the rhythms of Jewish economic life - all these will be examined in weekly lectures, classroom discussion, and with the use of a widely diverse range of readings, films, and other material. Explored in depth will be the ideas and practices of Zionism, the content of contemporary secularism and religious Orthodoxy, the impact Holocaust, the continued crisis facing Israel and the Palestinians. Who is to be considered Jewish, in any event, especially since so many of the best known (Spinoza, Freud, Marx) have had little if anything to do with Jewish life with their relationships to it indifferent, even hostile?.

Same as: CSRE 85B, JEWISHST 85B, REES 85B

**HISTORY 86S. Zionism Considered: Jewish Thinkers and the Quest for a Jewish Home. 5 Units.**

This course examines how Jews have approached Zionism from the mid-nineteenth century until the present day. Focusing on understanding the major divisions within Zionism, a particular emphasis will be on leaders of the various factions, exploring why they believed a Jewish home to be necessary and how such a home was envisioned. Readings will include propaganda, literature, and images, and assignments include short responses, presentations, and a research paper. Priority given to history majors and minors.

Same as: JEWISHST 86S

**HISTORY 87. The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan. 3 Units.**

(Same as HISTORY 187. History majors and other taking 5 units, register for 187.) Explores the contested politics of these societies in modern times. Topics include controversies surrounding the meaning of revolution, state building, war, geopolitics, Islamic law, clerical authority, gender, an Islamic economy, culture, and ethnic, national and religious identities from the 1940s to the present. Assignments will focus on primary sources (especially legal documents, poetry, novels, and memoirs) and films.

**HISTORY 90. Early Chinese Thought. 3-5 Units.**

This lecture course examines the emergence of critical thought in early China. After a brief study of the social and political changes that made this emergence possible, it looks at the nature and roles of the thinkers, and finally their ideas about the social order, the state, war and the army, the family, the cosmos, and the self (both physical and mental). Some brief comparisons with early Greek thought.

Same as: HISTORY 190

**HISTORY 91D. China: The Northern and Southern Dynasties. 3 Units.**

(Same as HISTORY 191D. History majors and others taking 5 units, register for 191D.) Examines one of the most dynamic periods of Chinese history with the emergence of the institutional religions (Buddhism and Daoism), the development of the garden as an art form, the rise of landscape as a theme of verse and art, the invention of lyric poetry, and the real beginnings of the southward spread of Chinese civilization.

**HISTORY 92A. The Historical Roots of Modern East Asia. 4-5 Units.**

Focus is on China and Japan before and during their transition to modernity. The populous, urbanized, economically advanced, and culturally sophisticated Ming empire and Muromachi shogunate in the 16th century when Europeans first arrived. How the status quo had turned on its head by the early 20th century when European and American steamships dominated the Pacific, China was in social and political upheaval, and Japan had begun its march to empire.

Same as: HISTORY 392E

**HISTORY 93. Late Imperial China. 3 Units.**

(Same as HISTORY 193. History majors and others taking 5 units, register for 193.) A survey of Chinese history from the 11th century to the collapse of the imperial state in 1911. Topics include absolutism, gentry society, popular culture, gender and sexuality, steppe nomads, the Jesuits in China, peasant rebellion, ethnic conflict, opium, and the impact of Western imperialism.

Same as: CHINLIT 93, FEMGEN 93

**HISTORY 94B. Japan in the Age of the Samurai. 3 Units.**

(Same as HISTORY 194B. History majors and others taking 5 units, register for 194B.) From the Warring States Period to the Meiji Restoration. Topics include the three great unifiers, Tokugawa hegemony, the samurai class, Neoconfucian ideologies, suppression of Christianity, structures of social and economic control, frontiers, the other and otherness, castle-town culture, peasant rebellion, black marketing, print culture, the floating world, National Studies, food culture, samurai activism, black ships, unequal treaties, anti-foreign terrorism, restorationism, millenarianism, modernization as westernization, Japan as imagined community.

**HISTORY 95. Modern Korean History. 3 Units.**

(Same as HISTORY 195. History majors and others taking 5 units, register for 195.) This lecture course provides a general introduction to the history of modern Korea. Themes include the characteristics of the Chosŏn dynasty, reforms and rebellions in the nineteenth century, Korean nationalism; Japan's colonial rule and Korean identities; decolonization and the Korean War; and the different state-building processes in North and South, South Korea's democratization in 1980s, and the current North Korean crisis.

**HISTORY 95C. Modern Japanese History: From Samurai to Pokemon. 3 Units.**

(Same as History 195C. History majors and others taking 5 units, register for 195C.) Japan's modern transformation from the late 19th century to the present. Topics include: the Meiji revolution; industrialization and social dislocation; the rise of democracy and empire; total war and US occupation; economic miracle and malaise; Japan as soft power; and politics of memory. Readings and films focus on the lived experience of ordinary men and women across social classes and regions.

**HISTORY 95N. Maps and the Modern Imagination. 4-5 Units.**

Preference to freshmen. Focus is on cutting-edge research. Topics: the challenge of grasping the globe as a whole; geography's roots in empire; maps as propaganda and as commodities; the cultural production of scale; and the cartography of imaginary worlds. Sources include resources in the Green Library Special Collections and in the Stanford Spatial History Lab.

**HISTORY 96. Gandhi in His Times and Ours. 3 Units.**

Place the paradox of Gandhi in context of global convulsions of 20th century. Gandhi lived across continents; maturing in South Africa, struggling in India, attaining celebrity in Europe. As leader of masses, his method of Satyagraha was distinctively at odds with his times. Yet, he also privileged sacrifice, dying, even euthanasia. In a world beset by fear and war, Gandhi's complex theory of nonviolence is compelling. What kind of nonviolent politics did Gandhi envision after Fascism, Auschwitz, Hiroshima, and Pakistan?

**HISTORY 98. The History of Modern China. 3 Units.**

(Same as HISTORY 198. History majors and others taking 5 units, register for 198.) This course charts major historical transformations in modern China, and will be of interest to those concerned with Chinese politics, culture, society, ethnicity, economy, gender, international relations, and the future of the world.

**HISTORY 98N. Beijing, Shanghai, and the Structure of Modern China. 3 Units.**

This course examines the transformation of China from the late empire to the present by studying the nature of its two greatest cities. Topics examined will include the evolving physical structure of the cities, their changing relations to the Chinese state and the outside world, shifting understandings of the urban population/crowd, the changing nature of time, new modes of self-definition through patterns of consumption, the cities as topics of literature and movies, and the nature of urban modernity.

**HISTORY 101. The Greeks. 4-5 Units.**

(Formerly CLASSHIS 101.) 250 years ago, for almost the first time in history, a few societies rejected kings who claimed to know what the gods wanted and began moving toward democracy. Only once before had this happened—in ancient Greece. This course asks how the Greeks did this, and what they can teach us today. It uses texts and archaeology to trace the material and military sides of the story as well as cultural developments, and looks at Greek slavery and misogyny as well as their achievements. Weekly participation in a discussion section is required. Same as: CLASSICS 63

**HISTORY 102. History of the International System. 5 Units.**

After defining the characteristics of the international system at the beginning of the twentieth century, this course reviews the primary developments in its functioning in the century that followed. Topics include the major wars and peace settlements; the emergence of Nazism and Communism; the development of the Cold War and nuclear weapons; the rise of China, India, and the EU; and the impact of Islamic terrorism. The role of international institutions and international society will also be a focus as will the challenge of environment, health, poverty, and climate issues to the functioning of the system.

Same as: INTNLREL 102

**HISTORY 102A. The Romans. 3-5 Units.**

(Formerly CLASSHIS 60.) How did a tiny village create a huge empire and shape the world, and why did it fail? Roman history, imperialism, politics, social life, economic growth, and religious change. Weekly participation in a discussion section is required; enroll in sections on Coursework.

Same as: CLASSICS 84

**HISTORY 102C. Heretics to Headscarves. 5 Units.**

Broad survey of religious discrimination and persecution in the Euro-American tradition, and the rise of tolerationist ideas and practices, from Augustine's rationale for punishing dissenters to the current European debates over the regulation of Islam. Topics include the Inquisition; struggles over toleration in Reformation Europe; the impact of Locke, Bayle, and Spinoza; Spanish practice in the Americas; and the American constitutional experiment in free exercise.

Same as: POLISCI 224C

**HISTORY 103D. Human Society and Environmental Change. 4 Units.**

Interdisciplinary approaches to understanding human-environment interactions with a focus on economics, policy, culture, history, and the role of the state. Prerequisite: ECON 1.  
Same as: EARTHSYS 112, ESS 112

**HISTORY 103E. The International History of Nuclear Weapons. 5 Units.**

An introduction to the history of nuclear weapons from World War II to the present. The focus is on politics, but the role of technology transfer & whether legal or illicit & in the development of nuclear weapons will be examined; so too will the theories about the military and political utility of nuclear weapons. We will look at the efforts to control and abolish nuclear weapons and at the international institutions created to reduce the danger of nuclear war.  
Same as: POLISCI 116

**HISTORY 103F. The Changing Face of War: Introduction to Military History. 5 Units.**

Introduces students to the rich history of military affairs and, at the same time, examines the ways in which we think of change and continuity in military history. How did war evolve from ancient times, both in styles of warfare and perceptions of war? What is the nature of the relationship between war and society? Is there such a thing as a Western way of war? What role does technology play in transforming military affairs? What is a military revolution and can it be manufactured or induced? Chronologically following the evolution of warfare from Ancient Greece to present day so-called new wars, we will continuously investigate how the interdependencies between technological advances, social change, philosophical debates and economic pressures both shaped and were influenced by war.

**HISTORY 104. Introduction to Geospatial Humanities. 3-5 Units.**

This course introduces undergraduate students to the theory and methods of the geospatial humanities, understood broadly as the application of GIS techniques and other quantitative methods in the humanistic study of social and cultural patterns in past and present settings.

Same as: HISTORY 4

**HISTORY 104D. International Security in a Changing World. 5 Units.**

This class surveys the most pressing global security problems facing the world today and includes an award-winning two-day international crisis simulation. Past guest lecturers have included former Secretary of Defense William Perry, former U.S. Ambassador to Afghanistan Gen. Karl Eikenberry, and former Secretary of State Condoleezza Rice. Major topics covered: changing types of warfare, ethics and conduct of war, nuclear proliferation, insurgency and terrorism, Russia, and ISIS. No prior background in international relations is necessary.

Same as: IPS 241, POLISCI 114S

**HISTORY 105C. Human Trafficking: Historical, Legal, and Medical Perspectives. 5 Units.**

(Same as HISTORY 5C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution and labor exploitation, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning. Students interested in service learning should consult with the instructor and will enroll in an additional course.

Same as: FEMGEN 105C, INTNLREL 105C

**HISTORY 106A. Global Human Geography: Asia and Africa. 5 Units.**

Global patterns of demography, economic and social development, geopolitics, and cultural differentiation, covering E. Asia, S. Asia, S.E. Asia, Central Asia, N. Africa, and sub-Saharan Africa. Use of maps to depict geographical patterns and processes.

**HISTORY 106B. Global Human Geography: Europe and Americas. 5 Units.**

Patterns of demography, economic and social development, geopolitics, and cultural differentiation. Use of maps to depict geographical patterns and processes.

**HISTORY 107E. Islamic Routes: Archaeology and Heritage of Muslim Societies. 3-5 Units.**

How has archaeology changed our knowledge of the spread of Islam and past Muslim societies? How does archaeology shape heritage debates, conflicts and ideas about Islam today? Topics include the city and urban change, secular and religious life, gender, economy, and globalization. These topics are explored using archaeological and critical heritage approaches. Focus is on examples drawn from Syria-Palestine, Egypt, Iraq, Arabian Peninsula, India, and Africa. Sources include archaeological data and material culture, historical texts in translation, and photography.  
Same as: ANTHRO 13A, ARCHLGY 13, HISTORY 7E

**HISTORY 109E. Global Women Leaders: Past, Present, and Future. 3-4 Units.**

What conditions prompted the emergence of women political leaders around the world and what difference has their leadership made? This course introduces students to global women's history and focuses on a series of individual women leaders in the 20th century. We look at movements for women's self-determination in the 19th and 20th centuries that set the stage for women's emergence as national political leaders and activists in the 20th century. We then focus on a series of global women leaders including Eleanor Roosevelt, Golda Meir, Margaret Thatcher, Benazir Bhutto, Michelle Bachelet and Aung San Suu Kyi. By studying their biographies and historical contributions, we will explore the ways women leaders make distinctive contributions as heads of state and political activists.

**HISTORY 110B. Survey of Early Modern Europe. 5 Units.**

(Same as HISTORY 10B. History majors and others taking 5 units, register for 110B.) From 1350 to 1789, Europe went from being a provincial backwater to a new global center of power. This course surveys the profound changes of the period that shape our world today: the spread of humanism and science, religious reformation, new styles of warfare, the rise of capitalism and a new global economy, the emergence of the state, and revolution which sought to overthrow established governments.

**HISTORY 110C. The Problem of Modern Europe. 5 Units.**

(SAME as HISTORY 10C. History majors and others taking 5 units, register for 110C.) From the late 18th century to the present. How Europeans responded to rapid social changes caused by political upheaval, industrialization, and modernization. How the experience and legacy of imperialism and colonialism both influenced European society and put in motion a process of globalization that continues to shape international politics today.

**HISTORY 112. Medicine and Disease in the Ancient World. 5 Units.**

(Same as HISTORY 12. History majors and others taking 5 units, register for HISTORY 112.) This course explores medicine and disease through case studies from civilizations of the ancient world such as Egypt, Greece, and Peru. We will discuss how these cultures conceptualized disease, and in turn, how they contended with illnesses. Lectures will address different forms of illness through medical texts, art, and human remains. Weekly discussion will incorporate evidence from these sources to explore both their potential and their limitations.

**HISTORY 113. Before Globalization: Understanding Premodern World History. 3-5 Units.**

(Formerly CLASSHIS 147.) This course covers the history of the world from 60,000 years ago until 1500 by asking big questions: Why did civilizations develop the way they did? What factors were responsible for similarities and differences between different parts of the world? What does this mean for our newly globalized world?.

**HISTORY 114. Origins of History in Greece and Rome. 4-5 Units.**  
(Formerly CLASHIS 117.) The beginnings and development of historical writing in the ancient world. Emphasis on major classical historians and various models of history they invented, from local to imperial, military, cultural, biographical, world history and church history. Focus on themes of power, war, loss, growth and decline, as put by the ancients into historical narrative forms and probed by way of historical questioning and explanation. Attention to how these models resonate still today. Readings in translation: Herodotus, Thucydides, Tacitus, Livy and others. Participation in a weekly discussion section is required.  
Same as: CLASSICS 88

**HISTORY 115D. The Civilization and Culture of the Middle Ages. 3-5 Units.**  
This course provides an introduction to Medieval Europe from the fall of Rome to the Renaissance. While the framework of the course is chronological, we'll concentrate particularly on the structure of medieval society. Rural and urban life, kingship and papal government, wars and plagues provide the context for our examination of the lives of medieval people, what they believed, and how they interacted with other, both within Christendom and beyond it.  
Same as: HISTORY 15D, RELIGST 115X

**HISTORY 116N. Howard Zinn and the Quest for Historical Truth. 3 Units.**  
With more than two million copies in print, Howard Zinn's *A People's History* is a cultural icon. We will use Zinn's book to probe how we determine what was true in the past. *A People's History* will be our point of departure, but our journey will visit a variety of historical trouble spots: debates about whether the US was founded as a Christian nation, Holocaust denial, and the "Birther" controversy of President Obama.  
Same as: EDUC 116N

**HISTORY 120A. The Russian Empire, 1450-1800. 5 Units.**  
(Same as HISTORY 20A. History majors and others taking 5 units, register for 120A.) Explores rise of Russian state and expanse of empire; patterns of governance of a Eurasian empire; strategies and institutions of governance; survey of various ethnic and religious groups in empire and their varied cultures and political economies; gender and family; serfdom; Russian Orthodox religion and culture; reforms and Europeanization of 18th century.

**HISTORY 120B. The Russian Empire. 5 Units.**  
From Peter the Great to the Bolsheviks. Russia as an empire; its varied regions, including the Caucasus, Central Asia, Ukraine, Poland, and the Baltics. Focus is on the politics and cultures of empire. Sources include novels, political tracts, paintings, music, and other primary sources.

**HISTORY 120C. 20th-Century Russian and Soviet History. 5 Units.**  
The Soviet polity from the 1917 Revolution to its collapse in 1991. Essentials of Marxist ideology; the Russian Empire in 1917. Causation in history; interpretations of the Revolution; state building in a socialist polity; social engineering through collectivization of agriculture, forced industrialization, and cultural revolution; terror as concept and practice; nationality policies in a multiethnic socialist empire; the routinization, decline, and collapse of the revolutionary ethos; and the legacy of the Soviet experiment in the new Russia.

**HISTORY 126B. Protestant Reformation. 4 Units.**  
The emergence of Protestant Christianity in 16th-century Europe. Analysis of writings by evangelical reformers (Luther, Calvin, Zwingli, Sattler, Hubmeier, Müntzer) and study of reform movements (Lutheran, Reformed, Anabaptist, Spiritualist) in their medieval context and as expressions of new and influential visions of Christian belief, life, social order.  
Same as: RELIGST 126

**HISTORY 130A. In Sickness and In Health: Medicine and Society in the United States: 1800-Present. 5 Units.**  
Explores the history of medical institutions, ideas and practices in the United States from the early nineteenth century to the present. How are ideas of illness and health historically rooted and socially constructed? How did scientific and medical discoveries lead to the rise of scientific medicine, and how were these innovations adopted within the American cultural landscape? Topics include the transformation of therapeutics and technologies, medicine and the scientific ideal in the U.S., gender and race and medicine, the history of public health, and the professionalization and specialization of American medical practice.

**HISTORY 131. Leonardo's World: Science, Technology, and Art in the Renaissance. 3-5 Units.**  
What did Leonardo actually know? How did he acquire that knowledge? Explores Leonardo's interests and accomplishments in such fields as painting, architecture, engineering, physics, mathematics, geology, anatomy, and physiology, and more generally the nature of Renaissance science, art, and technology. Considers the relationship between the society of fifteenth century Italy and the work of the man from Vinci: why did this world produce a Leonardo? How might we use him to understand creativity, innovation, and invention in the Renaissance and beyond? What was his legacy and how did he become a myth? Designed both for students interested in the history of science, medicine, and technology and for students interested in the history and art of Renaissance Italy.  
Same as: HISTORY 31

**HISTORY 132. Ordinary Lives: A Social History of the Everyday in Early Modern Europe. 5 Units.**  
What war meant for foot soldiers and the peasants across whose fields they marched. Ordinary people's lives in the eras of Machiavelli, Shakespeare, the Reformation, and the scientific revolution. Topics include: birth, marriage, and death; city life and peasant culture; lay encounters with religious and intellectual ideas; war and crime; and gender and sexuality.

**HISTORY 134A. The European Witch Hunts. 5 Units.**  
(Same as HISTORY 34A. History majors and others taking 5 units, register for 134A.) After the Reformation, in the midst of state-building and scientific discovery, Europeans conducted a series of deadly witch hunts, violating their own laws and procedures in the process. What was it about early modernity that fueled witch hunting? Examines witch trials and early modern demonology as well as historians' interpretations of events to seek answers to this question.

**HISTORY 137. The Holocaust. 4 Units.**  
The emergence of modern racism and radical anti-Semitism. The Nazi rise to power and the Jews. Anti-Semitic legislation in the 30s. WW II and the beginning of mass killings in the East. Deportations and ghettos. The mass extermination of European Jewry.  
Same as: HISTORY 337, JEWISHST 183, JEWISHST 383

**HISTORY 137A. Europe, 1945-2002. 5 Units.**  
Europe's transformation from the end of WW II to an expanded EU. Political, cultural, economic, and social history. Topics: postwar reconstruction, Cold War, consumer versus socialist culture, collapse of Communism, postcommunist integration.

**HISTORY 138A. Germany and the World Wars. 5 Units.**  
(Same as HISTORY 38A. Majors and others taking 5 units, enroll in 138A.) Germany's tumultuous history from the Second Empire through the end of the Cold War. International conflict, social upheaval, and state transformation during Bismarck's wars of unification, World War One, the Weimar Republic, the rise of Nazism, World War Two, the Holocaust, the division of communist East and capitalist West Germany, and the fall of the Iron Curtain.  
Same as: JEWISHST 138A

**HISTORY 139. Modern Britain and the British Empire. 5 Units.**

(Same as HISTORY 39. History majors and others taking 5 units, register in 139.) From American Independence to the latest war in Iraq. Topics include: the rise of the modern British state and economy; imperial expansion and contraction; the formation of class, gender, and national identities; mass culture and politics; the world wars; and contemporary racial politics. Focus is on questions of decline, the fortunes and contradictions of British liberalism in an era of imperialism, and the weight of the past in contemporary Britain.

**HISTORY 140. World History of Science. 5 Units.**

(Same as HISTORY 40. History majors and others taking 5 units, register for 140.) The earliest developments in science, the prehistoric roots of technology, the scientific revolution, and global voyaging. Theories of human origins and the oldest known tools and symbols. Achievements of the Mayans, Aztecs, and native N. Americans. Science and medicine in ancient Greece, Egypt, China, Africa, and India. Science in medieval and Renaissance Europe and the Islamic world including changing cosmologies and natural histories. Theories of scientific growth and decay; how science engages other factors such as material culture and religions.

**HISTORY 140A. The Scientific Revolution. 5 Units.**

What do people know and how do they know it? What counts as scientific knowledge? In the 16th and 17th centuries, understanding the nature of knowledge engaged the attention of individuals and institutions including Copernicus, Galileo, Descartes, Newton, the early Royal Society, and less well-known contemporaries. New meanings of observing, collecting, experimenting, and philosophizing, and political, religious, and cultural ramifications in early modern Europe.

**HISTORY 144. Women and Gender in Science, Medicine and Engineering. 5 Units.**

(Same as HISTORY 44. Majors and others taking 5 units, enroll in HISTORY 144.) Men's and women's roles in science, medicine, and engineering over the past 200 years with a focus on the present. What efforts are underway globally to transform research institutions so that both men's and women's careers can flourish? How have science and medicine studied and defined males and females? How can we harness the creative power of gender analysis to enhance knowledge and spark innovation?

Same as: FEMGEN 144

**HISTORY 145A. Africa Until European Conquest. 5 Units.**

Episodes in African history from the earliest records up until European partition of the continent, focusing on how knowledge about the natural, social, and spiritual worlds was linked to the exercise of power. The effects of technological innovations on states and other forms of social complexity; use of religious beliefs and practices to legitimate or critique authority. The effects of slave trades and imperial conquest on these forms of authority.

**HISTORY 145B. Africa in the 20th Century. 5 Units.**

(Same as HISTORY 45B. History majors and others taking 5 units, register for 145B.) The challenges facing Africans from when the continent fell under colonial rule until independence. Case studies of colonialism and its impact on African men and women drawn from West, Central, and Southern Africa. Novels, plays, polemics, and autobiographies written by Africans.

Same as: AFRICAAM 145B

**HISTORY 146. History of Humanitarian Aid in sub-Saharan Africa. 4-5 Units.**

Explores humanitarian endeavors through the era of the slave trade, colonialism, the Cold War and the present. Our focus is both local and global examining international humanitarian policy and the effects and perceptions of humanitarian aid within different African localities. Assignments use primary and secondary sources including organizational reports, ethnographies, memoirs and film. Topics: anti-slave trade and abolition movements, `civilizing` missions, development, refugees, peacekeeping, famine and women's rights.

**HISTORY 147. History of South Africa. 5 Units.**

(Same as HISTORY 47. History majors and others taking 5 units, register for 147.) Introduction, focusing particularly on the modern era. Topics include: precolonial African societies; European colonization; the impact of the mineral revolution; the evolution of African and Afrikaner nationalism; the rise and fall of the apartheid state; the politics of post-apartheid transformation; and the AIDS crisis.

Same as: AFRICAAM 147

**HISTORY 148. The Egyptians. 3-5 Units.**

Overview of ancient Egyptian pasts, from predynastic times to Greco-Roman rule, roughly 3000 BCE to 30 BCE. Attention to archaeological sites and artifacts; workings of society; and cultural productions, both artistic and literary. Participation in class is required.

Same as: AFRICAAM 30, CLASSICS 82, HISTORY 48

**HISTORY 149C. The Slave Trade. 5 Units.**

(Same as HISTORY 49C. History majors and others taking 5 units, enroll in 149C.) Slave trades and forms of slavery in W. Africa from 1000 to 1885; impacts on lives, social organization, and political structures. Slavery in Islam, the slave market in the Mediterranean and Middle East, and the Saharan slave trade. Slavery within Africa, growth of the Atlantic trade, the Middle Passage, and war and trade that produced slaves. Impact of the Industrial Revolution and European abolition movements on the use of slaves and warfare in Africa. The relationship between slaving and the European conquest of Africa.

**HISTORY 150A. Colonial and Revolutionary America. 5 Units.**

(Same as HISTORY 50A. History majors and others taking 5 units, register for HISTORY 150A.) Survey of the origins of American society and polity in the 17th and 18th centuries. Topics: the migration of Europeans and Africans and the impact on native populations; the emergence of racial slavery and of regional, provincial, Protestant cultures; and the political origins and constitutional consequences of the American Revolution.

Same as: AMSTUD 150A

**HISTORY 150B. 19th-Century America. 5 Units.**

(Same as HISTORY 50B. History majors and others taking 5 units, register for 150B.) Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture.

Same as: AFRICAAM 150B, AMSTUD 150B

**HISTORY 150C. The United States in the Twentieth Century. 5 Units.**

(Same as HISTORY 50C. History majors and others taking 5 units, register for 150C.) Major political, economic, social, and diplomatic developments in the U.S. Themes: the economic and social role of government (Progressive, New Deal, Great Society, and Reagan-Bush eras); ethnic and racial minorities in society (mass immigration at the turn of the century and since 1965, the civil rights era of the 50s and 60s); the changing status of women since WW II; shifting ideological bases, institutional structures, and electoral characteristics of the political system (New Deal and post-Vietnam); determinants of foreign policy in WW I and II, and the Cold War.

Same as: AMSTUD 150C

**HISTORY 151. The American West. 5 Units.**

The American West is characterized by frontier mythology, vast distances, marked aridity, and unique political and economic characteristics. This course integrates several disciplinary perspectives into a comprehensive examination of Western North America: its history, physical geography, climate, literature, art, film, institutions, politics, demography, economy, and continuing policy challenges. Students examine themes fundamental to understanding the region: time, space, water, peoples, and boom and bust cycles.

Same as: AMSTUD 124A, ARTHIST 152, ENGLISH 124, POLISCI 124A

**HISTORY 152. History of American Law. 5 Units.**

(Same as LAW 318.) Modern history of American law, legal thought, legal institutions and the legal profession. Topics include law and regulation of corporate organizations and labor relations in the age of enterprise, law of race relations in the South and North, development of classical legalism, critiques of classical legalism, modern administrative state, organized legal profession, New Deal legal thought and legislation, legal order of the 50s, expansion of enterprise liability, civil rights movements from 1940, rights revolution of the Warren Court and Great Society. Same as: HISTORY 352B

**HISTORY 152E. From Gold Rush to Google Bus: History of San Francisco. 5 Units.**

This class will examine the history of San Francisco from Native American and colonial settlement through the present. Focus is on social, environmental, and political history, with the theme of power in the city. Topics include Indians and Spanish settlers, the Gold Rush, immigration and nativism, earthquake and fire, progressive reform and unionism, gender, race and civil rights, sexuality and politics, redevelopment and gentrification.

Same as: AMSTUD 150X, URBANST 150

**HISTORY 153. CREATION OF THE CONSTITUTION. 5 Units.**

(Same as LAW 230.) The course begins with readings setting forth the intellectual and experiential background of the framing, including common law and natural rights theory, republicanism, economic & political scientific ideas, and colonial and post-Independence experience. We then study large parts of the debates at the Constitutional Convention, primarily using Madison's Notes. Next come the ratification debates, including readings from antifederalist writers, about half of *The Federalist*, and overviews of the Virginia and New York ratification conventions. We conclude with the addition of the Bill of Rights. Classes consist of a combination of lecture and extensive participation by students. Elements used in grading: Exam.

**HISTORY 154. American Intellectual and Cultural History to the Civil War. 5 Units.**

(Same as HISTORY 54. History majors and others taking 5 units, register for 154.) How Americans considered problems such as slavery, imperialism, and sectionalism. Topics include: the political legacies of revolution; biological ideas of race; the Second Great Awakening; science before Darwin; reform movements and utopianism; the rise of abolitionism and proslavery thought; phrenology and theories of human sexuality; and varieties of feminism. Sources include texts and images. Same as: AMSTUD 154

**HISTORY 154D. Religion and War in America. 4 Units.**

Scholars have devoted much attention to wars in American history, but have not agreed as to whether religion was a major cause or simply a cover for political, economic, and other motives. We will compare interpretations that leave religion out, with those that take it into account. We will also look at the impact of war on the religious lives of ordinary Americans. We will examine both secondary as well as primary sources, beginning with King Philip's War in the 17th century, and ending with the "War on Terror" in the present day.

Same as: RELIGST 105

**HISTORY 155. American Constitutional History from the Civil War to the War on Poverty. 5 Units.**

(Same as LAW 738.) American Constitutional History from the Civil War to the Cold War. This course will address U.S. constitutional history from the post-Civil War Reconstruction period through the mid-20th century. Because of the breadth of the subject matter, the view will necessarily be partial. In particular we will take as our focus the way the Constitution has provided a point of political mobilization for social movements challenging economic and social inequality. Topics covered include: Civil War Reconstruction and restoration; the rise of corporate capitalism and efforts to constrain it; Progressive Era regulation; the New Deal challenge to federalism and the anti-New Deal backlash; government spending; the World Wars and emergency powers; Civil Liberties including speech and privacy; and the beginning of the Civil Rights Era. Readings will include both legal and historical materials with a focus on the relationship between law and society. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper. Paper extensions will be granted with instructor permission. No automatic grading penalty for late papers.

**HISTORY 156. American Economic History. 5 Units.**

The American economy from colonial times to the present, illustrating the role of history in economic life. Topics: U.S. economic development in global and comparative context; slavery as an economic system; emergence of American technology and business organization; economics of the Great Depression and the New Deal; post-World War II economic performance and social change; globalization, information technology, and inequality. Prerequisite: 1 or 1A or 1V.

Same as: AMSTUD 116, ECON 116

**HISTORY 156G. Women and Medicine in US History: Women as Patients, Healers and Doctors. 5 Units.**

Women's bodies in sickness and health, and encounters with lay and professional healers from the 18th century to the present. Historical construction of thought about women's bodies and physical limitations; sexuality; birth control and abortion; childbirth; adulthood; and menopause and aging. Women as healers, including midwives, lay physicians, the medical profession, and nursing.

Same as: AMSTUD 156H, FEMGEN 156H

**HISTORY 157. The Constitution: A Brief History. 5 Units.**

A broad survey of the Constitution, from its Revolutionary origins to the contemporary disputes over interpretation. Topics include the invention of the written constitution and interpretative canons; the origins of judicial review; the Civil War and Reconstruction as constitutional crises; the era of substantive due process; the rights revolution; and the Constitution in wartime.

Same as: AMSTUD 157, POLISCI 128S

**HISTORY 158. The United States Since 1945. 4-5 Units.**

Focus is on foreign policy and politics with less attention to social and intellectual history. Topics include nuclear weapons in WW II, the Cold War, the Korean and Vietnam wars, Eisenhower revisionism, the Bay of Pigs and Cuban missile crisis, civil rights and the black freedom struggle, the women's movement, the Great Society and backlash, welfare policy, conservatism and liberalism, the 60s anti-war movement, Watergate and the growth of executive power, Iran-Contra and Reagan revisionism, Silicon Valley, the Gulf War, the Clinton impeachment controversy, 2004 election, and 9/11 and Iraq war.

**HISTORY 158B. History of Education in the United States. 3-5 Units.**

How education came to its current forms and functions, from the colonial experience to the present. Focus is on the 19th-century invention of the common school system, 20th-century emergence of progressive education reform, and the developments since WW II. The role of gender and race, the development of the high school and university, and school organization, curriculum, and teaching.

Same as: AMSTUD 201, EDUC 201

**HISTORY 158C. History of Higher Education in the U.S.. 3-5 Units.**

Major periods of evolution, particularly since the mid-19th century. Premise: insights into contemporary higher education can be obtained through its antecedents, particularly regarding issues of governance, mission, access, curriculum, and the changing organization of colleges and universities.

Same as: AMSTUD 165, EDUC 165, EDUC 265

**HISTORY 161. Women in Modern America. 4-5 Units.**

This course explores the transition from Victorian to modern womanhood in the U.S. from the 1890s to the end of the 20th century, including the experiences of Native, European, African, Mexican, and Asian American women. It asks how, when, and why the majority of American women become wage earners, gained full citizenship, and enacted political opportunities; how race- and class-specific ideals of womanhood changed in popular culture; and how women have redefined their reproductive and sexual relations.

Same as: AMSTUD 161, CSRE 162, FEMGEN 161

**HISTORY 163. A History of North American Wests. 5 Units.**

The history, peoples, and natural systems of a region that has never been contained within a single empire or nation state, but has been united by the movement of peoples, species, and things. Topics include smallpox, horses, gold, salmon, rivers, coal, and oil.

**HISTORY 164C. From Freedom to Freedom Now: African American History, 1865-1965. 5 Units.**

(Same as HISTORY 64C. History majors and others taking 5 units, register for 164C.) Explores the working lives, social worlds, political ideologies and cultural expressions of African Americans from emancipation to the early civil rights era. Topics include: the transition from slavery to freedom, family life, work, culture, leisure patterns, resistance, migration and social activism. Draws largely on primary sources including autobiographies, memoirs, letters, personal journals, newspaper articles, pamphlets, speeches, literature, film and music.

Same as: AMSTUD 164C

**HISTORY 165. Mexican American History through Film. 5 Units.**

Focus is on the 20th century. Themes such as immigration, urbanization, ethnic identity, the role of women, and the struggle for civil rights.

Same as: CHILATST 165, CSRE 165C

**HISTORY 165D. The Pacific World. 5 Units.**

(Same as HISTORY 65D. History majors and others taking 5 units, register for 165D.) Taking the Pacific and the regions of the world that touch the ocean as the unit of analysis, we will explore geographic, social, cultural, and political interactions that created what we now call the Pacific World. Ranging over four hundred years of history, we will examine human migrations, explorations, interactions and conflicts, and human ecology. The course is not nation-focused but is transnational and international in approach.

**HISTORY 166. Introduction to African American History - the Modern Freedom Struggle. 3-5 Units.**

Using the unique documentary resources and publications of Stanford's Martin Luther King Jr. Research and Education Institute, this course will utilize multi-media materials to shed light on the relationship between grassroots activism and King's visionary leadership.

Same as: AFRICAAM 166, AMSTUD 166, HISTORY 66

**HISTORY 166B. Immigration Debates in America, Past and Present. 3-5 Units.**

Examines the ways in which the immigration of people from around the world and migration within the United States shaped American nation-building and ideas about national identity in the twentieth century. Focuses on how conflicting ideas about race, gender, ethnicity, and citizenship with respect to particular groups led to policies both of exclusion and integration. Part One begins with the ways in which the American views of race and citizenship in the colonial period through the post-Reconstruction Era led to the passage of the Chinese Exclusion Act in 1882 and subsequently to broader exclusions of immigrants from other parts of Asia, Southern and Eastern Europe, and Mexico. Explores how World War II and the Cold War challenged racial ideologies and led to policies of increasing liberalization culminating in the passage of the 1965 Immigration Act, which eliminated quotas based on national origins and opened the door for new waves of immigrants, especially from Asia and Latin America. Part Two considers new immigration patterns after 1965, including those of refugees, and investigates the contemporary debate over immigration and immigration policy in the post 9/11 era as well as inequalities within the system and the impact of foreign policy on exclusions and inclusions.

Same as: CSRE 166B, HISTORY 366B

**HISTORY 167A. Martin Luther King, Jr. and the Global Freedom Struggle. 3-5 Units.**

Using the unique documentary resources and publications of Stanford's King Research and Education Institute, this course will be taught by Professor Carson and his colleagues at the Institute. It will provide a general introduction to the life and legacy of Martin Luther King, Jr., as well as devote attention to the movements he inspired. In addition to lectures, the course will include presentations of documentaries such as *Eyes on the Prize*. Students will be expected to read the required texts, participate in class discussions, and take a final exam or submit a research paper (or an audio-visual project developed in consultation with the professor).

**HISTORY 168. American History in Film Since World War II. 3-4 Units.**

U.S. society, culture, and politics since WW II through feature films. Topics include: McCarthyism and the Cold War; ethnicity and racial identity; changing sex and gender relationships; the civil rights and anti-war movements; and mass media. Films include *The Best Years of Our Lives*, *Salt of the Earth*, *On the Waterfront*, *Raisin in the Sun*, *Kramer v Kramer*, *Falling Down*, and *Never Forever*, among others.

**HISTORY 170. Colonial Latin America, 1400-1830. 5 Units.**

(Same as HISTORY 70A. History majors and others taking 5 units, register for HISTORY 170.) This survey course covers the history of Latin America from 1400 to 1830. Topics covered include Iberian overseas expansion, the conquest of Mexico and Peru, critiques of conquest, indigenous resistance and collaboration; interactions between Europe and the Americas, including the Columbian Exchange, religious syncretism, trans-Atlantic economies, and the role of race and gender in new colonial societies; we will conclude with the Bourbon reforms and the Latin American Wars of Independence. Readings include primary and secondary sources.

**HISTORY 170B. Culture, Society and Politics in Latin America. 5 Units.**

(Same as HISTORY 70. History majors and others taking 5 units, enroll in HISTORY 170B.) The course of Latin American history from the colonial era to the present day. Key issues such as colonialism, nationalism, democracy, and revolution will be examined critically in light of broad comparative themes in Latin American and world history. Sources include writings in the social sciences as well as primary documents, fiction, and film.

**HISTORY 172A. Mexico: From Colony to Nation, or the History of an impossible Republic?. 5 Units.**

Was a republican form of government even possible in 19th-century Mexico after 300 years of colonial rule under the Spanish monarchy? Was the Spanish colonial heritage a positive or a negative legacy according to 19th-century Mexican politicians? How were they to forge a new national identity with so many ethnically and culturally diverse peoples throughout the territory? Just how "traditional" was, in fact, the colonial period? These are some of the questions we will explore in this course. Journeying from the late colonial period (c.1700) to the 35-year dictatorship known as El Porfiriato (1876-1911) we will examine how Mexico's diverse indigenous peoples adapted to both colonial and postcolonial rule, how they actively participated in politics and political discourse to preserve their cultures, customs and colonial privileges, and how after independence in 1821, a new republican political culture was forged. Mexico was not an impossible republic, but rather another kind of republic.

**HISTORY 173. Mexican Migration to the United States. 3-5 Units.**

This class examines the history of Mexican migration to the United States. In the United States we constantly hear about Obama's immigration plan, the anti-immigrant laws in Arizona, and the courage of DREAM Activists; in Mexico news sources speak about the role of remittances, the effect of deportations, and the loss of life at the border. Unfortunately, few people truly understand the historical trends in these migratory processes, or the multifaceted role played by the United States in encouraging individuals to head there. Moreover, few people have actually heard the opinions and voices of migrants themselves. This course seeks to provide students with the opportunity to place migrants' experiences in dialogue with migratory laws as well as the knowledge to embed current understandings of Latin American migration in their meaningful historical context.

Same as: HISTORY 73

**HISTORY 174. Mexico Since 1876: History of a "Failed State"?. 5 Units.**

(Same as History 374.) This course is an introduction to the history and diverse peoples of modern Mexico from 1876 to the present. Through lectures, discussions, primary and secondary readings, short documentaries, and written assignments, students will critically explore and analyze the multiplicity of historical processes, events and trends that shaped and were shaped by Mexicans over the course of a century. The course will cover some of the social and political dimensions of rural social change, urbanization and industrialization, technological innovation and misuse, environmental degradation and conservation, education, ideology, culture and media, migration, and the drug trade.

**HISTORY 177D. U.S. Intervention and Regime Change in 20th Century Latin America. 5 Units.**

Policy discussions of regime change by US politicians, journalists and pundits usually focus on Iraq, Iran, Syria and North Korea, often with little or no historical context or perspective. This course does the opposite and takes seriously the proverbial saying "if history is any guide..." by examining U.S. interventions in Latin America, a region where so-called preventive regime change (covert as well as overt) has been operative policy for well over a century. Investigates the rationales, motivations and strategies behind U.S.-backed or engineered regime changes in Mexico in the 1910s, Guatemala in the 1950s, Chile in the 1970s, and Nicaragua in the 1980s.

**HISTORY 181B. Formation of the Contemporary Middle East. 5 Units.**

The history of the Middle East since WW I, focusing on the eastern Arab world, Egypt, the Fertile Crescent, and the Arabian Peninsula, with attention to Turkey, Iran, and Israel.

**HISTORY 182C. Making of the Islamic World, 600-1500. 5 Units.**

(Same as HISTORY 82C. Majors and other taking 5 units, register for 182C.) The History of Islam and Muslim peoples from 600-1500. Topics include Muhammad and his community; the early Arab conquests and empires; sectarian movements; formation of Islamic belief, thought, legal culture and religious institutions; transregional Sufi and learned networks; family and sexuality; urban, rural and nomadic life; non-Muslim communities; the development of Mediterranean and Indian Ocean trade; relations with Byzantium, the Latin West, China; the Crusades and the Mongols.

**HISTORY 184. Zionism and the State of Israel. 5 Units.**

(Same as History 84.) Hotly contested still, this course will open up the movement's ideas, practices, achievements and crises in such a way as to allow students to hear the fullest range of voices - Jewish, Arab, religious, secular, etc. It will track the movement from its appearance in the late nineteenth century until the establishment of State of Israel in 1948, and beyond.

Same as: CSRE 184C, JEWISHST 184, REES 184

**HISTORY 185B. Jews in the Contemporary World: Faith and Ethnicity, Vulnerability and Visibility. 5 Units.**

This course explores the full expanse of Jewish life today and in the recent past. The inner workings of religious faith, the content of Jewish identity shorn of belief, the interplay between Jewish powerlessness and influence, the myth and reality of Jewish genius, the continued pertinence of antisemitism, the rhythms of Jewish economic life - all these will be examined in weekly lectures, classroom discussion, and with the use of a widely diverse range of readings, films, and other material. Explored in depth will the ideas and practices of Zionism, the content of contemporary secularism and religious Orthodoxy, the impact Holocaust, the continued crisis facing Israel and the Palestinians. Who is to be considered Jewish, in any event, especially since so many of the best known (Spinoza, Freud, Marx) have had little if anything to do with Jewish life with their relationships to it indifferent, even hostile?.

Same as: CSRE 185B, HISTORY 385C, JEWISHST 185B, REES 185B

**HISTORY 187. The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan. 5 Units.**

(Same as HISTORY 87. History majors and others taking 5 units, register for 187.) Explores the contested politics of these societies in modern times. Topics include controversies surrounding the meaning of revolution, state building, war, geopolitics, Islamic law, clerical authority, gender, an Islamic economy, culture and ethnic, national and religious identities from the 1940s to the present. Assignments will focus on primary sources (especially legal documents, poetry, novels, and memoirs) and films.

**HISTORY 187D. Zionism and Its Critics. 4-5 Units.**

Zionism from its genesis in the 1880s up until the establishment of the state of Israel in May, 1948, exploring the historical, ideological and political dimensions of Zionism. Topics include: the emergence of Zionist ideology in connection to and as a response to challenges of modernity; emancipation; Haskalah (Jewish enlightenment); other national and ideological movements of the period; the ideological crystallization of the movement; and the immigration waves to Palestine.

**HISTORY 190. Early Chinese Thought. 3-5 Units.**

This lecture course examines the emergence of critical thought in early China. After a brief study of the social and political changes that made this emergence possible, it looks at the nature and roles of the thinkers, and finally their ideas about the social order, the state, war and the army, the family, the cosmos, and the self (both physical and mental). Some brief comparisons with early Greek thought.

Same as: HISTORY 90

**HISTORY 191D. China: The Northern and Southern Dynasties. 5 Units.**

(Same as HISTORY 91D. History majors and others taking 5 units, register for 191D.) Examines one of the most dynamic periods of Chinese history with the emergence of the institutional religions (Buddhism and Daoism), the development of the garden as an art form, the rise of landscape as a theme of verse and art, the invention of lyric poetry, and the real beginnings of the southward spread of Chinese civilization.

**HISTORY 193. Late Imperial China. 5 Units.**

(Same as HISTORY 93. History majors and others taking 5 units, register for 193.) A survey of Chinese history from the 11th century to the collapse of the imperial state in 1911. Topics include absolutism, gentry society, popular culture, gender and sexuality, steppe nomads, the Jesuits in China, peasant rebellion, ethnic conflict, opium, and the impact of Western imperialism.

Same as: FEMGEN 193

**HISTORY 194B. Japan in the Age of the Samurai. 5 Units.**

(Same as HISTORY 94B. History majors and others taking 5 units, register for 194B.) From the Warring States Period to the Meiji Restoration. Topics include the three great unifiers, Tokugawa hegemony, the samurai class, Neoconfucian ideologies, suppression of Christianity, structures of social and economic control, frontiers, the other and otherness, castle-town culture, peasant rebellion, black marketing, print culture, the floating world, National Studies, food culture, samurai activism, black ships, unequal treaties, anti-foreign terrorism, restorationism, millenarianism, modernization as westernization, Japan as imagined community.

**HISTORY 195. Modern Korean History. 5 Units.**

(Same as HISTORY 95. History majors and others taking 5 units, register for 195.) This lecture course provides a general introduction to the history of modern Korea. Themes include the characteristics of the Chosôn dynasty, reforms and rebellions in the nineteenth century, Korean nationalism; Japan's colonial rule and Korean identities; decolonization and the Korean War; and the different state-building processes in North and South, South Korea's democratization in 1980s, and the current North Korean crisis.

Same as: HISTORY 395

**HISTORY 195C. Modern Japanese History: From Samurai to Pokemon. 5 Units.**

(Same as HISTORY 95C. History majors and others taking 5 units, register for 195C.) Japan's modern transformation from the late 19th century to the present. Topics include: the Meiji revolution; industrialization and social dislocation; the rise of democracy and empire; total war and US occupation; economic miracle and malaise; Japan as soft power; and politics of memory. Readings and films focus on the lived experience of ordinary men and women across social classes and regions.

**HISTORY 195X. Islam in India: Conflict and Accommodation. 4 Units.**

This course will investigate the history of Islam in South Asia, particularly interactions between Muslims and Hindus, through the lenses of conflict and accommodation. This topic has become increasingly important in modern times as India and neighboring nations experience sectarian violence and simultaneously strive to engender the peaceful coexistence of multiple religious communities. In many ways the debate over South Asia's present and future is being played out in regards to interpretations of its past. In this course, students will gain a solid overview of the chronological development of Islam in India and its negotiations with other religious traditions on the subcontinent. We will think critically about the relevance of South Asia's past to its present and the crucial role of forms of Indian Islam in the broader context of Islamic cultures across the globe.

Same as: RELIGST 111

**HISTORY 196. Gandhi in His Times and Ours. 5 Units.**

(Same as HISTORY 96. History majors and others taking 5 units, register for 196.) Place the paradox of Gandhi in context of global convulsions of 20th century. Gandhi lived across continents; maturing in South Africa, struggling in India, attaining celebrity in Europe. As leader of masses, his method of Satyagraha was distinctively at odds with his times. Yet, he also privileged sacrifice, dying, even euthanasia. In a world beset by fear and war, Gandhi's complex theory of nonviolence is compelling. What kind of nonviolent politics did Gandhi envision after Fascism, Auschwitz, Hiroshima, and Pakistan?.

**HISTORY 197. Southeast Asia: From Antiquity to the Modern Era. 5 Units.**

The history of S.E. Asia, comprising Indonesia, the Philippines, Malaysia, Singapore, Thailand, Vietnam, Burma, Cambodia, and Laos, from antiquity to the present. The spread of Indian cultural influences, the rise of indigenous states, and the emergence of globally linked trade networks. European colonization, economic transformation, the rise of nationalism, the development of the modern state, and the impact of globalization.

**HISTORY 198. History of Modern China. 5 Units.**

(Same as HISTORY 98. History majors and others taking 5 units, register for 198.) This course charts major historical transformations in modern China, and will be of interest to those concerned with Chinese politics, culture, society, ethnicity, economy, gender, international relations, and the future of the world.

**HISTORY 198G. Beijing, Shanghai, and the Structure of China. 3-5 Units.**

China's modern history through the rivalry of its two most important cities. The course begins in the nineteenth century, contrasting Beijing, the classic imperial capital and a foreign foundation paradoxically celebrated as the embodiment of "traditional" China, with Shanghai, a treaty port and demographic/economic center of China, but identified as a "foreign" city. After following the cities' history through the warlord period, the "Shanghai decade" of Nationalist rule, and the Japanese occupation, the course examines the two cities' developments under Mao and Deng. The course concludes with a look at their current relations and roles, and the transformed nature of China's cities.

**HISTORY 201. Introduction to Public History and Public Service. 4-5 Units.**

Gateway course for the History and Public Service interdisciplinary track. Topics include the production, presentation, and practice of public history through narratives, exhibits, web sites, and events in museums, historical sites, parks, and public service settings in nonprofit organizations, government agencies, and educational institutions. Service Learning Course (certified by Haas Center).

Same as: AFRICAAM 102, CSRE 201, HISTORY 301

**HISTORY 201A. The Global Drug Wars. 4-5 Units.**

Explores the global story of the struggle over drugs from the nineteenth century to the present. Topics include the history of the opium wars in China, controversies over wine and tobacco in Iran, narco-trafficking and civil war in Lebanon, the Afghan 'narco-state,' Andean cocaine as a global commodity, the politics of U.S.- Mexico drug trafficking, incarceration, drugs, and race in the U.S., and the globalization of the American 'war on drugs.'

Same as: HISTORY 301A

**HISTORY 201C. The U.S., U.N. Peacekeeping, and Humanitarian War. 5 Units.**

The involvement of U.S. and the UN in major wars and international interventions since the 1991 Gulf War. The UN Charter's provisions on the use of force, the origins and evolution of peacekeeping, the reasons for the breakthrough to peacemaking and peace enforcement in the 90s, and the ongoing debates over the legality and wisdom of humanitarian intervention. Case studies include Croatia and Bosnia, Somalia, Rwanda, Kosovo, East Timor, and Afghanistan. \* Course satisfies the WiM requirement for International Relations majors.

Same as: INTNLREL 140C

**HISTORY 201E. Life under Nazism. 4-5 Units.**

This course explores everyday life in the Third Reich. Moving inside political events, students will examine daily experiences in the Nazi state— from Hitler's tumultuous rise to power through the end of World War Two. We will see how people navigated new ideologies, practices, anti-Semitism, war, and mass murder. Through analysis of memoirs, diaries, essays, novels, propaganda, scholarship, and film, students will investigate how social and political developments can reveal the very boundaries between self and society.

Same as: HISTORY 301E

**HISTORY 201J. Objects of History: From "Material Culture" to "Making". 4-5 Units.**

This class considers objects as historical sources. It surveys diverse approaches to the study and display of physical evidence, from "material culture" to "making." These explorations of object-oriented research will inform the course's hands-on components, working with objects and replicating historical experiences. With its focus on the question of what historical knowledge can be gained through interactivity, the course is suited to students whose interests include museums and public history, reenactment and performance, the maker movement, or interdisciplinary methodology.

Same as: HISTORY 301J

**HISTORY 202. International History and International Relations Theory. 4-5 Units.**

The aims of the course are: to gain some understanding of the history and development of the international states system; to explore the different ways in which historians and theorists have studied the system; to analyze aspects of the system that may now be changing; to identify the ways in which international history and international relations theory can learn from each other. The course will focus on major wars and the efforts to rebuild order after such wars.

Same as: HISTORY 306E, POLISCI 216E, POLISCI 316

**HISTORY 202B. Coffee, Sugar, and Chocolate: Commodities and Consumption in World History, 1200-1800. 4-5 Units.**

Many of the basic commodities that we consider staples of everyday life became part of an increasingly interconnected world of trade, goods, and consumption between 1200 and 1800. This seminar offers an introduction to the material culture of the late medieval and early modern world, with an emphasis on the role of European trade and empires in these developments. We will examine recent work on the circulation, use, and consumption of things, starting with the age of the medieval merchant, and followed by the era of the Columbian exchange in the Americas that was also the world of the Renaissance collector, the Ottoman patron, and the Ming connoisseur. This seminar will explore the material horizons of an increasingly interconnected world, with the rise of the Dutch East India Company and other trading societies, and the emergence of the Atlantic economy. It concludes by exploring classic debates about the "birth" of consumer society in the eighteenth century. How did the meaning of things and people's relationships to them change over these centuries? What can we learn about the past by studying things?.

Same as: HISTORY 302B

**HISTORY 202G. Peoples, Armies and Governments of the Second World War. 5 Units.**

Clausewitz conceptualized war as always consisting of a trinity of passion, chance, and reason, mirrored, respectively, in the people, army and government. Following Clausewitz, this course examines the peoples, armies, and governments that shaped World War II. Analyzes the ideological, political, diplomatic and economic motivations and constraints of the belligerents and their resulting strategies, military planning and fighting. Explores the new realities of everyday life on the home fronts and the experiences of non-combatants during the war, the final destruction of National Socialist Germany and Imperial Japan, and the emerging conflict between the victors. How the peoples, armies and governments involved perceived their possibilities and choices as a means to understand the origins, events, dynamics and implications of the greatest war in history.

Same as: HISTORY 302G

**HISTORY 203. Premodern Economic Cultures. 4-5 Units.**

Modern economists have made a science of studying the aggregate effects of individual choices. This science is based on the realities of personal freedom and individual choice. Prior to the modern era, however, different realities comprised very different economic cultures: moral economies in which greed was evil and generosity benefitted the patron's soul; familial collectives operating within historical conditioned diasporas; economies of obligation that threatened to collapse under their own weight as economic structures shifted. In this course we will be reading cross-culturally to develop an understanding of the shared and distinct elements of premodern economic cultures.

Same as: HISTORY 303

**HISTORY 203C. History of Ignorance. 5 Units.**

Scholars pay a lot of attention to knowledge—how it arises and impacts society—but much less attention has been given to ignorance, even though its impacts are equally profound. Here we explore the political history of ignorance, through case studies including: corporate denials of harms from particular products (tobacco, asbestos), climate change denialism, and creationist rejections of Darwinian evolution. Students will be expected to produce a research paper tracing the origins and impact of a particular form of ignorance.

**HISTORY 203D. The Holocaust in Recent Memory: Conflicts - Commemorations - Challenges. 5 Units.**

This course offers an in-depth approach to the study of the Holocaust as a historical point of reference for European memory, or for the memory cultures of European nations, where the international context in particular the USA and Israel will also be taken into consideration. The starting point is the transformations in Holocaust memory: after 1945, in the era of European postwar myths, the Holocaust was on the periphery of historical thinking, of scholarly and public interest. Today the Holocaust is acknowledged as a 'break in civilization', a watershed event in human history. This approach has only evolved since the 1980s.

Same as: HISTORY 303D, JEWISHST 283D, JEWISHST 383D

**HISTORY 203E. Global Catholicism. 5 Units.**

The rise of Catholicism as a global phenomenon, and its multiple transformations as it spread to the Americas, Asia, and Africa. Topics include the Reformation, Tridentine reform and the Jesuits, the underground churches in England and the Dutch Republic, the missions to Asia, the Spanish conquest of Latin America, conversion and indigenous religions, missionary imperialism and new religious movements in the non-European world.

Same as: INTNLREL 103E

**HISTORY 203G. Mobile Food: A Global Food History. 4-5 Units.**

The scope of global food history comprises all historical periods. Although, many different fields of history and related areas of expertise join in multi- and cross-disciplinary researches, global food history remains to be above all economic and social history. As this course concentrates on the global distribution of food and eating habits, the central attention lies on the interdependence of regions: starting from their sporadic interrelations, followed by evolving entanglements, and the sometimes subsequent building of, such as trading, institutions.  
Same as: HISTORY 303G

**HISTORY 203J. Water in World History. 4-5 Units.**

Examines the human relationship to water in various geographical, ecological, technological, cultural and sociopolitical settings, primarily during, but not limited to, the 19th and 20th centuries. Develops a broad historical understanding of the dwindling supply, deteriorating quality and inequitable distribution of freshwater today.  
Same as: HISTORY 303J

**HISTORY 203K. Trauma and History: Intergenerational suffering and collective healing. 1 Unit.**

This course will examine trauma as a historical process, following the intergenerational impacts of history's darker dramas, analyzing collective strategies for coping and healing after trauma, and asking whether we can speak of "traumatized societies." Readings for graduate students will include Ben Shephard's *A War of Nerves*, Didier Fassin and Richard Rechtman's *The Empire of Trauma*, and selections from Yael Danieli, ed., *Intergenerational Handbook of Multigenerational Legacies of Trauma*. Colloquium will be discussion-oriented, but will also include guest discussants from around the world. The course will culminate in a conference to be held at Stanford, June 4-6: "Soul Wounds: Trauma and Healing Across Generations." Undergraduate requirements for 1 credit: Attend weekly "Mind, Body, and Culture" workshop and first hour of Wednesday morning discussion, attend some part of conference on June 4-6. Graduate requirements for 4-5 credits: Attend workshop, read weekly, discussion on Wednesday mornings, write a paper and if desired present at conference.

**HISTORY 204. What is History?. 5 Units.**

An introduction to the discipline of history, designed for current or prospective History majors. Focusing on methods and theories of historical inquiry, students will learn how historians frame problems, collect and analyze evidence, and contribute to on-going debates. Through a series of case studies or exemplary works of historical study, the course will also explore different genres of historical writing (such as narrative, biography, social history) and different methodological approaches to history (such as Annales school, microhistory, and cultural history).

**HISTORY 204D. Advanced Topics in Agnotology. 4-5 Units.**

Advanced research into the history of ignorance. Our goal will be to explore how ignorance is created, maintained and destroyed, using case studies from topics such as tobacco denialism, global climate denialism, and other forms of resistance to knowledge making. Course culminates in a research paper on the theory and practice of agnotology, the science of ignorance.  
Same as: HISTORY 304D, STS 200J

**HISTORY 204E. Totalitarianism. 4-5 Units.**

Modern revolutionary and totalitarian politics. Sources include monographs on the medieval, Reformation, French Revolutionary, and Great War eras. Topics: the essence of modern ideology, the concept of the body national, state terror, charismatic leadership, gender assignments, private and public spheres, and identities.  
Same as: HISTORY 307E

**HISTORY 204G. War and Society. 4-5 Units.**

How Western societies and cultures have responded to modern warfare. The relationship between its destructive capacity and effects on those who produce, are subject to, and must come to terms with its aftermath. Literary representations of WW I; destructive psychological effects of modern warfare including those who take pleasure in killing; changes in relations between the genders; consequences of genocidal ideology and racial prejudice; the theory of just war and its practical implementation; and how wars are commemorated.  
Same as: HISTORY 304G, REES 304G

**HISTORY 205A. The History of Information. 4-5 Units.**

Examines the history of information from multiple perspectives such as the changing conceptions of facticity and evidence cross-culturally as well as a range of information technologies, from moveable type printing and telegraphy to text messaging and Twitter. Other topics include the ways in which information is shaped by the languages in which it is recorded, stored, and transmitted, and also the ways in which information infrastructures influence what is forgotten and lost.  
Same as: HISTORY 305A

**HISTORY 205E. Comparative Historical Development of Latin America and East Asia. 4-5 Units.**

Analysis, in historical perspective, of similarities and differences between development of Latin America and East Asia from early modern times to the present. Focusing primarily on Argentina, Brazil, and Mexico, on one hand, and China, Japan, and (South) Korea, on the other, topics include impact of colonial and postcolonial relationships on development of states, markets, and classes, as well as geopolitical, social, cultural, technological and environmental factors that shaped and were shaped by them.  
Same as: HISTORY 305E

**HISTORY 205G. Creative Political Thinking: From Machiavelli to Madison. 4-5 Units.**

How can we account for creativity and innovation in political thinking? Are these qualities simply a product of political expediency and rhetorical urgency, or do they also depend on qualities of mind and historical contingencies that have to be studied individually? This class will explore these questions with three noteworthy cases: Niccolò Machiavelli, John Locke, and James Madison. Extensive reading in both primary writings and secondary sources.  
Same as: HISTORY 305G, POLISCI 235J, POLISCI 335J

**HISTORY 206A. City, Society, Literature- 19th Century Histories. 4 Units.**

This course examines the rise of modern cities through an analysis of urban society and the imaginative literature of the 1800s.  
Same as: HISTORY 306A, URBANST 106

**HISTORY 207. Biography and History. 4-5 Units.**

The relationship between biographical and historical writing, primarily in Europe and America. Problems of methodology, evidence, dispassion, and empathy. Texts: biographies, critical literature on biographical work, and novels (A. S. Byatt's *Possession*, Bernard Malamud's *Dubin's Lives*) that illuminate the intellectual underpinnings of biographical labor.  
Same as: HISTORY 308

**HISTORY 207B. Environment, Technology and Revolution in World History. 4-5 Units.**

Exploration of historiographical and interdisciplinary methodologies and approaches to intersections among environmental, technological, and revolutionary social change in diverse geographical and temporal contexts. Readings include broad theoretical and synthetic works as well as case studies of American, French, Mexican, Russian, Chinese, and Hungarian revolutions.

**HISTORY 207C. The Global Early Modern. 4-5 Units.**

In what sense can we speak of "globalization" before modernity? What are the characteristics and origins of the economic system we know as "capitalism"? When and why did European economies begin to diverge from those of other Eurasian societies? With these big questions in mind, the primary focus will be on the history of Europe and European empires, but substantial readings deal with other parts of the world, particularly China and the Indian Ocean.

Same as: HISTORY 307C

**HISTORY 207G. The Age of Discovery: Maritime Science and Empire, 1400-1850. 4-5 Units.**

This course focuses on maritime science and empire from 1400 to 1850. We will consider how early modern empires, mariners and scientific figures, used technology, gathered information, described new locations and interacted with indigenous cultures. We will explore these themes through three perspectives: The initial overseas empires of Spain and Portugal in the sixteenth and seventeenth centuries; Chinese and Ottoman efforts at maritime expansion and finally, British exploration and expansion into the South Pacific and China.

Same as: HISTORY 307G

**HISTORY 208. Private Lives, Public Stories: Autobiography in Women's History. 5 Units.**

Changing contexts of women's lives and how women's actions have shaped and responded to those contexts.

**HISTORY 208B. Women Activists' Response to War. 4-5 Units.**

Theoretical issues, historical origins, changing forms of women's activism in response to war throughout the 20th century, and contemporary cases, such as the Russian Committee of Soldiers Mothers, Bosnian Mothers of Srebrenica, Serbian Women in Black, and the American Cindy Sheehan. Focus is on the U.S. and Eastern Europe, with attention to Israel, England, and Argentina.

Same as: FEMGEN 208B, HISTORY 308B

**HISTORY 208D. Pre-Modern Warfare. 4-5 Units.**

This course examines the evolving nature of warfare and its impact on society across the Eurasian continent up to the Gunpowder Revolution and rise of the nation-state. Beginning with an attempt to define war, it will trace the evolution of military technology from the Stone Age through the rise of the chariot, the sword, and the mounted rider, and examine how changing methods of conducting warfare were inextricably linked to changes in the social order and political structures.

Same as: HISTORY 308D

**HISTORY 208S. Facing the Past: The Politics of Retrospective Justice. 5 Units.**

Forms of injustice in history including slavery, genocide, ethnic cleansing, mass rape, forced religious conversion, and torture of prisoners. Mechanisms developed over the last century to define, deter, and alleviate the effects of such offenses, including war crimes tribunals, truth commissions, national apologies, and monetary reparations. Case studies chart the international field of retrospective justice, exploring the legal, political, and moral implications of confronting traumatic pasts.

**HISTORY 209B. The Idea of Politics. 4-5 Units.**

Can we live without politics? Is politics indispensable for humanity and vice-versa? The idea of politics is that it must transform, through human action, conditions of collective life. But the 20th century produced colliding beliefs about what that life might be and what the human being itself might look like. Explore whether, after the century, we might still think of politics as an ethical idea and the "human" as foundational political category. Keywords: Civility, Cruelty, Friendship, Empire, Democracy, Humanism, Animals.

Same as: HISTORY 309B

**HISTORY 209C. Liberalism and Violence. 4-5 Units.**

Does Liberalism have a theory of violence? What does modern political thought, in privileging humanity and rights, share with "terrorists" and "rogue states?" How is liberalism transformed by the use of religion and death for political ends? We read key thinkers of modern life- Adorno, Arendt, Agamben, Benjamin, Derrida, Fanon, Foucault, Gandhi, Heidegger, and Schmitt- to interrogate the relationship between religion, sacrifice, and democracy. At the center are connections between war and modern life, and between violence and non-violence.

Same as: HISTORY 309C

**HISTORY 209D. Postcolonialism and Universalism. 4-5 Units.**

Key texts and motifs from postcolonial theory: empire, class, exile, suffering, textuality, archive in juxtaposition to 20th-century philosophical questions about universal history and the relevance of humanist inquiry.

Same as: HISTORY 309A

**HISTORY 209S. Research Seminar for Majors. 5 Units.**

Required of History majors. How to conduct original, historical research and analysis, including methods such as using the libraries and archives at Stanford and elsewhere, and working collaboratively to frame topics, identify sources, and develop analyses.

**HISTORY 212. Knights, Monks, and Nobles: Masculinity in the Middle Ages. 4-5 Units.**

This course considers masculinity as historically and culturally contingent, focusing on the experiences and representations of medieval men as heroes, eunuchs, fathers, priests, husbands, boys, and fighting men. Recognizing that the lives of men, like those of women, were governed by gendered rules and expectations, we will explore a wide range of medieval masculinities, paying close attention to the processes by which manhood could be achieved (e.g. martial, spiritual, sexual), and to competing versions of manliness, from the warrior hero of the early middle ages to the suffering Christ of late medieval religion.

Same as: FEMGEN 212X, FEMGEN 312, HISTORY 312, RELIGST 212X, RELIGST 312X

**HISTORY 214D. Mediterranean Crossroads: Power, Culture, and Religion in Medieval Sicily. 5 Units.**

Sicily in the Middle Ages was a Mediterranean crossroads, a dynamic and diverse kingdom in which Muslim and Christian, Viking and African, European and Eastern Cultures all came together. Explores the life and times of Frederick II (1194-1250). He claimed universal authority as a Christian emperor, yet ruled multireligious Sicily as king. He promoted crusading, yet was accused of being a heretic and a crypto Muslim. He spoke six languages and actively patronized the arts and sciences. Topics include: structures and influences that made such a figure possible; how he managed the tensions of governing a diverse and disparate empire; how religion and cultural production created and maintained his authority; how contemporaries and later generations reacted to this enigmatic emperor; why has he continued to generate such polarizing reactions; and how did Frederick become a figure revered by Nazis and multiculturalists alike.

Same as: HISTORY 314D

**HISTORY 215. Saints and Sinners: Women and Religion in the Medieval World. 5 Units.**

Although the Apostle Paul taught that "There is neither Jew nor Greek, slave nor free, male nor female, for you are all one in Christ Jesus" (Gal. 3:28), men and women experienced medieval Christianity in ways that were often vastly different. In this course we examine the religious experiences of women from the origins of Christianity through to the end of the medieval period, with particular attention paid to female prophets and religious authority, saints and martyrs, sexuality and virginity, literacy and education within the cloister, mysticism, relations between religious women and men, and the relevance of gender in the religious life – especially as gender intersected with fears of heresy, sin, and embodiment.

Same as: FEMGEN 215, RELIGST 215X

**HISTORY 216. Women and the Book: Scribes, Artists, and Readers from Late Antiquity through the Fourteenth Century. 4-5 Units.**

This course examines the cultural worlds of medieval women through particular attention to the books that they owned, commissioned, and created. Beginning with the earliest Christian centuries, the course proceeds chronologically, charting women's book ownership, scribal and artistic activity, and patronage from Late Antiquity through the fourteenth century. In addition to examining specific manuscripts (in facsimile, or digitally), we will consider ancillary questions to do with women's authorship, education and literacy, reading patterns, devotional practices, and visual traditions and representation.

Same as: ARTHIST 206H, FEMGEN 216, HISTORY 316

**HISTORY 217S. Minorities In Medieval Europe. 5 Units.**

This course examines attitudes towards outsider groups within medieval society and the treatment of these groups by medieval Christians. Heretics, Jews, Muslims, homosexuals, prostitutes and usurers occupied ambivalent and at times dangerous positions within a society that increasingly defined itself as Christian. Differences in the treatment of these various 'outcast' groups, their depiction in art, their legal segregation, and their presumed association with demonic activity are addressed through discussion, and readings from primary and secondary source material.

Same as: RELIGST 217X

**HISTORY 219C. Science, Technology, and Modernity in the Soviet Union. 5 Units.**

Science and technology were integral to the Soviet claim to offer a vision of modernity superior to that of Western capitalism. Science and technology would flourish; society would develop on a scientific basis. The results were more complex than the vision. Topics to be covered: science and Marxism-Leninism; the Lysenko affair; the R&D system; the role of the secret police; the atomic project; the space race; missile development; Andrei Sakharov; technology and innovation.

Same as: HISTORY 319C

**HISTORY 220G. Demons, Witches, Old Believers, Holy Fools, and Folk Belief: Popular Religion in Russia. 4-5 Units.**

19th and early 20th centuries. Peasants, parish priests, witches, possessed persons, cults and sects, old believers, saints, and women's religious communities. Nominally Christian, and members of the Orthodox Church, Russians embraced beliefs and customs that combined teaching from Church and folk traditions.

Same as: HISTORY 320G, REES 220G, REES 320G

**HISTORY 221A. Men, Women, and Power in Early Modern Russia, 1500-1800. 5 Units.**

Social values, gender relations, and social change in an era of rapid change; challenges to established norms by new constructions of deviance (witchcraft, religious reform, and revolt) and new standards of civility; encounters with non-Russians and the construction of national consciousness. Social values as political ethos: patrimonial autocracy and the reality of female rule in the late 17th and 18th century.

**HISTORY 221B. The 'Woman Question' in Modern Russia. 5 Units.**

Russian radicals believed that the status of women provided the measure of freedom in a society and argued for the extension of rights to women as a basic principle of social progress. The social status and cultural representations of Russian women from the mid-19th century to the present. The arguments and actions of those who fought for women's emancipation in the 19th century, theories and policies of the Bolsheviks, and the reality of women's lives under them. How the status of women today reflects on the measure of freedom in post-Communist Russia.

Same as: FEMGEN 221B

**HISTORY 222. Crime and Punishment in Early Modern Europe and Russia. 5 Units.**

Explores criminal law in early modern Europe and Russia, ca 1500-1800, in law and in practice. Engages debates about use of exemplary public executions as tactic of governance, and about gradual decline in "violence" in Europe over this time. Explores practice of accusatory and inquisitory judicial procedures, judicial torture, forms of punishment, concepts of justice.

**HISTORY 223. Art and Ideas in Imperial Russia. 4-5 Units.**

Poetry, novels, symphonic music, theater, opera, painting, design, and architecture: what they reveal about the politics and culture of tsarist Russia.

Same as: HISTORY 323

**HISTORY 224A. The Soviet Civilization. 4-5 Units.**

Socialist visions and practices of the organization of society and messianic politics; the Soviet understanding of mass violence, political and ethnic; and living space. Primary and secondary sources. Research paper or historiographical essay.

Same as: HISTORY 424A, REES 224A

**HISTORY 224C. Genocide and Humanitarian Intervention. 3 Units.**

Open to medical students, graduate students, and undergraduate students. Traces the history of genocide in the 20th century and the question of humanitarian intervention to stop it, a topic that has been especially controversial since the end of the Cold War. The pre-1990s discussion begins with the Armenian genocide during the First World War and includes the Holocaust and Cambodia under the Khmer Rouge in the 1970s. Coverage of genocide and humanitarian intervention since the 1990s includes the wars in Bosnia, Rwanda, Kosovo, the Congo and Sudan.

Same as: HISTORY 324C, JEWISHST 284C, JEWISHST 384C, PEDS 224

**HISTORY 224D. The Soviet Civilization, Part 2. 4-5 Units.**

Prerequisite: HISTORY 224A/424A.

Same as: HISTORY 424B

**HISTORY 226E. Famine in the Modern World. 3 Units.**

Open to medical students, graduate students, and undergraduate students. Examines the major famines of modern history, the controversies surrounding them, and the reasons that famine persists in our increasingly globalized world. Focus is on the relative importance of natural, economic, and political factors as causes of famine in the modern world. Case studies include the Great Irish Famine of the 1840s; the Bengal famine of 1943-44; the Soviet famines of 1921-22 and 1932-33; China's Great Famine of 1959-61; the Ethiopian famines of the 1970s and 80s, and the Somalia famines of the 1990s and of 2011.

Same as: HISTORY 326E, PEDS 226

**HISTORY 227. East European Women and War in the 20th Century. 4-5 Units.**

Thematic chronological approach through conflicts in the region: the Balkan Wars, WW I, WW II, and the recent wars in the former Yugoslavia. The way women in E. Europe have been involved in and affected by these wars compared to women in W. Europe in the two world wars. Women's involvement in war as members of the military services, the backbone of underground movements, workers in war industries, mothers of soldiers, subjects and supporters of war aims and propaganda, activists in peace movements, and objects of wartime destruction, dislocation, and sexual violation.

Same as: HISTORY 327

**HISTORY 227D. All Quiet on the Eastern Front? East Europe and Russia in the First World War. 3-5 Units.**

Until recently history has been comparatively quiet about the experience of World War I in the east. Far from being a peripheral theater of war, however, the experiences of war on the Eastern Front were central to shaping the 20th century. Not only was the first shot of the war fired in the east, it was also the site of the most dramatic political revolution. Using scholarly texts, literature and film, this course combines political, military, cultural and social approaches to introduce the causes, conduct and consequences of World War I with a focus on the experiences of soldiers and civilians on the Eastern Front. Topics include: the war of movement, occupation, extreme violence against civilians, the Armenian genocide, population exchanges, the Russian Revolution and civil war, and the disintegration of empires and rise of nation-states. Same as: HISTORY 327D, REES 227, REES 327

**HISTORY 228. Circles of Hell: Poland in World War II. 5 Units.**

Looks at the experience and representation of Poland's wartime history from the Nazi-Soviet Pact (1939) to the aftermath of Yalta (1945). Examines Nazi and Soviet ideology and practice in Poland, as well as the ways Poles responded, resisted, and survived. Considers wartime relations among Polish citizens, particularly Poles and Jews. In this regard, interrogates the traditional self-characterization of Poles as innocent victims, looking at their relationship to the Holocaust, thus engaging in a passionate debate still raging in Polish society. Same as: HISTORY 328, JEWISHST 282, JEWISHST 382

**HISTORY 230A. The Witness in Modern History: Memoir, Reportage, Image. 5 Units.**

The rise of the witness as icon and debates about its reliability as a historical source. The power of eyewitness accounts to convict accused criminals, inspire indignation about war and genocide, and attract attention to humanitarian crises. Their notorious unreliability due to exaggeration and misapprehension. Sources include reportage, photography, and documentary film. Case studies include criminal cases, war, poverty, and natural disasters.

**HISTORY 230C. Paris: Capital of the Modern World. 4-5 Units.**

This course explores how Paris, between the eighteenth and twentieth centuries, became the political, cultural, and artistic capital of the modern world. It considers how the city has both shaped and been shaped by the tumultuous events of modern history- class conflict, industrialization, imperialism, war, and occupation. It will also explore why Paris became the major world destination for intellectuals, artists and writers. Sources will include films, paintings, architecture, novels, travel journals, and memoirs.

Same as: FRENCH 140, FRENCH 340

**HISTORY 230D. Europe in the World, 1789-Present. 4-5 Units.**

The European conquest of parts of Africa, Asia, and the South Pacific by European merchants, missionaries, armies, and administrators had significant, and often cataclysmic, effects on indigenous political alliances, cultural practices, and belief systems. But were the effects of expansion entirely one-sided? What impact did the experiences of colonialism have on European politics, culture, and Europe's relations with the rest of the world? Explores how interaction between Europe and the rest of the world redefined the political, racial, sexual, and religious boundaries of both Europe and its colonies and gave rise to the more "globalized" society we live in today.

Same as: HISTORY 330D

**HISTORY 230F. Surveillance in Modern Europe. 4-5 Units.**

This course investigates the rise of modern surveillance in twentieth-century Europe through the present day. We consider different forms of surveillance—in domestic security, international spying, police practices, social monitoring, corporate data collecting, self-surveillance, and subversion. Students will explore these themes in historical works, contemporary journalism, novels, film, and visual arts. Students will also pursue individual topics of interest and, over the quarter, prepare op-eds for publication.

Same as: HISTORY 330F

**HISTORY 231C. The Great War: WWI in Literature, Film, Art, and Memory. 3-5 Units.**

This course concerns how writers, artists, and other cultural producers understood and represented the traumas of the First World War and its aftermath. Rather than tracing a political or military history of the conflict, we'll focus on how the horrors of War (both in the trenches and on the home front) fostered broader social and cultural shifts, as people questioned the very foundations of European civilization. Most specifically, we'll explore the connections between the War and the emergence of post-War modernist movements, as writers and artists created new works to help them make sense of the catastrophe and the new world it wrought. Though France provides our starting point, we'll also travel beyond the Hexagon to incorporate other views and major works. Course readings will be in English, though students may elect to read works in French if they wish.

Same as: FRENCH 258, FRENCH 358, HISTORY 332C

**HISTORY 231E. Paper, Printing, and Digital Revolutions: Transformations of the Book. 4-5 Units.**

What is a book? This seminar explores the conceptual implications of approximately two millennia of transformations in the physical and material properties of books. How have the meaning and authority we assign the written word changed as technologies of book production and dissemination have evolved, and how have they remained continuous? Topics covered include the rise of the medieval manuscript codex, the emergence of print culture in early modern Europe, and current debates over the nature of text in the digital age.

Same as: HISTORY 331E

**HISTORY 232A. Power, Art, and Knowledge in Renaissance Italy. 4-5 Units.**

Provides a fundamental understanding of the cultural and political imagination of the Italian Renaissance, with particular emphasis on Florence between 1300 and 1600 CE. Topics include political and social upheavals, radical shifts in religious practice and devotion, the commercial revolution in trade and banking, the rediscovery of classical philosophy and style, and the flowering of the literary and visual arts.

Same as: HISTORY 332A

**HISTORY 232B. Heretics, Prostitutes and Merchants: The Venetian Empire. 5 Units.**

Between 1200-1600, Venice created a powerful empire at the boundary between East and West that controlled much of the Mediterranean, with a merchant society that allowed social groups, religions, and ethnicities to coexist. Topics include the features of Venetian society, the relationship between center and periphery, order and disorder, orthodoxy and heresy, the role of politics, art, and culture in the Venetian Renaissance, and the empire's decline as a political power and reinvention as a tourist site and living museum.

Same as: ITALIAN 232B

**HISTORY 232D. Rome: The City and the World, 1300-1800. 4-5 Units.**

What lies beyond the ruins of an ancient city? How did Rome revive? The history of Rome from the late Middle Ages and Renaissance to the age of the Grand Tour. Topics include: the history of the papacy; the everyday world of Roman citizens; the relationship between the city and the surrounding countryside; the material transformation of Rome and projects to map the city; and its meaning for foreigners.

Same as: HISTORY 332D

**HISTORY 232F. The Scientific Revolution. 5 Units.**

Was there a scientific revolution in the sixteenth and seventeenth centuries? How did modern science emerge as a distinctive kind of knowledge and practices? Explores changing ideas of nature and knowledge during the age of Copernicus, Galileo, Descartes, Bacon, and Newton. Examines the contexts in which western science emerged, issues of scientific methodology (e.g. induction, deduction, probability, and the rise of experimentation), the development of scientific institutions, and the emergence of the scientist as a historical figure.

**HISTORY 233C. Two British Revolutions. 4-5 Units.**

Current scholarship on Britain, 1640-1700, focusing on political and religious history. Topics include: causes and consequences of the English civil war and revolution; rise and fall of revolutionary Puritanism; the Restoration; popular politics in the late 17th century; changing contours of religious life; the crisis leading to the Glorious Revolution; and the new order that emerged after the deposing of James II. Same as: HISTORY 333C

**HISTORY 233F. Political Thought in Early Modern Britain. 5 Units.**

1500 to 1700. Theorists include Hobbes, Locke, Harrington, the Levellers, and lesser known writers and schools. Foundational ideas and problems underlying modern British and American political thought and life.

**HISTORY 233G. Catholic Politics in Europe, 1789-1992. 5 Units.**

What led to the creation of a specifically Catholic mass politics? How did these parties and movements interact with the Vatican and the wider Church? What accounts for political Catholicism's involvement in clerical-fascist states and its important role in shaping the EU? Sources focus on monographs. Research paper using primary sources.

**HISTORY 233K. The Invention of the Modern Republic. 4-5 Units.**

Examines the history of republican thinking in the Atlantic World from the Renaissance to the French Revolution. Same as: HISTORY 333K

**HISTORY 234. The Enlightenment. 3-5 Units.**

The Enlightenment as a philosophical, literary, and political movement. Themes include the nature and limits of philosophy, the grounds for critical intellectual engagement, the institution of society and the public, and freedom, equality and human progress. Authors include Voltaire, Montesquieu, Rousseau, Hume, Diderot, and Condorcet. Same as: DLCL 324, FRENCH 244, HISTORY 334, HISTORY 432A, HUMNTIES 324

**HISTORY 234G. Narrating the British Empire. 4-5 Units.**

This course will explore the historical and cultural reality of the British Empire in a global and comparative context, through works of fiction and non-fiction, history, memoir and a range of cultural chronicles. What relationship did British colonialism have with modernity and the European Enlightenment, and with neoliberalism and globalization that followed decolonization? Texts: CLR James's *Beyond a Boundary*, Jamaica Kincaid's *A Small Place*, Nirad Chaudhuri's *The Autobiography of an Unknown Indian*, Alan Paton's *Cry, The Beloved Country*, Witi Ihimaera's *Dear Miss Mansfield*. Same as: HISTORY 334G

**HISTORY 235. The Renaissance of War: Politics, Technology, and War in Late Medieval and Renaissance Italy. 5 Units.**

The dynamic societies of the Italian Peninsula of the 14th to 16th centuries "prosperous, astonishingly creative, politically fractious, and endemically violent" produced sweeping, deeply consequential changes. Among these were new developments in the theory and practice of war, politics, and diplomacy that laid the foundations for the modern state system and European military power. The class covers: new diplomatic practice; the Military Revolution; state-building; war finance; court culture; and the intersection of these with the shimmering brilliance of Renaissance culture.

**HISTORY 235C. Readings in the Supernatural. 4-5 Units.**

Class will read and discuss a selection of monographs, scholarly essays, and primary sources on the rich supernatural world of early modern Europe. We will discuss how fairies, werewolves, nightmares, and trolls all became witches, how the binary of angels and demons figured in European thought, and how the marginalized imaginary was reconstituted in theatre and fiction. Same as: HISTORY 335C

**HISTORY 236. The Ethics of Imperialism. 5 Units.**

Can a commitment to liberty, progress, and universal rights be reconciled with imperialism? The ethical underpinnings of empire; how modern Europeans provided ethical and political justifications for colonial expansion. How European ideals were used to defend and justify inequality, violence, and genocide. The ethics of American-driven globalization and humanitarianism. Texts include primary sources, philosophical treatises, and historical studies.

**HISTORY 236B. Hobbes to Habermas: The Idea of Society in Modern Thought. 4-5 Units.**

Classic texts in social theory from the seventeenth century to the present. Readings include Locke, Smith, Hegel, Comte, and Durkheim, and Weber. Same as: HISTORY 336B

**HISTORY 236F. The End of the World As They Knew It: Culture, Cafés, and Crisis in Europe, 1880-1918. 4-5 Units.**

The years stretching from roughly 1880 to end of the First World War were marked by profound social upheaval and an intense burst of creativity. This seminar will focus on the major cultural movements and big ideas of the period. Topics covered include the rise of mass culture and cinema, the origins of psychoanalysis, anti-Semitism and Zionism, new anxieties about sexuality and the "New Woman," anarchism, decadence, degeneration, and Dada with cameos from Bernhardt, Freud, Klimt, Nietzsche, Toulouse-Lautrec, Wilde, Zola, and other luminaries of the age. Same as: HISTORY 336F

**HISTORY 237F. 20th Century British History through the Hoover Archives. 4-5 Units.**

From the rich resources of the Hoover Institution, the students in this course will select a particular archive (war posters, politician, spy, literary figure, diplomat, etc. etc.) to investigate, to write about, discuss in class, and, it is hoped, present in an exhibition at the Hoover, learning museum skills along the way as well as the history of Britain in the 20th century. Same as: HISTORY 337F

**HISTORY 237K. Speed and Power in the Twentieth Century. 4-5 Units.**

Europeans living in the 20th century witnessed an unprecedented (and, to many observers, frightening) acceleration in the pace of everyday life, wrought by the introduction of a host of new travel technologies. Focusing on the metropolises of Europe, this seminar will explore the various ways that trains, planes, and automobiles have shaped modern urban life. We'll also look at how 20th-century artists and writers have treated the interrelated themes of speed and power in their work. Same as: FRENCH 237K, HISTORY 337K

**HISTORY 238G. Ethnography of the Late Middle Ages: Social history and popular culture in the age of the plague. 4-5 Units.**

During the late Middle Ages, as Europe was recovering from the devastation of the Black Death, political reorganization contributed to a burst of archival documentation that allows historians richly detailed glimpses of societies in transition. We will be reading selected scholarly articles and monographs covering such topics as persecution, pre-Christian cultural remnants, folk theologies, festival cultures, peasant revolts, heresy, and the advent of the diabolic witch. Same as: HISTORY 338G

**HISTORY 239E. Paris: The Making of a Modern Icon. 3-5 Units.**

Few places have been as heavily romanticized and mythologized as Paris. To many observers, Paris and its attractions serve as icons of modernity itself. By engaging with fiction, film, journalism, painting, photography, poetry, song, and other media, we'll trace how different people at different times have used Paris as both backdrop and main protagonist, and we'll consider how the city itself has incorporated and rebelled against such representations. The scope of our inquiry will stretch from the late 18th century to the present, covering a host of topics, figures, and sites: from the French Revolution to the protests of May '68, from Baudelaire to Hemingway, from the Impressionists to the Situationists. Taught in English.

Same as: FRENCH 227, URBANST 142

**HISTORY 239F. Empire and Information. 4-5 Units.**

How do states see? How do they know what they know about their subjects, citizens, economies, and geographies? How does that knowledge shape society, politics, identity, freedom, and modernity? Focus is on the British imperial state activities in S. Asia and Britain: surveillance technologies and information-gathering systems, including mapping, statistics, cultural schemata, and intelligence systems, to render geographies and social bodies legible, visible, and governable.

Same as: HISTORY 339F

**HISTORY 239H. Colonialism and Empire in Modern Europe. 5 Units.**

To better understand the history of modern Europe within a global context, explores the following questions: What impact did more than a century of colonialism have on the social lives, cultural attitudes, political loyalties, and intellectual world views of European women and men during the nineteenth century? What accounts for the resiliency of empire during a period of rapid global change that witnessed the rise of modern democracy, economic liberalism, ethnic nationalism, and international socialism?

**HISTORY 239K. Revolutionary Moments in French Thought. 3-5 Units.**

French intellectual and political culture has often been associated with revolutionary attempts to break free from the hold of tradition. Indeed, the concept of "revolution" has itself become a French tradition of sorts. Over the last 500 years, these revolutions have taken place in a number of arenas. In philosophy, René Descartes challenged all traditional learning and defined new principles that were central to the so-called "Revolution of the Mind." In religion, Enlightenment thinkers not only advocated the toleration of different faiths but also questioned the veracity of Christianity and of all theistic worldviews. In politics, the French Revolution redefined the very concept of a political revolution and set the stage for modern conceptions of sovereignty. French socialist thinkers of the 19th century, in turn, reshaped the ways their contemporaries thought about socio-economic arrangements. Finally, 20th-century existentialists have attempted to rethink the very purpose of human existence. In this course, we will explore these and other seminal revolutionary moments that not only transformed French society, but that also had implications for European and, indeed, global culture. Taught in English, readings in English.

Same as: FRENCH 128

**HISTORY 240. The History of Evolution. 4-5 Units.**

This course examines the history of evolutionary biology from its emergence around the middle of the eighteenth century. We will consider the continual engagement of evolutionary theories of life with a larger, transforming context: philosophical, political, social, economic, institutional, aesthetic, artistic, literary. Our goal will be to achieve a historical rich and nuanced understanding of how evolutionary thinking about life has developed to its current form.

Same as: BIO 340, HISTORY 340

**HISTORY 241K. Technology in Modern American Culture. 4-5 Units.**

This class displays the significance of technology in American culture by examining two principal technologies and their implications for politics, business, leisure, and social interaction, as well as for other technological systems. As starting points, we consider how computing systems and atomic weapons emerged at particular moments in history, including how their developments were intimately connected. This contextual approach leads us to the related study of topics within the histories of space travel, nuclear power, amateur electronics, and the Web.

Same as: AMSTUD 241K, HISTORY 341K

**HISTORY 243C. People, Plants, and Medicine: Atlantic World Amerindian, African, and European Science. 4-5 Units.**

Explores the global exchange of knowledge, technologies, plants, peoples, disease, and medicines. Considers primarily Africans, Amerindians, and Europeans in the eighteenth-century West but also takes examples from other knowledge traditions. Readings treat science and medicine in relation to voyaging, colonialism, slavery, racism, plants, and environmental exchange. Colonial sciences and medicines were important militarily and strategically for positioning emerging nation states in global struggles for land and resources.

Same as: HISTORY 343C

**HISTORY 243G. Tobacco and Health in World History. 4-5 Units.**

Cigarettes are the world's leading cause of death—but how did we come into this world, where 6 trillion cigarettes are smoked every year? Here we explore the political, cultural, and technological origins of the cigarette and cigarette epidemic, using the tobacco industry's 80 million pages of secret documents. Topics include the history of cigarette advertising and cigarette design, the role of the tobacco industry in fomenting climate change denial, and questions raised by the testimony of experts in court.

Same as: HISTORY 343G

**HISTORY 243S. Human Origins: History, Evidence, and Controversy. 4-5 Units.**

Research seminar. Debates and controversies include: theories of human origins; interpretations of fossils, early art, and the oldest tools; the origin and fate of the Neanderthals; evolutionary themes in literature and film; visual rhetoric and cliché in anthropological dioramas and phyletic diagrams; the significance of hunting, gathering, and grandmothering; climatological theories and neocatastrophic geologies; molecular anthropology; the impact of racial theories on human origins discourse. Background in human evolution not required.

Same as: HISTORY 443A

**HISTORY 244. Egyptomania! The Allure of Ancient Egypt Over the Past 3,500 Years. 5 Units.**

Why does Egypt fascinate us? From Napoleon's invasion to Katy Perry's latest music video, we have interpreted ancient Egyptian history and mythology for centuries; in fact, this obsession dates back to the Egyptians themselves. This seminar explores Egyptomania from the Pharaonic period to the 20th century. Topics include: ancient Egypt, Greek historians, medieval Arabic scholars, hieroglyphic decipherment, 19th century travel, 20th century pop culture, and how historians have interpreted this past over the centuries.

Same as: AFRICAAM 87, CLASSICS 87

**HISTORY 244C. The History of the Body in Science, Medicine, and Culture. 4-5 Units.**

The human body as a natural and cultural object, historicized. The cross-cultural history of the body from the 18th century to the present. Topics include: sciences of sex and race; medical discovery of particular body parts; human experimentation, foot binding, veiling, and other bodily coverings; thinness and obesity; notions of the body politic.

Same as: HISTORY 444C

**HISTORY 245. Violence and Identity in the African Great Lakes Region. 4-5 Units.**

Untangles current crises through exploring debates on migration, autochthony, ethnicity and nationalism from the pre-colonial era to the present. While the majority of the course focuses on the region's 'center' (Rwanda, Burundi and the Democratic Republic of the Congo), we will also examine continuities and differences within the larger geographic region. Topics include the historical roots and perspectives that inform genocide, gender based violence, mineral exploitation, reconciliation, development and controversies around homosexuality in Uganda and the wider region.

Same as: HISTORY 345

**HISTORY 245G. Law and Colonialism in Africa. 4-5 Units.**

Law in colonial Africa provides an opportunity to examine the meanings of social, cultural, and economic change in the anthropological, legal, and historical approaches. Court cases as a new frontier for the social history of Africa. Topics: meanings of conflicts over marriage, divorce, inheritance, property, and authority.

Same as: HISTORY 348D

**HISTORY 246. The Dynamics of Change in Africa. 4-5 Units.**

Crossdisciplinary colloquium; required for the M.A. degree in African Studies. Open to advanced undergraduates and PhD students. Addresses critical issues including patterns of economic collapse and recovery; political change and democratization; and political violence, civil war, and genocide. Focus on cross-cutting issues including the impact of colonialism; the role of religion, ethnicity, and inequality; and Africa's engagement with globalization.

Same as: AFRICAST 301A, HISTORY 346, POLISCI 246P, POLISCI 346P

**HISTORY 246E. Refugees and the Making of the Modern World. 4-5 Units.**

Following the mass popular displacements of WWII, a group of diplomats came together to create the United Nations High Commissioner for Refugees (UNHCR) and the 1951 Convention Relating to the Status of Refugees--the bases of the international refugee regime that has endured to the present. We will explore the processes that led to the creation of the modern international refugee regime, and how international refugee law has evolved in response to conflicts and emergencies "on the ground." Throughout, we will question the category of the "refugee," and interrogate the methods by which refugees, as individuals and as groups, have sought to control and alter their positions under national and international authorities. Topics will include notions of migration and asylum, the creation and evolution of international refugee law, refugees, stateless people, economic migrants, and decolonization. We will have case studies of post-WWII European, Palestinian, Thai, Ethiopian, Haitian, and Cuban "refugees," among others.

Same as: HISTORY 346E

**HISTORY 247. Violence in African History: Conflict and Healing in sub-Saharan Africa. 4-5 Units.**

This course questions what constitutes "violence" in African history, and why it occurred when it did. We will examine the subtleties of "violence" in African history, which have sometimes led to conflicts, and sometimes to rich strategies of healing and improvisation. These include ecological crises, domestic violence, corruption, economic exploitation, and demographic crises (including urbanization and diseases such as HIV-AIDS). While we begin by examining ideas about conflict in pre-colonial Africa, the course focuses on the colonial and post-colonial eras in African history.

Same as: HISTORY 347

**HISTORY 248S. Colonial States and African Societies, Part I. 4-5 Units.**

Colonialism set in motion profound transformations of African societies. These transformations did not occur immediately following military conquest, nor did they occur uniformly throughout the continent. This research seminar will focus directly on the encounter between the colonial state and African societies. The seminar will examine problems of social transformation, the role of the colonial state, and the actions of Africans. Following four weeks of colloquium style discussion, students then embark on independent research on the encounter between one colonial state and its constituent African societies.

Same as: HISTORY 448A

**HISTORY 249S. Colonial States and African Societies, Part II. 4-5 Units.**

Second part of the research seminar offered in the Winter. Students continue their research and present their penultimate drafts in week 8.

Same as: HISTORY 448B

**HISTORY 250A. History of California Indians. 5 Units.**

Demographic, political, and economic history of California Indians, 1700s-1950s. Processes and events leading to the destruction of California tribes, and their effects on the groups who survived. Geographic and cultural diversity. Spanish, Mexican, and Anglo-American periods. The mission system.

Same as: CSRE 117S, NATIVEAM 117S

**HISTORY 250E. Taxing America: From the Puritans to Prop. 13. 5 Units.**

Taxes have shaped American society and politics since before the Revolution. And they've been extremely controversial just as long. In this course we'll try to understand American society and government by looking at the politics of taxation from the colonial period to the twentieth century. Topics include the legitimacy of taxation, the constitution, economic development, inequality, gender, and race.

**HISTORY 252. Originalism and the American Constitution: History and Interpretation. 5 Units.**

Except for the Bible no text has been the subject of as much modern interpretive scrutiny as the United States Constitution. This course explores both the historical dimensions of its creation as well as the meaning such knowledge should bring to bear on its subsequent interpretation. In light of the modern obsession with the document's 'original meaning,' this course will explore the intersections of history, law, and textual meaning to probe what an 'original' interpretation of the Constitution looks like.

Same as: HISTORY 352

**HISTORY 252B. Diplomacy on the Ground: Case Studies in the Challenges of Representing Your Country. 5 Units.**

The tragic death of Ambassador Chris Stevens has recently highlighted the dangers of diplomacy in the modern era. This class will look at how Americans in embassies have historically confronted questions such as authoritarian rule, human rights abuses, violent changes of government, and covert action. Case studies will include the Berlin embassy in the 1930s, Tehran in 1979, and George Kennan's experiences in Moscow, among others. Recommended for students contemplating careers in diplomatic service. \* Course satisfies the WiM requirement for International Relations majors.

Same as: INTNLREL 174

**HISTORY 252K. America as a World Power: U.S. Foreign Relations, 1914 to Present. 5 Units.**

This course will examine the modern history of American foreign relations, from 1914 to the present. Beginning with the fateful decision to intervene in the First World War, it will examine the major crises and choices that have defined the 'American Century.' Our study of U.S. foreign relations will consider such key factors as geopolitics, domestic politics, bureaucracy, psychology, race, and culture. Students will be expected to undertake their own substantial examination of a critical episode in the era studied.

Same as: INTNLREL 168

**HISTORY 253D. Approaches to American Legal History. 5 Units.**

Legal history, once primarily devoted to exploring legal doctrines and key judicial opinions and thus of interest mainly to legal scholars and lawyers, now resembles historical writing more generally; the study of legal ideas and practices is increasingly integrated with social, intellectual, cultural, and political history. Recent writings in American legal history; how the field reflects developments in historical writing; and how the use of legal materials affects understanding of American history. Same as: POLISCI 226U

**HISTORY 254. Popular Culture and American Nature. 5 Units.**

Despite John Muir, Aldo Leopold, and Rachel Carson, it is arguable that the Disney studios have more to do with molding popular attitudes toward the natural world than politicians, ecologists, and activists. Disney as the central figure in the 20th-century American creation of nature. How Disney, the products of his studio, and other primary and secondary texts see environmentalism, science, popular culture, and their interrelationships.

**HISTORY 254D. Law, Slavery, and Race. 5 Units.**

(Same as LAW 747.) This course will explore the interaction of law, slavery and race in the United States, as well as from a comparative perspective. We will read original documents, including excerpts of trial transcripts, appellate opinions, treatises, codes, and first-person narratives. We will study the way law, politics and culture interacted to shape the institution of slavery and the development of modern conceptions of race. Course lectures and discussions will focus on questions such as: Did different legal regimes (Spanish, French, British) foster different systems of race and slavery in the Americas? How did/does law work "on the ground" to shape the production of racial hierarchy and creation of racial identities? In what ways did slavery influence the U.S. Constitution? How has race shaped citizenship in the U.S., and how can we compare it to other constitutional regimes? The course will begin with the origins of New World slavery, race and racism, and move chronologically to the present day.

Same as: AFRICAAM 254D, CSRE 154D, HISTORY 354

**HISTORY 254G. The Causes and Consequences of the American Revolution. 5 Units.**

Why did Britain's North American colonies declare independence from an empire they had long revered? What did the American Revolution mean for the people who experienced it? In this course we will explore the explosive origins of the American republic. Topics: revolutionary ideology, empire, the federal constitution, slavery, social conflict, and the international consequences of the American Revolution.

**HISTORY 254K. The Rise of Reaganism. 5 Units.**

This reading and research seminar explores the public career of Ronald Reagan and the political phenomenon that came to bear his name: Reaganism. More specifically, this course seeks to navigate between popular myth and political rhetoric to historically assess both Reagan and his legacy in American politics. Readings draw from primary and secondary sources covering Reagan's early political career, his governorship and presidency, and his legacy.

**HISTORY 255. Martin Luther King, Jr.: The Social Gospel and the Struggle for Justice. 5 Units.**

The religious and political thought of Martin Luther King, Jr., using the documentary resources of the King Institute at Stanford. His social gospel Christianity and prophetic message of radical social transformation. Readings include the forthcoming *The Papers of Martin Luther King, Jr., Volume VI: Advocate of the Social Gospel*.

**HISTORY 255D. Racial Identity in the American Imagination. 4-5 Units.**

From Sally Hemings to Barack Obama, this course explores the ways that racial identity has been experienced, represented and contested throughout American history. Engaging historical, legal and literary texts and films, this course examines major historical transformations that have shaped our understanding of racial identity. This course also draws on other imaginative modes including autobiography, memoir, photography and music to consider the ways that racial identity has been represented in American society. Most broadly, this course interrogates the problem of American identity and examines the interplay between racial identity and American identity. This course moves along both chronological and thematic axes to investigate the problems of racial mixture, mixed-race identity, racial passing and racial performance across historical periods. Themes of ambiguous, hidden and hybrid identity will be critical to this course. This course will also explore the interplay of the problems of class, gender and sexuality in the construction of racial identity.

Same as: AFRICAAM 255, AMSTUD 255D, CSRE 255D, HISTORY 355D

**HISTORY 255E. Education, Race, and Inequality in African American History, 1880-1990. 3-5 Units.**

Seminar. The relationship among race, power, inequality, and education from the 1880s to the 1990s. How schools have constructed race, the politics of school desegregation, and ties between education and the late 20th-century urban crisis.

Same as: AFRICAAM 116, CSRE 216X, EDUC 216

**HISTORY 256. 350 Years of America-China Relations. 4-5 Units.**

The history of turbulent relations, military conflict, and cultural clashes between the U.S. and China, and the implications for the domestic lives of these increasingly interconnected countries. Diplomatic, political, social, cultural, and military themes from early contact to the recent past.

Same as: EASTASN 256, HISTORY 356

**HISTORY 256G. Constructing Race and Religion in America. 4-5 Units.**

This seminar focuses on the interrelationships between social constructions of race, and social interpretations of religion in America. How have assumptions about race shaped religious worldviews? How have religious beliefs shaped racial attitudes? How have ideas about religion and race contributed to notions of what it means to be "American"? We will look at primary and secondary sources, and at the historical development of ideas and practices over time.

Same as: CSRE 246, HISTORY 356G, RELIGST 246, RELIGST 346

**HISTORY 257. Was the American Revolution a Social Revolution?. 5 Units.**

What kind of a revolution was the American Revolution? The revolution gave colonial Americans political independence from Britain to found the United States. But did the revolution also transform American society in its wake? This course explores how historians and historical participants alike have answered this question paying attention to historical changes (or lack thereof) that took place in American society between c. 1750-1820 as well as grappling with what conceptually constitutes a "social" revolution in the first place.

Same as: HISTORY 357

**HISTORY 257C. LGBT/Queer Life in the United States. 4-5 Units.**

An introductory course on LGBT social, cultural, and political history in the United States. This course explores how categories of sexuality have changed over time, with particular emphasis on the relationship among homosexuality, heterosexuality, and transgenderism. Students will analyze how the intersections of race, class, and sexuality influenced the constitution of these categories and the politics of social relations. Historical and literary sources will be used to examine changes in LGBT experiences and identities, primarily in the twentieth century.

Same as: FEMGEN 140D, FEMGEN 240D

**HISTORY 258. Sexual Violence in America. 4-5 Units.**

This undergraduate/graduate colloquium explores the history of sexual violence in America, with particular attention to the intersections of gender and race in the construction of rape. We discuss the changing definitions of sexual violence in law and in cultural representations from early settlement through the late-twentieth century, including slavery, wartime and prison rape, the history of lynching and anti-lynching movements, and feminist responses to sexual violence. In addition to introducing students to the literature on sexual violence, the course attempts to teach critical skills in the analysis of secondary and primary historical texts. Students write short weekly reading responses and a final paper; no final exam; fifth unit research or CEL options. Limited enrollment, permission of instructor required. Submit application form (available on Coursework) by Dec. 1, 2015 and indicate interest in CEL option. Priority admission to History, FGSS, CSRE, AFRICAAM, and AMSTUD declared majors and minors.

Same as: AFRICAAM 192, AMSTUD 258, CSRE 192E, FEMGEN 258, FEMGEN 358, HISTORY 358

**HISTORY 258E. History of School Reform: Origins, Policies, Outcomes, and Explanations. 3-5 Units.**

Required for students in the POLS M.A. program; others welcome. Focus is on 20th-century U.S. Intended and unintended patterns in school change; the paradox of reform that schools are often reforming but never seem to change much; rhetorics of reform and factors that inhibit change. Case studies emphasize the American high school. This course is required for POLS students pursuing the PreK-12 concentration.

Same as: EDUC 220D

**HISTORY 259A. Poverty and Homelessness in America. 4-5 Units.**

Service learning. Students participate in a two quarter internship at a local shelter for homeless individuals or families. Readings include historical, social science, and social commentary literature. Service Learning Course (certified by Haas Center).

**HISTORY 260. California's Minority-Majority Cities. 4-5 Units.**

Historical development and the social, cultural, and political issues that characterize large cities and suburbs where communities of color make up majority populations. Case studies include cities in Los Angeles, Santa Clara, and Monterey counties. Comparisons to minority-majority cities elsewhere in the U.S. Service Learning Course (certified by Haas Center).

Same as: CSRE 260, URBANST 169

**HISTORY 261. Race, Gender, and Class in Jim Crow America. 5 Units.**

How African American life and labor were redefined from 1890-1954. Topics include family life, work, leisure patterns, transnational relations, cultural expressions emphasizing literature and music, resistance and social activism. Primary sources including visual materials, literature, and film; historical interpretations of the period.

**HISTORY 261G. Presidents and Foreign Policy in Modern History. 5 Units.**

Nothing better illustrates the evolution of the modern presidency than the arena of foreign policy. This class will examine the changing role and choices of successive presidential administrations over the past century, examining such factors as geopolitics, domestic politics, the bureaucracy, ideology, psychology, and culture. Students will be encouraged to think historically about the institution of the presidency, while examining specific case studies, from the First World War to the conflicts of the 21st century.

Same as: INTNLREL 173

**HISTORY 264G. The Social History of Mental Illness in the United States. 5 Units.**

(Formerly HPS 158.) Explores the variety of meanings of mental illness in the past, and the diagnostic, therapeutic, cultural and policy challenges historically posed by mental illness. Focus is on the U.S. but is not limited to it. How has mental illness been defined in history? How has the mind been medicalized and managed? Topics include the rise of institutions for the mentally ill, the growth of the psychiatric profession and the relationship between psychiatry, deviance and anti-psychiatry, and gender and psychiatric norms.

**HISTORY 265. Writing Asian American History. 5 Units.**

Recent scholarship in Asian American history, with attention to methodologies and sources. Topics: racial ideologies, gender, transnationalism, culture, and Asian American art history. Primary research paper.

Same as: AMSTUD 265, ASNAMST 265, HISTORY 365

**HISTORY 266C. The Cold War: An International History. 5 Units.**

Though it ended twenty years ago, we still live in a world shaped by the Cold War. Beginning with its origins in the mid-1940s, this course will trace the evolution of the global struggle, until its culmination at the end of the 1980s. Students will be asked to ponder the fundamental nature of the Cold War, what kept it alive for nearly fifty years, how it ended, and its long term legacy for the world.

Same as: INTNLREL 154

**HISTORY 267A. Martin Luther King, Jr. and the Global Freedom Struggle. 5 Units.**

Using the unique documentary resources and publications of Stanford's Martin Luther King Jr. Research and Education Institute, this lecture/seminar will encourage students to undertake original research projects that will illuminate specific topics related to King's life, ideas, and legacy. Projects will be chosen after consultation with Carson.

**HISTORY 267E. Martin Luther King, Jr. - His Life, Ideas, and Legacy. 4-5 Units.**

Using the unique documentary resources and publications of Stanford's King Research and Education Institute, this course will provide a general introduction to King's life, visionary ideas, and historical significance. In addition to lectures and discussions, the course will include presentations of documentaries such as *Eyes on the Prize*. Students will be expected to read the required texts, participate in class discussions, and submit a research paper or an audio-visual project developed in consultation with the professor.

Same as: AFRICAAM 267E, AMSTUD 267E

**HISTORY 269. Thinking About Capitalism. 4-5 Units.**

What is capitalism? An economic and social system that maximizes both individual freedom and social good? An exploitative arrangement dependent on the subordination of labor to capital? A natural arrangement guided by a munificent invisible hand? Or a finely tuned mechanism requiring state support? We will study the history of debates about markets and social organization, taking capitalism as both an economic system and a culture. Focus on American and British writers including Keynes, Lippmann, Hayek, Rand, Schumpeter, and Friedman.

Same as: HISTORY 369

**HISTORY 271. Mexicans in the United States. 5 Units.**

This course explores the lives and experiences of Mexicans living in the United States, from 1848 to the present. Themes and topics include: the legacies of colonialism, the Mexican-American War, transnational migration, the effects of economic stratification, race and racialization, and the impact of sexual and gender ideologies on the lives of Mexicans residing north of the border.

Same as: AMSTUD 271, CHILATST 171, CSRE 171H

**HISTORY 272E. Theories of Citizenship and Sovereignty in a Transnational Context. 4-5 Units.**

This course explores the multiple meanings of citizenship and the ways in which they change when examined using different geographic scales (from the local to the transnational). The course will pair theoretical readings on citizenship with case studies that focus on North America. Topics include: definitions of citizenship; the interrelation of ideas of citizenship with those of race, ethnicity, gender, and sexuality; the relationship between sovereignty and territoriality; human and civil rights; and immigration.

Same as: AMSTUD 272E, CHILATST 172, CSRE 172H, FEMGEN 272E, HISTORY 372E

**HISTORY 273. The European Expansion. 4-5 Units.**

The relationship between European monarchies and their colonial domains from the 16th-18th centuries. Reasons for expansion, methods, and results. Case studies include the Spanish, Portuguese, Dutch, French, and English domains in Africa, Asia, and the Americas. Readings include primary and secondary sources.

Same as: HISTORY 373A

**HISTORY 273E. The Emergence of Nations in Latin America: Independence Through 1880. 4-5 Units.**

This course provides an introduction to the main themes of nineteenth-century Latin American history, including independence from Spain, the emergence of various nation-states, and the development of a new social, political, and economic order in the region.

Same as: HISTORY 373E

**HISTORY 274E. Urban Poverty and Inequality in Latin America. 5 Units.**

We examine historical issues of social inequality, poverty, crime, industrialization, globalization, and environment in major Latin American cities.

**HISTORY 275B. History of Modern Mexico. 4-5 Units.**

Surveys the history of governance, resistance, and identity formation in Mexico from the nineteenth century to the present. Explores Mexico's historical struggles to achieve political stability, economic prosperity, and social justice and examines how regional, class, ethnic, and gender differences have figured prominently in the shaping of Mexican affairs. Topics include Mexico's wars and their legacies, the power of the state, violence and protest, debates over the meaning of "Mexicanness," youth culture, and the politics of indigenismo.

Same as: AMSTUD 275B, CHILATST 275B, CSRE 275B, HISTORY 375C

**HISTORY 276. Modern Brazil. 4-5 Units.**

From independence in 1822 to the present. Social and cultural history. Literary and historical sources.

Same as: HISTORY 376

**HISTORY 278S. The Ethical Challenges of Climate Change. 4-5 Units.**

This course explores the ethical challenges of climate change from historical, social, economic, political, cultural and scientific perspectives. These include the discovery of global warming over two centuries, the rise of secular and religious denialism and skepticism toward the scientific consensus on it, the dispute between developed and developing countries over how to forge a binding global agreement to mitigate it, and the "role morality" of various actors (scientists, politicians, fossil fuel companies, the media and ordinary individuals) in the US in assessing ethical responsibility for the problem and its solutions.

Same as: HISTORY 478

**HISTORY 279. Latin American Development: Economy and Society, 1800-2014. 4-5 Units.**

The newly independent nations of Latin America began the 19th century with economies roughly equal to the U.S. and Canada. What explains the economic gap that developed since 1800? Why are some Latin American nations rich and others poor and how have societies changed over time? Marxist, dependency, neoclassical, and institutionalist interpretive frameworks are explored. The effects of globalization on Latin American economic growth, autonomy, and potential for social justice are examined and debated.

Same as: HISTORY 379

**HISTORY 279D. Modern Brazil: Economy, Society & Culture. 4-5 Units.**

This course addresses the history of modern Brazil from independence in 1822 to the present day. The class focuses on theories of economic development, social structure and change, and cultural life in Brazil's diverse regions.

Same as: HISTORY 379D

**HISTORY 281A. Twentieth-Century Iraq: A Political and Social History. 5 Units.**

The colonial experience, creation of the modern Iraqi state, and transition to military dictatorship. Political movements, religious and tribal elements, and their relation to the state. Geopolitical context.

**HISTORY 282. The United States and the Middle East since 1945. 4-5 Units.**

Since the end of WW II, U.S. interests in the Middle East have traditionally been defined as access to oil at a reasonable price, trade and markets, containing the influence of the Soviet Union, and the security of Israel. Is this the full range of U.S. interests? How has the pursuit of these interests changed over time? What forces have shaped U.S. policy? What is the impact of U.S. policy on the region itself?

Same as: HISTORY 382

**HISTORY 282F. History of Modern Turkey. 5 Units.**

Social, political and cultural history of Modern Turkey from the last decades of the Ottoman Empire in the late 19th century until Today. Themes include transformation from a multi-national empire to a national republic; Islam, secularism and radical modernism; military, bureaucracy and democratic experience; economic development, underdevelopment and class; Istanbul, Ankara and provincial Turkey; socialism, conservatism(s), and Kurdish challenge; Turkey in Europe, the Middle East and Central Asia; gender, sexuality and family; recent political crises.

**HISTORY 283. The New Global Economy, Oil and Origins of the Arab Spring. 4-5 Units.**

This class uses the methods of political economy to study the trajectory of global capitalism from the end of World War II to the current phase of neoliberal globalization. The argument is that the role of oil, and its primary repository "the Middle East" has been central in the global capitalist order and that neoliberalism and the oil economy are closely linked to the eruption of the Arab uprisings of 2011.

Same as: HISTORY 383

**HISTORY 284F. Empires, Markets and Networks: Early Modern Islamic World and Beyond, 1500-1800. 4-5 Units.**

Focuses on political regimes, economic interactions and sociocultural formations in the early modern Balkans and Middle East to Central and South Asia. Topics include complex political systems of the Ottoman, Safavid and Mughal empires; experiences of various Muslim, Christian, Jewish and Hindu, as well as urban, rural and nomadic communities; consolidation of transregional commerce and cultural exchange; incorporation of the Islamic world in the global economy; transimperial networks of the Muslim and Non-Muslim merchants, scholars and sufis.

Same as: HISTORY 384F

**HISTORY 284K. Violence, Imperialism, and the Collapse of the Ottoman Empire. 5 Units.**

How did the greatest Islamic state of modern times come to a violent end? This course will explore this complex question by examining the disintegration of the Ottoman Empire that led to the emergence of the modern Middle East and the Balkans during the early 20th century. Topics include European political and economic interests in the empire, cosmopolitanism in the Mediterranean port cities, coexistence of Muslims, Christians, and Jews, ethno-religious conflict, nationalism, war, and refugees.

**HISTORY 286. Jews Among Muslims in Modern Times. 4-5 Units.**

The history of Jewish communities in the lands of Islam and their relations with the surrounding Muslim populations from the time of Muhammad to the 20th century. Topics: the place of Jews in Muslim societies, Jewish communal life, variation in the experience of communities in different Muslim lands, the impact of the West in the Modern period, the rise of nationalisms, and the end of Jewish life in Muslim countries.

Same as: HISTORY 386, JEWISHST 286, JEWISHST 386

**HISTORY 287C. Zionism and its Critics. 4-5 Units.**

Zionism from its genesis in the 1880s up until the establishment of the state of Israel in May, 1948, exploring the historical, ideological and political dimensions of Zionism. Topics include: the emergence of Zionist ideology in connection to and as a response to challenges of modernity; emancipation; Haskalah (Jewish enlightenment); other national and ideological movements of the period; the ideological crystallization of the movement; and the immigration waves to Palestine.

**HISTORY 288. Palestine and the Arab-Israeli Conflict. 4-5 Units.**

This course examines some salient issues of the Israeli-Palestinian conflict from the late 19th century to the present. At the end of the course you should be able to articulate the positions of the major parties to the conflict, with the understanding that there is no single, unified Zionist (or Jewish) or Palestinian (or Arab) position. One quarter does not allow sufficient time to cover even all of the important topics comprehensively (for example, the role of the Arab states, the USA and the USSR, and the internal history of Israel receive less attention than is desirable). Some prior knowledge of Middle East history is desirable, but not required. Vigorous debate and criticism are strongly encouraged. Criticism and response expressed in a civil tone is an important way to get a fuller and more truthful picture of something. This is not only a fundamental democratic right and a basic citizenship skill, but it is essential to interpreting information and making good policy. Rights not used are easily lost.

Same as: HISTORY 388, JEWISHST 288, JEWISHST 388

**HISTORY 288D. American Jewish History: Learning to be Jewish in America. 2-4 Units.**

This course will be a seminar in American Jewish History through the lens of education. It will address both the relationship between Jews and American educational systems, as well as the history of Jewish education in America. Plotting the course along these two axes will provide a productive matrix for a focused examination of the American Jewish experience. History students must take course for at least 3 units. Same as: AMSTUD 279X, EDUC 279, JEWISHST 297X, RELIGST 279X

**HISTORY 290. North Korea in Historical Perspective. 4-5 Units.**

This colloquium will approach North Korea from a longer historical perspective and also discuss the country's current crisis and its future. Themes will include the northern region in colonial Korea, Kim Il Sung and Manchurian guerrillas, the USSR and North Korean Revolution, the reconstruction after the Korean War, Juche ideology and the political system, the everyday life of North Korea people, the Cold War and North Korean diplomacy, culture and mass performance, the great famine and economy in transition, the military and nuclear development, and refugees and the succession of leadership.

Same as: HISTORY 390

**HISTORY 291A. Archaeology and Modernity in Asia: The Excavation of Ancient Civilizations in Modern Times. 4-5 Units.**

The interplay in Asia between antiquity and modernity, civilization and nation state, and national versus colonial science. The recent excavation of artifacts and places associated with Asian civilization such as the terracotta warriors in China and Angkor Wat in Cambodia. How Asian states have grappled with modernity and colonialism as they simultaneously dug up their ancient pasts.

Same as: HISTORY 391A

**HISTORY 291G. Pre-Modern Chinese Warfare. 4-5 Units.**

This course examines the evolution of warfare in China, and its impact on the evolving political and social orders, from the earliest states through the Mongol conquest. It will study how changing military technology was inextricably linked to changes in the state and society. It will also look at changing Chinese attitudes towards warfare over the same period, from the celebration of heroism, through writing about warfare as an intellectual art, to the links of militarism with steppe peoples/.

Same as: HISTORY 391G

**HISTORY 292D. Japan in Asia, Asia in Japan. 4-5 Units.**

How Japan and Asia mutually shaped each other in the late 19th and 20th centuries. Focus is on Japanese imperialism in Asia and its postwar legacies. Topics include: pan-Asianism and orientalism; colonial modernization in Korea and Taiwan; collaboration and resistance; popular imperialism in Manchuria; total war and empire; comfort women and the politics of apology; the issue of resident Koreans; and economic and cultural integration of postwar Asia.

Same as: HISTORY 392D

**HISTORY 292F. Culture and Religions in Korean History. 4-5 Units.**

This colloquium explores the major themes of Korean history before 1800 and the role of culture and religions in shaping the everyday life of Chosôn-dynasty Koreans. Themes include the aristocracy and military in the Koryô dynasty, Buddhism and Confucianism in the making of Chosôn Korea, kingship and court culture, slavery and women, family and rituals, death and punishment, and the Korean alphabet (Hangûl) and print culture.

Same as: HISTORY 392F

**HISTORY 293A. Graduate Seminar on Modern Political Thought. 4-5 Units.**

A series of texts and documents that form the heart of what Marx and Engels called "the colonial question". Discussions center on specific themes relating to each student's research topic and/or interests. The seminar will be organized around a set of core common readings and weekly discussions, supplemented by a designed list of secondary texts and primary materials. Themes include: secularism, religion, state, capital, empire, anticolonialism, gender, democracy, textual and print cultures, cinema, political and legal theory, and history of economic thought. 400-level options allows students to do a two-quarter sequence, with the Spring devoted to writing up the research paper.

Same as: HISTORY 493

**HISTORY 293B. Queer History in Comparative Perspective. 4-5 Units.**

Comparative history of homoerotic desire, relations, and identity through scholarship on different historical periods and parts of the world: the classical Mediterranean, early modern European cities, late imperial and modern China, Tokugawa and modern Japan, and the U.S.

Same as: FEMGEN 293B, FEMGEN 393B, HISTORY 393B

**HISTORY 293D. Global Intellectual History. 4-5 Units.**

Ideas have circulated globally for millennia but relatively recently have thinkers begun to conceptualize the global. Like "humanity" and "universalism," or what Marx called "international," the "global" too has complex genealogies. It is associated, often simultaneously, with empire and freedom, war and equality, commitment and treason, piracy and justice, homelessness and cosmopolitanism. Working with key 20th century texts from Italy, Britain, India, Israel, Palestine, Germany, France, and Algeria, course explores how thinking "globally" impacts the very foundations of modern political thought.

Same as: HISTORY 393D

**HISTORY 293E. Female Divinities in China. 4-5 Units.**

This course examines the fundamental role of powerful goddesses in Chinese religion. It covers the entire range of imperial history and down to the present. It will look at, among other questions, what roles goddesses played in the spirit world, how this is related to the roles of human women, and why a civilization that excluded women from the public sphere granted them a dominant place, in the religious sphere. It is based entirely on readings in English.

Same as: HISTORY 393E, RELIGST 257X, RELIGST 357X

**HISTORY 294D. Manchuria: Cradle of Conflict, Cockpit of Asia. 4-5 Units.**

How did Manchuria become Chinese? This course utilizes the dual waves of early twentieth-century writings and a wide array of recent scholarship dealing with Manchuria to explore the formation of nation-states out of the Qing and Japanese empires in Northeast Asia through the lenses of opium, migration, cities, warlords, and memoir. This course will be of interest to students concerned with developing transcultural understandings of Northeast Asian history.

Same as: HISTORY 394D

**HISTORY 295F. Race and Ethnicity in East Asia. 4-5 Units.**

Intensive exploration of major issues in the history of race and ethnicity in China, Japan, and Korea from the early modern period to the present day.

Same as: ASNAMST 295F, HISTORY 395F

**HISTORY 295J. Chinese Women's History. 5 Units.**

The lives of women in the last 1,000 years of Chinese history. Focus is on theoretical questions fundamental to women's studies. How has the category of woman been shaped by culture and history? How has gender performance interacted with bodily disciplines and constraints such as medical, reproductive, and cosmetic technologies? How relevant is the experience of Western women to women elsewhere? By what standards should liberation be defined?

Same as: CHINLIT 295J, FEMGEN 295J

**HISTORY 296. Communism and Revolution in China. 5 Units.**

From the formation of the Chinese Communist Party (CCP) in 1921 through the 1949 founding of the People's Republic of China (PRC). Topics include: early theories of socialism in China; the relationship between Chinese communism and the Communist International and Soviet Union; agrarian reformulation of communism by Mao; the communist-nationalist civil war; the Communist Revolution of 1949; and the consolidation of communist power in the PRC.

**HISTORY 296F. Short Stories from India and Pakistan. 3-5 Units.**

The course introduces the main periods and trends of 20th- and 21st-century Urdu short story: Progressive Writers' Movement, Partition literature, Modernism, contemporary fiction. Classes include close reading and discussion of selected short stories, with special focus on prominent themes such as social problems; personal loss, exile, displacement, alienation, and questions of identity; gender and sexuality; history, memory, and nostalgia; myth and imagination. Readings include: Premchand, Manto, Ismat Chughtai, Qurratulain Hyder, Intizar Husain, Naiyer Masud. All readings are in English.

Same as: ICA 296F

**HISTORY 297. The Cold War and East Asia. 5 Units.**

Explores how East Asia negotiated superpower rivalry and global ideological competition during the Cold War. Considers the ways in which China, Japan, and Korea were more than battlegrounds for US-Soviet contestation and played active roles in defining the nature and dynamics of the conflict. Re-examines conventional narratives and periodizations against alternative conceptual models and interpretive frameworks highlighting the constructed nature of the struggle as well as the role of historical and cultural factors in shaping the East Asian experience.

Same as: HISTORY 397

**HISTORY 297F. Religion and Power in the Making of Modern South Asia. 3-5 Units.**

This course examines the diverse ways that religious traditions have been involved in the brokering of power in South Asia from the late seventeenth century to the present day. We will examine the intersection of religion and power in different arenas, including historical memory, religious festivals, language politics, and violent actions. At the core of our inquiry is how religion is invoked in political contexts (and vice-versa), public displays of religiosity, and the complex dynamics of religion and the state. Among other issues, we will particularly engage with questions of religious identity, knowledge, and violence. HISTORY297F must be taken for 4-5 units.

Same as: RELIGST 255, RELIGST 355

**HISTORY 299A. Senior Research I. 1-5 Unit.**

.

**HISTORY 299B. Senior Research II. 1-5 Unit.**

.

**HISTORY 299C. Senior Research III. 1-5 Unit.**

.

**HISTORY 299D. Tooling Up for Digital Humanities. 1 Unit.**

What are the digital humanities? The twenty-first century presents new opportunities in the humanities, such as unprecedented access to millions upon millions of digitized sources along with powerful technological tools to study those sources. Yet it also raises new challenges, such as the responsible and effective use of technology, and defining the nature of digital scholarship and communication. This workshop offers an introduction to fundamental concepts, methods, and issues within the growing field of digital humanities, including managing your online identity, digitizing sources, managing databases, text mining, spatial analysis, visualization, and pedagogy.

**HISTORY 299H. Junior Honors Colloquium. 1 Unit.**

Required of junior History majors planning to write a History honors thesis during senior year. Meets four times during the quarter.

**HISTORY 299M. Undergraduate Directed Research: Martin Luther King, Jr., Research and Education Institute. 1-4 Unit.**

May be repeated for credit.

**HISTORY 299P. Undergraduate Directed Research: Pioneering Women. 1 Unit.**

May be repeated for credit.

**HISTORY 299S. Undergraduate Directed Research and Writing. 1-5 Unit.**

May be repeated for credit.

**HISTORY 299T. Tough Questions. 1 Unit.**

A H&S initiative course.

Same as: HISTORY 399T

**HISTORY 299X. Preparing for International Field Work: Public Service or Research. 1 Unit.**

Open to students in all classes, those planning internships abroad and those planning research, from juniors with honors theses and sophomores with Chappell Lougee grants to freshmen thinking ahead. Introduces resources on campus for planning international research and service. Raises issues that need to be considered in advance of going abroad: ethical concerns, Human Subjects Protocol, networking, personal safety and gender issues, confronting cultural differences. Exposes students to research methods: case studies, interviewing, working in foreign libraries and archives.

Same as: HISTORY 399A

**HISTORY 301. Introduction to Public History and Public Service. 4-5 Units.**

Gateway course for the History and Public Service interdisciplinary track. Topics include the production, presentation, and practice of public history through narratives, exhibits, web sites, and events in museums, historical sites, parks, and public service settings in nonprofit organizations, government agencies, and educational institutions. Service Learning Course (certified by Haas Center).

Same as: AFRICAAM 102, CSRE 201, HISTORY 201

**HISTORY 301A. The Global Drug Wars. 4-5 Units.**

Explores the global story of the struggle over drugs from the nineteenth century to the present. Topics include the history of the opium wars in China, controversies over wine and tobacco in Iran, narco-trafficking and civil war in Lebanon, the Afghan 'narco-state,' Andean cocaine as a global commodity, the politics of U.S.- Mexico drug trafficking, incarceration, drugs, and race in the U.S., and the globalization of the American 'war on drugs.'

Same as: HISTORY 201A

**HISTORY 301E. Life under Nazism. 4-5 Units.**

This course explores everyday life in the Third Reich. Moving inside political events, students will examine daily experiences in the Nazi state— from Hitler's tumultuous rise to power through the end of World War Two. We will see how people navigated new ideologies, practices, anti-Semitism, war, and mass murder. Through analysis of memoirs, diaries, essays, novels, propaganda, scholarship, and film, students will investigate how social and political developments can reveal the very boundaries between self and society.

Same as: HISTORY 201E

**HISTORY 301J. Objects of History: From "Material Culture" to "Making". 4-5 Units.**

This class considers objects as historical sources. It surveys diverse approaches to the study and display of physical evidence, from "material culture" to "making." These explorations of object-oriented research will inform the course's hands-on components, working with objects and replicating historical experiences. With its focus on the question of what historical knowledge can be gained through interactivity, the course is suited to students whose interests include museums and public history, reenactment and performance, the maker movement, or interdisciplinary methodology.

Same as: HISTORY 201J

**HISTORY 302B. Coffee, Sugar, and Chocolate: Commodities and Consumption in World History, 1200-1800. 4-5 Units.**

Many of the basic commodities that we consider staples of everyday life became part of an increasingly interconnected world of trade, goods, and consumption between 1200 and 1800. This seminar offers an introduction to the material culture of the late medieval and early modern world, with an emphasis on the role of European trade and empires in these developments. We will examine recent work on the circulation, use, and consumption of things, starting with the age of the medieval merchant, and followed by the era of the Columbian exchange in the Americas that was also the world of the Renaissance collector, the Ottoman patron, and the Ming connoisseur. This seminar will explore the material horizons of an increasingly interconnected world, with the rise of the Dutch East India Company and other trading societies, and the emergence of the Atlantic economy. It concludes by exploring classic debates about the "birth" of consumer society in the eighteenth century. How did the meaning of things and people's relationships to them change over these centuries? What can we learn about the past by studying things?.

Same as: HISTORY 202B

**HISTORY 302G. Peoples, Armies and Governments of the Second World War. 5 Units.**

Clausewitz conceptualized war as always consisting of a trinity of passion, chance, and reason, mirrored, respectively, in the people, army and government. Following Clausewitz, this course examines the peoples, armies, and governments that shaped World War II. Analyzes the ideological, political, diplomatic and economic motivations and constraints of the belligerents and their resulting strategies, military planning and fighting. Explores the new realities of everyday life on the home fronts and the experiences of non-combatants during the war, the final destruction of National Socialist Germany and Imperial Japan, and the emerging conflict between the victors. How the peoples, armies and governments involved perceived their possibilities and choices as a means to understand the origins, events, dynamics and implications of the greatest war in history.

Same as: HISTORY 202G

**HISTORY 303. Premodern Economic Cultures. 4-5 Units.**

Modern economists have made a science of studying the aggregate effects of individual choices. This science is based on the realities of personal freedom and individual choice. Prior to the modern era, however, different realities comprised very different economic cultures: moral economies in which greed was evil and generosity benefitted the patron's soul; familial collectives operating within historical conditioned diasporas; economies of obligation that threatened to collapse under their own weight as economic structures shifted. In this course we will be reading cross-culturally to develop an understanding of the shared and distinct elements of premodern economic cultures.

Same as: HISTORY 203

**HISTORY 303C. History of Ignorance. 4-5 Units.**

Scholars pay a lot of attention to knowledge—how it arises and impacts society—but much less attention has been given to ignorance, even though its impacts are equally profound. Here we explore the political history of ignorance, through case studies including: corporate denials of harms from particular products (tobacco, asbestos), climate change denialism, and creationist rejections of Darwinian evolution. Students will be expected to produce a research paper tracing the origins and impact of a particular form of ignorance.

**HISTORY 303D. The Holocaust in Recent Memory: Conflicts - Commemorations - Challenges. 5 Units.**

This course offers an in-depth approach to the study of the Holocaust as a historical point of reference for European memory, or for the memory cultures of European nations, where the international context in particular the USA and Israel will also be taken into consideration. The starting point is the transformations in Holocaust memory: after 1945, in the era of European postwar myths, the Holocaust was on the periphery of historical thinking, of scholarly and public interest. Today the Holocaust is acknowledged as a 'break in civilization', a watershed event in human history. This approach has only evolved since the 1980s.

Same as: HISTORY 203D, JEWISHST 283D, JEWISHST 383D

**HISTORY 303F. Words and Things in the History of Classical Scholarship. 4-5 Units.**

How have scholars used ancient texts and objects since the revival of the classical tradition? How did antiquarians study and depict objects and relate them to texts and reconstructions of the past? What changed and what stayed the same as humanist scholarship gave way to professional archaeologists, historians, and philologists? Focus is on key works in the history of classics, such as Erasmus and Winckelmann, in their scholarly, cultural, and political contexts, and recent critical trends in intellectual history and the history of disciplines.

Same as: CLASSICS 331

**HISTORY 303G. Mobile Food: A Global Food History. 4-5 Units.**

The scope of global food history comprises all historical periods. Although, many different fields of history and related areas of expertise join in multi- and cross-disciplinary researches, global food history remains to be above all economic and social history. As this course concentrates on the global distribution of food and eating habits, the central attention lies on the interdependence of regions: starting from their sporadic interrelations, followed by evolving entanglements, and the sometimes subsequent building of, such as trading, institutions.

Same as: HISTORY 203G

**HISTORY 303J. Water in World History. 4-5 Units.**

Examines the human relationship to water in various geographical, ecological, technological, cultural and sociopolitical settings, primarily during, but not limited to, the 19th and 20th centuries. Develops a broad historical understanding of the dwindling supply, deteriorating quality and inequitable distribution of freshwater today.

Same as: HISTORY 203J

**HISTORY 303K. Trauma and History: Intergenerational suffering and collective healing. 4-5 Units.**

This course will examine trauma as a historical process, following the intergenerational impacts of history's darker dramas, analyzing collective strategies for coping and healing after trauma, and asking whether we can speak of "traumatized societies." Readings for graduate students will include Ben Shephard's *A War of Nerves*, Didier Fassin and Richard Rechtman's *The Empire of Trauma*, and selections from Yael Danieli, ed., *Intergenerational Handbook of Multigenerational Legacies of Trauma*. Colloquium will be discussion-oriented, but will also include guest discussants from around the world. The course will culminate in a conference to be held at Stanford, June 4-6: "Soul Wounds: Trauma and Healing Across Generations." Undergraduate requirements for 1 credit: Attend weekly "Mind, Body, and Culture" workshop and first hour of Wednesday morning discussion, attend some part of conference on June 4-6. Graduate requirements for 4-5 credits: Attend workshop, read weekly, discussion on Wednesday mornings, write a paper and if desired present at conference.

**HISTORY 304. Approaches to History. 4-5 Units.**

Required of first-year History Ph.D. students. This course explores ideas and debates that have animated historical discourse and shaped historiographical practice over the past half-century or so. The works we will be discussing raise fundamental questions about how historians imagine the past as they try to write about it, how they constitute it as a domain of study, how they can claim to know it, and how (and why) they argue about it.

**HISTORY 304D. Advanced Topics in Agnotology. 4-5 Units.**

Advanced research into the history of ignorance. Our goal will be to explore how ignorance is created, maintained and destroyed, using case studies from topics such as tobacco denialism, global climate denialism, and other forms of resistance to knowledge making. Course culminates in a research paper on the theory and practice of agnotology, the science of ignorance.

Same as: HISTORY 204D, STS 200J

**HISTORY 304G. War and Society. 4-5 Units.**

How Western societies and cultures have responded to modern warfare. The relationship between its destructive capacity and effects on those who produce, are subject to, and must come to terms with its aftermath. Literary representations of WW I; destructive psychological effects of modern warfare including those who take pleasure in killing; changes in relations between the genders; consequences of genocidal ideology and racial prejudice; the theory of just war and its practical implementation; and how wars are commemorated.

Same as: HISTORY 204G, REES 304G

**HISTORY 305. Graduate Pedagogy Workshop. 1 Unit.**

Required of first-year History Ph.D. students. Perspectives on pedagogy for historians: course design, lecturing, leading discussion, evaluation of student learning, use of technology in teaching lectures and seminars. Addressing today's classroom: sexual harassment issues, integrating diversity, designing syllabi to include students with disabilities.

**HISTORY 305A. The History of Information. 4-5 Units.**

Examines the history of information from multiple perspectives such as the changing conceptions of facticity and evidence cross-culturally as well as a range of information technologies, from moveable type printing and telegraphy to text messaging and Twitter. Other topics include the ways in which information is shaped by the languages in which it is recorded, stored, and transmitted, and also the ways in which information infrastructures influence what is forgotten and lost.

Same as: HISTORY 205A

**HISTORY 305C. Graduate Workshop Series. 1 Unit.**

This is a 1-credit course for which only regular attendance is required, and graduate students may audit any or all of the sessions as they find useful. The majority of the course addresses questions of research, grant writing, and professionalization, while the last few sessions offer general guidance on preparing for the job market.

**HISTORY 305E. Comparative Historical Development of Latin America and East Asia. 4-5 Units.**

Analysis, in historical perspective, of similarities and differences between development of Latin America and East Asia from early modern times to the present. Focusing primarily on Argentina, Brazil, and Mexico, on one hand, and China, Japan, and (South) Korea, on the other, topics include impact of colonial and postcolonial relationships on development of states, markets, and classes, as well as geopolitical, social, cultural, technological and environmental factors that shaped and were shaped by them.

Same as: HISTORY 205E

**HISTORY 305G. Creative Political Thinking: From Machiavelli to Madison. 4-5 Units.**

How can we account for creativity and innovation in political thinking? Are these qualities simply a product of political expediency and rhetorical urgency, or do they also depend on qualities of mind and historical contingencies that have to be studied individually? This class will explore these questions with three noteworthy cases: Niccolò Machiavelli, John Locke, and James Madison. Extensive reading in both primary writings and secondary sources.

Same as: HISTORY 205G, POLISCI 235J, POLISCI 335J

**HISTORY 306A. City, Society, Literature- 19th Century Histories. 4 Units.**

This course examines the rise of modern cities through an analysis of urban society and the imaginative literature of the 1800s.

Same as: HISTORY 206A, URBANST 106

**HISTORY 306D. World History: Graduate Colloquium. 4 Units.**

How do historians engage the global scale in the classroom as well as in research? The world history canon including Toynbee, McNeill, Braudel, Wolf, and Wallerstein; contrasting approaches, recent research, and resources for teaching. Recommended: concurrent enrollment in HISTORY 306K.

**HISTORY 306E. International History and International Relations Theory. 4-5 Units.**

The aims of the course are: to gain some understanding of the history and development of the international states system; to explore the different ways in which historians and theorists have studied the system; to analyze aspects of the system that may now be changing; to identify the ways in which international history and international relations theory can learn from each other. The course will focus on major wars and the efforts to rebuild order after such wars.

Same as: HISTORY 202, POLISCI 216E, POLISCI 316

**HISTORY 306F. Identities and Identification in the Atlantic World. 4-5 Units.**

How identities and processes of identification changed in Europe, Africa, and the Americas during the early modern period and as a result of the engagement of the inhabitants of these three continents in the Atlantic world.

**HISTORY 306G. Colonial Law. 4-5 Units.**

Examines the relationship between law and colonialism in Latin America, Africa and Asia during both the early modern and the modern period. By reading some of the seminal works that have been published on this issue, we will seek to understand how law both facilitated and limited colonialism and how colonialism, in turn, had modified the legal systems that had existed previously. Attention will also be given to law as an acculturating agent and to the legal arena as a sphere for conflict resolution, negotiation, and identity formation.

**HISTORY 306K. World History Pedagogy Workshop. 1 Unit.**

Students draft a syllabus and create a curriculum module for use in a world history lecture course. Corequisite: HISTORY 306D, recommended.

**HISTORY 307A. Legal History Workshop. 4-5 Units.**

(Same as LAW 372.) The Legal History Workshop is designed as a forum in which faculty and students from both the Law School and the History Department can discuss some of the best work now being done in the field of legal history. Every other week, an invited speaker will present his or her current research for discussion. This year the theme of the Workshop will be Conservative Legal Movements from 1950 to the Present. Speakers will include Reva Siegel, the Nicholas deB. Katzenbach Professor of Law at Yale Law School, and Thomas Sugrue, the David Boies Professor of History and Sociology at the University of Pennsylvania, as well several other scholars of law, the social sciences and humanities writing about this topic. In the week prior to a given speaker's presentation, the class will meet as a group to discuss secondary literature relevant to understanding and critiquing the speaker's research. Students will then read the speaker's paper in advance of the following week's workshop presentation. Special Instructions: Students are required to write a brief response to each speaker's paper. There will be a total of four speakers, and thus four papers. Guidance will be provided concerning how to frame these response papers, which will be due every two weeks - i.e., on the day before speaker presents and students will receive "W" writing credit. Students taking the course to receive "R" research credit are required to write a research paper on a legal history topic that they choose (in consultation with the professor). After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Students taking the course for R credit can take the course for either 2 or 3 units, depending on the paper length. Elements used in grading: Class participation, attendance, assignments and final paper. This course is open to first-year Law School students. Writing (W) credit is for students entering prior to Autumn 2012.

**HISTORY 307C. The Global Early Modern. 4-5 Units.**

In what sense can we speak of "globalization" before modernity? What are the characteristics and origins of the economic system we know as "capitalism"? When and why did European economies begin to diverge from those of other Eurasian societies? With these big questions in mind, the primary focus will be on the history of Europe and European empires, but substantial readings deal with other parts of the world, particularly China and the Indian Ocean.

Same as: HISTORY 207C

**HISTORY 307E. Totalitarianism. 4-5 Units.**

Modern revolutionary and totalitarian politics. Sources include monographs on the medieval, Reformation, French Revolutionary, and Great War eras. Topics: the essence of modern ideology, the concept of the body national, state terror, charismatic leadership, gender assignments, private and public spheres, and identities.

Same as: HISTORY 204E

**HISTORY 307G. The Age of Discovery: Maritime Science and Empire, 1400-1850. 4-5 Units.**

This course focuses on maritime science and empire from 1400 to 1850. We will consider how early modern empires, mariners and scientific figures, used technology, gathered information, described new locations and interacted with indigenous cultures. We will explore these themes through three perspectives: The initial overseas empires of Spain and Portugal in the sixteenth and seventeenth centuries; Chinese and Ottoman efforts at maritime expansion and finally, British exploration and expansion into the South Pacific and China.

Same as: HISTORY 207G

**HISTORY 308. Biography and History. 4-5 Units.**

The relationship between biographical and historical writing, primarily in Europe and America. Problems of methodology, evidence, dispassion, and empathy. Texts: biographies, critical literature on biographical work, and novels (A. S. Byatt's *Possession*, Bernard Malamud's *Dubin's Lives*) that illuminate the intellectual underpinnings of biographical labor.

Same as: HISTORY 207

**HISTORY 308B. Women Activists' Response to War. 4-5 Units.**

Theoretical issues, historical origins, changing forms of women's activism in response to war throughout the 20th century, and contemporary cases, such as the Russian Committee of Soldiers Mothers, Bosnian Mothers of Srebrenica, Serbian Women in Black, and the American Cindy Sheehan. Focus is on the U.S. and Eastern Europe, with attention to Israel, England, and Argentina.

Same as: FEMGEN 208B, HISTORY 208B

**HISTORY 308D. Pre-Modern Warfare. 4-5 Units.**

This course examines the evolving nature of warfare and its impact on society across the Eurasian continent up to the Gunpowder Revolution and rise of the nation-state. Beginning with an attempt to define war, it will trace the evolution of military technology from the Stone Age through the rise of the chariot, the sword, and the mounted rider, and examine how changing methods of conducting warfare were inextricably linked to changes in the social order and political structures.

Same as: HISTORY 208D

**HISTORY 308F. Law and Humanities Workshop: History, Literature, and Philosophy. 4-5 Units.**

(Same as LAW 516.) The Law and Humanities Workshop: History, Literature, and Philosophy is designed as a forum in which faculty and students from the Law School and from various humanities departments can discuss some of the best work now being done in law and humanities. Every other week, an invited speaker will present his or her current research for discussion. In the week prior to a given speaker's presentation, the class will meet as a group to discuss secondary literature relevant to understanding and critiquing the speaker's research. Students will then read the speaker's paper in advance of the following week's workshop presentation. Students have two options. Those taking the course for 4 units are required to write a brief response to each speaker's paper. There will be a total of four speakers, and thus four papers. Guidance will be provided concerning how to frame these response papers, which will be due every two weeks - i.e., on the day before the speaker presents. Students taking the course for 5 units are required to write a research paper on a law and humanities topic that they choose (in consultation with the professors). Law students who complete this 3-unit track will receive an "R" credit. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Enrollment will be limited to 30 students - 20 from SLS who will be selected by lottery and 10 from H&S. Elements used in grading: Class participation, attendance, and writing assignments.

**HISTORY 309A. Postcolonialism and Universalism. 4-5 Units.**

Key texts and motifs from postcolonial theory: empire, class, exile, suffering, textuality, archive in juxtaposition to 20th-century philosophical questions about universal history and the relevance of humanist inquiry. Same as: HISTORY 209D

**HISTORY 309B. The Idea of Politics. 4-5 Units.**

Can we live without politics? Is politics indispensable for humanity and vice-versa? The idea of politics is that it must transform, through human action, conditions of collective life. But the 20th century produced colliding beliefs about what that life might be and what the human being itself might look like. Explore whether, after the century, we might still think of politics as an ethical idea and the "human" as foundational political category. Keywords: Civility, Cruelty, Friendship, Empire, Democracy, Humanism, Animals. Same as: HISTORY 209B

**HISTORY 309C. Liberalism and Violence. 4-5 Units.**

Does Liberalism have a theory of violence? What does modern political thought, in privileging humanity and rights, share with "terrorists" and "rogue states?" How is liberalism transformed by the use of religion and death for political ends? We read key thinkers of modern life- Adorno, Arendt, Agamben, Benjamin, Derrida, Fanon, Foucault, Gandhi, Heidegger, and Schmitt- to interrogate the relationship between religion, sacrifice, and democracy. At the center are connections between war and modern life, and between violence and non-violence. Same as: HISTORY 209C

**HISTORY 309E. History Meets Geography. 4-5 Units.**

Focus is on developing competence in GIS computer applications and applying it to historical problems. Previous experience with GIS not required. Recommended: complete the GIS tutorial in Branner Library before the course starts.

**HISTORY 309F. Historical Geography Colloquium: Maps in the Early Modern World. 4-5 Units.**

The significance of cartographic enterprise across the early modern world. Political, economic, and epistemological imperatives that drove the proliferation of nautical charts, domain surveys, city plans, atlases, and globes; the types of work such artifacts performed for their patrons, viewers, and subjects. Contributions of indigenous knowledge to imperial maps; the career of the map in commerce, surveillance, diplomacy, conquest, and indoctrination. Sources include recent research from Asia, Europe, and the Americas.

**HISTORY 309G. Paleography of Medieval and Early Modern Manuscripts. 3-5 Units.**

Introductory course in the history of writing and of the book, from the late antique period until the advent of printing. Opportunity to learn to read and interpret medieval manuscripts through hands-on examination of original materials in Special Collections of Stanford Libraries as well as through digital images. Offers critical training in the reading of manuscripts for students from departments as diverse as Classics, History, Philosophy, Religious Studies, English, and the Division of Languages Cultures and Literatures.

Same as: CLASSICS 215, DLCL 209, RELIGST 204

**HISTORY 311A. Family, Gender, and Production in Ancient Rome. 4-5 Units.**

Seminar. The household as the basic unit of production in Rome in the context of family relations and ideologies of gender. Methodological challenges of doing social and economic history from literary, epigraphic, and literary texts. Demography of family and kinship in ancient Rome. Ideologies of gender and family roles and their influence on economic production. Economic theories of the family and human capital.

**HISTORY 311G. Big Ancient History. 4-5 Units.**

How the shift away from thinking about European history in terms of a western civilization model toward embedding it in stories of how global history affects research and teaching on ancient Greece and Rome. Conventional, evolutionary, and global history narratives of the past 5,000 to 15,000 years and some new ideas about how Greco-Roman history might fit into different storylines.

**HISTORY 312. Knights, Monks, and Nobles: Masculinity in the Middle Ages. 4-5 Units.**

This course considers masculinity as historically and culturally contingent, focusing on the experiences and representations of medieval men as heroes, eunuchs, fathers, priests, husbands, boys, and fighting men. Recognizing that the lives of men, like those of women, were governed by gendered rules and expectations, we will explore a wide range of medieval masculinities, paying close attention to the processes by which manhood could be achieved (e.g. martial, spiritual, sexual), and to competing versions of manliness, from the warrior hero of the early middle ages to the suffering Christ of late medieval religion. Same as: FEMGEN 212X, FEMGEN 312, HISTORY 212, RELIGST 212X, RELIGST 312X

**HISTORY 314D. Mediterranean Crossroads: Power, Culture, and Religion in Medieval Sicily. 5 Units.**

Sicily in the Middle Ages was a Mediterranean crossroads, a dynamic and diverse kingdom in which Muslim and Christian, Viking and African, European and Eastern Cultures all came together. Explores the life and times of Frederick II (1194-1250). He claimed universal authority as a Christian emperor, yet ruled multireligious Sicily as king. He promoted crusading, yet was accused of being a heretic and a crypto Muslim. He spoke six languages and actively patronized the arts and sciences. Topics include: structures and influences that made such a figure possible; how he managed the tensions of governing a diverse and disparate empire; how religion and cultural production created and maintained his authority; how contemporaries and later generations reacted to this enigmatic emperor; why has he continued to generate such polarizing reactions; and how did Frederick become a figure revered by Nazis and multiculturalists alike.

Same as: HISTORY 214D

**HISTORY 315. Advanced Paleography. 5 Units.**

This course will train students in the transcription and editing of original Medieval and Early Modern textual materials from c. 1000 to 1600, written principally in Latin and English (but other European languages are possible, too). Students will hone their archival skills, learning how to describe, read and present a range of manuscripts and single-leaf documents, before turning their hand to critical interpretation and editing. Students, who must already have experience of working with early archival materials, will focus on the full publication of one individual fragment or document as formal assessment.

Same as: CLASSICS 216, RELIGST 329X

**HISTORY 316. Women and the Book: Scribes, Artists, and Readers from Late Antiquity through the Fourteenth Century. 4-5 Units.**

This course examines the cultural worlds of medieval women through particular attention to the books that they owned, commissioned, and created. Beginning with the earliest Christian centuries, the course proceeds chronologically, charting women's book ownership, scribal and artistic activity, and patronage from Late Antiquity through the fourteenth century. In addition to examining specific manuscripts (in facsimile, or digitally), we will consider ancillary questions to do with women's authorship, education and literacy, reading patterns, devotional practices, and visual traditions and representation.

Same as: ARTHIST 206H, FEMGEN 216, HISTORY 216

**HISTORY 319B. Secularity. 4-5 Units.**

Classic theories of secularity. Is a secular world possible? How does, historically seen, the notion of the secular emerge, impose itself, and get challenged? Readings include Max Weber, E. Durkheim, R.A. Markus, Carl Schmitt, and Hans Blumenberg, and studies bearing on the Middle Ages, English monastic secularization, the French Revolution, and 20th-century political religions.

**HISTORY 319C. Science, Technology, and Modernity in the Soviet Union. 5 Units.**

Science and technology were integral to the Soviet claim to offer a vision of modernity superior to that of Western capitalism. Science and technology would flourish; society would develop on a scientific basis. The results were more complex than the vision. Topics to be covered: science and Marxism-Leninism; the Lysenko affair; the R&D system; the role of the secret police; the atomic project; the space race; missile development; Andrei Sakharov; technology and innovation.

Same as: HISTORY 219C

**HISTORY 320G. Demons, Witches, Old Believers, Holy Fools, and Folk Belief: Popular Religion in Russia. 4-5 Units.**

19th and early 20th centuries. Peasants, parish priests, witches, possessed persons, cults and sects, old believers, saints, and women's religious communities. Nominally Christian, and members of the Orthodox Church, Russians embraced beliefs and customs that combined teaching from Church and folk traditions.

Same as: HISTORY 220G, REES 220G, REES 320G

**HISTORY 321A. State, Society and Nation in Modern Russian Historiography. 4-5 Units.**

Main trends of Russian intellectual history as seen through major historians' treatment of Muscovy: Romanticism, Slavophilism, Hegelianism, Populism, Social Democracy, New Idealism, and Marxism-Leninism.

**HISTORY 321B. Imperial Russian Historiography. 4-5 Units.****HISTORY 323. Art and Ideas in Imperial Russia. 4-5 Units.**

Poetry, novels, symphonic music, theater, opera, painting, design, and architecture: what they reveal about the politics and culture of tsarist Russia.

Same as: HISTORY 223

**HISTORY 323B. Research Methodologies in Early Modern Russian History. 4-5 Units.****HISTORY 324C. Genocide and Humanitarian Intervention. 3 Units.**

Open to medical students, graduate students, and undergraduate students. Traces the history of genocide in the 20th century and the question of humanitarian intervention to stop it, a topic that has been especially controversial since the end of the Cold War. The pre-1990s discussion begins with the Armenian genocide during the First World War and includes the Holocaust and Cambodia under the Khmer Rouge in the 1970s. Coverage of genocide and humanitarian intervention since the 1990s includes the wars in Bosnia, Rwanda, Kosovo, the Congo and Sudan.

Same as: HISTORY 224C, JEWISHST 284C, JEWISHST 384C, PEDS 224

**HISTORY 324F. The Caucasus and the Muslim World. 4-5 Units.**

The linkages connecting the societies of the Caucasus to Muslim communities in Iran, Russia, the Ottoman Empire and Turkey, S. Asia, and the Middle East.

**HISTORY 326A. Modern Europe: Society and Politics. 5 Units.**

The goal of this course is to introduce graduate students to major works of history and literature in the field of nineteenth and early-twentieth century history. A colloquia will be given in tandem with a research seminar.

**HISTORY 326C. Graduate Colloquium on Balkan History. 4-5 Units.**

Designed for History Ph.D. students to develop competence in the history and historiography of the modern Balkans, from the French Revolution to the present. Areas of study include the influence of empires on the region, the rise of nationalism and nation states, the dilemmas of independence, the emergence and decline of communism in the region, and the recurrence of war and ethnic conflict.

**HISTORY 326E. Famine in the Modern World. 3 Units.**

Open to medical students, graduate students, and undergraduate students. Examines the major famines of modern history, the controversies surrounding them, and the reasons that famine persists in our increasingly globalized world. Focus is on the relative importance of natural, economic, and political factors as causes of famine in the modern world. Case studies include the Great Irish Famine of the 1840s; the Bengal famine of 1943-44; the Soviet famines of 1921-22 and 1932-33; China's Great Famine of 1959-61; the Ethiopian famines of the 1970s and 80s, and the Somalia famines of the 1990s and of 2011.

Same as: HISTORY 226E, PEDS 226

**HISTORY 327. East European Women and War in the 20th Century. 4-5 Units.**

Thematic chronological approach through conflicts in the region: the Balkan Wars, WW I, WW II, and the recent wars in the former Yugoslavia. The way women in E. Europe have been involved in and affected by these wars compared to women in W. Europe in the two world wars. Women's involvement in war as members of the military services, the backbone of underground movements, workers in war industries, mothers of soldiers, subjects and supporters of war aims and propaganda, activists in peace movements, and objects of wartime destruction, dislocation, and sexual violation.

Same as: HISTORY 227

**HISTORY 327D. All Quiet on the Eastern Front? East Europe and Russia in the First World War. 3-5 Units.**

Until recently history has been comparatively quiet about the experience of World War I in the east. Far from being a peripheral theater of war, however, the experiences of war on the Eastern Front were central to shaping the 20th century. Not only was the first shot of the war fired in the east, it was also the site of the most dramatic political revolution. Using scholarly texts, literature and film, this course combines political, military, cultural and social approaches to introduce the causes, conduct and consequences of World War I with a focus on the experiences of soldiers and civilians on the Eastern Front. Topics include: the war of movement, occupation, extreme violence against civilians, the Armenian genocide, population exchanges, the Russian Revolution and civil war, and the disintegration of empires and rise of nation-states.

Same as: HISTORY 227D, REES 227, REES 327

**HISTORY 328. Circles of Hell: Poland in World War II. 5 Units.**

Looks at the experience and representation of Poland's wartime history from the Nazi-Soviet Pact (1939) to the aftermath of Yalta (1945). Examines Nazi and Soviet ideology and practice in Poland, as well as the ways Poles responded, resisted, and survived. Considers wartime relations among Polish citizens, particularly Poles and Jews. In this regard, interrogates the traditional self-characterization of Poles as innocent victims, looking at their relationship to the Holocaust, thus engaging in a passionate debate still raging in Polish society. Same as: HISTORY 228, JEWISHST 282, JEWISHST 382

**HISTORY 330. Core Colloquium on Early Modern Europe: Ancien Regime. 4-5 Units.**

Topics in the social, political, and religious history of Western Europe, 1550-1789, with an emphasis on France. May be repeated for credit.

**HISTORY 330A. Early Modern Colloquium. 4-5 Units.**

Historiographical survey from the Renaissance to the Enlightenment. Topics include Renaissance, Reformation, European expansion, state and nation building, printing, military, and scientific revolutions, origins of Enlightenment. Designed to prepare students doing either a primary or secondary graduate field in early modern European history.

**HISTORY 330D. Europe in the World, 1789-Present. 4-5 Units.**

The European conquest of parts of Africa, Asia, and the South Pacific by European merchants, missionaries, armies, and administrators had significant, and often cataclysmic, effects on indigenous political alliances, cultural practices, and belief systems. But were the effects of expansion entirely one-sided? What impact did the experiences of colonialism have on European politics, culture, and Europe's relations with the rest of the world? Explores how interaction between Europe and the rest of the world redefined the political, racial, sexual, and religious boundaries of both Europe and its colonies and gave rise to the more "globalized" society we live in today. Same as: HISTORY 230D

**HISTORY 330F. Surveillance in Modern Europe. 4-5 Units.**

This course investigates the rise of modern surveillance in twentieth-century Europe through the present day. We consider different forms of surveillance—in domestic security, international spying, police practices, social monitoring, corporate data collecting, self-surveillance, and subversion. Students will explore these themes in historical works, contemporary journalism, novels, film, and visual arts. Students will also pursue individual topics of interest and, over the quarter, prepare op-eds for publication. Same as: HISTORY 230F

**HISTORY 331C. Core Colloquium on Modern Europe. 4-5 Units.**

The historiography of 20th-century Europe. Topics include WW I, the Russian Revolution, National Socialism, and the EU.

**HISTORY 331D. Core Colloquium on Modern Europe: Intellectual History. 4-5 Units.****HISTORY 331E. Paper, Printing, and Digital Revolutions: Transformations of the Book. 4-5 Units.**

What is a book? This seminar explores the conceptual implications of approximately two millennia of transformations in the physical and material properties of books. How have the meaning and authority we assign the written word changed as technologies of book production and dissemination have evolved, and how have they remained continuous? Topics covered include the rise of the medieval manuscript codex, the emergence of print culture in early modern Europe, and current debates over the nature of text in the digital age. Same as: HISTORY 231E

**HISTORY 332A. Power, Art, and Knowledge in Renaissance Italy. 4-5 Units.**

Provides a fundamental understanding of the cultural and political imagination of the Italian Renaissance, with particular emphasis on Florence between 1300 and 1600 CE. Topics include political and social upheavals, radical shifts in religious practice and devotion, the commercial revolution in trade and banking, the rediscovery of classical philosophy and style, and the flowering of the literary and visual arts. Same as: HISTORY 232A

**HISTORY 332B. Heretics, Prostitutes and Merchants: The Venetian Empire. 4-5 Units.**

Between 1200-1600, Venice created a powerful empire at the boundary between East and West that controlled much of the Mediterranean, with a merchant society that allowed social groups, religions, and ethnicities to coexist. Topics include the features of Venetian society, the relationship between center and periphery, order and disorder, orthodoxy and heresy, the role of politics, art, and culture in the Venetian Renaissance, and the empire's decline as a political power and reinvention as a tourist site and living museum. Same as: ITALIAN 332B

**HISTORY 332C. The Great War: WWI in Literature, Film, Art, and Memory. 3-5 Units.**

This course concerns how writers, artists, and other cultural producers understood and represented the traumas of the First World War and its aftermath. Rather than tracing a political or military history of the conflict, we'll focus on how the horrors of War (both in the trenches and on the home front) fostered broader social and cultural shifts, as people questioned the very foundations of European civilization. Most specifically, we'll explore the connections between the War and the emergence of post-War modernist movements, as writers and artists created new works to help them make sense of the catastrophe and the new world it wrought. Though France provides our starting point, we'll also travel beyond the Hexagon to incorporate other views and major works. Course readings will be in English, though students may elect to read works in French if they wish. Same as: FRENCH 258, FRENCH 358, HISTORY 231C

**HISTORY 332D. Rome: The City and the World, 1300-1800. 4-5 Units.**

What lies beyond the ruins of an ancient city? How did Rome revive? The history of Rome from the late Middle Ages and Renaissance to the age of the Grand Tour. Topics include: the history of the papacy; the everyday world of Roman citizens; the relationship between the city and the surrounding countryside; the material transformation of Rome and projects to map the city; and its meaning for foreigners. Same as: HISTORY 232D

**HISTORY 332F. The Scientific Revolution. 5 Units.**

What do people know and how do they know it? What counts as scientific knowledge? In the 16th and 17th centuries, understanding the nature of knowledge engaged the attention of individuals and institutions including Copernicus, Galileo, Descartes, Newton, the early Royal Society, and less well-known contemporaries. New meanings of observing, collecting, experimenting, and philosophizing, and political, religious, and cultural ramifications in early modern Europe.

**HISTORY 332G. When Worlds Collide: The Trial of Galileo. 4-5 Units.**

In 1633, the Italian mathematician Galileo was tried and condemned for advocating that the sun, not the earth, was the center of the cosmos. The Catholic Church did not formally admit that Galileo was right until 1992. Examines the many factors that led to the trial of Galileo and looks at multiple perspectives on this signal event in the history of science and religion. Considers the nature and definition of intellectual heresy in the sixteenth and early seventeenth centuries, and examines the writings of Galileo's infamously predecessor Giordano Bruno (burned at the stake in 1600). Looks closely at documents surrounding the trial and related literature on Renaissance and Reformation Italy in order to understand the perspectives of various participants in this famous event. Focal point of seminar involves the examination of the many different histories that can be produced from Galileo's trial. What, in the end, were the crimes of Galileo?

**HISTORY 333C. Two British Revolutions. 4-5 Units.**

Current scholarship on Britain, 1640-1700, focusing on political and religious history. Topics include: causes and consequences of the English civil war and revolution; rise and fall of revolutionary Puritanism; the Restoration; popular politics in the late 17th century; changing contours of religious life; the crisis leading to the Glorious Revolution; and the new order that emerged after the deposing of James II. Same as: HISTORY 233C

**HISTORY 333K. The Invention of the Modern Republic. 4-5 Units.**

Examines the history of republican thinking in the Atlantic World from the Renaissance to the French Revolution. Same as: HISTORY 233K

**HISTORY 334. The Enlightenment. 3-5 Units.**

The Enlightenment as a philosophical, literary, and political movement. Themes include the nature and limits of philosophy, the grounds for critical intellectual engagement, the institution of society and the public, and freedom, equality and human progress. Authors include Voltaire, Montesquieu, Rousseau, Hume, Diderot, and Condorcet. Same as: DLCL 324, FRENCH 244, HISTORY 234, HISTORY 432A, HUMNTIES 324

**HISTORY 334F. Science, Technology, and Empire. 4-5 Units.**

How modern Europe came to be connected to then wider world through repeated cycles of expansion, circulation, and exchange from the mid-nineteenth century to the present. Using weekly themes and in-depth discussions of watershed moments, the roles played by colonialism, migration, commerce, warfare, telecommunications, and popular culture in redefining the place of Europe in a changing global landscape will be explored.

**HISTORY 334G. Narrating the British Empire. 4-5 Units.**

This course will explore the historical and cultural reality of the British Empire in a global and comparative context, through works of fiction and non-fiction, history, memoir and a range of cultural chronicles. What relationship did British colonialism have with modernity and the European Enlightenment, and with neoliberalism and globalization that followed decolonization? Texts: CLR James's *Beyond a Boundary*, Jamaica Kincaid's *A Small Place*, Nirad Chaudhuri's *The Autobiography of an Unknown Indian*, Alan Paton's *Cry, The Beloved Country*, Witi Ihimaera's *Dear Miss Mansfield*. Same as: HISTORY 234G

**HISTORY 335. The Renaissance of War: Politics, Technology, and War in Late Medieval and Renaissance Italy. 4-5 Units.**

The dynamic societies of the Italian Peninsula of the 14th to 16th centuries "prosperous, astonishingly creative, politically fractious, and endemically violent" produced sweeping, deeply consequential changes. Among these were new developments in the theory and practice of war, politics, and diplomacy that laid the foundations for the modern state system and European military power. The class covers: new diplomatic practice; the Military Revolution; state-building; war finance; court culture; and the intersection of these with the shimmering brilliance of Renaissance culture.

**HISTORY 335C. Readings in the Supernatural. 4-5 Units.**

Class will read and discuss a selection of monographs, scholarly essays, and primary sources on the rich supernatural world of early modern Europe. We will discuss how fairies, werewolves, nightmares, and trolls all became witches, how the binary of angels and demons figured in European thought, and how the marginalized imaginary was reconstituted in theatre and fiction.

Same as: HISTORY 235C

**HISTORY 336. Modern France. 4-5 Units.**

(Daughton).

**HISTORY 336B. Hobbes to Habermas: The Idea of Society in Modern Thought. 4-5 Units.**

Classic texts in social theory from the seventeenth century to the present. Readings include Locke, Smith, Hegel, Comte, and Durkheim, and Weber.

Same as: HISTORY 236B

**HISTORY 336E. Humanities+Design: Visualizing the Grand Tour. 4-5 Units.**

Study of the eighteenth-century Grand Tour of Italy through visualization tools of the digital age. Critical readings in both visual epistemology and current Grand Tour studies; interrogating the relationship between quantitative and qualitative approaches in digital humanities; what new insights in eighteenth-century British travel to Italy does data visualization offer us? Students will transform traditional texts and documents into digital datasets, developing individual data analysis projects using text mining, data capture and visualization techniques. Same as: CLASSICS 396, DLCL 396

**HISTORY 336F. The End of the World As They Knew It: Culture, Cafés, and Crisis in Europe, 1880-1918. 4-5 Units.**

The years stretching from roughly 1880 to end of the First World War were marked by profound social upheaval and an intense burst of creativity. This seminar will focus on the major cultural movements and big ideas of the period. Topics covered include the rise of mass culture and cinema, the origins of psychoanalysis, anti-Semitism and Zionism, new anxieties about sexuality and the New Woman, anarchism, decadence, degeneration, and Dada with cameos from Bernhardt, Freud, Klimt, Nietzsche, Toulouse-Lautrec, Wilde, Zola, and other luminaries of the age.

Same as: HISTORY 236F

**HISTORY 337. The Holocaust. 4 Units.**

The emergence of modern racism and radical anti-Semitism. The Nazi rise to power and the Jews. Anti-Semitic legislation in the 30s. WW II and the beginning of mass killings in the East. Deportations and ghettos. The mass extermination of European Jewry.

Same as: HISTORY 137, JEWISHST 183, JEWISHST 383

**HISTORY 337C. Street History: Learning the Past in School and Out. 3-5 Units.**

Interdisciplinary. Since Herodotus, history and memory have competed to shape minds: history cultivates doubt and demands interpretation; memory seeks certainty and detests that which thwarts its aims. History and memory collide in modern society, often violently. How do young people become historical amidst these forces; how do school, family, nation, and mass media contribute to the process?

Same as: EDUC 356

**HISTORY 337F. 20th Century British History through the Hoover Archives. 4-5 Units.**

From the rich resources of the Hoover Institution, the students in this course will select a particular archive (war posters, politician, spy, literary figure, diplomat, etc. etc.) to investigate, to write about, discuss in class, and, it is hoped, present in an exhibition at the Hoover, learning museum skills along the way as well as the history of Britain in the 20th century.

Same as: HISTORY 237F

**HISTORY 337K. Speed and Power in the Twentieth Century. 4-5 Units.** Europeans living in the 20th century witnessed an unprecedented (and, to many observers, frightening) acceleration in the pace of everyday life, wrought by the introduction of a host of new travel technologies. Focusing on the metropolises of Europe, this seminar will explore the various ways that trains, planes, and automobiles have shaped modern urban life. We'll also look at how 20th-century artists and writers have treated the interrelated themes of speed and power in their work. Same as: FRENCH 237K, HISTORY 237K

**HISTORY 338A. Graduate Colloquium in Modern British History, Part I. 4-5 Units.** Influential approaches to problems in British, European, and imperial history. The 19th-century British experience and its relationship to Europe and empire. National identity, the industrial revolution, class formation, gender, liberalism, and state building. Goal is to prepare specialists and non-specialists for oral exams.

**HISTORY 338B. MODERN BRITISH HISTORY PART II. 4-5 Units.** Themes include empire and racism, the crisis of liberalism, the rise of the welfare state, national identity, the experience of total war, the politics of decline, and modernity and British culture.

**HISTORY 338G. Ethnography of the Late Middle Ages: Social history and popular culture in the age of the plague. 4-5 Units.** During the late Middle Ages, as Europe was recovering from the devastation of the Black Death, political reorganization contributed to a burst of archival documentation that allows historians richly detailed glimpses of societies in transition. We will be reading selected scholarly articles and monographs covering such topics as persecution, prechristian cultural remnants, folk theologies, festival cultures, peasant revolts, heresy, and the advent of the diabolic witch. Same as: HISTORY 238G

**HISTORY 339F. Empire and Information. 4-5 Units.** How do states see? How do they know what they know about their subjects, citizens, economies, and geographies? How does that knowledge shape society, politics, identity, freedom, and modernity? Focus is on the British imperial state activities in S. Asia and Britain: surveillance technologies and information-gathering systems, including mapping, statistics, cultural schemata, and intelligence systems, to render geographies and social bodies legible, visible, and governable. Same as: HISTORY 239F

**HISTORY 339H. Modern European History in a Global Age. 4-5 Units.** How scholars can write the history of modern Europe in a way that integrates global and transnational perspectives. Discussed the methodological challenges and merits of various approaches and reviews relevant theoretical and interdisciplinary models for how this can best be done. Topics include globalization, migration, internationalism, colonialism, post-colonialism, modern warfare, and the media.

**HISTORY 340. The History of Evolution. 4-5 Units.** This course examines the history of evolutionary biology from its emergence around the middle of the eighteenth century. We will consider the continual engagement of evolutionary theories of life with a larger, transforming context: philosophical, political, social, economic, institutional, aesthetic, artistic, literary. Our goal will be to achieve a historical rich and nuanced understanding of how evolutionary thinking about life has developed to its current form. Same as: BIO 340, HISTORY 240

**HISTORY 341K. Technology in Modern American Culture. 4-5 Units.** This class displays the significance of technology in American culture by examining two principal technologies and their implications for politics, business, leisure, and social interaction, as well as for other technological systems. As starting points, we consider how computing systems and atomic weapons emerged at particular moments in history, including how their developments were intimately connected. This contextual approach leads us to the related study of topics within the histories of space travel, nuclear power, amateur electronics, and the Web. Same as: AMSTUD 241K, HISTORY 241K

**HISTORY 342. Darwin in the History of Life. 4-5 Units.** Origins and impact of evolutionary theory from the nineteenth century to the present. Early theories of fossils, the discovery of deep time and uniformitarian geology, debates over evolution vs. extinction, the origin of life, and human origins; the rise of anthropology and racial theory; the changing challenge of creationism, the abuse of evolution in eugenics and Nazi racial hygiene; and new discoveries in the realm of extreme life, evo-devo, neocatastrophism, and the new technological frontier of biomimicry. Attendance at the lectures of HISTORY 142 is required.

**HISTORY 343C. People, Plants, and Medicine: Atlantic World Amerindian, African, and European Science. 4-5 Units.** Explores the global exchange of knowledge, technologies, plants, peoples, disease, and medicines. Considers primarily Africans, Amerindians, and Europeans in the eighteenth-century West but also takes examples from other knowledge traditions. Readings treat science and medicine in relation to voyaging, colonialism, slavery, racism, plants, and environmental exchange. Colonial sciences and medicines were important militarily and strategically for positioning emerging nation states in global struggles for land and resources. Same as: HISTORY 243C

**HISTORY 343G. Tobacco and Health in World History. 4-5 Units.** Cigarettes are the world's leading cause of death—but how did we come into this world, where 6 trillion cigarettes are smoked every year? Here we explore the political, cultural, and technological origins of the cigarette and cigarette epidemic, using the tobacco industry's 80 million pages of secret documents. Topics include the history of cigarette advertising and cigarette design, the role of the tobacco industry in fomenting climate change denial, and questions raised by the testimony of experts in court. Same as: HISTORY 243G

**HISTORY 344. Narrative Knowing. 1-2 Unit.** Philosophers and historians have been debating the status of narrative explanation for well over 50 years. Until quite recently, a supposed dichotomy between natural science and history has shaped the discussion. Beginning from the origins, history, and limitations of the dichotomy, this seminar will explore how claims for narrative understanding and explanation have come to occupy an increasingly important role in the natural sciences as well as the social sciences. Some classic contributors are Hempel, Danto, Mink, Kuhn, White, Ricouer, Geertz, and Ginzburg. Current authors include Roth, Rheinberger, Kitcher, Beatty, Morgan, and (yes) Wise. Same as: PHIL 344

**HISTORY 344F. Gender Methods in History, Medicine, and Technology. 4-5 Units.** Explores classics and new work in gender methods for historical research, medical research, science and technology. The course is robustly interdisciplinary and welcomes students from the humanities, social science, science, and engineering. We analyze the theory and practice of gender through weekly reading and discussion. Students will be asked to write a review paper or research paper that advances their own work. Seminar explores the creative power of gender analysis to create new knowledge. Same as: FEMGEN 344F

**HISTORY 345. Violence and Identity in the African Great Lakes Region. 4-5 Units.** Untangles current crises through exploring debates on migration, autochthony, ethnicity and nationalism from the pre-colonial era to the present. While the majority of the course focuses on the region's 'center' (Rwanda, Burundi and the Democratic Republic of the Congo), we will also examine continuities and differences within the larger geographic region. Topics include the historical roots and perspectives that inform genocide, gender based violence, mineral exploitation, reconciliation, development and controversies around homosexuality in Uganda and the wider region. Same as: HISTORY 245

**HISTORY 345A. Africa in the Era of the Slave Trade. 4-5 Units.**

The slave trade, including the trans-Saharan, Indian Ocean, and trans-Atlantic trades, constituted nearly a millennium of interaction with the wider world and set in motion transformations in African societies, politics, and cultures. Topics include the debates about slavery in Africa, the impact of the slave trade on African societies, state formation, economic change, religious change, and household change in the period before the scramble for Africa in the late 19th century.

**HISTORY 345B. African Encounters with Colonialism. 4-5 Units.**

This colloquium is a broad sweep of some of the main themes in the history of the colonial period for Africa. A course of this nature can not help but be a selective sample of the field. For example, topics on the end of slavery in Africa, on the social history of law in colonial Africa, Islam and religious conversion, nationalism and decolonization are not included here because they are covered by more specialized courses. This course is designed to let students sample different approaches to the history of the colonial period.

**HISTORY 346. The Dynamics of Change in Africa. 4-5 Units.**

Crossdisciplinary colloquium; required for the M.A. degree in African Studies. Open to advanced undergraduates and PhD students. Addresses critical issues including patterns of economic collapse and recovery; political change and democratization; and political violence, civil war, and genocide. Focus on cross-cutting issues including the impact of colonialism; the role of religion, ethnicity, and inequality; and Africa's engagement with globalization.

Same as: AFRICAST 301A, HISTORY 246, POLISCI 246P, POLISCI 346P

**HISTORY 346E. Refugees and the Making of the Modern World. 4-5 Units.**

Following the mass popular displacements of WWII, a group of diplomats came together to create the United Nations High Commissioner for Refugees (UNHCR) and the 1951 Convention Relating to the Status of Refugees—the bases of the international refugee regime that has endured to the present. We will explore the processes that led to the creation of the modern international refugee regime, and how international refugee law has evolved in response to conflicts and emergencies "on the ground." Throughout, we will question the category of the "refugee," and interrogate the methods by which refugees, as individuals and as groups, have sought to control and alter their positions under national and international authorities. Topics will include notions of migration and asylum, the creation and evolution of international refugee law, refugees, stateless people, economic migrants, and decolonization. We will have case studies of post-WWII European, Palestinian, Thai, Ethiopian, Haitian, and Cuban "refugees," among others.

Same as: HISTORY 246E

**HISTORY 347. Violence in African History: Conflict and Healing in sub-Saharan Africa. 4-5 Units.**

This course questions what constitutes "violence" in African history, and why it occurred when it did. We will examine the subtleties of "violence" in African history, which have sometimes led to conflicts, and sometimes to rich strategies of healing and improvisation. These include ecological crises, domestic violence, corruption, economic exploitation, and demographic crises (including urbanization and diseases such as HIV-AIDS). While we begin by examining ideas about conflict in pre-colonial Africa, the course focuses on the colonial and post-colonial eras in African history.

Same as: HISTORY 247

**HISTORY 348D. Law and Colonialism in Africa. 4-5 Units.**

Law in colonial Africa provides an opportunity to examine the meanings of social, cultural, and economic change in the anthropological, legal, and historical approaches. Court cases as a new frontier for the social history of Africa. Topics: meanings of conflicts over marriage, divorce, inheritance, property, and authority.

Same as: HISTORY 245G

**HISTORY 351A. Core in American History, Part I. 4-5 Units.**

May be repeated for credit.

**HISTORY 351B. Core in American History, Part II. 4-5 Units.**

.

**HISTORY 351C. Core in American History, Part III. 4-5 Units.**

.

**HISTORY 351D. Core in American History, Part IV. 4-5 Units.**

May be repeated for credit.

**HISTORY 351E. Core in American History, Part V. 4-5 Units.**

Required of all first-year United States History Ph.D. students. Topics in Twentieth Century United States History.

**HISTORY 351F. Core in American History, Part VI. 4-5 Units.**

Required of all first-year Ph.D. students in U.S. History.

**HISTORY 352. Originalism and the American Constitution: History and Interpretation. 5 Units.**

Except for the Bible no text has been the subject of as much modern interpretive scrutiny as the United States Constitution. This course explores both the historical dimensions of its creation as well as the meaning such knowledge should bring to bear on its subsequent interpretation. In light of the modern obsession with the document's original meaning, this course will explore the intersections of history, law, and textual meaning to probe what an original interpretation of the Constitution looks like.

Same as: HISTORY 252

**HISTORY 352B. History of American Law. 5 Units.**

(Same as LAW 318.) Modern history of American law, legal thought, legal institutions and the legal profession. Topics include law and regulation of corporate organizations and labor relations in the age of enterprise, law of race relations in the South and North, development of classical legalism, critiques of classical legalism, modern administrative state, organized legal profession, New Deal legal thought and legislation, legal order of the 50s, expansion of enterprise liability, civil rights movements from 1940, rights revolution of the Warren Court and Great Society.

Same as: HISTORY 152

**HISTORY 353D. Approaches to American Legal History. 4-5 Units.**

(Same as LAW 651.) Legal history may once have been primarily devoted to exploring legal doctrines and key judicial opinions, and thus to be of interest mainly to legal scholars and lawyers. Now, the best writing in legal history resembles historical writing more generally, and the study of legal ideas and practices is increasingly integrated with social, intellectual, cultural, and political history. Examines recent writings in American legal history, ranging broadly across time and space to ask how the field reflects developments in historical writing more generally, and how the use of legal materials affects our understanding of major aspects of American history.

**HISTORY 354. Law, Slavery, and Race. 5 Units.**

(Same as LAW 747.) This course will explore the interaction of law, slavery and race in the United States, as well as from a comparative perspective. We will read original documents, including excerpts of trial transcripts, appellate opinions, treatises, codes, and first-person narratives. We will study the way law, politics and culture interacted to shape the institution of slavery and the development of modern conceptions of race. Course lectures and discussions will focus on questions such as: Did different legal regimes (Spanish, French, British) foster different systems of race and slavery in the Americas? How did/does law work "on the ground" to shape the production of racial hierarchy and creation of racial identities? In what ways did slavery influence the U.S. Constitution? How has race shaped citizenship in the U.S., and how can we compare it to other constitutional regimes? The course will begin with the origins of New World slavery, race and racism, and move chronologically to the present day.

Same as: AFRICAAM 254D, CSRE 154D, HISTORY 254D

**HISTORY 355D. Racial Identity in the American Imagination. 4-5 Units.**

From Sally Hemings to Barack Obama, this course explores the ways that racial identity has been experienced, represented and contested throughout American history. Engaging historical, legal and literary texts and films, this course examines major historical transformations that have shaped our understanding of racial identity. This course also draws on other imaginative modes including autobiography, memoir, photography and music to consider the ways that racial identity has been represented in American society. Most broadly, this course interrogates the problem of American identity and examines the interplay between racial identity and American identity. This course moves along both chronological and thematic axes to investigate the problems of racial mixture, mixed-race identity, racial passing and racial performance across historical periods. Themes of ambiguous, hidden and hybrid identity will be critical to this course. This course will also explore the interplay of the problems of class, gender and sexuality in the construction of racial identity.

Same as: AFRICAAM 255, AMSTUD 255D, CSRE 255D, HISTORY 255D

**HISTORY 356. 350 Years of America-China Relations. 4-5 Units.**

The history of turbulent relations, military conflict, and cultural clashes between the U.S. and China, and the implications for the domestic lives of these increasingly interconnected countries. Diplomatic, political, social, cultural, and military themes from early contact to the recent past.

Same as: EASTASN 256, HISTORY 256

**HISTORY 356G. Constructing Race and Religion in America. 4-5 Units.**

This seminar focuses on the interrelationships between social constructions of race, and social interpretations of religion in America. How have assumptions about race shaped religious worldviews? How have religious beliefs shaped racial attitudes? How have ideas about religion and race contributed to notions of what it means to be "American"? We will look at primary and secondary sources, and at the historical development of ideas and practices over time.

Same as: CSRE 246, HISTORY 256G, RELIGST 246, RELIGST 346

**HISTORY 357. Was the American Revolution a Social Revolution?. 5 Units.**

What kind of a revolution was the American Revolution? The revolution gave colonial Americans political independence from Britain to found the United States. But did the revolution also transform American society in its wake? This course explores how historians and historical participants alike have answered this question paying attention to historical changes (or lack thereof) that took place in American society between c. 1750-1820 as well as grappling with what conceptually constitutes a "social" revolution in the first place.

Same as: HISTORY 257

**HISTORY 358. Sexual Violence in America. 4-5 Units.**

This undergraduate/graduate colloquium explores the history of sexual violence in America, with particular attention to the intersections of gender and race in the construction of rape. We discuss the changing definitions of sexual violence in law and in cultural representations from early settlement through the late-twentieth century, including slavery, wartime and prison rape, the history of lynching and anti-lynching movements, and feminist responses to sexual violence. In addition to introducing students to the literature on sexual violence, the course attempts to teach critical skills in the analysis of secondary and primary historical texts. Students write short weekly reading responses and a final paper; no final exam; fifth unit research or CEL options. Limited enrollment, permission of instructor required. Submit application form (available on Coursework) by Dec. 1, 2015 and indicate interest in CEL option. Priority admission to History, FGSS, CSRE, AFRICAAM, and AMSTUD declared majors and minors.

Same as: AFRICAAM 192, AMSTUD 258, CSRE 192E, FEMGEN 258, FEMGEN 358, HISTORY 258

**HISTORY 362G. The Pivotal Decade in U.S. History: 1960's or 1970's?. 4-5 Units.**

Which had more lasting impact, the civil war of the 1960s or the conservative revolt of the 1970s? Should the 1970s supersede the 1960s as a pivotal moment when something happened of considerable importance to historians? Considers this debate of the decades comparatively and thematically, addressing topics including civil rights, foreign policy, electoral politics, popular culture, law, economics, labor, and social movement organizing.

**HISTORY 365. Writing Asian American History. 5 Units.**

Recent scholarship in Asian American history, with attention to methodologies and sources. Topics: racial ideologies, gender, transnationalism, culture, and Asian American art history. Primary research paper.

Same as: AMSTUD 265, ASNAMST 265, HISTORY 265

**HISTORY 366B. Immigration Debates in America, Past and Present. 3-5 Units.**

Examines the ways in which the immigration of people from around the world and migration within the United States shaped American nation-building and ideas about national identity in the twentieth century.

Focuses on how conflicting ideas about race, gender, ethnicity, and citizenship with respect to particular groups led to policies both of exclusion and integration. Part One begins with the ways in which the American views of race and citizenship in the colonial period through the post-Reconstruction Era led to the passage of the Chinese Exclusion Act in 1882 and subsequently to broader exclusions of immigrants from other parts of Asia, Southern and Eastern Europe, and Mexico. Explores how World War II and the Cold War challenged racial ideologies and led to policies of increasing liberalization culminating in the passage of the 1965 Immigration Act, which eliminated quotas based on national origins and opened the door for new waves of immigrants, especially from Asia and Latin America. Part Two considers new immigration patterns after 1965, including those of refugees, and investigates the contemporary debate over immigration and immigration policy in the post 9/11 era as well as inequalities within the system and the impact of foreign policy on exclusions and inclusions.

Same as: CSRE 166B, HISTORY 166B

**HISTORY 369. Thinking About Capitalism. 4-5 Units.**

What is capitalism? An economic and social system that maximizes both individual freedom and social good? An exploitative arrangement dependent on the subordination of labor to capital? A natural arrangement guided by a munificent invisible hand? Or a finely tuned mechanism requiring state support? We will study the history of debates about markets and social organization, taking capitalism as both an economic system and a culture. Focus on American and British writers including Keynes, Lippmann, Hayek, Rand, Schumpeter, and Friedman.

Same as: HISTORY 269

**HISTORY 370. Graduate Colloquium on Colonial Latin American History. 4-5 Units.**

Sixteenth to nineteenth centuries. Indigenous cultures. The arrival of Europeans and its impact on native and European societies. Culture, religion and institutions, and everyday life. The independence period and the formation of new nations.

**HISTORY 371. Graduate Colloquium: Explorations in Latin American Social History. 4-5 Units.**

How to use primary sources such as government records, estate inventories, and parish records for social history.

**HISTORY 372A. Mexico: From Colony to Nation or the History of an Impossible Republic?. 5 Units.**

Was a republican form of government even possible in 19th-century Mexico after 300 years of colonial rule under the Spanish monarchy? Was the Spanish colonial heritage a positive or a negative legacy according to 19th-century Mexican politicians? How were they to forge a new national identity with so many ethnically and culturally diverse peoples throughout the territory? Just how "traditional" was, in fact, the colonial period? These are some of the questions we will explore in this course. Journeying from the late colonial period (c.1700) to the 35-year dictatorship known as El Porfiriato (1876-1911) we will examine how Mexico's diverse indigenous peoples adapted to both colonial and postcolonial rule, how they actively participated in politics and political discourse to preserve their cultures, customs and colonial privileges, and how after independence in 1821, a new republican political culture was forged. Mexico was not an impossible republic, but rather another kind of republic.

**HISTORY 372E. Theories of Citizenship and Sovereignty in a Transnational Context. 4-5 Units.**

This course explores the multiple meanings of citizenship and the ways in which they change when examined using different geographic scales (from the local to the transnational). The course will pair theoretical readings on citizenship with case studies that focus on North America. Topics include: definitions of citizenship; the interrelation of ideas of citizenship with those of race, ethnicity, gender, and sexuality; the relationship between sovereignty and territoriality; human and civil rights; and immigration.

Same as: AMSTUD 272E, CHILATST 172, CSRE 172H, FEMGEN 272E, HISTORY 272E

**HISTORY 373A. The European Expansion. 4-5 Units.**

The relationship between European monarchies and their colonial domains from the 16th-18th centuries. Reasons for expansion, methods, and results. Case studies include the Spanish, Portuguese, Dutch, French, and English domains in Africa, Asia, and the Americas. Readings include primary and secondary sources.

Same as: HISTORY 273

**HISTORY 373E. The Emergence of Nations in Latin America: Independence Through 1880. 4-5 Units.**

This course provides an introduction to the main themes of nineteenth-century Latin American history, including independence from Spain, the emergence of various nation-states, and the development of a new social, political, and economic order in the region.

Same as: HISTORY 273E

**HISTORY 374. Mexico Since 1876: History of a "Failed State"?. 5 Units.**

(Same as History 174.) This course is an introduction to the history and diverse peoples of modern Mexico from 1876 to the present. Through lectures, discussions, primary and secondary readings, short documentaries, and written assignments, students will critically explore and analyze the multiplicity of historical processes, events and trends that shaped and were shaped by Mexicans over the course of a century. The course will cover some of the social and political dimensions of rural social change, urbanization and industrialization, technological innovation and misuse, environmental degradation and conservation, education, ideology, culture and media, migration, and the drug trade.

**HISTORY 375B. Borders and Borderlands in Modern Mexico. 4-5 Units.**

Surveys the history of Mexico's borders and borderlands from the nineteenth century to the present. Examines theoretical conceptualizations of the borderlands as well as the historical development of identities and geographic borders within and around Mexico. Topics include the legacies of war, map making, the construction of *lo Mexicano*, the politics of culture, and migrations to, from, and through Mexico. Analyzes the prevailing trends in Mexicanist historiography.

**HISTORY 375C. History of Modern Mexico. 4-5 Units.**

Surveys the history of governance, resistance, and identity formation in Mexico from the nineteenth century to the present. Explores Mexico's historical struggles to achieve political stability, economic prosperity, and social justice and examines how regional, class, ethnic, and gender differences have figured prominently in the shaping of Mexican affairs. Topics include Mexico's wars and their legacies, the power of the state, violence and protest, debates over the meaning of "Mexicanness," youth culture, and the politics of indigenismo.

Same as: AMSTUD 275B, CHILATST 275B, CSRE 275B, HISTORY 275B

**HISTORY 376. Modern Brazil. 4-5 Units.**

From independence in 1822 to the present. Social and cultural history. Literary and historical sources.

Same as: HISTORY 276

**HISTORY 378A. The Logic of Authoritarian Government, Ancient and Modern. 5 Units.**

If authoritarianism is less economically efficient than democracy, and if authoritarianism is a less stable form of political organization than democracy, then why are there more authoritarian governments than democracies? To address this paradox, focus is on theoretical and empirical literature on authoritarian governments, and related literatures on the microeconomic analysis of property rights and credible commitments.

**HISTORY 379. Latin American Development: Economy and Society, 1800-2014. 4-5 Units.**

The newly independent nations of Latin America began the 19th century with economies roughly equal to the U.S. and Canada. What explains the economic gap that developed since 1800? Why are some Latin American nations rich and others poor and how have societies changed over time? Marxist, dependency, neoclassical, and institutionalist interpretive frameworks are explored. The effects of globalization on Latin American economic growth, autonomy, and potential for social justice are examined and debated.

Same as: HISTORY 279

**HISTORY 379D. Modern Brazil: Economy, Society & Culture. 4-5 Units.**

This course addresses the history of modern Brazil from independence in 1822 to the present day. The class focuses on theories of economic development, social structure and change, and cultural life in Brazil's diverse regions.

Same as: HISTORY 279D

**HISTORY 381. Economic and Social History of the Modern Middle East. 4-5 Units.**

The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market are combined with possible case studies of Egypt, Iraq, and Palestine.

**HISTORY 382. The United States and the Middle East since 1945. 4-5 Units.**

Since the end of WW II, U.S. interests in the Middle East have traditionally been defined as access to oil at a reasonable price, trade and markets, containing the influence of the Soviet Union, and the security of Israel. Is this the full range of U.S. interests? How has the pursuit of these interests changed over time? What forces have shaped U.S. policy? What is the impact of U.S. policy on the region itself?

Same as: HISTORY 282

**HISTORY 382F. History of Modern Turkey. 4-5 Units.**

Social, political and cultural history of Modern Turkey from the last decades of the Ottoman Empire in the late 19th century until Today. Themes include transformation from a multi-national empire to a national republic; Islam, secularism and radical modernism; military, bureaucracy and democratic experience; economic development, underdevelopment and class; Istanbul, Ankara and provincial Turkey; socialism, conservatism(s), and Kurdish challenge; Turkey in Europe, the Middle East and Central Asia; gender, sexuality and family; popular culture, soccer, and film industry; Post-Modernism, Neo-Ottomanism, and the New-Turkey; The class also include reading works of Turkish literature and watching movies by Turkish directors.

**HISTORY 382G. Israel from the Margins. 4-5 Units.**

Although secular, European Jews form a minority of the population of the State of Israel, and its history is typically narrated and interpreted from that perspective. Israel looks like a rather different place if it is seen and understood from the point of view of Middle Eastern and North African Jews, including those indigenous to the country before the advent of the modern Zionist movement, orthodox and ultra-orthodox Jews, Palestinian Arabs (nearly twenty percent of Israel's population today), migrant workers (about 200,000), and women. This course does not suggest that their perspectives are necessarily more real or true, only that an understanding of Israel that does not adequately consider them is necessarily false.

**HISTORY 383. The New Global Economy, Oil and Origins of the Arab Spring. 4-5 Units.**

This class uses the methods of political economy to study the trajectory of global capitalism from the end of World War II to the current phase of neoliberal globalization. The argument is that the role of oil, and its primary repository "the Middle East" has been central in the global capitalist order and that neoliberalism and the oil economy are closely linked to the eruption of the Arab uprisings of 2011.

Same as: HISTORY 283

**HISTORY 384F. Empires, Markets and Networks: Early Modern Islamic World and Beyond, 1500-1800. 4-5 Units.**

Focuses on political regimes, economic interactions and sociocultural formations in the early modern Balkans and Middle East to Central and South Asia. Topics include complex political systems of the Ottoman, Safavid and Mughal empires; experiences of various Muslim, Christian, Jewish and Hindu, as well as urban, rural and nomadic communities; consolidation of transregional commerce and cultural exchange; incorporation of the Islamic world in the global economy; transimperial networks of the Muslim and Non-Muslim merchants, scholars and sufis.

Same as: HISTORY 284F

**HISTORY 385A. Core Colloquium in Jewish History, 17th-19th Centuries. 4-5 Units.**

Same as: JEWISHST 385A

**HISTORY 385B. Core in Jewish History, 20th Century. 4-5 Units.**

Instructor consent required.

Same as: JEWISHST 385B

**HISTORY 385C. Jews in the Contemporary World: Faith and Ethnicity, Vulnerability and Visibility. 5 Units.**

This course explores the full expanse of Jewish life today and in the recent past. The inner workings of religious faith, the content of Jewish identity, shorn of belief, the interplay between Jewish powerlessness and influence, the myth and reality of Jewish genius, the continued pertinence of antisemitism, the rhythms of Jewish economic life – all these will be examined in weekly lectures, classroom discussion, and with the use of a widely diverse range of readings, films, and other material. Explored in depth will be the ideas and practices of Zionism, the content of contemporary secularism and religious Orthodoxy, the impact Holocaust, the continued crisis facing Israel and the Palestinians. Who is to be considered Jewish, in any event, especially since so many of the best known (Spinoza, Freud, Marx) have had little if anything to do with Jewish life with their relationships to it indifferent, even hostile?

Same as: CSRE 185B, HISTORY 185B, JEWISHST 185B, REES 185B

**HISTORY 385K. History of Modern Antisemitism: Nineteenth and Twentieth Centuries. 4-5 Units.**

The articulations of anti-Jewish hatred from the advent of Jewish emancipation in Europe. The legacy of premodern Christian demonization and its modern protean transformations as they penetrated and annexed new currents of ideology, notions of identity (social, national, racial), taste, and aesthetics. A history of ideas, representations, and stereotypes, and their relation to historical experience, action, and mobilization. Europe is the focus; case studies also include the Middle East and elsewhere.

**HISTORY 386. Jews Among Muslims in Modern Times. 4-5 Units.**

The history of Jewish communities in the lands of Islam and their relations with the surrounding Muslim populations from the time of Muhammad to the 20th century. Topics: the place of Jews in Muslim societies, Jewish communal life, variation in the experience of communities in different Muslim lands, the impact of the West in the Modern period, the rise of nationalisms, and the end of Jewish life in Muslim countries.

Same as: HISTORY 286, JEWISHST 286, JEWISHST 386

**HISTORY 386B. The Ottoman Empire in the Age of Revolutions, 1750-1850. 4-5 Units.**

Investigates the Ottoman World (the Balkans and the Middle East under the Ottoman Empire) in the Age of Revolutions in the global context. While the Ottoman World is the primary interest, developments in Europe, India and China are also discussed in a comparative perspective. Topics include military and fiscal transformation; regionalism; urban life and formations of public spheres; political crisis, social disturbances and political violence; transformation in the ethno-religious structures, gender relations and family life; proto-nationalism in the Balkans and Egypt.

**HISTORY 387C. Zionism and Its Critics. 4-5 Units.**

Zionism from its genesis in the 1880s up until the establishment of the state of Israel in May, 1948, exploring the historical, ideological and political dimensions of Zionism. Topics include: the emergence of Zionism ideology in connection to and as a response to challenges of modernity; emancipation; Haskalah (Jewish enlightenment); other national and ideological movements of the period; the ideological crystallization of the movement; and the immigration waves to Palestine.

**HISTORY 387K. Gentlemen and Jews: History of the Jews of England. 4-5 Units.**

Focuses on key chapters in the cultural and political histories of Britain and its Jews, between 1650 and 1950 and examines the advantages, as well as possible difficulties, that emerge when connecting Anglo-Jewish history to mainstream British history. What is unique about Jewish emancipation in England, and what are its connections to the formation of British national identity? Is there a unique path in which Jewish Enlightenment developed in England? What was the contribution of Jews to British Imperialism? Is there a cultural affinity between English philosemitism and liberalism?

**HISTORY 388. Palestine and the Arab-Israeli Conflict. 4-5 Units.**

This course examines some salient issues of the Israeli-Palestinian conflict from the late 19th century to the present. At the end of the course you should be able to articulate the positions of the major parties to the conflict, with the understanding that there is no single, unified Zionist (or Jewish) or Palestinian (or Arab) position. One quarter does not allow sufficient time to cover even all of the important topics comprehensively (for example, the role of the Arab states, the USA and the USSR, and the internal history of Israel receive less attention than is desirable). Some prior knowledge of Middle East history is desirable, but not required. Vigorous debate and criticism are strongly encouraged. Criticism and response expressed in a civil tone is an important way to get a fuller and more truthful picture of something. This is not only a fundamental democratic right and a basic citizenship skill, but it is essential to interpreting information and making good policy. Rights not used are easily lost.

Same as: HISTORY 288, JEWISHST 288, JEWISHST 388

**HISTORY 390. North Korea in Historical Perspective. 4-5 Units.**

This colloquium will approach North Korea from a longer historical perspective and also discuss the country's current crisis and its future. Themes will include the northern region in colonial Korea, Kim Il Sung and Manchurian guerrillas, the USSR and North Korean Revolution, the reconstruction after the Korean War, Juche ideology and the political system, the everyday life of North Korea people, the Cold War and North Korean diplomacy, culture and mass performance, the great famine and economy in transition, the military and nuclear development, and refugees and the succession of leadership.

Same as: HISTORY 290

**HISTORY 390A. Major Topics in Modern Chinese History: Qing/Republican Transition. 4-5 Units.**

Continuities and discontinuities in society, economy, politics, culture, and thought during the transition from the Qing dynasty to the republic. May be repeated for credit.

**HISTORY 391. East Asia in the Early Buddhist Age. 4-5 Units.**

Evolution of cities in imperial China through early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative examination of cases from European history.

**HISTORY 391A. Archaeology and Modernity in Asia: The Excavation of Ancient Civilizations in Modern Times. 4-5 Units.**

The interplay in Asia between antiquity and modernity, civilization and nation state, and national versus colonial science. The recent excavation of artifacts and places associated with Asian civilization such as the terracotta warriors in China and Angkor Wat in Cambodia. How Asian states have grappled with modernity and colonialism as they simultaneously dug up their ancient pasts.

Same as: HISTORY 291A

**HISTORY 391B. The City in Imperial China. 5 Units.**

The evolution of cities in the early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative cases from European history. Readings include primary and secondary sources, and visual materials.

**HISTORY 391C. Early Imperial China. 4-5 Units.**

The first millennium of imperial China, what endured over the centuries, and the major changes that took place in the political, social, and intellectual realms. Topics include the evolving geographic and environmental background, cities, the countryside, kinship, relations with the outer world, religion, philosophy, and literature. Also examines the nature of empire as a distinctive political form.

**HISTORY 391G. Pre-Modern Chinese Warfare. 4-5 Units.**

This course examines the evolution of warfare in China, and its impact on the evolving political and social orders, from the earliest states through the Mongol conquest. It will study how changing military technology was inextricably linked to changes in the state and society. It will also look at changing Chinese attitudes towards warfare over the same period, from the celebration of heroism, through writing about warfare as an intellectual art, to the links of militarism with steppe peoples/.

Same as: HISTORY 291G

**HISTORY 392B. Law and Society in Late Imperial China. 4-5 Units.**

(Same as LAW 773.) Connections between legal and social history. Ideology and practice, center and periphery, and state-society tensions and interactions. Readings introduce the work of major historians on concepts and problems in Ming-Qing history.

Same as: CHINLIT 392B

**HISTORY 392D. Japan in Asia, Asia in Japan. 4-5 Units.**

How Japan and Asia mutually shaped each other in the late 19th and 20th centuries. Focus is on Japanese imperialism in Asia and its postwar legacies. Topics include: pan-Asianism and orientalism; colonial modernization in Korea and Taiwan; collaboration and resistance; popular imperialism in Manchuria; total war and empire; comfort women and the politics of apology; the issue of resident Koreans; and economic and cultural integration of postwar Asia.

Same as: HISTORY 292D

**HISTORY 392E. The Historical Roots of Modern East Asia. 4-5 Units.**

Focus is on China and Japan before and during their transition to modernity. The populous, urbanized, economically advanced, and culturally sophisticated Ming empire and Muromachi shogunate in the 16th century when Europeans first arrived. How the status quo had turned on its head by the early 20th century when European and American steamships dominated the Pacific, China was in social and political upheaval, and Japan had begun its march to empire.

Same as: HISTORY 92A

**HISTORY 392F. Culture and Religions in Korean History. 4-5 Units.**

This colloquium explores the major themes of Korean history before 1800 and the role of culture and religions in shaping the everyday life of Chosôn-dynasty Koreans. Themes include the aristocracy and military in the Koryô dynasty, Buddhism and Confucianism in the making of Chosôn Korea, kingship and court culture, slavery and women, family and rituals, death and punishment, and the Korean alphabet (Hangûl) and print culture.

Same as: HISTORY 292F

**HISTORY 392G. Modern Korea. 4-5 Units.**

Examines seminal works and major historical debates in the study of modern Korea. Topics include the state and society in the Choson dynasty, reform and rebellion in the nineteenth century, colonization, gender and colonial modernity, national identity and assimilation, wartime colonial Korea, decolonization and the North Korean revolution, the Korean War and its aftermath, the Pak Chung Hee regime and labor relations, and democratization.

**HISTORY 393A. State, Society, and Economy in Qing Dynasty China. 4-5 Units.**

Historical scholarship on China during the Qing period, including the gentry, civil examinations, and the debate about social mobility; merchants, cities, and the debate about civil society/public sphere; taxation, local security, and famine relief; heterodoxy, collective violence, and rebellion; and rival approaches (neo-Malthusian, neo-conservative, and neo-Marxist) to understanding the high Qing economy.

**HISTORY 393B. Queer History in Comparative Perspective. 4-5 Units.**

Comparative history of homoerotic desire, relations, and identity through scholarship on different historical periods and parts of the world: the classical Mediterranean, early modern European cities, late imperial and modern China, Tokugawa and modern Japan, and the U.S.

Same as: FEMGEN 293B, FEMGEN 393B, HISTORY 293B

**HISTORY 393C. Late Imperial China. 4-5 Units.**

A survey of Chinese history from the 11th century to the collapse of the imperial state in 1911. Topics include absolutism, gentry society, popular culture, gender and sexuality, steppe nomads, the Jesuits in China, peasant rebellion, ethnic conflict, opium, and the impact of Western imperialism.

**HISTORY 393D. Global Intellectual History. 4-5 Units.**

Ideas have circulated globally for millennia but relatively recently have thinkers begun to conceptualize the global. Like "humanity" and "universalism," or what Marx called "international," the "global" too has complex genealogies. It is associated, often simultaneously, with empire and freedom, war and equality, commitment and treason, piracy and justice, homelessness and cosmopolitanism. Working with key 20th century texts from Italy, Britain, India, Israel, Palestine, Germany, France, and Algeria, course explores how thinking "globally" impacts the very foundations of modern political thought.

Same as: HISTORY 293D

**HISTORY 393E. Female Divinities in China. 4-5 Units.**

This course examines the fundamental role of powerful goddesses in Chinese religion. It covers the entire range of imperial history and down to the present. It will look at, among other questions, what roles goddesses played in the spirit world, how this is related to the roles of human women, and why a civilization that excluded women from the public sphere granted them a dominant place, in the religious sphere. It is based entirely on readings in English.

Same as: HISTORY 293E, RELIGST 257X, RELIGST 357X

**HISTORY 394D. Manchuria: Cradle of Conflict, Cockpit of Asia. 4-5 Units.**

How did Manchuria become Chinese? This course utilizes the dual waves of early twentieth-century writings and a wide array of recent scholarship dealing with Manchuria to explore the formation of nation-states out of the Qing and Japanese empires in Northeast Asia through the lenses of opium, migration, cities, warlords, and memoir. This course will be of interest to students concerned with developing transcultural understandings of Northeast Asian history.

Same as: HISTORY 294D

**HISTORY 395. Modern Korean History. 5 Units.**

(Same as HISTORY 95. History majors and others taking 5 units, register for 195.) This lecture course provides a general introduction to the history of modern Korea. Themes include the characteristics of the Chosŏn dynasty, reforms and rebellions in the nineteenth century, Korean nationalism; Japan's colonial rule and Korean identities; decolonization and the Korean War; and the different state-building processes in North and South, South Korea's democratization in 1980s, and the current North Korean crisis.

Same as: HISTORY 195

**HISTORY 395B. Early Modern Japan. 4-5 Units.****HISTORY 395F. Race and Ethnicity in East Asia. 4-5 Units.**

Intensive exploration of major issues in the history of race and ethnicity in China, Japan, and Korea from the early modern period to the present day.

Same as: ASNAMST 295F, HISTORY 295F

**HISTORY 395J. Gender and Sexuality in Chinese History. 4-5 Units.**

Same as: FEMGEN 395J

**HISTORY 396D. Historiography of Modern Japan. 4-5 Units.**

Introduces students to the major historical problems and historiographic trends in the study of modern Japan from the Meiji period to the present. Themes include approaches to late Meiji culture and politics, the formation of imperial subjects and citizens, agrarian society and politics, gender in modern Japan, empire and modernity, total war and transwar state and society, U.S. occupation, and postwar Japan.

**HISTORY 397. The Cold War and East Asia. 5 Units.**

Explores how East Asia negotiated superpower rivalry and global ideological competition during the Cold War. Considers the ways in which China, Japan, and Korea were more than battlegrounds for US-Soviet contestation and played active roles in defining the nature and dynamics of the conflict. Re-examines conventional narratives and periodizations against alternative conceptual models and interpretive frameworks highlighting the constructed nature of the struggle as well as the role of historical and cultural factors in shaping the East Asian experience.

Same as: HISTORY 297

**HISTORY 398. Modern China: State, Society, and Economy. 4-5 Units.**

Advanced graduate colloquium in modern Chinese history.

**HISTORY 399A. Preparing for International Field Work: Public Service or Research. 1 Unit.**

Open to students in all classes, those planning internships abroad and those planning research, from juniors with honors theses and sophomores with Chappell Lougee grants to freshmen thinking ahead. Introduces resources on campus for planning international research and service. Raises issues that need to be considered in advance of going abroad: ethical concerns, Human Subjects Protocol, networking, personal safety and gender issues, confronting cultural differences. Exposes students to research methods: case studies, interviewing, working in foreign libraries and archives.

Same as: HISTORY 299X

**HISTORY 399E. Preparing for International Field Research: Public Svc or Research, Electronic Version. 1 Unit.**

Restricted to students studying at a Stanford Overseas Studies campus; same course content as HISTORY 299X. Problems involved in research abroad: ethical issues; safety; security and conduct; human subjects protocol. Methodologies of research: interviewing, networking, case studies, participant observation, large surveys. Prerequisite: consent of instructor.

**HISTORY 399T. Tough Questions. 1 Unit.**

A H&S initiative course.

Same as: HISTORY 299T

**HISTORY 399W. Graduate Directed Reading. 1-10 Unit.****HISTORY 401A. Spatial History: Concepts, Methods, Problems. 4-5 Units.**

Technical training in GIS, with modules taught by Stanford Spatial History Lab staff; conceptual work in the use of these techniques in spatial historical analysis. Students develop their own spatial history projects and produce beta versions of dynamic visualizations.

**HISTORY 401B. Spatial History, Part II. 4-5 Units.**

Prerequisite: 401A.

**HISTORY 406. Graduate Research Seminar on Colonial Law. 4-5 Units.**

Prerequisite: HISTORY 306G.

**HISTORY 414A. Medieval History. 4-5 Units.****HISTORY 414B. Medieval History. 4-5 Units.****HISTORY 421A. Early Modern Russia. 4-5 Units.****HISTORY 422A. Research Seminar on the History of the Russian Empire. 4-5 Units.****HISTORY 422B. Research Seminar in Imperial Russia. 4-5 Units.**

**HISTORY 424A. The Soviet Civilization. 4-5 Units.**

Socialist visions and practices of the organization of society and messianic politics; the Soviet understanding of mass violence, political and ethnic; and living space. Primary and secondary sources. Research paper or historiographical essay.

Same as: HISTORY 224A, REES 224A

**HISTORY 424B. The Soviet Civilization, Part 2. 4-5 Units.**

Prerequisite: HISTORY 224A/424A.

Same as: HISTORY 224D

**HISTORY 424C. The End of Communism in Europe. 4-5 Units.**

Causes, course, and consequences.

**HISTORY 430. Graduate Research Seminar: Early Modern Europe. 4-5 Units.**

Prerequisite: HISTORY 302B. Students may research any aspect of late medieval, Renaissance, and early modern history, ca. 1300-1800. Students wishing to take this seminar must enroll in HISTORY 302B (Coffee, Sugar, and Chocolate: Commodities and Consumption, 1200-1800) in Winter 2016.

**HISTORY 430A. Graduate Research Seminar: Early Modern Europe. 3-5 Units.**

Students will begin a research project on any aspect of early modern European history, 1400-1800, by taking HISTORY 430A in winter quarter as the first quarter of this two-quarter sequence. Enrollment by permission of instructor.

**HISTORY 431. Early Modern Things. 4-5 Units.**

How do objects reveal their histories? What can be learned about the past by studying things? The material culture of early modern Europe, ca 1450-1750. Recent work on the circulation, use, and consumption of things, starting with the Columbian exchange which expanded the material horizons of the early modern world in the late 15th century, exploring challenges to the meaning of things in the age of the Reformation and Scientific Revolution, and ending with the birth of consumer society in the 18th century How did the meaning of things and people's relationships to them change over these centuries? What objects, ordinary and extraordinary, secular and sacred, natural and man-made, came to define the emerging features of the early modern world?.

**HISTORY 432A. The Enlightenment. 3-5 Units.**

The Enlightenment as a philosophical, literary, and political movement. Themes include the nature and limits of philosophy, the grounds for critical intellectual engagement, the institution of society and the public, and freedom, equality and human progress. Authors include Voltaire, Montesquieu, Rousseau, Hume, Diderot, and Condorcet.

Same as: DLCL 324, FRENCH 244, HISTORY 234, HISTORY 334, HUMNTIES 324

**HISTORY 432B. Grad Research Seminar: The Enlightenment, Pt. II. 4-5 Units.**

Prerequisite: Completion of HISTORY 234, 334 or 432A.

**HISTORY 433A. Research Seminar in Modern Europe: Society and Politics. 5 Units.**

The goal of this course is to introduce graduate students to major works of history and literature in the field of nineteenth and early-twentieth century history. A colloquia will be given in tandem with a research seminar. May be repeated for credit.

**HISTORY 433B. Research Seminar in Modern Europe. 4-5 Units.**

Prerequisite: HISTORY 433A.

**HISTORY 438. European History Workshop. 1 Unit.**

All European history graduate students in residence register for this weekly workshop, at which dissertation chapters and prospectuses, papers, and grant proposals by students and faculty are read and discussed.

**HISTORY 439A. Graduate Research Seminar: Modern Britain and the British Empire. 4-5 Units.****HISTORY 439B. Graduate Research Seminar: Modern Britain and the British Empire II. 4-5 Units.****HISTORY 443A. Human Origins: History, Evidence, and Controversy. 4-5 Units.**

Research seminar. Debates and controversies include: theories of human origins; interpretations of fossils, early art, and the oldest tools; the origin and fate of the Neanderthals; evolutionary themes in literature and film; visual rhetoric and cliché in anthropological dioramas and phyletic diagrams; the significance of hunting, gathering, and grandmothering; climatological theories and neocatastrophic geologies; molecular anthropology; the impact of racial theories on human origins discourse. Background in human evolution not required.

Same as: HISTORY 243S

**HISTORY 444. Graduate Research Seminar: Gender in Science, Medicine, and Engineering. 5 Units.**

Theory and practice of gender in STEM. 1. "Fix the Numbers of Women" focuses on increasing women's participation; 2. "Fix the Institutions" promotes gender equality in careers through structural change in research organizations; 3. "Fix the Knowledge" or "gendered innovations" stimulates excellence in science and technology by integrating gender analysis into research. Seminar explores harnessing the creative power of gender analysis to enhance knowledge and spark innovation.

Same as: FEMGEN 444

**HISTORY 444C. The History of the Body in Science, Medicine, and Culture. 4-5 Units.**

The human body as a natural and cultural object, historicized. The crosscultural history of the body from the 18th century to the present. Topics include: sciences of sex and race; medical discovery of particular body parts; human experimentation, foot binding, veiling, and other bodily coverings; thinness and obesity; notions of the body politic.

Same as: HISTORY 244C

**HISTORY 445A. Research Seminar in African History. 4-5 Units.**

Primary sources such as government records and missionary archives. Students present work in progress. Prerequisite: consent of instructor.

**HISTORY 445B. Research Seminar in African History. 4-5 Units.**

Primary sources such as government records and missionary archives. Students present work in progress. Prerequisite: consent of instructor.

**HISTORY 448A. Colonial States and African Societies, Part I. 4-5 Units.**

Colonialism set in motion profound transformations of African societies. These transformations did not occur immediately following military conquest, nor did they occur uniformly throughout the continent. This research seminar will focus directly on the encounter between the colonial state and African societies. The seminar will examine problems of social transformation, the role of the colonial state, and the actions of Africans. Following four weeks of colloquium style discussion, students then embark on independent research on the encounter between one colonial state and its constituent African societies.

Same as: HISTORY 248S

**HISTORY 448B. Colonial States and African Societies, Part II. 4-5 Units.**

Second part of the research seminar offered in the Winter. Students continue their research and present their penultimate drafts in week 8.

Same as: HISTORY 249S

**HISTORY 459A. Grad Research Seminar in U.S. History. 4-5 Units.****HISTORY 460. Research Seminar in America in the World. 4-5 Units.**

Ways to place American history in an international context. Comparative, transnational, diplomatic, and world systems are approaches to complete a research paper based on research into primary materials. Historical methodologies, research strategies, and essay projects. May be repeated for credit.

**HISTORY 461A. Research Seminar on the Histories of Women, the Family, and Sexuality. 4-5 Units.**

Research design, research methods, and historical writing on topics in the histories of women, the family, or sexuality in the U.S. Prepares graduate students for dissertation work. Workshop model involves exchanging preliminary prospectus, outline, writing sample, and draft for peer responses. Article-length original paper based on primary sources, to be completed by the end of Spring Quarter.

**HISTORY 461B. Research Seminar on the Histories of Women, the Family, and Sexuality, Part II. 4-5 Units.**

Prerequisite: 461A.

**HISTORY 471A. Environmental History of Latin America. 5 Units.**

What role did the natural environment play in the emergence of Latin America as a distinct geographical and socio-cultural world region? How do we analyze the historical relationship between the regions rich and seemingly abundant natural resources and its status as underdeveloped? What historical consequences did this relationship have and what alternative, more sustainable developmental paths can we envision for the future in light of the past that we will study? In this course, students will become familiar with the historiography on Brazil, Mexico, Peru, Cuba and Honduras that has explored these questions through a variety of approaches, methodologies and points of view.

**HISTORY 471B. Environmental History of Latin America. 5 Units.**

What role did the natural environment play in the emergence of Latin America as a distinct geographical and socio-cultural world region? How do we analyze the historical relationship between the region's rich and seemingly abundant natural resources and its status as 'underdeveloped'? What historical consequences did this relationship have and what alternative, more sustainable developmental paths can we envision for the future in light of the past that we will study? In this course, students will become familiar with the historiography on Brazil, Mexico, Peru, Cuba and Honduras that has explored these questions through a variety of approaches, methodologies and points of view.

**HISTORY 477. Transnational Latina/o History. 4-5 Units.**

The course explores the major trends in Latin American migration to the United States. We examine the impact of transnational migration on identity formation, economic relations, and policy debates in Latin America and the United States. Topics include citizenship debates, struggles over immigration reform, transnational identity formation, refugee migration and Cold War politics, Latino alliances in the United States, and the effects of gender and sexuality on Latina/o communities.

**HISTORY 477B. Transnational Latina/o History, Part 2. 4-5 Units.**

The course explores the major trends in Latin American migration to the United States. We examine the impact of transnational migration on identity formation, economic relations, and policy debates in Latin America and the United States. Topics include citizenship debates, struggles over immigration reform, transnational identity formation, refugee migration and Cold War politics, Latino alliances in the United States, and the effects of gender and sexuality on Latina/o communities. Prerequisite: History 477.

**HISTORY 478. The Ethical Challenges of Climate Change. 4-5 Units.**

This course explores the ethical challenges of climate change from historical, social, economic, political, cultural and scientific perspectives. These include the discovery of global warming over two centuries, the rise of secular and religious denialism and skepticism toward the scientific consensus on it, the dispute between developed and developing countries over how to forge a binding global agreement to mitigate it, and the "role morality" of various actors (scientists, politicians, fossil fuel companies, the media and ordinary individuals) in the US in assessing ethical responsibility for the problem and its solutions. Same as: HISTORY 278S

**HISTORY 481. Research Seminar in Middle East History. 4-5 Units.**

Student-selected research topics. Same as: JEWISHST 287S, JEWISHST 481

**HISTORY 481A. Research Seminar in Middle East History. 4-5 Units.****HISTORY 486A. Graduate Research Seminar in Jewish History. 4-5 Units.**

Same as: JEWISHST 486A

**HISTORY 486B. Graduate Research Seminar in Jewish History. 4-5 Units.**

Prerequisite: HISTORY 486A.

Same as: JEWISHST 486B

**HISTORY 491A. Modern Korea Research Seminar. 4-5 Units.**

This graduate seminar prepares students to undertake research using Korean-language sources on a variety of themes in modern Korea. Students will identify characteristics of major online and offline archives in Korean studies, learn essential skills in investigating primary sources, and analyze selected sample documents in class.

**HISTORY 491B. Modern Korea Research Seminar. 4-5 Units.**

This graduate seminar prepares students to undertake research using Korean-language sources on a variety of themes in modern Korea. Students will identify characteristics of major online and offline archives in Korean studies, learn essential skills in investigating primary sources, and analyze selected sample documents in class.

**HISTORY 492B. Origins of Technical Medicine in the Han Dynasty. 4-5 Units.**

How medicine as a technical, text-based art monopolized by specialists was established under the Han Dynasty in competition with practices aimed at nourishing life and securing longevity.

**HISTORY 493. Graduate Seminar on Modern Political Thought. 4-5 Units.**

A series of texts and documents that form the heart of what Marx and Engels called "the colonial question". Discussions center on specific themes relating to each student's research topic and/or interests. The seminar will be organized around a set of core common readings and weekly discussions, supplemented by a designed list of secondary texts and primary materials. Themes include: secularism, religion, state, capital, empire, anticolonialism, gender, democracy, textual and print cultures, cinema, political and legal theory, and history of economic thought. 400-level options allows students to do a two-quarter sequence, with the Spring devoted to writing up the research paper. Same as: HISTORY 293A

Same as: HISTORY 293A

**HISTORY 495B. Qing Legal Documents. 4-5 Units.**

How to use Qing legal documents for research. Winter: sample documents that introduce the main genres including: the Qing code and commentaries; magistrates' handbooks and published case collections; and case records from Chinese archives. Spring: class meets occasionally; students complete research papers. Prerequisite: advanced reading ability in Chinese.

**HISTORY 496A. Research Seminar in Chinese History. 4-5 Units.**

First part of a two part sequence. Primary sources and research methods to be used in the study of modern Chinese history.

**HISTORY 496B. Research Seminar in Chinese History. 4-5 Units.**

Second part of a two part sequence. Primary sources and research methods to be used in the study of modern Chinese history. Prerequisite: HISTORY 496A.

**HISTORY 497A. Maps and Gazetteers as Sources for East Asian History. 4-5 Units.**

For graduate students of early modern or modern East Asia. Includes weekend workshop on Chinese historical GIS with Harvard's Peter Bol. Students work with the Stanford Spatial History Lab to develop analytical techniques. Prerequisite: background in GIS.

**HISTORY 497B. Maps and Gazetteers as Sources for East Asian History, Part 2. 4-5 Units.**

Prerequisite: HISTORY 497A.

**HISTORY 498D. Japanese Imperial Archives, Part 2. 4-5 Units.**

Second part of a two-quarter research graduate seminar on Japanese imperialism in Asia. Students complete research papers based on research conducted for History 498C; the class meets occasionally to report on progress and discuss working drafts. Prerequisite: History 498C.

**HISTORY 499X. Graduate Research. 1-10 Unit.**

Units by arrangement. May be repeated for credit.

**HISTORY 802. TGR Dissertation. 0 Units.**

Units by arrangement.

**History & Philosophy of Science Courses****HPS 60. Introduction to Philosophy of Science. 5 Units.**

The nature of scientific knowledge: evidence and confirmation; scientific explanation; models and theories; objectivity; science, society, and values.

Same as: PHIL 60

**HPS 61. Philosophy and the Scientific Revolution. 5 Units.**

Galileo's defense of the Copernican world-system that initiated the scientific revolution of the 17th century, led to conflict between science and religion, and influenced the development of modern philosophy. Readings focus on Galileo and Descartes.

Same as: PHIL 61

**HPS 199. Directed Reading. 1-15 Unit.**

May be repeated for credit.

**HPS 299. Graduate Individual Work. 1-15 Unit.**

May be repeated for credit.

**Human Biology Courses****HUMBIO 2A. Genetics, Evolution, and Ecology. 5 Units.**

Introduction to the principles of classical and modern genetics, evolutionary theory, and population biology. Topics: micro- and macro-evolution, population and molecular genetics, biodiversity, and ecology, emphasizing the genetics and ecology of the evolutionary process and applications to human populations. HUMBIO 2A and 2B must be taken concurrently.

**HUMBIO 2B. Culture, Evolution, and Society. 5 Units.**

Introduction to the evolutionary study of human diversity. Hominid evolution, the origins of social complexity, social theory, and the emergence of the modern world system, emphasizing the concept of culture and its influence on human differences. HUMBIO 2A and 2B must be taken concurrently.

**HUMBIO 3A. Cell and Developmental Biology. 5 Units.**

The principles of the biology of cells: principles of human developmental biology, biochemistry of energetics and metabolism, the nature of membranes and organelles, hormone action and signal transduction in normal and diseased states (diabetes, cancer, autoimmune diseases), drug discovery, immunology, and drug addiction. HUMBIO 3A and 3B must be taken concurrently. Prerequisite: college chemistry or completion of the HumBio Core on-line chemistry lecture series during the fall quarter.

**HUMBIO 3B. Behavior, Health, and Development. 5 Units.**

Research and theory on human behavior, health, and life span development. How biological factors and cultural practices influence cognition, emotion, motivation, personality, and health in childhood, adolescence, and adulthood. HUMBIO 3A and 3B must be taken concurrently.

**HUMBIO 3Y. Practicum in Child Development. 1 Unit.**

Practicum experience at Bing Nursery School for 1 1/4 hours of observation per week, class meeting every other week for 1 hour. Pre- or corequisite: 3B.

**HUMBIO 4A. The Human Organism. 5 Units.**

Organ system physiology: the principles of neurobiology and endocrinology, and the functions of body organs. The mechanisms of control, regulation, and integration of organ systems function. HUMBIO 4A and 4B must be taken concurrently.

**HUMBIO 4B. Environmental and Health Policy Analysis. 5 Units.**

Connections among the life sciences, social sciences, public health, and public policy. The economic, social, and institutional factors that underlie environmental degradation, the incidence of disease, and inequalities in health status and access to health care. Public policies to address these problems. Topics include pollution regulation, climate change policy, biodiversity protection, health care reform, health disparities, and women's health policy. HUMBIO 4A and 4B must be taken concurrently.

**HUMBIO 5E. Science Education in Human Biology. 1 Unit.**

In this seminar, students will become familiar with current research on science education. They will use this knowledge to create and analyze teaching material such as section plans, exams, and problem sets. Material produced in this course will be related to the topics covered in the core course of the Program in Human Biology. Students will experience and practice various teaching styles. Prerequisite: HumBio Core or equivalent.

**HUMBIO 6. Human Origins. 5 Units.**

The human fossil record from the first non-human primates in the late Cretaceous or early Paleocene, 80-65 million years ago, to the anatomically modern people in the late Pleistocene, between 100,000 to 50,000 B.C.E. Emphasis is on broad evolutionary trends and the natural selective forces behind them.

Same as: ANTHRO 6, ANTHRO 206

**HUMBIO 9. Public Service Internship Preparation. 1 Unit.**

Are you prepared for your internship this summer? This workshop series will help you make the most of your internship experience by setting learning goals in advance; negotiating and communicating clear roles and expectations; preparing for a professional role in a non-profit, government, or community setting; and reflecting with successful interns and community partners on how to prepare sufficiently ahead of time. You will read, discuss, and hear from guest speakers, as well as develop a learning plan specific to your summer or academic year internship placement. This course is primarily designed for students who have already identified an internship for summer or a later quarter. You are welcome to attend any and all workshops, but must attend the entire series and do the assignments for 1 unit of credit.

Same as: ARTSINST 40, EARTHYSYS 9, EDUC 9, PUBLPOL 74, URBANST 101

**HUMBIO 11SI. Health and Wellness for Generation Y: A post-college Survival. 1 Unit.**

After living in the Stanford Bubble for 4 years, the thought of the rest of our lives can be a bit daunting. This 10-week seminar will cover key topics for a successful transition into the "real world" such as personal finance, health and nutrition, relationships, careers, and mindfulness, all through the interdisciplinary lens of Human Biology.

**HUMBIO 15SC. Parks and Peoples in Patagonia: Dilemmas of Protected Area Conservation. 2 Units.**

This course uses the diverse parks and reserves of Patagonia as a laboratory for understanding the pros and cons of protected area conservation as they impact flora, fauna, and local people. We will explore national parks and protected areas (PAs) in both Argentina and Chile, as well as the flourishing establishment of private parks and reserves in the region. We will use a series of case studies to ask: (1) What approach to protected area (PA) conservation has been taken in each case? Who are/were the key proponents and what are/were their main objectives? Was climate change taken into account and if so, how? (2) What have been the main costs and benefits of the PA, and who has received them? Where benefits are not commensurate to costs what is being done to address the imbalance? And (3) Are there alternatives or variations-on-the-theme of protected area conservation that would be more beneficial for wildlife and local people? How could the interests of parks and people be made more compatible in each case? Throughout the course we will look for ways to achieve conservation in a manner that is socially just, biologically successful, and beneficial to local livelihoods.

The class will begin on the Stanford campus at the same time as other Sophomore College courses. But on Sept. 12 we depart on an intensive thirteen-day expedition (at no extra cost) to Argentina and Chile to observe firsthand many of the conservation issues and successes discussed in class. For this portion of the class, undergraduates will be joined by a group of Stanford alumni and friends in a format called a Stanford "Field Seminar." Because our class time on campus is limited to one week before travel, students will be required to complete all course readings over the summer. Both on campus and in South America, the course emphasizes student contributions and presentations. Students will be asked to lead discussions and carry out literature research on the conservation challenges of particular Patagonian protected areas and species. The final assignment for the seminar is to complete a seven- to ten-page paper on their findings and to present the main conclusions of that paper in a joint seminar of undergrads and alumni as we travel in Patagonia.

Note: Students will arrive on campus and will be housed at Stanford until we leave for Patagonia. The travel components of the course are organized and managed by the Travel/Study Program of the Stanford Alumni Association. The costs of the trip (except incidentals) are included, thanks to the support of the Stanford Field Seminar Fund and generous donors. Students will return to campus on Sunday, September 25, the day before the fall term begins. Sophomore College course, applications required. Submit by April 5, 2016 at <http://soco.stanford.edu>.

Same as: ANTHRO 25SC

**HUMBIO 16SC. The Stanford Safari: Field Observations in Our Own Backyard. 2 Units.**

Although Stanford is renowned as a place of learning and research, the goal of this class is to approach Stanford University as a subject worthy of study in and of itself. Students will study Stanford in terms of the built environment (e.g. architecture; how buildings and styles interact; how the landscape shapes the flow of people, plants, and animals), the human interactions (e.g. sociology of tourism, the politics of land use), and the ecology (flora, fauna, geology, climatology, and pest control) of campus.

The students in this course will defamiliarize themselves with their campus environment and approach Stanford with new eyes—the eyes of the anthropologist, the photographer, the historian, the artist, and the tourist. We will explore its edifices, gardens, sculptures, open spaces, and commercial areas. Moreover, we will use Stanford as a lens to discuss a variety of disciplines: architecture, educational theory, California history, climatology, and natural history. But more than anything, we will focus on the human component, including the vision, drive, and serendipity that shaped the University.

In taking the course students will hone their skills in field observation that will carry over to future field work in more distant locales, develop an interdisciplinary approach to analyzing complex institutions, and gain a deeper appreciation for the complexity and richness of Stanford that will enhance all aspects of their remaining time as undergraduates. On a daily basis, the class will consist of three components: class presentations and discussions, formal and informal talks by many of the local experts at Stanford, and topical field trips. Students will select a theme that is of personal interest and develop field observation techniques useful for their particular topics. Course assignments will be to give two presentations on specific aspects of Stanford. In addition, each student will keep a field note-book with daily observations and field notes, post a collection of photographic observations, and complete pertinent readings. Plan to work intensely and have a great time in the process.

**HUMBIO 18SC. Conservation and Development Dilemmas in the Amazon. 2 Units.**

This course explores the human dimensions of conservation efforts under way in the Amazon Basin of South America. It has two specific goals: (1) to introduce the human ecology of Amazonia; and (2) to assess the prospects for joint efforts at biodiversity conservation and community development. We will draw on case studies to investigate such topics as the causes and consequences of deforestation, the social impact of parks and protected areas, and the potential for "Integrated Conservation and Development Projects" (ICDPs) such as extractive reserves, natural forest management, biodiversity prospecting, and community-based ecotourism. The course views Amazonia as a microcosm of the challenges facing conservation and development efforts today in the Third World.

Part of the course is an intensive 11-day expedition to the Peruvian Amazon, at no extra cost, to observe firsthand the conservation and development dilemmas discussed in class. We will visit ecolodges in the rainforest, walking miles of trails to learn about local flora, fauna, and conservation efforts. We will also visit Machu Picchu in the upper reaches of the rainforest. For the travel portion of the class, undergraduates will be joined by a group of Stanford alumni and friends.

Student contributions and presentations are emphasized throughout the course. Students are expected to come well-prepared to each session, to lead discussions, and to carry out literature research. The final assignment is a 6 to 8 page paper on a case study of your own choosing, or an equivalent piece of a longer collaborative paper that offers a critical assessment of one particular conservation and/or development project in or near the region we will visit. Students will present the main findings of their papers in a joint seminar of undergraduates and alumni as we travel in the Peruvian Amazon.

Note: Students will arrive on campus and will be housed at Stanford until we leave for the Amazon. Travel to and from Peru is organized by the Travel/Study Program of the Stanford Alumni Association and is included; costs are defrayed by the Stanford Field Seminar Fund and generous donors.

Same as: ANTHRO 11SC

**HUMBIO 19SC. Parks and Peoples: Dilemmas of Protected Area Conservation in East Africa. 2 Units.**

The world-famous landscapes of East Africa, including Serengeti National Park, Ngorongoro Conservation Area, and the Rift Valley lakes of Tanzania, form the backdrop for this special course on protected area conservation. The course is designed to explore the pros and cons of parks and protected areas as they impact flora, fauna, and human inhabitants, and to address the dilemma of how to achieve conservation in a manner that creates local community benefits and is socially just. We will use a case study approach to ask: (1) What approach to protected area (PA) conservation has been taken in each case? Who are the key proponents and what are their main objectives? (2) How successful has the protected area been at achieving its conservation goals? (3) What are the benefits of the PA to people and who receives them? (4) What are the costs of the PA to people and who pays them? (5) Where benefits are not commensurate to costs, what, if anything, is being done to address the imbalance? How well is it working? (6) Are there alternatives or variations on the theme of protected area conservation that would be more realistic and beneficial? How could the interests of parks and people be made more compatible in each case? Is there any chance for an "integrated conservation-development project" (ICDP), or is that just "wishful thinking," as some critics insist? This course includes an intensive 12-day expedition to Tanzania to observe firsthand the dilemmas of parks and peoples we have discussed in class. We are scheduled to visit Tarangire, Lake Manyara, Mt. Meru, and Serengeti National Parks, as well as the Ngorongoro Conservation Area. Both on campus and in Tanzania, the course emphasizes student contributions and presentations. Students are expected to come well-prepared to each and every session, and will be asked to lead discussions plus carry out literature research on particular protected areas or conservation issues of interest to them, or on alternative conservation strategies. The final assignment for the seminar is to complete a 5- to 7-page paper on some aspect of conservation dilemmas in East Africa, preferably Tanzania, and to present the main findings of that paper in a joint seminar of undergrads and alumni as we travel in East Africa. Note: Students will arrive on campus and will be housed at Stanford until we leave for the travel portion. Travel to Tanzania will be provided and paid by Sophomore College (except incidentals) and is made possible by the support of the Stanford Alumni Association Travel/Study Program and generous Stanford donors.

**HUMBIO 21. Introduction to Brain and Behavior. 3 Units.**

Evolutionary principles to understand how the brain regulates behavior physiologically, and is also influenced by behavioral interactions. Topics include neuron structure and function, transmission of neural information, anatomy and physiology of sensory and motor systems, regulation of body states, the biological basis of learning and memory, and behavioral abnormalities.  
Same as: BIO 20

**HUMBIO 25SI. Diverse Perspectives on Disabilities. 1-2 Unit.**

This class investigates definitions and the complexities of life with a disability through discussion and panel based learning. Through student and parent panels, speakers, professors, and professionals in the field of disability, this class looks at the different perspectives and ways that disability interacts with the world. In addition to learning about the scientific, social and legal backgrounds students can also participate in a community volunteering project for an additional unit through Kids with Dreams or another community or student organization.

**HUMBIO 26. Designing Research-Based Interventions to Solve Global Health Problems. 3-4 Units.**

The excitement around social innovation and entrepreneurship has spawned numerous startups focused on tackling world problems, particularly in the fields of education and health. The best social ventures are launched with careful consideration paid to research, design, and efficacy. This course offers students insights into understanding how to effectively develop, evaluate, and scale social ventures. Using TeachAIDS (an award-winning nonprofit educational technology social venture used in 78 countries) as a primary case study, students will be given an in-depth look into how the entity was founded and scaled globally. Guest speakers will include world-class experts and entrepreneurs in Philanthropy, Medicine, Communications, Education, and Technology. Open to both undergraduate and graduate students.  
Same as: AFRICAST 135, AFRICAST 235, EDUC 135, EDUC 335, HRP 235, MED 235

**HUMBIO 27. Traditional Chinese Medicine. 1 Unit.**

The philosophy and history behind traditional Chinese medicine. Concepts such as Qi, Yin/Yang, meridians, Chinese organs, and the 5 elements. How these concepts are applied through techniques such as acupuncture, herbal medicine, Qi gong, and massage. How traditional Chinese medicine is understood from a scientific standpoint. Political and socioeconomic implications. Observation of an acupuncturist. Readings on the integration of Eastern and Western medicine and on traditional Chinese medicine.

**HUMBIO 28. Health and Medical Impact of Sexual Assault across the Lifecourse. 1-3 Unit.**

Cross-listed with SOMGEN 237 and FEMGEN 237. HumBio students must enroll in HumBio 28 or AFRICAAM 28. An overview of the acute and chronic physical and psychological health impact of sexual abuse through the perspective of survivors of childhood, adolescent, young and middle adult, and elder abuse, including special populations such as pregnant women, military and veterans, prison inmates, individuals with mental or physical impairments. Also addresses: race/ethnicity, gender identity, sexual orientation, and other demographic and societal factors, including issues specific to college culture. Professionals with expertise in sexual assault present behavioral and prevention efforts such as bystander intervention training, medical screening, counseling and other interventions to manage the emotional trauma of abuse. Undergraduates must enroll for 3 units. Medical and graduate students should enroll in SOMGEN 237 for 1-2 units. To receive a letter grade in any listing, students must enroll for 3 units.  
Same as: AFRICAAM 28

**HUMBIO 29A. Well-Being in Immigrant Children & Youth: A Service Learning Course. 3 Units.**

This is an interdisciplinary course that will examine the dramatic demographic changes in American society that are challenging the institutions of our country, from health care and education to business and politics. This demographic transformation is occurring first in children and youth, and understanding how social institutions are responding to the needs of immigrant children and youth to support their well-being is the goal of this course.  
Same as: CHILATST 177A, CSRE 177E, EDUC 177A

**HUMBIO 57. Epidemic Intelligence: How to Identify, Investigate and Interrupt Outbreaks of Disease. 4 Units.**

We will cover: the components of public health systems in the US; principles of outbreak investigation and disease surveillance; different types of study design for field investigation; visualization and interpretation of public health data, including identification and prevention of biases; and implementation of disease control by public health authorities. Students will meet with leaders of health departments of the state and the county and will be responsible for devising and conducting their own investigation of a health problem.

**HUMBIO 74. Ethics in a Human Life. 4 Units.**

Ethical questions pervade a human life from before a person is conceived until after she dies, and at every point in between. This course raises a series of ethical questions, following along the path of a person's life - questions that arise before, during, and after she lives it. We will explore distinctive questions that a life presents at each of several familiar stages: prior to birth, childhood, adulthood, death, and even beyond. We will consider how some philosophers have tried to answer these questions, and we will think about how answering them might help us form a better understanding of the ethical shape of a human life as a whole.

Same as: PHIL 74A

**HUMBIO 79Q. Sexuality and Society. 3 Units.**

This course will explore how sexual identity, attitudes, and behaviors are shaped by the messages sent by the various agents of society such as schools, family, peers, media, and religious, medical, and political institutions. The interaction of biology, psychology, and socio-cultural factors, such as gender roles and sexual/relationship scripts will be discussed, as will the intersection of sexuality and notions of love, romance, and commitment. Critical developmental periods, such as adolescence and emerging adulthood will be examined in depth. Students will explore their own values and feelings about sexuality and come to an understanding of how their beliefs were formed. We will discuss how information about sexuality is disseminated in our society and what we can do to help ensure that such information is used in a way that promotes healthy self-conceptions, behavior, and relationships.

**HUMBIO 82A. Qualitative Research Methodology. 3 Units.**

Goal is to develop knowledge and skills for designing and conducting qualitative research studies including purposes, conceptual contexts, research questions, methods, validity issues, and interactions among these facets. Each student designs a qualitative research study.

**HUMBIO 82B. Advanced Data Analysis in Qualitative Research. 3 Units.**

For students writing up their own qualitative research. Students prepare a complete draft presenting their own qualitative research study including results, with reports drafted section by section, week by week. Class provides feedback, guidance, support.

**HUMBIO 84. Practical Analysis of Epidemiologic and Biological Data. 3 Units.**

This course will teach students how to think about and analyze quantitative data. Students will learn to apply univariate and multivariable methods (using Stata software) to either their own data or data from publicly available sources. A central part of the course will consist of the joint planning and execution of an epidemiologic analysis of real-world data and the production of a manuscript for submission to a scientific journal. This course focuses on health-related data, although these methods can be applied much more broadly.

**HUMBIO 85A. Essential Statistics for Human Biology. 4 Units.**

Introduction to statistical concepts and methods that are essential to the study of questions in biology, environment, health, epidemiology and related areas. The course will teach and use the computer language R. Topics include distributions, probabilities, likelihood, linear models; illustrations will be based on recent research.

Same as: BIO 108

**HUMBIO 86Q. Love as a Force for Social Justice. 3 Units.**

Preference to sophomores. Biological, psychological, religious, social and cultural perspectives on the concept of agape love. How love is conceptualized across cultures; agape love as the basis of many religions; different kinds of love; the biology of love; love in action for social justice; the languages of love, including art, literature, music, and poetry. Emphasis is on blog writing, participation, and oral presentation. Same as: FEMGEN 86Q

**HUMBIO 88. Introduction to Statistics for the Health Sciences. 4 Units.**

Students will learn the statistical tools used to describe and analyze data in the fields of medicine and epidemiology. This very applied course will rely on current research questions and publicly available data. Students will gain proficiency with Stata to do basic analyses of health-related data, including linear and logistic regression, and will become sophisticated consumers of health-related statistical results.

**HUMBIO 89. Statistics in the Health Sciences. 3 Units.**

This course aims to provide a firm grounding in the foundations of probability and statistics, with a focus on analyzing data from the health sciences. Students will learn how to read, interpret, and critically evaluate the statistics in medical and biological studies. The course also prepares students to be able to analyze their own data, guiding them on how to choose the correct statistical test, avoid common statistical pitfalls, and perform basic functions in R deducer.

**HUMBIO 91Q. Neuroethology: The Neural Control of Behavior. 3 Units.**

Preference to sophomores. Animal behavior offers insights about evolutionary adaptations and this seminar will discuss the origins of the study of animal behavior and its development to the present. How does the nervous system control behavior and how is it changed by behavior? We will analyze and discuss original research papers about the neural basis of behavior. The use and misuse of parallels between animal and human behavior. Possible field trip to observe animals in their natural habitat.

**HUMBIO 94Q. Law, Lawyers and Justice in Cinema. 4 Units.**

Examination of how the law, justice and lawyers are depicted in film, how real the depictions are, and the social issues that are the subjects of the film and the effect of film on change, attitudes and policy.

**HUMBIO 96Q. Injustice, Advocacy and Courage: The Path of Everyday Heroes. 3 Units.**

This course will study the paradigms of people of courage, action and energy who have fought against injustice by advocating for causes against great odds and at personal risk. The focus will be on everyday people who have taken action, often at great personal risk, not for ambition, but because of their convictions and steadfast commitment to their beliefs.

**HUMBIO 97Q. Sport, Exercise, and Health: Exploring Sports Medicine. 3 Units.**

Preference to sophomores. Sports medicine is the practice of clinical medicine at the interface between health and performance, competition and well-being. While sports medicine had its origins in providing care to athletes, medical advances developed in care of athletes exerted a great effect on the nature and quality of care to the broader community. Topics include sports injuries, medical conditions associated with sport and exercise, ethics, coaching, women's issues, fitness and health, and sports science. Case studies.

Same as: ORTHO 97Q

**HUMBIO 111. Human Dimensions of Global Environmental Change: Resilience, Vulnerability, and Environmental Justice. 3 Units.**

The complexity of social and political issues surrounding global environmental change. Emphasis is on synergies precipitated by human-induced climatic change. Case studies and scenarios to explore the vulnerability and resilience in households, communities, regions, and nation-states most affected by extreme weather conditions. Their concerns, livelihood changes, and diverse responses of rural smallholders, indigenous communities, the state, and local and regional migrants. Central theme is environmental justice.

Same as: ANTHRO 173

**HUMBIO 111M. Marine Resource Economics and Conservation. 5 Units.**

Economic and ecological frameworks to understand the causes of and potential solutions to marine resource degradation. Focus on conservation of marine biodiversity and ecosystem-based management. Applications include: commercial and recreational fisheries, marine reserves, and offshore energy production.

Same as: EARTHSYS 156M, ECON 156

**HUMBIO 112. Conservation Biology: A Latin American Perspective. 3 Units.**

Principles and application of the science of preserving biological diversity. Conceptually, this course is designed to explore 4 major components relevant to the conservation of biodiversity, as exemplified by the Latin American region. The conceptual frameworks and principles, however, should be generally applicable, and provide insights for all regions of the world, including those of lesser biodiversity. Satisfies Central Menu Area 4 for Bio majors. Prerequisite: BIO 101, or BIO 43 or HUMBIO 2A with consent of instructor. Graduate level students will be expected to conduct a literature research exercise leading to a written paper, addressing a topic of their choosing, derived from any of the themes discussed in class.

Same as: BIO 144, BIO 234

**HUMBIO 113. The Human-Plant Connection. 3 Units.**

The intertwined biologies of humans and plants, particularly the ways in which people and plants have imposed selection pressures and ecological change on one another. Topics include evolution and basic plant structure; plant domestication; effects of agriculture on human health and physiology; plants in traditional and contemporary diets; and human influences on plant biology through genetic manipulation and environmental change. Class meetings center on journal articles. Final project includes written and multimedia presentations.

**HUMBIO 113S. Healthy/Sustainable Food Systems: Maximum Sustainability across Health, Economics, and Environment. 4 Units.**

(HumBio students must enroll in HumBio 113S) Discussion-based seminar. Focus on problems with and systems-based solutions to food system issues. Four particular settings are addressed: University, worksite, hospital, and school food. Traditional vs. disruptive food system models compared and contrasted. The goal is to determine how best to maximize sustainability across several dimensions, including health, economics, and the environment. Underlying class themes include social justice and the potential for changing social norms around food production and consumption.

Same as: CHPR 213

**HUMBIO 114. Environmental Change and Emerging Infectious Diseases. 3-5 Units.**

The changing epidemiological environment. How human-induced environmental changes, such as global warming, deforestation and land-use conversion, urbanization, international commerce, and human migration, are altering the ecology of infectious disease transmission, and promoting their re-emergence as a global public health threat. Case studies of malaria, cholera, hantavirus, plague, and HIV.

Same as: ANTHRO 177, ANTHRO 277

**HUMBIO 117H. Human Behavioral Ecology. 3-5 Units.**

Theory, method, and application in anthropology. How theory in behavioral ecology developed to understand animal behavior is applied to questions about human economic decision making in ecological and evolutionary contexts. Topics include decisions about foraging and subsistence, competition and cooperation, mating, and reproduction and parenting.

Same as: ANTHRO 161, ANTHRO 261

**HUMBIO 118. Theory of Ecological and Environmental Anthropology. 5 Units.**

Dynamics of culturally inherited human behavior and its relationship to social and physical environments. Topics include a history of ecological approaches in anthropology, subsistence ecology, sharing, risk management, territoriality, warfare, and resource conservation and management. Case studies from Australia, Melanesia, Africa, and S. America.

Same as: ANTHRO 90C

**HUMBIO 120. Health Care in America: An Introduction to U.S. Health Policy. 4 Units.**

Health policy and health care delivery from a historical and a current policy perspective. Introduces cost, quality, and access as measures of health system performance. Considers institutional aspects of health care reform.

**HUMBIO 120A. American Health Policy. 3 Units.**

Issues in health care reform and the policy making process, the evolution of current systems, and theories underlying efforts for change. The national search for solutions to the problems of the uninsured, and the feasibility, options, and ramifications of alternative proposals for health care reform. Student presentations. Prerequisite: Human Biology core or equivalent, Human Biology 120, or consent of instructor.

**HUMBIO 121. Critical Issues in Child Health. 4 Units.**

Integrated picture of the physical and psychosocial health factors that result in a healthy child building on principles taught in the Human Biology core. Students apply basic human physiology to the physiology of the child to develop perspective on global pediatric health challenges and how the cultural context influences and defines the child living within it.

**HUMBIO 121E. Ethnicity and Medicine. 1-3 Unit.**

Weekly lecture series. Examines the linguistic, social class, and cultural factors that impact patient care. Presentations promote culturally sensitive health care services and review contemporary research issues involving minority and underserved populations. Topics include health care inequities and medical practices of African Americans, Asians, Latinos, Native Americans, immigrants, and refugees in both urban and rural settings. 1 unit requires weekly lecture attendance, completion of required readings, completion of response questions; 2 units requires weekly lecture attendance and discussion session, completion of required readings and weekly response questions; additional requirement for 3 units (HUMBIO only) is completion of a significant term paper. Only students taking the course for 3 units may request a letter grade. Enrollment limited to students with sophomore academic standing or above.

Same as: FAMMED 244

**HUMBIO 122. Beyond Health Care: Seeking Health in Society. 3 Units.**

Available evidence at the national and cross-country level linking social welfare interventions and health outcomes. If and how non-health programs and policies could have an impact on positive health outcomes. Evaluation of social programs and policies that buffer the negative health impact of economic instability and unemployment among adult workers and their children. Examination of safety nets, including public health insurance, income maintenance programs, and disability insurance. Prerequisites: HumBio 4B or equivalent, and some background in research methods and statistics, or Instructor permission.

Same as: PEDS 222

**HUMBIO 122M. Challenges of Human Migration: Health and Health Care of Migrants and Autochthonous Populations. 3 Units.**

An emerging area of inquiry. Topics include: global migration trends, health issues/aspects of migration, healthcare and the needs of immigrants in the US, and migrants as healthcare providers: a new area of inquiry in the US. Class is structured to include: lectures lead by the instructor and possible guest speakers; seminar, discussion and case study sessions led by students.

Same as: PEDS 212

**HUMBIO 122S. Social Class, Race, Ethnicity, and Health. 4 Units.**

Examines health disparities in the U.S., looking at the patterns of those disparities and their root causes. Explores the intersection of lower social class and ethnic minority status in affecting health status and access to health care. Compares social and biological conceptualizations of race and ethnicity.

Same as: AFRICAAM 132

**HUMBIO 123. Obesity in America: Clinical and Public Health Implications. 3-4 Units.**

(HumBio students must enroll in HumBio 123.) Interdisciplinary clinical, research, and policy approaches. The prevalence, predictors, and consequences of obesity and diabetes; biological and physiological mechanisms; clinical treatments including medications and surgery; and the relevance of behavioral, environmental, economic, and policy approaches to obesity prevention and control. Prerequisite: Human Biology core or equivalent, or consent of instructor. Same as: CHPR 223

**HUMBIO 124C. Global Child Health. 4 Units.**

This course will introduce key challenges to the health and wellbeing of children worldwide, with a particular focus on children in low- and middle-income countries. It will review the leading causes of morbidity and mortality, identify interventions to address some of the biggest child health problems, and provide an overview of the roles of culture, gender, and civil society on child health and health policy.

**HUMBIO 124E. Economics of Infectious Disease and Global Health. 3 Units.**

Introduction to global health topics such as childhood health, hygiene, drug resistance, and pharmaceutical industries from an economic development perspective. Introduces economic concepts including decision-making over time, externalities, and incentives as they relate to health.

Same as: MED 236

**HUMBIO 125. Current Topics and Controversies in Women's Health. 2-3 Units.**

Interdisciplinary. Focus is primarily on the U.S., with selected global women's health topics. Topics include: leading causes of morbidity and mortality across the life course; reproductive (e.g. gynecologic & obstetric) health issues; sexual function; importance of lifestyle (e.g. diet, exercise, weight control), including eating disorders; mental health; sexual and relationship abuse; issues for special populations. In-class Student Debates on key controversies in women's health. Guest lecturers. HUMBIO students must enroll in HumBio 125 for 3 units. PhD minor in FGSS, enroll in FEMGEN 256 for 2 - 3 units and for a letter grade. Med students enroll in OBGYN 256 for 2 units.

Same as: FEMGEN 256, OBGYN 256

**HUMBIO 126. Promoting Health Over the Life Course: Multidisciplinary Perspectives. 3 Units.**

(HUMBIO students must enroll in HumBio 126.) Disease prevention and health promotion topics pertinent to different stages of the life span emphasizing healthy lifestyle and reducing risk factors in both individuals and communities. Focus is on scientific investigation, the application of behavioral science to risk reduction strategies, and the importance of health promotion as a social and economic imperative. Topics include: epidemiology of chronic diseases; social determinants of health, behavior change; obesity, nutrition, and stress; children, young adult, mid-life and aging health issues; health care delivery and public health system; workplace wellness programs; and other additional issues. Prerequisite: Human Biology core or equivalent, or consent of instructor.

Same as: CHPR 226

**HUMBIO 126A. Advanced Seminar in Health and Security. 3 Units.**

In this course, we explore the growing interconnections between health and security. Global health can no longer be addressed without some important consideration of international security as war, civil conflict and political instability have increasingly defined the health challenges in major parts of the world. This course will address the interaction of three types of security: human, national, and international. Health is obviously a component of human security. However, it has also been raised as a concern of national and international security, particularly in areas where HIV/AIDS and Ebola have been prevalent and where the risk of pandemic outbreaks is high. This course will bring together a cross-disciplinary examination of these issues and address the opportunities and potential risks of tightly linking the provision of essential health services to security considerations. We will use case studies to explore both the conceptual and technical issues inherent in health and security. The challenges of Ebola, HIV, complex humanitarian emergencies, and pandemics will be explored in detail. As part of each discussion, the intense interaction of biology, service delivery, political legitimacy, human rights, and international relations will be examined.

**HUMBIO 127A. Community Health: Assessment and Planning I. 4 Units.**

Major determinants of health in a community. Working with community partners to identify health issues and plan programs and policies to prevent disease and promote health. Service learning component involving students in community health assessment techniques. Final grade given upon completion of HUMBIO 127B. Service Learning Course (certified by Haas Center). Prerequisite: 4B or equivalent, or consent of instructor.

**HUMBIO 127B. Community Health: Assessment and Planning II. 4 Units.**

Continuation of 127A. Service learning course with emphasis on conducting community health assessment and planning projects in collaboration with community-based organizations. Service Learning Course (certified by Haas Center). Prerequisite: 4B or equivalent, 127A, or consent of instructor.

**HUMBIO 128. Community Health Psychology. 4 Units.**

Social ecological perspective on health emphasizing how individual health behavior is shaped by social forces. Topics include: biobehavioral factors in health; health behavior change; community health promotion; and psychological aspects of illness, patient care, and chronic disease management. Prerequisites: HUMBIO 3B or PSYCH 1, or equivalent. Same as: PSYCH 101

**HUMBIO 129. Critical Issues in International Women's Health. 4 Units.**

Women's lives, from childhood through adolescence, reproductive years, and aging. Economic, social, and human rights factors, and the importance of women's capacities to have good health and manage their lives in the face of societal pressures and obstacles. Emphasis is on life or death issues of women's health that depend on women's capacity to exercise their human rights including maternal mortality, violence, HIV/AIDS, reproductive health, and sex trafficking. Organizations addressing these issues. A requirement of this class is participation in public blogs. Prerequisites: Human Biology core or equivalent or consent of instructor. Same as: FEMGEN 129

**HUMBIO 129S. Global Public Health. 4 Units.**

The class is an introduction to the fields of international public health and global medicine. It focuses on resource poor areas of the world and explores major global health problems and their relation to policy, economic development and human rights. The course is intended for students interested in global health, development studies, or international relations, and provides opportunities for in-depth discussion and interaction with experts in the field. .

**HUMBIO 129W. Health Care Systems Around the World. 4 Units.**

This course will explore the role of health care systems in societies around the world, identifying the common challenges facing health care systems and how different institutional structures in different countries perform in response to these challenges. We will structure the course around general conceptual frameworks related to key health system institutions (including financing, insurance, provider payment, patient cost-sharing, and the regulation of medical technology). From this foundation, we will draw on the experience of individual countries (high and low income, with heavy chronic disease and infectious disease burdens) to illustrate the function of these institutions under real-world circumstances observed around the globe.

Same as: MED 129

**HUMBIO 130. Human Nutrition. 4 Units.**

The study of food, and the nutrients and substances therein. Their action, interaction, and balance in relation to health and disease. Emphasis is on the biological, chemical, and physiological processes by which humans ingest, digest, absorb, transport, utilize, and excrete food. Dietary composition and individual choices are discussed in relationship to the food supply, and to population and cultural, race, ethnic, religious, and social economic diversity. The relationships between nutrition and disease; ethnic diets; vegetarianism; nutritional deficiencies; nutritional supplementation; phytochemicals. HUMBIO students must enroll in HUMBIO 130.

Same as: CHPR 231

**HUMBIO 133. Human Physiology. 4 Units.**

Human physiology will be examined by organ systems: cardiovascular, respiratory, renal, gastrointestinal and endocrine. Molecular and cell biology and signaling principles that underlie organ development, pathophysiology and opportunities for regenerative medicine are discussed, as well as integrative control mechanisms and fetal development. Prerequisite: Biology or Human Biology core.

Same as: BIO 112

**HUMBIO 135. Exercise Physiology. 4 Units.**

Explore the amazing capacity of your body to move and adapt within your everyday world. You will learn: how your body systems respond to the stress of acute exercise and adapt to chronic exercise training, how your cardiovascular system adapts to optimize oxygen delivery and utilization, how your muscles generate force and hypertrophy in response to training, and how your metabolic/biochemical pathways are regulated to support the increased energy demand of exercise. We will discuss theories on the causes of fatigue and muscle soreness, and on what limits human performance. Applied topics such as the effects of aging, gender, and environmental conditions (high altitude, heat, cold, microgravity) on your body will be emphasized in the second half of the course. Portions of the class will be taught through videos that use online lectures and engaging stories to illustrate physiology concepts. Prerequisite: Human Biology core, Biology core, or equivalent, or consent of instructor.

**HUMBIO 135S. Applied Topics in Exercise Physiology and Metabolism. 3 Units.**

Discussions of controversial topics in exercise physiology, sports performance, aging and environmental physiology. Special focus on how to read/evaluate research papers, how to get science out of the lab through better communication, and how basic and applied science is used to develop novel training programs and new medical devices. Students will learn the fundamentals of science storytelling and mixed media presentation of ideas. A requirement of this class is participation in blogs & in-class discussions, evaluations of physiology research, writing a research paper, and creation of a science-based story to share with the class. If class is full, contact instructor for an application. Enrollment limited to 10. Prerequisites: B+ or higher in HB135 and/or consent of instructor.

**HUMBIO 136. Human Physiology Laboratory. 4 Units.**

This laboratory course is active and inquiry based. Aspects of exercise and temperature are explored; however, the specific questions the class tackles differ each quarter. Samples of past questions: Does lactic acid accumulation correlate with exercise fatigue at different exercise and body temperatures? Does palm cooling during exercise mitigate the effect of body temperature on fatigue with or without evaporative cooling? Students participate both as experimenters and as subjects of the experiments in two-person teams. Participants must be in good physical condition, though not necessarily athletes, and must be willing to participate in strenuous exercise routines under adverse environmental conditions. Varsity athletes concurrently participating in a spring sport must consult the instructor before applying. Discussion sessions include student presentations of journal articles, data analyses, and feedback on individual WIM research proposals. By application only, see [sites.stanford.edu/bio107/](https://sites.stanford.edu/bio107/) for the application form. Prerequisite: Bio 42 or HumBio 4A. Satisfies WIM for Biology.

Same as: BIO 107

**HUMBIO 139E. Sport and Exercise Medicine. 3 Units.**

This is an upper division lecture course taught by the course directors and guest lecturers (experts from the field of sports and exercise medicine). The course is organized into three modules: Optimizing Health, Sports Science and Injury Prevention. The topics include wellness and the prevention of chronic disease, the balance point between health and harm in sports, clinical and sports biomechanics, injury prevention theories and case studies ethical issues in return-to-play decisions, the role of sports medicine in the prevention of chronic disease through exercise, common sports injuries and illnesses. Students will develop critical reading, thinking and writing skills as well as oral presentation skills and the confidence to engage in verbal exchange. Every other class is a discussion class involving hands-on activities and class discussions.

**HUMBIO 140. Sex and Gender in Human Physiology and Disease. 2-3 Units.**

(HumBio students must enroll in HumBio 140.) Chromosomal, hormonal and environmental influences that lead to male and female reproductive systems and neuroendocrine regulation and intersex variants. Masculinizing and feminizing effects of endogenous and exogenous sex hormones and other factors, in particular gender, on the musculoskeletal, neurological, cardiovascular, immunological and other systems and tissues, e.g. adipose, skin, etc. over the lifecourse, from conception to puberty, through reproductive phases (including changes during the menstrual cycle up to and beyond menopause in women, and with aging in both sexes). Transgender health issues. Guest lecturers. Prerequisite: Human Biology core or equivalent, or consent of instructor. HUMBIO students must enroll for 3 units.

Same as: FEMGEN 241, MED 240

**HUMBIO 142. Adolescent Development. 4 Units.**

Underlying changes and their consequences in everyday functioning. Physical, cognitive, social, and sexual development; how these changes influence the emerging sense of identity, autonomy, and intimacy. Contexts in which adolescents move such as family, friends and peers, school, and workplace. Focus is on normal development of boys and girls; attention to problem outcomes including eating disorders, depression, and teen pregnancy. Prerequisite: 3B or PSYCH 1, or consent of instructor.

**HUMBIO 142M. Special Topics in Adolescent Mental Health. 4 Units.**

Includes the study of aspects of common disorders seen in adolescent populations, such as prevalence, developmental course, gender differences, theoretical explanations, and therapeutic interventions. Topics will include mood/anxiety disorders, eating disorders, learning disabilities and ADHD, sexual risk behaviors, developmental disorders, substance abuse, and self-harm. Goals of this course include getting students to think critically about the unique mental health needs of adolescents, collaborating on devising ways to improve the way our society meets those needs, and strengthening writing and communication skills applicable to this area of inquiry.

**HUMBIO 143. Adolescent Sexuality. 4 Units.**

Developmental perspective. Issues related to scientific, historical, and cultural perceptions; social influences on sexual development; sexual risk; and the limitations and future directions of research. Sexual identity and behavior, sexually transmitted diseases including HIV, pregnancy, abortion, gay and lesbian youth, sex education and condom availability in schools, mass media, exploitative sexual activity, and difficulties and limitations in studying adolescent sexuality. Legal and policy issues, gender differences, and international and historical trends. Prerequisite: Human Biology core or equivalent, or consent of instructor.

**HUMBIO 144. Boys' Psychosocial Development. 4 Units.**

Focusing on early childhood through adolescence. Examining boys' lives and experiences as embedded within interpersonal relationships as well as social and cultural contexts. Including perspectives from psychology, sociology, gender studies, and education. Prerequisite: Human Biology core, Developmental Psychology, or consent of instructor.

**HUMBIO 145L. The Biology and Evolution of Language. 4-5 Units.**

Lecture course surveying the biology, linguistic functions, and evolution of the organs of speech and speech centers in the brain, language in animals and humans, the evolution of language itself, and the roles of innateness vs. culture in language. Suitable both for general education and as preparation for further studies in anthropology, biology, linguistics, medicine, psychology, and speech & language therapy. Anthropology concentration: CS, EE. No prerequisites.

Same as: ANTHRO 171, ANTHRO 271

**HUMBIO 146D. Developmental Disabilities: From Biology to Policy. 3 Units.**

Fifteen percent of US children have disabilities. While advances in medicine and technology have increased life expectancy for these children, health care delivery, education, and public attitudes have not kept pace. Students in this course will learn the possibilities and limitations of new biomedical treatments of Down syndrome, cerebral palsy, and autism. Students will also evaluate the impact of public policy initiatives, such as the Individuals with Disabilities Education Act and Americans with Disabilities Act on inclusion and participation in society. Same as: PEDS 246

**HUMBIO 148W. Women, Fertility, and Work. 5 Units.**

How do choices relating to bearing, nursing, and raising children influence women's participation in the labor force? Cultural, demographic, and evolutionary explanations, using crosscultural case studies. Emphasis is on understanding fertility and work in light of the options available to women at particular times and places. Same as: ANTHRO 151, ANTHRO 251

**HUMBIO 149. Psychological and Educational Resilience Among Children and Youth. 4 Units.**

Theoretical, methodological, and empirical issues pertaining to the psychological and educational resilience of children and adolescents. Overview of the resilience framework, including current terminology and conceptual and measurement issues. Adaptive systems that enable some children to achieve successful adaptation despite high levels of adversity exposure. How resilience can be studied across multiple levels of analysis, ranging from cell to society. Individual, family, school, and community risk and protective factors that influence children's development and adaptation. Intervention programs designed to foster resilient adaptation in disadvantaged children's populations. Same as: EDUC 256

**HUMBIO 149L. Longevity. 4 Units.**

Interdisciplinary. Challenges to and solutions for the young from increased human life expectancy: health care, financial markets, families, work, and politics. Guest lectures from engineers, economists, geneticists, and physiologists. Same as: NENS 202, PSYCH 102

**HUMBIO 150A. Assisted Reproductive Technologies. 1-3 Unit.**

Primary and current literature in basic and clinical science aspects of assisted reproductive technologies (ART), and demonstrations of current ART techniques including in vitro fertilization and embryo culture, and micromanipulation procedures such as intracytoplasmic sperm injection and embryo biopsy and cryopreservation. Class only may be taken for 1 unit. 2 units includes papers and attendance at clinical demonstrations. 3 units includes a term paper. Recommended: DBIO 201, or consent of instructors.

Same as: OBGYN 202

**HUMBIO 151R. Biology, Health and Big Data. 3 Units.**

We are living in the midst of a revolution in the accessibility and availability of biological and medical data. How can all this data be used to improve human health? In this course, students will look at case studies from diabetes and cancer research to learn how to access publicly available data ranging from gene or protein level datasets to information about clinical trials. Students will apply what they learn from the case studies to develop a research proposal and presentation on a biology-related topic of their choice. The class will have a small group workshop-type format. Students will gain skills in research methods including accessing, analyzing and presenting data. There will be exercises using the statistical package R. Prior programming experience is not required. Prerequisites: HumBio 2A, 3A or equivalent.

**HUMBIO 152. Viral Lifestyles. 3 Units.**

Viral lifestyle is a seminar devoted to exploring contemporary topics in microbiology with a focus on the global microbiome. The course includes lectures and will provide an opportunity for students to interact with each other, the instructor and guest lecturers to explore novel research areas in microbiology that are still being formed. The course will begin with lectures on topics such as cross-species transmission of microbes and human microbiome and will transition to presentation and discussion led by student groups. A significant percentage of class will be devoted to presentation and discussion focused on group projects.

**HUMBIO 153. Parasites and Pestilence: Infectious Public Health Challenges. 4 Units.**

Parasitic and other pestilence of public health importance. Pathogenesis, clinical syndromes, complex life cycles, and the interplay among environment, vectors, hosts, and reservoirs in historical context. Public health policy initiatives aimed at halting disease transmission. World Health Organization tropical disease targets including river blindness, sleeping sickness, leishmaniasis, schistosomiasis, mycobacterial disease (tuberculosis and leprosy), malaria, toxoplasmosis, dracunculiasis, and intestinal helminthes. Guest lecturers with expertise in disease control. Prerequisite: Human Biology core or equivalent, or consent of instructor.

**HUMBIO 154A. Disease control systems: epidemics, outbreaks, and modeling for public health. 4 Units.**

(HumBio students must enroll in HumBio 154A.) This course teaches operations research and modeling techniques to improve public health programs and disease control systems. Students will engage in in-depth interdisciplinary study of disease detection and control strategies from a "systems science" perspective, which involves the use of common mathematical modeling and operations research techniques such as optimization, queuing theory, Markov and Kermack-McKendrick models, and microsimulation. Lectures and problem sets will focus on applying these techniques to classical public health dilemmas such as how to optimize screening programs, reduce waiting times for healthcare services, solve resource allocation problems, and compare macro-scale disease control strategies that cannot be easily evaluated through randomized trials. Readings will complement the lectures and problem sets by offering critical perspectives from the public health history, sociology, and epidemiology. In-depth case studies from non-governmental organizations, departments of public health, and international agencies will drive the course. Open to upper-division undergraduate students.

Same as: CHPR 254

**HUMBIO 154B. Principles of Epidemiology. 3 Units.**

Epidemiology is the study of the distribution and determinants of health and disease in human populations. This course introduces students to observational epidemiology through major study designs along with measures of association and their computation. The course also covers how error, bias, and confounding can affect analytic findings, and how to detect and interpret interaction effects. Students will learn through lectures, problem sets, and critical appraisal of both classic and contemporary research articles. Human Biology 154 courses can be taken separately or as a series.

**HUMBIO 154C. Cancer Epidemiology. 4 Units.**

Clinical epidemiological methods relevant to human research in cancer will be the focus. The concepts of risk; case control, cohort, and cross-sectional studies; clinical trials; bias; confounding; interaction; screening; and causal inference will be introduced and applied. Social, political, economic, and ethical controversies surrounding cancer screening, prevention, and research will be considered. Human Biology 154 courses can be taken separately or as a series.

**HUMBIO 155B. The Vaccine Revolution. 6 Units.**

Advanced seminar. Human aspects of viral disease, focusing on recent discoveries in vaccine development and emerging infections. Journal club format: students choose articles from primary scientific literature, write formal summaries, and synthesize them into a literature review. Emphasis is on analysis, experimental design, and interpretation of data. Oral presentations. Enrollment limited to 8. Prerequisite: prior enrollment in HumBio 155H Humans and Viruses or MI 116, The Human Virosphere. Same as: MI 115B

**HUMBIO 155H. Humans and Viruses I. 6 Units.**

Introduction to human virology integrating epidemiology, molecular biology, clinical sciences, social sciences, history, and the arts. Emphasis is on host pathogen interactions and policy issues. Topics: polio and vaccination, smallpox and eradication, yellow fever and history, influenza and genomic diversity, rubella and childhood infections, adenovirus and viral morphology, ebola and emerging infection, lassa fever and immune response. Same as: MI 155H

**HUMBIO 157. The Biology of Stem Cells. 3 Units.**

The role of stem cells in human development and potential for treating disease. Guest lectures by biologists, ethicists, and legal scholars. Prerequisites: HumBio 2A and 3A, or the equivalent in the BioCore in Biological Sciences. Same as: DBIO 257

**HUMBIO 158. The Human Genome and Disease. 3 Units.**

The variability of the human genome and the role of genomic information in research, drug discovery, and human health. Concepts and interpretations of genomic markers in medical research and real life applications. Human genomes in diverse populations. Original contributions from thought leaders in academia and industry and interaction between students and guest lecturers. Students with a major, minor or cotermin in Biology: 109A/209A or 109B/209B may count toward degree program but not both. Same as: BIO 109A, BIOC 109A, BIOC 209A

**HUMBIO 159. Genes and Environment in Disease Causation: Implications for Medicine and Public Health. 2-3 Units.**

The historical, contemporary, and future research and practice among genetics, epidemiology, clinical medicine, and public health as a source of insight for medicine and public health. Genetic and environmental contributions to multifactorial diseases; multidisciplinary approach to enhancing detection and diagnosis. The impact of the Human Genome Project on analysis of cardiovascular and neurological diseases, and cancer. Ethical and social issues in the use of genetic information. Prerequisite: basic course in genetics; for undergraduates, Human Biology core or equivalent or consent of instructor. Same as: HRP 238

**HUMBIO 160. Human Behavioral Biology. 5 Units.**

Multidisciplinary. How to approach complex normal and abnormal behaviors through biology. How to integrate disciplines including sociobiology, ethology, neuroscience, and endocrinology to examine behaviors such as aggression, sexual behavior, language use, and mental illness. Same as: BIO 150

**HUMBIO 161. The Neurobiology of Sleep. 4 Units.**

Preference to seniors and graduate students. The neurochemistry and neurophysiology of changes in brain activity and conscious awareness associated with changes in the sleep/wake state. Behavioral and neurobiological phenomena including sleep regulation, sleep homeostasis, circadian rhythms, sleep disorders, sleep function, and the molecular biology of sleep. Enrollment limited to 16. Same as: BIO 149, BIO 249

**HUMBIO 162. The Nervous Age: Neurosis, Neurology, and Nineteenth-century Theatre. 5 Units.**

The nineteenth century witnessed profound developments in neurological and psychological sciences, developments that fundamentally altered conceptions of embodiment, agency, and mind. This course will place these scientific shifts in conversation with theatrical transformations of the period. We will read nineteenth-century neuropsychologists such as Charles Bell, Johannes Müller, George Miller Beard, Jean-Martin Charcot, and Hippolyte Bernheim alongside artists such as Percy Shelley, Georg Büchner, Richard Wagner, Émile Zola, and August Strindberg. Same as: GERMAN 284, TAPS 354

**HUMBIO 162H. Hysteria and Modern Culture. 3-5 Units.**

The term "hysteria" has been used for centuries to categorize the mysterious ailments of others. This course will focus on the history of hysteria's representation and production from the late nineteenth century through WWI. Readings will include medical writings (Charcot, Bernheim, Freud), plays (Ibsen, Strindberg, Toller), and feminist theory (Cixous, Clément, Diamond). We will also devote some attention to the ongoing influence of the discourse of hysteria on contemporary medical and popular cultures. Same as: GERMAN 137, TAPS 169

**HUMBIO 163. Neural Systems and Behavior. 4 Units.**

The field of neuroethology and its vertebrate and invertebrate model systems. Research-oriented. Readings include reviews and original papers. How animal brains compare; how neural circuits are adapted to species-typical behavior; and how the sensory worlds of different species represent the world. Lectures and required discussions. Satisfies Central Menu Area 3 for Bio majors. Prerequisites: BIO 42, HUMBIO 4A. Same as: BIO 163, BIO 263

**HUMBIO 164. Autism Spectrum Disorders. 3 Units.**

Abnormal social deficits, language development and repetitive behaviors, are the core symptoms of Autism Spectrum Disorders (ASD), a group of neurodevelopmental disorders that affect about 1% of all children and costs society an estimated \$268B annually. This interactive seminar course will provide an overview of our understanding of ASD, from genetics through epidemiology, biology and treatment, and the many implications for society, including the principles and problems of diagnosis, its impact upon family and across the lifespan, and controversies regarding its etiology, perception and care. Preference given to Seniors.

**HUMBIO 166. Food and Society: Exploring Eating Behaviors in Social, Environmental, and Policy Context. 4 Units.**

(HumBio students must enroll in HumBio 166.) The class examines the array of forces that affect the foods human beings eat, and when, where, and how we eat them, including human labor, agriculture, environmental sustainability, politics, animal rights/welfare, ethics, policy, culture, economics, business, law, trade, and ideology, and psychology. The class addresses the impact of current policies and actions that might be taken to improve human nutrition and health; macro-scale influences on food, nutrition, and eating behavior.

Same as: CHPR 266

**HUMBIO 167. The Art of Vision. 3 Units.**

This course concerns eyes and art. It asks how eyes are built, how they process visual information, and how they are affected by diseases that are major problems in our society. These topics are illustrated through fine art and famous artists, and we explore the implications of both normal and abnormal vision for art. There are short diversions into animal eyes and the role of vision in music, literature, and sports.

**HUMBIO 168. Multidisciplinary Perspectives on Guilt. 3 Units.**

The seminar encompasses the personal and cultural components of guilt from multidisciplinary perspectives. At the individual level, it explores behaviors that induce guilt; their relational aspects; genesis in evolutionary and developmental terms: and its normal and pathological manifestations. The cultural section includes cross-cultural perspectives on guilt and its conceptions in Christianity, Judaism, Islam, Hinduism, Buddhism, and Confucianism; as well as in the philosophy of Aristotle, Kant, J. S Mill and Nietzsche, and culpability in the law. Derived from this material, the course will also focus on the nature of ethical reasoning and the ways we make ethical choices and judgments in our lives.

**HUMBIO 170. Justice, Policy, and Science. 5 Units.**

The role of science in civil rights, justice, policy, criminal justice, evidence, education, and disabled rights.

**HUMBIO 170A. Sex and the Law. 4 Units.**

This course uses an interdisciplinary approach to examine the laws and regulation of sex in the United States by considering the legal, policy, social, political and scientific bases (or lack thereof) of such laws, the context and objectives of sex regulation, and the political dynamics of contemporary and controversial issues presented by this subject. Some laws reflect policies to protect persons from harm related to sexual conduct, such as rape, assault and pedophilia. Other laws impose notions of morality, such as sodomy, incest or polygamy, or homosexuality, or reflect policy or social judgments regarding abortion, contraceptives, and sexual activity of minors. Regulation often concern consensual conduct. This course will consider these topics from varying perspectives and policy objectives, and in the context of Constitutional and other liberty interests.

**HUMBIO 172B. Children, Youth, and the Law. 5 Units.**

How the legal rights of children and adolescents in America are defined, protected, and enforced through the legal process within the context of their developmental needs and competing societal interests. Topics: origins and definitions of children's rights; adoption; custody; the juvenile justice system; education; freedom of speech; and sex. The class is interactive, using hypotheticals for discussion and analysis. A and B alternate; students may take one or both.

**HUMBIO 173. Science, Innovation and the Law. 5 Units.**

The interaction of science, business and law: how scientific ideas are protected by law; the rights of those who invent, develop, and finance scientific discovery; the kinds of protections that apply; and how ideas are commercialized and brought to market. Guest speakers will include investors, start-up founders, scientists and inventors, and other relevant experts from IT, medical, pharma and biological sectors. The history of Silicon Valley will be examined as a paradigm for innovation, including a tour of historical landmarks in Silicon Valley.

**HUMBIO 174. Foundations of Bioethics. 3 Units.**

Classic articles, legal cases, and foundational concepts. Theoretical approaches derived from philosophy. The ethics of medicine and research on human subjects, assisted reproductive technologies, genetics, cloning, and stem cell research. Ethical issues at the end of life. Prerequisite: Human Biology core or equivalent, or consent of instructor.

**HUMBIO 175H. Literature and Human Experimentation. 3-5 Units.**

This course introduces students to the ways literature has been used to think through the ethics of human subjects research and experimental medicine. We will focus primarily on readings that imaginatively revisit experiments conducted on vulnerable populations: namely groups placed at risk by their classification according to perceived human and cultural differences. We will begin with Mary Shelley's *Frankenstein* (1818), and continue our study via later works of fiction, drama and literary journalism, including Toni Morrison's *Beloved*, David Feldshuh's *Miss Evers Boys*, Hannah Arendt's *Eichmann* and Vivien Spitz's *Doctors from Hell*, Rebecca Skloot's *Immortal Life of Henrietta Lacks*, and Kazuo Ishiguro's *Never Let Me Go*. Each literary reading will be paired with medical, philosophical and policy writings of the period; and our ultimate goal will be to understand modes of ethics deliberation that are possible via creative uses of the imagination, and literature's place in a history of ethical thinking about humane research and care.

Same as: AFRICAAM 223, COMPLIT 223, CSRE 123B, MED 220

**HUMBIO 175L. Literature and Global Health. 3-5 Units.**

This course examines the ways writers in literature and medicine have used the narrative form to explore the ethics of care in what has been called the developing world. We will begin with a call made by the editor-in-chief of *The Lancet* for a literature of global health, namely fiction modeled on the social reform novels of the nineteenth century, understood to have helped readers develop a conscience for public health as the field emerged as a modern medical specialty. We will then spend the quarter understanding how colonial, postcolonial, and world literatures have answered and complicated this call. Readings will include prose fiction by Albert Camus, Joseph Conrad, Tsitsi Dangarembga, Amitav Ghosh, Susan Sontag as well as physician memoirs featuring Frantz Fanon, Albert Schweitzer, Abraham Verghese, Paul Farmer. And each literary reading will be paired with medical, philosophical, and policy writings that deeply inform the field of global health.

Same as: AFRICAAM 229, AFRICAST 229, COMPLIT 229, CSRE 129B, FRENCH 229, MED 234

**HUMBIO 176A. Medical Anthropology. 4 Units.**

Emphasis is on how health, illness, and healing are understood, experienced, and constructed in social, cultural, and historical contexts. Topics: biopower and body politics, gender and reproductive technologies, illness experiences, medical diversity and social suffering, and the interface between medicine and science.

Same as: ANTHRO 82, ANTHRO 282

**HUMBIO 177C. Culture, Narrative, and Medicine. 5 Units.**

This course examines the ways in which medicine is practiced in diverse cultural contexts with narrative skills of recognizing, interpreting and being moved by the stories of illness. It is an examination of the human experience of illness and healing through narratives as presented in literature, film, and storytelling. We explore how cultural resources enable and empower healing and how narrative medicine can guide the practice of culturally competent medical care.

Same as: ANTHRO 178A

**HUMBIO 178. Ethics and Politics of Public Service. 5 Units.**

Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford. [This class is capped but there are some spaces available with permission of instructor. If the class is full and you would like to be considered for these extra spaces, please email sburbank@stanford.edu with your name, grade level, and a paragraph explaining why you want to take the class.]

Same as: CSRE 178, ETHICSOC 133, PHIL 175A, PHIL 275A, POLISCI 133, PUBLPOL 103D, URBANST 122

**HUMBIO 178T. Human Trafficking: Historical, Legal, and Medical Perspectives. 3 Units.**

(Same as History 105C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution and labor exploitation, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning. Students interested in service learning should consult with the instructor and will enroll in an additional course.

Same as: FEMGEN 5C, HISTORY 5C, SOMGEN 205

**HUMBIO 179S. Spirituality and Healing. 3-5 Units.**

The puzzle of symbolic healing. How have societies without the resources of modern medicine approached healing? Why do these rituals have common features around the world? Shamanism, spirit possession, prayer, and the role of placebos in modern biomedicine. Students do ethnographic work and practical explorations along with more traditional scholarly approaches to learning.

Same as: ANTHRO 184

**HUMBIO 180. Human Skeletal Anatomy. 5 Units.**

Study of the human skeleton (a. k. a. human osteology), as it bears on other disciplines, including medicine, forensics, archaeology, and paleoanthropology (human evolution). Basic bone biology, anatomy, and development, emphasizing hands-on examination and identification of human skeletal parts, their implications for determining an individual's age, sex, geographic origin, and health status, and for the evolutionary history of our species. Three hours of lecture and at least three hours of supervised and independent study in the lab each week.

Same as: ANTHRO 175, ANTHRO 275, BIO 174, BIO 274

**HUMBIO 191. Human Biology Practicum. 1 Unit.**

For students who have undertaken supervised community-engaged service, research (e.g. HB-REX, Bio-X) or pre-professional experiences related to their Area of Concentration topic. Includes a series of five required workshops, written reflection and presentation. Satisfies the Capstone Requirement of the major.

**HUMBIO 192S. Human Biology Synthesis. 2-3 Units.**

Co-Requisite HUMBIO 191. Expands the work of the Human Biology Practicum; (can also focus on a different aspect of the Area of Concentration). Allows students the opportunity to craft a culminating, creative work of scholarship based on a synthesis of personal and academic interests, including service projects. Exhibited during senior year.

**HUMBIO 193. Research in Human Biology. 1-5 Unit.**

Independent research conducted under faculty supervision, in junior or senior year, normally but not necessarily in pursuit of an honors project. May be taken for a maximum 3 quarters of credit. Prerequisite: Faculty approval; application available in student services office.

**HUMBIO 194. Honors. 1-10 Unit.**

Completion of the honors project, normally taken in the student's final quarter. First component: the honors thesis, a final paper providing evidence of rigorous research, fully referenced, and written in an accepted scientific style. Second component: participation in the honors symposium, including a 10-minute oral presentation followed by a brief question and answer session. Prerequisites: 193 or 199, and acceptance into the honors program.

**HUMBIO 197. Human Biology Internship. 1-4 Unit.**

Limited to and required of Human Biology majors. A supervised field, community, or lab experience of student's choosing, pre-approved by Human Biology faculty and student advisers, and initiated at least three quarters prior to graduation. Participation in a poster session on the internship experience is required during the first quarter that the student is in residence at Stanford after completion of the internship. May be repeated for credit and a total of 4 units accumulatively. Prerequisite: Human Biology core.

**HUMBIO 198. Senior Tutorial in Human Biology. 1-5 Unit.**

Reading for Human Biology majors in exceptional circumstances and under sponsorship of Human Biology associated faculty. Students must apply through Human Biology student services before registering. Reading list, paper, and evaluation required. May be repeated for credit.

**HUMBIO 199. Directed Reading/Special Projects. 1-4 Unit.**

Human Biology majors must obtain a sponsor from the Human Biology associated faculty or the Academic Council. Non-majors and students who have not declared must obtain a sponsor only from the Human Biology associated faculty. Students must complete application in student services office.

**HUMBIO 200. Teaching of Human Biology. 1-5 Unit.**

For upper division undergraduates and graduate students. Practical experience in teaching Human Biology or serving as an assistant in a lecture course. May be repeated for credit.

**Human Resource Management Courses****HRMGT 280. Human Resource Management. 2 Units.**

An organization's human resources are very often a key, even the key, to the organization's success. Human resource management (HRM) is therefore of strategic importance. We begin by surveying the fundamentals of human resource management from the perspective of the organization's overall strategy, relying on concepts and theories from your previous economics and organizational behavior courses. Then we focus on the question of motivation and, in particular, how organizations can successfully motivate their employees to provide "efforts" that go above and beyond the nominal specs of the particular job.

**HRMGT 282. HR for Startups. 4 Units.**

This course focuses attention on human resource strategies for startups. It discusses recruitment, incentives, design of jobs, development of talent, leadership and empowerment challenges in startups. We will deal with questions ranging from equity splits to founding team dynamics, hiring talent to the sequencing of hires. We will use a mix of "live cases" from the field, and lectures.

**HRMGT 284. Organizational Strategy. 2 Units.**

HRMGT 284 will focus on the organization strategy of the firm. The success of a firm depends not just on a well-designed product market strategy, but on how well that strategy is executed to align the goals of the employees with those of the firm. Topics covered include meeting strategic objectives, hiring, pay, training, teamwork, promotions, performance evaluation, pay for top executives, management practices in startups, and organizational transformation. While the general theme is the management of the firm, the topics also lend themselves to developing perspectives on how you manage your personal career.

**HRMGT 286. Managing People in the Global Context. 2 Units.**

The world of work has changed fundamentally - firms are now integrally linked to the global economy and many of you will manage teams of people located in different countries. What are the typical "people" challenges that arise when working across borders? We will answer this question by looking at topics such as hiring, job design, teamwork, training, pay and promotions. We will use exercises, cases from both developed and developing economies and guest lectures.

**HRMGT 289. Sloan: Talent Management Strategy. 4 Units.**

Everyone manages people; how can it be done better? How can it be done to facilitate your overall strategy, for your company and your career? This class covers the standard topics of people management: recruitment and selection; performance evaluation; incentives and compensation; promotions; job design; training; teamwork; and layoffs and retention. Each topic is covered through case studies and then analytical models for choosing and using best practices. The class content is aimed at managers who recognize that people management is important, but who typically want to spend less time managing people and more time doing what they really enjoy.

**HRMGT 302. Incentives and Productivity. 4 Units.**

This course is designed to teach the student how to use economics to solve practical personnel problems that affect worker productivity. Topics include: selecting the best workers to hire, training workers, turnover, setting compensation strategically, structuring salespersons' commissions, downsizing, using promotions as an incentive mechanism, and other topics. Examples and cases will be presented to demonstrate the importance of using economic techniques to structure human resources programs. The course will appeal most to the student who expects to be a general manager or who hopes to run his or her own business. Although the human resources specialist may benefit from this course, the emphasis will be on decisions that affect personnel, but are made primarily by general managers. The class format is somewhat unusual. Most classes consist of lecture with questions, but two are class workshops. The lecture will present a theoretical development of a topic. The questions discussed during the last part of the lecture period will involve practical business application of the theory presented in lecture. This course is more technical than other human resources courses, but should be accessible to anyone who has successfully completed the economics and statistics courses in the MBA core. Every student is expected to know calculus and basic probability and statistics. Although I will not emphasize the technical aspects on the final exam, the problem sets will require some knowledge of mathematics. To ease your fears, many "poets" have taken variants of this course in the past and have done well. There will be graded team problem sets and a final exam.

**HRMGT 512. Changing How We Manage People. 1 Unit.**

This course is designed for individuals interested in changing how people are managed to dispel flawed assumptions about human resource strategies and develop new techniques. In the past, human resource practices rarely served as a source of innovation in organizations. Rather, when establishing guidelines, policies, and rules, most companies chose to follow the norm, which often was unsatisfying and frustrating for their employees. These same firms chose not to focus on their human resource practices as a source of competitive advantage that could be used to hire the best talent, perform at the highest level, and weather the most difficult times. More recently, new ideas about the optimal approach to managing the firm's most important asset—its human capital—have flourished. As a result, a debate has surfaced in the corporate world about the best ways to get work done—from the allocation of job tasks to the structure of financial incentives. We tackle many of these fundamental questions in this course—what is the best way to hire people, to give performance feedback, to foster collaboration—but we look at these problems through a new lens, one informed more by evidence and analysis than by tradition and intuition. This class is an exercise in collaboration: a joint effort by a practitioner and an academic who are both hopelessly optimistic about how the management of human resources can be improved. In each session, we will tackle a novel and important topic (e.g., engagement surveys?) from three distinct points of view, first describing what is currently done, then identifying alternative approaches in other firms, and finally considering what a bold and creative approach might look like. After taking this course, you will be better able to: (1) identify misconceptions that undermine the effectiveness of human resource strategies; (2) learn new insights about human motivation in the workplace and (3) design new tools that can improve the working lives of your employees. We believe this perspective will be invaluable to you throughout your career.

**HRMGT 691. PhD Directed Reading. 1-15 Unit.**

This course is offered for students requiring specialized training in an area not covered by existing courses. To register, a student must obtain permission from the faculty member who is willing to supervise the reading.

Same as: ACCT 691, FINANCE 691, GSBGEN 691, MGTECON 691, MKTG 691, OB 691, OIT 691, POLECON 691, STRAMGT 691

**HRMGT 692. PhD Dissertation Research. 1-15 Unit.**

This course is elected as soon as a student is ready to begin research for the dissertation, usually shortly after admission to candidacy. To register, a student must obtain permission from the faculty member who is willing to supervise the research.

Same as: ACCT 692, FINANCE 692, GSBGEN 692, MGTECON 692, MKTG 692, OB 692, OIT 692, POLECON 692, STRAMGT 692

**HRMGT 802. TGR Dissertation. 0 Units.**

Same as: ACCT 802, FINANCE 802, GSBGEN 802, MGTECON 802, MKTG 802, OB 802, OIT 802, POLECON 802, STRAMGT 802

**Humanities & Sciences Courses****HUMSCI 100. 10 Jobs in 10 Weeks: Leveraging Your Liberal Arts Career. 1 Unit.**

This course is designed to give students a taste of 10 career fields in 10 weeks. Each week features an alum from a different industry, and a hands-on project pulled from their typical workday. In addition to guest speakers and in-class projects, focus is on tangible takeaways such as building a personal brand pyramid. Students also collaborate on exercises that teach them to articulate the core skills humanities and arts students bring to the table. Priority to undergraduates in the humanities and arts. Enrollment limited to 20. For more information, see <https://beam.stanford.edu/students/bachelors-co-terms-masters/courses>.

**HUMSCI 201. Graduate Environment of Support. 1 Unit.**

Psychosocial, financial, and career issues in adapting graduate students to Stanford; how these issues relate to diversity, resources, policies, and procedures. Discussions among faculty, advanced graduate students, campus resource people, and the dean's office. (Thomas).

**Iberian & Latin American Cultures Courses****ILAC 10SC. Spanish Immersion. 2 Units.**

Wouldn't it be great if you could quickly increase your Spanish proficiency through an intensive immersion experience right here at Stanford? Wouldn't you love to gain the cultural and historical knowledge necessary to begin taking film, literature, and culture courses generally reserved for advanced students? This intensive Spanish immersion course is designed to help students who have completed a year of Spanish to move forward quickly toward greater linguistic and cultural competence. After a year of Spanish, students tend to be able to handle straightforward interactions related to basic needs and personal information, but they generally lack the ability to handle more abstract discussions or to combine short utterances into longer presentations of their ideas. Most students likewise have little knowledge of the rich and complex history that surrounds the Spanish language or the central role that Spanish has played in the cultural, artistic, and political life of California. In this course, a team of experienced instructors will help students improve their Spanish through intensive lessons that incorporate film, literature, and social issues. Through a focused discussion of the themes of immigration and democracy in Latin America, Spain, and the United States, as well as excursions and guest lectures by Stanford faculty and community leaders, this course will immerse students in Spanish and help them to gain advanced proficiency much more quickly. Sophomore College Course: Application required, due noon, April 5, 2016. Apply at <http://soco.stanford.edu>.

**ILAC 102N. The Memory of the Eye: Traces of dictatorship in films from the Iberian Peninsula. 3-5 Units.**

Through major Spanish, Portuguese, Basque, and Catalan films from the last quarter of the 20th century to the present, this course will explore the complexities of individual recollection under conditions of collective trauma and political distortion of the past. Films by Saura, Almodovar, Amenobar, Erice, Marco Martins, Maria de Medeiros, Julio Medem, Almodovar, Bigas Luna, Ventura Pons, and Augusto Villaronga. A festival for the eye and the mind.

**ILAC 103N. The Millenium Novel in Latin America. 3 Units.**

Between 2000 and 2012, a young Spanish American novel emerges, taking at times a minimalist point of view to narrate individual stories with a subjective tone, or continuing a tradition of the historical panorama to present national tragedies that occurred in the last two or three decades. Focus is on this new type of novel from different countries, with such titles as "El cuerpo en que naci" by Guadalupe Entel; "Las teorías salvajes" by Pola Oloixarac; "El ruido de las cosas al caer" by Juan Gabriel Vazquez; and "Bonsai" by Alejandro Zambra, among others. Taught in Spanish.

**ILAC 104N. Radionovelas. 3-5 Units.**

Study and performance of Spanish-language novels written for and performed on radio during XX century.

**ILAC 107N. 3D Modeling, Virtual Media, and the Poetics of the Self: The Art and Lives of Fernando Pessoa. 3-5 Units.**

Preference to freshmen. The poetry and prose of Fernando Pessoa, Portugal's greatest modern poet. As famous for his written work (in Portuguese and English) as for his complex understanding of selfhood (he would divide his own subjectivity into 106 different, autonomous selves), Pessoa remains a towering and largely perplexing figure even today. Class discussions will focus on close readings of Pessoa's work along with the implications of his theory of subjectivity for our understanding of modernity, art, and the self. Class field trip to San Francisco. Written assignments include a journal, blog posts, and a final paper written as someone else. Taught in English.

**ILAC 108N. Masterpieces: García Márquez. 3-5 Units.**

Extensive and detailed reading of the major works and a selection of the most significant critical texts about the author. Secondary readings by Vargas Llosa, Ludmer, Moretti, and Bloom. Topics include: macondismo, magical realism, canonicity, representations of violence, and autobiography.

**ILAC 110. Spanish Society in the 21st Century Through Film. 3-5 Units.**

Open to undergraduates with an interest in 21st Century Film and the social reality of Spain nowadays. Explores how Spain has evolved from being one of the most undeveloped European countries to become a first mover in social issues such as gay marriage or women's public role. Topics include racism, migration, the reconstruction of the past and the vision of the other. Themes are analyzed through movies directed by Spanish and American filmmakers such as: Cesc Gay, Bollaín, Bigas-Luna, González-Iñárritu and Woody Allen. Class taught in Spanish, readings both in Spanish and English.

**ILAC 111Q. Spanish-English Literary Translation Workshop. 3 Units.**

This course introduces students to the theoretical knowledge and practical skills necessary to translate literary texts from Spanish to English and English to Spanish. Topics may include comparative syntaxes, morphologies, and semantic systems; register and tone; audience; the role of translation in the development of languages and cultures; and the ideological and socio-cultural forces that shape translations. Students will workshop and revise an original translation project throughout the quarter.

Same as: DLCL 111Q

**ILAC 113Q. Borges and Translation. 3-5 Units.**

Borges's creative process and practice as seen through the lens of translation. How do Borges's texts articulate the relationships between reading, writing, and translation? Topics include authorship, fidelity, irreverence, and innovation. Readings will draw on Borges's short stories, translations, and essays. Taught in Spanish. Prerequisite: 100-level course in Spanish or permission of instructor.

Same as: DLCL 113Q

**ILAC 114N. Introduction to Lyric Poetry. 3-5 Units.**

A basic introduction to the elements of lyric poetry—image, metaphor, symbol, connotation, denotation, irony, rhyme and meter - drawing upon a selection of poems from major poets of the Hispanic World, including, G. A. Bécquer, Rosalía de Castro, Rubén Darío, Miguel de Unamuno, Antonio Machado, Juan Ramón Jiménez, García Lorca, Pablo Neruda, and Gabriela Mistral. This is a bilingual course, taught both in English, and Spanish, with an emphasis on Spanish.

**ILAC 116. Approaches to Spanish and Spanish American Literature. 3-5 Units.**

Short stories, poetry, and theater. What analytical tools do the "grammars" of different genres call for? What contact zones exist between these genres? How have ideologies, the power of patronage, and shifting poetics shaped their production over time? Authors may include Arrabal, Borges, Cortázar, Cernuda, García Márquez, Lorca, Neruda, Rivas. Taught in Spanish. Prerequisite: SpanLang 13C.

**ILAC 120. Advanced Critical Reading in Spanish. 3-5 Units.**

Research and writing in the humanities; focus is on culture, literature, and society of the Spanish-speaking world. Students will learn how to conduct research online and in the library while developing archive skills. Emphasis is on skill-building while exploring topics of interest to each student from various historical periods and global locations. Taught in Spanish. Prerequisite: SPANLANG 13 or equivalent. Meets Writing-in-the-Major requirement.

**ILAC 122. Literature and Politics - Two Mediterranean Cases: Catalonia and Italy. 3-5 Units.**

A comparison between the different roles played by writers as members of the intellectual establishment in Catalonia, Spain and Italy. Focus on the relation between intellectuals and politics in shaping national identity. We will give especially consideration to the role played by intellectuals during the Fascist and Francoist dictatorships and during Spain's transition to democracy. Taught in English.

Same as: ITALIAN 136

**ILAC 130. Introduction to Iberia: Cultural Perspectives. 3-5 Units.**

The purpose of this course is to study major figures and historical trends in modern Iberia against the background of the linguistic plurality and social and cultural complexity of the Iberian world. We will study the fundamental issues of empire, the Napoleonic occupation of Spain, Latin American independence, recurring civil wars, federal republicanism, and the historic nationalisms (Galician, Basque, and Catalan), all leading up to the Spanish Civil War (1936-1939), which is a defining moment in modern Spanish and European history, with ongoing consequences still felt and debated painfully today in contemporary Spain. This course is designed to help prepare students for their participation in the Stanford overseas study programs in Barcelona and Madrid. Taught in Spanish.

**ILAC 131. Introduction to Latin America: Cultural Perspectives. 3-5 Units.**

Part of the Gateways to the World program, this is an introductory course for all things Latin American: culture, history, literature, and current events. By combining lecture and seminar formats, the class prepares you for all subsequent research on, and learning about, the region. Comparative discussion of independence movements in Mexico, Central America, the Caribbean, the Andean Region, Brazil, and the Southern Cone. Other topics vary yearly, including: representations of ethnicity and class, the Cold War, popular culture, as well as major thinkers and writers. Open to all. Recommended for students who want to study abroad in Santiago, Chile. Required for majors in Spanish or Iberian and Latin American Cultures (ILAC). In Spanish.

**ILAC 132. Drug Wars: from Pablo Escobar to the Mara Salvatrucha to Iguala Mass Student Kidnapping. 3-5 Units.**

This course will study the ways in which Latin American Narcos are represented in feature films, documentaries, essays, and novels. We will choose two regions and times: Pablo Escobar's Colombia (1949-1993) and current Mexico (1990-2015), including the mass students kidnappings in Iguala, México, 2014. Films: *Sins of my Father* (Entel, 2009); *Pablo's Hippos* (Lawrence Elman, 2010); *True Story of Killing Pablo*, David Keane (2002), *Sumas y restas* (Victor Gaviria, 2003); *La vida loca* (Poveda, 2009), *Sin nombre* (Cary Fukunaga, 2009), *El velador* (Almada, 2011); *La jaula de oro* (Quemada-Diez, 2013); *La bestia* (Pedro Ultras, 2010); *Cartel Land* (Heineman, 2015); *The Missing 43* (Vice, 2015). Books: *Alejandra Inzunza*, José Luis Pardo, Pablo Ferri: *Narco America, de los Andes a Manhattan* (2015); Sergio González Rodríguez: *El hombre sin cabeza* (2010); Rafael Ramírez Heredia: *La Mara* (2004).

**ILAC 133N. The Animal Within: Animal Presence in Latin American Narrative. 3 Units.**

How does the criterion for the division between the human and the animal take part on contemporary Latin American narrative? To what extent is this divide challenged or contested? The course combines a discussion of the literary works of authors like Jorge Luis Borges, Horacio Quiroga, Julio Cortázar, Mario Bellatin, Clarice Lispector, and José María Arguedas with a reflection on the animal and animality in the writings of Bataille, Derrida and Deleuze. Taught in English.

**ILAC 134. In the First Person: Representation of the Self in Modern Latin America. 3-5 Units.**

This course examines different expressions of self-portrayal in Latin America from 1920s to the present. The course explores different models of self-shaping and forms of expression that draw contours on self and identity in Latin America. After a brief consideration of the Inca Garcilaso, Sor Juana, J.F. Sarmiento, we examine the works of José Vasconcelos, Norah Lange, Victoria Ocampo, Frida Kahlo, José María Arguedas, Rosario Castellanos, Mario Bellatin, Tununa Mercado, Marcela Trujillo, Fernando Vallejo, among others. Taught in Spanish; Spanish proficiency required.

**ILAC 135. From Book to Screen: Brazilian Novels and Their Film Adaptations. 3-5 Units.**

Can the study of cinematographic adaptation of novels help us understand better the specific nature of literature and that of film? Addressing this central question, the course combines an introduction to Brazilian narrative (Euclides Da Cunha, Mário De Andrade, João Guimarães Rosa, Graciliano Ramos, Rubem Fonseca, Clarice Lispector) and a panorama of Brazilian cinematography (from Cinema Novo to contemporary productions). The course offers a space for reflection on the multifaceted relationship between the literary and the cinematographic. Taught in English.

**ILAC 136. Modern Iberian Literatures. 3-5 Units.**

1800 to the mid 20th century. Topics include: romanticism; realism and its variants; the turn of the century; modernism and the avant garde; the Civil War; and the first half of the 20th century. Authors may include Mariano Jose de Larra, Gustavo Adolfo Becquer, Rosalia de Castro, Benito Perez Galdos, Jacint Verdaguer, Eca de Queiros, Miguel de Unamuno, Ramon de Valle-Inclan, Antonio Machado, and Federico García Lorca. Taught in Spanish. Prerequisites: SPANLANG 13 or equivalent.

**ILAC 137. Latin American Heroes and Heroines. 3-5 Units.**

This course will focus on artists, writers, and political leaders in Latin America whose work would change Latin American history. The historical significance of some of these individuals is polemical, but their influence in Latin American culture is nevertheless of great importance. The heroes and heroines to be studied include: Eva Peron, Frida Kahlo, Ernesto Guevara, Anthony Quinn, Evo Morales, Michelle Bachelet, Fidel Castro, Jose Mujica, Carlos Fuentes, German Valdes Tin Tan, Mario Moreno Cantinflas, Gabriel García Márquez, Niní Marshall."

**ILAC 138. From National Angst to Incipient Modernity: Spanish Literature After Empire. 3-5 Units.**

This course focuses on the most predominant and influential Spanish writers from 1836 to 1936, exploring the emergence of a new political and social conscience in Spain and its transition from global empire to a nation that questions the ideas behind its world decline and eventual Civil War. The writers chosen portray a nation trying to find a new political order after the failure of various forms of government. Readings include the nonfiction and narrative of Larra, Espronceda, Galdós, and subsequently analyzing the innovative thinking and actions of Generation of 1898 philosopher Unamuno and the poets Machado and García Lorca. Taught in Spanish.

**ILAC 140. Migration in 21st Century Latin American Film. 3-5 Units.**

Focus on how images and narratives of migration are depicted in recent Latin American film. It compares migration as it takes place within Latin America to migration from Latin America to Europe and to the U.S. We will analyze these films, and their making, in the global context of an evergrowing tension between "inside" and "outside"; we consider how these films represent or explore precariousness and exclusion; visibility and invisibility; racial and gender dynamics; national and social boundaries; new subjectivities and cultural practices. Films include: *El niño pez*, Bolivia, *Ulises*, Faustino Mayta visita a su prima, Copacabana, *Chico y Rita*, *Sin nombre*, *Los que se quedan*, *Amador*, and *En la puta calle*. Films in Spanish, with English subtitles. Discussions and assignments in Spanish. Same as: CHILATST 140

**ILAC 145. Poets, Journalists and Collectors: Latin American Modernismo. 3-5 Units.**

Discusses the different artistic avatars exercised by Latin American modernistas at the turn of the 19th Century in the context of growing capitalism, technological innovation and social transformation. We focus on how modernistas as poets, journalists and collectors explored and transgressed the limits of the individual and his/her situation. We consider topics like cosmopolitanism, dandysm, autonomy of art, and the aesthetic cultivation of the self. Authors include: Delmira Agustini, Rubén Darío, Julián del Casal, Leopoldo Lugones, José Martí, Manuel Gutiérrez Nájera, José Enrique Rodó, José Asunción Silva, and Abraham Valdelomar. Spanish proficiency required.

**ILAC 157. Medieval and Early Modern Iberian Literatures. 3-5 Units.**

Survey of Iberian literature from the medieval and early modern periods. When covering texts in languages other than Spanish, translations into English or Spanish will be made available. Taught in Spanish; prerequisite: SPANLANG 13 or equivalent.

**ILAC 161. Modern Latin American Literature. 3-5 Units.**

From independence to the present. Topics include romantic allegories of thenation; modernism and postmodernism; avant-garde poetry; regionalism versus cosmopolitanism; indigenous and indigenist literature; magical realism and the literature of the boom; Afro-Hispanic literature; and testimonial narrative. Authors may include: Bolívar, Bello, Gómez de Avellaneda, Isaacs, Sarmiento, Machado de Assis, Darío, Martí, Agustini, Vallejo, Huidobro, Borges, Cortázar, Neruda, Guillon, Rulfo, Ramos, García Marquez, Lispector, and Bolaño. Taught in Spanish.

**ILAC 175. Daydreaming in Portugal and Brazil. 3-5 Units.**

This course explores the role of the imagination in 19th and 20th century Portuguese and Brazilian literature. We will read 4-5 novels, short stories and articles analyzing how and why authors recreate imaginary processes in their characters, and what these processes reveal about the socio-cultural contexts of their period. Authors include Raúl Brandão, Machado de Assis, Antonio Lobo Antunes, Raduan Nassar, and Álvaro Cardoso Gomes, with complementary short pieces by Fernando Pessoa, José Saramago, Mario de Andrade, Guimarães Rosa, and Clarice Lispector. Readings available in English and Portuguese. In English.

**ILAC 193. The Cinema of Pedro Almodovar. 3-5 Units.**

Pedro Almodóvar is one of the most recognizable auteur directors in the world today. His films express a hybrid and eclectic visual style and the blurring of frontiers between mass and high culture. Special attention is paid to questions of sexuality and the centering of usually marginalized characters. This course studies Pedro Almodóvar's development from his directorial debut to the present, from the "shocking" value of the early films to the award-winning mastery of the later ones. Prerequisite: ability to understand spoken Spanish. Readings in English. Midterm and final paper can be in English. Majors should write in Spanish. Same as: ILAC 393

**ILAC 193Q. Spaces and Voices of Brazil through Film. 3-4 Units.**

The manners in which a country is perceived and defines itself is a result of many complex forces, and involves the reproduction of social relations and complex social constructions both on the part of those who live there and those who see it from a distance. The perceptions of what Brazil is and what defines the country has changed throughout times, but has conserved some clear pervasive defining traits. This course is an introduction to the history, culture, politics and artistic production of Brazil as seen through feature films, documentaries and some complementary readings. Movies include, among others, *Banana is my Business*, *Black Orpheus*, *Olga*, *They Don't Use Black-Tie*, *City of God*, *Central Station*, *Gaijin*, and *Four Days in September*-among others. In English.

Same as: PORTLANG 193Q

**ILAC 199. Individual Work. 1-12 Unit.**

Open only to students in the department, or by consent of instructor.

**ILAC 201. Modern Spanish Theater. 3-5 Units.**

Survey of Spanish theater from 19th- to 21st-centuries.

**ILAC 207E. RENAISSANCE PASTORALISMS. 3-5 Units.**

Major works of Iberian pastoral lyric poetry and narrative fiction. What made this classical mode so popular during the Renaissance and beyond? What are its essential characteristics? What does it tell us about early modern theories of humanity's relation to nature? Was it merely a form of erotic escapism or is something darker and more troubling lurking between its lines? What can it teach us today about nature, eros, ethics, death, and love? Authors include: Theocritus; Virgil; Sannazaro; Garcilaso de la Vega; Montemayor; Ribeiro; Camões; and Cervantes. Readings in English, Portuguese, and Spanish. Discussion in English.

**ILAC 210. Queer Almodovar. 3-5 Units.**

Focus on the representation of non-normative sexualities and genders in films by Pedro Almodóvar, one of the most recognizable auteur directors in Europe today. Analysis of his hybrid and eclectic visual style complemented by critical and theoretical readings in queer studies. Taught in English. Same as: FEMST 210

**ILAC 216. Comparative Cities: Travel Literature as Urban Experience in Catalan Culture. 3-5 Units.**

Comparative reflection on travel literature, focused on some major Western cities, taking as a starting point the reflections on travel by some of the most prominent Catalan writers in the 20th century. Catalan travel literature, whether autobiographical or in essay form, is often related to literary journalism and exile. The foremost Catalan authors take notice of cities like Paris, Berlin, Madrid, Venice, Buenos Aires and New York, at historically decisive times: the two World Wars, the rise of fascism in Italy, Spain and Germany, the Cold War, the emergence of the United States as a world power. In this sense, travel writers offer a double comparative vantage point: on the one hand, between their own literature and that of other European travel writers; on the other hand, between Barcelona and some of the greatest cities in the world. These contrasts, perceived through the literary lens, help us understand the cosmopolitanism and modernity of Catalan culture. Taught in Spanish; all readings available both in Catalan and Spanish, some readings also available in English.

**ILAC 218. Anticlericalism in the Iberian Novel of the 19th Century. 3-5 Units.**

The rapid social and cultural changes in which 19th-century novelists wrote; the anti-clerical stance as marker of society's attempts to modernize. Why were monks and priests reviled by many Spanish novelists? How and why did they re-write Spanish history around these figures? What was the role of the church and religious men in modern society? Questions of individualism, property, and labor in novels by major Iberian prose realists. In Spanish.

**ILAC 219. Lusophone Africa. 3-5 Units.**

Focus on representative authors and works of modern Lusophone African literature (the literatures of Angola, Cabo Verde, Guinea-Bissau, Mozambique, and São Tomé e Príncipe) as well as relevant work in post-colonial theory. Students may take the course in English (3 units) or in English and Portuguese (5 units). Students who choose to take the course for five units must attend the Friday Portuguese discussion section.

**ILAC 223. The Generation of 1898 and Beyond. 3-5 Units.**

Preference for graduate students, majors are welcome. Course will focus on six major authors (Unamuno, Baroja, A. Machado, J. R. Jiménez, Valle-Inclán, García Lorca) and representative works, written between 1898 and 1930, dealing with an historical period of crisis and transition, and displaying major aesthetic innovations in both poetry and theater. Fundamental themes include the decline of feudal Galicia, the Spanish-American War of 1898, the emergence and social activism of new social forces, and the struggle for and betrayal of democracy, expressed through the various genres of the novel, poetry, and theater. Major works of Antonio Machado, Juan Ramón Jiménez, and Federico García Lorca will be examined, with special emphasis on the historical context of the first three decades of the 20th century and their contributions to the development of 20th century Spanish lyric poetry. Taught in either English or Spanish, depending on course enrollment.

**ILAC 224. Literature Inspired by the Spanish Republic and the Spanish Civil War. 3-5 Units.**

This course will deal with the significance of the Spanish Civil War in Iberian, European, and world history, through the literary works (poetry, theater, and novel) of major Spanish and Latin American writers. The war is anticipated in the poetry of Antonio Machado and in the theater of García Lorca, dealt with directly in the poetry of Alberti and Hernandez, of Neruda (Chile), Vallejo (Peru), and N. Guillen (Cuba), and treated in the aftermath during the Franco dictatorship in the novels of Cela and Sender. Taught in English.

**ILAC 235. Critique of Technology. 3-5 Units.**

Informed citizens living in today's world, and especially in Silicon Valley, should be able to formulate their own, articulate positions about the role of technology in culture. The course gives students the tools to do so. Against the trend towards the thoughtless celebration of all things technological, we will engage in critique in the two senses of the term: as careful study of the cultural implications of technology and as balanced, argumentative criticism. Can technology make life more meaningful, society more fair, people smarter, and the world smaller? Selections by fiction writers, philosophers and thinkers (such as Heidegger and Beller), as well as recent popular works of social commentary, such as *You are not a Gadget*, *The Shallows*, *24/7*, and *Present Shock*. Same as: STS 200L

**ILAC 239. Borges and Translation. 3-5 Units.**

Borges's creative process and practice as seen through the lens of translation. How do Borges's texts articulate the relationships between reading, writing, and translation? Topics include authorship, fidelity, irreverence, and innovation. Readings will draw on Borges's short stories, translations, and essays. Taught in Spanish. Prerequisite: 100-level course in Spanish or permission of instructor. Same as: DLCL 239

**ILAC 240E. Borges and Philosophy. 3-5 Units.**

Analysis of the Argentine author's literary renditions of philosophical ideas. Topics may include: time, free will, infinitude, authorship and self, nominalism vs. realism, empiricism vs. idealism, skepticism, peripheral modernities, postmodernism, and Eastern thought. Close reading of short stories, poems, and essays from *Labyrinths* paired with selections by authors such as Augustine, Berkeley, James, and Lao Tzu. The course will be conducted in English; Spanish originals will be available. Satisfies the capstone seminar requirement for the major in Philosophy and Literature.

**ILAC 241. Fiction Workshop in Spanish. 3-5 Units.**

Spanish and Spanish American short stories approached through narrative theory and craft. Assignments are creative in nature and focus on the formal elements of fiction (e.g. character and plot development, point of view, creating a scene, etc.). Students will write, workshop, and revise an original short story throughout the term. No previous experience with creative writing is required. Readings may include works by Ayala, Bolaño, Borges, Clarín, Cortázar, García Márquez, Piglia, Rodoreda, and others. Enrollment limited.

**ILAC 242. Poetry Workshop in Spanish. 3-5 Units.**

Latin American and Spanish poetry approached through elements of craft. Assignments are creative in nature and focus on lyric subgenres (e.g. ode, elegy, prose poetry) and formal elements of poetry (e.g. meter, rhythm, rhetorical figures, and tropes). Students write original poems over the course of the quarter. No previous experience with creative writing is required. Authors include Darío, Machado, Jiménez, Vallejo, Huidobro, Salinas, Pales Matos, Lorca, Aleixandre, Cernuda, Neruda, Girondo. Course is offered every other year. Taught in Spanish. Prerequisite: 100-level course taught in Spanish, or equivalent. Enrollment limited to 10 students.

**ILAC 243. The Millenium Novel in Latin America. 3-5 Units.**

Between 2000 and 2012, a young Spanish American novel emerges, taking at times a minimalist point of view to narrate individual stories with a subjective tone, or continuing a tradition of the historical panorama to present national tragedies that occurred in the last two or three decades. Focus is on this new type of novel from different countries, with such titles as "El cuerpo en que nací" by Guadalupe Entel; "Las teorías salvajes" by Pola Oloixarac; "El ruido de las cosas al caer" by Juan Gabriel Vazquez; and "Bonsai" by Alejandro Zambra, among others.

**ILAC 245. Brazil's Rhythm and Songs. 3-5 Units.**

Audiovisual introduction to Brazilian popular music. Chorinho, Samba, Frevo, Forró, Bossa Nova, Tropicalia, Pagode, Repente, Hip-Hop, Axe. Candomblé and Capoeira rhythms. Amerindian Songs. Dances and Rituals: Bumba meu Boi, Congada, Caterete, Carnaval. Drama Performances and Musical Films. Final visual-sonorous exhibition created by students. In English. Special sections for Portuguese learners.

**ILAC 247. Film and Politics: Argentina in the Hour of the Furnaces. 3-5 Units.**

Argentina is the best example of a Latin American country that went from democracy to dictatorship, to war (Falkland Islands war) to democracy, to terrorist attacks (against AMIA, the Jewish center), to financial crisis (Corralito), to corruption, to a polemically unique leftist female president (Cristina Kirchner). This course will focus in the documentary work of Fernando Solanas (*The hour of the furnaces*, *Fierro's sons*, *Tangos*, *South*, *Social Genocide*, *Latent Argentina*, *The Dignity of the Nobodies*, *The next station*, etc.) that covers sixty years of convulsive history and social crisis.

**ILAC 248. Distant Borders: Hispanic Migrations. 3-5 Units.**

During the last half a century, different people from Africa, Eastern Europe, have been moving from one area to another, looking for a better habitat. This has been a world wide phenomenon that has changed hundreds of thousands of lives, producing imperfect utopias. This course will focus on the assimilation of families and individuals to different cultures, as well as how the new country deals with this, many time rejecting the "other". Cinema and literature have been a great source to understand the drama of migration, and the course will use extensively these forms of artistic representation. Authors include Ángel Vásquez, Jorge Semprún, Mahi Binebine, Ariel Dorfman, Alberto Fuguet, Zoé Valdés, and Julia Álvarez.

**ILAC 251. Latin American Literary Theory. 3-5 Units.**

Latin American literary theory through the works of José Carlos Mariátegui, José Enrique Rodó, Alfonso Reyes, Antonio Candido, Roberto Schwartz, Angel Rama, Roberto Fernández Retamar, Antonio Cornejo Polar, Josefina Ludmer, Flora Sussekund. This course will focus on the concepts of "the lettered city", "hybridization", "psychoanalysis", "marxist theory", "class struggle", "literary politics", "latinamericanism". In sum: Literary theory from the inside of Latin American culture, considering also its Western influences. Taught in Spanish.

**ILAC 252. Guerrillas. 3-5 Units.**

The modern strategic response to state dictatorships in Latin America has its origins in Ernesto Che Guevara's "Guerra de guerrillas". This course will focus on how those irregular military groups were formed in Chile, Mexico, Argentina, and Uruguay during the 20th Century. We will give particular attention to the "invisible" guerrillas" (the women) in revolutionary moments. That view will be enhanced by films and literature on this subject. Authors include Palau, Ignacio Taibo II, Tort, Gibler, Guevara, Gilio, Caula, and Cavallo.

**ILAC 253. Poverty, Redemption and Writing: Franciscanism in Latin America. 3-5 Units.**

How are theories of poverty reflected in literary writing? What is the relationship between writing and redemption? Addressing these central questions, the course examines the heritage of Catholic thought and aesthetics in prominent colonial and post-colonial Latin America through the figure of Francis of Assisi. Franciscan writing allows us to explore the notions of subjectivity, solidarity, exception, animality, and capital. In Spanish.

**ILAC 254. Surrealism in Latin America and Spain. 3-5 Units.**

This course focuses on the legacy of Surrealism in the Hispanic transatlantic traditions, both in literature and the visual arts (film and paintings). We will study and analyze two aesthetic paths: on one hand, the embracing of Surrealism to enrich one's own poetics; on the other, that of other groups and authors' orthodox approach to the principles established by André Breton and his cohort in the aesthetic adventure. The course will study and assess Surrealism's lasting echoes in recent literary manifestations (among them Roberto Bolaño's works). Taught in Spanish.

Same as: Poetry and Fiction

**ILAC 257. Dictatorships in Latin America through testimonies and film. 3-5 Units.**

Focus on Pinochet coup, the Falkland Islands, the prison Libertad in Uruguay, the "Plan Condor." How literature, journalism and cinema denounced and revisited the worst political times in Latin America. Taught in Spanish.

Same as: Argentina, Chile, Uruguay in the 70s

**ILAC 261. Voices in Brazilian Fiction. 3-5 Units.**

Brazilian Literary canon. Novels and short stories from independence to the present. Topics include romanticism and realism; regionalism; modernism and postmodernism. Authors may include: José de Alencar, Machado de Assis, Oswald de Andrade, Graciliano Ramos, Guimarães Rosa, Lispector, Hilda Hilst, Silviano Santiago. Readings in Portuguese; Class discussions in English; Assignments in Portuguese or in English.

**ILAC 263. Visions of the Andes. 3-5 Units.**

What visions of the Andes circulate in Latin American literature, photography and painting? How are they constructed? How is their value accrued? The course focuses on visual and written images of Andean landscapes. Beginning with 19th century technical photography, the course explores the visual economy of the Andes in representative texts and images from Peru, Bolivia and Chile, vis-à-vis critical discourses about Andean culture. In Spanish.

Same as: ILAC 363

**ILAC 264. Visions of the Andes. 3-5 Units.**

What visions and images of the Andes circulate in Latin American literature? How are they constructed? How is their value accrued? The course explores the visual economy of the Andes in representative literary texts of the 20th century, vis-a-vis critical discourses about Andean culture. Topics: visual culture and identity, iconography and the word/image tension, nature vs. culture, debates on utopia, indigenismo, mestizaje, and hibridez. Authors may include: Pablo Neruda, Gabriela Mistral, Martín Chambi, José Carlos Mariátegui, César Vallejo, José María Arguedas, Mario Vargas Llosa, Raul Salmon, Aurelio Arturo.

Same as: ILAC 364

**ILAC 266. Beware of the Animal: Narratives of Animality and Care in Latin America. 3-5 Units.**

What can we learn from literary and filmed representation of care? What is the relationship between care and animality? Taking stock of a growing number of contemporary Latin American novels and films that focus on precarious forms of shared life (animal and human-animal), the course explores the ambiguous directionality of care for and against to consider new forms of human-nonhuman collectivities. We study different modes of care and caring identities. In Spanish.

**ILAC 268. Cultural Policies in Latin America and Europe. 1980-2015.. 3-5 Units.**

The purpose of this seminar is to provide an approach to the dominant conceptions about culture and cultural policies, starting with the doctrine of UNESCO about the protection of cultural diversity. We will compare different developments of those ideas and policies in Europe and in Latin America. We will study some policies on specific cultural fields (education, cultural heritage, infrastructures and access to culture, communications and social languages, entertainment and performing arts, content production and distribution industry, etc.) Finally, we will analyze the current public policies of European and Latin American states, in a changing cultural age determined by globalization, computing development, digitization and the prominence of networks and download and interconnection technologies.

**ILAC 271. Brazilian Presence: Landscape, Life and Literature. 3-5 Units.**

This course explores Brazil's literature and its representation of the country's diverse regional cultures and ecology. The course offers an in-depth discussion of Brazilian society, presenting fundamental texts that portray Brazilian landscape with its diverse eco-regions, people and culture. The program includes major authors such as Euclides da Cunha and his description of the Amazon in the early 1900s; the travels of anthropologist Claude Lévi-Strauss and his contact with Caduveo, Nhamiquara, Bororo and Tupi indigenous tribes; Mario de Andrade's novel, *Macunaima* and its ironical representation of Brazilian identity and miscegenation; Guimarães Rosa's short stories that show the imagery of the sertão and its people (the sertanejo culture); Milton Hatoum's novel, *The Brothers*, and its impressive portrayal of Manaus city in the 20th Century as an unstable world seen through the lens of Lebanese immigrants. These central books will be discussed together with critical essays about some important historical and contemporary challenges that Brazil has faced and continues to grapple with today.

**ILAC 272E. Clarice Lispector: Literature, Autobiography and Psychoanalysis. 3-5 Units.**

"If Kafka had been a woman. If Rilke had been a Jewish Brazilian born in the Ukraine. If Rimbaud had been a mother. If Heidegger had written the *Romance of the Earth* over there is where Lispector writes." (H.Cixous.) From *Near to the Wild Heart* to her *Complete Stories*. In English, with Portuguese sections.

**ILAC 276. Aesthetics, Revolutionaries and Terrorists. 3-5 Units.**

Who is a terrorist and who is a revolutionary? With surge of Anarchism in the XXth Century, the "culture of fear" has been one of the axes of political activism. This course will explore the difference between the desire to correct injustice in society (Revolution) and the desire to destroy society (Terrorism) using literary texts and films. Readings will include novels and testimonies of the protagonists in various social struggles, as well as journalistic and academic papers about these social movements.

Same as: ILAC 376

**ILAC 277. Spanish and Society: Rock en Español. 3-5 Units.**

Can music be a medium to study how a society communicates? This course wants to answer this question by paying attention to how has Spanish changed and adapted in recent history. Taking rock and pop as a global musical phenomenon, the focus of the course will be the most prominent bands and songs in Spanish language. Emphasis is on the analysis of the use of Spanish in real-world contexts. In Spanish.

**ILAC 278. Senior Seminar: Don Quijote. 3-5 Units.**

Focus is on a close reading of the original Spanish text of Miguel de Cervantes's prose masterpiece. The rise of the novel, written culture, empire, the rise of capitalism, Islam in the West, madness, reason and imagination, genius, and masochistic desire. (In Spanish).

**ILAC 278A. Senior Seminar: Machado de Assis. Discourse Networks and the Novel in Brazil. 3-5 Units.**

This course is designed to present the father of Modern Novel in Brazil, Machado de Assis, through a close reading of some of his masterpieces: *The Posthumous Memoirs of Bras Cubas* (1881), *Dom Casmurro* (1900), *The Alienist* and his short stories. Topics include: Slavery in Rio de Janeiro; Samba, Capoeira and Literature, the media revolution of 1880. In Portuguese, with Spanish section.

**ILAC 279. Searching for identity. 3-5 Units.**

The course will involve extensive and detailed reading, in addition to listening and viewing of materials that represent different modes of artistic expression. We will use literature, music/voice/sound, and film as tools in the process of self-discovery and re-discovery. Some of the questions we will address are: why do we write or speak in a certain way? Why might a particular musical piece, or a certain film, allow us to express who we are? How might our cultural background affect our preference for a work of art? What does that say about us? Further, do we see ourselves as part of a collective or as individuals? Focusing on a different artistic medium each week, the students will choose a work reflecting their individuality to bring for discussion within the group.

**ILAC 280. Latin@ Literature. 3-5 Units.**

Examines a diverse set of narratives by U.S. Latin@s of Mexican, Puerto Rican, Cuban, Guatemalan, and Dominican heritage through the lens of *latinidad*. All share the historical experience of Spanish colonization and U.S. imperialism, yet their im/migration patterns differ, affecting social, cultural, and political trajectories in the US and relationships to "home" and "homeland," nation, diaspora, history, and memory. Explores how racialization informs genders as well as sexualities. Emphasis on textual analysis. Taught in English.

Same as: CHILATST 200, CSRE 200, ILAC 382

**ILAC 281. Fernando Pessoa's Five forms of Anxiety. 3-5 Units.**

Ethics, politics, and philosophy in the poetry of Fernando Pessoa. A close analysis of five forms of anxiety that pervade Fernando Pessoa's poetry: 1) that you are a person; 2) that you are one person; 3) that you are yourself; 4) that your life can be wasted; and 5) that others may fail to understand you. How do these forms of anxiety shape Pessoa's style(s), his system of heteronyms, his interest in certain literary forms (such as esoteric and prophetic literature), and his perception of the Portuguese cultural and geohistorical context? Readings available in English and Portuguese. Taught in English.

**ILAC 282. Queer Film. 3-5 Units.**

Analysis of representations of queer lives in films from the Spanish-speaking world (including the U.S.). We will be looking at the meaning each film produces about a wide variety of queer experience, in relation to a specific national, historical and cultural context. We will also practice doing close readings of how each film produces meaning about queer experience, focusing on the formal features mise-en-scene, cinematography, sound, editing, narrative and style.

Same as: FEMGEN 282

**ILAC 293E. Baroque and Neobaroque. 5 Units.**

The literary, cultural, and political implications of the 17th-century phenomenon formed in response to the conditions of the 16th century including humanism, absolutism, and early capitalism, and dispersed through Europe, the Americas, and Asia. If the Baroque is a universal code of this period, how do its vehicles, such as tragic drama, Ciceronian prose, and metaphysical poetry, converse with one another? The neobaroque as a complex reaction to the remains of the baroque in Latin American cultures, with attention to the mode in recent Brazilian literary theory and Mexican poetry.

Same as: COMPLIT 233, ENGLISH 233

**ILAC 299. Individual Work. 1-12 Unit.**

Open to department advanced undergraduates or graduate students by consent of professor. May be repeated for credit.

**ILAC 305. Rhythm: Ethics and Poetics of the Premodern. 3-5 Units.**

Focus is on the notion of rhythm as a theoretical frame for the analysis of medieval and early modern Iberian poetry. Topics include Ancient Greek and modern conceptions of rhythm and the links between poetics and ethics in the medieval period and beyond. Authors include: Aeschylus, Plato, Aristoxenus, Maurice Blanchot, Paul Celan, Emmanuel Levinas, Arcipreste de Hita, Ausiàs March, Garcilaso de la Vega, and Luís de Camões. Taught in English.

**ILAC 309. First Year Writing Workshop. 1 Unit.**

This course enables students to develop the writing skills necessary in their academic careers. Course topics include writing in the discipline, critiques, and literature reviews.

**ILAC 316. Realism and Surrealism in the Cinema of Luis Bunuel. 3-5 Units.**

Surrealism, realism, dark comedy, film genres transformed by Spanish director, Luis Bunuel in Spain, France and Mexico during the second half of the XX century. An examination of Bunuel's work from his Surrealist beginnings (*L'Age d'Or*, *Un Chien Andalou*), subsequent realistic films in Mexico (*Los Olvidados*, *Nazarin*), and a mixture of Surrealism and Realism (*Viridiana*, *Exterminating Angel*, *Simon del Desierto*), as well his work with dark comedy (*Archibaldo de la Cruz*, *Belle de Jour*, *Le charme discret de la bourgeoisie*). In Spanish.

**ILAC 329. Luis de Camoes - Epic. 3-5 Units.**

Focus is on Camões's epic masterpiece, *Os Lusíadas*. Topics include empire, intertextuality, Indian Ocean Studies, history, prophecy, and poetics. Readings in English and Portuguese.

**ILAC 332. Race and Slavery in Nineteenth Century Spain. 3-5 Units.**

An analysis of the literature written in Spain during the nineteenth and twentieth centuries dealing with the empire post 1808. Authors discussed include Blanco White, Baroja, Avellaneda, and Rusiñol, among others.

**ILAC 333. Spain and the Transatlantic. 3-5 Units.**

Course will address a variety of literary works from the 19th century to today, current debates on transatlantic studies, review of recent scholarship, and history. Taught in Spanish.

**ILAC 335. Materialism and Literature. 3-5 Units.**

Exploration of vibrant materialism (Bennet, Latour) and historical materialism (critical theory) as a basis to approach Latin American commodity novels, i.e., those that revolve around bananas, coffee, etc. Literary works by J.E. Rivera, García Márquez, Asturias, Neruda, Magnus, and others. Taught in Spanish.

Same as: COMPLIT 335A

**ILAC 336. Early 20th Century Iberian Poetry. 3-5 Units.**

This course will study the development of the dominant trends of early Iberian 20th-century lyric poetry, against the background of Restoration Spain (1875-1930), and the forces of resistance and opposition to its oligarchical and archaic social and political structure. We will concentrate on the major works of the three most important poets: Antonio Machado, Juan Ramón Jiménez, and Federico García Lorca. Symbolist-modernist poetry, the creation of symbolic systems, and the brief appearance of surrealism all define key aspects of this avant-garde during the first three decades. Special attention will be given to close stylistic analysis and to the historical and social conditions out of which arose the progressive intellectual and educational movement that gave rise to this renaissance of brilliant lyric poetry. Taught in either English or Spanish depending on class enrollment.

**ILAC 341. Roberto Bolaño. 3-5 Units.**

The most universally acclaimed Latin American writer since the Boom, Roberto Bolaño has recently joined transnational literary canons. But what does that tell us about the phenomenon of World Literature itself? The class will provide an overview of Bolaño's vast oeuvre by considering nouvelles, selected short stories, and sections of the long novels *The Savage Detectives* and *2666*. The focus will be on exploring the multifarious relationship of Bolaño and the world. Up-to-date critical bibliography includes readings by Sarah Pollack, Gareth Williams, Sergio Villalobos, and others. Taught in Spanish.

**ILAC 345. Biopolitics and Sovereignty in Andean Culture, 1920-1940. 3-5 Units.**

What is productive life? How is life aesthetically and politically valued? This course explores the inscription of life in changing political and aesthetic regimes of the Andean South in the turbulent decades of the 1920s-1940s. Based on theories of biopower and sovereignty, we explore topics such as domination, domestication, appropriation, exclusion, facism, solidarity, tellurism, race, mestizaje, and human/nature relations. We will consider poetry, narrative, journals, and the visual arts. Authors include: Gabriela Mistral, Pablo Neruda, Pablo de Rokha, Alcides Arguedas, Augusto Céspedes, Franz Tamayo, Leopoldo Marechal, Roberto Arlt, Jorge Luis Borges, César Vallejo, José Carlos Mariátegui, Ciro Alegría, and José María Arguedas. Spanish proficiency required.

**ILAC 363. Visions of the Andes. 3-5 Units.**

What visions of the Andes circulate in Latin American literature, photography and painting? How are they constructed? How is their value accrued? The course focuses on visual and written images of Andean landscapes. Beginning with 19th century technical photography, the course explores the visual economy of the Andes in representative texts and images from Peru, Bolivia and Chile, vis-à-vis critical discourses about Andean culture. In Spanish.

Same as: ILAC 263

**ILAC 364. Visions of the Andes. 3-5 Units.**

What visions and images of the Andes circulate in Latin American literature? How are they constructed? How is their value accrued? The course explores the visual economy of the Andes in representative literary texts of the 20th century, vis-a-vis critical discourses about Andean culture. Topics: visual culture and identity, iconography and the word/image tension, nature vs. culture, debates on utopia, indigenismo, mestizaje, and hibridez. Authors may include: Pablo Neruda, Gabriela Mistral, Martín Chambi, José Carlos Mariátegui, César Vallejo, José María Arguedas, Mario Vargas Llosa, Raul Salmon, Aurelio Arturo.

Same as: ILAC 264

**ILAC 367. João/Joyce: Guimarães Rosa and the World Novel. 3-5 Units.**

A comparative analysis of João Guimarães Rosa's (1908-1967) work, with special attention to the novel *Grande Sertão-Veredas*, translated by a Stanford professor, launched by A. Knopf in 1963. Rosa's fiction disturbs gender, racial, and literary divisions by the creation of a Babelic Brazilian Portuguese language from the sertão. Students increase their literary vocabulary with new terms, *nonada* and *conconversa*, and a gallery of Indigenous, Afro-Americans, mestizos, and foreigners' characters. Discussions in English; readings in Portuguese and Spanish.

Same as: COMPLIT 317

**ILAC 368. Echopoetics: Literature, Performance and Visual Art in Brazil. 3 Units.**

This course explores 20-21th Century Brazilian Arts through the sense of listening and the notion of an echo-poetics. Authors may include: Glauber Rocha, Augusto Boal, the Concrete poets, Silviano Santiago, Nuno Ramos, Ligia Clark, Lispector, Hélio Oiticica, Zé Celso, Cildo Meireles, Veronica Stigger, André Sant'Anna, Lourenço Mutareli, among others. (In Portuguese).

**ILAC 373. Baroque Brazil. 3 Units.**

In this course we will read texts from and about seventeenth- and eighteenth-century Brazil, with special emphasis on the baroque aesthetic in literature, art, and music. Authors include Antóníovieira; Gregório de Matos; Bento Teixeira; Sebastião da Rocha Pita; Nuno Marques Pereira; Manuel Botelho de Oliveira; and Frei Itaparica. Readings in English and Portuguese. Taught in English.

**ILAC 376. Aesthetics, Revolutionaries and Terrorists. 3-5 Units.**

Who is a terrorist and who is a revolutionary? With surge of Anarchism in the XXth Century, the "culture of fear" has been one of the axes of political activism. This course will explore the difference between the desire to correct injustice in society (Revolution) and the desire to destroy society (Terrorism) using literary texts and films. Readings will include novels and testimonies of the protagonists in various social struggles, as well as journalistic and academic papers about these social movements.

Same as: ILAC 276

**ILAC 380E. Critical Concepts in Chican@ Literature. 3-5 Units.**

Combines primary texts of Chican@ literature with a metacritical interrogation of key concepts informing Chican@ literary criticism, the construction of Chican@ literary history, and a Chican@ literary canon. Interrogates the resistance paradigm and the "proper" subject of this literature, and critiques established genealogies and foundational authors and texts, as well as issues of periodization, including the notion of "emergence" (e.g. of feminist voices or dissident sexualities). Considers texts, authors and subjects that present alternatives to the resistance paradigm.

Same as: CHILATST 201C, CSRE 201C

**ILAC 382. Latin@ Literature. 3-5 Units.**

Examines a diverse set of narratives by U.S. Latin@s of Mexican, Puerto Rican, Cuban, Guatemalan, and Dominican heritage through the lens of *latinidad*. All share the historical experience of Spanish colonization and U.S. imperialism, yet their im/migration patterns differ, affecting social, cultural, and political trajectories in the US and relationships to "home" and "homeland," nation, diaspora, history, and memory. Explores how racialization informs genders as well as sexualities. Emphasis on textual analysis. Taught in English.

Same as: CHILATST 200, CSRE 200, ILAC 280

**ILAC 389E. Queer of Color Critique: Race, Sex, Gender in Cultural Representations. 3-5 Units.**

Examines major questions and issues that arise in considering race, sex, and gender together. Focus on critical and theoretical texts queering ethnic and diaspora studies and bringing race and ethnicity into queer studies. Close reading of texts in a variety of media negotiating racialized sexualities and sexualized identities. How is desire racialized? How is racial difference produced through sex acts? How to reconcile pleasure and desire with histories of imperialism and (neo)colonialism and structures of power?.

Same as: CSRE 289E, FEMGEN 389E

**ILAC 393. The Cinema of Pedro Almodóvar. 3-5 Units.**

Pedro Almodóvar is one of the most recognizable auteur directors in the world today. His films express a hybrid and eclectic visual style and the blurring of frontiers between mass and high culture. Special attention is paid to questions of sexuality and the centering of usually marginalized characters. This course studies Pedro Almodóvar's development from his directorial debut to the present, from the "shocking" value of the early films to the award-winning mastery of the later ones. Prerequisite: ability to understand spoken Spanish. Readings in English. Midterm and final paper can be in English. Majors should write in Spanish.

Same as: ILAC 193

**ILAC 399. Individual Work. 1-12 Unit.**

For Spanish and Portuguese department graduate students only. Prerequisite: consent of instructor.

**ILAC 801. TGR Project. 0 Units.**

ILAC 802. TGR Dissertation. 0 Units.

## Iberian Languages Courses

### Immersion in the Arts Courses

#### ITALIC 91. Immersion in the Arts: Living in Culture. 4 Units.

ITALIC is a new residence-based program built around a series of big questions about the historical, critical and practical purposes of art and its unique capacities for intellectual creativity, communication, and expression. This year-long program fosters close exchanges among faculty, students and guest artists and scholars in class, over meals and during excursions to arts events. We trace the challenges that works of art have presented to categories of knowledge – history, politics, culture, science, medicine, law – by turning reality upside-down or inside-out, or just by altering one's perspective on the world. The arts become a model for engaging with problem-solving: uncertainty and ambiguity confront art makers and viewers all the time; artworks are experiments that work by different sets of rules. Students will begin to understand and use the arts to create new frameworks for exploring our (and others') experience.

#### ITALIC 92. Immersion in the Arts: Living in Culture. 4 Units.

ITALIC is a new residence-based program built around a series of big questions about the historical, critical and practical purposes of art and its unique capacities for intellectual creativity, communication, and expression. This year-long program fosters close exchanges among faculty, students and guest artists and scholars in class, over meals and during excursions to arts events. We trace the challenges that works of art have presented to categories of knowledge – history, politics, culture, science, medicine, law – by turning reality upside-down or inside-out, or just by altering one's perspective on the world. The arts become a model for engaging with problem-solving: uncertainty and ambiguity confront art makers and viewers all the time; artworks are experiments that work by different sets of rules. Students will begin to understand and use the arts to create new frameworks for exploring our (and others') experience.

#### ITALIC 93. Immersion in the Arts: Living in Culture. 4 Units.

ITALIC is a new residence-based program built around a series of big questions about the historical, critical and practical purposes of art and its unique capacities for intellectual creativity, communication, and expression. This year-long program fosters close exchanges among faculty, students and guest artists and scholars in class, over meals and during excursions to arts events. We trace the challenges that works of art have presented to categories of knowledge – history, politics, culture, science, medicine, law – by turning reality upside-down or inside-out, or just by altering one's perspective on the world. The arts become a model for engaging with problem-solving: uncertainty and ambiguity confront art makers and viewers all the time; artworks are experiments that work by different sets of rules. Students will begin to understand and use the arts to create new frameworks for exploring our (and others') experience.

#### ITALIC 95W. Immersion in the Arts: Living in Culture, Writing Section. 4 Units.

ITALIC is a new residence-based program built around a series of big questions about the historical, critical and practical purposes of art and its unique capacities for intellectual creativity, communication, and expression. This year-long program fosters close exchanges among faculty, students and guest artists and scholars in class, over meals and during excursions to arts events. We trace the challenges that works of art have presented to categories of knowledge – history, politics, culture, science, medicine, law – by turning reality upside-down or inside-out, or just by altering one's perspective on the world. The arts become a model for engaging with problem-solving: uncertainty and ambiguity confront art makers and viewers all the time; artworks are experiments that work by different sets of rules. Students will begin to understand and use the arts to create new frameworks for exploring our (and others') experience.

## Immunology Courses

#### IMMUNOL 199. Undergraduate Research. 1-18 Unit.

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

#### IMMUNOL 201. Advanced Immunology I. 3 Units.

For graduate students, medical students and advanced undergraduates. Topics include the innate and adaptive immune systems; genetics, structure, and function of immune molecules; lymphocyte activation and regulation of immune responses. Prerequisites: undergraduate course in Immunology and familiarity with experimental approaches in biochemistry, molecular biology, and cell biology. Same as: MI 211

#### IMMUNOL 202. Advanced Immunology II. 3 Units.

Readings of immunological literature. Classic problems and emerging areas based on primary literature. Student and faculty presentations. Prerequisite: IMMUNOL 201/MI 211. Same as: MCP 202

#### IMMUNOL 203. Advanced Immunology III. 3 Units.

Key experiments and papers in immunology. Course focuses on the history of Immunology and how current research fits into the historical context. Students work on developing effective presentation skills.

#### IMMUNOL 204. Innate Immunology. 3 Units.

Innate immune mechanisms as the only defenses used by the majority of multicellular organisms. Topics include Toll signaling, NK cells, complement, antimicrobial peptides, phagocytes, neuroimmunity, community responses to infection, and the role of native flora in immunity. How microbes induce and defeat innate immune reactions, including examples from vertebrates, invertebrates, and plants. Same as: MI 104, MI 204

#### IMMUNOL 205. Immunology in Health and Disease. 4 Units.

Concepts and application of adaptive and innate immunology and the role of the immune system in human diseases. Case presentations of diseases including autoimmune diseases, infectious disease and vaccination, hematopoietic and solid organ transplantation, genetic and acquired immunodeficiencies, hypersensitivity reactions, and allergic diseases. Problem sets based on lectures and current clinical literature. Laboratory in acute and chronic inflammation.

#### IMMUNOL 206. Introduction to Applied Computational Tools in Immunology. 1-2 Unit.

Introduction to computational tools for analyses of immunological data sets, including but not limited to single-cell data such as that from flow cytometry of CyTOF, as well as genomic analyses. Students become familiar with major web-based databases and analysis suites for immunological and genomic data; gain a working knowledge of the major software/algorithms for working with major data types, and be able to apply at least one computational tool in these areas to analyze a public data set.

#### IMMUNOL 206B. Directed Projects in Systems and Computational Immunology. 3-10 Units.

Independent and team grant proposals, developed in Immunol 206A, will continue on as projects and contribute to ongoing research. Number of units assigned dependent upon the difficulty of and time spent on the project. May be repeated for credit.

#### IMMUNOL 207. Essential Methods in Computational and Systems Immunology. 3 Units.

Introduction to the major underpinnings of systems immunology: first principles of development of computational approaches to immunological questions and research; details of the algorithms and statistical principles underlying commonly used tools; aspects of study design and analysis of data sets. Prerequisites: CS106a and CS161 strongly recommended.

**IMMUNOL 208. Advanced Computational and Systems Immunology. 3 Units.**

Focus is on first principles and methods of advanced computational and systems immunology that are used in the analysis of protein and nucleic acid sequences, protein structures, and immunological processes. Students learn to write computational algorithms for sequence alignment, motif finding, expression array analysis, structural modeling, structure design and prediction, and network analysis and modeling. Students become familiar with the technologies used in CSI, which include dynamic programming, Markov and hidden Markov models, Bayesian networks, clustering methods, and energy minimization approaches. Designed for students with strong foundations in either immunology or computer science. Prerequisites: Immunol 207, CS 109 and CS 161.

**IMMUNOL 209. Translational Immunology. 1 Unit.**

(Open to medical students in the Immunology concentration, graduate students, undergraduates by consent of instructor) Journal style format focusing on current basic immunology research and how it is translated into immunotherapies and clinical trials. Topics include hematopoiesis, transplantation, tolerance, immune monitoring, vaccination, autoimmunity and antibodies, rheumatoid arthritis, chronic pulmonary disease, and asthma. May be repeated for credit.

**IMMUNOL 210. Immunology Research Seminars for Medical Students. 2 Units.**

Required for medical students selecting the Immunology Concentration. Attendance at a minimum of ten seminars related to immunology outside of required medical school classes. A one-page essay on each seminar, what was presented and how it relates to a clinical immunologic problem, is required.

**IMMUNOL 215. Principles of Biological Technologies. 3 Units.**

The principles underlying novel as well as commonly utilized techniques to answer biological questions. Lectures and primary literature critiques on topics such as fluorescence microscopy, including applications such as FRET and single-cell analysis; human and murine genetic analysis; FACS; proteomics and analysis of noncoding RNAs. Class participation is emphasized. Prerequisite: biochemistry. Required of first-year graduate students in Microbiology and Immunology and the Immunology program. Same as: MI 215

**IMMUNOL 260. HIV: The Virus, the Disease, the Research. 3-4 Units.**

Open to medical students, graduate students in biological sciences, undergraduates with strong biological background. Topics: immunopathogenesis immune deficits, opportunistic infections including TB, and malignancies; genomics viral genetic analyses that have traced the origin of HIV-1 and HIV-2 to primates, dated the spread of infection in humans, and characterized the evolution of the virus within infected individuals; antiretroviral drug development identification of drug targets, structure-based drug design, overcoming drug resistance, pivotal clinical trials, and role of community activism; clinical management solutions in high- and low-income countries; vaccine development learning from past failures and the future of engineering the human immune response. 4 units includes a final project assigned in consultation with the instructor to fit the individual student's background and area of HIV interest. Same as: MED 260

**IMMUNOL 275. Tumor Immunology. 2 Units.**

Tumor Immunology focuses on the mechanisms by which tumors can escape from and subvert the immune system and conversely on the ability of innate and adaptive arms of the immune system to recognize and eliminate tumors. Topics include: tumor antigens, tumor immunosurveillance and immunoeediting, tumor immunotherapy (including CAR-T and checkpoint antibodies) and cancer vaccines. Tracks the historical development of our understanding of modulating tumor immune response and discusses their relative significance in the light of current research findings. Prerequisite: for undergraduates, human biology or biology core. Same as: CBIO 275

**IMMUNOL 280. Early Clinical Experience in Immunology. 1-3 Unit.**

Clinical observation experience for medical students in the Immunology Scholarly Concentration. At the end of the observation period, which may span over one to two quarters, the student submits a case observation paper to his/her faculty sponsor. Prerequisite: IMMUNOL 205.

**IMMUNOL 290. Teaching in Immunology. 1-18 Unit.**

Practical experience in teaching by serving as a teaching assistant in an immunology course. Unit values are allotted individually to reflect the level of teaching responsibility assigned to the student. May be repeated for credit.

**IMMUNOL 299. Directed Reading in Immunology. 1-18 Unit.**

Prerequisite: consent of instructor.

**IMMUNOL 305. Immunology Journal Club. 1 Unit.**

Required of first- to fourth-year graduate students. Graduate students present and discuss recent papers in the literature. May be repeated for credit.

**IMMUNOL 310. Seminars in Computational and Systems Immunology. 1 Unit.**

Presentation of CSI technologies from recent literature. Discussion of emerging application areas and limitations. Dissemination of computational resources.

**IMMUNOL 311. Seminar in Immunology. 1 Unit.**

Enrollment limited to Ph.D., M.D./Ph.D., and medical students whose scholarly concentrations are in Immunology. Current research topics.

**IMMUNOL 311A. Discussions in Immunology. 1 Unit.**

Students discuss papers of speakers in 311, and meet with the speakers. Corequisite: 311.

**IMMUNOL 315. Special Topics in Immunology. 1 Unit.**

Directed readings and survey study of these topics in human and mousenimmunology: cells of the immune system; innate and adaptive immunity; antibodies and antigens; histocompatibility complex; lymphocyte development and the rearrangement and expression of antigen receptor genes; T-cell and B-cell signaling and activation; immunological tolerance; transplantation; diseases caused by immune responses; allergy; congenital and acquired immunodeficiencies. Graduate students outside immunology and Postdoctoral fellows and clinical fellows are welcome.

**IMMUNOL 399. Graduate Research. 1-18 Unit.**

For Ph.D., M.D./Ph.D. students, and medical students whose scholarly concentrations are in Immunology.

**IMMUNOL 801. TGR Project. 0 Units.**

.

**IMMUNOL 802. TGR Dissertation. 0 Units.**

.

**Institute for International Studies Courses****IIS 199. Interschool Honors Program in International Security Studies. 3-5 Units.**

Students from different schools meet in a year-long seminar to discuss, analyze, and conduct research on international security. Combines research methods, policy evaluation, oral presentation, and preparation of an honors thesis by each student. May be repeated for credit.

**Interdisciplinary Studies in the Humanities Courses**

## International Policy Studies Courses

### IPS 201. Managing Global Complexity. 3 Units.

Is international relations theory valuable for policy makers? The first half of the course will provide students with a foundation in theory by introducing the dominant theoretical traditions and insights in international relations. The second half of the course focuses on several complex global problems that cut across policy specializations and impact multiple policy dimensions. Students will assess the value of major theories and concepts in international relations for analyzing and addressing such complex global policy issues.

### IPS 202. Topics in International Macroeconomics. 5 Units.

Topics: standard theories of open economy macroeconomics, exchange rate regimes, causes and consequences of current account imbalances, the economics of monetary unification and the European Monetary Union, recent financial and currency crises, the International Monetary Fund and the reform of the international financial architecture. Prerequisites: Econ 52 and Econ 165.

### IPS 203. Issues in International Economics. 5 Units.

Topics in international trade and international trade policy: trade, growth and poverty, the World Trade Organization (WTO), regionalism versus multilateralism, the political economy of trade policy, trade and labor, trade and the environment, and trade policies for developing economies. Prerequisite: ECON 51, ECON 166.

### IPS 204A. Microeconomics. 4 Units.

Microeconomic concepts relevant to decision making. Topics include: competitive market clearing, price discrimination; general equilibrium; risk aversion and sharing, capital market theory, Nash equilibrium; welfare analysis; public choice; externalities and public goods; hidden information and market signaling; moral hazard and incentives; auction theory; game theory; oligopoly; reputation and credibility. Prerequisites: ECON 50 and MATH 51 or equiv. Same as: PUBLPOL 301A

### IPS 204B. Economic Policy Analysis for Policymakers. 4-5 Units.

This class provides economic and institutional background necessary to conduct policy analysis. We will examine the economic justification for government intervention and illustrate these concepts with applications drawn from different policy contexts. The goal of the course is to provide you with the conceptual foundations and the practical skills and experience you will need to be thoughtful consumers or producers of policy analysis. Prerequisites: ECON 102B or PUBLPOL 303D. Same as: PUBLPOL 301B

### IPS 205. Introductory Statistics for Policy. 5 Units.

Introduction to key elements of probability and statistical analysis, focusing on international and public policy relevant applications. Topics will include basic probability, discrete and continuous random variables, exploratory data analysis, hypothesis testing, and elements of mathematical statistics. Lectures will include both theoretical and practical components, and students will be introduced to R statistical programming and LaTeX.

### IPS 206. Applied Statistics for Policy. 5 Units.

Introduction to the use of statistical models and their application in quantitative policy analysis and data interpretation in policy contexts, with an emphasis on regression analysis, aiming to enable students to become intelligent and capable consumers and producers of regression analyses. Attention will be given to providing both applied experience with regression analyses and knowledge of the underlying statistical theory.

### IPS 207. Economics of Corruption. 3-5 Units.

The role of corruption in the growth and development experience of countries with a focus on the economics of corruption. Topics covered: the concept and measurement of corruption; theory and evidence on the impact of corruption on growth determinants and development outcomes, including public and private investment, financial flows, human capital accumulation, poverty and income inequality; the link between corruption and financial crises, including the recent crises in the US and the Eurozone; the cultural, economic, and political determinants of corruption; and policy measures for addressing corruption, including recent civil society initiatives and use of liberation technology. Prerequisite: ECON 1.

### IPS 207A. Problem Solving and Decision Making for Public Policy and Social Change. 4-5 Units.

This course introduces skills and bodies of knowledge useful for careers in law, public policy, and achieving social change at scale. These include framing problems; designing, implementing, and evaluating strategies; system design; cost-benefit analysis; decision making under uncertainty; heuristics and biases that affect empirical judgments and decision making; methods for influencing people's behavior ranging from incentives and penalties to "nudges," and human-centered design. The course will be taught through problems, cases, and a field project to solve real-world problems on or near the Stanford campus, with the goal of integrating strategic thinking and behavioral insights with human-centered design and systems design. The course may be of interest to students in Law and Policy Lab practicums who wish to broaden their policy analysis skills. Enrollment: Limited to 32 students, with priority given to students in Law School, the MPP program, and the IPS program in that order. Students other than law students must seek the consent of the instructor. Elements used in grading: Class participation, midterm assignment, and final assignment. Cross-listed with International Policy Studies (IPS 207A) & the Law School (LAW 333). Same as: PUBLPOL 305A

### IPS 207B. Public Policy and Social Psychology: Implications and Applications. 4 Units.

Theories, insights, and concerns of social psychology relevant to how people perceive issues, events, and each other, and links between beliefs and individual and collective behavior will be discussed with reference to a range of public policy issues including education, public health, income and wealth inequalities, and climate change. Specific topics include: situationist and subjectivist traditions of applied and theoretical social psychology; social comparison, dissonance, and attribution theories; stereotyping and stereotype threat, and sources of intergroup conflict and misunderstanding; challenges to universality assumptions regarding human motivation, emotion, and perception of self and others; also the general problem of producing individual and collective changes in norms and behavior.

Same as: PSYCH 216, PUBLPOL 305B

### IPS 208. Justice. 4-5 Units.

Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include financing schools and elections, regulating markets, discriminating against people with disabilities, and enforcing sexual morality. Counts as Writing in the Major for PoliSci majors. Same as: ETHICSOC 171, PHIL 171, PHIL 271, POLISCI 103, POLISCI 136S, POLISCI 336S, PUBLPOL 103C, PUBLPOL 307

**IPS 208A. International Justice. 4-5 Units.**

This course will examine the arc of an atrocity. It begins with an introduction to the interdisciplinary scholarship on the causes and enablers of mass violence; genocide, war crimes, terrorism, and state repression. It then considers political and legal responses ranging from humanitarian intervention (within and without the Responsibility to Protect framework), sanctions, commissions of inquiry, and accountability mechanisms, including criminal trials before international and domestic tribunals. The course will also explore the range of transitional justice mechanisms available to policymakers as societies emerge from periods of violence and repression, including truth commissions, lustrations, and amnesties. Coming full circle, the course will evaluate current efforts aimed at atrocity prevention, rather than response, including President Obama's atrocities prevention initiative. Readings address the philosophical underpinnings of justice, questions of institutional design, and the way in which different societies have balanced competing policy imperatives.

**IPS 209. Practicum. 1-8 Unit.**

Applied policy exercises in various fields. Multidisciplinary student teams apply skills to a contemporary problem in a major international policy exercise with a public sector client such as a government agency. Problem analysis, interaction with the client and experts, and presentations. Emphasis is on effective written and oral communication to lay audiences of recommendations based on policy analysis. Enrollment must be split between Autumn and Winter Quarters for a total of 8 units.

**IPS 209A. IPS Master's Thesis. 1-8 Unit.**

For IPS M.A. students only (by petition). Regular meetings with thesis advisers required.

**IPS 210. The Politics of International Humanitarian Action. 3-5 Units.**

The relationship between humanitarianism and politics in international responses to civil conflicts and forced displacement. Focus is on policy dilemmas and choices, and the consequences of action or inaction. Case studies include northern Iraq (Kurdistan), Bosnia, Rwanda, Kosovo, and Darfur. In addition to class attendance, each student will meet with the instructor for multiple one-on-one sessions during the quarter.

**IPS 211. The Transition from War to Peace: Peacebuilding Strategies. 3-5 Units.**

How to find sustainable solutions to intractable internal conflicts that lead to peace settlements. How institutions such as the UN, regional organizations, and international financial agencies attempt to support a peace process. Case studies include Bosnia, East Timor, Kosovo, Burundi, Liberia, and Afghanistan. In addition to class attendance, each student will meet with the instructor for multiple one-on-one sessions during the quarter.

**IPS 213. International Mediation and Civil Wars. 3-5 Units.**

This graduate seminar will examine international mediation efforts to achieve negotiated settlements for civil wars over the last two decades. Contending approaches to explain the success or failure of international mediation efforts will be examined in a number of cases from Africa (Sudan, Sierra Leone, Burundi), the Balkans (Bosnia, Macedonia), and Asia (Cambodia, Indonesia/Aceh). In addition to class attendance, each student will meet with the instructor for multiple one-on-one sessions during the quarter. Satisfies the IPS Policy Writing Requirement.

**IPS 219. Intelligence and National Security. 3 Units.**

How intelligence supports U.S. national security and foreign policies. How it has been used by U.S. presidents to become what it is today; organizational strengths and weaknesses; how it is monitored and held accountable to the goals of a democratic society; and successes and failures. Current intelligence analyses and national intelligence estimates are produced in support of simulated policy deliberations.

**IPS 224. Economic Development and Challenges of East Asia. 3-5 Units.**

This course explores East Asia's rapid economic development and the current economic challenges. For the purpose of this course, we will focus on China, Japan, and Korea. The first part of the course examines economic growth in East Asia and the main mechanisms. In this context, we will examine government and industrial policy, international trade, firms and business groups, and human capital. We will discuss the validity of an East Asian model for economic growth. However, rapid economic growth and development in East Asia was followed by economic stagnation and financial crisis. The second part of the course focuses on the current economic challenges confronting these countries, in particular, inequality, demography, and entrepreneurship and innovation. Readings will come from books, journal articles, reports, news articles, and case studies. Many of the readings will have an empirical component and students will be able to develop their understanding of how empirical evidence is presented in articles.

**IPS 225. Innovation-Based Economic Growth: Silicon Valley and Japan. 4 Units.**

Innovation is essential for the growth of a matured economy. An important reason for Japan's economic stagnation over the past two decades was its failure to transform its economic system from one suited for catch-up growth to one that supports innovation-based economic growth. This course examines the institutional factors that support innovation-based economic growth and explores policies that may encourage innovation-based growth in Japan. The course is a part of a bigger policy implementation project that aims to examine the institutional foundations of innovation-based economic growth, to suggest government policies that encourage innovation-based growth in Japan, and to help implement such policies. The central part of the course will be several group research projects conducted by the students. Each student research project evaluates a concrete innovation policy idea. Each student research group is to report the findings to the class and prepare the final paper.

Same as: EASTASN 151, EASTASN 251

**IPS 230. Democracy, Development, and the Rule of Law. 5 Units.**

Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts. Same as: INTNLREL 114D, POLISCI 114D, POLISCI 314D

**IPS 231. Russia, the West and the Rest. 4 Units.**

Focus on understanding the diversity of political, social, and economic outcomes in Russia since the collapse of the Soviet Union. Exploration of questions, including: Is Russia still a global power? Where does it have influence internationally, how much, and why? Developmentally, what is the relevant comparison set of countries? Is Russia's economic growth over the last decade truly similar to Brazil, China, and India or is it more comparable to Kazakhstan, Nigeria, and Kenya? How has Russia's domestic political trajectory from liberalizing country to increasingly autocratic affected its foreign policy toward Ukraine, Georgia, and other formerly Soviet states? Finally, is Russia's reemergence as an important global actor more apparent than real?

Same as: REES 231

**IPS 233. Civil Society, Protest, and Revolution. 3-5 Units.**

Study of the role of civil society in protest movements and revolutions which result in either regime change or regime continuity. The course will examine why some protest movements result in change while others do not, and what happens after the protests die out. The course will examine three periods of revolutionary movements in very recent history: Eastern/Central Europe around 1989, some former Soviet Republics in the early 2000s, as well as the Arab Spring countries. We will also compare and contrast these episodes in terms of the actors, environments and ultimate results.

**IPS 234. Democratic Peace: A Political Biography. 3-5 Units.**

The course will follow the political biography of the theories of democratic peace: their academic origins, migration into the public and political spheres, the politicization process they underwent, the political and rhetorical uses and misuses of the theories (including the Iraq War), and the outcomes of this charged meeting of academia and politics. No less importantly, the course will discuss the responsibility theorists bear for the real-world ramifications of their theories, and the way they should act to discharge their responsibilities.

**IPS 236. The Politics of Private Sector Development. 3-5 Units.**

This is a case-based course on how to achieve public policy reform with the aim of promoting private sector development in developing countries. It will deal with issues like privatization, reducing informality, infrastructure development, trade promotion, and combatting corruption.

**IPS 237. Religion and Politics: A Threat to Democracy?. 4-5 Units.**

The meddling of religion in politics has become a major global issue. Can religion co-exist with politics in a democracy? In Israel this is an acute issue exhibiting an existential question: To what extent religion is a source of the weaknesses and vulnerabilities of Israeli Democracy? This seminar is meant to be a research workshop, part of a policy-oriented applied research in motion, aimed at developing detailed strategies for alleviating the tensions and conflicts that stem from the role of religion in politics in Israel. The proposed research seminar will be directed toward constructing both the infrastructure and framework for the comparative dimension of the programmatic study. The seminar will include unique opportunities for hands-on, team-based research.

Same as: JEWISHST 237

**IPS 238. Overcoming Practical Obstacles to Policy Implementation. 3-5 Units.**

Many of the obstacles to effective governance lie less in the proper formulation of public policies than in their implementation. Modern government is complex, multilayered, and often highly politicized. This course will focus on problems of implementation based on the practical experiences of policy practitioners. This will be a team-taught course utilizing faculty from across the Freeman Spogli Institute for International Studies (FSI), and will encompass diverse policy areas including national security, foreign policy, crime, health, food safety, and environment.

**IPS 239. The Politics of Development: Social Service Delivery in the Developing World. 3-5 Units.**

In this course we will examine variation in service delivery across the developing world, with an eye to identifying key factors in success or failure, and to understanding how the interests of individuals, governments, donors, and non-state actors shape the outcomes we observe in the world. The course will include a practicum component, where students will work directly with development practitioners in developing countries to problem-solve and to write case studies. Much of the course material will be drawn from sub-Saharan Africa, but we will also cover material from Latin America, South Asia, and Southeast Asia. Same as: AFRICAST 239

**IPS 241. International Security in a Changing World. 5 Units.**

This class surveys the most pressing global security problems facing the world today and includes an award-winning two-day international crisis simulation. Past guest lecturers have included former Secretary of Defense William Perry, former U.S. Ambassador to Afghanistan Gen. Karl Eikenberry, and former Secretary of State Condoleezza Rice. Major topics covered: changing types of warfare, ethics and conduct of war, nuclear proliferation, insurgency and terrorism, Russia, and ISIS. No prior background in international relations is necessary.

Same as: HISTORY 104D, POLISCI 114S

**IPS 242. American Foreign Policy: Interests, Values, and Process. 5 Units.**

This seminar will examine the tension in American foreign policy between pursuing U.S. security and economic interests and promoting American values abroad. The course will retrace the theoretical and ideological debates about values versus interests, with a particular focus on realism versus liberalism. The course will examine the evolution of these debates over time, starting with the French revolution, but with special attention given to the Cold War, American foreign policy after September 11th, and the Obama administration. The course also will examine how these contending theories and ideologies are mediated through the U.S. bureaucracy that shapes the making of foreign policy. \*\* NOTE: Initial registration for this course does not guarantee enrollment. All interested students should attend the first class. Final enrollment criteria will be detailed on the first day of class. There will be 10 seats for graduate students and 10 seats for undergraduate students.

Same as: GLOBAL 220, POLISCI 217A

**IPS 244. U.S. Policy toward Northeast Asia. 5 Units.**

Case study approach to the study of contemporary U.S. policy towards Japan, Korea, and China. Historical evolution of U.S. foreign policy and the impact of issues such as democratization, human rights, trade, security relations, military modernization, and rising nationalism on U.S. policy. Case studies include U.S.-Japan trade tensions, anti-Americanism in Korea, and cross-straits relations between China and Taiwan. Satisfies the IPS Policy Writing Requirement.

**IPS 246. China on the World Stage. 4 Units.**

China's reemergence as a global player is transforming both China and the international system. Other nations view China's rise with a mixture of admiration, anxiety, and opportunism. Some welcome China's rise as a potential counterweight to US preeminence; others fear the potential consequences of Sino-American rivalry and erosion of the US-led international system that has fostered unprecedented peace and prosperity. This course provides an overview of China's engagement with countries in all regions and on a wide range of issues since it launched the policy of opening and reform in 1978. The goal is to provide a broad overview and systematic comparisons across regions and issues, and to examine how China's global engagement has changed over time.

**IPS 247. Organized Crime and Democracy in Latin America. 5 Units.**

Scholars and policy analysts have long emphasized the strength of the rule of law as a key determinant of economic development and social opportunity. They also agree that the rule of law requires an effective and accountable legal system. The growth of transnational organized crime is a major impediment, however, to the creation of effective and accountable legal systems. This seminar examines how and why transnational criminal organizations have developed in Latin America, explores why they constitute a major challenge to the consolidation of democratic societies, economic development and individual rights. It also examines the efforts of governments to combat them, with a focus on the experiences of Mexico, Colombia, and Brazil. The course examines these cases in order to draw lessons by pointing to both successes and failures of use to policy analysts, legal scholars, and practitioners.

Same as: INTNLREL 152, POLISCI 244T

**IPS 248. America's War in Afghanistan: Multiple Actors and Divergent Strategies. 4 Units.**

Establishing clear and consistent political-military objectives when waging limited wars is an essential but difficult task. Efforts to develop coherent campaign strategies are complicated by competing interests among US government actors (diplomatic, development, military and intelligence), members of the coalition intervention force, and relevant international organizations. This course will examine post-9/11 efforts to defeat Al Qaeda and stabilize Afghanistan from the perspectives of key US, international, and Afghan actors including the White House, State Department, Defense Department, Central Intelligence Agency, United Nations, NATO, Pakistan, and Afghan political elite and civil society. Classes will include presentations by individuals with firsthand diplomatic and military experience in Afghanistan and Pakistan.

**IPS 249. Living at the Nuclear Brink: Yesterday and Today. 3 Units.**

The development, testing, and proliferation of nuclear weapons will be covered, from World War II through the Cold War to the present. Emphasis will be placed on understanding the evolving role of these weapons, both militarily and politically. It will also examine controversies and opposition movements to nuclear weapons and their use. The course will feature numerous guest speakers from Stanford and beyond. Students will be required to write in-depth analyses of specific nuclear weapons policy questions. Following this course, students are expected to have a deeper understanding of the profound dangers these weapons continue to present to the world today.

Same as: POLISCI 115, POLISCI 315

**IPS 250. International Conflict Resolution. 3 Units.**

(Same as LAW 656) This seminar examines the challenges of managing and resolving violent inter-group and international conflicts. Employing an interdisciplinary approach drawing on social psychology, political science, game theory, and international law, the course identifies various tactical, psychological, and structural barriers that can impede the achievement of efficient solutions to conflicts. We will explore a conceptual framework for conflict management and resolution that draws not only on theoretical insights, but also builds on historical examples and practical experience in the realm of conflict resolution. This approach focuses on the following questions: (1) how can the parties to conflict develop a vision of a mutually bearable shared future; (2) how can parties develop trust in the enemy; (3) how can each side be persuaded, as part of a negotiated settlement, to accept losses that it will find very painful; and (4) how do we overcome the perceptions of injustice that each side are likely to have towards any compromise solution? Among the conceptual issues we will examine include the problem of spoilers who seek to sabotage agreements, the role of mediators, the role international legal rules can play in facilitating or impeding conflict resolution, and the advantages and disadvantages of unilateral versus and reciprocal measures in advancing conflict resolution efforts. Particular conflicts we will explore include the Northern Ireland conflict, the Israeli-Palestinian conflict, and the U.S.-Soviet Cold War rivalry. Prerequisite for undergraduates: consent of instructor.

Same as: PSYCH 383

**IPS 250A. International Conflict Resolution Colloquium. 1 Unit.**

(Same as LAW 611.) Sponsored by the Stanford Center on International Conflict and Negotiation (SCICN). Conflict, negotiation, and dispute resolution with emphasis on conflicts and disputes with an international dimension, including conflicts involving states, peoples, and political factions such as the Middle East and Northern Ireland. Guest speakers. Issues including international law, psychology, and political science, economics, anthropology, and criminology.

Same as: PSYCH 283

**IPS 252. Implications of Post-1994 Conflicts in Great Lakes Region of Africa: an American Perspective. 3 Units.**

Seminar will explore the post-1994 conflicts in the Great Lakes Region from the perspective of the former US Special Envoy to the region. Particular emphasis will be placed on the intensified regional and international efforts to resolve these conflicts since the M23 rebellion of 2012. It will consider the implications these activities have for the region, legal accountability, international peacekeeping and the conduct of American foreign policy. The seminar will include the following segments: 1) the origins and nature of the post-1994 conflicts and recent efforts to resolve them with particular attention to the relationship between modern Congolese history and the Rwandan genocide and the peace-making efforts initiated by the Peace, Security and Cooperation Framework agreement of February 2013; 2) accountability for conflict-related crimes committed in the region including sex and gender-based crimes and the legal and other regimes established to address conflict minerals; and 3) the broader implications of the conflict for American foreign policy in Africa (in particular and in general, and lessons learned about the way in which such policy is formulated) as well as the implications of this conflict for international peace-making and peace-keeping efforts. The course is cross-listed for IPS and law school students.

**IPS 264. Behind the Headlines: An Introduction to US Foreign Policy in South and East Asia. 3-5 Units.**

Introduction to India, Af-Pak and China. Analyzes historical forces that shaped the region, recent history and current state of key countries: the economic and political rise of India and China; rise of the Taliban and Al Qaeda in Afghanistan; Pakistan's government, military, and mullahs; and China's impact on the region. nExplores U.S. policy in depth: U.S. intervention in- and upcoming withdrawal from Afghanistan, U.S. relations with Pakistan and India, the "pivot to Asia" and its implications for US-China relations and the strategic balance in Asia. nSatisfies the IPS policy writing requirement.

**IPS 266. Managing Nuclear Waste: Technical, Political and Organizational Challenges. 3 Units.**

The essential technical and scientific elements of the nuclear fuel cycle, focusing on the sources, types, and characteristics of the nuclear waste generated, as well as various strategies for the disposition of spent nuclear fuel - including reprocessing, transmutation, and direct geologic disposal. Policy and organizational issues, such as: options for the characteristics and structure of a new federal nuclear waste management organization, options for a consent-based process for locating nuclear facilities, and the regulatory framework for a geologic repository. A technical background in the nuclear fuel cycle, while desirable, is not required.

Same as: GS 266

**IPS 270. The Geopolitics of Energy. 3-5 Units.**

The global energy landscape is undergoing seismic shifts with game-changing economic, political and environmental ramifications. Technological breakthroughs are expanding the realms of production, reshuffling the competition among different sources of energy and altering the relative balance of power between energy exporters and importers. The US shale oil and gas bonanza is replacing worries about foreign oil dependence with an exuberance about the domestic resurgence of energy-intensive sectors. China's roaring appetite for energy imports propels its national oil companies to global prominence. Middle Eastern nations that used to reap power from oil wealth are bracing for a struggle for political relevance. Many African energy exporters are adopting promising strategies to break with a history dominated by the "resource curse." This course provides students with the knowledge, skill set and professional network to analyze how the present and past upheavals in oil and gas markets affect energy exporters and importers, their policymaking, and their relative power. Students will gain a truly global perspective thanks to a series of exciting international guest speakers and the opportunity to have an impact by working on a burning issue for a real world client. Satisfies the IPS Policy Writing Requirement.

**IPS 271A. U.S. Human Rights NGOs and International Human Rights. 1 Unit.**

(Same as LAW 782) Many US human rights non-government organizations, including the US philanthropic sector, work on international human rights. The US government also engages with the private sector in "partnerships" that twins US foreign aid human rights action with corporate expertise. This weekly series will feature speakers who lead these human rights NGOs, philanthropic enterprises, and corporate partnerships, and also policy experts and scholars, to explore the pro's and con's of this scenario.

Same as: ETHICSOC 15R, MED 225, POLISCI 203

**IPS 274. International Urbanization Seminar: Cross-Cultural Collaboration for Sustainable Urban Development. 4-5 Units.**

Comparative approach to sustainable cities, with focus on international practices and applicability to China. Tradeoffs regarding land use, infrastructure, energy and water, and the need to balance economic vitality, environmental quality, cultural heritage, and social equity. Student teams collaborate with Chinese faculty and students partners to support urban sustainability projects. Limited enrollment via application; see [internationalurbanization.org](http://internationalurbanization.org) for details. Prerequisites: consent of the instructor(s).

Same as: CEE 126, EARTHSYS 138, URBANST 145

**IPS 280. Transitional Justice, Human Rights, and International Criminal Tribunals. 3-5 Units.**

Historical backdrop of the Nuremberg and Tokyo Tribunals. The creation and operation of the Yugoslav and Rwanda Tribunals (ICTY and ICTR). The development of hybrid tribunals in East Timor, Sierra Leone, and Cambodia, including evaluation of their success in addressing perceived shortcomings of the ICTY and ICTR. Examination of the role of the International Criminal Court and the extent to which it will succeed in supplanting all other ad hoc international justice mechanisms and fulfill its goals. Analysis focuses on the politics of creating such courts, their interaction with the states in which the conflicts took place, the process of establishing prosecutorial priorities, the body of law they have produced, and their effectiveness in addressing the needs of victims in post-conflict societies.

Same as: ETHICSOC 280, INTNLREL 180A

**IPS 290. Practical Approaches to Global Health Research. 3 Units.**

Enrollment limited to graduate students; undergraduates in their junior or senior year may enroll with consent of instructor only. Introduces research methods for conducting studies involving health in low-income context. Focuses on developing a concept note to support a funding proposal. addressing research question of student's interest. Skills developed include developing a compelling research question; synthesizing a focused literature review; selecting and adapting appropriate study design, target population, sampling methods, data collection and analysis; addressing human subject issues; developing productive cross-collaboration.

Same as: HRP 237, MED 226

**IPS 298. Practical Training. 1-3 Unit.**

Students obtain internship in a relevant research or industrial activity to enhance their professional experience consistent with their degree program and area of concentration. Prior to enrolling students must get internship approved by associate director. At the end of the quarter, a three page final report must be supplied documenting work done and relevance to degree program. Meets the requirements for Curricular Practical Training for students on F-1 visas. Student is responsible for arranging own internship. Limited to International Policy Studies students only. May be repeated for credit.

**IPS 299. Directed Reading. 1-5 Unit.**

IPS students only. May be repeated for credit.

**IPS 300. Issues in International Policy Studies. 1 Unit.**

Presentations of techniques and applications of international policy analysis by students, faculty, and guests, including policy analysis practitioners.

**IPS 316S. Decision Making in U.S. Foreign Policy. 5 Units.**

Formal and informal processes involved in U.S. foreign policy decision making. The formation, conduct, and implementation of policy, emphasizing the role of the President and executive branch agencies. Theoretical and analytical perspectives; case studies. Interested students should attend the first day of class. Admission will be by permission of the instructor. Priority to IPS students.

Same as: POLISCI 316S

**IPS 802. TGR Dissertation. 0 Units.****International Relations Courses****INTNLREL 12. The Human Rights Fad? International Human Rights Advocacy and the Ethics of Humanitarianism. 1 Unit.**

This 1-unit Alternative Spring Break course and trip will explore the world of international human rights advocacy, and the ethics of humanitarianism in the 21st Century. The course will examine the history of human rights and the international system that has been created to promote them. By looking at case studies of historical and current human rights violations, specifically those associated with mass atrocities, we hope to develop our understanding of then-term human rights and how it is applied in our world today. We will critically analyze the strategies employed by governments and NGOs to address these crimes committed against humanity.

**INTNLREL 13. Not For Sale: Human Trafficking in the Bay Area. 1 Unit.**

When we hear the phrase, "human trafficking", we usually envision brothels in India or red light districts in Nepal. Yet, trafficking is a worldwide phenomenon that is occurring right in our backyard, from the massage parlors of San Francisco to the small night clubs of Gilroy. Throughout our course and trip, we will shed light on the impact of trafficking in our daily lives, and why this billion dollar industry is occurring right here in the Bay Area. We will examine trafficking as an intersection of issues, and how topics such as gender, politics, immigration, and, even, economics fuel this dangerous industry. Through arming ourselves with awareness, we, as students, can equip ourselves with knowledge to identify and fight trafficking in our own community.

**INTNLREL 40N. World War 1: Ongoing and New Controversies. 3 Units.**

This seminar will examine controversies surrounding World War 1. Was Britain's decision to enter the war, the biggest error in modern history? Was Germany responsible for the war? Did the German army commit mass atrocities as was alleged by British propaganda? By studying the arguments and evidence that undergird the controversies, we hope to understand why many older controversies have defied resolution, how new evidence and interpretations may shed light on them, and why new controversies continue to arise.

**INTNLREL 60Q. United Nations Peacekeeping. 3 Units.**

Focus is on an examination of United Nations peacekeeping, from its inception in 1956 in the wake of the Suez Crisis, to its increasingly important role as an enforcer of political stability in sub-Saharan Africa. Examines the practice of "classic" peacekeeping as it developed during the Cold War, the rise and fall of "second-generation" peacekeeping, and the reemergence of a muscular form of peacekeeping in sub-Saharan Africa more recently. Topics include the basic history of the United Nations since 1945, the fundamentals of the United Nations Charter, and the historical trajectory of U.N. peacekeeping and the evolving arguments of its proponents and critics over the years.

**INTNLREL 61Q. Food and security. 3 Units.**

The course will provide a broad overview of key policy issues concerning agricultural development and food security, and will assess how global governance is addressing the problem of food security. At the same time the course will provide an overview of the field of international security, and examine how governments and international institutions are beginning to include food in discussions of security.

Same as: EARTHSYS 61Q, ESS 61Q

**INTNLREL 62Q. Truth Commissions and War Crimes Tribunals in Germany, South Africa, Bosnia, Rwanda, and elsewhere. 3 Units.**

Imagine you lived in a country in which a delusional dictator imprisons untold masses of citizens in labor camps, tortures them, and slaughters millions of them. Imagine you lived in a country, in which the ruling and unelected elite holds on to power by intimidating its citizens by pervasive secret reporting, sending many of them to prison. Imagine you lived in a country, in which one ethnic group slaughters the other. Imagine you lived in a country in which a racial white minority terrorizes and discriminates against a huge majority of black population. Imagine you lived in a country in which members of one group engage in an "ethnic cleansing" of their old neighbors. Now imagine something else: some big political change comes to each of these societies, and the oppressors lose their power and fall into disgrace. Now the previously oppressed engage in a deliberation what to do with their former oppressors. For the most part it is not a question of a brutal revenge by the former victims, but a legitimate and democratically authorized process. Welcome to the questions of transitional justice. The scenarios mentioned above are real ones: Cambodia, Germany, Rwanda, South Africa, and Bosnia. All of them happened in the last few decades. In this course we will explore different paths these societies chose to come to terms with past injustices. Each path was devised and decided in a complex public and political debate. We will discuss these and other cases of specific injustices, and the subsequent means to achieve a new start for the country. We will reflect on whether its citizens gained a sense of fairness and hope for a better future, and what it means to come to terms with the past.

**INTNLREL 71Q. Aesthetics of Dissent: the Case of Islamic Iran. 2-3 Units.**

Censorship, Borges tells us, is the mother of metaphors. The Islamic regime in Iran censors all aesthetic production in the country. But Iranian dissident artists, from film-makers and fiction writers to composers in a thriving under-ground musical scene, have cleverly found ways to fight these draconian measures. They have developed an impressive body of work that is as sophisticated in style as it is rich in its discourse of democracy and dissent. The purpose of the seminar is to understand the aesthetic tropes of dissent in Iran, and the social and theological roots of rules of censorship. Masterpieces of post-revolutionary film, fiction, and music will be discussed in the context of tumultuous history of dissent in Islamic Iran.

Same as: COMPLIT 40Q

**INTNLREL 102. History of the International System. 5 Units.**

After defining the characteristics of the international system at the beginning of the twentieth century, this course reviews the primary developments in its functioning in the century that followed. Topics include the major wars and peace settlements; the emergence of Nazism and Communism; the development of the Cold War and nuclear weapons; the rise of China, India, and the EU; and the impact of Islamic terrorism. The role of international institutions and international society will also be a focus as will the challenge of environment, health, poverty, and climate issues to the functioning of the system.

Same as: HISTORY 102

**INTNLREL 103E. Global Catholicism. 5 Units.**

The rise of Catholicism as a global phenomenon, and its multiple transformations as it spread to the Americas, Asia, and Africa. Topics include the Reformation, Tridentine reform and the Jesuits, the underground churches in England and the Dutch Republic, the missions to Asia, the Spanish conquest of Latin America, conversion and indigenous religions, missionary imperialism and new religious movements in the non-European world.

Same as: HISTORY 203E

**INTNLREL 105C. Human Trafficking: Historical, Legal, and Medical Perspectives. 5 Units.**

(Same as HISTORY 5C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution and labor exploitation, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning. Students interested in service learning should consult with the instructor and will enroll in an additional course.

Same as: FEMGEN 105C, HISTORY 105C

**INTNLREL 110C. America and the World Economy. 5 Units.**

Examination of contemporary US foreign economic policy. Areas studied: the changing role of the dollar; mechanism of international monetary management; recent crises in world markets including those in Europe and Asia; role of IMF, World Bank and WTO in stabilizing world economy; trade politics and policies; the effects of the globalization of business on future US prosperity. Enroll in PoliSci 110C for WIM credit.

Same as: POLISCI 110C, POLISCI 110X

**INTNLREL 110D. War and Peace in American Foreign Policy. 5 Units.**

(Students not taking this course for WIM, register for 110Y.) The causes of war in American foreign policy. Issues: international and domestic sources of war and peace; war and the American political system; war, intervention, and peace making in the post-Cold War period.

Same as: POLISCI 110D, POLISCI 110Y

**INTNLREL 112. Micro Finance, Impact Investment and Gender. 1-2 Unit.**

Introduction to microfinance and impact investment as important development efforts in the war against poverty. Why and how microfinance operations have grown to provide financial services to poor and low-income people on a sustainable basis. Advice and best practices from successful practitioners and institutions around the world as well as new technology startups targeting industry. Faculty and student led discussions concerning assigned articles and readings.

**INTNLREL 114D. Democracy, Development, and the Rule of Law. 5 Units.**

Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts.

Same as: IPS 230, POLISCI 114D, POLISCI 314D

**INTNLREL 118S. Political Economy of International Trade and Investment. 5 Units.**

How domestic and international politics influence the economic relations between countries. Why do governments promote or oppose globalization? Why do countries cooperate economically in some situations but not others? Why do countries adopt bad economic policies? Focus on the politics of international trade and investment. Course approaches each topic by examining alternative theoretical approaches and evaluate these theories using historical and contemporary evidence from many geographical regions around the world. Prerequisites: ECON 1A, ECON 1B, and a statistics course.

Same as: POLISCI 218S

**INTNLREL 119. The International Human Rights Movement; Assessing its History, Work and Current Challenges. 4 Units.**

This course critically examines the origins of the human rights movement, its present and its future. We will address the limits, challenges and principal dilemmas facing human rights advocates as well as their role in other global agendas such as economic development, humanitarian law and peace-building. In what circumstances is human rights advocacy most and least effective? Can advocacy be counterproductive? The course will examine these questions through critical readings, class discussion and consideration of case studies of rights advocacy.

**INTNLREL 122. Introduction to European Studies. 5 Units.**

This course offers an introduction to major topics in the study of historical and contemporary Europe. We focus on European politics, economics and culture. First, we study what makes Europe special, and how its distinct identity has been influenced by its history. Next, we analyze Europe's politics. We study parliamentary government and proportional representation electoral systems, and how they affect policy. Subsequently, we examine the challenges the European economy faces. We further study the European Union and transatlantic relations. Same as: POLISCI 213E

**INTNLREL 122A. The Political Economy of the European Union. 5 Units.**

EU institutions, the legislative process, policies, relations with the U.S., and enlargement and the future of the EU. History and theories of EU integration. Democratic accountability of the institutions, and the emerging party system. Principal policies in agriculture, regional development, the internal market, single currency, and competition. Emphasis is on policies that affect the relations with the U.S. including trade and security. Results of the EU's constitutional convention.

**INTNLREL 123. The Future of the European Union: Challenges and Opportunities. 5 Units.**

First, this course analyzes the EU's greatest challenge, preserving the monetary union, and discusses the political and economic reforms needed to achieve that goal. In this context the course also studies the fiscal and budgetary policies of the EU. Second, the course discusses the EU's role in global politics, its desire to play a more prominent role, and the ways to reach that objective. Third, the course analyzes the EU's institutional challenges in its efforts to enhance its democratic character.

**INTNLREL 128B. International Problem-Solving Through NGOs: Policy, Players, Strategies, and Ethics. 2 Units.**

This course will focus on advanced international problem-solving through the lens of international NGOs, while integrating other relevant players that address global issues within a lens of ethics and accountability. Particular aspects of NGOs that will be assessed are: policy, business, strategy, and engagement with other players. Students will consider the major issues that international NGOs face in their effort to effect positive change in an increasingly complex global environment. The course draws heavily on a series of sophisticated case studies involving a variety of NGOs, areas of specialization, and geographic regions. Topics may include: poverty and famine; the natural resources curse; terrorism; HIV/Aids and other epidemics and neglected diseases; natural disasters and emergencies; climate change; and contagion of unethical behavior. A final project tailored to each student's interest will be in lieu of a final exam. Students will have the opportunity to work with several internationally prominent guests.

Same as: PUBLPOL 128, PUBLPOL 228

**INTNLREL 135A. International Environmental Law and Policy. 3-5 Units.**

This course addresses the nature, content, and structure of international environmental law. We will discuss its sources (formal and informal) and general principles, along with the emerging principles (sustainable development, precautionary principle, etc.) We will evaluate the role of international and non-governmental organizations, as well as examine the negotiation, conclusion, and implementation of international environmental agreements. Problem areas to be examined include global warming, stratospheric ozone depletion, exports of hazardous substances, transboundary pollution, trade and environment, and development and environment. RECOMMENDED PREREQ: students have completed INTNLREL 1 and/or INTNLREL 140A.

**INTNLREL 136. History of International Relations Thought. 5 Units.**

In this course, we will examine the intellectual origins of contemporary theories and approaches to international politics. In particular, we will trace the classical and early modern roots of contemporary realism, idealism, and cosmopolitanism. We will also address some of the enduring normative and empirical questions about international politics: (1) What is the basis of political power and authority? (2) What rights and obligations do individuals have? (3) What rights and obligations do states have? (4) What are the causes of conflict? (5) What are the prospects for enduring peace? Thinkers covered may include: Thucydides, Cicero, Augustine, Aquinas, Grotius, Hobbes, Kant, Morgenthau, and Waltz.

Same as: POLISCI 238T

**INTNLREL 136R. Introduction to Global Justice. 4 Units.**

This course provides an overview of core ethical problems in international politics, with special emphasis on the question of what demands justice imposes on institutions and agents acting in a global context. The course is divided into three sections. The first investigates the content of global justice, and comprises of readings from contemporary political theorists and philosophers who write within the liberal contractualist, utilitarian, cosmopolitan, and nationalist traditions. The second part of the course looks at the obligations which global justice generates in relation to five issues of international concern: global poverty, climate change, immigration, warfare, and well-being of women. The final section of the course asks whether a democratic international order is necessary for global justice to be realized.

Same as: ETHICSOC 136R, PHIL 76, POLISCI 136R, POLISCI 336

**INTNLREL 140A. International Law and International Relations. 4-5 Units.**

What is the character of international legal rules? Do they matter in international politics, and if so, to what degree? How effective can they really be? What should we expect from international law in shaping international relations? This seminar will provide introductory knowledge of the foundational principles and sources of public international law and a brief review of the most prominent IR-theories. Besides exploring how these theories address the role of IL in international politics, we will also consider a set of practical problems, where IL and IR intersect most dramatically, such as intervention by force, human rights, and enforcement of criminal law. \* Notice to students- registration for this course is not finalized until confirmed by the instructor during the first week of class. All interested students (registered or not) must attend the first class meeting for an in-depth discussion of the syllabus and other course policies. At that (mandatory) meeting a selection process will be conducted to determine final course enrollment. \* Course satisfies the WiM requirement for International Relations majors.

**INTNLREL 140C. The U.S., U.N. Peacekeeping, and Humanitarian War. 5 Units.**

The involvement of U.S. and the UN in major wars and international interventions since the 1991 Gulf War. The UN Charter's provisions on the use of force, the origins and evolution of peacekeeping, the reasons for the breakthrough to peacemaking and peace enforcement in the 90s, and the ongoing debates over the legality and wisdom of humanitarian intervention. Case studies include Croatia and Bosnia, Somalia, Rwanda, Kosovo, East Timor, and Afghanistan. \* Course satisfies the WiM requirement for International Relations majors.

Same as: HISTORY 201C

**INTNLREL 141A. Camera as Witness: International Human Rights Documentaries. 5 Units.**

Rarely screened documentary films, focusing on global problems, human rights issues, and aesthetic challenges in making documentaries on international topics. Meetings with filmmakers.

**INTNLREL 142. Challenging the Status Quo: Social Entrepreneurs Advancing Democracy, Development and Justice. 3-5 Units.**

This seminar is part of a broader program on Social Entrepreneurship at CDDRL in partnership with the Haas Center for Public Service. It will use practice to better inform theory. Working with three visiting social entrepreneurs from developing and developed country contexts students will use case studies of successful and failed social change strategies to explore relationships between social entrepreneurship, gender, democracy, development and justice. It interrogates current definitions of democracy and development and explores how they can become more inclusive of marginalized populations. This is a service learning class in which students will learn by working on projects that support the social entrepreneurs' efforts to promote social change. Students should register for either 3 OR 5 units only. Students enrolled in the full 5 units will have a service-learning component along with the course. Students enrolled for 3 units will not complete the service-learning component. Limited enrollment. Attendance at the first class is mandatory in order to participate in service learning.

Same as: AFRICAST 142

**INTNLREL 143. State and Society in Korea. 4 Units.**

20th-century Korea from a comparative historical perspective. Colonialism, nationalism, development, state-society relations, democratization, and globalization with reference to the Korean experience.

Same as: SOC 111, SOC 211

**INTNLREL 144. New Global Human Rights. 3 Units.**

Examination of emerging trends in international human rights with an analysis of new categories of human rights victims, human rights actors, and human rights technologies.

**INTNLREL 145. Genocide and Humanitarian Intervention. 4 Units.**

The course, traces the history of genocide in the 20th century and the question of humanitarian intervention to stop it, a topic that has been especially controversial since the end of the Cold War. The pre-1990s discussion begins with the Armenian genocide during the First World War and includes the Holocaust and Cambodia under the Khmer Rouge in the 1970s. Coverage of genocide and humanitarian intervention since the 1990s includes the wars in Bosnia, Rwanda, Kosovo, the Congo, and Sudan. The final session of the course will be devoted to a discussion of the International Criminal Court and the separate criminal tribunals that have been tasked with investigating and punishing the perpetrators of genocide.

**INTNLREL 149. The Economics and Political Economy of the Multilateral Trade System. 5 Units.**

The historical development of the multilateral trade system, the current agenda of the World Trade Organization, and prospects for trade liberalization. Emphasis is on the economic rationale for multilateral trade rules, the political problems facing countries in supporting further liberalization, and the challenges to the legitimacy of WTO procedures and practices. Issues include the greater participation of developing countries, the impact of new members, and the relationship between the WTO and other multilateral bodies. Guest speakers; student research paper presentations.

**INTNLREL 151. Decoding the Arab Spring and the Future of the Middle East. 5 Units.**

The seminar will focus on events of the Arab Spring and the future of the Middle East under new political players. The course will explore themes such as: the issues that forged the identity of the Arab Spring; common features among the Arab Spring countries; mechanisms of street protests against police states, history and current relationship between the military and new political powers; differences and similarities between secularists and Islamists towards public policy; why the Islamists are winning in public polls; scenarios for the region and some countries under new constitutions and parties.

**INTNLREL 152. Organized Crime and Democracy in Latin America. 5 Units.**

Scholars and policy analysts have long emphasized the strength of the rule of law as a key determinant of economic development and social opportunity. They also agree that the rule of law requires an effective and accountable legal system. The growth of transnational organized crime is a major impediment, however, to the creation of effective and accountable legal systems. This seminar examines how and why transnational criminal organizations have developed in Latin America, explores why they constitute a major challenge to the consolidation of democratic societies, economic development and individual rights. It also examines the efforts of governments to combat them, with a focus on the experiences of Mexico, Colombia, and Brazil. The course examines these cases in order to draw lessons; by pointing to both successes and failures of use to policy analysts, legal scholars, and practitioners.

Same as: IPS 247, POLISCI 244T

**INTNLREL 154. The Cold War: An International History. 5 Units.**

Though it ended twenty years ago, we still live in a world shaped by the Cold War. Beginning with its origins in the mid-1940s, this course will trace the evolution of the global struggle, until its culmination at the end of the 1980s. Students will be asked to ponder the fundamental nature of the Cold War, what kept it alive for nearly fifty years, how it ended, and its long term legacy for the world.

Same as: HISTORY 266C

**INTNLREL 157. The Political Economy of the Arab Revolutions. 5 Units.**

Many observers prefer to interpret the popular uprisings that swept through the Middle East in 2011 as a mere reaction to decades of authoritarian rule and human rights abuses. Conversely, others have underlined the deeper and more structural socio-economic drivers of revolt. This course aims at providing an in-depth analysis of Arab revolutions by employing the tools of political economy and departing from the conviction that revolts are the culmination of lengthy and complex processes rather than just occasional breakdown of authoritarian regimes.

**INTNLREL 159. Political Economy of East Asia. 3-5 Units.**

(Formerly 117.) Comparative and international political economy of E. and S.E. Asia. Industrial development and the Asian miracle, economic integration, regional cooperation, the Asian financial crisis, and contemporary challenges.

Same as: POLISCI 211

**INTNLREL 163. Introduction to Israeli Politics. 5 Units.**

This course aims to introduce students to Israel's political system and its major actors. We will survey Israel's political landscape, both chronologically and thematically, covering the major issues and conflicts which have dominated Israeli politics since its inception.

Same as: JEWISHST 279P, POLISCI 249P

**INTNLREL 168. America as a World Power: U.S. Foreign Relations, 1914 to Present. 5 Units.**

This course will examine the modern history of American foreign relations, from 1914 to the present. Beginning with the fateful decision to intervene in the First World War, it will examine the major crises and choices that have defined the American Century. Our study of U.S. foreign relations will consider such key factors as geopolitics, domestic politics, bureaucracy, psychology, race, and culture. Students will be expected to undertake their own substantial examination of a critical episode in the era studied.

Same as: HISTORY 252K

**INTNLREL 168A. American Interventions, 1898-Present. 5 Units.**

This class seeks to examine the modern American experience with limited wars, beginning with distant and yet pertinent cases, and culminating in the war in Iraq. Although this class will examine war as a consequence of foreign policy, it will not focus primarily on presidential decision making. Rather, it will place wartime policy in a broader frame, considering it alongside popular and media perceptions of the war, the efforts of antiwar movements, civil-military relations, civil reconstruction efforts, and conditions on the battlefield. We will also examine, when possible, the postwar experience.

**INTNLREL 173. Presidents and Foreign Policy in Modern History. 5 Units.**

Nothing better illustrates the evolution of the modern presidency than the arena of foreign policy. This class will examine the changing role and choices of successive presidential administrations over the past century, examining such factors as geopolitics, domestic politics, the bureaucracy, ideology, psychology, and culture. Students will be encouraged to think historically about the institution of the presidency, while examining specific case studies, from the First World War to the conflicts of the 21st century.

Same as: HISTORY 261G

**INTNLREL 174. Diplomacy on the Ground: Case Studies in the Challenges of Representing Your Country. 5 Units.**

The tragic death of Ambassador Chris Stevens has recently highlighted the dangers of diplomacy in the modern era. This class will look at how Americans in embassies have historically confronted questions such as authoritarian rule, human rights abuses, violent changes of government, and covert action. Case studies will include the Berlin embassy in the 1930s, Tehran in 1979, and George Kennan's experiences in Moscow, among others. Recommended for students contemplating careers in diplomatic service. \* Course satisfies the WiM requirement for International Relations majors.

Same as: HISTORY 252B

**INTNLREL 177. Bridging the Divide: Civil-Military Relations and Military Service as Public Service. 1 Unit.**

How does society conceive of a soldier, a sailor, an airman, a marine? Today fewer than 0.5 percent of Americans serve in the military, as compared to roughly 12 percent during the second World War. This has led to a widening gap in knowledge about the military and its members. This course is intended to introduce students to the notion of military service as public service and explore how misperceptions on both sides affect the civil-military divide.

**INTNLREL 180A. Transitional Justice, Human Rights, and International Criminal Tribunals. 3-5 Units.**

Historical backdrop of the Nuremberg and Tokyo Tribunals. The creation and operation of the Yugoslav and Rwanda Tribunals (ICTY and ICTR). The development of hybrid tribunals in East Timor, Sierra Leone, and Cambodia, including evaluation of their success in addressing perceived shortcomings of the ICTY and ICTR. Examination of the role of the International Criminal Court and the extent to which it will succeed in supplanting all other ad hoc international justice mechanisms and fulfill its goals. Analysis focuses on the politics of creating such courts, their interaction with the states in which the conflicts took place, the process of establishing prosecutorial priorities, the body of law they have produced, and their effectiveness in addressing the needs of victims in post-conflict societies.

Same as: ETHICSOC 280, IPS 280

**INTNLREL 182. World War I: Three Perspectives. 2 Units.**

Required for students participating in the BOSP Overseas Seminar, "Europe 1914 and the Origins of World War I." This course provides historical background on World War I and the events and processes leading up to the war. Taught in three-week segments from the perspectives of military history, political science, and literature, the course aims to help students formulate possible research topics for the Overseas Seminar. Prerequisite application and acceptance/waitlisted statuses into Europe 1914 and the Origins of World War I.

**INTNLREL 189. PRACTICAL TRAINING. 1-3 Unit.**

Students obtain internship in a relevant research or industrial activity to enhance their professional experience consistent with their degree program and area of concentration. Prior to enrolling students must get internship approved by the director. At the end of the quarter, a three page final report must be supplied documenting work done and relevance to degree program. Meets the requirements for Curricular Practical Training for students on F-1 visas. Student is responsible for arranging own internship. Limited to declared International Relations students only who are non-US citizens. May be repeated for credit.

**INTNLREL 191. IR Journal. 1 Unit.**

(Staff).

**INTNLREL 197. Directed Reading in International Relations. 1-5 Unit.**

Open only to declared International Relations majors. (Staff).

**INTNLREL 198. Senior Thesis. 2-10 Units.**

Open only to declared International Relations majors with approved senior thesis proposals.

**INTNLREL 200A. International Relations Honors Field Research. 3 Units.**

For juniors planning to write an honors thesis during senior year. Initial steps to prepare for independent research. Professional tools for conceptualizing a research agenda and developing a research strategy. Preparation for field research through skills such as data management and statistics, references and library searches, and fellowship and grant writing. Creating a work schedule for the summer break and first steps in writing. Prerequisite: acceptance to IR honors program.

**INTNLREL 200B. International Relations Honors Seminar. 3 Units.**

Second of two-part sequence. For seniors working on their honors theses. Professional tools, analysis of research findings, and initial steps in writing of thesis. How to write a literature review, formulate a chapter structure, and set a timeline and work schedule for the senior year. Skills such as data analysis and presentation, and writing strategies. Prerequisites: acceptance to IR honors program, and 199 or 200A. \* Course satisfies the WiM requirement for International Relations majors who are accepted into the IR Honors program.

**INTNLREL 200C. IR Honors Thesis Writing. 1 Unit.**

Mandatory seminar for International Relations Honors Students who are writing their Honors Thesis. INTNLREL 200A and 200B are prerequisites.

**INTNLREL 206. Palestinian Nationalism, Past and Present. 5 Units.**

The Palestinian national movement and its role in the Arab-Israeli conflict. The roots of the movement in the Ottoman Empire, its growth through the British Mandate, the 1948 and 1967 wars, the Intifada, and the Israeli-Palestinian peace process. Emphasis is on components which contributed to or delayed the growth of a distinct Palestinian identity, including Zionism.

**INTNLREL 207. Tribe, State, and Society in the Modern Middle East. 5 Units.**

The staying power of tribal identities and values in the Middle East. Examples include the Iraqi Sunni tribal insurgency against the U.S. The role of tribes in the formation of Middle Eastern states and how tribal values continue to impact social, political, and economic issues today.

**Introduction to the Humanities Courses****Italian General Courses****Italian Language Courses****ITALLANG 1. First-Year Italian, First Quarter. 5 Units.**

All-in-Italian communicative and interactive approach. Emphasis is on the development of appropriate discourse in contemporary cultural contexts. Interpretation of authentic materials, written and oral presentations, and plenty of conversational practice. Language lab, multimedia, and online activities.

**ITALLANG 1A. Accelerated First-Year Italian, Part 1. 5 Units.**

Accelerated sequence that completes first-year Italian in two rather than three quarters. For students with previous knowledge of Italian or with a strong background in another Romance language. Prerequisite: advanced-level proficiency in another Romance language; AP or SAT in Italian or another Romance language; one year of Italian college level courses or in another Romance language; placement test.

**ITALLANG 2. First-Year Italian, Second Quarter. 5 Units.**

Continuation of ITALLANG 1. All-in-Italian communicative and interactive approach. Emphasis is on the development of appropriate discourse in contemporary cultural contexts. Interpretation of authentic materials, written and oral presentations, and plenty of conversational practice. Language lab, multimedia, and online activities. Prerequisite: Itallang 1 or placement test.

**ITALLANG 2A. Accelerated First-Year Italian, Part 2. 5 Units.**

Continuation of ITALLANG 1A. Accelerated sequence that completes first-year Italian in two rather than three quarters. For students with previous knowledge of Italian or with a strong background in another Romance language. Prerequisite: Placement Test or ITALLANG 1A. Fulfills the University language requirement.

**ITALLANG 3. First-Year Italian, Third Quarter. 5 Units.**

Continuation of ITALLANG 2. All-in-Italian communicative and interactive approach. Emphasis is on the development of appropriate discourse in contemporary cultural contexts. Interpretation of authentic materials, written and oral presentations, and plenty of conversational practice. Language lab, multimedia, and online activities. Prerequisite: Itallang 2 or placement test. Fulfills the University language requirement.

**ITALLANG 5A. Intensive First-Year Italian, Part A. 5 Units.**

Same as ITALLANG 1. Accelerated. Covers 1 quarter of Italian. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials. Only Stanford graduate students restricted to 9 units may register for 205A,B,C.

**ITALLANG 5B. Intensive First-Year Italian, Part B. 5 Units.**

Same as ITALLANG 2. Continuation of 5A. Accelerated. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials. Only Stanford graduate students restricted to 9 units may register for 205A,B,C. Prerequisite 1 or 5A.

**ITALLANG 5C. Intensive First-Year Italian, Part C. 5 Units.**

Same as ITALLANG 3. Continuation of 5B. Accelerated. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials. Only Stanford graduate students restricted to 9 units may register for 205A,B,C. Prerequisite 2 or 5B. Fulfills the University language requirement.

**ITALLANG 15S. Intermediate Italian Oral Conversation. 3 Units.**

May be repeated once for credit.

**ITALLANG 20. Intermediate Oral Communication: Italy Today. 3 Units.**

Second-year conversational and presentational skills developed through exposure to movie clips, slide shows, and other authentic multimedia materials. Guest lectures on Italian culture including opera, pop music, wine, and food culture. Preview of the Florentine experience with Florence returnees sharing their experiences in Italy. Prerequisite: ITALLANG 2A, ITALLANG 3. Repeatable for credit twice.

**ITALLANG 21. Second Year Italian, First Quarter. 4 Units.**

Continuation of 3 or Italian 2A. Second-Year Italian, First Quarter - Sequence integrating culture and language in the development of socioculturally appropriate discourse. Authentic materials include news and film clips, video and audio files, and short stories. Reading, writing, listening, and speaking competence based on cross cultural understanding. Prerequisite: Placement Test, ITALLANG 3.

**ITALLANG 21A. Accelerated Second-Year Italian, Part 1. 5 Units.**

Continuation of ITALLANG 2A or Italian 3. For students going to Florence. Completes second-year sequence in two rather than three quarters. Prerequisite: placement test, ITALLANG 2A, ITALLANG 3.

**ITALLANG 22. Second-Year Italian, Second Quarter. 4 Units.**

Continuation of ITALLANG 21. Sequence integrating culture and language in the development of socioculturally appropriate discourse. Authentic materials include news and film clips, video and audio files, and excerpts from short stories. Reading, writing, listening, and speaking competence based on cross-cultural understanding. Prerequisite: Placement Test, ITALLANG 21 or equivalent.

**ITALLANG 22A. Accelerated Second-Year Italian, Part 2. 5 Units.**

Continuation of ITALLANG 21A or OSPFLOR 21F (for Florence returnees). Part A of a second-year sequence in two rather than three quarters. Satisfies the foreign language requirement for International Relations majors. Prerequisite: Placement Test, ITALLANG 21A or OSPFLOR 21F.

**ITALLANG 23. Second-Year Italian, Third Quarter. 3-4 Units.**

Continuation of ITALLANG 22. Sequence integrating culture and language in the development of socioculturally appropriate discourse. Authentic materials include news and film clips, video and audio files, and short stories. Reading, writing, listening, and speaking competence based on cross cultural understanding. Prerequisite: Placement Test, ITALLANG 22 or equivalent. Satisfies the foreign language requirement for International Relations majors.

**ITALLANG 99. Language Specials. 1-5 Unit.**

Prerequisite: consent of instructor.

**ITALLANG 101. Advanced Oral Communication: Italian Opera. 3 Units.**

For Florence returnees or those who have completed second-year Italian. Use of opera by Leoncavallo, Puccini, Rossini, Verdi to improve communication skills and review language functions. Emphasis is on presentation, conversation, and debate. Prerequisites: Placement Test, second-year Italian or equivalent.

**ITALLANG 102. Advanced Oral Communication: Modern Cinema. 3 Units.**

For Florence returnees or those who have completed second-year Italian. Use of movies by Italian film directors such as Benigni, Moretti, Salvatores, Soldini, and Tornatore to improve communication skills and review language functions. Emphasis is on presentation, conversation, and debate. Prerequisite: placement test, 101.

**ITALLANG 103. Advanced Oral Communication: Italian Classic Cinema. 3 Units.**

For Florence returnees or those who have completed second-year Italian. Use of classical movies by Italian film directors such as Antonioni, De Sica, Fellini, Rossellini, Visconti, and others to improve communication skills and review language functions. Emphasis is on presentation, conversation, and debate. Prerequisite: second-year Italian.

**ITALLANG 113. Italian Cultural Studies. 3 Units.**

Literary texts, news reports, comic books, film reviews, music lyrics, and sociological surveys used to examine Italy's language, culture, and society today. Advanced grammatical analysis and reading comprehension. Prerequisite: second-year Italian or equivalent.

**ITALLANG 114. Advanced Stylistics and Composition. 3-4 Units.**

Goal is advanced proficiency in written Italian. Textual and grammatical analysis of literary and non-literary texts, oral reports, translations, and writing assignments. Prerequisite: Placement Test, second-year Italian or equivalent.

**ITALLANG 115. Academic and Creative Writing. 3-4 Units.**

Continuation of 114. Academic prose: formal structures and academic terminology. Creative prose: short stories, expressive language, and when and how to break the rules for effect. Prerequisite: second-year Italian or equivalent.

**ITALLANG 126. Italy and Italians Today. 2 Units.**

May be repeated for credit.

**ITALLANG 205A. Intensive First-Year Italian for Stanford Grads, Part A. 3-5 Units.**

Equivalent to ITALLANG 5A. Accelerated. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials. Only Stanford graduate students restricted to 9 units may register for 205A,B,C or 2 of the courses for a total of 9 units.

**ITALLANG 205B. Intensive First-Year Italian for Stanford Grads, Part B. 3-5 Units.**

Equivalent to ITALLANG 5B. Accelerated. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials. Only Stanford graduate students restricted to 9 units may register for 205A,B,C or 2 of the courses for a total of 9 units Prerequisite 205A or equivalent.

**ITALLANG 205C. Intensive First-Year Italian for Stanford Grads, Part C. 3-5 Units.**

Equivalent to ITALLANG 5C. Accelerated. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials. Only Stanford graduate students restricted to 9 units may register for 205A,B,C or 2 of the courses for a total of 9 units Prerequisite 205B or equivalent.

**ITALLANG 250. Reading Italian. 4 Units.**

For seniors or graduate students seeking to meet the University reading requirement for advanced degrees. Reading strategies for comprehension of secondary literature for academic research. Fulfills the University foreign language requirement for advanced degrees if student earns a grade of 'B.' Prerequisite: one year of Italian or reading proficiency in another Romance language.

**ITALLANG 394. Graduate Studies in Italian Conversation. 1-3 Unit.**

Prerequisite: consent of instructor.nn (Staff).

**ITALLANG 395. Graduate Studies in Italian. 2-5 Units.**

Prerequisite: consent of instructor.nn (Staff).

**Italian Literature Courses****Italian Literature Courses****ITALIAN 41N. Imagining Italy. 3 Units.**

No city in Italy has inspired the imagination of writers, artists, and filmmakers more than Venice, with its golden dance of water and stone, its carnival masks, and its melancholic intimations of mortality. This course will be devoted to the city's imaginary life in literature and film. Readings include Marco Polo, Henry James's *The Aspern Papers*, Italo Calvino's *Invisible Cities*, John Ruskin's *The Stones of Venice*, and Joseph Brodsky's *Watermarks*. Films include *Dangerous Beauty*, *Casanova*, *Don't Look Now*, *Death in Venice*, and *The Comfort of Strangers*.

**ITALIAN 52N. Life is a Play: Identity, Persona, and Improvisation in Luigi Pirandello. 3 Units.**

Stanford Introductory Seminar. Preference to freshmen. For Pirandello (1867-1936; Nobel Prize, 1934), to suddenly realize your entire life has been a performance is a moment of utmost horror, comedy, and opportunity for self-awareness. In a quintessentially modern fashion, he claims that the performance cannot be stopped, that authenticity is a mirage, and that learning to laugh at oneself is the only liberation. Materials include Pirandello's existential "theater within the theater," his novels, and their film adaptations, which we will study in their cultural context.

**ITALIAN 75N. Narrative Medicine and Near-Death Experiences. 3 Units.**

Even if many of us don't fully believe in an afterlife, we remain fascinated by visions of it. This course focuses on Near-Death Experiences and the stories around them, investigating them from the many perspectives pertinent to the growing field of narrative medicine: medical, neurological, cognitive, psychological, sociological, literary, and filmic. The goal is not to understand whether the stories are veridical but what they do for us, as individuals, and as a culture, and in particular how they seek to reshape the patient-doctor relationship. Materials will span the 20th century and come into the present. Taught in English.

Same as: FRENCH 75N

**ITALIAN 100. Masterpieces: Dante. 3-5 Units.**

An exploration of Dante's "Inferno" (the first of the three canticles of *The Divine Comedy*). The aim is to learn how to read the poem in detail and in depth, through both slow reading and ongoing reconstruction of Dante's world. We will also ask to what extent Dante's civic identity as a Florentine, especially his exile from Florence, gave momentum to his literary career and helped him become the author of one of the masterpieces of Western literature. Special emphasis is placed on Dante's ethical world view and his representation of character. Taught in English.

**ITALIAN 101. Italy: The Good, the Bad and the Ugly. 3 Units.**

Renowned for its rich cultural tradition, Italy is also one of the most problematic nations in Europe. This course explores the contradictions at the heart of Italy by examining how art and literature provide a unique perspective onto modern Italian history. We will focus on key phenomena that contribute both positively and negatively to the complex "spirit" of Italy, such as the presence of the past, political realism and idealism, revolution, corruption, decadence, war, immigration, and crises of all kinds. Through the study of historical and literary texts, films, and news media, the course seeks to understand Italy's current place in Europe and its future trajectory by looking to its past as a point of comparison. Taught in English.

**ITALIAN 102. Masterpieces: Boccaccio's Decameron. 3-5 Units.**

This course offer an in-depth consideration of Boccaccio's masterpiece *The Decameron*. We will pay special attention to Boccaccio's unparalleled art of storytelling; at his distinctly "modern" sensibility; and at the new kind of heroes his book champions: heroes of wit, imagination, free-thinking and self-reliance. Finally we will consider the erotic exuberance of many of Boccaccio's tales.

**ITALIAN 104. La dolce vita: Italian Stereotypes in Film. 3-5 Units.**

Passion, nostalgia, mafia, women. What has it meant to be Italian in the past hundred years? How are these stereotypes invented, portrayed and dismantled by filmmakers such as Fellini, Scola, Giordana, Benigni and Torre? This course will address the problem of Italianità, its anomalies and contradictions, and look at how Italians have imagined themselves on the big screen, from the figure of the hopeless romantic to the mafioso. Films will be in Italian with English subtitles. Taught in Italian.

**ITALIAN 120. Love Italian Style. 4 Units.**

Gateway course for Italian studies. An examination of representations of love and sexuality in Italian literature, art, film, and popular culture from the Italian Renaissance to the current period. Beginning with the figure of Silvio Berlusconi and ending with Dante's love for Beatrice, the course considers differences in social practices and mores over time, the role of literary and artistic representations in establishing cultural expectations about love, the question of gender roles and identity in Italian society, as well as contemporary stereotypes about love in Italy and Italians in love. Taught in Italian. Prerequisites: ITALLANG 22A or equivalent.

**ITALIAN 127. Inventing Italian Literature. 4 Units.**

An introduction to the study of literature in Italian, especially short prose fiction and poetry. Attention will be given to building a vocabulary and critical tool-set for the interpretation of literary texts from the Middle Ages to the contemporary period. Taught in Italian. Prerequisites: ITALLANG 22A or equivalent (2 years of Italian).

**ITALIAN 128. The Italian Renaissance and the Path to Modernity. 4 Units.**

The literature, art, and history of the Renaissance and beyond. Readings from the 15th through 18th centuries include Moderata Fonte, Machiavelli, Ariosto, Tasso, Galileo, and Goldoni. Taught in Italian. Prerequisites: ITALLANG 22A or equivalent (2 years of Italian).

**ITALIAN 129. Modern Italian Culture: Avant-garde and Politics. 4 Units.**

This course will provide students with an introduction to twentieth century Italian literature and culture through the lens of major trends in literary aesthetics, with an emphasis on the experimental and avant-garde. We will focus on gaining an understanding of the interrelationship between different aesthetic approaches and their expression in works of literature and film. We will also investigate political culture in twentieth-century Italy, in an attempt to map historical changes alongside ideas about literature. Taught in Italian. Prerequisites: ITALLANG 22A or equivalent (2 years of Italian).

**ITALIAN 136. Literature and Politics - Two Mediterranean Cases: Catalonia and Italy. 3-5 Units.**

A comparison between the different roles played by writers as members of the intellectual establishment in Catalonia, Spain and Italy. Focus on the relation between intellectuals and politics in shaping national identity. We will give especially consideration to the role played by intellectuals during the Fascist and Francoist dictatorships and during Spain's transition to democracy. Taught in English.

Same as: ILAC 122

**ITALIAN 143. Favorite Italian Films. 2 Units.**

In this course we will view and discuss 9 beloved & critically acclaimed Italian films, primarily from the 1980s and 90s, including Cinema paradiso, Il postino, Mediterraneo, and La vita è bella. This course is especially intended for returnees from the Florence program who want to maintain and develop their spoken Italian. A film screening time will be scheduled during the first week of class. Taught in Italian. Prerequisites: ITALLANG 21 or equivalent (4 quarters of Italian).

**ITALIAN 152. Boccaccio's Decameron: The Ethics of Storytelling. 3-5 Units.**

This course involves an in-depth study of Boccaccio's Decameron in the context of medieval theories of poetry and interpretation. The goal is to understand more fully the relationship between literature and lived experience implied by Boccaccio's fictions. We will address key critical issues and theoretical approaches related to the text. Taught in English translation, there will be an optional supplementary Italian discussion section during weeks 2-9.

Same as: ITALIAN 352

**ITALIAN 154. Film & Philosophy. 4 Units.**

Issues of freedom, morality, faith, knowledge, personal identity, and the value of truth explored through film; philosophical investigation of the filmic medium itself. Screenings to include Twelve Monkeys (Gilliam), Ordet (Dreyer), The Dark Knight (Nolan), Vicky Cristina Barcelona (Allen), and Eternal Sunshine of the Spotless Mind (Kaufman). Taught in English. Same as: COMPLIT 154A, FRENCH 154, PHIL 193C, PHIL 293C

**ITALIAN 155. The Mafia in Society, Film, and Fiction. 4 Units.**

The mafia has become a global problem through its infiltration of international business, and its model of organized crime has spread all over the world from its origins in Sicily. At the same time, film and fiction remain fascinated by a romantic, heroic vision of the mafia. Compares both Italian and American fantasies of the Mafia to its history and impact on Italian and global culture. Taught in English.

**ITALIAN 181. Philosophy and Literature. 5 Units.**

Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track. Majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature, with particular focus on the question of value: what, if anything, does engagement with literary works do for our lives? Issues include aesthetic self-fashioning, the paradox of tragedy, the paradox of caring, the truth-value of fiction, metaphor, authorship, irony, make-believe, expression, edification, clarification, and training. Readings are drawn from literature and film, philosophical theories of art, and stylistically interesting works of philosophy. Authors may include Sophocles, Chaucer, Dickinson, Proust, Woolf, Borges, Beckett, Kundera, Charlie Kaufman; Barthes, Foucault, Nussbaum, Walton, Nehamas; Plato, Montaigne, Schopenhauer, Nietzsche, and Sartre. Taught in English.

Same as: CLASSICS 42, COMPLIT 181, ENGLISH 81, FRENCH 181, GERMAN 181, PHIL 81, SLAVIC 181

**ITALIAN 199. Individual Work. 1-12 Unit.****ITALIAN 214. Pirandello, Sartre, and Beckett. 3-5 Units.**

In this course we will read the main novels and plays of Pirandello, Sartre, and Beckett, with special emphasis on the existentialist themes of their work. Readings include The Late Mattia Pascal, Six Characters in Search of an Author, Henry IV; Nausea, No Exit, "Existentialism is a Humanism"; Molloy, Endgame, Krapp's Last Tape, Waiting for Godot. Taught in English.

Same as: COMPLIT 281E, COMPLIT 381E, FRENCH 214, FRENCH 314, ITALIAN 314

**ITALIAN 215. Italian Film, Fashion, and Design, 1950-1968. 3-5 Units.**

In a close analysis of films by Fellini, Antonioni, Rossellini, Pasolini, and Bertolucci, we will explore the various contradictions that fueled the Italian cultural imagination in the 50s and 60s: minimalism and multiplicity, male and female, industrial and archaic, comic and tragic, wealth and poverty. Special emphasis placed on fashion, design, and modernist art. Taught in English, with the option of an additional discussion section in Italian. Occasional screenings Monday evenings at 7pm.

Same as: ITALIAN 315

**ITALIAN 220. Early Modern Seminar. 3-5 Units.**

Explores some of the key texts of European early modernity and the critical paradigms according to which the idea of the "Renaissance" has been formed, analyzed, and questioned since the 19th century. Will aim to provide a broad introduction to Early Modern studies from the point of view of the Italian Renaissance and its reception in different European contexts. Taught in English.  
Same as: DLCL 323

**ITALIAN 221. Italo Calvino: Literature, Science, Philosophy. 3-5 Units.**

The course will follow the development of Italo Calvino's literary career, with a particular focus on his interest in fantastical and meta-fictional forms of narrative. Readings of Calvino's literary works, such as *Cosmicomics*, *Invisible Cities*, and *Mr. Palomar*, will be supplemented by readings from his critical prose, collected in the volumes *The Uses of Literature* and *Six Memos for the Next Millennium*. Taught in English.

**ITALIAN 224. Leopardi, Baudelaire, and Modernity. 3-5 Units.**

A close reading of Giacomo Leopardi's *Canti* and Charles Baudelaire's *Flowers of Evil* and *Paris Spleen* in the context of 19th-century Europe. Discussion of the poetry will be enriched by selections from their essays on literature and art and by notes from the *Zibaldone* and *Mon coeur mis à nu*. Key themes and concepts include language, imagination, "noia," "spleen," and the oppositions between nature and civilization, modernity and antiquity. Taught in English.  
Same as: FRENCH 224, FRENCH 324, ITALIAN 324

**ITALIAN 225. Petrarch & Petrarchism: Fragments of the Self. 3-5 Units.**

In this course we will examine Francis Petrarch's book of Italian lyric poems, *Rerum vulgarium fragmenta*, and its reception in early modern France, England, and Spain. Readings from Petrarch's epistolary and ethical writings will contextualize historically and intellectually the aesthetics and ethics of the fragment in his poetry. With this foundation, we will investigate the long-lasting impact of Petrarch's work on Renaissance poetry and humanism, with attention to both the literary and the material aspects of its reception. Taught in English.  
Same as: COMPLIT 225E, COMPLIT 325E, ITALIAN 325

**ITALIAN 226. Modern Italian Poetry and Ultimate Questions. 3-5 Units.**

More than in any other tradition, Italian poets of the twentieth century focus on "ultimate questions," and look all the way back to Dante in doing so: why do we die? is there a God? what does it mean to love? are we responsible for our neighbors? is beauty related to truth? what do we learn from the past? what makes life meaningful? Poets include Ungaretti, Montale, Caproni, Sereni, Rosselli, Pasolini, Luzi, Merini, and Zanzotto. Taught in Italian. Prerequisites: Second-year Italian minimum.

**ITALIAN 227. Giambattista Vico & Claude Lévi-Strauss. 3-5 Units.**

An intensive reading of Vico's *New Science* with special emphasis on Vico's theory of anthropogenesis, myth, and the poetic origins of human consciousness. Vico's thought will be placed in relation to Lévi-Strauss's theories of myth and so-called "primitive thought". Readings include Vico's *New Science* and Lévi-Strauss's "The Structural Study of Myth", and the first chapters of his book *The Savage Mind*. Taught in English.  
Same as: FRENCH 230, FRENCH 330, ITALIAN 327

**ITALIAN 228. Science, technology and society and the humanities in the face of the looming disaster. 2-5 Units.**

How STS and the Humanities can together help think out the looming catastrophes that put the future of humankind in jeopardy.  
Same as: FRENCH 228, POLISCI 233F

**ITALIAN 232B. Heretics, Prostitutes and Merchants: The Venetian Empire. 5 Units.**

Between 1200-1600, Venice created a powerful empire at the boundary between East and West that controlled much of the Mediterranean, with a merchant society that allowed social groups, religions, and ethnicities to coexist. Topics include the features of Venetian society, the relationship between center and periphery, order and disorder, orthodoxy and heresy, the role of politics, art, and culture in the Venetian Renaissance, and the empire's decline as a political power and reinvention as a tourist site and living museum.  
Same as: HISTORY 232B

**ITALIAN 234. Courtly Love: Deceit and Desire in the Middle Ages. 3-5 Units.**

A comparative seminar on medieval love books and their reception. We will examine and question the notion of "amour courtois," which arose in the lyrics and romances of medieval France and was codified in Romantic-era criticism. Primary readings will be enriched by thinking about this notion through the lens of modern theories of desire, such as those of Girard, Lacan, and Zizek. Conducted in English with readings in translation.  
Same as: COMPLIT 221A, FRENCH 234

**ITALIAN 235E. Dante's "Inferno". 3-5 Units.**

Intensive reading of Dante's "Inferno" (the first canticle of his three canticle poem *The Divine Comedy*). Main objective: to learn how to read the *Inferno* in detail and in depth, which entails both close textual analysis as well as a systematic reconstruction of the Christian doctrines that subtend the poem. The other main objective is to understand how Dante's civic and political identity as a Florentine, and especially his exile from Florence, determined his literary career and turned him into the author of the poem. Special emphasis on Dante's moral world view and his representation of character. Taught in English.

**ITALIAN 236E. Dante's "Purgatorio and Paradiso". 4-5 Units.**

Reading the second and third canticles of Dante's *Divine Comedy*. Prerequisite: students must have read Dante's *Inferno* in a course or on their own. Taught in English. Recommended: reading knowledge of Italian.

**ITALIAN 247. Shakespeare and Italy. 3-5 Units.**

Focus on Italy's presence in Shakespeare's corpus; his use of Italian literary sources, and the Italian settings of some of his plays. It will also look at the reception of Shakespeare in Italy, especially in Italian opera and film. Readings will include Petrarch, Boccaccio, Bandello and Machiavelli; Shakespeare's sonnets and some of his major plays that are set in Italy. We will also discuss Verdi's opera, *Otello*, and Zeffirelli's movie *Romeo and Juliette*, among others Italian renditions of Shakespeare's plays. Taught in English.

**ITALIAN 251. Writing, Memory, and Self-Fashioning. 3-5 Units.**

Writing is not a mere recording of the past, but a selection and reinvention of our experiences. We will look at how writing is central to the philosophical project of fashioning the self, even as it reveals that much of what we call the self is a fictional construct. Materials include fiction and memoirs (Primo Levi, Michel Tournier, Melania Mazzucco, Jonathan Littell), and theoretical works in philosophy (Bergson, James, Freud, Jung, Derrida, Wyschogrod, Nehamas), psycholinguistics, and neuroscience. Taught in English.  
Same as: FRENCH 251

**ITALIAN 255. Literature and Death: An Existential Constellation in its Historical Unfolding. 2-3 Units.**

This seminar will pursue the intuition that literary texts, due to their status as fiction, have always been intensely related to Death as the ultimate horizon of individual existence, a horizon that is only available to our imagination. We will concentrate on this largely unexplored link as an existential constellation of concrete historical and of challenging philosophical complexity. The discussions will begin with a detailed analysis of the canonical passages in Martin Heidegger's *Being and Time* from 1927 that try to understand the difference between Death as seen from outside and Death in its *Jemeinigkeit*, that is Death as the absolute end-horizon of individual existence which necessarily causes *Angst* because it is followed by *Nothingness*. On this basis and supplemented by an introduction into several present-day theories and reflections on imagination as a distinct potential of the human mind, we will dedicate the weekly seminar sessions to specific historical moments and different literary (and perhaps artistic) forms that have articulated the connection between Death and Literature (with the final choice of texts and paradigms being open to the participants' interests and area of competence). Topics and textual materials may include: fifth century Greek Tragedy, Roman Stoicism, Medieval Epic in the context of Christian cosmology, Death as a horizon of individual existence in early Modernity (*Don Quijote*), the invisible presence of Death in baroque art, the bracketing of Death in the context of the Enlightenment mentality, Death and suicide as gestures of Romantic self-stylization, the presence of Death in Classical and Romantic conception of music, Death and the absence of God in nineteenth century novels and philosophy, the experience of World War I and a new intensity in the experience of Death, Death and grand abstraction in art, Death in mid-twentieth century Existentialism, Death and its place in the *Anthropocene* as an early twenty-first century frame of mind. Emphasizing weekly the reading assignments and intense participation in the seminar discussions, this course is laid out for two units (no final paper) but open for the participation of auditors (including undergraduate students with specific areas of competence) who are willing to work through the full range of philosophical texts, literary texts, and artworks on the syllabus. Students interested in this topic should begin with a reading of Heidegger's *Being and Time* and try to remember own readings and forms of experiences that seem pertinent to this topic. Contact with the instructor during the summer months is encouraged (sepp@stanford.edu).

Same as: COMPLIT 257A, COMPLIT 355A, FRENCH 256

**ITALIAN 256. North/South in Contemporary Italy. 4 Units.**

One of the most difficult tasks of Italian unification was to negotiate the many differences between North and South – economic, social, cultural, and linguistic. The phenomenal growth of regional and even separatist sentiment exemplified in the Northern League shows that Italian integration is far from complete. In this course we will explore the history of conflict between North and South from the *Risorgimento* to the present day, with a primary focus on prose fiction and film. Taught in English.

**ITALIAN 257. Simone de Beauvoir, Hannah Arendt, and Adriana Cavarero. 1-5 Unit.**

What does it mean to say the personal is the political, or, in the case of Arendt, that the personal is not political, especially if you are woman? This course explores how De Beauvoir, Arendt, and Cavarero contend with this question and how all three of them think, each in her own way, outside the box of philosophy, of political science, of ethics, and of feminism. Particular attention will be given to the role of art in directing social change and personal transformation, and to the enduring relevance of these women's thought today. Texts include *The Second Sex*, *The Ethics of Ambiguity*, *The Human Condition*, *Between Past and Future*, *Stately Bodies*, and *Relating Narratives*.

Same as: FRENCH 257, FRENCH 357, ITALIAN 357

**ITALIAN 260. Italy, France, and Postcolonialism. 3-5 Units.**

The starting point for our seminar is the question of how postcolonial thought enhances our possible understandings of Italy – as a nation, as a territorial unit coalescing cultural parts that remain disparate to this day, and as a population that has not come fully to terms with its fascist history, its crimes in World War II, or the atrocities it perpetrated as a colonizing state. The Italian case is unusual compared to others, in that the country's colonial past in north and east Africa is still being uncovered after a long period of public silence and government suppression; and what might be called the postcolonial Italian project has begun only recently, driven by a distinct minority of scholars, 'migrant' authors, and activists. French cultural politics and history are often taken as a point of reference from which to analyze Italian phenomena. In this case, we will make use of the French postcolonial tradition as a point of both comparison and differentiation. Among other things, we will focus on the different meanings of 'postcolonial' in a country that is strongly centralized (France) and another which is unremittingly fragmented (Italy). As just one example, we will scrutinize how Gramsci's work has been understood in Anglophone and Francophone criticism (cultural studies, Subaltern studies, and so on), as opposed to how it may be read in its original Italian context, where it concerned subalterns within the nation-state. Asking what is postcolonial, for whom, when, and where?, ultimately our goal is to discern the specific contours of Italy's postcolonialism by juxtaposing it with France's, and to simultaneously ask what light can be shed on French postcolonial particularities by placing it in this dialogue. Beginning with fundamental historical readings (Gramsci, Fanon, Memmi) and touching on some early Anglophone postcolonial critics (Said, Bhabha), the seminar will then be structured around key literary and theoretical readings from Italy and France. Ideally, readings will be in the original language, but as often as possible they will be selected such that they will be accessible in English translation as well. Taught in English. Same as: FRENCH 260

**ITALIAN 266. Women's Voices in Contemporary Italian Literature. 3-5 Units.**

The traditional canon of Italian literature consists almost exclusively of male authors. Yet Italian women writers have been active since the time of Dante. This presents an overview of women's prose fiction of the last 100 years, from Sibilla Aleramo's groundbreaking feminist novel *Una donna* (1906) to novels from the 80's and 90's. We will examine such issues as the central issue of sexual violence in many female autobiographies; the experience of motherhood; the conflict between maternal love and the desire for self-determination and autonomy; paths to political awareness; reinventing the historical novel. Taught in English.

**ITALIAN 281. Novels into Film. 4-5 Units.**

Some critics claim that film has displaced the novel as the most popular narrative form of contemporary culture. What is the relationship between the two media? Which novels are chosen for adaptation and why? What are the relative strengths and limitations of literature and film as media? What are the specific pleasures of adaptations? In this course we will read five Italian novels and analyze their film versions, viewing adaptation as a legitimate creative response to a work of literature. We will first read the novel and consider the particular challenges it presents to transposition into film. We will follow this discussion with a close reading of the film version. The goal of the course is to examine cinematic adaptation as a cultural process by introducing a group of significant texts from the Italian tradition. Taught in English.

**ITALIAN 288. Decadence and Modernism from Mallarmé to Marinetti. 3-5 Units.**

One hundred years ago, artists feared their work was incompatible with modern economic systems, secular bourgeois values, and materialist science. Accused of being decadent, they took up this term of derision and made it into a program of rebellion that has shaped modern art. This course explores decadent rebellion, with an eye toward how the last turn of the century might be similar to our current one. Writers include Huysmans, Poe, Mallarmé, Nietzsche, Nordau, d'Annunzio, Valéry, Ungaretti, Marinetti, and Breton; we will also consider parallels in the visual arts.

Same as: FRENCH 288, FRENCH 388, ITALIAN 388

**ITALIAN 314. Pirandello, Sartre, and Beckett. 3-5 Units.**

In this course we will read the main novels and plays of Pirandello, Sartre, and Beckett, with special emphasis on the existentialist themes of their work. Readings include *The Late Mattia Pascal*, *Six Characters in Search of an Author*, *Henry IV*; *Nausea*, *No Exit*, "Existentialism is a Humanism"; *Molloy*, *Endgame*, *Krapp's Last Tape*, *Waiting for Godot*. Taught in English.

Same as: COMPLIT 281E, COMPLIT 381E, FRENCH 214, FRENCH 314, ITALIAN 214

**ITALIAN 315. Italian Film, Fashion, and Design, 1950-1968. 3-5 Units.**

In a close analysis of films by Fellini, Antonioni, Rossellini, Pasolini, and Bertolucci, we will explore the various contradictions that fueled the Italian cultural imagination in the 50s and 60s: minimalism and multiplicity, male and female, industrial and archaic, comic and tragic, wealth and poverty. Special emphasis placed on fashion, design, and modernist art. Taught in English, with the option of an additional discussion section in Italian. Occasional screenings Monday evenings at 7pm.

Same as: ITALIAN 215

**ITALIAN 324. Leopardi, Baudelaire, and Modernity. 3-5 Units.**

A close reading of Giacomo Leopardi's *Canti* and Charles Baudelaire's *Flowers of Evil* and *Paris Spleen* in the context of 19th-century Europe. Discussion of the poetry will be enriched by selections from their essays on literature and art and by notes from the *Zibaldone* and *Mon coeur mis à nu*. Key themes and concepts include language, imagination, "noia," "spleen," and the oppositions between nature and civilization, modernity and antiquity. Taught in English.

Same as: FRENCH 224, FRENCH 324, ITALIAN 224

**ITALIAN 325. Petrarch & Petrarchism: Fragments of the Self. 3-5 Units.**

In this course we will examine Francis Petrarch's book of Italian lyric poems, *Rerum vulgarium fragmenta*, and its reception in early modern France, England, and Spain. Readings from Petrarch's epistolary and ethical writings will contextualize historically and intellectually the aesthetics and ethics of the fragment in his poetry. With this foundation, we will investigate the long-lasting impact of Petrarch's work on Renaissance poetry and humanism, with attention to both the literary and the material aspects of its reception. Taught in English.

Same as: COMPLIT 225E, COMPLIT 325E, ITALIAN 225

**ITALIAN 327. Giambattista Vico & Claude Lévi-Strauss. 3-5 Units.**

An intensive reading of Vico's *New Science* with special emphasis on Vico's theory of anthropogenesis, myth, and the poetic origins of human consciousness. Vico's thought will be placed in relation to Lévi-Strauss's theories of myth and so-called "primitive thought". Readings include Vico's *New Science* and Lévi-Strauss's "The Structural Study of Myth", and the first chapters of his book *The Savage Mind*. Taught in English.

Same as: FRENCH 230, FRENCH 330, ITALIAN 227

**ITALIAN 328. Literature, Narrative, and the Self. 3-5 Units.**

The role of narrative in the well-lived life. Are narratives necessary? Can they, and should they, be literary? When might non-narrative approaches, whether literary or otherwise, be more relevant? Is unity of self something given, something to be achieved, or something to be overcome? Readings from Aristotle, Montaigne, Schopenhauer, Nietzsche, Camus, Sartre, MacIntyre, G. Strawson, Velleman; Ricoeur, Brooks; Shakespeare, Stendhal, Musil, Levi, Beckett, Morrison; film. Taught in English.

Same as: COMPLIT 328, FRENCH 328

**ITALIAN 332B. Heretics, Prostitutes and Merchants: The Venetian Empire. 4-5 Units.**

Between 1200-1600, Venice created a powerful empire at the boundary between East and West that controlled much of the Mediterranean, with a merchant society that allowed social groups, religions, and ethnicities to coexist. Topics include the features of Venetian society, the relationship between center and periphery, order and disorder, orthodoxy and heresy, the role of politics, art, and culture in the Venetian Renaissance, and the empire's decline as a political power and reinvention as a tourist site and living museum.

Same as: HISTORY 332B

**ITALIAN 345. In Defense of Poetry. 3-5 Units.**

Beginning with the account of the quarrel between philosophy and poetry in Plato's *Republic*, we will read definitions and defenses of poetry by authors such as Cicero, Horace, Petrarch, Boccaccio, Sidney, Shelley, and Pound, among others. While we will try to historicize these authors' defenses as much as possible, we will also read them from the perspective of contemporary efforts to defend literature and the humanities. Topics of central concern will be the connection between poetry and ethics, the conflict between poetry and the professions of business, law, and medicine, poetry's place in the university, the political role of the poet, questions of poetic language and form, and the relevance of defenses of poetry to literary theory.

Same as: FRENCH 343

**ITALIAN 352. Boccaccio's Decameron: The Ethics of Storytelling. 3-5 Units.**

This course involves an in-depth study of Boccaccio's *Decameron* in the context of medieval theories of poetry and interpretation. The goal is to understand more fully the relationship between literature and lived experience implied by Boccaccio's fictions. We will address key critical issues and theoretical approaches related to the text. Taught in English translation, there will be an optional supplementary Italian discussion section during weeks 2-9.

Same as: ITALIAN 152

**ITALIAN 357. Simone de Beauvoir, Hannah Arendt, and Adriana Cavarero. 1-5 Unit.**

What does it mean to say the personal is the political, or, in the case of Arendt, that the personal is not political, especially if you are woman? This course explores how De Beauvoir, Arendt, and Cavarero contend with this question and how all three of them think, each in her own way, outside the box of philosophy, of political science, of ethics, and of feminism. Particular attention will be given to the role of art in directing social change and personal transformation, and to the enduring relevance of these women's thought today. Texts include *The Second Sex*, *The Ethics of Ambiguity*, *The Human Condition*, *Between Past and Future*, *Stately Bodies*, and *Relating Narratives*.

Same as: FRENCH 257, FRENCH 357, ITALIAN 257

**ITALIAN 369. Introduction to the Profession of "Literary Studies" for Graduate Students. 1-2 Unit.**

A history of literary theory for entering graduate students in national literature departments and comparative literature.

Same as: COMPLIT 369, DLCL 369, FRENCH 369, GERMAN 369

**ITALIAN 388. Decadence and Modernism from Mallarmé to Marinetti. 3-5 Units.**

One hundred years ago, artists feared their work was incompatible with modern economic systems, secular bourgeois values, and materialist science. Accused of being decadent, they took up this term of derision and made it into a program of rebellion that has shaped modern art. This course explores decadent rebellion, with an eye toward how the last turn of the century might be similar to our current one. Writers include Huysmans, Poe, Mallarmé, Nietzsche, Nordau, d'Annunzio, Valéry, Ungaretti, Marinetti, and Breton; we will also consider parallels in the visual arts.

Same as: FRENCH 288, FRENCH 388, ITALIAN 288

**ITALIAN 395. Philosophical Reading Group. 1 Unit.**

Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht is required. May be repeated for credit. Taught in English.

Same as: COMPLIT 359A, FRENCH 395

**ITALIAN 398. Intensive Reading in French/Italian. 10 Units.**

Enrollment is limited to French/Italian Ph.D. students. Course is designed for French/Italian Ph.D. students to prepare for department milestone exams.

Same as: FRENCH 398

**ITALIAN 399. Individual Work. 1-12 Unit.**

Repeatable for Credit.

**ITALIAN 802. TGR Dissertation. 0 Units.****Japanese General Courses****JAPANGEN 51. Japanese Business Culture and Systems. 3-5 Units.**

Japanese sociocultural dynamics in industrial and corporate structures, negotiating styles, decision making, and crisis management. Practicum on Japan market strategies.

Same as: JAPANGEN 251

**JAPANGEN 57. How to Find Modern Japan: A Gateway Course. 4 Units.**

An introduction to key locales in the cultural production of modern Japanese identity, offering a virtual tour of Japan and its significant others through major works of Japanese literature and film. Particular attention to sociohistorical context.

Same as: JAPANGEN 157

**JAPANGEN 60. Asian Arts and Cultures. 5 Units.**

An introduction to major monuments, themes, styles, and media of East and South Asian visual arts, in their social, literary, religious, and political contexts. Through close study of primary monuments of architectural, pictorial, and sculptural arts and related texts, this course will explore ritual and mortuary arts; Buddhist arts across Asia; narrative and landscape images; and courtly, urban, monastic, and studio environments for art from Bronze Age to modern eras.

Same as: ARTHIST 2

**JAPANGEN 75N. Around the World in Seventeen Syllables: Haiku in Japan, the U.S., and the Digital World. 3-4 Units.**

Preference to freshmen. Origins of the haiku form in Japan, its place in the discourse of Orientalism during the 19th and early 20th centuries in the West, its appropriation by U.S. devotees of Zen and the beat poets after WW II, and its current transformation into a global form through the Internet.

**JAPANGEN 79. Japanese Ghosts: The Supernatural in Japanese Art and Entertainment. 4 Units.**

The complex meanings of ghosts in Japanese culture. Representations of the supernatural in images, drama, oral narratives, prose, film, comics and animation at different moments in Japanese history.

Same as: JAPANGEN 179

**JAPANGEN 82N. Joys and Pains of Growing Up and Older in Japan. 3 Units.**

What do old and young people share in common? With a focus on Japan, a country with a large long-living population, this seminar spotlights older people's lives as a reflection of culture and society, history, and current social and personal changes. Through discussion of multidisciplinary studies on age, analysis of narratives, and films, we will gain a closer understanding of Japanese society and the multiple meanings of growing up and older. Students will also create a short video/audio profile of an older individual, and we will explore cross-cultural comparisons. Held in Knight Bldg. Rm. 201.

**JAPANGEN 92. Introduction to Japan. 5 Units.**

Required Japanese majors. Introduction to Japanese culture in historical context. Previous topics include: shifting paradigms of gender relations and performance, ancient mythology, court poetry and romance, medieval war tales, and the theaters of Noh, Bunraku, and Kabuki.

**JAPANGEN 121. Translating Japan, Translating the West. 3-4 Units.**

Translation lies at the heart of all intercultural exchange. This course introduces students to the specific ways in which translation has shaped the image of Japan in the West, the image of the West in Japan, and Japan's self-image in the modern period. What texts and concepts were translated by each side, how, and to what effect? No prior knowledge of Japanese language necessary.

Same as: COMPLIT 142B, JAPANGEN 221

**JAPANGEN 122. Translating Cool: Globalized Popular Culture in Asia. 3-4 Units.**

Did you grow up watching Pokémon and Power Rangers? Have you danced along to "Gangnam Style"? As we become increasingly exposed to Asian popular culture and the Internet facilitates instant access to new media, previous localized forms of entertainment—animated cartoons, comics, video games, music videos, film, and soap operas—have become part of a global staple. However, these cultural forms have emerged not only in their original form with mediation of subtitles. Many have undergone various processes of adaptation and translation so that we no longer recognize that these products had ever originated elsewhere. This course will immerse students in a range of Japanese and Korean cultural phenomena to reveal the spectrum of translation practices across national boundaries. We will inquire into why these cultural forms have such compelling and powerful staying power, contextualize them within their frames of production, and explore the strategies, limitations, and potential of translational practices. Contact instructor for place.

dafnazur@stanford.edu Knight 201.

Same as: JAPANGEN 222, KORGEN 122

**JAPANGEN 124. Manga as Literature. 3-5 Units.**

Analysis of representative manga as narratives that combine verbal and visual elements, with attention to historical and cultural background. Representative manga by Tezuka Osamu, Tatsumi Yoshihiro, Koike Kazuo, Taniguchi Jiro, Natsume Ono, Kono Fumiyo, and others. All readings in English. Class meets in Knight Bldg, Rm 018. Contact instructor (sdcarter@stanford.edu) for place.

Same as: JAPANGEN 224

**JAPANGEN 126. The Vampire in Anime. 3-4 Units.**

Analysis of anime where vampires play central roles as characters and/or in plot development. Comparison of character and plot development within anime series and Western vampire literature will be the main focus; attention will also be paid to the development of the vampire as a literary and film character in the West, the conception of the supernatural in Japanese culture, and the points of similarity and difference between the two.

**JAPANGEN 127. JAPANimals: Fauna in the Cultural History of Japan. 3-5 Units.**

Multifarious roles played by animals throughout Japanese art and culture. Signs of the zodiac; shape-changers and tricksters; fabulous beasts and sacred animals; the notorious "Dog Shogun" and animal satires; commodification of animals, representation of animals in anime. Same as: JAPANGEN 227

**JAPANGEN 133. Japanese Media Culture. 2-4 Units.**

Focuses on the intertwined histories of the postwar Japanese television, anime, music, and video game industries, and how their development intersects with wider trends in Japanese society. We will pay particular attention to questions of affect, labor, and environment in media production, consumption, and style. Same as: JAPANGEN 233

**JAPANGEN 137. Classical Japanese Literature in Translation. 4 Units.**

Prose, poetry, and drama from the 10th-19th centuries. Historical, intellectual, and cultural context. Works vary each year. May be repeated for credit with consent of instructor. Same as: JAPANGEN 237

**JAPANGEN 138. Introduction to Modern Japanese Literature and Culture. 3-4 Units.**

This class introduces key literary texts from Japan's modern era (1868-present), locating these works in the larger political, social, and cultural trends of the period. Primary texts include: Futabatei Shimei's *Floating Clouds*, Higuchi Ichiyō's *Child's Play*, Natsume Sōseki's *Kokoro*, Kobayashi Takiji's *Cannery Boat*, Ōe Kenzaburō's *The Catch*, and Yoshimoto Banana's *Kitchen*. Examination of these literary works will be contextualized within larger political trends (e.g., the modernization program of the Meiji regime, the policies of Japan's wartime government, and postwar Japanese responses to the cold war), social developments (e.g., changing notions of social class, the women's rights movement, and the social effects of the postwar economic expansion), and cultural movements (e.g., literary reform movement of the 1890s, modernism of the 1920s and 30s, and postmodernism of the 1980s). The goal of the class is to use literary texts as a point of entry to understand the grand narrative of Japan's journey from its tentative re-entry into the international community in the 1850s, through the cataclysm of the Pacific War, to the remarkable prosperity of the bubble years in the 1980s.

Same as: COMPLIT 138A, JAPANGEN 238

**JAPANGEN 141. Japanese Performance Traditions. 3-4 Units.**

Major paradigms of gender in Japanese performance traditions from ancient to modern times, covering Noh, Kabuki, Bunraku, and Takarazuka. Same as: JAPANGEN 241

**JAPANGEN 142. Gender, Sex, and Text in Early Modern Japan. 3-4 Units.**

The early modern period in Japan (1600-1868) was a vibrant time when popular culture flourished, cities expanded, and people enjoyed a 'floating world' of transient, sensual delights. Reading popular literature from the time (in translation), including novels and poetry, and looking at explicit erotic imagery in woodblock prints as well as other visual media, we will discuss topics related to gender, sex, and sexuality. Critical scholarship by historians, art historians and scholars of literature will add to students' own readings of these primary sources.

Same as: JAPANGEN 242

**JAPANGEN 144. Inventing Japan: Traditional Culture in the Modern World. 3-5 Units.**

Features of traditional Japanese culture such as temples and shrines, kimono, and cultural practices like the tea ceremony, have played an important role in both domestic and international representations of Japan since the late nineteenth century. In this course students will be introduced to these elements of traditional Japanese culture, while learning to cast a critical eye on the concept of tradition. Themes will include discussion of the gendered nature of tradition in modern Japan and the role played by such traditions in constructing national identity, both in Japan and overseas. We will explore these topics using the theoretical frameworks of invention of tradition and reformatting of tradition. Contact instructor for room. rcorbett@stanford.edu. Same as: JAPANGEN 244

**JAPANGEN 148. Modern Japanese Narratives: Literature and Film. 3-5 Units.**

Central issues in modern Japanese visual and written narrative. Focus is on competing views of modernity, war, and crises of individual and collective identity and responsibility. Directors and authors include Kurosawa, Mizoguchi, Ozu, Ogai, Akutagawa, Tanizaki, Abe, and Oe. Same as: JAPANGEN 248

**JAPANGEN 149. Screening Japan: Issues in Crosscultural Interpretation. 3-4 Units.**

Is the cinematic language of moving images universal? How have cultural differences, political interests, and genre expectations affected the ways in which Japanese cinema makes meaning across national borders? Sources include the works of major Japanese directors and seminal works of Japanese film criticism, theory, and scholarship in English. No Japanese language skills required.

Same as: JAPANGEN 249

**JAPANGEN 152. Art Animation. 2-4 Units.**

While anime has spread around the world, Japanese art animators have been busy developing a parallel tradition, built from a more personal, experimental, and idiosyncratic approach to the medium. Looking closely at key works from major artists in the field, this course explores art animation from a variety of perspectives: animation scene; philosophical attempts to account for animated movement; and art animation's unique perspective on Japanese culture.

Same as: FILMSTUD 146, JAPANGEN 252

**JAPANGEN 157. How to Find Modern Japan: A Gateway Course. 4 Units.**

An introduction to key locales in the cultural production of modern Japanese identity, offering a virtual tour of Japan and its significant others through major works of Japanese literature and film. Particular attention to sociohistorical context.

Same as: JAPANGEN 57

**JAPANGEN 160. Early Modern Japan: The Floating World of Chikamatsu. 4 Units.**

Early modern Japan as dramatized in the puppet theater of Chikamatsu Monzaemon (1653-1725), Japan's leading dramatist, who depicted militarization, commercialization, and urbanization in the Tokugawa period (1603-1868). Emperors, shogun, daimyo, samurai, merchants, monks, geisha, and masterless ronin in his bunraku plays as denizens of a floating world. Themes of loyalty, love, heroism, suicide, and renunciation in the early modern world. In English.

Same as: JAPANGEN 260

**JAPANGEN 179. Japanese Ghosts: The Supernatural in Japanese Art and Entertainment. 4 Units.**

The complex meanings of ghosts in Japanese culture. Representations of the supernatural in images, drama, oral narratives, prose, film, comics and animation at different moments in Japanese history.

Same as: JAPANGEN 79

**JAPANGEN 184. Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting. 4 Units.**

Changes marking the transition from medieval to early modern Japanese society that generated a revolution in visual culture, as exemplified in subjects deemed fit for representation; how commoners joined elites in pictorializing their world, catalyzed by interactions with the Dutch.  
Same as: ARTHIST 184, ARTHIST 384, JAPANGEN 384

**JAPANGEN 185. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868. 4 Units.**

Narratives of conflict, pacification, orthodoxy, nostalgia, and novelty through visual culture during the change of episteme from late medieval to early modern, 16th through early 19th centuries. The rhetorical messages of castles, teahouses, gardens, ceramics, paintings, and prints; the influence of Dutch and Chinese visuality; transformation in the roles of art and artist; tensions between the old and the new leading to the modernization of Japan.

Same as: ARTHIST 187, ARTHIST 387

**JAPANGEN 186. Theme and Style in Japanese Art. 4 Units.**

A mixture of lecture and discussion, this course presents a chronological introduction to some of the defining monuments in the history of Japanese visual culture from prehistory to the mid-19th century. This introductory class presumes no prior knowledge of art history or of Japan. We will emphasize certain overarching themes like religious life; notions of decorum appropriate to various classes (court, warrior, and commoner); the relationship between and among the arts, such as the visual and the verbal, or the symphonic assemblage arts as seen in the tea ceremony; pervasive cultural tropes like nostalgia, seasonality, or the sense of place; and broader issues such as censorship, patronage, gender issues, and the encounters between Japanese and foreign cultures.

Same as: ARTHIST 186, ARTHIST 386, JAPANGEN 286

**JAPANGEN 187. Romance, Desire, and Sexuality in Modern Japanese Literature. 3-4 Units.**

This class is structured around three motifs: love suicide (as a romantic ideal), female desire, and same-sex sexuality. Over the course of the quarter we will look at how these motifs are treated in the art and entertainment from three different moments of Japanese history: the Edo period (1615-1868), the modern period (1920-65), and the contemporary period (1965-present). We will start by focusing on the most traditional representations of these topics. Subsequently, we will consider how later artists and entertainers revisited the conventional treatments of these motifs, informing them with new meanings and social significance. We will devote particular attention to how this material comments upon issues of gender, sexuality, and human relationships in the context of Japan. Informing our perspective will be feminist and queer theories of reading and interpretation.

Same as: FEMGEN 187, JAPANGEN 287

**JAPANGEN 200. Directed Reading in Asian Languages. 1-12 Unit.**

For Japanese literature. Prerequisite: consent of instructor. (Staff).

**JAPANGEN 201. Teaching Japanese Humanities. 1 Unit.**

Prepares graduate students to teach humanities at the undergraduate level. Topics include syllabus development and course design, techniques for generating discussion, effective grading practices, and issues particular to the subject matter.

**JAPANGEN 220. The Situation of the Artist in Traditional Japan. 5 Units.**

Topics may include: workshop production such as that of the Kano and Tosa families; the meaning of the signature on objects including ceramics and tea wares; the folk arts movement; craft guilds; ghost painters in China; individualism versus product standardization; and the role of lineage. How works of art were commissioned; institutions supporting artists; how makers purveyed their goods; how artists were recognized by society; the relationship between patrons' desires and artists' modes of production.

**JAPANGEN 221. Translating Japan, Translating the West. 3-4 Units.**

Translation lies at the heart of all intercultural exchange. This course introduces students to the specific ways in which translation has shaped the image of Japan in the West, the image of the West in Japan, and Japan's self-image in the modern period. What texts and concepts were translated by each side, how, and to what effect? No prior knowledge of Japanese language necessary.

Same as: COMPLIT 142B, JAPANGEN 121

**JAPANGEN 222. Translating Cool: Globalized Popular Culture in Asia. 3-4 Units.**

Did you grow up watching Pokémon and Power Rangers? Have you danced along to "Gangnam Style"? As we become increasingly exposed to Asian popular culture and the Internet facilitates instant access to new media, previous localized forms of entertainment—animated cartoons, comics, video games, music videos, film, and soap operas—have become part of a global staple. However, these cultural forms have emerged not only in their original form with mediation of subtitles. Many have undergone various processes of adaptation and translation so that we no longer recognize that these products had ever originated elsewhere. This course will immerse students in a range of Japanese and Korean cultural phenomena to reveal the spectrum of translation practices across national boundaries. We will inquire into why these cultural forms have such compelling and powerful staying power, contextualize them within their frames of production, and explore the strategies, limitations, and potential of translational practices. Contact instructor for place.

dafnazur@stanford.edu Knight 201.  
Same as: JAPANGEN 122, KORGEN 122

**JAPANGEN 224. Manga as Literature. 3-5 Units.**

Analysis of representative manga as narratives that combine verbal and visual elements, with attention to historical and cultural background. Representative manga by Tezuka Osamu, Tatsumi Yoshihiro, Koike Kazuo, Taniguchi Jiro, Natsume Ono, Kono Fumiyo, and others. All readings in English. Class meets in Knight Bldg, Rm 018. Contact instructor (sdcarter@stanford.edu) for place.

Same as: JAPANGEN 124

**JAPANGEN 227. JAPANimals: Fauna in the Cultural History of Japan. 3-5 Units.**

Multifarious roles played by animals throughout Japanese art and culture. Signs of the zodiac; shape-changers and tricksters; fabulous beasts and sacred animals; the notorious "Dog Shogun" and animal satires; commodification of animals, representation of animals in anime.

Same as: JAPANGEN 127

**JAPANGEN 229. Topophilia: Place in Japanese Visual Culture through 19th Century. 5 Units.**

Attachments to "place" and "home" are hard-wired into the biology of humans and animals alike, although such attachments vary according to specific times, cultures, and states of mind. Can we speak of a "Japanese sense of place" and if so, what is distinctive about it? Seminar explores religious visions and ritual fields; narratives of itinerancy; cityscapes; topographic taxonomies. Knowledge of Japanese culture is beneficial but not mandatory.

Same as: ARTHIST 229D

**JAPANGEN 233. Japanese Media Culture. 2-4 Units.**

Focuses on the intertwined histories of the postwar Japanese television, anime, music, and video game industries, and how their development intersects with wider trends in Japanese society. We will pay particular attention to questions of affect, labor, and environment in media production, consumption, and style.

Same as: JAPANGEN 133

**JAPANGEN 237. Classical Japanese Literature in Translation. 4 Units.**

Prose, poetry, and drama from the 10th-19th centuries. Historical, intellectual, and cultural context. Works vary each year. May be repeated for credit with consent of instructor.

Same as: JAPANGEN 137

**JAPANGEN 238. Introduction to Modern Japanese Literature and Culture. 3-4 Units.**

This class introduces key literary texts from Japan's modern era (1868-present), locating these works in the larger political, social, and cultural trends of the period. Primary texts include: Futabatei Shimei's *Floating Clouds*, Higuchi Ichiyō's *Child's Play*, Natsume Sōseki's *Kokoro*, Kobayashi Takiji's *Cannery Boat*, Ōe Kenzaburō's *The Catch*, and Yoshimoto Banana's *Kitchen*. Examination of these literary works will be contextualized within larger political trends (e.g., the modernization program of the Meiji regime, the policies of Japan's wartime government, and postwar Japanese responses to the cold war), social developments (e.g., changing notions of social class, the women's rights movement, and the social effects of the postwar economic expansion), and cultural movements (e.g., literary reform movement of the 1890s, modernism of the 1920s and 30s, and postmodernism of the 1980s). The goal of the class is to use literary texts as a point of entry to understand the grand narrative of Japan's journey from its tentative re-entry into the international community in the 1850s, through the cataclysm of the Pacific War, to the remarkable prosperity of the bubble years in the 1980s.

Same as: COMPLIT 138A, JAPANGEN 138

**JAPANGEN 241. Japanese Performance Traditions. 3-4 Units.**

Major paradigms of gender in Japanese performance traditions from ancient to modern times, covering Noh, Kabuki, Bunraku, and Takarazuka.

Same as: JAPANGEN 141

**JAPANGEN 242. Gender, Sex, and Text in Early Modern Japan. 3-4 Units.**

The early modern period in Japan (1600-1868) was a vibrant time when popular culture flourished, cities expanded, and people enjoyed a 'floating world' of transient, sensual delights. Reading popular literature from the time (in translation), including novels and poetry, and looking at explicit erotic imagery in woodblock prints as well as other visual media, we will discuss topics related to gender, sex, and sexuality. Critical scholarship by historians, art historians and scholars of literature will add to students' own readings of these primary sources.

Same as: JAPANGEN 142

**JAPANGEN 244. Inventing Japan: Traditional Culture in the Modern World. 3-5 Units.**

Features of traditional Japanese culture such as temples and shrines, kimono, and cultural practices like the tea ceremony, have played an important role in both domestic and international representations of Japan since the late nineteenth century. In this course students will be introduced to these elements of traditional Japanese culture, while learning to cast a critical eye on the concept of tradition. Themes will include discussion of the gendered nature of tradition in modern Japan and the role played by such traditions in constructing national identity, both in Japan and overseas. We will explore these topics using the theoretical frameworks of invention of tradition and reformatting of tradition. Contact instructor for room. rcorbett@stanford.edu.

Same as: JAPANGEN 144

**JAPANGEN 248. Modern Japanese Narratives: Literature and Film. 3-5 Units.**

Central issues in modern Japanese visual and written narrative. Focus is on competing views of modernity, war, and crises of individual and collective identity and responsibility. Directors and authors include Kurosawa, Mizoguchi, Ozu, Ogai, Akutagawa, Tanizaki, Abe, and Oe.

Same as: JAPANGEN 148

**JAPANGEN 249. Screening Japan: Issues in Crosscultural Interpretation. 3-4 Units.**

Is the cinematic language of moving images universal? How have cultural differences, political interests, and genre expectations affected the ways in which Japanese cinema makes meaning across national borders?

Sources include the works of major Japanese directors and seminal works of Japanese film criticism, theory, and scholarship in English. No Japanese language skills required.

Same as: JAPANGEN 149

**JAPANGEN 251. Japanese Business Culture and Systems. 3-5 Units.**

Japanese sociocultural dynamics in industrial and corporate structures, negotiating styles, decision making, and crisis management. Practicum on Japan market strategies.

Same as: JAPANGEN 51

**JAPANGEN 252. Art Animation. 2-4 Units.**

While anime has spread around the world, Japanese art animators have been busy developing a parallel tradition, built from a more personal, experimental, and idiosyncratic approach to the medium. Looking closely at key works from major artists in the field, this course explores art animation from a variety of perspectives: animation scene; philosophical attempts to account for animated movement; and art animation's unique perspective on Japanese culture.

Same as: FILMSTUD 146, JAPANGEN 152

**JAPANGEN 260. Early Modern Japan: The Floating World of Chikamatsu. 4 Units.**

Early modern Japan as dramatized in the puppet theater of Chikamatsu Monzaemon (1653-1725), Japan's leading dramatist, who depicted militarization, commercialization, and urbanization in the Tokugawa period (1603-1868). Emperors, shogun, daimyo, samurai, merchants, monks, geisha, and masterless ronin in his bunraku plays as denizens of a floating world. Themes of loyalty, love, heroism, suicide, and renunciation in the early modern world. In English.

Same as: JAPANGEN 160

**JAPANGEN 286. Theme and Style in Japanese Art. 4 Units.**

A mixture of lecture and discussion, this course presents a chronological introduction to some of the defining monuments in the history of Japanese visual culture from prehistory to the mid-19th century. This introductory class presumes no prior knowledge of art history or of Japan. We will emphasize certain overarching themes like religious life; notions of decorum appropriate to various classes (court, warrior, and commoner); the relationship between and among the arts, such as the visual and the verbal, or the symphonic assemblage arts as seen in the tea ceremony; pervasive cultural tropes like nostalgia, seasonality, or the sense of place; and broader issues such as censorship, patronage, gender issues, and the encounters between Japanese and foreign cultures.

Same as: ARTHIST 186, ARTHIST 386, JAPANGEN 186

**JAPANGEN 287. Romance, Desire, and Sexuality in Modern Japanese Literature. 3-4 Units.**

This class is structured around three motifs: love suicide (as a romantic ideal), female desire, and same-sex sexuality. Over the course of the quarter we will look at how these motifs are treated in the art and entertainment from three different moments of Japanese history: the Edo period (1615-1868), the modern period (1920-65), and the contemporary period (1965-present). We will start by focusing on the most traditional representations of these topics. Subsequently, we will consider how later artists and entertainers revisited the conventional treatments of these motifs, informing them with new meanings and social significance. We will devote particular attention to how this material comments upon issues of gender, sexuality, and human relationships in the context of Japan. Informing our perspective will be feminist and queer theories of reading and interpretation.

Same as: FEMGEN 187, JAPANGEN 187

**JAPANGEN 287A. The Japanese Tea Ceremony: The History, Aesthetics, and Politics Behind a National Pastime. 5 Units.**

The Japanese tea ceremony, the ultimate premodern multimedia phenomenon, integrates architecture, garden design, ceramics, painting, calligraphy, and other treasured objects into a choreographed ritual wherein host, objects, and guests perform designated roles on a tiny stage sometimes only six feet square. In addition to its much-touted aesthetic and philosophical aspects, the practice of tea includes inevitable political and rhetorical dimensions. This course traces the evolution of tea practice from its inception within the milieu of courtier diversions, Zen monasteries, and warrior villas, through its various permutations into the 20th century, where it was manipulated by the emerging industrialist class for different-but ultimately similar-ends.

Same as: ARTHIST 287A

**JAPANGEN 384. Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting. 4 Units.**

Changes marking the transition from medieval to early modern Japanese society that generated a revolution in visual culture, as exemplified in subjects deemed fit for representation; how commoners joined elites in pictorializing their world, catalyzed by interactions with the Dutch.

Same as: ARTHIST 184, ARTHIST 384, JAPANGEN 184

**JAPANGEN 402T. Entrepreneurship in Asian High-Tech Industries. 1 Unit.**

Distinctive patterns and challenges of entrepreneurship in Asia; update of business and technology issues in the creation and growth of start-up companies in major Asian economies. Distinguished speakers from industry, government, and academia. Course may be repeated for credit.

Same as: CHINGEN 402T, EE 402T, KORGEN 402T

**Japanese Language Courses****JAPANLNG 1. First-Year Japanese Language, Culture, and Communication, First Quarter. 5 Units.**

(Formerly JAPANLNG 7). First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. 72 kanji characters will be taught.

**JAPANLNG 2. First-Year Japanese Language, Culture, and Communication, Second Quarter. 5 Units.**

(Formerly JAPANLNG 8). Continuation of 1. First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. Students are expected to master 177 kanji characters by completing this course. Prerequisite: placement test, JapanLng 1. See <http://japanese.stanford.edu>.

**JAPANLNG 3. First-Year Japanese Language, Culture, and Communication, Third Quarter. 5 Units.**

(Formerly JAPANLNG 9). Continuation of JapanLng 2. First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. Students are expected to master ~ 300 kanji characters by completing the course. Fulfills University Foreign Language Requirement. Prerequisite: placement test, JapanLng 2. <http://japanese.stanford.edu/>.

**JAPANLNG 4A. First-Year Japanese Language Essentials, First Quarter. 3 Units.**

(Formerly JAPANLNG 7A.) For students who want to build communication skills in limited time. Online listening exercises, audiovisual materials, kanji exercises. See [http://japanese.stanford.edu/?page\\_id=73](http://japanese.stanford.edu/?page_id=73).

**JAPANLNG 4B. First-Year Japanese Language Essentials, Second Quarter. 3 Units.**

(Formerly JAPANLNG 8A.) Continuation of JAPANLNG 4A. For students who want to build communication skills in limited time. Online listening exercises, audiovisual materials, kanji exercises. Prerequisite: Placement Test, JAPANLNG 4A. See [http://japanese.stanford.edu/?page\\_id=73](http://japanese.stanford.edu/?page_id=73).

**JAPANLNG 4C. First-Year Japanese Language Essentials, Third Quarter. 3 Units.**

(Formerly JAPANLNG 9A.) Continuation of JAPANLNG 4B. For students who want to build communication skills in limited time. Online listening exercises, audiovisual materials, kanji exercises. Prerequisite: Placement Test, JAPANLNG 4B. See [http://japanese.stanford.edu/?page\\_id=73](http://japanese.stanford.edu/?page_id=73).

**JAPANLNG 5. Intensive First-Year Japanese Language. 15 Units.**

Equivalent to 1, 2, and 3 combined. See [http://japanese.stanford.edu/?page\\_id=323](http://japanese.stanford.edu/?page_id=323). Graduate students restricted to 9 units should enroll in 305.

**JAPANLNG 11A. Intermediate Japanese Conversation, First Quarter. 2 Units.**

(Formerly JAPANLNG 27.) Goal of the course is to converse in Japanese with more confidence. Develops oral proficiency through building solid basic sentence patterns and increasing vocabulary in order to gain ability to speak about greater variety of topics with more detail. Class activities include role play and mini skits for practical use of Japanese. Prerequisite: JAPANLNG 3 or consent of instructor.

**JAPANLNG 11B. Intermediate Japanese Conversation, Second Quarter. 2 Units.**

(Formerly JAPANLNG 28.) Continuation of JAPANLNG 11A. Goal of the course is to converse in Japanese with more confidence. Develops oral proficiency through building solid basic sentence patterns and increasing vocabulary in order to gain ability to speak about greater variety of topics with more detail. Class activities include role play and mini skits for practical use of Japanese. Prerequisite: JAPANLNG 11A or consent of instructor.

**JAPANLNG 11C. Intermediate Japanese Conversation, Third Quarter. 2 Units.**

(Formerly JAPANLNG 29.) Goal of the course is to converse in Japanese with more confidence. Develops oral proficiency through building solid basic sentence patterns and increasing vocabulary in order to gain ability to speak about greater variety of topics with more detail. Class activities include role play and mini skits for practical use of Japanese. Prerequisite: JAPANLNG 11B or consent of instructor.

**JAPANLNG 14A. Second-Year Japanese Language Essentials, First Quarter. 3 Units.**

(Formerly JAPANLNG 17A.) Continuation of JAPANLNG 4C. For students who want to build communication skills in limited time. Prerequisite: JAPANLNG 4C. See [http://japanese.stanford.edu/?page\\_id=89](http://japanese.stanford.edu/?page_id=89).

**JAPANLNG 14B. Second-Year Japanese Language Essentials, Second Quarter. 3 Units.**

(Formerly JAPANLNG 18A.) Continuation of JAPANLNG 14A. For students who want to build communication skills in limited time. Prerequisite: JAPANLNG 14A. See [http://japanese.stanford.edu/?page\\_id=89](http://japanese.stanford.edu/?page_id=89).

**JAPANLNG 14C. Second-Year Japanese Language Essentials, Third Quarter. 3 Units.**

(Formerly JAPANLNG 19A.) Continuation of JAPANLNG 14B. For students who want to build communication skills in limited time. Prerequisite: JAPANLNG 14B. See [http://japanese.stanford.edu/?page\\_id=89](http://japanese.stanford.edu/?page_id=89).

**JAPANLNG 20. Intensive Second-Year Japanese. 15 Units.**

Equivalent to 21,22,23 combined. Prerequisite: 3, 5 or consent of instructor. graduate students restricted to 9 units may take the course under JAPANLNG 320. See [http://japanese.stanford.edu?page\\_id=323](http://japanese.stanford.edu?page_id=323).

**JAPANLNG 21. Second-Year Japanese Language, Culture, and Communication, First Quarter. 5 Units.**

(Formerly JAPANLNG 17.) Goal is to further develop and enhance spoken and written Japanese in order to handle advanced concepts such as comparison and contrast of the two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include authentic materials such as newspaper articles, and essays. Prerequisite: Placement Test, JAPANLNG 3. See [http://japanese.stanford.edu/?page\\_id=23](http://japanese.stanford.edu/?page_id=23).

**JAPANLNG 22. Second-Year Japanese Language, Culture, and Communication, Second Quarter. 5 Units.**

(Formerly JAPANLNG 18). Continuation of JAPANLNG 21. Goal is to further develop and enhance spoken and written Japanese in order to handle advanced concepts such as comparison and contrast of the two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include authentic materials such as newspaper articles, and essays. Prerequisite: Placement Test, JAPANLNG 21. See [http://japanese.stanford.edu/?page\\_id=23](http://japanese.stanford.edu/?page_id=23).

**JAPANLNG 23. Second-Year Japanese Language, Culture, and Communication, Third Quarter. 5 Units.**

(Formerly JAPANLNG 19). Goal is to further develop and enhance spoken and written Japanese in order to handle advanced concepts such as comparison and contrast of the two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include authentic materials such as newspaper articles, and essays. (Formerly JAPANLNG 18B.) Prerequisite: 22. [http://japanese.stanford.edu/?page\\_id=23](http://japanese.stanford.edu/?page_id=23).

**JAPANLNG 31A. Intermediate to Advanced Conversation, First Quarter. 2 Units.**

Oral proficiency through role play, oral presentations, and discussion. Recommended for those who have participated in Kyoto SCTI program. May be taken concurrently with JAPANLNG 21, 22, and 23. Prerequisite: 9K, or consent of instructor. See [http://japanese.stanford.edu/?page\\_id=421](http://japanese.stanford.edu/?page_id=421).

**JAPANLNG 31B. Intermediate to Advanced Conversation, Second Quarter. 2 Units.**

Continuation of JAPANLNG 31A. (Oral proficiency through role play, oral presentations, and discussion. Recommended for those who have participated in Kyoto SCTI program. May be taken concurrently with JAPANLNG 21, 22, and 23. Prerequisite: JAPANLNG 31A. See <http://japanese.stanford.edu/>.

**JAPANLNG 31C. Intermediate to Advanced Conversation, Third Quarter. 2 Units.**

(Continuation of JAPANLNG 31B. Oral proficiency through role play, oral presentations, and discussion. Recommended for those who have participated in Kyoto SCTI program. May be taken concurrently with JAPANLNG 21, 22, and 23. Prerequisite: JAPANLNG 32B. See <http://japanese.stanford.edu/>.

**JAPANLNG 31E. Accelerated Beginning Japanese for Engineering Students. 4 Units.**

Restricted to engineering students participating in the School of Engineering Japan Internship Program. This is a special course for those who go to Japan for summer internships. The course focuses on survival Japanese but lays a solid foundation for continued learning of the language. Grad students enroll in JAPANLNG 331E.

**JAPANLNG 32G. Accelerated Beginning Business Japanese II. 4 Units.**

For GSB students only. Limited enrollment.

**JAPANLNG 33G. Accelerated Beginning Business Japanese III. 4 Units.**

For GSB students only. Limited enrollment.

**JAPANLNG 99. Language Specials. 1-5 Unit.**

Prerequisite: consent of instructor.nn (Staff).

**JAPANLNG 100. Reading in Japanese. 1 Unit.**

Goal is to advance Japanese proficiency through reading in Japanese on topics you are interested in. You will read and write journals about the booklets, magazines, periodicals, and manga you choose. Research shows that this type of reading activity further enhances learners' proficiency (accuracy, vocabulary, writing, and cultural literacy). Prerequisite: JapanLng 2, but all levels are welcome.

**JAPANLNG 101. Third-Year Japanese Language, Culture, and Communication, First Quarter. 5 Units.**

(Formerly JAPANLNG 117.) Goal is to express thoughts and opinions in paragraph length in spoken and written forms. Materials include current Japanese media and literature for native speakers of Japanese. Cultural and social topics related to Japan and its people. Prerequisite: Placement Tests, JAPANLNG 23. See [http://japanese.stanford.edu/?page\\_id=39](http://japanese.stanford.edu/?page_id=39).

**JAPANLNG 102. Third-Year Japanese Language, Culture, and Communication, Second Quarter. 5 Units.**

(Formerly JAPANLNG 118). Continuation of 101. Goal is to express thoughts and opinions in paragraph length in spoken and written forms. Materials include current Japanese media and literature for native speakers of Japanese. Cultural and social topics related to Japan and its people. Prerequisite: 101. See [http://japanese.stanford.edu/?page\\_id=39](http://japanese.stanford.edu/?page_id=39).

**JAPANLNG 103. Third-Year Japanese Language, Culture, and Communication, Third Quarter. 5 Units.**

(Formerly JAPANLNG 119). Continuation of 102. Goal is to express thoughts and opinions in paragraph length in spoken and written forms. Materials include current Japanese media and literature for native speakers of Japanese. Cultural and social topics related to Japan and its people. Prerequisite: 102. See [http://japanese.stanford.edu/?page\\_id=39](http://japanese.stanford.edu/?page_id=39) Prerequisite.

**JAPANLNG 104A. Japanese for Professionals, First Quarter. 3 Units.**

Recommended for students who have the basic grammatical foundation (equivalent to completion of JAPANLNG 14C or 3), and are ready to develop further communication skills in a limited time not only in their field of interest but also in a professional environment. Prerequisite: JAPANLNG 14C, JAPANLNG 3. See [http://japanese.stanford.edu/?page\\_id=223](http://japanese.stanford.edu/?page_id=223).

**JAPANLNG 104B. Japanese for Professionals, Second Quarter. 3 Units.**

Continuation of JAPANLNG 104A. Recommended for students who have the basic grammatical foundation, and are ready to develop further communication skills in a limited time not only in their field of interest but also in a professional environment. Prerequisite: JAPANLNG 104A.

**JAPANLNG 104C. Japanese for Professionals, Third Quarter. 3 Units.**

Continuation of JAPANLNG 104B. Recommended for students who have the basic grammatical foundation, and are ready to develop further communication skills in a limited time not only in their field of interest but also in a professional environment. Prerequisite: JAPANLNG 104B. .

**JAPANLNG 105. Intensive 3rd Year Modern Japanese. 15 Units.**

Equivalent to 101, 102, 103 combined. Prerequisite 20, 23, or, equivalent. Graduate students restricted to 9 units may take the course for 9 units under 405.

**JAPANLNG 111A. Advanced Japanese Conversation, First Quarter. 2 Units.**

(formerly JAPANLNG 121) The J111A, B, & C course sequence is designed for students who wish to advance their speaking skills of the Japanese language to the advanced level. Its goals are to help students gain proficiency and confidence in the use of Japanese and to prepare them for their lifelong study. This is a "students-driven, students-centered" course. The instructor will not "teach." Instead she is there to facilitate interactions and "help the students obtain their goals." Students are expected to come to class with their concrete goals as to what they want to do with their Japanese, and be ready to work hard in class to reach their goals.

**JAPANLNG 111B. Advanced Japanese Conversation, Second Quarter. 2 Units.**

(Formerly JAPANLNG 122.) Continuation of JAPANLNG 111A. The J111A, B, & C course sequence is designed for students who wish to advance their speaking skills of the Japanese language to the advanced level. Its goals are to help students gain proficiency and confidence in the use of Japanese and to prepare them for their lifelong study. This is a "students-driven, students-centered" course. The instructor will not "teach." Instead she is there to facilitate interactions and "help the students obtain their goals." Students are expected to come to class with their concrete goals as to what they want to do with their Japanese, and be ready to work hard in class to reach their goals.

**JAPANLNG 111C. Advanced Japanese Conversation, Third Quarter. 2 Units.**

(Formerly JAPANLNG 123.) Continuation of JAPANLNG 111B. The J111A, B, & C course sequence is designed for students who wish to advance their speaking skills of the Japanese language to the advanced level. Its goals are to help students gain proficiency and confidence in the use of Japanese and to prepare them for their life-long study. This is a "students-driven, students-centered" course. The instructor will not "teach." Instead she is there to facilitate interactions and "help the students obtain their goals." Students are expected to come to class with their concrete goals as to what they want to do with their Japanese, and be ready to work hard in class to reach their goals.

**JAPANLNG 113F. Japanese Through Film, First Quarter. 2-4 Units.**

Contemporary Japanese culture through Japanese films, documentaries, TV dramas, and animes. Structured for students with a strong desire to advance their Japanese language skills and who have limited class preparation time. Students will engage in in-depth discussion and exploration of social and cultural issues, expand the repertoire of vocabulary, and practice on advanced language skills. Topics may vary depending on student interests. Prerequisite: JAPANLNG 23. See <http://japanese.stanford.edu/>.

**JAPANLNG 114F. Japanese Through Film, Second Quarter. 2-4 Units.**

Contemporary Japanese culture through Japanese films, documentaries, TV dramas, and animes. Structured for students with a strong desire to advance their Japanese language skills and who have limited class preparation time. Students will engage in in-depth discussion and exploration of social and cultural issues, expand the repertoire of vocabulary, and practice on advanced language skills. Topics may vary depending on student interests. Prerequisite: JAPANLNG 23. See <http://japanese.stanford.edu/>.

**JAPANLNG 115F. Japanese Through Film, Third Quarter. 2-4 Units.**

Contemporary Japanese culture through Japanese films, documentaries, TV dramas, and animes. Structured for students with a strong desire to advance their Japanese language skills and who have limited class preparation time. Students will engage in in-depth discussion and exploration of social and cultural issues, expand the repertoire of vocabulary, and practice on advanced language skills. Topics may vary depending on student interests. Prerequisite: JAPANLNG 23.

**JAPANLNG 200. Directed Reading. 1-5 Unit.**

Prerequisite: 213 and consent of instructor.

**JAPANLNG 211. Fourth-Year Japanese, First Quarter. 3-5 Units.**

Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: JAPANLNG 103. See [http://japanese.stanford.edu/?page\\_id=263](http://japanese.stanford.edu/?page_id=263).

**JAPANLNG 212. Fourth-Year Japanese, Second Quarter. 3-5 Units.**

Continuation of JAPANLNG 211. Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: JAPANLNG 211. See [http://japanese.stanford.edu/?page\\_id=263](http://japanese.stanford.edu/?page_id=263).

**JAPANLNG 213. Fourth-Year Japanese, Third Quarter. 3-5 Units.**

Continuation of JAPANLNG 212. Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: JAPANLNG 212. See [http://japanese.stanford.edu/?page\\_id=263](http://japanese.stanford.edu/?page_id=263).

**JAPANLNG 305. Intensive First-Year Japanese for Stanford Graduate Students. 9 Units.**

Equivalent to 3 quarters of JAPANLNG 1, 2, and 3 combined. Same as JAPANLNG nn5. Stanford Grads only. [http://japanese.stanford.edu/?page\\_id=323](http://japanese.stanford.edu/?page_id=323).nnSum.

**JAPANLNG 320. Intensive Second-Year Japanese for Stanford Graduate Students. 9 Units.**

Equivalent to 21, 22, 23 combined or 20. Stanford Grads only. See [http://japanese.stanford.edu/?page\\_id=323](http://japanese.stanford.edu/?page_id=323).

**JAPANLNG 331E. Accelerated Beginning Japanese for Engineering Students, First Quarter. 1-4 Unit.**

Restricted to engineering students participating in the School of Engineering Japan Internship Program.

**JAPANLNG 394. Graduate Studies in Japanese Conversation. 1-3 Unit.**

Prerequisite: consent of instructor. (Staff).

**JAPANLNG 395. Graduate Studies in Japanese. 1-5 Unit.**

Prerequisite: consent of instructor. (Staff).

**JAPANLNG 405. Intensive third Year Japanese for Graduate Students. 9 Units.**

Equivalent to 101, 102, and 103 combined or 105. Prerequisite 23 or 20. For Stanford grads only.

**Japanese Literature Courses****JAPANLIT 146. Introduction to Premodern Japanese. 3-5 Units.**

Readings from Heian, Kamakura, Muromachi, and early Edo periods with focus on grammar and reading comprehension. Prerequisite: JAPANLNG 129B or 103, or equivalent.

Same as: JAPANLIT 246

**JAPANLIT 157. Points in Japanese Grammar. 2-4 Units.**

Meaning and grammatical differences of similar expressions, and distinctions that may not be salient in English. Prerequisite: JAPANLNG 18B or 22, or equivalent.

Same as: JAPANLIT 257

**JAPANLIT 170. The Tale of Genji and Its Historical Reception. 4 Units.**

Approaches to the tale including 12th-century allegorical and modern feminist readings. Influence upon other works including poetry, Noh plays, short stories, modern novels, and comic book (manga) retellings. Prerequisite for graduate students: JAPANLNG 129B or 103, or equivalent.

Same as: JAPANLIT 270

**JAPANLIT 181. Japanese Pragmatics. 2-4 Units.**

The choice of linguistic expressions and our understanding of what is said involve multiple sociocultural, cognitive and discourse factors. Can such pragmatic factors and processes be considered universal to all languages, or are there variations among languages? The course will investigate an array of phenomena observed in Japanese. Through readings and projects, students will deepen their knowledge of Japanese and consider theoretical implications. Prerequisites: one year of Japanese and a course in linguistics, or two years of Japanese, or consent of instructor.

Same as: JAPANLIT 281

**JAPANLIT 189A. Honors Research. 2-5 Units.****JAPANLIT 189B. Honors Research. 5 Units.**

Open to senior honors students to write thesis.

**JAPANLIT 199. Individual Reading in Japanese. 1-4 Unit.**

Asian Languages majors only. May be repeated for credit. Prerequisites: JAPANLNG 129B or 103, and consent of instructor.

**JAPANLIT 200. Directed Reading in Japanese. 1-12 Unit.****JAPANLIT 201. Proseminar: Introduction to Graduate Study in Japanese. 2-5 Units.**

Bibliographical and research methods. Major trends in literary and cultural theory and critical practice. May be repeated once for credit. Prerequisite: JAPANLNG 103 or 129B, or consent of instructor.

**JAPANLIT 202. Bibliographic and Research Methods in Japanese. 1-3 Unit.**

The use of library and online resources for the study of Japanese literature, language, and culture. Prerequisite: JAPANLNG 103 or 129B, or consent of instructor.

**JAPANLIT 224. Dramatic Manga. 2-4 Units.**

In depth reading and analysis of so-called "dramatic" or "realistic" manga (gekiga), concentrating on one of the major contributors to that genre (Saito Takao, Tatsumi Yoshihiro, Taniguchi Jiro, Sugiura Hinako, Mase Moto, and others). Readings in Japanese and English translation. Prerequisite: four years of Japanese, or consent of instructor.

**JAPANLIT 235. Academic Readings in Japanese I. 2-4 Units.**

Strategies for reading academic writings in Japanese. Readings of scholarly papers and advanced materials in Japanese in students' research areas in the humanities and social sciences. Prerequisites: JAPANLNG 103, 129B, or equivalent; and consent of instructor.

**JAPANLIT 236. Academic Readings in Japanese II. 2-4 Units.**

Strategies for reading academic writings in Japanese. Readings of scholarly papers and advanced materials in Japanese in students' research areas in the humanities and social sciences. May be taken independently of 264. May be repeated for credit. Prerequisites: JAPANLNG 103, 129B, or equivalent; and consent of instructor.

**JAPANLIT 246. Introduction to Premodern Japanese. 3-5 Units.**

Readings from Heian, Kamakura, Muromachi, and early Edo periods with focus on grammar and reading comprehension. Prerequisite: JAPANLNG 129B or 103, or equivalent.

Same as: JAPANLIT 146

**JAPANLIT 247. Readings in Premodern Japanese. 2-5 Units.**

Edo and Meiji periods with focus on grammar and reading comprehension. May be repeated for credit. Prerequisite: 246 or equivalent.

**JAPANLIT 248. Readings in Classical Japanese. 5 Units.**

Edo and Meiji periods including travel writings, fictions, miscellanies, and poetry. Focus is on grammar, stylistic analysis, and rhetoric. Can be taken independently. Prerequisite: 246.

**JAPANLIT 257. Points in Japanese Grammar. 2-4 Units.**

Meaning and grammatical differences of similar expressions, and distinctions that may not be salient in English. Prerequisite: JAPANLNG 18B or 22, or equivalent.

Same as: JAPANLIT 157

**JAPANLIT 260. Japanese Poetry and Poetics. 2-4 Units.**

Heian through Meiji periods with emphasis on relationships between the social and aesthetic. Works vary each year. This year's genre is the diary. Prerequisites: 246, 247, or equivalent.

**JAPANLIT 266. Introduction to Sino-Japanese. 3-5 Units.**

Readings in Sino-Japanese (*kambun*) texts of the Heian, Kamakura, and Muromachi periods, with focus on grammar and reading comprehension. Prerequisite: 246 or equivalent.

**JAPANLIT 267. Readings in Sino-Japanese. 2-4 Units.**

Readings in Sino-Japanese (*kambun*) texts of the Edo and Meiji periods, with focus on grammar and reading comprehension. Prerequisite: 264 or equivalent.

**JAPANLIT 270. The Tale of Genji and Its Historical Reception. 4 Units.**

Approaches to the tale including 12th-century allegorical and modern feminist readings. Influence upon other works including poetry, Noh plays, short stories, modern novels, and comic book (manga) retellings. Prerequisite for graduate students: JAPANLNG 129B or 103, or equivalent.

Same as: JAPANLIT 170

**JAPANLIT 276. Modern Japanese Short Stories. 2-4 Units.**

This course explores the postwar Japanese short story. We will read representative works by major authors, such as Ishikawa Jun, Hayashi Fumiko, Abe Kobe and Murakami Haruki. Attention will be devoted to both accurate reading of the Japanese prose and more general discussion of the literary features of the texts.

**JAPANLIT 279. Research in Japanese Linguistics. 2-4 Units.**

Introduction to graduate research in Japanese linguistics. Fields of research, methods and bibliographical background. Conduct a pilot research project in a chosen area. May be repeated for credit. Prerequisite: JAPANLNG 119 or consent of instructor.

**JAPANLIT 281. Japanese Pragmatics. 2-4 Units.**

The choice of linguistic expressions and our understanding of what is said involve multiple sociocultural, cognitive and discourse factors. Can such pragmatic factors and processes be considered universal to all languages, or are there variations among languages? The course will investigate an array of phenomena observed in Japanese. Through readings and projects, students will deepen their knowledge of Japanese and consider theoretical implications. Prerequisites: one year of Japanese and a course in linguistics, or two years of Japanese, or consent of instructor.

Same as: JAPANLIT 181

**JAPANLIT 287. Pictures of the Floating World: Images from Japanese Popular Culture. 5 Units.**

Printed objects produced during the Edo period (1600-1868), including the Ukiyo-e (pictures of the floating world) and lesser-studied genres such as printed books (*ehon*) and popular broadsheets (*kawaraban*). How a society constructs itself through images. The borders of the acceptable and censorship; theatricality, spectacle, and slippage; the construction of play, set in conflict against the dominant neo-Confucian ideology of fixed social roles.

Same as: ARTHIST 287, ARTHIST 487X

**JAPANLIT 296. Modern Japanese Literature. 2-5 Units.**

Advanced readings. May be repeated for credit. Prerequisite: JAPANLNG 213. Formerly JAPANLIT 396.

**JAPANLIT 298. The Theory and Practice of Japanese Literary Translation. 2-5 Units.**

Theory and cultural status of translation in modern Japanese and English. Comparative analysis of practical translation strategies. Final project is a literary translation of publishable quality. Prerequisite: fourth-year Japanese or consent of instructor.

**JAPANLIT 299. Master's Thesis or Translation. 1-5 Unit.**

A total of 5 units, taken in one or more quarters. (Staff).

**JAPANLIT 350. Japanese Historical Fiction. 3-5 Units.**

Authors include Mori Ogai, Akutagawa Ryunosuke, Tanizaki Jun'ichiro, Enchi Fumiko, Shiba Ryotaro, Fujisawa Shuhei, and Hiraiwa Yumie. Genre theory, and historical and cultural context. Works vary each year. May be repeated for credit.

**JAPANLIT 377. Seminar: Structure of Japanese. 2-4 Units.**

Linguistic constructions in Japanese. Topics vary annually. In 2009-10, focus is on noun-modifying constructions in Japanese from multiple perspectives including syntax, semantics, pragmatics, and acquisition. Contrasts with similar constructions in other languages. Typological implications. Prerequisites: courses in Japanese linguistics, consent of instructor.

**JAPANLIT 381. Topics in Pragmatics and Discourse Analysis. 2-4 Units.** Naturally occurring discourse (conversational, narrative, or written) and theoretical implications. Discourse of different age groups, expressions of identity and persona, and individual styles. May be repeated for credit.

**JAPANLIT 382. Research Projects in Japanese Linguistics. 2-5 Units.** For advanced graduate students with specific research projects in Japanese linguistics. Consent of instructor required.

**JAPANLIT 395. Early Modern Japanese Literature. 2-4 Units.** May be repeated for credit. Prerequisite: 247.

**JAPANLIT 396. Modern Japanese Literature Seminar. 2-5 Units.** Works and topics vary each year. May be repeated for credit. Prerequisite: fourth-year Japanese or consent of instructor.

**JAPANLIT 399. Dissertation Research. 1-12 Unit.** For doctoral students in Japanese working on dissertations.

**JAPANLIT 801. TGR Project. 0 Units.**

**JAPANLIT 802. TGR Dissertation. 0 Units.**

## Jewish Studies Courses

**JEWISHST 4N. A World History of Genocide. 3-5 Units.** Reviews the history of genocide from ancient times until the present. Defines genocide, both in legal and historical terms, and investigates its causes, consequences, and global dimensions. Issues of prevention, punishment, and interdiction. Main periods of concern are the ancient world, Spanish colonial conquest; early modern Asia; settler genocides in America, Australia, and Africa; the Armenian genocide and the Holocaust; genocide in communist societies; and late 20th century genocide. Same as: HISTORY 4N

**JEWISHST 5. Biblical Greek. 3-5 Units.** (Formerly CLASSGRK 5.) This is a one term intensive class in Biblical Greek. After quickly learning the basics of the language, we will then dive right into readings from the New Testament and the Septuagint, which is the ancient Greek translation of the Hebrew Bible. No previous knowledge of Greek required. If demand is high for a second term, an additional quarter will be offered in the Spring. Same as: CLASSICS 6G, RELIGST 171A

**JEWISHST 5B. Biblical Greek. 3-5 Units.** (Formerly CLASSGRK 6) This is a continuation of the Winter Quarter Biblical Greek Course. Pre-requisite: CLASSICS 6G (Formerly CLASSGRK 5) or a similar introductory course in Ancient Greek. Same as: CLASSICS 7G

**JEWISHST 5G. Intensive Biblical Greek. 8 Units.** Equivalent to two quarters of Biblical Greek (CLASSICS 6G, 7G). Students will learn the core of New Testament Greek with the goal of learning to accurately translate and read the New Testament. Students will read one-third of the Gospel of John during the course and will be well-prepared to read the Greek New Testament independently after the course. Focus on knowledge of key vocabulary and grammar needed to read the Greek Bible with ease. No previous knowledge of Greek required. Course does not fulfill the Stanford language requirement. Same as: RELIGST 171X

**JEWISHST 17N. Intimacy, Secrets and the Past: Biography in History and Fiction. 3-4 Units.**

Biography is one of the most popular- and controversial- modes of writing about the past and perhaps its greatest draw is in its promise to reveal the otherwise sequestered details of life, its everyday secrets otherwise sequestered from view. This, of course, is also at the heart of most modern fiction, and the two modes of writing have many other similarities as well as, needless to say, differences. The rhythms of life writing in biography as well as fiction will be explored in this class, along with the difficulties (factual, ethical, and otherwise) of ferreting out the secrets of individual lives. Among the figures explored in the course will be Sigmund Freud, Sabina Spielrein, Sylvia Plath, Hannah Arendt, and Woody Allen. Same as: HISTORY 17N

**JEWISHST 18N. Religion and Politics: Comparing Europe to the U.S.. 3-4 Units.**

Interdisciplinary and comparative. Historical, political, sociological, and religious studies approaches. The relationship between religion and politics as understood in the U.S. and Europe. How this relationship has become tense both because of the rise of Islam as a public religion in Europe and the rising influence of religious groups in public culture. Different understandings and definitions of the separation of church and state in Western democratic cultures, and differing notions of the public sphere. Case studies to investigate the nature of public conflicts, what issues lead to conflict, and why. Why has the head covering of Muslim women become politicized in Europe? What are the arguments surrounding the Cordoba House, known as the Ground Zero Mosque, and how does this conflict compare to controversies about recent constructions of mosques in Europe? Resources include media, documentaries, and scholarly literature. Same as: RELIGST 18N

**JEWISHST 19N. "Land of Milk and Honey": Food, Justice, and Ethnic Identity in Jewish Culture. 3 Units.**

Food is an essential aspect of the human experience. The decisions and choices we make about food define who we have been, who we are now, and who we want to become. This seminar examines Jewish culture and the food practices and traditions that have shaped and continue to shape it. Why has Jewish culture been centered around food practices? How have religious laws and rituals about food and food production shaped Jewish culture and vice versa? Dietary laws prescribe which animals are and are not "kosher" and what can be eaten with them, holidays are celebrated with traditional foods, and regional foods contribute to the formation of distinct Jewish ethnic identities. More recently, American Jews have begun to organize around issues of food justice, and joined the sustainability movement, adapting Jewish traditions about food production into their cause. What is the significance of animal welfare, environmental issues, and labor practices in Jewish culture? This multi-disciplinary seminar explores the connection between food practices and ethnic and religious identity(ies), the history of the dietary laws and their multiple interpretations, the cultural significance of the phenomenal success of kosher certification in the U.S. food market, and the rise of the Jewish food justice movement. These issues raise a multitude of comparative questions, and you are encouraged to engage in research into other religious and ethnic food cultures. Course materials include: biblical and later religious, legal, and philosophical texts; cook-books (as cultural and historical sources); literature (both fiction and academic); films; news media, and food experts. We will visit an urban farming community (Urban Adamah) to learn from those involved in the Jewish sustainability movement. Same as: CSRE 19N, RELIGST 19N

**JEWISHST 37Q. Zionism and the Novel. 4 Units.**

At the end of the nineteenth century, Zionism emerged as a political movement to establish a national homeland for the Jews, eventually leading to the establishment of the State of Israel in 1948. This seminar uses novels to explore the changes in Zionism, the roots of the conflict in the Middle East, and the potentials for the future. We will take a close look at novels by Israelis, both Jewish and Arab, in order to understand multiple perspectives, and we will also consider works by authors from the North America and from Europe.

Same as: COMPLIT 37Q

**JEWISHST 38A. Germany and the World Wars. 3 Units.**

(Same as HISTORY 138A. Majors and others taking 5 units, enroll in 138A.) Germany's tumultuous history from the Second Empire through the end of the Cold War. International conflict, social upheaval, and state transformation during Bismarck's wars of unification, World War One, the Weimar Republic, the rise of Nazism, World War Two, the Holocaust, the division of communist East and capitalist West Germany, and the fall of the Iron Curtain.

Same as: HISTORY 38A

**JEWISHST 71. Jews and Christians: Conflict and Coexistence. 3 Units.**

The relationship between Judaism and Christianity has had a long a controversial history. Christianity originated as a dissident Jewish sect but eventually evolved into an independent religion, with only tenuous ties to its Jewish past and present. At the same time, Judaism has at times considered Christianity a form of idolatry. It seems that only since the catastrophe of the Holocaust, Jews and Christians (Catholics and Protestants) have begun the serious work of forging more meaningful relationships with each other. This course explores the most significant moments, both difficult and conciliatory ones, that have shaped the relationship between Judaism and Christianity, and introduces students to some of the most important literature, art, and music that are part of it. Selected literature: Gospel according Matthew, the letters of St. Paul, St. Augustine, the Talmud (selections), Maimonides, Martin Luther's sermons on the Jews, Nostra Aetate (Vatican II) Art and Music: Medieval art and sculpture, Haendel's Messiah.

Same as: RELIGST 71

**JEWISHST 80T. Jewish Music in the Lands of Islam. 4 Units.**

An Interdisciplinary study of Music, Society, and Culture in communities of the Jewish Diaspora in Islamic countries. The course examines the diverse and rich musical traditions of the Jews in North Africa and the Middle East. Based on the "Maqamat" system, the Arabic musical modes, Jewish music flourished under Islamic rule, encompassing the fields of sacred music, popular songs, and art music. Using musicological, historical, and anthropological tools, the course compares and contrasts these traditions from their original roots through their adaptation, appropriation, and re-synthesis in contemporary art music and popular songs.

Same as: MUSIC 80T

**JEWISHST 84. Zionism and the State of Israel. 3 Units.**

(Same as HISTORY 184. History majors and others taking 5 units, register for 184.) Hotly contested still, this course will open up the movement's ideas, practices, achievements and crises in such a way as to allow students to hear the fullest range of voices - Jewish, Arab, religious, secular, etc. It will track the movement from its appearance in the late nineteenth century until the establishment of State of Israel in 1948, and beyond.

Same as: CSRE 84, HISTORY 84, REES 84

**JEWISHST 85B. Jews in the Contemporary World: Faith and Ethnicity, Visibility and Vulnerability. 3 Units.**

(Same as HISTORY 185B. History majors and others taking 5 units, register for 185B.) This course explores the full expanse of Jewish life today and in the recent past. The inner workings of religious faith, the content of Jewish identity shorn of belief, the interplay between Jewish powerlessness and influence, the myth and reality of Jewish genius, the continued pertinence of antisemitism, the rhythms of Jewish economic life – all these will be examined in weekly lectures, classroom discussion, and with the use of a widely diverse range of readings, films, and other material. Explored in depth will be the ideas and practices of Zionism, the content of contemporary secularism and religious Orthodoxy, the impact Holocaust, the continued crisis facing Israel and the Palestinians. Who is to be considered Jewish, in any event, especially since so many of the best known (Spinoza, Freud, Marx) have had little if anything to do with Jewish life with their relationships to it indifferent, even hostile?.

Same as: CSRE 85B, HISTORY 85B, REES 85B

**JEWISHST 86S. Zionism Considered: Jewish Thinkers and the Quest for a Jewish Home. 5 Units.**

This course examines how Jews have approached Zionism from the mid-nineteenth century until the present day. Focusing on understanding the major divisions within Zionism, a particular emphasis will be on leaders of the various factions, exploring why they believed a Jewish home to be necessary and how such a home was envisioned. Readings will include propaganda, literature, and images, and assignments include short responses, presentations, and a research paper. Priority given to history majors and minors.

Same as: HISTORY 86S

**JEWISHST 101A. First-Year Hebrew, First Quarter. 5 Units.**

Same as: AMELANG 128A

**JEWISHST 101B. First-Year Hebrew, Second Quarter. 5 Units.**

Continuation of AMELANG 128A. Prerequisite: Placement Test, AMELANG 128A.

Same as: AMELANG 128B

**JEWISHST 101C. First-Year Hebrew, Third Quarter. 5 Units.**

Continuation of AMELANG 128B. Prerequisite: Placement Test, AMELANG 128B. Fulfill the University Foreign Language Requirement.

Same as: AMELANG 128C

**JEWISHST 104C. First-Year Yiddish, Third Quarter. 4 Units.**

Continuation of AMELANG 140B. Prerequisite: AMELANG 140B. Fulfills the University Foreign Language Requirement.

Same as: AMELANG 140C

**JEWISHST 105. Hebrew Forum. 2-4 Units.**

Intermediate and advanced level. Biweekly Hebrew discussion on contemporary issues with Israeli guest speakers. Vocabulary enhancement. Focus on exposure to academic Hebrew.

Same as: AMELANG 131B

**JEWISHST 106. Reflection on the Other: The Jew and the Arab in Literature. 3-5 Units.**

How literary works outside the realm of Western culture struggle with questions such as identity, minority, and the issue of the Other. How the Arab is viewed in Hebrew literature, film and music and how the Jew is viewed in Palestinian works in Hebrew or Arabic (in translation to English). Historical, political, and sociological forces that have contributed to the shaping of these writers' views. Guest lectures about the Jew in Palestinian literature and music.

Same as: AMELANG 126, COMPLIT 145

**JEWISHST 107A. Biblical Hebrew, First Quarter. 2 Units.**

Establish a basic familiarity with the grammar and vocabulary of Biblical Hebrew and will begin developing a facility with the language. Students that are enrolled in this course must also enroll in Beginning Hebrew. This course requires no prior knowledge of Hebrew and will begin with learning the alphabet. By the end of the year, students will be able to translate basic biblical texts, will be familiar with common lexica and reference grammars, and will have sufficient foundational knowledge to enable them to continue expanding their knowledge either in a subsequent course or on their own.

Same as: AMELANG 170A, RELIGST 170A

**JEWISHST 107B. Biblical Hebrew, Second Quarter. 2 Units.**

Continuation of 170A.

Same as: AMELANG 170B

**JEWISHST 107C. Biblical Hebrew, Third Quarter. 2 Units.**

Continuation of 170B.

Same as: AMELANG 170C

**JEWISHST 120. Sex and Gender in Judaism and Christianity. 3 Units.**

What role do Jewish and Christian traditions play in shaping understandings of gender differences? Is gender always imagined as dual, male and female? This course explores the variety of ways in which Jewish and Christian traditions - often in conversation with and against each other - have shaped gender identities and sexual politics. We will explore the central role that issues around marriage and reproduction played in this conversation. Perhaps surprisingly, early Jews and Christian also espoused deep interest in writing about 'eunuchs' and 'androgynes,' as they thought about Jewish and Christian ways of being a man or a woman. We will examine the variety of these early conversations, and the contemporary Jewish and Christian discussions of feminist, queer, trans- and intersex based on them.

Same as: FEMGEN 130, RELIGST 130

**JEWISHST 127D. Readings in Talmudic Literature. 1 Unit.**

Readings of the talmudic texts. Some knowledge of Hebrew is preferred. The ongoing seminar is designed to study the making of the talmudic sugya (unit of discourse), along with classic commentaries. Students will consider some of the recent developments in the academic study of Talmudic literature, introduced by the instructor. The goal of the ongoing seminar is to provide Stanford students and faculty with the opportunity to engage in regular Talmud study, and to be introduced to a variety of approaches to studying Talmudic texts. Class meets on Fridays, from 12:00-1:15 pm in Hillel (Koret Pavilion Taube Hillel House; Ziff Center for Jewish Life). May be repeat for credit.

Same as: JEWISHST 227D, RELIGST 170D

**JEWISHST 129. Modern Jewish Thought. 4 Units.**

From 1870 to the late twentieth century, Jewish thought and philosophy attempted to understand Judaism in response to the developments and crises of Jewish life in the modern world. In this course we shall explore the responses of figures such as Martin Buber, Franz Rosenzweig, Hermann Cohen, Abraham Joshua Heschel, Joseph Soloveitchik, Emil Fackenheim, and Emmanuel Levinas. Central topics will concern ethics and politics, faith and revelation, redemption and messianism, and the religious responses to catastrophe and atrocity. We shall discuss Judaism in European culture before and after World War I and in North America in the postwar period and after the Six Day War. A central theme will be the ways in which attempts to understand Jewish experience are related to history.

Same as: RELIGST 129

**JEWISHST 132. Between Nation-Building and Liberalization: The Welfare State in Israel. 3 Units.**

According to one commentator, the political economy of Israel is characterized by embedded illiberalism. In the context of a national and territorial conflict, the Israeli state fostered comprehensive nation-building projects (such as immigration absorption), via employment and social protection schemes. This course surveys the distinctive development of the Israeli welfare state in comparative perspective, and analyzes its particular politics and outcomes in the form of inclusion but also exclusion of different populations from full citizenship. The course will follow a chronological path from the pre-state crystallization of national welfare institutions to the current neo-liberalization trend that seems to undermine collectivist projects and advance the re-commodification of citizenship. Throughout the course we will discuss issues such as: the role of labor and nationalism in the design of social policy, the production of national, ethnic and gender inequality, and the dynamics of change and continuity following heightened liberalization and internationalization since the 1980s. The course exposes students to key issues of the sociology of the welfare state with particular emphasis on the development and role of the state in a deeply conflicted society, using the Israeli experience. At the conclusion of the course students are expected to understand how welfare state institutions reflect but also reproduce societal schisms and conflicts, and be familiar with central aspects of Israeli politics past and present.

Same as: SOC 102

**JEWISHST 132D. Sociology of Jewishness. 3-5 Units.**

Examines the place of the Jewish people in society throughout various locales and historical periods to understand how interactions among Jews and with other groups have shaped Jewish identities. Topics include modernism, the Holocaust, Israel/nationhood, race/ethnicity, intermarriage, and assimilation. Uses theoretical, empirical, and historical material from multiple social scientific fields of study and explores the study of Judaism from several major sociological lenses.

Same as: CSRE 132J, SOC 132J

**JEWISHST 133. Sociology of Citizenship. 3 Units.**

Not only a legal status, citizenship forms a major concern for political sociologists interested in questions of membership, exclusion, redistribution, and struggles over the boundaries of collective identity. Citizenship is in essence membership in a political community that entails rights and duties, and structures a tripartite relationship between the individual, community and state. The institutions of citizenship include formal and bureaucratic rules of eligibility  $\zeta$  but also informal institutions such as identity and belonging. Throughout the course, students are exposed to key issues of the sociology of citizenship such as the historically different paths of men, women, minority groups and immigrants into citizenship, the contested development of rights and duties, the regulation of population, as well as insurgency and collective attempts to rearticulate the terms of the  $\zeta$ contract $\zeta$  with the state. Israel, the USA, France and Germany are used as empirical illustrations. At the conclusion of the course students will know how to utilize the analytic framework of citizenship in order to analyze a wide range of political phenomena in contemporary societies.

Same as: SOC 103

**JEWISHST 138A. Germany and the World Wars. 5 Units.**

(Same as HISTORY 38A. Majors and others taking 5 units, enroll in 138A.) Germany's tumultuous history from the Second Empire through the end of the Cold War. International conflict, social upheaval, and state transformation during Bismarck's wars of unification, World War One, the Weimar Republic, the rise of Nazism, World War Two, the Holocaust, the division of communist East and capitalist West Germany, and the fall of the Iron Curtain.

Same as: HISTORY 138A

**JEWISHST 139. Rereading Judaism in Light of Feminism. 4 Units.**

During the past three decades, Jewish feminists have asked new questions of traditional rabbinic texts, Jewish law, history, and religious life and thought. Analysis of the legal and narrative texts, rituals, theology, and community to better understand contemporary Jewish life as influenced by feminism.

Same as: FEMGEN 139

**JEWISHST 143. Literature and Society in Africa and the Caribbean. 4 Units.**

This course aims to equip students with an understanding of the cultural, political and literary aspects at play in the literatures of Francophone Africa and the Caribbean. Our primary readings will be Francophone novels and poetry, though we will also read some theoretical texts, as well as excerpts of Francophone theater. The assigned readings will expose students to literature from diverse French-speaking regions of the African/Caribbean world. This course will also serve as a "literary toolbox," with the intention of facilitating an understanding of literary forms, terms and practices. Students can expect to work on their production of written and spoken French (in addition to reading comprehension) both in and outside of class. Required readings include: Aimé Césaire, "Cahier d'un retour au pays natal," Albert Memmi, "La Statue de Sel," Kaouther Adimi, "L'envers des autres", Maryse Condé, "La Vie sans fards". Movies include "Goodbye Morocco", "Aya de Yopougon", "Rome plutôt sue Vous". Taught in French. Prerequisite: FRENLANG 124 or consent of instructor.

Same as: AFRICAAM 133, FRENCH 133

**JEWISHST 144B. Poetic Thinking Across Media. 4 Units.**

Even before Novalis claimed that the world must be romanticized, thinkers, writers, and artists wanted to perceive the human and natural world poetically. The pre- and post-romantic poetic modes of thinking they created are the subject of this course. Readings include Ecclesiastes, Zhaozhou Congshen, Montaigne, Nietzsche, Kafka, Benjamin, Arendt, and Sontag. This course will also present poetic thinking in the visual arts—from the expressionism of Ingmar Bergman to the neo-romanticism of Gerhard Richter.

Same as: COMPLIT 154B, COMPLIT 354B, GERMAN 154, GERMAN 354

**JEWISHST 145. Masterpieces: Kafka. 3-5 Units.**

This class will address major works by Franz Kafka and consider Kafka as a modernist writer whose work reflects on modernity. We will also examine the role of Kafka's themes and poetics in the work of contemporary writers.

Same as: COMPLIT 114, GERMAN 150

**JEWISHST 146. Co-Existence in Hebrew Literature. 4-5 Units.**

Is co-existence possible? Does pluralism require co-existence? Can texts serve as forms of co-existence? The class will focus on these and other questions related to coexistence and literature. Through reading works mostly by Jewish authors writing in Europe, Israel and the US we will explore attempts for complete equality, for a variety of hierarchical systems and for different kinds of co-dependence. Guest speaker: professor Anat Weisman, Ben Gurion University of the Negev.

Same as: AMELANG 175, COMPLIT 161

**JEWISHST 147. German Capstone: Reading Franz Kafka. 3-5 Units.**

This class will address major works by Franz Kafka and consider Kafka as a modernist writer whose work reflects on modernity. We will also examine the role of Kafka's themes and poetics in the work of contemporary writers. (Meets Writing-in-the-Major requirement).

Same as: COMPLIT 111, COMPLIT 311C, GERMAN 190, GERMAN 390, JEWISHST 349

**JEWISHST 147A. The Hebrew Bible in Literature. 3-5 Units.**

Close reading of major biblical stories and poems that influenced modern literature written in English and Hebrew. Hebrew texts will be read in translation to English. Each class will include a section from the Hebrew Bible as well as a modern text or film based on the biblical story/poem. Discussion of questions such as: the meaning and function of myths and the influence of the Hebrew Bible on the development of literary styles and genres.

Same as: COMPLIT 147A, COMPLIT 347A, JEWISHST 347A

**JEWISHST 148. Writing Between Languages: The Case of Eastern European Jewish Literature. 3-5 Units.**

Eastern European Jews spoke and read Hebrew, Yiddish, and their co-territorial languages (Russian, Polish, etc.). In the modern period they developed secular literatures in all of them, and their writing reflected their own multilinguality and evolving language ideologies. We focus on major literary and sociolinguistic texts. Reading and discussion in English; students should have some reading knowledge of at least one relevant language as well.

Same as: JEWISHST 348, SLAVIC 198, SLAVIC 398

**JEWISHST 155D. Jewish American Literature. 5 Units.**

A study of Jewish-American literature from its Russian roots into the present. What distinguishes it from American mainstream and minority literatures? We will consider the difficulties of displacement for the emigrant generation who struggled to sustain their cultural integrity in the multicultural American environment, and the often comic revolt of their American-born children and grandchildren against their grand)parents $\zeta$  nostalgia, trauma, and failure to assimilate.

Authors: Gogol, Dostoevsky, Babel, Olsen, Paley, Yezierska, Ozick, Singer, Malamud, Spiegelman, Roth, Bellow, Segal, Baldwin.

Same as: ENGLISH 145D, REES 145D

**JEWISHST 183. The Holocaust. 4 Units.**

The emergence of modern racism and radical anti-Semitism. The Nazi rise to power and the Jews. Anti-Semitic legislation in the 30s. WW II and the beginning of mass killings in the East. Deportations and ghettos. The mass extermination of European Jewry.

Same as: HISTORY 137, HISTORY 337, JEWISHST 383

**JEWISHST 184. Zionism and the State of Israel. 5 Units.**

(Same as History 84.) Hotly contested still, this course will open up the movement's ideas, practices, achievements and crises in such a way as to allow students to hear the fullest range of voices - Jewish, Arab, religious, secular, etc. It will track the movement from its appearance in the late nineteenth century until the establishment of State of Israel in 1948, and beyond.

Same as: CSRE 184C, HISTORY 184, REES 184

**JEWISHST 185B. Jews in the Contemporary World: Faith and Ethnicity, Vulnerability and Visibility. 5 Units.**

This course explores the full expanse of Jewish life today and in the recent past. The inner workings of religious faith, the content of Jewish identity shorn of belief, the interplay between Jewish powerlessness and influence, the myth and reality of Jewish genius, the continued pertinence of antisemitism, the rhythms of Jewish economic life & all these will be examined in weekly lectures, classroom discussion, and with the use of a widely diverse range of readings, films, and other material. Explored in depth will the ideas and practices of Zionism, the content of contemporary secularism and religious Orthodoxy, the impact Holocaust, the continued crisis facing Israel and the Palestinians. Who is to be considered Jewish, in any event, especially since so many of the best known (Spinoza, Freud, Marx) have had little if anything to do with Jewish life with their relationships to it indifferent, even hostile?

Same as: CSRE 185B, HISTORY 185B, HISTORY 385C, REES 185B

**JEWISHST 199B. Directed Reading in Yiddish, Second Quarter. 1-5 Unit.**

For intermediate or advanced students. May be repeated for credit.

**JEWISHST 205. Reading Hebrew, First Quarter. 2-4 Units.**

Introduction to Hebrew literature through short stories and poetry by notable Israeli writers. In Hebrew. Prerequisite: one year of Hebrew or equivalent.

Same as: AMELANG 250A

**JEWISHST 221D. Readings in Syriac Literature. 2-5 Units.**

In recent years, there has been growing interest in the works of Syriac speaking Christians in antiquity and beyond. This course offers an introduction to the Syriac language, including its script, vocabulary and grammar, and a chance to read from a selection of foundational Syriac Christian texts.

Same as: JEWISHST 321D, RELIGST 221D, RELIGST 321D

**JEWISHST 224. Emmanuel Levinas: Ethics, Philosophy and Religion. 4 Units.**

Emmanuel Levinas (1906-1995) is a major French philosopher of the second half of the twentieth century and is among the half-dozen most important Jewish thinkers of the century. Born in Lithuania, Levinas lived most of his life in France; he was primarily a philosopher but also a deeply committed Jewish educator who often lectured and wrote about Judaism and Jewish matters. Levinas was influenced by Bergson, Husserl, Heidegger, and others, like Buber and Rosenzweig. We will look at the philosophical world in which he was educated and explore his unique development as a philosopher in the years after World War Two. Levinas reacted against the main tendencies of Western philosophy and religious thought and as a result shaped novel, powerful, and challenging ways of understanding philosophy, religion, ethics, and politics. In this course, we will examine works from every stage of Levinas's career, from his early study of Husserl and Heidegger to the emergence of his new understanding of the human condition and the primacy of ethics, the face-to-face encounter with the human other, the role of language and the relationship between ethics and religion, and finally his understanding of Judaism and its relationship to Western philosophy. We will be interested in his philosophical method, the relevance of his thinking for ethics and religion, the role of language in his philosophy and the problem of the limits of expressibility, and the implications of his work for politics. We shall also consider his conception of Judaism, its primary goals and character, and its relation to Western culture and philosophy.

Same as: JEWISHST 324, RELIGST 234, RELIGST 334

**JEWISHST 227D. Readings in Talmudic Literature. 1 Unit.**

Readings of the talmudic texts. Some knowledge of Hebrew is preferred. The ongoing seminar is designed to study the making of the talmudic sugya (unit of discourse), along with classic commentaries. Students will consider some of the recent developments in the academic study of Talmudic literature, introduced by the instructor. The goal of the ongoing seminar is to provide Stanford students and faculty with the opportunity to engage in regular Talmud study, and to be introduced to a variety of approaches to studying Talmudic texts. Class meets on Fridays, from 12:00-1:15 pm in Hillel (Koret Pavilion Taube Hillel House; Ziff Center for Jewish Life). May be repeat for credit.

Same as: JEWISHST 127D, RELIGST 170D

**JEWISHST 237. Religion and Politics: A Threat to Democracy?. 4-5 Units.**

The meddling of religion in politics has become a major global issue. Can religion co-exist with politics in a democracy? In Israel this is an acute issue exhibiting an existential question: To what extent religion is a source of the weaknesses and vulnerabilities of Israeli Democracy? This seminar is meant to be a research workshop, part of a policy-oriented applied research in motion, aimed at developing detailed strategies for alleviating the tensions and conflicts that stem from the role of religion in politics in Israel. The proposed research seminar will be directed toward constructing both the infrastructure and framework for the comparative dimension of the programmatic study. The seminar will include unique opportunities for hands-on, team-based research.

Same as: IPS 237

**JEWISHST 242. Beyond Casablanca: North African Cinema and Literature. 3-5 Units.**

This course explores the emergence of Francophone cinema and literature from North Africa (Algeria, Tunisia, Morocco) in the post-independence era: aesthetics, exile, language métissage, race and gender relations, collective memory, parallax, nationalism, laïcité, religion, emigration and immigration, and the Arab Spring will be covered. Special attention will be given to judeo-maghrebi history, and to the notions of francophone / maghrebi / "beur" / diasporic cinema and literature. Readings from Frantz Fanon, Albert Memmi, Kateb Yacine, Albert Camus, Colette Fellous, Abdelkebir Khatibi, Leila Sebbar, Benjamin Stora, Lucette Valensi, Abdelwahab Meddeb. Movies include Viva Laldjérie, Tenja, Le Chant des Mariées, Française, Bled Number One, Omar Gatlato, Casanegra, La Saison des Hommes. Taught in French. Films in French and Arabic with English subtitles.

Same as: COMPLIT 247F, FRENCH 242

**JEWISHST 243. Masterpieces of Hebrew Literature from the Bible to the Present. 3-5 Units.**

This course presents and reflects on some of the canonical works of Hebrew literature, from biblical era to the present. Discussing works such as the Wisdom Books and selections from the Midrash; and reflecting on important periods such as the Golden Age of Jewish Culture in Spain, the Renaissance, and contemporary Israeli literature, we will highlight linguistic innovation, as well as crucial thematic and philosophical concerns. Readings include the Book of Job, Psalm, Ibn Gabirol, Mapu, Rachel, Goldbegr, Agnon, S. Yizhar, Amichai, Oz and more.

Same as: COMPLIT 283

**JEWISHST 271C. Campaigns and Elections in Israel. 5 Units.**

Employing a theoretical and comparative framework, this seminar focuses on campaigns and elections in Israel. The seminar is divided into two interrelated sections. In the first section, we will cover voting behavior. Here we will look at Israel's election laws, its political culture, socialization and cleavages, turnout, political sophistication, ideology, partisanship and issue voting. In the second half of the semester we will examine elections from the perspective of candidates and campaign strategists. The topics we will focus on include election laws, public and private campaign finance, campaign strategy, media, polling, and advertising. In examining these topics, we will cover a variety of elections campaigns since Israel's birth, with an emphasis on the most recent ones.

Same as: POLISCI 241C

**JEWISHST 275D. Special Topics: Dilemmas of Democracy and Security in Israel and the Middle East. 5 Units.**

The Middle East is known to be a volatile region, characterized by political violence, armed conflicts, and social instabilities. This volatility is of relevance for many countries including the US with its invested interests in the region and Israel that exists at the heart of the region, and along with its conflict with the Palestinians is considered to be one of the root causes of this volatility. Moreover, the volatility brings into encounter two kinds of collective goods: democracy and security. Their encounter in a conflictual and unstable environment raises a host of questions and dilemmas, both moral and practical: should we balance democracy and security and if so how? Can the two be accommodated at all? Does democracy is better or worse in addressing security problems? Does democracy and security constitute each other conceptually? Do democratic states tend to cooperate with each other when confronting security issues? And what about democratization: how good a cause is it as a foreign policy? How good a cause is it in justifying war and/or not ending one? From its establishment the State of Israel found itself torn by these and others related questions and the recent decades saw the US drawn by these dilemmas as well (think of the Bybee Memo and the Patriot acts). In the course we will introduce these dilemmas, analyze them and examine different normative and policy answers that were discussed in academia and in the policy world.

Same as: POLISCI 215D

**JEWISHST 279P. Introduction to Israeli Politics. 5 Units.**

This course aims to introduce students to Israel's political system and its major actors. We will survey Israel's political landscape, both chronologically and thematically, covering the major issues and conflicts which have dominated Israeli politics since its inception.

Same as: INTNLREL 163, POLISCI 249P

**JEWISHST 282. Circles of Hell: Poland in World War II. 5 Units.**

Looks at the experience and representation of Poland's wartime history from the Nazi-Soviet Pact (1939) to the aftermath of Yalta (1945). Examines Nazi and Soviet ideology and practice in Poland, as well as the ways Poles responded, resisted, and survived. Considers wartime relations among Polish citizens, particularly Poles and Jews. In this regard, interrogates the traditional self-characterization of Poles as innocent victims, looking at their relationship to the Holocaust, thus engaging in a passionate debate still raging in Polish society.

Same as: HISTORY 228, HISTORY 328, JEWISHST 382

**JEWISHST 283D. The Holocaust in Recent Memory: Conflicts - Commemorations - Challenges. 5 Units.**

This course offers an in-depth approach to the study of the Holocaust as a historical point of reference for European memory, or for the memory cultures of European nations, where the international context in particular the USA and Israel will also be taken into consideration. The starting point is the transformations in Holocaust memory: after 1945, in the era of European postwar myths, the Holocaust was on the periphery of historical thinking, of scholarly and public interest. Today the Holocaust is acknowledged as a 'break in civilization', a watershed event in human history. This approach has only evolved since the 1980s.

Same as: HISTORY 203D, HISTORY 303D, JEWISHST 383D

**JEWISHST 284C. Genocide and Humanitarian Intervention. 3 Units.**

Open to medical students, graduate students, and undergraduate students. Traces the history of genocide in the 20th century and the question of humanitarian intervention to stop it, a topic that has been especially controversial since the end of the Cold War. The pre-1990s discussion begins with the Armenian genocide during the First World War and includes the Holocaust and Cambodia under the Khmer Rouge in the 1970s. Coverage of genocide and humanitarian intervention since the 1990s includes the wars in Bosnia, Rwanda, Kosovo, the Congo and Sudan.

Same as: HISTORY 224C, HISTORY 324C, JEWISHST 384C, PEDS 224

**JEWISHST 286. Jews Among Muslims in Modern Times. 4-5 Units.**

The history of Jewish communities in the lands of Islam and their relations with the surrounding Muslim populations from the time of Muhammad to the 20th century. Topics: the place of Jews in Muslim societies, Jewish communal life, variation in the experience of communities in different Muslim lands, the impact of the West in the Modern period, the rise of nationalisms, and the end of Jewish life in Muslim countries.

Same as: HISTORY 286, HISTORY 386, JEWISHST 386

**JEWISHST 287S. Research Seminar in Middle East History. 4-5 Units.**

Student-selected research topics.

Same as: HISTORY 481, JEWISHST 481

**JEWISHST 288. Palestine and the Arab-Israeli Conflict. 4-5 Units.**

This course examines some salient issues of the Israeli-Palestinian conflict from the late 19th century to the present. At the end of the course you should be able to articulate the positions of the major parties to the conflict, with the understanding that there is no single, unified Zionist (or Jewish) or Palestinian (or Arab) position. One quarter does not allow sufficient time to cover even all of the important topics comprehensively (for example, the role of the Arab states, the USA and the USSR, and the internal history of Israel receive less attention than is desirable). Some prior knowledge of Middle East history is desirable, but not required. Vigorous debate and criticism are strongly encouraged. Criticism and response expressed in a civil tone is an important way to get a fuller and more truthful picture of something. This is not only a fundamental democratic right and a basic citizenship skill, but it is essential to interpreting information and making good policy. Rights not used are easily lost.

Same as: HISTORY 288, HISTORY 388, JEWISHST 388

**JEWISHST 291X. Knowing God: Learning Religion in Popular Culture. 4 Units.**

This course will examine how people learn religion outside of school, and in conversation with popular cultural texts and practices. Taking a broad social-constructivist approach to the variety of ways people learn, this course will explore how people assemble ideas about faith, identity, community, and practice, and how those ideas inform individual, communal and global notions of religion. Much of this work takes place in formal educational environments including missionary and parochial schools, Muslim madrasas or Jewish yeshivot. However, even more takes place outside of school, as people develop skills and strategies in conversation with broader social trends. This course takes an interdisciplinary approach to questions that lie at the intersection of religion, popular culture, and education.

Same as: AMSTUD 231X, EDUC 231, RELIGST 231X

**JEWISHST 297X. American Jewish History: Learning to be Jewish in America. 2-4 Units.**

This course will be a seminar in American Jewish History through the lens of education. It will address both the relationship between Jews and American educational systems, as well as the history of Jewish education in America. Plotting the course along these two axes will provide a productive matrix for a focused examination of the American Jewish experience. History students must take course for at least 3 units.

Same as: AMSTUD 279X, EDUC 279, HISTORY 288D, RELIGST 279X

## Korean General Courses

**KORGEN 101. Kangnam Style: Korean Media and Pop Culture. 4 Units.**

For over a decade now, South Korea has established itself as a tireless generator of soft power, the popularity of its pop-culture spreading from Asia to the rest of the world. This class will look into the economic engine that moves this "cultural contents" industry, and will examine some of its expressions in the form of K-pop, soap operas, tourism, food, sports, and fashion in order to illuminate the ways in which Korean culture is being (self-)narrated and consumed in this era of globalization of the 21st century.

Same as: KORGEN 201

**KORGEN 101N. Kangnam Style: Korean Media and Pop Culture. 4 Units.**

For over a decade now, South Korea has established itself as a tireless generator of soft power, the popularity of its pop-culture spreading from Asia to the rest of the world. This class will look into the economic engine that moves this "cultural contents" industry, and will examine some of its expressions in the form of K-pop. Class meets in East Asia Library (Lathrop Library), Rm 338.

**KORGEN 120. Narratives of Modern and Contemporary Korea. 4-5 Units.**

This introductory survey will examine the development of South and North Korean literature from the turn of the 20th century until the present. The course will be guided by historical and thematic inquiries as we explore literature in the colonial period, in the period of postwar industrialization, and contemporary literature from the last decade. We will supplement our readings with critical writing about Korea from the fields of cultural studies and the social sciences in order to broaden the terms of our engagement with our primary texts.

Same as: KORGEN 220

**KORGEN 121. Doing the Right Thing: Ethical Dilemmas in Korean Film. 3-4 Units.**

Ethics and violence seem to be contradictory terms, yet much of Korean film and literature in the past five decades has demonstrated that they are an intricate and in many ways justifiable part of the fabric of contemporary existence. Film exposes time and again the complex ways in which the supposed vanguards of morality, religious institutions, family, schools, and the state are sites of condoned transgression, wherein spiritual and physical violation is inflicted relentlessly. This class will explore the ways in which questions about Truth and the origins of good and evil are mediated through film in the particular context of the political, social, and economic development of postwar South Korea. Tuesday classes will include a brief introduction followed by a film screening that will last on average for two hours; students that are unable to stay until 5 pm will be required to watch the rest of the film on their own.

Same as: KORGEN 221

**KORGEN 122. Translating Cool: Globalized Popular Culture in Asia. 3-4 Units.**

Did you grow up watching Pokémon and Power Rangers? Have you danced along to "Gangnam Style"? As we become increasingly exposed to Asian popular culture and the Internet facilitates instant access to new media, previous localized forms of entertainment—animated cartoons, comics, video games, music videos, film, and soap operas—have become part of a global staple. However, these cultural forms have emerged not only in their original form with mediation of subtitles. Many have undergone various processes of adaptation and translation so that we no longer recognize that these products had ever originated elsewhere. This course will immerse students in a range of Japanese and Korean cultural phenomena to reveal the spectrum of translation practices across national boundaries. We will inquire into why these cultural forms have such compelling and powerful staying power, contextualize them within their frames of production, and explore the strategies, limitations, and potential of translational practices. Contact instructor for place. dafnazur@stanford.edunKnight 201.

Same as: JAPANGEN 122, JAPANGEN 222

**KORGEN 140. Childhood and Children: Culture in East Asia. 3-5 Units.**

Literature for children often reflects society's deepest-held convictions and anxieties, and is therefore a critical site for the examination of what is deemed to be the most imperative knowledge for the young generation. In this respect, the analysis of both texts and visual culture for children, including prose, poetry, folk tales, film, and picture books illuminates prevalent discourses of national identity, family, education and gender. Through an examination of a diverse range of genres and supported by the application of literary theories, students will obtain an understanding, in broad strokes, of the birth of childhood and the emergence of children's literature of China, Korea and Japan from the turn of the century until the present.

Same as: KORGEN 240

**KORGEN 198. Senior Colloquium in Japanese Studies. 1 Unit.**

Research, write, and present capstone essay or honors thesis.

Same as: JAPANGEN 198

**KORGEN 200. Directed Reading. 1-12 Unit.**

Directed Reading in Korean Studies.

**KORGEN 201. Kangnam Style: Korean Media and Pop Culture. 4 Units.**

For over a decade now, South Korea has established itself as a tireless generator of soft power, the popularity of its pop-culture spreading from Asia to the rest of the world. This class will look into the economic engine that moves this "cultural contents" industry, and will examine some of its expressions in the form of K-pop, soap operas, tourism, food, sports, and fashion in order to illuminate the ways in which Korean culture is being (self-)narrated and consumed in this era of globalization of the 21st century.

Same as: KORGEN 101

**KORGEN 220. Narratives of Modern and Contemporary Korea. 4-5 Units.**

This introductory survey will examine the development of South and North Korean literature from the turn of the 20th century until the present. The course will be guided by historical and thematic inquiries as we explore literature in the colonial period, in the period of postwar industrialization, and contemporary literature from the last decade. We will supplement our readings with critical writing about Korea from the fields of cultural studies and the social sciences in order to broaden the terms of our engagement with our primary texts.

Same as: KORGEN 120

**KORGEN 221. Doing the Right Thing: Ethical Dilemmas in Korean Film. 3-4 Units.**

Ethics and violence seem to be contradictory terms, yet much of Korean film and literature in the past five decades has demonstrated that they are an intricate and in many ways justifiable part of the fabric of contemporary existence. Film exposes time and again the complex ways in which the supposed vanguards of morality, religious institutions, family, schools, and the state are sites of condoned transgression, wherein spiritual and physical violation is inflicted relentlessly. This class will explore the ways in which questions about Truth and the origins of good and evil are mediated through film in the particular context of the political, social, and economic development of postwar South Korea. Tuesday classes will include a brief introduction followed by a film screening that will last on average for two hours; students that are unable to stay until 5 pm will be required to watch the rest of the film on their own.

Same as: KORGEN 121

**KORGEN 240. Childhood and Children: Culture in East Asia. 3-5 Units.**

Literature for children often reflects society's deepest-held convictions and anxieties, and is therefore a critical site for the examination of what is deemed to be the most imperative knowledge for the young generation. In this respect, the analysis of both texts and visual culture for children, including prose, poetry, folk tales, film, and picture books illuminates prevalent discourses of national identity, family, education and gender. Through an examination of a diverse range of genres and supported by the application of literary theories, students will obtain an understanding, in broad strokes, of the birth of childhood and the emergence of children's literature of China, Korea and Japan from the turn of the century until the present.

Same as: KORGEN 140

**KORGEN 402T. Entrepreneurship in Asian High-Tech Industries. 1 Unit.**

Distinctive patterns and challenges of entrepreneurship in Asia; update of business and technology issues in the creation and growth of start-up companies in major Asian economies. Distinguished speakers from industry, government, and academia. Course may be repeated for credit.

Same as: CHINGEN 402T, EE 402T, JAPANGEN 402T

**Korean Language Courses****KORLANG 1. First-Year Korean, First Quarter. 5 Units.**

Communication skills, vocabulary, and grammar patterns. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language.

**KORLANG 1H. Beginning Korean for Heritage Learners, First Quarter. 3 Units.**

For students with previous knowledge of Korean or a strong background in listening and speaking. Focus is on reading, writing, and spelling rather than speaking and listening. Sources include textbook, workbook, and digitized listening materials.

**KORLANG 2. First-Year Korean, Second Quarter. 5 Units.**

Continuation of KORLANG 1. Communication skills, vocabulary, and grammar patterns. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language. Prerequisite: Placement Test, KORLANG 1.

**KORLANG 2H. Beginning Korean for Heritage Learners, Second Quarter. 3 Units.**

Continuation of KORLANG 1H. For students with previous knowledge of Korean or a strong background in listening and speaking. Focus is on reading, writing, and spelling rather than speaking and listening. Sources include textbook, workbook, and digitized listening materials. Prerequisite: KORLANG 1H.

**KORLANG 3. First-Year Korean, Third Quarter. 5 Units.**

Continuation of KORLANG 2. Communication skills, vocabulary, and grammar patterns. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language. Prerequisite: Placement Test, KORLANG 2. Fulfills the University language requirement.

**KORLANG 3H. Beginning Korean for Heritage Learners, Third Quarter. 3 Units.**

Continuation of KORLANG 2H. For students with previous knowledge or a strong background in listening and speaking. Focus is on reading, writing, and spelling rather than speaking and listening. Sources include textbook, workbook, and digitized listening materials. Prerequisite: KORLANG 2H. Fulfills University Language requirement.

**KORLANG 21. Second-Year Korean, First Quarter. 5 Units.**

Continuation of KORLANG 3. More complex sentences and grammatical patterns. Conversation in daily situations such as making a polite request or suggestion, reading simple texts, and Korean culture. Prerequisite: Placement Test, KORLANG 3.

**KORLANG 22. Second-Year Korean, Second Quarter. 5 Units.**

Continuation of KORLANG 21. More complex sentences and grammatical patterns. Conversation in daily situations such as making a polite request or suggestion, reading simple texts, and Korean culture. Prerequisite: Placement Test, KORLANG 21.

**KORLANG 23. Second-Year Korean, Third Quarter. 5 Units.**

Continuation of KORLANG 22. More complex sentences and grammatical patterns. Conversation in daily situations such as making a polite request or suggestion, reading simple texts, and Korean culture. Prerequisite: Placement Test, KORLANG 22.

**KORLANG 101. Third-Year Korean, First Quarter. 4-5 Units.**

Continuation of KORLANG 23. Materials about Korean culture and society. Proficiency in interpersonal, interpretive, and presentational communication. Vocabulary, reading, and aural/oral skills. Prerequisite: Placement Test, KORLANG 23.

**KORLANG 102. Third-Year Korean, Second Quarter. 4-5 Units.**

Continuation of KORLANG 101. Materials about Korean culture and society. Proficiency in interpersonal, interpretive, and presentational communication. Vocabulary, reading, and aural/oral skills. Prerequisite: Placement Test or KORLANG 101.

**KORLANG 103. Third-Year Korean, Third Quarter. 4-5 Units.**

Continuation of KORLANG 102. Materials about Korean culture and society. Proficiency in interpersonal, interpretive, and presentational communication. Vocabulary, reading, and aural/oral skills. Prerequisite: Placement Test, or KORLANG 102.

**KORLANG 110. Korean Pronunciation and Intonation. 1-2 Unit.**

Goal is intelligibility and fluency. Lab assignments. Prerequisite: 3.

**KORLANG 111. Medical Korean, First Quarter. 2-3 Units.**

Medical vocabulary; cultural attitude. Video clips, technical journal and prescription reading, and class simulations. Prerequisite: 23.

**KORLANG 112. Medical Korean, Second Quarter. 2 Units.**

Medical vocabulary; cultural attitude. Video clips, technical journal and prescription reading, and class simulations. Prerequisite: 111.

**KORLANG 120A. Korean Culture. 1-3 Unit.**

Examination of Korean culture and society to develop fluency and vocabulary through newspapers and short essays. May be repeated for credit. Prerequisite: 103.

**KORLANG 120B. Korean Culture. 1-2 Unit.**

Examination of Korean culture and society to develop fluency and vocabulary through newspapers and short essays. May be repeated for credit. Prerequisite: 103.

**KORLANG 120C. Korean Culture. 1-2 Unit.**

Examination of Korean culture and society to develop fluency and vocabulary through newspapers and short essays. May be repeated for credit. Prerequisites: 103.

**KORLANG 120K. Korean Language and Culture through Drama and Film. 3 Units.**

Korean culture and society through contemporary Korean drama and films. Advanced vocabulary, grammar, and idiomatic expressions. Prerequisite: placement test or 103.

**KORLANG 130. Reading Korean. 4 Units.**

Contemporary literature and academic texts. May be repeated for credit. Prerequisite: KORLANG 103.

**KORLANG 200. Directed Reading in Korean. 1-5 Unit.**

Prerequisite: consent of instructor.nn (Staff).

**KORLANG 395. Graduate Studies in Korean. 1-5 Unit.**

Prerequisite: consent of instructor.

**Korean Literature Courses****KORLIT 230. Intimate Encounters: Reading and Translating Korean Literature. 4-5 Units.**

Close analysis of fiction and poetry in original Korean. Discussion of the works in a broader context of Korean literature, history, and current events. Translation of Korean fiction that has not previously been translated; select translations will be considered for publication. Prerequisite: three years of Korean language. Same as: KORLIT 330

**KORLIT 231. Topics in Korean Literature. 4-5 Units.**

This year's graduate seminar in Korean Literature will focus on the period of the 1970s, an era marked as one of political turmoil and censorship. This class will examine essays and works of fiction produced by Korea's preeminent poets and writers to understand how they grappled with the changing forms of social and political life, urbanization and industrialization, and with increasing censorship over creative works. Readings will be in Korean and English. Same as: 1970's

**KORLIT 330. Intimate Encounters: Reading and Translating Korean Literature. 4-5 Units.**

Close analysis of fiction and poetry in original Korean. Discussion of the works in a broader context of Korean literature, history, and current events. Translation of Korean fiction that has not previously been translated; select translations will be considered for publication. Prerequisite: three years of Korean language. Same as: KORLIT 230

**Latin American Studies Courses****LATINAM 197. Directed Individual Research. 1-10 Unit.**

For students engaged in interdisciplinary work that cannot be arranged by department. May be repeated for credit. Prerequisite: consent of instructor.

**LATINAM 198. Honors Thesis. 1-10 Unit.**

Restricted to those writing an honors thesis in Latin American Studies.

**LATINAM 200. Seminar on Contemporary Issues in Latin American Studies. 1 Unit.**

Guest scholars present analyses of major Latin American themes.

**LATINAM 207. Spanish in Science/Science in Spanish. 2 Units.**

For graduate and undergraduate students interested in the natural sciences and the Spanish language. Students will acquire the ability to communicate in Spanish using scientific language and will enhance their ability to read scientific literature written in Spanish. Emphasis on the development of science in Spanish-speaking countries or regions. Course is conducted in Spanish and intended for students pursuing degrees in the sciences, particularly disciplines such as ecology, environmental science, sustainability, resource management, anthropology, and archeology.

Same as: BIO 208, EARTHSYS 207

**LATINAM 398. Master's Thesis. 1-10 Unit.**

Restricted to students writing a master's thesis in Latin American Studies. May be repeated for credit.

**LATINAM 801. TGR Project. 0 Units.**

.

**Law Courses****LAW 201. Civil Procedure I. 4 Units.**

This course is part of the required first-year JD curriculum. This course is a study of the process of civil litigation from the commencement of a lawsuit through final judgment under modern statutes and rules of court, with emphasis on the federal rules of civil procedure. May include class participation, written assignments, or other elements. Your instructor will advise you of the basis for grading.

**LAW 203. Constitutional Law. 3 Units.**

This course is part of the required first-year JD curriculum. This course offers an introduction to American constitutional law. In addition to examining questions of interpretive method, the course focuses on the powers of the federal government and the allocation of decision making authority among government institutions, including both federalism and separation of powers. Class participation, attendance, written assignments, and final exam. This course is open to first-year Law School students only.

**LAW 205. Contracts. 4 Units.**

This course is part of the required first-year JD curriculum. It provides exposure to basic contract law. The course will identify the scope and purpose of the legal protection accorded to interests predicated on contract and will focus on problems of contract formation, interpretation, performance, and remedies for breach.

**LAW 207. Criminal Law. 4 Units.**

This course is part of the required first-year JD curriculum. It examines the traditional general issues in the substantive criminal law, including the purposes of punishment and the appropriate limits on the use of the criminal sanction. It focuses predominantly on how criminal statutes are organized around objective offense elements (conduct, causation, and attendant circumstances) and mental states, and to a lesser degree on inchoate crimes, complicity, justification and excuse.

**LAW 217. Property. 4 Units.**

This course is part of the required first-year JD curriculum. It deals with possession and ownership of land and with the incidents thereof, including private and public restrictions on its use and development, nuisance, trespass, concurrent interests, landlord and tenant, and eminent domain. Attendance and final exam. Your instructor will advise you of other basis of grading. This course is open to first-year Law School students only.

**LAW 218. JSD Research Colloquium. 0 Units.**

Required for and limited to JSD candidates. The objective of the colloquium is to assist students in designing, conducting, analyzing and reporting their doctoral dissertation research. Weekly colloquium sessions are devoted to work in progress presentations by JSD candidates, supplemented by occasional guest lectures and discussions of cross-cutting issues of interest to doctoral students.

**LAW 219. Legal Research and Writing. 2 Units.**

Legal Research and Writing is a two-unit course taught as a simulation. Students work on a legal problem starting with an initial interview, and they conduct fact investigation and legal research related to that problem. Students receive rigorous training in reading and analyzing legal authority, and in using persuasive strategies—legal analysis, narrative, rhetoric, legal theory, and public policy—to frame and develop legal arguments. Students write predictive memos and persuasive briefs, and are introduced to the professional norms of ethics, timeliness, and courtesy. This course is part of the required first-year JD curriculum.

**LAW 220. Regulatory Economics. 5 Units.**

Law 220 examines public policies for dealing with problems arising in markets in which competitive forces are weak. The focus is on monopolies, oligopolies, cartels, and other environments where market mechanisms are unlikely to produce outcomes that benefit consumers more than the alternatives involving costly government intervention. The two main areas examined are competition policy and economic regulation. Competition policy refers to laws that define certain market behavior as illegal because it is harmful to competition or fails to provide consumer benefits that justify its costs to consumers. Economic regulation refers to policies in which government controls prices and/or decides the terms and conditions under which firms can participate in a market. A growing area of study and policy design is the introduction of market mechanisms into formerly regulated industries such as: telecommunications, electricity, airlines, railroads, postal delivery services and environmental regulation. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper and Final Exam. Cross-listed with Economics (ECON 158).

**LAW 221. Intellectual Property: Commercial Law. 3 Units.**

This seminar, co-taught by eBay's first In-House Counsel and former Director of Law & Public Policy, Brad Handler, will examine the ways in which intellectual property rights are asserted, exchanged, protected, and respected, both in theory and in practice. Special attention will be devoted to the regulatory and strategic considerations involved in the business and legal decisions implicating intellectual property. Special Instructions: Any intellectual property course, such as IP: Introduction (Law 409), IP: Patents (Law 326) or IP: Copyright (Law 324) is a prerequisite. Elements used in grading: Paper, participation, attendance, preparation and presentation.

**LAW 222. Advanced Legal Research. 3 Units.**

The course is designed to prepare law students for research in practice and clerkships. The course will review sources of legal authority and how this material is used, organized, published, indexed, and kept current. Objectives for the course are: 1) to show students how to find and evaluate legal research sources and use them effectively, with particular emphasis on cost-effective research; 2) to expand research skills in primary and secondary U.S. legal sources; and 3) to introduce students to the array of non-legal information resources useful to legal practice. Learning legal research requires a hands-on approach, so students will complete in-class exercises, homework assignments, and quizzes – all of which contribute to grading. There will not be a final exam. This course is open to Stanford graduate students with permission from the instructor.

**LAW 223. Torts. 4 Units.**

This course is part of the required first-year JD curriculum. It considers issues involved in determining whether the law should require a person to compensate for harm intentionally or unintentionally caused. These problems arise in situations as diverse as automobile collisions, operations of nuclear facilities, and consumption of defective food products. Among other considerations, the course explores various resolutions in terms of their social, economic, and political implications.

**LAW 224A. Federal Litigation: Coursework. 2 Units.**

This course is part of the required first-year JD curriculum. It is an introductory course in the litigation process. Students represent the plaintiff or defendant in a simulated public interest case set in a federal district court that raises complex issues of federal civil procedure, privacy, and first amendment law. Students plan litigation strategy, draft pleadings, conduct discovery, write short briefs, and orally argue major motions for dismissal, class action certification, and preliminary injunctive relief. While developing students' written and oral advocacy skills, the course also focuses on substantive issues of civil procedure and constitutional law. Attendance, class participation and written assignments. This course is open to first-year Law School students only.

**LAW 224B. Federal Litigation: Methods. 1 Unit.**

This course is part of the required first-year JD curriculum. It is an introductory course in the litigation process. Students represent the plaintiff or defendant in a simulated public interest case set in a federal district court that raises complex issues of federal civil procedure, privacy, and first amendment law. Students plan litigation strategy, draft pleadings, conduct discovery, write short briefs, and orally argue major motions for dismissal, class action certification, and preliminary injunctive relief. While developing students' written and oral advocacy skills, the course also focuses on substantive issues of civil procedure and constitutional law. Attendance, class participation and written assignments. This course is open to first-year Law School students only.

**LAW 224C. Federal Litigation: Practice. 1 Unit.**

This course is part of the required first-year JD curriculum. It is an introductory course in the litigation process. Students represent the plaintiff or defendant in a simulated public interest case set in a federal district court that raises complex issues of federal civil procedure, privacy, and first amendment law. Students plan litigation strategy, draft pleadings, conduct discovery, write short briefs, and orally argue major motions for dismissal, class action certification, and preliminary injunctive relief. While developing students' written and oral advocacy skills, the course also focuses on substantive issues of civil procedure and constitutional law. Attendance, class participation and written assignments. This course is open to first-year Law School students only.

**LAW 225A. Immigrants' Rights Clinic: Clinical Practice. 4 Units.**

The Immigrants' Rights Clinic offers students the opportunity to represent immigrants before the San Francisco Immigration Court, the Board of Immigration Appeals, and the Ninth Circuit Court of Appeals. Students in the clinic conduct mini-trials in immigration court, write motions and appellate briefs, interview clients and witnesses, investigate facts, develop case strategy, and argue cases. The Clinic represents immigrants with past criminal convictions, asylum seekers, and survivors of domestic violence. All clinic students also work on a variety of impact litigation and advocacy projects to address federal government immigration enforcement practices at the national and local levels, including impact litigation to challenge prolonged immigration detention, local and state advocacy to limit enforcement activity by police, the creation of model pleadings and know your rights materials for immigrant detainees, and advocacy with the federal agencies that regulate immigration. No prior substantive experience or background in immigration or immigrants' rights work is necessary. Special Instructions: General Structure of Clinical Courses -- The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students will be awarded three separate grades for their clinical quarter, each reflecting four credits. The three grades are broken into the following categories: clinical practice; clinical methods; and clinical coursework. Grading is pursuant to the H/P system. Enrollment in a clinic is binding; once selected into a clinic to which he or she has applied, a student may not later drop the course except in limited and exceptional cases. Requests for withdrawal are processed through the formal petition and clinical faculty review process described in the clinic policy document posted on the SLS website. Students may not enroll in any clinic (full-time or advanced) which would result in them earning more than 27 clinical credits during their law school career. The rules described here do not apply to advanced clinics for students who are continuing with a clinic in which they were previously enrolled. For information about advanced clinics, please see the course descriptions for those courses. For more information about clinic enrollment and operations, please see the clinic policy document posted on the SLS website. Elements used in grading: Attendance and participation in class, case and project work and writing assignments.

**LAW 225B. Immigrants' Rights Clinic: Clinical Methods. 4 Units.**

The Immigrants' Rights Clinic offers students the opportunity to represent immigrants before the San Francisco Immigration Court, the Board of Immigration Appeals, and the Ninth Circuit Court of Appeals. Students in the clinic conduct mini-trials in immigration court, write motions and appellate briefs, interview clients and witnesses, investigate facts, develop case strategy, and argue cases. The Clinic represents immigrants with past criminal convictions, asylum seekers, and survivors of domestic violence. All clinic students also work on a variety of impact litigation and advocacy projects to address federal government immigration enforcement practices at the national and local levels, including impact litigation to challenge prolonged immigration detention, local and state advocacy to limit enforcement activity by police, the creation of model pleadings and know your rights materials for immigrant detainees, and advocacy with the federal agencies that regulate immigration. No prior substantive experience or background in immigration or immigrants' rights work is necessary. Special Instructions: General Structure of Clinical Courses -- The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Elements used in grading: Attendance and participation in class, case and project work and writing assignments.

**LAW 226. Accounting. 3 Units.**

The objective of financial accounting is to measure economic activity for decision-making. Financial statements are a key product of this measurement process and an important component of firms' financial reporting activities. This course is aimed at developing students' ability to read, understand, and use corporate financial statements. The primary focus is on understanding the mapping between underlying economic events and financial statements, and how this mapping can affect inferences about future firm profitability. To this end, the course will provide an introduction to: (1) accrual accounting concepts, principles and conventions; (2) the process of preparing and presenting the primary financial statements (income statement, balance sheet, and statement of cash flows); (3) the judgment involved and discretion allowed in making accounting choices; (4) the effects of accounting discretion on the quality of the (reported) financial information; and (5) the fundamentals of financial statement analysis. Class time will be allocated to a combination of short lectures and discussions of the assigned cases. The assigned cases are based on actual corporate financial statements and/or "real life" financial situations. Elements used in grading: Class participation, attendance, written assignments, final paper.

**LAW 229. Racial Justice Through Law. 3 Units.**

Racial inequality pervades American life. Race related controversies arise with depressing regularity. This, more than half a century after the Supreme Court's landmark decision in *Brown v Board of Education*, after landmark federal civil rights legislation, and at a time when many Americans profess to be colorblind. This course will examine why and how racial injustice persists, and the role of law in furthering or impeding the cause of racial justice. These questions will be explored across a variety of settings, including criminal justice, college admissions, political participation, primary/secondary education, employment, housing, hate speech, and the formation of family relationships. The class will employ a discussion based approach in which student participation is essential. Elements used in grading: Exam, class participation.

**LAW 230. Creation of the Constitution. 4 Units.**

The course begins with readings setting forth the intellectual and experiential background of the framing, including common law and natural rights theory, republicanism, economic & political scientific ideas, and colonial and post-Independence experience. We then study large parts of the debates at the Constitutional Convention, primarily using Madison's Notes. Next come the ratification debates, including readings from antifederalist writers, *The Federalist*, and speeches in ratification conventions. We conclude with the addition of the Bill of Rights. Classes consist of a combination of lecture and extensive participation by students. Elements used in grading: Exam. Cross-listed with History (HISTORY 153).

**LAW 233. Antitrust. 4 Units.**

Antitrust law sets the ground rules for competition. This course will explore the basic concepts in antitrust law. We will examine cartels and competitor collaborations, monopolization, vertical restraints and horizontal mergers. There are no prerequisites for this course. No economic background is required. The course is open to GSB students and graduate students in the Economics Department. To apply for this course, non-Law students must complete a Non-Law Student Add Request Form available on the SLS Registrar's Office website (see Non-Law Students). Elements used in grading: Class participation, attendance and final exam.

**LAW 236. Art and the Law. 2 Units.**

This course covers the legal, public policy, and ethical issues that concern artists, art dealers, auction houses, museums, collectors, and others who comprise the world of visual art. Our focus will be on artists' rights (including copyright, resale royalties, moral rights, and freedom of expression issues), how the market in art functions (such as the artist-dealer relationship, auction rules, and issues faced by collectors), and the legal and ethical rules governing the collection, donation, and display of visual art, particularly for museums and their donors. The course focuses on certain recurrent themes: How do statutes and courts define (or attempt to define) art-and how is art defined differently for different legal purposes? How does the special character of art justify or require different treatment under the law from that accorded other tangible personal property, and how does (and should) the expressive nature of art affect the way it is owned, protected, regulated, or funded? We anticipate having two or three visitors to the class during the quarter, such as a gallery owner, auctioneer, and museum director. In addition, we will also have the students participate in at least one or two interactive negotiation simulation exercises inspired by real situations and controversies in the art world. Special Instructions: Students have the option to write a research paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Graduate students from other departments are welcome to take this course with the permission of the instructor. See "Non-Law Students" on the SLS Registrar's Office website for enrollment instructions. Elements used in grading: Class participation, attendance, final paper or final exam.

**LAW 238. Administrative Law. 4 Units.**

Law made by administrative agencies dominates the modern legal system and modern legal practice. This course examines the legal and practical foundations of the modern administrative state. Topics include rationales for delegation to administrative agencies; the legal framework (both constitutional and statutory) that governs agency decision-making; the proper role of agencies in interpreting statutory and regulatory law; and judicial review of agency action. The course will cover these topics through a combination of cases and examples drawn primarily from separation of powers doctrine; the constitutional law of due process; health, safety, and environmental policy; criminal justice; and national security law. The central theme of the course is how administrative law balances "rule of law" values (procedural regularity, substantive limits on arbitrary action) against the often competing values of political accountability, democratic participation, and effective administrative governance. Elements used in grading: Class participation, attendance and final exam.

**LAW 239. Writing Workshop: Law and Creativity. 3 Units.**

Practicing law is very much a creative enterprise. Effective advocates and counselors provide innovative and thoughtful solutions to complex problems. But there often isn't enough attention devoted in law school either to thinking creatively or to reflecting in a creative way on the issues students confront inside and outside the classroom. This course will respond to this gap by building a bridge between law and the arts, with the goal of helping students hone their ability to think creatively and use disciplined imagination. Law & Creativity will meet twice a week and have dual components designed to inform one another. The first session will be structured as a seminar in which students gather to examine and discuss creative treatments of legal and professional issues in a variety of media (including film, fiction, and nonfiction). The second session will follow the creative-writing workshop model in which students submit their own fiction and creative nonfiction pieces for group discussion. Through the workshop process, students will develop the skills necessary to constructively critique and workshop one another's work, and learn a variety of techniques for improving their own creative writing. Elements used in grading: Class attendance, participation and final paper.

**LAW 240. Bankruptcy. 3 Units.**

This course concerns the law and finance of corporate bankruptcy with an emphasis on reorganization. The course reviews the fundamentals of debt contracting, including the role of events of default, debt priority, and security interests. The course examines various aspects of the bankruptcy process: including the automatic stay, the avoidance of prebankruptcy transactions (e.g. fraudulent conveyances and preferences), the treatment of executory contracts, the debtor's governance structure during bankruptcy, the financing of operations and investments in bankruptcy, sales of assets during bankruptcy, and the process of negotiating, voting, and ultimately confirming a plan of reorganization. Elements used in grading: Class participation and exam.

**LAW 242. Corporations. 4 Units.**

This course is an introduction to the basic legal rules and principles governing the relations between managers, investors, and creditors in the business enterprise. The course is the foundation for advanced business courses. We focus on problems that arise because a firm's managers and owners have conflicting interests. We examine the costs associated with this conflict and how markets, legal rules and contracts might reduce them. Special Instructions: QM: Finance (Law 467) is recommended. Elements used in grading: Class participation, attendance, written assignments, midterm, final exam.

**LAW 245. China Law and Business. 3 Units.**

This introductory course provides an overview of the Chinese legal system and business environment and examines Chinese legal rules and principles in select business-related areas. These areas include intellectual property, dispute resolution, foreign investment, mergers and acquisitions, antimonopoly law, and environment. Through active class participation and analysis of business case studies, students will learn both the law in the books and the law in action, as well as strategies that businesses could use to overcome limitations in the Chinese legal system. Leaders from the law and business community will be invited to share their experiences and insights. This course is particularly suitable for law students and students enrolled in the MBA program and/or the East Asian Studies Program. Undergraduates who have permission from the instructor may also take this course. A Stanford Non-Law Student Course Registration Form is available on the SLS Registrar's Office website. Elements used in grading: Class participation (30%) and extended take-home exam (70%).

**LAW 248. Corporate Reorganization. 3 Units.**

This course examines the reorganization of a financially distressed company under chapter 11 of the Bankruptcy Code. Among other things, the course follows a fictitious company through several stages of a business turnaround and financial restructuring, including an out-of-court workout, a chapter 11 filing, selected chapter 11 operating issues, and the negotiation, formulation and confirmation of a plan of reorganization. In addition, the course follows current developments relating to bankruptcy, primarily through reports in the media. For example, in recent years the course has examined developments in actual chapter 11 cases (e.g., General Motors, Chrysler Corporation, American Airlines, Caesars Entertainment Operating Co and Lehman Brothers) and the effects of bankruptcy on various industries (e.g., airlines, automotive, energy and retail). The course also touches on various issues that often arise in a reorganization setting, such as valuation, leveraged buyouts, debt and derivative instruments, and distressed debt trading. Elements used in grading: Class participation and final exam.

**LAW 251. Conflict of Laws. 3 Units.**

Instances are common in law where more than one legal authority potentially governs a particular event, occurrence or transaction. When the outcome required by these authorities differs, which law governs? Beginning with the classic problem of choosing an applicable law in cases with facts touching more than one jurisdiction, this course is designed broadly to explore the variety of theories and systems used to resolve this question. The course thus uses state/state conflicts to develop a set of approaches and then extends these to such other problems as adjudicatory jurisdiction, judgments, federal subject-matter jurisdiction, and public and private international law. Elements used in grading: Attendance, preparation, participation and final examination.

**LAW 253. Advanced Civil Procedure. 3 Units.**

This course is a basic introduction to high-stakes litigation involving parallel or sequential claims, multiple claims and parties, and multiple jurisdictions, principally in cases governed by the Federal Rules of Civil Procedure. The course assumes basic familiarity with the way courts resolve lawsuits between two parties. It also assumes that students are familiar with the basics of territorial and subject matter jurisdiction—which we will build on over the course of the semester. The course starts with the law of preclusion, filling in any gaps in coverage from first year. After a brief review of the law of joint and several liability, the course will cover simple joinder of claims (Rule 18), joinder of plaintiffs and defendants (Rule 20), cross-claims and third party practice (Rule 13 and 14). Then we'll look at problems of non-parties—those who want to intervene in the litigation (Rule 24) and those who decline to intervene and cannot be joined (Rule 19). Throughout, we will pay attention to the relationship between federal joinder rules and federal subject matter jurisdiction, including the federal supplemental jurisdiction statute. We'll very briefly glance at the law of interpleader, both under Rule 22 and the federal interpleader statute. The second part of the course will deal with class actions under Federal Rule 23. It will cover the types of class action (limited fund, injunction, damages), the differing requirements for certification of the various types of actions, and how trial and appellate courts approach critical issues of certification, notice and jurisdiction, collective proof, settlement and preclusion. Cases will give a feel of the issues across various types of class action: including consumer, antitrust, securities, civil rights and employment litigation. The course will also look at the federalization of state class action law, including important recent case law from the US Supreme Court upholding class action waivers in contracts of adhesion containing arbitration clauses and legislation expanding federal subject matter jurisdiction over diversity class actions. In view of the likely decline of class action practice in certain fields of law, we'll also look at contractual and statutory substitutes for class action approaches. The final topic in the class will be multidistrict litigation, including the statutory authority for multi-district transfers, how they differ from transfers for trial, the standards that govern where and how a multidistrict proceeding is established, and some current issues of law, practice and policy, focusing on mass tort and product liability cases. At the end of the course, you should know and be able to apply the rules covered, have some sense of how those rules figure in developing plaintiff and defense strategies in complex cases, understand the kinds of arguments that are likely to move trial and appellate judges presiding in such cases, and begin to see the hard policy choices involved in the design of rules for resolving such cases. Elements used in grading: ATTENDANCE AND CLASS PARTICIPATION ARE REQUIRED—STUDENTS WILL BE "ON CALL" FOR APPROXIMATELY ONE IN EVERY FOUR CLASSES, ON A SCHEDULE TO BE RELEASED AFTER THE FIRST CLASS. GRADING IS BASED ON A ONE-DAY TAKE HOME FINAL EXAMINATION WITH A WORD LIMIT.

**LAW 255. Constitutional Law: The Fourteenth Amendment. 3 Units.**

This course examines various aspects of the Fourteenth Amendment, with special attention to equal protection, substantive due process, and state action. Topics addressed will include equal protection in relation to race, gender, and sexual orientation, and substantive due process in relation to procreation, sexuality, and relationships. Elements used in grading: Class participation and exam.

**LAW 259. State-Building and the Rule of Law Seminar. 3 Units.**

The State-Building and Rule of Law Seminar is centrally concerned with bridging theory and practice. The seminar introduces the key theories relevant to state-building generally and strengthening the rule of law in particular. This course explores the multidisciplinary nature of development – through readings, lectures, guest lectures, and seminar discussions – and asks how lawyers fit in and contribute to the process. Essentially, in a given context, what is the relationship of law to political, social, and economic change? This course will employ case studies as a way to analyze rule-of-law practice within development theory. The set of developing countries considered within the scope of this workshop is broad. It includes, among others, states engaged in post-conflict reconstruction, e.g., Cambodia, Timor Leste, Rwanda, Iraq, Sierra Leone; states still in conflict, e.g., Afghanistan, Somalia; the poorest states of the world that may not fall neatly into the categories of conflict or post-conflict, e.g., Nepal, Haiti; least developed states that are not marked by high levels of violent conflict at all, e.g., Bhutan; and more developed states at critical stages of transition, e.g., Tunisia, Georgia, Hungary. Grading is based on participation, a presentation of research or a proposal, and, in consultation with the professor, a research paper (for R credit) or an in-depth research proposal either of which could be the basis for future field research. CONSENT APPLICATION: The seminar is open by consent to up to twelve (12) JD, SPILS, and LLM students, and graduate students from other departments within Stanford University. To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration) to the instructor. See Consent Application Form for submission deadline.

**LAW 259A. Afghanistan Legal Education Project (ALEP) Seminar. 3 Units.**

The Afghanistan Legal Education Project (ALEP) Seminar is only open to student preselected in the spring. The ALEP Seminar will begin with an intensive bootcamp taught by ALEP leadership and members of the law faculty at American University of Afghanistan (AUAF). We will explore the Afghan sociopolitical and legal context, rule of law efforts and challenges in Afghanistan, and the role of legal education in legal development. Participants will learn from Afghan law professors about Shari' a law, customary law, Afghan civil law, and the challenges presented by Afghanistan's pluralistic legal system in preparation to work on legal curriculum to be taught at AUAF. The bootcamp will be highly participatory and requires full attendance. During the remainder of the quarter, participants will receive training in curriculum creation and organizational development in preparation for authoring an Afghan legal textbook and assuming ALEP programmatic responsibilities. Elements used in grading: Grading is based on mandatory attendance of the boot camp, participation, assignments, and revision of an existing textbook chapter. Consent Process: Only students selected in spring 2015 have consent to take the ALEP Seminar. Their names will be given to the Registrar, who will automatically enroll them in the course in fall 2015.

**LAW 260. Contemporary Issues in Law and Politics. 2-3 Units.**

This seminar covers high profile legal controversies from the previous few years. Topics to be covered this semester will include recent Supreme Court decisions concerning affirmative action, the Voting Rights Act, campaign finance, the First Amendment, national security, and criminal procedure, as well as other legislative controversies and cases pending during the term. Students are required to complete a considerable amount of reading each week and participate actively in the seminar. The final paper will be approximately 30 pages in length and will concern a topic of the student's choice dealing with law and politics. Students can take the seminar for either 2 or 3 units. Students taking the seminar for 3 units are required to complete weekly written assignments in addition to the final paper. After the term begins, students accepted into the course can transfer from section (01) into section (02), for 3 units with instructor consent. Elements used in grading: Class participation, final paper and written assignments (optional).

**LAW 262. Corporate Finance I. 3 Units.**

There are many contexts in which lawyers need an understanding of finance. For example, many of the disputes that give rise to litigation center on the financial valuation of firms and the securities they issue. In addition, an understanding of firms' capital structures and the design of corporate securities is necessary in analyzing many legal issues, especially those arising in corporate transactions, executive compensation, and bankruptcy proceedings. This course is designed to provide students with a rigorous conceptual understanding of finance and to give students the analytical tools needed to make financial decisions and value financial securities. The course stresses problem solving and includes problem sets, cases, and a midterm and final examination. The course is designed to be accessible to students with a fairly limited mathematical background. In general we will not assume any knowledge of mathematics beyond high-school algebra. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Exam.

**LAW 264. Advanced Corporate Finance. 2 Units.**

Lawyers often need an advanced understanding of corporate financial decisions, instruments, and transactions. Corporate finance topics include the determination of a firm's cost of capital, valuation, payout policy, equity and debt financing, bankruptcy and restructuring, and mergers and corporate control. Advanced Corporate Finance introduces these topics by lecture and then explores them through detailed analysis of actual cases. Legal considerations that arise within corporate finance include the issuance of dual class shares, disputes related to earnings repatriation and taxes, mandatory disclosure requirements, appraisal cases and fairness opinions, takeover defenses and fiduciary duty challenges, contractual provisions in merger agreements, charges of anticompetitiveness, and Chapter 11 bankruptcy proceedings. This class rigorously advances both conceptual and practical/analytical understanding. These skills facilitate professional dealings with CFOs, corporate treasurers and directors, investment bankers, consultants, portfolio and investment managers, venture capitalists, and private equity managers. Prerequisite: Corporate Finance I (Law 262) or equivalent background. Elements used in grading: class participation and final exam.

**LAW 266A. Juelsgaard Intellectual Property and Innovation Clinic: Clinical Practice. 4 Units.**

The Juelsgaard Intellectual Property and Innovation Clinic provides students the opportunity to understand and advocate for sound innovation policies. Students in the clinic will help shape the course and outcome of significant legal and policy debates before courts, legislators, regulatory bodies, and other policy makers. Our work focuses on the relationship between law, regulation and innovation in areas ranging from biotechnology to information technology, pharmaceuticals, clean technology, and the creation and distribution of information. Students will represent a variety of NGOs and non-profit entities and, in certain cases, groups or associations of innovators, entrepreneurs, technology users or consumers, economists, technologists, legal academics, and the like, and occasionally individual inventors, start-ups, journalists, or researchers. Students will address their client's complex issues through tools that may include amicus briefs; comments or testimony in rulemaking and regulatory proceedings (i.e., DMCA exemption requests, comments to OSTP on issues such as open access, privacy or open data, comments to the FTC as part of IP and innovation hearings and reports, comments to the PTO or FDA, etc.); comments or testimony on proposed legislation; and whitepapers or other "best practices" documents to encourage sensible and balanced legal approaches to innovation and creativity. Our policy advocacy will often involve intertwined factual, technological, business, economic, political and public relations considerations along with the substantive legal issues. Students in the clinic may be called upon to collaborate with technologists, researchers, doctors, economists, social scientists, industry experts, and others to develop and articulate the appropriate policy advocacy for their clients. The clinic seminar will focus on student-led workshops regarding client projects, and on engaging with current thinking around innovation, innovation economics and the impact of IP, antitrust, and other law and regulation on innovation. We will explore the process of policy advocacy, including various policy levers, the types of tools available to advocates and the strategies and tactics that may be employed, and will consider and critique a variety of case studies of previous advocacy, situating them in the larger context in which these efforts occurred. Students will critically examine the role of lawyers advocating for the public interest and for sound and sensible innovation policy outcomes and bring those lessons to bear on their own clinic work. A background in technology may be useful in some cases but is not necessary to a successful experience in the clinic. -- Special Instructions: General Structure of Clinical Courses -- The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students

**LAW 266B. Juelsgaard Intellectual Property and Innovation Clinic: Clinical Methods. 4 Units.**

The Juelsgaard Intellectual Property and Innovation Clinic provides students the opportunity to understand and advocate for sound innovation policies. Students in the clinic will help shape the course and outcome of significant legal and policy debates before courts, legislators, regulatory bodies, and other policy makers. Our work focuses on the relationship between law, regulation and innovation in areas ranging from biotechnology to information technology, pharmaceuticals, clean technology, and the creation and distribution of information. Students

**LAW 267. Law of Nonprofits. 3 Units.**

This course provides an overview of the rules governing the formation and operation of nonprofit organizations. The course will focus both on the state laws governing nonprofit corporations and on federal tax laws. Topics will include the fiduciary duties of nonprofit directors, obtaining and maintaining tax-exempt status, nonprofit lobbying and political activities, and nonprofit earned income strategies, including social enterprise. Special Instructions: No pre-requisites. Knowledge of basic tax and/or corporate law is helpful but not required. Elements used in grading: Class participation, including attendance will comprise (20%) and final exam (80%).

**LAW 268. Democracy and the Constitution. 3 Units.**

This course will explore connections between democratic theory, constitutional theory, and constitutional law. We will discuss issues in political philosophy, law, and jurisprudence, and leading cases about freedom of expression, campaign finance, deference to administrative agencies, and legislative apportionment. Readings from Scalia, Breyer, Ely, Rawls, Dahl, Sunstein, Siegel, Kramer, Habermas, Dworkin, Przeworski, Riker, and Schumpeter. Special Instructions: Enrollment is limited to 20 students, 10 from SLS and 10 from H&S, who will be selected by lottery. Elements used in grading: Class participation and final paper. Writing (W) credit is for students entering prior to Autumn 2012. Cross-listed with Political Science (POLISCI 438) and Philosophy (PHIL 374C).

**LAW 272A. Organizations and Transactions Clinic: Clinical Practice. 4 Units.**

The O&T Clinic is targeted at both students planning to do M&A, finance, securities, IP licensing or other corporate or transactional work at major firms and those seeking to explore a non-litigation, advisory-oriented practice. In the clinic, students develop legal advice, learn to review and write contracts and governance materials, meet with client executives, examine commercial relationships, and receive extensive feedback about their work. No prior experience in business, finance, or corporate law is necessary. Students work on structural, programmatic, contractual, affiliation, and governance matters for corporate entities. Students typically represent multiple clients during the term, interact with client CEOs, CFOs, board members, and general counsels, and work in teams with other students and the instructors. Students receive detailed comments about the design, content, and execution of work-products and client communications, and about their performance in client meetings and calls. Students regularly assess their own work throughout the quarter and prepare a self-evaluation at the end of the term. O&T clients are all established Northern California nonprofit corporations. Most of the clients generate annual revenues in the range of \$1 - \$25 million, and some are considerably larger. We focus on these organizations because they are corporations that typically have substantial governance and external disclosure obligations, active boards of directors, audited financial statements, complex programs, varied collaborations, and diverse funding sources and contractual relationships – all of which are relevant to and productive of corporate work – yet are small enough that the clinic's contact is a senior executive. We think they provide excellent material for students learning about organizational representation and institutional corporate practice. The course includes a seminar that generally meets twice a week. Seminar meetings focus on student-led workshops regarding client projects, and on orientation to corporate practice, including discussion of core commercial relationships such as acquisition, credit, and licensing, and practice skills such as transaction planning and management. Evaluation and grading are based on detailed points of emphasis that reflect ways of working we believe characterize an effective lawyer and responsible colleague. Course design and operation reflect the instructors' combined 40+ years of corporate practice representing consumer products, finance, technology, and life science companies, in both law firm and senior in-house roles. Information about prior projects is available from the instructors and on the SLS website. Special Instructions: General Structure of Clinical Courses -- The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students

**LAW 272B. Organizations and Transactions Clinic: Clinical Methods. 4 Units.**

The O&T Clinic is targeted at both students planning to do M&A, finance, securities, IP licensing or other corporate or transactional work at major firms and those seeking to explore a non-litigation, advisory-oriented practice. In the clinic, students develop legal advice, learn to review and write contracts and governance materials, meet with client executives, examine commercial relationships, and receive extensive feedback about their work. No prior experience in business, finance, or corporate law is necessary. Students work on structural, programmatic, contractual, affiliation, and governance matters for corporate entities. Students typically represent multiple clients during the term, interact with client CEOs, CFOs, board members, and general counsels, and work in teams with other students and the instructors. Students receive detailed comments about the design, content, and execution of work-products and client communications, and about their performance in client meetings and calls. Students regularly assess their own work throughout the quarter and prepare a self-evaluation at the end of the term. O&T clients are all established Northern California nonprofit corporations. Most of the clients generate annual revenues in the range of \$1 - \$25 million, and some are considerably larger. We focus on these organizations because they are corporations that typically have substantial governance and external disclosure obligations, active boards of directors, audited financial statements, complex programs, varied collaborations, and diverse funding sources and contractual relationships – all of which are relevant to and productive of corporate work – yet are small enough that the clinic's contact is a senior executive. We think they provide excellent material for students learning about organizational representation and institutional corporate practice. The course includes a seminar that generally meets twice a week. Seminar meetings focus on student-led workshops regarding client projects, and on orientation to corporate practice, including discussion of core commercial relationships such as acquisition, credit, and licensing, and practice skills such as transaction planning and management. Evaluation and grading are based on detailed points of emphasis that reflect ways of working we believe characterize an effective lawyer and responsible colleague. Course design and operation reflect the instructors' combined 40+ years of corporate practice representing consumer products, finance, technology, and life science companies, in both law firm and senior in-house roles. Information about prior projects is available from the instructors and on the SLS website. Special Instructions: General Structure of Clinical Courses -- The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students

**LAW 272C. Organizations and Transactions Clinic: Clinical Coursework. 4 Units.**

The O&T Clinic is targeted at both students planning to do M&A, finance, securities, IP licensing or other corporate or transactional work at major firms and those seeking to explore a non-litigation, advisory-oriented practice. In the clinic, students develop legal advice, learn to review and write contracts and governance materials, meet with client executives, examine commercial relationships, and receive extensive feedback about their work. No prior experience in business, finance, or corporate law is necessary. Students work on structural, programmatic, contractual, affiliation, and governance matters for corporate entities. Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students

**LAW 273. Deals I. 4 Units.**

This course applies economic concepts to the practice of structuring contracts. The course extends over two quarters. In the Fall quarter it will meet four hours per week. In the Winter quarter, it will meet ONLY FOR FIVE WEEKS for four hours per week—for 2 units of course credit. During those five weeks, it will meet on Monday and Friday. Exactly which five weeks the course will meet will be announced during the Fall quarter. Students enrolled in the course must take both quarters. All of the first quarter will be spent in a traditional classroom setting, reading and discussing the economics underlying business transactions and applying those concepts to focused case studies that illustrate the economic concepts that we study. During the second quarter, we will explore deals in greater detail by studying five complex transactions in full. For this part of the course, students will be divided into groups and will be assigned one of the five deals. Each group will give a presentation of its deal to the class, and in the following class, a lawyer or other participant in the deal will come to class to present the deal based on his or her experience. When it works, the students' and the practitioners' analyses are mutually enlightening. We study five new deals each year. Deals that we have studied over the years have included movie financings, biotech alliances, venture capital financings, cross-border joint ventures, private equity investments, and corporate reorganizations. Special Instructions: Students enrolled in the course must take both quarters. Students who have not taken the course in the fall cannot register for it in the winter, and those who took it in the fall must register for it in the winter. No exam in Autumn Term. An In-School exam will be given at the conclusion of the course in the Winter Term. Grades will be given at the end of the second quarter and will be applied to both quarters. NOTE: This year, I have blocked out 4 class periods per week in the second quarter on Mondays and Fridays. As explained above, however, WE WILL ONLY USE HALF OF THOSE CLASSES - that is, FIVE MONDAYS and FRIDAYS over the Winter quarter. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration) to the instructors. See Consent Application Form for submission deadline. I use the consent form to ensure diversity of experience and non-experience and diversity across classes. Elements used in grading: Attendance, class participation, presentation, written assignments, group paper, and exam.

**LAW 274. Advanced Immigrants' Rights Clinic. 2-7 Units.**

The Immigrants' Rights Advanced Clinic offers the opportunity for students who have already successfully completed the Immigrants' Rights Clinic to pursue a specific immigrants' rights advocacy project; advanced individual client representation; and/or working with the clinic director to provide direction/guidance to those enrolled in the Clinic for the first time. All advanced Clinic projects will be jointly designed by the director and the advanced student. Advanced students providing guidance/direction to first-time students will receive additional training on providing supervision. Special instructions: Advanced students are expected to attend the case-rounds portion of the weekly seminar, and to participate as needed in the lecture/discussion portion of the seminar. Advanced students may arrange with the instructor to receive between two and seven units. No student may receive more than 27 overall clinical credits, however, during the course of the student's law school career. Elements used in grading: Attendance and participation in class, project work, writing assignments, and case preparation.

**LAW 275. Deals II. 2 Units.**

This course applies economic concepts to the practice of structuring contracts. The course extends over two quarters. In the Fall quarter it will meet four hours per week. In the Winter quarter, it will meet ONLY FOR FIVE WEEKS for four hours per week—for 2 units of course credit. During those five weeks, it will meet on Monday and Friday. Exactly which five weeks the course will meet will be announced during the Fall quarter. Students enrolled in the course must take both quarters. All of the first quarter will be spent in a traditional classroom setting, reading and discussing the economics underlying business transactions and applying those concepts to focused case studies that illustrate the economic concepts that we study. During the second quarter, we will explore deals in greater detail by studying five complex transactions in full. For this part of the course, students will be divided into groups and will be assigned one of the five deals. Each group will give a presentation of its deal to the class, and in the following class, a lawyer or other participant in the deal will come to class to present the deal based on his or her experience. When it works, the students' and the practitioners' analyses are mutually enlightening. We study five new deals each year. Deals that we have studied over the years have included movie financings, biotech alliances, venture capital financings, cross-border joint ventures, private equity investments, and corporate reorganizations. Special Instructions: Students enrolled in the course must take both quarters. Students who have not taken the course in the fall cannot register for it in the winter, and those who took it in the fall must register for it in the winter. No exam in Autumn Term. An In-School exam will be given at the conclusion of the course in the Winter Term. Grades will be given at the end of the second quarter and will be applied to both quarters. NOTE: This year, I have blocked out 4 class periods per week in the second quarter on Mondays and Fridays. As explained above, however, WE WILL ONLY USE HALF OF THOSE CLASSES - that is, FIVE MONDAYS and FRIDAYS over the Winter quarter. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration) to the instructors. See Consent Application Form for submission deadline. I use the consent form to ensure diversity of experience and non-experience and diversity across classes. Elements used in grading: Attendance, class participation, presentation, written assignments, group paper, and exam.

**LAW 278. The Article III Judge. 2 Units.**

The contemporary debate over the proper role of a federal judge under the Constitution turns, in large measure, on what it is we think an Article III judge is doing when she is called upon to resolve a "case or controversy." Is she looking for the fair result? If so, by whose lights? Is she a political actor, or is she instead looking for a rule of decision that has been previously established by law (a "mere translator" of the law, in Justice Frankfurter's words). If so, by natural law or positive law? These are some of the questions we will consider in discussing what role a federal judge plays when she exercises "the judicial Power of the United States" conferred by Article III of the Constitution. Readings will include books and articles by some of the leading legal thinkers in the nation's history. Special Instructions: This class will meet the first three weeks of the quarter only. Elements used in grading: Class attendance and participation, reading the assigned material, and a 10-15 page paper that uses the readings to analyze a significant judicial opinion. Special Instructions: This class will meet the first three weeks of the quarter only.

**LAW 279. Advanced Organizations and Transactions Clinic. 2-7 Units.**

Advanced clinic allows students who have taken the Organizations & Transactions Clinic to work on ongoing projects. Advanced clinic may be taken for 2-7 units. Students may not enroll in any clinic (basic or advanced) which would result in them earning more than 27 clinical credits during their law school career. Students must have taken Organizations & Transactions Clinic (Law 272). Writing (W) credit is for 3Ls only. Elements used in grading: Written assignments and client interactions.

**LAW 280. Toxic Harms. 2 Units.**

This seminar will examine the concerns arising from exposure to toxic substances from a variety of perspectives. A principal focus will be tort liability, and a central theme in the course will be whether tort law is an effective method of compensating victims of toxic exposure and controlling the distribution and/or emission of toxic substances. In order to assess the efficacy of tort, it is essential to compare the liability system with alternatives such as restructured "public law" litigation, administrative compensation schemes, and regulatory control strategies. Moreover, it seems equally important that these options be grounded in a concrete understanding of the major current problem areas. To accomplish these aims, the course will focus on a number of specific present concerns, including tobacco, asbestos, anti-inflammatory drugs, and workplace emissions exposures. In each instance, we will look at the nature of the public health problem as well as ensuing tort litigation and regulatory activity. In addition to examining these distinctive problem areas, we will look at broader, cross-cutting institutional reform proposals that have received recent attention. Students in Section (01) will write three ten-page writing exercises on topics discussed in class. After the term begins, students accepted into the course can transfer from section (01) into section (02), and have the option to write a final independent research paper for Research credit, with instructor consent. Elements used in grading: Three ten-page writing exercises or final independent research paper. Early drop deadline.

**LAW 281. Natural Resources Law and Policy. 3 Units.**

Natural resource management presents extremely difficult and contentious issues of law and public policy. Major debates continue to rage over issues such as the Endangered Species Act, whether the United States should permit drilling in the Arctic National Wildlife Refuge, and how to prevent the overfishing of the oceans. This course will focus on two major aspects of natural-resource management: biodiversity protection (including the Endangered Species Act, ocean fisheries management, and global protection of marine mammals) and public lands in the United States such as national parks and wilderness areas. The course also will examine the National Environmental Protection Act and the effectiveness of environmental impact assessments. Class sessions will include critical examinations of current law and policy and in-depth discussions of situational case studies that force you to consider how you would resolve real-life issues. Students will be expected to participate actively in class discussions. (This course will not examine either water law or energy law in any depth. Water Law will be offered again in the 2015-2016 academic year. Several other courses in the Law School deal with energy-law questions.) Elements used in grading: Class participation and final exam (open book).

**LAW 283. Federal Courts. 5 Units.**

This course considers the role of the federal courts in the federal system. It is both an advanced course in constitutional law and a course on the institutional design of the federal courts. In the first aspect, we consider two great themes: the allocation of power between the states and the federal government – federalism – and the relationship between the federal courts and the political branches of the national government – separation of powers. In the other aspect, we focus on the structure of the judicial system, the scope and limits of federal judicial power, essential aspects of federal court procedure, and the evolving structural response of the federal courts to changes in technology, commerce, government, and a multitude of factors that affect the business of the federal courts and the role of federal judges. Topics will include the original and appellate jurisdiction of the federal courts, Supreme Court review of state court judgments, federal common law including implied rights of action, Congressional power to limit the jurisdiction of the federal courts and to create adjudicative bodies within the federal government but outside the requirements of Article III, state sovereign immunity, justiciability, abstention and other doctrines of restraint, and the role of the federal courts in the war on terrorism. This course is highly recommended for students planning to practice in the federal courts, and many judges consider it essential preparation for a judicial clerkship. This course complements Constitutional Litigation (Law 641), and students, especially those who plan to clerk, will benefit from taking both courses. In-School: Three hour exam. During the exam students may consult course materials and notes prepared by them or students in this class, but not treatises (including Chemerinsky), commercial outlines, or student notes from past years or other schools. Elements used in grading: Class participation, attendance and final exam.

**LAW 285. International Trade Law. 3 Units.**

The WTO is a remarkably successful international institution, with perhaps the most effective dispute resolution system of any international organization. This course will survey the law and policy of the WTO system and related legal regimes. Topics will include the political economy of the treaty framework, the relationship between international and domestic law, the dispute resolution system, legal restrictions on border instruments, nondiscrimination obligations in international trade, preferential trading agreements such as NAFTA, TTIP and TPP, WTO rules concerning domestic regulation including the perceived tension between WTO obligations and domestic environmental/health/safety regulations, subsidies in international trade, antidumping law, trade in services, and investor rights under trade agreements. Elements used in grading: Class participation and final exam.

**LAW 287. Advanced Juelsgaard Intellectual Property and Innovation Clinic. 2-7 Units.**

Advanced clinic allows students who have taken the Advanced Juelsgaard Intellectual Property and Innovation Clinic to continue working on cases. Advanced clinic may be taken for 2-7 units. Students may not enroll in any clinic (basic or advanced) which would result in them earning more than 27 clinical credits during their law school career.

**LAW 290. Evidence. 5 Units.**

Evidence rules constrain proof at criminal and civil trials. We will study the Federal Rules of Evidence, related case law, and those constitutional concepts that limit proof at criminal trials. Topics include relevance, unfair prejudice, character evidence, impeachment, the rape shield law, hearsay, and the Confrontation and Compulsory Process Clauses. Please note that the California Bar Examiners have posted this announcement: "Applicants should be prepared to answer questions that have issues concerning the Federal Rules of Evidence and the California Evidence Code. Applicants should be prepared to compare and contrast the differences between the Federal Rules and the California Evidence Code, especially where the California rules of evidence have no specific counterparts in the Federal Rules." This evidence course covers only the Federal Rules of Evidence and does not address the California Evidence Code. Although similar principles of law govern the Federal Rules and California Code, the two sets of rules are not identical. Students preparing for the California Bar Exam will have to learn some new material. Elements used in grading: Final exam (one-half essay and one-half multiple choice).

**LAW 292. Estate Planning. 3 Units.**

This class will cover the basics of the gift and estate tax system and estate planning principles. With these fundamentals, the course will then examine basic and advanced estate planning and wealth transfer techniques, including wills, various types of trusts, titling property, gifts during lifetime, charitable vehicles, handling closely held businesses and valuation matters—with an emphasis on how to use these tools in planning an estate to meet the objectives of a couple or individual. Probate of an estate, durable power of attorneys, conservatorships, and planning for other life situations will be explored. Elements used in grading: Class participation (is a small factor and only in the positive direction) and final exam. This course is open to GSB and graduate students with consent of the instructor.

**LAW 293. Family Law. 3 Units.**

If there were no legal institution called marriage, would we want to create one? In the context of people's intimate relationships, when and how does the law facilitate and reinforce people's preferences/choices, and when does and should it restrict them? What are (and should be) the sources of legally enforceable obligations between intimates or family members? How does and should the law take account of children, who cannot fend for themselves? This course will consider these questions and more. Elements used in grading: Exam, with minor adjustments for class participation.

**LAW 297. Entertainment Law. 3 Units.**

Entertainment law is not, in and of itself, a separate legal discipline. Instead, the practice of entertainment law lies at the intersection of various traditional legal disciplines, such as contract, tort, copyright, trademark, antitrust, secured transactions, etc., and applies those disciplines to a unique business setting. This course is intended to approach the study of entertainment law from a practical perspective, applying the principles of traditional legal disciplines to avoid problems and find solutions in various facets of the entertainment industry. To accomplish the necessary background, we will study the entertainment industry from both a macro level (i.e., the organization of the motion picture, television and music business, including the function of studios, producers, networks, record companies, agencies, managers, lawyers and labor unions) and a micro level (i.e., examining actual agreements in order to understand the principal components of motion picture talent, production and distribution contracts, television series contracts, music and book publishing contracts). We will also examine key litigation issues that affect the industry, such as the interaction of the First Amendment and the right of publicity, the right of privacy and libel, the anti-SLAPP laws, the "final cut" and profit participation cases. The impact of the digital media (including the internet) will, of course, be analyzed, along with the future of the entertainment industry, including convergence, holograms, syntho-thesians and the like. We plan to include guest speakers from the entertainment industry so that this class will embody both business and legal considerations. The overall goals of this course are (1) to expose students to the unique and increasingly complex structure of the entertainment business; (2) to foster an understanding of the role the law and entertainment lawyers play in that unique business structure; (3) to strengthen students' ability to draft key documents and craft persuasive legal arguments to accomplish the goals they may seek to achieve as lawyers in the entertainment industry; and (4) to develop the analytical and problem-solving skills necessary to make them into effective entertainment lawyers. Elements used in grading: Class participation, brief writing exercises, team contract negotiation and drafting projects.

**LAW 299. Derivatives. 2 Units.**

The course will examine the legal, regulatory, trading and risk management aspects of the \$600 trillion notional over-the-counter and cleared derivatives markets. Derivatives have historically not been well-understood by regulators or the public and have been blamed for causing or contributing to the economic crisis. This course will offer students the opportunity to understand how various derivative products are designed, traded and risk-managed and what role regulators play in the derivatives industry. In addition, students will focus on understanding key legal contracts that underpin the global derivatives industry, in particular focusing on the ISDA® Master Agreement and Credit Support Annex, as well as documentation supporting credit derivatives and other common derivative types. Students will also consider the shifting regulatory landscape for financial institutions and hedge funds as it relates to the way in which these products are traded, with rates and credit products migrating to clearinghouses. The course will conclude with an examination of the economic crisis that erupted with Lehman Brothers' bankruptcy in September 2008 and the consequent policy reactions to that event from a derivatives and bankruptcy perspective. Elements used in grading: attendance, written homework assignments and a final exam.

**LAW 300. Securities Litigation. 4 Units.**

Securities litigation is a complex, multi-billion dollar enterprise that raises a host of intricate legal, economic, and social policy issues. This course addresses criminal, SEC civil, and private enforcement of the federal securities laws, with a focus on "big-ticket" litigation that illuminates underlying policy tensions. The course addresses a range of strategic litigation issues, and emphasizes elements of practice that are not apparent from decided cases, such as mechanisms that generate settlement pressure on corporate and individual defendants, business challenges to plaintiffs seeking to bring class actions, and the debate over the failure to prosecute individuals in connection with the 2008-09 financial crisis. The course also addresses the international dimension of securities litigation by examining the implications of the Supreme Court's Morrison decision, and the operation of the Foreign Corrupt Practices Act. Students interested in a complete understanding of the federal securities laws are urged to take the Winter Capital Market course, though it is not a prerequisite for this course. Elements used in grading: Final Exam.

**LAW 301. Labor Law. 2 Units.**

This course will cover the basic substantive and procedural aspects of the enforcement of the National Labor Relations Act (NLRA) in the U.S. economy today. After a brief introduction to the origin and history of collective bargaining laws, the course will examine how the protections and obligations of the NLRA actually operate in the modern workplace. Coverage will include legal issues in union organizing, union recognition, collective bargaining and workplace governance in a union context. The course will also emphasize the role of the NLRA in the non-union workplace, addressing such issues as the right to speak out at work (and limits thereon), and the rights of employees to engage in other concerted activity to advance their interests. Finally, the course will address the issue of arbitration of employment disputes in both the union and non-union workplace. Elements used in grading: Class Participation, Written Assignments.

**LAW 302. Advanced Topics in Federalism. 2-3 Units.**

This seminar will deal with a variety of legal issues arising out of our federal system. The goal is to go beyond well-worn debates about Congress's enumerated powers and look at a series of more intricate legal problems. The first part of the course will examine several discrete issues about the relationship of states to federal institutions, such as whether states have any reserved rights under the Tenth Amendment, and what relationship states have to federal courts. The second part of the course will look at "horizontal" federalism—i.e., relations between the states themselves. The final part of the course will reflect on the bigger picture—what purposes, if any, is federalism supposed to serve, and which of these doctrines, if any, serve them well?

**LAW 303. Teaching and Learning in Higher Education. 3 Units.**

This course is co-taught by Thomas Ehrlich, former dean of the Law School and now Consulting Professor at the Graduate School of Education and Mariatte Denman, Director of Educational Programs at the Office of the Vice Provost for Teaching and Learning (VPTL). It provides students from many disciplines throughout the university opportunities to gain the knowledge and skills needed to be effective teachers. Students watch and interview master teachers at Stanford, learn a range of effective pedagogical methods, and prepare a syllabus module for a workshop or class they might teach. They have an opportunity to practice teach in a supportive environment and gain feedback on their teaching. Elements used in grading: Class Participation, Written Assignments, Final Course or Workshop Syllabus Module. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for submission deadline. Cross-listed with The Vice Provost for Teaching and Learning (VPTL 297) and Education (EDUC 297).

**LAW 304. Law and the Rhetorical Tradition. 3 Units.**

In this interdisciplinary seminar we will explore the rhetorical underpinnings of legal argument. In the first half of the course, we will acquaint ourselves with relevant elements of the rhetorical tradition. In the second half, we will analyze a variety of legal texts (both written and oral) with an eye to the use and function of rhetorical principles, as well as the ways form and content are mutually constitutive. This course aims both to increase students' understanding of rhetoric as readers and interpreters of legal texts and to develop students' skills as writers and speakers. Students will be expected to participate in class discussion in addition to completing a series of writing assignments including the rhetorical analysis of legal and non-legal texts and the revision of students' legal writing. Special Instructions: This course can satisfy the Research "R" requirement. The instructor and the student must agree whether the student will receive "R" credit. For "R" credit, the paper is substantial and is based on independent research. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class participation, attendance, assignments, final paper. Automatic grading penalty waived for writers.

**LAW 307. Gender, Law, and Public Policy. 3 Units.**

Topics in this course will include equal protection standards, employment, family, reproductive rights, sexual harassment, rape, domestic violence, pornography, sexual orientation, diversity in the profession, feminist legal theory, international human rights, and intersections with race, ethnicity, class, and sexual orientation. Materials will include cases, commentary, problems, and media portrayals. Special Instructions: Course requirements will include class participation and either (1) a long paper, which will satisfy the research requirement or (2) short weekly reflection papers on the assigned readings, and a short final research paper. Students writing reflection papers will form teams and each member will be responsible for writing comments on one classmate's paper each week. There will be no final examination. A maximum of 10 students will be permitted to write the long paper for R credit. All students interested in R credit should pre-register by lottery for Law 307-0-02. Students who do not receive a spot in section 02 may enroll in section 01. Open to students from other schools with the consent of the instructor. To apply for this course, non-Law students must complete a Non-Law Student Course Add Request Form available on the SLS Registrar's Office website (Click Registration and then click Non-Law Students). Elements used in grading: Class participation, attendance, reflection papers, and final paper.

**LAW 310. Protecting Workers' Rights in Hard Times. 2-3 Units.**

Workplace law is at a difficult crossroads. With high unemployment, violations of labor laws widespread, and unionization at an all-time low, promoting workers' rights poses unprecedented challenges. This seminar will explore, in turn, a variety of pressing issues confronting worker advocates and policymakers. Through analysis of academic and non-academic readings, and candid conversations with attorneys and officials in the trenches, we will evaluate the contours of each problem and consider a variety of solutions that have been attempted or proposed. We will consider statutory and common-law reforms, as well as the quality of enforcement, new regulatory approaches, and private/nonprofit-sector initiatives. Among the topics to be explored are the "fissuring" of employment relationships through outsourcing, franchising, reliance on independent contractors, and the like; the prevalence of wage theft; the difficulties of redressing more subtle forms of workplace discrimination; the decline of private-sector unionization and the attack on public-sector unions; the precarious legal status of undocumented workers; the regulatory challenges involved in protecting workers' safety and health; and the proliferating contractual bans on workers' ability to pursue class actions and court adjudication. The course format will combine lecture, group discussions and guest presentations. Although there are no formal prerequisites, prior experience and/or coursework in at least one workplace-related field such as employment law, employment discrimination law, or labor law is recommended.

**LAW 311. Comparative Law. 3 Units.**

The big question in comparative law today - and one that is of key importance to anyone interested in international law - is whether we are currently witnessing a convergence of national legal systems. This course examines this question, as well as the related problem of American exceptionalism, by exploring key aspects of contemporary Western European legal systems. We will study a range of legal institutions and practices, including such topics as legal education, the role of judges and judging, constitutional courts and judicial review, criminal procedure and punishment, and the rise and regulation of consumer culture. In contrast to the traditional comparative law course, we will also devote substantial time to such pressing public-law questions as racial equality and affirmative action, gender equality and sexual harassment, and church-state relations. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class participation and exam or research paper.

**LAW 312. Criminal Procedure: Investigation. 4 Units.**

The law school offers two survey courses dealing with constitutional criminal procedure. "Criminal Adjudication" covers the formal pretrial and trial processes, including the right of counsel, prosecutorial charging criteria, grand juries, bail, speedy trial, discovery, plea bargaining, trial by jury, and double jeopardy. This course, "Criminal Investigation," covers police investigation in the form of searches and seizures, interrogations, lineups, and undercover operations, and hence examines the Fourth and Fifth (and, to a limited extent, the Sixth) Amendment rules regulating the police in these endeavors. It also incorporates some of the federal laws governing electronic communications and privacy. Students may take both Criminal Investigation and Criminal Adjudication. (There is, of course, no requirement to do so.) Elements used in grading: Final exam (in-school, open book), plus small adjustments for exceptional class participation.

**LAW 315. Criminal Procedure: Adjudication. 4 Units.**

The Law School offers two survey courses dealing with constitutional criminal procedure. "Criminal Investigation" will consider questions that arise under the fourth, fifth, and sixth amendments regarding investigations, interrogations, and charging decisions. This course, "Criminal Adjudication," will look at the way the judicial system handles criminal cases. Topics will include the right to counsel (and the concomitant right to "effective assistance" of counsel), prosecutorial discretion and plea bargaining, joinder and severance, discovery, the right to jury trial, double jeopardy, sentencing, and appellate review. Students may take both Criminal Investigation and Criminal Adjudication. (There is, of course, no requirement to do so.) Elements used in grading: Attendance, participation and final exam. Small grade adjustments will be made for exceptional class participation.

**LAW 317. Criminal Trial Juries. 3 Units.**

This seminar, which is taught by a local state court judge who has also served as an Assistant United States Attorney and law professor, examines the criminal trial jury from both a practical and theoretical perspective. The course will consider the history of the criminal jury trial, legal and strategic considerations in jury selection, jurors' ability to act as fact-finders, rules protecting jury deliberations, the consequences of juror misconduct, and juries and the death penalty. Students will observe portions of actual jury trials occurring in local courthouses. They will also examine legal decisions, theoretical critiques, and empirical research about the jury. Class discussion will consider the practical challenges for lawyers and judges posed by jury trials. This course will combine a one-hour seminar with a mandatory two-hour per week "practicum" involving time spent at court. Elements used in grading: Class participation and a final research paper.

**LAW 318. History of American Law. 3 Units.**

This course examines the growth and development of American legal institutions with particular attention to crime and punishment, slavery and race relations, the role of law in developing the economy, and the place of lawyers in American society, from colonial times to the present. Special Instructions: Any student may write a paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Final exam or paper. Automatic grading penalty waived for writers. Cross-listed with History (HISTORY 152 - Consent of instructor required) & (HISTORY 352B).

**LAW 319. Legislation. 3 Units.**

Lawyers work in a legal system largely defined by statutes, and constantly shaped by the application of legislative power. This course is about statutes and the legislative institutions that create them. It discusses some of the key laws governing access to legislative power and the procedures that culminate in the production of statutes in the legislature. The course is divided into two parts. The first part will focus on the acquisition of legislative power. Key topics include bribery laws, lobbying and indirect influence on legislative activity, and campaign finance regulations. The second part will focus on the exercise of legislative power. Through a number of public policy case studies, students will better understand the organization of the U.S. Congress, the ways in which power is exercised in that institution, and the intersection between politics, the law, and policymaking. Elements used in grading: Class participation and final exam. (Cross-listed with PUBLPOL 319).

**LAW 321. Patent Prosecution. 2 Units.**

This skill-based course examines the core requirements and strategies for drafting and prosecuting a patent application before the U.S. Patent & Trademark Office (US PTO). The class brings in real inventors and US PTO patent examiners to give students a real-world experience of developing a patent, understanding patentability and building patent portfolios, and getting a patent application prosecuted through the patent office. Students will interact with real inventors and US PTO examiners to gain the experience of getting a patent issued - through interactions with an inventor to develop an idea and draft a patent application, responding to rejections and office actions from the US PTO after filing the patent application, through interactions with a US PTO examiner to interview the office action and getting the application issued. This course is open to people with technical or non-technical backgrounds - all you require is an interest in patent law. A solid understanding of patent claims and internal mechanics (which this class focuses on) will be very helpful experience and background for law students interested in pursuing a career in any form of IP/patent litigation or transactional (prosecution, licensing, etc.) practice. Elements used in grading: Students are evaluated on participation, in-class and take-home exercises, projects relating to the drafting and prosecution of a patent application and extended take-home exam.

**LAW 322. Patent Litigation Workshop. 3 Units.**

This course simulates the strategy and pretrial preparation of a patent lawsuit. The course materials include information typical to a patent lawsuit: a patent, file history, prior art, and information regarding the accused product. Students will represent either the patentee or the accused infringer. Students will plan litigation strategy, meet with and advise a client, conduct written discovery, take and defend depositions, and brief and argue claim construction and motions for summary judgment. Some knowledge of patent law is presumed. Special Instructions: IP: Patents (Law 326) is a prerequisite for this course, but can be taken coterminously. Students must attend the first class session (or contact the instructor) or they will be dropped from the class or waitlist. Elements used in grading: Attendance, participation, writing assignments, exercises and oral arguments. Writing (W) credit is for students entering prior to Autumn 2012.

**LAW 323. Cross-Border Mergers and Acquisitions. 3 Units.**

The course will explore the complexities of cross-border mergers and acquisitions, with a particular focus on transatlantic and other international public M&A transactions. The subject-matter provides an opportunity to tie together different bodies of law relevant to M&A (corporate, contracts, securities, antitrust and other regulatory fields) and to confront the US, European, and emerging markets legal, business, and cultural environments in a deal-oriented context, including case studies of major transactions. We will go over the business and legal framework of cross-border M&A, deal-making strategies, transaction structures and key deal considerations, and explore the content of cross-border M&A agreements. Regulatory matters, deal risk management and hostile takeovers will also be addressed, as well as the broader policy and cross-cultural considerations underlying global M&A practice. International guest speakers will be invited to share their experience. The course will aim to provide students with a broad understanding of the legal and business aspects of major cross-border M&A transactions. This is an interactive, primarily practice-oriented course requiring active student participation. Special Instructions: Corporations recommended but not required. This course is open to GSB students with permission of the instructor. Elements used in grading: Class participation, oral presentations, contractual practice exercise, and final exam.

**LAW 324. Intellectual Property: Copyright. 3 Units.**

Copyright law is the engine behind not only such traditional entertainment and information industries as music, book publishing, news and motion pictures, but also software, video games and other digital products. This course examines all aspects of copyright law and practice, as well as the business and policy challenges and opportunities that the Internet and other new technologies present for the exploitation of copyrighted works. There are no prerequisites for this class. Elements used in grading: Final Exam (In-School, open book).

**LAW 325. The Role of the Modern General Counsel. 2 Units.**

(Same as GSBGEN 544) The news is filled with reports of one corporate crisis after another - names like BP, Goldman Sachs, Bank of America, AIG, Siemens, Toyota, and issues like backdating, bribery, antitrust violations, insider trading, procurement fraud, health and safety violations, consumer class actions and the like. And often the cry is heard - where are the lawyers? This course explores the evolution of the role of the general counsel in major American public companies and, more broadly, the expanding role of in-house counsel. These are the lawyers in the trenches, on the front lines of American businesses. Each week, we'll review another dimension of the general counsel's job. We'll consider how general counsel today play an important role on the executive team of major companies and explore the different ways in which general counsels manage large corporate legal departments and direct functional legal areas like litigation, IP, corporate and securities, M&A, environmental and employment law. We will also examine the professional responsibilities and legal obligations of the general counsel - including the delicate and sometimes conflicting reporting relationships to the CEO and the board of directors - and consider how an in-house legal department fits into a corporation's organizational structure and how it supports the company's operating units on a day-to-day basis. We will explore the general counsel's role in internal investigations, regulatory investigations and compliance programs, and governmental affairs. We will also consider current practices in how in-house lawyers select, collaborate with and evaluate outside counsel. The class will meet weekly and we will invite current and former general counsels to join us occasionally for our discussions. Each student will be expected to participate actively in class discussions, and will be required to complete two projects, each in collaboration with three other students and submitted as a team, presenting how the team would address a complex set of legal and business issues.

**LAW 326. Intellectual Property: Patents. 3 Units.**

In this course we cover the major aspects of patent law, primarily as applied in the United States: patentability, including novelty, nonobviousness, and enablement; infringement; and remedies. The emphasis is on essential legal principles and a policy analysis of the patent system. The course is designed to be useful both as solid background for non-patent-specialists and for those planning a career in the field. Introduction to Intellectual Property or consent of the instructor is a prerequisite for this course. No technical background is required. Elements used in grading: Class participation and final exam.

**LAW 327. Introduction to Organizational Behavior. 3 Units.**

Why are some organizations more successful than others? Is it their emphasis on innovation and risk taking? Their founders' eccentric and visionary personalities? Or perhaps their bureaucratic discipline and effectiveness? We will explore these questions by reviewing existing theory and research on organizational problems in a number of areas including: individual motivation and behavior; decision making and leadership; interpersonal and intergroup communication, influence and conflict; organizational culture; and inter-organizational competition and cooperation. The course focuses on the reasons for organizational founding and failure, the variety of organizational forms and the ways in which organizations and their members affect one another. You will participate in a number of group exercises to illustrate the theoretical and practical implications of addressing organizational problems and increasing overall performance. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper.

**LAW 328. Intellectual Property: Advanced Patents. 3 Units.**

This is an advanced seminar, open only to those who have taken patent law. We will discuss current cases, as well as some issues not covered in the basic class. We will also focus on current efforts to reform the patent system. Students will write and present a research paper on a patent law topic.

**LAW 329. Intellectual Property: International. 3 Units.**

Music, motion pictures, even books travel instantaneously around the globe. So do patented inventions; so do brands and trademarks. Copyright and trademark licenses increasingly take foreign exploitation into account. Litigation over an important patented invention often proceeds on several foreign fronts. No lawyer practicing intellectual property law today can afford to overlook the substantive and procedural differences that separate one country's law from another's. This course will focus on the counseling considerations that surround the exploitation of intellectual properties in domestic and foreign markets through licensing, litigation, or both. The course will survey the principal legal systems and international treaty arrangements for copyright, patent, trademark and neighboring rights, as well as questions of jurisdiction, territoriality, national treatment and choice of law.

**LAW 330. International Human Rights. 3 Units.**

This course examines the law of international human rights, analyzing various categories of rights, from civil and political human rights, to social and economic human rights, to group and collective rights. It studies the structure and processes of international and regional courts that adjudicate human rights claims and international treaty bodies that report on State human rights action. It explores debates about the normative justifications for human rights, and whether and how these debates impact upon the application and enforcement of human rights. Special Instructions: Students have the option to write a long research paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class participation; exam or final long research paper.

**LAW 331. Intellectual Property: Strategy for Technology Companies. 3 Units.**

This course focuses on the actual day-to-day intellectual property issues faced by a technology-based company. Each class will cover a different aspect of an intellectual property practice, covering such topics as the establishment of a patent program, trade secret management, intellectual property licensing, the intellectual property issues arising during M&A transactions and strategic alliances, patent litigation, and managing open source software. The emphasis in each class will be on case studies, guest speakers, and interactive exercises designed to simulate scenarios commonly faced by an intellectual property attorney, including the negotiation of patent cross licenses, the drafting of intellectual property representations and warranties, the generation of intellectual property disclosure and licensing policies, and the identification and prioritization of patentable inventions. Prerequisite: Basic familiarity with patent law is strongly recommended for this course. If necessary, Intellectual Property: Patents can be taken concurrently. Elements used in grading: Class participation and written assignments.

**LAW 333. Problem Solving and Decision Making for Public Policy and Social Change. 4 Units.**

This course introduces skills and bodies of knowledge useful for careers in law, public policy, and achieving social change at scale. These include framing problems; designing, implementing, and evaluating strategies; system design; cost-benefit analysis; decision making under uncertainty; heuristics and biases that affect empirical judgments and decision making; methods for influencing people's behavior ranging from incentives and penalties to "nudges;" and human-centered design. The course will be taught through problems, cases, and a field project to solve real-world problems on or near the Stanford campus, with the goal of integrating strategic thinking and behavioral insights with human-centered design and systems design. The course may be of interest to students in Law and Policy Lab practicums who wish to broaden their policy analysis skills. Enrollment: Limited to 32 students, with priority given to students in Law School, the MPP program, and the IPS program in that order. Students other than law students must seek the consent of the instructor. Elements used in grading: Class participation, midterm assignment, and final assignment. Cross-listed with International Policy Studies (IPS 207A) & Public Policy (PUBLPOL 305A).

**LAW 334. International Criminal Law. 3 Units.**

The roots of modern international criminal law can be traced to the Nuremberg and Tokyo war crimes trials held after World War II. Since the establishment by the Security Council of the United Nations established the International Criminal Tribunal for the former Yugoslavia twenty years ago, the field has experienced remarkable growth. The international community has created a range of new international criminal tribunals to investigate and prosecute international crimes. National courts are now also exercising an expanded domestic and universal criminal jurisdiction over international or transnational crimes. The substantive criminal law has also expanded, and notions of individual responsibility for international crimes have evolved and extend the reach of international criminal law. At the same time, new debates have emerged about the suitability of using criminal justice mechanisms to respond to mass atrocity situations. This course will explore legal and institutional responses to transnational and international crime. It will examine traditional forms of international cooperation to address transnational crimes and the concept of universal jurisdiction that provides a basis for treating certain crimes as "international." It will cover the range of institutions created to punish international criminals, including the Nuremberg and Tokyo tribunals, the ad hoc tribunals for the former Yugoslavia and Rwanda, the "mixed" international/domestic tribunals such as the Special Court for Sierra Leone, the Cambodia war crimes tribunal, the Special Tribunal for Lebanon. As these tribunals approach the end of their mandates, the International Criminal Court is assuming greater importance. The progress of the ICC will be considered and, so too, the role of the United States in all of these developments. Alternative institutional arrangements and options for responding to international crimes, such as truth commissions and amnesties will also be examined. The course will also include: (1) the moral and political goals that motivate responses to international crimes; (2) the role of international politics and foreign policy considerations in shaping responses to international crimes; (3) the suitability of different institutional models for addressing international crimes. The grade for this course will be based on a final research paper of 26 pages, double spaced. The topic should relate to a subject covered directly or indirectly by the syllabus or readings. Elements used in grading: Class participation and final paper.

**LAW 335. Legal Ethics. 3 Units.**

This course introduces students to the goals, rules and responsibilities of the American legal profession and its members. The course is designed around the premise that the subject of professional responsibility is the single most relevant to students' future careers as members of the bar. These issues come up on a constant basis and it is critical that lawyers be alert to spotting them when they arise and be educated in the methods of resolving them. As such, the course will address many of the most commonly recurring issues that arise, such as confidentiality, conflicts of interest, candor to the courts and others, the role of the attorney as counselor, the structure of the attorney-client relationship, issues around billing, the tension between "cause lawyering" and individual representation, and lawyers' duty to serve the underrepresented. In addition, we will delve into some more personal ethical issues that reflect on why students have chosen law as a profession and how lawyers compose careers that promote or frustrate those goals. Special Instructions: Grades will be based on the final examination, which will be part essay and part objective. The instructor retains the right to take class participation into account. Attendance is mandatory. Elements used in grading: Class participation, attendance and final examination.

**LAW 336. Real Estate Transactions and Commercial Development. 3 Units.**

Real Estate Transactions and Commercial Development examines the structuring, negotiation and documentation of commercial real estate transactions. Working both individually and in groups, students will learn the requisite skills for drafting and negotiation leases, letters of intent, sale contracts and related financing documents. As time permits, development-related matters will be explored, including the legal aspects of site acquisition, design and construction. Classes will be a mixture of lectures, interactive discussions, and several mock negotiations. Elements used in grading will include Class attendance, individual and group project participation, and written assignments.

**LAW 337. Intellectual Property: Trademark and Unfair Competition Law. 3 Units.**

This course will consider the protection and enforcement of trademarks and related state rights in brands and names, including the right of publicity. There is no prerequisite, though some students will have taken Introduction to Intellectual Property. Elements used in grading: Class Participation, Exam (Open-book take-home).

**LAW 338. Land Use. 3 Units.**

This course focuses on the pragmatic (rather than theoretical) aspects of contemporary land use law and policy, including: nuisance as a land use tool and foundation for modern land use law; use and abuse of the "police power" (the legal basis for land use control); zoning flexibility; vested property rights, development agreements, and takings; redevelopment; growth control; and direct democracy. We explore how land use decisions affect environmental quality and how land use decision-making addresses environmental impacts. Special Instructions: All graduate students from other departments are encouraged to enroll, and no pre-requisites apply. Student participation is essential. Roughly two-thirds of the class time will involve a combination of lecture and classroom discussion. The remaining time will engage students in case studies based on actual land use issues and disputes. Elements used in grading: Attendance, class participation, writing assignments, and final exam. This course is cross-listed with Earth Systems 238.

**LAW 339. Employment Law. 2 Units.**

Workplace issues have become one of the fastest-growing areas of state and federal law. Employment-related lawsuits filed in federal court have tripled in volume in the past decade, and now account for a tenth of all civil cases. Many state courts have experienced a similar burgeoning of their employment law caseloads. This course examines this diverse, rewarding, and rapidly evolving area of legal practice by considering the diverse array of laws and institutions that regulate the employment relationship. The substantive focus of the course is on laws that affect employees in non-unionized settings, such as protections against dismissal without cause, wage and hour restrictions, workplace privacy, covenants not to compete, and mandatory arbitration of employment disputes. The course does not cover either Employment Discrimination or Labor Law, both of which are offered as separate courses. The pedagogic approach is to ask students to work through problems, on your own and in small groups in class, where you have to generate and evaluate options to counsel clients on workplace-law issues. Special Instructions: Early Add/Drop Deadline: Add/Drop decisions must be made the first week of class. Exceptions are at the instructor's discretion and will be considered on a case-by-case basis. No laptops in class, except when designated by instructor. Students enrolled in Employment Law have the option to concurrently enroll in Advanced Legal Research: Employment Law (Law 339A) for one unit. See Law 339A course description for details. Elements used in grading: Class participation (30%), two 5-7 page (single-spaced) memos involving research, one due mid-quarter and one due at the end of the quarter (35% each). No final.

**LAW 339A. Advanced Legal Research: Employment Law. 1 Unit.**

This research module would help students develop strategies for evaluating possible courses of action in workplace law. Students will be asked to complete three assignments designed to help comprehensively research and analyze workplace law issues. The first two assignments will be undertaken in conjunction with the first memo assigned in Employment Law, and the third with the second memo. Students in Employment Law are strongly encouraged to take this module though it is not required, and current enrollment in Employment Law is necessary. The work will all be out of class, but the instructors will be available to meet with students individually to go over their research plans and offer feedback. Prerequisite: Concurrently taking Employment Law (Law 339). Elements used in grading: Written Assignments.

**LAW 340. Comparative Corporate Capitalism. 2 Units.**

Forms of corporate ownership and control vary widely from one country to another. The type of corporate capitalism based on widely distributed share ownership that is found in the United States, and that is the usual subject of law school corporate law and corporate governance courses, is in fact an outlier. For example, in most countries public corporations have a controlling shareholder. In this seminar we'll examine the organization of enterprise in a range of both developed and developing countries to the end of understanding their variety, including the influence of a country's political governance. As part of this exercise, we'll look at the ways in which organizations and organizational law have evolved in different countries, and we'll speculate on the directions in which they'll continue to evolve in the future. Finally, we'll address the relationship between forms of capitalism and economic development. Students will do a series of short weekly papers on the readings. Elements used in grading: Series of short weekly papers.

**LAW 343. Intellectual Property: Scientific Evidence in Patent Litigation. 3 Units.**

(Same as GENE 243). This seminar will explore the role of scientific experts in patent infringement litigation. The class will have a mix of law students and doctoral candidates from the sciences and engineering. The law students must have some familiarity with United States patent law from classes or work experience. The graduate students must have completed their required coursework and have TGR status. In other areas of the law where scientific experts are used – medical malpractice, environmental law, criminal law – the science itself is often in dispute. In patent cases, however, the parties generally agree on the science. This affects the relationship between the lawyer and the expert and the substantive content of their interactions. Patent experts need to be able to explain science to the judge and jury, of course. But they also must help the litigators to choose which legal issues to press and which to concede, and to be aware of how the complications of the science might help, hurt, obscure or reveal how the law should be applied to the facts. Thus, both the lawyer and the scientist must educate the other about their specialties. For the first several weeks, the class will examine judicial decisions and trial documents involving scientific evidence in patent litigation. The rest of the quarter is largely devoted to work on the final projects: simulations of expert testimony in a patent case. Students will work together in teams and will meet regularly with the instructor in order to: select suitable patents; identify a balanced issue on either validity or infringement; prepare claim charts and materials for testimony; and give short, illustrated talks to inform their classmates about their projects. Finally, they will choose sides (patent owner or accused infringer) and finetune their presentations. The simulations will be performed at the end of the quarter before panels of practicing patent lawyers.

**LAW 344. Law and Economics Seminar I. 2-3 Units.**

This seminar will examine current research by lawyers and economists on a variety of topics in law and economics. Several sessions of the seminar will consist of an invited speaker, usually from another university, who will discuss his or her current research. Representative of these sessions have been discussions of compensation for government regulations and takings, liability rules for controlling accidents, the definition of markets in antitrust analysis, the role of the government as a controlling shareholder, and optimal drug patent length. Special Instructions: You may write a series of short commentaries on the guest speakers' papers, of which there will be four. Students electing this option will be graded on a Mandatory Pass/Restricted Credit/Fail basis and receive 2 units of credit. Alternatively, you may write a single research paper on a law and economics topic of your choice. This will satisfy the Law School's Research requirement. These papers will be graded on an Honors/Pass/Restricted Credit/Fail basis. (You may write a single longer paper for two quarters if you enroll in the Seminar in the Winter as well.) Students taking the seminar for R credit can take the seminar for either 2 or 3 units of credit, depending on the paper length. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. There is no formal economics prerequisite to take this seminar, though students doing the longer research papers typically have some prior training in economics. Students may take both Law and Economics Seminar I and Law and Economics Seminar II in either order (neither is a prerequisite for the other). This seminar is cross-listed with the Economics Department (same as Econ 354). Elements used in grading: Four commentaries or one research paper. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration) to the instructors. See Consent Application Form for submission deadline.

**LAW 345. Law and Culture in American Fiction. 3 Units.**

This seminar examines the way literary texts register changes in property law, the law of contracts, intellectual property and legal constructions of race, gender, and privacy, especially as they relate to the maintenance of personal identity, community stability, and linguistic meaning. The terms and stakes of these relationships will inform our readings of the texts themselves, as well as our understanding of their representations of law. The writers whose work we will consider include James Fenimore Cooper, Herman Melville, Henry James, Nella Larsen, Willa Cather, William Faulkner, and Sherman Alexie. Each week, a novel or story will be paired with relevant legal and historical readings. We will also consider the points of contact between literary narrative and narrative in law. English Department cognate course. Special instructions: Course requirements include class attendance and participation, three short response papers, and two longer papers. For Research "R" credit, students may petition to complete one long paper based on independent research. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class participation, attendance, written assignments and final paper. Automatic grading penalty waived for writers.

**LAW 347. Law and Culture in American Film. 3 Units.**

In this course we will attend to representations of law in 20th century American film - particularly Westerns, gangster films, and courtroom dramas. The themes we will address include: the asymmetry of law and justice, the relationship between law and social change, the public and private identities of lawyers, anxiety that the rule of law fails individuals and minorities, and the disciplinary modes of both law and culture. We will also attend to the convergence of narrative, visual, aural, and dramatic practices in legal proceedings and cinematic productions. Special instructions: Course requirements include class attendance and participation, three short response papers, and two longer papers. For Research "R" credit, students must complete one long paper based on independent research. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class participation, attendance, assignments, final paper. Automatic grading penalty waived for writers. This course is open to first year Law School students. Writing (W) credit is for 3Ls only.

**LAW 348. Health Law: Finance and Insurance. 3 Units.**

This course provides the legal, institutional, and economic background necessary to understand the financing and production of health services in the U.S. We will discuss the Affordable Care Act, health insurance (Medicare and Medicaid, employer-sponsored insurance, the uninsured), the approval process and IP protection for pharmaceuticals, and antitrust policy. We may discuss obesity and wellness, regulation of fraud and abuse, and medical malpractice. The syllabus for this course can be found at <https://syllabus.stanford.edu>. Elements used in grading: Participation, attendance, class presentation, and final exam. Cross-listed with Graduate School of Business (MGTECON 331), Health Research & Policy (HRP 391) & Public Policy (PUBLPOL 231).

**LAW 349. Employment Discrimination. 3 Units.**

This course will examine legal responses to the barriers to workplace equality that are faced by minority groups. The course will survey the relevant doctrine, focusing primarily on federal employment discrimination statutes, but also addressing more expansive antidiscrimination protections under some state statutes, and local ordinances. Covered topics include sexual and racial harassment, sexual orientation discrimination, and affirmative interventions aimed at increasing the minority group and/or female representation in certain job categories or segments of the labor market. In addition to surveying the doctrine as it stands and as it has developed over time, we will also explore the doctrinal and conceptual difficulties inherent in identifying invidious discrimination and in devising appropriate remedies. Elements used in grading: Class participation and exam.

**LAW 351. Corporate Income Taxation. 4 Units.**

This course is an intensive introduction to the federal income taxation of large American business corporations. As a result, it does not touch on the taxation of partnerships or S corporations, which are the tax-preferred forms for many privately-held business enterprises and investment funds. The course reviews the tax considerations relevant to each stage in the life cycle of a corporation, but emphasizes business acquisitions and divestitures. The instructor makes special efforts to relate classroom topics to current public deals, to show how tax law develops through complex interactions among Congress, administrative agencies, courts and taxpayers, and to demonstrate how lawyers (in this case, tax lawyers) add value for their clients in structuring transactions. Class participation is expected, but except in extraordinary cases will not be graded. Basic Tax or permission of the instructor is a prerequisite. The student's final grade will be based on a final exam, although class participation in rare cases may improve a student's grade. Elements used in grading: Final Exam.

**LAW 352. International Tax. 2 Units.**

This course examines the United States federal income taxation of international operations and transactions, including international joint ventures and M&A transactions. Income source, foreign tax credits and Subpart F are important. International transfer pricing rules also will be addressed. Elements used in grading: Final Exam.

**LAW 353. Corporate Acquisitions. 3 Units.**

This course examines the corporate acquisitions from a transactional and financial perspective. It begins with a review of a corporate acquisition agreement, the document at the center of a friendly transaction. We then consider a variety of explanations for how corporate acquisitions may promise to create value, and think about why they often fail to meet that expectation. In doing so, we will review the basics of accounting for acquisitions and their tax treatment. From there we move on to the corporate law side of acquisitions - the different forms the transaction can take, the rules governing hostile transactions, freezeouts of minority shareholders, and proxy fights. Elements used in grading: Final exam.

**LAW 355. Taxation I. 4 Units.**

This course provides an overview of the federal income tax. Elements used in grading: Class participation and final exam.

**LAW 358. Advanced Antitrust: Litigating an Antitrust Case. 3 Units.**

We will examine in depth four pivotal antitrust cases: Polygram Holdings, Microsoft, Leegin and Oracle. We will study the record created in the lower courts and then analyze how the court came to the conclusions it did. Students will write an amicus brief and argue a motion for preliminary injunction or an appeal.

**LAW 359. Tax Policy. 2 Units.**

This course will explore various tax policy issues. In past years, the issues we've explored have included the carbon tax, health care, social security, consumption tax, tax compliance, tax shelters and school financing. Special Instructions: Grades will be based on either (A) class participation and memos responding to the discussion questions for any three of the sessions or (B) class participation and a research paper on a topic of your choosing (subject to instructor approval). Option B is Research (R) credit. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class Participation, attendance and written assignments.

**LAW 360. Advanced Empirical Methods. 3 Units.**

This course will examine topics in the empirical evaluation of law and policy for those who have already been exposed to basic statistics and regression. The course will begin with a discussion of problems of causal inference that have plagued some traditional statistical approaches and then examine the virtues and limitations associated with some more advanced techniques, such as regression discontinuity analyses and instrumental variables estimation. The course is designed to move students towards a publishable empirical research project. Given the constraints of the quarter system, the product is more likely to end with a detailed project design rather than a fully implemented study. Successful completion of the course requires regular attendance, and: (1) Careful reading of the course assignments coupled with frequent one page written assignments on the reading; (2) A PowerPoint presentation to the class discussing a major paper; and (3) A detailed project design using one of the empirical approaches discussed in the class. Elements used in grading: Attendance, written assignments, classroom presentation and paper.

**LAW 363. History of the Common Law in England and America. 3 Units.**

The right to a trial by jury, the presumption of public access to criminal proceedings, and citizenship by birth rather than blood, all enshrined in the U.S. Constitution, ultimately derive from English common law. American private law-including contracts, torts, and property-is indebted to the same heritage. This course will examine the history and theory of the common law with the aim of demonstrating its continuing relevance. Three principal strands will run through the class. The first will trace the substantive and procedural evolution of the common law from its early English roots and writs to its role in the American legal system today. Another thread will emphasize conceptions of the common law, including both historical accounts derived from the writings of Sir Edward Coke, Matthew Hale, Jeremy Bentham, and Oliver Wendell Holmes, and more recent theoretical contributions by Guido Calabresi and Ronald Dworkin, among others. Finally, the course will examine central institutions of the common law, including the judge who follows precedent and the jury, and compare common law modes of adjudication with the alternative methods employed by the Chancellor in equity and judges in the civil law system. Source materials will include historical cases and documents as well as some secondary articles. Special Instructions: Grades will be based on class participation and (1) the final exam or (2) a long independent research paper for Research (R) credit. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class Participation, assignments, final exam or final paper. This course is cross-listed with Hist 131B.

**LAW 368. Law and Biosciences: Neuroscience. 3 Units.**

This seminar examines legal, social, and ethical issues arising from advances in the biosciences. This year it will focus on neuroscience. It will examine how neuroscience will affect the law, and society, through improvements in predicting illnesses and behaviors, in "reading minds" through neuroimaging, in understanding responsibility and consciousness, in "treating" criminal behavior, and in cognitive enhancement. Students who have taken the Law and the Biosciences (Genetics) seminar in past years may receive additional credit for taking this year's class. The class is open to 1Ls. Elements used in grading: Class participation, attendance and final research paper. Cross-listed with Health Research & Policy (HRP 211).

**LAW 372. Legal History Workshop. 2-3 Units.**

The Legal History Workshop is designed as a forum in which faculty and students from both the Law School and the History Department can discuss some of the best work now being done in the field of legal history. Every other week, an invited speaker will present his or her current research for discussion. This year the theme of the Workshop will be Conservative Legal Movements from 1950 to the Present. Speakers will include Reva Siegel, the Nicholas deB. Katzenbach Professor of Law at Yale Law School, and Thomas Sugrue, the David Boies Professor of History and Sociology at the University of Pennsylvania, as well several other scholars of law, the social sciences and humanities writing about this topic. In the week prior to a given speaker's presentation, the class will meet as a group to discuss secondary literature relevant to understanding and critiquing the speaker's research. Students will then read the speaker's paper in advance of the following week's workshop presentation. Special Instructions: Students are required to write a brief response to each speaker's paper. There will be a total of four speakers, and thus four papers. Guidance will be provided concerning how to frame these response papers, which will be due every two weeks - i.e., on the day before speaker presents and students will receive "W" writing credit. Students taking the course to receive "R" research credit are required to write a research paper on a legal history topic that they choose (in consultation with the professor). After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Students taking the course for R credit can take the course for either 2 or 3 units, depending on the paper length. Enrollment will be limited to 30 students - 20 from SLS who will be selected by lottery and 10 from H&S. Elements used in grading: Class participation, attendance, assignments and final paper. Writing (W) credit is for students entering prior to Autumn 2012. Cross-listed with History (HISTORY 307A).

**LAW 373. Protection of Personality. 3 Units.**

This course will examine the theoretical foundations and common law development of the range of tort remedies designed to afford protection to the interests in personality. Defamation, the right of privacy, and claims of emotional distress and harassment will receive particular attention, along with the constitutional defenses to these claims, based on the First Amendment, which have arisen since the mid-1960's. Elements used in grading: Final Exam.

**LAW 377. Partnership Tax. 2 Units.**

This course will cover the basic rules that govern the tax treatment of partnerships and partners. Prerequisites: Taxation I required; Corporate Income Taxation suggested but not required. Elements used in grading: Class Participation, Final Exam.

**LAW 378. Banking Law. 3 Units.**

This course will examine the legal and regulatory system governing financial institutions, with an emphasis on banks. It will do so by exploring the underlying economics of banking, and the ongoing effort to reform financial regulation. Questions addressed will include: Why do we regulate financial institutions? What dangers do we want to avoid? How well does the current regulatory system achieve what we want to achieve? What alternative approaches can be taken? What are the costs and benefits of the current system, and those of the alternatives? Elements used in grading: Class participation, attendance, final exam.

**LAW 381. Wrongful Convictions: Causes, Preventions and Remedies. 3 Units.**

Over the course of the past two decades there has been increasing recognition that, despite its commitment to the concept of proof beyond a reasonable doubt, our criminal justice system yields a steady stream of wrongful convictions. This Seminar will focus on some causes, preventions and potential remedies for this phenomenon. Subjects to be addressed include eyewitness identification, interrogations and confessions, jailhouse informant testimony, forensic evidence, the psychology of tunnel vision and confirmation bias, the role of appellate review and habeas corpus, the role of clemency, the impact of the problem on the death penalty, and issues around compensation of those who have been wrongly convicted. As we study these subjects, we will also reflect on whether taking some reforms too far will impair on the efficacy of legitimate law enforcement. The class will meet for two hours each week. In addition, there will be three additional evening or weekend sessions (to be scheduled at the convenience of the participants). During each of these additional sessions, students will watch a film involving a wrongful conviction and will engage in conversation about the particular case involved. Each student will be responsible for preparing a paper on an appropriate topic to be chosen in consultation with the instructor. Consent Instructions: After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class participation; Paper.

**LAW 387. Internet Torts and Crimes. 2 Units.**

The purpose of this course is to cover the highlights of torts and crimes on the Internet. Topics include cybercrimes (spam, fraud, cyberbullying), privacy, and First Amendment issues (defamation, threats, and indecent speech). The perspective will be from that of a practitioner faced with various fact patterns and known case law who has to advise his/her client on the best course of action. (Think stud poker as applied to the practice of law.)

**LAW 388. Technological, Economic and Business Forces Transforming the Private Practice of Law. 2 Units.**

The private commercial practice of law is undergoing fundamental change. Modern technological, economic and business forces are placing extreme pressure on the traditional private attorney law firm model. These forces will transform, eliminate or replace virtually every aspect of legal services provided by attorneys. Traditional foundations of the large law firm model such as "billable" hours, summer associate programs, large staffs (e.g., paralegals and secretaries) and high associate-to-partner ratios are becoming (or have already become) relics of a bygone era. Today, the business need for clients to select a one-stop, full-service law firm for their important legal work has, in a variety of circumstances, disappeared. Sophisticated clients are utilizing a wide range of legal services firms and companies for their legal work. As a result, the diversity of legal business models and manner of providing legal services has greatly expanded. Often individual lawyers (or very small firms) can provide high-level legal services by assembling "virtual" teams in which each team member handles a different constituent part of the representation. "In-sourcing," "out-sourcing" and the transferring of large portions of work to non-lawyer legal support vendors are all becoming fixtures of the legal economy. This rapid increase in diversity on both the supply and demand side of the legal economy will greatly alter the skills and prerequisites required for the successful private practice of law. The course is composed of two parts. In part one, the technological, economic and business practices transforming the legal profession are identified and their impact on the traditional approaches to private practice law firms will be examined. In part two, the course focuses on how individual lawyers can adapt to or embrace the forces transforming law to improve their practice and succeed in the new environment. Part two of the course will additionally focus on how specific skills such as project management, social networking and information management will be crucial to a successful legal career. Part two of the course will also discuss how the changing legal environment creates new ethical and professional challenges for attorneys. Elements used in grading: Attendance, class participation and written assignments. Writing (W) credit is for students entering prior to Autumn 2012.

**LAW 390. Current Issues in Law and Business. 2 Units.**

This course will focus on issues in law and business that are both important to practitioners and the subject of academic or political debate. We will cover a range of legal and economic issues, including: the financial performance of "socially responsible" firms; claims of short term-ism in management of public companies; investment banker liability risk arising from their advice on mergers or for conflict of interests; challenges of capital investment in emerging markets; financing of financially distressed companies; and municipal bankruptcy. On each of these issues, we will hear from prominent practitioners and/or academics in the field, but the classes will rely heavily on student discussion and critical evaluation of the papers and positions we examine. Elements used in grading: Class Participation, Written Assignments.

**LAW 393. Remedies. 3 Units.**

This is a seminar in the law, history and culture of remedies. We will survey the dominant legal doctrines for providing redress, the relationship between legal rights and traditional legal remedies, as well as the unique, sometimes paradoxical, features of remedies for constitutional violations - especially in the area of civil rights. The seminar will also survey the rich non-legal and interdisciplinary discourses on theories of redress and repair including scholarship on reparations, restorative justice, and rectification. In order to develop a comparative base for assessing the capacity of law to reach and repair complex group-based harms, special attention will be given to cultural practices that have emerged to supplement, substitute for, and sometimes subvert legal remedies. Special Instructions: Students may choose to write either a substantial research paper or a series of three short papers for the course. Students who choose to write a substantial research paper will receive Research (R) credit. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class participation, attendance, written assignments and paper.

**LAW 394. Legislation and Administration. 3 Units.**

This course explores the world of legislation and administration that defines much of our modern legal order. By analyzing agencies, statutes, and legislative procedures, the course prepares students to think about the structures and processes of government, and how they influence legal outcomes that would otherwise be defined largely by social norms, economic transactions, and common law adjudication. Drawing on examples from a variety of substantive areas, the course covers the legislative process, approaches to statutory interpretation, the role of agencies and the legislature in a system of separated powers, delegation to agencies, the interaction of common law doctrines and agency practices, and techniques of agency regulation and adjudication. First-year students are welcome. Special Instructions: Students who receive credit for Legislation (Law 319) and/or Statutory Interpretation (Law 425) may not receive credit for Legislation and Administration (Law 394) and vice versa. Elements used in grading: Class Participation, Attendance, and a Final Exam. CONSENT APPLICATION: To apply for this course, students must complete and submit a Consent Application Form available on the SLS website (Click Courses at the bottom of the homepage and then click Consent of Instructor Forms) to the instructor(s). See Consent Application Form for submission deadline.

**LAW 395. Creating New Legal Tools to Address the Environmental Impacts of Energy Projects. 3 Units.**

A domestic energy boom is underway with major new energy projects being sited on both private and public lands, including wind projects, utility-scale solar projects, oil and gas projects, and associated transmission lines and pipeline projects. Many of these projects have significant footprints, with related negative impacts on their local environments. Students will work with policymakers in Sacramento and Washington this fall in evaluating new regulatory and market-based options to address the environmental impacts of energy-related projects. In doing so, seminar participants will be working "in real time" on new state and federal initiatives to develop more expedited and effective mechanisms to compensate for environmental impacts of energy and other infrastructure projects, including a number of large renewable energy projects that currently are being developed on public and private lands in the southwest. The seminar also will explore the full range of environmental issues associated with major infrastructure development, including an in-depth discussion and evaluation of permitting reforms and environmental issues that the Administration is now addressing under Executive Order 13604 (President Obama's infrastructure permitting reform initiative).

**LAW 397. Law and Economics of Death Penalty Seminar. 2-3 Units.**

This seminar will examine the legal and policy aspects of a capital punishment regime. Students will have the option to take the seminar alone or to combine it with a practicum. This seminar component will explore three primary issues: 1) the Supreme Court's forty-year effort to define what cases can permissibly receive the death penalty and the procedures under which it must be imposed; 2) the arguments for and against the death penalty, with a major focus on whether the death penalty deters, is administered in a racially biased way, or is otherwise implemented in an arbitrary and capricious manner; and 3) what the U.S. and international status of the death penalty is today and what the prospects are for the future. The readings on deterrence and racial discrimination will entail some substantial statistical analysis, although a background in statistics, though helpful, will not be required. Special Instructions: After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Students taking the course for R credit can take the course for either 2 or 3 units, depending on the paper length. Writing (W) credit is for students entering prior to Autumn 2012. Elements used in grading seminar: Written assignments and final paper. Students who take the practicum component must attend the 9 seminar class meetings and do all reading and writing assignments of the seminar except that instead of writing a final paper of their choosing they will focus on actual policy or litigation work that will be arranged with various death penalty abolition groups. I expect that there will be an opportunity to work on policy relevant research that will be of assistance in the repeal movement (as well as attending the 9 seminar class meetings and doing the readings for each class).

**LAW 400. Directed Research. 1-4 Unit.**

Directed Research is an extraordinary opportunity for students beyond the first-year to research problems in any field of law. The final product must be embodied in a paper or other form of written work involving a substantial independent effort on the part of the student. A student must submit a detailed petition of at least 250 words, approved by the sponsoring faculty member, outlining his or her proposed project and demonstrating that the research is likely to result in a significant scholarly contribution. A petition will not be approved for work assigned or performed in a course, clinic, or externship for which the student has or will receive credit. A petition must indicate whether the product is intended for publication in a law review or elsewhere. A student may petition for "Directed Research: Curricular Development" when the work involves assisting a Law School faculty member in developing concepts or materials for new and innovative law school courses. Both the supervising faculty member and the Associate Dean for Curriculum must approve petition for "Directed Research: Curricular Development." Students must meet with the instructor frequently for the purposes of report and guidance. Unit credit is by arrangement. Students whose projects warrant more than four units should consider a Senior Thesis or the Research Track. See SLS Student Handbook for requirements and limitations. With the approval of the instructor, a directed research project of two-units or more may satisfy one research writing course (R course). Elements used in grading: As agreed to by instructor. Directed Research petitions are available on the Law School Registrar's Office website (see Petition Process and Forms).

**LAW 401. Venture Capital II: Starting and Running a Venture-Backed Company. 3 Units.**

This class will focus on the legal and non-legal tactical details of entrepreneurial endeavors. The legal specifics of corporate formation, tax, and contracts are well covered by a variety of other courses at the Law School and will only be reviewed briefly in this course. Instead, the course will examine the life stages (formation, financing, execution, and exit) of a venture-backed company from the entrepreneur's perspective. Students who are interested in either starting companies or working with startup founders as their legal counsel will solidify their foundations in this course. There will be no textbook - course materials will include PowerPoint slides, readings from various entrepreneur and venture capital blogs, sample business plans, and other sources. Grades will be based on class participation (10%), short reflection papers and/or short problem sets (15%), and a 60 minute oral business plan presentation with accompanying slide deck and written business plan. This course is limited to 16 students with students who have taken VC I receiving priority in enrollment. Prerequisites: A modest background in financial analysis or Excel, such as might be obtained in QM finance (Law 467), is a prerequisite for this course. Venture Capital I will be helpful but is not a prerequisite. Elements used in grading: Class participation (20%), and a 60 minute oral business plan presentation with accompanying slide deck and written materials (80%). CONSENT APPLICATION: To apply for this course, students must complete and submit a Consent Application Form available on the SLS website (Click Courses at the bottom of the homepage and then click Consent of Instructor Forms) to the instructor. See Consent Application Form for submission deadline.

**LAW 402. Moot Court. 1 Unit.**

The major moot court activity at Stanford Law School is the Marion Rice Kirkwood Memorial Competition, which takes place each year during Autumn and Winter terms. Autumn term will be dedicated to brief writing and completion of the written portion of the Competition; the oral argument portion of the Competition will be conducted during the first four weeks (approx.) of Winter term. Students on externship and in clinics may enroll if permitted by their respective programs. In Autumn term there are only a few class meetings, which can be recorded, as well as conferences and practice arguments, which are scheduled individually. In Winter term, students must participate in scheduled oral arguments. The preliminary rounds are in the evening; the semifinal and final rounds are in the late afternoon. Prior to the Competition itself, materials and lectures are provided on research, brief writing, and oral advocacy techniques. Registration for the Kirkwood Competition is by team. Each team is required to submit an appellate brief of substantial length and quality, and to complete at least two oral arguments, one on each side of an actual case. The first draft of the brief is reviewed and critiqued by the course instructors. The final draft of the brief is scored by the course instructors and members of the Moot Court Board. The course also offers digital recording and critiques of practice oral arguments. Panels of local attorneys and judges serve as judges who score the oral argument portion of the Competition. Teams are selected for the quarterfinal, semifinal and final round of the Competition based on their brief and oral advocacy scores. The final round of the Competition is held before a panel of distinguished judges and the entire Law School community is invited to attend. Special Instructions: In order to maintain academic standards, enrollment in the Kirkwood Competition is limited to 20 two-person teams. This limit will be strictly enforced. Registration forms will be distributed Spring term. If the program is oversubscribed, a lottery will be held to determine participating teams and to establish a waiting list. The final drop deadline for the course will be Friday of the first week of classes. Enrollment in both Autumn (2 units) and Winter (1 unit) terms is required. The final grade for both Autumn and Winter terms and the Professional Skills credit will be awarded upon the completion of the course requirements. Registration and Consent Instructions: Instructions on how to register for the Moot Court competition are sent out to students each year in Spring term for the coming academic year. The registration process is separate from the regular class registration process. Elements used in grading: Satisfactory completion of appellate brief and oral arguments. Early application and drop deadlines.

**LAW 403. Senior Thesis. 5-8 Units.**

An opportunity for third-year students to engage in original research and to prepare a substantial written-work product on the scale of a law review article. The thesis topic should be chosen no later than two weeks after the beginning of the seventh term of law study and may be chosen during the sixth term. The topic is subject to the approval of the thesis supervisor, who may be any member of the Law School faculty under whose direction the student wishes to write the thesis and who is willing to assume the responsibility therefor. An oral defense of the thesis before members of the faculty, including the thesis supervisor, will be conducted late in the student's ninth academic term. Acceptance of the thesis for credit requires the approval of the thesis supervisor and one or more other members of the faculty who will be selected by the supervisor. Satisfactory completion of the senior thesis will satisfy graduation requirements to the extent of (a) 5 - 8 units of credit and (b) two research courses. The exact requirements for a senior thesis are in the discretion of the supervising faculty member. Special Instructions: Two Research credits are possible. Elements Used in Grading: Paper.

**LAW 404B. Foreign Legal Study: Bucerius Law School. 9-14 Units.**

This course is for J.D. students who have been approved by the Law School to study at one of the following schools: Bucerius Law School (BLS): Hamburg, Germany, Hebrew University of Jerusalem (HU): Jerusalem, Israel, Institut d'Etudes Politiques de Paris (Sciences Po): Paris, France, National University of Singapore (NUS): Singapore, Peking University Law School (PKU): Beijing, China, or the Waseda University Law School (WLS): Tokyo, Japan. See SLS Foreign Legal Study Exchange Program at <http://www.law.stanford.edu/organizations/programs-and-centers/stanford-program-in-international-and-comparative-law/the-foreign-legal-study-program>. Elements used in grading: Satisfactory evaluation of course work at the exchange institution.

**LAW 404H. Foreign Legal Study: Hebrew University of Jerusalem. 9-14 Units.**

This course is for J.D. students who have been approved by the Law School to study at one of the following schools: Bucerius Law School (BLS): Hamburg, Germany, Hebrew University of Jerusalem (HU): Jerusalem, Israel, Institut d'Etudes Politiques de Paris (Sciences Po): Paris, France, National University of Singapore (NUS): Singapore, Peking University Law School (PKU): Beijing, China, or the Waseda University Law School (WLS): Tokyo, Japan. See SLS Foreign Legal Study Exchange Program at <http://www.law.stanford.edu/organizations/programs-and-centers/stanford-program-in-international-and-comparative-law/the-foreign-legal-study-program>. Elements used in grading: Satisfactory evaluation of course work at the exchange institution.

**LAW 404I. Foreign Legal Study: Institut d'Etudes Politiques de Paris. 9-14 Units.**

This course is for J.D. students who have been approved by the Law School to study at one of the following schools: Bucerius Law School (BLS): Hamburg, Germany, Hebrew University of Jerusalem (HU): Jerusalem, Israel, Institut d'Etudes Politiques de Paris (Sciences Po): Paris, France, National University of Singapore (NUS): Singapore, Peking University Law School (PKU): Beijing, China, or the Waseda University Law School (WLS): Tokyo, Japan. See SLS Foreign Legal Study Exchange Program at <http://www.law.stanford.edu/organizations/programs-and-centers/stanford-program-in-international-and-comparative-law/the-foreign-legal-study-program>. Elements used in grading: Satisfactory evaluation of course work at the exchange institution.

**LAW 404P. Foreign Legal Study: Peking University Law School. 9-14 Units.**

This course is for J.D. students who have been approved by the Law School to study at one of the following schools: Bucerius Law School (BLS): Hamburg, Germany, Hebrew University of Jerusalem (HU): Jerusalem, Israel, Institut d'Etudes Politiques de Paris (Sciences Po): Paris, France, National University of Singapore (NUS): Singapore, Peking University Law School (PKU): Beijing, China, or the Waseda University Law School (WLS): Tokyo, Japan. See SLS Foreign Legal Study Exchange Program at <http://www.law.stanford.edu/organizations/programs-and-centers/stanford-program-in-international-and-comparative-law/the-foreign-legal-study-program>. Elements used in grading: Satisfactory evaluation of course work at the exchange institution.

**LAW 404S. Foreign Legal Study: National University of Singapore. 9-14 Units.**

This course is for J.D. students who have been approved by the Law School to study at one of the following schools: Bucerius Law School (BLS): Hamburg, Germany, Hebrew University of Jerusalem (HU): Jerusalem, Israel, Institut d'Etudes Politiques de Paris (Sciences Po): Paris, France, National University of Singapore (NUS): Singapore, Peking University Law School (PKU): Beijing, China, or the Waseda University Law School (WLS): Tokyo, Japan. See SLS Foreign Legal Study Exchange Program at <http://www.law.stanford.edu/organizations/programs-and-centers/stanford-program-in-international-and-comparative-law/the-foreign-legal-study-program>. Elements used in grading: Satisfactory evaluation of course work at the exchange institution.

**LAW 404W. Foreign Legal Study: Waseda University. 9-14 Units.**

This course is for J.D. students who have been approved by the Law School to study at one of the following schools: Bucerius Law School (BLS): Hamburg, Germany, Hebrew University of Jerusalem (HU): Jerusalem, Israel, Institut d'Etudes Politiques de Paris (Sciences Po): Paris, France, National University of Singapore (NUS): Singapore, Peking University Law School (PKU): Beijing, China, or the Waseda University Law School (WLS): Tokyo, Japan. See SLS Foreign Legal Study Exchange Program at <http://www.law.stanford.edu/organizations/programs-and-centers/stanford-program-in-international-and-comparative-law/the-foreign-legal-study-program>. Elements used in grading: Satisfactory evaluation of course work at the exchange institution.

**LAW 405. Privacy and Technology in Law and Practice. 2 Units.**

In this lecture course, students will identify instances in which new technologies have changed the likelihood that information about individuals will be created, collected, stored, analyzed, and disclosed to both private entities and to governments. We will look at the internet, mobile platforms and drones, among other developments. The class will identify both privacy defeating and privacy enhancing technologies, and consider how legal regimes and policy choices as well as technological design can mitigate or heighten the risk of unwanted information disclosure. Assignments will ask for both descriptive and normative analysis. Students will examine the interrelationship between privacy, security, free speech, innovation and other public goods and be asked to debate particular policy outcomes in light of competing values about information privacy with regard to both the public and private sector. We will cover issues such as Do-Not-Track and online advertising, data security breaches, consumer notice, privacy by design, corporate best practices, Federal Trade Commission enforcement, workplace monitoring, and law enforcement and national security access.

**LAW 406. Research Track. 9-12 Units.**

The Research Track is for students who wish to carry out a research project of a scope larger than that contemplated for a Senior Thesis. Research Track projects are to be supervised by two or more professors, at least one of whom must be a member of the Law School faculty. At least one faculty member in addition to the supervisors must read the written product of the research, and the student must defend the written work orally before the readers. Students will be admitted to Research Track only if they have a demonstrated capability for substantial independent research, and propose a significant and well-formulated project at the time of application. Special Instructions: Two Research credits are possible. Elements Used in Grading: Paper.

**LAW 407. International Deal Making. 2 Units.**

This course specifically focuses on the application of legal and business knowledge to real world transactions in the international context. This is a practical course for students who are interested in applying their knowledge to deal structuring, identifying and resolving legal and business concerns, negotiations, documentation and deal closing. The caselets (short-form cases), developed by the instructor (JD/MBA/CPA) from his 25 years' experience in deal-making in China and Asia, raising \$9 billion in equity and debt, often place the student inside the negotiating room and challenge the student to strike deals with senior private and public officials. This course is structured as an intense large seminar with a maximum of 30 law and 10 business students, mixed into groups for class work and presentations. Course objectives: (1) To give the law student a deeper understanding of the legal issues that arise in cross-border transactions, and a broader understanding of the business context in which legal advice is asked for and given; (2) to give the business student an appreciation of the importance of reading the legal documents which purport to describe his/her business transaction, and an understanding of the role the legal advisor can and should play in deal structuring, negotiating and documenting aspects; and (3) for both sets of students, there will be the opportunity to strategize, structure and be the principal negotiator in real world, substantive, international business deals. Following the outcomes decided in class, the actual outcomes and subsequent events will be shared. This is an applied business law course focused on structuring, negotiating and closing pioneering business transactions which have several legal and business obstacles to overcome. Elements used in grading: Class participation (30%), attendance, final paper (30%) and group presentation (40%).

**LAW 408A. Criminal Defense Clinic: Clinical Practice. 4 Units.**

Students in the Criminal Defense Clinic represent indigent criminal defendants in a wide range of misdemeanor cases in Santa Clara and San Mateo counties. Students are California Bar Certified and thus appear in court and argue their clients' cases with faculty standing by. Students take the lead role in all aspects of case development, including interviewing clients and witnesses, investigating facts, developing case strategy, negotiating with prosecutors, drafting and arguing motions, and trying cases before judges and juries. Common charges include drug use and possession, assault, theft and DUI. While students have primary responsibility for all aspects of their cases, all work is closely supervised. The Criminal Defense Clinic is an intensive, fast-paced and demanding program of education and practical skills, taught through a two-week introductory training and ongoing workshops and skills practicums. The Clinic also addresses broader systemic issues such as implicit bias in the legal system, immigration consequences, economic disparities and addiction. The goal of the Clinic is to train students how to conduct a criminal case from beginning to end while engaging in thoughtful reflection and providing holistic representation. While the work is often challenging and sometimes heartbreaking, it offers students a unique opportunity to put their skills, intellect and compassion to use by serving people in a moment of great need. Special Instructions: General Structure of Clinical Courses -- The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students will be awarded three separate grades for their clinical quarter, each reflecting four credits. The three grades are broken into the following categories: clinical practice; clinical methods; and clinical coursework. Grading is pursuant to the H/P system. Enrollment in a clinic is binding; once selected into a clinic to which he or she has applied, a student may not later drop the course except in limited and exceptional cases. Requests for withdrawal are processed through the formal petition and clinical faculty review process described in the clinic policy document posted on the SLS website. Students may not enroll in any clinic (full-time or advanced) which would result in them earning more than 27 clinical credits during their law school career. The rules described here do not apply to advanced clinics for students who are continuing with a clinic in which they were previously enrolled. For information about advanced clinics, please see the course descriptions for those courses. For more information about clinic enrollment and operations, please see the clinic policy document posted on the SLS website. Elements used in grading: Class participation, attendance, written assignments and case work and professionalism.

**LAW 408B. Criminal Defense Clinic: Clinical Methods. 4 Units.**

Students in the Criminal Defense Clinic represent indigent criminal defendants in a wide range of misdemeanor cases in Santa Clara and San Mateo counties. Students are California Bar Certified and thus appear in court and argue their clients' cases with faculty standing by. Students take the lead role in all aspects of case development, including interviewing clients and witnesses, investigating facts, developing case strategy, negotiating with prosecutors, drafting and arguing motions, and trying cases before judges and juries. Common charges include drug use and possession, assault, theft and DUI. While students have primary responsibility for all aspects of their cases, all work is closely supervised. The Criminal Defense Clinic is an intensive, fast-paced and demanding program of education and practical skills, taught through a two-week introductory training and ongoing workshops and skills practicums. The Clinic also addresses broader systemic issues such as implicit bias in the legal system, immigration consequences, economic disparities and addiction. The goal of the Clinic is to train students how to conduct a criminal case from beginning to end while engaging in thoughtful reflection and providing holistic representation. While the work is often challenging and sometimes heartbreaking, it offers students a unique opportunity to put their skills, intellect and compassion to use by serving people in a moment of great need. Special Instructions: General Structure of Clinical Courses -- The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students will be awarded three separate grades for their clinical quarter, each reflecting four credits. The three grades are broken into the following categories: clinical practice; clinical methods; and clinical coursework. Grading is pursuant to the H/P system. Enrollment in a clinic is binding; once selected into a clinic to which he or she has applied, a student may not later drop the course except in limited and exceptional cases. Requests for withdrawal are processed through the formal petition and clinical faculty review process described in the clinic policy document posted on the SLS website. Students may not enroll in any clinic (full-time or advanced) which would result in them earning more than 27 clinical credits during their law school career. The rules described here do not apply to advanced clinics for students who are continuing with a clinic in which they were previously enrolled. For information about advanced clinics, please see the course descriptions for those courses. For more information about clinic enrollment and operations, please see the clinic policy document posted on the SLS website. Elements used in grading: Class participation, attendance, written assignments and case work and professionalism.

**LAW 408C. Criminal Defense Clinic: Clinical Coursework. 4 Units.**

Students in the Criminal Defense Clinic represent indigent criminal defendants in a wide range of misdemeanor cases in Santa Clara and San Mateo counties. Students are California Bar Certified and thus appear in court and argue their clients' cases with faculty standing by. Students take the lead role in all aspects of case development, including interviewing clients and witnesses, investigating facts, developing case strategy, negotiating with prosecutors, drafting and arguing motions, and trying cases before judges and juries. Common charges include drug use and possession, assault, theft and DUI. While students have primary responsibility for all aspects of their cases, all work is closely supervised. The Criminal Defense Clinic is an intensive, fast-paced and demanding program of education and practical skills, taught through a two-week introductory training and ongoing workshops and skills practicums. The Clinic also addresses broader systemic issues such as implicit bias in the legal system, immigration consequences, economic disparities and addiction. The goal of the Clinic is to train students how to conduct a criminal case from beginning to end while engaging in thoughtful reflection and providing holistic representation. While the work is often challenging and sometimes heartbreaking, it offers students a unique opportunity to put their skills, intellect and compassion to use by serving people in a moment of great need. Special Instructions: General Structure of Clinical Courses - - The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. For information about advanced clinics, please see the course descriptions for those courses. For more information about clinic enrollment and operations, please see the clinic policy document posted on the SLS website. Elements used in grading: Class participation, attendance, written assignments and case work and professionalism.

**LAW 409. Introduction to Intellectual Property. 4 Units.**

This is an overview course covering the basics of intellectual property law -- trade secrets, patents, copyrights, and trademarks, as well as selected other state intellectual property rights. This course is designed both for those who are interested in pursuing IP as a career, and those who are looking only for a basic knowledge of the subject. There are no prerequisites, and a scientific background is not required. Elements used in grading: Class participation and final exam (4-hour, open-book, in-class final).

**LAW 411. Directed Writing. 1-4 Unit.**

Teams of students may earn "Directed Writing" credit for collaborative problems involving professional writing, such as briefs, proposed legislation or other legal writing. Only projects supervised by a member of the faculty (tenured, tenure-track, senior lecturer, or professor from practice) may qualify for Directed Writing credit. It will not necessarily be appropriate to require each member of the team to write the number of pages that would be required for an individual directed research project earning the number of credits that each team member will earn for the team project. The page length guidelines applicable to individual papers may be considered in determining the appropriate page length, but the faculty supervisor has discretion to make the final page-length determination. Students must meet with the instructor frequently for the purposes of report and guidance. Unit credit is by arrangement. A petition will not be approved for work assigned or performed in a course, clinic, or externship for which the student has or will receive credit. Special Instructions: A Directed Writing project may not count as the equivalent of a "PW" (Professional Writing) course.

**LAW 413A. Policy Practicum: Obesity in Santa Clara County. 1-3 Unit.**

This course will develop obesity initiatives for Santa Clara County. Law, medical, and public policy students will work with representatives from the County Board of Supervisors to identify strategies for reducing child and adult obesity that the County can implement. A paper focusing on particular initiatives will be required. Course must be taken for two-units or more to satisfy the Research requirement. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for contact information and submission deadline. Elements used in grading: Class Participation, Attendance, Final Paper.

**LAW 413B. Policy Practicum: Election Administration and Reform. 2 Units.**

Students in this policy lab will be conducting research on problems in administration that have plagued recent elections, as well as potential reform proposals. The areas of inquiry will include: wait times to vote, polling place location and management, poll worker recruitment and training, voting accessibility for uniformed and overseas voters, individuals with disabilities, limited English proficiency, voter rolls and poll books, voting machine capacity and technology, ballot simplicity and voter education, provisional ballots, absentee and early voting, and the adequacy of contingency plans for natural disasters and other emergencies that may disrupt elections. Students will be responsible for white papers on one or more of these issues, as well as creating bibliographies on these and related topics. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for contact information and submission deadline. Elements used in grading: Written Assignments.

**LAW 413C. Policy Practicum: Improving Bone Marrow Donation Programs. 2-3 Units.**

The National Bone Marrow Donation Program (NBMD) operates the "Be the Match Registry." Individuals who register with Be the Match may be identified as potential donors of hematopoietic cells (most typically bone marrow) to patients facing life-threatening disorders such as leukemia, lymphoma, and aplastic anemia who do not have family members who are good matches to serve as donors. (Family members are appropriate for only 30% of patients needing these transplants.) The NBMD is considering whether the procedures that it uses to attract people to enroll as potential donors in the registry could be improved, and also wants to investigate the further possibility that the proportion of potential donors who actually donate cells once it is discovered that they are a match for a particular patient could be increased. Social psychologists here at Stanford are interested in working with the NBMD to examine some of the organization's practices, taking advantage of the sorts of social psychological insights often employed by those interested in marketing products or increasing charitable donations. There are questions, of course, about the efficacy of the techniques that they might recommend in terms of increasing ultimate donation levels, but there are also significant questions about whether some of the techniques might run afoul of existing legal regulation or pose other sorts of problems for the organization. Law students who choose to work on this practicum will almost surely work (in teams with other law students and in conjunction with social psychologists working on this issue and the NBMD) on the following issues: – To what extent is it consonant with existing medical privacy law (or laws that the NBMD might press to adopt) to reveal personal information about donees to potential donors, assuming that donors are more likely to donate to those with whom they feel a greater personal connection? – To what degree can NBMD simplify the process of registering potential donors without running afoul of current (or ideal) regulation protecting people against undergoing medical procedures in the absence of informed consent? – What sorts of material incentives for donation, if any, are permissible under current (or ideal) law and what stance should the NBMD take on the use of material incentives? There may well be other related topics upon which students will work as well. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors at [mkelman@stanford.edu](mailto:mkelman@stanford.edu) and [lmarsall@law.stanford.edu](mailto:lmarsall@law.stanford.edu). See Consent Application Form for submission deadline. Elements used in grading: Written Assignments, Class Participation, Group Work.

**LAW 413D. Policy Practicum: Institutional and Legislative Copyright Reform. 2-3 Units.**

The US Copyright Office has developed an ambitious agenda for legislative and institutional reform of the American copyright system, and the Register of Copyrights would like us to assist in researching and formulating policy on two of the more pressing projects on its agenda, at least one of which may be the subject of hearings before the House Judiciary Committee this fall. Students will be responsible for developing and implementing the research design; consulting regularly with Copyright Office personnel on development of policy proposals; and preparing a final report for presentation to the Copyright Office. This will require a student commitment to two quarters of work during the Fall and Winter Quarters. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advance by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. Elements used in grading: As agreed to by instructor. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 413E. Policy Practicum: Empirical Study of Patent Troll Litigation. 1-3 Unit.**

Many believe litigation by patent trolls—those in the business of asserting patents rather than making products—is rampant and has harmed innovation and raised consumer prices. This concern has spread to Congress and the U.S. Patent Office, which are considering new regulation of patent trolls. However, there remains insufficient data to determine the amount and impact of patent troll litigation. Students selected for this course will work with renowned patent law scholar Mark Lemley and Law, Science & Technology Teaching Fellow Shawn Miller to produce the first patent litigation database to include comprehensive identification of the type of patent plaintiff involved in each lawsuit. Students' principal responsibilities during 2015-16 will be to complete the database and help draft a position paper for policy makers on the impact of patent trolls. Though voluntary, Professor Lemley and Dr. Miller will also encourage and aid students in utilizing this experience and the database for their own scholarly work. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. Elements used in grading: Class Participation, Attendance, Written Assignments. CONSENT APPLICATION: To apply for this course, students must complete and submit a Consent Application Form available on the SLS website (Click Courses at the bottom of the homepage and then click Consent of Instructor Forms) to the instructor. See Consent Application Form for submission deadline.

**LAW 413F. Policy Practicum: Mediation Confidentiality and Attorney Malpractice in California. 2 Units.**

The issue of confidentiality is central to contemporary mediation practice, yet raises significant public policy issues. The California Legislature has directed the California Law Revision Commission to analyze "the relationship under current law between mediation confidentiality and attorney malpractice and other misconduct and the purposes for, and impact of, those laws on public protection, professional ethics, attorney discipline, client rights, the willingness of parties to participate in voluntary and mandatory mediation, and the effectiveness of mediation, as well as any other issues that the Commission deems relevant," with an eye to making recommendations for revising relevant state law. California is a leader in the ADR domain and significant changes in its policies regarding mediation have the potential to affect mediation law in other state courts as well as the federal court system. In this practicum students will work collaboratively to assist Commission staff identify issues for research and analysis, conduct research and prepare policy memoranda for consideration of Commission staff. Elements used in grading: Class Participation, Attendance, Written Assignments. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 413G. Policy Practicum: Social Mobility In Higher Education. 2 Units.**

The Mobility Project will explore ways to increase the representation at elite universities of high achieving students who are socioeconomically disadvantaged. Economically disadvantaged students are underrepresented at most selective colleges or universities. This despite the fact that in recent years a number of prominent universities (Stanford among them) have made their financial aid policies considerably more generous for students from lower income families. Recent research indicates that the pool of resource disadvantaged, high achieving high school students is much larger than commonly thought. Each year, there are more than 25,000 high school seniors from relatively low income families whose standardized test scores and grades place them in the top 4% of high school students, making it likely that they could be admitted to, receive financial aid from, and thrive at a selective institution. Yet many thousands of these talented students do not apply to any top tier college. Some do not even apply to any four year school. This failure in the matching of students to schools is socially significant. While higher education has long been a means of promoting mobility for individuals and across generations, the economic benefits of advanced education are even greater now than in past eras. Thus, it has become especially important that universities provide an avenue of advancement for talented students of all backgrounds. The Mobility Project is also timely given the likelihood of increasing restrictions on race-based affirmative action. Expanding access to elite colleges for economically disadvantaged students will also contribute to the racial diversity of those institutions. The group of low income, high achievers is more racially diverse (and more specifically, has a higher representation of African Americans and Latinos) than the group of high achieving students from affluent families. We will examine a variety of initiatives to increase the enrollment at elite universities of high achieving economically disadvantaged students. We hope to assemble a small interdisciplinary team of faculty and students from the Schools of Law, Education, and Humanities and Sciences to explore scalable interventions. Students have the option to write papers for Research credit with instructor approval. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors at [rbanks@law.stanford.edu](mailto:rbanks@law.stanford.edu) and [pbrest@law.stanford.edu](mailto:pbrest@law.stanford.edu). See Consent Application Form for submission deadline.

**LAW 413H. Policy Practicum: State Law Enforcement Access to Customer Records of Communication Companies. 2 Units.**

If California Senate Bill SCR 54 is enacted, as seems likely, the California Law Revision Commission will be tasked with modernizing California statutory law on law enforcement access to customer records of cell phone providers, internet service providers, social media companies, and other mobile and internet-based communication providers. The Commission would like us to prepare a thorough and balanced background study of the relevant legal and policy concerns, including civil liberties, public safety, and the scope of federal preemption in the area, with an emphasis on new and emerging communication services. This is likely to be a high profile project, with close attention from the Legislature and many interest groups. This project involves complex issues under the Fourth Amendment and such statutory structures as the Electronic Communications Privacy Act. Completion of the course in Criminal Investigation is a prerequisite, with exceptions only for those with demonstrable alternative background in Fourth Amendment law. Elements used in grading: As agreed to by instructor. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 413I. Policy Practicum: Tax Regulatory Project. 3 Units.**

The changing economic landscape places great stress on the tax legislative process. This stress is magnified by flaws in existing statutes, and by taxpayer attempts to exploit those flaws. There are no statutory rules governing hundreds of billions of dollars of annual transactions. Much of this void is filled in (imperfectly) by Treasury regulations. This practicum will take a close look at one or two issues raised by one proposed Treasury regulation. We will look at the relevant literature, talk to stakeholders, and (possibly) and in our individual names, provide public comments and testimony on the regulation. Since the primary output will be a public (and therefore published in the leading tax journal, *Tax Notes*) comment, the course will offer Professional Writing (PW) credit. Students with a research interest in this area that is aligned with the project can with permission of the professor write a paper that receives Research (R) credit. After the term begins, students accepted into the course can transfer from the PW section (01) to the R section (02) with consent of the instructor. Elements used in grading: Class Participation, Written Assignments or Research Paper. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 413J. Policy Practicum: Court-Supervised Remediation of Complex Environmental Problems. 2 Units.**

The Law School's Environmental Law Clinic is representing an environmental group in a lawsuit against the Monterey County Water Resources Agency. The suit asserts that the agency has been polluting both surface and ground waters in the Salinas River Valley and Elkhorn Slough by discharging pesticide-laden farm irrigation run-off in violation of California environmental laws. If the plaintiffs prevail, the appropriate injunctive relief is likely to be complex. Neither the precise dimensions of the problem nor those of the most effective interventions to remedy it are known. So, ideally, relief should combine adaptive flexibility for the agency, meaningful accountability to the plaintiffs and the public, and an opportunity for all parties to learn in the process of the implementation. Policy Lab students will work with Professors Deborah Sivas (lead plaintiffs' counsel) and Bill Simon on some aspect of a possible remedial regime. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline. Elements used in grading: Class Participation, Final Paper.

**LAW 413K. Policy Practicum: Stream Flow Restoration Transactions. 1-3 Unit.**

Water in the West (a joint program of the Woods Institute and the Lane Center for the American West) is working with the National Fish and Wildlife Foundation (NFWF) on research related to water rights transactions that restore water to the environment. Rivers in the western United States are subject to significant water withdrawals that have had major impacts on the health of their ecosystems. In an effort to restore the health of such rivers, a number of conservation groups have begun to facilitate voluntary transactions to restore water to the environment, such as acquiring water rights and funding irrigation efficiency improvements. NFWF has extensive experience with these efforts through its funding of the Columbia Basin Water Transaction Program and implementation of the Walker Basin Restoration Program, and intends to expand its efforts to other parts of the West. It faces the challenge of deciding where to invest funds and resources in order to achieve the greatest conservation benefits for available dollars. Students in this policy lab will assist NFWF in the development of an assessment methodology for identifying and analyzing watersheds in the western United States as potential locations for expanding its efforts. Our work will focus on evaluating western states in terms of the extent to which they allow the transfer of water rights for environmental use and in terms of the regulatory, financial, and social hurdles such transactions face in each state. We will also analyze data related to stream flow alteration and work with NFWF to integrate this information into its broader assessment. Finally, we will work with NFWF staff to integrate our work into their broader assessment and help them begin to evaluate specific candidate watersheds. Elements used in grading: As agreed to by instructor. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 413L. Policy Practicum: Advising Congress on Health Policy. 2 Units.**

This policy lab will conduct research on national health policy problems for the Medicare Payment Advisory Commission, or MedPAC (MedPAC is an independent Congressional agency established by the Balanced Budget Act of 1997 to advise the U.S. Congress on issues affecting the Medicare program). Students will work in teams with lawyers and PhD economists from MedPAC, resident and fellow physicians from Stanford Hospital, and other students from throughout the University on one of two topics: Expanding the healthcare workforce through reform of states' scope of practice regulation. This project will examine how changes in licensing rules governing health care providers' allowed scope of practice can accommodate the expansion of demand for health services due to the Affordable Care Act and other factors. Specific questions include: 1) Under existing state law, what additional tasks can non-physicians such as nurse practitioners, physician assistants, and pharmacists undertake that would reduce cost and/or improve quality? 2) What changes to state law might expand the allowed scope of practice of non-physicians that would reduce cost and/or improve quality? 3) What incentives might the federal government provide, either through Medicare or other means, to encourage states to reform optimally their scope of practice rules to reflect new available technologies? Designing antitrust policy to achieve the benefits of coordination and avoid the costs of consolidation. On one hand, closer links between physicians, hospitals, and other health care providers has the potential to reduce cost and improve quality by improving communication across care settings, avoiding wasteful duplication of effort, and reducing medical errors. On the other hand, consolidation may be used to exploit consumers by facilitating the exercise of health care providers' market power. This tension has become especially important due to incentives in the Affordable Care Act that encourage doctors and hospitals to join together in Accountable Care Organizations. This project will examine the following questions: 1) How can the U.S. Department of Justice and Federal Trade Commission use existing federal antitrust law to allow welfare-improving coordination while prohibiting welfare-reducing consolidation in ways that minimize costs of enforcement, including the legal uncertainty facing providers? 2) Can adoption of health-care-specific antitrust laws, such as those proposed or enacted in Massachusetts and California, effectively fill in the gaps in existing federal antitrust laws? 3) What incentives might the federal government provide, through design of reimbursement policies in the Medicare program, to complement federal and state antitrust laws? Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline. Elements used in grading: Written Assignments, Final Paper. This course is cross-listed with HRP 222A and B.

**LAW 413M. Policy Practicum: Stereotype Threat and Higher Education. 2 Units.**

A large body of social psychological research has established the existence of stereotype threat—a worry that one might be viewed through the lens of a negative intellectual stereotype. This concern provokes anxiety and can undermine the academic performance of members of negatively stereotyped groups, underrepresented minority groups in particular. Stereotype threat acts like an intellectual headwind. This project will consider changes that colleges and universities institutions might undertake to reduce the effect of stereotype threat. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 413N. Policy Practicum: Court Online Mediation Service Practicum. 2 Units.**

California is a leader in alternative dispute resolution (ADR), and its innovations have the potential to affect mediation law in state and federal courts across the nation. In this practicum students will work collaboratively to build a new online dispute resolution (ODR) system to be piloted in the San Mateo Superior Court for Family Law. Stanford students will work side by side with faculty, court staff, and experts from Modria Inc. (a leading mediation software designer) to implement the Beta Test of the design. The core of this quarter's work will focus on introducing the platform to its first users - claimants with family law disputes - and designing an evaluation program for collecting feedback and implementing improvements. The project will include opportunities to learn basic coding skills, innovate user experience (UX) design for a tech product, and work directly in family law client services. Most importantly, this project addresses a long-neglected access-to-justice issue in California, where 60-80% of claimants arriving in civil courts cannot afford an attorney. ODR, designed and tested properly, may streamline the system for those who need it most while still offering supervision and quality control of the court staff. Special Instructions: Enrollment in Thinking Like a Policy Analyst (Law 444) encouraged. Preference given to students who have taken LAW 615 Negotiation, LAW 613 Dispute System Design, LAW 638 Mediation, or demonstrate substantial experience in ADR, or law and technology. Students have the option to write a paper for R credit. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Participation, Attendance, and Contribution to Project. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 413O. Policy Practicum: China's Solar Industry and its Global Implications. 2-3 Units.**

China dominates and defines a growing global market for solar power. That market faces a stark dichotomy. Solar energy's prospects as a meaningful electricity source are increasingly bright. Yet, amid a global glut of solar panels, the future contours of the industry - the relative roles of leading players such as the United States and China - are increasingly unclear. Students in this seminar will analyze industry and policy data to assess China's competitive strengths in the global solar industry and, based on those conclusions, to suggest finance and policy approaches that the US and China each could adopt so that the two countries operate more strategically in an economically efficient global solar market - and, by extension, a globalizing market for cleaner sources of energy. This research will figure into a project on this theme underway at the Steyer-Taylor Center for Energy Policy and Finance. Course deliverables will vary among students and will be based on discussions at the start of the class between the instructors and the students. Some students will produce papers; others will develop and analyze key sets of data. Students from graduate programs around the university - the law school and others - are encouraged to apply. Preference will be given to those with demonstrated interest in energy finance and policy, particularly bearing on China, and with fluency in Mandarin, though neither is a firm requirement. Given that the Steyer-Taylor Center project will continue through the academic year, preference also will be given to students who intend to continue with the practicum in both the winter and spring quarters. Students have the option to write papers for W or R credit. If the paper involves independent research, then it will be eligible for R credit. The instructor and student must agree whether the student will receive an R or a W. After the term begins, students accepted into the course can transfer from the W writing section (01) into section (02), which meets the R requirement, with consent of the instructor. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. Elements used in grading: Class Participation, Written Assignments or Paper. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 413P. Policy Practicum: Wildlife Trafficking: Stopping the Scourge. 2 Units.**

This policy lab seminar will address the international wildlife trafficking crisis, with a focus on legal and policy tools that can help combat the scourge. The price of ivory on black markets has skyrocketed and elephant and rhino populations in Africa are being decimated. At current poaching rates, African elephants could be wiped out within 8 to 10 years. Trafficking also is hitting tigers, great apes, sharks and other important species. The seminar will key into the President's recent Executive Order on this subject (E.O. 13658, issued on July 1, 2013) and related international efforts to reduce the killing in host countries, the transshipment of poached materials, and consumer demand for ivory and other wildlife parts. The seminar will address US laws and their role in addressing trade in wildlife parts. It also will undertake a comparative review of the legal structures in relevant African and Asian nations, and the potential role of the international endangered species treaty (CITES) and transnational enforcement efforts in cracking down on ivory and other wildlife-related trafficking. The seminar will review prior poaching crises, including the elephant/ivory crisis in the late 1980s, and evaluate why the strategies that reduced killings in the 1990s are no longer successful. Based on these analyses, the class will develop and submit recommendations for reforms to US, African, and international laws and practices to two groups established under the Executive Order: (1) the President's Wildlife Trafficking Task Force, which is chaired by the Secretaries of State and Interior and the Attorney General; and (2) the Wildlife Trafficking Advisory Council, which is composed of outside experts who are advising the Task Force. (Professor Hayes is an appointed member of the Advisory Council.) Elements used in grading: Class Participation, Attendance, Final Paper. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 413Q. Policy Practicum: Constitutional Design in Libya: The Division of National & Provincial Powers. 1 Unit.**

Libya's government has experienced significant strains stemming from various interest groups and armed militias calling for federalism. The General National Congress, elected in 2012, is mandated to form a government, promulgate legislation for Libya's transitional period, and establish a constitution-drafting entity. A de facto federal structure has emerged since the fall of the Qaddafi regime, and it appears that a federal state structure is the only way forward for Libya. Even a decentralized framework may be threatened, however, if it does not clearly delineate the powers of the executive heads of provincial territories. Students in this Practicum will work to support the Public Interest Law and Policy Group (PILPG), a pro bono international law firm, which in turn is providing advice to civil society groups in Libya. To assist PILPG in supporting its clients' engagement on constitutional issues and decentralization, students in this Practicum will develop a legal memorandum analyzing comparative state practice of the distribution of powers between the national executive and provincial level executives in federal or decentralized states. The memorandum will address approaches states have taken on key issues such as whether the national executive can remove the heads of provincial governments; whether the provincial executive has a role in national-level policies; whether provincial executives maintain any control over the military; and whether the provincial executives' powers can supersede the national executive's powers on certain regional issues. State practice from the Middle East and North Africa region will be of particular relevance to PILPG's Libyan clients, but state practice examples will ultimately be selected based on their value in explaining or illustrating mechanisms and processes that shed light on the efficacy of different approaches to distributing powers between national and provincial executives. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline. Elements used in grading: Class participation, Written Assignments.

**LAW 413R. Policy Practicum: The National Environmental Policy Act: Pushing the Reset Button. 2 Units.**

This policy lab will focus on recommendations for the reform and modernization of the National Environmental Policy Act (NEPA) – the granddaddy of our environmental laws. NEPA is a disclosure statute which requires that before federal officials can issue a permit, commit federal funds, or otherwise take an action that may have a significant impact on the environment, decision-makers must have the opportunity to review an Environmental Impact Statement (EIS) that analyzes the potential environmental consequences of the proposed action and its alternatives. Many critics from both the right and left are dissatisfied with the way that NEPA and its state analogues are being implemented, prompting some legislators to advocate statutory overrides and agency officials to expand the use of categorical exemptions. Meanwhile, NEPA proponents are interested in making the environmental review process more user-friendly and efficient, while preserving its core disclosure requirements. In this policy lab, students will review, analyze, and develop positions on potential NEPA reform options. Students will interact with NEPA experts at the White House’s Council on Environmental Quality (CEQ) and produce work product that CEQ can use as it responds to Congressional and outside pressure to reform the NEPA process. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. Elements used in grading: Class Participation, Attendance, Final Paper. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar’s Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 413S. Policy Practicum: Carbon Pollution Standards and Carbon Taxes. 2 Units.**

This policy lab seminar will address the ongoing effort by the Environmental Protection Agency to reduce carbon pollution from electric power plants. The EPA is currently in the process of writing New Source Performance Standards for new and existing coal and natural gas fired electric power plants. A critical question in writing these rules will be the extent to which EPA can allow for economically efficient approaches to cutting emissions. States, including California, industry, and environmental groups are all pushing EPA to incorporate some sort of emissions pricing as either a safe harbor or to propose it as a Federal Implementation Plan that States may choose to join. By doing so, not only will costs fall for regulated sectors but also, deeper cuts in emissions may become feasible. Almost all parties expect, based on prior precedent, that such a proposal will take the form of a cap-and-trade or at least some sort of mass-based cap on emissions. Adele Morris, the Policy Director for the Climate and Energy Economics Project at the Brookings Institution, has asked for our assistance in formulating and assessing the legal implications of an alternative proposal - a carbon tax. Students will prepare briefings and written comments to EPA and OMB explaining the potential benefits of a carbon tax approach to New Source Performance Standards as well as exploring the legal risks that might be created by this approach. We anticipate that students will also participate in briefings with key OMB and EPA Air and Radiation staff involved in drafting the proposed rule. The New Source Performance Standard rulemaking for greenhouse gases is the most environmentally and economically significant regulatory effort that EPA will undertake this decade. Partnering with Brookings will allow us to both leverage legal and economic expertise and to inject students into the most exciting environmental policy making currently underway in the United States. Doing so now, before the draft rule is published, allows us to exert maximum influence before the agency loses flexibility to respond to outside input. To develop skills relevant to the work of practicing lawyers, students will research and write parts of memos and written comments to EPA and OMB on behalf of Morris based on their research into various legal and policy aspects of Clean Air Act Section 111 as applied to the problem of power plant emissions. These assignments, for Writing (W) or Professional Writing (PW), or Research (R) credit, will be due before the end of the quarter. Students must obtain the instructor’s approval of their election to take the course for writing (PW or W) or research (R) credit. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar’s Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 413T. Policy Practicum: Human Rights in the Americas: the Inter-American System. 3-4 Units.**

In this practicum, students will contribute to analyses of the current state of human rights in the Americas and, in particular, to analyses of areas of focus for the Inter-American Commission (the "Commission"). Students will become familiar with international and regional standards in human rights and with the procedures, history and practice of the Commission and will contribute, through their policy analysis, to the work of the Commission. Working independently and/or in teams, students will prepare studies on situations of rights abuse, as well as on best practices across the region. The scope of students' work product will expand as they acquire more expertise with international standards and transnational comparative tools in policy analysis. Fluency in Spanish or Portuguese helpful, but not required. One or more students may travel in conjunction with this practicum to sessions of the Inter-American Commission in October/November 2014. This course will be offered in the Fall of 2014. While priority will be given to students who enrolled in the course in the Spring of 2014, all students are encouraged to apply. Special Instructions: Students must enroll with a minimum of 3 units, but are encouraged to enroll in 4 units. This class meets the PW requirement. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline. Students who have taken the practicum in the Spring of 2014 have consent to take this course in the Fall of 2014 and need not file a Consent Application. Elements used in grading: Class Participation, Attendance, Written Assignments.

**LAW 413U. Policy Practicum: Next Steps in Network Neutrality. 1-3 Unit.**

Earlier this year, the Court of Appeals for the D.C. Circuit struck down the Federal Communications Commission's Open Internet rules. This policy practicum will help policy makers assess the available options in the wake of the court's decision. In December 2010, the Federal Communications Commission (FCC) adopted the Open Internet Order, which enacted binding network neutrality rules for the first time. Network neutrality rules limit the ability of Internet service providers to interfere with the applications, content and services on their networks; they allow users to decide how they want to use the Internet without interference from Internet service providers. In January of this year, the Court of Appeals for the D.C. Circuit struck down the core provisions of the Open Internet Order - the rules against blocking and discrimination. The decision combined two wins for the FCC with one decisive loss. According to the Court, the FCC has authority to regulate providers of broadband Internet access service under Section 706 of the Telecommunications Act of 1996, and the FCC's justification for the Open Internet Order is "reasonable and supported by substantial evidence." The no-blocking and non-discrimination rules, the Court found, however, violate the Communications Act's ban on imposing common carrier obligations on entities like Internet service providers that the FCC has not classified as telecommunications service providers under Title II of the Communications Act. As a result of this ruling, Internet service providers like Verizon, AT&T or Cox Cable that connect users to the Internet are now free to block any content, service or application they want. They can slow down selected applications, speed up others, or ask application or content providers like Netflix or Spotify to pay fees to reach their users. These practices would fundamentally change how we experience the Internet. In the wake of the Court's decision, policy makers, stakeholders and observers are debating how to best ensure that the Internet remains open and free. Policy makers essentially have three options: First, the FCC can preserve the Open Internet Rules by reclassifying Internet service as a telecommunications service under Title II of the Communications Act. Second, it can develop a different, narrower network neutrality regime under Section 706 of the Telecommunications Act within the boundaries established by the Court of Appeal's decision. Finally, Congress or the FCC can adopt a new network neutrality regime, but only, in the case of the FCC, after reclassifying Internet service as a telecommunications service. In mid-February, the Federal Communications Commission opened a docket within which to consider how the Commission should proceed. Special Instructions: Upon consent of the instructor, students may choose enrollment Option 1 or Option 2: Option 1 (3 units) - Students who elect Option 1 will research and write parts of white papers and comments to the Federal Communications Commission that will help policy makers assess the available options. In special cases, students electing Option 1 may take the policy practicum for 2 units. Students interested in this option should indicate this on their application. Option 2 (1 to 2 units) - In order to elect Option 2, students must concurrently enroll (with consent of instructor) in the seminar component, "Current Issues in Network Neutrality" (2 units), which meets Thursdays from 4:15pm-6:15pm. Students in the policy practicum with the seminar component will research and write parts of white papers and comments to the Federal Communications Commission that will help policy makers assess the available options. Students will be required to attend the seminar and participate in the discussion, but will not do any of the written assignments for the seminar. Depending on the type of work in Option 1 or Option 2, students taking the policy practicum for two-units or more may receive professional writing (PW) or research (R) credit. Students must obtain the instructor's approval of their election to take the course for writing (PW or W) or research (R) credit. After the term begins, students accepted into the course can transfer from the W/PW writing section (01) into section (02), which meets the R requirement, with consent of the instructor. The class is open to law students and students from other parts of the university. It does not require any technical background. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 413V. Policy Practicum: Law and Economics of the Death Penalty. 2 Units.**

This is the practicum component of the Law and Economics of the Death Penalty Seminar. See Law and Economics of the Death Penalty Seminar (Law 397) for a detailed course description. Students who take the practicum component must attend the 9 seminar class meetings and do all reading and writing assignments of the seminar except that instead of writing a final paper of their choosing they will focus on actual policy or litigation work that will be arranged with various death penalty abolition groups. Only students enrolled in the Law and Economics of the Death Penalty Seminar (whether for two or three units) may enroll in the practicum component for two additional units. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 413W. Policy Practicum: Expanding Access to Justice in California Courts for Limited-English Court Users. 1-4 Unit.**

This policy practicum will offer recommendations to the California Supreme Court Chief Justice Tani Cantil-Sakauye, Associate Justice Maria Rivera (First District Court of Appeal), Hon. Manuel Cavarrubius (California Superior Court, County of Ventura) and members of the California Judicial Council to increase access to justice for limited English proficient (LEP) court users. The project interacts with the process of the Joint Working Group for California's Language Access Plan and assists development of a response to a U.S. Department of Justice notice that certain Court policies and procedures may be inconsistent with Title VI of the Civil Right Act of 1964 and its implementing regulations. Numerous state and local laws are also implicated by a potential lack of access for LEP court users. The California Commission on Access to Justice estimates that well over 7 million Californians, almost 20% of our state's population, "cannot access the courts without significant language assistance, cannot understand pleadings, forms or other legal documents and cannot participate meaningfully in court proceedings." Through fieldwork, literature review, legal research, and interviews with relevant participants and stakeholders students will identify challenges facing LEP litigants. Students will interview and consult with such parties as the Chief Justice, appellate court judges, state bar leaders and other attorneys, members of the Language Access Task Force of California, and individual stakeholders to develop recommendations for potential reform options, including whether the use of such technologies as video remote interpreting (VRI) can expand access to justice for LEP litigants. Students will be asked to produce written materials (findings and recommendations) as well as make oral presentations to California judges, Judicial Council staff, and others at meetings at each quarter. This policy practicum will be offered Fall 2014 and Winter 2015. We encourage students to participate both quarters if they are able to do so. Students should also note that field work will require some number of students to engage in overnight travel for court observation and local interviews in areas outside the Bay Area. Your availability to take the practicum both quarters and to travel for field research should be noted in your consent form. Students have the option to write papers for PW or R credit. If the paper involves independent research, then it will be eligible for R credit. The instructor and student must agree whether the student will receive an R or a PW. After the term begins, students accepted into the course can transfer from the PW writing section (01) into section (02), which meets the R requirement, with consent of the instructor. The practicum must be taken for at least two-units or more to receive R or PW credit. Elements used in grading: Class Participation, Attendance, Written Assignments. Oral presentations to judges, commissions and California Judicial Council representatives, quality of research. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 413X. Policy Practicum: Designing a Social Impact Bond for Santa Clara County Mental Health. 3 Units.**

Social impact bonds, also called "Pay for Success" initiatives, are an innovative finance mechanism through which investors provide the funds for organizations to provide social services at the request of a government entity. These investors may be repaid, with interest, depending on the organizations' success in achieving specified outcomes. The most noteworthy examples to date involve pay-for-success schemes to reduce recidivism in the UK, Massachusetts, and New York City prisons. Santa Clara County will soon issue a request for proposals for a social impact bond to reduce the hospitalization of mentally ill patients at the Santa Clara Valley Medical Center. It has retained Third Sector Capital Partners as an advisor and Keith Humphreys, Ph.D., Professor and Section Director for Mental Health Policy in the Department of Psychiatry and Behavioral Sciences at Stanford University, as the evaluator. Students in this Policy Lab practicum will work with Dr. Humphreys, the Santa Clara County Counsel's Office, and Third Sector to develop the scheme, including designing clear metrics for success and undertaking a cost-benefit analysis of the de-institutionalization of mental health patients. It is likely that we will collaborate with faculty and students from other schools and departments having particular expertise in cost-benefit analysis and evaluation. Special Instructions: Total enrollment in this course will be limited to 12 (4 SLS students, 4 Medical School students & 4 other). A preference will be given to students who can enroll for both the Autumn and Winter quarters. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline. Cross-listed with Psychiatry (PSYC 213).

**LAW 413Y. Policy Practicum: Catalyzing Nature-Based Coastal Flood Mitigation and Adaptation. 2 Units.**

Recently, several perilous and costly flood events have raised public awareness of the threats posed by coastal and riverine floods nationally. It is likely that with climate change, the frequency of heavy precipitation will increase in some areas over the 21st century, and that the return interval of flood events will decrease, greatly increasing overall flood risk. Traditionally, flood mitigation has occurred through the use of hard engineering - seawalls, revetments and levees. However, natural habitats and ecosystems also offer significant, and often overlooked and undervalued protections in mitigating or buffering flood hazards. Hazard mitigation plans and conservation project plans very rarely explicitly recognize the protective value of natural habitats, even though this value has been well documented. Moreover, hazard mitigation agents and environmental conservation organizations seldom work together, although recent catastrophic events highlight why it would make sense to do so. FEMA Region IX and The Nature Conservancy in California have recognized this and wish to develop a paradigm for working together to promote nature-based flood mitigation, and have asked for our help. Students in this practicum will: (a) Identify a coastal community with areas of both high flood risk and conservation value; (b) Design a nature-based strategy for risk reduction, which could include managed retreat and/or other mitigation/adaptation tactics; (c) Identify available resources/programs/incentives for and barriers to implementation at the local, state and federal levels; (d) Design a process for enabling the community to avail themselves of these resources; and (e) Comment on how laws, regulations and programs could be changed to better facilitate nature-based flood risk reduction. Students will also provide insight into the transferability of this approach beyond the study area. Elements Used in Grading: Class Participation, Attendance, Written Assignments. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 413Z. Policy Practicum: Endstage Decisions: Health Directives in Law and Practice. 2 Units.**

Medical decisions toward the end of life can be crucial and difficult for patients, doctors, and the families of patients. Law and medicine have been struggling to find ways to strike a balance between what the patients might want (or say they want), and what makes medical, economic, and ethical sense. People have been encouraged to fill out "Advanced Health Care Directives," which give guidance to doctors and surrogates (usually a family member) on what to do when faced with end-of-life dilemmas. Another form, adopted in just over half the states (including California) is the POLST form (Physician Orders for Life-Sustaining Treatment). The two types are supposed to complement each other, but they are different in important ways. The Advanced Health Care Directive expresses what a person wants, or thinks she wants, and/or appoints a surrogate, in case the patient is unable to express her wishes. Anybody can fill out a Directive, at any time of life. Ideally, a copy goes to the surrogate, if one is appointed, and another to the primary care physician. The POLST form is meant for people who are seriously ill. It is a one page form, printed on bright pink paper. It is signed by patient and doctor. The directives (for example "no artificial nutrition by tube") are supposed to be controlling; the patient, of course, can change her mind; but there is no surrogate. It is an agreement between the patient and the doctor. Who uses these forms? How effective are they? To what extent and in what situations are they useful? In what situations are they not useful? Can they be made more useful and, if so, how? There has been research on the subject; and a major report on the end-of-life issue (originally due out in December) will be released this summer. The class will look at some of this literature, but the main point will be to find out what local hospitals and nursing homes are doing. Students will conduct interviews with doctors, nurses, and other health care specialists in order to find out what one might call the living law of the Directive and of Polst. The aim is to get a more realistic picture of the situation in the area: how are these forms used, when are they used, what has the experience of health care professionals been; perhaps also some insight into the experience of patients and family members. The ultimately goal would, one hopes, be policy recommendations for improvements in the forms themselves, and the laws relating to the forms, along with recommendations for ways to improve the way the forms are or can be used; or whether some entirely different approach to the problem might be needed. Stanford Hospital and Clinics will be the client in researching and addressing the above questions. Elements used in grading: Final Paper. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 414A. Policy Practicum: Central Valley Habitat Exchange. 3 Units.**

This policy lab will assist in developing more flexible and effective wildlife habitat mitigation tools for use in California's Central Valley, a landscape that presents the challenge of taking advantage of the habitat potential provided by working agricultural lands. Habitat mitigation is an important tool under a variety of environmental and wildlife protection statutes, both state and federal. Current regulatory frameworks usually require that habitat mitigation employ permanent easements or long-term contracts fixed in particular locations, despite the fact that species have changing habitat needs. Many species are migratory and must move across the landscape to survive; a changing climate and shifting human activity only increase the dynamic nature of habitat needs. To ensure that species and their habitat are protected in the most effective manner possible, legal and policy frameworks must be structured to address this and other challenges. Additionally, there is a need for a robust market mechanism that recognizes the inherent natural capital and species habitat provided by working agricultural lands, and compensates landowners for the value of those resources. In the face of significant upcoming conservation and mitigation needs for California, new policies and regulatory frameworks are necessary, and must be rooted in rigorous science, be consistent with existing legal frameworks, and accomplish the dual goals of promoting species recovery and maintaining agricultural production. Students in the Law and Policy Lab will analyze cutting edge issues related to species habitat and protection. They will help provide recommendations to the Central Valley Habitat Exchange (CVHE) in the development of more flexible and marketable habitat mitigation tools that can be used under a variety of programs, including the Endangered Species Act, the Clean Water Act, state wildlife laws, and the Bay Delta Conservation Plan. The CVHE is a new initiative taking advantage of the emerging market of habitat credits by maximize the benefits of the habitat that willing agricultural landowners can provide. The CVHE will facilitate investment in conservation and restoration of vital and dynamic Central Valley floodplain and riparian habitat by promoting, monitoring and assisting in the exchange of habitat credits. Students will tackle issues of permanence and change from legal, policy, economic, and scientific perspectives, depending on their existing skill set and research needs. During the quarter, visitors from the CVHE Working Group - which includes members from national environmental non-profits, government agencies, and the private sector - will share their perspectives, and students will be invited to present their findings and make recommendations to help inform development of the CVHE. The course will meet at a mutually convenient time that will be chosen after the quarter begins. Meetings will include a mix of individual meetings and group meetings. Special Instructions: This practicum is offered in autumn quarter and winter quarter. Students enrolled in autumn quarter who intend to continue with the practicum will be given preference in winter quarter. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for contact information and submission deadline. Elements used in grading: As agreed to by instructor.

**LAW 414B. Policy Practicum: Analyzing Alternative Laws and Policies for Psychoactive Drugs. 3 Units.**

Four states have already legalized marijuana, and there is a strong likelihood that California will significantly change its marijuana laws. This practicum works closely with a policy client to assess alternative options for California marijuana laws. We will examine possible options through many lenses, including moral philosophy, welfare economics, neuroscience and medicine, criminal justice, and political analysis. Students will gain exposure to such policy analysis methodologies as epidemiology, econometrics, quasi-experimentation, simulation modeling, and cross-national case studies to identify and analyze options and likely tradeoffs to help the client and the citizens of California make informed choices. Elements used in grading: Class Participation, Attendance, Written Assignments. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for submission deadline.

**LAW 414C. Policy Practicum: Strategic Litigation in Global Context. 3-4 Units.**

Students will work with litigators at the Open Society Justice Initiative, a law center housed inside a global foundation, on a comparative research project exploring the impacts of strategic litigation in the public interest. The resulting publication aims to assist strategic litigators, social change actors and rights activists in understanding the promise, risks and complexity of the burgeoning global practice of strategic litigation and in wielding this specialized justice tool more skillfully. The autumn practicum will culminate in a conference at the Law School in December 2014 before an international audience of practitioners, with the possibility of student papers appearing in a conference compilation. Students who are available both autumn and winter quarter may continue their work on the project through the winter. The project on the impacts of strategic litigation will examine how legal judgments - both positive and negative - and the ensuing record of implementation have influenced, together with other tools of change, the advancement of human rights in a variety of settings. Over the course of the Practicum, students will explore one or more of the following human rights themes: equal access to quality education, the death penalty, disability, housing rights, land rights and/or state-sponsored violence/torture. Cases will be drawn from domestic courts across the globe, as well as regional human rights tribunals and UN treaty bodies. Specific questions to be examined include: What contributions to social, political and legal change has strategic litigation made on particular issues in particular places? What were the conditions, circumstances and manner in which litigation was pursued (in conjunction with other tools) which enhanced its contribution(s), and which diminished them? What does comparative experience teach about the risks and trade-offs involved in deciding whether, when and how to litigate so that it generates the strongest and most enduring impacts? There is a preference for students who can enroll for both autumn and winter quarter. Elements used in grading: Class Participation, Attendance, Written Assignments. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 414D. Policy Practicum: Copyright Policy Practicum. 3 Units.**

One of today's great challenges for creative production on and off the Internet is to connect creative users of copyrighted works with the works' owners quickly and cheaply in order to enable licensed uses. With the United States Copyright Office as its client, this practicum will develop a feasibility study/rough prototype for a Web-based copyright clearance system. Law students will work with computer science and business students to inventory existing sources of copyright ownership information; explore with the managers of these sources (including the Copyright Office) protocols for integrating the sources in a Web-based platform; explore use protocols with potential copyright users; develop strategies for gathering ownership data that do not presently reside in databases; and develop (and possibly implement) criteria for platform-enabling software. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for contact information and submission deadline. Elements used in grading: Class Participation, Written Assignments.

**LAW 414E. Policy Practicum: Legal and Policy Tools for Preventing Atrocities. 2-4 Units.**

In 2012, at the U.S. Holocaust Museum and Memorial, President Obama announced the adoption of a comprehensive global strategy to prevent atrocities. This strategy is based on a set of recommendations generated by a comprehensive interagency review of the U.S. government's capabilities mandated by Presidential Study Directive 10 (PSD-10) of 2011. In unveiling this major new initiative, President Obama underscored that Preventing mass atrocities and genocide is a core national security interest and a core moral responsibility of the United States. Foundational to the PSD-10 recommendations was the creation of a high-level interagency Atrocities Prevention Board (APB) to monitor at-risk countries and emerging threats in order to coordinate the U.S. government's responses thereto. The National Security Staff's Senior Director for Multilateral Affairs and Human Rights convenes the APB. Since being established in 2012, the APB has worked to amass and strengthen a range of legal, diplomatic, military, rhetorical, and financial tools for atrocity prevention. Although the APB is a U.S. initiative, it also aims to build multilateral support around the imperative of prevention, working with the U.N. Office on Genocide Prevention and the Responsibility to Protect, regional organizations such as the International Conference on the Great Lakes Region, and committed partner states, such as Tanzania, Switzerland, and Argentina. The proposed policy lab would support the APB primarily through one of its constitutive entities, the Office of Global Criminal Justice (GCJ) in the U.S. Department of State. GCJ is headed by an Ambassador-at-Large (Assistant Secretary equivalent) and a Deputy (a position I held from 2012-2013) and advises the Secretary of State and the Under Secretary for Civilian Security, Democracy, and Human Rights on U.S. policy addressed to the prevention of, responses to, and accountability for mass atrocities. Additional client agencies and offices will include the Department of Justice, the National Security Council, the Department of the Treasury, the Agency for International Development (USAID), and other State Department Offices, such as the Bureau of Human Rights, Democracy & Labor and the Bureau of International Organizations. Depending on student interest, I envision the lab taking on a range of projects devoted to (a) strengthening existing tools, (b) developing new capabilities, (c) evaluating the efficacy of past efforts in order to glean lessons learned, and (d) gathering best practices from other states and entities engaged in similar endeavors, all with an eye toward developing concrete recommendations for future action.

1. Regulating the Transfer of Arms in the Service of Atrocities Prevention: In 2013, the U.N. General Assembly adopted the Arms Trade Treaty (ATT), regulating the international trade in conventional arms (which include everything from small arms to battle tanks, combat aircraft, and warships). According to Article 6(3) of the treaty, States Parties (of which there are now 40) are barred from authorizing the transfer of covered conventional weapons if officials have knowledge that the arms would be used in the commission of genocide, crimes against humanity, or war crimes. States Parties are obliged to take measures to implement the provisions of the treaty, including through an effective and transparent national control system. In September 2013, the United States signed the treaty but the President has not yet submitted it for ratification. This project would devise proposals for how states can best implement their treaty duties under Article 6(3) with an eye toward generating model regulatory language based on analogous treaty regimes.
2. Designing Commissions of Inquiry in Support of Accountability: The Under-Secretary of Civilian Security, Human Rights, and Democracy would benefit from advice on how to maximize the impact of the commissions of inquiry (COIs) that are established, usually by the Human Rights Council in Geneva but occasionally by the U.N. Security Council, to document the commission of international crimes in armed conflicts and repressive states. The project would collate the various mandates, methodologies, outcomes, and impact of prior (and current) COIs with an eye toward developing best practices and recommending ways that future COIs can be designed to better contribute to processes of accountability for the crimes they document and the perpetrators they identify. In particular, students would propose options for better leveraging lists of perpetrators for accountability purposes, such as by sharing with national immigration and prosecutorial officials.
3. According and Withholding Foreign Official Immunity: The Department of Justice (Human Rights & Special Prosecutions Unit) is keenly interested in gaining a better understanding

**LAW 414F. Policy Practicum: Rethinking Penal Code Enhancements in California. 3 Units.**

The Stanford Criminal Justice Center was approached by the Chief Justice of California to advise the judiciary, and indirectly the Legislature, on potential revisions to the California Penal Code. The California prison system remains under federal court control for unconstitutional overcrowding, and the federal court is loath to terminate the injunction without some reassurance of reforms that might prevent the overcrowding from recurring. In the absence of a state sentencing commission, the Chief Justice believes that we at Stanford can perform a fresh new analysis of the parts of the Penal Code that most merit review, in terms of their undue complexity, their arguably disproportionate severity, and the possibility that they are major drivers of the size of the prison population. Enhancements are an incredibly complex part of the Penal Code. Tens of provisions, many of them obscure even to judges, allow for very large upgrades to sentences because of aspects of conduct that are said to aggravate the underlying crime. (Please note that while some of the enhancements under review involve prior crimes, we are not dealing with the Three Strikes Law.) The Chief Justice's administrative arm, the Administrative Office of the Courts (AOC), acknowledges that no one has performed even a statutory analysis of the overall scheme of enhancements, much less any empirical effort to connect them to prison inputs. This will likely be a multi-term Policy Lab that will ultimately gather data to attempt this empirical analysis, but the first term effort is more circumscribed. A team of students will undertake the mapping of the statutory terrain - a charting of all the enhancements in the Penal Code and the many cross-permutations of these enhancements and the crimes to which they attach, and as a first empirical cut, identification of the permutations of crime and enhancements that are most often charged in California. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for contact information and submission deadline. Elements used in grading: As agreed to by instructor.

**LAW 414G. Policy Practicum: Energy and Environmental Governance. 1-3 Unit.**

Important energy and environmental initiatives cut across many agencies in the federal government, leading to significant policymaking and implementation challenges. Many of the agencies operating in the energy and environmental sphere have overlapping jurisdictions, but they also have different missions, priorities, and resources that push them toward agency-specific policies and programs and away from cross-cutting, government-wide initiatives. The result has been sub-optimal federal implementation of clean energy solutions, responses to climate change, the coordination of regulatory and permitting activity, and the like. In this SPRING QUARTER policy lab (3 units), students will work with the Center for American Progress (CAP) and the Office of Management & Budget in Washington to scope out the governance challenge and to review and analyze administrative tools (e.g., Executive Orders; Presidential Memoranda; inter-agency Task Forces; budget-led initiatives, etc.) that have been used to address it. Students will develop candid assessments of successes and failures and seek to identify common ingredients that may help predict the efficacy of cross-agency efforts. The policy lab will produce a report to CAP that should assist future Administrations in deploying more effective administrative governance tools in the energy and environmental arena. Elements used in grading - Individual and Team Development of Written Analyses and Policy Recommendations . NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for submission deadline.

**LAW 414H. Policy Practicum: Preparing for Transition in Syria. 1 Unit.**

Syria is in the midst of a devastating civil war, during which almost 200,000 persons have been killed, many more have been injured, and millions have been displaced. One major coalition of Syrian opposition groups, known as the National Coalition for Syrian Revolution and Opposition Forces, or the Syrian National Coalition, seeks to replace the current Syrian government, led by President Bashar al-Assad. As the Coalition plans for a post-Assad transition, it has encountered a number of legal and policy challenges that implicate international law, international relations, and administrative problems. Students will support the Public Interest Law and Policy Group, which is working closely with the Coalition, to provide legal advice on legal issues identified by the opposition as likely to arise in the event negotiations to resolve the Syrian conflict resume. Elements used in grading: Class Participation, Written Assignments. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT: Contact Professor Weiner at [aweiner@stanford.edu](mailto:aweiner@stanford.edu).

**LAW 414I. Policy Practicum: Procedural Reform at the California Public Utilities Commission. 2 Units.**

The CPUC is an administrative agency headquartered in San Francisco that regulates electricity, natural gas, telecommunications, water, and transportation. Many of its decisions (both adjudicatory decisions and regulations) are of enormous importance to the California economy. The proceedings to adopt these decisions are often lengthy and complex. The CPUC is interested in working with the Stanford Law and Policy Lab to consider procedural reforms to promote transparency and efficiency in its decisionmaking. There are three areas of potential procedural reform that the Policy Lab might consider. Which of the areas are selected for study will be decided after discussion between the CPUC, the supervising professor, and students enrolled in the practicum. i) Ex parte communication rules. Ex parte communications between outsiders and PUC decisionmakers are prohibited in adjudicatory cases; permitted in ratemaking cases but must be disclosed; and permitted in rulemaking without disclosure. Some CPUC decisionmakers believe that ex parte communications are essential to enable them to properly consider different points of view and to facilitate timely decisionmaking. Others view such communications as inherently unreliable and as undermining the transparency and accountability of the agency. The CPUC is interested in studying this problem and considering amendments to relevant statutes and regulations. ii) Open Meetings law. The Bagley Keene Act requires the CPUC to conduct open meetings when a quorum of its 5 commissioners meet. Bagley Keene has, in practice, effectively prevented the CPUC from properly managing its operations and engaging in useful deliberation. The CPUC and the Little Hoover Commission are considering whether to seek an amendment to Bagley Keene in order to permit more coordination and collaboration among CPUC Commissioners. iii) Evidence rules. The "residuum rule" requires that on judicial review of an agency decision, the record must contain at least some evidence, other than hearsay, to support the agency's findings and conclusions. A recent court decision has said the CPUC is subject to the residuum rule because it has been declared CPUC policy. A variety of evidence (such as studies by other government agencies) often comprise the underpinning of CPUC decisions and may not come under any hearsay exception. As a result, the residuum rule could compromise the efficiency of CPUC proceedings and risk reversal of future decisions on technical evidentiary grounds. The CPUC is interested in investigating potential solutions for remedying this problem. This practicum will carry two units of credit. It will be supervised by Visiting Professor Michael Asimow. Students will be expected to do field work and legal research and write a paper that makes policy proposals in one or more of the three areas discussed above. Enrollment is limited to three students and will be graded under the H/P/R/F system. Grades will be based on the level of a student's participation and the quality of the final paper. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for submission deadline. Same as: CPUC

**LAW 414J. Policy Practicum: Designing a Children's Coordinating Council. 2-4 Units.**

The Lab would work with the San Francisco Mayor's Office, helping create the structure for a new "Our Children, Our Families Council" that was established by a recent amendment to the City's charter. It is tasked with coordinating the City's efforts, and aligning with the SF Unified School District, to better support children, youth and families. In the lab, we would look at other places that have established children's councils in order to see how they are made to work most effectively, examine the current landscape of policy activity related to children, youth and families in SF, and help shape initial structures and plans for the Council. Special Instructions: Not open to 1Ls. Requires early commitment. Minimum number of students required. Elements used in grading: Class Participation, Written Assignments. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for submission deadline.

**LAW 414K. Policy Practicum: Veterans Research. 2 Units.**

The Stanford Veterans Policy Practicum will explore the possibilities for veterans policy research programs at Stanford. The course is open to Stanford students from all departments, and will focus on researching the current disposition of veterans research at academic and research institutions nationwide, with a particular emphasis on entities and individuals engaged in conducting policy research. Through our research, we hope to identify the key entities, offices, and individuals engaged in veterans-related work, what they have studied and are studying, how they are funded, what models they use to operate and conduct research, how they publish their work, what impact their work has on policy and practice, and any other relevant information. Students interested in particular veterans policy issues are encouraged to study related research programs and all students will develop a strong understanding of veterans policy issues, the body of existing research on veterans issues and the current research framework. Students will present their research and findings in a suitable format, and there will be opportunities for students who choose to continue their work after the term. Elements used in grading: Class Participation, Attendance, Final Paper. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for submission deadline.

**LAW 414L. Policy Practicum: Race, Gender and Prosecution. 2-3 Units.**

This policy practicum will focus on the gender and racial diversity of prosecutors' offices in California. Although police departments have collected and reported data on racial and gender diversity for decades, no similar information has been publicly available for prosecutors' offices, despite the longstanding belief that diversity is important for criminal justice decision makers. Recent controversies around the country about the investigation and prosecution of killings by police officers have only underscored the continued importance of attention to the role that race plays in the administration of justice in our country. This practicum builds off data collected from county prosecutors' offices in California to start a national conversation on prosecutorial diversity and how it affects decision-making and operations of justice. Students will expand the study with research on other states and/or the federal criminal justice system, organize a national roundtable to identify ways to improve staff diversity in prosecutors' offices, and conduct case studies on select California county prosecutors' offices. Elements used in grading: Class Participation, Attendance, Written Assignments. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook.

**LAW 414M. Policy Practicum: Policing and Data Innovation. 2-4 Units.**

This course will place students in projects with a local Police Department. Each student will work as part of a team that will communicate and work directly with Department officials. The projects will focus on one of three areas where the Dept. seeks to improve its operations. One project will examine ways the Department might better elicit and receive feedback from community members. Another project will examine how the Dept. might better use the information from the stop data forms that its officers complete. A third project will consider the use of body worn cameras. Each student team will produce a written report and present its findings to Dept officials. Elements used in grading: Class Participation, Attendance, Final Paper. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for submission deadline.

**LAW 414N. Policy Practicum: Campaign Reform and The Future of Political Communication. 2-3 Units.**

This Policy Lab will engage students who are interested in campaign finance reform and/or the future of political communication on the Internet. The research projects students will undertake involve the effect of the transition from television to the internet as the principal mode of political campaigning. Research will include assessments of candidate, party and independent spending on different forms of communication in the ongoing presidential election campaign, investigation into rules for political communication on major internet platforms (e.g., Facebook, Google/YouTube, Twitter), and review of the relevant literature on campaign finance and political communication. The client is the Bipartisan Policy Center in Washington, DC, which will house a campaign finance reform commission that will be tracking developments during the 2016 campaign. Opportunities for research on campaign finance issues, more generally, will also be part of this policy lab in subsequent months. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Research memo and individual meetings with the professor. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for submission deadline.

**LAW 414O. Policy Practicum: Copyright Licensing. 2 Units.**

The Copyright Licensing Policy Practicum will involve creating licensing structures for the automated licensing of photographic images as part of an ongoing Practicum project for the US Copyright Office. Special Instructions: After the term begins, students accepted into IP: Copyright Licensing: Principles, Law and Practice (LAW 625) may concurrently enroll in this practicum with consent of the instructor. In other words, students must be enrolled in IP: Copyright Licensing: Principles, Law and Practice to enroll in this practicum. See IP: Copyright Licensing: Principles, Law and Practice course description for enrollment instructions. Elements used in grading: Class Participation, Written Assignments. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook.

**LAW 414P. Policy Practicum: Impact Investing In Developing Countries: Legal Institutions and Work-Arounds. 2-3 Units.**

What legal institutions are important to the success of businesses serving the world's poorest people, and what are feasible work-arounds when those institutions are absent? An increasing number of business enterprises in developing countries, including India and much of Africa, seek to provide health, sanitation, housing, savings, insurance, and other essential services to the very poor. But many of them operate in countries that lack stable property rights, independent judiciaries, and other elements of the "rule of law" that investors and entrepreneurs take for granted in more developed countries. We will study how entrepreneurs operate and attract investors in these situations. The first phase of the project will involve in-depth interviews with and data gathering from foundations, funds, and other institutional investors who have a sophisticated knowledge of the conditions that conduce to the success of their investee enterprises and a return on their investments. Our client will likely be a foundation or other organization making impact investments in developing countries. GSB, Political Science, and Economics students as well as Law students are welcome to participate. Elements used in grading: TBD with instructor. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for submission deadline.

**LAW 414Q. Policy Practicum: Developing a Federal Framework for Climate Change Policy. 3 Units.**

Students in this policy lab will work with the instructor, and a sponsoring foundation, to develop strategies to guide the federal government in delivering on the nation's climate change commitments. The students will focus on two major topics: (1) constructing an inventory and road map of potential carbon emissions reductions across the federal government; and (2) evaluating governing structures available to coordinate federal emissions reductions and adaptation/resilience actions across the federal government, and with the states. Elements used in grading: Written Assignments. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for submission deadline.

**LAW 414R. Policy Practicum: Managing Gentrification in San Francisco. 2-4 Units.**

Gentrification is a concern for policy makers in successful and diverse cities. Gentrification can improve neighborhoods that suffer from underinvestment, but it can also cause the displacement of long term residents, cherished landmarks and long standing businesses and it can make neighborhoods homogenous, sterile and less able to meet the day to day needs of their residents. A gentrifying city can be a city in the process of losing the variety and dynamism that made it attractive to investors and successful people in the first place. And of course, gentrifying cities are unaffordable to low income residents. Because of rising rents, many neighborhoods in San Francisco are already unable to sustain such businesses as dry cleaners, laundry services, drug stores and affordable restaurants. A neighborhood with nothing but fancy wine bars, chic clothing shops, gourmet restaurants and trendy coffee houses selling \$5 drip coffee is not in crisis, but a city with only such neighborhoods arguably is. We will work with the San Francisco Mayor's Office of Community and Economic Development on various issues related to the challenges of gentrification in San Francisco. Issues include researching policy responses to the displacement of legacy businesses and non-profit enterprises and analyzing the effects of rising property values and rents on the diversity of businesses in San Francisco neighborhoods. Students interested in this policy lab should submit a C/V and statement of interest, to be reviewed by Professor Ford and San Francisco city officials. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. Elements used in grading: Class Participation, Written Assignments. CONSENT APPLICATION: To apply for this course, students must complete and submit a Consent Application Form available on the SLS website (Click Courses at the bottom of the homepage and then click Consent of Instructor Forms) to the instructor. See Consent Application Form for submission deadline.

**LAW 414S. Policy Practicum: The Law and Practice of Changing Mindsets to Build Cultures of Health. 3 Units.**

Stanford Social Psychological Answers to Real-world Questions (SPARQ) is a "do tank" in the Department of Psychology that partners with organizations to solve real-world problems by applying social science. With a grant from the Robert Wood Johnson Foundation, SPARQ is developing techniques to improve people's health by changing mindsets in culturally appropriate ways. The project, Changing Mindsets to Build Cultures of Health, targets the mindsets not only of patients, but also of healthcare practitioners. For example, one study examines how changing practitioners' mindsets affects their online communications with patients and, in turn, patients' behaviors and health. Working closely with SPARQ as a client, the practicum investigates legal issues in changing doctor and patient mindsets. For example, can patients consent to knowing more or less about their doctors' expectations? How much can doctors' curate their findings and opinions for the sake of their patients? (How might a patient consent, for instance, to being given a placebo when detailed knowledge that it is a placebo destroys the placebo effect?) With the advent of electronic medical records (EMR), how much information are healthcare practitioners legally required to share with their patients and should they push to share as much as they are permitted to in all circumstances? Practicum participants will work on a multidisciplinary team with SPARQ faculty, grad students, and staff to develop a memo analyzing relevant legal questions and precedents and may also advise the design of behavioral experiments. Students will receive 3 credits for this one-quarter "R" class. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION : To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper.

**LAW 414T. Policy Practicum: Mass Incarceration of Immigrants. 2-3 Units.**

Nascent empirical research suggests that there may be a "citizenship bias" in sentencing and that immigrants receive more punitive sentences than their similarly situated citizen counterparts. There are numerous possible explanations for this discrepancy, but one trend may help to account for at least some of it: immigrants in state prisons and jails may be deemed ineligible for certain rehabilitative programs and other sentencing alternatives on the basis of their citizenship status. The purpose of this policy lab is to determine whether and to what extent immigrants in California prisons and jails are excluded from access to rehabilitative programs that function as alternatives to incarceration on the basis of citizenship status. Students will do research to document the existence of such exclusions as a matter of policy and/or practice, and work with Professors Jayashri Srikantiah and Jennifer Chacón and the ACLU of Southern California to draft legislation to prevent noncitizens from being unnecessarily excluded from such programs. This policy lab is offered for three units in Autumn Quarter and two units in Winter Quarter. Elements used in grading: Written research and drafting assignments. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 414U. Policy Practicum: Investments in Investor-Backed Pay For Success (Social Impact Bond) Programs. 2-3 Units.**

A growing number of state and local governments are entering into contracts that pay nonprofit or for-profit organizations for success in delivering social outcomes, such as reducing recidivism, homelessness, obesity, or asthma. Among the key players in these pay-for-success (PFS), or social impact bond (SIB) programs are investors who provide working capital to service providers and are repaid to the extent that providers achieve agreed-upon outcomes. The typical investment "stack" consists of for-profit investors and foundations that make grants or invest at concessionary rates and absorb first losses if the provider fails to perform. This practicum will consider the variety of strategies and instruments for financing social impact bonds, examining the entire spectrum of investments, optimal investment structures, the role of investors in monitoring service providers, and the role of intermediaries in structuring and placing these financial instruments. Thus far, these arrangements have been one-off, or bespoke, requiring individual crafting that makes them difficult if not impossible to scale. Major barriers to scaling include (1) the transaction costs of negotiating agreements among non-concessionary commercial investors, foundations, and individual philanthropists to assemble the capital necessary to finance a program, and (2) identifying success metrics that are sufficiently clear, measurable, evidence-based, and "non-game-able" that investors can invest with reasonable certainty. We will initially focus on the problem of outcome metrics. Although such metrics are inevitably specific to different social program—e.g., youth recidivism and early childhood education—it may be possible to develop metrics that are useable by different government entities adopting similar sorts of programs across the United States. In addition, the early stages of a program financed by a social impact bond may create uncertainties with respect, say, to the processes of enrolling participants. To explore these issues, we will draw on existing examples of SIBs, on the social science literature (and experts) in particular fields, and on the expertise of organizations including Third Sector Capital Partners, Social Finance US, the Nonprofit Finance Fund, and the Social Impact Bond Technical Assistance Lab at Harvard's Kennedy School. Our client will be the Nonprofit Finance Fund, founded in 1980, which helps organizations connect money to mission effectively, and supports innovations such as growth capital campaigns, cross-sector economic recovery initiatives and impact investing. See <http://nonprofitfinancefund.org/>. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 414V. Policy Practicum: Access to Justice: Legal Services Programs and Limited Advice Assistance. 3-4 Units.**

This course seeks to assess the effectiveness of limited advice and assistance provided to low income clients rather than full representation. Because legal services programs can represent less than a fifth of those who need their help, most offer some form of limited aid. Partnering with the national Legal Services Corporation and Alaska Legal Services, students will interview of sample of clients who received limited assistance and a sample of individuals who secured no help. The outcome of this study will help guide the decisions of legal services programs about whether to invest in limited assistance. After the term begins, students accepted into the course can transfer from section 01 (3 units) into section 02 (4 units), which meets the R requirement, with consent of the instructor. Elements used in grading: Interviewing skills; data analysis; written research and drafting assignments. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 414W. Policy Practicum: Exploding the Fine Print: Designing More Effective Legal Disclosures. 2 Units.**

The government uses mandated disclosure as a central way to regulate companies' relationships with consumers. They set standards for how companies present terms, conditions, and other legal information to people, in the hope that communicating these terms will educate people sufficiently to make wise decisions. But are these disclosures actually comprehensible, engaging, or effective? Anecdotally, we all know that most people ignore the fine print, click through online disclosures without reading them, and trash the paperwork that come along with products or account statements. In this Policy Lab, we will experiment with how these very important disclosures could be improved, with better designs that could make the information more understandable, more engaging, and more actionable for normal people. We will partner with the financial regulator FINRA, as they grapple with a specific disclosure use case: when financial companies advertise their products to people via print, web, mobile, and television, how can they effectively communicate the terms and risks of these financial products? What kind of disclosure design – with more visuals, with more interactivity, or with tech-enabled communication – could be a new standard for helping people make smart decisions about financial products? During the Policy Lab, our team of students will work with FINRA leaders to understand their current disclosure design requirements for financial companies and their rule-making process as they set new regulations for advertising disclosures. We will understand the needs and requirements of the regulators, the financial companies, and the different target users, and then use the design process to generate new proposed models for disclosures and then test them with qualitative and quantitative evaluation. We will submit this research and these new models to FINRA to be used as they define standards for securities firms communicating with the general public. Elements used in grading: Class Participation, Final Paper. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 414X. Policy Practicum: California Drought. 3 Units.**

Students in this Policy Lab practicum will work with the Public Policy Institute of California (PPIC) as part of a broad study of lessons learned from the current California drought. The overall goal of the study is to assess the functioning of various aspects of California's water management system during the current drought and to develop tools and policy recommendations to help the state survive future droughts with fewer economic and environmental impacts. California is currently in its fourth year of drought. The drought's duration, along with increased temperatures due to climate change, have combined to make it perhaps the most intense drought since we have begun keeping records. These conditions have placed enormous strains on water management systems at all levels of government. The state's water rights system (among other laws) has had to cope with unprecedented hydrologic conditions, conflicting demands for water, and data gaps. As a result, state and federal water management agencies have faced unprecedented decisions along with untested rules for making those decisions. The overall PPIC study, including the work of the practicum, will seek to evaluate the performance of the state's institutions, management systems, infrastructure, and laws during these extreme conditions in order to make recommendations to better prepare California for future droughts. The practicum will focus primarily on the California water rights system and its interaction with other laws related to water quality and aquatic species protection in the context of the ongoing drought. Issues for research include case studies of the effectiveness of different legal mechanisms for protecting streamflows and aquatic species from conditions related to extreme drought. They may also include an analysis of temporary urgency change petitions (a mechanism to temporarily suspend water quality based limitations on water rights) during the drought, including their rationale and their effects on water quality. The practicum will contribute some written analysis a series of reports to be produced by PPIC. Students will also participate in planning and holding a workshop of experts that will help shape the project and its outputs. The practicum will accept up to eight students. Elements used in grading: Written Assignments. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and submit a Consent Application Form available on the SLS website (Click Courses at the bottom of the homepage and then click Consent of Instructor Forms) to the instructor. See Consent Application Form for submission deadline.

**LAW 414Y. Policy Practicum: Veterans Treatment Courts. 2-3 Units.**

More than 250 veterans treatment courts now exist nationwide. They recognize the unique needs of veterans who get entangled in the criminal justice system, and endeavor to provide more effective resources to treat their problems than the traditional criminal justice system ordinarily provides. Despite their growth and popularity, little is known about their effectiveness, particularly in the target population they reach. We are partnering with Congressman Seth Moulton and the Massachusetts veterans court program on an ambitious and interesting project to understand who is excluded from veterans treatment courts (VTCs), why, and whether there are ways to help them too. We will work closely with the Commonwealth to collect and review information on veterans in the criminal justice system, and veterans who are in or have gone through VTCs, for the purpose of understanding the population and gaining insight into who truly benefits from the courts and who is excluded. We will use techniques used in evaluating mental health and other specialty courts to assess the VTCs and develop recommendations for expanding their reach to at least some of those who are currently excluded but who could benefit from them. The information we gather and develop into a report will be useful to the many jurisdictions that already host veterans treatment courts, as well as to those considering their adoption. Elements used in grading: Attendance, Class Participation, Final Paper. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 414Z. Policy Practicum: Retaining & Advancing Women in National Law Firms. 3 Units.**

50/30/18. These numbers represent a long-standing problem for U.S. law firms. For over 30 years, 50% of law school graduates have been women, yet only 18% of law firm equity partners are women. What's more, that partnership number has remained relatively fixed for much of that time. In the National Association of Women Lawyers' first annual survey in 2006, women constituted 15% of equity partners. Despite a recognition of and focus on this issue, law firms have not been able to move the needle. Conventional methods haven't worked. The profession needs new ideas - creative and innovative ways to retain and advance women in private law firms. Students selected for this course will work together to produce a policy paper analyzing this issue. Research will focus on two major areas: (1) the possible reasons for the low retention rates and partnership percentage; and (2) innovative ideas both inside and outside the legal profession for retaining and advancing women. The paper will be used to advise participants in the inaugural Women in Law Hackathon. The Hackathon is a Shark-Tank style pitch competition co-created by Diversity Lab and SLS. 54 high-level partners from top U.S. law firms and nine SLS students will work together (virtually) in teams of seven from January to June 2016 to innovate new means of advancing and retaining women in the legal profession, particularly those in private sector law firms. The teams will then present their ideas in person to a panel of judges at a pitch event at SLS on June 24, 2016. The top three winning teams will grant the prize money donated by Bloomberg Law (1st place \$10,000, 2nd place \$7,500, 3rd place \$5,000) to their choice of a non-profit organization that is advancing women in the legal profession and beyond. The winning ideas will be published on Diversity Lab's and SLS's websites and distributed to major news publications and top management at U.S. law firms. Our hope is that some or all of these ideas will be adopted by firms across the U.S. Students may also elect to participate as a team member in the Hackathon. Time commitment of team members is approximately 2-3 hours per month (via phone) from January through June 2016, plus the 1.5-day in-person pitch competition June 23-24, 2016 at SLS. Funding is available to cover domestic travel costs for students to return from summer internships to participate in the competition. Maximum enrollment: 9. Preference will be given to those students who would like to participate in both the practicum and the Hackathon. Students will receive 3 credits for this one-quarter "R" class. Elements used in grading: Class participation, qualitative and empirical research, written assignments, and final policy report. NOTE: Students may not count more than a combined total of eight units of directed research projects and policy lab practica toward graduation unless the additional counted units are approved in advance by the Petitions Committee. Such approval will be granted only for good cause shown. Even in the case of a successful petition for additional units, a student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. For detailed information, see "Directed Research/Policy Labs" in the SLS Student Handbook. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 415A. Policy Practicum: UNCITRAL International Mediation Convention. 1-2 Unit.**

The United Nations Commission on International Trade and Law (UNCITRAL) has formed a working group to explore development of a convention on the enforcement of cross-border mediation settlement agreements, comparable to the existing New York Convention for enforcement of arbitral awards. Many of the working group delegates are very experienced with international arbitration, but less acquainted with mediation. Our project will be to interview about 25 international mediators through survey and structured interviews, from which we can pinpoint the enforcement issues that emerge, and develop a series of illustrative cases. This research would require IRB review; our project for winter quarter will be to design the survey/interview protocol, submit for approval, and schedule the interviews. Both the Legal Office of UNCITRAL and U.S. State Department are available for advice. The UNCITRAL working group will be meeting in February in New York, then September in Vienna, so we anticipate that our work will be a useful input to the overall education of the delegates to ensure that the convention provisions align with the needs of practice. Course available for one credit or two credits. Elements used in grading: Attendance, Written Assignments.

**LAW 417. Advanced Criminal Law and Public Policy: A Research Practicum. 3 Units.**

This course will provide students with a rare opportunity to engage in real-world crime policy analysis, both as a way to use some of the skills they have learned in previous SLS courses, as well as to help them learn about the political and practical issues involved in constructing public policies. Students will work with a "client" agency or organization in the crime policy sector to carry out a policy-related research and analysis project. We will organize ourselves as a provisional policy think-tank or, if you prefer, a makeshift policy institute or short-term consulting group. As such, this practice-oriented course has both learning and real-world policy reform goals, which makes this course unique within SLS and, I hope, refreshing and compelling. Students will learn how to: Identify and analyze empirical data for policy purposes; develop evidence-based policy proposals; interact with high-level policymakers around politically sensitive issues; and effectively prepare a policy brief and deliver a formal presentation to high-level government officials.

**LAW 418. Advanced Criminal Defense Clinic. 2-7 Units.**

Advanced clinic allows students who have taken the Criminal Defense Clinic to continue working on cases. Participation in case rounds is required. Advanced clinic may be taken for 2-7 units. Students may not enroll in any clinic (basic or advanced) which would result in them earning more than 27 clinical credits during their law school career. Students must have taken Criminal Defense Clinic (Law 408). Elements used in grading: Class participation, attendance, written assignments and case work.

**LAW 419. Three Strikes Project: Criminal Justice Reform & Individual Representation. 3 Units.**

This seminar offers a unique opportunity to study criminal justice reform in real time. In this seminar, students read and analyze a variety of cases and articles, examining the evolution of incarceration and sentencing reform in California as a case study in the history, politics, practical considerations and legal regulation of sentencing and "mass incarceration" in the United States. Students will also test their skills in the field by assisting with the representation of individual inmates sentenced to long prison terms for nonviolent crimes and engaging in active criminal justice policy analysis and advocacy. Over the five years, no other state has implemented more reforms to reduce its prison and jail populations than California. The Project has been intimately involved in this movement, leading ballot measures that implemented legislative reforms to reduce prison sentences and representing individual prisoners sentenced to life for nonviolent crimes under California's "Three Strikes" law. Based on this experience, the Project was recently asked by the White House to support prisoners who receive sentence commutations from the President. Students enrolled in the seminar are involved in all aspects of the Project's work. Student casework involves assistance with different stages of ongoing litigation in state and federal court. Students will visit a Project client in prison, conduct factual investigation in the field, and draft petitions on our clients' behalf. Students will also contribute to ongoing policy work to ensure the effective implementation of reforms impacting our clients, which include individual prisoners and the NAACP Legal Defense and Educational Fund. The Project is an active, fast-paced organization that depends on the hard work and contributions of law students enrolled in this seminar. This course offers the opportunity to both study the theory behind the law and to hone practical litigation and advocacy skills in and out of the courtroom. The seminar will meet for 3 hours per week. Students will also meet for 1 hour individually and in teams with Project director Mike Romano each week to discuss their work on their projects. CONSENT APPLICATION: Interested students must apply to enroll in the seminar by sending a one-page statement of interest and resume by email with the subject line "application" to Mike Romano (mromano@stanford.edu). Applications will be considered on a rolling basis. Elements used in grading: Class Participation, Attendance, Written Assignments.

**LAW 423. Advanced Supreme Court Litigation Clinic. 2-7 Units.**

The Advanced Supreme Court Litigation Clinic provides an opportunity for students who have already successfully completed the Supreme Court Litigation Clinic to continue their work in the Clinic. Work includes research and drafting petitions for certiorari and oppositions, merits briefs, and amicus briefs, compiling joint appendices, and preparing advocates for oral argument, as well as commenting on drafts of briefs being filed by lawyers in other cases. Advanced students will also continue to participate in the Clinic's discussion of cases during case rounds. For a more elaborate description of the clinic's content, see the course description for Course Number 436-0-01. Special instructions: Admission is by consent of instructor. Advanced students may arrange with the instructor to receive between two and seven units. No student may receive more than 27 overall clinical credits, however, during the course of the student's law school career. Students have the option to receive R credit upon instructor approval. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Projects and participation.

**LAW 424. Secured Credit. 3 Units.**

This course surveys the law of raising funds by granting security interests in personal property. Security interests affect the creditor's rights if the debtor is unable to repay the loan; as a result, they significantly affect the terms on which capital can be raised. They affect industries ranging from traditional manufacturing to high tech start-ups; they also play a role in consumer loans (and help explain the movie "Repo Man"). The course focuses primarily on Article 9 of the Uniform Commercial Code, but also considers the federal Bankruptcy Code, the federal intellectual property statutes, and other state and federal laws. Bankruptcy is the first of three courses (the other two are Secured Credit and Payment Systems) dealing with the financing of commercial ventures through means other than the sale of corporate stock. These courses may be taken in any order: neither presupposes any knowledge of the others. Students who cannot take all three should probably prioritize them in the order they are listed—that is, Bankruptcy is the single most important course to take, then Secured Credit, then Payment Systems. Elements used in grading: Final exam.

**LAW 425. Statutory Interpretation. 3 Units.**

Statutory law is the dominant source of contemporary law, and it is the form of law that lawyers are likely to confront most often in almost any area of practice. It is also an area of vibrant intellectual debate, as scholars, Supreme Court justices, and others debate the methods and aims of statutory interpretation. This course will stress both the practical and theoretical dimensions of interpretation. Students will learn and apply the methods of statutory interpretation. We will also spend considerable time on contemporary controversies, such as debates about textualist, purposive and dynamic interpretation; about the use of legislative history and canons of construction; about the special interpretive problems that arise in the context of direct democracy; and about the democratic and constitutional foundations of statutory interpretation itself. Readings will draw from political science as well as law. Elements used in grading: Class participation and final exam.

**LAW 426. Law, Lawyers and Social Movements. 3 Units.**

This seminar will examine, through historical and current case studies, the uses that social movements make of law and lawyers as means of mobilizing followers, building movements, and achieving their ultimate aims. It will ask such questions as whether—as some critics claim—resorting to law drains social movements of democratic energy and passion, and relying on courts produces only symbolic victories and destructive backlash; or whether legal strategies can be a useful catalyst for change, as a supplement to protests, community organizing, and lobbying for legislation. Among the movements likely to be studied are different phases in the movement for black civil rights, the women's equality movements of the early and late 20th century, the labor movement before and during the New Deal, and the movements for LGBT rights of the present time. Students may satisfy the course requirements either by taking a final extended take-home exam reflecting on the course readings, or (in the "R" section of the course), writing a research paper based largely on primary sources on some aspect of a social movement and its legal strategies. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class Participation, Attendance, Final Exam or Research Paper. CONSENT APPLICATION: To apply for this course, students must complete and submit a Consent Application Form available on the SLS website (Click Courses at the bottom of the homepage and then click Consent of Instructor Forms) to the instructor. See Consent Application Form for submission deadline.

**LAW 427. Local Government Law. 3 Units.**

This course will examine the source, scope and limits of local government power. It will consider the relationship of local governments to state and federal government and of the relationship of local governments to the individuals and communities within and around them. Specific themes will include the potential of local governments to be responsive democratic communities, the potential of local governments to become isolated or exclusive enclaves, and the effect of local governments on the metropolitan political economy. Using the casebook *Local Government Law* by Frug, Ford and Barron, the course will examine state and federal doctrine that affects local government, political/ social theory and urban planning/ development literature. Open to first-year Law School students with prior instructor approval. Special Instructions: Students may write papers in lieu of the final exam. Upon instructor consent, students interested in writing should enroll in Law 427-0-02. Students who do not receive a spot in section 02 may enroll in section 01. Elements used in grading: Exam or paper and class participation.

**LAW 430. Trusts and Estates. 2 Units.**

This course will cover the following topics: intestacy; will execution and revocation; will provisions and interpretations; restrictions on the right to devise; probate; creation, amendment and termination of trusts; revocable and irrevocable trusts; trust provisions; charitable trusts; trust administration; and substitutes and conservatorships. Elements used in grading: Final exam (In-School: open book, essay).

**LAW 432. Managing Natural Resources In The Face of Climate Change and Other Stressors Workshop. 2-3 Units.**

This workshop seminar will provide students with the opportunity to examine and critique cutting-edge research and work in the natural resources field, with a focus on how climate change and other stressors are affecting scientific, legal and policy issues arising in a number of natural resource contexts, including water, forestry, coastal resources, conventional and renewable energy development, and the like. Although it is open to all students, the seminar is designed especially for those with an interest in the field who wish to stay abreast of current issues, work, and ideas. In each class, an academic expert, policy maker, or practitioner will present their current research or work and engage in a robust discussion. Special Instructions: Grades will be based on class participation and reflection/discussion papers (Section 1) or (Section 2) a long research paper. After the term begins, students accepted into the course can transfer from Section (01) into Section (02) which meets the R requirement, with consent of the instructor. Students taking the course for R credit can take the course for either 2 or 3 units, depending on the paper length. Grading for Section 1 will be Mandatory P/R/F. Grading for Section 2 will be H/P/R/F. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper.

**LAW 434. Contract Design: Principles and Practice. 2 Units.**

Although transaction lawyers spend much time drafting contracts and related documents, they can contribute very significant value by designing transactions. Transactions should be tailored to the goals and circumstances of each set of parties, but there are some general principles that can guide the design process. This seminar examines some of these principles: such as the use of embedded options in contracts, of third parties, and of tailored procedures for dispute resolution and enforcement. Some of the readings and discussion will be at a fairly high level of abstraction, drawing on economic and sociological theories of contracting. The rest will be closer to ground level, looking at particular types of transactions, such as franchising, construction, joint ventures, or start-up financing. We will also look at the process of innovation in contract design, including the role of lawyers and digital document production. Students will be required to write paper for the seminar, and encouraged to focus on a specific type of transaction. Special Instructions: Grades will be based on (1) short papers or (2) an independent research paper for "R" (Research credit). After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Short papers or research paper.

**LAW 436A. Supreme Court Litigation Clinic: Clinical Practice. 4 Units.**

The Supreme Court Litigation Clinic will expose students to the joys and frustrations of litigation before the Supreme Court of the United States. The bulk of the clinic will be run as a small law firm working on live cases before the Court. Students will participate in drafting petitions for certiorari and oppositions, merits briefs, and amicus briefs, compiling joint appendices, and preparing advocates for oral argument, as well as commenting (the technical term is "kibbitzing") on drafts of briefs being filed by lawyers in other cases. The precise nature of the cases will depend on the Court's docket, but in recent Terms, the clinic's cases have involved federal criminal law and procedure, habeas corpus, constitutional and statutory antidiscrimination and employment law, bankruptcy law, and the First Amendment. Our aim is to involve students as fully as possible in this type of litigation. The Clinic begins with an intensive introduction to the distinctive nature of Supreme Court practice, including the key differences between merits arguments and the certiorari process, the role of amicus briefs, and the Supreme Court Rules. After that, seminar meetings will be devoted primarily to collaborative work on the cases the clinic is handling. While students will be primarily responsible for working in teams on one case at a time, they will also be expected to acquire familiarity with the issues raised in other students' cases and will both edit each others' substantive work and assist each other and the instructors with the technical production work attendant on filing briefs with the Supreme Court. The course will involve substantial amounts of legal research. The Supreme Court operates on a tight, and unyielding deadline, and students must be prepared both to complete their own work in a timely fashion and to assist one another and the instructors on other cases. The instructors will not ask students to do any kind of "grunt work" that they themselves will not also be handling, but grunt work there will be: proofreading, cite-checking, dealing with the joint appendix, and the like. The nature of the work product means that while students will average thirty hours per week on their case-related work, that work will surely be distributed unevenly across the quarter. Unlike most other courts, the Supreme Court has no student practice rules. Thus, students will not be able to argue cases before the Court. But they will participate in moot courts on their cases, as both advocates and Justices. Each student will also have the opportunity to travel to Washington to see the Court in session, preferably with respect to a case on which the student has worked. Ideally students will already have experience with persuasive doctrinal writing, through a course like Federal Pretrial Litigation or through intensive supervision during their summer jobs or other clinics. Admission to the Clinic is by consent of the instructors. Students will need to submit a writing sample that reflects their facility with doctrinal legal arguments and the name of at least one reference who can comment on their legal analytic ability. -- Special instructions: General Structure of Clinical Courses -- The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours

**LAW 436B. Supreme Court Litigation Clinic: Clinical Methods. 4 Units.**

The Supreme Court Litigation Clinic will expose students to the joys and frustrations of litigation before the Supreme Court of the United States. The bulk of the clinic will be run as a small law firm working on live cases before the Court. Students will participate in drafting petitions for certiorari and oppositions, merits briefs, and amicus briefs, compiling joint appendices, and preparing advocates for oral argument, as well as commenting (the technical term is "kibbitzing") on drafts of briefs being filed by lawyers in other cases. The precise nature of the cases will depend on the Court's docket, but in recent Terms, the clinic's cases have involved federal criminal law and procedure, habeas corpus, constitutional and statutory antidiscrimination and employment law, bankruptcy law, and the First Amendment. Our aim is to involve students as fully as possible in this type of litigation. The Clinic begins with an intensive introduction to the distinctive nature of Supreme Court practice, including the key differences between merits arguments and the certiorari process, the role of amicus briefs, and the Supreme Court Rules. After that, seminar meetings will be devoted primarily to collaborative work on the cases the clinic is handling. While students will be primarily responsible for working in teams on one case at a time, they will also be expected to acquire familiarity with the issues raised in other students' cases and will both edit each others' substantive work and assist each other and the instructors with the technical production work attendant on filing briefs with the Supreme Court. The course will involve substantial amounts of legal research. Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours

**LAW 437. Water Law and Policy. 3 Units.**

This course will study how society allocates and protects its most crucial natural resource -- water. The emphasis will be on current legal and policy debates, although we will also examine the history of water development and politics. Although the course will focus on United States law and policy, insights from the course are applicable to water regimes throughout the world, and we will occasionally look at law and policy elsewhere in the world for comparison. Among the many issues that we will consider are: how to allocate water during periods of scarcity; alternative means of responding to the world's growing demands for water (including active conservation); the appropriate role for the market and private companies in meeting society's water needs; protection of threatened groundwater resources; environmental limits on water development (including the U.S. Endangered Species Act and the "public trust" doctrine); constitutional issues in water governance; Indian water rights; protection of water quality; challenges to substantively reforming existing water law; and interstate and international disputes over water. Students will be expected to participate actively in classroom discussions. Elements Used in Grading: Class participation, attendance and final exam.

**LAW 439. Mind the Gap: Exploring Selected Areas of American Inequality. 2 Units.**

This course will explore the equity of resource distribution and opportunity in the United States in the 21st century. We will explore and evaluate the common critique that the contemporary structure of various entities (such as schools, courts, and the legislature) contributes to increased inequality. Some of the likely topics to be covered in class, along with their concomitant impact on equity, include: language and identity; trade-offs between equality of opportunity and equality of outcome; stereotype threat; felon disenfranchisement; labor market inequality; urban vs. rural poverty; the erosion of mental health services; and how factors such as race, ethnicity, gender, and income can contribute to academic achievement gaps. The class will explore the substantive issues related to equality and inequality as well develop written and oral skills for advocacy, including drafting op-eds, position papers, and other written materials and preparing for oral presentations. Each student will be responsible for leading at least one class at San Quentin State Prison to a mixed class composed of Stanford and San Quentin prisoner students. Students will be also be expected to write weekly reflection papers in response to the assigned reading and to attend and participate heavily in each class discussion; they will also be expected to edit and provide individual feedback on the written assignments of the San Quentin students. In addition, attendance at a one day training conducted by the Prison University Project is mandatory. Class will meet on Fridays from 3:00 - 5:00pm. Grades will be based on a combination of active class participation and preparation, consistent attendance, and several written assignments. **CONSENT APPLICATION:** To apply for this course, students must complete and e-mail the Consent Application Form to the instructors; the form is available on the SLS Registrar's Office website (See Registration and then Law Students). See Consent Application Form for submission deadline.

**LAW 441. European Legal History. 3 Units.**

This seminar will explore major topics in European legal history from ancient Rome through the present: Roman law, canon law, feudalism, sixteenth- and seventeenth-century constitutionalism, modern natural law, the age of absolutism and the rise of the centralized, administrative state, the structure of Old Regime law and society and the radical changes brought about by revolution, the German historical school of jurisprudence, and the rise of the European Union and a new culture of international human rights. In exploring these topics, we will focus on certain core, recurring themes that continue profoundly to shape the world in which we live. These include the sources and nature of law (positive law vs. custom), the relationship between law and society, and the relationship between law and history. Classroom discussion will focus on selected primary- and secondary-source texts that we will read as a group. The course will be limited to 12 SLS students with 10 additional slots held for students enrolling in HISTORY 238E/338E. Elements used in grading: Brief analytical paper (6-8 pages, worth 35% of the total course grade) and final exam (worth 65% of the total course grade). Cross-listed with History (HISTORY 238E & HISTORY 338E).

**LAW 444. Thinking Like a Policy Analyst: Introduction to Policy Analysis. 2 Units.**

This seminar is designed primarily for students working on Policy Lab projects, but will be open to other students as well subject to a total enrollment of 15 students. It will be offered both the Autumn and Winter quarters during 2013-14, with any individual student eligible to enroll only in one quarter. You already know how to think like a lawyer, but if you are interested in policymaking, policy advocacy or policy research, whether in the public, nonprofit, or corporate sector, you need to know how to think like a policy analyst as well. This seminar, designed primarily for students beginning or continuing in Policy Lab practicums, has three purposes. First, it introduces students to the ways in which policy analysts approach public policy problems and controversies, focusing on perspectives that distinguish policy analysis from traditional legal analysis. Second, it introduces students to the tools of policy analysis, including approaches to collecting and analyzing information. Third, it provides hand-on lessons on communicating with policy makers orally and in writing. There is no text for the course. Readings for the course will include examples of policy analyses conducted to inform public policymaking. Students engaged in policy practicums will use their practicum experience as a basis for assessing the value of various policy analytic perspectives and research approaches. Students not engaged in policy practicums will pick a policy problem they are interested in and develop a plan for conducting a policy analysis relevant to this problem. Elements used in grading (Autumn): Attendance, class participation, three short reflection papers. Elements used in grading (Winter): Course paper and class participation. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 447. Communications Law: Broadcast and Cable Television. 3 Units.**

Most people watch television on a regular basis (although not necessarily on TV). Television entertains, delivers the news, and provides an important forum for debating political issues. Focusing on communications law and first amendment law, the course will discuss how and why regulation shapes what we see on TV, and how it attempts to ensure that television can fulfill its functions for society. For example, why is cable television so expensive? Why can comedians swear on cable TV, but not on broadcast TV? Should regulators care as much about violence as they do about indecency? Can we trust the market to give the audience what it wants? Will the market provide content that is in the public interest, such as local news or educational programming, or do regulators need to intervene? Should we care if media outlets are increasingly owned by a few small conglomerates? And how does the Internet affect the need for ownership regulation? The course mostly focuses on the U.S., but highlights developments elsewhere where appropriate. Special instructions: Students may take Communications Law: Internet and Telephony and Communications Law: Broadcast and Cable Television in any order (neither is a prerequisite for the other). There are no prerequisites for this course. No technical background is required. Elements used in grading: Class participation, attendance, final exam.

**LAW 448. Contemporary Issues in Constitutional Law. 2 Units.**

This is an advanced constitutional law seminar for students who have already taken the introductory Constitutional Law course. The seminar will provide an opportunity for in-depth discussion of competing theories of constitutional interpretation, the role of the Supreme Court in our political system, and analysis of judicial behavior. Each week, these themes will be examined through the lens of a current "hot topic" in constitutional law - for example, the Affordable Care Act, affirmative action, the Second Amendment, the death penalty, executive power in the war on terrorism, campaign finance, immigration, same-sex marriage, and other topics. This is not a "spectator" class; all students will be expected to participate actively in class discussion each week. This is a good seminar for students interested in clerking or pursuing academia.

**LAW 451. European Union Law. 2-3 Units.**

The U.S. and the European Union (which comprises 28 European states and 500 million people) have the largest bilateral trade relationship in the world. About 60% of the world's GDP is generated on the Transatlantic Marketplace. U.S. companies rely on the EU market for more than half of their global foreign profits, and U.S. investment in the EU is currently three times greater than U.S. investment in the whole of Asia. The new Transatlantic Trade and Investment Partnership (TTIP), a free trade agreement currently under negotiation between the EU and the U.S., will further strengthen substantially the economic ties between the EU and the U.S. in the near future. In the past few years, even several proposed mergers between U.S. companies have been killed solely by the EU antitrust authorities, although approved by the U.S. antitrust regulators. In recent years, this has tremendously heightened the need for a sound understanding of the legal system of the EU, especially for business and technology lawyers. Responding to this need, this course will, first, examine the internationally unique legal system of the EU as such, as it is applicable to any field of substantive and procedural EU law. Thus, we will look at the legal nature and the different sources of EU law and its relationship with the national law of the EU Member States. We will cover the relevant EU law enforcement actions including state liability issues as well as the jurisdiction of both European Courts and relevant remedies in national courts. Secondly, we will explore the legal framework of doing business in the EU, from the perspective of a business entity as an internationally operating actor in a European business environment. In this context, we will focus on the most essential fields of EU business law, i.e. (a) the four fundamental economic freedoms of the European Internal Market for goods, services, capital and persons, (b) EU competition/antitrust law, as well as (c) EU e-commerce law. Special attention will be given to the question how companies established outside the EU can efficiently use EU business law to pursue their interests in the EU. Additional education and research opportunities for students in EU law, building on this course, can be found in the course syllabus. Special Instructions: Students have the option to write a research paper in lieu of the one-day take home exam. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Students taking the course for R credit can take the course for either 2 or 3 units, depending on the paper length. Elements used in grading: Class participation, one-day take-home exam or research paper.

**LAW 453. State-Building and Rule of Law Seminar: Advanced. 3 Units.**

Students who participate in the State-Building and Rule of Law Seminar in the fall quarter may seek consent to continue their work in the Advanced Seminar in winter or spring quarter. Six students per quarter will be allowed to participate. Students will work on individual applied or scholarly research projects developed in collaboration with the professor, and meet regularly as a group to discuss shared research challenges and issues. There may be funds available for fieldwork necessary to complete applied research projects. Determinations will be made by the professor and Rule of Law Program. Students may write a paper for Research credit with instructor consent. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Attendance, Written Assignments, Final Paper.

**LAW 453A. Afghanistan Legal Education Seminar: Advanced. 3 Units.**

Students who participate in the Afghanistan Legal Education Seminar in the fall quarter will continue their work in the Advanced Seminar in the winter or spring quarter. Only students selected for the Afghanistan Legal Education Project (ALEP) in spring 2015 may participate. Students will author textbook chapters, assume programmatic responsibilities, and meet regularly as a team and individually with the ALEP faculty. Elements used in grading: Attendance, Written Assignments, Final Paper.

**LAW 453B. State-Building and the Rule of Law Workshop: Advanced. 3 Units.**

The Advanced Workshop on State-Building and the Rule of Law builds on the State-Building and Rule of Law Seminar offered in the fall quarter. Enrollment is by consent and limited to students who successfully completed the fall seminar and are members of one of the four Rule of Law Projects: the Afghanistan Legal Education Project (ALEP), the Rwanda Law and Development Project (RLDP), the Timor Leste Legal Education Project (TLLEP), or the Iraq Legal Education Initiative (ILEI). The ALEP team will write textbooks and develop curriculum for, and provide program support to, the Department of Law at American University of Afghanistan. The RLDP team will conduct research and analysis culminating in a background paper on statutory interpretation for the Rwandan Law Review Commission. The TLLEP team will write textbooks and teaching manuals for use at the National Law School of Timor-Leste and the judicial training center. The ILEI team will write textbooks and materials to begin the process of building out a law program at the American University of Iraq, Sulaimani. Automatic grading penalty waived for writers. Writing (W) credit is for 3Ls only. Same as: BLPP

**LAW 453C. State-Building and the Rule of Law Workshop: Advanced. 3 Units.**

The Advanced Workshop on State-Building and the Rule of Law builds on the State-Building and Rule of Law Seminar offered in the fall quarter. Enrollment is by consent and limited to students who successfully completed the fall seminar and are members of one of the four Rule of Law Projects: the Afghanistan Legal Education Project (ALEP), the Rwanda Law and Development Project (RLDP), the Timor Leste Legal Education Project (TLLEP), or the Iraq Legal Education Initiative (ILEI). The ALEP team will write textbooks and develop curriculum for, and provide program support to, the Department of Law at American University of Afghanistan. The RLDP team will conduct research and analysis culminating in a background paper on statutory interpretation for the Rwandan Law Review Commission. The TLLEP team will write textbooks and teaching manuals for use at the National Law School of Timor-Leste and the judicial training center. The ILEI team will write textbooks and materials to begin the process of building out a law program at the American University of Iraq, Sulaimani. Automatic grading penalty waived for writers. Writing (W) credit is for 3Ls only. Same as: TLLEP

**LAW 453D. State-Building and the Rule of Law Workshop: Advanced. 3 Units.**

The Advanced Workshop on State-Building and the Rule of Law builds on the State-Building and Rule of Law Seminar offered in the fall quarter. Enrollment is by consent and limited to students who successfully completed the fall seminar and are members of one of the three Rule of Law Projects: the Afghanistan Legal Education Project (ALEP), the Rwanda Law and Development Project (RLDP), or the the Iraq Legal Education Initiative (ILEI). Project members will undertake research, writing, and programmatic responsibilities to support the work of their respective local partners in Afghanistan, Rwanda and Iraqi Kurdistan. Elements used in grading: Class Participation, Attendance, Written Assignments. Automatic grading penalty waived for writers. Writing (W) credit is for students entering prior to Autumn 2012. Same as: ILEI

**LAW 453E. State-Building and the Rule of Law Workshop: Advanced. 3 Units.**

The Advanced Workshop on State-Building and the Rule of Law builds on the State-Building and Rule of Law Seminar offered in the fall quarter. Enrollment is by consent and limited to students who successfully completed the fall seminar and are members of one of the three Rule of Law Projects: the Afghanistan Legal Education Project (ALEP), the Rwanda Law and Development Project (RLDP), or the the Iraq Legal Education Initiative (ILEI). Project members will undertake research, writing, and programmatic responsibilities to support the work of their respective local partners in Afghanistan, Rwanda and Iraqi Kurdistan. Elements used in grading: Class Participation, Attendance, Written Assignments. Automatic grading penalty waived for writers. Writing (W) credit is for students entering prior to Autumn 2012. Same as: RLDP

**LAW 455. Energy Law. 3 Units.**

The supply of a reliable, low-cost and clean energy supply for the United States is a key determinant of current and future prosperity. Perhaps as a result, electric utilities are among the most heavily regulated of large firms. This statutory and regulatory framework is composed of a complex patchwork of overlapping state and federal rules that is constantly evolving to meet emerging challenges to the energy system. In this course, students will acquire a basic understanding of the law of rate-based regulation of utilities. We will then examine the history of natural gas pipeline regulation in the United States, concluding with the introduction of market competition into US natural gas markets and the advent of shale gas. Next, we will cover the basics of the electricity system, including consumer demand, grid operations, and power plant technologies and economics. We will then revisit cost of service rate regulation as it has been applied in the electricity context. Next we will examine reform of both rate-regulated and wholesale market-based structures, focusing on various attempts to introduce market competition into aspects of the industry and to strengthen incentives for utility investment in energy efficiency. Finally, students will examine various approaches to subsidization of utility scale renewable energy and the growth of distributed energy. Throughout, the course will focus on the sometimes cooperative, sometimes competing, but ever evolving federal and state roles in regulating the supply of electric power. Students will write two 1000 word response papers to questions related to readings and outside speakers in addition to taking a final exam. Elements used in grading: Class participation (20%), written assignments (40%), and final exam (40%).

**LAW 458. Health Law: The FDA. 3 Units.**

This course will examine the Food and Drug Administration. It will focus largely on the FDA's regulation of drugs and biologics, but will also cover its regulation of medical devices, nutritional supplements, and, to some extent, its jurisdiction over special legal, social, and ethical issues arising from advances in the biosciences. Special Instructions: The class is open to all law or medical students. Graduate students may be admitted from other parts of the University by consent of the instructor. Substantial class attendance is required; in addition, the quality of class participation will play a small role in grading. Elements used in grading: Attendance, class participation, and final exam (In-school, open book). (Cross listed with Health Research and Policy (HRP 209).

**LAW 459. Intellectual Property and Antitrust Law. 3 Units.**

This is an advanced seminar focusing on antitrust law as it applies to the creation, licensing, and exercise of intellectual property rights. At least one IP or antitrust class is a prerequisite, and ideally both. Papers will be due before the Law School deadline. Draft papers will be due in time for student presentations. Elements use in grading: Class participation and final paper.

**LAW 461. Foreign and International Legal Research. 2 Units.**

This course will introduce students to concepts and skills used in international and foreign law research. Students will learn to construct successful research strategies for questions of foreign law, public international law, and private international law. Both primary and secondary authority will be covered in various formats. Students will understand how different legal systems and cultures influence the use and assessment of legal resources. The course will also equip students to critically evaluate current and future research tools. No pre-requisites or foreign language ability required. Advanced degree and non-law students are welcome to enroll in the course. Learning Outcomes - \*Identify primary and secondary sources of materials on international law and foreign legal systems. \*Develop effective research strategies using online and print resources. \*Critically evaluate research tools for international and foreign legal research. \*Appreciate cultural and historical influences on the development of legal systems and their relevance to legal research. \*Understand the role of language and translation tools in researching foreign and international law. Elements used in grading: Class participation & attendance (10%), written assignments (70%) and final paper (20%).

**LAW 465. Venture Capital I. 3 Units.**

This course introduces the operation of the venture capital industry from both a theoretical and practical perspective. The course tracks the start-up process from initial formation of a new venture through its private capitalization, the navigation of typical operational or strategic hurdles/milestones, and potential exit through merger/acquisition or initial public offering. The class will analyze each step in the process from the perspective of the business entity, of the founder-employees, and of the venture backers. It also will consider the incentive mechanisms and control structures used at each step of the transaction (and alternatives to these structures), with a focus on both the underlying economic and financial theory, as well as on pragmatic considerations in structuring the transactions. Students are required to complete a term sheet negotiation exercise, participate in class discussions and related short assignments, and sit for an examination. Special Instructions: some modest background in financial analysis or Excel, such as might be obtained in QM finance (Law 467), is recommended for this course. Elements used in grading: Class participation/assignments, term sheet negotiation exercise written summary, and the final exam (In-School, Essay and Objective, closed book).

**LAW 467. Quantitative Methods: Finance. 2 Units.**

This course covers several of the central ideas in modern finance with a particular focus on the time value of money. Topics include present value and future value analysis, discounting, net present value, "IRR", bond valuations, and a critique of other project valuation methods. Along with a brief overview of "market fundamentals" and an introduction to the vocabulary of modern "popular finance" (as found in such publications as the Wall Street Journal), additional topics will include diversification, the risk-return trade-off, portfolio performance measurement, and market efficiency. Issues of arbitrage and tax considerations will be considered as time allows. Each topic is introduced with an emphasis on applications in legal settings. The course is intended to provide those students that have very little or no background in finance with the essential vocabulary, tools, and insights to spot "finance related issues" in various legal practice areas. The problem sets, class discussions, and applied hypotheticals should allow students to develop the skills necessary to ask the right questions when confronted with problems that involve elements of modern finance. Special Instructions: You are expected to have little or no background in finance or related areas prior to taking this course. Required math skills are very modest (low-level high school algebra, at most) and students will rely mainly on the use of Excel and/or financial calculators for simple calculations. Elements used in grading: Class participation, written assignments/problem-sets and final exam (In-School: closed book, objective).

**LAW 468. Statistical Inference in Law. 3 Units.**

Drawing an inference from quantitative evidence lies at the heart of many legal and policy decisions. This course provides the tools, concepts, and framework for lawyers to become sophisticated consumers of quantitative evidence and social science. Unlike traditional statistics courses, it will be taught using substantive case law as a springboard for considering quantitative evidence. No background, beyond high school algebra, is assumed, but students are required to learn basic statistical programming. Elements Used in Grading: Class participation, attendance, problem sets. Attendance is required to retain a seat in class.

**LAW 471. Constitutional Law: Freedom of Speech. 3 Units.**

A survey of First Amendment law, including a close study of text, the drafting and ratification process, and the development of modern First Amendment theory. The course will explore the multiple participants in the speech process, including the speaker, hearer, publisher, target and regulator, and ask why the law favors certain participants over others. The evolution of Supreme Court case law will be analyzed historically, with special emphasis on the relationship between free speech and democracy.

**LAW 472. Externship Companion Seminar. 2 Units.**

The practice of public interest law - whether in the criminal or civil context or a government or non-profit setting - requires an attorney to consider a host of issues distinct from one in private practice. How should decisions be made about priorities with limited resources? Where an organization has a broad social justice mission, where does litigation on behalf of individual clients or a group of clients fit in? Prior to initiating litigation or advancing a defense, what quantum of evidence should an attorney require? What role, if any, should an attorney's personal beliefs play in a course of representation? Through directed supervision of their externships in prosecutors', public defenders' or civil non-profit and government offices, as well as participation in weekly seminars, students will evaluate such questions in the context of their practical experience. Students are required to write weekly reflection papers of 3 to 5 pages and a 10-15 page paper at the end of the course. Elements used in grading: Attendance, class participation, weekly reflection papers and final reflection paper. .

**LAW 473. Externship, Special Circumstances. 12 Units.**

Following approval of a student's application, the Special Circumstances Externship Program (SCEP) allows second and third year students to work for credit for one quarter in non-profit public interest, public policy, and government agencies outside of the Bay Area. Standards for approval of a SCEP placement are similar to those for Directed Research proposals, although they are higher. Because there is a preference for local civil and criminal SEP placements (see Law 474 and Law 475), your SCEP proposal must explain (a) how it meets the goals of the externship program; and (b) why a similar project cannot be accomplished in one of the placements offered in the Bay Area. SCEP placements outside the Bay Area must be full-time. Students wishing to undertake a SCEP placement obtain the supervision of a faculty member who will oversee their externship and an accompanying tutorial. For a full description of the SCEP, students should read the Externship Handbook, which is available from the Levin Center for Public Service and Public Interest Law or online at: <http://www.law.stanford.edu/organizations/programs-and-centers/john-and-terry-levin-center-for-public-service-and-public-interest-law/externship-program-0> . Students wishing to enroll in an externship must meet the various requirements that are set out in the Handbook. Interested students should speak to Jory Steele, Lecturer in Law and Director of Externship and Pro Bono Programs at [jsteele@law.stanford.edu](mailto:jsteele@law.stanford.edu). Grading Elements used: Full participation and attendance, satisfactory evaluation by field placement supervisor, weekly reflection papers of three to five pages, and a final reflection paper of a length to be determined by your faculty supervisor.

**LAW 474. Externship, Civil Law. 5-12 Units.**

Following approval of a student's application, the Civil Standard Externship Program (SEP) allows second and third year students to obtain academic credit for externing in select non-profit public interest, public policy, and government agencies in the Bay Area for one quarter. The Civil SEP allows students to (a) gain experience in a field where a clinical course is not offered, or (b) pursue advanced work in an area of prior clinical practice. Placements can be either full time (40 hours per week) or part time, but no fewer than 16 hours per week. Because of other Law School requirements, students in their final quarter are limited to part-time externships of no more than 16 hours per week. For a complete description of the Civil SEP, students should read the Externship Handbook, which is available from the Levin Center for Public Service and Public Interest Law or online at: <http://www.law.stanford.edu/organizations/programs-and-centers/john-and-terry-levin-center-for-public-service-and-public-interest-law/externship-program-0> . Students wishing to enroll in an externship must meet various requirements that are set out in the Handbook. Interested students should speak to Jory Steele, Lecturer in Law and Director of Externship and Pro Bono Programs at [jsteele@law.stanford.edu](mailto:jsteele@law.stanford.edu). Students participating in the Civil SEP must also concurrently enroll in the Externship Companion Seminar. In some cases, where other seminars would be more appropriate companion courses for a student's placement, the student can request to substitute a different course in the application process. Grading Elements used: Full participation and attendance, satisfactory evaluation by field placement supervisor, weekly reflection papers of three to five pages, as well as a final, longer reflection paper.

**LAW 475. Externship, Criminal Law. 5-12 Units.**

Following approval of a student's application, the Criminal Standard Externship Program (SEP) allows second and third year students to work for credit in criminal prosecutors' and defenders' offices in the Bay Area for one quarter. Placements can be either full time (40 hours per week) or part-time, but no fewer than 16 hours per week. Because of other Law School requirements, students in their final quarter are limited to part-time externships of no more than 16 hours per week. For a complete description of the Criminal SEP, students should read the Externship Handbook, which is available from the Levin Center for Public Service and Public Interest Law or online at: <http://www.law.stanford.edu/organizations/programs-and-centers/john-and-terry-levin-center-for-public-service-and-public-interest-law/externship-program-0> . Students wishing to enroll in an externship must meet various requirements that are set out in the Handbook. Interested students should speak to Jory Steele, Lecturer in Law and Director of Externship and Pro Bono Programs at [jsteele@law.stanford.edu](mailto:jsteele@law.stanford.edu). Students participating in the Criminal SEP must also concurrently enroll in the Externship Companion Seminar. In some cases, where other seminars would be more appropriate companion courses for a student's placement, the student can request to substitute a different course in the application process. Grading Elements used: Full participation and attendance, satisfactory evaluation by field placement supervisor, weekly reflection papers of three to five pages, and a final, longer reflection paper.

**LAW 476. Advanced Criminal Practice. 3 Units.**

In this seminar, we will discuss the most pressing current issues and cases across the criminal justice spectrum, from arrest through appeal and collateral attack. Our focus will be on the practice of criminal law – how prosecutors and defense lawyers actually develop and use the latest cases and arguments. The subjects that we will take up will include, for example, ineffective assistance and the death penalty, sentencing, the "drug court" development, public prosecution and white collar crime. Each student will choose a case from the Supreme Court's current criminal docket and write about the issues that either arose or should have arisen during any of the stages of the case. Understanding these issues will require a careful investigation of the case history and the way it is developed for the Supreme Court. Particular attention will be paid to the ethical issues that arise in practice. Our text for the course will be pre-assigned cases from the current Criminal Law Reporter, along with articles and litigation materials in connection with a particular topic. Students should use the class to develop the habit of keeping up with the constantly evolving law in the specialized fields of criminal law and criminal procedure.

**LAW 477. Intellectual Property: Patent Litigation. 3 Units.**

This patent litigation course offers students the opportunity to gain experience in oral and written advocacy, while becoming familiar with the most prevalent real world issues in such cases. It does so by simulating a patent action from complaint filing to appeal. Students take turns presenting mock oral arguments, which are held each class. Sitting Federal judges will critique student arguments and provide instruction during several classes. Hot issues in patent law are explored as litigation skills are developed. While not a prerequisite, completion of Introduction to Intellectual Property or Intellectual Property: Patents, is preferred. Elements used in grading: oral presentation and papers.

**LAW 478. IP Advanced Topics: The Future of Online Music and Online Video. 3 Units.**

The online music and online video industries are undergoing profound changes. In online video, the rise of Netflix and Hulu are just two examples of this trend. This class will explore how the different technical, economic or regulatory decisions we make today will interact to shape the future of these industries, and what the different options under consideration will mean for specific companies in this space. Class sessions will consist of a mix of guest lectures by industry leaders and class discussions of the assigned readings. Throughout the class, the students will work in interdisciplinary groups on problems facing specific companies in the online and online video industry today. For the final project, the groups will address specific policy problems from the perspective of a specific company, with different groups representing companies on different sides of an issue.

**LAW 479. International Law. 4 Units.**

This course provides a general introduction to international law and its role in today's complex and interdependent world. We will begin by considering fundamental questions about the nature of international law, such as the sources of international law (including treaties and customary international law), the subjects of international law, the origins of international law in the sovereign equality of states, and the absence of mechanisms for the authoritative interpretation or enforcement of international law. We will also examine the operation of international law in the U.S. legal system. We will then explore core concepts such as state responsibility and the bases upon which states may exercise jurisdiction. In the second half of the course, we will look at a series of contemporary international law topics and issues, including international human rights law, the law governing coercion and the use of armed force, the law of armed conflict, international environmental law, and international criminal law. Throughout, we will consider current issues and problems arising in the international arena and the extent to which international law actually affects the behavior of states. This course provides a general grounding in public international law and a foundation for more advanced or specialized international law courses. Elements used in grading: Class participation, optional paper, and final exam.

**LAW 480. Law and Biosciences: Genetics. 3 Units.**

This seminar will focus on ethical, legal, and social issues arising from advances in our knowledge of human genetics. These include forensic uses of genetics, genetic testing, widespread whole genome sequencing, the consequences of genetics for human reproduction, and the ethics of genomic biobanks for research, among other things. Students are required to write a research paper for this course. This class is crosslisted with HRP221. Special Instructions: The class is open to all law students and to other graduate students with consent of instructor. Substantial class attendance is required; in addition, the quality of class participation will play a small role in grading. Students will be required to submit an independent research paper. Elements used in grading: Class participation, attendance and final paper.

**LAW 481. Communications Law: Internet and Telephony. 4 Units.**

New developments in Internet and other technology enable new forms of innovation, content production and political participation that have the potential to significantly transform our economy, society and democratic system. This transformation will not happen automatically. Technical, legal and economic choices will affect whether the Internet can realize its potential or not. Communications law - the law that governs both the physical infrastructures for communications services such as cable and telephone networks as well as the communication services which are provided over these infrastructures - has become one of the most important arenas in which choices affecting the future of the information society are made. The debates over network neutrality (whether network providers should be able to restrict the applications and content that their Internet service customers can access over the network) or the right ways to foster broadband deployment are examples of this trend. At the same time, the Internet's ability to support a variety of different communications services such as telephony, information services or video over the same physical network infrastructure challenges the existing communications law, which is based on the assumption that different physical infrastructures offer different communications services. What are the features of the Internet that are at the core of its economic, social, cultural and political potential? What can regulators and legislators do to allow the Internet to realize this potential? And how can they allow applications like Internet telephony and traditional telephony to coexist without giving one an unfair advantage over the other? The course will address how current law deals with these questions, but also explore what regulators and legislators may do to better deal with the challenges posed by the Internet. The course is mostly focused on the US, but highlights developments elsewhere where appropriate. Special Instructions: Students may take Communications Law: Internet and Telephony and Communications Law: Broadcast and Cable Television in any order (neither is a prerequisite for the other). There are no prerequisites for this course. No technical background is required. Elements used in grading: Class participation, attendance, final exam.

**LAW 483. Deal Litigation Seminar. 2-3 Units.**

This seminar is designed as an introduction to mergers and acquisitions litigation. The course aims to provide both a practical and doctrinal perspective on M&A-related litigation and will rely heavily on readings and issues derived from practice in the Delaware courts where much contemporary deal litigation occurs. Students will be asked to apply cases and legal principles in various practical situations that may arise in a transactional litigation practice. Familiarity with basic corporate law principles is assumed. Classes and readings. The first segment of the course will introduce basic doctrinal principles of M&A law and provide an introduction to the litigator's role in the transactional setting. The remaining sessions will revolve around three detailed M&A case studies, with seminar members divided into group roles. The first week of each case study will involve the negotiation and structuring of an M&A transaction. The second week will involve litigation relating to the transaction. Reading for these sessions will include case scenarios, supporting materials, and additional relevant case law and articles. The attendance and active participation of seminar members is essential. Readings for all classes will be provided in spiral-bound volumes distributed in class. Written assignments and grading. Students will be expected to (i) write a final paper; (ii) prepare two additional short written assignments associated with the case study assignments (such as marking up draft documents or preparing court papers); and (iii) participate actively in class. Special Instructions: After the term begins, students accepted into the course can transfer from section (01) into section (02) which meets the R requirement, with consent of the instructor. Students taking the seminar for R credit can take the seminar for either 2 or 3 units, depending on the paper length. Corporations (Law 242) is a prerequisite. Elements used in grading: Attendance, class participation, written assignments and paper. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for submission deadline.

**LAW 487. The Evolution of Finance. 2 Units.**

This course discusses the financial crisis of 2008-9, developments since that time, and the future of finance. We consider how regulation, technology, and the changing world economy will create challenges and opportunities. We have guest speakers for about half of the classes. The list changes from year to year, but 2013's speakers included Tanya Beder, Sue Decker, Jacob Goldfield, Tom Kempner, Ana Marshall, Vincent Reinhart, Larry Summers, and Kevin Warsh. Elements used in grading: Group Project/Paper. Mandatory attendance. Absences impact grade. Participation 25% Project/Paper 75%. Cross-listed with Graduate School of Business (MGTECON 343).

**LAW 488. Legal Aspects of Autonomous Driving. 2-3 Units.**

Self-driving cars and trucks are rapidly entering the mainstream. They raise key legal and policy questions, which this seminar explores through source materials (from case law to treaties), academic scholarship, and industry speakers. Topics include state and federal regulation, public and private standards, liability and insurance, privacy and security, and social norms. Because the course is intended to meaningfully advance-rather than to merely present-legal analysis of this emerging technology.

**LAW 490. Reproductive Justice: Law, Policy and Advocacy. 2 Units.**

This course offers an opportunity to explore constitutional doctrines on childbearing and to consider contemporary strategies for advancing reproductive justice. We will examine federal court decisions defining reproductive rights, including cases involving conflicts between reproductive freedom, religious liberty and freedom of speech. We will consider the limits of federal constitutional protection for vulnerable communities, such as teenagers, inmates and women with public insurance. In light of those limitations, we will consider alternative strategies to strengthen reproductive freedom: state constitutional litigation, legislation, administrative advocacy, communications, organizing and initiative campaigns. Each of these will be paired with a current reproductive rights controversy, such as insurance coverage of contraception, teenagers' access to confidential reproductive health care, abstinence-only sex education and prosecution of pregnant women. Reproductive justice advocates, including litigators, organizers and legislative advocates will make guest appearances. The success of this course depends on lively class participation. Students will write a short piece on each week's topic using a different advocacy style (such as a legislative fact sheet, blog post, initiative ballot argument, op-ed article) and will make oral presentations in class. Special Instructions: CLASS WILL MEET SIX FRIDAYS. Exact meeting dates TBA. Elements used in grading: Class participation and written assignments.

**LAW 491. Myth, Law, and Practice. 2 Units.**

Collective myths from a variety of traditions and cultures capture enduring psychological truths about human choices and the human condition. Lawyers at various stages in their careers have their own personal myths, sometimes conscious and sometimes not. These personal myths embody key tendencies that determine or heavily influence each lawyer's personal and professional path. This course uses some salient collective myths as well as modern psychological material to create a powerful backdrop for self-examination and self-development. It offers a space and time for each student to consider his or her own personal and professional direction through the course materials, class interactions, and a series of reflection papers. The course benefits from the collaboration of Ron Tyler, Director of the Criminal Defense Clinic, who will conduct a session focusing on mindfulness practices. Elements used in grading: A series of reflection papers totaling at least 18-pages.

**LAW 492. Multi-Party Litigation. 3 Units.**

This introduction to aggregative litigation will cover joinder of claims and parties, class actions, and multidistrict litigation, as well as related topics such as preclusion and brief coverage of remedies and choice of law. The focus will be both doctrinal and practice-oriented, and we will also consider broader questions of how the civil justice system should respond to mass harms as well as proposals for reform. This course is strongly recommended for students planning a practice in private or public civil litigation, managing or supervising litigation, or a judicial clerkship. It provides a basis for advanced courses such as complex litigation. Elements used in grading: Class participation, assignments and final exam. This course is open to first-year Law School students.

**LAW 493. Entrepreneurship, Leadership and the Law Practicum. 2 Units.**

Starting or advising a growing social enterprise requires on-the-ground experience. This class brings theory and case studies examined in Entrepreneurship, Leadership and Law in Social Enterprise to use through placements as consultants with local social enterprises. Students will make connections in the community; learn creative and hands-on problem solving skills; teamwork and communication skills; and be inspired to innovate and break away from the traditional lawyer path.

**LAW 496. Legal Studies Workshop. 1 Unit.**

The Legal Studies Workshop is designed to support students working on a piece of legal scholarship with an eye to publication. The workshop will meet every other week throughout the academic year. Students may sign up for any combination of quarters, and will receive one credit for each quarter they are enrolled. Each session will be devoted to presentations of one or two student works-in-progress. Every student is expected to present his or her own work at least once while enrolled (although many students enroll for multiple quarters), and to provide constructive oral feedback on others' work. Attendance is mandatory (except of course for extenuating circumstances). There are no written requirements for the course, and no requirement that the work presented be original to the Workshop. Students may wish to use the Workshop as an opportunity to expand on seminar papers or pursue independent research projects for which they are getting separate credit through one of the research tracks (e.g., directed research, dissertation). Whether students are working on a new project or revising an old, the expectation is that students will develop their topics independent of the course. Students who would like to participate in the Workshop but feel they need help in developing a workable research topic should consult faculty members ahead of time. Elements used in grading: Class participation and attendance.

**LAW 498. Designing Liberation Technologies. 3-4 Units.**

Small project teams will work with selected NGOs to design new technologies for promoting development and democracy. They will conduct observations to identify needs, generate concepts, create prototypes, and test their appropriateness. Some projects may continue past the quarter towards full-scale implementation. Taught through the Hasso Plattner Institute of Design at Stanford ([d.school.stanford.edu](http://d.school.stanford.edu)). This course is cross-listed with the Computer Science and Political Science Departments (Same as CS 379L and POLISCI 337T). Enrollment is limited to a total of 16 students (under all course numbers combined), by consent of instructor. Students may enroll for 3 credits or 4 credits with additional assignments. Consent Application: To apply for this course, students must complete and submit a consent application available at <http://bit.ly/libtech2014>. See Consent Application Form for submission deadline and additional course information. Elements used in grading: Attendance and participation in all phases of the team project, from conception through execution. (Cross-listed as CS 379L and POLISCI 337T).

**LAW 499. Intellectual Property: Trade Secrets. 3 Units.**

With the increasing importance of technology to industry and the ease with which information can now be downloaded and shared, trade secret protection has become one of the most important issues in intellectual property today. The law has to strike a balance between encouraging and protecting commercial investment in research, and preserving an individual's right to change employment or to compete directly against a former employer. In addition to examining the law and the theory behind it, we will emphasize the practical aspects of protecting information as a trade secret. We will discuss the challenges and issues involved in litigating trade secret cases, creating corporate programs to protect trade secrets, and drafting agreements. We will feature several guest speakers and will highlight topics of current interest, such as "inevitable disclosure," non-competition agreements, trade secrets and the Internet, and cybercrime. The class should be of interest to students who expect to practice intellectual property law as well as to students who expect to be involved in corporate transactions and labor law. Elements used in grading: Class participation and final exam.

**LAW 500. Modern American Legal Thought. 3 Units.**

The course is a survey of the theories of law and adjudication that have been most important in this country since the Civil War, concluding with an introduction to significant contemporary schools of legal thought. We will consider Formalist (Langdellian) Legal Science, Sociological Jurisprudence, American Legal Realism, the Legal Process School, Law and Moral Philosophy, Law and Economics, Feminist Jurisprudence, Public Choice Theory, and Neo-formalism. The readings are drawn principally from primary materials - the important contemporary manifestos and critiques of the schools of thought studied, along with writings that involve their application to concrete legal problems or reveal their influence on others. Among the recurring issues treated are: How political is law? How objective? How much do and should courts legislate? Is law mostly rules? Principles? Policies? Decisions? How much should law be bound up with other intellectual disciplines? What should legal education be like? Special Instructions: If any student would like to write a research paper in lieu of the final exam, he or she should consult the instructor before the start of the course. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class Participation, Final Exam or Final Paper.

**LAW 504. International Business Negotiation. 3 Units.**

This course is structured around a quarter-long, simulated negotiation exercise which provides an in-depth study of the structuring and negotiating of an international business transaction. This class will be taught in counterpart with a class at Berkeley Law School. Students in this class will represent a U.S. pharmaceutical company, and the students in the class at Berkeley will represent an African agricultural production company. The two companies are interested in working together to exploit a new technology developed by the pharmaceutical company that uses the cassava produced by the African agricultural production company. The form of their collaboration could be a joint venture, a licensing agreement or a long term supply contract. The negotiations between the two classes will take place through written exchanges and through real-time negotiation which will be conducted both in-person and via videoconferences. The purpose of the course is to provide students with an opportunity (i) to experience the sequential development of a business transaction over an extended negotiation, (ii) to study the business and legal issues and strategies that impact the negotiation, (iii) to gain insight into the dynamics of negotiating and structuring international business transactions, (iv) to learn about the role that lawyers and law play in these negotiations, (v) to give students experience in drafting communications, and (vi) to provide negotiating experience in a context that replicates actual legal practice with an unfamiliar opposing party (here, the students at Berkeley). Students will also learn about the legal and business issues that may arise in joint ventures, supply agreements and licensing agreements. The thrust of this course is class participation and active involvement in the negotiations process. Students are expected to spend time outside of class, working in teams, to prepare for class discussions involving the written exchanges, as well as preparing for the live negotiations. Class discussions will focus on the strategy for, and progress of, the negotiations, as well as the substantive legal, business and policy matters that impact on the negotiations. In addition to the regular Monday class, classes will meet for the live negotiations on two Thursday evenings on-campus at 7:00 PM (10/15 and 10/22) and three Saturday mornings at 10:30 AM (10/10, 10/31 and 11/14) in the San Francisco office of DLA Piper (555 Mission Street; close to Montgomery St. BART station). Due to the Thursday and Saturday classes, this class will conclude on November 16. The course will be limited by lottery to twelve (12) law students (additional students from business or engineering may also participate). Attention Non-Law Students: You must complete and submit a Non-Law Student Course Add Request Form to the Law School Registrar's Office (Room 100). See Stanford Non-Law Student Course Registration on the SLS Registrar's Office website. Prerequisites: A course in basic negotiations (e.g., Law 615) or comparable prior experience is recommended. A primer on basic negotiations skills will be offered at a time TBD as an alternative for students who have not had a prior negotiations class or experience. Elements used in grading: Class participation, written assignments and final paper.

**LAW 508. Law and Social Change in the Global Context. 3 Units.**

This colloquium will examine the impact of human rights and rule of law strategies on social change in the global context. Over the past two decades, the establishment of international criminal courts and the expansion of regional human rights tribunals have significantly improved the enforceability of international human rights law in many regions of the world. Within a similar timeframe, building the rule of law, especially in transitional societies, has found an increasingly important place on the development agenda of international organizations, governmental development agencies and private foundations. One issue that remains unclear is the impact of human rights enforceability on the reform of domestic justice systems. During the first half of the course, students will read and discuss articles that provide an overall framework for understanding the field of international human rights and the field of rule of law, including the most common critiques of both fields as they are currently practiced. In the latter half of the course, students will hear examine case studies and hear perspectives from leading public interest attorneys about how they are deploying human rights mechanisms and engaging with the process of legal reform in their respective countries. There will be a focus on equal treatment and the lack of discrimination on the basis of race or ethnicity as a case study. The attorneys will offer on-the-ground observations of both the complex relationship between human rights and rule of law, and the potential and limitations of both approaches. Students will be required to participate in a symposium of leading international practitioners that addresses the same topic, and to synthesize lessons learned from the symposium as their final writing assignment. Special instructions: Requirements will include class participation, a class presentation and (1) either short written weekly reflection papers (about 3-4 pages) for and a short research paper (about 5 pages) for W credit or (2) a long paper (approximately 30 pages) for R credit with consent of the instructor. Writing (W) credit is for 3Ls only.

**LAW 509. Facilitation for Attorneys. 2 Units.**

This course is designed to help students develop an understanding of the practice of facilitation in the legal context and to develop skills as facilitators. As the practice of law becomes more complex, it includes more and more situations where groups of people need to work together. Common examples include: planning complex legal strategies, developing firm policies, coordinating work among attorneys and staff, working with corporations or other multi-person clients, shareholder meetings, public commissions and councils, corporate and non-profit Board of Directors meetings. Countless hours are spent in meetings - a typical lawyer in the United States can expect to spend at least 10,000 hours in meetings during his or her working life. This course will help students improve the quality of both the processes and products of meetings, as a facilitator, leader, or meeting participant. Class Schedule dates: Oct. 9 (4:30 - 9p.m.), Oct 10th (9 - 5:15) and Oct. 17th (9 - 5:15). Elements used in grading: Class attendance, participation and final paper.

**LAW 511. Legal Cultures and Legal Professionals in Latin America and Latin Europe. 2 Units.**

The Latin countries of Europe and Latin America are the most direct inheritors of Roman language and law. They have made very important contributions to the history of law and mankind. They have not only an important legal tradition - the civil law tradition - but also some countries of the area among the fast growing economies of the world and are undergoing quick social change. This course proposes to give a broad picture of the transformation of law and legal thinking, and the relation between law and society in this important part of the world.

**LAW 512. Intellectual Property: Licensing. 2 Units.**

In this course we cover the major aspects of intellectual property licenses. We will cover patent, copyright, trademark and trade secret licenses in a variety of industries. We will focus on agreements governed by US federal and state law, but will cover select issues in cross border transactions. Topics include: grant language, upstream and downstream immunities, change of control events, indemnities, and insolvency. Using a case law-based approach, we will examine the interrelationship between contract language and background law. Introduction to Intellectual Property or consent of the instructor is a prerequisite for this course.

**LAW 514. California Coast: Science, Policy and Law. 4 Units.**

This interdisciplinary course integrates the legal, scientific, and policy dimensions of how we characterize and manage resource use and allocation along the California coast. We will use this geographic setting as the vehicle for exploring more generally how agencies, legislatures, and courts resolve resource use conflicts and the role that scientific information and uncertainty play in the process. Our focus will be on the land-sea interface as we explore contemporary coastal land use and marine resource decision-making, including coastal pollution, public health, ecosystem management; public access; private development; local community and state infrastructure; natural systems and significant threats; resource extraction; and conservation, mitigation and restoration. Students will learn the fundamental physics, chemistry, and biology of the coastal zone, tools for exploring data collected in the coastal ocean, and the institutional framework that shapes public and private decisions affecting coastal resources. There will be 3 to 4 smaller written assignments addressing policy and science issues during the quarter, as well as a take-home final assignment. Special Instructions: In-class work and discussion is often done in interdisciplinary teams of students from the school of law, the school of engineering, and the school of earth sciences. Students are expected to participate in class discussion and field trips. Elements used in grading: Participation, including class session and field trip attendance, writing and quantitative assignments. Cross-listed with Civil & Environmental Engineering (CEE 175A/275A) and Earth Systems (EARTHSYS 175/275).

**LAW 515. Sustainable Energy: Business Opportunities and Public Policy. 3 Units.**

This course examines trends and opportunities in the sustainable energy sector with a particular focus on low carbon energy. We examine these trends in the context of technological change, emerging business opportunities and the parameters set by public policy. Specific topics to be examined include: > The State of the Global Cleantech Industry.> The Impact of Regulatory Policies and Tax Subsidies.> Cost Competitiveness of Alternative Energy Technologies.> VC Perspective on Sustainable Energy Start-ups.> Project Finance > Fossil Fuels and Carbon Capture.> Renewable Energy, including Solar PV and Biofuels.> Energy Efficiency and Storage. Elements used in grading: Active class participation (30% of grade), case studies (30% of grade) and a course project (group project) to be delivered at the end of the fall quarter (40% of grade). The course project can alternatively (i) develop a (rough) business plan, (ii) analyze an existing business or technology in the sustainable energy domain, or (iii) analyze the impact of an existing regulation or proposed policy. Enrollment: Enrollment is capped at 60 students. The class is open to all MBA and Law School students. 10 seats will be set aside for graduate students from outside the two schools. These students are required to obtain instructors' permission for enrollment. Compressed class: Class will meet in weeks 3, 4, 5 and 7 of the Autumn Quarter. Cross-listed with the Graduate School of Business (GSBGEN 332).

**LAW 516. Law and Humanities Workshop: History, Literature, and Philosophy. 2-3 Units.**

The Law and Humanities Workshop: History, Literature, and Philosophy is designed as a forum in which faculty and students from the Law School and from various humanities departments can discuss some of the best work now being done in law and humanities. Every other week, an invited speaker will present his or her current research for discussion. In the week prior to a given speaker's presentation, the class will meet as a group to discuss secondary literature relevant to understanding and critiquing the speaker's research. Students will then read the speaker's paper in advance of the following week's workshop presentation. Students have two options. Those taking the course for 2 credits are required to write a brief response to each speaker's paper. There will be a total of four speakers, and thus four papers. Guidance will be provided concerning how to frame these response papers, which will be due every two weeks - i.e., on the day before the speaker presents. Students taking the course for 3 credits are required to write a research paper on a law and humanities topic that they choose (in consultation with the professors). Law students who complete this 3-unit track will receive an "R" credit. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Enrollment will be limited to 30 students - 20 from SLS who will be selected by lottery and 10 from H&S. Elements used in grading: Class participation, attendance, and writing assignments. Cross-listed with the Department of History (HIST 308F).

**LAW 517. Why Intellectual Property?: Rationales and Critiques of IP Law. 2 Units.**

Why do societies decide to grant special legal protection to various types of creative works? A number of answers have been given over the years. Some are utilitarian: we grant these rights because doing so maximizes social welfare. Some are deontological: we grant rights because this is morally required in a just society. We will examine these various justifications, as well as variants on them. We will also ask how a society, having decided to grant some version of IP rights, ought best structure them. Should they be true property rights, with all or most of the powers this implies (creator control over uses, right to compensation from exploitation, etc.), or something else? Would a state-backed reward system work better, so that compensation is divorced from individual control? Should compensation for successful creators be limited or capped, as part of a wider attempt to moderate the distributional impacts of granting individual property rights; or must we tolerate "big winners" as an inducement or symbolic reward for other creators? We will address these and related questions by reading two sets of materials: (1) classic treatments of property rights (Locke, Kant, etc.) and social justice (Rawls); and (2) material from the contemporary literature on IP theory. We may also host some of the most interesting scholars working in the field of IP theory today, to come and explain their thinking and their work.

**LAW 518. International Public Interest Lawyering Colloquium. 2-3 Units.**

Over the past two decades, the establishment of international criminal courts and the expansion of regional human rights tribunals have significantly improved the enforceability of international human rights law in many regions of the world. Within a similar timeframe, building the rule of law, especially in transitional societies, has found an increasingly important place on the development agenda of international organizations, governmental development agencies and private foundations. One issue that remains unclear is the impact of human rights enforceability on the reform of domestic justice systems. This colloquium will examine the relationship between international human rights and domestic rule of law in transitional societies from the perspective of public interest attorneys who are seeking to achieve justice for clients who are low-income and marginalized. During the first half of the course, students will read and discuss articles that provide an overall framework for understanding the field of international human rights and the field of rule of law, including the most common critiques of both fields as they are currently practiced. In the latter half of the course, students will hear perspectives from leading public interest attorneys about how they are deploying human rights mechanisms and engaging with the process of legal reform in their respective countries. There will be a focus on gender equality and protecting the human rights of women as a case study. The attorneys will offer on-the-ground observations of both the complex relationship between human rights and rule of law, and the potential and limitations of both approaches. Students will be required to participate in a symposium of leading international practitioners that addresses the same topic, and to synthesize lessons learned from the symposium as their final writing assignment.

**LAW 519. 21st Century Professional Skills and Practice Management. 2 Units.**

This course will help students to develop the professional management skills that are essential for a successful legal career. The course will focus on team dynamics and leadership; effectively communicating with clients, colleagues, other parties and tribunals; client development and service; managing expectations and unexpected adversity; and the economics of law practice, including forecasting demand for legal services and project management. For the final paper, students will create a comprehensive, personal plan outlining the substantive knowledge, professional skills, and business focus they need to build a fulfilling law practice. Assignments and simulations will demonstrate and model various skills and instructors will provide real-time feedback to students on class exercises. The course is not limited to any particular type of practice (size or substantive area). Elements used in grading: Class participation and attendance, course exercises and written assignments.

**LAW 520. Betrayal and Loyalty, Treason and Trust. 2 Units.**

The main topic of the seminar is Betrayal: its meaning as well as its moral, legal and political implications. We shall discuss various notions of betrayal: Political (military) betrayal such as treason, Religious betrayal with Judas as its emblem, but also apostasy (converting one's religion) which is regarded both as a basic human right and also as an act of betrayal, social betrayal - betraying class solidarity as well as Ideological betrayal - betraying a cause. On top of political betrayal we shall deal with personal betrayal, especially in the form of infidelity and in the form of financial betrayal of the kind performed by Madoff. The contrasting notions to betrayal, especially loyalty and trust, will get special consideration so as to shed light or cast shadow, as the case may be, on the idea of betrayal. The seminar will focus not only on the normative aspect of betrayal - moral or legal, but also on the psychological motivations for betraying others. The seminar will revolve around glaring historical examples of betrayal but also use informed fictional novels, plays and movies from Shakespeare and Pinter, to John Le Carre'. Elements used in grading: Class Participation, Attendance, Final Paper. This course is cross-listed with PHIL 174L/274L ETHICSOC 174L/274L.

**LAW 522. Private Equity Investing. 3 Units.**

This course will concern itself with the central issues related to private equity investing. Topics to be covered include the following: valuation, pricing and structuring of private investments; leveraged buyouts and other transactions involving multitiered capital structures; the structure and governance of pe funds; conceptual issues (such as option theory, asymmetric information and bounded rationality) relevant in this realm; and private equity as a distinct asset class. The primary pedagogical objective is to have students learn skills and tools used in the private equity arena including, inter alia, financial analysis, conducting a multipronged due diligence process, spreadsheet modeling and the crafting of legal documents. Case studies requiring the assessment of actual transactions will be utilized. We will have a number of guest speakers during the term, and will use various materials illustrative of what one would encounter in private equity deals and funds. Special Instructions: In order to enroll in Private Equity Investing students must concurrently enroll in PEI: Quantitative Skills Seminar (Law 721; 1 unit). In other words, no student may enroll in either Law 522 or Law 721 without also enrolling in the other. Elements used in grading: class attendance, participation and written assignments. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration) to the instructor. See Consent Application Form for submission deadline.

**LAW 524. Mental Health Law. 3 Units.**

This seminar explores topics in mental health law with special emphasis on liberty issues. After a brief introduction to mental disorders, their treatment and the mental health profession, the seminar sessions will explore topics such as: civil commitment, criminal responsibility, competency determinations, and the right to refuse and consent to psychiatric treatment. A research paper is required. Elements used in grading: Final Paper.

**LAW 527. Juvenile Crime, Juvenile Justice. 3 Units.**

Juveniles are accorded special status under the American legal system. This introductory course will examine the historical precedents and philosophical reasons for treating juveniles differently from adults, and review empirical evidence about child development that can illuminate the reasons for their special status within the court system. Students will learn about the distribution of juvenile delinquency and the impact of significant social and institutional influences on delinquency: family, school, peers, and drugs. The course will also provide a detailed overview of the juvenile system, from its beginning to the current state of the institution, which will include a review of police work with juveniles, pretrial procedures, and the juvenile court and corrections systems. Major court rulings that have shaped contemporary juvenile justice will be presented. Finally, the course will consider dispositional options available to Courts, and will identify the most effective in reducing delinquency. By the conclusion of this course, students should have an understanding of the juvenile justice system and how it compares with the adult justice system, what programs work to reduce recidivism, and be cognizant of some of the major legal and policy issues confronting that system today. The course format will combine lecture, group discussions, and guest presentations. Students may also have the opportunity to observe the juvenile justice system first hand by attending a juvenile court session, visiting a correctional facility for adjudicated delinquents, and hearing directly from those who work with high-risk youth on probation or in the community. Written Work. Each student will write four reflection papers, 5-7 pages each (about 1,700 words) over the quarter. Due dates will be listed in the class syllabus. Elements used in grading: Final grades will be based on the four reflection papers (20% each) and class participation (20%). This course is open to 2Ls, and 3Ls in the Law School. Cross-listed with Comparative Studies in Race & Ethnicity (CSRE 227).

**LAW 528. Economic Analysis of Law. 3 Units.**

This course will provide a broad overview of the scholarly field known as "law and economics." The focus will be on how legal rules and institutions can correct market failures. We will discuss the economic function of contracts and, when contracts fail or are not feasible, the role of legal remedies to resolve disputes. We will also discuss at some length the choice between encouraging private parties to initiate legal actions to correct externalities and governmental actors, such as regulatory authorities. Extensive attention will be given to the economics of litigation, and to how private incentives to bring lawsuits differ from the social value of litigation. The economic motive to commit crimes, and the optimal governmental response to crime, will be studied in depth. Specific topics within the preceding broad themes include: the Coase Theorem; the tradeoff between the certainty and severity of punishment; the choice between *ex ante* and *ex post* sanctions; negligence versus strict liability; property rules; remedies for breach of contract; and the American rule versus the English rule for allocating litigation costs. There is no formal economics prerequisite to take this course, though some prior training in economics will be helpful. Elements used in grading: Final exam (open-book) plus several take-home problems during the quarter. Cross-listed with Public Policy (PUBLPOL 302B). (For students interested in a shorter introduction to economic analysis of law, see Law 741, "Introduction to Law and Economics," which is a one-unit course also offered during the winter quarter that is graded on a mandatory pass-fail basis.)

**LAW 531. Wine and the Law. 2-3 Units.**

The wine industry is the subject of intense activity in many legal subject areas, including constitutional law, intellectual property, environmental and land use regulation, trade protectionism, and internet commerce. This seminar surveys the legal landscape of this multibillion dollar industry, focusing on contemporary debates and developments in judicial, legislative, and administrative arenas. Course materials will consist of a blend of judicial opinions, governmental materials, and secondary sources. The instructor specializes in litigation concerning the California wine industry, and the course will feature several guest speakers addressing the economic, political, and legal aspects of the subject in its state, national, and international dimensions. A paper will be required of all students on some topic of their choosing concerning the course subject matter. Students may earn an optional third unit by writing a longer paper. Special Instructions: Students may earn credit in this seminar in one of two alternative ways, both of which will be graded under the Honors/Pass system. The first alternative is to write a series of short commentaries (about 4-5 pages each) on the material covered in four weeks of your choosing. This alternative will satisfy the Law School's "W" writing requirement. If you elect this option, you may earn two credits. The second alternative is to write a single research paper on a topic of your choosing relating to the subject matter of the course. This alternative will satisfy the Law School's "R" research requirement. If you elect the second alternative, you may earn two or three credits; the required length of the paper is approximately 20 pages for two credits and approximately 30 pages for three credits. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Students taking the course for R credit can take the course for either 2 or 3 units, depending on the paper length. Elements used in grading: Class participation, attendance and final paper. Constitutional law is a prerequisite. Writing (W) credit is for students entering prior to Autumn 2012.

**LAW 532. Understanding the Legislative Process: American Legislative Institutions in Analytical Perspective. 3 Units.**

Statutes are central to the legal system in the United States and virtually every other country, but they are generated through an intricate legislative process that is often poorly understood and has in recent years been subject to intense criticism. The primary goal of this course is to explore certain categories, procedures, and norms used in the U.S. Congress. The class will also consider how the U.S. legislative process functions relative to approaches in other countries (particularly advanced industrialized countries with mature legislative and executive institutions), and will critically examine some of the concerns that have been raised among scholars and commentators about the efficacy of the U.S. legislative process. Specific topics covered in the course will include the legislative budgeting and appropriations process; legal (including constitutional) interpretation in the legislature; oversight of executive and administrative action; legislative agenda-setting and other counter-majoritarian features of the lawmaking process; and the division of labor between legislative chambers, committees, and subcommittees. Students will have an option of either choosing between writing 4 short response papers (4-5 pp. each), or one longer paper for writing "W" credit for 3Ls only. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the W requirement, with consent of the instructor. Special Instructions Writing (W) credit is for 3Ls only. Elements Used in Grading: Class participation, attendance, four short response papers or final paper.

**LAW 534. Law and Psychology. 3 Units.**

This course will examine the implications of psychological theory and research for normative legal theory and for contemporary legal policies, procedures, and practices. The course will draw on contemporary cognitive, social, and clinical psychology to address the concepts of intent, responsibility, deterrence, retribution, morality, and procedural and distributive justice. We will examine evidence law (e.g. eyewitness testimony, polygraphy, expert testimony, psychiatric diagnosis and prediction), procedure (e.g., trial conduct, jury selection, settlement negotiations, alternative dispute resolution), and various topics in criminal law, torts, contracts, property, discrimination, family law, and other areas. We will compare "rational actor" and psychological perspectives on decision making by juries, judges, attorneys, and litigants. Special Instructions: After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Series of shorter papers or final independent research paper totaling 28-pages.

**LAW 537. The United States Senate as a Legal Institution. 3 Units.**

This course will familiarize students with major, and/or emerging legal and constitutional issues concerning the U.S. Senate. In so doing, it will examine: 1) the Senate's nature as a complex legal institution, and 2) the issue of the Senate's legitimacy in the context of the current and largely unprecedented criticism of the Senate from all parts of the political spectrum. This first portion of the course will consider institutional-legitimacy issues facing the Senate, including the appointment of senators to fill vacancies as well as disputes concerning Senate rules and procedures such as the filibuster and holds. The second part of the course will explore how the Senate interfaces with the Constitution and the Supreme Court. It will examine how senators should regard the issue of constitutionality in voting on legislation, be it campaign-finance reform, internet decency, or health care. This part of the course will also consider how senators should approach proposed constitutional amendments. The final portion of the course will review the wide range of issues that have emerged in recent years regarding the constitutional relationship between the Senate and the Executive Branch, including the increasingly acrimonious issue of the standard to apply to executive appointments under the advice and consent power. Particular emphasis on this part of the course will be given to issues that have gained greater prominence since 9/11, including the relationship between enacted, constitutional legislation and the presidential assertion of Article II powers, as well as the Senate's abdication of its Article I war-declaration power. Elements used in grading: Class participation, attendance and final exam.

**LAW 538. Sociology of Law. 3-4 Units.**

This course explores major issues and debates in the sociology of law. Topics include historical perspectives on the origins of law; rationality and legal sanctions; normative decision making and morality; cognitive decision making; crime and deviance, with particular attention to the problem of mass incarceration; the "law in action" versus the "law on the books;" organizational responses to law, particularly in the context of labor and employment; the roles of lawyers, judges, and juries; and law and social change with particular emphasis on the American civil rights movement. Special Instructions: Students are expected to attend a weekly TA-led discussion section in addition to lecture. Sections will be scheduled after the start of term at times when all students can attend. Paper requirements are flexible. Cross listed with the Sociology Department (Soc 136/236). See "Special Instructions" in course description above. Elements Used in Grading: Class participation, paper proposal, three short papers and a final paper (see syllabus for details).

**LAW 540. Litigation and Institutional Design. 2-3 Units.**

This seminar will focus on issues of institutional design as they relate to complex litigation in the contemporary American legal system. Topics addressed will include explanations for the general move away from regulation and toward litigation in recent decades, the legal and policy implications of that trend, and contemporary efforts to retrench or remake the system. We will examine these topics from a number of substantive and procedural angles using case law, readings, and case studies. We will explore such disparate substantive areas of law as employment discrimination, securities regulation, qui tam actions, and mass torts. We will also discuss trans-substantive topics such as the class action device, private enforcement of public law (through regimes that deputize "private attorneys general" as enforcers), and federal regulatory pre-emption. Though the seminar will integrate knowledge from a number of fields of law and from other disciplines, emphasis will be given to the functional analysis of practical problems of institutional design. (Note: This course was previously titled "Reconstructing the Litigation State.") Grades will be based on class participation and either (1) several short reflection papers or (2) an independent research paper with consent of the instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Students taking the course for R credit can take the course for either 2 or 3 units, depending on the paper length. Writing (W) credit is for 3Ls only. Elements used in grading: Class participation, attendance, reflection papers or research paper.

**LAW 541. Legal Profession Workshop: The Future of Big Law. 2-4 Units.**

Ever since the global financial crisis, legal media have focused on the contraction of the corporate legal services sector. But the future holds more high-end corporate law work, not less; the question is who (or what) is going to perform that work, in what organizational setting and what part of the world. This seminar will address the key dimensions of change in the "big law" market and how changes in the delivery of corporate legal services may affect legal careers, gender equality, diversity, and work-life balance. Topics include the increased power of General Counsel, new organizational models for delivering corporate legal services, the response of large law firms to new market factors, the expanding role of information technology in the delivery of corporate legal services, third-party litigation financing, changing legal markets outside the US, the evolution of global law firms, the effects of changes in law firm organization on women and lawyers of color, and the effects of changes in the legal market on legal careers. Course materials will include books and journal articles, media reports, blog posts and guest lectures. Students may enroll either in Section 01, Section 02, or Section 03. Students in Section 01 will receive 3 credits and write research papers on a topic of their choice, relying primarily on existing literature (e.g. journal articles, media reports and blog posts). These papers will be due on the regular submission date for Winter Quarter Courses. Students in Section 02 will receive 4 credits and write research papers on a topic of their choice, based on their own empirical research projects. Students may use existing ALM datasets (available through the library), conduct qualitative interviews or online surveys, scrape data from the Web, or use other data sources in their research. Prof. Hensler will meet with students in Section 02 as necessary to advise on research design, data collection and analysis. Research papers for Section 02 will be due on the submission date FOR THE SPRING QUARTER. Students in Section 03 will write an 18 page paper and attend all class sessions and receive 2 credits. Section 03 receives research writing credit and grading is based on the paper and class participation. Elements used in grading: Class participation and research paper.

**LAW 543. Entrepreneurship, Leadership and Law in Social Enterprises. 2 Units.**

Many believe that society's greatest challenges have already been solved by social entrepreneurs and the challenge is how to take their ideas to scale. However, it has become increasingly difficult to start and sustain social ventures. The lines between the public and private sectors have become increasingly blurry as best practices in the social sector now include innovation, strategy and accountability. This course will expose students to the work of social entrepreneurs in social enterprises - focusing primarily on domestic non-profit organizations. Using the "case study method" typically used in MBA programs, students will examine the challenges of starting, counseling, serving, funding and scaling social ventures through the eyes of the entrepreneur, investor, attorney and community leader. The course will explore the intricacies of remaining mission driven, talent, board relations, managing and sustaining growth, the changing role of corporate governance, and leveraging private sector partnerships and resources. Students will also explore innovative public / private sector partnerships and the challenges and opportunities of engaging diverse partners with differing agendas. The course will include guest speakers from the fields of law, business and the social sector. Throughout, students will explore the valuable roles that attorneys can and have played in such ventures. Students will be expected to attend, participate actively, present to the class and write reflection papers. Elements used in grading: Reflection Papers.

**LAW 545. Alternate Dispute Resolution: Law, Practice, and Policy. 3 Units.**

Lawyers' representation of their clients increasingly calls for skill within a broad range of alternative dispute resolution processes. In this course, you will learn about the variety of dispute resolution procedures that operate under the ADR umbrella, within and outside of the court system (including mediation and arbitration). The goal is for students to understand the law and policy behind these alternatives relative to court adjudication, to be able to select the appropriate process for a client, and to effectively represent that client in the selected process. The teaching team includes third party neutrals and advocates from a range of contexts, including federal court, private mediation, private and public arbitration, and corporate legal counsel. An optional 1 unit module on International Arbitration will be taught in Spring quarter by Gary Born. Elements used in grading: Elements used in grading: Class participation, short written assignments and take-home exam.

**LAW 546. Alternative Dispute Resolution: Practicum. 2 Units.**

Effective client representation increasingly calls for lawyers with skill within a broad range of alternative dispute resolution processes. In this course, you will have the opportunity to observe 2-3 ADR processes being handled by Bay Area third-party neutral practitioners. Students in the class will meet periodically to review relevant law and policy, and to discuss observed cases. Grades will be based on seminar participation and 3 short papers. Co- or Prerequisites: Mediation or ADR. Elements used in grading: Class participation, attendance and written assignments. CONSENT APPLICATION: To apply for this course, students must complete and submit a Consent Application Form available on the SLS website (Click Courses at the bottom of the homepage and then click Consent of Instructor Forms) to the instructor. See Consent Application Form for submission deadline.

**LAW 548. Social Media Law Seminar. 2 Units.**

As individuals, companies, and state actors exchange vast amounts of information via social media platforms such as Facebook, Instagram, Snapchat, Pinterest, and Twitter, the law has struggled to mediate competing social, economic, and regulatory interests. This course will examine a series of legal issues raised by (1) the flow of personal information through social media, (2) the emergence of business models premised on such information flows, and (3) expanded opportunities for law enforcement and government surveillance. It will also examine strategic and ethical issues surrounding lawyers' use of evidence derived from social media. Topics covered may include consumer privacy, online harassment, advertising and securities law regulations, copyright and user-generated content, electronic discovery, and the free speech interests of businesses, employees, and students. Each class session will focus on a particular facet of an emerging body of social media law, and students will read and discuss related case law, scholarship, and policy proposals. Grading will be based upon class participation, two short response essays, and a final paper. Students will present and discuss their final paper topics during the final weeks of the course. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper.

**LAW 554. International Commercial Arbitration. 2 Units.**

This course is designed to provide students with an introduction to the theory and practice of international commercial arbitration, the preferred method of dispute resolution in international trade and commerce. It will familiarize students with the framework of international treaties and federal and state laws that undergird the international arbitral system and explore U.S. jurisprudence on the respective roles of courts and arbitral tribunals in resolving disputes subject to international arbitration. In addition the course will analyze alternatives in drafting international arbitration clauses, including the applicable arbitration rules, the significance of the agreed-upon place of arbitration, the number of arbitrators, and the method of their selection. The course will also impart a practical, in-depth understanding of each of the principal stages of arbitration, including the enforcement of the arbitration agreement; initiation of the arbitral proceedings; the availability of provisional remedies; the conduct of the arbitration from the pleading stage through discovery and briefing to the hearing; the arbitral tribunal's preparation of the award; and the judicial enforcement proceedings that conclude the process. Although the course will focus on the practice of international arbitration from the U.S. perspective, it will also introduce students to perspectives from other leading civil and common law jurisdictions. Elements used in grading: Class Attendance, Class Participation, Final Exam.

**LAW 555. The Plaintiffs' Lawyer: Institutional Constraints and Ethical Challenges. 3 Units.**

This course uses a study of plaintiffs' lawyers as a vehicle to explore many of the most controversial and important issues at the intersection of tort law, civil procedure, and legal ethics. Specifically, in this course, we will study who personal injury lawyers are, how they find clients, how they fund litigation, and how they usher complex cases to conclusion. In so doing, we will address: the role and regulation of lawyers, the use and abuse of the contingency fee, the legality and normative consequences of solicitation and attorney advertising, the propriety of secret settlements and expansive protective orders, the rise and impact of "alternative litigation finance," and the vexing issues posed by class actions, aggregate actions, consolidated actions, and multidistrict litigations (MDLs). The final segment of the course will involve a series of case studies, where students will test their knowledge of the Model Rules of Professional Conduct and have the opportunity to see the course's themes echoed and expressed in recent real-world controversies. Importantly, though the course is nominally focused on "the plaintiffs' lawyer," it does not just equip students to practice on one side of the "v." Rather, through our grounded study of legal ethics, advanced civil procedure, and contemporary legal practice, students will acquire tools that will be helpful across all kinds of civil litigation. The final paper will be due shortly after the course's conclusion. Elements used in grading: Class participation, reflection papers, final paper, and group presentation.

**LAW 556. Counterterrorism Law and Institutions. 2 Units.**

This seminar will explore a range of legal and policy questions in U.S. law related to the prevention of terrorism. Topics include intelligence-gathering, investigations, and the prosecution of suspects in U.S. courts, including controversies surrounding the use of informants, material support laws, racial and religious profiling, electronic surveillance, terrorist watchlists, and terrorism trials. In exploring these controversies, the course focuses on several core themes: 1) the contested relationship between rights and security; 2) the question of institutional choice in national security decision-making and oversight; and 3) the challenge of assessing the efficacy of counterterrorism measures. The course pays special attention to the policy controversies that affect U.S. communities, including minority and immigrant communities. To develop skills central to the work of practicing lawyers, students will write two short papers that simulate the actual work assignments of lawyers for government agencies, human rights groups, or other interested parties. For instance, students might draft a local ordinance on police intelligence-gathering, prepare a memo for a national security agency head or member of Congress, or design an administrative mechanism for resolving watchlist complaints. These assignments, for Professional Writing (PW) credit, will be due before the end of the quarter. Alternatively, students may opt to take the seminar for Research (R) credit with the professor's approval, according to the standard requirements and deadlines. In addition to completing the writing assignments, students are expected to read thoroughly and contribute to a thoughtful and lively discussion each class. Special Instructions: After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class participation and two short papers or research paper.

**LAW 557. Direct Democracy. 2-3 Units.**

In recent years, the use of ballot measures has sharply risen, and initiatives and referenda have featured prominently in contested debates over immigration, affirmative action, abortion, same sex marriage and term limits. This seminar will focus on direct democracy as a method of lawmaking. Our principal focus will be on initiatives and referenda, but we will allocate some time to the recall, as well. We will consider the history, practice, theoretical justifications, and constitutional dimensions of direct democracy, as well as how direct democracy interacts with representative democracy. We will also explore many legal questions that have arisen in as ballot measures have been used as instruments of governance and policy. Topics will include whether direct democracy comports with the federal constitution; judicial review and interpretation of ballot measures; minority rights under direct democracy; election rules relating to signature gathering, qualifying ballot measures and campaign finance; and the role of interest groups. I anticipate one or more guest lecturers. Each student will present on one particular ballot measure that is linked to that week's topics. Students will write either multiple response papers (for W credit) or a final research paper (for R credit) on a topic to be worked out with the instructor. Special Instructions: After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Students taking the seminar for R credit can take the seminar for either 2 or 3 units, depending on the paper length. Elements used in grading: Class participation, written assignments, multiple response papers or a final paper. Writing (W) credit is for 3Ls only.

**LAW 558. Workshop on International Security, Law, and Social Science. 1 Unit.**

Societies throughout the world face pressing security and international cooperation problems involving insurgency, transnational crime, risk regulation, migration, arms control, and related areas. This seminar, based at Stanford's university-wide Center for International Security and Cooperation covers a variety of issues of interest for a multi-disciplinary audience of social scientists, lawyers and legal scholars, and natural scientists, among others. Issues include nuclear weapons proliferation and arms control, war and civil conflict, international and transnational organizations, governance, counter-terrorism, biosecurity and global public health, and migration.

**LAW 560. Mental Health Law: Forensics. 3 Units.**

It is estimated that nearly one-third of Americans experience a diagnosable mental disorder each year. This course is designed to provide law students with a working knowledge of the major areas of mental health and illness, as well as a basic understanding of legal issues affecting the practice of psychology and psychiatry. Basic concepts of clinical psychiatry and psychopathology will be highlighted throughout the course. We will also address legal issues that pertain to the needs and rights of individuals with a mental disorder and explore the delivery of mental health services, the regulation of mental health professionals, and the relationship between society and individuals with a mental disability. Whenever appropriate, landmark cases will be discussed and their impact in the practice of mental health delivery (i.e., psychiatry and psychology) and on the practice of law, will be discussed. This course is intended to be interactive and while the core of the course is pre-determined, some of the content will be tailored to address interests and needs of participants. The structure of most sessions will begin with case presentations highlighting the day's topic, followed by a didactic portion from the instructor, ending with an interactive discussion between class members and invited panelists. Grades will be based on class participation, group participation in a mock deposition/trial, and a research paper for R credit- the topic for the paper is to be agreed upon between the student and the course director. Elements used in grading: Class participation, attendance, group participation in a mock deposition/trial and final paper.

**LAW 562. Comparative Civil Rights. 4 Units.**

This course will compare civil rights laws in the United States to those in several other countries in Europe and the developing world. We will focus on how differing national histories, priorities, politics and demographics have led to distinct approaches to anti-discrimination as well as on how civil rights movements have influenced and borrowed from each other. Special Instructions: The course will be taught using a "flipped classroom" format: students will complete a series of on line class segments that include video interviews with experts from around the world, texts and quizzes. The on line materials will allow flexibility so that students can focus in greater depth on areas of interest as well as review foundational material on American anti discrimination law, international law and international human rights. Classroom time will be dedicated to discussion and questions. Students have the option to write papers for Research (R) credit. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Students enrolled in this class will have the option of participating in a one-week extension of the course (Law 562A) in Paris, France during spring break for an additional credit. Students may enroll for this course alone or for both this course and Law 562A. As one of the SLS overseas courses, the first eight weeks of the course will coincide with the first eight weeks of the Winter Quarter, and will be conducted at Stanford Law School. The overseas option is limited to 12 students. (See Law 562A for application instructions and deadline). Elements used in grading: Class participation, attendance and final paper.

**LAW 562A. Comparative Civil Rights: Paris Field Study. 1 Unit.**

This is the Paris, France component of Comparative Civil Rights (Law 562). For details, see course description for Law 562. Students in this optional field study component will travel to Paris, France for one week during the spring recess. There they will meet with attorneys, government officials, activists and scholars who specialize in French and European anti discrimination law. Enrollment is limited to 12 students. Elements used in grading: TBD. APPLICATION: To apply for this course, students must complete and e-mail the Application Form available on the SLS Registrar's Office website (see Registration) to the SLS Registrar's Office. See Application Form for submission deadline.

**LAW 563. Beyond the Common Law: Tort Reform and Tort Alternatives. 2-3 Units.**

Over the past century, tort law has been under sustained attack. Using a broad mix of case law, case studies, and scholarly analysis, this seminar will interrogate those attacks—including their historical roots, their theoretical justifications, and their practical effects. We will first study "replacement reforms"—attempts to jettison the common law in favor of alternative compensation mechanisms, including workers' compensation, auto no-fault, the September 11th Victim Compensation Fund, and the Vaccine Injury Compensation Program, housed within the U.S. Court of Claims. Second, we will study modern tort reform initiatives, often dubbed "discouragement reforms," which have chiseled away at damages and chilled personal injury victims' incentives and capacity to seek relief. Finally, we will study the United States Supreme Court's own tort reform activity, including recent jurisprudence limiting punitive damages, preferencing arbitration, and granting broad preemptive effect to agency actions. Through this analysis, students will develop a deeper and richer understanding of the tort system, its contemporary operation and excesses, and the uneasy but undeniably important place tort law—and civil litigation more generally—occupies in contemporary American society. Special Instructions: Grades will be based on class attendance, class participation, and either several short reflection papers (section (01)) or an independent research paper (section (02)). After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Students taking the course for R credit can take the course for either 2 or 3 units, depending on paper length. Elements used in grading: Class participation, class attendance, reflection papers or research paper. Early drop deadline.

**LAW 564. The Future of Finance. 2 Units.**

If you are interested in a career in finance or that touches finance (computational science, economics, public policy, legal, regulatory, corporate, other), this course will give you a useful perspective. We will take on hot topics in the current landscape of the global markets as the world continues to evolve from the financial crisis. We will discuss the sweeping change underway at the policy level by regulators and legislators around the world and how this is changing business models for existing players and attracting new players to finance. The course will include guest-lecturer perspectives on where the greatest opportunities exist for students entering or touching the world of finance today including new and disruptive players in fin tech, crowd financing, block chain, robo advising, algorithmic trading, big data and other areas. New challenges such as cyber and financial warfare threats also will be addressed. While derivatives and other quantitative concepts will be handled in a non-technical way, some knowledge of finance and the capital markets is presumed. Elements used in grading: Class Participation, Attendance, Final Paper. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration) to the instructor(s). See Consent Application Form for submission deadline. Cross-listed with Economics (ECON 152/252), Public Policy (PUBLPOL 364), Statistics (STATS 238).

**LAW 565. Immigration Law and Policy. 3 Units.**

This course will examine many aspects of immigration law including the criteria for admission to the United States on a temporary or permanent basis, the grounds and processes of removal, the functions of relevant administrative agencies, the role of the courts, the nature and structure of immigration enforcement, the role of states and localities in immigration law, refugee and asylum law, the constitutional status of foreign nationals in the U.S., and citizenship. Students will be assessed on short writing assignments and a three-hour, in-class final examination. Elements used in grading: Class Participation, Written Assignments, Final Exam.

**LAW 572. Social Justice Impact Litigation: Issues and Strategies. 2 Units.**

This seminar is designed to examine strategic and legal issues related to litigating impact and social justice cases that advance the constitutional and civil rights of vulnerable communities. The course will be informed by the instructor's three decades of experience litigating class action and appellate cases, including in the Supreme Court, on behalf of immigrants and civil rights plaintiffs as the founder and former director of the ACLU national Immigrants' Rights Project. We will consider some key doctrinal issues as a prelude to exploring litigation strategy and approaches through a variety of case studies, pending litigation, and guest lecturers. Among the issues we may examine are: selecting and using test cases; strategic pleading; class action problems; ethical questions; the role of amicus briefs; suits for damages versus injunctive relief; standing and mootness; settlement strategies; coalition litigation; use of public advocacy and media; the impact of litigation on policymakers and government officials; and the role litigation in furthering legislative action. Some guest speakers will be invited. This seminar is not appropriate for 1L students. Enrollment is limited. Grading will be based on class participation and written work of at least 18 pages. In consultation with the instructor at the beginning of the course, students will have the option of choosing either to submit a final paper or a series of reflection or analytical pieces responding to the seminar readings. All students enrolled in the course are eligible for Writing (W) credit. With the instructor's prior consent, a limited number of students may be approved for Research (R) credit for writing a substantial research paper on an approved topic. After the term begins, students approved for R credit will transfer from section (01) into section (02). Elements used in grading: Class participation (50%) and written submissions (50%). Writing (W) credit is for students entering prior to Autumn 2012. The seminar is not open to 1L students. --- CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. There are no prerequisites but familiarity with constitutional litigation and federal jurisdictional issues is helpful. See Consent Application Form for submission deadline.

**LAW 573. Legislating. 1 Unit.**

Legislating- representing the voters in the making of laws-is obviously a very important part of our democracy, but it is also the least well understood. There is much greater public understanding of both the Executive and Judicial branches. And this lack of understanding unfortunately contributes to a negativism about the Legislative process which in turn deepens the unhappiness with government which has reached the level of interfering with our ability to improve the quality of our lives. This course will both describe the general nature of Legislating and describe how the process works in the US Congress and State legislating. In the case of the Congress, the discussion will focus very much on how that process has deteriorated over the past few years, and what the prospects are for reverting to a more normal, and healthier, situation. The reading will consist of accounts of Legislatures-State and Federal-dealing concretely with issues. This class will meet February 8, 9, 10, 11, & 12. Elements used in grading: Final Paper.

**LAW 575. International Commercial Arbitration. 1 Unit.**

This course is designed to provide students with an introduction to the law, theory and practice of international commercial arbitration. It will familiarize students with the framework of international treaties and federal and state laws that undergird the international arbitral system and explore U.S. jurisprudence on the respective roles of courts and arbitral tribunals in resolving disputes subject to international arbitration. The course will cover the basics of drafting international arbitration clauses and the principal stages of arbitration, including the enforcement of the arbitration agreement. Class will meet 10:00 a.m. to 1:00 p.m., Friday, April 1, Saturday, April 2 and Sunday, April 3. Prerequisite: Alternate Dispute Resolution: Law, Practice, and Policy (LAW 545). Elements used in grading: Class Attendance, Class Participation, Written Assignments.

**LAW 576. Law and Sexuality. 2-3 Units.**

This seminar will focus on how the law regulates sexuality. We will approach the material as an exercise in advanced constitutional law, exploring how courts have used—or might use—federal or state constitutional provisions to address issues regarding a wide array of issues involving sexuality. The core of the class will relate to contemporary controversies concerning sexual orientation and gender identity (including, for example, how sexual orientation and gender identity are defined, regulation of sexual conduct, marriage and parenting rights of same-sex couples, and religious liberty debates, among others). But we will also discuss other issues, including polygamy/polyamory and asexuality. We will maintain an interdisciplinary focus throughout as we consider how social, cultural, and political forces shape, and are shaped by, legal doctrine. All students taking the seminar for 2 credits will either write a final research paper of approximately 18 pages (for R credit) or a series of shorter reaction papers. Students who wish to write a longer R paper (approx. 26 pages) may enroll in the seminar for 3 credits. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Students taking the course for R credit can take the course for either 2 or 3 units, depending on the paper length. Elements used in grading: Class participation and paper(s).

**LAW 577. Regulation of the Political Process. 3 Units.**

This course is intended to give students a basic understanding of the themes in the legal regulation of elections and politics. We will cover all the major Supreme Court cases on topics of voting rights, reapportionment/redistricting, ballot access, regulation of political parties, campaign finance, and the 2000 presidential election controversy. The course pays particular attention to competing political philosophies and empirical assumptions that underlie the Court's reasoning while still focusing on the cases as litigation tools used to serve political ends. Elements used in grading: Class participation and exam. Cross-listed with Communication (COMM 361) and Political Science (POLISCI 327C).

**LAW 583. International Investment Law. 2 Units.**

International investment law and arbitration is one of the fastest-developing areas of international law. It is an area that combines elements of treaty and customary international law, public policy, and private dispute resolution. In the past decades, there has been a dramatic increase in the number of bilateral investment treaties and other agreements with investment-related provisions, followed by a sharp rise in the number of disputes between private investors and sovereign states under those specialized legal regimes. The rise of international investment law and arbitration has generated a new and exciting practice area in global law firms, where teams of lawyers act on behalf of investors against sovereign states, or defending sovereign states against investor claims, before international arbitral tribunals. This course will cover four broad areas: (I) the historic, theoretical and policy grounds underpinning international investment law; (II) the substantive obligations and standards governing the investor-state relationship; (III) the growth of investor-state arbitration and its impact on international law; and (IV) the wider issues of fairness and functionality of investment treaty law and investor-state dispute resolution. The course uses materials from international investment treaty texts, case law, and commentaries to enable students to evaluate and apply legal doctrine to future situations. The course will highlight different and sometimes conflicting interpretations and decisions in the area, and invite students to analyze, discuss, and form their own views on key issues. Students may choose between a series of weekly response papers, or a larger research paper, and will serve as discussion facilitators along with the instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class participation and paper(s).

**LAW 586. Islamic Law. 4 Units.**

Topics include marriage, divorce, inheritance, ritual, war, rebellion, abortion, and relations with non-Muslims. The course begins with the premodern period, in which jurists were organized in legal traditions called *schools of law*. After examining the nature and functions of these institutions, we turn to the present era to study the relationship between customary law, state law, and the Islamic legal heritage in Egypt and Indonesia. The course explores Muslim laws and legal institutions and the factors that have shaped them, including social values and customs, politics, legal precedents, and textual interpretation. Elements used in grading: Participation & final paper. Cross-listed with Religious Studies (RELIGST 201/301).

**LAW 588. Sports Law. 2 Units.**

This seminar covers various legal and business aspects of professional sports, the Olympics and college athletics. Topics covered may include antitrust law, labor law, collective bargaining, torts, contracts, agency, constitutional law, administrative law and intellectual property. Class lecture and discussion will be supplemented with speakers from the sports industry, with an emphasis on current and future sports law issues. Special Instructions: Any student may write a paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from the exam section (01) to the paper section (02) for Research credit with consent of the instructor. Class will meet six Tuesdays. Exact meeting dates TBA. Elements used in grading: Class Participation, Attendance, Final Exam or Final Paper.

**LAW 590. Modern Capital Markets and the Financial Crisis. 4 Units.**

Money: Shadow Banking, Dark Financial Matter and the Future of Finance. This course introduces law students to the structure of the shadow banking system and related financial markets. Emphasis is placed on the securitization process, the swaps markets (including credit default swaps, total returns swaps, interest rate, and currency swaps), repo agreements, forwards, futures, and related institutions such as clearing houses and exchanges. The course will consider the role that these markets played in the recent and ongoing financial crisis, their potential implications for future crises, and several of the regulatory initiatives proposed by the Dodd Frank Act. Much of the course will operate through the lens of a series of case studies including the Greek debt crisis, Harvard's loss of \$500 million in the swaps market, the AIG bailout, and JPMorgan's loss of \$2 billion in its hedge book. Special Instructions: If you have taken Law 559: Modern Securities Regulation (Sonsini) and/or Law 542: Modern Securities Fraud Litigation (Eth), you may take Law 590: Modern Capital Markets (Grundfest). Elements used in grading: Class attendance, participation and exam.

**LAW 591. Securities Regulation: Raising Capital in U.S. Markets, from Start-up through IPO and Beyond. 4 Units.**

This course relies on Silicon Valley's venture capital process as a template and examines the legal regime governing capital formation from the earliest angel investing rounds, through billion dollar private placements, initial public offerings (IPO's), and subsequent governance as a publicly traded firm. The course also addresses emerging crowd-funding markets, secondary market mechanisms that offer liquidity to employees of privately held, VC-backed firms, as well the operation of Rule 144A markets in which large foreign firms tap US institutional investors for billions in financing without ever registering with the SEC. The course relies extensively on recent transactions including the Alibaba, Etsy, and GoPro IPOs, and Uber private placements. Students interested in a more complete appreciation of the securities regulation process are advised also to take the Spring Securities Litigation course. Elements used in grading: Final exam.

**LAW 592. Law, Race, and Inequality. 2-3 Units.**

This course will examine the application of constitutional and statutory antidiscrimination law to race related controversies across a variety of settings. After some exploration of the historical origins of statutory and constitutional antidiscrimination law, the course will then consider antidiscrimination law as applied to contemporary controversies in specific settings, which may include criminal justice, college admissions, political participation, primary/secondary education, employment, housing, hate speech, and the formation of family relationships. The readings will be varied and will include judicial opinions, scholarly commentary, and social science research. Throughout, we will aim to understand both the specific challenges of regulating race in particular contexts, and the broader (and conflicting) conceptions of racial justice that inform law, policy and morality. Students in the seminar will write a substantial research paper of either 18 pages to receive 2 units of credit or 26 pages to receive 3 credits. Elements used in grading: Class participation and research paper.

**LAW 593. Terrorism and the Courts. 3 Units.**

The emergence of international terrorism and governments' responses to it have led to novel questions for courts at the intersection of constitutional, criminal, international, and procedural law. This seminar will consider a series of interrelated problems that have arisen in federal courts over the treatment and punishment of suspected terrorists and compensation for victims. Topics will include habeas litigation by detainees; the creation and use of non-Article III courts such as military commissions as alternatives to criminal prosecution; congressional attempts to withdraw jurisdiction from federal courts over litigation involving terrorism; separation of powers issues involving the roles of the President, Congress, and the courts in the treatment and punishment of suspected terrorists; compensation claims by victims of terrorism (through statutory compensation funds, litigation against foreign states under the Foreign Sovereign Immunities Act, and tort litigation against individuals and entities); techniques for handling complex litigation involving terrorism; the Alien Tort Statute; and civil litigation by detainees over their treatment. The course is designed to be complementary to Professor Shirin Sinnar's Counterterrorism and the Law. Students are encouraged to take both courses. Grading will be based on class participation, a paper, and an oral presentation of the paper topic to the class. Papers meeting the requirements for Research (R) credit will be eligible for R credit with the consent of the instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Special Instructions: If the course is over-subscribed preference will be given to third year students, then to students who have relevant background in federal courts, national security, international law, or other related topics, then to second year students without such background, then to first year students. Selection within those categories will be by lottery. Students wishing to have prior coursework or experience considered in case of oversubscription should submit a short statement describing their background. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline. Elements used in grading: Class participation, written assignments, final paper and oral presentation. This course is open to first-year Law School students. Automatic grading penalty waived for writers. Writing (W) credit is for students entering prior to Autumn 2012.

**LAW 600. Federal Indian Law. 3 Units.**

This course will provide an overview of the field of federal Indian law. It will consider the origins and scope of tribal sovereignty as recognized under federal law, as well as current federal law on tribal legislative, executive, and judicial authority. It will also explore the division of authority between tribal, federal, and state governments; federal statutory schemes governing Natives and Native nations; and constitutional issues affecting Natives. Additional current legal issues which may be covered include Native land claims, gaming, family law, religious and cultural rights, and natural resources. Elements used in grading: Class Participation, Final Exam.

**LAW 602. Religion and the First Amendment. 3 Units.**

This course covers the major doctrines and decisions interpreting the provisions of the First Amendment affecting religion, especially the free exercise and establishment clauses. Special emphasis is placed on the historical, philosophical, and theological roots of first amendment principles, and it also studies the briefs and arguments in a case currently in litigation.

**LAW 603. Environmental Law and Policy. 3 Units.**

This course provides an introduction to federal environmental law, regulation, and policy in the United States. The course emphasizes the cooperative and competing roles that the federal and state governments play in implementing environmental law in the United States. The course encourages students to adopt a comparative and dynamic view of environmental protection under U.S. law. We begin with a discussion of the property law roots of environmental law. Next we briefly touch on some aspects of U.S. administrative law that are essential to understanding the material that follows (students should feel free to take this class without having taken Administrative Law). This is followed by a discussion of the risk assessment and cost-benefit frameworks essential to understanding the current U.S. approach to environmental problems. We conclude this segment with a comparison of two approaches to chemical safety regulation - the U.S. Toxic Substances Control Act and the EU REACH directive. Next, we focus on three key substantive federal environmental statutes: the Clean Air Act, the Clean Water Act, and the Endangered Species Act. Next, we turn to the National Environmental Policy Act to understand how environmental concerns are included in the process of making agency decisions. The course concludes with a discussion of current EPA efforts to address emissions of greenhouse gases under the Clean Air Act. Special Instructions: Substantial participation is expected and class participation constitutes twenty percent (20%) of the overall grade for the course. In addition, students are expected to complete two 1000 word written assignments during the course that will constitute forty percent (40%) of the overall grade. Finally, an in-school exam will, similar in format and length to the written assignments, constitute the remaining forty percent (40%) of the overall grade. Elements used in grading: Class participation (20%), written assignments (40%) and final exam (40%).

**LAW 605. International Environmental Law. 3 Units.**

This course examines the legal, scientific, political, economic, and organizational issues associated with the creation of international environmental regimes. The principal emphasis will be on the issue of climate change, with a focus on the current regime(s) and the lead-up to the Paris Conference of the Parties to the UN Framework Convention. The course will also address the Montreal Protocol for Ozone Depleting Substances, the International Convention for Regulation of Whaling, and other multilateral agreements. The course examines the choice of legal instrument, as well as the implementation, evolution, and ultimate effectiveness of environmental regimes. Finally, close attention is paid to equity and development issues that are critical in bridging north-south divides on international environmental issues. Substantial student participation is expected and class participation will constitute twenty percent (20%) of the overall grade for the course. Elements used in grading: Class participation and final paper.

**LAW 606. Supreme Court Simulation Seminar. 3 Units.**

This seminar provides students with the opportunity to analyze, argue, hear oral arguments and draft opinions in cases that are currently pending before the Supreme Court of the United States. Professor Larry Marshall will serve as the instructor in the seminar, but many of the Law School's esteemed group of Supreme Court litigators will be participating in one or more of the sessions. The 18 students in the seminar will be divided into two courts. One of these courts will sit five times and the other will sit four times. During each sitting, the court will hear arguments in a case currently pending before the Supreme Court. The cases chosen will provide a mix of constitutional and statutory issues, as well as a mix between criminal and civil cases. Each student will be assigned the role of a particular Justice for the entire quarter. Each student's task while sitting on cases is to do his or her best to understand that particular justice, based on that justice's prior opinions and judicial philosophy. In this sense, the seminar is intended to help promote insight into the role of judicial personality and philosophy within the decisional process. The weekly seminars will proceed as follows: In preparation for each week's session, all students (whether they are the two students arguing that week, the nine students judging that week, or the seven students observing that week) will read the lower courts' decisions, the briefs (the party briefs and selected amicus briefs) and the major precedents implicated. During the first portion of each week's session (approximately one hour), two of the students (who are members of the Court that is not sitting that week) will present oral arguments to the nine "justices" sitting that week. The arguments will be based on the briefs that were actually filed in the case. During the second segment of each week's session (approximately 45 minutes), the "justices" who are sitting that week will "conference" the case while the other non-sitting students, students who argued, instructors and guests will observe. Again, each student will be in the role of a particular justice. At the end of the "conference," the opinion-writing will be assigned to one "justice" in the majority and one "justice" in the dissent. During the final portion of each session (approximately one hour), the instructors, guests and students will engage in a broad discussion of what they just observed. This may include analysis of the briefing, discussion about the oral argument, reflections on the "conference," and, more generally, a discussion about the case and its significance. After each class, the student assigned to draft the majority opinion will have two weeks to circulate a draft to the "Court." The student writing the dissent will then have two weeks to circulate his or her opinion. The other sitting "justices" can join one of these opinions, request some changes as a condition of joining, or decide to write separately. Over the course of the Quarter, then, each student will argue one case, sit on four or five cases, and draft at least one opinion.

**LAW 609. Comparative Legal Cultures: Understanding for Cross-Border Legal Practice. 2 Units.**

In the globalizing world legal practice frequently involves more than one country and more than one legal system. Rule systems are converging; and the differences between systems are no longer as serious barriers to transnational legal practice as they once were. But legal systems do change at different speeds, and require sensitivity to the variety of legal structures and cultures. This seminar explores legal practice in context, comparing in particular legal cultures in the United States, Latin America, and southern Europe. Elements used in grading: Class Participation, Written Assignments, Final Paper.

**LAW 610. Trial Advocacy Workshop. 5 Units.**

This lawyering skills course gives students an orientation to and constant practice in most basic pretrial and trial advocacy skills areas. Topics include: taking and defending depositions, motion practice, trial evidence, including admission of trial exhibits in evidence and use of prior witness statements to refresh and impeach a witness, jury selection and voir dire, opening statements, direct and cross-examination of witnesses, and closing arguments. Students will try a full jury case through to verdict with use of jurors and usually before a real judge in the courthouse in Palo Alto at the end of the course. Students will also have a chance to watch the jurors deliberate and talk with them after their verdict. The course takes place during seven weeks of the Autumn Quarter with two classes (one lecture and one workshop) per week on most weeks from 4:15-9:00 (these usually occur on T, W, or Th, plus an occasional M), plus two Saturday workshops and the final weekend of jury trials, Saturday and Sunday November 14 and 15. Each day's ending time will vary; most sessions will end before 9:00. For a detailed schedule, contact Stephanie Basso at sbasso@law.stanford.edu. The format for each topic begins with a lecture/discussion featuring video vignettes of various techniques and a live demonstration by an expert trial lawyer. Following the discussion portion of each topic are small group sessions during which each student practices the skills involved. Constructive feedback is given after each exercise by two of our faculty of very experienced Bay Area litigators and judges. Most exercises are also videoed for further one-on-one critique by another faculty member. The central philosophy of the workshop is that skills are best acquired in an experiential manner by seeing and doing. Frequent short, well-defined exercises followed by immediate constructive feedback in a non-competitive, non-threatening atmosphere provide the core of the program. The workshop directors are Tim Hallahan, Judge Sallie Kim and Jeff Kobrick. Tim has taught similar programs at Harvard Law School, the University of San Francisco School of Law, Boalt Hall, the California Continuing Education of the Bar, and in private and public interest law firms around the country. Sallie is a United States Magistrate Judge in San Francisco and was a partner in a civil litigation firm and also previously taught a class at SLS and served as Associate Dean for Student Affairs. Jeff is a partner in a civil litigation firm and has taught litigation skills courses at Harvard and Stanford Law Schools for a number of years. Special Instructions: If you haven't taken Evidence you must contact Tim Hallahan before the course begins for some brief pre-course reading assignments. There are no papers or tests, but attendance at every session is required. Since we will begin our trial advocacy exercises on the first day of class, all students who are interested in taking the course (whether enrolled or on the wait-list) need to be present for the first class. (Students who are not present will be dropped from the class or waiting list unless they have made previous arrangements with the professor.) Add-drop decisions need to be resolved at the first class; no drops will be permitted thereafter. Exceptions to this rule will be made by petition only. Mandatory attendance. Elements used in grading: Attendance and in-class assignments.

**LAW 612. Constitutional Law: Speech and Religion. 4 Units.**

This is a course about the freedoms of speech, press, religion, association, and assembly under the First Amendment. Two-thirds of the course will be about freedoms of speech, press, and assembly. We will examine historical context, doctrinal development, and current caselaw. We will ask why government regulates speech (to prevent harms? to protect sensibilities? to redistribute power? to advance the interests and ideas of the politically powerful?), how government regulates speech (by aiming at messages? by aiming at markets? by aiming at when and where speech takes place? by conditioning subsidies?), and what justifications are ever sufficient for limiting speech. We will include consideration of the institutional press and new technologies including the Internet, as well as the rights of private organizations to determine their membership and organization. About a third of the course will be about religion. We will ask how the twin constraints of the Free Exercise and Establishment Clauses relate, looking especially at notions of neutrality, voluntarism, separation, and accommodation. Elements used in grading: Exam.

**LAW 613. Dispute Systems Design. 3 Units.**

Lawyers are often called upon to help design systems for managing and resolving conflicts that support or supplant existing legal structures. The crisis of September 11 led Congress to pass a law creating the September 11 Fund; a California Supreme Court challenge to its method of resolving health care disputes led Kaiser Permanente to reform its arbitration system; years of atrocities committed against the people of South Africa, Guatemala and many other countries led to the formation of truth commissions. Lawyers helped to structure these and many other conflict resolution systems. We'll use a case study model to survey different kinds of conflict prevention, management and resolution systems, and examine different factors in their design. Special Instructions: Grades will be based on class participation and Option 1 (section 01) a series of short essays and a short research paper; or Option 2 (section 02) a long research paper involving independent research. Students electing option 2 (section 02) will be graded on the H/P/R/F system and will receive Research (R) credit. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Negotiation Seminar (LAW 615) strongly preferred but not required. Elements used in grading: Class participation, attendance, written assignments and final paper. Attendance at the first class is mandatory.

**LAW 615. Negotiation. 3 Units.**

As a lawyer, you will probably negotiate more than you do anything else. You will negotiate not just over cases, but any time that you need something that you cannot get alone. You will negotiate with your boss, your clients, your secretary, and all of their counterparts (plus the lawyers) on the other side. You will negotiate with "the system" whether it is the court, the government, the structure of society, or the law. You will also continue to negotiate with your family, your friends, and yourself. This course is designed to: (1) develop your understanding of negotiation, and your awareness of yourself as a negotiator; (2) give you some tools and concepts for analyzing and preparing for negotiations; (3) enhance your negotiating skills through frequent role plays, reflection, and feedback; and (4) teach you how to keep learning from your own negotiation experience. In addition to negotiation skills and theory, you will be introduced to issues of representation, ethics, and the place of negotiation in our legal system. The Negotiation Seminar is an intense, interactive course. We will require weekly preparation of readings, simulations, and written assignments. Basically, you will learn by reading about specific research and doing simulated negotiations – figuring out with the rest of the class what works and what does not, writing about what you're learning, and trying again. Because participation in the simulations is central to the course, attendance at all classes is required. Since we will begin our simulation exercises on the first day of class, all students who are interested in taking the course (whether enrolled or on the wait-list) need to be present for the first class. (Students who are not present will be dropped from the class or waiting list unless they have made previous arrangements with the professor.) Add-drop decisions need to be resolved at the first class; no drops will be permitted thereafter. Once you commit to the class, you must complete it or receive a failing grade. Exceptions to this rule will be made by petition only. Petitions of this type must be extraordinarily strong in order to be granted. Elements used in grading: Class participation, attendance and written assignments.

**LAW 616. Complex Litigation. 3 Units.**

This course will examine the variety of procedures used to develop and manage complex litigation in the U.S., including class actions, multidistrict litigation, and high-stakes one-on-one litigation. Topics include judicial case management, electronic discovery, use of expert evidence, consolidation, class certification, quasi-class actions, trying complex cases, the substitution of arbitration for litigation, and how complex cases are funded. The course will consider these topics as they have played out in current cases, including social impact litigation, mass product defect claims, financial litigation including securities class actions, patent and copyright disputes, gender, race, and other discrimination claims, assisted by guest lectures by judges and lawyers. Early in the quarter each student will choose a recent or ongoing complex litigation to investigate. (A list of candidate litigations will be provided, but students are free to choose any complex litigation that interests them.) During the quarter, students will conduct research on the litigation including, where possible, contacting key participants for information and perspective. This research will serve as the basis for in-class discussion, focusing on different aspects of the litigation as the quarter progresses. Students will hand in 2 brief papers on the litigation they are researching during the course of the quarter, for review and comment, but not for grading, and a final paper including the two previous drafts plus additional analysis by the official Fall quarter paper deadline. Regular reading assignments will be tailored to allow time for this on-going student research. Elements used for grading: Final paper and class participation.

**LAW 617. Public Interest Law and Practice. 2-3 Units.**

This course will examine the history, theoretical frameworks, strategies and political position of public interest law practice and attorneys in the United States. We will consider the role of lawyers and the legal system in advancing social justice; different career paths of public interest lawyers; ethical issues related to working as a public interest lawyer; the personal impacts of this type of career choice; and strategies employed by lawyering in differing settings, from issue-based non-profits to government agencies, and private public interest law firms or legal services groups. Readings will include law review articles, legal pleadings and case studies that allow analysis and exploration of the tensions and challenges that exist within the legal system for public interest practitioners. Students will also be exposed to practical skills outside of litigation that social justice lawyers should understand. Students will be asked to produce several short papers throughout the quarter. For an additional credit and Research credit, students will be asked to produce a substantially longer paper on a related topic and can be excused from some of the shorter assignments. Students taking the seminar for Research credit can take the seminar for either 2 or 3 units, depending on the paper length. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Attendance, class participation, written assignments.

**LAW 620A. Criminal Prosecution Clinic: Clinical Practice. 4 Units.**

The six students enrolled in Stanford's Criminal Prosecution Clinic prosecute cases at the San Jose Superior Court under the guidance of Santa Clara County prosecutors. Students formulate case strategy, identify and interview witnesses, and advocate before the court at evidentiary motions or preliminary hearings. The cases, almost always felonies, include drug offenses, thefts, burglaries, assaults (including domestic assaults), weapons possessions, and a range of less common crimes. Students offer testimony by police officers, crime victims, and other witnesses and cross-examine defense witnesses, including those defendants who take the stand. Clinic students spend at least three full days a week at the D.A.'s office. All six students must spend all day Tuesdays and Thursdays on site. Each student also must choose a third on-site day that stays constant through the term. There generally will be two class sessions each week—a three-hour on-campus class and a lunchtime seminar in the D.A.'s office. At the beginning of the term classes focus on skills training, including direct and cross-examination, admission of physical evidence, making and answering objections, and argument. Toward the end of the term the focus shifts to an examination and critique of the local mechanisms of criminal justice. Topics include the impact of race, gender, and class on the quality of justice; the institutional strengths and weaknesses of the actors in the system; prison conditions and prison reform; and the ethical issues that confront prosecutors and defense lawyers. Students typically tour the Santa Clara County crime lab, San Quentin Prison, and the Chaderjian Youth Correctional Facility in Stockton and have the option to spend an evening on a police ride-along. Students must submit regular written reflections on their experiences in and observations of the local justice system. Their assigned cases often will demand written court filings. During most weeks students will meet one-on-one with the faculty supervisor. Evidence is a prerequisite. In rare cases a concurrent clinic module in evidence can fulfill this requirement. Courses in criminal procedure (investigation) and trial advocacy are strongly encouraged. Students will be awarded three separate grades, each reflecting four credits, for clinical practice, clinical methods, and clinical coursework. Elements used in grading include class attendance and participation, writing assignments, case preparation, and courtroom presentations and advocacy. Class attendance is mandatory. Grading is on the H/P system. Special Instructions: General Structure of Clinical Courses: All of the Law School's clinical courses, other than advanced clinics, are offered on a full-time basis for twelve credits. This format allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams, and papers. Students enrolled in a clinic are not permitted to enroll in any other class, seminar, directed research, or other credit-yielding activity within the Law School or University during their clinical quarter. Nor are they allowed to serve as teaching assistants expected to attend a class regularly. There is a limited exception for joint-degree students who are required to take specific courses each quarter and who would be foreclosed from taking a clinic unless allowed to co-register. These exceptions are approved case by case. The clinical quarter begins the first day of classes and runs through the final day of exam period. Students should not plan personal travel during the Monday-to-Friday workweek without permission from on-site and faculty supervisors. Students are expected to be available by email or cell phone during workday hours Monday through Friday and are expected to devote at least thirty-five hours per week to various facets of this work. In some weeks casework may demand longer hours. Enrollment in a clinic is binding; once selected by a clinic to which he or she has applied, a student may not drop the course later except in limited and exceptional cases. Requests for withdrawal are processed through the formal petition and clinical faculty review process described in the clinic policy document posted on the SLS website. Students may not enroll in any clinic (full-time or advanced) that would result in their earning more than twenty-seven clinical credits during their law school career. For more general information about clinic enrollment and operations, please see the clinic policy document posted on the SLS website.

**LAW 620B. Criminal Prosecution Clinic: Clinical Methods. 4 Units.**

The six students enrolled in Stanford's Criminal Prosecution Clinic prosecute cases at the San Jose Superior Court under the guidance of Santa Clara County prosecutors. Students formulate case strategy, identify and interview witnesses, and advocate before the court at evidentiary motions or preliminary hearings. The cases, almost always felonies, include drug offenses, thefts, burglaries, assaults (including domestic assaults), weapons possessions, and a range of less common crimes. Students offer testimony by police officers, crime victims, and other witnesses and cross-examine defense witnesses, including those defendants who take the stand. For more general information about clinic enrollment and operations, please see the clinic policy document posted on the SLS website.

**LAW 621. Sentencing, Corrections, and Criminal Justice Policy. 3 Units.**

This introductory course will familiarize students with the history, structure, and performance of America's sentencing and corrections system. Sentencing is the process by which criminal sanctions are imposed in individual cases following criminal convictions. Corrections deals with the implementation and evaluation of criminal sentences after they are handed down. In fact, the two subject areas are inseparable. The course will examine sentencing and corrections from global and historical views, from theoretical and policy perspectives, and with close attention to many problem-specific areas. We will explore sentencing theories and their application, the nature, scope and function of corrections, the impact of mass incarceration on crime and communities, the effectiveness of rehabilitation, the relationship between sanctions and crime, and the consequences of prisoner reentry. These topics will be considered as they play out in current political and policy debates. Guest lectures may include presentations by legal professionals, victims, offenders, and correctional leaders. We also plan to visit a correctional facility. This course is open to 1Ls, 2Ls, and 3Ls in the Law School. Special Instructions: Grades will be based on class participation, and either: (1) three reflection papers of 5 to 7 pages each, or (2) a longer research paper. After the term begins, students accepted into the course can transfer from section (01) into section (02) which meets the research (R) requirement, with consent of the instructor. Elements used in grading: Class participation, reflection papers or research paper. Cross-listed with Comparative Studies in Race & Ethnicity (CSRE 221) & Public Policy (PUBLPOL 221).

**LAW 622A. Environmental Law Clinic: Clinical Practice. 4 Units.**

Students enrolled in the Clinic provide legal assistance to national, regional and grassroots non-profit organizations on a variety of environmental issues, with a focus on complex natural resource conservation and biodiversity matters at the interface of law, science and policy. Working under the direct supervision of practicing environmental attorneys, Clinic students help screen new matters and potential clients; formulate strategies; research and develop factual and legal issues; and prosecute administrative and litigation proceedings. During the term, students may meet with clients, opposing counsel or agency decision-makers; review and prepare administrative records; develop expert testimony; draft comment letters, petitions, pleading or briefs; and/or attend and present arguments in administrative and court hearings. In regular one-on-one meetings with supervising faculty, there is a heavy emphasis on learning how to write persuasively and present oral arguments. Indeed, in any given quarter, our students typically prepare a mix of state and federal, and trial and appellate, court pleadings, and because all of our hearings during the academic year are conducted by students, many students also have the opportunity to present oral argument in front of one or more judges. In addition, students participate in a regular seminar where we examine strategic, ethical and substantive issues arising out of the Clinic's work. The Clinic is a particularly good place to learn how to conduct effective legal research, marshal facts in support of legal arguments, and, above all, write well. We practice at all levels of state and federal court and before many local, state and federal administrative agencies. Our work involves extensive motions practice and brief writing, and often involves administrative petitions and policy papers. Our work is inherently cross-disciplinary. No prior environmental experience or background is necessary, but an interest in learning about environmental and natural resources law is important. Special Instructions: General Structure of Clinical Courses -- The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students will be awarded three separate grades for their clinical quarter, each reflecting four credits. The three grades are broken into the following categories: clinical practice; clinical methods; and clinical coursework. Grading is pursuant to the H/P system. Enrollment in a clinic is binding; once selected into a clinic to which he or she has applied, a student may not later drop the course except in limited and exceptional cases. Requests for withdrawal are processed through the formal petition and clinical faculty review process described in the clinic policy document posted on the SLS website. Students may not enroll in any clinic (full-time or advanced) which would result in them earning more than 27 clinical credits during their

**LAW 622B. Environmental Law Clinic: Clinical Methods. 4 Units.**

Students enrolled in the Clinic provide legal assistance to national, regional and grassroots non-profit organizations on a variety of environmental issues, with a focus on complex natural resource conservation and biodiversity matters at the interface of law, science and policy. Working under the direct supervision of practicing environmental attorneys, Clinic students help screen new matters and potential clients; formulate strategies; research and develop factual and legal issues; and prosecute administrative and litigation proceedings. Students may not enroll in any clinic (full-time or advanced) which would result in them earning more than 27 clinical credits during their

**LAW 623. Advanced Environmental Law Clinic. 2-7 Units.**

The Advanced Environmental Law Clinic provides students who have already taken the Environmental Law Clinic the opportunity to continue intense individual project work. Advanced students often work on matters they worked on as full-time students, but they also have the chance to work on new matters and develop new skills. Advanced students work closely with supervising faculty on their designated projects and are expected to take increasing responsibility for managing their work and representing clients. In addition, advanced students often serve as mentors to less experienced full-time students and thereby receive training in basic team building and supervision. Advanced students may arrange to receive between two and seven credits. No student may receive more than 27 total clinical credits during the course of the student's law school career.

**LAW 625. Intellectual Property: Copyright Licensing, Principles, Law and Practice. 2 Units.**

This course will present a mix of three elements: (1) in-depth study, through reading assignments and lectures, of the US law governing copyright transactions (contract formalities and construction; recordation and title practice; termination of transfers); (2) copyright contract drafting and negotiation exercises (book publishing agreement; software license); (3) licensing policy in the context of mass license programs (the proposed Google Book settlement; orphan works legislation, proposed and enacted, in the US and abroad). Special Instructions: After the term begins, eight students accepted into IP: Copyright Licensing: Principles, Law and Practice may concurrently enroll in the Copyright Licensing Policy Practicum for an additional two units of credit with consent of the instructor. The Copyright Licensing Policy Practicum option will involve creating licensing structures for the automated licensing of photographic images as part of an ongoing Practicum project for the US Copyright Office. Elements used in grading: Class Participation, Written Assignments. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for submission deadline.

**LAW 626. Legislative Simulation: The Federal Budget. 3 Units.**

How does a bill really become a law? This course is about the formal and informal American legislative and budget process. The course is part lecture, part simulation. You will learn the formal processes that govern legislating and White House policymaking, including: how a President decides what policy to propose; Congressional committee markups; House and Senate floor debate, rules, and the amendment process; conference committees; and Presidential signatures and vetoes. You will then learn how legislative coalitions are built and broken, how and why bargaining occurs, the roles of interest groups and lobbyists, how an Executive Branch tries to influence Congress, how political parties and elections influence legislative behavior, and how the press and personalities influence all of the above. While this is primarily a class about policymaking process, we will learn enough about federal budget policy to make your participation in budget legislative simulations more effective. Can your class solve America's long-term budget problems when your counterparts in Washington have so far been ineffective at doing so? Elements used in grading: Class participation (for lectures and the simulations), attendance and written assignments (memos).

**LAW 628A. Oral Argument Workshop. 2 Units.**

Building on the skills developed in Federal Litigation, this simulation course will give students the unique opportunity to argue and judge pretrial motions from actual federal court cases. The instructor will provide the written briefs, and each week half the class will argue and half the class will judge a motion. Preparation will require reading the cases cited in the briefs and coming to class ready either to present an argument (attorneys) or interrogate counsel (judges). Students will critique each other both orally and in writing, and the instructor will provide oral critiques of all arguments. The goals of this class are: to train students to argue in court; to provide them with a chance to polish their public speaking skills and practice thinking on their feet; to prepare students to engage in challenging dialogue with both colleagues and future clients; and to improve self-confidence. Thus, while the context of the course is litigation, the objectives are much broader than the mastery of litigation technique. This course is not open to first year Law School students. Priority will be given to those students who commit to taking the class if given consent to enroll. Please indicate your commitment on the consent form. Elements used in grading: Class attendance, participation, and preparation. CONSENT APPLICATION: To apply for this course, students must complete and submit a Consent Application Form available on the SLS website (Click Courses at the bottom of the homepage and then click Consent of Instructor Forms) to the instructor. See Consent Application Form for submission deadline.

**LAW 629. Spanish for Lawyers. 3 Units.**

The Spanish for Lawyers course offers students the opportunity to enhance existing Spanish communication skills in legal practice. The course will emphasize speaking and listening comprehension through in-class presentations and dialogue. Students will also be assigned reading and writing exercises in Spanish. The course will introduce Spanish legal terminology in areas such as civil and human rights, and criminal, employment, housing and family law. Students will learn how to apply these language skills as future legal practitioners interacting with clients, colleagues and government and judicial officials who possess limited English proficiency in domestic and international contexts. Native or fluent guest lecturers will expose students to legal terminology, concepts and dialects from various Spanish-speaking countries. Student Eligibility: Students must already have basic proficiency in Spanish. The goal of the class is to strengthen existing Spanish language skills. The class is aimed at learning Spanish legal vocabulary and developing culturally competent communication skills. To verify basic Spanish proficiency, the instructor may seek to speak with students by phone prior to admitting them. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper. CONSENT APPLICATION: To apply for this course, students must complete and submit a Consent Application Form available on the SLS website (Click Courses at the bottom of the homepage and then click Consent of Instructor Forms) to the instructor. See Consent Application Form for submission deadline.

**LAW 632A. Religious Liberty Clinic: Practice. 4 Units.**

The Religious Liberty Clinic is the only clinic of its kind in the country. The landmark program offers participating students a full-time, first-chair experience representing a diverse group of clients in legal disputes arising from a wide range of beliefs, practices, and circumstances. Students learn in class and engage through reflective and supervised practice the laws, norms, and limits affecting the exercise of religious freedom in a pluralistic society. Students are expected to counsel individual or institutional clients and litigate on their behalf with excellence, professionalism, and maturity. In clinic, students typically handle an accommodation project - e.g., represent a prisoner, student, or employee facing obstacles in the exercise of faith - as well as a longer-term litigation or development matter - e.g., represent a small church, synagogue, or mosque with zoning issues, or an individual challenging state preferences for particular beliefs. Opportunities to draft amicus briefs also arise. The clinic involves agency, trial, and appellate practice - though time constraints may not permit each student to work in all areas - under the empowering supervision of faculty and staff. Students work in assigned case teams but are also encouraged to help develop new clients and matters. Special Instructions: General Structure of Clinical Courses -- The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students will be awarded three separate grades for their clinical quarter, each reflecting four credits. The three grades are broken into the following categories: clinical practice; clinical methods; and clinical coursework. Grading is pursuant to the H/P system. Enrollment in a clinic is binding; once selected into a clinic to which he or she has applied, a student may not later drop the course except in limited and exceptional cases. Requests for withdrawal are processed through the formal petition and clinical faculty review process described in the clinic policy document posted on the SLS website. Students may not enroll in any clinic (full-time or advanced) which would result in them earning more than 27 clinical credits during their law school career. The rules described here do not apply to advanced clinics for students who are continuing with a clinic in which they were previously enrolled. For information about advanced clinics, please see the course descriptions for those courses. For more information about clinic enrollment and operations, please see the clinic policy document posted on the SLS website. Elements used in grading: Clinical case/project work, clinical performance, seminar preparation and participation.

**LAW 632B. Religious Liberty Clinic: Clinical Methods. 4 Units.**

The Religious Liberty Clinic is the only clinic of its kind in the country. The landmark program offers participating students a full-time, first-chair experience representing a diverse group of clients in legal disputes arising from a wide range of beliefs, practices, and circumstances. Elements used in grading: Clinical case/project work, clinical performance, seminar preparation and participation.

**LAW 635. The Future of Labor Law & Policy. 2 Units.**

The course covers the current and past NLRB political crises, with particular focus upon rule making initiatives; union tactics and efforts to organize domestics, home care workers, agricultural and white collar workers, independent contractors and the problems peculiar to such; right-to-work legislation, particularly recent initiatives in Michigan and Indiana; the impact of recent Supreme Court and other decisions on union ability to participate in the political process; new legislation restricting public employee union activity, with particular focus on Wisconsin and union efforts to invoke the First Amendment; the First Amendment rights of free speech in the workplace in the public sector, and social media and free speech in the private sector; new and innovative dispute resolution procedures involving union recognition and discrimination issues as well as rights and interest arbitration and mediation; the globalization of labor disputes. Students will write a final paper. There are no prerequisites to this seminar, and students need not have had basic Labor Law to take it. This course prerequisite Sports Law. Students who complete this seminar will have preference for enrollment in Sports Law when it is next offered in 2014-15. This course is open to first year Law School students. Elements used in grading: Class participation and a final paper. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 637. Advanced Legal Writing: Intellectual Property Counseling. 3 Units.**

In this course, students will develop the research, writing, and analytical skills necessary to advise clients on complex intellectual property matters. This course is designed particularly for students interested in law firm IP practice or working in-house for companies in IP-rich industries, including software, pharmaceuticals, entertainment, news media, and consumer goods. Students will be provided realistic questions from clients in these industries that raise overlapping patent, copyright, and/or trademark issues. Students will conduct their own legal research and discuss potential options for addressing their clients' concerns, including litigation, negotiation, and technological solutions, as well as the strategic and ethical dimensions of each option. Based upon this research and class discussion, students will draft client memos, demand letters, and legal briefs. Students will also be instructed in IP-focused research and analysis, including searching and interpreting documents from PTO and Copyright Office databases. Although class time may be devoted to discussing the substantive legal issues raised in student assignments, previous enrollment in Introduction to Intellectual Property or substantial intellectual property coursework is strongly recommended. This course is open to LLM students in the Law, Science & Technology program. Elements used in grading: Class Participation, Attendance, Written Assignments. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for submission deadline.

**LAW 638. Mediation. 3 Units.**

In recent years, individuals and their lawyers have increasingly turned to mediation to resolve disputes. In mediation, the parties to the dispute, who may be represented by lawyers, are in charge of the outcome. With the assistance of a mediator they may be able to reach agreements at any stage in a dispute, in some cases avoiding litigation altogether, in other cases agreeing when the case is on appeal. This course will introduce you to the theory and practice of mediation. You will learn about the mediation process primarily by experiencing it in roleplay and hands-on exercises. The course also includes readings and discussions, brief lectures, demonstrations, student presentations, and videotapes. You will mediate disputes based on actual cases, and be coached in small groups by Bay Area mediators. The course goals are to understand the nature of conflict and principles of conflict management, to develop the communication skills essential to effective mediation, to evaluate various mediation models and mediator styles, to consider the policy and ethical implications of the expanding use of mediation, and to develop the skills necessary to represent clients in mediation. Elements used in grading: Class participation, attendance, assignments. CONSENT APPLICATION: To apply for this course, students must complete and submit a Consent Application Form available on the SLS website (Click Courses at the bottom of the homepage and then click Consent of Instructor Forms) to the instructor. See Consent Application Form for submission deadline.

**LAW 639. Lawyering and Social Intelligence. 3 Units.**

Building a successful legal career or practice involves both technical expertise as well as relational skills. Becoming a trusted advisor or effective advocate is essentially an interpersonal process that relies upon social and emotional skills, such as listening in ways that gain client trust and engagement or delivering tough messages in ways that reduce defensiveness and increase mutual problem solving. These skills can be learned. Unlike conceptual knowledge, they are acquired through practicing new behaviors that expand skills or undo old habits. Adult learning is strengthened through experiencing the concept in action, reflecting upon the experience and practicing it. I will construct such exercises for use in class as well as in workgroups outside of class. This course will introduce students to simple frameworks that raise awareness and understanding of social intelligence and expose them to a process of learning they can employ in their everyday interactions for continued growth and development. Special Instructions: This course develops student skills and not simply conceptual knowledge. Learning will come from consistent class attendance and a willingness to participate actively - not only in occasional role plays but primarily as one's self, practicing new behaviors that build skill sets. Written assignments will be brief weekly reflections on personal learning. Since I will establish workgroups following the first day of class, all students who are interested in taking this course (whether enrolled or on the wait-list) need to be present for the first class. (Students who are not present will be dropped from the class or waiting list unless they have made previous arrangements with the professor.) Add-drop decisions need to be made at the conclusion of the first class; no drops will be permitted thereafter as learning will depend upon intact workgroups throughout the quarter. Once you commit to the class, you must complete it or receive a failing grade. Exceptions to this rule will be made by petition only. Elements used in grading: Class participation, attendance, written assignments.

**LAW 640A. Community Law Clinic: Clinical Practice. 4 Units.**

The CLC is the closest thing to a general legal services office among Stanford's clinical offerings. Based in East Palo Alto, the CLC provides students with the opportunity to provide direct legal services to low-income residents, while thinking critically about the role of lawyers and lawyering in addressing the problems of America's so-called "working poor." The Clinic's practice is in four areas: (1) housing (eviction defense and Section 8 termination); (2) wage and hour and related workers' rights; (3) social security and disability benefits; and (4) criminal record expungement. Each student handles his or her own caseload, which is comprised of cases matters in all of the practice areas. The practice areas are selected and designed to lie at the intersection where the community's unmet legal needs and students' learning needs correspond. The clinic's docket is fundamentally a trial docket. Students have first-chair responsibility for their cases, and perform all of the lawyering tasks necessary to advance their clients' interests, including interviewing, counseling, negotiation, fact investigation, legal research, and representation in the court and agency settings that hear the clients' cases. Skills emphasized include those trial lawyering skills, as well as time management and developing client-centered lawyering practices. Students may also have the chance to participate in outreach or policy-level projects, such as representing the clinic on a state or regional committee on a substantive issue, doing community education workshops at sites around the Peninsula, and/or legislative research and advocacy. In the clinic seminar and in regular supervision, students are encouraged to interrogate the effectiveness of the legal system at delivering "justice" for their clients and to explore creative ways that legal knowledge can be deployed to attack the social problems attendant to low wages, substandard and unstable housing, and other features of low-income life in Silicon Valley. Special Instructions: General Structure of Clinical Courses – The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. Students may not enroll in any clinic (full-time or advanced) which would result in them earning more than 27 clinical credits during their

**LAW 641. Constitutional Litigation. 3 Units.**

This is a course in advanced and applied constitutional law. It focuses on one of the central ways in which constitutional claims are actually litigated: in lawsuits against public officials and local governments. The bulk of the course looks at litigation under 42 U.S.C. § 1983. We will consider topics such as what it means to act "under color of state law;" absolute and qualified immunities; government liability for the acts of individual officials; remedies for constitutional violations, including monetary and injunctive relief; structural reform litigation; and the remedial issue nearest and dearest to many lawyers' hearts: attorney's fees awards. This course is particularly useful for students who plan to clerk in Federal courts, as much of their dockets involves §1983 litigation. This course complements Federal Courts (Law 283) and students who plan to clerk will benefit from taking both courses. Elements used in grading: Participation, Attendance, Exam.

**LAW 642. Advanced Community Law Clinic. 2-7 Units.**

The Advanced Community Law Clinic offers law students who already have some significant civil clinical experience the opportunity to work under supervision on more advanced projects and cases being handled by the Stanford Community Law Clinic, including litigation and other matters. Advanced Clinic students will also work with Clinical Supervising Attorneys to provide direction and guidance to those enrolled in the Community Law Clinic for the first time, in areas in which Advanced Clinic students have already acquired some expertise. In addition, Advanced Clinic students may function as team leaders on larger projects in which the Clinic is engaged. Advanced students may arrange with the instructor to receive between two and seven units. No student may receive more than 27 overall clinical credits, however, during the course of the student's law school career. Special Instructions: Completion of the Community Law Clinic (Law 640) or its equivalent is a prerequisite for the advanced clinic. Elements used in grading: Participation, reflective paper and project.

**LAW 643. Medical-Legal Issues in Children's Health. 4 Units.**

(Same as PEDS211) This service-learning seminar is open to law and medical students interested in exploring the link between poverty and children's health, and how the professions can work together to improve health outcomes for low-income children. The course consists of four components: (1) weekly class meetings in which we will discuss a series of medical-legal issues (e.g., asthma, immigration, health insurance, etc.) with guest lecturers from the medical and legal fields, selected for their expertise on each topic.; (2) intake interviews with patient families at Lucile Packard Children's Hospital or the Ravenswood Family Health Center in East Palo Alto, and an analysis of their medical-legal issues; (3) a group project focused on a local or state-level medical-legal policy issue (e.g., obesity prevention); and (4) a final paper that law and medical students will co-write in pairs. The course is linked to the Peninsula Family Advocacy Program. You can learn more about it at [www.peninsulafap.org](http://www.peninsulafap.org).

**LAW 644. Disability: Law, Human Rights and Justice. 3 Units.**

This is a survey course of disability rights law, with an emphasis on federal and state statutes and case law, and some exposure to international human rights law and the contemporary concept of "disability justice." Areas of concentration are employment, government services, public accommodations, education, housing, mental health treatment and involuntary commitment, and personal autonomy. We will review such statutes as the Americans with Disabilities Act (ADA), Rehabilitation Act (Sec. 504), Individuals with Disabilities Education Act (IDEA), Fair Housing Act Amendments, California Developmental Services ("Lanterman") Act and the UN Convention on the Rights of Persons with Disabilities. The course examines disability from a civil and human rights perspective and has a "cross-disability" orientation insofar as it addresses the legal interests of persons with mobility and communication impairments, as well as intellectual and psycho-social disabilities. Exploration of the legal doctrine will be complemented with practical skills exercises and presentations by guest speakers. Special Instructions: Grades will be based on class participation and (1) short reflection essays on the readings and a short research paper for Writing (W) credit or (2) a long independent research paper for Research (R) credit. The student must consult with the instructor on the paper's topic, scope and format. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class participation (40%), short reflection essays and short research paper (60%) or a long independent research paper (60%). Writing (W) credit is for students entering prior to Autumn 2012. --- NOTE: The first class meets on Sept. 24, Erev Rosh Hashonah (Eve of Jewish New Year). If you are unable to attend, the instructor will provide an accommodation to ensure that you are not disadvantaged. Please contact him before Sept. 17 at 510.387.3956.

**LAW 645. Reading The Constitution. 2 Units.**

This seminar is devoted to a careful reading of the entire text of the U.S. Constitution, from the Preamble to the 27th Amendment. From "We the People," through the structure of government, to the Bill of Rights, the Reconstruction amendments, and Progressive and Modern Era Amendments, the text of the Constitution tells an overall story about America's supreme law that is rich, intricate, and surprising, yet too often neglected, even in law school. In addition to the text itself, we will consult historical materials from the drafting and ratification of the parts under consideration each week. And throughout the seminar, we will occasionally step back to consider and assess various classic statements by scholars, judges, and presidents about how to best read the Constitution. The goal of the course is the title of the course: to read the Constitution with attentive and open eyes; to become familiar with its text, even the parts that are rarely litigated; to learn some of the history of its creation, even the stories that do not fill amicus briefs; to consider how the different clauses and sections may relate to each other; and to examine several different methods of reading the Constitution as a whole. Elements used in grading: Class Participation, Written Assignments, Final Paper.

**LAW 649A. Cyberlaw/Fair Use Clinic: Advanced. 4 Units.**

This is a hands-on, project-oriented seminar, in which students work on a wide range of cyberlaw projects with lawyers from the Center for Internet and Society's Fair Use Project and with lawyers from the Electronic Frontier Foundation. There are significant faculty-student interactions through meetings to discuss the projects and an associated bi-monthly discussion seminar covering advanced cyberlaw topics. This clinical program provides law students with the opportunity to represent clients in cutting-edge issues of intellectual property and technology law, in the public interest. Through the hands-on experience of representing clients (under the supervision of the faculty) in various fora, students learn professional responsibility and advocacy skills, substantive law and procedural rules related to their projects, and examine the concept of the public interest in intellectual property and technology law. Clients vary widely, and may be individual artists; technologists; non-profit institutions; coalitions; etc. In the past, students have drafted amicus briefs, counseled nonprofits on public-interest initiatives, created a patent licensing scheme, represented independent and documentary filmmakers who are pursuing legislation in Congress, and counseled artists developing new technology-based art forms, among other projects. Thus, the skills each student learns also vary according to project. The classroom component explores public interest practice in tech law in various fora, and spends significant time on student projects.

**LAW 649B. Cyberlaw/Fair Use Clinic: Advanced. 3 Units.**

This is a hands-on, project-oriented seminar, in which students work on a wide range of cyberlaw projects with lawyers from the Center for Internet and Society's Fair Use Project and with lawyers from the Electronic Frontier Foundation. There are significant faculty-student interactions through meetings to discuss the projects and an associated bi-monthly discussion seminar covering advanced cyberlaw topics. This clinical program provides law students with the opportunity to represent clients in cutting-edge issues of intellectual property and technology law, in the public interest. Through the hands-on experience of representing clients (under the supervision of the faculty) in various fora, students learn professional responsibility and advocacy skills, substantive law and procedural rules related to their projects, and examine the concept of the public interest in intellectual property and technology law. Clients vary widely, and may be individual artists; technologists; non-profit institutions; coalitions; etc. In the past, students have drafted amicus briefs, counseled nonprofits on public-interest initiatives, created a patent licensing scheme, represented independent and documentary filmmakers who are pursuing legislation in Congress, and counseled artists developing new technology-based art forms, among other projects. Thus, the skills each student learns also vary according to project. The classroom component explores public interest practice in tech law in various fora, and spends significant time on student projects. After completing the initial 7-unit Cyberlaw/Fair Use Clinic: Advanced course, students may enroll again for either 3 or 4 credits by consent of the instructor.

**LAW 650. Advanced Negotiation: Public Policy. 3 Units.**

Advanced Negotiation courses are designed to take students beyond the two-party, lawyer-client negotiations that were the focus of the Negotiation Seminar, to examine many facets of negotiation complexity, both in terms of the participants and topics. This section of Advanced Negotiation will focus on multi-party negotiations, working in teams, group decision-making, and negotiating on behalf of organizations to solve complex problems. We will study negotiations and stakeholder dialogue processes involving a diverse set of public and private actors. In the context of both real and simulated case studies, we will address diverse public policy issues, both domestic (including civil rights, racial justice, economic inequality and natural resources management) and international (negotiating bilateral and multilateral agreements, including global security environmental treaties). The goals of the class are twofold, for students (1) to acquire an added theoretical base beyond what was covered in the Negotiation Seminar through which to analyze, prepare for, participate in and facilitate more complex, multiparty negotiations, and (2) to expand skills through deeper examination of various actual negotiation cases and complex simulations. Special Instructions: Attendance at and participation in the simulations is required. Passing is dependent upon active participation, submission of several assigned short reflection papers, and completion of a substantial group paper and presentation analyzing a selected case (a completed or ongoing multi-party public policy dialogue) and the team's internal negotiation process. Prerequisite: Negotiation Seminar (Law 615) or its substantial equivalent. Advanced degree students (and graduate students in other departments and programs) are encouraged to enroll provided that they have previous negotiation training or equivalent practice experience. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Students approved for "R" credit will be graded on the H/P/R/F system. Elements used in grading: Class participation and engagement, including simulations; attendance; preparation for and contributions to discussion; short written assignments; final project involving group and individual components.

**LAW 652. Animal Law. 2 Units.**

This course presents a survey of the historical and current status of this rapidly developing specialty. In brief, animal law encompasses all areas of the law in which the nature – legal, social or biological – of nonhuman animals is an important factor. It is an objective and logical specialization of a challenging area – one with a growing number of cases and laws, increasing public and practical interest, and significantly different historical, legal and philosophical foundations than most other courses. Topics covered include animal cruelty, animals as property, tort claims regarding animals, farm animals, animals in entertainment, and federal issues regarding animals. The Animal Law course has been described as intellectually stimulating and ethically challenging, and synthesizes a wide range of legal concepts, and the course materials apply traditional ideas to animals in new ways. Students have called it a great bar review class, because concepts from many areas of law are covered with respect to their application to animals and their interests. More and more firms, large and small, are providing pro bono (and paying) work in the animal law area, as the field gains momentum and reputability in the legal community. Mr. Wagman is a partner at Schiff Hardin in San Francisco, with a full-time animal law practice, representing organizations and individuals in a wide range of cases. He is one of the authors of the Animal Law casebook, and has been practicing animal law for most of his 23-year career. His practice includes litigation, consultation, legislative work, and extensive writing and lecturing on various animal law topics. The class includes regular updates on his current cases, as well as real-life experiences from the front lines of the animal law frontier. Special Instructions: Students have the option to write an independent research paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Final exam or 18 page independent research paper.

**LAW 653. Corporate Law: Theory and Practice. 2 Units.**

This class will bring leading academics and members of the corporate bar, business and investment communities, judges and regulators to the law school to discuss new research, as well as new practice and regulatory issues. The idea is to engage students in the theoretical and policy debates and to understand how these concerns affect business and the practice of law.

**LAW 654. Law and Biosciences Workshop. 1 Unit.**

This workshop seminar will provide students with the opportunity to examine and critique cutting-edge research and work in the field of law and the biosciences presented by different speakers from Stanford and elsewhere. Although it is open to all students, the seminar is designed especially for those with an interest in the field who wish to stay abreast of current issues, work, and ideas. In each class, an academic expert, policy maker, or practitioner will present his or her current research or work and engage in a robust discussion. A second version of the class will held in winter quarter that will also be worth one unit; students may take both the fall and winter classes. This class will meet four times for two hours, 15 minutes during each of the fall and winter terms. This class is open to first-year Law School students in the winter term. Elements used in grading: Class participation, attendance, written assignments and final paper.

**LAW 656. International Conflict Resolution. 3 Units.**

This seminar examines the challenges of managing and resolving violent inter-group and international conflicts. Employing an interdisciplinary approach drawing on social psychology, political science, game theory, and international law, the course identifies various tactical, psychological, and structural barriers that can impede the achievement of efficient solutions to conflicts. We will explore a conceptual framework for conflict management and resolution that draws not only on theoretical insights, but also builds on historical examples and practical experience in the realm of conflict resolution. This approach focuses on the following questions: (1) how can the parties to conflict develop a vision of a mutually bearable shared future; (2) how can parties develop trust in the enemy; (3) how can each side be persuaded, as part of a negotiated settlement, to accept losses that it will find very painful; and (4) how do we overcome the perceptions of injustice that each side are likely to have towards any compromise solution? Among the conceptual issues we will examine include the problem of spoilers who seek to sabotage agreements, the role of mediators, the role international legal rules can play in facilitating or impeding conflict resolution, and the advantages and disadvantages of unilateral versus and reciprocal measures in advancing conflict resolution efforts. Particular conflicts we will explore include the Northern Ireland conflict, the Israeli-Palestinian conflict, and the U.S.-Soviet Cold War rivalry.  
Special Instructions: Total enrollment in this course will be limited to 20. Initial Law student enrollment will be limited to 10. International Policy Studies students will be given priority to enroll in this course. The remaining spaces will be filled (and the number of Law School students to be admitted will be determined) after the first class. Students may not add this class after the first class without the consent of the instructor.  
This course is cross-listed with the International Policy Studies and Psychology Departments (Same as IPS 250 and PSYCH 383).  
Special Instructions: Section 01: Grades will be based on class presentation, short presentation paper, class participation, and final paper. Section 02: Five students will have the option, to write an independent research paper for Research (R) credit, with consent of the instructor, in lieu of the final paper for section 01.  
Other course requirements -- class presentation, short presentation paper and class participation.  
Elements used in grading: Class presentation, short presentation paper, class participation, and final paper.  
This course is open to first-year Law School students.

**LAW 658A. International Human Rights and Conflict Resolution Clinic: Clinical Practice. 4 Units.**

In the past half-century, human rights advocates have transformed a marginal utopian ideal into a central element of global discourse, if not practice. This course examines the actors and organizations behind this remarkable development, as well as the vast challenges faced by advocates in the recent past and today. Increasingly, human rights as a framework has become essential to a broad range of situations of tension and conflict. This course interrogates the nature of engagement by human rights practitioners, as well as approaches adopted by those focused on the management of violent conflict. What are the origins of the human rights movement and where is it headed? What does it mean to be a human rights activist? What are the main challenges and dilemmas facing those engaged in rights promotion and defense? How is conflict resolution consistent with human rights advocacy? When and where are these approaches in tension? The course also develops advocacy skills through in-class sessions, role play exercises and engagement in, and critical assessment of clinical projects in human rights. Class sessions introduce students to human rights advocacy and conflict management techniques through discussion of the readings and related issues, as well as through student presentations critiquing their participation in supervised clinical projects. The readings and seminar sessions expose students to some of the practical manifestations of the main debates and dilemmas within the human rights and conflict resolution movement(s). These include several of the ethical and strategic issues that arise in the course of doing fact-finding and advocacy and balancing the often differing agendas of western international nongovernmental organizations (INGOs) and their counterparts in the (frequently non-western) developing world. The readings also consider tensions within the field of conflict resolution, as well as between conflict resolution and human rights. Several class sessions will focus on fact-finding and advocacy skills. One or more of these sessions will be full-day, role play exercises. In these full-day sessions, students will engage in human rights research, documentation, negotiation and dispute management exercises, and advocacy role-playing. In some sessions, part of the class will be devoted to presentations by students and clinical 'rounds'. These presentations will consider one or more issues that arise in the course of students' own engagement in advocacy projects through the International Human Rights and Conflict Resolution Clinic. During the course of the quarter, students will also be required to draft several brief fact-finding/advocacy pieces (these will be explained in class), and write short, critical reflection papers (2-4 pages, double-spaced, or 500-1,000 words, thought pieces) on the readings. Special Instructions: -- General Structure of Clinical Courses. The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third,

**LAW 658B. International Human Rights and Conflict Resolution Clinic: Clinical Methods. 4 Units.**

In the past half-century, human rights advocates have transformed a marginal utopian ideal into a central element of global discourse, if not practice. **LAW 659. Advanced Negotiation: Transactions. 3 Units.**

Complex and multi-party negotiations permeate law, business and life. Advanced Negotiation is designed to take students beyond the two-party, lawyer-client negotiations that were the focus of the Negotiation Seminar. Advanced Negotiation: Transactions will focus on more complex negotiations, multi-party negotiations, working in teams, and negotiating on behalf of complex organizations, e.g., governments, corporations, NGOs, and unions. Simulations will include critical-path material supply agreements, cross-cultural joint ventures, airline reorganizations, big pharma workouts and big oil exploration negotiations. The goals of the class include: (1) acquisition of new theoretical bases beyond what was covered in the Negotiation Seminar, in order to better inform analysis in preparation for negotiations, and (2) to expanding skills through deeper examination of scenarios and far more challenging simulations. Special Instructions: Attendance at and participation in the simulations is required. Passing is dependent upon active participation, a series of short papers and in-class presentation. Prerequisite: Negotiation Seminar (Law 615) or its substantial equivalent, as assessed by the instructor. Elements used in grading: Attendance, participation, in-class negotiations and out-of-class preparation, and short papers.

**LAW 660A. Youth and Education Law Project: Clinical Practice. 4 Units.**

The Youth and Education Advocacy Clinic offers students the opportunity to participate in a wide variety of educational rights and reform work, including direct representation of youth and families in special education and school discipline matters, community outreach and education, school reform litigation, and/or strategic policy research and consulting. All students will have an opportunity to represent elementary and high school students with disabilities in special education proceedings, to represent students in school discipline proceedings, or to work with community groups in advocating for the provision of better and more equitable educational opportunities to their children. Students working on special education matters will have the opportunity to handle all aspects of their clients' cases. Students working in this area will interview and counsel clients, investigate and develop facts, work with medical and mental health professionals and experts, conduct legal and educational research, create case plans, and represent clients at individual education program (IEP) team meetings, mediation or special education due process hearings. This work will offer students a chance to study the relationship between individual special education advocacy and system-wide reform efforts such as impact litigation. Students working on school discipline matters will interview and counsel clients, investigate and develop facts, interview witnesses, conduct legal and educational research, create case plan, and represent clients at school discipline hearings such as expulsion hearings. Such hearings provide the opportunity to present oral and written argument, examine witnesses, and present evidence before a hearing officer. If appropriate and necessary, such proceedings also present the opportunity to represent students on appeal before the school district board of trustees or the county board of education. Students may also have the opportunity to participate in complex school reform litigation, including the monitoring and enforcement of a consent decree and corrective action plan in an ongoing special education lawsuit or appellate and trial work in a pathbreaking educational finance reform litigation. Finally, students who are interested in strategic policy research and management consulting on behalf of public education institutional clients (school districts, charter schools, state education agencies) will have the opportunity to participate in the multi-disciplinary collaboration with Consortium for Public Research and Leadership (CPRL). Through the CPRL, students will work with Stanford Graduate School of Education and Graduate School of Business students to pursue research and consulting for clients on topics such as accountability, community outreach, and school climate. Moreover, students who pursue this work will do so in a broader cooperative arrangement through CPRL with other professional students from, e.g., Columbia University, New York University, Harvard University, Yale University and the University of Michigan. The education clinic includes a one-week intensive training program held at the beginning of the quarter, weekly seminars that focus on legal skills and issues in law and education policy, regular case review, and a many opportunities for feedback and reflection with the instructors. Admission is by consent of instructor. Special Instructions: General Structure of Clinical Courses - - The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. - - Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. - - Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. - - The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters

**LAW 660B. Youth and Education Law Project: Clinical Methods. 4 Units.**

The Youth and Education Advocacy Clinic offers students the opportunity to participate in a wide variety of educational rights and reform work, including direct representation of youth and families in special education and school discipline matters, community outreach and education, school reform litigation, and/or strategic policy research and consulting. All students will have an opportunity to represent elementary and high school students with disabilities in special education proceedings, to represent students in school discipline proceedings, or to work with community groups in advocating for the provision of better and more equitable educational opportunities to their children. Students working on special education matters will have the opportunity to handle all aspects of their clients' cases. Students working in this area will interview and counsel clients, investigate and develop facts, work with medical and mental health professionals and experts, conduct legal and educational research, create case plans, and represent clients at individual education program (IEP) team meetings, mediation or special education due process hearings. This work will offer students a chance to study the relationship between individual special education advocacy and system-wide reform efforts such as impact litigation. Students working on school discipline matters will interview and counsel clients, investigate and develop facts, interview witnesses, conduct legal and educational research, create case plan, and represent clients at school discipline hearings such as expulsion hearings. Such hearings provide the opportunity to present oral and written argument, examine witnesses, and present evidence before a hearing officer. If appropriate and necessary, such proceedings also present the opportunity to represent students on appeal before the school district board of trustees or the county board of education. Students may also have the opportunity to participate in complex school reform litigation, including the monitoring and enforcement of a consent decree and corrective action plan in an ongoing special education lawsuit or appellate and trial work in a pathbreaking educational finance reform litigation. Finally, students who are interested in strategic policy research and management consulting on behalf of public education institutional clients (school districts, charter schools, state education agencies) will have the opportunity to participate in the multi-disciplinary collaboration with Consortium for Public Research and Leadership (CPRL). Through the CPRL, students will work with Stanford Graduate School of Education and Graduate School of Business students to pursue research and consulting for clients on topics such as accountability, community outreach, and school climate. Moreover, students who pursue this work will do so in a broader cooperative arrangement through CPRL with other professional students from, e.g., Columbia University, New York University, Harvard University, Yale University and the University of Michigan. The education clinic includes a one-week intensive training program held at the beginning of the quarter, weekly seminars that focus on legal skills and issues in law and education policy, regular case review, and a many opportunities for feedback and reflection with the instructors. Admission is by consent of instructor. Special Instructions: General Structure of Clinical Courses -- The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. -- Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. -- Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. -- The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters

**LAW 660C. Youth and Education Law Project: Clinical Coursework. 4 Units.**

The Youth and Education Advocacy Clinic offers students the opportunity to participate in a wide variety of educational rights and reform work, including direct representation of youth and families in special education and school discipline matters, community outreach and education, school reform litigation, and/or strategic policy research and consulting. All students will have an opportunity to represent elementary and high school students with disabilities in special education proceedings, to represent students in school discipline proceedings, or to work with community groups in advocating for the provision of better and more equitable educational opportunities to their children. Students working on special education matters will have the opportunity to handle all aspects of their clients' cases. Students working in this area will interview and counsel clients, investigate and develop facts, work with medical and mental health professionals and experts, conduct legal and educational research, create case plans, and represent clients at individual education program (IEP) team meetings, mediation or special education due process hearings. This work will offer students a chance to study the relationship between individual special education advocacy and system-wide reform efforts such as impact litigation. Students working on school discipline matters will interview and counsel clients, investigate and develop facts, interview witnesses, conduct legal and educational research, create case plan, and represent clients at school discipline hearings such as expulsion hearings. Such hearings provide the opportunity to present oral and written argument, examine witnesses, and present evidence before a hearing officer. If appropriate and necessary, such proceedings also present the opportunity to represent students on appeal before the school district board of trustees or the county board of education. Students may also have the opportunity to participate in complex school reform litigation, including the monitoring and enforcement of a consent decree and corrective action plan in an ongoing special education lawsuit or appellate and trial work in a pathbreaking educational finance reform litigation. Finally, students who are interested in strategic policy research and management consulting on behalf of public education institutional clients (school districts, charter schools, state education agencies) will have the opportunity to participate in the multi-disciplinary collaboration with Consortium for Public Research and Leadership (CPRL). Through the CPRL, students will work with Stanford Graduate School of Education and Graduate School of Business students to pursue research and consulting for clients on topics such as accountability, community outreach, and school climate. Moreover, students who pursue this work will do so in a broader cooperative arrangement through CPRL with other professional students from, e.g., Columbia University, New York University, Harvard University, Yale University and the University of Michigan. The education clinic includes a one-week intensive training program held at the beginning of the quarter, weekly seminars that focus on legal skills and issues in law and education policy, regular case review, and a many opportunities for feedback and reflection with the instructors. Admission is by consent of instructor. Special Instructions: General Structure of Clinical Courses -- The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. -- Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. -- The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys,

**LAW 661. Advanced Negotiation: International. 3 Units.**

Building on skills developed, tools acquired and theory learned in the basic Negotiation Seminar, this advanced seminar explores how lawyers, diplomats, NGOs and citizen advocates can successfully negotiate agreements in the public international field with a special focus on processes not clearly governed by a legal or diplomatic framework or connected to an enforcement body. The goal of this course will be to help students learn how to 1) critically evaluate and 2) organize and participate in these kinds of processes, with special attention to what their role as lawyers or legal advisors can be in such contexts. The course will incorporate scenarios, case studies, and simulations in the following areas: > Track 2 processes > Governance/civil society engagement (particularly regarding resource management, transparency and accountability, extractive industries) > Transitional justice (including reparations, truth-telling, reconciliation efforts, victim-perpetrator dialogue, restorative justice) > Peace processes, peace treaty development > Security sector reform > DDR (disarmament, demobilization and reintegration of armed groups). Prerequisite: Negotiation Seminar (LAW 615), its substantial academic equivalent, or substantial experience in the field. SPILS students are especially encouraged to enroll. This course is also open to cross-registration by graduate students in a variety of departments and programs including International Policy Studies, provided that they have had sufficient prior background in negotiation. Elements used in grading: The seminar requires that students do the required reading, actively participate in class and simulations, make a team presentation analyzing a case study in international negotiation process, and to submit occasional short writing assignments. CONSENT APPLICATION: To apply for this course, students must complete and submit the Consent Form available on the SLS website (Click Courses at the bottom of the homepage and then click Consent of Instructor Forms).

**LAW 662. Advanced Youth and Education Advocacy Clinic. 2-7 Units.**

The Youth and Education Advocacy Advanced Clinic provides an opportunity for students who have already successfully completed the Education Advocacy Clinic to continue their advocacy work in the Clinic and/or to pursue a discrete project related to educational equity advocacy. Examples of projects include strategic policy research and management consulting for public education institutions on specific topics (e.g., accountability programs, community outreach and engagement, school climate); investigation and preparation for impact litigation; and community education and outreach on a specific education-related issue. All projects will be jointly designed by the instructor and the advanced student. Advanced students will also continue to participate in the Clinic's discussion of cases during case rounds. Special instructions: Admission is by consent of instructor. Advanced students may arrange with the instructor to receive between two and seven units. No student may receive more than 27 overall clinical credits, however, during the course of the student's law school career. Elements used in grading: Projects and class participation.

**LAW 663. Advanced International Human Rights and Conflict Resolution Clinic. 2-7 Units.**

The International Human Rights and Conflict Resolution Advanced Clinic offers the opportunity for students who have already successfully completed an International Human Rights and Development Clinic to pursue one or more specific projects in conjunction with the Clinic, either independently or in collaboration with colleague(s) enrolled in the regular clinic. Any travel will be strictly contingent on the Advanced Clinical student's availability and the needs of the project. Advanced Clinical students are expected to participate in as much of the regular clinical seminar and seminar simulations as possible given pre-existing scheduling constraints. Advanced students may arrange with the instructor to receive between two and seven units. No student may receive more than 27 overall clinical credits, however, during the course of the student's law school career. Elements used in grading: Project work, writing assignments, case preparation, attendance and class participation.

**LAW 664. Advanced Legal Writing: Business Transactions. 3 Units.**

This course offers students practical preparation in the skills needed to be a great transactional lawyer. Students will learn to draft clear, effective, plain language contracts and to draft and analyze other transactional writings used to manage complex business transactions. The course provides a wide range of realistic drafting problems and interactive lectures. Through them students will (i) develop sensitivity to the expectations of their clients and other attorneys, (ii) sharpen their analytical skills in the context of contracts, and (iii) learn specialized research tools related to contract provisions. The class will appeal to students interested in working in a law firm and practicing transactional law (of any type) and those interested in business litigation who would like to gain an understanding of contract provisions. SPECIAL INSTRUCTIONS: Students on the waitlist for the course will be admitted if spots are available on the basis of priority and Degree of Study. Early drop deadline: Students may not drop this course after first week of class. Corporations (Law 242) is a prerequisite for all but LLM (CGP) students. Elements used in grading: Class participation, attendance, written assignments, and final paper.

**LAW 665. Advanced Legal Writing: Legislative Drafting and Analysis. 2 Units.**

This course offers practical preparation in how to draft and analyze federal legislation. The course is designed to give students realistic legislative drafting problems and an opportunity to research the legislative process of an enacted law of their choosing. Through these drafting assignments and study, students will learn in detail the dynamic and fascinating political process of how laws are enacted in the United States and how to draft effectively within such a process. Students will gain unique, foundational tools and skills necessary to draft effective, clear legislation and to analyze and interpret laws of any kind. Elements used in grading: Class participation, attendance, written assignments and final paper.

**LAW 668. Legal Technology and Informatics. 2-3 Units.**

Legal technology is rapidly transforming both the practice and nature of law. This class seeks to explore both the current trends and the future possibilities of this transformation, as we begin to train the future generation of technology savvy lawyers, and technologists who understand the intricacies and potential of what the law could be. Legal informatics could be defined as a computational perspective of law: where does legal information reside, how is it manipulated, and which algorithms and data structures are used in various legal functions? Note that there are no prerequisites for this class beyond an interest in the subject. There are numerous examples of technologically driven legal transformation. Case law search has moved from hard copy to closed digital systems such as Westlaw and LexisNexis, and into free cloud-based systems such as Google Scholar and Wikipedia. More and more statutes are available online. Changes can be seen in e-discovery, privacy, the delivery of (online) legal services, and the budding legal technology startup community. As a result, questions arise as to the proper statutory and ethical boundaries between humans and machines in implementing legal activities. Beyond the current and near-term technologies, however, are core academic and philosophical questions that will have increasing import as machines gain in sophistication and capability. For example, although the law differentiates between the responsibility assignable to minors compared to adults, we are far from identifying the point at which an agent or robot is morally responsible for its own actions, as opposed to the responsibility being assigned to its creator.

**LAW 669. Narrative Skills and the Law. 3 Units.**

A lawyer who communicates not only in a cerebrally persuasive way, but also in an emotionally gripping way, has an enormous strategic advantage. Judges, jurors, and clients are all human beings, susceptible to compelling stories like everyone else. This course - conducted by a television and film writer who is also a lawyer with experience in all three branches of government, private practice, political campaigns, and a labor union - teaches how to compose an engaging story and how to apply those skills to a variety of legal situations. The first part of the course will cover the art of storytelling on both a theoretical and a practical track. On the theoretical track, students will study story drive; narrative structure; beginnings, middles, and ends; openings; plot and character; exposition; and transitions. The class will have a healthy amount of assigned reading and viewing that illustrate each of these components in literature, drama, and film. On the practical track, students will undertake writing exercises that parallel the theoretical discussion, to develop a first-hand facility with those facets of storytelling. In the second part of the course, students will apply their storytelling insights and skills to specific legal situations: A criminal case. An appellate case. A legislative proposal. A labor negotiation. A public relations crisis. Students will discuss in depth their narrative approaches to these situations, along with those taken by lawyers in other cases in the respective areas. By the end of the course students will have a powerful tool few of their peers will possess, and be able to approach their day-to-day professional challenges in a more effective and confident way.

**LAW 670. White Collar Crime. 3 Units.**

This course explores the law of economic and political crimes associated with the rubric "white collar crime." The class is divided thematically between mens rea issues and substantive issues. Among the substantive areas which are covered are: obstruction of justice, perjury, bribery and gratuities, mail and wire fraud, securities fraud, and money laundering. We will study specific federal statutes in considerable detail, while also speculating about the jurisprudence underlying these crimes, and related issues of prosecutorial discretion and attorney ethics. Special instructions: Students may write a paper in lieu of the final exam for Research credit. Also, classroom participation may be taken into account to some very small degree. After the term begins, students accepted into the course can transfer from section (01) into section (02) which meets the R requirement, with consent of the instructor. Elements used in grading: Class participation and final exam or paper.

**LAW 671. Critical Theory. 3 Units.**

This course will review the most important developments in critical theory as it relates to law and jurisprudence. It will begin with a brief review of the critical tradition in Western philosophy including thinkers such as Friedrich Nietzsche, Karl Marx, Max Weber, Jean Paul Sartre and Michel Foucault. We will then look at the influence of this critical tradition in American legal theory, tracing the critical turn through the American legal realists, Critical Legal Studies and the emergence of identity based critical movements such as Critical Race Theory, Critical Feminist Theory and Critical Approaches to Sexual Orientation. The class will conclude by examining the theories of Giorgio Agamben, Jacques Rancière, and Niklas Luhmann and considering their possible legal implications. Special Instructions: Students have the option to write an independent research paper for Research credit. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class participation and final paper.

**LAW 672. Ending Wars: A Just Peace or Just a Peace. 2 Units.**

Much of just war theory focuses on the justifications for resorting to armed force and the conduct of hostilities. But what are the ethical and legal principles that govern ending wars and making peace? This course will explore the theory of "just peace," including such problems as when a party to war may demand the unconditional surrender of its adversary and what kinds of compromises are ethically permissible in order to end - or to avoid - armed conflict. We will also consider the terms and practices the winning party in war may impose on the loser, such as reparations and occupation (particularly transformative occupation). In addition, we will examine the topic of transitional justice, including issues related to amnesty, forgiveness, criminal and other forms of accountability, and reconciliation. Elements used in grading: Class Participation, Written Assignments, Final Exam. Cross-listed with Ethics in Society (ETHICSOC 372R) and Philosophy (PHIL 372M).

**LAW 673. Advanced Legal Writing: Drafting and Negotiating Sports Law Transactions. 3 Units.**

This seminar focuses on the drafting and negotiation of certain sports law transaction documents. Examples of documents to be discussed in the seminar are suite license agreements, sponsorship agreements, naming rights agreements, sports team acquisition agreements and media rights agreements. This seminar is intended to be "hands-on" with all students having the opportunity to experience being a "sports law attorney." The class room environment is intended to simulate the experiences that a junior attorney would encounter in a law firm or corporate legal setting. The major emphasis of this seminar will be on how sports transaction documents are drafted, negotiated, revised and finalized. In addition to a discussion of some of the specific sports transaction documents and the drafting and negotiation techniques related to those documents, there will be general discussions of other sports law related issues. Depending on availability and timing, the seminar may also feature periodic sports practitioners (e.g., general counsel for professional sports teams or organizations) as guest speakers to discuss their sports law experiences and their perspective on some of the documentation covered by this seminar. There will be no exams but instead there will be three independent writing assignments which will require the students to draft transaction documents based on forms from actual sports transactions. The final assignment will be a group assignment consisting of drafting, negotiating and finalizing a sports transaction document. There will also be periodic negotiation sessions. Special Instructions: Attendance at all class sessions is mandatory. Enrolled and waitlisted students must attend the first class meeting to be enrolled in the course and waitlisted students must continue to attend classes until they are either enrolled or until the final determination of their waitlist status is made. Late papers are subject to grading penalties. Elements used in grading: Class participation (quality not quantity), attendance, written drafting assignments, and the final negotiation/drafting assignment. Writing (W) credit is for students entering prior to Autumn 2012.

**LAW 674. Advanced Legal Writing: Litigation. 3 Units.**

Building on the skills developed in Federal Litigation, this course will give students additional practice with legal analysis, argument structure, and writing in the pre-trial litigation context. Students will draft an office memo, summary judgment brief, and pleadings in an internet school speech case. Students also will complete short writing exercises in and out of class to practice skills such as omitting surplus words, preferring active voice, using concrete words, punctuating carefully, etc. The goals of this class are to help students organize facts and principles in a succinct and logical way and to deepen their understanding of the legal reasoning process. The course should appeal to students interested in litigation practice and those wishing to hone their writing skills. Elements used in grading: Class participation, attendance and written assignments.

**LAW 675. Human Trafficking: Historical, Legal, and Medical Perspectives. 3 Units.**

This course offers an interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, including trafficking for forced prostitution, labor exploitation, and organ harvesting. In each of these areas, we will focus on human rights violations and remedies. The course aims to: 1. Provide the historical context for the development and spread of human trafficking. 2. Analyze current international and domestic legal and policy frameworks to combat trafficking and evaluate their practical implementation. 3. Examine the medical, psychological, and public health issues involved. 4. Stimulate ideas for new interventions. Instruction will combine lectures and small group discussion, and uses problem-based learning. Students interested in service learning should also enroll in History 6W/7W (FemGen 6W/7W), a two-quarter service learning workshop. Elements used in grading: Attendance; participation; written assignments; and final exam. This class is cross-listed with Feminist, Gender and Sexuality Studies (FEMGEN 5C, FEMGEN 105C), History (HISTORY 5C, 105C), Human Biology (HUMBIO 178T), International Relations (INTNLREL 105C) & School of Medicine General (SOMGEN 205).

**LAW 676. Rethinking Refugee Communities. 2 Units.**

Tens of millions of people have been forcibly uprooted by conflict or persecution worldwide. Although some of these people obtain asylum in advanced industrialized countries, a far larger number remain as refugees and internally-displaced people living in hastily-built refugee communities in the developing world. This project-based, interdisciplinary class is focused on exploring alternatives to improve the planning, design, and governance of refugee communities. It considers some of the legal, design, engineering, and governance challenges associated with communities of refugees and other forced migrants. The goal is to exercise and enhance students' ability to deal with multifaceted complex issues by developing recommendations that can be implemented by the Office of the United Nations High Commissioner for Refugees (UNHCR).

**LAW 677. Professional Responsibility. 3 Units.**

This course introduces students to the goals, rules and responsibilities of the American legal profession and its members. The course is designed around the premise that the subject of professional responsibility is the single most relevant to students' future careers as members of the bar. These issues come up on a constant basis and it is critical that lawyers be alert to spotting them when they arise and be educated in the methods of resolving them. As such, the course will address many of the most commonly recurring issues that arise, such as confidentiality, conflicts of interest, candor to the courts and others, the role of the attorney as counselor, the structure of the attorney-client relationship, issues around billing, the tension between "cause lawyering" and individual representation, and lawyers' duty to serve the underrepresented. In addition, we will delve into some more personal ethical issues that reflect on why students have chosen law as a profession and how lawyers compose careers that promote or frustrate those goals. At the start of each session (starting with the second session) there will be a brief quiz on the material that was covered in the readings and discussion of the prior session. During the period of the course, students will also be responsible for submitting one reflection paper (three-to-five pages) on a topic that is covered in the course (one paper for the entire course). These papers will be due on the Wednesday of the last week of class. Grades will be based on the quizzes and the paper submitted, with the instructor retaining the right to take class participation into account. Attendance is mandatory and students must seek instructor approval for any absences not due to illness. This course is offered to foreign graduate students only. It is taught on an accelerated basis over the course of three weeks between August 31, 2015 and September 18, 2015. Thus, the course meets on average nine hours per week. The exact meeting times will be set once the graduate students' schedules are set. Elements used in grading: Attendance, class participation, quizzes and written memo. Limited to LLMS, JSMs and exchange students. Required for LLMS.

**LAW 678. Introduction to Microeconomics. 3 Units.**

COURSE SUBSTANCE: It is no secret that economic ideas are being used increasingly in law school courses, in law practice, and in a wide variety of other fields that a law school graduate might choose to pursue - antitrust, corporate, environmental, tax, labor, and securities are just some of the immediate examples that come to mind. While many Stanford Law School students have already taken courses in economics as undergraduates, or might even have majored in economics, many of you have not. This course is offered to "bring you up to speed" so that you will not be at a disadvantage in other courses at the Law School that draw on economic ideas (or, just as importantly, not be at a disadvantage when you graduate and you encounter economic ideas and arguments on the job or in life.) So, what is economics, exactly? All societies face the problem of scarcity - there are not enough resources to satisfy people's desires for all things. Economics studies how individuals and societies deal with scarcity and the mechanisms for deciding what to produce, how to produce it, and who gets the output. It is as simple and complex as that! As you can imagine, the practical applications are nearly endless. Please note that the course focus will be microeconomics - the branch of economics that focuses on the economic behavior of individual decision-making units, such as households and firms, and how these individual decisions fit together. (I will not discuss macroeconomics in this course - i.e. the behavior of the economy as a whole, particularly inflation, unemployment, and business cycles.) More specifically, I will spend the vast majority of the course taking you through the basic supply and demand model of markets - what it is, where it came from, how and when it works, and when it does not work so well. With that base, I can branch out accordingly to help you apply it to a wide variety of relevant issues. Though I will not focus specifically on how economic ideas have been used in a legal context (there is another course and seminar that does that), I will make some effort to link the economic ideas we discuss directly to legal topics. COURSE PROCEDURE: My primary goal is to teach you the fundamental principles of microeconomics by (1) providing you the relevant schema to understand the basic tools of economic analysis; and by (2) drilling you extensively with problems, cases, current events, and other applied materials so as to help you develop the ability to use these tools and truly make them your own. A heavy emphasis will be placed on building a conceptual understanding of some key economic models, looking closely at the underlying assumptions of those models, and engaging in the process of questioning and relaxing those assumptions in the context of actual "real life" issues. Please do not mistake the analytical rigor I will require, to mean that we will use sophisticated mathematics. To the contrary, I believe that most powerful economic principles should be highly intuitive and non-quantitative.

**LAW 679. The Rule of Law - The Foundation of Functional Communities. 2 Units.**

We will seek to determine a useful meaning of the notion of the rule of law to identify some measurement of adherence and to explore the importance of the rule of law in terms of economic, socio-political and human development. We will focus on accountable government; just laws; open processes for the enactment, administration and enforcement of laws and effective dispute resolution. Readings and discussion will include the works of ancient philosophers, political theorists and jurists from the 17th to the 20th century, modern political economists and contemporary scholars. This seminar will feature several experts in the field as guest lectures and requires three reaction papers from all participants. Elements Used in Grading: Class participation, written assignments and series of short reaction papers.

**LAW 680. Pivotal Moments in American Institutions and Public Law, 1791-Present. 3 Units.**

(Same as PoliSci 323) American lawyers and policymakers work today in a system of institutions that are strikingly unique in comparative and historical terms. With some exceptions, that system is characterized by relatively stable political and legal institutions, low levels of explicit corruption, high bureaucratic capacity in public organizations, and relatively open, impersonal access to political, policymaking, and legal institutions. Although these characteristics are now often taken for granted, the process through which they emerged remains remarkably opaque. In the 1780s under the Articles of Confederation, the United States was a poor developing country on the fringe of the Atlantic community with limited capacity and a striking inability to provide basic public goods, such as security. One hundred years later, it well along the way to becoming the richest nation in the world. How did this transformation occur? Drawing on judicial opinions, legal scholarship, political science, economics, and history, this course explores how institutions evolved to create such a system. It traces the problem of institutional development through several critical periods in the history of American public law, including the emergence of the Constitution, the events leading up to and following the Civil War, the Progressive era, World War II, institutional changes occurring roughly during 1964-75, and the emergence of the modern administrative state. Although the primary focus is on the American experience, we place these developments in comparative context as well.

**LAW 681A. Better: Improving Decision-Making, Achievement, and Performance. 1 Unit.**

This discussion group will explore how recent insights from psychology and related fields can help make us better students, better professionals, better leaders, and better people. We will consider works dealing with happiness, decision-making, learning, persuasion, success, and achievement. The reading list will include some or all of the following: Jonathan Haidt, *The Happiness Hypothesis*; Atul Gawande, *Better: A Surgeon's Notes on Performance*; Paul Tough, *How Children Succeed: Grit, Curiosity, and the Hidden Power of Character*; Richard Thaler & Cass Sunstein, *Nudge: Improving Decisions about Health, Wealth, and Happiness*; Annie Murphy Paul, *Brilliant: The New Science of Smart*; and Adam Grant, *Give and Take*. Begin in Autumn Quarter and run through Winter Quarter. Class meeting dates: Tuesday evenings from 7:30 - 9:30, exact dates TBD. DISCUSSIONS IN ETHICAL & PROFESSIONAL VALUES COURSES RANKING FORM: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration). See Ranking Form for instructions and submission deadline.

**LAW 681B. Can Philosophical Insights or Empirical Knowledge Help Us Make Hard Choices?. 1 Unit.**

We will explore both two overarching themes and five specific problems that I hope are intrinsically interesting. The first general question is whether philosophical inquiries on big issues - e.g. what it means to be well-off; what obligations do we have to strangers who are radically worse off than we are; when should we observe rights-based limits on our pursuit of aggregate welfare; what does it mean to coerce another party - help us make choices when it is not obvious what we should do. The second, related question is whether empirical knowledge - e.g. psychological, economic - might help us, in addition, instead, or no more than philosophical insight. The specific questions we will focus on have little in common, other than that they are not easily answered. Some refer to decisions that seem wholly self-regarding, others that seem to refer to obligations to others. Some involve acting in professional role, some out of role. Some seem plainly important, others might seem more trivial. And it is possible, of course, that you will come to believe that philosophers or empiricists may have more to say about some of the issues that we discuss than others. The five questions I tentatively plan on exploring are: (a) how a late adolescent patient (or a doctor advising that patient) ought to choose between an operation that will significantly improve various aspects of her life over the next thirty years but poses a substantial risk of leaving her wheelchair-dependent in middle age and an operation that will lead to impaired functioning for the next few decades but mobile without mechanical aids past the age of 50 (b) how we can evaluate claims that virtually all of us living in economically prosperous countries are obliged to give away a substantial chunk of our income to save the lives of very poor people around the world (c) how we should evaluate the propriety of torture designed to elicit information about planned criminal/terrorist activities that might arguably save those who would be harmed if the plans came to fruition (d) how an attorney in a big law firm ought to determine when and whether it is appropriate to ask an administrative assistant to do work that is not directly related to the production of legal services (e.g. pick up laundry from the cleaners) and whether (and if so, why) the answer to that question is sensitive to the gender of the attorney and the attorney's administrative assistant, and finally, (e) whether existing rules governing the conduct of war that draw significant distinctions between killing soldiers and killing civilians and between killing civilians intentionally rather than knowingly are sensible. Begin in Winter Quarter and run through Spring Quarter. Class meeting dates: To be determined by instructor. Elements used in grading: Class attendance at all sessions and class participation. DISCUSSIONS IN ETHICAL & PROFESSIONAL VALUES COURSES RANKING FORM: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline.

**LAW 681C. Group Behavior. 1 Unit.**

This discussion group will look at how ethical choices are shaped by organizational and group cultures. We'll read about some famous psychological experiments such as the Milgram and Zimbardo experiments; and some studies of decisions made in corporate organizations, government bureaucracies, and a battalion of ordinary middle-class Germans tasked with hunting down Jews; and talk about what insights from this work may be relevant to lawyers' ethics and working lives. Begin in Winter Quarter and run through Spring Quarter. Class meeting dates: To be determined by instructor. DISCUSSIONS IN ETHICAL & PROFESSIONAL VALUES COURSES RANKING FORM: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration). See Ranking Form for instructions and submission deadline. Elements used in grading: Class attendance at all sessions and class participation.

**LAW 681D. How Can You Represent Those People?. 1 Unit.**

This discussion group will consider why a lawyer might devote herself or himself to representing people accused of crime. We will explore a range of possible answers, from guaranteeing procedural fairness to appreciating the factual indeterminacy inherent in our world to fighting racial or class-based injustice. Course materials will likely include fiction (such as *Atonement* by Ian McEwan); nonfiction essays; as well as a couple of recent films (*Bernie* and *The House I Live In*). Lisa Douglass, lecturer and staff attorney in the Stanford Community Law Clinic, will help lead the discussions. Class meeting dates: To be determined by instructor. Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students). See Ranking Form for instructions and submission deadline.

**LAW 681E. Human Rights and Film. 1 Unit.**

This 'Discussion' group will focus on the treatment of human rights issues in films. After reviewing brief, selected readings that provide essential background, the group will view a film (one per session, for five sessions) that focuses on issues of social conflict and human rights. Several of the film showings will be held at Prof. Cavallaro's home. Afterwards, students will consider the human rights matters addressed in the film. Films likely to include 'Battle of Algiers' and 'La Historia Oficial' (The Official Story, Argentina 1985). Winter Quarter. Class meeting dates: To be determined by instructor. Elements used in grading: Class attendance at all sessions and class participation. DISCUSSIONS IN ETHICAL & PROFESSIONAL VALUES COURSES RANKING FORM: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline.

**LAW 681F. Law, Narrative, and Boundaries. 1 Unit.**

As citizens and as professionals, lawyers work in a world marked and shaped by salient social boundaries. Some kinds of differences - of politics, religion/religiosity, race, ethnicity, language, wealth, gender, sexuality and other attributes - can be profoundly divisive. Broadly speaking, this class is inspired by the complex cultural and political challenge of managing these differences—a challenge that lawyers have a unique opportunity to address. The particular lens through which we will investigate this issue involves those who cross, or reflect upon in novel ways, some of these boundaries. As we read and discuss narrative accounts, we will consider what light they shed on how social and legal boundaries are created, evolve, and take on particular meanings. We will ask how law constructs or enforces lines, and how those practices change when the line itself gets blurry. Materials will include fiction and nonfiction, prose and film, on subjects such as: stories of "passing" (involving race and gender); the Thomas Jefferson-Sally Hemings relationship; attempts by Palestinians and Israelis to live peacefully with one another in the cooperative village of Wahat al-Salam/Neve Shalom; various narratives about life on both sides of the U.S.-Mexican border; and stories about the intersection of religion and sexuality. We will supplement the narratives with some theoretical material that looks at how law can shape, define, and enforce boundaries.

**LAW 681G. Searching for Balance. 1 Unit.**

This discussion group will explore the topic of work-life balance, in particular how women and men in law and other demanding professions negotiate the demands of work and family. Readings will include a wide range of perspectives - current social science research, contemporary fiction, feminist theory, debate in the popular media, comparative studies of other countries. We will consider the factors that make work-life balance so elusive, including government policies (e.g., maternity leave and child care); gender roles in the family; the institutional culture and structure of particular workplaces; differences related to race, ethnicity and economic status; and individual choices that men and women make about how to lead lives that they find meaningful. Begin in Winter Quarter and run through Spring Quarter. Class meeting dates: To be determined by instructor. DISCUSSIONS IN ETHICAL & PROFESSIONAL VALUES COURSES RANKING FORM: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration). See Ranking Form for instructions and submission deadline. Elements used in grading: Class attendance at all sessions and class participation.

**LAW 681H. Issues in Philanthropy. 1 Unit.**

We will explore selected topics, encompassing some subset of the following: the roles of the philanthropic and nonprofit sectors in society; the justifications for tax-subsidized philanthropy; whether giving to the poor is morally obligatory or discretionary; barriers to the practice of strategic philanthropy; evaluating philanthropic outcomes; impact investing; the role of corporate philanthropy; and whether foundations should be designed and run to exist in perpetuity or to spend down corpus over a finite lifetime. Winter Quarter. Class meeting dates: To be determined by instructor. Elements used in grading: Class attendance at all sessions and class participation. DISCUSSIONS IN ETHICAL & PROFESSIONAL VALUES COURSES RANKING FORM: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline.

**LAW 681I. The Sea Around Us: Ethical, Physical, and Emotional Connections Between Humans and the Ocean. 1 Unit.**

This colloquium examines current ocean law and policy issues through a series of readings of seminal works about ethical, physical, and emotional relationships of human beings to the marine world. Through the lenses offered by several classic readings, we will examine and reinterpret the challenges of fisheries collapse, climate change, shipping, marine spatial planning, biodiversity conservation, and the management of land-sea interactions. The course is open to all law students and will be particularly interesting for those interested in studying and solving key issues of ocean policy and management, from coastal adaptation to fisheries management to cumulative impacts assessments to the relationship of human beings and the sea. Begin in Winter Quarter and run through Spring Quarter. Class meeting dates: Exact meeting time and dates to be determined by instructor. Elements used in grading: Class attendance at all sessions and class participation. DISCUSSIONS IN ETHICAL & PROFESSIONAL VALUES COURSES RANKING FORM: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline.

**LAW 681J. When Bad Things are Done by Good People. 1 Unit.**

Some people live their lives in a manner that would lead few to declare them good people. From Tony Soprano to Saddam Hussein to Bernie Madoff, we are all familiar with individuals who have made crime and violence a constant in their lives. There are far more people, though, who try generally to live good lives, but find themselves having acted or having failed to act in ways that are widely condemned as evil. Over the course of our five meetings, we will be looking (through some books, reports and films) at case studies of such circumstances, ranging from clergy and others in authority who covered up evidence of sexual abuse, prosecutors who ignored evidence of wrongful convictions, lawyers who turned blind eyes to client misconduct, and soldiers who committed acts they would have once found unimaginable. We will also look at a contrasting case study of individuals who resisted great pressure and kept their moral compasses well-calibrated. Throughout our inquiry, we will reflect in particular on the power of institutions and authority in affecting ethical mores. Begin in Winter Quarter and run through Spring Quarter. Class meeting dates: To be determined by instructor. DISCUSSIONS IN ETHICAL & PROFESSIONAL VALUES COURSES RANKING FORM: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline. Elements used in grading: Class attendance at all sessions and class participation.

**LAW 681K. Confidence, Influence and Leadership. 1 Unit.**

For the past two years, the name of this reading group was Why are People So Sure? For this year, we have changed the name—and the emphasis to a degree. As in the past, we will discuss books that address the phenomenon of people having great confidence in their beliefs or opinions, even when there is a reasonable possibility that they are wrong. For example, many arguments about politics or policy involve highly complex factual assumptions and predictions. Despite the difficulty of assessing the validity of factual assumptions and forecasting the consequences of any particular decision, many people maintain great confidence in the correctness of their beliefs. Why is that? In addition, some people are very successful in influencing other people with respect to such beliefs or opinions. How do they do that, and what makes their audience susceptible to being convinced? In the extreme, what allows this sort of person to be a leader or at least a "thought leader" (to use what regrettably seems to be a new entry into our lexicon)? In this discussion group, we will read books that engage these questions in diverse ways. Students that join the group will be expected to be full participants in the discussion. Neither of us is an expert in the topic and neither of us expects to have any more to say than you will. So please join us only if you find this format appealing. Another requirement of the group will be to create a written log, or summary, of what we read and discuss. We will all share responsibility for writing this. Begin in Autumn Quarter and run through Winter Quarter. Class meeting dates: To be determined by instructor. DISCUSSIONS IN ETHICAL & PROFESSIONAL VALUES COURSES RANKING FORM: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline.

**LAW 681L. Constitutional Law and Lawyers in Context. 1 Unit.**

In this discussion group, we will go beyond judicial opinions to read books about some of the leading cases in constitutional law and the lawyers who litigated them. In the course of doing so, we will discuss what insights about constitutional law and lawyering can be distilled from exploring the historical context, participants, origins and aftermaths of some major cases and issues. The books will include Gilbert King's *Devil in the Grove* (about Thurgood Marshall's role in defending the "Groveland Boys" against accusations of rape in Florida in the 1940's); Anthony Lewis's *Gideon's Trumpet* (about Gideon v. Wainwright), Dale Carpenter's *Flagrant Conduct* (about *Lawrence v. Texas*); David Garrow's *Liberty and Sexuality: The Right to Privacy and the Making of Roe v. Wade* (about *Griswold v. Connecticut* and *Roe v. Wade*) and Victoria Nourse's *In Reckless Hands* (about *Skinner v. Oklahoma*). Begin in Winter Quarter and run through Spring Quarter. Class meeting dates: Wednesday evenings, 7:30-9:30 pm, on Jan. 21, Feb. 18, March 4, April 15, and May 13. Discussions will be held at Professor Schacter's home in Menlo Park. Elements used in grading: Class attendance at all sessions and class participation. DISCUSSIONS IN ETHICAL & PROFESSIONAL VALUES COURSES RANKING FORM: To apply for this course, students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students). See Ranking Form for instructions and submission deadline.

**LAW 681N. Law and Performance. 1 Unit.**

From the rhetorical fireworks of the classic American trial scene to the band Pussy Riot's "aesthetic resistance" in Russia, law and performance have been entangled in more and less officially sanctioned ways. This discussion seminar will address questions at the intersection of law and performance, such as: What are the ethical implications of performance in the legal context?; When does or should freedom of performance come into conflict with the norms of a well-ordered society?; Can examining methods of musical interpretation help us to adjudicate between originalism and living constitutionalism?; and; What can drama reveal to us about the law? Among other readings will be included Jack Balkin's work on opera and constitutional interpretation, Kenji Yoshino's "The City and the Poet," Hannah Arendt's *Eichmann in Jerusalem*, and Desmond Manderson's "Making a Point and Making a Noise: A Punk Prayer."nSpring Quarter.nClass meeting dates: To be determined by instructor.nElements used in grading: Class attendance at all sessions and class participation.nDiscussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline.

**LAW 681O. The Law of Democracy. 1 Unit.**

This seminar will cover topics in the general area of law and politics, specifically the law concerning elections. The discussions will focus on the following five case studies: Redistricting; *Bush v. Gore* and the 2000 election; Campaign Finance; Party Primaries and Conventions; and The Voting Rights Act. Although we will discuss court cases, much of the seminar will include "war stories" from those involved in the cases or legislative battles. Students who plan to enroll in "Regulation of the Political Process" are encouraged to take this discussion seminar as well. But that class is not a prerequisite for this seminar. Note: Los Altos location is not walkable. Winter Quarter. Class meeting dates: TBD. DISCUSSIONS IN ETHICAL & PROFESSIONAL VALUES COURSES RANKING FORM: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline.

**LAW 681P. Personal Satisfaction in Legal Practice. 1 Unit.**

This discussion group will explore satisfaction in professional practice. Readings will explore the conditions of current practice, with an emphasis on law firms, and what can be learned from research on happiness. Books to be excerpted may include Nancy Levit and Douglas Linder, *The Happy Lawyer*, Steven Harper, *The Lawyer Bubble*, Sonja Lyubomirsky, *The How of Happiness*, Daniel Gilbert, *Stumbling on Happiness*, Martin Seligman, *Authentic Happiness*, Bryant Garth, *After the JD*, Milton Reagan, *Eat What You Kill*, and Nash and Stevenson, *Just Enough*. Begin in Winter Quarter and run through Spring Quarter. Class meeting dates: To be determined by instructor. Elements used in grading: Class attendance at all sessions and class participation. Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline.

**LAW 681Q. Failure. 1 Unit.**

Lawyers are charged with prosecuting and defending the civil and criminal failings of others. In client counseling and transactional representation, we are charged with helping our clients avoid failure. And as professionals, we are enjoined to avoid failures ourselves. So we spend our careers in and around failure - anticipating it, reconstructing it, and seeking to prevent and remedy it. This seminar explores the human experience of failure in both legal and non-legal settings. What are the circumstances (structural and cognitive) that appear to lead to personal, professional, legal, political, and moral failures? How does the law shape social understandings of what failure is? What kinds of failures appear to support the belief that failure is (almost always) avoidable, and thus the fault of individuals who experience failure? Why do other failures seem inevitable? What is the narrative structure and allure of representations of failure as a condition of success? How are failure and the harms that flow from the experience of failure remembered or forgotten by individuals and groups who cause failure and those who attempt to redress it? Sources for the seminar will range from cases dealing with professional malpractice and cultural histories of professional ideology to poetry, constitutional history, theories of creative destruction, and responses to mass atrocities. Begins in Winter Quarter and runs through Spring Quarter. Class meeting dates: Five evening sessions to be determined by instructor in coordination with enrolled students. Elements used in grading: Class attendance at all sessions and class participation. To apply for this course, 2L, 3L and Advanced Degree students must complete an application form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See form for instructions and submission deadline.

**LAW 681R. The Arrest, Trial, and Execution of Jesus of Nazareth. 1 Unit.**

Patterned on a seminar taught by Professor Joseph Weiler at NYU Law School, this discussion seminar will study the most famous criminal case in the history of the world: the arrest, trial, and execution of Jesus of Nazareth. In five two-hour sessions at Professor McConnell's home, we will cover (1) Jesus's arrest in the the Garden of Gethsemane, (2) his trial before Jewish authorities, (3) his trial before Roman authorities, and (4) his execution, with (5) one session left for general considerations. (We will not delve into the reports of his resurrection.) We will focus on the nature of the charges against Jesus, the legal procedures employed, the evidence and the defense, the relation between imperial and local authorities, the relation between religious and secular law, the ethical roles of the individuals involved, and the mode of execution. Our primary text will be Raymond E. Brown, *The Death of the Messiah* (Yale University Press 2004), a scholarly two-volume study drawing on all the extant historical sources. Among the questions we are likely to discuss are: Was the trial fair by the standards of the day? Was Jesus guilty of any of the charges? What were the authorities - and particularly Pilate - trying to accomplish? What was the role of the mob? Was Roman law a constraining influence, or the opposite? What was Jesus's own perspective on the proceedings? How reliable and/or plausible are the sources? Although this subject is of religious and spiritual concern to some, including (in all likelihood) some students taking the seminar, the seminar will not consider the material in a religious way, but instead as a legal event. The instructor hopes that the class will be religiously diverse, and especially encourages non-Christian students to enroll. Discussion will, of course, be conducted in a way that is comfortable for persons of all shades of belief and disbelief. Begin in Winter Quarter and run through Spring Quarter. Class meeting dates: To be determined by instructor. Elements use in grading: Class attendance at all sessions and class participation. Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline.

**LAW 681S. Plato's Republic. 1 Unit.**

We will discuss Plato's Republic with a focus on its treatment of law, justice, equality, and legal institutions. After the first session, on Book One, students will take turns co-leading the discussions. Limited to eight students, the seminar will meet in the instructor's home. Begin in Winter Quarter and run through Spring Quarter. The class will meet in the evening, on a weekday. Exact meeting time and dates to be determined by consensus of the participants. DISCUSSIONS IN ETHICAL & PROFESSIONAL VALUES COURSES RANKING FORM: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline.

**LAW 681T. Law and the Humanities Discussion Seminar. 1 Unit.**

There have been a number of efforts to define what "law and the humanities" comprehends, some including history and philosophy as disciplines juxtaposed with law and others insisting on a narrower version of the field. A newer movement led by Chris Tomlins has rejected the "law and" model entirely and insists instead on formulating interdisciplinary work in law as "law as." This discussion seminar will examine inductively what law and the humanities might mean and the significance of its contribution by considering a number of essays and articles that could be thought of as work in law and the humanities. Each session will be devoted to a pair of writings around topics like "Law and Literature," "Legal History," and "Law and Performance." Questions to be considered include the role of law within these projects, the audience being addressed, the larger social significance of the arguments being made, and the extent to which the pieces are grounded in a particular discipline or set of disciplines or float above disciplinary formations. Begin in Winter Quarter and run through Spring Quarter. Class meeting dates: To be determined by instructor. Elements used in grading: Class attendance at all sessions and class participation. Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline.

**LAW 681U. Injuries. 1 Unit.**

Very generally speaking, we try, as individuals, to avoid injuring people and, collectively, to adopt policies that minimize injury, in the sense that we don't want to make people worse off, in some hedonic sense, or deprive them of options or capacities that we think they ought to have. Moreover, our legal system frequently compensates people who are injured (and therefore must ascertain if, and how badly, they are injured.) What we get the chance to investigate and discuss in this discussion group is what we mean when we say that people are injured by some particular practices or outcomes that might seem, without much reflection, to be obviously injurious. More particularly, we will discuss five issues: (1) In our first session, we will work out the implications of an academic literature that seems to explore what I see to be one of the finest of one-line jokes ("Nothing matters, and what if it did?"). The literature on hedonic adaptation might seem to suggest that we can neither injure others nor improve their lots: very quickly, people return to a (generally mildly positive) fixed equilibrium state even when seemingly very good or very bad things happen to them. We will explore the literature and its limits. (2) In the final four sessions, we will explore four conditions or practices that seem intuitively injurious and problematic and try to figure out more precisely what might be bad about them, or whether they are actually injurious in the ways that we might at first think: we will explore what is injurious about poverty, discrimination, sexual harassment, and even the big one, death. Begin in Winter Quarter and run through Spring Quarter. Class meeting dates: Meetings will be in the evenings. Exact meeting time and dates to be determined by consensus of the participants. DISCUSSIONS IN ETHICAL & PROFESSIONAL VALUES COURSES RANKING FORM: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration). See Ranking Form for instructions and submission deadline. Elements used in grading: Class attendance at all sessions and class participation.

**LAW 681V. Impact Investing. 1 Unit.**

There has been growing interest in investments in for-profit enterprises where investors seek particular social outcomes (e.g., health, sanitation, or financial services for the poor) in addition to or even at the sacrifice of financial return. A small but growing subset of impact investments involves social impact bonds to help finance government pay-for-success contracts with organizations seeking to problems such as recidivism, homelessness, and asthma. Foundations, including Gates, Ford, and MacArthur make such impact investments through what the Internal Revenue Code terms "program-related investments," which count toward the foundations' required annual payout. And some family offices and high net worth individuals make them out of their checkbooks. We will take a sympathetic but skeptical look at a range of impact investments to understand their potential for solving social problems and also their limitations. Two pervasive questions will be the scope of investment opportunities that sacrifice financial return, and whether and when investments that seek risk-adjusted financial returns accomplish anything that ordinary commercial investments wouldn't do anyway. The discussion seminar requires no prior knowledge of philanthropy or finance. Winter Quarter. Class meeting dates: To be determined by instructor. DISCUSSIONS IN ETHICAL & PROFESSIONAL VALUES COURSES RANKING FORM: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration). See Ranking Form for instructions and submission deadline. Elements used in grading: Class attendance at all sessions and class participation.

**LAW 681W. When Research Goes Bad. 1 Unit.**

Research is the application of systematic methods for purposes of producing generalizable knowledge. In some cases, individuals research on their own; at other times, they work within a range of organizations, such as business entities, universities or other nonprofits. The products of research have powerful effects: they alter human understanding-how we see ourselves and the world; they influence government, policies, and markets; they also shape lifestyles, diets, education, and medical care. In addition, research findings may bring adulation and wealth to the researchers who produce them. Unethical research processes and false research findings ("bad research") can be extremely damaging. They may set science, medicine, business, and social policy in the wrong direction; they invariably waste money; and, directly or indirectly, they are likely to harm the very people they promise to benefit. Bad research is sometimes the result of intentional wrongdoing, but it may also stem from carelessness, "honest" mistakes, and unconscious biases. Through a selection of intriguing case studies and other accounts, this discussion group will explore instances in which research has taken a wrong turn, or is perceived to have done so. What are the consequences for society? What are the consequences for the researchers and their subjects? What ethical, legal and policy questions arise? And what institutional structures can best address these challenges? Begin in Winter Quarter and run through Spring Quarter. Class meeting dates: The class will meet in the evening. Exact meeting time and dates to be determined by instructor. DISCUSSIONS IN ETHICAL & PROFESSIONAL VALUES COURSES RANKING FORM: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration). See Ranking Form for instructions and submission deadline. Elements used in grading: Class attendance at all sessions and class participation.

**LAW 682. Advanced Criminal Law and Public Policy II: A Research Practicum. 3 Units.**

Written Work. Students will expand upon the research begun in Petersilia's Fall 2012 class, turning their fall research papers into academic journal articles, ready for submission. This course meets the SLS writing (W) graduation requirement. This course is a follow on to the Fall 2012 course taught by Professor Petersilia. In that course, each student conducted research on an aspect of California sentencing and/or corrections. The Winter 2013 class will be designed for students who wish to expand their research projects with an eye towards journal publication. This class will also devote significant time to developing policy recommendations and delivering formal briefings to high level policymakers.

**LAW 683. The Future of Human Rights: Law, Politics, and Social Justice in a Multipolar, Multimedia World. 2 Units.**

Human rights law and practice are being transformed by geopolitical, technological and economic forces that unsettle the actors, strategies, and legal standards that dominated the field in the twentieth century. In this seminar, we will take stock of key global developments that underlie such a transformation, and analyze their impact on the future of human rights, as follows: nn1. The rise of emerging powers (such as Brazil, China and India) and the relative decline of Europe and the U.S. point to a multipolar world order. Together with the proliferation of international regulations (such as transnational corporations' codes of conduct, legal standards advanced by coalitions of NGOs, and decisions of international bodies such as the WTO and UN agencies), this trend results in a legal and political arena that is both broader and more fragmented. In this new context, states and NGOs in the Global North no longer control the creation and implementation of human rights standards, while new actors (from transnational social movements to Global South states and NGOs) emerge as influential voices. nn2. Information and communication technologies present new challenges and opportunities for human rights. As the mobilizations catalyzed by the Arab Spring have shown, tools such as social networks, video documentaries, digital reporting, online learning and long-distance education can accelerate political change, reduce the informational disadvantages suffered by marginalized groups, and bring together national, regional and global groups capable of making a direct impact on the protection of rights. nn3. The range of actors and legal and political strategies has been considerably expanded. Time-honored strategies such as naming and shaming recalcitrant states are being complemented with newer strategies for transnational research, information circulation, and training, which involve a host of different actors, including social movements, online media outlets, inter-governmental organizations, universities and virtual activist networks.nnThe seminar will be divided into three sections, each dealing with one of these transformations. Each section, in turn, will be divided into two discussion sessions and one lecture by a leading scholar and/or practitioner.nnThe seminar will revolve around the discussion of the assigned readings and materials, as well as presentations by students and guest speakers. Grades will be based on an in-class presentation and a final paper.

**LAW 684. Conflicts, Ethics, and the Academy. 3 Units.**

This course looks at conflicts of interest and ethical issues as they arise within academic work. The participants will be drawn from schools and departments across the University so that the discussion will prompt different examples of, and perspectives on, the issues we discuss. Topics will include the conflicts that arise from sponsored research, including choices of topics, shaping of conclusions, and nondisclosure agreements; issues of informed consent with respect to human subjects research, and the special issues raised by research conducted outside the United States; peer review, co-authorship, and other policies connected to scholarly publication; and the ethics of the classroom and conflicts of interest implicating professor-student relationships. Representative readings will include Marcia Angell's work, *Drug Companies and Doctors: A Story of Corruption*, N.Y. Rev. Books, Jan. 15, 2009, and *Is Academic Medicine for Sale?* 342 N. Engl. J. Med. 1516 (2000) (and responses); William R. Freudenberg, *Seeding Science, Courting Conclusions: Reexamining the Intersection of Science, Corporate Cash, and the Law*, 20 *Sociological Forum* 3 (2005); Max Weber, *Science as a Vocation*; legal cases; and conflict-of-interest policies adopted by various universities and professional organizations. The course will include an informal dinner at the end of each session. The goal of the course is to have students across disciplines think about the ethical issues they will confront in an academic or research career. Elements used in grading: attendance, participation, and two short reflection papers. Cross-listed with Ethics in Society (ETHICSOC 301). Non-law students should enroll in ETHICSOC 301.

**LAW 685. The American Legal Profession. 3 Units.**

This course will deal with selected aspects of the history, organization, economics, ethics, and possible futures of the legal profession in the United States. Likely topics will include, in addition to the ABA's Model Rules of Professional Conduct: demographic changes in the profession, the evolution of law firms, bar associations, and law schools from the early twentieth century to the present; the development of corporate law, personal injury, mass torts, prosecutorial and criminal defense practices, and the "public-interest" bar; the dominant professional ethic of adversary-advocacy, and its critics; the regulation of lawyers; the economics of the market for legal services; the organization and culture of law firm practice; the role of the lawyer as counselor; and the export of American lawyering models abroad. Take-home examination, with option of writing a research paper. Special Instructions: Students have the option to write a long research paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class participation, attendance, final paper or final exam.

**LAW 686. Advanced Legal Writing: Business Transactions, Technology and Social Enterprise. 3 Units.**

This course is designed to give students practical preparation in drafting and analyzing contracts and drafting with an eye toward addressing both client requirements and negotiation concerns. It should especially appeal to students interested in working in house and practicing transactional law (be it in a traditional for-profit or a social enterprise - with a focus on technology, telecom, social enterprise and collaborative arrangements.). The course offers a wide range of realistic legal writing and drafting problems—completed both inside and outside of class. These drafting assignments will help students improve their writing, drafting, and editing skills and develop their sensitivity to the expectations of the attorneys and clients for whom they will be working as well as the impact of their drafting on the other side. Students will also have an opportunity to collectively interview "clients" for the purpose of determining drafting priorities. In the course, students will learn the foundational tools necessary to analyze a variety of business agreements. Students will learn how to write clear, effective, plain language contracts. Special Instructions: Students on the waitlist for the course will be admitted if spots are available on the basis of priority and Degree of Study. Students may not drop this course after the second day of class. Corporations (Law 242) is a prerequisite for all but LLM (CGP) students. A substantial mark-up of a contract is due on the last day of class.

**LAW 688. Advanced Religious Liberty Clinic. 2-7 Units.**

Advanced clinic allows students who have taken the Religious Liberty Clinic to continue working on cases. Participation in rounds is required. Advanced clinic may be taken for 2-7 units; general rule of thumb is 4 hours of work per week per unit. Students may not enroll in any clinic (basic or advanced) which would result in earning more than 27 clinical credits during their law school enrollment. Elements used in grading: Class participation, written assignments, and case work. Students must have taken Religious Liberty Clinic.

**LAW 689. Advanced Legal Writing: The Art of the Deal. 3 Units.**

This course offers students a range of flexible and adaptive tools to develop the skills necessary for success as deal lawyers. Students will learn how to effectively structure, analyze, research, draft, and negotiate contractual provisions used in documenting complex deals at typical stages of a company's life cycle, highlighting Silicon Valley-style practices. Through drafting exercises, specialized research assignments, case studies, and interactive lectures involving realistic client situations, students will (1) gain a thorough understanding of customary agreement structures, (2) learn how to analyze, revise, and frame important contractual provisions with their client's best interests in mind, (3) recognize the links between successful outcomes and process choices involved in designing, drafting, and negotiating deals, and (4) develop sensitivity for balancing legal, strategic, operational, relational, and cultural aspects. Emphasis will be placed on advancing the goals, interests, and needs of stakeholders while maximizing the value that can be generated by the deal itself. This course will promote collaborative learning within a supportive cohort, enabling students to draw upon the knowledge, experiences, and perspectives of the instructor and their peers while enhancing and refining practical skills. Students will also engage in critical reflection around legal, strategic, and ethical dimensions of their work and their own professional development. This course is designed for students interested in working on deals, whether as a practicing lawyer, investor, or strategic advisor. SPECIAL INSTRUCTIONS: Students on the waitlist for the course will be admitted if spots are available on the basis of priority and degree of study. Early drop deadline: Students may not drop this course after first week of class. Corporations (Law 242) is a prerequisite for all but LLM (CGP) students. Class size limited to 16 students. Elements used in grading: Class participation, attendance, written assignments, and final paper. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for submission deadline.

**LAW 692. Modern Surveillance Law. 2 Units.**

This seminar provides an in depth look at modern government surveillance law, policies and practices. It is taught by Richard Salgado, director of law enforcement and information security at Google and a former prosecutor at the U.S. Department of Justice's Computer Crime and Intellectual Property Section, and Todd Hinnen, a partner at Perkins Coie and a former head of U.S. Department of Justice's National Security Division. The course will cover the technology, law and policy of government surveillance of the Internet and other communications technologies. We will focus on U.S. government surveillance for national security, criminal law enforcement and public safety purposes, but also address the relationship with other jurisdictions. Technologies and practices covered will include wiretapping, stored data collection and mining, location tracking and drones. Legal regimes will include the Fourth Amendment, the Foreign Intelligence Surveillance Act, the USA Freedom Act, USA Patriot Act, the Electronic Communications Privacy Act, and CALEA among others. Elements used in grading: Class participation, attendance, and two writing assignments, which includes a final paper.

**LAW 693. Law and Politics Workshop. 2-3 Units.**

This workshop will feature guest speakers who are political scientists or law professors specializing in the legal regulation of politics. Students will be responsible for response papers to each scholarly paper presented. On weeks without guest speakers, topics to be covered will include election law, administrative law, legislation, judicial behavior and public opinion, as well as the political science relevant to those areas of law. The final grade will be determined by class participation (10%), response papers (30%) and final research paper (60%). Students can take the course for R credit for either 2 or 3 units, depending on paper length. Elements used in grading: Class participation (10%), Response papers (30%) and final paper of no less than 18 pages for 2 units of credit and 26 pages for 3 units of credit (60%). (Cross-listed as POLISCI 321).

**LAW 694. The Law of War. 3 Units.**

The course explores the international law regime governing war, including the law that regulates when states may resort to force and the constraints on the conduct of warfare itself. We will begin by considering when states may permissibly use force, and how changing security threats, including terrorism, the proliferation of weapons of mass destruction, and the commission of widespread humanitarian atrocities challenge and are reshaping the legal framework on recourse to force. We will then explore the rules governing the conduct of military operations, including the constraints on the means and methods of war, the rules governing the treatment of detainees, and the protections extended to civilians and noncombatants in armed conflict. A particular focus of the class will be the application of these rules in non-traditional, asymmetric conflicts between states and terrorist and other non-state groups. Special Instructions: Any student may write a paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements Used in Grading: Class participation, written assignments, research paper or final exam.

**LAW 695. International Human Rights: Media and Education. 2 Units.**

This course will explore the role of media and communications in the human rights field, and in particular human rights education. The central focus of the course will be the development by the students of an online education program in international human rights law, which will be made available on the Stanford Law School Human Rights Center website. Students will research effective methods of communication and presentation, as well as the applicable law and will work in small groups to develop multimedia online education modules. Enrollment is by consent of the instructor, and some prior coursework or experience in international law is required. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline. Elements used in grading: Class participation and written assignments.

**LAW 696. Computer Security and Privacy. 2 Units.**

This seminar surveys the legal environment for technology security and privacy. We will emphasize areas of law that are frequently invoked, hotly contested, or ripe for reform. Specific topics will include trespass offenses (CFAA and DMCA), consumer protection against deficient security, breach notification, privacy policies, communications safeguards (ECPA), and compelled disclosure to law enforcement and intelligence agencies (Title III and FISA). The material will draw upon high profile and challenging cases, including the prosecutions of Aaron Swartz and Bradley Manning, the contempt citation against Lavabit, and class actions against Apple, Facebook, and Google. Students will have the option of completing a series of short written assignments or one research paper. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. A background in computer science is not required for this course. Writing (W) credit is for 3Ls only. Elements used in grading: Class Participation, Attendance, Written Assignments.

**LAW 697. Comparative Law and Society. 2 Units.**

By the mid 20th century, the legal map of the world recognized four main traditions: civil law, common law, socialist, and Islamic law. In early 21st century, the main socialist countries have disappeared and globalization has produced a pronounced convergence between common law and civil law. We also became aware that comparative law has to compare more than law and has to include the social and political context of the law. The comparative method is important, but the substance to be compared has changed. This course introduces students to the main historical experiences of law using the comparative method and law and society materials. They will find a new way of looking at Roman, medieval, or 19th century law because its "monuments" are placed in social perspective. The method will be used to reconstruct the contemporary ideas of human rights and rule of law in the context of specific countries. Students will have two writing obligations: (1) brief reflective essays on assigned readings and (2) a research paper. Starting in session 2, students will prepare brief reflective essays on the required reading (or readings) for the session and submit them to the professors and other students 24 hours prior to the beginning of the session. Assigned readings will all be in English. Additional readings may be in other languages. For the research paper the student will, with professorial approval, choose a country and a topic and discuss the work in progress with the professors at least twice during the quarter. It should not exceed 5,000 words. Special Instructions: After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: The short essays or article presentations will be one leg of the students' evaluation (50%). The other leg will be the final research essay (50%). Writing (W) credit is for students entering prior to Autumn 2012.

**LAW 698. Education Law and Policy. 3 Units.**

This seminar will explore the current state of education law and policy, with an emphasis on legal environment for charter schools. Students will have an opportunity to discuss cutting edge issues in education reform with leaders and policy-makers from charter school operators, union leaders, researchers, and innovators. Special Instructions: Grades will be based on class participation and (1) weekly reflection papers of 3-5 pages each week for each of our speakers/topics or (2) a long research paper. Writing credit is for 3Ls only. After the term begins, students accepted into the course can transfer from section (01) into section (02) which meets the R requirement, with consent of the instructor. The course is open to first-year Law School students. Writing (W) credit is for 3Ls only. Elements used in grading: Weekly Reflection Papers or Research Paper.

**LAW 699. Arbitration in America. 3 Units.**

Transactional lawyers and litigation counsel alike will face arbitration as a significant option for resolving their clients' legal disputes. This course covers the development of alternative dispute resolution in the U.S., with an emphasis on arbitration under the Federal Arbitration Act (FAA). It describes how the federal and state governments have gradually come to accept and now favor the private settlement of commercial disputes based on consent of parties. It examines the many different contexts and industries in which arbitration is conducted, including government-mandated programs for labor disputes, systems established by specific industries such as the diamond trade and professional sports associations, the construction industry, and commercial disputes in general; more controversial is the use of arbitration for consumer, class action and employment disputes. This historic reversal of power over adjudication from government to the private sector has alleviated the delays and uncertainties of judicial litigation, and has created a huge and growing legal field of attorneys, arbitrators, and service providers fashioning and administering systems ranging in complexity from the most formal mega dispute with full discovery to the resolution of mini disputes through mechanically applied algorithms. Allowing private parties to agree on the law and procedures that govern their disputes has led, moreover, to numerous clashes of interests, including evasion of public policies established by legislation. How to deal with alleged violations of public policy, errors of law, erroneous findings of fact, unfair procedures, unequal negotiating power, and arbitrator bias are among the continuing and complex difficulties currently faced by courts and legislatures. The US Supreme Court's recent attempts to deal with several aspects of these difficulties will be considered. We will also examine the less heralded but highly significant use of mediation as a relatively speedy and inexpensive method for private dispute resolution, and the recent development of hybrid systems and other innovations. Elements used in grading: Class participation, attendance, written assignments and final exam.

**LAW 701. SPILS Law and Society Seminar. 3 Units.**

This seminar is restricted to students who are in the SPILS program. The seminar deals with the relationship between legal systems and the societies in which they are embedded. The materials are drawn from studies of many different societies. Among the issues dealt with are: What influence does culture have on the operation of legal systems? What are the social forces which produce particular forms of law? What impact do legal interventions have on society and on human behavior? Elements used in grading: Exam. Enrollment is restricted to SPILS program students.

**LAW 703. Corporate Governance and Practice Seminar. 2 Units.**

The seminar on corporate governance meets in the Autumn and Winter quarters and forms the core of the LL.M. Program in Corporate Governance & Practice. The course, designed to be taken in conjunction with Corporations in the fall, takes an economic approach to the analysis of corporate law. In particular, we ask why American corporation law has its particular structure. We will seek to understand how the separation of ownership and control produces agency costs, and the ways in which corporate law seeks to remedy these through techniques like disclosure, fiduciary duties and shareholder litigation, voting, and hostile takeovers. We will read and discuss ongoing debates among scholars and practitioners about the agency cost framework, the merits and limits of current legal policies, and the role of institutional arrangements like activist shareholders. We will also consider the relevance of these disputes, and the effectiveness of corporate law and governance more generally, in the context of a variety of real-life incidents, including the collapse of Enron and the 2008 financial crisis. No knowledge of economics is presupposed, so the course will also introduce basic economics and finance concepts necessary to understand these concepts. Some course sessions, largely in the Winter, will feature outside speakers who will complement the discussions with real-world examples drawn from practice. Attendance and active participation are important to the success of the seminar and an important factor in the overall grade. Students are expected to have carefully read and reviewed assigned materials in advance of each session. Students may be also asked to prepare brief presentations to help guide discussions. Students will be required to submit reflection papers (2 to 3 pages in length) that evaluate, critique, and discuss some or all of the key topics reviewed in the previous week's session. Elements used in grading: Class participation, attendance and assignments. This course is required for and limited to students in the Corporate Governance and Practice LL.M. Program.

**LAW 704. Law, Science, and Technology Colloquium. 2 Units.**

The Law, Science & Technology Colloquium offers students in the Law, Science & Technology LLM Program the opportunity to discuss cutting-edge legal issues at the intersection of law and technology with leading experts in the field, including Stanford faculty, visiting scholars, technology and IP lawyers, entrepreneurs, and executives from Silicon Valley technology companies. During most class meetings, an invited guest lecturer will present research, a paper, or their experiences to the class on a specific topic related to law, science, and technology. Following these presentations, all students will participate with the lecturer in a class discussion based on assigned readings, the presentation, and students' own experience in the area. Attendance and preparation are vital to the success of the Colloquium and, accordingly, will constitute an important factor in the overall grade. Also, each student will individually write weekly commentary papers that evaluate, critique, and/or discuss key issues from the assigned reading. Elements used in grading: Class participation, attendance and weekly commentary papers. Satisfies the colloquium requirement for Law, Science, and Technology LLM (LST) candidates. Open to LLM students.

**LAW 705. SPILS Masters Thesis. 4 Units.**

The writing of a work of original scholarship in the area of research that each student chooses is necessary requirement of the JSM degree. During the winter quarter students are expected to submit two draft chapters: 1) any chapter of the fellow's choice in early February; and 2) a draft of the empirical research result's chapter in early March. During the spring quarter students are expected to finalize their research project, and write and submit their final thesis. Towards that end, students must complete and submit a draft of the whole thesis in early April. The final version, revised in response to the adviser's comments, must be submitted by the end of the quarter. The exact dates will be informed in advance by the teaching fellow. Elements used in grading: Thesis. This course is exclusive to SPILS students. The thesis is required for JSM graduation.

**LAW 706. Environmental Law and Policy Colloquium. 2 Units.**

The Environmental Law & Policy Colloquium offers LLM students the opportunity to discuss cutting-edge legal topics related to, among others, the environment, natural resources management, or energy policy. The colloquium meets in all three quarters. During the autumn quarter, students will engage in group policy discussions. During the winter quarter, a leading expert in the field - a faculty member, a lawyer, a public official, a member of an advocacy groups, or an entrepreneur - will present his or her research, a paper, or his or her experiences to the class on a specific topic. Following these presentations, all students will participate with the lecturer in a class discussion based on assigned readings, the presentation, and students' own experience in the area. During the spring quarter, the students will present their research papers focused on the solution of an environmental or energy issue. Attendance and active participation are important to the success of the seminar and an important factor in the overall grade. Students are expected to have carefully read and reviewed assigned materials in advance of each session. During the first quarter, students will work in teams and will have to submit memos in preparation for the policy discussion. During the second quarter, students will individually write weekly commentary papers to be submitted before the lecture evaluating, critiquing, and/or discussing key issues from the assigned reading(s). In the third quarter, students are expected to present their papers and comment on the other students' research. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper. This course is required for and limited to students in the Environmental Law & Policy LL.M. Program.

**LAW 707. SPILS Research Methods Workshop. 2 Units.**

This is a mandatory course for SPILS Fellows as part of the program's core curriculum. Its main goal is to offer students an interdisciplinary perspective about socio-legal research, and research tools for implementing their individual research projects. This Winter term workshop will complement the Research Design for Empirical Legal Studies Seminar taken in the Autumn by 1) expanding and elaborating on some of the methods analyzed during the seminar; and 2) assisting students in using such methods towards their individual research project. The workshop will consist of specialized sessions, most of them tailored towards the work of empirical research that occurs after the data collection phase. During the quarter the fellows are expected to submit drafts of different chapters of their thesis. If appropriate, the workshop may also include group and/or individual sessions designed to address the very specific needs of the research undertaken by the SPILS Fellows. Elements used in grading: Class participation, attendance and written assignments. Enrollment is restricted to SPILS fellows. The seminar is required for JSM graduation.

**LAW 708. Advanced Legal Writing for American Practice. 3 Units.**

This course orients advanced degree students and upper class JD students to a range of legal writing genres used by lawyers in practice in American law offices and before American courts. At the core of these genres are the techniques of legal research, objective and persuasive legal writing, and related legal analysis. The course presents students with realistic legal writing scenarios that they address in and out of class. Students perform legal research and analysis as they complete assignments designed to incorporate methods that American lawyers use to analyze typical legal problems while advocating on behalf of a hypothetical client in a litigation matter. Class Participation, Attendance, Written Assignments.

**LAW 709. Introduction to American Law. 3 Units.**

This course is designed to introduce international students in the Exchange and Advanced Degree Programs (LL.M. and SPILS) to the key principles of American law. The course provides an overview of distinctive features of the U.S. legal system, including its history, procedures and institutions. Topics include: Precedent role in the Common Law; the Branches of the U.S. Government and the Separation of Powers; Federalism; Due Process; and Equal Protection. The course is offered before the start of the regular Law School quarter. Special Instructions: Required for LL.M. but optional for the SPILS and Exchange Program students. Open to LL.M., SPILS and SLS Exchange Program students only. The class starts on August 31 and runs through September 18. Final exam will be scheduled on Friday, September 18. Elements used in grading: Class attendance, participation, short written assignment and final exam. LLM/SPILS students only.

**LAW 712. Research Design for Empirical Legal Studies. 3-4 Units.**

Empirical legal studies have become popular in the U.S. and are now spreading to non-U.S. law faculties as well. Usually the term applies to analyses of quantitative data and the researcher relies on data collected by others. But the term "empirical" properly encompasses both qualitative and quantitative data, including interviews, legal documents, survey research and experimental results. Analysts interested in using such data need to understand how they were collected, in order to decide what data can appropriately be used to answer different kinds of questions. Often to answer the questions of interest, a researcher needs to collect new data, which poses challenging questions about how to design an empirical research study. Answering these questions appropriately is important to ensure publication in a peer-reviewed journal, which is becoming increasingly important to legal academia. This seminar will introduce students to the wide range of research methods that can be used to answer empirical questions, provide a framework for choosing among methods, and explain how to use the methods. The project for the quarter is to design an empirical research study on a topic of your choice. Special Instructions: JD students can take the class for 3-4 units. SPILS students must take this class for 4 units. Students taking the course for 4 units must attend the additional session on Thursday, which is optional for others. After the term begins, JD students accepted into the course can transfer from section (01) into section (02), which can potentially satisfy the R requirement, with consent of the instructor. Consent Application for JD students: To apply for this course, JD students must e-mail Robert MacCoun at [maccoun@law.stanford.edu](mailto:maccoun@law.stanford.edu) and Diego Gil McCawley at [dgil@stanford.edu](mailto:dgil@stanford.edu). This course is REQUIRED for all SPILS fellows and BY CONSENT for all other students. Elements used in grading: Class participation, attendance, written assignments and final paper.

**LAW 715A. How to Ask a Question. 1 Unit.**

Asking questions is at the core of the role of an attorney. Whether it is interviewing a potential new client, interrogating a witness in a deposition, or conducting a direct or cross examination at trial, knowing how to ask a question is an essential lawyering skill. We'll explore textual materials and real life case examples in transcripts, videotape, and cinema to determine the principals and best practices for questioning. We'll learn how to prepare for questioning, how to focus, narrow, and broaden an examination, how to obtain key admissions, how to deal with a difficult opponent, when to stop asking, and how to use what's been obtained in court or otherwise to win for your clients. This course will give you the skills and tools needed for the critical roles of understanding your clients and your cases and successfully representing their causes. There is no exam or paper. Class attendance is required. Grading will be based on attendance, preparation for class by reading and considering the assigned course material and participation in class. Shanin Specter is a founding partner of Klein & Specter, P.C., in Philadelphia, concentrating in catastrophic injury litigation. He has obtained more than 200 settlements or verdicts in excess of \$1 million and is a member of the Inner Circle of Advocates, whose membership is limited to the top 100 plaintiffs' attorneys in the United States. Special Instructions: This class will meet on Friday the first three weeks of Autumn Quarter (September 25, October 2 and October 9). Students must attend all three classes. Early drop deadline: Students may not drop this course after the first class. Elements used in grading: Class Participation, Attendance.

**LAW 715B. Strategic Litigation for Racial Justice. 1 Unit.**

Recent events in our country have dramatically highlighted the fact that we are not a post-racial society, and that structural racism and implicit bias are as harmful to people and institutions as intentional discrimination. Currently, plaintiffs can only show a violation of the Equal Protection Clause of the 14th Amendment - and several other antidiscrimination laws - by proving intentional discrimination. This seminar will examine this "intent standard" and its significant barriers to racial justice litigation. The course will review social science research, including studies on implicit bias, racial anxiety, stereotyping, and other concepts, to explore how contemporary discrimination manifests. We will address how legal advocates and the law can utilize such research to challenge and remedy discrimination through strategic litigation. We will examine real-world examples of this, including in the context of school discipline and the school-to-prison pipeline. Special Instructions: This class will meet on Friday the second three weeks of Autumn Quarter (October 16, October 23 & October 30). Students must attend all three classes. Early drop deadline: Students may not drop this course after the first class. Elements used in grading: Written assignments (reflection papers) and class participation.

**LAW 715C. Fundamentals of Structuring Private Equity Deals. 1 Unit.**

This course will cover the essential elements of representing private equity funds, entrepreneurs, and senior management in venture capital, growth equity and leveraged buyout transactions. Emphasis will be placed on structuring equity arrangements that are characteristic of venture capital and other private equity transactions, understanding business and legal issues that commonly arise in negotiating investment and acquisition agreements, and tax planning. Basic financial and accounting principles will be discussed. Special Instructions: This class will meet on Friday the first three weeks of Spring Quarter (April 1, April 8 and April 15). Students must attend all three classes. Early drop deadline: Students may not drop this course after the first class. Elements used in grading: Grading will be based on class participation and written assignments. Prerequisites: Corporations and Taxation 1.

**LAW 715D. Digital Currency and Cybercrime. 1 Unit.**

The way that we transact is ripe for disruption given the advent of digital currencies. How does and will the law treat this disruptive technology? This course will study digital currency and other alternative payment mechanisms. Interest in this topic has exploded in recent years, as Bitcoin and numerous brands of competitors have risen in value and are gaining increasing acceptance as payment devices. Proponents of Bitcoin herald it as a better payment mechanism: lower transaction costs, international, more secure, the opportunity to bank the "unbanked," and with a set protocol for increase in supply. However, there are also legitimate and serious concerns about their use, including the worry that the anonymous nature of digital currency facilitates illegal transactions and money laundering. These concerns have triggered a growing number of government actions. The course will cover topics such as the origin and function of Bitcoin; examine the legal and regulatory treatment of digital currencies; and review recent enforcement trends in the criminal arena. It is also anticipated that the course will take account of new developments in this rapidly evolving topic. If time allows, there would also be the possibility of prominent guest speakers or outside events in the community given SLS's proximity to Silicon Valley housing digital currency companies. This class will meet on Friday the first three weeks of Winter Quarter (January 8, January 15, and January 22). Students must attend all three classes. Early drop deadline: Students may not drop this course after the first class. Elements used in grading: Class Participation, Attendance, Final Paper.

**LAW 717. Intermediary Liability. 3 Units.**

This course will focus on the liability of intermediaries such as Internet service providers, search engines, and web sites for content created or posted by others. Topics will include intellectual property, tort, and criminal liability. The course will cover international as well as U.S. liability. Students are expected to write and present a research paper during the course of the quarter. Special Instructions: For reasons of pedagogy, students on the waitlist for the course will be admitted if spots are available on the basis of priority, degree of study and class level. Elements used in grading: Class Participation, Attendance, Final Paper.

**LAW 718. Advanced Legal Writing: Appellate Litigation. 3 Units.**

This course will improve one's writing skills and develop the habits needed to become an effective and powerful legal writer. We will study advanced grammar and usage, typography, pronunciations, classical rhetoric, drafting and editing, and examples of great legal writing. The class will emphasize appellate litigation and appellate brief writing, and should be useful to students seeking appellate-court clerkships at any level. Grading will be based on a final exam and an appellate brief that the student will write. Elements used in grading: Attendance, Final Paper, Final Exam.

**LAW 719. Legal Design Lab: Consumer Contracts. 2 Units.**

A persistent and central challenge in consumer contracts remains the fact that consumers enter into contracts without reading or being otherwise aware of the terms to which they are agreeing. This problem is exacerbated in the current world of increasingly smart, small and interconnected devices, where it has become even more difficult and annoying for consumers to read the terms and conditions before downloading software, using a new piece of hardware, or accessing a new web service. Moreover, consumer relationships over the internet often require individuals to disclose and relinquish control over personal data (about health, finances, and location), making the problem of informed consent even more consequential. It has become increasingly clear that simply mandating more textual disclosure is not a solution, particularly in a world where individuals struggle to sift, sort and process the vast amounts of information now available at low or zero cost. This presents a challenge that we address in this legal design lab: how can we present the complex and important information in a contract to lay people, so that they engage with it, comprehend and act on it in their own best interests? In this class, students will tackle this consumer-contract design challenge. In the first half of the course, they will study and discuss principles of contract design, theories of consumer consent, communication design, privacy scholarship, and behavioral economics to understand the dynamics of how lay people interact with legal text and choices, particularly in digital environments. In the second half, they will work in teams to address a specific design challenge, engage knowledgeable experts from industry and generate new strategies and interfaces. They will engage in a design process beginning with discovery, to prototype, to testing their designs of consumer-facing contracts. Elements used in grading: The course grade will be based on the instructors' evaluation of: 1) individual responses to short-answer assignments based on the class readings, 2) class and team participation 3) the contract design, report and end-of-quarter presentation. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration) to the instructors. See Consent Application Form for submission deadline.

**LAW 720. The Business of Intellectual Property: When Patents, Technology, Competition and Finance Converge. 3 Units.**

From President Obama deriding patent trolls in a State of the Union address to the smart phone patent wars regularly making headlines in mainstream press, patents are no longer a topic relegated to engineers, scientists and patent attorneys. Now a critical area for the C-suite, board rooms, trading floor, political arenas and beyond, today's debate encompasses a range of complex topics, including the role of patents in promoting innovation, protecting market share and shaping technology; how patents can drive strategic and competitive advantage; proper valuation of assets; patent assertion entities that arose to take advantage of inefficiencies in the system; and what a balanced patent system requires. As a framework for our class discussion of these topics, we will examine the market, legal and competitive forces that drove five major tech companies (Apple, Blackberry, Ericsson, Microsoft and Sony) to form a consortium called Rockstar to buy for \$4.5B the bankrupt technology giant Nortel Networks' massive patent portfolio. Their move kept the patents out of the hands of another bidding consortium (Google and Intel), and Google's response to the loss included an acquisition of Motorola and its extensive patent portfolio for \$12B. We will then follow Rockstar's ensuing licensing campaign that led to eight patent lawsuits and nearly 30 patent validity challenges involving major competitors. With dozens of additional offensive and defensive actions looming, industry observers predicted Armageddon as corporate relations continued to fray. Instead, a groundbreaking resolution was brokered that all sides considered a success. In what is recognized as the industry's most complex and innovative intellectual property deal, RPX, a public company focused on reducing patent risk, brought together a cross-industry syndicate of over 40 US and foreign licensee participants, including Google and Cisco, to purchase from Rockstar for \$900M its remaining patent assets, resulting in a dismissal of all actions and a wind down of Rockstar forever. This case study will be the basis of an interdisciplinary look at how patents, technology, competition and finance converge in the real world, including corporate, marketplace, policy and regulatory dynamics. Students will participate in mock negotiations, deal structuring, consortium-building, and valuation exercises. No technical or legal background is required. Special Instructions: This class is limited to 25 students, with an effort made to have students from SLS (15 students will be selected by lottery) and students from the Graduate School of Business and the School of Engineering (10 students). Non-Law students may apply for this class by submitting a Non-Law Student Add Request Form available at <http://www.law.stanford.edu/organizations/offices/office-of-the-registrar/registration/non-law-students>. Elements used in grading: Class Participation, Written Coursework & Attendance.

**LAW 721. Private Equity Investing: Quantitative Skills Seminar. 1 Unit.**

This course has been created to supplement Law 522, Private Equity Investing. The focus will be on the quantitative aspects of private equity investing. The primary pedagogical objective is to have students learn the skills required to do financial analysis and spreadsheet modeling. Students will develop a thorough understanding of "the time value of money" and the concepts of present value, internal rates of return, and the discounting of cash flows and annuity streams. The key principles of entrepreneurial finance and deal arithmetic will be presented, including the implied valuation of an investment, blended returns, the math of multitiered capital structures, contingent claims analysis, DCF valuation techniques, investment fund economics, option mechanics and variable pricing mechanisms. Mastery of these fundamentals will allow students to develop and strengthen their ability to prepare forecasts, craft deal structures and run the numbers on real world transactions. Special Instructions: In order to enroll in PEI: Quantitative Skills students must concurrently enroll in Private Equity Investing (LAW 522). In other words, no student may enroll in either Law 522 or Law 721 without also enrolling in the other. Students accepted to enroll in Private Equity Investing (for which a Consent Application Form is required) will automatically be able to enroll in LAW 721. Law 721 will be graded on a Mandatory Pass/Restricted Credit/Fail (MP/R/F) basis. Elements used in grading: class attendance, participation and written assignments.

**LAW 722. Contracts: American Law. 4 Units.**

This course will provide advanced-degree students with coverage of Contracts law comparable to the fall course offered for first-year JD students. The course will identify the scope and purpose of the legal protection accorded to interests predicated on contract. We will focus on problems of contract formation, enforceability, interpretation, performance and excuses for non-performance, and remedies for breach. The course will cover both the U.S. common law of contracts and the basics of UCC Article 2 (sales of goods). We will spend considerable time discussing contract law from a law and economics perspective. Not open to JD students. Open only to students in the SLS Advanced Degree Programs. Elements used in grading: Class Participation, Attendance, Final Exam.

**LAW 724. Ethics On the Edge: Business, Non-Profit Organizations, Government, and Individuals. 2 Units.**

The objective of the course is to explore the increasing ethical challenges in a world in which technology, global risks, and societal developments are accelerating faster than our understanding can keep pace. We will unravel the factors contributing to the seemingly pervasive failure of ethics today among organizations and leaders across all sectors: business, government, and non-profit. A framework for ethical decision-making underpins the course. The relationship between ethics and culture, global risks (poverty, cyber-terrorism, climate change...), leadership, and the law and policy will inform discussion. Prominent guest speakers will attend certain sessions interactively. A broad range of international case studies might include: Ebola; Facebook's mood manipulation research; anonymous social media; Google's European "right to be forgotten"; driverless cars; Space X (Elon Musk's voyages to Mars); ISIS' interaction with international NGOs; sexual assault on US University campuses and in the US military; the ethics of corporate social responsibility (through companies such as L'Oréal, Whole Foods and Wal-Mart); European migration; Human Rights Watch's questions of consent; corporate and financial sector scandals. Final project in lieu of exam on a topic of student's choice. Attendance required. Class participation important (with multiple opportunities beyond speaking in class). Strong emphasis on critical thinking and testing ideas in real world contexts. There will be a limited number of openings above the set enrollment limit of 40 students. If the enrollment limit is reached, students wishing to take the course should contact Dr. Susan Liautaud at [susanl1@stanford.edu](mailto:susanl1@stanford.edu). The course offers credit toward Ethics in Society, Public Policy core requirements (if taken in combination with Public Policy 103F), and Science, Technology, and Society and satisfies the Ways of Thinking requirement. The course is open to undergraduate and graduate students. Undergraduates will not be at a disadvantage. NOTE: This course does not meet the SLS Ethics requirement. Elements used in grading: Class Participation, Attendance, Written Assignments, and Final Paper. Cross-listed with Ethics in Society (ETHICSOC 234R), Public Policy (PUBLPOL 134, PUBLPOL 234).

**LAW 726. Negotiation on the Ground: Discussions at the Intersection of Theory and Practice. 1 Unit.**

We can read any number of books about negotiation, but how do the concepts and principles play out in the real world? This dinner colloquium will meet with distinguished negotiators working in a variety of fields to reflect on and draw lessons from their deep and diverse experience. Guests for last year spoke on: studio and talent perspectives in entertainment negotiations, business and legal perspectives in biotechnology companies, public/private policy negotiations in natural resource management, criminal justice, and California health policy. Pre-Requisite: Negotiation Seminar or substantial equivalent. Schedule: Wednesday, 5:30-8:00pm. There will be five presentation/dinner discussion sessions during the Winter Quarter, of which students are required to attend four. Elements used in grading: Class participation, reading, preparation and submission of questions for discussion, and attendance.

**LAW 727. Health Law: Quality and Safety of Care. 3 Units.**

Concerns about the quality of health care, along with concerns about its cost and accessibility, are the focal points of American health policy. This course will consider how legislators, courts, and professional groups attempt to safeguard the quality and safety of the health care patients receive. The course approaches "regulation" in a broad sense. We will cover regimes for determining who may deliver health care services (e.g. licensing and accreditation agencies), legal and ethical obligations providers owe to patients (e.g. confidentiality, informed consent), individual and institutional liability for substandard care, and various proposals for reforming the medical malpractice system. We will also discuss the Patient Protection and Affordable Care Act (aka, "Obamacare"), which is launching many new initiatives aimed at assuring or improving health care quality. Special Instructions: Any student may write a paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class Participation, Exam or Final Paper. (Cross-listed with School of Medicine - MED 209).

**LAW 728. Stolen Art. 2 Units.**

Public fascination with stolen art is evident from its almost daily coverage in the media, including the New York Times, the Wall Street Journal, the Art Newspaper, the Art Crime Journal, and numerous online sources. What is less evident is the extent to which apparently disparate art, cultural heritage and law topics share a significant stolen art interest. The course will deal with five currently lively stolen art topics: Imperialism; the Holocaust; Indigenous Art; Collectors and Museums; and the Illicit Trade in Antiquities. Law students and graduate students in other fields at Stanford (Art History, Anthropology, Archaeology, Classics, and others) will be eligible to take the course. Grades will be based on research papers (up to five students may write research papers) or final examinations. Special Instructions: Students have the option to write a research paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Final Exam or Final Research Paper.

**LAW 729. Legal Informatics. 2-3 Units.**

The legal system is undergoing rapid change due to - among other forces - expanding use of information technology in legal services as well as globalization of the legal industry. This class offers an overview of how technology is used in legal today's legal practice and how it will be changing the landscape of the legal profession and the law more broadly in the foreseeable future. Through this class students gain an understanding of the unique challenges and opportunities the legal system and the legal industry are facing and learn about innovative new systems seeking to address them. Students will be introduced to technologies that are commonly used for legal research, as well matter management and client management by law firms as well as in-house departments. Students will also be familiarized with the next generation of innovative systems and platforms that challenge the way law has been practiced to date, but also promise to increase the efficiency of our legal system. The class modules include: (i) Legal Document Management (including electronic legal research, e-discovery, specialized legal databases), (ii) Legal Infrastructure (including: case management, legal lead generation, managing the firms legal business process and legal process outsourcing), and (iii) Computational Law (including: legal expert systems, computable contracts, and unauthorized practice of law issues). Expert guest-speakers from academia and industry will provide for a diverse and interdisciplinary experience. Successful legal technology entrepreneurs and thought leaders in the legal technology space will provide a practical angle to the discussion. Special Instructions: Grades will be based on class participation including class preparation (25% of grade) and one of the following two options: Option 1 (section 01): Legal Technology Project (individual or group). Students will be presented with a series of research problems posed by industry partners of CodeX - The Stanford Center for Legal Informatics (<http://codex.stanford.edu>). Students can select a project and, individually or as part of a team, address the posed problem in form of a written report or by preparing a technical demonstration project/prototype that aims to solve the problem posed by the industry partner (75% of grade); or Option 2 (section 02): independent research paper (75% of grade). Students shall write an independent research paper on a legal informatics topic. You are invited to propose a topic and a working title and to discuss your topic ideas with us. The topic and the working title of the research paper must be approved by the instructors, before you start your detailed research. Independent research papers require by definition that students include other research materials besides the introductory and advanced readings for class. Students electing option 2 will receive Research (R) credit. Students taking the course for R credit can take the course for either 2 or 3 units, depending on the length of the research paper. If you wish to earn 2 units, the research paper shall be at least 18 pages in length (double-spaced, 12-point font size, 1-inch margins). If you wish to earn 3 units, the research paper shall be at least 26 pages in length (double-spaced, 12-point font size, 1-inch margins). Each student can choose one of the above two options, whichever he/she prefers. After the term begins, students electing option 2 can transfer from section (01) into section (02), with consent of the instructor. There are no prerequisites for this class. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper. Cross-listed with Computer Science (CS 204).

**LAW 730. Advanced Legal Writing: Technology Transactions. 3 Units.**

This course covers the foundations of drafting contracts in a modern commercial setting, primarily through weekly hands-on writing exercises that illustrate business problems commonly found in today's technology transactions law practice. Topics to be addressed will include basic contract anatomy, common clause ambiguities, structuring for readable "flow", and drafting-for-negotiation techniques. Final examination will involve crafting a full-length technology license agreement from a rough term sheet that appears to have been pecked out on some sort of mobile device. No prior business law coursework, intellectual property background, or martial arts proficiency required. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Exam.

**LAW 731. Current Issues in Network Neutrality. 2 Units.**

Do we need network neutrality rules and, if yes, what should they be? After more than ten years, this question is still hotly debated around the world. Network neutrality rules limit the ability of Internet service providers to interfere with the applications, content and services on their networks; they allow users to decide how they want to use the Internet without interference from Internet service providers. In the US, the recent decision by the Court of Appeals for the DC Circuit in *Verizon v. FCC* has re-opened the debate. In December 2010, the Federal Communications Commission (FCC) adopted the Open Internet Order, which enacted binding network neutrality rules for the first time. In January of this year, the Court of Appeals for the D.C. Circuit struck down the core provisions of the Open Internet Order - the rules against blocking and discrimination. As a result of this ruling, Internet service providers like Verizon, AT&T or Cox Cable that connect users to the Internet are now free to block any content, service or application they want. They can slow down selected applications, speed up others, or ask application or content providers like Netflix or Spotify to pay fees to reach their users. These practices would fundamentally change how we experience the Internet. In the wake of the Court's decision, policy makers, stakeholders and observers in the US are debating how to best ensure that the Internet remains open and free. In February, the Federal Communications Commission opened a new docket to collect public input on the best way to proceed. In Europe, the European Commission, the European Parliament and the member states are currently considering which approach to network neutrality they should take. The Brazilian Parliament is in the process of adopting network neutrality rules. This seminar aims to enable students to participate in the ongoing policy debates over network neutrality in the US and abroad. Class sessions will explore whether there is a need for network neutrality rules and, if yes, what kind of rules a network neutrality regime should include. For example, should network neutrality rules only ban blocking, or also discrimination? And if yes, what kind of differential treatment should be banned? Should Internet service providers be allowed to charge application or content providers for prioritized or otherwise enhanced access to their Internet service customers? How can we find network neutrality rules that allow network providers to manage their networks and that allow innovation in the network, while protecting the interests of users and application developers? Does competition in the market for Internet services remove the need for network neutrality rules? And finally, what is the best way to move forward in the US? Students will work in groups on written assignments that explore specific questions from the perspective of particular Internet companies or interest groups. Students are expected to attend all sessions of the class and participate in the class discussion. Special Instructions: Students may submit consent applications to enroll in the "Current Issues in Network Neutrality" seminar and the "Next Steps in Network Neutrality" policy lab practicum. Students concurrently accepted in the seminar and the policy practicum will research and write parts of white papers and comments to the Federal Communications Commission that will help policy makers assess the available options. Students will be required to attend the seminar and participate in the discussion, but will not do any of the written assignments for the seminar. Students enrolled in the seminar and the practicum will have the option to write papers for PW or R credit in the practicum, with instructor consent. The class is open to law students and students from other parts of the university. It does not require any technical background. Elements used in grading: Class participation, attendance, written assignments. CONSENT APPLICATION: To apply for this course, students must complete and submit a Consent Application Form available on the SLS website (Click Courses at the bottom of the homepage and then click Consent of Instructor Forms) to the instructor. See Consent Application Form for submission deadline.

**LAW 733. Topics in American Legal Practice. 1 Unit.**

This course is designed to introduce international students to American legal practice. Elements used in grading: Final Paper.

**LAW 734. Introduction to Antidiscrimination Law. 3 Units.**

This course will focus on the statutory legal rules (primarily federal) governing discrimination on the basis of race, national origin, sex, disability, and other protected classifications. With a rotation of instructors including and beyond Ford and Anderson, the course will include modules regarding: employment discrimination (including sexual harassment), fair housing law, voting rights, and disability law. Note: The course will be designed to minimize overlap with Ford's Employment Discrimination course, and thus students are welcome to take both. Elements used in grading: Class Participation, Attendance, Final Exam.

**LAW 735. Cities in Distress. 2-3 Units.**

In 2013, the City Detroit became the 28th city to declare municipal bankruptcy or to enter a receivership for fiscal crisis since late 2008, a window of time that has seen five of the six largest municipal bankruptcies in American history. This course will focus on these cities and the legal tools available to facilitate their restructuring and recovery. Subjects will include: (1) the basics of local finance; (2) an introduction to the primary causes of local fiscal distress; and (3) tools for state and federal governance of city finances and financial distress (including audits and other oversight mechanisms, state regulation, municipal bankruptcy, and state receiverships). The course will feature readings focused on law and cities across the country, including in California, Pennsylvania, Michigan, and North Carolina. A special unit in the course will focus squarely on the city of Detroit's bankruptcy. Grades will be based on class participation and (1) weekly reflection papers of 3-5 pages each week for each of our speakers/topics or (2) a long research paper. After the term begins, students accepted into the course can transfer from section (01) into section (02) which meets the R requirement, with consent of the instructor. Students taking the course for R credit can take the course for either 2 or 3 units, depending on the paper length. Elements Used in Grading: Class Participation, Attendance, Written Assignments, Final Paper.

**LAW 736. Comparative Venture Capital - China. 2 Units.**

This course is taught in conjunction with Law 736A. Students may enroll for this course alone or for both this course and Law 736A. Law 736 is intended to introduce students to the legal and financial principles underlying venture capital investment in start-up enterprises and innovative technologies. A special emphasis of this course will be a comparative analysis of the ways in which the various legal and financial structures employed by venture capitalists are replicated in other legal environments, with a focus on the largest venture capital and IPO market in the world - China. The first eight weeks of the course will coincide with the first eight weeks of Winter Quarter, and will be conducted at Stanford Law School. Class sessions will be comprised of lectures regarding the basic concepts and structures, as well as seminar discussions with venture capital industry participants. Elements used in grading: Final exam, attendance and class participation. Special Instructions: Enrollment in the Beijing option is limited to 12 students (See Law 736A for application instructions and deadline).

**LAW 736A. Comparative Venture Capital - China: Field Study. 1 Unit.**

This is the Stanford Center at Peking University in Beijing component of Comparative Venture Capital - China (Law 736). For details, see course description for Law 736. During spring break 2016, the course will be held at the Stanford Center at Peking University in Beijing, and will consist of meetings and seminars with lawyers, entrepreneurs, and venture capitalists active in the Chinese venture capital market. Students will also tour start-up enterprises made possible with venture investments. Enrollment is limited to 12 students. PLEASE NOTE: Students will need a passport and a visa to travel to Beijing. Elements used in grading: class participation and short writing assignments. APPLICATION: To apply for this course, students must complete and e-mail the Application Form available on the SLS Registrar's Office website (see Registration) to the SLS Registrar's Office. See Application Form for submission deadline.

**LAW 738. American Constitutional History from the Civil War to the War on Poverty. 3 Units.**

This course addresses U.S. constitutional history from the post-Civil War Reconstruction period through the mid-20th century. Because of the breadth of the subject matter, the view will necessarily be partial. In particular we will take as our focus the way the Constitution has provided a point of political mobilization for social movements challenging economic and social inequality. Topics covered include: Civil War Reconstruction and restoration; the rise of corporate capitalism and efforts to constrain it; Progressive Era regulation; the New Deal challenge to federalism and the anti-New Deal backlash; government spending; WWII and the Japanese Internment; the Civil Rights Era, and the War on Poverty. Readings will include both legal and historical materials with a focus on the relationship between law and society. Readings will include both legal and historical materials with a focus on the relationship between law and society. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper. Paper extensions will be granted with instructor permission. No automatic grading penalty for late papers. Cross-listed with History (HISTORY 155).

**LAW 739. International Deals: The Economic Structure of Business Transactions. 4 Units.**

This course applies economic theory to the practice of structuring contracts. In the first part of the course, we read economics articles and case studies, focusing on problems of imperfect information. In the second part, we explore the connection between economic theory and contracting practice by dividing into groups to study a current deal. Groups examine a deal in detail and make a presentation to the class. We then hear from the lawyer or principal who worked on that deal. When it works, the students' and the practitioners' analyses are complimentary and enlightening. This year, we will focus on deals with an international component. In the past, we have examined cross-border joint ventures, movie and television financings, biotech alliances, venture capital financings, private equity investments, and architectural services. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Exam. Prerequisite: Corporations. If necessary, Corporations can be taken concurrently.

**LAW 740. Guns, Drugs, Prisons, and Other Empirical Debates in Law and Policy. 2 Units.**

Empirical debates are often crucial to decisions by judges and policymakers. This course will focus on some of these debates with the goal of both informing students on the substantive issues and helping them to develop the ability to understand and evaluate empirical studies by reading major studies on the issues of guns, drugs, prisons and a variety of other hotly contested empirical issues in law and policy. Although we will be reading actual statistical/econometric studies, there is no pre-requisite for the class since it is not a hard-core quantitative empirical methods class, but rather is designed to develop the ability to be a thoughtful consumer of empirical research. The goal is to provide information that judges, litigators, policymakers, and informed citizens would find useful in understanding the strengths and weaknesses of empirical evidence. The final in-class exam will involve a critique of an actual empirical paper. One page comment papers will be written for each class. Depending on the size of the class, we may also have student presentations of certain papers.

**LAW 741. Introduction to Law and Economics. 1 Unit.**

This course will introduce students to the "law and economics" way of thinking about the legal system. It is designed primarily for students who have little or no prior training in economics and who are unlikely to take more advanced courses in the field (such as the 3 unit Law 528, "Economic Analysis of Law"). This class will meet for six 1.5 hour sessions during the first part of the quarter. We will focus on the core bodies of law taught to first-year law students: tort law, contract law, property law, criminal law, and civil procedure. For each of these bodies of law, the economic approach will be described in non-technical terms and then this approach will be used to examine a key case or key issue within that body of law. First-year law students are especially welcome in this course. There are no prerequisites to take this course. Elements used in grading: Five short take-home exercises (graded on a mandatory pass-fail basis).

**LAW 742. Federalism. 3 Units.**

This course is an overview of legal and policy issues connected to federalism. We will examine a set of core theoretical questions - the values federalism serves; the relationship of federalism and individual and minority rights; and the role of judges in enforcing federalism through judicial review - across a wide range of contemporary legal debates (e.g., same-sex marriage, health care, immigration, voting rights). While much of the seminar will focus on the United States, we will also consider federalism in comparative context by examining the constitutions and legal doctrines of other regimes. Special Instructions: After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class Participation, Written Assignments or Research Paper.

**LAW 743. Advanced Legal Writing for American Courts. 3 Units.**

This course orients LLM, advanced degree students, and JD students to a range of legal writing genres used by lawyers in practice before American courts and by courts in their decision making. At the core of these genres are the techniques of legal research, objective and persuasive legal writing, and related legal analysis. The course presents students with realistic legal writing scenarios that they address in and out of class. Students perform legal research and prepare an analytical memorandum advising a hypothetical judge and write a short letter brief. These assignments are designed to help students adapt their writing skills by incorporating methods that American lawyers use to analyze typical legal problems and to advocate on behalf of their clients and that American judges use to evaluate the cases before them. Elements used in grading: Class Participation, Attendance, Written Assignments.

**LAW 744. Moral Minds. 2 Units.**

Recent psychological advances in our understanding of the cognitive and social origins of morality cast a new light on age-old questions about ethics, such as: How did our moral sense evolve in our species? How does it develop over our lifetime? How much does our culture, religion, or politics determine our moral values? What is the role of intuition and emotion in moral judgment? How "logical" is moral judgment? How do other people's moral choices affect us? Does character matter or is behavior entirely dictated by the situations we find ourselves in? If it is purely situational, are we morally responsible for anything? How far will we go to convince ourselves that we are good and moral? We will review empirical answers to these questions suggested by behavioral research, and explore their implications for ethics. Open to all graduate students, including advanced degree candidates at the professional schools (law, business, medicine, computer science, education, etc.). Enrollment limited to 16 by consent of instructors. Elements used in grading: Class Participation, Attendance, Readings. CONSENT APPLICATION: Students enrolled in the course will be selected through an application process. The application can be found at <http://web.stanford.edu/~arnewman/MoralMinds.fb>, and is due at 11:59 p.m. on November 14, 2014. Cross-listed with Ethics in Society (ETHICSOC 304) and Psychology (PSYCH 264).

**LAW 745. Intellectual Property: International and Comparative Copyright. 3 Units.**

Music, motion pictures, books and computer programs are protected instantly upon their creation and without further ado under the copyright laws of 180+ countries. Few copyright licenses today fail to reach across borders, and copyright litigation increasingly calls for a general understanding of foreign law. One great challenge for lawyers is to determine who owns the rights to these works across countries with differing legal systems. Another challenge is to determine what rights and remedies attach to these works, and what exceptions to rights apply, across countries that assign different policy weights to the interests of creators and users. This course will focus on the counselling considerations that surround the exploitation of foreign and domestic copyrighted works, respectively, in US and foreign markets through licensing, litigation, or both. The course will survey the principal legal systems and international treaty arrangements for the protection of copyrighted works as well as questions of jurisdiction, territoriality, national treatment, and choice of law. There will be no exam in the course, but rather four problem sets that will be discussed in separate class sessions. Students may select which three of the problem sets they wish to have graded. Elements used in grading: In-class problem sets.

**LAW 746. Climate Change Policy: Economic, Legal, and Political Analysis. 4 Units.**

This course will advance students' understanding of economic, legal, and political approaches to avoiding or managing the problem of global climate change. Beyond focusing on economic issues and legal constraints, it will address the political economy of various emissions-reduction strategies. The course will consider policy efforts at the local, national, and international levels. Theoretical contributions as well as empirical analyses will be considered. Specific topics include: interactions among overlapping climate policies and between new policies and pre-existing legal or regulatory frameworks; the role that jurisdictional or geographic scale can play in influencing the performance of climate policy approaches; and numerical modeling and statistical analyses of climate change policies. Elements used in grading: Class Participation, Written Assignments, Final Exam. Cross-listed with Economics (ECON 159).

**LAW 747. Law, Slavery and Race. 3 Units.**

This course will explore the interaction of law, slavery and race in the United States, as well as from a comparative perspective. We will read original documents, including excerpts of trial transcripts, appellate opinions, treatises, codes, and first-person narratives. We will study the way law, politics and culture interacted to shape the institution of slavery and the development of modern conceptions of race. Course lectures and discussions will focus on questions such as: Did different legal regimes (Spanish, French, British) foster different systems of race and slavery in the Americas? How did/does law work "on the ground" to shape the production of racial hierarchy and creation of racial identities? In what ways did slavery influence the U.S. Constitution? How has race shaped citizenship in the U.S., and how can we compare it to other constitutional regimes? The course will begin with the origins of New World slavery, race and racism, and move chronologically to the present day. All students will be required to read and to participate in classroom discussion (obviously, attendance is required). Students will prepare two questions for discussion for 12 out of 20 class meetings; participation and discussion questions together will count for 25% of the grade. For students taking the exam, there will be a one-day take-home essay exam. Alternatively, students may write a final paper based on original research, of approximately 26 pages in length. A prospectus and rough draft will be required, for 5% and 10% of the grade respectively. The final exam or paper will be worth 75% of the grade (including the prospectus and rough draft). After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper or Final Exam. Cross-listed with African & African American Studies (AFRICAAM 254D), Comparative Studies in Race & Ethnicity (CSRE 154D) and History (HISTORY 254D) & (HISTORY 354).

**LAW 748. Comparative Class Actions. 1 Unit.**

Although many lawyers regard the class action as a quintessential U.S. procedure, more than two dozen countries in North and South America, Northern, Central and Western Europe, Australia, Asia, Africa and the Mid-East have adopted some form of modern representative class action, and the number of jurisdictions with class actions is continuing to increase. Although the U.S. Supreme Court has steadily narrowed the scope for U.S. class actions, other jurisdictions see the procedure as appropriate for resolving securities, antitrust, consumer and personal injury claims. Some jurisdictions have invited business to resolve trans-national claims against them in their own domestic courts, and plaintiff attorneys who cannot obtain class certification in U.S. courts coordinate non-class mass actions with class action attorneys outside the U.S. Stanford is collaborating with the University of Windsor (Ontario) and Tilburg University (the Netherlands) law schools to offer a 1-credit seminar on these developments. Using a combination of synchronous and asynchronous on-line communication, faculty and students at the 3 law schools will describe and analyze differences and similarities among the 3 countries (quite different) class action regimes. The class will meet weekly (sometimes separately by school and sometimes with faculty and students from the 3 schools together virtually) and SLS students will work with students at the other 2 institutions to research issues that cut across all three jurisdictions. This is a great opportunity to discover how lawyers in non-U.S. jurisdictions think about problems that arise trans-nationally, and some of the student you encounter in the seminar may be the practitioners you will litigate besides or against in future global litigation. Elements used in grading: Class Participation, Attendance, Written Assignments. CONSENT APPLICATION: Students interested this course should contact Professor Hensler directly via email at dhensler@stanford.edu.

**LAW 749. Global Litigation. 3 Units.**

A securities class action is resolved in the NJ federal court for US investors and in the Amsterdam Court of Appeals for all other investors world-wide. Apple sues Samsung for patent infringement in N.D. CA and Samsung counter-sues in Korea, Japan and Germany. Merck is sued for injuries arising from its prescription drug, Vioxx, in the U.S., Canada and Australia, and the Australian lawyers are directed to challenge an otherwise unproblematic judicial ruling because of its possible impact on the U.S. litigation; meanwhile class certification is denied in the U.S. but granted in Canada. Philip Morris' Hong Kong subsidiary files a claim in an international arbitration tribunal charging that Australia's public health protection statute regarding tobacco marketing violates Australia's bi-lateral investment treaty with Hong Kong. Lawyers who received a \$9 billion judgment from Ecuadorian courts against Chevron for environmental damage fight to enforce it in courts in Argentina, Brazil and Canada while Chevron's lawyers file a RICO suit against the plaintiff lawyer in the federal court for the N.Y.S.D. With the globalization of the economy we are seeing the globalization of litigation and the emergence of a new class of "global lawyers" who advise clients on litigation risks and opportunities in jurisdictions with different substantive law, procedural rules and legal and judicial cultures. This seminar will consider the doctrinal, procedural and practical challenges that arise when litigation goes global. We will consider the high profile cases in which these issues have played out in recent years and meet some of the lawyers who are creating a new virtual international court system for the resolution of global disputes. Special Instructions: Students in this course may if they wish also register for a 1-credit course on comparative class actions (Law 748), which will be taught collaboratively with faculty and students in U. Windsor (Ontario) and Tilburg University (the Netherlands). Elements used in grading: Class Participation, Attendance, Final Paper.

**LAW 750. Topics in Complex Litigation. 1 Unit.**

This course is an introduction to complex litigation and institutional design in the contemporary American legal system including the general move away from regulation and toward litigation in recent decades, the legal and policy implications of that trend, and contemporary efforts to retrench or remake the system.

**LAW 751. Just and Unjust Wars. 2 Units.**

War is violent, but also a means by which political communities pursue collective interests. When, in light of these features, is the recourse to armed force justified? Pacifists argue that because war is so violent it is never justified, and that there is no such thing as a just war. Realists, in contrast, argue that war is simply a fact of life and not a proper subject for moral judgment, any more than we would judge an attack by a pack of wolves in moral terms. In between is just war theory, which claims that some wars, but not all, are morally justified. We will explore these theories, and will consider how just war theory comports with international law rules governing recourse to force. We will also explore justice in war, that is, the moral and legal rules governing the conduct of war, such as the requirement to avoid targeting non-combatants. Finally, we will consider how war should be terminated; what should be the nature of justified peace? We will critically evaluate the application of just war theory in the context of contemporary security problems, including: (1) transnational conflicts between states and nonstate groups and the so-called "war on terrorism"; (2) civil wars; (3) demands for military intervention to halt humanitarian atrocities taking place in another state. Enrollment will be limited to 20 students -- 10 from SLS who will be selected by lottery and 10 from H&S. Elements used in grading: Class Participation, Written Assignments, Final Exam. Cross-listed with Ethics in Society (ETHICSOC 205R), (ETHICSOC 305R) & Philosophy (PHIL 205R), (PHIL 305R).

**LAW 752. International Criminal Justice. 2 Units.**

The establishment of a global system of international justice reveals that the promises made during the Nuremberg era are not mere history. Over the past decade, the international community has undertaken a considerable investment in enforcing international criminal law in conflict and post-conflict situations with the establishment of the international criminal tribunals for the former Yugoslavia, Rwanda, Sierra Leone, East Timor, Cambodia, and Lebanon. As these ad hoc institutions wind down, the International Criminal Court (ICC) has become fully functional, although it is plagued by challenges to its legitimacy, erratic state cooperation, and persistent perceptions of inefficacy and inefficiency. Moreover, the global commitment to international justice remains inconsistent as calls for criminal accountability for the situations in Sri Lanka, South Sudan, and Syria-among others-go unanswered. This intensive mini-course in the new September Term will introduce students to the law, institutions, and actors that constitute the system of international criminal justice and to the political environment in which it operates. The classroom component (offered at Stanford during the first week of the course) will offer an elemental analysis of international crimes as they have evolved in international law and focus on the challenges of interpreting these norms in a criminal prosecution. Jurisprudence from the various international tribunals will be scrutinized with an emphasis on understanding the prosecution's burden, available defenses, and sources of proof. The course will culminate in a visit to The Hague in the second week of the course, during which time students will meet with principals from the tribunals, including prosecutors, judges, administrators, and members of the defense bar. In addition to the substance of international criminal law, this course will also serve as an introduction to international legal reasoning, law-making, and institutional design. It will complement existing courses at the Law School covering comparative law, international organizations, international human rights, and public international law. Elements used in grading: The course grade will be based on a series of short papers and active in-class engagement with the assigned materials. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

**LAW 753. Intellectual Property: Patent and Technology Licensing. 3 Units.**

This course covers the fundamentals of the law and practice of licensing of patents and technology. Licensing is the principal means by which rights in patents and technology are shared, exploited and monetized. It is fundamental to business models throughout the technology industry and beyond, including in software, mobile, consumer devices, semiconductors and pharmaceuticals. We cover (1) the business drivers and models for licensing patents and technology, (2) the core concepts and current trends of licensing law (both Federal Circuit and Supreme Court), and (3) key issues in structuring, drafting and negotiating patent and technology licenses. We also cover how the "patent troll" and "patent reform" debates may affect licensing law and practice. We will emphasize the practical aspects of licensing patents and technology, and licensing in its broader context in relation to corporate, litigation, intellectual property and antitrust practices. Elements used in grading: Class Participation, Final Exam.

**LAW 754. Current Issues in Corporate Governance. 2 Units.**

Corporate governance has become a constant fixture of the legal and policy debates of our time. It not only figured prominently in the Sarbanes-Oxley Act of 2002 and the Dodd-Frank Act of 2010, the sweeping regulatory reforms of the last decade, but its reach has been far broader at both domestic and international levels. For a vast array of economic and social problems - from economic growth and systemic risk to rising inequality - improved corporate governance surfaced as a favored policy response. This seminar explores the central debates in this area with respect to issues such as board independence, shareholder voting and the role of proxy advisors, institutional investor activism, executive compensation, the question of short-termism, and board diversity. We will read works from the legal and economic literature and focus on current controversies. Special Instructions: Students have the option to write a paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), with consent of the instructor. Elements used in grading: Class Participation, Written Assignments and Final Exam or Final Paper.

**LAW 755. Deals in Latin America. 2 Units.**

This course is an introduction to the law, institutions and practice of business transactions in Latin American, with particular emphasis on Chile. It provides an overview of corporate governance practices, entrepreneurship and deal structures in the region. This is an offering in the series of overseas study courses that combines a Stanford classroom component (10 hours during the winter quarter) and one week's visit to Santiago for joint classes with students from the law school at Catholic University of Chile. The joint classes will be based on case studies of business transactions. During the visit, we will also meet with general counsel and executives of prominent multinational corporations, leading business lawyers and with high-level government regulators and other lawmakers. Meeting dates: Beginning February 5, the class will meet at SLS the last five Fridays of winter quarter and in Santiago during spring break 2016. Elements used in grading: The course grade will be based on two essay responses (one each at the end of the Stanford and Santiago segments) and on students' preparation and participation in classes and site visits. APPLICATION: To apply for this course, students must complete and e-mail the Application Form available on the SLS Registrar's Office website (see Registration) to the SLS Registrar's Office. See Application Form for submission deadline.

**LAW 757. Corrections, Punishment, and Public Policy. 3 Units.**

This introductory course will familiarize students with the history, structure, and performance of America's corrections system. Corrections deals with the implementation and evaluation of criminal sentences after they are handed down. This course will cover probation, jails, prison, parole, and prisoner reentry. We will also discuss special populations (e.g., mentally ill, sex offenders), mass incarceration, and how the widespread impacts of America's prison expansion. The course will examine corrections from global and historical views, from theoretical and policy perspectives, and with close attention to many problem-specific areas. We will explore correctional theories and their application, the nature, scope and function of corrections, the impact of mass incarceration on crime and communities, what works in rehabilitation, and how to help offenders reintegrate after a prison term. These topics will be considered as they play out in current political and policy debates. Guest lectures may include presentations by legal professionals, victims, offenders, and correctional leaders. We also plan to visit a correctional facility. This course is open to 1Ls, 2Ls, and 3Ls in the Law School. Students who have previously taken Petersilia's Sentencing and Corrections course (SLS 621-0-01) should not enroll in this class, as it would be duplicative. Students are asked to write two reflection papers (dates will be specified in the syllabus). Those two reflection papers constitute 50% of the grade; the final one-day take home exam constitutes the other 50%. Class participation will be used as a "tipping factor."

**LAW 758. Introduction to Financial Institutions. 3 Units.**

Introduction to financial institutions reviews a broad range of institutions that accept money from savers and invest that money in stocks, bonds or other assets. The course will explain how each of these institutions provide services to their clients and how each is regulated by government agencies. The course will cover pass-through institutions where the savers receive the return on their investments minus management expenses – mutual funds, hedge funds and sovereign funds. It also covers institutions offering savers some form of guaranteed returns – banks, insurance companies and Fannie Mae. Finally, the course will cover pension plans, both defined contribution and defined benefit plans. The course is geared to the non-financial expert with background notes as well as case studies on actual institutions. The course is taught from the viewpoint of someone advising or dealing with these institutions, as well as a public official deciding upon regulatory policy. Elements used in grading: Class Participation, Attendance, Final Exam. The instructor will bring to the course years of experience as head of two global financial companies.

**LAW 759. Law, Leadership, and Social Change. 3 Units.**

This course will examine the responsibilities and challenges for those who occupy leadership roles and for those seeking to use law as a vehicle for social change. Topics will include characteristics and styles of leadership, organizational dynamics, forms of influence, decision making, conflict management, innovation, diversity, ethical responsibilities, scandal, civil and human rights, and public interest law. Materials will include cutting-edge research, case histories, problems, exercises, and media clips. Class sessions will include visitors who have occupied leadership roles. Requirements will include class participation, and either short written weekly reflection papers (2 to 3 pages and a short research paper (about 5 pages) or (2) a long paper (approximately 26-30 pages). After the term begins, students can transfer from section (01) into section (02), which meets the R requirement. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper.

**LAW 760. Law and Visual Culture. 3 Units.**

Why doesn't the Supreme Court allow video cameras in oral argument? Why do jurors find video recordings more believable than live testimony? Is a computer generated re-enactment evidence? This course tracks the legal reception of modern visual representation from the confusion about the admissibility of photographs in the late 19th century (is it like a drawing? is it like eyewitness testimony?) to the debate about cameras in the courtroom in the late 20th century (do judges and jurors decide differently when the proceedings are subject to public scrutiny?) to the frequent and strategic deployment of visual media in pretrial and litigation practice today. We will pursue a variety of approaches to the topic, ranging from the discussion of film theory to guest lectures by practicing attorneys. Elements Used in Grading: Class Participation, Attendance, Written Assignments, Final Paper. Automatic grading penalty waived for writers.

**LAW 761. Introduction to Legal Design. 4 Units.**

Intro to Legal Design is a 9-week course for law students & other graduate students to reimagine how legal services are delivered, & learn how to use human-centered design methods to create breakthrough solutions to complex problems. The students will work with project partners - including legal aid groups, courts, and private law firms – on 2 legal service challenges to help the partners solve real problems they & their users face. For each challenge, students will work on interdisciplinary teams, with close coaching from designers, engineers & lawyers. Students will learn design methods and use their respective expertise to design new innovations that make legal services more accessible & engaging. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for submission deadline. Elements used in grading: Class Participation, Attendance, Written Assignments.

**LAW 762. Health Law: Improving Public Health. 3 Units.**

This course examines how the law can be used to improve the public's health. The major themes explored are, what authority does the government have to regulate in the interest of public health? How are individual rights balanced against this authority? What are the benefits and pitfalls of using laws and litigation to achieve public health goals? The course investigates these issues as they operate in a range of specific contexts in public health, including the control and prevention of infectious disease; laws aimed at preventing obesity and associated noncommunicable diseases; tobacco regulation; ensuring access to medical care; reproductive health; lawsuits against tobacco, food, and gun companies; and public health emergencies. In these contexts, we will ask and answer questions such as, what do the Constitution and key statutes permit? What makes a good public health law? What does public health evidence tell us about the likely effectiveness of particular legal interventions? What ethical and economic arguments justify government intervention to shape individuals' and companies' health-related behaviors? Instruction is through interactive lectures with a significant amount of class discussion and some group exercises. Class Participation, Written Assignments, Final Exam. Cross-listed with Medicine (MED 237).

**LAW 763. International Trade and Development in the Global Economy. 3 Units.**

This course focuses on the intersection of two key objectives of the international order and international economic law: the promotion of central rules, regimes and policies for the stabilization and liberalization of international trade; and the encouragement of economic growth and development in poor countries. The course begins with the primary multilateral trade organization, the World Trade Organization (WTO), and its predecessor, the General Agreement on Tariffs and Trade (GATT). The course then proceeds to regional trade and investment regimes: agreements affecting particular areas of the developing world, with special emphasis on U.S. trade law and policy in respect of those regions. Throughout, the course will examine high-profile case studies, as well as consider current events, such as U.S. negotiations on the Trans-Pacific Partnership and the Transatlantic Trade and Investment Partnership. Elements used in grading: Class Participation, Written Assignments, Final Exam.

**LAW 764. Current Issues in Insurance Law. 2 Units.**

This seminar will consider a range of important issues involving tort and contract aspects of insurance law. Each week will focus on a different topic. Topics may include the application of contra proferentem and reasonable expectations doctrines, bad faith litigation, duty to settle, prominent issues in asbestos litigation, remedies for misrepresentation, limitations on insurability, and the proper role for regulation of insurance policies. Readings will consist of a mix of important cases and academic articles. After the first week, students will take the lead in class discussion of each topic. Grading will be based on a combination of class participation and, at the student's option, (1) weekly response papers or (2) a single longer paper. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class Participation, Attendance, Written Assignments or Final Paper.

**LAW 765. The Welfare State. 3-5 Units.**

Much has been written in recent years about the decline of the welfare state. Numerous adjectives have been applied to describe a trend toward austerity – death, demise, withering, reversal. One writer suggested that the welfare state had not died, it had merely "moved to Asia" along with industrialization. This seminar introduces students to the key literature, questions, and debates about the modern welfare state. We will consider the emergence, growth, and current status of the welfare state, primarily in Western Europe and North America. The course will examine classical theories about markets and the emergence of social provision. We will also consider the leading theoretical and empirical research addressing the emergence of the welfare state, looking at the American case in comparative perspective. Attention will be paid to social and political factors on state development including political parties, labor markets, gender, demographic change, and immigration. We will then turn to the trend toward austerity and retrenchment, and the effect of globalization for the future of the welfare state. Course Requirements. Participation/Discussion (25%). Students are responsible to complete all readings and to come to class prepared to actively participate in discussion. Each student is responsible to lead a portion of the discussion twice per quarter. Short Reaction Papers (25%). All students must complete 5 reaction papers related to the weekly readings of 2 to 3 pages in length. Reaction papers will include a list of questions to be addressed in that week's discussion. All reaction papers must be posted to coursework in advance of class so that the student(s) leading that week's discussion can incorporate the questions into that week's discussion. Final Options (50%). Students have the option of completing one final paper of 20 pages in length OR 4 essays of 5-6 pages each addressing the readings in weeks that the student did NOT complete reaction papers. Topics for 20 page papers must be approved by me in advance, and may be related to a student's dissertation or master's research or may be a stand-alone topic. Papers may take the form of a research proposal and need not contain original empirical research. Shorter papers should engage thoroughly with the literature on the selected topic, and should bring additional sources other than those read for class to bear on the topic of choice. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline. Cross-listed with Sociology (SOC 254 & SOC 354).

**LAW 766. Going Global: Advising Clients in a Global Economy. 3 Units.**

Lawyers are increasingly asked to advise clients with global operations. This course will provide a foundation for understanding the types of challenges faced by business entities that operate around the world and that are therefore subject to multiple and sometimes inconsistent national laws. We will review some of the laws that apply to cross-border, multinational and foreign transactions and how variations in culture and legal systems affect the substance and application of those laws. We will also examine how treaties, international agreements and informal or political norms can constrain or supplement these laws and review the risks of doing business in communities whose laws are ineffective or unreliable. And we will consider some of the ways in which companies that do business in multiple nations can adapt to the challenges they will face. Elements used in grading: Class Participation, Assignments.

**LAW 767. Internet and Society: The Technologies and Politics of Control. 2 Units.**

This course offers an intensive introduction to the field of cyberlaw. We will investigate the evolving nature of online architecture and activities, and the ways in which the legal toolbox has been, and will be, leveraged to influence them. Course themes include the complex interaction between Internet governance organizations and sovereign states, the search for balance between the ease of disseminating information online and the interest of copyright holders, privacy advocates, and others in controlling that dissemination, and the roles of intermediaries and platforms in shaping what people can and cannot do online. By application. Please note special compressed meeting times. No prerequisites. Special Instructions: The course will run from Sunday, January 4, 2015 to Friday, January 16, 2015. It will comprise 10 students from Stanford Law School and 10 students from Harvard Law School, including any cross-registrants from other Stanford or Harvard schools. There will be an opening Sunday set of activities; one approximately two-hour session each weekday in that period; and potentially one Saturday session, including field trips. Students enrolled in the course from both schools will be selected through an application process. CONSENT APPLICATION: The application can be found at <http://brk.mn/InternetandSociety>, and is due at 11:59 p.m. on Friday, October 10, 2014. Elements used in grading: Class Participation, Attendance, Final Paper.

**LAW 768. Environmental Justice. 3 Units.**

This course will introduce environmental justice as a social movement, including its central substantive concerns (the needs of humans in the built environment rather than the need to protect the environment from humans) and its methods (community-based political organizing rather than professionalized judicial or legislative action). The bulk of the course will then pursue a broader conception of environmental justice today by using social science research, theory, and case studies to investigate the civil rights and poverty aspects of environmental safety and natural resources. The course will include units on: (1) toxic exposure and public health disparities stemming from the disproportionate siting of locally-unwanted land uses in poor neighborhoods of color; (2) access to natural resources and basic public services, including clean water, wastewater disposal, and open space; (3) tools in environmental justice advocacy (including community-based lawyering, Title VI of the Civil Rights Act of 1964, the Fair Housing Act, common law nuisance actions, and transactional lawyering); (4) environmental justice issues in Indian Country, and (5) environmental justice issues in climate change policy. Much of the course material, including student presentations, will be grounded in the experiences and advocacy histories of specific communities, both urban and rural, across the country. Grades will be based on class participation and (1) weekly reflection papers of 3-5 pages each week for each of our topics or (2) a long research paper. After the term begins, students accepted into the course can transfer from section (01) into section (02) which meets the R requirement, with consent of the instructor. Students who opt for a long research paper may, if they so choose, conduct substantial legal research responsive to a non-profit environmental justice organization's legal needs. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper.

**LAW 769. Copyright and Content in the Digital Age. 3 Units.**

The digital age has brought about unprecedented opportunity and upheaval in the creation and distribution of content. This seminar will examine digital disruptions to the business models of content creators and industries, and the corresponding impact of the Internet on copyright law, largely through the lens of the litigation involving Google Books. That litigation, which has been active in the courts for almost a decade, is a microcosm of the vast issues that have faced content owners and consumers in the digital age: new technologies to reproduce and distribute works, evolving concepts of fair use, changing consumer norms, massive disruptions to economic interests, increased access to information, concerns about piracy, and threats to competition. We will examine issues related to copyright and content in the digital age by focusing not only on legal claims and defenses, but also litigation strategy, business strategy, policy strategy and public relations strategy, all of which play an important part in the art of lawyering today. The seminar will explore in depth the many contours of the Google Books litigation, including transformative fair use, the problem of orphan works, the rise of ebooks, non-display use and the proposed class action settlement of the case, which was rejected by the district court in 2011. We will also examine digital developments in other content industries (movie, music and newspaper) and focus on two related book issues: the ebook antitrust case against both publishers and Apple and the frequent disputes between publishers and Amazon. The seminar will include visitors who have been involved in the issues being studied. Grading will be based upon weekly reflections, class participation and (for those opting for Research credit) a long paper based on independent research. Some copyright experience is recommended. The course is open to graduate students throughout the university, especially the Graduate School of Business, the Department of Communication and the Journalism Program, by consent of the instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for submission deadline. Elements used in grading: Class Participation and Written Assignments or Research paper.

**LAW 771. Indigenous Cultural Heritage: Protection, Practice, Repatriation. 2 Units.**

This new interdisciplinary seminar explores challenges and avenues for furthering protection of the cultural heritage rights enshrined in the UN Declaration on the Rights of Indigenous Peoples (UNDRIP). Using an innovative combination of in-class lectures and videos of interviews with renowned experts, including Indigenous leaders, scholars, artists and performers and museum professionals from around the world, this seminar will analyze current and potential tribal, domestic and international legal and ethical frameworks for indigenous cultural heritage protection and repatriation. Among other subjects, we will discuss and problematize: the impact of colonialism, urbanization and other political, legal, economic, religious and cultural forces on understandings and definitions of "indigenous" and "cultural heritage"; the development of international law relating to Indigenous peoples' cultural rights; domestic heritage protection and repatriation legislation such as the 1990 US Indian Arts and Crafts Act and Native American Graves Protection and Repatriation Act; past and present Western museum practices relating to display, preservation, provenance research and repatriation of Indigenous peoples' cultural material; the meaning of repatriation to Indigenous peoples and other stakeholders; and resolving repatriation disputes, including by alternative dispute resolution (ADR) processes. While case studies will relate primarily to Indigenous peoples of North America, including the Arizona Hopi and Northwest Coast First Nations, comparisons will be drawn with the situation of Indigenous peoples in other regions, such as Oceania and Russia. The overall seminar experience will involve discussions of lectures and video content, assigned readings, a class visit to the Cantor Center Native Americas collection, and visits to our classroom by renowned experts, including Dr. Morten Rasmussen, who participated in the recent DNA analysis of Kennewick Man/The Ancient One. Students who have taken this course are eligible to join a guided weekend trip to Hopi territory tentatively planned for Spring Quarter 2016. Elements used in grading: class participation, attendance and a final project (one-day take-home exam or research paper). After the term begins, SLS students who have received the instructor's consent to write a research paper should transfer from LAW 771 section (01) to section (02), which meets the R requirement. Registration: SLS or graduate student status, or consent of the instructor. Any non-law students who wish to enroll in LAW 771 should complete the Course Add Request form at: [http://2pe0o743k0s82lo5l6trs9j1-wpengine.netdna-ssl.com/wp-content/uploads/2015/04/Non-Law-Student-Add-Request-Form-Autumn-Quarter-2015-2016\\_-11.pdf](http://2pe0o743k0s82lo5l6trs9j1-wpengine.netdna-ssl.com/wp-content/uploads/2015/04/Non-Law-Student-Add-Request-Form-Autumn-Quarter-2015-2016_-11.pdf) and send it to the instructor by email (sjdenant@stanford.edu) or bring it to class. Cross-listed with Art History 90 and Art History 490A.

**LAW 772. Career Development: Alchemy, Law, and Practice. 2 Units.**

Career development is embedded in life development. This course offers a space and time for each student to consider both through course materials, class interactions, and a series of reflection papers. The course includes one class facilitated in collaboration with the Office of Career Services focusing on a formal assessment via one or more psychological tests offered to each student. The materials for other class meetings are thought provoking works that have proven to be salient for considering career and life direction. Images and material from alchemy that embody what many consider to be a primary set of symbols for personal transformation provide a backdrop for the course. The course benefits from the collaboration of Michael Guasperini, a mythologist and lawyer whose primary vocation is working intimately with lawyers and firms during periods of personal and institutional transition. Mr. Guasperini has deep experience with the personal lives of hundreds of lawyers at various ages and levels of professional development, providing a valuable and practical perspective for self-reflection. Elements used in grading: Written Assignments (reflection papers).

**LAW 773. Law and Society in Late Imperial China. 3 Units.**

Our purpose in this colloquium is to understand how law in the Qing dynasty (1644-1912) functioned as an instrument of autocratic power, a field of interaction between state and society, and a vital feature of social life. To this end, we shall survey Qing law "from the top down" (the perspective of the imperial center, its ideology, and its political imperatives), but also "from the bottom up" (the perspective of quotidian practice at the local level). We shall explore the friction between ideology and practice within the dynasty's formal legal system, but also the field of customary practice that flourished outside the formal system, sometimes in conflict with it. Readings have been selected to introduce the work of major historians (in English) and to cover a range of basic concepts and problems in this field. One important theme is how scholarly interpretation and debate have changed over time, especially as a result of the opening of Qing legal archives for research. Another theme is the question of what concepts and vocabulary are most appropriate for this field of study. What are the advantages and disadvantages of analyzing the Chinese legal tradition in comparison to the West? Is it possible to understand it "on its own terms"? Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper. Cross-listed with History (HISTORY 392B) & Chinese Literature (CHINLIT 392B).

**LAW 774. Clean Energy Project Development and Finance. 3 Units.**

This case study-oriented course will focus on the critical skills needed to evaluate, develop, finance (on a non-recourse basis), and complete standalone utility-scale energy and infrastructure projects. The primary course materials will be documents from several representative projects - e.g. solar, wind, storage, and carbon capture - covering key areas including market and feasibility studies, environmental permitting and regulatory decisions, financial disclosure from bank and bond transactions, and construction, input, and offtake contracts. Documents from executed transactions are highly customized. By taking a forensic and cross-disciplinary approach, looking at several different deals, we can learn how project developers, financiers, and lawyers work to get deals over the finish line that meet the demands of the market, the requirements of the law, and (sometimes) broader societal goals, in particular climate change, economic competitiveness, and energy security. Elements used in grading: Class Participation (35 %), Lecture-based Assignment (15 %), Group Project (50 %). Absences affect grade. Also open to engineering graduate students. Cross-listed with Graduate School of Business (GSBGEN 335).

**LAW 775. Information Privacy Law. 2 Units.**

Today almost all modern businesses need advice about information privacy law. While the roots of privacy law in the US started with a right to be let alone, modern business models, the needs of the administrative state, law enforcement priorities, and our own behavior complicate approaches based solely upon seclusion or secrecy. This course will explore the roots of US privacy law, its evolution in the 20th century, and the challenges of regulating information in the modern era where institutions and individuals need and reveal information constantly, but also seek basic dignity and safety from harm. Privacy law is comprised of torts, contracts, constitutional law, statutory law, soft law norms, and emerging technologies. We will discuss all of these things, as well as incorporate developments in the news. Elements used in grading: Class Participation and Final Exam.

**LAW 776. U.S. and International Issues in the Changing Arctic. 3 Units.**

This seminar will explore domestic and international issues that are arising in the Arctic, including territorial rights; energy development in the Arctic (including the role of multi-national oil companies, country-specific regulatory standards and response capabilities); the rights of indigenous peoples; mutual aid agreements; and climate change impacts, including the opening of new shipping routes, increased coastal erosion, the loss of permafrost, impacts on traditional subsistence activities, and the like. The seminar is particularly timely, as the U.S. will be taking over Chairmanship of the 8 nation Arctic Council next year and setting a substantive agenda for the international community. Special Instructions: Students in Section (01) will write reflection papers on topics of interest. After the term begins, students accepted into the course can transfer from section (01) into section (02), and have the option to write a longer paper for Research (R) credit with consent of instructor. Elements used in grading: Class Participation and Reflection or Research Papers.

**LAW 778. Launching Moonshots: Legal Counseling for New Technologies. 2 Units.**

This seminar course will explore some of the most interesting and challenging legal issues involved in launching new and innovative technologies from the perspective of an in-house counsel. These include issues of international law, privacy and security, products liability, and regulation of cutting-edge products such as self-driving cars, drones, the internet of things, and other "moonshot" technologies. The course will feature guest presentations by practicing lawyers and technologists in the field. Through advanced case studies, students will gain an understanding of the significant legal and policy issues raised by these technologies, as well as gain exposure to real-world product counseling in a dynamic sector. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper.

**LAW 779. Transition to Practice: Selected Topics. 1 Unit.**

This course is designed to explore issues of professional identity for students transitioning into the legal profession. It will begin in the spring quarter and continue into the fall quarter, and will require the writing of a paper. Elements used in grading: Final Paper.

**LAW 781. Philanthropy and Civil Society. 1 Unit.**

Associated with the Center for Philanthropy and Civil Society (PACS). Year-long workshop for doctoral students and advanced undergraduates writing senior theses on the nature of civil society or philanthropy. Focus is on pursuit of progressive research and writing contributing to the current scholarly knowledge of the nonprofit sector and philanthropy. Accomplished in a large part through peer review. Readings include recent scholarship in aforementioned fields. May be repeated for credit for a maximum of 3 units. Cross-listed with Education (EDUC 374), Political Science (POLISCI 334) and Sociology (SOC 374).

**LAW 782. U.S. Human Rights NGOs and International Human Rights. 1 Unit.**

Many US human rights non-government organizations, including the US philanthropic sector, work on international human rights. The US government also engages with the private sector in "partnerships" that twins US foreign aid human rights action with corporate expertise. This weekly series will feature speakers who lead these human rights NGOs, philanthropic enterprises, and corporate partnerships, and also policy experts and scholars, to explore the pro's and con's of this scenario. Cross-listed with Ethics in Society (ETHICSOC 15R), International Policy Studies (IPS 271A), Medicine (MED 225) and Political Science (POLISCI 203).

**LAW 783. Lawyering and Leading in Transitional Societies. 2 Units.**

As societies transition from authoritarian regimes to liberal democracies, public interest lawyers are seeking to transform law from a means of state control to an instrument for the common good. Public interest lawyers practicing in these transitional countries, where the pace of political and economic change is accelerating rapidly are called upon to occupy unique and critical leadership roles. These leaders face an increasingly complex tapestry of economic, political, and social challenges. This course will examine the leadership challenges and opportunities faced by both domestic and international public interest lawyers in transitional societies. Guest speakers who have led international NGOs and foreign NGOs advocating for social justice in transitional societies will anchor many of the class discussions. Readings will largely focus on practitioner-oriented case studies and evaluations. Themes addressed will include: \* Globalization is advancing rapidly. Leaders must understand how new rules of the game for global governance will affect organizations. They must develop the technical and political skills to be heard in international arenas at the same time that they mediate the impact of global change on the economic and social futures of their countries. \* Decentralization of decision-making authority creates more challenges. Leaders in times of transition must understand how to build coalitions and negotiate across multiple layers of government and networks of interested parties. \* Democratization and political participation are increasing. Public interest legal organizations and a variety of other organizations in civil society must develop the skill sets necessary to make claims on government at all levels and are hold leaders more accountable for their actions. Increasing political participations requires effective movement building skills which are often underdeveloped in these societies. \* Knowledge is expanding exponentially. Leaders must spend more time acquiring knowledge for informed decision making and must guide their organizations in adapting new technologies and new knowledge to improve performance and responsiveness to the needs of their constituencies. \* Regulatory environments are uncertain. Leaders of NGOs in transitional societies are often operating in an environment of rapidly changing regulatory environments with respect to legal compliance and governance for NGOs. \* Overwhelming numbers of critical priorities compete for organizational time and resources. In transitional societies there are typically very few NGOs and many pressing needs with respect to representing and serving marginalized communities and expanding political participation across the board. Organizational leadership can succumb to mission creep and burnout. Guest speakers will include: Dmitri Holtzman, Founder and Executive Director of the Equal Education Law Centre (EELC). EELC is dedicated to advancing the right to basic education through strategic litigation and advocacy in South Africa. Prior to his work with EELC, Dmitri worked with Equal Education, a movement seeking to address poor quality and inequality in education. Hou Ping, Hou Ping is the founder and Vice President of LesGo, a nonprofit organization working on LGBT rights in China. LesGo advocates for recognition of and equality for the LGBT community in Suzhou and surrounding areas. In her role as Vice President, Ping focuses on community research and rights. Students will be asked to produce several short papers throughout the quarter. For Research credit, students will be asked to produce a substantially longer paper on a related topic and can be excused from some of the shorter assignments. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Attendance, class participation, written assignments.

**LAW 784. Critical Race Theory. 1 Unit.**

This course will consider one of the newest intellectual currents within American Legal Theory – Critical Race Theory. Emerging during the 1980s, critical race scholars made many controversial claims about law and legal education – among them that race and racial inequality suffused American law and society, that structural racial subordination remained endemic, and that both liberal and critical legal theories marginalized the voices of racial minorities. Course readings will be taken from both classic works of Critical Race Theory and newer interventions in the field, as well as scholarship criticizing or otherwise engaging with Critical Race Theory from outside or at the margins of the field. The class will meet 7:15PM to 9:15PM on January 4, 5, 6 and 11, 12. Elements used in grading: Class Participation, Written Assignments.

**LAW 785. Current Issues in Tax Practice. 2 Units.**

This course will introduce students to major issues in tax practice. Each class will be co-taught by one or more leading practitioners in the tax bar, with other members of the bar attending. Subjects include international tax, intellectual property and tax, tax litigation, state and local taxation, working for the government in tax, tax lobbying and working in a corporate tax department. Class will meet at my home (with take-out dinner provided). The class offers students a good opportunity to connect their SLS tax courses to real-world tax issues and practitioners. Elements used in grading: Class Participation, Attendance, Written Assignments.

**LAW 786. International Justice. 3 Units.**

This course will examine the arc of an atrocity. It begins with an introduction to the interdisciplinary scholarship on the causes and enablers of mass violence-genocide, war crimes, terrorism, and state repression. It then considers political and legal responses ranging from humanitarian intervention (within and without the Responsibility to Protect framework), sanctions, commissions of inquiry, and accountability mechanisms, including criminal trials before international and domestic tribunals. The course will also explore the range of transitional justice mechanisms available to policymakers as societies emerge from periods of violence and repression, including truth commissions, lustrations, and amnesties. Coming full circle, the course will evaluate current efforts aimed at atrocity prevention, rather than response, including President Obama's atrocities prevention initiative. Readings address the philosophical underpinnings of justice, questions of institutional design, and the way in which different societies have balanced competing policy imperatives. Elements used in grading: Class Participation, Final Paper. Cross-listed with International Policy Studies (IPS 208A).

**LAW 787. Reinventing American Criminal Justice Systems. 3 Units.**

The scandal of criminal justice in the United States is by now a familiar one, its facts well known. As the late William J. Stuntz wrote in *The Collapse of American Criminal Justice*: "Rule of law has vanished in America's criminal justice system. Prosecutors decide whom to punish; most accused never face a jury; policing is inconsistent; plea bargaining is rampant; and draconian sentencing fills prisons with mostly minority defendants." There is no controversy that change is needed, and many believe we are now at a policy turning point. For the first time in nearly 40 years, prison populations are declining and a variety of forces—fiscal, political, and evidentiary—have finally come together to create broad-based support for reconstituting components of the American criminal justice system. But good intentions are not enough, and a policy opportunity is not the same thing as a policy success. This historic opportunity requires a thoughtfully planned, multidisciplinary effort. This seminar is designed to engage in that effort. Each student will be asked to select a particular area of potential reform (e.g., police, prisons, prosecution, sentencing, plea bargaining, parole release, risk prediction, juvenile justice, mental health, drug policy, racial disparities, parole), and to offer a comprehensive concrete proposal for change. The final paper will offer plans for reconstituting that particular component of the criminal justice system. The concrete proposals must be justified in terms of the pertinent legal and empirical research. The goal of each paper is to provide policymakers with a practical blueprint for choosing a different criminal justice future. This course is designed for students who wish to delve deeply into specific areas of criminal justice reform, and have an interest in policy reform, empirical research, and advocacy. Elements used in grading: Final Paper. Automatic grading penalty is waived. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration) to the instructors. See Consent Application Form for submission deadline.

**LAW 788. Race, Policing and Prosecutors: Perspectives, Problems, and Possibilities. 1 Unit.**

Prompted by the killings of Tamir Rice in Cleveland, Ohio, Michael Brown in Ferguson, Missouri, and Eric Garner in Staten Island, New York, this 1 unit mini-course will draw on a wide array of materials to examine the challenges and injustices that arise at the intersection of race and policing in the United States. The first part of the course will consider alternative accounts of the central problems at the intersection of race and law enforcement, and will explore the roots of distrust between minority communities and law enforcement agencies. The course will examine the social, psychological, historical and institutional roots of these problems. The second part of the course will survey various reform proposals. What are the possibilities and limits of civil rights actions? Is reform best undertaken by courts or legislatures? By the federal government or by states? Some reforms focus on prosecutors, e.g. limiting prosecutorial discretion, eliminating grand juries. Other reforms focus on policing, e.g. racial sensitivity or procedural justice training, requiring body cameras, creating more racially representative police forces. To what extent should solutions be pursued through new forms of democratic oversight and accountability (such as police civilian review boards) or through community organizing efforts. Does racially just and effective policing require controlling and constraining the police, or working collaboratively with law enforcement agencies? This 1 unit course is Mandatory Pass/Fail, and will meet only three times during the course of the quarter. Attendance and participation at each class session is required. Prior to each class session, each student will post questions, observations or reflections that will provide the basis for class discussion. The class will meet from 2-5 pm the following Fridays: January 16, February 6, and February 27. Elements used in grading: Class Participation, Attendance & Written Assignments.

**LAW 789. Transnational Corporations and Human Rights. 2 Units.**

Apple's use of child labor; Goldcorp's operations in Guatemala; the complicity of Dow Chemical/Union Carbide in the Bhopal chemical disaster; Shell's involvement in the executions of activists protesting the company's environmental and development policies in Nigeria. These are just a few examples of alleged corporate malfeasance that have emerged on the international stage. The purpose of this seminar is to introduce students to the debate concerning the accountability of transnational corporations that are complicit in rights-violating activities. At the international level, there has been a striking new strategy in the protection of human rights: a transition from focusing solely on rights-violations committed by governments to a detailed examination of transnational corporate conduct. Indeed, it has now become trite to say that particular corporations have directly or indirectly participated in violations of human rights. In order to address the fundamental question of whether corporations should in fact be socially responsible, the seminar will begin with an introduction to corporate theory. Students will then explore some of the key issues in the debate. Namely, whether transnational corporations can properly be included under the international law of state responsibility; mechanisms for self-regulation (e.g. voluntary corporate codes of conduct); the utility of the U.S. Alien Tort Claims Act; the advantages and disadvantages of U.N. initiatives (e.g. the work of the former U.N. Special Representative on Business and Human Rights); and the relevance of domestic corporate and securities law mechanisms (e.g. shareholder proposals and social disclosure). The course will provide a comparative analysis of the U.S. and Canadian experiences, in particular. Special Instructions: The use of laptop computers (or other similar electronic note-taking devices) is not permitted. Elements used in grading: Grading will be based on class participation (including student presentations) and a final research paper.

**LAW 790. Separation of Powers and Executive Branch Legal Interpretation. 2 Units.**

This course will explore the parameters of the executive-congressional relationship, with a special focus on the mechanisms through which the Executive Branch engages in legal interpretation. We will examine the case law that structures the relationship between the political branches, as well as congressional efforts to constrain executive power, such as through appropriations and oversight. But we will be most concerned with how the Executive conceptualizes and implements its "Take Care" responsibilities and its relationship to Congress, through its own forms of constitutional interpretation and when implementing statutes and exercising enforcement discretion. We will begin with the question—what is executive power? We then will study the work of different interpreters within the Executive Branch, such as the Office of Legal Counsel, the White House Counsel, OIRA, and the agencies, mindful of the fact that the branch is a "they," not an "it." We will conclude by studying various policy dilemmas that have required the Executive to conceptualize and assert a view of its authority within the constitutional system, including its use of prosecutorial discretion and its foreign affairs, war, and Commander-in-Chief powers. Readings will consist of executive branch and congressional documents, case law, and secondary literature. Elements used in grading: Grades will be based on class participation and each student's choice of either (1) series of 3-5 page reflection papers or (2) final research paper of approximately 5000 words for "R" (Research credit). After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor.

**LAW 791. Implications of Post-1994 Conflicts in Great Lakes Region of Africa: an American Perspective. 3 Units.**

Seminar will explore the post-1994 conflicts in the Great Lakes Region from the perspective of the former US Special Envoy to the region. Particular emphasis will be placed on the intensified regional and international efforts to resolve these conflicts since the M23 rebellion of 2012. It will consider the implications these activities have for the region, legal accountability, international peacekeeping and the conduct of American foreign policy. The seminar will include the following segments: 1) the origins and nature of the post-1994 conflicts and recent efforts to resolve them with particular attention to the relationship between modern Congolese history and the Rwandan genocide and the peace-making efforts initiated by the Peace, Security and Cooperation Framework agreement of February 2013; 2) accountability for conflict-related crimes committed in the region including sex and gender-based crimes and the legal and other regimes established to address conflict minerals; and 3) the broader implications of the conflict for American foreign policy in Africa, in particular, and in general, and lessons learned about the way in which such policy is formulated; as well as the implications of this conflict for international peace-making and peace-keeping efforts. The course is cross-listed for IPS and law school students. Special instructions: The class will be limited to 12 IPS students and five law students. Elements used in grading: Class participation, Attendance, Final Paper. Cross-listed with International Policy Studies (IPS 252).

**LAW 792. Advanced Legal Writing: Public Interest Litigation. 3 Units.**

Public-interest litigation is often an uphill battle. Civil rights plaintiffs have difficulty prevailing even when their fact-patterns are sympathetic, as can be seen in contexts from sexual harassment lawsuits to wage to hour claims and from police brutality and prison conditions cases to transnational human rights complaints. Yet when public interest impact litigation does succeed it can enable or even galvanize social movements-both domestic and international-and meaningfully change the legal landscape. This class will focus on the skills necessary to litigate public interest lawsuits, and, in particular, public interest impact litigation. We will focus on marrying research and analysis of statutory text and case law and harnessing the creativity necessary to win such lawsuits by using those research and analytical results to write two briefs from the perspective of public interest or pro-bono advocates. Along the way, we will examine some of the most important briefs of the twentieth and twenty-first centuries in various public interest contexts to unpack the rhetorical and analytical skills needed to persuade judges across the ideological spectrum. Grading will be based on a Mandatory P/R/F system, taking into account research and writing as well as class participation. SPECIAL INSTRUCTIONS: Students on the waitlist for the course will be admitted if spots are available on the basis of priority. Early drop deadline: Students may not drop this course after first week of class.

**LAW 793. Constitutional Litigation and Public Policy: Race and Criminal Justice. 2 Units.**

This course will examine the ways in which race and perceptions of race influence our criminal-justice system, with an emphasis on interactions between individuals and the police. Topics will include racial profiling, stop-and-frisk tactics, police use of force, the over- and under-policing of communities of color, and the impact of the war on drugs on these communities. We will discuss the doctrinal, policy, and practical issues that these topics raise, as well as the question of how to effectively use litigation and other types of advocacy to address problems within the criminal-justice system. My goal is for students in the course not only to gain an understanding of the subject matter but also to develop their litigation, writing, and advocacy skills. Readings will include Michelle Alexander's *The New Jim Crow*, Randall Kennedy's *Race, Crime, and the Law*, as well as cases and articles. Students will be required to write a number of short papers. Grades will be based on those papers and on class participation.

**LAW 794. Introduction to Finance. 2 Units.**

This course is a basic introduction to the principles of finance and is intended as a primer on principles of valuation that are useful in everything from settlement negotiations to family law. No prior knowledge of finance will be assumed. If you want an introduction to corporate finance and won't take the full 3 credit course, this is for you. The first part of the course (approximately 6 weeks) will consist of on-line modules and problem sets that you will complete on your own and in small groups. We will cover topics such as: earnings, cash flows, income statements, interest rates, time value of money, estimating firm value, risk and return and the cost of capital. We will provide a framework for answering questions such as: how much is this project (or firm) worth? How should the firm raise money for a new investment? There will be weekly problem sets and you will get experience with building a simple model (excel spreadsheet) that will help you estimate the value of a potential new project. The second part of the course will consist of in-class discussions of case studies that apply these valuation principles to particular legal settings: e.g. valuing settlement offers, merger proposals, appraisal proceedings, and the efficient capital markets hypothesis. We hope that this flexible format will allow more students to take finance. If you wish, you can take this course and then later take Corporate Finance 1. The class will meet (TBA). Additional small group meetings will be scheduled with the instructor. On-line component. Elements used in grading: Written Assignments, Final Project.

**LAW 795. Youth Law and Policy: How the Law Sees and Ignores Children and Youth in Contemporary America. 2 Units.**

This course examines current issues in youth law and policy with a focus on the potential and collateral effects of law on certain subpopulations of vulnerable youth. Substantively, the course focuses on case law and statutes in delinquency, dependency, education, public benefits, and health access with an attention to cross-section themes of poverty, economic justice, race, and youth voice. By the end of the course, students will have developed a better understanding of how litigation, legislation, and policy in youth law come about through examining recent developments in the field and the tools advocates have used to enact change. Any student may write a paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from the exam section (01) into paper section (02), with consent of the instructor. Elements used in grading: Class Participation, Attendance, Written Assignments; Exam or Final Paper.

**LAW 796. Intellectual Property: International and Comparative Patent Law. 2 Units.**

Patentable goods and services are increasingly important in today's global information economy, and they frequently cross national borders, physically or electronically. This course will include a comparative examination of the major national patent systems, a survey of the principal international patent treaties, and discussions of related transnational patent issues. We will examine these topics both from the perspective of global patent practitioners - who face challenges such as securing large international patent portfolios and strategizing multinational patent litigation - and from the perspective of the academics and policymakers who are engaged in ongoing patent harmonization debates. Prerequisites: Introduction to Intellectual Property or another patent-related course or consent of instructor. Elements used in grading: class participation and either several short writing exercises (section (01)) or an independent research paper to be presented in class (section (02)). Special instructions: With the instructor's consent, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement. Early drop deadline. Elements used in grading: Class Participation, Written Assignments or Final Paper.

**LAW 797. Criminal Justice and the Rights of Noncitizens. 2 Units.**

This course will explore a broad set of issues relating to noncitizens and the criminal justice system, including: the immigration consequences of criminal convictions, the effect of citizenship status on criminal justice processes and outcomes, procedural rules and norms governing the policing of crimes of migration, the policing of immigrant communities more generally, the punishment of noncitizens and the extraterritorial reach of the criminal law. The focus will be primarily domestic but we will pay some attention to comparative developments. Elements used in grading: Class Participation, Written Assignments.

**LAW 798. Education Law & Policy. 3 Units.**

This survey class will examine the development of education law and policy in the United States, focusing on the related issues of equity and access. Specific topics covered include who has access to what kind of education, quality and accountability in provision of education, disparate effects of education policies on different groups, and both discipline and its consequences. At the completion of the course students will have gained a deeper understanding of the complex relationships among the law, the student experience, culture, and politics, and of the history of education reform efforts. Elements used in grading: Class Participation, Written Assignments, Final Exam.

**LAW 799. Regional Human Rights Protections: The Inter-American System. 3 Units.**

This course provides an in-depth introduction to the doctrine, practice and critiques of the Inter-American Human Rights System ("IASHR"). Students will examine the major instruments for human rights protections in the IASHR, the Inter-American Court and Commission's procedure and jurisprudence, as well as the obstacles and opportunities that civil society, victims, and advocates encounter when engaging the inter-American system. The Course will consider issues of implementation, and the types of measures and forms of relief that can be sought from the Court and the Commission. The inter-American system has played a crucial role in opening spaces for debate on human rights protections in Latin America and the Caribbean, increasing protections at the domestic level, and supporting civil society in its quest for accountability for massive human rights violations. The system has also played a role in civil society efforts to bring the human rights debate home, including in the United States. Students will have an opportunity to cast a comparative look at the inter-American and the European Human Rights systems and to consider the comparative advantages, disadvantages and complementary potential of regional human rights systems and universal international human rights and criminal justice bodies. Cross Registration: This Course is open to graduate students across the university, with permission of the instructor. Preference for cross-registration by non-Law School students will be given to students enrolled in the Master of Arts program in Latin American Studies. Elements used in grading (Evaluation): Class Participation, Attendance, Final Exam. CONSENT APPLICATION: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration) to the instructors. See Consent Application Form for submission deadline.

**LAW 802. TGR: Dissertation. 0 Units.****Law, Nonprofessional Courses****LAWGEN 10SC. One in Five: The Law, Policy, and Politics of Campus Sexual Assault. 2 Units.**

Trigger Warning: Over the past three years, the issue of campus sexual assault has exploded into the public discourse. While definitive figures are difficult to obtain due to the necessarily private nature of these events, several recent studies estimate that between 20-25% of college women (and a similar proportion of students identifying as transgender and gender-nonconforming, as well as around 5-10% of male students) experience sexual assault. Survivors have come forward across the country with harrowing stories of assault followed by what they describe as an insensitive or indifferent response from college administrators. These survivors have launched one of the most successful, and surprising, social movements in recent memory. As a result, the federal government has stepped up its civil rights enforcement in this area, with 124 colleges and universities under investigation for allegedly mishandling student sexual assault complaints as of July 2015. This course focuses on the legal, policy, and political issues surrounding sexual assault on college campuses. The class is rigorous and includes substantial reading over the summer and during the course. We will spend the first week of the course learning some background about sexual violence and the efforts to implement legal protections for survivors. We will study the basic legal frameworks governing campus assault, focusing on the relevant federal laws such as Title IX and the Clery Act. During the second week we will travel to Washington, D.C., where we will meet with journalists, activists, experts, policymakers, elected officials, and others who are actively involved in shaping the national response to this issue. Expected guests speakers include Catherine Lhamon, the Assistant Secretary of Education for Civil Rights; Representative Jackie Speier (D-CA); lawyers from the National Women's Law Center; the Legislative Director for Senator Kristin Gillibrand (D.N.Y.); Kirby Dick, the director of the acclaimed documentary *The Hunting Ground*; and many of the activists who appear in the film, as well as journalists, policymakers, and theorists. We will also visit sites and museums with relevant exhibits. On our return to campus students will create and present final projects. Travel expenses to DC (except incidentals) are provided by Sophomore College. Students are expected to do all readings, and participate in all class sessions, meals, field trips, films, and discussions. Requirements include 2-3 reaction papers, preparing for discussions with outside speakers, and the development and presentation of a final paper or final group-designed project which can include a multi-media or artistic component. The subject matter of this course is sensitive and students are expected to treat the material with maturity. Much of the reading and subject matter may be upsetting and/or triggering for students who identify as survivors. There is no therapeutic component for this course, although supportive campus resources and Title IX staff are available for those who need them. Please consider this prior to enrolling in the course. Sophomore College course, application required, due noon, April 5, 2016. Apply at <http://soco.stanford.edu>.

**LAWGEN 15SC. Environmental & Resource Challenges on Native American Lands. 2 Units.**

This seminar will study and examine the varied environmental and resource challenges facing Indian reservations in the western United States. Over 360 Indian reservations, the majority of which are in the western United States, encompass over 56 million acres – a land total approximating the size of the State of Idaho. While Indian treaties and executive orders often relegated tribes to isolated and unwanted lands, Indian reservations frequently contain valuable natural resources such as oil, gas, hard minerals, and forests. Many Indian tribes, moreover, enjoy special fishing rights and the legal right to vast amounts of water. At the same time, Indian reservations face serious environmental challenges, including water contamination, habitat decline, and climate change. To examine these questions, we will start with a week of classroom study and discussion. During this week, we will examine the nature of the environmental and resource challenges facing Native American tribes today, the relevant ins and outs of federal Indian law and the legal rights of tribes, Native American governmental systems, and the approaches that tribes are currently taking to these challenges. We will then move into the field and spend approximately ten days in the states of Washington, Montana, and Wyoming, meeting with tribal officials and seeing firsthand the environmental and resource challenges that they face. On our return to Stanford, students will break into groups, and each group will analyze a particular challenge facing a Native American tribe and how best to address that challenge. The course will culminate in student presentations on these analyses. Over the summer, students also will be responsible for assigned readings, online interactive materials, and relevant recent news articles. The class begins on-campus and then travels to Washington, Montana, and Wyoming. Travel expenses during the course will be provided (except incidentals) by the Bill Lane Center for the American West and Sophomore College. Application required, due noon, April 5, 2016. Apply at <http://soco.stanford.edu>.

**LAWGEN 102Q. Pre-field Course for Alternative Spring Break. 1 Unit.**

Pre-field course for undergraduates participating in the Alternative Spring Break program.

**LAWGEN 111Q. Introduction to International Human Rights. 3 Units.**

This course will study the main international human rights declarations, treaties, covenants, committees, courts and tribunals. It will look at the effect of nation states, regional bodies, and key economic and military organizations upon human rights. Categories of rights – civil, political, social, economic and cultural – will be analyzed, with a particular focus on the rights of women and children, and the right to culture.

**LAWGEN 112N. Law and Inequality. 3 Units.**

Most Americans know that discrimination on the basis of race, sex, and religion is unlawful. Seems simple enough. But advertisements in the back of newspapers still announce: "Single White Female Seeks Single White Male?" Isn't that discrimination on the basis of race and sex? Most businesses don't consider men for women's locker room or bathroom attendant. And why aren't those men and women's bathrooms and locker rooms illegal segregation? After all we know what would happen if some business set up separate bathrooms for blacks and whites. Isn't it discrimination for an employer to insist that men wear a jacket and tie and women wear nylons and a skirt? Why are some forms of discrimination unlawful and others not? Why is discrimination against short people, overweight people, or people with annoying personalities not against the law? We will answer these and many other questions by looking at court cases, legal theory, and philosophy. We may also have conversations with guest lecturers who work in civil rights enforcement, and the seminar may include a field trip to visit the offices of civil rights lawyers (lawyers tend to be busy people so these opportunities will depend on their schedules). Class participation and a short final paper are required, but here are no prerequisites other than an open mind and a willingness to delve into unfamiliar material.

**LAWGEN 114Q. Dilemmas of Regulating Race and Inequality in American Society. 3 Units.**

Is race an irrelevant characteristic to which we should all be blind? Do only racists pay attention to race? Or must we take account of race, as one Supreme Court Justice has urged, in order to get beyond it? Indeed, is race something that we should want to "get beyond"? This seminar will consider the nature and extent of racial inequality, and how we as a society might and should respond to it. We will consider specific dilemmas regarding the propriety of taking account of race, in, for example, placing children with adoptive parents, selecting individuals for police investigation, hiring and college admissions. Readings will be drawn from law, history and social science. The goal of the course is to enable you to think more deeply about the moral, social and practical dimensions of how to regulate race in specific settings.

**LAWGEN 115N. Human Rights Advocacy. 3 Units.**

What are the origins of the human rights movement and where is it headed? What does it mean to be a human rights activist? What are the main challenges and dilemmas facing those engaged in human rights advocacy? In the space of 60 years, human rights advocates have transformed a marginal utopian ideal into a central element of global discussion, if not practice. In this seminar we will examine the actors and organizations behind this remarkable development as well as the vast challenges faced by advocates in the recent past and today. Together, we will learn to be critical of, as well as to think, and act, like human rights advocates. This seminar will introduce you to some of the main debates and dilemmas within the human rights movement. We will consider and understand the differing agendas of western international nongovernmental organizations (INGOs) and their counterparts in the frequently non-western developing world, as well as tensions between and among rights advocates along other important dimensions (civil and political vs. economic, social and cultural rights; rights promotion through engagement of powerful actors vs. challenging structures of power, etc.). The seminar seeks to develop your ability: 1) to understand human rights and social justice issues as contested political, legal and cultural phenomena; 2) to review advocacy texts, videos and other interventions critically; 3) to appreciate the political dimensions of efforts to promote human rights; 4) to understand how recent history constrains and structures options and possibilities for social intervention to promote rights and justice. During the course of the quarter you will be required to submit several short reflection papers and develop a human rights advocacy campaign.

**LAWGEN 116N. Guns, Drugs, Abortion, and Empirical Evaluation of Law and Policy. 3 Units.**

Guns, Drugs, Abortion, Capital Punishment, Policing and Prisons, and Other Uncontroversial Topics in the Empirical Evaluation of Law and Policy Do guns make us safer? Can mass shootings be stopped? What is the true cost of the war on drugs and is legalization the answer? Why does the US have the most prisoners in the world and what are the social ramifications? Did the legalization of abortion reduce crime in the 1990s? Did capital punishment? Is the criminal justice system racially biased? These are some of the questions we will address by reading major empirical studies evaluating the impact of law and policy in the arena of criminal justice. This course has been modified from my law school course so that it is accessible to those with little or no statistical or economic background but who are willing to grapple with the intuitions behind such studies, which will be a main focus of the course readings. The seminar should appeal to anyone interested in understanding core issues in criminal justice policy, the challenges in answering empirical questions with data, and the intuition behind the statistical techniques that define the credibility revolution in empirical evaluation. The goal is to help students be more aware that many beliefs and policy positions are based on factual premises for which the empirical support is weak or nonexistent, or even directly contradictory, and how better to empirically ascertain truths about the world and align them with our policy preferences. Successful completion of the course will enable students to more effectively understand and critically evaluate the strengths and weaknesses of the empirical studies that constantly appear in the media and policy discourse, to comprehend the challenges in establishing true causal relationships in the fields of law, policy, and medicine, and to better understand how ideologues and motivated researchers contribute to the vast array of conflicting studies in these domains.

**LAWGEN 206Q. Thinking Like a Lawyer. 3-4 Units.**

(Same as GSBGEN 382.) Open to and limited to non-Law graduate students at the University, this course will provide non-law students an analytical framework for understanding the core concepts of the law and familiarize students with how lawyers analyze and structure their work. This course will be taught by Vice Dean Mark Kelman and Law School faculty in their areas of expertise, with one to two classes devoted to each topic. It will introduce students to some of the foundational principles of law and will review topics such as contracts, litigation, intellectual property, securities and employment law. Students must also attend an additional TA-led discussion section each week. There will be no final exam, but completion of problem sets on various topics as well as class and section participation will be used to determine grading. 3 problem sets are required for all students. For 4 units, an additional assignment must be completed. All readings will be provided on Coursework. TGR students welcome. TGR students welcome. Elements used in grading: Class attendance and written assignments.

**LAWGEN 209Q. Community Police Academy. 1 Unit.**

This course aims to demystify public safety, build trust, and develop partnerships between the police department and the community it serves. Each session is taught by a different deputy or staff member and is designed to expand each participant's knowledge of the duties, responsibilities, decisions, and constraints in the field of law enforcement. The class will discuss topics such as laws of arrest, search and seizure, alcohol laws (to be explored in a DUI wet lab), patrol procedures, officer safety, vehicle stops, CSI vs. reality, emergency communications, and defensive tactics and force options, culminating with a session of scenarios to bring the material to life. In addition to the weekly class, participants are invited to attend field trips, for more in-depth experiences. Past field trips have included the coroner's office, Palo Alto Communications dispatch center, and the San Jose Main Jail. The course is open to all Stanford students, staff, and residents over 18 years of age. While this course is open to all students throughout the University, the units will not count toward the requirements for a law degree. Special Instructions: Live Scan records check required.

**LAWGEN 210Q. International Human Rights: Interdisciplinary Project Work. 4 Units.**

Students enrolled in this course will work on international human rights projects relating to water/sanitation from an interdisciplinary perspective. Enrollment in this section is limited to non-law students, who will work with law students on clinical projects.

**Leadership Intensive Courses****LEAD 10. Leadership Intensive. 2 Units.**

Leadership Intensive (LEAD) offers rising juniors a unique and immersive study of the complexities of leadership through a 3-week residential summer program just before the start of autumn quarter. The program is characterized by an atmosphere of intense exploration of one's own leadership skills and abilities and participation in a strong community committed to helping all members develop their own unique potential. Design thinking, collaborative leadership and hands-on practice of essential leadership skills are integral components of LEAD. The first two weeks of the program will be on campus, while the last week will be off-site in the greater Bay Area.

**LEAD 11A. Leadership Seminar, Autumn. 1 Unit.**

This seminar provides leadership training and skills development. Priority will be given to students who completed the Leadership Intensive Program (LEAD 10).

**LEAD 11B. Leadership Seminar, Winter. 1 Unit.**

This seminar provides leadership training and skills development. Priority will be given to students who completed the Leadership Intensive program (LEAD 10).

**LEAD 101. Fundamentals of Leadership. 3 Units.**

Examination of sources required for authentic leadership: connections, identity, integrity and personal power. Analysis of effective leadership practices and the application to collaborative environments.

**LEAD 105. Art of Facilitation. 1 Unit.**

This experiential education style course allows participants to develop and test their group facilitation skills. Students will explore delivering group initiatives surrounding popular leadership topics and learn how to help their group take away valuable learning from an educational experience. Topics include: Group dynamics theories, safety, assessing the physical, human and social environment to improve group effectiveness.

**Linguistics Courses****LINGUIST 1. Introduction to Linguistics. 4 Units.**

This course introduces students to the cognitive organization of linguistic structure and the social nature of language use. We will investigate language as it is used in our everyday lives, highlighting both the variability and systematic nature of all levels of linguistic structure. In doing so, we will discover how to approach language from a scientific perspective, learn the fundamentals of linguistic analysis, and understand the foundational concepts of the field of Linguistics. Sample topics to be explored across a variety of languages include language and advertising, language change, dialect variation, and language and technology. \*\*\* Sections are mandatory. Please sign up for one of the sections at enrollment.

**LINGUIST 3. Glamour of Grammar. 3-4 Units.**

In this course, we will dispel many a mystery of English grammar, often presented as a dull and dreary subject in schools: we will see that the words *glamorous* and *grammar* come from the same root meaning *mysterious* or *occult* and we will ask: Why is there *stupidity* but not *smartity*? Why can we *blacken* fish or *whiten* teeth, but not *pinken* or *greenen* anything? Who makes up new words anyway? How do we put words together into meaningful sentences? And how do we understand the nuances of English without much direct instruction? While the focus of this course is on English grammar, we will also see that other languages possess grammars that are based on the same principles and constraints.

**LINGUIST 5N. What's Your Accent? Investigations in Acoustic Phonetics. 3 Units.**

Preference to freshmen. Phonetic variation across accents of English; experimental design; practical experience examining accents of seminar participants; acoustic analysis of speech using Praat.

**LINGUIST 10N. Experimental Phonetics. 4 Units.**

Everyday, we face variation in language. As readers, we see words printed in different fonts, sizes, and typefaces, typically static on a page. As listeners, we hear a speech signal riddled with variation. We are exposed to words, but a single word is produced differently each time it is uttered. These words stream by listeners at a rate of about 5 syllables per second, further complicating the listeners' task. How listeners map a speech signal into meaning despite massive variation is an issue central to linguistic theory. The field of experimental phonetics investigates how listeners take words that often vary drastically and understand them as quickly and adeptly as they do. This class introduces students to acoustic and auditory phonetics. As a class, we will carry out a project in experimental phonetics aimed at understanding how different realizations of words are able to be understood by listeners. Throughout the course, students will read background literature, become familiar with the Stanford Linguistics Lab, and learn to use software integral to the design, data collection, and data analysis of experiments. Each week, we will have two meetings, one in a seminar setting and one in the lab.

**LINGUIST 36. The Arabic Language and Culture. 3 Units.**

(Formerly AMELANG 36). Arabic language from historical, social, strategic, and linguistic perspectives. History of the Arabic language and the stability of classical Arabic over the last 15 centuries. Why the functionality of classical Arabic has not changed as Latin, Old English, and Middle English have. Social aspects of the Arabic language, Ferguson's notion of diglossia. The main varieties of Arabic, differences among them, and when and where they are spoken. Role of Arabic and culture in current world politics, culture, and economy. Linguistic properties of Arabic such as root-based morphology, lexical ambiguity, and syntactic structure relating it to current linguistic theories. Same as: LINGUIST 270

**LINGUIST 44N. Living with Two Languages. 3 Units.**

Preference to freshmen. The nature of bi- and multilingualism with emphasis on the social and educational effects in the U.S. and worldwide, in individual versus society, and in child and adult. The social, cognitive, psycholinguistic, and neurological consequences of bilingualism. Participation in planning and carrying out a research project in language use and bilingualism.

**LINGUIST 47N. Languages, Dialects, Speakers. 3 Units.**

Preference to freshmen. Variation and change in languages from around the world; language and thought; variation in sound patterns and grammatical structures; linguistic and social structures of variation; how languages differ from one another and how issues in linguistics connect to other social and cultural issues; the systematic study of language.

**LINGUIST 52N. Spoken Sexuality: Language and the Social Construction of Sexuality. 3 Units.**

The many ways language is used in the construction of sexuality and sexual identity. How language is used as a resource for performing and perceiving sexual identity. Drawing on linguistic analyses of pronunciation, word choice, and grammar, questions such as: Is there a gay accent? Why isn't there a lesbian accent? How do transgendered people modify their linguistic behavior when transitioning? How are unmarked (heterosexual) identities linguistically constructed? Sexuality as an issue of identity, as well as of desire. Iconic relations between elements of language such as breathy voice quality and high pitch, and aspects of desire such as arousal and excitement. How language encodes ideologies about sexuality; how language is used to talk about sexuality in public discourses about gay marriage and bullying, as well as in personal narratives of coming out. How language encodes dominant ideologies about sexuality, evident in labels for sexual minorities as well as terminology for sex acts. Discussions of readings, explorations of how sexuality is portrayed in popular media, and analyses of primary data. Final research paper on a topic of student choice. Same as: FEMGEN 52N

**LINGUIST 53N. Language and Adolescence. 3 Units.**

Adolescents are arguably the most creative age group in our society. They are the leaders in linguistic change, introducing innovations that eventually spread to the entire population. Not only do adolescents create new speech styles such as "valley girl" and "cholo", and new forms such as the quotative "I'm like", they also accelerate the phonetic changes that differentiate regional and ethnic dialects. This seminar will explore the diversity and creativity of adolescent language, and the role of adolescents in linguistic and social change.

**LINGUIST 63N. The Language of Comics. 3 Units.**

This seminar will explore language as represented in cartoons and comics such as Bizarro, Dilbert and Zits, how we interpret it, and why we find comics funny. We will explore and analyze language play, genderspeak and teenspeak; peeving about usage; new and spreading usages.

**LINGUIST 65. African American Vernacular English. 3-5 Units.**

The English vernacular spoken by African Americans in big city settings, and its relation to Creole English dialects spoken on the S. Carolina Sea Islands (Gullah), in the Caribbean, and in W. Africa. The history of expressive uses of African American English (in soundin' and rappin'), and its educational implications. Service Learning Course (certified by Haas Center). Same as: AFRICAAM 21

**LINGUIST 66. Vernacular English and Reading. 4-5 Units.**

Discusses some of the literature on the relation between use of vernacular English varieties (e.g. African American Vernacular English, Chicano English) and the development of literacy (especially in Standard English). But our primary focus is on improving the reading skills of African American and Latino students in local schools through the Reading Road program developed at the University of Pennsylvania. Students must commit to tutoring one or more elementary students weekly, using the program. L65 AAVE recommended, but not required. Same as: LINGUIST 266

**LINGUIST 83N. Translation. 3 Units.**

Preference to Freshman. What is a translation? The increased need for translations in the modern world due to factors such as tourism and terrorism, localization and globalization, diplomacy and treaties, law and religion, and literature and science. How to meet this need; different kinds of translation for different purposes; what makes one translation better than another; why some texts are more difficult to translate than others. Can some of this work be done by machines? Are there things that cannot be said in some languages?.

**LINGUIST 90. Teaching Spoken English. 3-4 Units.**

Practical approach to teaching English to non-native speakers. Teaching principles and the features of English which present difficulties. Preparation of lessons, practice teaching in class, and tutoring of non-native speaker.

**LINGUIST 105. Phonetics. 4 Units.**

Phonetics is the systematic study of speech. In this class, we will learn about the physical gestures and timing involved in the articulation of spoken language and about the resulting acoustic signal that is decoded into linguistic units by the human auditory system. The class is structured into two parts: A practical lab component, and a class component. This course highlights both the complexity of the physical nature of producing spoken language, and the highly variable acoustic signal that is interpreted by listeners as language. By the end of this course, you should: (1) Understand the process of preparing an utterance to articulating it; (2) Understand the basic acoustic properties of speech; (3) Provide detailed phonetic transcriptions of speech; (4) Produce and understand the gestures involved in nearly all of the world's speech sounds, and (5) Understand the ways this knowledge can be used to advance our understanding of spoken language understanding by humans and machines.

Same as: LINGUIST 205A

**LINGUIST 106. Introduction to Speech Perception. 4 Units.**

Basics of acoustic phonetics and audition. What do listeners perceive when they perceive speech. Examine current research including: the categorical perception of speech, cross-language speech perception, infant speech perception. Theoretical questions of interest to speech perception researchers and experimental methods used in the field.

**LINGUIST 110. Introduction to Phonology. 4 Units.**

Introduction to the sound systems of the world's languages, their similarities and differences. Theories that account for the tacit generalizations that govern the sound patterns of languages.

**LINGUIST 112. Seminar in Phonology. 2-4 Units.**

Topics vary each year. Previous topics include variation in the phonology of words according to their contexts within larger expressions and the place of these phenomena in a theory of grammar. May be repeated for credit.

Same as: LINGUIST 212A

**LINGUIST 116. Morphology. 4 Units.**

A survey of words including their structures, pronunciations, meanings, and syntactic possibilities in a wide sampling of languages to provide a laboratory for investigating the nature of morphology.

**LINGUIST 120. Introduction to Syntax. 4 Units.**

Grammatical constructions, primarily English, and their consequences for a general theory of language. Practical experience in forming and testing linguistic hypotheses, reading, and constructing rules.

**LINGUIST 121A. The Syntax of English. 4 Units.**

Course description: A data-driven introduction to the study of generative syntax through an in-depth investigation of the sentence structure of English. Emphasis is on central aspects of English syntax, but the principles of theory and analysis extend to the study of the syntax of other languages. The course focuses on building up syntactic argumentation skills via the collective development of a partial formal theory of sentence structure, which attempts to model native speaker knowledge. Satisfies the WIM requirement for Linguistics and the WAY-FR requirement. Prerequisites: none (can be taken before or after Linguistics 121B). The discussion section is mandatory.

**LINGUIST 121B. Crosslinguistic Syntax. 4 Units.**

Course description: A data-driven introduction to the study of syntax through the investigation of a diverse array of the world's languages, including but not limited to English. Emphasis is on understanding how languages are systematically alike and different in their basic sentence structure. The course focuses on building up syntactic argumentation skills via the collective development of a partial formal theory of sentence structure, which attempts to model native speaker knowledge. Satisfies the WIM requirement for Linguistics and the WAY-FR requirement.

Prerequisites: none (can be taken before or after Linguistics 121A). The discussion section is mandatory.

**LINGUIST 124. Introduction to Lexical Function Grammar. 2-4 Units.**

Presentation of a formal model of grammar designed to allow precise, computationally tractable descriptions of cross-linguistic variation in syntactic structure. Concentration on the formal properties of the model, its flexibility in teasing out language specific and possibly universal characteristics of natural languages and the place of syntax as a component within a larger linguistic architecture. Prerequisite: 120 or consent of instructor.

Same as: LINGUIST 224

**LINGUIST 130A. Introduction to Semantics and Pragmatics. 4 Units.**

Linguistic meaning and its role in communication. Topics include ambiguity, vagueness, presupposition, intonational meaning, and Grice's theory of conversational implicature. Applications to issues in politics, the law, philosophy, advertising, and natural language processing. Those who have not taken logic, such as PHIL 150 or 151, should also enroll in 130C. Pre- or corequisite: 120, 121, consent of instructor, or graduate standing in Linguistics.

Same as: LINGUIST 230A

**LINGUIST 130B. Introduction to Lexical Semantics. 3-4 Units.**

Introduction to basic concepts and issues in the linguistic study of word meaning. The course focuses on the core semantic properties and internal organization of the four major word classes in natural languages: nouns, adjectives, prepositions, verbs. This course draws on material from English and other languages to illustrate the range of word meanings found across languages and to investigate possible word meanings. Prerequisites: Linguist 1 or equivalent or permission of the instructor. Linguist 130A is not a prerequisite for this course.

**LINGUIST 130C. Logic Laboratory. 1 Unit.**

Typically taken in conjunction with 130A/230A.

Same as: LINGUIST 230E

**LINGUIST 131. Language and Thought. 4 Units.**

The psychology of language including: production and understanding in utterances; from speech sounds to speaker's meaning; children's acquisition of the first language; and the psychological basis for language systems. Language functions in natural contexts and their relation to the processes by which language is produced, understood, and acquired. Prerequisite: 1 or LINGUIST 1.

Same as: PSYCH 131, PSYCH 262

**LINGUIST 134. Seminar on Language and Deception. 3 Units.**

Deceptive, exploitative, and other noncooperative uses of language. How is language used to deceive or exploit? Where are these techniques practiced and why? What are the personal, ethical, and social consequences of these practices? Prerequisite: 131, LINGUIST 1, or PHIL 181.

Same as: PSYCH 134

**LINGUIST 134A. The Structure of Discourse: Theory and Applications. 2-4 Units.**

In this course we will address the structure of language above the sentence concentrating initially on: (1) defining the minimal units of discourse structure (2) recursive rules of combination of minimal units (i.e. discourse syntax) (3) representations of discourse level phenomena (4) the nature and structure of spoken and written formal and informal discourse genres and Speech events in English and other languages including stories, explanations, literary works etc. on the one hand, and socially constructed occasions of speaking such as classes, doctor patient interactions, and informal conversation on the other.

Same as: LINGUIST 234

**LINGUIST 140. Language Acquisition I. 4 Units.**

Processes of language acquisition in early childhood; stages in development; theoretical issues and research questions. Practical experience in data collection. Satisfies the WIM requirement for Linguistics if requested.

Same as: LINGUIST 240

**LINGUIST 141. Language and Gesture. 4 Units.**

History of work on gesture, gestural systems associated with particular languages/cultures, and with specific activities - music, sports, traffic management, stock exchanges, etc. Examination of how gesture is represented in painting and animation, and the role it plays in early adult-child interaction.

**LINGUIST 142. Heritage Languages. 3-4 Units.**

The linguistic and cultural properties of Heritage languages, which are partially acquired and supplanted by a dominant language in childhood. Topics: Syntactic, phonological and morphological properties of heritage languages, implications from experimental HL research for language universals, cultural vs. linguistic knowledge, the role of schooling in HL competence, influence of the dominant language on the HL, and pedagogical issues for HL learners in the classroom.

Same as: LINGUIST 242

**LINGUIST 143. Sign Languages. 4 Units.**

The linguistic structure of sign languages. How sign languages from around the world differ, and what properties they share. Accents and dialects in sign languages. How sign languages are similar to and different from spoken languages. How and why sign languages have emerged.

**LINGUIST 144. Minds and Machines. 4 Units.**

An overview of the interdisciplinary study of cognition, information, communication, and language, with an emphasis on foundational issues: What are minds? What is computation? What are rationality and intelligence? Can we predict human behavior? Can computers be truly intelligent? How do people and technology interact, and how might they do so in the future? Lectures focus on how the methods of philosophy, mathematics, empirical research, and computational modeling are used to study minds and machines. Undergraduates considering a major in symbolic systems should take this course as early as possible in their program of study.

Same as: PHIL 99, PSYCH 35, SYMSYS 100

**LINGUIST 150. Language in Society. 2-4 Units.**

How language and society affect each other. Class, age, ethnic, and gender differences in speech. Prestige and stigma associated with different ways of speaking and the politics of language. The strategic use of language. Stylistic practice; how speakers use language to construct styles and adapt their language to different audiences and social contexts.

**LINGUIST 152. Sociolinguistics and Pidgin Creole Studies. 2-4 Units.**

Introduction to pidgins and creoles, organized around the main stages in the pidgin-creole life cycle: pidginization, creolization, and decreolization. Focus is on transformations in the English language as it was transported from Britain to Africa, Asia, the Caribbean, and the Pacific. Resultant pidginized and creolized varieties such as Nigerian Pidgin English, Chinese Pidgin English, New Guinea Tok Pisin, Suriname Sranan, and the creole continua of Guyana, Jamaica, and Hawaii. Also French, Dutch, Portuguese, Chinook, Motu, and Sango.

Same as: LINGUIST 252

**LINGUIST 153. Language, Power & Politics. 3-4 Units.**

The integral role language plays in politics; how power operates in linguistic practices and political interaction. Critical examination of how language is used to articulate, maintain and subvert relations of power in society, emphasizing language in the media, the political rhetoric associated with war, and the construction of "truth" in politics. The role of ethnographic analysis in aiding sociolinguistic understandings of how social actors use and (re)interpret political language.

**LINGUIST 154. Sociolinguistics of Language Contact. 2-4 Units.**

The role of contact between speakers of different languages in processes of language borrowing, convergence, and shift. Attending both to linguistic aspects and social contexts, examine: second-language acquisition, bilingualism, code-switching, lexical and grammatical borrowing, first language attrition, language death, and the creation of new contact varieties such as jargons, mixed languages, pidgins, and creoles. Prerequisite: background in linguistics, at least one course in linguistics.

Same as: LINGUIST 254

**LINGUIST 155. Hip Hop, Youth Identities, and the Politics of Language. 3-4 Units.**

Focus is on issues of language, identity, and globalization, with a focus on Hip Hop cultures and the verbal virtuosity within the Hip Hop nation. Beginning with the U.S., a broad, comparative perspective in exploring youth identities and the politics of language in what is now a global Hip Hop movement. Readings draw from the interdisciplinary literature on Hip Hop cultures with a focus on sociolinguistics and youth culture.

Same as: AFRICAAM 121X, AMSTUD 121X, ANTHRO 121A, CSRE 121X, EDUC 121

**LINGUIST 156. Language and Gender. 4 Units.**

The role of language in the construction of gender, the maintenance of the gender order, and social change. Field projects explore hypotheses about the interaction of language and gender. No knowledge of linguistics required.

Same as: FEMGEN 156X

**LINGUIST 157. Sociophonetics. 1-4 Unit.**

The study of phonetic aspects of sociolinguistic variation and the social significance of phonetic variation. Acoustic analysis of vowels, consonants, prosody, and voice quality. Hands-on work on collaborative research project. Prerequisite: 110 or equivalent, or consent of instructor.

Same as: LINGUIST 257

**LINGUIST 159. American Dialects. 2-4 Units.**

What is a dialect, and who speaks one? This course will focus on the fundamentals of linguistic study and dialectology through examinations of regional, social and ethnic dialects in the United States. The course will examine dialect variation on many linguistic levels, from variation in individual words (pop v. soda) to variation in how vowels are pronounced. Historical development of U.S. dialects, linguistic change, perceptual dialectology, and prestige and stigma of dialects will be discussed. Students will participate in real variation research to gain experience with quantitative data in examining the influence of social factors on dialect variation.

**LINGUIST 160. Introduction to Language Change. 4 Units.**

Principles of historical linguistics; the nature of language change. Kinds and causes of change, variation and diffusion of changes through populations, differentiation of dialects and languages, determination and classification of historical relationships among languages, the reconstruction of ancestral languages and intermediate changes, parallels with cultural and genetic evolutionary theory, and implications of variation and change for the description and explanation of language in general. Prerequisite: introductory course in linguistics.

**LINGUIST 162. History Through Language. 3-4 Units.**

What we can learn about the human past through human language, especially where proper historical records are absent. Studying population migrations through language spread. Different types of change in different social environments: grammatical "simplification" of imperial languages vs. complexity of tribal languages. Effects of contact on languages. Methods for reconstructing linguistic past: comparative method, linguistic paleontology, computational phylogenetic methods.

**LINGUIST 163A. Endangered Languages and Language Revitalization. 3-4 Units.**

Languages around the world are dying at such a rapid rate that the next century could see half of the world's 6800 languages and cultures become extinct unless action is taken now. This course looks at how and why languages die, and what is lost from a culture when that occurs. We will investigate how this trend can be reversed by methods of language documentation and description, the use of innovative technologies, multimodal fieldwork, writing dictionaries and grammars for different audiences, language planning, and data creation, annotation, preservation, and dissemination. We will focus on a number of current programs around the world to revitalize languages. Finally, the course will examine ethical modes of fieldwork within endangered language communities, and the possibilities of successful collaborations and capacity building, focusing especially on Northern California Indian peoples and their languages.

Same as: ANTHRO 163A, ANTHRO 263A, LINGUIST 263, NATIVEAM 163

**LINGUIST 167. Languages of the World. 3-4 Units.**

The diversity of human languages, their sound systems, vocabularies, and grammars. Tracing historical relationships between languages and language families. Parallels with genetic evolutionary theory. Language policy, endangered languages and heritage languages. Classification of sign languages.

**LINGUIST 171. Iberian Languages: Structure, Variation & Context. 3 Units.**

The course will center on Iberian languages with a special focus on Catalan. We will consider the relation between language structure and other factors, such as language variation in space and time, and sociological and political factors. Topics will include a contrastive analysis of selected features of Iberian languages, a survey of dialectal variation in some of the languages of the area and of their external linguistic history.

**LINGUIST 173. The Structure of Russian. 2-4 Units.**

A synchronic overview of contemporary standard Russian, including its sound system, word formation and grammatical structure. Emphasis is on problems presented by Russian for current linguistic theory. The acquisition of Russian as a first language.

Same as: LINGUIST 273

**LINGUIST 180. From Languages to Information. 3-4 Units.**

Extracting meaning, information, and structure from human language text, speech, web pages, genome sequences, social networks. Methods include: string algorithms, edit distance, language modeling, the noisy channel, naive Bayes, inverted indices, collaborative filtering, PageRank. Applications such as question answering, sentiment analysis, information retrieval, text classification, social network models, machine translation, genomic sequence alignment, spell checking, speech processing, recommender systems. Prerequisite: CS103, CS107, CS109.

Same as: CS 124, LINGUIST 280

**LINGUIST 182. Computational Theories of Syntax. 3-4 Units.**

Salient features of modern syntactic theories, including HPSG, LFG, and TAG, motivated by computational concerns. Impact of work within these frameworks on the design of algorithms in computational linguistics, and its influence in both linguistics and computer science. Topics include: notions of unification; unification algorithms and their relation to linguistic theory; agenda-driven chart processing for analysis and synthesis; the interface with morphology, the lexicon, and semantics; and applications, notably machine translation.

Same as: LINGUIST 282

**LINGUIST 183. Programming and Algorithms for Natural Language Processing. 3-4 Units.**

Construction of computer programs for linguistic processes such as string search, morphological, syntactic, and semantic analysis and generation, and simple machine translation. Emphasis is on the algorithms that have proved most useful for solving such problems.

**LINGUIST 184. Syntactic Theory and Implementation. 4 Units.**

Analysis and implementation of grammatical phenomena of English. Introduction to a theory of formal grammar, and its computational realization. Practical experience in forming linguistic hypotheses and testing them via implementation using state-of-the-art language technology.

Same as: SYMSYS 184

**LINGUIST 185. Writing Systems in a Digital Age. 2-3 Units.**

Introduction to the variety of writing systems and their behaviors. Classification of all existing scripts as alphabetic, syllabic, ideographic; unifying and differentiating features within each group. How writing captures human language in various ways. The development of the alphabet, from ancient Semitic scripts to modern times. How writing systems are extended to additional languages. Chinese writing, its characteristics and sphere of influence. Japanese writing as a hybrid system that includes Chinese. Korean writing as an ideally designed script. The Indian system of writing as the foundation of numerous Asian syllabic scripts. Unicode as global standard for encoding text in all languages. Font technology: the emulation of human writing in the digital realm. nBasic knowledge of phonetics recommended. Knowledge of foreign languages helpful.

Same as: LINGUIST 284A

**LINGUIST 188. Natural Language Understanding. 3-4 Units.**

Project-oriented class focused on developing systems and algorithms for robust machine understanding of human language. Draws on theoretical concepts from linguistics, natural language processing, and machine learning. Topics include lexical semantics, distributed representations of meaning, relation extraction, semantic parsing, sentiment analysis, and dialogue agents, with special lectures on developing projects, presenting research results, and making connections with industry. Prerequisites: one of LINGUIST 180, CS 124, CS 224N, CS224S, or CS221; and logical/semantics such as LINGUIST 130A or B, CS 157, or PHIL150.

Same as: CS 224U, LINGUIST 288

**LINGUIST 191. Linguistics and the Teaching of English as a Second/Foreign Language. 4-5 Units.**

Methodology and techniques for teaching languages, using concepts from linguistics and second language acquisition theory and research. Focus is on teaching English, but most principles and techniques applicable to any language. Optional 1-unit seminar in computer-assisted language learning.

Same as: LINGUIST 291

**LINGUIST 195A. Undergraduate Research Workshop. 1 Unit.**

Designed for undergraduates beginning or working on research projects in linguistics. Participants present and receive feedback on their projects and receive tips on the research and writing process.

**LINGUIST 196. Introduction to Research for Undergraduates. 1 Unit.**

Introduction to linguistic research via presentations by Stanford linguistics faculty and graduate students. Open to undergraduate students interested in linguistics. Required for linguistics majors.

**LINGUIST 197A. Undergraduate Research Seminar. 2-3 Units.**

Senior capstone seminar. Joint readings in an annually varying topic, exploring the implications and importance of linguistic research for other domains of knowledge or practice.

**LINGUIST 198. Honors Research. 1-15 Unit.****LINGUIST 199. Independent Study. 1-15 Unit.****LINGUIST 200. Foundations of Linguistic Theory. 4 Units.**

Theories that have shaped contemporary linguistics; recurrent themes and descriptive practice. Strong background in Linguistics or permission of instructor.

**LINGUIST 204. Philosophy of Linguistics. 4 Units.**

Philosophical issues raised by contemporary work in linguistics. Topics include: the subject matter of linguistics (especially internalism vs. externalism), methodology and data (especially the role of quantitative methods and the reliance on intuitions), the relationship between language and thought (varieties of Whorfianism and anti-Whorfianism), nativist arguments about language acquisition, and language evolution. Same as: PHIL 369, SYMSYS 204

**LINGUIST 205A. Phonetics. 4 Units.**

Phonetics is the systematic study of speech. In this class, we will learn about the physical gestures and timing involved in the articulation of spoken language and about the resulting acoustic signal that is decoded into linguistic units by the human auditory system. The class is structured into two parts: A practical lab component, and a class component. This course highlights both the complexity of the physical nature of producing spoken language, and the highly variable acoustic signal that is interpreted by listeners as language. By the end of this course, you should: (1) Understand the process of preparing an utterance to articulating it; (2) Understand the basic acoustic properties of speech; (3) Provide detailed phonetic transcriptions of speech; (4) Produce and understand the gestures involved in nearly all of the world's speech sounds, and (5) Understand the ways this knowledge can be used to advance our understanding of spoken language understanding by humans and machines.

Same as: LINGUIST 105

**LINGUIST 205B. Advanced Phonetics. 2-4 Units.**

In this course, we will read and discuss literature relating broadly to issues of attention in speech perception. This course will illuminate the complexity of speech perception, identify where we are as a field in understanding human behavior with respect to speech perception, pinpoint specific areas of research that might be informed by considering attention, and to understand the impact an attentional component in current models would have on the structure and organization of language and on our current understanding of linguistic experience.

**LINGUIST 207. Seminar in Phonetics: The perception and recognition of clear and casual speech.. 2-4 Units.**

Through readings and discussion, we will focus on two questions in this seminar: (1) Is the balance of top-down versus bottom-up information different when processing careful vs. casual speech? (2) What provides more information to a listener - Half of a clearly-articulated word, or an entire reduced word? This is not a project-based seminar, but the seminar is linked to an ongoing research project, and we will use that project to ground how a researcher might go about addressing the above questions. We will refer to our in-progress project to provide concrete examples of (a) testable, theoretically-grounded hypotheses, (b) appropriately matched methods/design, (c) benefits/costs of different types of statistical methods, and (d) supported vs. speculative accounts. The seminar is heavily based on reading and discussion, but will be supplemented by the practical issues associated with a related project. At the end of the seminar, students will have a basic understanding of the literature related to the topic, what gaps/inconsistencies exist in that work, and how to pursue those gaps, if interested. A research proposal is required at the end of the quarter.

**LINGUIST 210A. Phonology. 3-4 Units.**

Introduction to phonological theory and analysis based on cross-linguistic evidence. Topics: phonological representations including features, syllables, metrical structure; phonological processes; and phonological typology and universals; Optimality Theory. The phonology/morphology interface.

**LINGUIST 210B. Advanced Phonology. 2-4 Units.**

New developments in phonological theory, in particular Optimality Theory, primarily on the empirical basis of stress, syllable structure, prosodic organization, and phonological variation.

**LINGUIST 211. Metrics. 1-4 Unit.**

Principles of versification from a linguistic point of view. Traditional and optimality-theoretic approaches. The canonical system of English metrics, and its varieties and offshoots. The typology of metrical systems and its linguistic basis. Meter and performance.

**LINGUIST 212A. Seminar in Phonology. 2-4 Units.**

Topics vary each year. Previous topics include variation in the phonology of words according to their contexts within larger expressions and the place of these phenomena in a theory of grammar. May be repeated for credit.

Same as: LINGUIST 112

**LINGUIST 212B. Seminar in Phonology. 1-4 Unit.**

May be repeated for credit.

**LINGUIST 213. Corpus Phonology. 2-4 Units.**

An introduction to constructing and using phonologically annotated corpora to test phonological hypotheses. Hands-on experience in corpus manipulation and phonological modeling.

**LINGUIST 214. Phonology Workshop. 1-2 Unit.**

May be repeated for credit.

**LINGUIST 217. Morphosyntax. 2-4 Units.**

The role of morphology in grammar: how word structure serves syntax in the expression of meaning. Lexical semantics, Theta-roles, argument structure, and grammatical relations. Licensing: case, agreement, word order, and their interaction.

**LINGUIST 218. Seminar on Morphological Theories. 2-4 Units.**

Word formation and the lexicon: empirical generalizations and theoretical approaches. Lexicalist and Distributed Morphology. How words are built and interpreted: constituency and headedness, morpheme order and scope, the mirror principle, bracketing paradoxes, the hierarchy of functional categories. Paradigms, blocking, gaps, periphrasis, syncretism. Locality, head movement vs. selection, constraints on allomorphy, incorporation, polysynthesis, cliticization and prosodic re-ordering phenomena.

**LINGUIST 219. Frequency and the Grammar of Alternations. 1-4 Unit.**

Variationist, and psycholinguistic studies of how syntactic alternations (for example, the English dative, genitive, and passive) develop in time and space.

**LINGUIST 221A. Foundations of English Grammar. 1-4 Unit.**

A systematic introduction to the formal analysis of English grammar using the framework of head-driven phrase structure grammar (HPSG). Topics: feature structure modeling, lexical and phrasal organization in terms of type hierarchies and constraint inheritance, clausal types, patterns of complementation, the auxiliary system, extraction dependencies, wh-constructions, and the syntax-semantics interface.

**LINGUIST 221B. Studies in Universal Grammar. 1-4 Unit.**

Focus is on grammatical analysis of individual languages. Builds directly on the theoretical foundations presented in 221A. Topics vary each year.

**LINGUIST 222A. Foundations of Syntactic Theory I. 3-4 Units.**

The roles of the verb and the lexicon in the determination of sentence syntax and their treatment in modern grammatical theories. Empirical underpinnings of core phenomena, including the argument/adjunct distinction, argument structure and argument realization, control and raising, operations on argument structure and grammatical function changing rules. Motivations for a lexicalist approach rooted in principles of lexical expression and subcategorization satisfaction. Prerequisite: 120 or permission of instructor.

**LINGUIST 222B. Foundations of Syntactic Theory II. 3-4 Units.**

The nature of unbounded dependency constructions such as constituent questions, topicalization, relative clauses, and clefts, among others. Topics include A-bar movement, constraints on extraction, successive cyclicity, as well as variation in the way unbounded dependencies are established crosslinguistically. Prerequisite: 222A.

**LINGUIST 223. Introduction to Minimalist Syntax. 3-4 Units.**

Introduces the basics of Minimalist architecture and structure-building operations, with attention to the communication of syntax with the phonological and semantic interfaces. Topics include phrase structure, locality and phases, phrasal and head movement, functional categories, and features. A previous graduate-level syntax course, or permission of the instructor required.

**LINGUIST 224. Introduction to Lexical Function Grammar. 2-4 Units.**

Presentation of a formal model of grammar designed to allow precise, computationally tractable descriptions of cross-linguistic variation in syntactic structure. Concentration on the formal properties of the model, its flexibility in teasing out language specific and possibly universal characteristics of natural languages and the place of syntax as a component within a larger linguistic architecture. Prerequisite: 120 or consent of instructor. Same as: LINGUIST 124

**LINGUIST 224A. From Text to Natural Reasoning. 1-4 Unit.**

To reason about textual information we rely extensively on extra-linguistic information but the syntactic structure and lexical items used also play a role in guiding us to conclusions. In by now traditional semantic practice the contributions of those are treated in model theoretic terms. But formulas of first or higher order logic do not come with effective procedures for the reasoning that is required to draw inferences or answer questions given some natural language input. Natural Reasoning is a cover term we use for a family of proof-theoretic formal approaches that are currently used by computational linguists. The course will give an overview of proof-theoretic logic as applied to natural language, discuss some of the computational systems that incorporate this view (Stanford's NatLog, Bar Ilan's Biutee, Parc's Bridge) and conclude with a critical view of the linguistic generalizations that underlie these approaches and means to improve them or mitigate their shortcomings. The examples of natural reasoning will mainly be in the domain of monotonicity reasoning and reasoning about the factuality of events.

**LINGUIST 224B. Advanced Topics in Lexical Functional Grammar. 1-4 Unit.**

May be repeated for credit.

**LINGUIST 225. Seminar in Syntax: Head Movement. 2-4 Units.**

Seminar on advanced topics in syntax. Topics may vary from year to year. May be repeated for credit. May be repeated for credit.

**LINGUIST 225A. Seminar in Syntax: Ellipsis. 1-4 Unit.**

Diverse kinds of elliptical utterances. The fundamental problems in grammatical analysis of ellipsis (primary focus: English). The clarification of key data relating to current theoretical controversies. May be repeated for credit.

**LINGUIST 225B. Seminar in Syntax: Syntax/Phonology Interface. 2-4 Units.**

The nature of the syntax-phonology interface. To what extent does syntax influence phonology and in what ways does phonology influence syntax? Topics may include: word order and linearization, second-position effects, prosodic structure and the prosodic hierarchy, sentential stress, ellipsis, focus, allomorphy, among others. May be repeated for credit. Prerequisites: Linguistics 222A (Foundations of Syntactic Theory I) and Linguistics 210A (Phonology), or permission of the instructor.

**LINGUIST 225S. Syntax and Morphology Research Seminar. 1 Unit.**

Presentation of ongoing research in syntax and morphology. May be repeated for credit.

**LINGUIST 227C. Projects in Syntax. 2-4 Units.**

Group research projects using quantitative syntactic data from texts, recordings, experiments, or historical records. Skills in extracting, graphically exploring, and analyzing naturalistic syntactic data, and in presenting results. May be repeated for credit. Prerequisite: 229A, B, or D, or equivalent.

**LINGUIST 229A. Laboratory Syntax I. 1-4 Unit.**

Critiques of the empirical foundations of syntax. The roles of introspective, usage-based, experimental, and typological evidence. Modern methods of data collection and analysis used in syntax. Hands-on, practical work with data sets. May be repeated for credit.

**LINGUIST 229B. Laboratory Syntax II. 1-4 Unit.**

Hands-on use of methods for handling syntactic data, including corpus work on ecologically natural data and controlled experimental paradigms. Explanatory models of syntactic processing and their relation to theories of grammar. May be repeated for credit.

**LINGUIST 229C. Laboratory Syntax III. 1-4 Unit.**

Hands-on use of methods for handling syntactic data, including corpus work on ecologically natural data and controlled experimental paradigms. Explanatory models of syntactic processing and their relation to theories of grammar. May be repeated for credit.

**LINGUIST 229D. Empirical Syntax Research Seminar. 1-2 Unit.**

Recent work in syntax that employs data-rich methods like corpora and laboratory studies, emphasizing research by seminar participants. May be repeated for credit.

**LINGUIST 230A. Introduction to Semantics and Pragmatics. 4 Units.**

Linguistic meaning and its role in communication. Topics include ambiguity, vagueness, presupposition, intonational meaning, and Grice's theory of conversational implicature. Applications to issues in politics, the law, philosophy, advertising, and natural language processing. Those who have not taken logic, such as PHIL 150 or 151, should also enroll in 130C. Pre- or corequisite: 120, 121, consent of instructor, or graduate standing in Linguistics.

Same as: LINGUIST 130A

**LINGUIST 230B. Semantics and Pragmatics I. 2-4 Units.**

Expands on 130A/230A. Detailed study of selected topics in formal semantics and pragmatics. Prerequisites: LINGUIST 130A/230A or permission from instructor.

**LINGUIST 230C. Semantics and Pragmatics II. 1-4 Unit.**

We focus on a topic in the meaning and use of linguistic expressions to explore a number of central issues in semantics and pragmatics. These include quantification, binding, referentiality, presupposition, pragmatic inferences, context-dependency, indexicality, and systems of dynamic interpretation. Prerequisites: Ling 230B or permission of the instructor.

**LINGUIST 230D. Semantics Research Seminar. 1 Unit.**

May be repeated for credit.

**LINGUIST 230E. Logic Laboratory. 1 Unit.**

Typically taken in conjunction with 130A/230A.

Same as: LINGUIST 130C

**LINGUIST 232A. Lexical Semantics. 2-4 Units.**

Introduction to issues in word meaning, focused primarily around verbs. Overview of the core semantic properties of verbs and the organization of the verb lexicon. Approaches to lexical semantic representation, including semantic role lists, proto-roles, and causal and aspectual theories of event conceptualization.

**LINGUIST 232B. Seminar in Lexical Semantics: Agents, External Arguments, and Clause Structure. 1-4 Unit.**

An investigation into the semantic foundations of clause structure through the lens of agentivity. Review of recent research on the nature of agentivity, with a focus on investigations of non-canonical instances (e.g., non-volitional agents, emitters, natural forces, projectiles). Implications for current syntactic assumptions about the nature of the clause (e.g., severing the external argument, voice P, little v). May be repeated for credit with different content.

**LINGUIST 234. The Structure of Discourse: Theory and Applications. 2-4 Units.**

In this course we will address the structure of language above the sentence concentrating initially on: nn(1) defining the minimal units of discourse structure(2) recursive rules of combination of minimal units (i.e. discourse  $\zeta$  syntax $\zeta$ )n(3) representations of discourse level phenomenon(4) the nature and structure of spoken and written formal and informal discourse genres and Speech events in English and other languages including stories, explanations, literary works etc. on the one hand, and socially constructed occasions of speaking such as classes, doctor patient interactions, and informal conversation on the other. Same as: LINGUIST 134A

**LINGUIST 235. Semantic Fieldwork. 2-4 Units.**

Techniques for evidence from less well-studied languages within formal semantic theory. Semantic phenomena, and techniques for investigating them, including scope, quantifiers, pronouns, focus, tense, aspect, mood, evidentiality, and information structure. Practical work on a language.

**LINGUIST 236. Seminar in Semantics: Modality and Conditionals. 4 Units.**

Discussion of theories of the semantics and pragmatics of modals and conditionals.

Same as: PSYCH 236C

**LINGUIST 237. Seminar in Semantics: Gradation & Modality. 1-4 Unit.**

Discussion of major semantic theories of modality and gradation, with special attention to empirical and logical issues that arise from the study of gradable modals.

**LINGUIST 239. Semantics and Pragmatics Research Seminar. 1-2 Unit.**

Presentation of ongoing research in semantics. May be repeated for credit.

**LINGUIST 240. Language Acquisition I. 4 Units.**

Processes of language acquisition in early childhood; stages in development; theoretical issues and research questions. Practical experience in data collection. Satisfies the WIM requirement for Linguistics if requested.

Same as: LINGUIST 140

**LINGUIST 241. Language Acquisition II. 4 Units.**

Pragmatics and acquisition. May be repeated for credit.

**LINGUIST 242. Heritage Languages. 3-4 Units.**

The linguistic and cultural properties of Heritage languages, which are partially acquired and supplanted by a dominant language in childhood. Topics: Syntactic, phonological and morphological properties of heritage languages, implications from experimental HL research for language universals, cultural vs. linguistic knowledge, the role of schooling in HL competence, influence of the dominant language on the HL, and pedagogical issues for HL learners in the classroom.

Same as: LINGUIST 142

**LINGUIST 245. Experimental Design for Linguistics. 4 Units.**

Hypothesis formation, confound avoidance, power, general methods, and analysis of results. Students complete a pilot experiment; write-up; peer review; presentation.

**LINGUIST 246. Foundations of Psycholinguistics. 4 Units.**

Basic readings in language processing and language use, with a historical dimension; discussion each week in class of the relevant papers.

**LINGUIST 248. Seminar in Developmental Psycholinguistics. 4 Units.**

Children's acquisition of word meaning, with particular emphasis on socio-pragmatic approaches vs. a priori constraints. Consideration of differences in acquisition by syntactic category (nouns versus verbs), by semantic domain, and by conversational frame, in considering how children build up a lexical repertoire.

**LINGUIST 249. Language Processing. 2-4 Units.**

Understanding spoken or written language requires the rapid, incremental processing of novel compositional structures, as well as the integration of the incoming language stream with multiple sources of information, such as the prior discourse, physical context, social information, etc. How are humans able to efficiently accomplish this task? To address this question, this course will consider principles of sentence and discourse processing that guide language understanding and features of sentence & discourse structure that facilitate comprehension. Specific topics are likely to include reference processing, memory & forgetting, individual differences in comprehension ability, the role of context, and computational models of language comprehension.

**LINGUIST 249L. Workshop on Language and Social Reasoning. 1 Unit.**

To what extent can language use be treated as a special case of social cognition? The class will be based around visiting lectures by major researchers in this area, along with meetings to prepare for their visits by discussing key readings. May be repeated for credit.

Same as: PSYCH 249L

**LINGUIST 250. Sociolinguistic Theory and Analysis. 3-4 Units.**

Methods of modeling the patterned variation of language in society. Emphasis is on variation, its relation to social structure and practice, and its role in linguistic change. Intersection between quantitative and qualitative analysis, combining insights of sociology and linguistic anthropology with quantitative linguistic data. Prerequisite: graduate standing in Linguistics or consent of instructor.

**LINGUIST 251. Sociolinguistic Field Methods. 3-5 Units.**

Strengths and weaknesses of the principal methods of data collection in sociolinguistics.

**LINGUIST 252. Sociolinguistics and Pidgin Creole Studies. 2-4 Units.**

Introduction to pidgins and creoles, organized around the main stages in the pidgin-creole life cycle: pidginization, creolization, and decreolization. Focus is on transformations in the English language as it was transported from Britain to Africa, Asia, the Caribbean, and the Pacific. Resultant pidginized and creolized varieties such as Nigerian Pidgin English, Chinese Pidgin English, New Guinea Tok Pisin, Suriname Sranan, and the creole continua of Guyana, Jamaica, and Hawaii. Also French, Dutch, Portuguese, Chinook, Motu, and Sango.

Same as: LINGUIST 152

**LINGUIST 253. Race, Ethnicity, and Language. 3-4 Units.**

This seminar explores the linguistic construction of race and ethnicity across a wide variety of contexts and communities. Throughout the course, we will take a comparative perspective and highlight how different racial/ethnic formations participate in similar, yet different, ways of "doing race" through language, interaction and culture. Readings draw heavily from perspectives in (linguistic) anthropology and sociolinguistics. Prerequisite: consent of instructor.

Same as: ANTHRO 320A

**LINGUIST 254. Sociolinguistics of Language Contact. 2-4 Units.**

The role of contact between speakers of different languages in processes of language borrowing, convergence, and shift. Attending both to linguistic aspects and social contexts, examine: second-language acquisition, bilingualism, code-switching, lexical and grammatical borrowing, first language attrition, language death, and the creation of new contact varieties such as jargons, mixed languages, pidgins, and creoles. Prerequisite: background in linguistics, at least one course in linguistics.

Same as: LINGUIST 154

**LINGUIST 255A. Seminar in Sociolinguistics: California Dialectology. 1-5 Unit.**

This seminar organizes and analyzes data gathered by the Voices of California project. This year, we will be working with the data from Sacramento. May be repeated for credit.

**LINGUIST 255B. Sociolinguistics Classics and Community Studies. 3-5 Units.**

This course discusses some of the major community studies in sociolinguistics (e.g. Labov in NYC, Wolfram in Detroit, Trudgill in Norway, Milroy in Belfast, and a selection of others up to the present) and the work of other classic sociolinguistic figures (e.g. Romaine, Hymes) who contributed in other ways. Our goal is to reach a deep understanding and critique of their methods, findings and ideas, to improve our own research and our responses to new developments in the field.

**LINGUIST 255C. Seminar in Sociolinguistics: Sociogrammar. 2-4 Units.**

Seminar style course exploring the literature on sociolinguistic variation in morphology and syntax from the 1960s to the present, and its implication for (socio)linguistic theory, especially in relation to (and in contrast with) socio-phonetics.

**LINGUIST 255D. Seminar in Sociolinguistics: Character Types in Sociolinguistics. 1-4 Unit.**

Figures of personhood, personas, character types, and stereotypes in the study of linguistic variation. What are the significant differences among these types? Are these social types merely the vehicles through which social meanings travel or do they constitute the meanings themselves?.

**LINGUIST 255E. Seminar in Sociolinguistics: Stylistic Landscapes. 2-5 Units.**

The study of the role of language in the stylistic construction of personae has progressed significantly over the past decade. We know that patterns of association of these personae ramp up to construct the major macro-social categories such as gender, age, class, ethnicity, hence patterns across their linguistic styles correlate with these categories. We have yet, though, to theorize how that patterning takes place on the ground. This seminar will explore ways to theorize the stylistic landscape.  
Prerequisites: 105/205 and 250, or consent of instructor.

**LINGUIST 255F. Seminar in Sociolinguistics: Classics in Sociolinguistics. 1-4 Unit.**

Figures of personhood, personas, character types, and stereotypes in the study of linguistic variation. What are the significant differences among these types? Are these social types merely the vehicles through which social meanings travel or do they constitute the meanings themselves?.

**LINGUIST 256. Language, Gender and Sexuality. 1-4 Unit.**

The role of language in constructing gender and sexuality. Historical overview of major theoretical perspectives and debates (difference vs. dominance, identity vs. desire) and discussion of new directions (affect, embodiment, figures of personhood, experimental approaches). Previous coursework in sociolinguistics recommended. Prerequisites: LING 250 and 110 or the equivalent.

**LINGUIST 257. Sociophonetics. 1-4 Unit.**

The study of phonetic aspects of sociolinguistic variation and the social significance of phonetic variation. Acoustic analysis of vowels, consonants, prosody, and voice quality. Hands-on work on collaborative research project. Prerequisite: 110 or equivalent, or consent of instructor. Same as: LINGUIST 157

**LINGUIST 258. Analysis of Variation. 1-4 Unit.**

The quantitative study of linguistic variability in time, space, and society emphasizing social constraints in variation. Hands-on work with variable data. Prerequisites: 105/205 and 250, or consent of instructor.

**LINGUIST 259. Topics in Sociolinguistics. 2-4 Units.**

Topics vary by quarter. Current topic is Sociophonetics. Repeatable for credit. This seminar explores new methods of collecting and analyzing sociophonetic data in an experimental setting, including electroglottography, aerodynamic measures, speech resynthesis, and perception study tasks. Requirements include both collaborative and individual research projects.

**LINGUIST 260A. Historical Morphology and Phonology. 2-4 Units.**

Sound change and analogical change in the perspective of linguistic theory. Internal and comparative reconstruction. Establishing genetic relationships.

**LINGUIST 260B. Historical Morphosyntax. 2-4 Units.**

Morphological and syntactic variation and change. Reanalysis, grammaticalization. The use of corpora and quantitative evidence.

**LINGUIST 263. Endangered Languages and Language Revitalization. 3-4 Units.**

Languages around the world are dying at such a rapid rate that the next century could see half of the world's 6800 languages and cultures become extinct unless action is taken now. This course looks at how and why languages die, and what is lost from a culture when that occurs. We will investigate how this trend can be reversed by methods of language documentation and description, the use of innovative technologies, multimodal fieldwork, writing dictionaries and grammars for different audiences, language planning, and data creation, annotation, preservation, and dissemination. We will focus on a number of current programs around the world to revitalize languages. Finally, the course will examine ethical modes of fieldwork within endangered language communities, and the possibilities of successful collaborations and capacity building, focusing especially on Northern California Indian peoples and their languages.

Same as: ANTHRO 163A, ANTHRO 263A, LINGUIST 163A, NATIVEAM 163

**LINGUIST 264. English Transplanted, English Transformed: Pidgins and Creoles. 2-4 Units.**

English varieties around the world, including white vernacular dialects and creole, pidgin, and indiginized Englishes. Emphasis is on the historical circumstances of origin, linguistic characteristics, and social setting in colonial and postcolonial societies. Theoretical issues pertaining to language contact, language shift, and pidgin and creole formation.

**LINGUIST 265. African American Vernacular English. 2-5 Units.**

Linguistics 265 is a new, advanced course on African American Vernacular English, intended for graduate students in Linguistics, Education and other fields, and for undergraduate majors in Linguistics. Students who have taken Linguistics 65 or its equivalent, or who have had an undergraduate introduction to linguistics, are also eligible to take this course. The course will discuss in detail some of the descriptive, historical and sociolinguistic literature on AAVE, beginning with the classic book length works on AAVE written by William Labov, Walt Wolfram and Ralph Fasold, but including some of the most recent research-based articles on the subject in current and recent journals. Research interests of students in the course will help to determine the specific foci within these broad parameters.

**LINGUIST 266. Vernacular English and Reading. 4-5 Units.**

Discusses some of the literature on the relation between use of vernacular English varieties (e.g. African American Vernacular English, Chicano English) and the development of literacy (especially in Standard English). But our primary focus is on improving the reading skills of African American and Latino students in local schools through the Reading Road program developed at the University of Pennsylvania. Students must commit to tutoring one or more elementary students weekly, using the program. L65 AAVE recommended, but not required. Same as: LINGUIST 66

**LINGUIST 270. The Arabic Language and Culture. 3 Units.**

(Formerly AMELANG 36). Arabic language from historical, social, strategic, and linguistic perspectives. History of the Arabic language and the stability of classical Arabic over the last 15 centuries. Why the functionality of classical Arabic has not changed as Latin, Old English, and Middle English have. Social aspects of the Arabic language, Ferguson's notion of diglossia. The main varieties of Arabic, differences among them, and when and where they are spoken. Role of Arabic and culture in current world politics, culture, and economy. Linguistic properties of Arabic such as root-based morphology, lexical ambiguity, and syntactic structure relating it to current linguistic theories. Same as: LINGUIST 36

**LINGUIST 271. Structure of Basque. 2-4 Units.**

Introduction to key topics in Basque morphology, syntax, semantics and how they bear on current theoretical debates. Topics covered may include basic clause structure and word order, case-marking and ergativity, the expression of motion and location.

**LINGUIST 272. Structure of Finnish. 2-4 Units.**

Central topics in Finnish morphology, syntax, and semantics and how they bear on current theoretical debates. Topics: clause structure; case; aspect; word order.

**LINGUIST 272A. Structure of Slavic. 2-4 Units.**

Central topics in the syntax, morphology, and phonology of Slavic languages and how they bear on current theoretical debates. Prerequisites: Linguistics 222A (Foundations of Syntactic Theory I) and Linguistics 210A (Phonology).

**LINGUIST 273. The Structure of Russian. 2-4 Units.**

A synchronic overview of contemporary standard Russian, including its sound system, word formation and grammatical structure. Emphasis is on problems presented by Russian for current linguistic theory. The acquisition of Russian as a first language. Same as: LINGUIST 173

**LINGUIST 274A. Linguistic Field Methods. 3-4 Units.**

Practical training in the collection and analysis of linguistic data from native speakers of a language largely unknown to the investigator. Documentation of endangered languages. Research goals, field trip preparation, ethics (including human subjects, cooperation with local investigators, and governmental permits), working in the community, technical equipment, and analytical strategies. Emphasis is on the use of recording devices and computers in collection and analysis. Students are strongly encouraged to make a commitment to both 274A and 274B in the same year. Prerequisites: One course in phonetics or phonology and syntax, or permission of the instructor. Open to undergraduates with permission of instructor only. Same as: ANTHRO 30

**LINGUIST 274B. Field Methods II. 2-3 Units.**

Continuation of 274A, with a focus on student projects in a targeted language. Prerequisite: 274A or consent of instructor. Graduate students are strongly encouraged to make a commitment to both 274A and 274B in the same year. For full credit, students are expected to work privately with the consultant outside of class time.

**LINGUIST 274C. Linguistic Field Methods: Syntax. 3-4 Units.**

Prerequisites include one quarter of phonology and one quarter of syntax or permission of instructor. Graduate students are heavily encouraged to make a commitment to both 274B and 274C in the same year.

**LINGUIST 275. Probability and Statistics for linguists. 2-4 Units.**

Introduction to probability and statistical inference, with a focus on conceptual and practical issues relevant to theoretical, experimental, and corpus linguistics. Data analysis and modeling using R. Course project will involve reproducing a published modeling result or statistical analysis in full detail.

**LINGUIST 276. Quantitative Methods in Linguistics. 2-4 Units.**

Introduction to methods for collecting and analyzing quantitative linguistic data, with a primary focus on the use of corpora in exploring theoretical questions in various areas of linguistics. Topics include the access and retrieval of corpus data (including web-based corpora), data annotation, and statistical modeling. Practical experience with R, Python scripting, and setting up online experiments through Amazon Mechanical Turk.

**LINGUIST 277. Laboratory Methods in Psycholinguistics. 2-4 Units.**

Issues that commonly arise in the design and implementation of linguistic experiments and in the statistical analysis of empirical results. Topics in experimental design include selection of stimuli, blocking, and power analysis and sample size calculation. How to fit and interpret statistical models using the multilevel regression and Bayesian inference, as implemented in software packages R and Bugs. Topics include interpretation of model coefficients for fixed and random effects, collinearity, model criticism, as well as comparison and reporting of models. Theoretical issues worked out at lab sessions using examples from experiments and corpus studies, including those provided by students.

**LINGUIST 278. Programming for Linguists. 1-4 Unit.**

Computer programming techniques for collecting and analyzing data in linguistic research. Introduction to the UNIX, regular expressions, and Python scripting. Hands-on experience gathering, formatting, and manipulating corpus, field, and experimental data, combining data from multiple sources, and working with existing tools. Knowledge of computer programming not required.

**LINGUIST 280. From Languages to Information. 3-4 Units.**

Extracting meaning, information, and structure from human language text, speech, web pages, genome sequences, social networks. Methods include: string algorithms, edit distance, language modeling, the noisy channel, naive Bayes, inverted indices, collaborative filtering, PageRank. Applications such as question answering, sentiment analysis, information retrieval, text classification, social network models, machine translation, genomic sequence alignment, spell checking, speech processing, recommender systems. Prerequisite: CS103, CS107, CS109. Same as: CS 124, LINGUIST 180

**LINGUIST 281. Computational Models of Linguistic Formalism. 1-4 Unit.**

This seminar will explore the computational properties of a small set of formalisms from phonology, morphology, syntax, and semantics, the choice depending on the interests of the participants. Possible topics include, but are not limited to, finite-state techniques, Optimality Theory, Unification-based grammar, Montague Grammar, Sound change, Corpus-based exploration, and Translation.

**LINGUIST 282. Computational Theories of Syntax. 3-4 Units.**

Salient features of modern syntactic theories, including HPSG, LFG, and TAG, motivated by computational concerns. Impact of work within these frameworks on the design of algorithms in computational linguistics, and its influence in both linguistics and computer science. Topics include: notions of unification; unification algorithms and their relation to linguistic theory; agenda-driven chart processing for analysis and synthesis; the interface with morphology, the lexicon, and semantics; and applications, notably machine translation. Same as: LINGUIST 182

**LINGUIST 283. Basic Algorithms for Computational Linguistics. 2-4 Units.**

Foundational algorithms of non-statistical computational linguistics, including string searching, suffix trees and suffix arrays, finite-state technology for phonology, morphology and dictionary access, classical back-tracking programs for sentence analysis, the use of charts in parsing, generation and translation. Students complete a programming project in one of these areas.

**LINGUIST 284. Natural Language Processing. 3-4 Units.**

Methods for processing human language information and the underlying computational properties of natural languages. Syntactic and semantic processing from linguistic and algorithmic perspectives. Focus is on modern quantitative techniques in NLP: using large corpora, statistical models for acquisition, translation, and interpretation; and representative systems. Prerequisites: CS124 or CS121/221.

Same as: CS 224N

**LINGUIST 284A. Writing Systems in a Digital Age. 2-3 Units.**

Introduction to the variety of writing systems and their behaviors. Classification of all existing scripts as alphabetic, syllabic, ideographic; unifying and differentiating features within each group. How writing captures human language in various ways. The development of the alphabet, from ancient Semitic scripts to modern times. How writing systems are extended to additional languages. Chinese writing, its characteristics and sphere of influence. Japanese writing as a hybrid system that includes Chinese. Korean writing as an ideally designed script. The Indian system of writing as the foundation of numerous Asian syllabic scripts. Unicode as global standard for encoding text in all languages. Font technology: the emulation of human writing in the digital realm. nBasic knowledge of phonetics recommended. Knowledge of foreign languages helpful.

Same as: LINGUIST 185

**LINGUIST 286. Information Retrieval and Web Search. 3 Units.**

Text information retrieval systems; efficient text indexing; Boolean, vector space, and probabilistic retrieval models; ranking and rank aggregation; evaluating IR systems. Text clustering and classification: classification algorithms, latent semantic indexing, taxonomy induction; Web search engines including crawling and indexing, link-based algorithms, and web metadata. Prerequisites: CS 107, CS 109, CS 161.

Same as: CS 276

**LINGUIST 287. Extracting Social Meaning and Sentiment. 3 Units.**

Methods for extracting social meaning (speaker perspectives, emotions and attitudes) from text and speech. Topics include sentiment analysis and summarization, detection of deception, sarcasm, emotion, and personality. nAnalysis of meaning-bearing characteristics of the speaker and topic, including text, discourse, prosodic and other cues. Prerequisite: CS 124 or 221 or 229 or permission of instructors.

**LINGUIST 288. Natural Language Understanding. 3-4 Units.**

Project-oriented class focused on developing systems and algorithms for robust machine understanding of human language. Draws on theoretical concepts from linguistics, natural language processing, and machine learning. Topics include lexical semantics, distributed representations of meaning, relation extraction, semantic parsing, sentiment analysis, and dialogue agents, with special lectures on developing projects, presenting research results, and making connections with industry. Prerequisites: one of LINGUIST 180, CS 124, CS 224N, CS224S, or CS221; and logical/ semantics such as LINGUIST 130A or B, CS 157, or PHIL150.

Same as: CS 224U, LINGUIST 188

**LINGUIST 289. Topics in Computational Linguistics: Computational Models of Language Change. 3-4 Units.**

Topics in computational models of language change. Vector semantic models of change in word meaning, word sentiment, and word innovation, computational models of syntactic change and sound change, and models of language evolution like the iterated learning paradigm.

Prerequisites: LINGUIST 288, LINGUIST 230A, LINGUIST 250, and either LINGUIST 205A or 210A. Or consent of instructor.

**LINGUIST 291. Linguistics and the Teaching of English as a Second/ Foreign Language. 4-5 Units.**

Methodology and techniques for teaching languages, using concepts from linguistics and second language acquisition theory and research. Focus is on teaching English, but most principles and techniques applicable to any language. Optional 1-unit seminar in computer-assisted language learning.

Same as: LINGUIST 191

**LINGUIST 294. Linguistic Research Discussion Group. 1 Unit.**

Restricted to first-year Linguistics Ph.D. students.

**LINGUIST 290. M.A. Project. 1-6 Unit.****LINGUIST 391A. Curricular Practical Training. 1 Unit.**

Educational opportunities in research and development labs in industry. Qualified linguistics students engage in internship work and integrate that work into their academic program. Students register during the quarter they are employed and complete a research report outlining their work activity, problems investigated, results, and follow-on projects they expect to perform. 391 A may be taken only once.

**LINGUIST 393. Summer Research Activity. 1-8 Unit.**

Restricted to Linguistics Ph.D. students. May be repeated for credit.

**LINGUIST 393A. Research Activity in Sociolinguistics. 1-2 Unit.**

Restricted to Linguistics Ph.D. students. May be repeated for credit.

**LINGUIST 394. TA Training Workshop. 1 Unit.**

For second-year graduate students in Linguistics.

**LINGUIST 395. Research Workshop. 1-2 Unit.**

Restricted to students in the doctoral program. Student presentations of research toward qualifying papers. May be repeated for credit.

**LINGUIST 395C. Summer Research Workshop. 1-2 Unit.**

Restricted to Linguistics Ph.D. students. May be repeated for credit. Student presentations of ongoing research plus professional development sessions.

**LINGUIST 395D. Linguistics Writing Group. 1 Unit.**

Restricted to Linguistics Ph.D. students. May be repeated for credit. Meets weekly to support student writing projects.

**LINGUIST 396. Research Projects in Linguistics. 2-3 Units.**

Mentored research project for first-year graduate students in linguistics.

**LINGUIST 397. Directed Reading. 1-15 Unit.****LINGUIST 398. Directed Research. 1-15 Unit.****LINGUIST 399. Dissertation Research. 1-15 Unit.****Management Science & Engineering Courses****MS&E 20. Discrete Probability Concepts And Models. 4 Units.**

Concepts and tools for the analysis of problems under uncertainty, focusing on structuring, model building, and analysis. Examples from legal, social, medical, and physical problems. Topics include axioms of probability, probability trees, belief networks, random variables, conditioning, and expectation.

**MS&E 22Q. The Flaw of Averages. 3 Units.**

Uncertain assumptions in business and public policy are often replaced with single ;best guess; or average numbers. This leads to a fallacy as fundamental as the belief that the earth is flat, which I call the Flaw of Averages. It states, in effect, that: plans based on average assumptions are wrong on average. This class will discuss mitigations of the flaw of averages using simulation and other methods from probability management.

**MS&E 41. Financial Literacy. 1 Unit.**

Practical knowledge about personal finance and money management including budgeting, pay checks, credit cards, banking, insurance, taxes, and saving. Class especially appropriate for those soon to be self-supporting. Limited enrollment. Admission by order of enrollment in Axess.

**MS&E 52. Introduction to Decision Making. 3 Units.**

How to ensure focus, discipline, and passion when making important decisions. Comprehensive examples illustrate Decision Analysis fundamentals. Consulting case studies highlight practical solutions for real decisions. Student teams present insights from their analyses of decisions for current organizations. Topics: declaring when and how to make a decision, framing and structuring the decision basis, defining values and preferences, creating alternative strategies, assessing unbiased probabilistic judgments, developing appropriate risk/reward and portfolio models, evaluating doable strategies across the range of uncertain future scenarios, analyzing relevant sensitivities, determining the value of additional information, and addressing the qualitative aspects of communication and commitment to implementation. Not intended for MS&E majors.

**MS&E 92Q. International Environmental Policy. 3 Units.**

Preference to sophomores. Science, economics, and politics of international environmental policy. Current negotiations on global climate change, including actors and potential solutions. Sources include briefing materials used in international negotiations and the U.S. Congress.

**MS&E 93Q. Nuclear Weapons, Energy, Proliferation, and Terrorism. 3 Units.**

Preference to sophomores. At least 20 countries have built or considered building nuclear weapons. However, the paths these countries took in realizing their nuclear ambitions vary immensely. Why is this the case? How do the histories, cultures, national identities, and leadership of these countries affect the trajectory and success of their nuclear programs? This seminar will address these and other questions about nuclear weapons and their proliferation. Students will learn the fundamentals of nuclear technology, including nuclear weapons and nuclear energy, and be expected to use this knowledge in individual research projects on the nuclear weapons programs of individual countries. Case studies will include France, UK, China, India, Israel, Pakistan, North Korea, South Africa, Libya, Iraq, and Iran, among others. Please note any language skills in your application. Recommended: 193 or 293.

**MS&E 101. Undergraduate Directed Study. 1-15 Unit.**

Subject of mutual interest to student and faculty member. Prerequisite: faculty sponsor.

**MS&E 101A. Undergraduate Directed Study. 1-4 Unit.**

Subject of mutual interest to student and mentor.

**MS&E 107. Interactive Management Science. 3 Units.**

Analytical techniques such as linear and integer programming, Monte Carlo simulation, forecasting, decision analysis, and Markov chains in the environment of the spreadsheet. Probability management. Materials include spreadsheet add-ins for implementing these and other techniques. Emphasis is on building intuition through interactive modeling, and extending the applicability of this type of analysis through integration with existing business data structures.

Same as: MS&E 207

**MS&E 108. Senior Project. 5 Units.**

Restricted to MS&E majors in their senior year. Students carry out a major project in groups of four, applying techniques and concepts learned in the major. Project work includes problem identification and definition, data collection and synthesis, modeling, development of feasible solutions, and presentation of results. Service Learning Course (certified by Haas Center).

**MS&E 111. Introduction to Optimization. 4 Units.**

Formulation and analysis of linear optimization problems. Solution using Excel solver. Polyhedral geometry and duality theory. Applications to contingent claims analysis, production scheduling, pattern recognition, two-player zero-sum games, and network flows. Prerequisite: CME 100 or MATH 51.

Same as: ENGR 62

**MS&E 112. Mathematical Programming and Combinatorial Optimization. 3 Units.**

Combinatorial and mathematical programming (integer and non-linear) techniques for optimization. Topics: linear program duality and LP solvers; integer programming; combinatorial optimization problems on networks including minimum spanning trees, shortest paths, and network flows; matching and assignment problems; dynamic programming; linear approximations to convex programs; NP-completeness. Hands-on exercises. Prerequisites: 111 or MATH 103, CS 106A or X.

Same as: MS&E 212

**MS&E 120. Probabilistic Analysis. 5 Units.**

Concepts and tools for the analysis of problems under uncertainty, focusing on focusing on structuring, model building, and analysis. Examples from legal, social, medical, and physical problems. Topics include axioms of probability, probability trees, random variables, distributions, conditioning, expectation, change of variables, and limit theorems. Prerequisite: CME 100 or MATH 51.

**MS&E 121. Introduction to Stochastic Modeling. 4 Units.**

Stochastic processes and models in operations research. Discrete and continuous time parameter Markov chains. Queuing theory, inventory theory, simulation. Prerequisite: 120, 125, or equivalents.

**MS&E 125. Introduction to Applied Statistics. 4 Units.**

An increasing amount of data is now generated in a variety of disciplines, ranging from finance and economics, to the natural and social sciences. Making use of this information, however, requires both statistical tools and an understanding of how the substantive scientific questions should drive the analysis. In this hands-on course, we learn to explore and analyze real-world datasets. We cover techniques for summarizing and describing data, methods for statistical inference, and principles for effectively communicating results. Prerequisite: 120, CS 106A, or equivalents.

**MS&E 130. Information Networks and Services. 3 Units.**

Architecture of the Internet and performance engineering of computer systems and networks. Switching, routing and shortest path algorithms. Congestion management and queueing networks. Peer-to-peer networking. Wireless and mobile networking. Information service engineering and management. Search engines and recommendation systems. Reputation systems and social networking technologies. Security and trust. Information markets. Select special topics and case studies. Prerequisites: 111, 120, and CS 106A.

**MS&E 135. Networks. 3 Units.**

This course provides an introduction to how networks underly our social, technological, and natural worlds, with an emphasis on developing intuitions for broadly applicable concepts in network analysis. The course will include: an introduction to graph theory and graph concepts; social networks; information networks; the aggregate behavior of markets and crowds; network dynamics; information diffusion; the implications of popular concepts such as "six degrees of separation", the "friendship paradox", and the "wisdom of crowds".

**MS&E 140. Accounting for Managers and Entrepreneurs. 3-4 Units.**

Non-majors and minors who have taken or are taking elementary accounting should not enroll. Introduction to accounting concepts and the operating characteristics of accounting systems. The principles of financial and cost accounting, design of accounting systems, techniques of analysis, and cost control. Interpretation and use of accounting information for decision making. Designed for the user of accounting information and not as an introduction to a professional accounting career. Enrollment limited. Admission by order of enrollment. Same as: MS&E 240

**MS&E 140X. Financial Accounting Concepts and Analysis. 2 Units.**

Introductory course in financial accounting. Accounting is referred to as the language of business. Developing students ability to read, understand, and use business financial statements. Understanding the mapping between the underlying economic events and financial statements, and how this mapping can affect inferences about future firm profitability. Introduction to measuring and reporting of the operating cycle; the process of preparing and presenting primary financial statements; the judgment involved and discretion allowed in making accounting choices; the effects of accounting discretion on the quality of the (reported) financial information; and the fundamentals of financial statement analysis. Class time will be allocated to a combination of lectures, cases and discussions of cases. Capstone project analyzing a company's financials at the end of the quarter. Enrollment limited. Admission by order of enrollment.

**MS&E 145. Introductory Financial Analysis. 3 Units.**

Formerly MS&E 142. Evaluation and management of money, complicated by temporary distributions and uncertainty. The "time-value of money" and its impact on economic decisions (both personal and corporate) with the introduction of interest rate (constant or varying over time); several approaches critically examined and made consistent as suitable metrics of comparison. The concept of investment diversification in the presence of uncertainty; portfolio selection and efficient frontier analysis leading to the formulation of the Capital Asset Pricing Model; practical implementation of the concepts, including comparison of loan (e.g., house and auto) terms, credit card financial terms, interest rate term structure and its relationship to rate-of-return analysis, and graphical presentation of uncertain investment alternatives; and current economic news of interest. Critical thinking, discussion, and interaction, using group and computer labs assignments. Prerequisites: 111, 120, CME 100 or MATH 51, or equivalents.

**MS&E 146. Corporate Financial Management. 4 Units.**

Key functions of finance in both large and small companies, and the core concepts and key analytic tools that provide their foundation. Making financing decisions, evaluating investments, and managing cashflow, profitability and risk. Designing performance metrics to effectively measure and align the activities of functional groups and individuals within the firm. Structuring relationships with key customers, partners and suppliers. Prerequisite: 145, 245A, 245G or equivalent.

**MS&E 152. Introduction to Decision Analysis. 3-4 Units.**

How to make good decisions in a complex, dynamic, and uncertain world. People often make decisions that on close examination they regard as wrong. Decision analysis uses a structured conversation based on actional thought to obtain clarity of action in a wide variety of domains. Topics: distinctions, possibilities and probabilities, relevance, value of information and experimentation, relevance and decision diagrams, risk attitude. Students seeking to fulfill the Writing in the Major requirement should register for MS&E 152W. Same as: MS&E 152W

**MS&E 152W. Introduction to Decision Analysis. 3-4 Units.**

How to make good decisions in a complex, dynamic, and uncertain world. People often make decisions that on close examination they regard as wrong. Decision analysis uses a structured conversation based on actional thought to obtain clarity of action in a wide variety of domains. Topics: distinctions, possibilities and probabilities, relevance, value of information and experimentation, relevance and decision diagrams, risk attitude. Students seeking to fulfill the Writing in the Major requirement should register for MS&E 152W. Same as: MS&E 152

**MS&E 174. Social Entrepreneurship Collaboratory. 4 Units.**

Interdisciplinary student teams create and develop U.S. and international social entrepreneurship initiatives. Proposed initiatives may be new entities, or innovative projects, partnerships, and/or strategies impacting existing organizations and social issues in the U.S. and internationally. Focus is on each team's research and on planning documents to further project development. Project development varies with the quarter and the skill set of each team, but should include: issue and needs identification; market research; design and development of an innovative and feasible solution; and drafting of planning documents. In advanced cases, solicitation of funding and implementation of a pilot project. Enrollment limited to 20. May be repeated for credit. Prerequisites: 131 and 132, or consent of instructor. Same as: URBANST 133

**MS&E 175. Innovation, Creativity, and Change. 3-4 Units.**

Problem solving in organizations; creativity and innovation skills; thinking tools; creative organizations, teams, individuals, and communities. Limited enrollment. (Katila).

**MS&E 177. Creativity Rules. 4 Units.**

This experiential course explores a wide array of tools that are used to enhance innovation and how those tools are applied across engineering disciplines. Using workshops, demonstrations, and field trips, students will learn how creative problem solving is deployed across engineering fields and, in partnership with the Stanford Virtual Human Interaction Lab, expand their own creative problem solving skills with virtual reality experiences that stretch their imagination. Limited enrollment. Admission by application.

**MS&E 178. The Spirit of Entrepreneurship. 3 Units.**

Is there more to entrepreneurship than inventing the better mouse trap? This course uses the speakers from the Entrepreneurial Thought Leader seminar (MS&E472) to drive research and discussion about what makes an entrepreneur successful. Topics include venture financing, business models, and interpersonal dynamics in the startup environment. Students meet before and after MS&E 472 to prepare for and debrief after the sessions. Enrollment limited to 50 students. Please submit Winter course application at <http://goo.gl/forms/3LXFAYFD9t> by 6pm on Monday, January 4, 2016.

**MS&E 180. Organizations: Theory and Management. 4 Units.**

For undergraduates only; preference to MS&E majors. Classical and contemporary organization theory; the behavior of individuals, groups, and organizations. Limited enrollment. Admission by application. Students must attend first session.

**MS&E 181. Issues in Technology and Work for a Postindustrial Economy. 3 Units.**

How changes in technology and organization are altering work and lives. Approaches to studying and designing work. How understanding work and work practices can assist engineers in designing better technologies and organizations. Topics include job design, distributed and virtual organizations, the blurring of boundaries between work and family life, computer supported cooperative work, trends in skill requirements and occupational structures, monitoring and surveillance in the workplace, downsizing and its effects on work systems, project work and project-based lifestyles, the growth of contingent employment, telecommuting, electronic commerce, and the changing nature of labor relations. Enrollment limited to 50 students. Preference to MS&E, STS, and CEE seniors, followed by MS&E, STS, and CEE juniors.

**MS&E 183. Leadership in Action. 3 Units.**

Leadership in action is designed with a significant lab component in which students will be working on leadership projects throughout the quarter. The projects will provide students with hands on experience trying out new leadership behaviors in a variety of situations, along with the opportunity to reflect on these experience and, in turn, expand their leadership skills. Limited enrollment. Please submit course application at <http://goo.gl/forms/f061GT1NnY> by 6pm on Monday, September 21, 2015.

**MS&E 185. Global Work. 4 Units.**

Issues, challenges, and opportunities facing workers, teams, and organizations working across national boundaries. Topics include geographic distance, time zones, language and cultural differences, technologies to support distant collaboration, team dynamics, and corporate strategy. Limited enrollment. Please submit Winter course application at <http://goo.gl/forms/3LXFAYFD9t> by 6pm on Monday, January 4, 2016. Recommended: 180.

**MS&E 189. Social Networks - Theory, Methods, and Applications. 3 Units.**

Introduces students to the theoretical, substantive, and methodological foundations of social networks. The social network paradigm seeks to explain how social relations facilitate and constrain an actor's opportunities, behaviors, and cognitions. Topics include: network concepts and principles; network data collection, measurement, and analysis; and applications in management, engineering, and related disciplines. Please submit Winter course application at <http://goo.gl/forms/3LXFAYFD9t> by 6pm on Monday, January 4, 2016.

**MS&E 190. Methods and Models for Policy and Strategy Analysis. 3 Units.**

Guest lectures by departmental practitioners. Emphasis is on links among theory, application, and observation. Environmental, national security, and health policy; marketing, new technology, and new business strategy analyses. Comparisons between domains and methods.

**MS&E 193. Technology and National Security. 3 Units.**

The interaction of technology and national security policy from the perspective of history to implications for the new security imperative, homeland defense. Key technologies in nuclear and biological weapons, military platforms, and intelligence gathering. Policy issues from the point of view of U.S. and other nations. The impact of terrorist threat. Guest lecturers include key participants in the development of technology and/or policy.

Same as: MS&E 293

**MS&E 197. Ethics, Technology, and Public Policy. 5 Units.**

Ethical issues in science- and technology-related public policy conflicts. Focus is on complex, value-laden policy disputes. Topics: the nature of ethics and morality; rationales for liberty, justice, and human rights; and the use and abuse of these concepts in policy disputes. Case studies from biomedicine, environmental affairs, technical professions, communications, and international relations.

**MS&E 201. Dynamic Systems. 3-4 Units.**

Goal is to think dynamically in decision making, and recognize and analyze dynamic phenomena in diverse situations. Concepts: formulation and analysis; state-space formulation; solutions of linear dynamic systems, equilibria, dynamic diagrams; eigenvalues and eigenvectors of linear systems, the concept of feedback; nonlinear dynamics, phase plane analysis, linearized analysis, Liapunov functions, catastrophe theory. Examples: grabber-holder dynamics, technology innovation dynamics, creation of new game dynamics in business competition, ecosystem dynamics, social dynamics, and stochastic exchange dynamics. Prerequisite: CME 100 or MATH 51 or equivalent.

**MS&E 207. Interactive Management Science. 3 Units.**

Analytical techniques such as linear and integer programming, Monte Carlo simulation, forecasting, decision analysis, and Markov chains in the environment of the spreadsheet. Probability management. Materials include spreadsheet add-ins for implementing these and other techniques. Emphasis is on building intuition through interactive modeling, and extending the applicability of this type of analysis through integration with existing business data structures. Same as: MS&E 107

**MS&E 208A. Practical Training. 1 Unit.**

MS&E students obtain employment in a relevant industrial or research activity to enhance professional experience, consistent with the degree program they are pursuing. Students submit a statement showing relevance to degree program along with offer letter to the Student Services Office before the start of the quarter, and a 2-3 page final report documenting the work done and relevance to degree program at the conclusion of the quarter. Students may take each of A, B, and C once.

**MS&E 208B. Practical Training. 1 Unit.**

MS&E students obtain employment in a relevant industrial or research activity to enhance professional experience, consistent with the degree program they are pursuing. Students submit a statement showing relevance to degree program along with offer letter to the Student Services office before the start of the quarter, and a 2-3 page final report documenting the work done and relevance to degree program at the conclusion of the quarter. Students may take each of A, B, and C once.

**MS&E 208C. Practical Training. 1 Unit.**

MS&E students obtain employment in a relevant industrial or research activity to enhance professional experience, consistent with the degree program they are pursuing. Students submit a statement showing relevance to degree program along with offer letter to the Student Services office before the start of the quarter, and a 2-3 page final report documenting the work done and relevance to degree program at the conclusion of the quarter. Students may take each of A, B, and C once.

**MS&E 208D. Practical Training. 1 Unit.**

MS&E students obtain employment in a relevant industrial or research activity to enhance professional experience, consistent with the degree program they are pursuing. Students submit a one-page statement showing relevance to degree program along with offer letter before the start of the quarter, and a 2-3 page final report documenting the work done and relevance to degree program at the conclusion of the quarter. Students may take each of A, B, and C once, and may petition to take D.

**MS&E 211. Linear and Nonlinear Optimization. 3-4 Units.**

Optimization theory and modeling. The role of prices, duality, optimality conditions, and algorithms in finding and recognizing solutions. Perspectives: problem formulation, analytical theory, computational methods, and recent applications in engineering, finance, and economics. Theories: finite dimensional derivatives, convexity, optimality, duality, and sensitivity. Methods: simplex and interior-point, gradient, Newton, and barrier. Prerequisite: CME 100 or MATH 51.

**MS&E 212. Mathematical Programming and Combinatorial Optimization. 3 Units.**

Combinatorial and mathematical programming (integer and non-linear) techniques for optimization. Topics: linear program duality and LP solvers; integer programming; combinatorial optimization problems on networks including minimum spanning trees, shortest paths, and network flows; matching and assignment problems; dynamic programming; linear approximations to convex programs; NP-completeness. Hands-on exercises. Prerequisites: 111 or MATH 103, CS 106A or X. Same as: MS&E 112

**MS&E 220. Probabilistic Analysis. 3-4 Units.**

Concepts and tools for the analysis of problems under uncertainty, focusing on model building and communication: the structuring, processing, and presentation of probabilistic information. Examples from legal, social, medical, and physical problems. Spreadsheets illustrate and solve problems as a complement to analytical closed-form solutions. Topics: axioms of probability, probability trees, random variables, distributions, conditioning, expectation, change of variables, and limit theorems. Prerequisite: CME 100 or MATH 51. Recommended: knowledge of spreadsheets.

**MS&E 221. Stochastic Modeling. 3 Units.**

Focus is on time-dependent random phenomena. Topics: discrete and continuous time Markov chains, renewal processes, queueing theory, and applications. Emphasis is on building a framework to formulate and analyze probabilistic systems. Prerequisite: 220 or consent of instructor.

**MS&E 223. Simulation. 3 Units.**

Discrete-event systems, generation of uniform and non-uniform random numbers, Monte Carlo methods, programming techniques for simulation, statistical analysis of simulation output, efficiency-improvement techniques, decision making using simulation, applications to systems in computer science, engineering, finance, and operations research. Prerequisites: working knowledge of a programming language such as C, C++, Java, Python, or FORTRAN; calculus-base probability; and basic statistical methods.

**MS&E 226. "Small" Data. 3 Units.**

This course is about understanding "small data": these are datasets that allow interaction, visualization, exploration, and analysis on a local machine. The material provides an introduction to applied data analysis, with an emphasis on providing a conceptual framework for thinking about data from both statistical and machine learning perspectives. Topics will be drawn from the following list, depending on time constraints and class interest: approaches to data analysis: statistics (frequentist, Bayesian) and machine learning; binary classification; regression; bootstrapping; causal inference and experimental design; multiple hypothesis testing. Class lectures will be supplemented by data-driven problem sets and a project. Prerequisites: CME 100 or MATH 51; 120, 220 or STATS 116; experience with R at the level of CME/STATS 195 or equivalent.

**MS&E 231. Introduction to Computational Social Science. 3 Units.**

With a vast amount of data now collected on our online and offline actions – from what we buy, to where we travel, to who we interact with – we have an unprecedented opportunity to study complex social systems. This opportunity, however, comes with scientific, engineering, and ethical challenges. In this hands-on course, we develop ideas from computer science and statistics to address problems in sociology, economics, political science, and beyond. We cover techniques for collecting and parsing data, methods for large-scale machine learning, and principles for effectively communicating results. To see how these techniques are applied in practice, we discuss recent research findings in a variety of areas. Prerequisites: introductory course in applied statistics, and experience coding in R, Python, or another high-level language. Same as: SOC 278

**MS&E 233. Networked Markets. 3 Units.**

An introduction to economic analysis for modern online services and systems. Topics include: Examples of networked markets. Online advertising. Recommendation and reputation systems. Pricing digital media. Network effects and network externalities. Social learning and herd behavior. Markets and information. Prerequisites: CME 100 or Math 51, and probability at the level of MS&E 220 or equivalent. No prior economics background will be assumed; requisite concepts will be introduced as needed.

**MS&E 235. Analytics in Action. 3 Units.**

Examines the role of analytics in real-world solutions across different industries. Provides a short introduction on the main concepts of analytics, and addresses common modeling approaches for both supervised (e.g., regression and classification) and unsupervised techniques (e.g., clustering, anomaly detection and pattern recognition), using platforms such as Hadoop and R. Discussion of implementations of these models in various industries, such as manufacturing, retail, banking, marketing, telecom and security. Teams of students will be required to prepare and present an analytics use case, covering aspects related to data collection, pre-processing, modeling, analyses, visualization, recommendations, implementation, business value and ROI. Students will be expected to come prepared to class, ready to discuss the case at hand, and offer their thoughts and insights. Cases will be presented in the context of leading a data science team, much as a Chief Analytics Officer (CAO) would be expected to do. Prerequisite: 226, CME 195, or equivalents.

**MS&E 237. Spectral Graph Theory and Algorithmic Applications. 3 Units.**

Brings students to the forefront of a very active area of research. Reviews classic results relating graph expansion and spectra, random walks, random spanning trees, and their electrical network representation. Covers recent progress on graph sparsification, Kadison-Singer problem and approximation algorithms for traveling salesman problems. Same as: CME 237

**MS&E 238. Leading Trends in Information Technology. 3 Units.**

Focuses on new trends and disruptive technologies in IT. Emphasis on the way technologies create a competitive edge and generate business value. Broad range of views presented by guest speakers, including top level executives of technology companies, and IT executives (e.g. CIOs) of Fortune 1000 companies. Special emphasis in technologies such as Virtualization, Cloud Computing, Security, Mobility and Unified Communications.

**MS&E 238A. Leading Trends in Information Technology. 1 Unit.**

Focuses on new trends and disruptive technologies in IT. Emphasis on the way technologies create a competitive edge and generate business value. Broad range of views presented by guest speakers, including top level executives of technology companies, and IT executives (e.g. CIOs) of Fortune 1000 companies. Special emphasis in technologies such as Virtualization, Cloud Computing, Security, Mobility and Unified Communications.

**MS&E 240. Accounting for Managers and Entrepreneurs. 3-4 Units.**

Non-majors and minors who have taken or are taking elementary accounting should not enroll. Introduction to accounting concepts and the operating characteristics of accounting systems. The principles of financial and cost accounting, design of accounting systems, techniques of analysis, and cost control. Interpretation and use of accounting information for decision making. Designed for the user of accounting information and not as an introduction to a professional accounting career. Enrollment limited. Admission by order of enrollment. Same as: MS&E 140

**MS&E 241. Economic Analysis. 3-4 Units.**

Principal methods of economic analysis of the production activities of firms, including production technologies, cost and profit, and perfect and imperfect competition; individual choice, including preferences and demand; and the market-based system, including price formation, efficiency, and welfare. Practical applications of the methods presented. Recommended: 211, ECON 50.

**MS&E 243. Energy and Environmental Policy Analysis. 3 Units.**

Concepts, methods, and applications. Energy/environmental policy issues such as automobile fuel economy regulation, global climate change, research and development policy, and environmental benefit assessment. Group project. Prerequisite: MS&E 241 or ECON 50, 51.

**MS&E 244. Economic Growth and Development. 3 Units.**

Formerly 249. What generates economic growth. Emphasis is on theory accompanied by intuition, illustrated with country cases. Topics: the equation of motion of an economy; optimal growth theory; calculus of variations and optimal control approaches; deriving the Euler and Pontraguine equations from economic reasoning. Applications: former planned economies in Russia and E. Europe; the present global crisis: causes and consequences; a comparative study of India and China. The links between economic growth and civilization; the causes of the rise and decline of civilizations; lessons for the future. Intended for graduate students. Prerequisite: multivariate calculus and permission of instructor. To receive permission, submit an application at <http://web.stanford.edu/~lcottle/forms/244app.fb>.

**MS&E 245A. Investment Science. 3 Units.**

Formerly MS&E 242. Introduction to the basic concepts of modern quantitative finance and investments. Focus is on basic principles and how they are applied in practice. Topics: basic interest rates; evaluating investments: present value and internal rate of return; fixed-income markets: bonds, yield, duration, portfolio immunization; term structure of interest rates; measuring risk: volatility and value at risk; designing optimal security portfolios; the capital asset pricing model. Group projects involving financial market data. No prior knowledge of finance required. Appropriate for engineering or science students wishing to apply their quantitative skills to develop a basic understanding of financial modeling and markets. Prerequisite: basic preparation in probability, statistics, and optimization.

**MS&E 245B. Advanced Investment Science. 3 Units.**

Formerly MS&E 342. Topics: forwards and futures contracts, continuous and discrete time models of stock price behavior, geometric Brownian motion, Ito's lemma, basic options theory, Black-Scholes equation, advanced options techniques, models and applications of stochastic interest rate processes, and optimal portfolio growth. Computational issues and general theory. Teams work on independent projects. Prerequisite: 245A.

**MS&E 245G. Finance for Non-MBAs. 3 Units.**

For graduate students and advanced undergraduates. The foundations of finance; applications in corporate finance and investment management. Financial decisions made by corporate managers and investors with focus on process valuation. Topics include criteria for investment decisions, valuation of financial assets and liabilities, relationships between risk and return, market efficiency, and the valuation of derivative securities. Corporate financial instruments including debt, equity, and convertible securities. Equivalent to core MBA finance course, FINANCE 220. Prerequisites: ECON 50, ECON 102A, or equivalents; ability to use spreadsheets, and basic probability and statistics concepts including random variables, expected value, variance, covariance, and simple estimation and regression. Same as: ECON 135

**MS&E 246. Financial Risk Analytics. 3 Units.**

Practical introduction to financial risk analytics, focusing on data-driven modeling, computation, and statistical estimation of credit and market risks. Case studies based on real data will be emphasized. Topics include mortgage risk, asset-backed securities, commercial lending, consumer delinquencies, crowd funding, transactions analytics, derivatives risk. Tools from machine learning and statistics will be developed. Data sources will be discussed. Intended to enable students to design and implement risk analytics tools in practice. Prerequisite: 245A or similar, some background in probability and statistics, working knowledge of R, Matlab, or similar computational/statistical package.

**MS&E 250A. Engineering Risk Analysis. 3 Units.**

The techniques of analysis of engineering systems for risk management decisions involving trade-offs (technical, human, environmental aspects). Elements of decision analysis; probabilistic risk analysis (fault trees, event trees, systems dynamics); economic analysis of failure consequences (human safety and long-term economic discounting); and case studies such as space systems, nuclear power plants, and medical systems. Public and private sectors. Prerequisites: probability, decision analysis, stochastic processes, and convex optimization.

**MS&E 250B. Project Course in Engineering Risk Analysis. 3 Units.**

Students, individually or in groups, choose, define, formulate, and resolve a real risk management problem, preferably from a local firm or institution. Oral presentation and report required. Scope of the project is adapted to the number of students involved. Three phases: risk assessment, communication, and management. Emphasis is on the use of probability for the treatment of uncertainties and sensitivity to problem boundaries. Limited enrollment. Prerequisites: MS&E 250A and consent of instructor.

**MS&E 251. Stochastic Control. 3 Units.**

Introduction to stochastic control, with applications taken from a variety of areas including supply-chain optimization, advertising, finance, dynamic resource allocation, caching, and traditional automatic control. Markov decision processes, optimal policy with full state information for finite-horizon case, infinite-horizon discounted, and average stage cost problems. Bellman value function, value iteration, and policy iteration. Approximate dynamic programming. Linear quadratic stochastic control. Formerly EE365. Prerequisites: EE 263, EE 178 or equivalent. Same as: EE 266

**MS&E 252. Decision Analysis I: Foundations of Decision Analysis. 3-4 Units.**

Coherent approach to decision making, using the metaphor of developing a structured conversation having desirable properties, and producing actionable thought that leads to clarity of action. Socratic instruction; computational problem sessions. Emphasis is on creation of distinctions, representation of uncertainty by probability, development of alternatives, specification of preference, and the role of these elements in creating a normative approach to decisions. Information gathering opportunities in terms of a value measure. Relevance and decision diagrams to represent inference and decision. Principles are applied to decisions in business, technology, law, and medicine. See 352 for continuation.

**MS&E 254. The Ethical Analyst. 1-3 Unit.**

The ethical responsibility for consequences of professional analysts who use technical knowledge in support of any individual, organization, or government. The means to form ethical judgments; questioning the desirability of physical coercion and deception as a means to reach any end. Human action and relations in society in the light of previous thought, and research on the desired form of social interactions. Attitudes toward ethical dilemmas through an explicit personal code.

**MS&E 256. Technology Assessment and Regulation of Medical Devices. 3 Units.**

(Formerly 475.) Regulatory approval and reimbursement for new medical technologies as a key component of product commercialization. The regulatory and payer environment in the U.S. and abroad, and common methods of health technology assessment. Framework to identify factors relevant to adoption of new medical devices, and the management of those factors in the design and development phases. Case studies; guest speakers from government (FDA) and industry.

**MS&E 256A. Technology Assessment and Regulation of Medical Devices. 1 Unit.**

Regulatory approval and reimbursement for new medical technologies as a key component of product commercialization. The regulatory and payer environment in the U.S. and abroad, and common methods of health technology assessment. Framework to identify factors relevant to adoption of new medical devices, and the management of those factors in the design and development phases. Case studies; guest speakers from government (FDA) and industry.

**MS&E 257. Healthcare Reforms and Value-Based Biomedical Technology Innovation. 3 Units.**

A fundamental transformation of the healthcare system is underway in which policymakers, payers and administrators are intensely focused on new policy mechanisms designed to constrain healthcare costs while promoting quality, outcomes and value. This class evaluates healthcare reforms in the U.S. and abroad with specific focus on examining their impact on the biomedical technology innovation process. Lectures and case studies, guest speakers from health plans, providers, and the medical technology industry perspectives. Students investigate real-world technology innovations in projects.

**MS&E 257A. Healthcare Reforms and Value-Based Biomedical Technology Innovation. 1 Unit.**

A fundamental transformation of the healthcare system is underway in which policymakers, payers and administrators are intensely focused on new policy mechanisms designed to constrain healthcare costs while promoting quality, outcomes and value. This class evaluates healthcare reforms in the U.S. and abroad with specific focus on examining their impact on the biomedical technology innovation process. Lectures and case studies, guest speakers from health plans, providers, and the medical technology industry perspectives. Students investigate real-world technology innovations in projects.

**MS&E 260. Introduction to Operations Management. 3 Units.**

Operations management focuses on the effective planning, scheduling, and control of manufacturing and service entities. This course introduces students to a broad range of key issues in operations management. Topics include determination of optimal facility location, production planning, optimal timing and sizing of capacity expansion, and inventory control. Prerequisites: basic knowledge of Excel spreadsheets, probability, and optimization.

**MS&E 261. Inventory Control and Production Systems. 3 Units.**

Topics in the planning and control of manufacturing systems. The functions of inventory, determination of order quantities and safety stocks, alternative inventory replenishment systems, item forecasting, production-inventory systems, materials requirements planning (MRP), just-in-time systems, master and operations scheduling, supply chain management, and service operations. Limited enrollment. Prerequisite: 120, or STATS 116, or equivalent.

**MS&E 262. Supply Chain Management. 3 Units.**

Definition of a supply chain; coordination difficulties; pitfalls and opportunities in supply chain management; inventory/service tradeoffs; performance measurement and incentives. Global supply chain management; mass customization; supplier management. Design and redesign of products and processes for supply chain management; tools for analysis; industrial applications; current industry initiatives. Enrollment limited to 50. Admission determined in the first class meeting. Recommended: 260 or 261.

**MS&E 263. Healthcare Operations Management. 3 Units.**

With healthcare spending in the US exceeding 17% of GDP and growing, improvements in the quality and efficiency of healthcare services are urgently needed. This class focuses on the use of analytical tools to support efficient and effective delivery of health care. Topics include quality control and management, capacity planning, resource allocation, management of patient flows, and scheduling. Prerequisites: basic knowledge of Excel spreadsheets, probability, and optimization.

**MS&E 264. Sustainable Product Development and Manufacturing. 3-4 Units.**

For SCPD students only in 2014; not offered on-campus. Strategies and techniques for development of sustainable products and manufacturing processes. Topics: strategic decisions in new product development when environmental and resource externalities are accounted for; effect of regulatory requirements on ability of a firm to achieve its business objectives; contributions of sustainable products/processes to the firm's competitive advantage and operational efficiency and to enabling entrepreneurial opportunities; industrial ecology and life cycle analysis techniques in integrating traditional product development requirements with those of the environment and society. May be repeatable for credit once.

**MS&E 265. Product Management Fundamentals. 3 Units.**

Introduction to Product Management (PM). PM's define a product's functional requirements and lead cross functional teams responsible for development, launch, and ongoing improvement. The course uses a learning-by-doing approach covering the following topics: changing role of a PM at different stages of the product life cycle; techniques to understand customer needs and validate demand; user experience design and testing; role of detailed product specifications; waterfall and agile methods of software development. Group projects involve the specification of a software technology product though the skills taught are useful for a variety of product roles. No prior knowledge of design, engineering, or computer science required.

**MS&E 268. Operations Strategy. 3 Units.**

The development and implementation of the operations functional strategy. The integration of operations strategy with business and corporate strategies of a manufacturing-based firm. Topics: types and characteristics of manufacturing technologies, quality management, capacity planning and facilities choice, organization and control of operations, and operations' role in corporate strategy. Prerequisites: 260 or 261, or equivalent experience.

**MS&E 270. Strategy in Technology-Based Companies. 3-4 Units.**

For graduate students only. Introduction to the basic concepts of strategy, with emphasis on high technology firms. Topics: competitive positioning, resource-based perspectives, co-opetition and standards setting, and complexity/evolutionary perspectives. Limited enrollment.

**MS&E 271. Global Entrepreneurial Marketing. 3-4 Units.**

Skills needed to market new technology-based products to customers around the world. Case method discussions. Cases include startups and global high tech firms. Course themes: marketing toolkit, targeting markets and customers, product marketing and management, partners and distribution, sales and negotiation, and outbound marketing. Team-based take-home final exam. Limited enrollment. Please submit Winter course application at <http://goo.gl/forms/3LXFAYFD9t> by 6pm on Monday, January 4, 2016.

**MS&E 272. Startup Boards. 3 Units.**

Accelerate your startup through hands-on guidance from your own "board of directors" comprised of venture capitalists and experienced entrepreneurs. Like real startup boards, your board will help your team identify critical milestones, assist in achieving them, and hold your team accountable through regular board meetings. Learn how to avoid common mistakes that lead to ineffective board meetings, fired CEOs, and startup failures. Experience the other side of the table as a board member for another startup and learn the principles of effective board services. Topics include building boards, managing board meetings, making strategic decisions, executing board responsibilities, and replacing CEOs. Limited enrollment. Admission by application. Preference given to teams with demonstrated commitment to a viable startup business.

**MS&E 273. Technology Venture Formation. 3-4 Units.**

Open to graduate students interested in technology driven start-ups. Provides the experience of an early-stage entrepreneur seeking initial investment, including: team building, opportunity assessment, customer development, go-to-market strategy, and IP. Teaching team includes serial entrepreneurs and venture capitalists. Student teams validate the business model using R&D plans and financial projections, and define milestones for raising and using venture capital. Final exam is an investment pitch delivered to a panel of top tier VC partners. In addition to lectures, teams interact with mentors and teaching team weekly. Enrollment by application: <http://www.stanford.edu/class/msande273>. Recommended: 270, 271, or equivalent.

**MS&E 274. Dynamic Entrepreneurial Strategy. 3 Units.**

Primarily for graduate students. How entrepreneurial strategy focuses on creating structural change or responding to change induced externally. Grabber-holder dynamics as an analytical framework for developing entrepreneurial strategy to increase success in creating and shaping the diffusion of new technology or product innovation dynamics. Topics: First mover versus follower advantage in an emerging market; latecomer advantage and strategy in a mature market; strategy to break through stagnation; and strategy to turn danger into opportunity. Modeling, case studies, and term project.

**MS&E 275. Foundations for Large-Scale Entrepreneurship. 3 Units.**

Explore the foundational and strategic elements needed for startups to be designed for "venture scale" at inception. Themes include controversial and disruptive insights, competitive analysis, network effects, organizational design, and capital deployment. Case studies, expert guests, and experiential learning projects will be used. Primarily for graduate students. Limited enrollment. Recommended: basic accounting.

**MS&E 276. Entrepreneurial Management and Finance. 3 Units.**

For graduate students only, with a preference for engineering and science majors. Emphasis on managing high-growth, early-stage enterprises, especially those with innovation-based products and services. Students work in teams to develop skills and approaches necessary to becoming effective entrepreneurial leaders and managers. Topics include assessing risk, understanding business models, analyzing key operational metrics, modeling cash flow and capital requirements, evaluating sources of financing, structuring and negotiating investments, managing organizational culture and incentives, managing the interplay between ownership and growth, and handling adversity and failure. Limited enrollment. Admission by application. Recommended: basic accounting.

**MS&E 277. Creativity and Innovation. 3-4 Units.**

Experiential course explores factors that promote and inhibit creativity and innovation in individuals, teams, and organizations. Teaches creativity tools using workshops, case studies, field trips, expert guests, and team design challenges. Enrollment limited to 40. Admission by application. See <http://dschool.stanford.edu/classes>.

**MS&E 278. Patent Law and Strategy for Innovators and Entrepreneurs. 2-3 Units.**

Inventors and entrepreneurs have four concerns related to patent law: protecting their inventions in the very early stages of product development, determining the patentability of their invention, avoiding infringement of a competitor's patent, and leveraging their patent as a business asset. This course will address each of these concerns through the application of law cases and business cases to an invention of the Student's choice. Although listed as a ME/MSE course, the course is not specific to any discipline or technology. Same as: ME 208

**MS&E 279A. Entrepreneurial Leadership. 1 Unit.**

This seminar explores a wide range of topics related to entrepreneurial leadership through class discussions, case studies, field trips, and guest speakers. It is part of the DFJ Entrepreneurial Leaders Fellowship, which requires an application during Fall quarter. Details can be found at: <http://stvp.stanford.edu/dfj/>.

**MS&E 279B. Entrepreneurial Leadership. 1 Unit.**

This seminar explores a wide range of topics related to entrepreneurial leadership through class discussions, case studies, field trips, and guest speakers. It is part of the DFJ Entrepreneurial Leaders Fellowship, which requires an application during Fall quarter. Details can be found at: <http://stvp.stanford.edu/dfj/>.

**MS&E 280. Organizational Behavior: Evidence in Action. 3-4 Units.**

Organization theory; concepts and functions of management; behavior of the individual, work group, and organization. Emphasis is on cases and related discussion. Enrollment limited; priority to MS&E students. Please submit Winter course application at <http://goo.gl/forms/3LXFAYFD9t> by 6pm on Monday, January 4, 2016.

**MS&E 282. Transformational Leadership. 3 Units.**

The personal, team-based and organizational skills needed to become a transformative leader. Case method discussions and lectures. Themes include: personal transformation; the inside-out effect, group transformation; cross-functional teams; re-engineering; rapid - non-profit and for profit - organizational transformation; and social transformation. Course includes a group project that is defined and approved during the first two weeks of class. Limited enrollment. Graduate students only. Admission by application. Prerequisite: 180 or 280.

**MS&E 284. Designing Modern Work Organizations. 3 Units.**

This practice-based experiential lab course is geared toward MS&E masters students. Students will master the concepts of organizational design, with an emphasis on applying them to modern challenges (technology, growth, globalization, and the modern workforce). Students will also gain mastery of skills necessary for success in today's workplace (working in teams, communicating verbally, presenting project work). Guest speakers from industry will present real-world challenges related to class concepts. Students will complete a quarter-long project designing and managing an actual online organization. Limited to 25. Admission by application.

**MS&E 292. Health Policy Modeling. 3 Units.**

Primarily for master's students; also open to undergraduates and doctoral students. The application of mathematical, statistical, economic, and systems models to problems in health policy. Areas include: disease screening, prevention, and treatment; assessment of new technologies; bioterrorism response; and drug control policies.

**MS&E 293. Technology and National Security. 3 Units.**

The interaction of technology and national security policy from the perspective of history to implications for the new security imperative, homeland defense. Key technologies in nuclear and biological weapons, military platforms, and intelligence gathering. Policy issues from the point of view of U.S. and other nations. The impact of terrorist threat. Guest lecturers include key participants in the development of technology and/or policy.

Same as: MS&E 193

**MS&E 294. Climate Policy Analysis. 3 Units.**

Design and application of formal analytical methods in climate policy development. Issues include instrument design, technology development, resource management, multiparty negotiation, and dealing with complexity and uncertainty. Links among art, theory, and practice. Emphasis is on integrated use of modeling tools from diverse methodologies and requirements for policy making application. Prerequisites: ECON 50, MS&E 211, MS&E 252, or equivalents, or permission of instructor.

**MS&E 295. Energy Policy Analysis. 3 Units.**

Design and application of formal analytical methods for policy and technology assessments of energy efficiency and renewable energy options. Emphasis is on integrated use of modeling tools from diverse methodologies and requirements for policy and corporate strategy development. Prerequisites: ECON 50, MS&E 211, MS&E 252, or equivalents, or permission of instructor.

**MS&E 297. "Hacking for Defense": Solving National Security issues with the Lean Launchpad. 3-4 Units.**

In a crisis, national security initiatives move at the speed of a startup yet in peacetime they default to decades-long acquisition and procurement cycles. Startups operate with continual speed and urgency 24/7. Over the last few years they've learned how to be not only fast, but extremely efficient with resources and time using lean startup methodologies. In this class student teams will take actual national security problems and learn how to apply lean startup principles, ("business model canvas," "customer development," and "agile engineering") to discover and validate customer needs and to continually build iterative prototypes to test whether they understood the problem and solution. Teams take a hands-on approach requiring close engagement with actual military, Department of Defense and other government agency end-users. Team applications required in February. Limited enrollment. Course builds on concepts introduced in MS&E 477.

**MS&E 299. Voluntary Social Systems. 1-3 Unit.**

Ethical theory, feasibility, and desirability of a social order in which coercion by individuals and government is minimized and people pursue ends on a voluntary basis. Topics: efficacy and ethics; use rights for property; contracts and torts; spontaneous order and free markets; crime and punishment based on restitution; guardian-ward theory for dealing with incompetents; the effects of state action-hypothesis of reverse results; applications to help the needy, armed intervention, victimless crimes, and environmental protection; transition strategies to a voluntary society.

**MS&E 300. Ph.D. Qualifying Tutorial or Paper. 1-3 Unit.**

Restricted to Ph.D. students assigned tutorials as part of the MS&E Ph.D. qualifying process. Enrollment optional.

**MS&E 301. Dissertation Research. 1-15 Unit.**

Prerequisite: doctoral candidacy.

**MS&E 302. Fundamental Concepts in Management Science and Engineering. 1 Unit.**

Each course session will be devoted to a specific MS&E PhD research area. Advanced students will make presentations designed for first-year doctoral students regardless of area. The presentations will be devoted to: illuminating how people in the area being explored that day think about and approach problems, and illustrating what can and cannot be done when addressing problems by deploying the knowledge, perspectives, and skills acquired by those who specialize in the area in question. Area faculty will attend and participate. During the last two weeks of the quarter groups of first year students will make presentations on how they would approach a problem drawing on two or more of the perspectives to which they have been exposed earlier in the class. Attendance is mandatory and performance will be assessed on the basis of the quality of the students' presentations and class participation. Restricted to first year MS&E PhD students.

**MS&E 310. Linear Programming. 3 Units.**

Formulation of standard linear programming models. Theory of polyhedral convex sets, linear inequalities, alternative theorems, and duality. Variants of the simplex method and the state of art interior-point algorithms. Sensitivity analyses, economic interpretations, and primal-dual methods. Relaxations of harder optimization problems and recent convex conic linear programs. Applications include game equilibrium facility location. Prerequisite: MATH 113 or consent of instructor.

**MS&E 311. Optimization. 3 Units.**

Applications, theories, and algorithms for finite-dimensional linear and nonlinear optimization problems with continuous variables. Elements of convex analysis, first- and second-order optimality conditions, sensitivity and duality. Algorithms for unconstrained optimization, and linearly and nonlinearly constrained problems. Modern applications in communication, game theory, auction, and economics. Prerequisites: MATH 113, 115, or equivalent.

**MS&E 312. Advanced Methods in Numerical Optimization. 3 Units.**

Topics include interior-point methods, relaxation methods for nonlinear discrete optimization, sequential quadratic programming methods, optimal control and decomposition methods. Topic chosen in first class; different topics for individuals or groups possible. Individual or team projects. May be repeated for credit.

Same as: CME 334

**MS&E 314. Linear and Conic Optimization with Applications. 3 Units.**

Linear, semidefinite, conic, and convex nonlinear optimization problems as generalizations of classical linear programming. Algorithms include the interior-point, barrier function, and cutting plane methods. Related convex analysis, including the separating hyperplane theorem, Farkas lemma, dual cones, optimality conditions, and conic inequalities.

Complexity and/or computation efficiency analysis. Applications to combinatorial optimization, sensor network localization, support vector machine, and graph realization. Prerequisite: MS&E 211 or equivalent.

Same as: CME 336

**MS&E 315. Numerical Optimization. 3 Units.**

Solution of nonlinear equations; unconstrained optimization; linear programming; quadratic programming; global optimization; general linearly and nonlinearly constrained optimization. Theory and algorithms to solve these problems. Prerequisite: background in analysis and numerical linear algebra.

Same as: CME 304

**MS&E 316. Discrete Mathematics and Algorithms. 3 Units.**

Topics: Basic Algebraic Graph Theory, Matroids and Minimum Spanning Trees, Submodularity and Maximum Flow, NP-Hardness, Approximation Algorithms, Randomized Algorithms, The Probabilistic Method, and Spectral Sparsification using Effective Resistances. Topics will be illustrated with applications from Distributed Computing, Machine Learning, and large-scale Optimization. Prerequisites: CS 261 is highly recommended, although not required.

Same as: CME 305

**MS&E 317. Algorithms for Modern Data Models. 3 Units.**

We traditionally think of algorithms as running on data available in a single location, typically main memory. In many modern applications including web analytics, search and data mining, computational biology, finance, and scientific computing, the data is often too large to reside in a single location, is arriving incrementally over time, is noisy/uncertain, or all of the above. Paradigms such as map-reduce, streaming, sketching, Distributed Hash Tables, Bulk Synchronous Processing, and random walks have proved useful for these applications. This course will provide an introduction to the design and analysis of algorithms for these modern data models. Prerequisite: Algorithms at the level of CS 261.

Same as: CS 263

**MS&E 318. Large-Scale Numerical Optimization. 3 Units.**

The main algorithms and software for constrained optimization emphasizing the sparse-matrix methods needed for their implementation. Iterative methods for linear equations and least squares. The simplex method. Basis factorization and updates. Interior methods. The reduced-gradient method, augmented Lagrangian methods, and SQP methods. Prerequisites: Basic numerical linear algebra, including LU, QR, and SVD factorizations, and an interest in MATLAB, sparse-matrix methods, and gradient-based algorithms for constrained optimization. Recommended: MS&E 310, 311, 312, 314, or 315; CME 108, 200, 302, 304, 334, or 335. Same as: CME 338

**MS&E 319. Approximation Algorithms. 3 Units.**

Combinatorial and mathematical programming techniques to derive approximation algorithms for NP-hard optimization problems. Possible topics include: greedy algorithms for vertex/set cover; rounding LP relaxations of integer programs; primal-dual algorithms; semidefinite relaxations. May be repeated for credit. Prerequisites: 112 or CS 161.

**MS&E 321. Stochastic Systems. 3 Units.**

Topics in stochastic processes, emphasizing applications. Markov chains in discrete and continuous time; Markov processes in general state space; Lyapunov functions; regenerative process theory; renewal theory; martingales, Brownian motion, and diffusion processes. Application to queueing theory, storage theory, reliability, and finance. Prerequisites: 221 or STATS 217; MATH 113, 115. (Glynn).

**MS&E 322. Stochastic Calculus and Control. 3 Units.**

Ito integral, existence and uniqueness of solutions of stochastic differential equations (SDEs), diffusion approximations, numerical solutions of SDEs, controlled diffusions and the Hamilton-Jacobi-Bellman equation, and statistical inference of SDEs. Applications to finance and queueing theory. Prerequisites: 221 or STATS 217; MATH 113, 115.

**MS&E 330. Law, Order & Algorithms. 3 Units.**

Data and algorithms are rapidly transforming law enforcement and criminal justice, including how police officers are deployed, how discrimination is detected, and how sentencing, probation, and parole terms are set. Modern computational and statistical methods offer the promise of greater efficiency, equity, and transparency, but their use also raises complex legal, social, and ethical questions. In this course, we analyze recent court decisions, discuss methods from machine learning and game theory, and examine the often subtle relationship between law, public policy and statistics. Students work in interdisciplinary teams to explore these issues in an empirical or investigative project of their choice. Prerequisite: An introductory course in applied statistics (e.g. MS&E 125). Recommended: experience programming in R or Python. Same as: SOC 279

**MS&E 332. Topics in Social Algorithms. 3 Units.**

In depth discussion of selected research topics in social algorithms, including networked markets, collective decision making, recommendation and reputation systems, prediction markets, social computing, and social choice theory. The class will include a theoretical project and a paper presentation. Prerequisites: CS 261 or equivalent; understanding of basic game theory.

**MS&E 333. Social Algorithms. 1 Unit.**

This seminar will introduce students to research in the field of social algorithms, including networked markets, collective decision making, recommendation and reputation systems, prediction markets, social choice theory, and models of influence and contagion.

**MS&E 334. The Structure of Social Data. 3 Units.**

This course provides a survey of recent research in the study of social networks and large-scale social and behavioral data. Topics will include network models based on random graphs and their properties; centrality and ranking on graphs; ranking from comparisons; heavy-tailed statistical distributions for social data; the wisdom of crowds; homophily and social influence; experimentation and causal inference on networks. Prerequisites: 221, 226, CS161.

**MS&E 335. Queueing and Scheduling in Processing Networks. 3 Units.**

Advanced stochastic modeling and control of systems involving queueing and scheduling operations. Stability analysis of queueing systems. Key results on single queues and queueing networks. Controlled queueing systems. Dynamic routing and scheduling in processing networks. Applications to modeling, analysis and performance engineering of computing systems, communication networks, flexible manufacturing, and service systems. Prerequisite: 221 or equivalent.

**MS&E 336. Platform and Marketplace Design. 3 Units.**

The last decade has witnessed a meteoric rise in the number of online markets and platforms competing with traditional mechanisms of trade. Examples of such markets include online marketplaces for goods, such as eBay; online dating markets; markets for shared resources, such as Lyft, Uber, and Airbnb; and online labor markets. We will review recent research that aims to both understand and design such markets. Emphasis on mathematical modeling and methodology, with a view towards preparing Ph.D. students for research in this area. Prerequisites: Mathematical maturity; 300-level background in optimization and probability; prior exposure to game theory.

**MS&E 338. Advanced Topics in Information Science and Technology. 3 Units.**

Advanced material in this area is sometimes taught for the first time as a topics course. Prerequisite: consent of instructor.

**MS&E 347. Credit Risk: Modeling and Management. 3 Units.**

Credit risk modeling, valuation, and hedging emphasizing underlying economic, probabilistic, and statistical concepts. Point processes and their compensators. Structural, incomplete information and reduced form approaches. Single name products: corporate bonds, equity, equity options, credit and equity default swaps, forwards and swaptions. Multiname modeling: index and tranche swaps and options, collateralized debt obligations. Implementation, calibration and testing of models. Industry and market practice. Data and implementation driven group projects that focus on problems in the financial industry.

**MS&E 348. Optimization of Uncertainty and Applications in Finance. 3 Units.**

How to make optimal decisions in the presence of uncertainty, solution techniques for large-scale systems resulting from decision problems under uncertainty, and applications in finance. Decision trees, utility, two-stage and multi-stage decision problems, approaches to stochastic programming, model formulation; large-scale systems, Benders and Dantzig-Wolfe decomposition, Monte Carlo sampling and variance reduction techniques, risk management, portfolio optimization, asset-liability management, mortgage finance. Projects involving the practical application of optimization under uncertainty to financial planning.

**MS&E 351. Dynamic Programming and Stochastic Control. 3 Units.**

Markov population decision chains in discrete and continuous time. Risk posture. Present value and Cesaro overtaking optimality. Optimal stopping. Successive approximation, policy improvement, and linear programming methods. Team decisions and stochastic programs; quadratic costs and certainty equivalents. Maximum principle. Controlled diffusions. Examples from inventory, overbooking, options, investment, queues, reliability, quality, capacity, transportation. MATLAB. Prerequisites: MATH 113, 115; Markov chains; linear programming.

**MS&E 352. Decision Analysis II: Professional Decision Analysis. 3-4 Units.**

How to organize the decision conversation, the role of the decision analysis cycle and the model sequence, assessing the quality of decisions, framing decisions, the decision hierarchy, strategy tables for alternative development, creating spare and effective decision diagrams, biases in assessment, knowledge maps, uncertainty about probability. Sensitivity analysis, approximations, value of revelation, joint information, options, flexibility, bidding, assessing and using corporate risk attitude, risk sharing and scaling, and decisions involving health and safety. See 353 for continuation. Prerequisite: 252.

**MS&E 353. Decision Analysis III: Frontiers of Decision Analysis. 3 Units.**

The concept of decision composite; probabilistic insurance and other challenges to the normative approach; the relationship of decision analysis to classical inference and data analysis procedures; the likelihood and exchangeability principles; inference, decision, and experimentation using conjugate distributions; developing a risk attitude based on general properties; alternative decision aiding practices such as analytic hierarchy and fuzzy approaches. Student presentations on current research. Goal is to prepare doctoral students for research. Prerequisite: 352.

**MS&E 355. Influence Diagrams and Probabilistics Networks. 3 Units.**

Network representations for reasoning under uncertainty: influence diagrams, belief networks, and Markov networks. Structuring and assessment of decision problems under uncertainty. Learning from evidence. Conditional independence and requisite information. Node reductions. Belief propagation and revision. Simulation. Linear-quadratic-Gaussian decision models and Kalman filters. Dynamic processes. Bayesian meta-analysis. Prerequisites: 220, 252, or equivalents, or consent of instructor.

**MS&E 365. Advanced Models in Operations Management. 3 Units.**

Primarily for doctoral students. Focus on quantitative models dealing with sustainability and related to operations management. Prerequisite: consent of instructor. May be repeated for credit.

**MS&E 371. Innovation and Strategic Change. 2-3 Units.**

Doctoral research seminar, limited to Ph.D. students. Current research on innovation strategy. Topics: scientific discovery, innovation search, organizational learning, evolutionary approaches, and incremental and radical change. Topics change yearly. Recommended: course in statistics or research methods.

**MS&E 372. Entrepreneurship Doctoral Research Seminar. 1-3 Unit.**

Classic and current research on entrepreneurship. Limited enrollment, restricted to PhD students. Prerequisites: SOC 363 or equivalent, and permission of instructor.

**MS&E 374. Dynamic Corporate Strategy. 3 Units.**

Restricted to Ph.D. students. Research on the creation and shaping of disruptive industry dynamics and how companies can formulate and implement strategies to excel in such changing environments. Dynamic system model approach; case studies. Prerequisites: 201 or equivalent, 274.

**MS&E 375. Research on Entrepreneurship. 3 Units.**

Restricted to Ph.D. students. Organization theory, economics, and strategy perspectives. Limited enrollment. Prerequisites: SOC 360 or equivalent, and consent of instructor.

**MS&E 376. Strategy Doctoral Research Seminar. 3 Units.**

Classic and current research on business and corporate strategy. Limited enrollment, restricted to PhD students. Prerequisites: SOC 363 or equivalent, and permission of instructor. Course may be repeated for credit.

**MS&E 380. Doctoral Research Seminar in Organizations. 3 Units.**

Limited to Ph.D. students. Topics from current published literature and working papers. Content varies. Prerequisite: consent of instructor.

**MS&E 381. Doctoral Research Seminar in Work, Technology, and Organization. 2-3 Units.**

Enrollment limited to Ph.D. students. Topics from current published literature and working papers. Content varies. Prerequisite: consent of instructor.

**MS&E 383. Doctoral Seminar on Ethnographic Research. 3 Units.**

For graduate students; upper-level undergraduates with consent of instructor. Ethnosemantic interviewing and participant observation. Techniques for taking, managing, and analyzing field notes and other qualitative data. 15 hours per week outside class collecting and analyzing own data. Methods texts and ethnographies offer examples of how to analyze and communicate ethnographic data. Prerequisite: consent of instructor. (Barley).

**MS&E 384. Groups and Teams. 3 Units.**

Research on groups and teams in organizations from the perspective of organizational behavior and social psychology. Topics include group effectiveness, norms, group composition, diversity, conflict, group dynamics, temporal issues in groups, geographically distributed teams, and intergroup relations.

**MS&E 387. Design of Field Research Methods. 3 Units.**

Field research involves collecting original data (qualitative and/or quantitative) in field sites. This course combines informal lecture and discussion with practical exercises to build specific skills for conducting field research in organizations. Readings include books and papers about research methodology and articles that provide exemplars of field research. Specific topics covered include: the role of theory in field research, variance versus process models, collecting and analyzing different kinds of data (observation, interview, survey), levels of analysis, construct development and validity, blending qualitative and quantitative data (in a paper, a study, or a career), and writing up field research for publication. Students will develop intuition about the contingent relationship between the nature of the research question and the field research methods used to answer it as a foundation for conducting original field research.

**MS&E 388. Themes in Contemporary Meso-level Field Research. 3 Units.**

Doctoral research seminar, limited to Ph.D. students. Current meso-level field research on organizational behavior, especially work and coordination. Topics: work design, job design, roles, teams, organizational change and learning, knowledge management, performance. Focus on understanding theory development and research design in contemporary field research. Topics change yearly. Recommended: course in statistics or research methods.

**MS&E 389. Seminar on Organizational Theory. 5 Units.**

The social science literature on organizations assessed through consideration of the major theoretical traditions and lines of research predominant in the field.

Same as: EDUC 375A, SOC 363A

**MS&E 390. Doctoral Research Seminar in Health Systems Modeling. 1-3 Unit.**

Restricted to PhD students, or by consent of instructor. Doctoral research seminar covering current topics in health policy, health systems modeling, and health innovation. May be repeated for credit.

**MS&E 391. Doctoral Research Seminar in Energy-Environmental Systems Modeling and Analysis. 1-3 Unit.**

Restricted to PhD students, or by consent of instructor. Doctoral research seminar covering current topics in energy and environmental modeling and analysis. Current emphasis on approaches to incorporation of uncertainty and technology dynamics into complex systems models. May be repeated for credit.

**MS&E 403. Integrative Modeling. 3 Units.**

Modeling approaches for examining real life problems: how to get started. Critical thinking in framing and problem formulation leading to actionable solutions and communication of results to decision makers. Models to identify and evaluate multiple objectives/metrics. Models examined include both deterministic and probabilistic components. Overview of optimization and probability, decomposition principles to model large scale problems, appropriate integration of uncertainties into model formulations. Primarily team-project based assignments, with three to four group projects. Project topics drawn from applications with real data. Sample project topics include: optimizing group phone plans for large corporations, life insurance business models, making sense of the health care debate, logistic decision problems. Project teams will critically grade other teams' project reports using provided guidelines. Project presentations throughout the quarter. Prerequisites: 211, 220.

**MS&E 408. Directed Reading and Research. 1-15 Unit.**

Directed study and research on a subject of mutual interest to student and faculty member. Prerequisite: faculty sponsor.

**MS&E 408A. Directed Reading and Research. 1-4 Unit.**

Directed study and research on a subject of mutual interest to student and mentor.

**MS&E 431. Projects in Computational Social Science. 3-4 Units.**

Students work in interdisciplinary teams to complete a project of their choice in computational social science. Groups present their progress throughout the term, receiving regular feedback on their own projects and providing feedback on other students' projects. Students learn how to deal with the computational and statistical challenges of working with large, real-world datasets in the context of a motivating, substantive problem in the social sciences. Lectures and discussions are tailored to the specific topics that the groups pursue. Enrollment is by application only; details will be posted in the fall quarter. Prerequisite: MS&E 231 or similar.

**MS&E 441. Policy and Economics Research Roundtable. 1 Unit.**

Research in progress or contemplated in policy and economics areas. Emphasis depends on research interests of participants, but is likely to include energy, environment, transportation, or technology policy and analysis. May be repeated for credit. Same as: PERR

**MS&E 445. Projects in Wealth Management. 3-4 Units.**

Recent theory and standard practice in portfolio design for institutions, individuals, and funds. Student projects and case studies derived from the financial industry.

**MS&E 447. Systemic and Market Risk : Notes on Recent History, Practice, and Policy. 3 Units.**

The global financial crisis of 2007-8 threw into sharp relief the ongoing challenges of understanding risk, the financial system, links with the global economy, and interactions with policy. We will explore elements of the crisis, a few other key events, and ongoing debates about systemic risk. Group projects will explore in more detail past events and current topics in systemic risk. Supplements a rigorous technical curriculum in modern finance with select aspects relevant to understanding the practice and broader context of modern financial activities such as derivatives, financial engineering, and risk management.

**MS&E 448. Big Financial Data and Algorithmic Trading. 3 Units.**

Project course emphasizing the connection between data, models, and reality. Vast amounts of high volume, high frequency observations of financial quotes, orders and transactions are now available, and poses a unique set of challenges. This type of data will be used as the empirical basis for modeling and testing various ideas within the umbrella of algorithmic trading and quantitative modeling related to the dynamics and micro-structure of financial markets. Due to the fact that it is near impossible to perform experiments in finance, there is a need for empirical inference and intuition, any model should also be justified in terms of plausibility that goes beyond pure econometric and data mining approaches. Introductory lectures, followed by real-world type projects to get a hands-on experience with realistic challenges and hone skills needed in the work place. Work in groups on selected projects that will entail obtaining and cleaning the raw data and becoming familiar with techniques and challenges in handling big data sets. Develop a framework for modeling and testing (in computer languages such as Python, C++, Matlab and R) and prepare presentations to present to the class. Example projects include optimal order execution, developing a market making algorithm, design of an intra-day trading strategy, and modeling the dynamics of the bid and ask. Prerequisites: MS&E 211, 242, 342, or equivalents, some exposure to statistics and programming. Enrollment limited. Admission by application; details at first class.

**MS&E 449. Buy-Side Investing. 1-2 Unit.**

In-class lectures and guest speakers who work in the Buy-Side to explore the synergies amongst the various players, roles, risk appetites, and investment time and return horizons. We aim to see the forest and the different species of trees growing in the forest known as the Buy-Side, so as to develop a perspective as financial engineers for how the ecosystem functions, what risks it digests, how it generates capital at what rate and amount for the Sell-Side, and how impacts in the real economy are reflected - or should be reflected - in the culture and risk models adopted by the Buy-Side participants.

**MS&E 450. Lessons in Decision Making. 1 Unit.**

Entrepreneurs, senior management consultants, and executives from Fortune 500 companies share real-world stories and insights from their experience in decision making.

**MS&E 452. Decision Analysis Projects: Helping Real Leaders Make Real Decisions. 3 Units.**

A virtual consulting firm directed by professional decision analysts who offer advice and guidance as student teams help local organizations make a current business strategy or public policy decision. Projects for businesses, governments, or other institutions typically include start-up venture funding, R&D portfolio planning, new product or market entry, acquisition or partnering, cost reduction, program design, or regulatory policy decisions. Emphasis is on developing clarity of action and delivering insights to clients. Satisfies MS&E project course requirement. Prerequisite: 252. Recommended: 352.

**MS&E 453. Decision Analysis Applications: Business Strategy and Public Policy. 2-3 Units.**

What are the most essential, efficient, and effective ways that important decisions are being made in the real world? Experienced practitioners provide insights from technically challenging and organizationally complex decisions that they helped analyze for decision makers in businesses, nonprofits, and governments. Both the process and content of such decisions are discussed. Process includes disciplined qualitative and quantitative approaches for framing, structuring, modeling, assessing, evaluating, appraising, and communicating decisions. Content broadly covers business and corporate strategy, venture capital investing, financial derivatives and hedging, R&D portfolio management, new product design, technology manufacturing alternatives, business renewal, real estate investment and development, intellectual property litigation risk, interplanetary contamination risk, energy economics and policies, electric power production, nuclear waste disposal, environmental cleanup of mines, marine fisheries and resource protection, medical diagnosis and treatment options, health insurance plans, hospital risk management, pharmaceutical drug trials and backups, behavioral economics lessons, effective interaction techniques, and implications of social psychology for improved organizational decision making. Prerequisite: 252.

**MS&E 454. Decision Analysis Seminar. 1 Unit.**

Current research and related topics presented by doctoral students and invited speakers. May be repeated for credit. Prerequisite: 252.

**MS&E 463. Healthcare Systems Design. 3 Units.**

Students work on projects to analyze and design various aspects of healthcare including hospital patient flow, physician networks, clinical outcomes, reimbursement incentives, and community health. Students work in small teams under the supervision of the course instructor and partners at the Lucille Packard Children's Hospital, the Stanford Hospital, and other regional healthcare providers. Prerequisite: 263.

**MS&E 464. Global Project Coordination. 3-4 Units.**

Students engage in projects that are global in nature and related to the planning, design, and operations of supply chains, marketing, manufacturing, and product development processes. Stanford students work with students from an overseas university in teams of 6-8, using email, teleconferencing, and videoconferencing to meet on a regular basis. As part of the course, students travel to Hong Kong during Stanford's spring break. Applications due by November 15. Information session on October 29. Please see [https://stanford.qualtrics.com/SE/?SID=SV\\_3a8ZBx2NWB8p73T](https://stanford.qualtrics.com/SE/?SID=SV_3a8ZBx2NWB8p73T) for more information.

**MS&E 467. Strategic Operations Consulting. 3 Units.**

Restricted to MS&E masters students. Guided by industry practitioners, students work in teams to conduct an in-depth consulting project for a sponsoring company, assessing operational challenges and developing effective solutions. Projects range from the planning, design, and operation of supply chains to manufacturing to new product introduction. Emphasis is on developing diagnostic skills and designing effective and actionable solutions that provide new insights to clients. Students will be taught and coached on business writing and presentation skills. Projects culminate with a comprehensive presentation of findings and recommended actions to the sponsor. Satisfies MS&E project course requirement. Prerequisites: 260 or 261. Admission by application, limited enrollment.

**MS&E 472. Entrepreneurial Thought Leaders' Seminar. 1 Unit.**

Entrepreneurial leaders share lessons from real-world experiences across entrepreneurial settings. ETL speakers include entrepreneurs, leaders from global technology companies, venture capitalists, and best-selling authors. Half-hour talks followed by half hour of class interaction. Required web discussion. May be repeated for credit.

**MS&E 476. Entrepreneurship Through the Lens of Venture Capital: Venture Capital From Past to Present. 2 Units.**

Explores changes in the venture capital industry: rise of Silicon Valley and Sand Hill Road, investing in the dot-com bubble, incubators and accelerators, equity crowd funding platform, and different models of venture capital. Explores how companies are funded, grown, and scaled by meeting with individuals who have been at the forefront of this change. See [www.lensofvc.com](http://www.lensofvc.com).

**MS&E 477. Silicon Valley and the U.S. Government: Scaling Business-to-Government Technology. 2-3 Units.**

Understanding how to sell and scale dual-use technologies in the business-to-government (B2G) market. Dual-use technologies are viable consumer and commercial technologies with relevance in government, or B2G, marketplaces. Government technology needs, government acquisitions channels, and how to locate and access government funding. Students gain exposure to Silicon Valley venture investors familiar with funding dual-use technologies. Topics introduced are particularly relevant to technology researchers in academia, founders of technology companies, and future employees of startups pursuing dual-use technologies.

**MS&E 478. The Spirit of Entrepreneurship. 2 Units.**

This course uses the speakers from the Entrepreneurial Thought Leader seminar (MS&E472) to drive research and discussion about what makes an entrepreneur successful. Students meet before and after MS&E 472 to prepare for and debrief after the sessions. It is part of the DFJ Entrepreneurial Leaders Fellowship, which requires an application during Fall quarter. Details can be found at: <http://stvp.stanford.edu/dfj/>.

**MS&E 487. D.ORG: PROTOTYPING ORGANIZATIONAL CHANGE. 2-4 Units.**

d.org will send outstanding, proven design thinkers into organizations to jump-start organizational R&D experiments. Students will work directly with senior leaders to prototype ways to reinforce culture through policies, rituals, and behavioral norms.

**MS&E 488. Prototyping and Rapid Experiment Lab. 4 Units.**

Gain a deeper understanding of the prototyping and user feedback parts of the design thinking process with a focus on rapid experimentation. Explore prototyping and user feedback that happens in later stages of iteration when design ideas are somewhat gelled, but designers are still uncertain about whether the design will meet the need and evoke the response intended. Introduce and generate creative ways to discover what users will do in the real world with the designs we envision. For seasoned students who thoroughly understand the design thinking process or, more broadly, human-centered design and now want to focus on one later stage aspect of it in more depth. An application process will happen in Fall Quarter. Please contact the d.school for more details.

**MS&E 489. d.Leadership: Design Leadership in Context. 1-3 Unit.**

d.Leadership is a course that teaches the coaching and leadership skills needed to drive good design process in groups. d.leaders will work on real projects driving design projects within organizations and gain real world skills as they experiment with their leadership style. Take this course if you are inspired by past design classes and want skills to lead design projects beyond Stanford. Preference given to students who have taken other Design Group or d.school classes. Admission by application. See [dschool.stanford.edu/classes](http://dschool.stanford.edu/classes) for more information. Same as: ME 368

**MS&E 494. The Energy Seminar. 1 Unit.**

Interdisciplinary exploration of current energy challenges and opportunities, with talks by faculty, visitors, and students. May be repeated for credit.

Same as: CEE 301, ENERGY 301

**MS&E 802. TGR Dissertation. 0 Units.****Marketing Courses****MKTG 240. Marketing Management. 3 Units.**

The objectives of this course are to introduce students to the substantive and procedural aspects of marketing management and to sharpen skills for critical analytical thinking and effective communication. Specifically, the goals are to introduce students to marketing strategy and to the elements of marketing analysis: customer analysis, competitor analysis, and company analysis; to familiarize students with the elements of the marketing mix (product strategy, pricing, advertising and promotion, and distribution), and to enhance problem solving and decision-making abilities in these operational areas of marketing; and to provide students with a forum (both written and verbal) for presenting and defending their own recommendations, and for critically examining and discussing the recommendations of others.

**MKTG 249. MSx: Marketing. 3 Units.**

Every business has two kinds of problems: 1) Not having customers and 2) everything else. Marketing addresses the first problem. With increased access to information and fast-changing technology the role of marketing has broadened significantly. To attract and retain profitable customers, managers must identify and measure consumers' needs and wants, assess the competitive environment, select the most appropriate customer targets, and then develop multi-faceted marketing programs that satisfy consumers' needs better than the competition. The objective of this class is to provide you with perspectives on classical and modern day marketing, and to teach you how to take a high level strategic approach towards contemporary marketing challenges.

**MKTG 326. Customer Acquisition for New Ventures. 3 Units.**

The focus of this course is on the strategies and methods used by early-stage companies to acquire customers (through outbound or inbound marketing) and to activate them (i.e., to encourage repeat behavior and/or increase the frequency of interaction). Throughout the course, we will examine topics such as search engine marketing (SEM), content marketing, affiliate marketing, social media campaigns, mobile applications, freemium strategies, and the use of web analytics for tracking customer acquisition and conversion. The focus will be mainly on digital marketing channels, and the emphasis will be more B2C than B2B. Instruction will consist of case discussion, exercises and simulations, and guest lectures, with students working in groups to apply their learning to improve the process of customer acquisition.

**MKTG 335. Product Launch. 3 Units.**

Our focus is on the question, "When launching a product, what are the framing issues that will help determine success?" In particular, we will provide you with tools to analyze market situations and determine whether it makes sense to launch a product or engage in a marketing-related investment. The course is not designed to cover issues such as execution of a strategy (although we will touch on this a bit), but on whether to enter a market to begin with. Thus, the course is decision oriented; we want you to think about market entry decisions and how you would make them. The tools that you will be provided won't consist of equations; instead, we'll arm you with a set of questions to ask, whose answers will help you make better decisions. This course is an advanced applications marketing course. Unlike the base core course that is designed to cover every basic topic in marketing, here we focus on a number of basic questions and explore them in depth. Although we will have some lectures for background, the bulk of this endeavor will be accomplished through case discussions. In other words, we can't and won't cover everything, as this course is not designed to be comprehensive. We are going to rely on your academic background in marketing to cover the basics; here and there, it is possible that some material will be a review of what you've done before (there's nothing wrong with a little *de ja vu*). Unfortunately, due to the tight schedule we will not be able to cover any of the basics that are not already included in the course material. The course includes, cases, lectures, and guest lectures.

**MKTG 344. Marketing Research. 3 Units.**

Market intelligence is of value to firms. To understand their markets, firms need to answer questions such as: How large is the market for a product, what is important for the target segment? How does change in the product design affect profits? This course aims to help students ask relevant questions and find data-driven answers to them. The main objectives are to equip students with: 1) an understanding of the value of data - what intelligence it can and cannot provide, 2) exposure to state-of-the-art quantitative tools such as conjoint analysis and cluster analysis to analyze the data, and 3) sufficient hands-on experience with these tools for answering students' own marketing research questions from the perspective of an entrepreneur, marketer or a consultant. The course is designed to address substantive marketing problems such as: market segmentation, targeting, forecasting demand, pricing, and developing new products. We will use a mix of lectures, exercises, cases and a project to learn the material.

**MKTG 353. Social Brands. 4 Units.**

As savvy consumers are increasingly participating in brands rather than merely receiving their messages, how do leading organizations stoke conversations, co-create experiences and stories, and build engaging relationships with consumers? Moreover, how do they harness social media to build a brand, and empower employees and consumers to share these brand stories with others? Social Brands is a hands-on, project-based course that will draw brain power from the GSB, School of Engineering, and other Stanford graduate programs to collaboratively and creatively explore these questions. While we examine various inspiring examples of social brands, we will find that the rules are yet to be written. This emerging genre of social commerce and marketing is the "Wild West" and students working in mixed teams will be challenged to design and launch their own social experiments to form their own hypotheses. Assignments will push student teams to audit a brand, focus on a strategic goal, and design a social interaction that invites people on campus to participate in an extraordinary personal experience with that brand. Teams will then capture this experience in short videos and compile them into a story – one that highlights the brand experience they orchestrated, its impact, and their key learnings. This course will integrate approaches from the school and marketing curriculum - including brand strategy, storytelling fundamentals, human-centered methods, rapid prototyping, and a bias toward action. This is a class for those that want to learn by doing and creating. MKTG 353 - Social Brands class website: <http://www.stanford.edu/class/mktg353/>.

**MKTG 355. Designing for Happiness. 4 Units.**

We assume happiness is stable, an endpoint to achieve or goal to chase. It's not. What we think drives our happiness often doesn't. So what does? And how can knowing this help us create strong companies and brands? Understanding happiness is crucial to building successful relationships, products, and organizations. Yet recent research suggests that our definition of happiness is often confused and misguided. In this class, we explore new data on happiness, focusing on: rethinking happiness (a happy you) redesigning happiness (a happy company) spreading happiness (a happy brand) Students will work together to use an iterative design-thinking approach to understand our own definitions of happiness, uncover what really makes us happy (vs. what we think makes us happy), prototype solutions/products to increase our happiness, and design happy companies and brands. The class will be data-driven, drawing on multiple methodologies both quantitative and ethnographic. Throughout the quarter, students will build a class-wide database to investigate real-world happiness data via an Designing Happiness app, and test hypotheses about what truly makes them, their teams and their customers happy. This class is recommended for students who plan to be a future entrepreneur building a strong brand, an employee who finds meaning in their work, or someone who wants to understand happiness.

**MKTG 365. Marketing Analytics. 3 Units.**

Firms operate in an increasingly challenging business environment, with greater competition, more informed customers and rapidly changing market trends. Simultaneously, they also have access to more information about their customers, the marketplace and their competitors than ever before. In this environment, knowing how to use this information to make optimal business decisions is a crucial competitive advantage. Firms often have access to data that they do not know how to use. The objectives of this course are to introduce students to state-of-the-art marketing analytics and to teach them how to practically apply these analytics to real-world business decisions. The following are examples of the types of questions that the course will address: How should a firm determine the prices for its products and services? What is the effect of television advertising on a brand's sales and how should advertising be optimized? What can a firm learn about its customers from online browsing behavior and how can this knowledge be used for targeted advertising and promotions? How should a firm allocate its sales force? How should a firm manage the allocation of its promotional budget in order to maximize its returns? How should the mailing of catalogs or direct mail be targeted to increase response rates? The course will use a mix of lectures, cases, homework assignments and a course project to learn the material. Students do not need to have an advanced statistical background to take this course. Familiarity with the material in an introductory marketing course and an introductory statistics course will be assumed, but necessary material will be reviewed during the course of the quarter as necessary.

**MKTG 366. Advanced Marketing Analytics. 3 Units.**

This course is focused on advanced methods and approaches to marketing analytics. Firms often operate in an increasingly challenging environment, with greater competition, more informed customers and rapidly changing market trends. They also operate in a data-rich environment, with information often at the individual customer level. Knowing how to use this information to optimize business decisions is a competitive advantage. The course will take a hands-on approach to learning advanced techniques and methods in marketing analytics. The course will set a broad set of topics including pricing, advertising, channel management and customer relationship management amongst others. Students will use a mix of approaches including statistical methods, experimental and quasi-experimental approaches. This course will use a hybrid model, with a mix of case studies, exercises and flipped classrooms, where students will read/view material in advance of the class, with the class sessions focusing on discussing the topics at a deeper level. A major component of the course will be a project that students will work on in partnership with a firm on solving a business problem using the methods and approaches learned in this course. The course will be a good fit for students who have a background in advanced statistical methods and programming, or are willing to acquire these skills on their own in advance.

**MKTG 373. Monetization - Choosing a Business Model. 3 Units.**

This course examines the fundamental issues of creating a strategy for monetization and revenue growth within an organization. Students learn about setting an organization's business model design, aligning various functional areas within the company to implement a monetization strategy, and the tradeoffs that occur when choosing amongst profitable monetization policies for the firm. They master concepts, frameworks, and tools to assess an industry and a firm's pricing strategy and business models, and to craft alternatives. They also study the interplay between marketing, salesforces, HR incentives and human capital management, advertising and data and analytics in shaping a winning monetization policy. Topics we will cover include monetizing online content and strategies in ad-driven industries, understanding freemium models and installed-base competition, monetization of consumer data, privacy considerations and the privacy economy, business models from the perspective of investors and venture capitalists, regulatory considerations, and linking monetization to the ability to measure and capture value. We will use a mix of cases and lectures along with extensive participation from industry leaders to bring to light the various issues in class.

**MKTG 375. Consumer Behavior. 4 Units.**

Contemporary approaches to marketing emphasize the importance of adopting a consumer focus, from determining consumers' wants and needs to shaping their attitudes and ensuring their loyalty. This course provides insight into consumer psychology and the means by which consumer behavior can be influenced or altered. The course has both theoretical and practical objectives in that it will: (1) explore theory and research that is relevant to understanding consumer psychology and behavior, and (2) apply these theories and findings to generate ideas for developing effective marketing techniques and tactics. By shedding light on the psychological underpinnings of consumers' thoughts, attitudes, preferences, needs, and decision-making styles, this course will help students make more insightful and effective marketing decisions. Moreover, because this course takes a broad psychological perspective, it highlights novel ideas for grabbing attention, shaping behavior, and changing people's minds both within and outside of traditional marketing contexts.

**MKTG 526. Customer Acquisition for New Ventures. 2 Units.**

The focus of this course is on the strategies and methods used by early-stage companies to acquire customers (through outbound or inbound marketing) and to activate them (i.e., to encourage repeat behavior and/or increase the frequency of interaction). Throughout the course, we will examine topics such as search engine marketing (SEM), content marketing, affiliate marketing, social media campaigns, mobile applications, freemium strategies, and the use of web analytics for tracking customer acquisition and conversion. The focus will be mainly on digital marketing channels, and the emphasis will be more B2C than B2B. Instruction will consist of case discussion and guest lectures, with students working in groups to apply their learning to improve the process of customer acquisition.

**MKTG 532. Persuasion. 2 Units.**

The aim of this course is to provide insight into the psychology of persuasion. We will explore research and theory in this domain and discuss potentially powerful techniques for changing people's attitudes and behaviors. We will apply our insights broadly to examine the features that make for an effective persuasive appeal in a wide range of settings (e.g., an ad, a pitch to investors, etc.), and students will practice designing and implementing persuasive messages. In each session, I will share classic and cutting edge research on persuasion emanating from the fields of social and consumer psychology. These insights will be organized around a few basic principles. We will then work together to brainstorm and practice the application of the insights to real world persuasion settings.

**MKTG 534. The Travel and Airline Industry. 2 Units.**

This class will provide an overview of the travel and hospitality industry focusing on strategy, business models, institutions and innovations. Issues we will cover include pricing and yield management, service quality assessment and loyalty and reward program management within verticals such as airlines, hotels and cruise lines. We will also discuss new innovations such as shared consumption models and the role of online reviews and user generated content in facilitating travel. The class will involve a mix of cases and lectures; a site visit to a Bay Area travel/hospitality firm for a tour of operations and discussion of strategy; and interactions with several industry leaders in the travel space.

**MKTG 535. Product Launch. 2 Units.**

Our focus is on the question, "When launching a product, what are the framing issues that will help determine success?" In particular, we will provide you with tools to analyze market situations and determine whether it makes sense to launch a product or engage in a marketing-related investment. The course is not designed to cover issues such as execution of a strategy (although we will touch on this a bit), but on whether to enter a market to begin with. Thus, the course is decision oriented; we want you to think about market entry decisions and how you would make them. The tools that you will be provided won't consist of equations; instead, we'll arm you with a set of questions to ask, whose answers will help you make better decisions. This course is an advanced applications marketing course. Unlike the base core course that is designed to cover every basic topic in marketing, here we focus on a number of basic questions and explore them in depth. Although we will have some lectures for background, the bulk of this endeavor will be accomplished through case discussions. In other words, we can't and won't cover everything, as this course is not designed to be comprehensive. We are going to rely on your academic background in marketing to cover the basics; here and there, it is possible that some material will be a review of what you've done before (there's nothing wrong with a little *de ja vu*). Unfortunately, due to the tight schedule we will not be able to cover any of the basics that are not already included in the course material. The course includes, cases, lectures, and guest lectures.

**MKTG 536. Entrepreneurial Ventures in Luxury Markets. 2 Units.**

The broad goal of this Bass Seminar is to apply the key concepts covered in *The Frinky Science of the Human Mind (GSBGEN 520)\** for identifying and proposing new ventures in the "luxury" space. For this course, "luxury" will be viewed in a broader than usual fashion, namely creating distinctive differences to fundamentally change an otherwise mundane product category. An example of such a view will be the venture, Mr., an upscale barbershop in San Francisco, started by two GSB alums, Kumi Walker and Sean Heywood. Another example will be Voss, an upscale brand in the bottled water category. Students in this course will work in groups to identify promising opportunities in the "luxury" space early in the quarter. The groups will then hone their new venture ideas through meetings with entrepreneurs, experts in private equity, product design, etc., who will serve as guest speakers in this course. In this regard, each session will be structured to begin with a guest speaker followed by a brainstorming/ discussion session. The final deliverable will be a business plan that is put together by each group for a new venture in the "luxury" space. \*Students who could not take GSBGEN 520 are strongly encouraged to attend preparatory sessions that will be scheduled in the first week of December. Such students may also contact the instructor ([shiv\\_baba@gsb.stanford.edu](mailto:shiv_baba@gsb.stanford.edu)) to see if they can sit in on some of the GSBGEN 520 sessions that will be relevant for this Bass Seminar.

**MKTG 541. Social Brands. 2 Units.**

A hands-on two-week survey of Marketing's cutting edge, where bold brands are becoming ever more open, participatory, experiential & experimental. Inspired by a smattering of provocative real-world examples and mind-blowing guests, diverse student teams will employ design methods to conceive of and visualize their own creative proposals for how the Stanford GSB itself might engage with the world in radical new ways. Teams will ultimately pitch their final concepts to the GSB's Chief Marketing Officer for consideration, feedback and potential real-world implementation.

**MKTG 542. Designing Story in a Digital World. 1 Unit.**

Our world is changing at an incredible pace. We're in the middle of a commerce revolution that is consumer-driven and technology-enabled. Consumer expectations have risen. They want to be inspired by engaging, meaningful experiences, and they want to engage with people and brands that have compelling, data-driven, and authentic stories to share. But how do you develop that story? Storytelling has always been a significant part of history, but the means through which the stories have been told has evolved with each civilization. From the oral histories, to the works of scribes, to newspapers, television, and now the Internet, personal narrative has been used to communicate the events of the past. Digital media now combines tradition with technology and allows us to tell stories through voice, text, images, audio, and video. The immersive workshop is structured around three key principles: (1) know your goal, (2) craft your story, and (3) prototype to learn. You will be a part of an ultra-paced design sprint to come up with a compelling story about a brand or person of your choosing, and design the story to be leveraged across digital media.

**MKTG 547. Strategic Marketing Communication - Compressed. 2 Units.**

The course is designed to sharpen students' grasp of the strategic and tactical aspects of Marketing Communications that lead to competitive advantages in the marketplace. The course will begin a focus on strategy and introduce students to frameworks that address two broad goals of any firm: (1) Establish a competitive advantage by offering a superior customer value proposition and (2) Generate sustainable organic growth. The course will then segue into marketing communication tactics that will enable the firm effectively accomplish its strategic objectives. Here, the concepts and frameworks will only be applicable to traditional approaches (such as the use of television, print, and point-of-purchase promotions) but also to emergent approaches (such as the use of the internet, mobile media, etc.). Designed from the perspective of executives who are often involved in making strategic as well as tactical marketing decisions to solve contemporary business problems, this course is intended for students whose career plans include consulting and entrepreneurial ventures, apart from those thinking of careers in marketing.

**MKTG 552. Building Innovative Brands. 2 Units.**

Building Innovative Brands is a hands-on two-week dive into how leading brands may leverage a Design Thinking approach to become ever more participatory, experiential and experimental. Together, we will explore how leading organizations stoke conversations, co-create experiences, spark stories and build engaging relationships with consumers. Inspired by provocative real-world examples and industry guests, diverse student teams will employ human-centered design methods to conceive of and visualize their own creative proposals for how a brand could engage in innovative, brand-enhancing new ways. Teams will ultimately pitch their experience design concepts to the program leadership for feedback, consideration and potential real-world implementation.

**MKTG 554. Branding in the Digital Era. 2 Units.**

A strong brand is the most valuable and irreplaceable asset for a firm. Apple, Google, Coca Cola, Nike, VISA, McDonalds, and Disney, are a few prominent examples of legendary brands. Many companies recognize that the investment they make in the creation and communication of their brand will become a strategic differentiator in the future. This course is designed to provide students with theoretical as well as applied appreciation and understanding of what it takes to build and sustain strong brands. To achieve these goals, the class will be co-taught by two academic and industry experts who will not only provide basic insights into branding basics but will also discuss cutting-edge research and technological developments in the area. Prof. Khan will lead the first half of the course. This week will focus on conceptual and strategic frameworks for understanding basic branding concepts and answering core challenges such as, how to define and establish brand meaning and personality; how to measure and leverage brand equity; how to manage brand architecture; and how to establish brand leadership. In the second week, the focus will switch to digital aspects of branding. This week will be led by Mr. Gopi Kallayil, Chief Evangelist, Brand Marketing, at Google. Mr. Kallayil will explore contemporary issues in brand marketing such as, how to construct and maintain brand meaning in the high customer involvement digital space; how to seize the opportunity of your super fans actively expressing brand love on digital; and how to leverage new customer experiences created with digital in branding strategy. Students are required to attend and come prepared to all classes.

**MKTG 555. Designing Happiness. 2 Units.**

We assume happiness is stable, an endpoint to achieve or a goal to "chase." It's not. Recent research suggests that the meaning of happiness changes every 3-4 years. Understanding happiness is crucial to building successful products, organizations and relationships. In this MBA seminar, we explore the data-driven research on happiness, revealing insights about (a) anticipating, (b) understanding, (c) visualizing, (d) spreading, (e) remembering, and (f) creating happiness. Students will work together to use an iterative design-thinking approach to understand our own current definition of happiness, uncover what really makes us happy (vs. what we think makes us happy), prototype solutions/products to increase our present happiness, and develop tools to continually understand and foster happiness as our lives change. The seminar will be data-driven, drawing on multiple methodologies including blogs (<http://www.wefeelfine.org/>), experiments and surveys.

**MKTG 574. Rethinking Purpose. 2 Units.**

We assume happiness is stable, an endpoint to achieve our goal to chase. It's not. Recent behavioral research suggests that the meaning of happiness changes every 5-10 years, raising the question: how might we build organizations and lives that cultivate happiness? Research suggests it is better to aim for meaning. In Rethinking Purpose, we explore how to rethink purpose in work and life. Students will hear from guests and take a field trip to see how Google has reconsidered purpose. Building on the principles for Solve for X ([www.solveforx.com](http://www.solveforx.com)), a platform encouraging moonshot thinking to solve huge problems in the world, we'll harness design thinking principles to create personal moonshots and a path to continue to find those moonshots over the life course. Lastly, we'll map out how to use time in ways that would help build innovative teams, products, and ultimately lives that have positive, meaningful, lasting impact in the world. If you take this course, please save Feb 20th 2016 (Sat, 10-6pm) at the d.school for an immersive day to serve foundation for this 2 week class.

**MKTG 575. Consumer Behavior. 2 Units.**

Contemporary approaches to marketing emphasize the importance of adopting a consumer focus, from determining consumers' wants and needs, understanding their motivation, to shaping their attitudes and ensuring their loyalty. This course provides insight into consumer psychology and the means by which consumer behavior can be influenced or altered. The course has both theoretical and practical objectives in that we will: (1) explore theory and research that is relevant to understanding consumer psychology, (2) apply these theories and findings to generate novel ideas for effective marketing techniques. By shedding light on the psychological underpinnings of consumers' motivation, attitudes, preferences, and decision-making styles, this course will help students make more insightful and effective marketing decisions, as well as developing novel ideas for grabbing attention, shaping behavior, and changing consumers' minds.

**MKTG 576. Digital Marketing. 2 Units.**

There has been a rapid evolution of digital means of communicating with consumers and advertising to them, driven by changes in technologies and consumer behavior. Readership of traditional print media has gone down dramatically, and television is consumed very differently now than even a few years ago, with the advent of digital video recording and streaming video platforms. This has led to a dramatic growth of marketing using digital platforms. Furthermore, a variety of avenues for digital marketing has emerged, including display advertising, search advertising, advertising on online video platforms, advertising and other forms of engagement on social networks etc. A recent trend has been the rapid growth of mobile platforms, which include these different avenues also available. An integrated view of using these different media to market to consumers is important to effective digital marketing. With the rapid acceptance of numerous "Big Data" technologies by large enterprises, online marketing is also evolving to incorporate a customer-centric view rather than a campaign centric view. This course will explore these issues.

**MKTG 622. Behavioral Research in Marketing III: Consumer Behavior Classics. 3 Units.**

The purpose of this seminar is to provide PhD level coverage of the major research work carried out in consumer behavior. For each topic considered, a selection of articles with a specific focus on "early classics" will be distributed and discussed. For each topic, our goals will be to determine the main ideas and research questions driving work in each topic area, how these authors positioned their work and tested their ideas, what made these papers "classics," where the gaps are, and what ideas for new research those gaps imply.

**MKTG 641. Behavioral Research in Marketing I. 3 Units.**

This course prepares the student to do empirical behavioral research. It will cover all aspects of the research process, from hypothesis generation to experimental design to data analysis to writing up your results and submitting them for publication.

**MKTG 642. Behavioral Research in Marketing II: Consumer Behavior. 3 Units.**

This PhD seminar provides coverage of the major research carried out in consumer research both in marketing and psychology. A vast set of topic will be covered including conscious and non-conscious consumer goals, motivations, emotions, attention and perception and consumer decision processes. The course will help students hone their ability to conceptualize, operationalize, and develop research idea and will provide a grasp of what it takes to be a successful academic in the field of consumer behavior.

**MKTG 644. Quantitative Research in Marketing. 3 Units.**

The goal of this seminar is to familiarize students with the quantitative marketing literature and develop the process of generating research ideas and topics. Sessions will involve a mix of: (i) a discussion of papers in a particular area in quantitative marketing; and/or (ii) a discussion of students' research ideas with respect to topics. The format will mix student presentations of papers with lectures by the instructor(s). When discussing papers in the literature, the focus will be on the topic and research question and not the methodological approach. When discussing research ideas, students should be able to articulate why their question is interesting, where it fits in the literature and how they would address their question.

**MKTG 645. Empirical Analysis of Dynamic Decision Contexts. 3 Units.**

This course will focus on empirical tools for analyzing dynamic decision contexts, wherein current actions of firms or consumers have effects on future payoffs, profits and/or competitive conduct. The course will build the relevant material generally, but our applications will be mostly focused on empirical marketing, operations and industrial organization problems. We will have an applied focus overall, emphasizing the practical aspects of implementation, especially programming. The overall aim of the class is to help students obtain the skills to implement these methods in their research. By the end of the class, students are expected to be able to formulate a dynamic decision problem, program it in a language such as Matlab or C, and to estimate the model from data. The course starts with an overview of consumer theory and static models of consumer choice. We build on this material and introduce discrete choice markovian decision problems, and continuous markovian decision problems, and focus on building the computational toolkit for the numerical analysis of these problems. We then move on to specific applications, and discuss multi-agent dynamic equilibrium models. Finally, we discuss recently proposed advanced methods for alleviating computational burden in dynamic models.

**MKTG 646. Bayesian Inference: Methods and Applications. 3 Units.**

The course aims to develop a thorough understanding of Bayesian inference, with a special focus on empirical applications in marketing. The course will start with a brief theoretical foundation to Bayesian inference and will subsequently focus on empirical methods. Initial topics would include Bayesian linear regression, multivariate regression, importance sampling and its applications. Subsequently, the course will focus on Markov Chain Monte Carlo (MCMC) methods including the Gibbs Sampler and the Metropolis-Hastings algorithm and their applications. The overall focus of the course will be on applying these methods for empirical research using a programming language such as R.

**MKTG 661. Attitudes and Persuasion. 3 Units.**

The goal of this course - geared toward graduate students in marketing, psychology, and related disciplines - is to explore some of the issues and controversies that currently engage researchers in the domain of attitudes and persuasion. We will cover classic topics in this domain, but in each case we will emphasize new findings or recent directions. Students who take this course will become familiar with research methods and major issues in attitudes research and will have a better understanding of how individuals form, use, change, and maintain their attitudes. Throughout the course, students will be encouraged to critique existing research and formulate new research ideas.

**MKTG 691. PhD Directed Reading. 1-15 Unit.**

This course is offered for students requiring specialized training in an area not covered by existing courses. To register, a student must obtain permission from the faculty member who is willing to supervise the reading.

Same as: ACCT 691, FINANCE 691, GSBGEN 691, HRMGT 691, MGTECON 691, OB 691, OIT 691, POLECON 691, STRAMGT 691

**MKTG 692. PhD Dissertation Research. 1-15 Unit.**

This course is elected as soon as a student is ready to begin research for the dissertation, usually shortly after admission to candidacy. To register, a student must obtain permission from the faculty member who is willing to supervise the research.

Same as: ACCT 692, FINANCE 692, GSBGEN 692, HRMGT 692, MGTECON 692, OB 692, OIT 692, POLECON 692, STRAMGT 692

**MKTG 698. Doctoral Practicum in Teaching. 1 Unit.**

Doctoral Practicum in Teaching.

**MKTG 699. Doctoral Practicum in Research. 1 Unit.**

Doctoral Practicum in Research.

**MKTG 802. TGR Dissertation. 0 Units.**

Same as: ACCT 802, FINANCE 802, GSBGEN 802, HRMGT 802, MGTECON 802, OB 802, OIT 802, POLECON 802, STRAMGT 802

**Materials Science & Engineer Courses****MATSCI 10SC. Diamonds from Peanut Butter: Material Technologies and Human History. 2 Units.**

Technological importance of materials in history is captured in names: the Stone Age, Bronze Age, Iron Age, and now the Information Age or the Silicon Age. How materials have played, and continue to play, pivotal roles in the development of new technologies.

**MATSCI 81N. Bioengineering Materials to Heal the Body. 3 Units.**

Preference to freshmen. How scientists and engineers are designing new materials for surgeon to use in replacing body parts such as heart tissue or the spinal cord. How cells, in the body and transplanted stem cells, communicate with implanted materials. Real-world examples of materials developed for tissue engineering and regenerative medicine therapies. Students identify a clinically important disease or injury that requires a better material, research approaches to the problem, and debate possible engineering solutions.

**MATSCI 82N. Science of the Impossible. 3 Units.**

Imagine a world where cancer is cured with light, objects can be made invisible, and teleportation is allowed through space and time. The future once envisioned by science fiction writers is now becoming a reality, thanks to advances in materials science and engineering. This seminar will explore 'impossible' technologies - those that have shaped our past and those that promise to revolutionize the future. Attention will be given to both the science and the societal impact of these technologies. We will begin by investigating breakthroughs from the 20th century that seemed impossible in the early 1900s, such as the invention of integrated circuits and the discovery of chemotherapy. We will then discuss the scientific breakthroughs that enabled modern 'impossible' science, such as photodynamic cancer therapeutics, invisibility, and psychokinesis through advanced mind-machine interfaces. Lastly, we will explore technologies currently perceived as completely impossible and brainstorm the breakthroughs needed to make such science fiction a reality. The course will include introductory lectures and in-depth conversations based on readings. Students will also be given the opportunity to lead class discussions on a relevant 'impossible science' topic of their choosing.

**MATSCI 100. Undergraduate Independent Study. 1-3 Unit.**

Independent study in materials science under supervision of a faculty member.

**MATSCI 150. Undergraduate Research. 3-6 Units.**

Participation in a research project.

**MATSCI 151. Microstructure and Mechanical Properties. 3-4 Units.**

Primarily for students without a materials background. Mechanical properties and their dependence on microstructure in a range of engineering materials. Elementary deformation and fracture concepts, strengthening and toughening strategies in metals and ceramics. Topics: dislocation theory, mechanisms of hardening and toughening, fracture, fatigue, and high-temperature creep. Prerequisite: MATSCI 163. Undergraduates register in 151 for 4 units; graduates register for 251 in 3 units.

Same as: MATSCI 251

**MATSCI 152. Electronic Materials Engineering. 4 Units.**

Materials science and engineering for electronic device applications. Kinetic molecular theory and thermally activated processes; band structure; electrical conductivity of metals and semiconductors; intrinsic and extrinsic semiconductors; elementary p-n junction theory; operating principles of light emitting diodes, solar cells, thermoelectric coolers, and transistors. Semiconductor processing including crystal growth, ion implantation, thin film deposition, etching, lithography, and nanomaterials synthesis.

**MATSCI 153. Nanostructure and Characterization. 4 Units.**

The structure of materials at the nanoscale is in most cases the same crystalline form as the natural phase. Structures of materials such as semiconductors, ceramics, metals, and nanotubes; classification of these materials according to the principles of crystallography. Primary methods of structural characterization, X-ray diffraction, and electron microscopy; their applications to study such nanostructures.

**MATSCI 154. Thermodynamic Evaluation of Green Energy Technologies. 4 Units.**

Understand the thermodynamics and efficiency limits of modern green technologies such as carbon dioxide capture from air, fuel cells, batteries, and solar-thermal power.

**MATSCI 155. Nanomaterials Synthesis. 4 Units.**

The science of synthesis of nanometer scale materials. Examples including solution phase synthesis of nanoparticles, the vapor-liquid-solid approach to growing nanowires, formation of mesoporous materials from block-copolymer solutions, and formation of photonic crystals. Relationship of the synthesis phenomena to the materials science driving forces and kinetic mechanisms. Materials science concepts including capillarity, Gibbs free energy, phase diagrams, and driving forces.

**MATSCI 156. Solar Cells, Fuel Cells, and Batteries: Materials for the Energy Solution. 3-4 Units.**

Operating principles and applications of emerging technological solutions to the energy demands of the world. The scale of global energy usage and requirements for possible solutions. Basic physics and chemistry of solar cells, fuel cells, and batteries. Performance issues, including economics, from the ideal device to the installed system. The promise of materials research for providing next generation solutions. Undergraduates register in 156 for 4 units; graduates register in 256 for 3 units.

Same as: EE 293A, ENERGY 293A, MATSCI 256

**MATSCI 157. Quantum Mechanics of Nanoscale Materials. 4 Units.**

Introduction to quantum mechanics and its application to the properties of materials. No prior background beyond a working knowledge of calculus and high school physics is presumed. Topics include: The Schrodinger equation and applications to understanding of the properties of quantum dots, semiconductor heterostructures, nanowires, and bulk solids. Tunneling processes and applications to nanoscale devices; the scanning tunneling microscope, and quantum cascade lasers. Simple models for the electronic properties and band structure of materials including semiconductors, insulators and metals and applications to semiconductor devices. Time-dependent perturbation theory and interaction of light with materials with applications to laser technology.

**MATSCI 159Q. Japanese Companies and Japanese Society. 3 Units.**

Preference to sophomores. The structure of a Japanese company from the point of view of Japanese society. Visiting researchers from Japanese companies give presentations on their research enterprise. The Japanese research ethic. The home campus equivalent of a Kyoto SCTI course.

Same as: ENGR 159Q

**MATSCI 160. Nanomaterials Laboratory. 4 Units.**

Preference to sophomores and juniors. Hands-on approach to synthesis and characterization of nanoscale materials. How to make, pattern, and analyze the latest nanotech materials, including nanoparticles, nanowires, and self-assembled monolayers. Techniques such as soft lithography, self-assembly, and surface functionalization. The VLS mechanism of nanowire growth, nanoparticle size control, self-assembly mechanisms, and surface energy considerations. Laboratory projects. Enrollment limited to 24.

**MATSCI 161. Nanocharacterization Laboratory. 3-4 Units.**

Students use optical microscopy, x-ray diffraction, scanning electron microscopy, x-ray photoelectron spectroscopy, atomic force microscopy and other techniques to characterize recently discovered perovskite semiconductors that can be used to make highly efficient solar cells. This course fulfills the Writing in the Major Requirement for MSE undergrads. Instruction on writing, statistics, generating effective plots with curve fits, using databases to find information and giving oral scientific presentations is given. Instruction on characterization techniques is provided, but it is expected that the students will have already taken a course like MATSCI 153 that covers the fundamentals of the techniques. The emphasis on this course is on doing nanocharacterization experiments and writing up the results. Undergraduates register for 161 for 4 units; graduates register for 171 for 3 units.

Same as: MATSCI 171

**MATSCI 162. X-Ray Diffraction Laboratory. 3-4 Units.**

Experimental x-ray diffraction techniques for microstructural analysis of materials, emphasizing powder and single-crystal techniques. Diffraction from epitaxial and polycrystalline thin films, multilayers, and amorphous materials using medium and high resolution configurations. Determination of phase purity, crystallinity, relaxation, stress, and texture in the materials. Advanced experimental x-ray diffraction techniques: reciprocal lattice mapping, reflectivity, and grazing incidence diffraction. Enrollment limited to 20. Undergraduates register for 162 for 4 units; graduates register for 172 for 3 units.

Same as: MATSCI 172, PHOTON 172

**MATSCI 163. Mechanical Behavior Laboratory. 3-4 Units.**

Experimental techniques for the study of the mechanical behavior of engineering materials in bulk and thin film form, including tension testing, nanoindentation, and wafer curvature stress analysis. Metallic and polymeric systems. Prerequisite: ENGR 50. Undergraduates register for 163 in 4 units; graduates register in 173 for 3 units.

Same as: MATSCI 173

**MATSCI 164. Electronic and Photonic Materials and Devices Laboratory. 3-4 Units.**

Lab course. Current electronic and photonic materials and devices. Device physics and micro-fabrication techniques. Students design, fabricate, and perform physical characterization on the devices they have fabricated. Established techniques and materials such as photolithography, metal evaporation, and Si technology; and novel ones such as soft lithography and organic semiconductors. Prerequisite: 152 or 199 or consent of instructor. Undergraduates register in 164 for 4 units; graduates register in 174 for 3 units.

Same as: MATSCI 174

**MATSCI 165. Nanoscale Materials Physics Computation Laboratory. 3-4 Units.**

Computational exploration of fundamental topics in materials science using Java-based computation and visualization tools. Emphasis is on the atomic-scale origins of macroscopic materials phenomena. Simulation methods include molecular dynamics and Monte Carlo with applications in thermodynamics, kinetics, and topics in statistical mechanics. Required prerequisites: Freshman-level physics, undergraduate thermodynamics. Undergraduates register for 165 for 4 units; graduates register for 175 for 3 units.

Same as: MATSCI 175

**MATSCI 171. Nanocharacterization Laboratory. 3-4 Units.**

Students use optical microscopy, x-ray diffraction, scanning electron microscopy, x-ray photoelectron spectroscopy, atomic force microscopy and other techniques to characterize recently discovered perovskite semiconductors that can be used to make highly efficient solar cells. This course fulfills the Writing in the Major Requirement for MSE undergrads. Instruction on writing, statistics, generating effective plots with curve fits, using databases to find information and giving oral scientific presentations is given. Instruction on characterization techniques is provided, but it is expected that the students will have already taken a course like MATSCI 153 that covers the fundamentals of the techniques.

The emphasis on this course is on doing nanocharacterization experiments and writing up the results. Undergraduates register for 161 for 4 units; graduates register for 171 for 3 units.

Same as: MATSCI 161

**MATSCI 172. X-Ray Diffraction Laboratory. 3-4 Units.**

Experimental x-ray diffraction techniques for microstructural analysis of materials, emphasizing powder and single-crystal techniques. Diffraction from epitaxial and polycrystalline thin films, multilayers, and amorphous materials using medium and high resolution configurations. Determination of phase purity, crystallinity, relaxation, stress, and texture in the materials. Advanced experimental x-ray diffraction techniques: reciprocal lattice mapping, reflectivity, and grazing incidence diffraction. Enrollment limited to 20. Undergraduates register for 162 for 4 units; graduates register for 172 for 3 units.

Same as: MATSCI 162, PHOTON 172

**MATSCI 173. Mechanical Behavior Laboratory. 3-4 Units.**

Experimental techniques for the study of the mechanical behavior of engineering materials in bulk and thin film form, including tension testing, nanoindentation, and wafer curvature stress analysis. Metallic and polymeric systems. Prerequisite: ENGR 50. Undergraduates register for 163 in 4 units; graduates register in 173 for 3 units.

Same as: MATSCI 163

**MATSCI 174. Electronic and Photonic Materials and Devices Laboratory. 3-4 Units.**

Lab course. Current electronic and photonic materials and devices. Device physics and micro-fabrication techniques. Students design, fabricate, and perform physical characterization on the devices they have fabricated. Established techniques and materials such as photolithography, metal evaporation, and Si technology; and novel ones such as soft lithography and organic semiconductors. Prerequisite: 152 or 199 or consent of instructor. Undergraduates register in 164 for 4 units; graduates register in 174 for 3 units.

Same as: MATSCI 164

**MATSCI 175. Nanoscale Materials Physics Computation Laboratory. 3-4 Units.**

Computational exploration of fundamental topics in materials science using Java-based computation and visualization tools. Emphasis is on the atomic-scale origins of macroscopic materials phenomena. Simulation methods include molecular dynamics and Monte Carlo with applications in thermodynamics, kinetics, and topics in statistical mechanics. Required prerequisites: Freshman-level physics, undergraduate thermodynamics. Undergraduates register for 165 for 4 units; graduates register for 175 for 3 units.

Same as: MATSCI 165

**MATSCI 190. Organic and Biological Materials. 3-4 Units.**

Unique physical and chemical properties of organic materials and their uses. The relationship between structure and physical properties, and techniques to determine chemical structure and molecular ordering. Examples include liquid crystals, dendrimers, carbon nanotubes, hydrogels, and biopolymers such as lipids, protein, and DNA. Prerequisite: Thermodynamics and ENGR 50 or equivalent. Undergraduates register for 190 for 4 units; graduates register for 210 for 3 units.

Same as: MATSCI 210

**MATSCI 192. Materials Chemistry. 3-4 Units.**

An introduction to the fundamental physical chemical principles underlying materials properties. Beginning from basic quantum chemistry, students will learn how the electronic configuration of molecules and solids impacts their structure, stability/reactivity, and spectra. Topics for the course include molecular symmetry, molecular orbital theory, solid-state chemistry, coordination compounds, and nanomaterials chemistry. Using both classroom lectures and journal discussions, students will gain an understanding of and be well-positioned to contribute to the frontiers of materials chemistry, ranging from solar-fuel generation to next-generation cancer treatments. Undergraduates register in 192 for 4 units; graduates register in 202 for 3 units.

Same as: MATSCI 202

**MATSCI 193. Atomic Arrangements in Solids. 3-4 Units.**

Atomic arrangements in perfect and imperfect solids, especially important metals, ceramics, and semiconductors. Elements of formal crystallography, including development of point groups and space groups. Undergraduates register in 193 for 4 units; graduates register in 203 for 3 units.

Same as: MATSCI 203

**MATSCI 194. Thermodynamics and Phase Equilibria. 3-4 Units.**

The principles of heterogeneous equilibria and their application to phase diagrams. Thermodynamics of solutions; chemical reactions; non-stoichiometry in compounds; first order phase transitions and metastability; thermodynamics of surfaces, elastic solids, dielectrics, and magnetic solids. Undergraduates register for 194 for 4 units; graduates register for 204 for 3 units.

Same as: MATSCI 204

**MATSCI 195. Waves and Diffraction in Solids. 3-4 Units.**

The elementary principals of x-ray, vibrational, and electron waves in solids. Basic wave behavior including Fourier analysis, interference, diffraction, and polarization. Examples of wave systems, including electromagnetic waves from Maxwell's equations. Diffracted intensity in reciprocal space and experimental techniques such as electron and x-ray diffraction. Lattice vibrations in solids, including vibrational modes, dispersion relationship, density of states, and thermal properties. Free electron model. Basic quantum mechanics and statistical mechanics including Fermi-Dirac and Bose-Einstein statistics. Prerequisite: 193/203 or consent of instructor. Undergraduates register for 195 for 4 units; graduates register for 205 for 3 units.

Same as: MATSCI 205, PHOTON 205

**MATSCI 196. Defects in Crystalline Solids. 3-4 Units.**

Thermodynamic and kinetic behaviors of 0-D (point), 1-D (line), and 2-D (interface and surface) defects in crystalline solids. Influences of these defects on the macroscopic ionic, electronic, and catalytic properties of materials, such as batteries, fuel cells, catalysts, and memory-storage devices. Prerequisite: 193/203. Undergraduates register for 196 for 4 units; graduates register for 206 for 3 units.

Same as: MATSCI 206

**MATSCI 197. Rate Processes in Materials. 3-4 Units.**

Diffusion and phase transformations in solids. Diffusion topics: Fick's laws, atomic theory of diffusion, and diffusion in alloys. Phase transformation topics: nucleation, growth, diffusional transformations, spinodal decomposition, and interface phenomena. Material builds on the mathematical, thermodynamic, and statistical mechanical foundations in the prerequisites. Prerequisites: 194/204. Undergraduates register for 197 for 4 units; graduates register for 207 for 3 units. Same as: MATSCI 207

**MATSCI 198. Mechanical Properties of Materials. 3-4 Units.**

Introduction to the mechanical behavior of solids, emphasizing the relationships between microstructure and mechanical properties. Elastic, anelastic, and plastic properties of materials. The relations between stress, strain, strain rate, and temperature for plastically deformable solids. Application of dislocation theory to strengthening mechanisms in crystalline solids. The phenomena of creep, fracture, and fatigue and their controlling mechanisms. Prerequisites: 193/203. Undergraduates register for 198 for 4 units; graduates register for 208 for 3 units. Same as: MATSCI 208

**MATSCI 199. Electronic and Optical Properties of Solids. 3-4 Units.**

The concepts of electronic energy bands and transports applied to metals, semiconductors, and insulators. The behavior of electronic and optical devices including p-n junctions, MOS-capacitors, MOSFETs, optical waveguides, quantum-well lasers, light amplifiers, and metallo-dielectric light guides. Emphasis is on relationships between structure and physical properties. Elementary quantum and statistical mechanics concepts are used. Prerequisite: 195/205 or equivalent. Undergraduates register for 199 for 4 units; graduates register for 209 for 3 units. Same as: MATSCI 209

**MATSCI 200. Master's Research. 1-15 Unit.**

Participation in a research project.

**MATSCI 202. Materials Chemistry. 3-4 Units.**

An introduction to the fundamental physical chemical principles underlying materials properties. Beginning from basic quantum chemistry, students will learn how the electronic configuration of molecules and solids impacts their structure, stability/reactivity, and spectra. Topics for the course include molecular symmetry, molecular orbital theory, solid-state chemistry, coordination compounds, and nanomaterials chemistry. Using both classroom lectures and journal discussions, students will gain an understanding of and be well-positioned to contribute to the frontiers of materials chemistry, ranging from solar-fuel generation to next-generation cancer treatments. Undergraduates register in 192 for 4 units; graduates register in 202 for 3 units. Same as: MATSCI 192

**MATSCI 203. Atomic Arrangements in Solids. 3-4 Units.**

Atomic arrangements in perfect and imperfect solids, especially important metals, ceramics, and semiconductors. Elements of formal crystallography, including development of point groups and space groups. Undergraduates register in 193 for 4 units; graduates register in 203 for 3 units. Same as: MATSCI 193

**MATSCI 204. Thermodynamics and Phase Equilibria. 3-4 Units.**

The principles of heterogeneous equilibria and their application to phase diagrams. Thermodynamics of solutions; chemical reactions; non-stoichiometry in compounds; first order phase transitions and metastability; thermodynamics of surfaces, elastic solids, dielectrics, and magnetic solids. Undergraduates register for 194 for 4 units; graduates register for 204 for 3 units. Same as: MATSCI 194

**MATSCI 205. Waves and Diffraction in Solids. 3-4 Units.**

The elementary principals of x-ray, vibrational, and electron waves in solids. Basic wave behavior including Fourier analysis, interference, diffraction, and polarization. Examples of wave systems, including electromagnetic waves from Maxwell's equations. Diffracted intensity in reciprocal space and experimental techniques such as electron and x-ray diffraction. Lattice vibrations in solids, including vibrational modes, dispersion relationship, density of states, and thermal properties. Free electron model. Basic quantum mechanics and statistical mechanics including Fermi-Dirac and Bose-Einstein statistics. Prerequisite: 193/203 or consent of instructor. Undergraduates register for 195 for 4 units; graduates register for 205 for 3 units. Same as: MATSCI 195, PHOTON 205

**MATSCI 206. Defects in Crystalline Solids. 3-4 Units.**

Thermodynamic and kinetic behaviors of 0-D (point), 1-D (line), and 2-D (interface and surface) defects in crystalline solids. Influences of these defects on the macroscopic ionic, electronic, and catalytic properties of materials, such as batteries, fuel cells, catalysts, and memory-storage devices. Prerequisite: 193/203. Undergraduates register for 196 for 4 units; graduates register for 206 for 3 units. Same as: MATSCI 196

**MATSCI 207. Rate Processes in Materials. 3-4 Units.**

Diffusion and phase transformations in solids. Diffusion topics: Fick's laws, atomic theory of diffusion, and diffusion in alloys. Phase transformation topics: nucleation, growth, diffusional transformations, spinodal decomposition, and interface phenomena. Material builds on the mathematical, thermodynamic, and statistical mechanical foundations in the prerequisites. Prerequisites: 194/204. Undergraduates register for 197 for 4 units; graduates register for 207 for 3 units. Same as: MATSCI 197

**MATSCI 208. Mechanical Properties of Materials. 3-4 Units.**

Introduction to the mechanical behavior of solids, emphasizing the relationships between microstructure and mechanical properties. Elastic, anelastic, and plastic properties of materials. The relations between stress, strain, strain rate, and temperature for plastically deformable solids. Application of dislocation theory to strengthening mechanisms in crystalline solids. The phenomena of creep, fracture, and fatigue and their controlling mechanisms. Prerequisites: 193/203. Undergraduates register for 198 for 4 units; graduates register for 208 for 3 units. Same as: MATSCI 198

**MATSCI 209. Electronic and Optical Properties of Solids. 3-4 Units.**

The concepts of electronic energy bands and transports applied to metals, semiconductors, and insulators. The behavior of electronic and optical devices including p-n junctions, MOS-capacitors, MOSFETs, optical waveguides, quantum-well lasers, light amplifiers, and metallo-dielectric light guides. Emphasis is on relationships between structure and physical properties. Elementary quantum and statistical mechanics concepts are used. Prerequisite: 195/205 or equivalent. Undergraduates register for 199 for 4 units; graduates register for 209 for 3 units. Same as: MATSCI 199

**MATSCI 210. Organic and Biological Materials. 3-4 Units.**

Unique physical and chemical properties of organic materials and their uses. The relationship between structure and physical properties, and techniques to determine chemical structure and molecular ordering. Examples include liquid crystals, dendrimers, carbon nanotubes, hydrogels, and biopolymers such as lipids, protein, and DNA. Prerequisite: Thermodynamics and ENGR 50 or equivalent. Undergraduates register for 190 for 4 units; graduates register for 210 for 3 units. Same as: MATSCI 190

**MATSCI 230. Materials Science Colloquium. 1 Unit.**

May be repeated for credit.

**MATSCI 251. Microstructure and Mechanical Properties. 3-4 Units.**

Primarily for students without a materials background. Mechanical properties and their dependence on microstructure in a range of engineering materials. Elementary deformation and fracture concepts, strengthening and toughening strategies in metals and ceramics. Topics: dislocation theory, mechanisms of hardening and toughening, fracture, fatigue, and high-temperature creep. Prerequisite: MATSCI 163. Undergraduates register in 151 for 4 units; graduates register for 251 in 3 units.

Same as: MATSCI 151

**MATSCI 256. Solar Cells, Fuel Cells, and Batteries: Materials for the Energy Solution. 3-4 Units.**

Operating principles and applications of emerging technological solutions to the energy demands of the world. The scale of global energy usage and requirements for possible solutions. Basic physics and chemistry of solar cells, fuel cells, and batteries. Performance issues, including economics, from the ideal device to the installed system. The promise of materials research for providing next generation solutions. Undergraduates register in 156 for 4 units; graduates register in 256 for 3 units.

Same as: EE 293A, ENERGY 293A, MATSCI 156

**MATSCI 299. Practical Training. 1 Unit.**

Educational opportunities in high-technology research and development labs in industry. Qualified graduate students engage in internship work and integrate that work into their academic program. Following the internship, students complete a research report outlining their work activity, problems investigated, key results, and any follow-on projects they expect to perform. Student is responsible for arranging own employment. See department student services manager before enrolling.

**MATSCI 300. Ph.D. Research. 1-15 Unit.**

Participation in a research project.

**MATSCI 302. Solar Cells. 3 Units.**

This course takes a comprehensive view of solar cells and what will need to be done to enable them to substantially change how the world obtains its electricity. After covering the fundamentals (light trapping, current flow in pn junctions, recombination) that are important for almost all photovoltaic technologies, the course will address technologies based on highly crystalline forms of silicon and gallium arsenide. The device simulator PC1D will be used to model solar cells. The course will then go through multijunction cells with concentrators, low-cost thin-film solar cells, organic semiconductors, hybrid perovskites and nanowires. There will be discussions of module design and the economics of the solar industry. There will be a tour of a company that makes solar cells and guest lectures.

**MATSCI 303. Principles, Materials and Devices of Batteries. 3 Units.**

Thermodynamics and electrochemistry for batteries. Emphasis on lithium ion batteries, but also different types including lead acid, nickel metal hydride, metal air, sodium sulfur and redox flow. Battery electrode materials, electrolytes, separators, additives and electrode-electrolyte interface. Electrochemical techniques; advanced battery materials with nanotechnology; battery device structure. Prerequisites: undergraduate chemistry.

**MATSCI 311. Lasers in Materials Processing. 3 Units.**

Principles of laser operation. Optically and electrically pumped lasers. Materials for solid-state lasers. Fundamentals of laser/materials interactions. Applications in thin film technology and microfabrication; laser annealing of defects and crystallization of amorphous films. Laser-induced shock waves. Extreme non-equilibrium laser processing; ultra-fast (femtosecond) lasers and their novel uses; micro- and nanofabrication of fluidic and photonic devices; intracellular nanosurgery.

**MATSCI 312. New Methods in Thin Film Synthesis. 3 Units.**

Materials base for engineering new classes of coatings and devices. Techniques to grow thin films at atomic scale and to fabricate multilayers/superlattices at nanoscale. Vacuum growth techniques including evaporation, molecular beam epitaxy (MBE), sputtering, ion beam assisted deposition, laser ablation, chemical vapor deposition (CVD), and electroplating. Future direction of material synthesis such as nanocluster deposition and nanoparticles self-assembly. Relationships between deposition parameters and film properties. Applications of thin film synthesis in microelectronics, nanotechnology, and biology. SCPD offering.

**MATSCI 316. Nanoscale Science, Engineering, and Technology. 3 Units.**

This course covers important aspects of nanotechnology in nanomaterials synthesis and fabrication, novel property at the nanoscale, tools and applications: a variety of nanostructures including nanocrystal, nanowire, carbon nanotube, graphene, nanoporous material, block copolymer, and self-assembled monolayer; nanofabrication techniques developed over the past 20 years; thermodynamic, electronic and optical property; applications in solar cells, batteries, biosensors and electronics. Other nanotechnology topics may be explored through a group project. SCPD offering.

**MATSCI 320. Nanocharacterization of Materials. 3 Units.**

Current methods of directly examining the microstructure of materials. Topics: optical microscopy, scanning electron and focused ion beam microscopy, field ion microscopy, transmission electron microscopy, scanning probe microscopy, and microanalytical surface science methods. Emphasis is on the electron-optical techniques. Recommended: 193/203.

**MATSCI 321. Transmission Electron Microscopy. 3 Units.**

Image formation and interpretation. The contrast phenomena associated with perfect and imperfect crystals from a physical point of view and from a formal treatment of electron diffraction theory. The importance of electron diffraction to systematic analysis and recent imaging developments. Recommended: 193/203, 195/205, or equivalent.

**MATSCI 322. Transmission Electron Microscopy Laboratory. 3 Units.**

Practical techniques in transmission electron microscopy (TEM): topics include microscope operation and alignment, diffraction modes and analysis, bright-field/dark-field imaging, high resolution and aberration corrected imaging, scanning TEM (STEM) imaging, x-ray energy dispersive spectrometry (EDS) and electron energy loss spectrometry (EELS) for compositional analysis and mapping. Prerequisite: 321, consent of instructor. Enrollment limited to 12.

**MATSCI 323. Thin Film and Interface Microanalysis. 3 Units.**

The science and technology of microanalytical techniques, including Auger electron spectroscopy (AES), Rutherford backscattering spectroscopy (RBS), secondary ion mass spectroscopy (SIMS), ion scattering spectroscopy (ISS), and x-ray photoelectron spectroscopy (XPS or ESCA). Generic processes such as sputtering and high-vacuum generation. Prerequisite: some prior exposure to atomic and electronic structure of solids. SCPD offering.

**MATSCI 326. X-Ray Science and Techniques. 3 Units.**

X-ray interaction with matter; diffraction from ordered and disordered materials; x-ray absorption, photoemission, and coherent scattering; x-ray microscopy. Sources including synchrotrons, high harmonic generation, x-ray lasers. Time-resolved techniques and detector technology.

Same as: PHOTON 326

**MATSCI 331. Atom-based computational methods for materials. 3 Units.**

Introduction to atom-based computational methods for materials with emphasis on quantum methods. Topics include density functional theory, tight-binding and empirical approaches. Computation of optical, electronic, phonon properties. Bulk materials, interfaces, nanostructures. Molecular dynamics. Prerequisites - undergraduate quantum mechanics.

**MATSCI 343. Organic Semiconductors for Electronics and Photonics. 3 Units.**

The science of organic semiconductors and their use in electronic and photonic devices. Topics: methods for fabricating thin films and devices; relationship between chemical structure and molecular packing on properties such as band gap, charge carrier mobility and luminescence efficiency; doping; field-effect transistors; light-emitting diodes; lasers; biosensors; photodetectors and photovoltaic cells.

**MATSCI 346. Nanophotonics. 3 Units.**

Recent developments in micro- and nanophotonic materials and devices. Basic concepts of photonic crystals. Integrated photonic circuits. Photonic crystal fibers. Superprism effects. Optical properties of metallic nanostructures. Sub-wavelength phenomena and plasmonic excitations. Meta-materials. Prerequisite: Electromagnetic theory at the level of 242. Same as: EE 336

**MATSCI 347. Introduction to Magnetism and Magnetic Nanostructures. 3 Units.**

Atomic origins of magnetic moments, magnetic exchange and ferromagnetism, types of magnetic order, magnetic anisotropy, domains, domain walls, hysteresis loops, hard and soft magnetic materials, demagnetization factors, and applications of magnetic materials, especially magnetic nanostructures and nanotechnology. Tools include finite-element and micromagnetic modeling. Design topics include electromagnet and permanent magnet, electronic article surveillance, magnetic inductors, bio-magnetic sensors, and magnetic drug delivery. Design projects, team work, and computer-aided design. Prerequisites: PHYSICS 29 and 43, or college-level electricity and magnetism.

**MATSCI 353. Mechanical Properties of Thin Films. 3 Units.**

The mechanical properties of thin films on substrates. The mechanics of thin films and of the atomic processes which cause stresses to develop during thin film growth. Experimental techniques for studying stresses in and mechanical properties of thin films. Elastic, plastic, and diffusional deformation of thin films on substrates as a function of temperature and microstructure. Effects of deformation and fracture on the processing of thin film materials. Prerequisite: 198/208.

**MATSCI 358. Fracture and Fatigue of Materials and Thin Film Structures. 3 Units.**

Linear-elastic and elastic-plastic fracture mechanics from a materials science perspective, emphasizing microstructure and the micromechanisms of fracture. Plane strain fracture toughness and resistance curve behavior. Mechanisms of failure associated with cohesion and adhesion in bulk materials, composites, and thin film structures. Fracture mechanics approaches to toughening and subcritical crack-growth processes, with examples and applications involving cyclic fatigue and environmentally assisted subcritical crack growth. Prerequisite: 151/251, 198/208, or equivalent. SCPD offering.

**MATSCI 359. Crystalline Anisotropy. 3 Units.**

Matrix and tensor analysis with applications to the effects of crystal symmetry on elastic deformation, thermal expansion, diffusion, piezoelectricity, magnetism, thermodynamics, and optical properties of solids, on the level of J. F. Nye's *Physical Properties of Crystals*. Homework sets use Mathematica.

**MATSCI 380. Nano-Biotechnology. 3 Units.**

Literature based. Principles that make nanoscale materials unique, applications to biology, and how biological systems can create nanomaterials. Molecular sensing, drug delivery, bio-inspired synthesis, self-assembling systems, and nanomaterial based therapies. Interactions at the nanoscale. Applications and opportunities for new technology.

**MATSCI 381. Biomaterials in Regenerative Medicine. 3 Units.**

Materials design and engineering for regenerative medicine. How materials interact with cells through their micro- and nanostructure, mechanical properties, degradation characteristics, surface chemistry, and biochemistry. Examples include novel materials for drug and gene delivery, materials for stem cell proliferation and differentiation, and tissue engineering scaffolds. Prerequisites: undergraduate chemistry, and cell/molecular biology or biochemistry.

Same as: BIOE 361

**MATSCI 382. Biochips and Medical Imaging. 3 Units.**

The course covers state-of-the-art and emerging bio-sensors, bio-chips, imaging modalities, and nano-therapies which will be studied in the context of human physiology including the nervous system, circulatory system and immune system. Medical diagnostics will be divided into bio-chips (in-vitro diagnostics) and medical and molecular imaging (in-vivo imaging). In-depth discussion on cancer and cardiovascular diseases and the role of diagnostics and nano-therapies.

Same as: EE 225, SBIO 225

**MATSCI 399. Graduate Independent Study. 1-10 Unit.**

Under supervision of a faculty member.

**MATSCI 400. Participation in Materials Science Teaching. 1-3 Unit.**

May be repeated for credit.

**MATSCI 801. TGR Project for MS Students. 0 Units.**

.

**MATSCI 802. TGR Dissertation for Ph.D Students. 0 Units.**

.

**Mathematical & Computational Science Courses****MCS 100. Mathematics of Sports. 3 Units.**

The use of mathematics, statistics, and probability in the analysis of sports performance, sports records, and strategy. Topics include mathematical analysis of the physics of sports and the determinations of optimal strategies. New diagnostic statistics and strategies for each sport. Corequisite: STATS 60, 110 or 116.

Same as: STATS 50

**Mathematics Courses****MATH 16. Mathematics in the Real World. 3 Units.**

Introduction to non-calculus applications of mathematical ideas and principles in real-world problems. Topics include probability and counting, basic statistical concepts, geometric series. Applications include insurance, gambler's ruin, false positives in disease testing, present value of money, and mortgages. No knowledge of calculus required. Enrollment limited to students who do not have Stanford credit for a high school or college course in calculus or statistics.

Same as: STATS 90

**MATH 19. Calculus. 3 Units.**

Introduction to differential calculus of functions of one variable. Topics: review of elementary functions including exponentials and logarithms, limits, rates of change, the derivative, and applications. Math 19, 20, and 21 cover the same material as Math 41 and 42, but in three quarters rather than two. Prerequisites: precalculus, including trigonometry, advanced algebra, and analysis of elementary functions.

**MATH 20. Calculus. 3 Units.**

Continuation of 19. Applications of differential calculus; introduction to integral calculus of functions of one variable, including: the definite integral, methods of symbolic and numerical integration, applications of the definite integral. Prerequisites: 19 or equivalent.

**MATH 21. Calculus. 4 Units.**

Continuation of 20. Applications of integral calculus, introduction to differential equations, infinite series. Prerequisite: 20 or equivalent.

**MATH 41. Calculus. 5 Units.**

Introduction to differential and integral calculus of functions of one variable. Topics: limits, rates of change, the derivative and applications, introduction to the definite integral and integration. Math 41 and 42 cover the same material as Math 19-20-21, but in two quarters rather than three. Prerequisites: trigonometry, advanced algebra, and analysis of elementary functions, including exponentials and logarithms. Same as: Accelerated

**MATH 41A. Calculus ACE. 6 Units.**

Students attend MATH 41 lectures with different recitation sessions, four hours instead of two, emphasizing engineering applications. Prerequisite: application; see <http://soe.stanford.edu/edp/programs/ace.html>.

**MATH 42. Calculus. 5 Units.**

Continuation of 41. Methods of symbolic and numerical integration, applications of the definite integral, introduction to differential equations, infinite series. Prerequisite: 41 or equivalent. Same as: Accelerated

**MATH 42A. Calculus ACE. 6 Units.**

Students attend MATH 42 lectures with different recitation sessions, four hours instead of two, emphasizing engineering applications. Prerequisite: application; see <http://soe.stanford.edu/edp/programs/ace.html>.

**MATH 51. Linear Algebra and Differential Calculus of Several Variables. 5 Units.**

Geometry and algebra of vectors, systems of linear equations, matrices and linear transformations, diagonalization and eigenvectors, vector valued functions and functions of several variables, parametric curves, partial derivatives and gradients, the derivative as a matrix, chain rule in several variables, constrained and unconstrained optimization. Prerequisite: 21, or 42, or a score of 4 on the BC Advanced Placement exam or 5 on the AB Advanced Placement exam, or consent of instructor.

**MATH 51A. Linear Algebra and Differential Calculus of Several Variables, ACE. 6 Units.**

Students attend MATH 51 lectures with different recitation sessions: four hours per week instead of two, emphasizing engineering applications. Prerequisite: application; see <http://soe.stanford.edu/edp/programs/ace.html>.

**MATH 51H. Honors Multivariable Mathematics. 5 Units.**

For prospective Mathematics majors in the honors program and students from other areas of science or engineering who have a strong mathematics background. Three quarter sequence covers the material of 51, 52, 53, and additional advanced calculus and ordinary and partial differential equations. Unified treatment of multivariable calculus, linear algebra, and differential equations with a different order of topics and emphasis from standard courses. Students should know one-variable calculus and have an interest in a theoretical approach to the subject. Prerequisite: score of 5 on BC Advanced Placement exam, or consent of instructor.

**MATH 51M. Introduction to MATLAB for Multivariable Mathematics. 1 Unit.**

This class complements MATH51 by exploring computational aspects of linear algebra and multivariable differential calculus using MATLAB. There are three goals for this course. First, this course provides a gentle introduction to MATLAB and scientific programming. Second, this course explains how to use MATLAB to solve problems in linear algebra and multivariable differential calculus encountered in MATH51. Finally, this course explains how certain key algorithms from MATH51 are implemented quickly and efficiently by commonly used scientific computing packages. Each class consists of a short lecture followed by an in-class on-laptop activity.

**MATH 52. Integral Calculus of Several Variables. 5 Units.**

Iterated integrals, line and surface integrals, vector analysis with applications to vector potentials and conservative vector fields, physical interpretations. Divergence theorem and the theorems of Green, Gauss, and Stokes. Prerequisite: 51 and 42 or equivalents.

**MATH 52H. Honors Multivariable Mathematics. 5 Units.**

Continuation of 51H. Prerequisite: 51H.

**MATH 53. Ordinary Differential Equations with Linear Algebra. 5 Units.**

Ordinary differential equations and initial value problems, systems of linear differential equations with constant coefficients, applications of second-order equations to oscillations, matrix exponentials, Laplace transforms, stability of non-linear systems and phase plane analysis, numerical methods. Prerequisite: 51 and 42 or equivalents.

**MATH 53H. Honors Multivariable Mathematics. 5 Units.**

Continuation of 52H. Prerequisite: 52H.

**MATH 70SI. The Game of Go: Strategy, Theory, and History. 1 Unit.**

Strategy and mathematical theories of the game of Go, with guest appearance by a professional Go player.

**MATH 80Q. Capillary Surfaces: Explored and Unexplored Territory. 3 Units.**

Preference to sophomores. Capillary surfaces: the interfaces between fluids that are adjacent to each other and do not mix. Recently discovered phenomena, predicted mathematically and subsequently confirmed by experiments, some done in space shuttles. Interested students may participate in ongoing investigations with affinity between mathematics and physics.

**MATH 87Q. Mathematics of Knots, Braids, Links, and Tangles. 3 Units.**

Preference to sophomores. Types of knots and how knots can be distinguished from one another by means of numerical or polynomial invariants. The geometry and algebra of braids, including their relationships to knots. Topology of surfaces. Brief summary of applications to biology, chemistry, and physics.

**MATH 101. Math Discovery Lab. 3 Units.**

MDL is a discovery-based project course in mathematics. Students work independently in small groups to explore open-ended mathematical problems and discover original mathematics. Students formulate conjectures and hypotheses; test predictions by computation, simulation, or pure thought; and present their results to classmates. No lecture component; in-class meetings reserved for student presentations, attendance mandatory. Admission is by application: <http://math101.stanford.edu>. Motivated students with any level of mathematical background are encouraged to apply. WIM.

**MATH 104. Applied Matrix Theory. 3 Units.**

Linear algebra for applications in science and engineering: orthogonality, projections, the four fundamental subspaces of a matrix, spectral theory for symmetric matrices, the singular value decomposition, the QR decomposition, least-squares, the condition number of a matrix, algorithms for solving linear systems. (Math 113 offers a more theoretical treatment.) Prerequisites: MATH 51 and MATH 52 or 53.

**MATH 106. Functions of a Complex Variable. 3 Units.**

Complex numbers, analytic functions, Cauchy-Riemann equations, complex integration, Cauchy integral formula, residues, elementary conformal mappings. (Math 116 offers a more theoretical treatment.) Prerequisite: 52.

**MATH 107. Graph Theory. 3 Units.**

An introductory course in graph theory establishing fundamental concepts and results in variety of topics. Topics include: basic notions, connectivity, cycles, matchings, planar graphs, graph coloring, matrix-tree theorem, conditions for hamiltonicity, Kuratowski's theorem, Ramsey and Turan-type theorem. Prerequisites: 51 or equivalent and some familiarity with proofs is required.

**MATH 108. Introduction to Combinatorics and Its Applications. 3 Units.**

Topics: graphs, trees (Cayley's Theorem, application to phylogony), eigenvalues, basic enumeration (permutations, Stirling and Bell numbers), recurrences, generating functions, basic asymptotics. Prerequisites: 51 or equivalent.

**MATH 109. Applied Group Theory. 3 Units.**

Applications of the theory of groups. Topics: elements of group theory, groups of symmetries, matrix groups, group actions, and applications to combinatorics and computing. Applications: rotational symmetry groups, the study of the Platonic solids, crystallographic groups and their applications in chemistry and physics. Honors math majors and students who intend to do graduate work in mathematics should take 120. WIM.

**MATH 110. Applied Number Theory and Field Theory. 3 Units.**

Number theory and its applications to modern cryptography. Topics: congruences, finite fields, primality testing and factorization, public key cryptography, error correcting codes, and elliptic curves, emphasizing algorithms. WIM.

**MATH 113. Linear Algebra and Matrix Theory. 3 Units.**

Algebraic properties of matrices and their interpretation in geometric terms. The relationship between the algebraic and geometric points of view and matters fundamental to the study and solution of linear equations. Topics: linear equations, vector spaces, linear dependence, bases and coordinate systems; linear transformations and matrices; similarity; eigenvectors and eigenvalues; diagonalization. (Math 104 offers a more application-oriented treatment.)

**MATH 114. Introduction to Scientific Computing. 3-4 Units.**

Introduction to Scientific Computing Numerical computation for mathematical, computational, physical sciences and engineering: error analysis, floating-point arithmetic, nonlinear equations, numerical solution of systems of algebraic equations, banded matrices, least squares, unconstrained optimization, polynomial interpolation, numerical differentiation and integration, numerical solution of ordinary differential equations, truncation error, numerical stability for time dependent problems and stiffness. Implementation of numerical methods in MATLAB programming assignments. Prerequisites: MATH 51, 52, 53; prior programming experience (MATLAB or other language at level of CS 106A or higher). Graduate students should take it for 3 units and undergraduate students should take it for 4 units. Same as: CME 108

**MATH 115. Functions of a Real Variable. 3 Units.**

The development of real analysis in Euclidean space: sequences and series, limits, continuous functions, derivatives, integrals. Basic point set topology. Honors math majors and students who intend to do graduate work in mathematics should take 171. Prerequisite: 51.

**MATH 116. Complex Analysis. 3 Units.**

Analytic functions, Cauchy integral formula, power series and Laurent series, calculus of residues and applications, conformal mapping, analytic continuation, introduction to Riemann surfaces, Fourier series and integrals. (Math 106 offers a less theoretical treatment.) Prerequisites: 52, and 115 or 171.

**MATH 118. Mathematics of Computation. 3 Units.**

Notions of analysis and algorithms central to modern scientific computing: continuous and discrete Fourier expansions, the fast Fourier transform, orthogonal polynomials, interpolation, quadrature, numerical differentiation, analysis and discretization of initial-value and boundary-value ODE, finite and spectral elements. Prerequisites: MATH 51 and 53.

**MATH 120. Groups and Rings. 3 Units.**

Recommended for Mathematics majors and required of honors Mathematics majors. Similar to 109 but altered content and more theoretical orientation. Groups acting on sets, examples of finite groups, Sylow theorems, solvable and simple groups. Fields, rings, and ideals; polynomial rings over a field; PID and non-PID. Unique factorization domains. WIM.

**MATH 121. Galois Theory. 3 Units.**

Field of fractions, splitting fields, separability, finite fields. Galois groups, Galois correspondence, examples and applications. Prerequisite: Math 120 and (also recommended) 113.

**MATH 122. Modules and Group Representations. 3 Units.**

Modules over PID. Tensor algebra. Group representations and group rings. Maschke's theorem and character theory. Character tables, construction of representations. Prerequisite: Math 120. Also recommended: 113.

**MATH 131P. Partial Differential Equations I. 3 Units.**

An introduction to PDE; particularly suitable for non-Math majors. Topics include physical examples of PDE's, method of characteristics, D'Alembert's formula, maximum principles, heat kernel, Duhamel's principle, separation of variables, Fourier series, Harmonic functions, Bessel functions, spherical harmonics. Students who have taken MATH 171 should consider taking MATH 173 rather than 131p. Prerequisite: 53.

**MATH 132. Partial Differential Equations II. 3 Units.**

Laplace's equation and properties of harmonic functions. Green's functions. Distributions and Fourier transforms. Eigenvalue problems and generalized Fourier series. Numerical solutions. Prerequisite: 131P.

**MATH 136. Stochastic Processes. 3 Units.**

Introduction to measure theory,  $L_p$  spaces and Hilbert spaces. Random variables, expectation, conditional expectation, conditional distribution. Uniform integrability, almost sure and  $L_p$  convergence. Stochastic processes: definition, stationarity, sample path continuity. Examples: random walk, Markov chains, Gaussian processes, Poisson processes, Martingales. Construction and basic properties of Brownian motion. Prerequisite: STATS 116 or MATH 151 or equivalent. Recommended: MATH 115 or equivalent. Same as: STATS 219

**MATH 137. Mathematical Methods of Classical Mechanics. 3 Units.**

Newtonian mechanics. Lagrangian formalism. E. Noether's theorem. Oscillations. Rigid bodies. Introduction to symplectic geometry. Hamiltonian formalism. Legendre transform. Variational principles. Geometric optics. Introduction to the theory of integrable systems. Prerequisites: 51, 52, 53, or 51H, 52H, 53H.

**MATH 138. Celestial Mechanics. 3 Units.**

Mathematically rigorous introduction to the classical N-body problem: the motion of N particles evolving according to Newton's law. Topics include: the Kepler problem and its symmetries; other central force problems; conservation theorems; variational methods; Hamilton-Jacobi theory; the role of equilibrium points and stability; and symplectic methods. Prerequisites: 53, and 115 or 171.

**MATH 142. Hyperbolic Geometry. 3 Units.**

An introductory course in hyperbolic geometry. Topics may include: different models of hyperbolic geometry, hyperbolic area and geodesics, Isometries and Mobius transformations, conformal maps, Fuchsian groups, Farey tessellation, hyperbolic structures on surfaces and three manifolds, limit sets. Prerequisites: some familiarity with the basic concepts of differential geometry and the topology of surfaces and manifolds is strongly recommended.

**MATH 143. Differential Geometry. 3 Units.**

Geometry of curves and surfaces in three-space and higher dimensional manifolds. Parallel transport, curvature, and geodesics. Surfaces with constant curvature. Minimal surfaces.

**MATH 145. Algebraic Geometry. 3 Units.**

Hilbert's nullstellensatz, complex affine and projective curves, Bezout's theorem, the degree/genus formula, blow-up, Riemann-Roch theorem. Prerequisites: 120, and 121 or knowledge of fraction fields. Recommended: familiarity with surfaces equivalent to 143, 146, 147, or 148.

**MATH 146. Analysis on Manifolds. 3 Units.**

Differentiable manifolds, tangent space, submanifolds, implicit function theorem, differential forms, vector and tensor fields. Frobenius' theorem, DeRham theory. Prerequisite: 52 or 52H.

**MATH 147. Differential Topology. 3 Units.**

Smooth manifolds, transversality, Sard's theorem, embeddings, degree of a map, Borsuk-Ulam theorem, Hopf degree theorem, Jordan curve theorem. Prerequisite: 115 or 171.

**MATH 148. Algebraic Topology. 3 Units.**

Fundamental group, covering spaces, Euler characteristic, homology, classification of surfaces, knots. Prerequisite: 109 or 120.

**MATH 151. Introduction to Probability Theory. 3 Units.**

Counting; axioms of probability; conditioning and independence; expectation and variance; discrete and continuous random variables and distributions; joint distributions and dependence; central limit theorem and laws of large numbers. Prerequisite: 52 or consent of instructor.

**MATH 152. Elementary Theory of Numbers. 3 Units.**

Euclid's algorithm, fundamental theorems on divisibility; prime numbers; congruence of numbers; theorems of Fermat, Euler, Wilson; congruences of first and higher degrees; quadratic residues; introduction to the theory of binary quadratic forms; quadratic reciprocity; partitions.

**MATH 154. Algebraic Number Theory. 3 Units.**

Properties of number fields and Dedekind domains, quadratic and cyclotomic fields, applications to some classical Diophantine equations; introduction to elliptic curves. Prerequisites: 120 and 121, especially modules over principal ideal domains and Galois theory of finite fields.

**MATH 155. Analytic Number Theory. 3 Units.**

Topics in analytic number theory such as the distribution of prime numbers, the prime number theorem, twin primes and Goldbach's conjecture, the theory of quadratic forms, Dirichlet's class number formula, Dirichlet's theorem on primes in arithmetic progressions, and the fifteen theorem. Prerequisite: 152, or familiarity with the Euclidean algorithm, congruences, residue classes and reduced residue classes, primitive roots, and quadratic reciprocity.

**MATH 158. Basic Probability and Stochastic Processes with Engineering Applications. 3 Units.**

Calculus of random variables and their distributions with applications. Review of limit theorems of probability and their application to statistical estimation and basic Monte Carlo methods. Introduction to Markov chains, random walks, Brownian motion and basic stochastic differential equations with emphasis on applications from economics, physics and engineering, such as filtering and control. Prerequisites: exposure to basic probability. Same as: CME 298

**MATH 159. Discrete Probabilistic Methods. 3 Units.**

Modern discrete probabilistic methods suitable for analyzing discrete structures of the type arising in number theory, graph theory, combinatorics, computer science, information theory and molecular sequence analysis. Prerequisite: STATS 116/MATH 151 or equivalent.

**MATH 161. Set Theory. 3 Units.**

Informal and axiomatic set theory: sets, relations, functions, and set-theoretical operations. The Zermelo-Fraenkel axiom system and the special role of the axiom of choice and its various equivalents. Well-orderings and ordinal numbers; transfinite induction and transfinite recursion. Equinumerosity and cardinal numbers; Cantor's Alephs and cardinal arithmetic. Open problems in set theory. Prerequisite: students should be comfortable doing proofs.

**MATH 162. Philosophy of Mathematics. 4 Units.**

(Graduate students register for PHIL 262.) General survey of the philosophy of mathematics, focusing on epistemological issues. Includes survey of some basic concepts (proof, axiom, definition, number, set); mind-bending theorems about the limits of our current mathematical knowledge, such as Gödel's Incompleteness Theorems, and the independence of the continuum hypothesis from the current axioms of set theory; major philosophical accounts of mathematics: Logicism, Intuitionism, Hilbert's program, Quine's empiricism, Field's program, Structuralism; concluding with a discussion of Eugene Wigner's 'The Unreasonable Effectiveness of Mathematics in the Natural Sciences'. Students won't be expected to prove theorems or complete mathematical exercises. However, includes some material of a technical nature. Prerequisite: PHIL 150 or consent of instructor. Same as: PHIL 162, PHIL 262

**MATH 163. The Greek Invention of Mathematics. 3-5 Units.**

(Formerly CLASSGEN 103.) How was mathematics invented? A survey of the main creative ideas of ancient Greek mathematics. Among the issues explored are the axiomatic system of Euclid's Elements, the origins of the calculus in Greek measurements of solids and surfaces, and Archimedes' creation of mathematical physics. We will provide proofs of ancient theorems, and also learn how such theorems are even known today thanks to the recovery of ancient manuscripts. Same as: CLASSICS 136

**MATH 171. Fundamental Concepts of Analysis. 3 Units.**

Recommended for Mathematics majors and required of honors Mathematics majors. Similar to 115 but altered content and more theoretical orientation. Properties of Riemann integrals, continuous functions and convergence in metric spaces; compact metric spaces, basic point set topology. Prerequisite: 51H or 115 or consent of the instructor. WIM.

**MATH 172. Lebesgue Integration and Fourier Analysis. 3 Units.**

Similar to 205A, but for undergraduate Math majors and graduate students in other disciplines. Topics include Lebesgue measure on Euclidean space, Lebesgue integration,  $L^p$  spaces, the Fourier transform, the Hardy-Littlewood maximal function and Lebesgue differentiation. Prerequisite: 171 or consent of instructor.

**MATH 173. Theory of Partial Differential Equations. 3 Units.**

A rigorous introduction to PDE accessible to advanced undergraduates. Elliptic, parabolic, and hyperbolic equations in many space dimensions including basic properties of solutions such as maximum principles, causality, and conservation laws. Methods include the Fourier transform as well as more classical methods. The Lebesgue integral will be used throughout, but a summary of its properties will be provided to make the course accessible to students who have not had 172 or 205A. Prerequisite: 171 or equivalent.

**MATH 174. Calculus of Variations. 3 Units.**

An introductory course emphasizing the historical development of the theory, its connections to physics and mechanics, its independent mathematical interest, and its contacts with daily life experience. Applications to minimal surfaces and to capillary surface interfaces. Prerequisites: Math 171 or equivalent.

**MATH 175. Elementary Functional Analysis. 3 Units.**

Linear operators on Hilbert space. Spectral theory of compact operators; applications to integral equations. Elements of Banach space theory. Prerequisite: 115 or 171.

**MATH 177. Geometric Methods in the Theory of Ordinary Differential Equations. 3 Units.**

Hamiltonian systems and their geometry. First order PDE and Hamilton-Jacobi equation. Structural stability and hyperbolic dynamical systems. Completely integrable systems. Perturbation theory.

**MATH 180. Introduction to Financial Mathematics. 3 Units.**

Financial derivatives: contracts and options. Hedging and risk management. Arbitrage, interest rate, and discounted value. Geometric random walk and Brownian motion as models of risky assets. Initial boundary value problems for the heat and related partial differential equations. Self-financing replicating portfolio. Black-Scholes pricing of European options. Dividends. Implied volatility. Optimal stopping and American options. Prerequisite: 53. Corequisites: 131, 151 or STATS 116.

**MATH 193. Polya Problem Solving Seminar. 1 Unit.**

Topics in mathematics and problem solving strategies with an eye towards the Putnam Competition. Topics may include parity, the pigeonhole principle, number theory, recurrence, generating functions, and probability. Students present solutions to the class. Open to anyone with an interest in mathematics.

**MATH 197. Senior Honors Thesis. 1-6 Unit.**

Honors math major working on senior honors thesis under an approved advisor carries out research and reading. Satisfactory written account of progress achieved during term must be submitted to advisor before term ends. May be repeated 3 times for a max of 9 units. Contact department student services specialist to enroll.

**MATH 198. Practical Training. 1 Unit.**

Only for students majoring in mathematics. Students obtain employment in a relevant industrial or research activity to enhance their professional experience. Students submit a concise report detailing work activities, problems worked on, and key results. May be repeated for credit up to 3 units. Prerequisite: qualified offer of employment and consent of department. Prior approval by Math Department is required; you must contact the Math Department's Student Services staff for instructions before being granted permission to enroll.

**MATH 199. Independent Work. 1-3 Unit.**

For math majors only. Undergraduates pursue a reading program; topics limited to those not in regular department course offerings. Credit can fulfill the elective requirement for math majors. Approval of Undergraduate Affairs Committee is required to use credit for honors majors area requirement. Contact department student services specialist to enroll.

**MATH 205A. Real Analysis. 3 Units.**

Basic measure theory and the theory of Lebesgue integration. Prerequisite: 171 or equivalent.

**MATH 205B. Real Analysis. 3 Units.**

Point set topology, basic functional analysis, Fourier series, and Fourier transform. Prerequisites: 171 and 205A or equivalent.

**MATH 210A. Modern Algebra I. 3 Units.**

Basic commutative ring and module theory, tensor algebra, homological constructions, linear and multilinear algebra, introduction to representation theory. Prerequisite: 122 or equivalent.

**MATH 210B. Modern Algebra II. 3 Units.**

Continuation of 210A. Topics in Galois theory, commutative algebra, and algebraic geometry. Prerequisites: 210A, and 121 or equivalent.

**MATH 210C. Lie Theory. 3 Units.**

Topics in Lie groups, Lie algebras, and/or representation theory. Prerequisite: math 210B. May be repeated for credit.

**MATH 215A. Complex Analysis, Geometry, and Topology. 3 Units.**

Analytic functions, complex integration, Cauchy's theorem, residue theorem, argument principle, conformal mappings, Riemann mapping theorem, Picard's theorem, elliptic functions, analytic continuation and Riemann surfaces.

**MATH 215B. Complex Analysis, Geometry, and Topology. 3 Units.**

Topics: fundamental group and covering spaces, homology, cohomology, products, basic homotopy theory, and applications. Prerequisites: 113, 120, and 171, or equivalent; 215A is not a prerequisite for 215B.

**MATH 215C. Complex Analysis, Geometry, and Topology. 3 Units.**

Differentiable manifolds, transversality, degree of a mapping, vector fields, intersection theory, and Poincare duality. Differential forms and the DeRham theorem. Prerequisite: 215B or equivalent.

**MATH 216A. Introduction to Algebraic Geometry. 3 Units.**

Algebraic curves, algebraic varieties, sheaves, cohomology, Riemann-Roch theorem. Classification of algebraic surfaces, moduli spaces, deformation theory and obstruction theory, the notion of schemes. May be repeated for credit. Prerequisites: 210ABC or equivalent.

**MATH 216B. Introduction to Algebraic Geometry. 3 Units.**

Continuation of 216A. May be repeated for credit.

**MATH 216C. Introduction to Algebraic Geometry. 3 Units.**

Continuation of 216B. May be repeated for credit.

**MATH 217C. Complex Differential Geometry. 3 Units.**

Complex structures, almost complex manifolds and integrability, Hermitian and Kahler metrics, connections on complex vector bundles, Chern classes and Chern-Weil theory, Hodge and Dolbeault theory, vanishing theorems, Calabi-Yau manifolds, deformation theory.

**MATH 220. Partial Differential Equations of Applied Mathematics. 3 Units.**

First-order partial differential equations; method of characteristics; weak solutions; elliptic, parabolic, and hyperbolic equations; Fourier transform; Fourier series; and eigenvalue problems. Prerequisite: foundation in multivariable calculus and ordinary differential equations. Same as: CME 303

**MATH 221A. Mathematical Methods of Imaging. 3 Units.**

Image denoising and deblurring with optimization and partial differential equations methods. Imaging functionals based on total variation and l-1 minimization. Fast algorithms and their implementation. Same as: CME 321A

**MATH 221B. Mathematical Methods of Imaging. 3 Units.**

Array imaging using Kirchhoff migration and beamforming, resolution theory for broad and narrow band array imaging in homogeneous media, topics in high-frequency, variable background imaging with velocity estimation, interferometric imaging methods, the role of noise and inhomogeneities, and variational problems that arise in optimizing the performance of array imaging algorithms. Same as: CME 321B

**MATH 226. Numerical Solution of Partial Differential Equations. 3 Units.**

Hyperbolic partial differential equations: stability, convergence and qualitative properties; nonlinear hyperbolic equations and systems; combined solution methods from elliptic, parabolic, and hyperbolic problems. Examples include: Burger's equation, Euler equations for compressible flow, Navier-Stokes equations for incompressible flow. Prerequisites: MATH 220A or CME 302. Same as: CME 306

**MATH 227. Partial Differential Equations and Diffusion Processes. 3 Units.**

Parabolic and elliptic partial differential equations and their relation to diffusion processes. First order equations and optimal control. Emphasis is on applications to mathematical finance. Prerequisites: MATH 131 and MATH 136/STATS 219, or equivalents.

**MATH 228. Stochastic Methods in Engineering. 3 Units.**

The basic limit theorems of probability theory and their application to maximum likelihood estimation. Basic Monte Carlo methods and importance sampling. Markov chains and processes, random walks, basic ergodic theory and its application to parameter estimation. Discrete time stochastic control and Bayesian filtering. Diffusion approximations, Brownian motion and an introduction to stochastic differential equations. Examples and problems from various applied areas. Prerequisites: exposure to probability and background in analysis. Same as: CME 308

**MATH 228A. Probability, Stochastic Analysis and Applications. 3 Units.**

The basic limit theorems of probability theory and their application to maximum likelihood estimation. Basic Monte Carlo methods and importance sampling. Markov chains and processes, random walks, basic ergodic theory and its application to parameter estimation. Discrete time stochastic control and Bayesian filtering. Diffusion approximations, Brownian motion and basic stochastic differential equations. Examples and problems from various applied areas. Prerequisites: exposure to probability and background in analysis.

**MATH 230A. Theory of Probability. 2-4 Units.**

Mathematical tools: sigma algebras, measure theory, connections between coin tossing and Lebesgue measure, basic convergence theorems. Probability: independence, Borel-Cantelli lemmas, almost sure and  $L_p$  convergence, weak and strong laws of large numbers. Large deviations. Weak convergence; central limit theorems; Poisson convergence; Stein's method. Prerequisites: 116, MATH 171. Same as: STATS 310A

**MATH 230B. Theory of Probability. 2-3 Units.**

Conditional expectations, discrete time martingales, stopping times, uniform integrability, applications to 0-1 laws, Radon-Nikodym Theorem, ruin problems, etc. Other topics as time allows selected from (i) local limit theorems, (ii) renewal theory, (iii) discrete time Markov chains, (iv) random walk theory, (v) ergodic theory. Prerequisite: 310A or MATH 230A. Same as: STATS 310B

**MATH 230C. Theory of Probability. 2-4 Units.**

Continuous time stochastic processes: martingales, Brownian motion, stationary independent increments, Markov jump processes and Gaussian processes. Invariance principle, random walks, LIL and functional CLT. Markov and strong Markov property. Infinitely divisible laws. Some ergodic theory. Prerequisite: 310B or MATH 230B. Same as: STATS 310C

**MATH 231A. An Introduction to Random Matrix Theory. 3 Units.**

Patterns in the eigenvalue distribution of typical large matrices, which also show up in physics (energy distribution in scattering experiments), combinatorics (length of longest increasing subsequence), first passage percolation and number theory (zeros of the zeta function). Classical compact ensembles (random orthogonal matrices). The tools of determinantal point processes. Same as: STATS 351A

**MATH 231C. Free Probability. 3 Units.**

Background from operator theory, addition and multiplication theorems for operators, spectral properties of infinite-dimensional operators, the free additive and multiplicative convolutions of probability measures and their classical counterparts, asymptotic freeness of large random matrices, and free entropy and free dimension. Prerequisite: STATS 310B or equivalent.

**MATH 232. Topics in Probability: Percolation Theory. 3 Units.**

An introduction to some of the most important theorems and open problems in percolation theory. Topics include some of the difficult early breakthroughs of Kesten, Menshikov, Aizenman and others, and recent fields-medal winning works of Schramm, Lawler, Werner and Smirnov. Prerequisites: graduate-level probability. Offered every 1-2 years.

**MATH 233. Topics in Combinatorics: Non-constructive methods in combinatorics. 3 Units.**

Methods in combinatorics that prove the existence of certain objects without constructing them explicitly: The probabilistic method (concentration of measure, Lovasz local lemma), topological methods (Sperner's lemma, Brouwer's fixed-point and Borsuk-Ulam theorems), and algebraic methods (Nullstellensatz, the polynomial method and interlacing polynomials). We will also discuss the computational question of constructing the respective objects efficiently.

**MATH 234. Large Deviations Theory. 3 Units.**

Combinatorial estimates and the method of types. Large deviation probabilities for partial sums and for empirical distributions, Cramer's and Sanov's theorems and their Markov extensions. Applications in statistics, information theory, and statistical mechanics. Prerequisite: MATH 230A or STATS 310. Offered every 2-3 years. Same as: STATS 374

**MATH 235A. Topics in combinatorics. 3 Units.**

This advanced course in extremal combinatorics covers several major themes in the area. These include extremal combinatorics and Ramsey theory, the graph regularity method, and algebraic methods.

**MATH 235B. Modern Markov Chain Theory. 3 Units.**

This is a graduate-level course on the use and analysis of Markov chains. Emphasis is placed on explicit rates of convergence for chains used in applications to physics, biology, and statistics. Topics covered: basic constructions (metropolis, Gibbs sampler, data augmentation, hybrid Monte Carlo); spectral techniques (explicit diagonalization, Poincaré, and Cheeger bounds); functional inequalities (Nash, Sobolev, Log Sobolev); probabilistic techniques (coupling, stationary times, Harris recurrence). A variety of card shuffling processes will be studied. Central Limit and concentration.

**MATH 235C. Topics in Markov Chains. 3 Units.**

Classical functional inequalities (Nash, Faber-Krahn, log-Sobolev inequalities), comparison of Dirichlet forms. Random walks and isoperimetry of amenable groups (with a focus on solvable groups). Entropy, harmonic functions, and Poisson boundary (following Kaimanovich-Vershik theory).

**MATH 236. Introduction to Stochastic Differential Equations. 3 Units.**

Brownian motion, stochastic integrals, and diffusions as solutions of stochastic differential equations. Functionals of diffusions and their connection with partial differential equations. Random walk approximation of diffusions. Prerequisite: 136 or equivalent and differential equations.

**MATH 237. Default and Systemic Risk. 3 Units.**

Introduction to mathematical models of complex static and dynamic stochastic systems that undergo sudden regime change in response to small changes in parameters. Examples from materials science (phase transitions), power grid models, financial and banking systems. Special emphasis on mean field models and their large deviations, including computational issues. Dynamic network models of financial systems and their stability.

**MATH 238. Mathematical Finance. 3 Units.**

Stochastic models of financial markets. Forward and futures contracts. European options and equivalent martingale measures. Hedging strategies and management of risk. Term structure models and interest rate derivatives. Optimal stopping and American options. Corequisites: MATH 236 and 227 or equivalent. Same as: STATS 250

**MATH 239. Computation and Simulation in Finance. 3 Units.**

Monte Carlo, finite difference, tree, and transform methods for the numerical solution of partial differential equations in finance. Emphasis is on derivative security pricing. Prerequisite: 238 or equivalent.

**MATH 243. Functions of Several Complex Variables. 3 Units.**

Holomorphic functions in several variables, Hartogs phenomenon,  $d$ -bar complex, Cousin problem. Domains of holomorphy. Plurisubharmonic functions and pseudo-convexity. Stein manifolds. Coherent sheaves, Cartan Theorems A&B. Levi problem and its solution. Grauert's Oka principle. Prerequisites: MATH 215A and experience with manifolds.

**MATH 244. Riemann Surfaces. 3 Units.**

Riemann surfaces and holomorphic maps, algebraic curves, maps to projective spaces. Calculus on Riemann surfaces. Elliptic functions and integrals. Riemann-Hurwitz formula. Riemann-Roch theorem, Abel-Jacobi map. Uniformization theorem. Hyperbolic surfaces. (Suitable for advanced undergraduates.) Prerequisites: MATH 106 or MATH 116, and familiarity with surfaces equivalent to MATH 143, MATH 146, or MATH 147.

**MATH 245A. Topics in Algebraic Geometry. 3 Units.**

Topics of contemporary interest in algebraic geometry. May be repeated for credit.

**MATH 245B. Topics in Algebraic Geometry. 3 Units.**

May be repeated for credit.

**MATH 245C. Topics in Algebraic Geometry. 3 Units.**

May be repeated for credit.

**MATH 248. Introduction to Ergodic Theory. 3 Units.**

Topics may include 1) subadditive and multiplicative ergodic theorems, 2) notions of mixing, weak mixing, spectral theory, 3) metric and topological entropy of dynamical systems, 4) measures of maximal entropy. Prerequisites: Solid background in "Measure and Integration" (Math 205A) and some functional analysis, including Riesz representation theorem and Hahn-Banach theorem (Math 205B).

**MATH 249A. Topics in number theory. 3 Units.**

Topics of contemporary interest in number theory. May be repeated for credit.

**MATH 249B. Topics in Number Theory. 3 Units.**

.

**MATH 249C. Topics in Number Theory. 3 Units.**

.

**MATH 256A. Partial Differential Equations. 3 Units.**

The theory of linear and nonlinear partial differential equations, beginning with linear theory involving use of Fourier transform and Sobolev spaces. Topics: Schauder and  $L^2$  estimates for elliptic and parabolic equations; De Giorgi-Nash-Moser theory for elliptic equations; nonlinear equations such as the minimal surface equation, geometric flow problems, and nonlinear hyperbolic equations.

**MATH 256B. Partial Differential Equations. 3 Units.**

Continuation of 256A.

**MATH 257A. Symplectic Geometry and Topology. 3 Units.**

Linear symplectic geometry and linear Hamiltonian systems. Symplectic manifolds and their Lagrangian submanifolds, local properties. Symplectic geometry and mechanics. Contact geometry and contact manifolds. Relations between symplectic and contact manifolds. Hamiltonian systems with symmetries. Momentum map and its properties. May be repeated for credit.

**MATH 257B. Symplectic Geometry and Topology. 3 Units.**

Continuation of 257A. May be repeated for credit.

**MATH 257C. Symplectic Geometry and Topology. 3 Units.**

Continuation of 257B. May be repeated for credit.

**MATH 258. Topics in Geometric Analysis. 3 Units.**

May be repeated for credit.

**MATH 262. Applied Fourier Analysis and Elements of Modern Signal Processing. 3 Units.**

Introduction to the mathematics of the Fourier transform and how it arises in a number of imaging problems. Mathematical topics include the Fourier transform, the Plancherel theorem, Fourier series, the Shannon sampling theorem, the discrete Fourier transform, and the spectral representation of stationary stochastic processes. Computational topics include fast Fourier transforms (FFT) and nonuniform FFTs. Applications include Fourier imaging (the theory of diffraction, computed tomography, and magnetic resonance imaging) and the theory of compressive sensing.

Same as: CME 372

**MATH 263A. Infinite-dimensional Lie Algebras. 3 Units.**

Basics of Kac-Moody Lie algebras, which include both finite dimensional semisimple Lie algebras and their infinite-dimensional analogs, up to the Kac-Weyl character formula and Macdonald identities, and the Boson-Fermion correspondence. May be repeated for credit. Prerequisite: 210 or equivalent.

**MATH 263B. Crystal Bases: Representations and Combinatorics. 3 Units.**

Crystal Bases are combinatorial analogs of representation theory of Lie groups. We will explore different aspects of these analogies and develop rigorous purely combinatorial foundations.

**MATH 263C. Topics in Representation Theory. 3 Units.**

May be repeated for credit.

**MATH 269. Topics in symplectic geometry. 3 Units.**

May be repeated for credit.

**MATH 270. Geometry and Topology of Complex Manifolds. 3 Units.**

Complex manifolds, Kahler manifolds, curvature, Hodge theory, Lefschetz theorem, Kahler-Einstein equation, Hermitian-Einstein equations, deformation of complex structures. May be repeated for credit.

**MATH 271. The H-Principle. 3 Units.**

The language of jets. Thom transversality theorem. Holonomic approximation theorem. Applications: immersion theory and its generalizations. Differential relations and Gromov's h-principle for open manifolds. Applications to symplectic geometry. Microflexibility. Mappings with simple singularities and their applications. Method of convex integration. Nash-Kuiper  $C^1$ -isometric embedding theorem.

**MATH 272. Topics in Partial Differential Equations. 3 Units.**

.

**MATH 280. Evolution Equations in Differential Geometry. 3 Units.**

.

**MATH 282A. Low Dimensional Topology. 3 Units.**

The theory of surfaces and 3-manifolds. Curves on surfaces, the classification of diffeomorphisms of surfaces, and Teichmüller space. The mapping class group and the braid group. Knot theory, including knot invariants. Decomposition of 3-manifolds: triangulations, Heegaard splittings, Dehn surgery. Loop theorem, sphere theorem, incompressible surfaces. Geometric structures, particularly hyperbolic structures on surfaces and 3-manifolds. May be repeated for credit up to 6 total units.

**MATH 282B. Homotopy Theory. 3 Units.**

Homotopy groups, fibrations, spectral sequences, simplicial methods, Dold-Thom theorem, models for loop spaces, homotopy limits and colimits, stable homotopy theory. May be repeated for credit up to 6 total units.

**MATH 282C. Fiber Bundles and Cobordism. 3 Units.**

Possible topics: principal bundles, vector bundles, classifying spaces. Connections on bundles, curvature. Topology of gauge groups and gauge equivalence classes of connections. Characteristic classes and K-theory, including Bott periodicity, algebraic K-theory, and indices of elliptic operators. Spectral sequences of Atiyah-Hirzebruch, Serre, and Adams. Cobordism theory, Pontryagin-Thom theorem, calculation of unoriented and complex cobordism. May be repeated for credit up to 6 total units.

**MATH 283. Topics in Algebraic and Geometric Topology. 3 Units.**

May be repeated for credit.

**MATH 283A. Topics in Topology. 3 Units.**

May be repeated for credit.

**MATH 284. Topics in Geometric Topology. 3 Units.**

Incompressible surfaces, irreducible manifolds, prime decomposition, Morse theory, Heegaard diagrams, Heegaard splittings, the Thurston norm, sutured manifold theory, Heegaard Floer homology, sutured Floer homology.

**MATH 284A. Geometry and Topology in Dimension 3. 3 Units.**

The Poincaré conjecture and the uniformization of 3-manifolds. May be repeated for credit.

**MATH 284B. Geometry and Topology in Dimension 3. 3 Units.**

The Poincaré conjecture and the uniformization of 3-manifolds. May be repeated for credit.

**MATH 286. Topics in Differential Geometry. 3 Units.**

May be repeated for credit.

**MATH 301. Advanced Topics in Convex Optimization. 3 Units.**

Modern developments in convex optimization: semidefinite programming; novel and efficient first-order algorithms for smooth and nonsmooth convex optimization. Emphasis on numerical methods suitable for large scale problems arising in science and engineering. Prerequisites: convex optimization (EE 364), linear algebra (Math 104), numerical linear algebra (CME 302); background in probability, statistics, real analysis and numerical optimization.

Same as: CME 375

**MATH 305. Applied mathematics through toys and magic. 3 Units.**

This course is a series of case-studies in doing applied mathematics on surprising phenomena we notice in daily life. Almost every class will show demos of these phenomena (toys and magic) and suggest open projects. The topics range over a great variety and cut across areas traditionally pigeonholed as physics, biology, engineering, computer science, mathematics  $\zeta$  but, instead of developing sophisticated mathematics on simple material, our aim is to extract simple mathematical understanding from sophisticated material which, at first, we may not yet know how to pigeonhole. In each class I will try to make the discussion self-contained and to give everybody something to take home, regardless of the background.

**MATH 355. Graduate Teaching Seminar. 1 Unit.**

Required of and limited to first-year Mathematics graduate students.

**MATH 360. Advanced Reading and Research. 1-10 Unit.**

.

**MATH 382. Qualifying Examination Seminar. 1-3 Unit.**

.

**MATH 391. Research Seminar in Logic and the Foundations of Mathematics. 1-3 Unit.**

Contemporary work. May be repeated a total of three times for credit.

Math 391 students attend the logic colloquium in 380-381T.

Same as: PHIL 391

**MATH 802. TGR Dissertation. 0 Units.**

.

## Mechanical Engineering Courses

**ME 10N. Form and Function of Animal Skeletons. 3 Units.**

Preference to freshmen. The biomechanics and mechanobiology of the musculoskeletal system in human beings and other vertebrates on the level of the whole organism, organ systems, tissues, and cell biology.

Field trips to labs.

Same as: BIOE 10N

**ME 11SC. The Art and Science of Measuring Fluid Flows. 2 Units.**

The roles of fluid flows in natural systems such as swimming protozoa and planet-forming nebulae, and technologies such as biomolecular assay devices and jet engines. The analytical background for fluid sciences. Phenomena such as shock waves and vortex formation that create flow patterns while challenging engineers. Visualization and measurement techniques to obtain full-field flow pattern information. The physics behind these technologies. Field trips; lab work. (Eaton).

**ME 12N. The Jet Engine. 3 Units.**

Preference to freshmen. How a jet engine works; the technologies and analytical techniques required to understand them. Dynamics, thermodynamics, turbomachinery, combustion, advanced materials, cooling technologies, and control systems. Visits to research laboratories, examination of a partially disassembled engine, and probable operation of a small jet engine. Prerequisites: high school physics.

**ME 12SC. Hands-on Jet Engines. 2 Units.**

How jet engines transformed the world through intercontinental travel causing internationalization in daily life. Competition driving improvements in fuel economy, engine lifetime, noise, and emissions.

**ME 13N. The Great Principle of Similitude. 3 Units.**

Basic rules of dimensional analysis were proposed by Sir Isaac Newton. Lord Rayleigh called the method  $\zeta$ The Great Principle of Similitude. $\zeta$  On its surface, it is a look at the relationships between physical quantities which uses their basic  $\zeta$ units $\zeta$ . In fact, it is a powerful and formalized method to analyze complex physical phenomena, including those for which we cannot pose, much less solve, governing equations. The method is also valuable to engineers and scientist as it helps perform back-of-the-envelope estimates and derive scaling laws for the design of machines and processes. The principle has been applied successfully to the study of complex phenomena in biology, aerodynamics, chemistry, sports, astrophysics, and forensics, among other areas. In this course, the students will be provided with the basic tools to perform such flexible and powerful analyses. We will then review particular example analyses. These will include estimating the running speed of a hungry tyrannosaurus rex, a comparison of the flights of mosquitos and jet airliners, the cost of submarines, and the energy released by an atomic weapon. We will then work together as a class to identify problems in everyday life and/or current world events to analyze with this powerful tool.

**ME 14N. How Stuff Is Made. 3 Units.**

The design and engineering of products and processes, such as machining, fabric, food, and electrical goods. Tradeoffs in choice of materials, features, and process selection. Final project: students research and redesign the engineering and manufacturing aspects of a product and its processes with an eye toward sustainability. Includes several field trips to manufacturing facilities.

**ME 16N. Energy & The Industrial Revolution - Past, Present & Future. 3 Units.**

When you flip a light switch, or drive to your neighborhood grocery store or do a Google search, it is easy to forget that we receive the benefit of 250 years of industrial revolution, which has been arguably the most remarkable period of human history. This revolution has resulted in exponential growth in the world's economy as well as unprecedented prosperity and improvements in our quality of life. The industrial revolution has been largely about how we sourced, distributed and used energy. It was and continues to be predominantly based on fossil energy. But the impact of our traditional energy sources on climate change is one of the most daunting issues of the 21st century because it will affect the world as a whole - the 7-10 billion people, businesses, nations, ecosystems. The choice that our society is asked to make is often posed as follows: Should we continue our exponential economic growth based on fossil fuels and ignore the environment, or should we reduce our greenhouse gas emissions at the cost of our economic growth? This is a false choice because it is based on extrapolating the past. It does not account for the capacity for innovations in technology, finance and business to create sustainable energy future, one that allows the economy and our environment to be mutually inclusive. In short, we need a new industrial revolution. This seminar course will: (a) provide a view of the current energy landscape and the magnitude of the challenge; (b) discuss some techno-economic trends that we are currently witnessing; and (c) identify opportunities to innovate in technology, finance and business that could create the foundations for a new industrial revolution.

**ME 17N. Robotics Imitating Nature. 3 Units.**

Preference to freshmen. The dream of constructing robots that duplicate the functional abilities of humans and/or other animals has been promulgated primarily by science fiction writers. But biological systems provide models for the designers of robots. Building electromechanical devices that perform locomotory and sensing functions similar to those of an animal as a way of learning about how biological systems function. Walking and running machines, and the problem of giving a robot the capability to respond to its environment.

**ME 18Q. Teamology: Creative Teams and Individual Development. 3 Units.**

Preference to sophomores. Roles on a problem solving team that best suit individual creative characteristics. Two teams are formed for teaching experientially how to develop less conscious abilities from teammates creative in those roles. Reinforcement teams have members with similar personalities; problem solving teams are composed of people with maximally different personalities.

**ME 19. Pre-field Course for Alternative Spring Break: Design for Social Change. 1 Unit.**

Focus is on applying design, technology and innovation to catalyze social change. Topics include identifying social needs, learning different brainstorming methods, developing an applicable service model or product, prototyping, implementation, and reiteration. Reading and service components, followed by week-long Alternative Spring Break trip. See <http://d4sc.blogspot.com>. Enrollment limited to 12. May be repeated for credit.

**ME 20N. Haptics: Engineering Touch. 3 Units.**

Students in this class will learn how to build, program, and control haptic devices, which are mechatronic devices that allow users to feel virtual or remote environments. In the process, students will gain an appreciation for the capabilities and limitations of human touch, develop an intuitive connection between equations that describe physical interactions and how they feel, and gain practical interdisciplinary engineering skills related to robotics, mechanical engineering, electrical engineering, bioengineering, and computer science. In-class laboratories will give students hands-on experience in assembling mechanical systems, making circuits, programming Arduino microcontrollers, testing their haptic creations, and using Stanford's student prototyping facilities. The final project for this class will involve creating a novel haptic device that could be used to enhance human interaction with computers, mobile devices, or remote-controlled robots.

**ME 21N. Renaissance Machine Design. 3 Units.**

Preference to freshmen. Technological innovations of the 1400s that accompanied the proliferation of monumental art and architecture by Brunelleschi, da Vinci, and others who designed machines and invented novel construction, fresco, and bronze-casting techniques. The social and political climate, from the perspective of a machine designer, that made possible and demanded engineering expertise from prominent artists. Hands-on projects to provide a physical understanding of Renaissance-era engineering challenges and introduce the pleasure of creative engineering design. Technical background not required.

**ME 22N. Smart Robots in our Mix: Collaborating in High Tech Environments of Tomorrow. 3 Units.**

This course invites students to explore rules of engagement in a global digitally interconnected world they will create with the robots in their society. The material will be taught in the context of ubiquitous integrated technology that will be part of their future reality. Human-robot interactions will be an integral part of future diverse teams. Students will explore what form will this interaction take as an emerging element of tomorrow's society, be it medical implanted technology or the implications of military use of robots and social media in future society. Students will learn to foster their creative confidence to explore collaboration by differences for social innovation in a digitally networked world.

**ME 23Q. The Worldly Engineer. 3 Units.**

Preference given to sophomores. Engineering, its practice and products placed in multi-disciplinary context. Topics include the history of the engineering profession and engineering education; cultural influences on design; the role of national and international public policy and economics; dependence on natural resources; environmental impact; contemporary workforce development. Emphasis is on cultivating an appreciation of these issues to enrich the educational and professional pursuit of engineering.

**ME 24N. Designing the Car of the Future. 3 Units.**

Preference to freshmen. Automotive design drawing from all areas of mechanical engineering. The state of the art in automotive design and the engineering principles to understand vehicle performance. Future technologies for vehicles. Topics include vehicle emissions and fuel consumption, possibilities of hydrogen, drive-by-wire systems, active safety and collision avoidance, and human-machine interface issues.

**ME 25N. Energy Sustainability and Climate Change. 3 Units.**

One of the primary global challenges of the 21st century is providing the energy required to meet increasing demands due to population growth and economic development. A related challenge is mitigation of the effect of this energy growth on climate. This seminar will examine various scenarios for the energy resources required to meet future demand and the potential consequences on climate. The scientific issues underlying climate change and the coupling of energy use with changes in the global atmosphere that impact climate will be discussed.

**ME 26N. Think Like a Designer. 3 Units.**

Introduces students to techniques designers use to create highly innovative solutions across domains. The project-based class will emphasize approaches to problem identification and problem solving. Topics include need-finding, structured brainstorming, synthesis, rapid prototyping, and visual communication; field trips to a local design firm, a robotics lab, and a machining lab. A secondary goal of the seminar is to introduce students to the pleasures of creative design and hands-on development of tangible solutions.

**ME 27SI. Needfinding for Underserved Populations. 2 Units.**

The heart of any design process resides in empathy with users and their needs. Working in the realm of public service may engage a population to which the designer might not have been exposed. How different needfinding techniques can help designers to understand users from underserved populations and inspire them to create products and services that serve user needs.

**ME 28SI. Professional Design Practices. 1 Unit.**

Lab. Professional skills are developed through web-based portfolio and resume building. Additionally, visits to local design consulting firms and in house design groups will help solidify students understanding of the designer in the professional workplace. May be repeated for credit.

**ME 29SI. Cars: A Crash Course. 1 Unit.**

Focus is on the basic mechanics and significance of cars. Topics include a basic, real-world understanding of automobile workings, histories, industries, cultural impact, and related media. Field trips to Tesla Motors and Go-Kart Racer will be organized, and there will be guest appearances by local automotive historians and enthusiasts. Students will get hands on experience with maintaining real cars, see high performance engines run, and have the opportunity to learn how to drive a manual transmission.

**ME 52SI. Scan, Model, Print! Designing with 3D Technology. 2 Units.**

Think 3D scanning, modeling, and printing technology is just about plastic widgets? Think again! Immerse yourself in a world of custom prosthetics, manufacturing in space, autonomous cars, and much more. This hands-on engineering design course teaches advanced 3D imaging and computational modeling skills in order to leverage the unique benefits of additive manufacturing to solve complex problems. Students will connect the theory behind these tools to direct experience with the equipment and software. Short assignments at the start of the quarter will build students' core competencies and prepare them for a team-based, open-ended project. Class time will be a mixture of lecture, lab, guest speakers, and field trips. Recommended: basic CAD, fabrication, and programming experience (e.g. ME103D, 203, CS106A or equivalents).

**ME 70. Introductory Fluids Engineering. 4 Units.**

Elements of fluid mechanics as applied to engineering problems. Equations of motion for incompressible ideal flow. Hydrostatics. Control volume laws for mass, momentum, and energy. Bernoulli equation. Dimensional analysis and similarity. Flow in ducts. Boundary layer flows. Lift and drag. Lab experiment demonstrations. Prerequisites: ENGR 14 and 30.

**ME 80. Mechanics of Materials. 4 Units.**

Mechanics of materials and deformation of structural members. Topics include stress and deformation analysis under axial loading, torsion and bending, column buckling and pressure vessels. Introduction to stress transformation and multiaxial loading. Prerequisite: ENGR 14.

**ME 101. Visual Thinking. 4 Units.**

Lecture/lab. Visual thinking and language skills are developed and exercised in the context of solving design problems. Exercises for the mind's eye. Rapid visualization and prototyping with emphasis on fluent and flexible idea production. The relationship between visual thinking and the creative process. Limited enrollment. Attend the first day of class.

**ME 103D. Engineering Drawing and Design. 1 Unit.**

Designed to accompany 203. The fundamentals of engineering drawing including orthographic projection, dimensioning, sectioning, exploded and auxiliary views, assembly drawings, and SolidWorks. Homework drawings are of parts fabricated by the student in the lab. Assignments in 203 supported by material in 103D and sequenced on the assumption that the student is enrolled in both courses simultaneously.

**ME 103Q. Product Realization: Making is Thinking. 3 Units.**

Product Realization encompasses those processes required to transform a concept into the creation of a functional, useful, and beautiful product. In this project-based seminar, students develop product realization confidence and intuition using the rich array of tools available in the Product Realization Lab as well as industry-standard design engineering software programs and course readings in design/realization philosophy. Interactions with the Stanford design engineering community as well as field trips to iconic Bay area design engineering firms round out students' experience. Learning Goals: Build confidence in transforming concepts into products through foundational texts and rigorous exercises, master integrated design/realization software and tools through hands-on learning and practice, and engage with the Stanford design engineering community on campus and well beyond.

**ME 104. The Designer's Voice. 1 Unit.**

Course helps students develop a point of view about their design career that will enable them to articulate their design vision, inspire a design studio, or infect a business with a culture of design-thinking. Focus on the integration of work and worldview, professional values, design language, and the development of the designer's voice. Includes seminar-style discussions, role-playing, short writing assignments, guest speakers, and individual mentoring and coaching. Participants will be required to keep a journal.

**ME 104B. Designing Your Life. 2 Units.**

The course employs a design thinking approach to help students develop a point of view about their career. The course focuses on an introduction to design thinking, the integration of work and worldview, and practices that support vocation formation. Includes seminar-style discussions, role-playing, short writing assignments, guest speakers, and individual mentoring and coaching. Open to juniors and seniors of all majors. Admission to be confirmed by email to Axxess registered students prior to first class session. More information at <http://www.designingyourlife.org>. Effective Autumn 2012, course is no longer repeatable for credit.

**ME 104S. Designing Your Stanford. 2 Units.**

DYS uses a Design Thinking approach to help Freshmen and Sophomores learn practical tools and ideas to make the most of their Stanford experience. Topics include the purpose of college, major selection, educational wayfinding, and innovating college outcomes - all applied through an introduction to Design Thinking. This seminar class incorporates small group discussion, in-class activities, field exercises, personal reflection, and individual coaching. Admission to be confirmed by email to Axxess registered students prior to first class session. More information at [www.designingyourstanford.org](http://www.designingyourstanford.org). Same as: EDUC 118S

**ME 110. Design Sketching. 2 Units.**

Freehand sketching, rendering, and design development. Students develop a design sketching portfolio for review by program faculty. May be repeated for credit.

**ME 112. Mechanical Systems Design. 4 Units.**

Lecture/lab. Characteristics of machine elements including gears, bearings, and shafts. Design for fatigue life. Electric motor fundamentals. Transmission design for maximizing output power or efficiency. Mechanism types, linkage analysis and kinematic synthesis. Team-based design projects emphasizing the balance of physical with virtual prototyping based on engineering analysis. Lab for dissection of mechanical systems and project design reviews. Prerequisites: 80, 101. Recommended: 203, ENGR 15.

**ME 113. Mechanical Engineering Design. 4 Units.**

Capstone course. Mechanical engineering design is experienced by students as they work on team projects. Prerequisites: 80, 101, 112, 203. Enrollment limited to ME majors. One of two available capstone design courses.

**ME 114. Consumer Analytical Product Design. 4 Units.**

Holistic design experience for consumer product. Integration of models of engineering function, environmental impact, manufacturing costs, and market conditions. Introduction to life-cycle-analysis to capture environmental impact. Introduction to modeling micro economics, market models, and consumer surveying as applied in product design. Introduction to consumer product cost modeling. Draw from past coursework to build engineering function model. Student teams build and link these models in an optimization framework to maximize profitability and minimize environmental impact. Build prototypes for engineering function and form expression. ME Design Capstone Experience option. Same as: CAPD

**ME 115A. Introduction to Human Values in Design. 3 Units.**

Lecture/lab. Introduces the central philosophy of the product design program, emphasizing the relation between technical and human values, the innovation process, and design methodology. Lab exercises include development of simple product concepts visualized in rapidly executed three-dimensional mockups. Prerequisite: 101.

**ME 115B. Product Design Methods. 3 Units.**

Problem-finding, problem-solving, intermediate creativity methods and effective techniques for researching and presenting product concepts. Individual- and team-based design projects emphasizing advanced visual thinking and prototyping skills. Prerequisite: ME115A.

**ME 115C. Design and Business Factors. 3 Units.**

Design and Business Factors: Introduces business concepts critical to determining the success of new products and services. Students will learn to estimate the cost of R&D for new product development. Using financial analysis, ROI, and tollgates to reduce development risk will be explored using case studies and simulations. Students will develop a bill of materials and a profit and loss statement for a sample product concept, prototype a design consultancy, and create a business proposal for a proposed new product company.

**ME 116M. Introduction to the Design of Smart Products. 4 Units.**

This course will focus on the technical mechatronic skills as well as the human factors and interaction design considerations required for the design of smart products and devices. Students will learn techniques for rapid prototyping of smart devices, best practices for physical interaction design, fundamentals of affordances and signifiers, and interaction across networked devices. Students will be introduced to design guidelines for integrating electrical components such as PCBs into mechanical assemblies and consider the physical form of devices, not just as enclosures but also as a central component of the smart product. Prerequisites include: CS106A, E40, and ME 210, or instructor approval.

**ME 120. History and Philosophy of Design. 3 Units.**

Major schools of 19th- and 20th-century design (Arts and Crafts movement, Bauhaus, Industrial Design, and postmodernism) are analyzed in terms of their continuing cultural relevance. The relation of design to art, technology, and politics; readings from principal theorists, practitioners, and critics; recent controversies in industrial and graphic design, architecture, and urbanism. Enrollment limited to 65.

**ME 131A. Heat Transfer. 3-5 Units.**

The principles of heat transfer by conduction, convection, and radiation with examples from the engineering of practical devices and systems. Topics include transient and steady conduction, conduction by extended surfaces, boundary layer theory for forced and natural convection, boiling, heat exchangers, and graybody radiative exchange. Prerequisites: 70, ENGR 30. Recommended: intermediate calculus, ordinary differential equations.

**ME 131B. Fluid Mechanics: Compressible Flow and Turbomachinery. 4 Units.**

Engineering applications involving compressible flow: aircraft and rocket propulsion, power generation; application of mass, momentum, energy and entropy balance to compressible flows; variable area isentropic flow, normal shock waves, adiabatic flow with friction, flow with heat addition. Operation of flow systems: the propulsion system. Turbomachinery: pumps, compressors, turbines. Angular momentum analysis of turbomachine performance, centrifugal and axial flow machines, effect of blade geometry, dimensionless performance of turbomachines; hydraulic turbines; steam turbines; wind turbines. Compressible flow turbomachinery: the aircraft engine. Prerequisites: 70, ENGR 30.

**ME 137. 3D Printing for Non-Technical Innovators. 1-3 Unit.**

3D Printing is a method of creation that requires only some basic computer skills and a few rules of thumb. This class will allow students to discover for themselves the potential and limitations of 3D Printing through a build intensive design project. This course is an excellent option for anyone who ever wanted to prototype an invention, create a work of art, customize a product or just make something cool – and yet lacked the skills or a fully equipped workshop. Students may enroll for 1 unit to attend the lectures or 3 units for the complete project course. No prior technical knowledge needed. Note: Course material is targeted toward non-ME Design and non-PD majors. An application is required for the 3-unit course option. Please complete the online application by Friday, March 25th. The application is available on the course website: [web.stanford.edu/class/me137](http://web.stanford.edu/class/me137). Same as: ME 237

**ME 139. Educating Young STEM Thinkers. 3-5 Units.**

The course introduces students to the design thinking process, the national conversations about the future of STEM careers, and opportunities to work with middle school students and K-12 teachers in STEM-based after-school activities and intercession camps. The course is both theory and practice focused. The purpose is twofold; to provide reflection and mentoring opportunities for students to learn about pathways to STEM careers and to introduce mentoring opportunities with young STEM thinkers. Same as: EDUC 139, EDUC 239, ME 231

**ME 140. Advanced Thermal Systems. 5 Units.**

Capstone course. Thermal analysis and engineering emphasizing integrating heat transfer, fluid mechanics, and thermodynamics into a unified approach to treating complex systems. Mixtures, humidity, chemical and phase equilibrium, and availability. Labs apply principles through hands-on experience with a turbojet engine, PEM fuel cell, and hybrid solid/oxygen rocket motor. Use of MATLAB as a computational tool. Prerequisites: ENGR 30, ME 70, and 131A,B.

**ME 161. Dynamic Systems, Vibrations and Control. 3-4 Units.**

(Graduate students only enroll in 261.) Modeling, analysis, and measurement of mechanical and electromechanical systems. Numerical and closed form solutions of ordinary differential equations governing the behavior of single and multiple degree of freedom systems. Stability, resonance, amplification and attenuation, and control system design. Demonstrations and laboratory experiments. Prerequisite: Calculus (differentiation and integration), ordinary differential equations (e.g., CME 102 or MATH53), basic linear algebra (determinants and solving linear equations), and familiarity with basic dynamics ( $F=m*a$ ) and electronics ( $v=i*R$ ). ME undergraduates must enroll for 4 units with lab. All others should enroll for 3 units without lab. Same as: ME 261

**ME 166. Introduction to Physiology and Biomechanics of Hearing. 3 Units.**

Hearing is fundamental to our ability to communicate, yet in the US alone over 30 million people suffer some form of hearing impairment. As engineers and scientists, it is important for us to understand the underlying principles of the auditory system if we are to devise better ways of helping those with hearing loss. The goal of this course is to introduce undergraduate and graduate students to the anatomy, physiology, and biomechanics of hearing. Principles from acoustics, mechanics, and hydrodynamics will be used to build a foundational understanding of one of the most complex, interdisciplinary, and fascinating areas of biology. Topics include the evolution of hearing, computational modeling approaches, fluid-structure interactions, ion-channel transduction, psychoacoustics, diagnostic tools, and micrometer to millimeter scale imaging methods. We will also study current technologies for mitigating hearing loss via passive and active prostheses, as well as future regenerative therapies.

Same as: BIOE 287, ME 266

**ME 177. Global Engineers' Education. 3 Units.**

A project based course for those who would like to use their engineering backgrounds to address real world challenges faced by underserved communities globally. In direct collaboration with an underserved community from a rural village in India, students will develop engineering solutions to the challenge of sanitation and hygiene. Focus will be on working with the community rather than for them. Concepts covered will include designing with what designers care about at the center, articulating and realizing individual and community aspirations, ethics of engaging with underserved communities, and methodology of working sustainably with an underserved community.

**ME 181. Deliverables: A Mechanical Engineering Design Practicum. 3 Units.**

The goal of this course is to enable students to solve industry design challenges using modern mechanical design methods. Each week a new practical skill is introduced. These skills have been identified by recently graduated Stanford engineers as being critical to their work. Students then build their command of each skill by completing a simplified yet representative project and submitting deliverables similar to those required in industry. For example, students will learn about how to properly design parts with O-rings and then will be required to design a water-tight enclosure and submit CAD, mechanical drawings, and a bill of materials. Several of the classes feature recent Stanford graduates as guest lecturers. In addition to teaching applicable skills from their job and providing examples from industry, these engineers will also expose students to the range of responsibilities and daily activities that makeup professional mechanical design work. Prerequisites: ME203, ME103d and ME112 OR consent of instructor. Enrollment limited; students complete application on first day of class.

**ME 185. Electric Vehicle Design. 3 Units.**

This project based class focuses on the design and prototyping of electric vehicles. Students learn the fundamentals of vehicle design in class and apply the knowledge as they form teams and work on projects involving concept, specifications, structure, systems, integration, assembly, testing, etc. The class meets once a week to learn about the fundamentals, exchange their experiences, and coordinate between projects. The teams of 3-5 will work on their projects independently.

**ME 190. Ethical Issues in Mechanical Engineering. 4 Units.**

Moral rights and responsibilities of engineers in relation to society, employers, colleagues, and clients; cost-benefit-risk analysis, safety, and informed consent; whistle blowing; engineers as expert witnesses, consultants, and managers; ethical issues in engineering design, manufacturing, and operations, and engineering work in foreign countries; and ethical implications of the social and environmental contexts of contemporary engineering. Case studies and field research. Enrollment limited to 25 Mechanical Engineering majors.

**ME 191. Engineering Problems and Experimental Investigation. 1-5 Unit.**

Directed study and research for undergraduates on a subject of mutual interest to student and staff member. Student must find faculty sponsor and have approval of adviser.

**ME 191H. Honors Research. 1-5 Unit.**

Student must find faculty honors adviser and apply for admission to the honors program.nn (Staff).

**ME 199A. Practical Training. 1 Unit.**

For undergraduate students. Educational opportunities in high technology research and development labs in industry. Students engage in internship work and integrate that work into their academic program. Following internship work, students complete a research report outlining work activity, problems investigated, key results, and follow-up projects they expect to perform. Meets the requirements for curricular practical training for students on F-1 visas. Student is responsible for arranging own internship/employment and faculty sponsorship. Register under faculty sponsor's section number. All paperwork must be completed by student and faculty sponsor, as the Student Services Office does not sponsor CPT. Students are allowed only two quarters of CPT per degree program. Course may be repeated twice.

**ME 200. Judging Historical Significance Through the Automobile. 1 Unit.**

This seminar is for students to learn how to assess the impact of historical importance through the lens of the automobile. Students will participate in discussions about measuring and judging historical importance from a number of perspectives - engineering, aesthetic, historical, etc. They will then decide on criteria and use these to be a part of a judging team at the Pebble Beach Concours d'Elegance. The Pebble Beach event is the leading concours for automobiles in the United States. Using the criteria established by the students, the judging team, including the students, will decide the recipient of the Stanford/Revs Automotive History Trophy for 2015 and have the opportunity to present it on the lawn at Pebble Beach Lodge on August 16th. Must apply using this application: <http://revs.stanford.edu/course/703>. Must attend first class to be considered for acceptance, no exceptions.

**ME 201. Dim Sum of Mechanical Engineering. 1 Unit.**

Introduction to research in mechanical engineering for M.S. students and upper-division undergraduates. Weekly presentations by current ME Ph.D. and second-year fellowship students to show research opportunities across the department. Strategies for getting involved in a research project.

**ME 202. Mechaponics: Smart Phone-Enabled Mechatronic Systems. 3 Units.**

Explore the use of smartphones and tablets as enabling components within modern mechatronic systems. Emphasis on leveraging Android resources (user interface, communications, sensors) in combination with the Arduino microcontroller platform to design and build complex mechatronic devices. Topics include: basic Android application development, Android communications, sensors, Arduino, Arduino peripherals. Large, open-ended team project. Android device and programming hardware required. Limited enrollment. Prerequisites: ME210, ME218, or permission of instructor.

**ME 203. Design and Manufacturing. 4 Units.**

Integrated experience involving need finding, product definition, conceptual design, detail design, prototype manufacture, public presentation of outcomes, archiving and interpreting the product realization process and its results. Presents an overview of manufacturing processes crucial to the practice of design. Corequisite: 103D or CAD experience. Recommended: 101.

**ME 203X. Prototyping and Process Capture. 1 Unit.**

Concepts and methods for low resolution prototyping as an integral activity in engineering design process. Class meetings include presentations by faculty and design oriented exercises by students. Assignments will be Blog Posts. ME203X is designed to work in phase with ME203 and offers greater depth in prototyping strategy, technique, and resultant insights. Concurrent enrollment in ME203 is required. Enrollment is optional and capped at 6 students.

**ME 204A. Bicycle Design and Frame-Building. 1 Unit.**

Lecture/lab. The engineering and artistic execution of designing and building a bicycle frame. Fundamentals of bicycle dynamics, handling, and sizing. Manufacturing processes. Films, guest lecturers, field trips. Each student designs and fabricates a custom bicycle frame. This course is now a two part course series ME204A&B. Limited enrollment. Prerequisite: 203 or equivalent.

**ME 204B. Bicycle Design and Frame-Building. 3 Units.**

The engineering and artistic execution of designing and building a bicycle frame. The fundamentals of bicycle dynamics, handling, and sizing. Manufacturing processes. Films, guest lecturers, field trips. Each student designs a custom bicycle frame that they continue from ME204A in winter quarter. Limited enrollment, admission by consent of instructors. Attendance at first lecture is required. Both ME204A and ME204B must be taken. Prerequisite: 203 or equivalent.

**ME 205. Flexible Part Design. 3 Units.**

Project based course. Students design and fabricate tooling to create and refine elastomeric parts using RTV silicone rubber. Focus is on the development of elastomeric part design intuition through iteration. Fabrication techniques include manual/CNC machining and additive manufacturing, and molding liquid silicone. Prerequisites: ME203 or instructor consent. Recommended: ME318. Admission is by consent of the instructor. Class size limited to 10, must attend first lecture.

**ME 206A. Entrepreneurial Design for Extreme Affordability. 4 Units.**

Project course jointly offered by School of Engineering and Graduate School of Business. Students apply engineering and business skills to design product prototypes, distribution systems, and business plans for entrepreneurial ventures in developing countries for a specified challenge faced by the world's poor. Topics include user empathy, appropriate technology design, rapid prototype engineering and testing, social technology entrepreneurship, business modeling, and project management. Weekly design reviews; final course presentation. Industry and adviser interaction. Limited enrollment via application; see [extreme.stanford.edu](http://extreme.stanford.edu).

**ME 206B. Entrepreneurial Design for Extreme Affordability. 4 Units.**
