## Degree Requirements

A student with a minor in Art Practice must complete nine courses for a total of 36 units.

1. Three lower level courses (12 units) selected from:
- 2.

Select three of the following:

ARTSTUDI 13C Interactive Art: Making it with Arduino (meets WAY CE)

ARTSTUDI 13I Sound Art I (meets WAY CE)

ARTSTUDI 14C Drawing I (meets WAY CE)

ARTSTUDI 14I Plein Air Painting Now

ARTSTUDI 14E Painting I (meets WAY CE)

12

Units

ARTSTUDI 147	Artist's Book (meets WAY CE)	
ARTSTUDI 148	Monotype	
ARTSTUDI 148B	Introduction to Printmaking Techniques (meets WAY CE)	
ARTSTUDI 148D	DIGITAL PRINTMAKING	
ARTSTUDI 149	Etching	
ARTSTUDI 151	Sculpture I (meets WAY CE)	
ARTSTUDI 156	Installation Art in Time and Space	
ARTSTUDI 157	Art, Invention, Activism in the Public Sphere	
ARTSTUDI 160	Intro to Digital / Physical Design (meets WAY CE)	
ARTSTUDI 162	Embodied Interfaces	
ARTSTUDI 163	Drawing with Code	
ARTSTUDI 164	DESIGN IN PUBLIC SPACES	
ARTSTUDI 165	Social Media and Performative Practices	
ARTSTUDI 168	Data as Material	
ARTSTUDI 170	Introduction to Photography (meets WAY CE)	
ARTSTUDI 173	Cell Phone Photography (meets WAY CE)	
ARTSTUDI 174	Creativity in the Age of Facebook: Making Art for and from Networks (meets WAY CE)	
ARTSTUDI 177	Video Art I (meets WAY CE)	
ARTSTUDI 178	Art and Electronics (meets WAY CE)	
ARTSTUDI 179	Digital Art I (meets WAY CE)	

3. Three upper level courses (11 units):

a.		
	ARTSTUDI 230 Interdisciplinary Art Survey	4
b.		
	Select two of the following:	8
	ARTSTUDI 23 Intermedia Workshop	
	ARTSTUDI 24 Painting II	
	ARTSTUDI 25 Sculpture II	
	ARTSTUDI 25K Kinetic Sculpture	
	ARTSTUDI 26 Advanced Interaction Design	
	ARTSTUDI 26G Sculptural Screens / Malleable Media	
	ARTSTUDI 27 Advanced Photography Seminar	
	ARTSTUDI 27 The View Camera: Its Uses and Techniques	
	ARTSTUDI 27 Alternative Processes	
	ARTSTUDI 27F Introduction to Digital Photography and Visual Images	
	ARTSTUDI 27 The Photographic Book	
	ARTSTUDI 27P Project class: Digital and Analogue Projects in Photography	
	ARTSTUDI 27	
	ARTSTUDI 27B Intermediate Black and White Photography	
	ARTSTUDI 27 Digital Art II	
	ARTSTUDI 28 Art and Biology	

4. Three Art History Courses (13 units):

5.		
	Select two of the following:	8-10
	ARTHIST 143A American Architecture	4
	ARTHIST 160N The Sisters: Poetry & Painting	3
	ARTHIST 163 Queer America	4
	ARTHIST 171 Baudelaire to Bardot: Art, Fashion, and Film in Modern France	4
	ARTHIST 176 Feminism and Contemporary Art	4

	One other art history course	4-5
ARTHIST 1A	Introduction to the Visual Arts: Prehistoric through Medieval (highly recommended)	5
ARTHIST 1B	Introduction to the Visual Arts: History of Western Art from the Renaissance to the Present (highly recommended)	5
ARTHIST 100N	The Artist in Ancient Greek Society (meets WAY A-II)	3
ARTHIST 101	Introduction to Greek Art I: The Archaic Period	4
ARTHIST 102	Introduction to Greek Art II: The Classical Period (meets WAY A-II)	4
ARTHIST 106	Byzantine Art and Architecture, 300-1453 C.E.	4
ARTHIST 126	Post-Naturalist Painting	4
ARTHIST 182B	Cultures in Competition: Arts of Song-Era China	4
ARTHIST 186	Theme and Style in Japanese Art	4
ARTHIST 187	Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868	4
ARTHIST 203	Greek Art In and Out of Context	5
ARTHIST 208	Hagia Sophia	5
ARTHIST 210	Giotto	5
ARTHIST 217B	The Classical Theory of Architecture from Antiquity to the French Revolution	5
ARTHIST 278	Curating Africa: Anatomy of an Exhibition	5
ARTHIST 287	Pictures of the Floating World: Images from Japanese Popular Culture	5
ARTHIST 287A	The Japanese Tea Ceremony: The History, Aesthetics, and Politics Behind a National Pastime	5

**Units**

Courses may not be offered every year and are subject to change.

## Minor in Film and Media Studies

A minor in Film Studies requires four core courses and three elective courses for a total of seven courses. Courses must focus on film and use the method of film study towards completion of the minor; courses that use film to illustrate a cultural topic are not eligible. Film Production and Studio Art courses may not be used towards the requirements.

Upon declaring the minor, students are assigned an adviser with whom they plan their course of study and electives. A proposed course of study must be approved by the adviser and placed in the student's departmental file. Only one class may be taken for credit outside the Stanford campus, including Stanford Overseas Studies programs. Minors are required to attend an orientation session presented by the professional staff of the Art Library, which introduces the many tools of research and reference available on campus or through the Internet. This requirement should be completed no later than the quarter following the minor declaration.

## Degree Requirements

The minor in Film Studies requires seven courses for a minimum of 29 units.

Required Courses for the Minor

Units		Units
	FILMSTUD 4 Introduction to Film Study (meets WAY A-II)	5
	FILMSTUD 102 Theories of the Moving Image (meets WAY A-II)	4
	Select one of the following:	
	FILMSTUD 100B History of World Cinema II, 1930-1959 (meets WAY A-II)	4

FILMSTUD 100C	History of World Cinema III, 1960-Present (meets WAY A-II)	4
One course in a national cinema or an additional course in film history		4-5

### Elective Courses for the Minor

Three elective courses, which may include only one film production course. An elective can be chosen from courses in other departments only if approved by the Film Studies coordinator and core faculty for their stress on methods of film analysis. These may include courses in national cinemas, film genres, experimental and documentary film, or film theory.

Elective Courses		12-15
FILMSTUD 6	Introduction to Digital Media	5
FILMSTUD 115	Documentary Issues and Traditions	4
FILMSTUD 125	Horror Films	4
FILMSTUD 245B	History and Politics in Russian and Eastern European Cinema	5
FILMSTUD 250B	Bollywood and Beyond: An Introduction to Indian Film	3-5
FILMPROD 101T	Writing the Television Pilot	5
FILMPROD 103	Adaptation	4
FILMPROD 104	Screenwriting II: Intermediate Screenwriting	4
FILMPROD 105	Script Analysis	4
FILMPROD 114	Introduction to Film and Video Production (meets WAY CE)	5

## Coterminal Master of Arts in Art History

Stanford undergraduates, regardless of undergraduate major, who wish to pursue an M.A. in Art History may apply for the coterminal master's program. University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (p. 42)" section of the Bulletin. Additional information can be found in the "Applying to Coterm" (<http://studentaffairs.stanford.edu/registrar/students/coterm/applyingtocoterm>) section of the University Registrar's page. For University coterminal master's degree application forms, see the Registrar's Publications page (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/artandarthistory/%20https://studentaffairs.stanford.edu/registrar/publications/#Coterm>).

### Admission

Undergraduates must be admitted to the program and enrolled as a graduate student for at least one quarter prior to their B.A. conferral. A cumulative GPA of at least 3.5 in previous undergraduate work is required for admission; GRE test scores are not required. The department accepts applications once a year; the application deadline is January 15th for admission in the Spring quarter immediately following. There are no exceptions to this deadline. All application materials are submitted directly to the Art History graduate student services office. The department does not fund coterminal M.A. students. To apply for admission to the Art History coterminal M.A. program, students must submit the coterminal application and the following:

- Statement of Purpose (up to 1000 words, double-spaced);
- Current unofficial transcript;
- Application for Admission to Coterminal Master's Program;
- Preliminary Master's Program Proposal; this is a form in the application packet. Specify at least 45 units of course work relevant to the degree program with at least 40 units in Art History.
- Coterminal Course Approval Form (this form is required only if transferring courses from undergraduate to the graduate program at the time of application; students will be allowed to transfer courses between their undergraduate and graduate careers for a limited time).

To be eligible for transfer, courses must have been taken in the three quarters preceding admission to the M.A. program (please note that no courses taken earlier than Autumn quarter of sophomore year may count toward the M.A.).

- Two letters of recommendation from Stanford faculty familiar with the student's academic work, one of which must be from an Art History faculty member.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

### Degree Requirements

Requirements for the coterminal master's degree program include the following:

- Coterminal M.A. students are required to take 45 units of course work during their graduate career, of which at least 40 of these units must be in Art History courses (Note: One of these courses must be the art history methods graduate seminar; six of these Art History courses must be at the 300-400 level).
- All units for the coterminal M.A. must be taken at or above the 100 level; advanced-level course work is encouraged and a minimum of 20 units must be taken at the 200 level.
- M.A. Qualifying paper (this paper can be developed from a seminar paper).
- All courses taken for the Coterminal M.A. must be taken for a letter grade; achievement of an overall grade point average of 3.5 is required for the degree to be conferred.
- A faculty advisor appointed in the Department of Art & Art History in the first quarter of the Master's degree program.
- Students may transfer up to 10 units from their undergraduate career to count toward the M.A.; to be eligible for transfer, courses must have been taken in the three quarters prior to matriculation in the first graduate quarter of the M.A. program (please note that no courses taken earlier than Autumn quarter of sophomore year may count toward the M.A.).
- Undergraduate courses cannot be transferred for graduate credit after a student's B.A. is conferred.
- Submission of an approved Master's degree program proposal form by the last day of the first quarter of the Master's degree program.

- Students are responsible for knowing and adhering to University and Departmental policies, standards, and requirements for coterminal students.

## Master of Arts in Art History

University requirements for the M.A. are described in the "Graduate Degrees (p. 45)" section of this bulletin.

### Admission

The department offers M.A. and Ph.D. degrees, although the M.A. is only granted as a step toward fulfilling requirements for the Ph.D. The department does not admit students who wish to work only toward the M.A. degree. Please see the Ph.D. section for admissions information.

### Degree Requirements

#### Units

Completing a total of at least 45 units of graduate work at Stanford in the history of art in courses at the 200 level and above, including a seminar in art historiography/visual theory.

#### Languages

Reading knowledge of at least one foreign language, preferably German, French or Italian. Students in Chinese and Japanese art are ordinarily expected to demonstrate reading competence in modern and classical Chinese or Japanese, depending on the student's area of focus. Final determination of which foreign languages will fulfill the requirement is made in consultation with the student's primary adviser.

#### Papers

Submission of one paper from among those written during the year that demonstrates depth of research and capacity to build an argument. The paper should be perfected under the supervision of a member of the department faculty.

#### Area Coverage

Demonstration to the faculty, by course work and/or examination, that the student has adequate knowledge of the major areas of the history of art represented in the department curriculum.

## Master of Fine Arts in Art Practice (Studio)

University requirements for the M.F.A. are described in the "Graduate Degrees (p. 45)" section of this bulletin.

### Admission

The applicant must have a B.A., B.F.A., or B.S. from an accredited school. It is expected that the applicant will have a strong background in art practice, either an undergraduate degree or at least three years of independent studio practice. Students accepted to the program are admitted for the beginning of the following Autumn Quarter. No applicants for mid-year entrance are considered.

Portfolio Specifications—See the department's Graduate Admission (<https://art.stanford.edu/academics/graduate-programs/masters-program/how-apply>) web site for portfolio requirements.

### Fields of Study or Degree Options

Fields of study for the M.F.A. degree are offered in Painting, Sculpture, New Genres, and Photography. These fields of study are not declared on Axess; they are not printed on the transcript or the diploma.

## Degree Requirements

### Residency

Completing a minimum of two years (six academic quarters) of graduate work in residence at Stanford.

### Units

The student must complete 48 units of study. Students must discuss their programs of study with their academic adviser and the department's student services manager to ensure that an appropriate program of study is chosen.

### Seminar Requirement

Six quarters (36 units), which includes two weekly seminars (the Object Seminar and the Concept Seminar) and Studio Practice, which is an individual tutorial with a selected member of the faculty.

		Units
<b>First Year Seminar Requirements</b>		
ARTSTUDI 361	MFA First Year Seminar: Context	2
ARTSTUDI 342A	MFA: Object Seminar (2 units per quarter- Autumn and Winter)	4
ARTSTUDI 342B	MFA: Concept Seminar (2 units per quarter- Autumn and Winter)	4
ARTSTUDI 342C	M.F.A Seminar	2
ARTSTUDI 342	MFA Project: Tutorial (1 unit per quarter)	3
<b>Second-Year Seminar Requirements</b>		
ARTSTUDI 342A	MFA: Object Seminar (4 units per quarter- Autumn and Winter)	8
ARTSTUDI 342B	MFA: Concept Seminar (4 units per quarter- Autumn and Winter)	8
ARTSTUDI 342C	M.F.A Seminar	2
ARTSTUDI 342	MFA Project: Tutorial (1 unit per quarter)	3

### Elective Requirement

Three courses of academic electives (12 units) are required in the first year. These courses can be chosen from a large variety of disciplines in consultation with the Director of Graduate Studies.

### Faculty Reviews

The student is expected to pass four formal academic reviews conducted by the faculty. The purpose of these reviews is to evaluate development and to assess the progress of the student.

- At the end of the first quarter; any student judged to be making inadequate progress is placed on probation and requires an additional review at the end of the second quarter.
- At the end of the third quarter, at which time recommendation to proceed to the second year is determined.
- At the start of the fifth quarter. If the review is not satisfactory the student is placed on probation and an additional review is scheduled at the end of the 5th quarter.
- At the time of the M.F.A. exhibition.

### Thesis

The thesis consists of two portions: an exhibition at the end of the final quarter, and a written paper addressing the development of work completed over the two-year period at Stanford, to be completed during the fifth quarter. Both the written portion and participation in the M.F.A. exhibition at the end of the year are required.

### Graduate Student Teaching

Regardless of their source of funding, students are required to assist with the department's teaching program for a minimum of eight hours per week over the period of six quarters; the particulars of this assignment are at the department's convenience.

The Department reserves the right to make use of graduate paintings, sculptures, and photographs in exhibitions serving the interests of the graduate program.

Graduate students must remain in residence at Stanford for the duration (six academic quarters) of the program.

## Master of Fine Arts in Design

University requirements for the M.F.A. are described in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

### Admission

1. The applicant must have a B.A., B.F.A., or B.S. from an accredited school. It is expected that the applicant will have a strong background in studio art or design practice, either an undergraduate degree or at least three years of art or design studio practice.
2. Students accepted to the program are admitted for the beginning of the following Autumn Quarter. No applicants for mid-year entrance are considered.
3. Portfolio Specifications—See the department's Graduate Admission (<https://art.stanford.edu/academics/graduate-programs/mfa-design/mfa-design-admission>) web site for portfolio requirements.

### Fields of Study or Degree Options

Fields of study for the M.F.A. degree are offered in Design.

### Degree Requirements

#### Residency

The student must complete a minimum of two years (six academic quarters) of graduate work in residence at Stanford.

#### Units

The student must complete a minimum of 57 units of course work chosen in consultation with the Director of Graduate Studies in Design. Typically, students working for the M.F.A. degree are encouraged to take full advantage of both sides of the Joint Program in Design, as well as courses that tap the broader resources of the University.

### Required Courses

#### Required Courses

ARTSTUDI 350A	Art & Design I: History and Theory	3
ARTSTUDI 350B	Art & Design II: Personal Practice	3
ME 203	Design and Manufacturing	4
ME 277	Graduate Design Research Techniques	3-4
ME 311		3
ME 313	Human Values and Innovation in Design	3

Total Units

Units

19-20

### Thesis Requirements (18 units)

ME 316A	Product Design Master's Project	2-6
ME 316B	Product Design Master's Project	2-4
ME 316C	Product Design Master's Project	2-4
ARTSTUDI 360A	Design Masters Project I	4
ARTSTUDI 360B	Design Masters Project II	4

Note: Students must take ME 316 A, B & C for 3-4 units.

Total Units (minimum 18 units required)

Units

17-20

### Elective Course Distributions

Students are required to take six elective courses, which meet the following distributions and approvals:

1. All electives must be approved by the student's adviser prior to enrollment and are expected to form a coherent trajectory with a focus on Design.
2. All elective courses must be taken for a letter grade unless a letter grade is not offered; no more than two elective courses (6 units total) can be taken for CR/NC or S/NP and counted toward the Design M.F.A. program.
3. At least two electives must be ARTSTUDI courses (200 level or higher) and taken in addition to the required ARTSTUDI courses listed above.
4. The remaining four electives may be chosen from any the schools at the University (200 level or higher).
5. With approval of the advisor, electives at the 100 level may be taken in some circumstances. In no circumstance will course credits at the 200 level be less than 50% of the required credits.

### Other Requirements:

1. All students are required to complete and submit an acceptable program proposal to the department by the end of their first quarter of enrollment. This is done by submitting a Program Proposal Form approved and signed by the Design Director of Graduate Studies to the Student Services Manager (SSM). Approved changes to the program proposal may be submitted any quarter thereafter, but an updated signed Program Proposal form must be filed with the SSM by the Final Study List deadline of that quarter.
2. Design MFA candidates must participate in the faculty curated Design Show held during the second year of their studies. Attendance at the guest critique / walk-through of the show is also required. It is expected that students will also contribute to a show catalog if produced.
3. Students are expected to pass two faculty reviews. The purpose of these reviews is to evaluate and assess student participation and progress. These reviews are held in the spring quarter of the first year, and in the winter quarter of the second year. Any student judged to be making inadequate progress will be placed on probation and require an additional review at the end of the next quarter, or any time during that quarter the faculty deems necessary. Failure to pass the probationary review will result in dismissal from the program.
4. All students are expected to earn a grade of 'B' or better in each course and are required to maintain a GPA of 3.0 in all courses required for the degree. Failure to do so may result in probation or dismissal from the program.

## Master of Fine Arts in Documentary Film and Video

University requirements for the M.F.A. are described in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

### Admission

The program requires residency for two consecutive years. The admissions committee seeks applicants who have some work experience beyond their undergraduate years and can articulate why they want to learn documentary film and video production. The committee looks for evidence of the likelihood of success in a rigorous academic program that emphasizes creative work. The conceptual and technical skills required for documentary work are sufficiently different from fictional narrative to make the Stanford program inappropriate for students interested in narrative filmmaking. The program does not allow for deferred admission or a mid-year enrollment.

## Portfolio

The department requires a film or video work for which the applicant has had creative control. The sample work must be well labeled and accompanied by a brief synopsis, running time of the clips, the circumstances of production, and the applicant's role. Total running time for the work sample should not exceed 15 minutes and may consist of more than one project. Work on which the applicant had only a production assistant role is not appropriate for submission. Student work, however, is appropriate for consideration. Applicants who have had only minimal film or video production experience should submit an example of their best creative work in any medium.

Portfolio Specifications—See the department's Graduate Admission (<https://art.stanford.edu/academics/graduate-programs/mfa-documentary-film-and-video/mfa-documentary-film-and-video-admissions>) web site for portfolio requirements.

## Fields of Study or Degree Options

Fields of study for the M.F.A. degree are offered in Documentary Film.

## Degree Requirements

### Residency

Completing two years (six quarters) of graduate work in residence at Stanford.

### Units

A minimum of 76 units is required for the M.F.A. degree (students admitted to the Documentary Film and Video M.F.A. program prior to academic year 2015-16 fulfill the requirements in effect at the time of their admission). In the production core, students are required to conceptualize and visualize their ideas in a series of writing and producing courses that focus on documentary story structure. These courses are taken in tandem with project-based production courses that provide training in the technical and conceptual aspects of cinematography, sound recording, and editing. Discussion of form and content is a signature component of the writing and production courses. The production core is complemented by a series of required film studies courses in documentary plus elective courses in the history, aesthetics, ideology, and theory of all genres of moving image media. All courses must be taken for a letter grade.

### M.F.A. Thesis Project

In the second year of the program, each student produces a 15-20 minute documentary that constitutes the thesis project. In FILMPROD 405 Producing Practicum, students choose a topic, research and develop their project, and write a proposal for submission. A project may not begin production until the final proposal has been approved. Most of the production and post-production occurs (in Winter and Spring quarters) in:

	Units
FILMPROD 406A Documentary M.F.A. Thesis Seminar I	4
FILMPROD 406B Documentary M.F.A. Thesis Seminar II	4

### Required Courses

1. Core Production courses (32 units); core courses must be taken in sequence.

	Units
FILMPROD 400 Film/Video Writing and Directing	4
FILMPROD 401 Nonfiction Film Production	4
FILMPROD 402 Digital Video	4
FILMPROD 403 Advanced Documentary Directing	4
FILMPROD 404 Advanced Video Production	4
FILMPROD 405 Producing Practicum	4
FILMPROD 406A Documentary M.F.A. Thesis Seminar I	4

FILMPROD 406B Documentary M.F.A. Thesis Seminar II	4
--	---

2. Core Film Studies courses (16 units)

	Units
FILMSTUD 302 Theories of the Moving Image	4
FILMSTUD 315 Documentary Issues and Traditions	4
FILMSTUD 316 International Documentary	4
FILMSTUD 410 Documentary Perspectives I	4

3. Electives (to be chosen in consultation with the student's adviser)

	Units
Art History—one course	4
Studio Art and/or Communications—two courses	8
Film Studies—three courses	12
Choice Elective—one course	4

## Doctor of Philosophy in Art History

University requirements for the Ph.D. are described in the "Graduate Degrees (p. 45)" section of this bulletin. An expanded explanation of department requirements is given in the Art History Graduate Student Handbook.

## Admission

In addition to University requirements, the department requires a research paper of approximately 15-20 pages demonstrating the student's capacity to pursue independent investigation of an art historical problem as part of the application. All applicants must have been awarded a B.A., B.F.A., or B.S. from an accredited university.

## Degree Requirements

To be eligible for the doctoral degree, the student must complete a minimum of three years of full-time graduate work in Art History, at least two years of which must be in residence at Stanford. Doctoral students must complete a minimum of 135 units. Of these 135, the student must complete at least 100 units of graduate course work at the 200 level or above, including all required courses, with a minimum of 62 units in Art History lecture courses and seminars.

### 1. Collateral Studies

The student is required to take at least three courses in supporting fields of study (such as anthropology, classics, history, literature, or philosophy), determined in consultation with the department advisers. These courses are intended to strengthen the student's interdisciplinary study of art history.

### 2. Distribution Requirements

There are seven areas of distribution: 1) Pre-Modern (Ancient & Medieval), 2) Early Modern (Renaissance/Baroque), 3) 18th Century & 19th Century, 4) Modern/Contemporary, 5) Film, 6) Non-Western: Asia, Africa & Oceania, 7) Architectural History. Students must take at least one course in each of five different areas outside of the student's area of concentration. Students are required to fulfill the distribution requirement in graduate seminars. If students have entered the Stanford program with an M.A., they may transfer courses taken at the graduate level to fulfill up to two areas of the distribution requirement.

### 3. Language Requirement

Students in Western Art must demonstrate reading knowledge of two foreign languages. Students in Asian Art are required to demonstrate competence in one Asian language (equivalent to three years of study) and at least one year of study in a second (which may be a classical version of Chinese or Japanese). One of the language requirements should be satisfied by the end of the first year while the second should be fulfilled by the end of the second year. Students

entering with a M.A. should already have satisfied one language requirement prior to admission. Foreign language requirements for the Ph.D. are fulfilled by taking the reading examination given each quarter by the various language departments.

#### 4. Graduate Student Teaching

As a required part of their training, graduate students in Art History, regardless of their source of funding, must participate in the department's teaching program.

- a. Students are required to take ARTHIST 405A: Graduate Pedagogy.
- b. Students are required to serve as a teaching assistant for a minimum of four quarters. Further opportunities for teaching may be available.
- c. At least one, one-quarter assignment in a course from the following list:
  - i

ARTHIST 1A	Introduction to the Visual Arts: Prehistoric through Medieval	5
ARTHIST 1B	Introduction to the Visual Arts: History of Western Art from the Renaissance to the Present	5
ARTHIST 2	Asian Arts and Cultures	5
ARTHIST 3	Introduction to World Architecture	5
FILMSTUD 4	Introduction to Film Study	5

#### 5. Admission to Candidacy

A graduate student's progress is formally reviewed at the end of Spring Quarter of the second year. The applicant for candidacy must assemble a candidacy file showing that he/she has completed the requirements governing the M.A. program in the History of Art (see above), and an additional 18-24 units by the end of Winter Quarter of the second year. The graduate student does not become a formal candidate for the Ph.D. degree until he/she has fully satisfied these requirements and has been accepted as a candidate by the department faculty.

#### 6. Area Core Examination (ACE)

All graduate students conceptualize an area core and bibliography in consultation with their primary adviser and two other Stanford faculty members, one of whom is drawn from a field other than Art History, or, if in Art History, has expertise outside of the student's main area of interdisciplinary concentration. Students are required to pass an area core examination, in either written or oral form, during (or before) Winter Quarter of the third year of study. To prepare for the exam, students may enroll in the 5-unit reading course:

ARTHIST 620	Area Core Examination Preparation	5
-------------	-----------------------------------	---

#### 7. Dissertation Colloquium

The dissertation colloquium provides an opportunity for the PhD student to share an aspect of her/his dissertation project with the departmental community at large. Colloquium talks should be presented during the early stages of researching and writing, allowing students to incorporate useful feedback from professors and colleagues into their completed dissertation. The colloquium consists of a 30-minute presentation followed by 30 minutes devoted to questions and answers. The presentation should give some attention to the broader issues of the dissertation topic along with a substantial treatment of one part of the project. At least two members of the student's Reading Committee must attend.

#### 8. Dissertation and Oral Defense Requirements

- a. *Reading Committee:* After passing the Area Core Examination (ACE), each student is responsible for the formation of a dissertation reading committee consisting of a principal adviser,

who chairs the reading committee, and three readers. Normally, at least two of the three readers are drawn from the department and one may come from outside the department.

- b. *Dissertation Proposal:* By the beginning of Autumn Quarter in the fourth year, students should have identified a dissertation subject and written a proposal in consultation with their principal adviser. To prepare the proposal, students may take:
  - i one 5-unit independent study course:

ii	ARTHIST 640	Dissertation Proposal Preparation	5
----	-------------	-----------------------------------	---

- iii and apply for a funded Summer Quarter to research and write the proposal. The proposal is submitted for approval by the Art History faculty at the beginning of the fourth year for comments. In the event that a proposal is not approved, the faculty establishes conditions for its resubmission and reconsideration at a later date.

#### Units

- c. *Dissertation:* The final draft of the dissertation must be in all the readers' hands at least four weeks before the date of the oral defense. The dissertation must be completed within five years from the date of the student's admission to candidacy for the Ph.D. degree. A candidate taking more than five years must apply for an extension of candidacy.
- d. *Oral Defense Examinations:* The student arranges an oral examination with the four members of the reading committee and a chair of the oral defense chosen from outside the department. The oral examination consists mainly of a defense of the dissertation but may range, at the committee's discretion, over a wider field. The student is expected to discuss research methods and findings at some length and to answer all questions and criticisms put by members of the examining committee. At the end of the defense, the committee votes to pass or fail the student on the defense. The committee may make recommendations for changes in the dissertation manuscript before it is submitted to the University as the final requirement for the granting of the Ph.D. degree in the History of Art. After these changes have been incorporated, the manuscript is given a final review and approval by the student's principal adviser.

## Ph.D. Minor in Art History

For a minor in Art History, a candidate is required to complete 24 units of graduate-level Art History courses (300 level or above).

*Emeriti:* (Professors) Keith Boyle, Kristina Branch, Wanda M. Corn, David Hannah, Joel Leivick, Suzanne Lewis, Dwight C. Miller, Kristine Samuelson, Paul V. Turner, Bryan Wolf

#### Units

*Chair:* Alexander Nemerov

*Area Director for Art History:* Alexander Nemerov

*Area Director for Film and Media Studies:* Pavle Levi

*Area Director for Art Practice:* Gail Wight

*Director of Undergraduate Studies in Art History:* Jody Maxmin

*Director of Undergraduate Studies in Art Practice:* Terry Berlier

*Director of Undergraduate Studies in Film and Media Studies:* Jean Ma

*Director of Graduate Studies in Art History:* Richard Meyer

*Director of Graduate Studies in Art Practice:* Paul DeMarinis

*Director of Graduate Studies in Documentary Film:* Jamie Meltzer

Academic Director for Stanford Graduate Design Program: Camille Utterback

Director of Honors Program: Adam Tobin

Writing Specialist: Gabrielle Ann Moyer (Lecturer, Program in Writing and Rhetoric)

Professors: Scott Bukatman (Film Studies), Enrique Chagoya (Painting/Drawing/Printmaking), Paul DeMarinis (Electronic Media), Jan Krawitz (Documentary Film), Pamela M. Lee (Contemporary Art), Michael Marrinan (18th- and 19th-century European Art), Richard Meyer (American Art), Alexander Nemerov (American Art), Nancy J. Troy (Modern Art), Richard Vinograd (Chinese Art), Xiaoze Xie (Painting/Drawing)

Associate Professors: Terry Berlier (Sculpture), Pavle Levi (Film Studies), Jean Ma (Film Studies), Jody Maxmin (Ancient Art), Jamie Meltzer (Documentary Film), Bissera Pentcheva (Medieval Art), Gail Wight (Electronic Media)

Assistant Professors: Fabio Barry (Architectural History), Jonathan Calm (Photography), Srdan Keca (Documentary Film), Camille Utterback (Design)

Senior Lecturer: Adam Tobin (Screenwriting)

Lecturers: Robert Dawson (Photography), Yvette Deas (Painting and Drawing), Lukas Felzmann (Photography), Elizabeth Kessler (Art History)

Affiliated Professor: John H. Merryman (Law, emeritus)

## Overseas Studies Courses in Art History

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPBER 17	Split Images: A Century of Cinema	3-4
OSPBER 60	Cityscape as History: Architecture and Urban Design in Berlin	5
OSPFLOR 34	The Virgin Mother, Goddess of Beauty, Grand Duchess, and the Lady: Women in Florentine Art	4
OSPFLOR 48	Sharing Beauty in Florence: Collectors, Collections and the Shaping of the Western Museum Tradition	4
OSPFLOR 54	High Renaissance and Mannerism: the Great Italian Masters of the 15th and 16th Centuries	4
OSPFLOR 58	Space as History: Social Vision and Urban Change	4
OSPFLOR 111Y	From Giotto to Michelangelo: The Birth and Flowering of Renaissance Art in Florence	4
OSPFLOR 115Y	Building the Cathedral and the Town Hall: Constructing and Deconstructing Symbols of a Civilization	4
OSPMADRD 45	Women in Art: Case Study in the Madrid Museums	4
OSPOXFRD 15	British Architecture and the Renaissance: 1500-1850	4-5
OSPOXFRD 221Y	Art and Society in Britain	4-5

OSPSPARIS 54	The Artist's World: The Workshop, Patronage and Public in 19th and 20th Century France	4
OSPSPARIS 72	The Ceilings of Paris	4
OSPSPARIS 92	Building Paris: Its History, Architecture, and Urban Design	4

## Overseas Studies Courses in Art Practice

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPFLOR 41	The Florentine Sketchbook: A Visual Arts Practicum	4
OSPFLOR 55	Academy of Fine Arts: Studio Art	1-5
OSPFLOR 71	A Studio with a View: Drawing, Painting and Informing your Aesthetic in Florence	4
OSPMADRD 46	Drawing with Four Spanish Masters: Goya, Velazquez, Picasso and Dali	3
OSPSPARIS 42	EAP: Drawing with Live Models	2
OSPSPARIS 43	EAP: Painting and Use of Color	2
OSPSPARIS 44	EAP: Analytical Drawing and Graphic Art	2

## Overseas Studies Courses in Film

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPBEIJ 17	Chinese Film Studies	4
OSPBER 17	Split Images: A Century of Cinema	3-4
OSPFLOR 11	Film, Food and the Italian Identity	4
OSPFLOR 49	On-Screen Battles: Filmic Portrayals of Fascism and World War II	5
OSPFLOR 67	The Celluloid Gaze: Gender, Identity and Sexuality in Cinema	4

## Astronomy

Astronomy courses are offered primarily through the Physics department, with subject code PHYSICS on the Stanford Bulletin's ExploreCourses website.

Although Stanford University does not have a degree program in astronomy or astrophysics, teaching and research in various branches

of these disciplines are ongoing activities in the departments of Applied Physics, Electrical Engineering, and Physics.

For the convenience of students interested in astronomy, astrophysics, and cosmology, a course program for undergraduate and graduate study is listed in the "Astronomy Cognate Courses (p. 348)" section of this bulletin. The list includes introductory courses for the student who wishes to be informed about the fields of astronomy without the need for prerequisites beyond high school algebra and physics. Courses in astronomy numbered below 100 are designed to serve this group of students. Astronomy courses numbered 100-199 serve the student interested in an initial scientific study of astronomy. The courses numbered 200 and above are for graduate students and advanced undergraduates, subject to prior approval by the course instructor.

## Undergraduate Programs in Astronomy

The University does not offer a separate undergraduate major in Astronomy. Students who intend to pursue graduate study in astronomy or space science are encouraged to major in physics, following the advanced sequence if possible, or in electrical engineering if the student has a strongly developed interest in radiosience. The course descriptions for these basic studies are listed under the appropriate department sections of this bulletin. Students desiring guidance in developing an astronomy-oriented course of study should contact the chair of the Astronomy Program Committee. The following courses are suitable for undergraduates and are recommended to students considering advanced study in astronomy or astrophysics:

		Units
PHYSICS 100	Introduction to Observational Astrophysics	4
PHYSICS 160	Introduction to Stellar and Galactic Astrophysics	3
PHYSICS 161	Introduction to Cosmology and Extragalactic Astrophysics	3
GS 222	Planetary Systems: Dynamics and Origins	3-4
PHYSICS 262	General Relativity	3

The above-mentioned courses are required for physics majors who choose the curriculum with a concentration in astrophysics (see the "Physics (p. 582)" section of this bulletin).

### Stanford Student Observatory

The student observatory, located in the hills to the west of the campus, is equipped with a 24-inch and other small reflecting telescopes. It is used for instruction of the observation-oriented courses, PHYSICS 50 Observational Astronomy Laboratory and PHYSICS 100 Introduction to Observational Astrophysics.

The Department of Physics offers a minor in Physics with a concentration in Astronomy.

## Minor in Physics with Concentration in Astronomy

Students wishing to pursue advanced work in astrophysical sciences should major in Physics (p. 584) and concentrate in astrophysics. However, students outside of Physics with a general interest in astronomy may organize their studies by completing one of the following Physics minor concentration programs.

Students who take the 20, 40, or 60 series at Stanford in support of their major may count those units towards the minor.

An undergraduate Physics minor with a concentration in Astronomy requires the following courses:

## Non-Technical

For students whose majors do not require the PHYSICS 40 or 60 series:

		Units
PHYSICS 21	Mechanics, Fluids, and Heat	4
PHYSICS 23	Electricity, Magnetism, and Optics	4
PHYSICS 25 & PHYSICS 26	Modern Physics and Modern Physics Laboratory	4
PHYSICS 50 or PHYSICS 10	Observational Astronomy Laboratory (Introduction to Observational Astrophysics)	3-4
Select two of the following:		6
PHYSICS 15	Stars and Planets in a Habitable Universe	
PHYSICS 16	The Origin and Development of the Cosmos	
PHYSICS 17	Black Holes and Extreme Astrophysics	
Total Units		21-22

## Technical

For students whose majors require the PHYSICS 40 or 60 series:

		Units
Select one of the following Series:		14-17
Series A		
PHYSICS 41	Mechanics	
PHYSICS 43	Electricity and Magnetism	
PHYSICS 45 & PHYSICS 46	Light and Heat and Light and Heat Laboratory	
PHYSICS 70	Foundations of Modern Physics	
Series B		
PHYSICS 61	Mechanics and Special Relativity	
PHYSICS 63	Electricity, Magnetism, and Waves	
PHYSICS 65	Quantum and Thermal Physics	
PHYSICS 67	Introduction to Laboratory Physics	
And take the following three courses:		
PHYSICS 100	Introduction to Observational Astrophysics	4
PHYSICS 160	Introduction to Stellar and Galactic Astrophysics	3
PHYSICS 161	Introduction to Cosmology and Extragalactic Astrophysics	3
Total Units		24-27

Students are also encouraged to take the electricity and magnetism/optics lab of the appropriate PHYSICS series, PHYSICS 24, PHYSICS 44 or PHYSICS 64 for 1 additional unit.

## Graduate Programs in Astronomy

Graduate programs in astronomy and astrophysics and related topics are carried out primarily in the Department of Physics but also the departments of Applied Physics and Electrical Engineering. Students should consult the course listings, degree requirements, and research programs of these departments for more detailed information.

Graduate research opportunities are available in many areas of theoretical and observational astronomy. For further information, see the Kavli Institute of Particle Astrophysics and Cosmology (<http://kipac.stanford.edu>) website.

**Students planning to conduct research in astronomy and astrophysics should take:**

Select one of the following:	3
PHYSICS 361	Cosmology

PHYSICS 362	Advanced Extragalactic Astrophysics and Cosmology	
<b>Students lacking a background in astrophysics, gravitation, and plasma physics should take:</b>		
PHYSICS 260	Introduction to Stellar and Galactic Astrophysics	3
PHYSICS 261	Introduction to Cosmology and Extragalactic Astrophysics	3
PHYSICS 262	General Relativity	3
PHYSICS 312	Basic Plasma Physics (Not offered 2015-16)	3
<b>Students with special interests in gravitation should take:</b>		
PHYSICS 364	Advanced Gravitation (Not offered 2014-15)	3

Each year a number of "special topics" course are offered. Refer to courses in the PHYSICS 360 range for more details. Students interested in research programs in space physics involving spacecraft studies of the planets, their satellites, and their near-space environments should see the "Center for Space Science and Astrophysics (p. 720)" section of this bulletin.

*Emeriti: (Professors)* Von R. Eshleman, Peter A. Sturrock, G. Leonard Tyler, Robert V. Wagoner

*Professors:* Roger Blandford (Physics, SLAC), Pat Burchat (Physics), Blas Cabrera (Physics), Sarah Church (Physics), Kent Irwin (Physics, SLAC), Steven Kahn (Physics, SLAC), Chao-Lin Kuo (Physics, SLAC), Bruce Macintosh (Physics), Peter Michelson (Physics), Vahé Petrosian (Physics, Applied Physics), Roger W. Romani (Physics)

*Associate Professors:* Steve Allen (Physics, SLAC), Tom Abel (Physics, SLAC), Chao-Lin Kuo (Physics, SLAC), Risa Wechsler (Physics, SLAC)

*Professor (Research):* Philip H. Scherrer (Physics)

## Astronomy Cognate Courses

### Elementary Lectures

The following courses provide a descriptive knowledge of astronomical objects and astrophysics. PHYSICS 15, PHYSICS 16, and PHYSICS 17 are for students not majoring in the sciences and are taught in different quarters by different instructors, and may be taken individually or in any order.

		Units
PHYSICS 15	Stars and Planets in a Habitable Universe	3
PHYSICS 16	The Origin and Development of the Cosmos	3
PHYSICS 17	Black Holes and Extreme Astrophysics	3

### Observatory

The following courses allow students to use the on-campus Stanford Student Observatory, and are intended to familiarize students with observational methods and analysis of astronomical data. PHYSICS 50 is for general students, while PHYSICS 100 involves more advanced observations and is intended for students with a college level background in physics.

		Units
PHYSICS 50	Observational Astronomy Laboratory	3
PHYSICS 100	Introduction to Observational Astrophysics	4

### Advanced Undergraduate

The following courses are for students with a more advanced knowledge of basic physics and mathematics, and form the core courses for a concentration in astrophysics for Physics majors.

		Units
PHYSICS 160	Introduction to Stellar and Galactic Astrophysics	3
PHYSICS 161	Introduction to Cosmology and Extragalactic Astrophysics	3

### Graduate

		Units
GES 222		3-4
PHYSICS 260	Introduction to Stellar and Galactic Astrophysics	3
PHYSICS 261	Introduction to Cosmology and Extragalactic Astrophysics	3
PHYSICS 262	General Relativity	3
PHYSICS 301	Astrophysics Laboratory (Not offered 2014-15)	3
PHYSICS 312	Basic Plasma Physics (Not offered 2014-15)	3
PHYSICS 361	Cosmology (Not offered 2014-15)	3
PHYSICS 362	Advanced Extragalactic Astrophysics and Cosmology (Not offered 2014-15)	3

## Athletics, Physical Education, and Recreation

Courses offered through the Department of Athletics, Physical Education, and Recreation are listed under the subject code ATHLETIC (<https://explorecourses.stanford.edu/search?view=catalog&academicYear=&page=0&q=ATHLETIC&filter-departmentcode=ATHLETIC=on&filter-coursestatus=Active=on>), OUTDOOR (<https://explorecourses.stanford.edu/search?view=catalog&academicYear=&page=0&q=OUTDOOR&filter-departmentcode=OUTDOOR=on&filter-coursestatus=Active=on>), PE (<https://explorecourses.stanford.edu/search?view=catalog&academicYear=&page=0&q=PE&filter-departmentcode=PE=on&filter-coursestatus=Active=on>), and WELLNESS (<https://explorecourses.stanford.edu/search?view=catalog&academicYear=&page=0&q=WELLNESS&filter-departmentcode=WELLNESS=on&filter-coursestatus=Active=on>) on the Stanford Bulletin's ExploreCourses (<https://explorecourses.stanford.edu/browse>) web site. Most courses are activity classes and carry 1 unit of credit for satisfactory completion of work. Although there is no limitation on the number of activity classes in which a student may enroll, no more than 8 units of these activity classes (and/or other University activity classes) may be applied toward undergraduate graduation requirements. See the "Credit (p. 32)" tab of the "Undergraduate Degrees (p. 23)" section of this bulletin for complete information. Course fees, as applicable, are posted to the student's University account.

## Department of Athletics, Physical Education, & Recreation Mission

From its founding in 1891, Stanford University's leaders have believed that physical activity is valuable for its own sake and that vigorous exercise is complementary to the educational purposes of the University. Within this context for human development, it is the mission of Stanford's Department of Athletics, Physical Education, and Recreation to offer a wide range of high quality programs which will encourage and facilitate all participants to realize opportunities for championship athletic participation, physical fitness, health, and well being.

The mission of Stanford Recreation is to provide a balanced and holistic approach to the growth and wellness of our students, faculty, and staff by delivering best-in-class co-curricular programs and resources.

The department's classes and programs aim to promote understanding of the value and role of physical activity as an important dimension of the human condition, to develop performance skills in sport, to develop

the habit of participation, and to provide leadership opportunities in aquatics, sports, and other physical activities. To this end, the program encompasses a diversity of learning and participating opportunities from informal recreation through organized intramural competition, basic instructional classes, and theoretical study to, and including, intercollegiate athletic competition.

There are no degree programs currently offered in Athletics, Physical Education, and Recreation.

## Facilities

Athletic facilities are located throughout campus. They include, but are not limited to Arrillaga Center for Sport and Recreation (Squash, Fencing, fitness & physical education facility for students, faculty, & staff), Arrillaga Family Sports Center (Home to DAPER), Arrillaga Outdoor Education & Recreation Center (Outdoor Education, Avery Recreation Pool, fitness & Physical Education facility for students, faculty & staff), Avery Aquatic Center (Swimming & Diving, Water Polo, Synchronized Swimming), Bill & Joyd Smith Family Stadium (Softball), Burnham Pavillion & Ford Center (Gymnastics, Volleyball), Cobb Track and Angell Field (Track & Field), Klein Field at Sunken Diamond (Baseball), Laird Q. Cagan Stadium at Maloney Field (Soccer, Lacrosse), Maples Pavillion (Basketball, Volleyball), Red Barn (Equestrian), Siebel Varsity Golf Training Complex (Golf), Stanford Campus Recreation Association (Stanford's community center for faculty, senior staff and their families), Stanford Golf Course (Golf, Cross Country), Stanford Rowing & Sailing Center (Rowing, Sailing, Lightweight Rowing), Stanford Stadium (Football), Steuber Rugby Stadium & Doyle Family Clubhouse (Rugby), Taube Family Tennis Center (Tennis), West Campus Tennis Courts, Varsity Field Hockey Turf (Field Hockey), Sand Hill Intramural Fields, Roble Field, Tresidder Fitness Center, Manzanita Basketball Court and Field.

## Lockers

Lockers are available for rent to faculty/staff and students at the Arrillaga Outdoor Education Recreation Center, Arrillaga Family Sports Center, and the Ford Center.

## Contacts

Office: Arrillaga Family Sports Center

 Web Site: <http://clubsports.stanford.edu> (<http://clubsports.stanford.edu>)  
 Web Site: <http://smap.stanford.edu> (<http://smap.stanford.edu>)

Courses offered by Athletics are listed under the subject code ATHLETIC (<https://explorecourses.stanford.edu/search?view=catalog&academicYear=&page=0&q=ATHLETIC&filter-departmentcode=ATHLETIC=on&filter-coursestatus=Active=on>) on the Stanford Bulletin's ExploreCourses (<https://explorecourses.stanford.edu/browse>) web site.

## Athletics Programs

### Intercollegiate Athletics

In keeping with American university tradition, Stanford offers a broad intercollegiate athletic program. The objectives are to provide the opportunity to compete at the highest possible level without jeopardizing the integrity of the individual or the institution; to adhere strictly to all University, association, and conference rules governing athletic participation; and to encourage effectively the achievement of academic goals by student athletes at the same rate as other University students.

As a member of the National Collegiate Athletic Association (NCAA), Stanford fields both men's and women's varsity teams. Those for men are baseball, basketball, crew, cross country, fencing, football, golf,

gymnastics, sailing, soccer, swimming and diving, tennis, track and field, volleyball, water polo, and wrestling. Those for women are basketball, crew, cross country, fencing, field hockey, golf, gymnastics, lacrosse, sailing, soccer, softball, squash, swimming and diving, synchronized swimming, tennis, track and field, volleyball, sand volleyball and water polo. Both men's and women's teams are affiliated with the Pacific Twelve Conference. Additional or alternative intercollegiate athletic competition is available for all teams.

## Club Sports Program

Stanford Club Sports supports intercollegiate competition for non-varsity Club Sports teams at the highest level by providing opportunities for student leadership development as well as appropriate resources to support team and individual success in development, training, and competition. The program is actively supervised by the Associate Director for Recreation Sports and Physical Education, along with the Coordinator for Club Sports and Intramural Sports but the emphasis is for team operations to be student-driven. Students who are returning and committed members of teams that meet the criteria for inclusion in the formal curriculum may register for units of credit, subject to the University's Activity unit (p. 32) policy, for Athletics, Physical Education & Recreation.

## Martial Arts Program

The Stanford Martial Arts Program (SMAP) is an umbrella organization that supports the various member martial arts groups on campus. Its main goals are to educate the Stanford community through outreach programming about the variety of martial arts instruction on campus, serve as a centralized communications network among the different groups, and preserve the martial arts as a vital and distinctive component of Stanford life. Academic credit, subject to the University's Activity unit (p. 32) policy, is offered for participation in SMAP classes in accordance with the department's Physical Education guidelines.

## Directors

*Director, Academic Services Student Athletes:* Austin D. Lee

*Associate Director for Recreation Sports and Physical Education:* Pam Mahlow

*Stanford Martial Arts Program:* Tim Ghormley

 Phone: (650) 723-7686  
 Web Site: <http://cardinalrec.stanford.edu/pe-classes> (<http://cardinalrec.stanford.edu/pe-classes>)  
 Email: [tlillie@stanford.edu](mailto:tlillie@stanford.edu)

Courses offered by Physical Education are listed under the subject code PE (<https://explorecourses.stanford.edu/search?view=catalog&academicYear=&page=0&q=PE&filter-departmentcode=PE=on&filter-coursestatus=Active=on>) on the Stanford Bulletin's ExploreCourses (<https://explorecourses.stanford.edu/browse>) web site.

## Physical Education

Being active, relieving stress, creating socially interactive environments and having fun are a few of the objectives we have for our Physical Education program.

## Physical Education Mission

The goal of the program is to provide undergraduates and graduate students with opportunities to learn new skills and concepts through a variety of non-competitive lifelong physical activity courses such as:

fitness, weight training, aquatics, racquet sports, dance, golf, sailing, horsemanship, indoor rock climbing, etc. These courses are tailored to help students learn and develop their physical fitness and motor skills, as well as create a positive attitude toward well-being and physical activity which enable students to live a healthy, active lifestyle.

## Learning Outcomes

Physical Education offers courses applicable to a variety of environments and experiences across campus and in life and pair well with academic and group work. Learning outcomes include:

- Understanding of appropriate warm-up and cool-down routines
- Identify health related components of fitness (cardiovascular endurance, muscular strength and endurance, and flexibility)
- Understanding of basic anatomical terminology and proper stretching technique
- Make intelligent choices that contribute to a healthy, active lifestyle

## Directors

*Associate Director of Health and Human Performance:* Chris Pelchat, Ph.D.

*Assistant Director of Physical Education:* Tia Lillie, Ph.D.

## Teaching Specialists (Activity Class Instructors)

Tia Lillie (Fitness/Swim), Stacie Lonaker (Swimming), Phil Marrone (Golf), Ying Mitchell (Yoga/Pilates), Olivia Palmer (Lifeguarding), Tamar Petrosian (Fitness), Tom Sarsfield (Tennis/Table Tennis), Bernardo Tapia (Fitness), Matt Thornton (Tennis/Golf)

## Contacts

Office: Arrillaga Outdoor Education & Recreation Center  
Mail Code: 94305-6151  
Phone: (650) 498-0766  
Web Site: <http://hhp.stanford.edu/oe>  
Email: [outdoored@stanford.edu](mailto:outdoored@stanford.edu)

Courses offered by Outdoor Education are listed under the subject codes OUTDOOR (<https://explorecourses.stanford.edu/search?view=catalog&academicYear=&page=0&q=OUTDOOR&filter-departmentcode-OUTDOOR=on&filter-coursestatus-Active=on>) and SURG (<https://explorecourses.stanford.edu/search?view=catalog&academicYear=&q=SURG&filter-departmentcode-SURG=on&filter-coursestatus-Active=on&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&page=0>) on the Stanford Bulletin's ExploreCourses (<https://explorecourses.stanford.edu/browse>) web site.

## Outdoor Education Mission

Outdoor Education's purpose is to develop visionary outdoor educational leaders who are prepared to be agents of change in the world, whether in a wilderness context or a context where these transferable skills are implemented. Courses completed in OUTDOOR and SURG could lead to a national certificate in Outdoor Education.

## Facilities

Courses and experiential education take place in the Arrillaga Outdoor Education and Recreation Center, the Outdoor House community space, and the outdoors. The Outdoor Center (AOERC) hosts access to equipment, class and lecture area, a resource library, climbing center and indoor climbing facility, meeting and trip-planning space. Field experiences facilitate a variety of outdoor and adventure disciplines, and vary in locale both near and far from campus.

## Learning Outcomes

Outdoor Education offers co-curricular courses applicable to a variety of environments and experiences across campus and in life. Outdoor Education expects student exposure to the following learning outcomes:

- Introduction to the environment through outdoor recreation activities
- Empowerment to move beyond self-imposed limitations
- Development of effective team building and leadership skills
- Education about the environment and sustainability
- Training for critical thinking, and the ability to identify risks and make sound decisions
- Exploration and attainment of new skills which merge outside of the classroom

## Directors

*Associate Director of Health and Human Performance:* Chris Pelchat

*Coordinator of Outdoor Education:* Antja Thompson

## Teaching Specialists

*Teaching Specialists:* Peter Wright, Phil Sandlin, Chris Pelchat, Kelsey McCabe, Kevin Hopper, Antja Thompson, Andrew De Torres, Patrick Noble, Joel Reid

Email: [tlillie@stanford.edu](mailto:tlillie@stanford.edu)

Courses offered by Wellness Education are listed under the subject code WELLNESS (<https://explorecourses.stanford.edu/search?view=catalog&academicYear=&page=0&q=WELLNESS&filter-departmentcode-WELLNESS=on&filter-coursestatus-Active=on>) on the Stanford Bulletin's ExploreCourses (<https://explorecourses.stanford.edu/browse>) web site.

## Wellness Education Mission

Stanford WellnessEd is the student wellness education program at Stanford. The WellnessEd curriculum is designed to inspire students to be the healthiest versions of themselves possible in the cognitive, emotional, social, and physical realms of wellness. The hallmark of the WellnessEd methodology for individual and community change is embodied in its motto: "Learn, Apply, Transform." Program instructors teach students the latest research-based wellness ideas and strategies. Resourced with this learning, students are supported in applying these practical wellness strategies to their own lives, thereby transforming their quality of living and impacting their social spheres in positive ways. In short, WellnessEd trains wellness change agents who change themselves in order to impact the world around them in meaningful ways.

## Learning Outcomes

WellnessEd offers a range of research-based theory and practice classes in the areas of wellness and flourishing. These courses teach ideas and skills that enhance cognitive, emotional, and social wellness across the full variety of environments that students experience. Though we do not offer a degree program, for students who want to deepen their wellness education, we also offer a Wellness Certificate with a 5 course curriculum.

- Understand the core components of an integrated emotional-social-physical perspective of human wellness.
- Investigate and apply research based strategies for enhancing flourishing and resilience.
- Conceptualize optimal performance as a balance between achievement and wellness.
- Learn the latest findings in the mind-brain-body system and its impact of human achievement and health.

## Directors

*Associate Director for Health and Human Performance:* Chris Pelchat

*Coordinator of Wellness Education:* TBA

## Teaching Specialists

Aneel Chima, Marlene Bjornsrud, Monica Hanson, Carley Hauck, Fred Luskin, Carole Pertofsky, Shani Robins, Rev. Joanne Sanders, Sonya Soohoo, Clyde Wilson

## Directors

*Athletic Director:* Bernard Muir

*Senior Associate Athletic Director /Senior Woman Administrator:* Beth Goode

*Senior Associate Athletic Director, External Relations:* Kevin Blue

*Senior Associate Athletic Director, Intercollegiate Sports:* Earl Koberlein

*Senior Associate Athletic Director, Physical Education, Recreation, and Wellness:* Eric Stein

*Senior Associate Athletic Director, CFO:* Brian Talbott

## Biology, Hopkins Marine Station

Courses offered by the Hopkins Marine Station are listed under the subject code BIOHOPK on the Stanford Bulletin's ExploreCourses web site.

The Hopkins Marine Station, located 90 miles from the main University campus in Pacific Grove, was founded in 1892 as the first marine laboratory on the west coast of North America. The modern laboratory facilities on the 11-acre campus on Cabrillo Point house nine faculty, all members of the Department of Biology. The Miller Library has a collection of literature in marine science. The Hopkins faculty offers undergraduate and graduate courses in biology which focus on the marine realm and involve topics including oceanography, environmental and comparative physiology, molecular evolution, biomechanics, cellular biology, conservation biology, and neurobiology and behavior. Most courses have laboratory sections that exploit the potential of working with readily available marine plants and animals. Small class sizes encourage close student-faculty interactions. Undergraduates have opportunities to carry out research projects with Hopkins faculty during the academic year or summer months.

Courses at Hopkins Marine Station can satisfy many requirements, from GERs/WAYS to major and minor requirements in departments housed in the Schools of Engineering, Humanities and Sciences, and Earth Sciences. Students are encouraged to check with their department's student services office to see which courses at Hopkins may be used to fulfill major or minor requirements.

## Summer Program at Hopkins Marine Station

The summer program is open to advanced undergraduate, graduate students, and postdoctoral students, and to teachers whose biological backgrounds, teaching, or research activities can benefit from a summer's study of marine life. Applications, deadlines, and further

information are available at the Hopkins Marine Station (<http://hopkins.stanford.edu>) web site.

*Emeriti Professors:* David Epel, George N. Somero

*Director:* Stephen R. Palumbi

*Professors:* Barbara A. Block, Larry Crowder, Giulio De Leo, Mark W. Denny, William F. Gilly, Fiorenza Micheli, Stephen R. Palumbi, Stuart H. Thompson

*Associate Professor:* Christopher Lowe

*Assistant Professor:* Jeremy A. Goldbogen

*Lecturer:* James Watanabe

## Biology

Courses offered by the Department of Biology are listed under the subject code BIO on the Stanford Bulletin's ExploreCourses web site.

The department provides:

- a major program leading to the B.S. degree
- a minor program
- a coterminal program leading to the M.S. degree
- a doctoral program leading to the Ph.D. degree, and
- courses designed for the non-major.

## Mission of the Undergraduate Program in Biology

The mission of the undergraduate program in Biology is to provide students with in-depth knowledge in the discipline, from molecular biology to ecology. Students in the program learn to think and analyze information critically, to draw connections among the different areas of biology, and to communicate their ideas effectively to the scientific community. The major exposes students to the scientific process through a set of core courses and electives from a range of subdisciplines. The Biology major serves as preparation for professional careers, including medicine, dentistry, veterinary sciences, teaching, consulting, research, and field studies.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. the ability to use discipline-specific tools and content knowledge to analyze and interpret scientific data, to evaluate the significance of the data, and to articulate conclusions supportable by the data.
2. the ability, independently and collaboratively, to formulate testable scientific hypotheses and to design approaches to obtain data to test the respective hypotheses.
3. the ability to communicate content understanding and research outcomes effectively using various media.

## Mission of the Graduate Program in Biology

For graduate-level students, the department offers resources and experience learning from and working with world-renowned faculty involved in research on ecology, neurobiology, population biology,

plant and animal physiology, biochemistry, immunology, cell and developmental biology, genetics, and molecular biology.

The M.S. degree program offers general or specialized study to individuals seeking biologically oriented course work, and to undergraduate science majors wishing to increase or update their science background or obtain advanced research experience.

The training for a Ph.D. in Biology is focused on learning skills required to be a successful research scientist and teacher, including how to ask important questions and then devise and carry out experiments to answer these questions. Students work closely with an established adviser and meet regularly with a committee of faculty members to ensure that they understand the importance of diverse perspectives on experimental questions and approaches. Students learn how to evaluate critically pertinent original literature in order to stay abreast of scientific progress in their areas of interest. They also learn how to make professional presentations, write manuscripts for publication, and become effective teachers.

## Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Biology and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Biology. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Biology and to interpret and present the results of such research.

## Facilities

The offices, labs, and personnel of the Department of Biology are located in the Gilbert Biological Sciences, Herrin Laboratories, Herrin Hall, James H. Clark Center, Lorry I. Lokey Laboratory, and Jerry Yang and Akiko Yamazaki Environment and Energy (Y2E2) buildings. Along with the Carnegie Institution of Washington all are on the main campus. Jasper Ridge Biological Preserve (JRBP) is located near Stanford University's campus in the eastern foothills of the Santa Cruz Mountains. Hopkins Marine Station is on Monterey Bay in Pacific Grove.

Jasper Ridge Biological Preserve encompasses geologic, topographic, and biotic diversity within its 1,189 acres and provides a natural laboratory for researchers from around the world, educational experiences for students and docent-led visitors, and refuge for native plants and animals. See the JRBP (<http://jrpb.stanford.edu>) web site.

Hopkins Marine Station, located 90 miles from the main University campus in Pacific Grove, was founded in 1892 as the first marine laboratory on the west coast of North America. For more information, including courses taught at Hopkins Marine Station with the subject code BIOHOPK, see the "Hopkins Marine Station (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/biology/%20/schoolofhumanitiesandsciences/biologyhopkinsmarinestation>)" section of this bulletin.

The department's large collections of plants (Dudley Herbarium), fish, reptiles, and amphibians, as well as smaller collections of birds, mammals, and invertebrates, are housed at the California Academy of Sciences in San Francisco, where they, and extensive collections of the Academy, are available to those interested in the systematics of these groups. Entomological collections, restricted to those being used in particular research projects, are housed in the Herrin Laboratories. No general collections are maintained except for teaching purposes.

The Falconer Biology Library (<http://library.stanford.edu/falconer>) in Herrin Hall contains over 1,200 current subscriptions and an extensive collection of monographs and reference works. A specialized library is maintained at Hopkins Marine Station.

## Biology Course Numbering System

The department uses the following course numbering system:

Number	Level
000-099	Introductory and Core
100-199	Undergraduate
200-299	Advanced Undergraduate, Coterminial and PhD
300+	PhD

## Bachelor of Science in Biology

The undergraduate major in Biology can serve as a stepping-stone for a wide variety of career opportunities. For students planning to attend medical, dental, or veterinary school, or graduate school in biological and applied sciences, the biology major provides a strong foundation in the basic life sciences. This foundation of knowledge, plus laboratory experience, also prepares students well for research and technical positions in universities, government, and industry.

While a major in Biology provides an excellent background for these technical careers, it can also serve as a valuable and satisfying focus of a liberal arts education for those not planning careers in science-related fields. An understanding of basic biological principles is of increasing importance in today's world. A knowledgeable and concerned citizenry is the best guarantee that these issues will be resolved most effectively. Finally, an understanding of the processes of life can heighten our perception and appreciation of the world around us, in terms of its beauty, variety, and uniqueness.

## Advising

Members of the Biology faculty are available for advising on such academic matters as choice of courses, research, suggested readings, and career plans. The student services office maintains a current list of faculty advisers, advising availability, and research interests.

The student services staff and BioBridge (<http://biology.stanford.edu/biobridge>), the department's peer advising group, are prepared to answer questions on administrative matters, such as requirements for the major, approved out-of-department electives, transfer course evaluations, and petition procedures. This office also distributes the department's Bachelor of Science Handbook ([http://biology.stanford.edu/sites/all/files/BS\\_Handbook.pdf](http://biology.stanford.edu/sites/all/files/BS_Handbook.pdf)), which delineates policies and requirements, as well as other department forms and informational handouts.

Each undergraduate interested in the Biology major is required to select a department faculty adviser as part of the major declaration process.

## Degree Requirements

Candidates for the general Biology B.S. degree must complete the following, which range from 86-119 total units. There is also an option to add honors to the general major. Honors requirements are explained in detail below.

### Core Courses

(must be taken for a letter grade when available):

		Units
BIO 41	Genetics, Biochemistry, and Molecular Biology	5
BIO 42	Cell Biology and Animal Physiology	5
BIO 43	Plant Biology, Evolution, and Ecology	5

	or BIOHOPK 43 Plant Biology, Evolution, and Ecology	
BIO 44X	Core Molecular Biology Laboratory	5
BIO 44Y	Core Plant Biology & Eco Evo Laboratory <sup>1</sup>	5
	or BIOHOPK 44Y Core Laboratory in Plant Biology, Ecology and Evolution	

<sup>1</sup> BIO 44Y Core Plant Biology & Eco Evo Laboratory not required if completing honors program. Failure to complete honors program results in student being required to complete BIO 44Y Core Plant Biology & Eco Evo Laboratory.

### Required Foundational Breadth Courses

(two courses may be taken credit/no credit):

#### Chemistry

The following CHEM courses are required:

CHEM 31A & CHEM 31B	Chemical Principles I and Chemical Principles II	5-10
	or CHEM 31X Chemical Principles Accelerated	
CHEM 33	Structure and Reactivity	4-5
	or CHEM 1 Structure and Reactivity	
CHEM 35	Synthetic and Physical Organic Chemistry	4-5
	or CHEM 2 Organic Monofunctional Compounds	
CHEM 130	Organic and Bio-organic Chemistry Laboratory <sup>1</sup>	3-4
	or CHEM 2L & CHEM 3L Organic Chemistry Lab I and Organic Chemistry Lab II	
CHEM 131	Organic Polyfunctional Compounds	3-4
	or CHEM 3 Organic Polyfunctional Compounds	
CHEM 135	Physical Biochemistry	3
	or CHEM 171 Physical Chemistry I	

#### Physics

Select one of the following Series: 10-12

##### PHYSICS 20 Series

PHYSICS 21	Mechanics, Fluids, and Heat
PHYSICS 22	Mechanics, Fluids, and Heat Laboratory
PHYSICS 23	Electricity, Magnetism, and Optics
PHYSICS 24	Electricity, Magnetism, and Optics Laboratory

##### PHYSICS 40 Series

PHYSICS 41	Mechanics
PHYSICS 43	Electricity and Magnetism
PHYSICS 45	Light and Heat

#### Mathematics

Select one of the following Series: 5-10

##### 3-Quarter Calculus Series

MATH 19	Calculus
MATH 20	Calculus
MATH 21	Calculus

##### 2-Quarter Calculus Series

MATH 41	Calculus
MATH 42	Calculus

##### Advanced Calculus and Linear Algebra

MATH 51	Linear Algebra and Differential Calculus of Several Variables (or beyond) <sup>2</sup>
---------	--

#### Additional Foundational Breadth Course

Select one of the following: 3-5

BIOHOPK 174H	Experimental Design and Probability <sup>3</sup>
BIO/STATS 141	Biostatistics <sup>3</sup>

CS 106A	Programming Methodology
	or CS 106X Programming Abstractions (Accelerated)
MATH 51	Linear Algebra and Differential Calculus of Several Variables <sup>2</sup>
STATS 60/PSYCH 10	Introduction to Statistical Methods: Precalculus

Total Units 40-58

<sup>1</sup> May be substituted with upper-division, above 100-level quantitative or computational course from this list: BIO 182, 183, 220; BIOC 218; BIOMEDIN 212, 214, 217, 231, 262, 374; CS courses above 106A (may not fulfill both the CHEM 130 and additional foundational breadth requirement); GENE 212, 214, 244; MATH courses above 102; STATS 116.

<sup>2</sup> May be counted either toward the math requirement or foundational breadth, but not both.

<sup>3</sup> If taken to fulfill the foundational breadth requirement, these courses do not count toward the 24 elective unit requirement.

### Electives

24 units required, distributed as follows:

- Biology (BIO) or Hopkins Marine Station (BIOHOPK) courses numbered 100 or above.
- Approved out-of-department electives ([http://biology.stanford.edu/sites/all/files/out\\_of\\_dept\\_electives.pdf](http://biology.stanford.edu/sites/all/files/out_of_dept_electives.pdf)) (list also available in the student services office).
- No more than 6 units from any combination of these courses may be applied toward the total number of elective units:

BIO 196A	Biology Senior Reflection	3
BIO 196B	Biology Senior Reflection	3
BIO 196C	Biology Senior Reflection	3
BIO 197WA	Senior Writing Project: The Personal Essay in Biology	3
BIO 198	Directed Reading in Biology	1-15
BIO 198X	Out-of-Department Directed Reading	1-15
BIO 199	Advanced Research Laboratory in Experimental Biology	1-15
BIO 199W	Senior Honors Thesis: How to Effectively Write About Scientific Research	3
BIO 199X	Out-of-Department Advanced Research Laboratory in Experimental Biology	1-15
BIO 290	Teaching of Biology	1-5
BIO 291	Development and Teaching of Core Experimental Laboratories	1-2
BIOHOPK 198H	Directed Instruction or Reading	1-15
BIOHOPK 199H	Undergraduate Research	1-15
BIOHOPK 290H	Teaching of Biological Science	1-15

- One course from at least three of the four central menu areas listed below. The purpose of the central menu is to expose students to a wide range of topics studied within the field of biology and is intended to give students a breadth of knowledge. Please note—this requirement is only for the general major. Students pursuing a specialized field of study should consult the specific degree requirements listed in the "Fields of Study" section below.

- No more than 6 units applied toward the elective unit requirement may be taken CR/NC.

### Central Menu Areas

The four Central Menu Areas are:

Units

- Area 1 (Molecular)
- Area 2 (Cell/Developmental)
- Area 3 (Organismal)
- Area 4 (Ecology and Evolution)

## 1. Molecular (Area 1)

BIO 104	Advanced Molecular Biology
BIO 110	Chromatin Regulation of the Genome
BIO 113	Fundamentals of Molecular Evolution <sup>3</sup>
BIO 118	Genetic Analysis of Biological Processes <sup>1</sup>
BIO 123A	Cell and Developmental Biology I
BIO 123B	Cell and Developmental Biology II
BIO 173	Chemical Biology
BIO 188	Biochemistry I
BIO 189	Biochemistry II
BIO 230	Molecular and Cellular Immunology <sup>1</sup>
BIOHOPK 155H	Developmental Biology and Evolution
BIOHOPK 160H	Developmental Biology in the Ocean: Diverse Embryonic & Larval Strategies of marine invertebrates
CBIO/PATH 101	Cancer Biology <sup>1</sup>
CEE 274A/ CHEMENG 174/274	Environmental Microbiology I <sup>5</sup>

## 2. Cell/Developmental (Area 2)

BIO 118	Genetic Analysis of Biological Processes <sup>1</sup>
BIO 123A	Cell and Developmental Biology I
BIO 123B	Cell and Developmental Biology II
BIO 129B	Cellular Dynamics II: Building a Cell
BIO 137	Plant Genetics
BIO 154	Molecular and Cellular Neurobiology <sup>2</sup>
BIO 158	Developmental Neurobiology <sup>2</sup>
BIO 173	Chemical Biology
BIO 230	Molecular and Cellular Immunology <sup>1</sup>
BIOHOPK 155H	Developmental Biology and Evolution
BIOHOPK 160H	Developmental Biology in the Ocean: Diverse Embryonic & Larval Strategies of marine invertebrates
BIOHOPK 167H	Nerve, Muscle, and Synapse
BIOHOPK 187H	Sensory Ecology
CBIO/PATH 101	Cancer Biology <sup>1</sup>
CEE 274A/ CHEMENG 174/274	Environmental Microbiology I <sup>5</sup>

## 3. Organismal (Area 3)

BIO 112	Human Physiology
BIO 153	Cellular Neuroscience: Cell Signaling and Behavior
BIO 154	Molecular and Cellular Neurobiology <sup>2</sup>
BIO 158	Developmental Neurobiology <sup>2</sup>
BIO 163	Neural Systems and Behavior
BIOHOPK 150H	Ecological Mechanics
BIOHOPK 154H	Animal Diversity: An Introduction to Evolution of Animal Form and Function from Larvae to Adults
BIOHOPK 161H	Invertebrate Zoology
BIOHOPK 162H	Comparative Animal Physiology
BIOHOPK 167H	Nerve, Muscle, and Synapse
BIOHOPK 168H	Disease Ecology: from parasites evolution to the socio-economic impacts of pathogens on nations

## Units

BIOHOPK 179H	Physiological Ecology of Marine Megafauna
BIOHOPK 187H	Sensory Ecology
MI 185	Topics in Microbiology
4. Ecology and Evolution (Area 4)	
BIO 101	Ecology
BIO 113	Fundamentals of Molecular Evolution <sup>3</sup>
BIO 121	Biogeography
BIO 136	Evolutionary Paleobiology
BIO 143	Evolution
BIO 144	Conservation Biology: A Latin American Perspective
BIO 145	Ecology and evolution of animal behavior
BIO 182	Modeling Cultural Evolution
BIOHOPK 150H	Ecological Mechanics
BIOHOPK 163H	Oceanic Biology
BIOHOPK 168H	Disease Ecology: from parasites evolution to the socio-economic impacts of pathogens on nations
BIOHOPK 172H	Marine Ecology: From Organisms to Ecosystems
BIOHOPK 173H	Marine Conservation Biology
BIOHOPK 177H	Dynamics and Management of Marine Populations
BIOHOPK 179H	Physiological Ecology of Marine Megafauna
BIOHOPK 185H	Ecology and Conservation of Kelp Forest Communities
CEE 274A/ CHEMENG 174,	Environmental Microbiology I <sup>5</sup>

1. May be used to satisfy either area I or area II requirement.
2. May be used to satisfy either area II or area III requirement.
3. May be used to satisfy either area I or area IV requirement.
4. May be used to satisfy either area III or area IV requirement.
5. May be used to satisfy area I, area II, or area IV requirement.

## Writing in the Major

	Units
Select one of the following:	3-5
BIO 44Y	Core Plant Biology & Eco Evo Laboratory <sup>1</sup>
BIO 107	Human Physiology Laboratory <sup>2</sup>
BIO 137	Plant Genetics <sup>2</sup>
BIO 168	Explorations in Stem Cell Biology <sup>1,2</sup>
BIO 196A	Biology Senior Reflection <sup>2</sup>
BIO 197WA	Senior Writing Project: The Personal Essay in Biology <sup>2</sup>
BIO 199W	Senior Honors Thesis: How to Effectively Write About Scientific Research <sup>2</sup>
BIOHOPK 44Y	Core Laboratory in Plant Biology, Ecology and Evolution
BIOHOPK 172H	Marine Ecology: From Organisms to Ecosystems <sup>2,3</sup>

<sup>1</sup> If taken academic year 2014-15 or later.

<sup>2</sup> This course can also be used to count toward the elective requirement.

<sup>3</sup> If taken academic year 2015-16 or later.

## Typical Schedule for a Four-Year Program

First Year	Units		
	Autumn	Winter	Spring
Chemical Principles Accelerated (CHEM 31X) <sup>1</sup>		5	
Calculus (MATH 19)		3	

Freshman requirements, seminars, or GERs/WAYS	8		
Structure and Reactivity (CHEM 33)		5	
Calculus (MATH 20)		3	
Freshman requirements, seminars, or GERs/WAYS	8		
Synthetic and Physical Organic Chemistry (CHEM 35)		5	
Calculus (MATH 21)		4	
Freshman requirements, seminars, or GERs/WAYS		6	
Year Total:	16	16	15

Second Year	Units		
	Autumn	Winter	Spring
Genetics, Biochemistry, and Molecular Biology (BIO 41)		5	
Organic and Bio-organic Chemistry Laboratory (CHEM 130)		3	
GERs/WAYS	6		
Cell Biology and Animal Physiology (BIO 42)			5
Core Molecular Biology Laboratory (BIO 44X)			5
Organic Polyfunctional Compounds (CHEM 131)			3
GERs/WAYS		5	
Plant Biology, Evolution, and Ecology (BIO 43) or Plant Biology, Evolution, and Ecology (BIOHOPK 43)			5
Core Plant Biology & Eco Evo Laboratory (BIO 44Y) or Core Laboratory in Plant Biology, Ecology and Evolution (BIOHOPK 44Y)			5
GERs/WAYS			8
Year Total:	14	18	18

Third Year	Units		
	Autumn	Winter	Spring
Mechanics, Fluids, and Heat (PHYSICS 21)	4		
Mechanics, Fluids, and Heat Laboratory (PHYSICS 22)	1		
GERs/WAYS or Electives	10		
Electricity, Magnetism, and Optics (PHYSICS 23)			4
Electricity, Magnetism, and Optics Laboratory (PHYSICS 24)			1
GERs/WAYS or Electives		10	
Physical Biochemistry (CHEM 135) <sup>2</sup>			3
GERs/WAYS or Electives			12
Year Total:	15	15	15

Fourth Year	Units		
	Autumn	Winter	Spring
General Education/WAYS requirements and/or electives	13		
General Education/WAYS requirements and/or electives		13	
General Education/WAYS requirements and/or electives			13
Year Total:	13	13	13

Total Units in Sequence: 181

<sup>1</sup> This schedule varies slightly if the student takes CHEM 31A Chemical Principles I, CHEM 31B Chemical Principles II

<sup>2</sup> Or take CHEM 171 Physical Chemistry in autumn

## Fields of Study (Subplans)

In addition to the undergraduate major program described above, the department offers the following six fields of study (also known as subplans) for students wishing to concentrate their studies in particular areas of biology:

1. Biochemistry and Biophysics
2. Ecology and Evolution
3. Marine Biology
4. Microbes and Immunity

5. Molecular, Cellular, and Developmental Biology
6. Neurobiology

These fields of study are declared on Axxess at the time of the major declaration; they appear on both the transcript and on the diploma. Candidates for the B.S. degree in Biology with a field of study are required to complete the departmental honors program as well as the set of requirements outlined below.

### Biochemistry and Biophysics

Candidates for the Biochemistry and Biophysics field of study must complete the following, which range from 98-119 total units:

#### Core Courses (must be taken for a letter grade when available):

		Units
BIO 41	Genetics, Biochemistry, and Molecular Biology	5
BIO 42	Cell Biology and Animal Physiology	5
BIO 43	Plant Biology, Evolution, and Ecology or BIOHOPK 43 Plant Biology, Evolution, and Ecology	5
BIO 44X	Core Molecular Biology Laboratory	5

#### Required Foundational Breadth Courses

Two courses may be taken credit/no credit.

	Units
--	-------

#### Chemistry

The following CHEM courses are required:

CHEM 31A & CHEM 31B or CHEM 31X	Chemical Principles I and Chemical Principles II Chemical Principles Accelerated	5-10
CHEM 33 or CHEM 1	Structure and Reactivity Structure and Reactivity	4-5
CHEM 35 or CHEM 2	Synthetic and Physical Organic Chemistry Organic Monofunctional Compounds	4-5
CHEM 130 or CHEM 2L & CHEM 3L	Organic and Bio-organic Chemistry Laboratory Organic Chemistry Lab I and Organic Chemistry Lab II	3-4
CHEM 135 or CHEM 171	Physical Biochemistry Physical Chemistry I	3

#### Physics

PHYSICS 41	Mechanics	4
PHYSICS 43	Electricity and Magnetism	4
PHYSICS 45	Light and Heat	4

#### Mathematics

MATH 51	Linear Algebra and Differential Calculus of Several Variables	5
MATH 52	Integral Calculus of Several Variables	5

#### Additional Foundational Breadth Course

STATS 60 or BIO 141	Introduction to Statistical Methods: Precalculus Biostatistics	5
------------------------	---	---

Total Units 46-54

#### Required Biology Courses

Must be taken for a letter grade.

	Units	
BIO 104	Advanced Molecular Biology	5
BIO 118	Genetic Analysis of Biological Processes	4
BIO 188	Biochemistry I	3
Select one of the following:	4	
BIO 123A	Cell and Developmental Biology I	

BIO 123B	Cell and Developmental Biology II
BIO 129A	Cellular Dynamics I: Cell Motility and Adhesion
BIO 129B	Cellular Dynamics II: Building a Cell

### Approved Biochemistry and Biophysics Courses

Must be taken for a letter grade.

Select three of the following:

	Units
APPPHYS/ BIOC 236	Biology by the Numbers
APPPHYS 293	Theoretical Neuroscience
APPPHYS 294	Cellular Biophysics
BIO 132/232/ APPPHYS/ BIOPHYS/ GENE 232	Advanced Imaging Lab in Biophysics
BIO 152/ MCP 222	Imaging: Biological Light Microscopy
BIO 154/254/ NBIO 254	Molecular and Cellular Neurobiology
BIO 189/ CHEM 183/ CHEMENG 183/283	Biochemistry II
BIO 214/ BIOC 224	Advanced Cell Biology
BIO 217	Neuronal Biophysics
BIOE 101	Systems Biology
BIOE 103	Systems Physiology and Design
BIOE/RAD 220	Introduction to Imaging and Image-based Human Anatomy
BIOMEDIN 210	Modeling Biomedical Systems: Ontology, Terminology, Problem Solving
BIOMEDIN/ BIOE/GENE 214/CS 274	Representations and Algorithms for Computational Molecular Biology
BIOPHYS/ SBIO 228	Computational Structural Biology
BIOPHYS/ SBIO 241	Biological Macromolecules
CHEM 184	Biological Chemistry Laboratory
CHEM 185	Biophysical Chemistry
EE 236A	Modern Optics
MCP 256	How Cells Work: Energetics, Compartments, and Coupling in Cell Biology
PHYSICS 105	Intermediate Physics Laboratory I: Analog Electronics

### Electives

7 units required. Electives must be 100-level or above and chosen from the offerings in the Department of Biology, Hopkins Marine Station, or from the list of approved out-of-department electives. Up to 6 units of teaching and research are allowed. Only one course can be taken credit/no credit.

### Writing in the Major

Select one of the following:

	Units
BIO 44Y	Core Plant Biology & Eco Evo Laboratory <sup>1</sup>
BIO 107	Human Physiology Laboratory <sup>2</sup>
BIO 137	Plant Genetics <sup>2</sup>

BIO 168	Explorations in Stem Cell Biology <sup>1,2</sup>
BIO 196A	Biology Senior Reflection <sup>2</sup>
BIO 197WA	Senior Writing Project: The Personal Essay in Biology <sup>2</sup>
BIO 199W	Senior Honors Thesis: How to Effectively Write About Scientific Research <sup>2</sup>
BIOHOPK 44Y	Core Laboratory in Plant Biology, Ecology and Evolution
BIOHOPK 172H	Marine Ecology: From Organisms to Ecosystems <sup>2,3</sup>

<sup>1</sup> If taken academic year 2014-15 or later.

<sup>2</sup> This course can also be used to count toward the elective requirement.

<sup>3</sup> If taken academic year 2015-16 or later.

### Honors Requirements

1. Approved Honors Proposal
2. 10 units of research from the same lab; only research units from BIO or BIOHOPK are permitted as follows:

	Units
BIO 199	Advanced Research Laboratory in Experimental Biology
BIO 199X	Out-of-Department Advanced Research Laboratory in Experimental Biology
BIOHOPK 199H	Undergraduate Research

3. Poster/oral presentation at annual honors symposium
4. Approved Honors Thesis
5. 3.0 GPA in all courses taken for the major with the exception of research and/or teaching units

### Computational Biology

Candidates for the Computational Biology field of study must complete the following, which range from 87-111 total units:

#### Core Courses (must be taken for a letter grade when available):

	Units	
BIO 41	Genetics, Biochemistry, and Molecular Biology	5
BIO 42	Cell Biology and Animal Physiology	5
BIO 43	Plant Biology, Evolution, and Ecology	5
	or BIOHOPK 43 Plant Biology, Evolution, and Ecology	
	Select one of the following:	5
BIO 44X	Core Molecular Biology Laboratory	
BIO 44Y	Core Plant Biology & Eco Evo Laboratory	
BIOHOPK 44Y	Core Laboratory in Plant Biology, Ecology and Evolution	

#### Required Foundational Breadth Courses, Group 1

Two courses may be taken credit/no credit.

### Chemistry

The following CHEM courses are required:

CHEM 31A & CHEM 31B	Chemical Principles I and Chemical Principles II	5-10
	or CHEM 31X	Chemical Principles Accelerated
CHEM 33	Structure and Reactivity	4-5
	or CHEM 1	Structure and Reactivity
CHEM 35	Synthetic and Physical Organic Chemistry	4-5
	or CHEM 2	Organic Monofunctional Compounds

### Physics

Select one of the following series: 10-12

PHYSICS 20 Series	
PHYSICS 21	Mechanics, Fluids, and Heat
PHYSICS 22	Mechanics, Fluids, and Heat Laboratory
PHYSICS 23	Electricity, Magnetism, and Optics
PHYSICS 24	Electricity, Magnetism, and Optics Laboratory
PHYSICS 40 Series	
PHYSICS 41	Mechanics
PHYSICS 43	Electricity and Magnetism
PHYSICS 45	Light and Heat

Total Units 23-32

**Required Foundational Breadth Courses, Group 2**

All courses must be taken for a letter-grade only.

	Units
MATH 51	Linear Algebra and Differential Calculus of Several Variables 5
CS 106A	Programming Methodology 3-5
BIO 141	Biostatistics 3-5
Total Units	11-15

**Required Computational Biology Courses**

Must be taken for a letter grade.

Select four of the following:

BIO 126	Introduction to Biophysics
BIO 182	Modeling Cultural Evolution
BIO 183	Theoretical Population Genetics
BIO 202	Ecological Statistics
BIO 268	Statistical and Machine Learning Methods for Genomics
BIOE 101	Systems Biology
BIOE 115	Computational Modeling of Microbial Communities
BIOPHYS 228	Computational Structural Biology
STATS 155	Statistical Methods in Computational Genetics

**Electives**

3 courses of 3 or more units each. Electives must be 100-level or above and chosen from the offerings in the Department of Biology, Hopkins Marine Station, Department of Computer Sciences, or from the list of approved out-of-department electives. Only one course can be taken credit/no credit. Research and teaching units may not count towards this requirement.

**Writing in the Major**

Select one of the following: 3-5

BIO 44Y	Core Plant Biology & Eco Evo Laboratory <sup>1</sup>
BIO 107	Human Physiology Laboratory <sup>2</sup>
BIO 137	Plant Genetics <sup>2</sup>
BIO 168	Explorations in Stem Cell Biology <sup>1,2</sup>
BIO 196A	Biology Senior Reflection <sup>2</sup>
BIO 197WA	Senior Writing Project: The Personal Essay in Biology <sup>2</sup>
BIO 199W	Senior Honors Thesis: How to Effectively Write About Scientific Research <sup>2</sup>
BIOHOPK 44Y	Core Laboratory in Plant Biology, Ecology and Evolution

BIOHOPK 172H	Marine Ecology: From Organisms to Ecosystems <sup>2,3</sup>
--------------	---

- <sup>1</sup> If taken academic year 2014-15 or later.
- <sup>2</sup> This course can also be used to count toward the elective requirement.
- <sup>3</sup> If taken academic year 2015-16 or later.

**Honors Requirements**

- 1. Approved Honors Proposal
- 2. 10 units of research from the same lab; only research units from BIO or BIOHOPK are permitted as follows:

BIO 199	Advanced Research Laboratory in Experimental Biology
BIO 199X	Out-of-Department Advanced Research Laboratory in Experimental Biology
BIOHOPK 199H	Undergraduate Research

- 3. Poster/oral presentation at annual honors symposium
- 4. Approved Honors Thesis
- 5. 3.0 GPA in all courses taken for the major with the exception of research and/or teaching units

**Ecology and Evolution**

Candidates for the Ecology and Evolution field of study must complete the following, which range from 103-122 total units:

**Core Courses**

Must be taken for a letter grade when available.

	Units
BIO 41	Genetics, Biochemistry, and Molecular Biology 5
BIO 42	Cell Biology and Animal Physiology 5
BIO 43	Plant Biology, Evolution, and Ecology 5
	or BIOHOPK 43 Plant Biology, Evolution, and Ecology
BIO 101	Ecology <sup>1</sup> 4
	or BIOHOPK 17 Marine Ecology: From Organisms to Ecosystems
Select one of the following: 5	
BIO 44X	Core Molecular Biology Laboratory
BIO 44Y	Core Plant Biology & Eco Evo Laboratory
BIOHOPK 44Y	Core Laboratory in Plant Biology, Ecology and Evolution

- <sup>1</sup> This course cannot also be used to count toward the elective requirement.

**Required Foundational Breadth Courses**

Two courses may be taken credit/no credit.

**Chemistry**

The following CHEM courses are required:	
CHEM 31A & CHEM 31B	Chemical Principles I and Chemical Principles II 5-10
	or CHEM 31X Chemical Principles Accelerated
CHEM 33	Structure and Reactivity 4-5
	or CHEM 1 Structure and Reactivity
CHEM 35	Synthetic and Physical Organic Chemistry 4-5
	or CHEM 2 Organic Monofunctional Compounds

**Physics**

Select one of the following Series: 10-12  
PHYSICS 20 Series

PHYSICS 21	Mechanics, Fluids, and Heat
PHYSICS 22	Mechanics, Fluids, and Heat Laboratory
PHYSICS 23	Electricity, Magnetism, and Optics
PHYSICS 24	Electricity, Magnetism, and Optics Laboratory
PHYSICS 40 Series	
PHYSICS 41	Mechanics
PHYSICS 43	Electricity and Magnetism
PHYSICS 45	Light and Heat

**Mathematics**

Select one of the following Series: 5-10

## 3-Quarter Calculus Series

MATH 19	Calculus
MATH 20	Calculus
MATH 21	Calculus

## 2-Quarter Calculus Series

MATH 41	Calculus
MATH 42	Calculus

## Advanced Calculus and Linear Algebra

MATH 51	Linear Algebra and Differential Calculus of Several Variables
---------	---

Total Units 28-42

**Required Evolutionary Biology Course**

Must be taken for a letter grade.

Select one of the following:

BIO 113	Fundamentals of Molecular Evolution
BIO 136	Evolutionary Paleobiology
BIO 143	Evolution
BIOHOPK 166H	Molecular Ecology

**Required Quantitative Methods Course**

Must be taken for a letter grade.

Select one of the following:

BIO 141	Biostatistics
BIOHOPK 174H	Experimental Design and Probability
CS 106A	Programming Methodology
or CS 106X	Programming Abstractions (Accelerated)
STATS 60	Introduction to Statistical Methods: Precalculus (or beyond)

**Electives (30 units required)**

Only one course can be taken credit/no credit. Electives must be from this approved list:

BIO 101	Ecology <sup>4</sup>	4
BIO 105A	Ecology and Natural History of Jasper Ridge Biological Preserve	4
BIO 105B	Ecology and Natural History of Jasper Ridge Biological Preserve	4
BIO 116	Ecology of the Hawaiian Islands	4
BIO 117	Biology and Global Change	4
BIO 118	Genetic Analysis of Biological Processes	4
BIO 121	Biogeography	3
BIO 131	Complex Systems Lab	1

BIO 144	Conservation Biology: A Latin American Perspective	3
BIO 145	Ecology and evolution of animal behavior	3
BIO 146	Population Studies	1
BIO 182	Modeling Cultural Evolution	3
BIO 183	Theoretical Population Genetics	3
BIO 227	Foundations of Community Ecology	2
BIO 234	Conservation Biology: A Latin American Perspective	3
BIO 274S	Hopkins Microbiology Course	3-12
BIOHOPK 161H	Invertebrate Zoology	5
BIOHOPK 162H	Comparative Animal Physiology	5
BIOHOPK 163H	Oceanic Biology	4
BIOHOPK 166H	Molecular Ecology	5
BIOHOPK 172H	Marine Ecology: From Organisms to Ecosystems <sup>4</sup>	5
BIOHOPK 173H	Marine Conservation Biology <sup>1</sup>	4
BIOHOPK 174H	Experimental Design and Probability <sup>5</sup>	3
BIOHOPK 182H	Stanford at Sea <sup>3</sup>	16
BIOHOPK 184H	Holistic Biology <sup>3</sup>	16
BIOHOPK 185H	Ecology and Conservation of Kelp Forest Communities <sup>3</sup>	5
BIOHOPK 187H	Sensory Ecology	4
BIOHOPK 264H	POPULATION GENOMICS	1-2
BIOHOPK 268H	Disease Ecology: from parasites evolution to the socio-economic impacts of pathogens on nations	3
BIOHOPK 275H	Synthesis in Ecology	2
CHEM 130	Organic and Bio-organic Chemistry Laboratory	3
CHEM 131	Organic Polyfunctional Compounds	3
EARTHSYS 128	Evolutionary History of Terrestrial Ecosystems	4
EARTHSYS 144/ESS 164	Fundamentals of Geographic Information Science (GIS)	4
EARTHSYS 158	Geomicrobiology	3
OSPAUSTL 10	Coral Reef Ecosystems <sup>2</sup>	3
OSPAUSTL 25	Freshwater Systems <sup>2</sup>	3
OSPAUSTL 30	Coastal Forest Ecosystems <sup>2</sup>	3

Units

3-5

Units

3-5

- 1 Only 1 unit can count.
- 2 Only 2 units can count.
- 3 Only 6 units can count.
- 4 Cannot also count toward core course requirement.
- 5 Cannot also count toward quantitative methods requirement.

**Writing in the Major**

Select one of the following:

BIO 44Y	Core Plant Biology & Eco Evo Laboratory <sup>1</sup>	3-5
BIO 107	Human Physiology Laboratory <sup>2</sup>	
BIO 137	Plant Genetics <sup>2</sup>	
BIO 168	Explorations in Stem Cell Biology <sup>1,2</sup>	
BIO 196A	Biology Senior Reflection <sup>2</sup>	
BIO 197WA	Senior Writing Project: The Personal Essay in Biology <sup>2</sup>	
BIO 199W	Senior Honors Thesis: How to Effectively Write About Scientific Research <sup>2</sup>	
BIOHOPK 44Y	Core Laboratory in Plant Biology, Ecology and Evolution	
BIOHOPK 172H	Marine Ecology: From Organisms to Ecosystems <sup>2,3</sup>	

Units

1

- <sup>1</sup> If taken academic year 2014-15 or later.
- <sup>2</sup> This course can also be used to count toward the elective requirement.
- <sup>3</sup> If taken academic year 2015-16 or later.

**Honors Requirements**

- 1. Approved Honors Proposal
- 2. 10 units of research from the same lab; only research units from BIO or BIOHOPK are permitted as follows:

BIO 199	Advanced Research Laboratory in Experimental Biology
BIO 199X	Out-of-Department Advanced Research Laboratory in Experimental Biology
BIOHOPK 199H	Undergraduate Research

- 3. Poster/oral presentation at annual honors symposium
- 4. Approved Honors Thesis
- 5. 3.0 GPA in all courses taken for the major with the exception of research and/or teaching units

**Marine Biology**

Candidates for the Marine Biology field of study must complete the following, which range from 94-125 total units:

**Core Courses**

Must be taken for a letter grade when available.

BIO 41	Genetics, Biochemistry, and Molecular Biology	5
BIO 42	Cell Biology and Animal Physiology	5
BIO 43	Plant Biology, Evolution, and Ecology	5
	or BIOHOPK 43 Plant Biology, Evolution, and Ecology	
Select one of the following:		5
BIO 44X	Core Molecular Biology Laboratory	
BIO 44Y	Core Plant Biology & Eco Evo Laboratory	
BIOHOPK 44Y	Core Laboratory in Plant Biology, Ecology and Evolution	

**Required Foundational Breadth Courses**

Two courses may be taken credit/no credit.

**Chemistry**

The following CHEM courses are required:

CHEM 31A & CHEM 31B	Chemical Principles I and Chemical Principles II	5-10
	or CHEM 31X Chemical Principles Accelerated	
CHEM 33	Structure and Reactivity	4-5
	or CHEM 1 Structure and Reactivity	
CHEM 35	Synthetic and Physical Organic Chemistry	4-5
	or CHEM 2 Organic Monofunctional Compounds	
CHEM 130	Organic and Bio-organic Chemistry Laboratory <sup>1</sup>	3-4
	or CHEM 2L Organic Chemistry Lab I & CHEM 3L and Organic Chemistry Lab II	
CHEM 131	Organic Polyfunctional Compounds	3-4
	or CHEM 3 Organic Polyfunctional Compounds	

**Physics**

Select one of the following Series: 10-12

PHYSICS 20 Series	
PHYSICS 21	Mechanics, Fluids, and Heat
PHYSICS 22	Mechanics, Fluids, and Heat Laboratory

PHYSICS 23	Electricity, Magnetism, and Optics
PHYSICS 24	Electricity, Magnetism, and Optics Laboratory
PHYSICS 40 Series	
PHYSICS 41	Mechanics
PHYSICS 43	Electricity and Magnetism
PHYSICS 45	Light and Heat
<b>Mathematics</b>	
Select one of the following Series: 5-10	
<b>Units</b>	
Quarter Calculus Series	
MATH 19	Calculus
MATH 20	Calculus
MATH 21	Calculus
2-Quarter Calculus Series	
MATH 41	Calculus
MATH 42	Calculus
Advanced Calculus and Linear Algebra	
MATH 51	Linear Algebra and Differential Calculus of Several Variables
<b>Additional Foundational Breadth Course</b> 3-5	
Select one of the following:	
STATS 60	Introduction to Statistical Methods: Precalculus
BIO 141	Biostatistics
BIOHOPK 174H	Experimental Design and Probability
<b>Total Units</b>	<b>37-55</b>

<sup>1</sup> May be substituted with upper-division, above 100-level quantitative or computational course from this list: BIO 182, 183, 220; BIOC 218; BIOMEDIN 212, 214, 217, 231, 262, 374; CS courses above 106A (may not fulfill both the CHEM 130 and additional foundational breadth requirement); GENE 212, 214, 244; MATH courses above 102; STATS 116.

**Required Biology Courses**

Must be taken for a letter grade.

BIO 101	Ecology <sup>1</sup>	4
	or BIOHOPK 172H Marine Ecology: From Organisms to Ecosystems	
BIO 118	Genetic Analysis of Biological Processes	4
BIO 143	Evolution	3

<sup>1</sup> If BIOHOPK 172H is taken to fulfill this requirement, it cannot also count below.

**Approved courses**

Must be taken for a letter grade.

Select four of the following: 15-52

BIO/ EARTHSYS 116	Ecology of the Hawaiian Islands
BIOHOPK 150H	Ecological Mechanics
BIOHOPK 155H	Developmental Biology and Evolution
BIOHOPK 160H	Developmental Biology in the Ocean: Diverse Embryonic & Larval Strategies of marine invertebrates
BIOHOPK 161H	Invertebrate Zoology
BIOHOPK 162H	Comparative Animal Physiology
BIOHOPK 163H	Oceanic Biology
BIOHOPK 167H	Nerve, Muscle, and Synapse

BIOHOPK 172H	Marine Ecology: From Organisms to Ecosystems <sup>1</sup>
BIOHOPK 173H	Marine Conservation Biology ((must be take for 3 units))
BIOHOPK 177H	Dynamics and Management of Marine Populations
BIOHOPK 179H	Physiological Ecology of Marine Megafauna
BIOHOPK 182H	Stanford at Sea
BIOHOPK 185H	Ecology and Conservation of Kelp Forest Communities
BIOHOPK 187H	Sensory Ecology
OSPAUSTL 10	Coral Reef Ecosystems <sup>2</sup>
OSPAUSTL 25	Freshwater Systems <sup>2</sup>
OSPAUSTL 30	Coastal Forest Ecosystems <sup>2</sup>

<sup>1</sup> May not also fulfill the required Biology course above.

<sup>2</sup> These three courses as a whole count as one of the four required courses in this section.

### Writing in the Major

	Units
Select one of the following:	3-5
BIO 44Y Core Plant Biology & Eco Evo Laboratory <sup>1</sup>	
BIO 107 Human Physiology Laboratory <sup>2</sup>	
BIO 137 Plant Genetics <sup>2</sup>	
BIO 168 Explorations in Stem Cell Biology <sup>1,2</sup>	
BIO 196A Biology Senior Reflection <sup>2</sup>	
BIO 197WA Senior Writing Project: The Personal Essay in Biology <sup>2</sup>	
BIO 199W Senior Honors Thesis: How to Effectively Write About Scientific Research <sup>2</sup>	
BIOHOPK 44Y Core Laboratory in Plant Biology, Ecology and Evolution	
BIOHOPK 172H Marine Ecology: From Organisms to Ecosystems <sup>2,3</sup>	

<sup>1</sup> If taken academic year 2014-15 or later.

<sup>2</sup> This course can also be used to count toward the elective requirement.

<sup>3</sup> If taken academic year 2015-16 or later.

### Honors Requirements

1. Approved Honors Proposal - one Hopkins Marine Station faculty member must be a reader on the thesis
2. 10 units of research from the same lab; only research units from BIO or BIOHOPK are permitted as follows:

BIO 199	Advanced Research Laboratory in Experimental Biology
BIO 199X	Out-of-Department Advanced Research Laboratory in Experimental Biology
BIOHOPK 199H	Undergraduate Research

3. Poster/oral presentation at annual honors symposium
4. Approved Honors Thesis; one Hopkins Marine Station faculty member must be a reader on the thesis
5. 3.0 GPA in all courses taken for the major with the exception of research and/or teaching units

### Microbes and Immunity

Candidates for the Microbes and Immunity field of study must complete the following, which range from 90-122 total units:

### Core Courses

Must be taken for a letter grade when available.

	Units	
BIO 41	Genetics, Biochemistry, and Molecular Biology	5
BIO 42	Cell Biology and Animal Physiology	5
BIO 43	Plant Biology, Evolution, and Ecology	5
	or BIOHOPK 43 Plant Biology, Evolution, and Ecology	
Select one of the following:	5	
BIO 44X	Core Molecular Biology Laboratory	
BIO 44Y	Core Plant Biology & Eco Evo Laboratory	
BIOHOPK 44Y	Core Laboratory in Plant Biology, Ecology and Evolution	

### Required Foundational Breadth Courses

Two courses may be taken credit/no credit.

	Units
<b>Chemistry</b>	
The following CHEM courses are required:	
CHEM 31A Chemical Principles I	5-10
& CHEM 31B and Chemical Principles II	
or CHEM 31X Chemical Principles Accelerated	
CHEM 33 Structure and Reactivity	4-5
or CHEM 1 Structure and Reactivity	
CHEM 35 Synthetic and Physical Organic Chemistry	4-5
or CHEM 2 Organic Monofunctional Compounds	
CHEM 130 Organic and Bio-organic Chemistry Laboratory <sup>1</sup>	3-4
or CHEM 2L Organic Chemistry Lab I	
& CHEM 3L and Organic Chemistry Lab II	
CHEM 131 Organic Polyfunctional Compounds	3-4
or CHEM 3 Organic Polyfunctional Compounds	
<b>Physics</b>	
Select one of the following Series:	10-12
<b>PHYSICS 20 Series</b>	
PHYSICS 21 Mechanics, Fluids, and Heat	
PHYSICS 22 Mechanics, Fluids, and Heat Laboratory	
PHYSICS 23 Electricity, Magnetism, and Optics	
PHYSICS 24 Electricity, Magnetism, and Optics Laboratory	
<b>PHYSICS 40 Series</b>	
PHYSICS 41 Mechanics	
PHYSICS 43 Electricity and Magnetism	
PHYSICS 45 Light and Heat	
<b>Mathematics</b>	
Select one of the following Series:	5-10
<b>3-Quarter Calculus Series</b>	
MATH 19 Calculus	
MATH 20 Calculus	
MATH 21 Calculus	
<b>2-Quarter Calculus Series</b>	
MATH 41 Calculus	
MATH 42 Calculus	
<b>Advanced Calculus and Linear Algebra</b>	
MATH 51 Linear Algebra and Differential Calculus of Several Variables	
<b>Additional Foundational Breadth Course</b>	
BIO 141 Biostatistics <sup>2</sup>	4-5

or BIOHOPK 174H	Experimental Design and Probability	
<b>Total Units</b>		38-55

- <sup>1</sup> May be substituted with upper-division, above 100-level quantitative or computational course from this list: BIO 182, 183, 220; BIOC 218; BIOMEDIN 212, 214, 217, 231, 262, 374; CS courses above 106A (may not fulfill both the CHEM 130 and additional foundational breadth requirement); GENE 212, 214, 244; MATH courses above 102; STATS 116.
- <sup>2</sup> This course cannot also be used to count toward the elective requirement.

**Required Courses in Microbiology, Immunology, Molecular Evolution**  
Must be taken for a letter grade.

Select four of the following:

BIO 177	Plant Microbe Interaction
BIO 230	Molecular and Cellular Immunology
BIO 232	Advanced Imaging Lab in Biophysics
BIOHOPK 274	Hopkins Microbiology Course
CEE 177	Aquatic Chemistry and Biology
CEE 274A	Environmental Microbiology I
CEE 274B	Microbial Bioenergy Systems
CEE 274D	Pathogens and Disinfection
EARTHSYS 158	Geomicrobiology
HUMBIO 152	Viral Lifestyles
HUMBIO 155H	Humans and Viruses I
IMMUNOL 201	Advanced Immunology I
IMMUNOL 202	Advanced Immunology II
IMMUNOL 209	Translational Immunology
IMMUNOL 260	HIV: The Virus, the Disease, the Research
IMMUNOL 275	Tumor Immunology
MI 104	Innate Immunology
MI 120	Bacteria in Health and Disease
MI 209	Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites: Part I
MI 210	Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites
MI 211	Advanced Immunology I

**Required Course in Reading Scientific Literature**  
Must be taken for a letter grade.

Select one of the following or students may petition for other courses in reading scientific literature: **Units** 3

BIO 178	Microbiology Literature
MI 185	Topics in Microbiology

**Electives**

12 units required. Electives must be 100-level or above and selected from the offerings in the Department of Biology, Hopkins Marine Station, or from the list of approved out-of-department electives. Up to 6 units of teaching and research are allowed. Only one course can be taken credit/no credit.

**Writing in the Major**

Select one of the following:

BIO 44Y	Core Plant Biology & Eco Evo Laboratory <sup>1</sup>	<b>Units</b> 3-5
BIO 107	Human Physiology Laboratory <sup>2</sup>	

BIO 137	Plant Genetics <sup>2</sup>
BIO 168	Explorations in Stem Cell Biology <sup>1,2</sup>
BIO 196A	Biology Senior Reflection <sup>2</sup>
BIO 197WA	Senior Writing Project: The Personal Essay in Biology <sup>2</sup>
BIO 199W	Senior Honors Thesis: How to Effectively Write About Scientific Research <sup>2</sup>
BIOHOPK 44Y	Core Laboratory in Plant Biology, Ecology and Evolution
BIOHOPK 172H	Marine Ecology: From Organisms to Ecosystems <sup>2,3</sup>

- <sup>1</sup> If taken academic year 2014-15 or later.
- <sup>2</sup> This course can also be used to count toward the elective requirement.
- <sup>3</sup> If taken academic year 2015-16 or later.

**Honors Requirements**

1. Approved Honors Proposal
2. 10 units of research from the same lab; only research units from BIO or BIOHOPK are permitted as follows:

BIO 199	Advanced Research Laboratory in Experimental Biology
BIO 199X	Out-of-Department Advanced Research Laboratory in Experimental Biology
BIOHOPK 199H	Undergraduate Research

3. Poster/oral presentation at annual honors symposium
4. Approved Honors Thesis
5. 3.0 GPA in all courses taken for the major with the exception of research and/or teaching units

**Molecular, Cellular, and Developmental Biology**

Candidates for the Molecular and Cell Biology field of study must complete the following, which range from 98-123 total units:

**Core Courses**

Must be taken for a letter grade when available.

BIO 41	Genetics, Biochemistry, and Molecular Biology	<b>Units</b> 5
BIO 42	Cell Biology and Animal Physiology	5
BIO 43	Plant Biology, Evolution, and Ecology	5
or BIOHOPK 43	Plant Biology, Evolution, and Ecology	
Select one of the following:		5
BIO 44X	Core Molecular Biology Laboratory	
BIO 44Y	Core Plant Biology & Eco Evo Laboratory	
BIOHOPK 44Y	Core Laboratory in Plant Biology, Ecology and Evolution	

**Required Foundational Breadth Courses**

Two courses may be taken credit/no credit.

**Chemistry**

The following CHEM courses are required:		
CHEM 31A & CHEM 31B	Chemical Principles I and Chemical Principles II	<b>Units</b> 5-10
or CHEM 31X	Chemical Principles Accelerated	
CHEM 33	Structure and Reactivity	4-5
or CHEM 1	Structure and Reactivity	
CHEM 35	Synthetic and Physical Organic Chemistry	4-5

**Units**

or CHEM 2	Organic Monofunctional Compounds	
CHEM 130	Organic and Bio-organic Chemistry Laboratory <sup>1</sup>	3-4
or CHEM 2L & CHEM 3L	Organic Chemistry Lab I and Organic Chemistry Lab II	
CHEM 131	Organic Polyfunctional Compounds	3-4
or CHEM 3	Organic Polyfunctional Compounds	
CHEM 135	Physical Biochemistry	3
or CHEM 171	Physical Chemistry I	

**Physics**

Select one of the following Series: 10-12

**PHYSICS 20 Series**

PHYSICS 21	Mechanics, Fluids, and Heat
PHYSICS 22	Mechanics, Fluids, and Heat Laboratory
PHYSICS 23	Electricity, Magnetism, and Optics
PHYSICS 24	Electricity, Magnetism, and Optics Laboratory

**PHYSICS 40 Series**

PHYSICS 41	Mechanics
PHYSICS 43	Electricity and Magnetism
PHYSICS 45	Light and Heat

**Mathematics**

Select one of the following Series: 5-10

**3-Quarter Calculus Series**

MATH 19	Calculus
MATH 20	Calculus
MATH 21	Calculus

**2-Quarter Calculus Series**

MATH 41	Calculus
MATH 42	Calculus

**Advanced Calculus and Linear Algebra**

MATH 51	Linear Algebra and Differential Calculus of Several Variables
---------	---

**Additional Foundational Breadth Course**

BIO 141	Biostatistics <sup>2</sup>	4-5
or STATS 60	Introduction to Statistical Methods: Precalculus	

Total Units 41-58

<sup>1</sup> May be substituted with upper-division, above 100-level quantitative or computational course from this list: BIO 182, 183, 220; BIOC 218; BIOMEDIN 212, 214, 217, 231, 262, 374; CS courses above 106A (may not fulfill both the CHEM 130 and additional foundational breadth requirement); GENE 212, 214, 244; MATH courses above 102; STATS 116.

<sup>2</sup> This course cannot also be used to count toward the elective requirement.

**Required Biology Courses**

Must be taken for a letter grade.

		Units
BIO 104	Advanced Molecular Biology	5
BIO 118	Genetic Analysis of Biological Processes	4
Choose two of the following courses: <sup>1</sup>		
BIO 123A	Cell and Developmental Biology I	
BIO 123B	Cell and Developmental Biology II	
BIO 129B	Cellular Dynamics II: Building a Cell	

<sup>1</sup> Prior to academic year 2015-16, students can also choose from BIO 129A, 160A, or 160B to fulfill this requirement.

**Electives**

15 units required. Electives must be 100-level or above and selected from the offerings in the Department of Biology, Hopkins Marine Station, or from the list of approved out-of-department electives. Up to 6 units of teaching and research are allowed. Only one course can be taken credit/no credit.

**Writing in the Major**

Select one of the following: 3-5

BIO 44Y	Core Plant Biology & Eco Evo Laboratory <sup>1</sup>
BIO 107	Human Physiology Laboratory <sup>2</sup>
BIO 137	Plant Genetics <sup>2</sup>
BIO 168	Explorations in Stem Cell Biology <sup>1,2</sup>
BIO 196A	Biology Senior Reflection <sup>2</sup>
BIO 197WA	Senior Writing Project: The Personal Essay in Biology <sup>2</sup>
BIO 199W	Senior Honors Thesis: How to Effectively Write About Scientific Research <sup>2</sup>
BIOHOPK 44Y	Core Laboratory in Plant Biology, Ecology and Evolution
BIOHOPK 172H	Marine Ecology: From Organisms to Ecosystems <sup>2,3</sup>

<sup>1</sup> If taken academic year 2014-15 or later.

<sup>2</sup> This course can also be used to count toward the elective requirement.

<sup>3</sup> If taken academic year 2015-16 or later.

**Honors Requirements**

1. Approved Honors Proposal
2. 10 units of research from the same lab; only research units from BIO or BIOHOPK are permitted as follows:

		Units
BIO 199	Advanced Research Laboratory in Experimental Biology	
BIO 199X	Out-of-Department Advanced Research Laboratory in Experimental Biology	
BIOHOPK 199H	Undergraduate Research	

3. Poster/oral presentation at annual honors symposium
4. Approved Honors Thesis
5. 3.0 GPA in all courses taken for the major with the exception of research and/or teaching units

**Neurobiology**

Candidates for the Neurobiology field of study must complete the following, which range from 94-122 total units:

**Core Courses**

Must be taken for a letter grade when available.

		Units
BIO 41	Genetics, Biochemistry, and Molecular Biology	5
BIO 42	Cell Biology and Animal Physiology	5
BIO 43	Plant Biology, Evolution, and Ecology	5
or BIOHOPK 43	Plant Biology, Evolution, and Ecology	
Select one of the following:		5
BIO 44X	Core Molecular Biology Laboratory	
BIO 44Y	Core Plant Biology & Eco Evo Laboratory	
BIOHOPK 44Y	Core Laboratory in Plant Biology, Ecology and Evolution	

**Required Foundational Breadth Courses**

Two courses may be taken credit/no credit.

**Chemistry**

The following CHEM courses are required:

CHEM 31A & CHEM 31B or CHEM 31X	Chemical Principles I and Chemical Principles II Chemical Principles Accelerated	5-10
CHEM 33 or CHEM 1	Structure and Reactivity Structure and Reactivity	4-5
CHEM 35 or CHEM 2	Synthetic and Physical Organic Chemistry Organic Monofunctional Compounds	4-5
CHEM 130 or CHEM 2L & CHEM 3L	Organic and Bio-organic Chemistry Laboratory <sup>1</sup> Organic Chemistry Lab I and Organic Chemistry Lab II	3-4
CHEM 131 or CHEM 3	Organic Polyfunctional Compounds Organic Polyfunctional Compounds	3-4

**Physics**

Select one of the following Series: 10-12

PHYSICS 20 Series

PHYSICS 21	Mechanics, Fluids, and Heat
PHYSICS 22	Mechanics, Fluids, and Heat Laboratory
PHYSICS 23	Electricity, Magnetism, and Optics
PHYSICS 24	Electricity, Magnetism, and Optics Laboratory

PHYSICS 40 Series

PHYSICS 41	Mechanics
PHYSICS 43	Electricity and Magnetism
PHYSICS 45	Light and Heat

**Mathematics**

Select one of the following Series: 5-10

3-Quarter Calculus Series

MATH 19	Calculus
MATH 20	Calculus
MATH 21	Calculus

2-Quarter Calculus Series

MATH 41	Calculus
MATH 42	Calculus

Advanced Calculus and Linear Algebra

MATH 51	Linear Algebra and Differential Calculus of Several Variables
---------	---

**Additional Foundational Breadth Course**

BIO 141 or STATS 60	Biostatistics <sup>2</sup> Introduction to Statistical Methods: Precalculus	4-5
---------------------	--	-----

Total Units 38-55<sup>3</sup>

<sup>1</sup> May be substituted with upper-division, above 100-level quantitative or computational course from this list: BIO 182, 183, 220; BIOC 218; BIOMEDIN 212, 214, 217, 231, 262, 374; CS courses above 106A (may not fulfill both the CHEM 130 and additional foundational breadth requirement); GENE 212, 214, 244; MATH courses above 102; STATS 116.

<sup>2</sup> This course cannot also be used to count toward the elective requirement.

**Required Biology Courses**

Must be taken for a letter grade.

BIO 118	Genetic Analysis of Biological Processes	4
---------	--	---

or BIO 104	Advanced Molecular Biology	
BIO 158	Developmental Neurobiology	4
Select one of the following: <sup>1</sup>		4

BIO 123A	Cell and Developmental Biology I	
BIO 123B	Cell and Developmental Biology II	
BIO 129B	Cellular Dynamics II: Building a Cell	

Select one from the following list of neural systems courses: 4-8

BIO 149	The Neurobiology of Sleep	
BIO 150	Human Behavioral Biology	
BIO 163	Neural Systems and Behavior	
NBIO 206	The Nervous System <sup>2</sup>	

Select one of the following cell biology courses: 4-8

BIO 154	Molecular and Cellular Neurobiology	
NBIO 206	The Nervous System <sup>2</sup>	

<sup>1</sup> Prior to academic year 2015-16, students can also choose from BIO 129A, 160A, or 160B to fulfill this requirement.

<sup>2</sup> If taken for 8 units, can be used to fulfill the cell biology and neural systems course requirements.

**Electives**

12 units required. Electives must be at the 100-level or above and selected from the offerings in the Department of Biology, Hopkins Marine Station, or from the list of approved out-of-department electives. Up to 6 units of teaching and/or research are allowed. Only one course can be taken credit/no credit.

**Writing in the Major**

Select one of the following: 3-5

BIO 44Y	Core Plant Biology & Eco Evo Laboratory <sup>1</sup>	
BIO 107	Human Physiology Laboratory <sup>2</sup>	
BIO 137	Plant Genetics <sup>2</sup>	
BIO 168	Explorations in Stem Cell Biology <sup>1,2</sup>	
BIO 196A	Biology Senior Reflection <sup>2</sup>	
BIO 197WA	Senior Writing Project: The Personal Essay in Biology <sup>2</sup>	
BIO 199W	Senior Honors Thesis: How to Effectively Write About Scientific Research <sup>2</sup>	
BIOHOPK 44Y	Core Laboratory in Plant Biology, Ecology and Evolution	
BIOHOPK 172H	Marine Ecology: From Organisms to Ecosystems <sup>2,3</sup>	

<sup>1</sup> If taken academic year 2014-15 or later.

<sup>2</sup> This course can also be used to count toward the elective requirement.

<sup>3</sup> If taken academic year 2015-16 or later.

**Honors Requirements**

1. Approved Honors Proposal
2. 10 units of research from the same lab; only research units from BIO or BIOHOPK are permitted as follows:

BIO 199	Advanced Research Laboratory in Experimental Biology	
BIO 199X	Out-of-Department Advanced Research Laboratory in Experimental Biology	
BIOHOPK 199H	Undergraduate Research	

3. Poster/oral presentation at annual honors symposium
4. Approved Honors Thesis

5. 3.0 GPA in all courses taken for the major with the exception of research and/or teaching units

## Honors

To graduate with departmental honors, a student must conduct an independent research project typically over the course of at least one year; projects are started no later than Autumn or Winter quarter of the junior year. Research must be done in a Biology Department lab or a lab in another department for which the student has obtained prior approval. Administrative steps include:

1. Submit an approved honors proposal to the department's student services office two quarters prior to graduation. For instance, students graduating Spring Quarter must submit petitions no later than mid-Autumn Quarter.
2. Complete at least 10 units of an approved research project in from the same lab. Only research units from BIO or BIOHOPK are permitted:

BIO 199	Advanced Research Laboratory in Experimental Biology	1-15
BIO 199X	Out-of-Department Advanced Research Laboratory in Experimental Biology	1-15
BIOHOPK 199H	Undergraduate Research	1-15

3. Obtain at least a 3.0 (B) grade point average (GPA) in all Biology major requirements taken at Stanford (foundational breadth, core, and elective courses). Grades earned from teaching and research are not computed into this GPA:

BIO 199	Advanced Research Laboratory in Experimental Biology	1-15
BIO 199X	Out-of-Department Advanced Research Laboratory in Experimental Biology	1-15
BIO 290	Teaching of Biology	1-5
BIO 290	Teaching of Biological Science	1-5
BIO 291	Development and Teaching of Core Experimental Laboratories	1-2
BIOHOPK 199H	Undergraduate Research	1-15

4. If graduating in June, participate in the annual Achauer Undergraduate Biology Honors Symposium by presenting a poster or giving an oral presentation. The symposium is typically at the end of May. If graduating Autumn, Winter, or Summer Quarter, produce a poster to be displayed at the symposium. Students graduating in quarters other than spring, are required to submit a poster in the quarter in which they graduate.
5. Complete and, by the published deadline within the quarter graduation is expected, submit online an honors thesis approved by at least two readers (one of whom must be from the faculty of the Department of Biology and both must be Academic Council members). The title page of the honors thesis will include student name, thesis title, name and department of research sponsor, and name and department of second reader. Students must submit this page with original ink signatures to the student services office by the published deadline for the quarter in which graduation is expected.

Further information on the honors program is available in the student services office in Gilbert 108, as well as on the Honors Program and Undergraduate Research in Biology (<http://biology.stanford.edu/research-and-honors>) website.

## Hopkins Marine Station

For additional information, see the "Biology, Hopkins Marine Station (p. 351)" section of this bulletin or the Hopkins Marine Station web site (<http://hopkins.stanford.edu>).

Courses offered by the Department of Biology are listed under the subject code BIOHOPK on the Stanford Bulletin's ExploreCourses web site.

### Summer Program at Hopkins Marine Station

The summer program is open to advanced undergraduate, graduate students, and postdoctoral students, and to teachers whose biological backgrounds, teaching, or research activities can benefit from a summer's study of marine life. Applications, deadlines, and further information are available at <http://hopkins.stanford.edu>.

### Courses

Courses at Hopkins Marine Station can satisfy many requirements, from the Natural Sciences GER to major and minor requirements in departments housed in the Schools of Engineering, Humanities and Sciences, and Earth Sciences. Students are encouraged to check with their department's student services office to see which courses at Hopkins may be used to fulfill major or minor requirements.

Students may go to Hopkins as early as Spring Quarter in the sophomore year, and can also go in the junior and/or senior year to take elective courses. The following Hopkins Marine Station courses may be used toward the Biology degree requirements:

#### Core

Units		Units
BIOHOPK 43	Plant Biology, Evolution, and Ecology	5
BIOHOPK 44Y	Core Laboratory in Plant Biology, Ecology and Evolution	5

#### Electives

	Units	
BIOHOPK 150H	Ecological Mechanics	3
BIOHOPK 154H	Animal Diversity: An Introduction to Evolution of Animal Form and Function from Larvae to Adults	7
BIOHOPK 155H	Developmental Biology and Evolution	4
BIOHOPK 160H	Developmental Biology in the Ocean: Diverse Embryonic & Larval Strategies of marine invertebrates	5-8
BIOHOPK 161H	Invertebrate Zoology	5
BIOHOPK 162H	Comparative Animal Physiology	5
BIOHOPK 163H	Oceanic Biology	4
BIOHOPK 165H	The Extreme Life of the Sea	3
BIOHOPK 166H	Molecular Ecology	5
BIOHOPK 167H	Nerve, Muscle, and Synapse	5
BIOHOPK 168H	Disease Ecology: from parasites evolution to the socio-economic impacts of pathogens on nations	3
BIOHOPK 172H	Marine Ecology: From Organisms to Ecosystems	5
BIOHOPK 173H	Marine Conservation Biology	4
BIOHOPK 174H	Experimental Design and Probability	3
BIOHOPK 177H	Dynamics and Management of Marine Populations	4
BIOHOPK 179H	Physiological Ecology of Marine Megafauna	3
BIOHOPK 182H	Stanford at Sea (only 6 units may count towards the major)	16
BIOHOPK 184H	Holistic Biology (only 6 units may count towards the major)	16
BIOHOPK 185H	Ecology and Conservation of Kelp Forest Communities	5

BIOHOPK 187H	Sensory Ecology	4
BIOHOPK 189H	Sustainability and Marine Ecosystems	3
BIOHOPK 264H	POPULATION GENOMICS	1-2
BIOHOPK 274	Hopkins Microbiology Course	9-12
BIOHOPK 275H	Synthesis in Ecology	2

### Research and/or Teaching (maximum 6 units combined)

		Units
BIOHOPK 198H	Directed Instruction or Reading	1-15
BIOHOPK 199H	Undergraduate Research	1-15
BIOHOPK 290H	Teaching of Biological Science	1-15
BIOHOPK 300H	Research	1-15

See Biology degree requirements above for further information. Many of the Hopkins Marine Station courses may be used to fulfill department major requirements.

## Minor in Biology

Students interested in the minor in Biology must declare the minor and submit their course plan online via Axxess no later than two quarters prior to the student's intended quarter of degree conferral. The Biology minor requires a minimum of six courses meeting the following criteria:

- All courses must be taken for a letter grade.
- All courses must be worth or approved for 3 or more units.
- All courses, other than the BIO 41, 42, 43, BIOHOPK 43, OSPAUSTL 10, 20, or 30 must be at or above the 100-level. Stanford Introductory Seminars may not be used to fulfill the minor requirements.
- Courses used to fulfill the minor may not be used to fulfill any other department degree requirements (minor or major).
- Courses must be chosen from the offerings of the Department of Biology or the Hopkins Marine Station, or from the list of approved out-of-department electives ([http://biology.stanford.edu/sites/all/files/out\\_of\\_dept\\_electives.pdf](http://biology.stanford.edu/sites/all/files/out_of_dept_electives.pdf)).
- At least one course from the Biology Core must be taken:

BIO 41	Genetics, Biochemistry, and Molecular Biology	5
BIO 42	Cell Biology and Animal Physiology	5
BIO 43	Plant Biology, Evolution, and Ecology	5
	or BIOHOPK 43 Plant Biology, Evolution, and Ecology	5

- The Biology Core Laboratory courses do not count towards the minor:

BIO 44X	Core Molecular Biology Laboratory	5
BIO/BIOHOPK 44Y	Core Plant Biology & Eco Evo Laboratory	5

- Elective credit for research is limited to a maximum of 3 units.

BIO 199	Advanced Research Laboratory in Experimental Biology	1-15
BIOHOPK 199H	Undergraduate Research	1-15
Not allowable is:		
BIO 199X	Out-of-Department Advanced Research Laboratory in Experimental Biology	

## Master of Science in Biology

For information on the University's basic requirements for the M.S. degree, see the "Graduate Degrees (p. 46)" section of this bulletin.

Students considering this degree option should meet with staff in the student services office prior to applying.

The M.S. degree program offers general or specialized study to individuals seeking biologically oriented course work and to undergraduate science majors wishing to increase or update their science background or obtain advanced research experience. Students who have majored in related fields are eligible to apply, but course work equivalent to the preparation of a Stanford B.S. in Biology may be required in addition to the general requirements. This includes course work in biology, chemistry, physics and mathematics. The M.S. program does not have an M.S. with thesis option.

### Admissions

The department only accepts M.S. program applications from matriculated Stanford students:

- undergraduates wishing to pursue a coterminal M.S. degree.
- graduate students from other Stanford programs wishing to pursue an M.S. degree.
- current Biology Ph.D. students wishing to discontinue the Ph.D. program with an M.S. degree.

Undergraduates must apply in mid-January to start the program in Spring, Autumn, or the following Winter quarter. Graduate students may apply by the third week of any academic quarter.

### Required application materials

- Application for Admission, Preliminary Program Proposal, and Course Transfer Form (<https://biology.stanford.edu/coterm-admissions>)
- A statement of purpose which explains why the student wishes to enter the program and what the student plans to accomplish while in the program. The statement should also supply information about the student's science capabilities if his or her undergraduate academic record does not accurately reflect them.
- Unofficial Stanford transcript.
- Two letters of recommendation, preferably from Biology faculty members in this department. If two such letters are not available, letters from faculty familiar with the student's ability to succeed in a graduate science curriculum are acceptable.
- Application fee: an application fee is charged to all students regardless of outcome; application fee is applied directly to students' accounts.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career

may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

## General Requirements

The M.S. program consists of Department of Biology and/or Hopkins Marine Station course work, approved out-of-department electives, and foundational breadth courses totaling at least 45 units at or above the 100-level, distributed as follows:

1. A minimum of 23 of the 45 units must be courses designated primarily for graduate students (generally 200-level or higher, but not always).
2. A minimum of 36 units must be chosen from the offerings in the Department of Biology (BIO), Hopkins Marine Station (BIOHOPK), the list of approved out-of-department electives ([http://biology.stanford.edu/sites/all/files/out\\_of\\_dept\\_electives.pdf](http://biology.stanford.edu/sites/all/files/out_of_dept_electives.pdf)), research, teaching and/or foundational breadth courses.

		Units
BIO 198	Directed Reading in Biology	1-15
BIO 198X	Out-of-Department Directed Reading	1-15
BIO 290	Teaching of Biology	1-5
BIO 291	Development and Teaching of Core Experimental Laboratories	1-2
BIO 300	Graduate Research	1-10
BIO 300X	Out-of-Department Graduate Research	1-10
BIOHOPK 198H	Directed Instruction or Reading	1-15
BIOHOPK 290H	Teaching of Biological Science	1-15
BIOHOPK 300H	Research	1-15

- a. a maximum of 18 units may be a combination of Biology research, directed reading and/or teaching;
  - b. a maximum of 9 units may be foundational breadth courses in chemistry, mathematics, statistics, computer science, and/or physics beyond the level required for the undergraduate degree in Biology and at least at the 100-level.
3. No more than 9 units may be other Stanford course work relevant to a student's professional development. Students are required to petition for courses that fall into this category using the General Petition form ([http://biology.stanford.edu/sites/all/files/general\\_petition.pdf](http://biology.stanford.edu/sites/all/files/general_petition.pdf)).

Each candidate designs a coherent program of study in consultation with her or his department adviser. Although there are no specific courses required, program proposals must adhere to department parameters.

In addition to the unit requirements outlined above, students must adhere to the following:

1. A program proposal, signed by the student's adviser and approved by the chair of the M.S. committee, must be filed by the third week of the first quarter of enrollment. A revised program proposal is required to be filed whenever there are changes to a student's previously approved program proposal.
2. Students may take only 6 units CR/NC.
3. Students must maintain a GPA of 3.0 or higher.
4. Students must receive a grade of 'B-' or better in all courses taken for the degree.

Students not meeting these minimum requirements are subject to departmental academic review and/or dismissal.

The department's Master of Science Handbook ([http://biology.stanford.edu/sites/all/files/MS\\_handbook.pdf](http://biology.stanford.edu/sites/all/files/MS_handbook.pdf)) has additional information about the program, University policy and the department.

## Doctor of Philosophy in Biology

For information on the University's basic requirements for the Ph.D. degree, see the "Graduate Degrees (p. 45)" section of this bulletin. The training for a Ph.D. in Biology is focused on learning skills required for being a successful research scientist and teacher, including how to ask important questions and then devise and carry out experiments to answer these questions. Students work closely with an established adviser and meet regularly with a committee of faculty members to ensure that they understand the importance of diverse perspectives on experimental questions and approaches. Students learn how to evaluate critically pertinent original literature in order to stay abreast of scientific progress in their areas of interest. They also learn how to make professional presentations, write manuscripts for publication, and become effective teachers.

## Admissions

Students seeking entrance to graduate study in Biology ordinarily should have the equivalent of an undergraduate major in Biology at Stanford. However, students from other disciplines, particularly the physical sciences, are also encouraged to apply. Such students are advised at the time of initial registration on how they should complete background training during the first year of graduate study. In addition to the usual basic undergraduate courses in biology, it is recommended that preparation for graduate work include courses in chemistry through organic chemistry, general physics, and mathematics through calculus.

## Application, Admission, and Financial Aid

Prospective graduate students must apply via Stanford's online graduate application (<http://gradadmissions.stanford.edu>).

The department's program is divided into three separate areas of concentration:

- ecology/evolution/population studies
- integrative/organismal
- molecular/cellular/developmental/genetic/plant

Included in these concentrations is the option to conduct research at Hopkins Marine Station. These concentrations are recorded in the department as part of the admissions process and for tracking degree progress for admitted students; they do not appear on official university records.

Applicants are required to take the Graduate Record Examination (GRE) general test. The GRE subject test is not required. Applicants should plan on taking the GRE at least one month prior to the application deadline to ensure that official scores are available when applications are evaluated.

Admission to the Ph.D. program is competitive and in recent years it has been possible to offer admission to approximately 9-10 percent of the applicants.

Applicants who are eligible should apply for nationally competitive predoctoral fellowships, especially those offered by the National Science Foundation.

Admitted students are typically offered financial support in the form of Stanford Graduate Fellowships, research assistantships, NIH traineeships or biology fellowships.

## General Requirements

All students must be enrolled in exactly 10 units during autumn, winter, spring and summer quarters until reaching Terminal Graduate Registration (TGR) status and are required to pass all courses in which they are enrolled. Students must earn a grade of 'B-' or better in all courses applicable to the degree that are taken for a letter grade. Satisfactory completion of each year's general and track specific

requirements listed below is required for satisfactory progress towards the degree. Students not making satisfactory degree progress are subject to departmental academic review and/or dismissal.

### 1. First year advising

Each entering student meets with the first-year advising committee within the first two weeks of Autumn Quarter, Winter Quarter and May 15 of Spring Quarter. The committee reviews the student's previous academic work and current goals and advises the student on a program of Stanford courses, some of which may be required and others recommended. Completion of the core curriculum listed below under "Track Specific Requirements" is required of all students.

### 2. Ethics

Students must take a course on the ethical conduct of research. This course should be taken in the first year of the program.

BIO 312	Ethical Issues in Ecology and Evolutionary Biology	1
MED 255	The Responsible Conduct of Research	1

### 3. Teaching

4. Teaching experience and training are part of the graduate curriculum. Each student assists in teaching one course in
- the department's core lecture or lab series

BIO 41	Genetics, Biochemistry, and Molecular Biology	5
BIO 42	Cell Biology and Animal Physiology	5
BIO 43	Plant Biology, Evolution, and Ecology	5
BIO 44X	Core Molecular Biology Laboratory	5
BIO 44Y	Core Plant Biology & Eco Evo Laboratory	5

- and a second course that can be either a core course or other Biology or Hopkins Marine Station course

### 5. Seminars

Graduate seminars devoted to current literature and research in particular fields of biology are an important means of attaining professional perspective and competence. Seminars are presented under individual course listings or are announced by the various research groups. Topics of current biological interest are presented by speakers from Stanford and other institutions. During the first year of study, graduate students are required to attend seminars and make one formal seminar presentation which must be evaluated by a minimum of two Biology faculty members.

### 6. Fellowship application

All eligible first and second year students must apply for a National Science Foundation (NSF) Graduate Research Fellowship.

### 7. Adviser/lab selection

By May 1, each first-year student is required to have selected a lab in which to perform dissertation research and to have been accepted by the faculty member in charge.

### 8. Qualifying exam and admission to candidacy

During the second year, students are required to write a dissertation proposal which is evaluated by a committee of faculty (the dissertation proposal committee) in an oral presentation. Track-specific deadlines are listed below. All students must be admitted to candidacy by the end of their second year. This is contingent upon satisfactory completion of course work, all first and second year requirements, the dissertation proposal and the University's requirements for candidacy outlined in the Candidacy (p. 47) section of this bulletin. If a student does not meet the requirements for admission to candidacy by the end of the second year, the student is subject to dismissal from the Ph.D. program.

### 9. Committee meetings

Students must meet regularly with their advising committees. For more details, see the Biology PhD Handbook ([https://biology.stanford.edu/sites/all/files/PhD\\_Handbook\\_1415.pdf](https://biology.stanford.edu/sites/all/files/PhD_Handbook_1415.pdf)).

### 10. Individual Development Plan meetings

Students must meet once a year with their adviser. For more details, see the Biology PhD Handbook ([https://biology.stanford.edu/sites/all/files/PhD\\_Handbook\\_1415.pdf](https://biology.stanford.edu/sites/all/files/PhD_Handbook_1415.pdf)).

### 11. Publishable manuscript

Each student must complete one publishable manuscript (paper) for which s/he is the major contributor.

### 12. Residency requirement

A minimum of 135 units of graduate registration is required of each candidate at the time of graduation.

### Units 13. Doctoral dissertation

A substantial draft of the dissertation must be submitted to the student's oral examination committee at least one month before the oral exam is scheduled to take place. The dissertation must be presented to an oral examination committee (p. 47) comprised of at least five faculty members. In addition, the final written dissertation must be approved by the student's reading committee (p. 47) (a minimum of three approved faculty), and submitted to the Registrar's Office. Upon completion of this final requirement, a student is eligible for conferral of the degree.

## Track Specific Requirements

In addition to the general requirements listed above, students must also complete requirements within their concentration. Written petitions for exemptions to core curriculum and lab rotation requirements are considered by the advising committee and the chair of the graduate studies committee. Approval is contingent upon special circumstances and is not routinely granted.

### Molecular, Cellular, Developmental, Genetic, and Plant

- Courses: Students are required to take the following courses prior to Spring Quarter of the 4th year, except for the required first year courses as noted:

BIOS 200	Foundations in Experimental Biology (must be taken Autumn quarter of the first year)	6
BIO 301	Frontiers in Biology (satisfies first-year seminar requirement; must be taken Autumn and Winter quarters of first year)	1-3

One additional course in each of the four scientific areas decided upon by the student and the advising committee<sup>1</sup>

- Cell Biology
- Biology of Molecules
- Genetics/Genomics
- Quantitative Methods

- Lab Rotations: First-year students are required to complete rotations in at least two different laboratories for a total of 20 weeks during autumn and winter quarters. At least one rotation must be in a lab in the Department of Biology.
- Two-part qualifying exam: Each student must pass the exam in their second year.
  - Dissertation proposal:* During Autumn Quarter of the second year, the student must prepare a written dissertation proposal that outlines the student's projected dissertation research, including an expert assessment of the current literature; deadline is November 1.
  - Oral examination:* Held after submission of the written proposal to the dissertation proposal committee. It is an evaluation of the student's ability to summarize the field of study, generate

a working hypothesis, develop a degree plan that could be completed in 3-4 years, understand the logic of experimental design, develop a decision tree based on (all) possible results of experiments and draw conclusions and adapt hypotheses depending on results. Deadline is November 15.

- <sup>1</sup> Up to two of these courses may be "mini courses" in the Biosciences (BIOS).

### Integrative/Organismal

1. Courses: Students are required to take BIO 301 Frontiers in Biology in their first year. Students specializing in integrative/organismal biology may be required to take additional courses as advised by committee.
2. First-year paper: Students must submit a paper that is evaluated by a minimum of two Academic Council faculty members by May 15. This paper should be a step toward the development of a dissertation proposal and may consist of an analysis of new data or a literature review and synthesis.
3. Two-part qualifying exam: Each student must pass the exam in their second year.
  - a. *Dissertation proposal*: During Spring Quarter of the second year, the student must prepare a written dissertation proposal that outlines the student's projected dissertation research, including an expert assessment of the current literature; deadline is May 15.
  - b. *Oral examination*: Held after submission of the written proposal to the dissertation proposal committee. It is an evaluation of the student's ability to summarize the field of study, generate a working hypothesis, develop a degree plan that could be completed in 3-4 years, understand the logic of experimental design, develop a decision tree based on (all) possible results of experiments and draw conclusions and adapt hypotheses depending on results. Deadline is June 15.

### Ecology, Evolution, and Population Studies

1. Courses: Students are required to take the following courses in their first year:

BIO 302	Current Topics and Concepts in Population Biology, Ecology, and Evolution	1
BIO 303	Current Topics and Concepts in Population Biology, Ecology, and Evolution	1
BIO 304	Current Topics and Concepts in Population Biology, Ecology, and Evolution	1

Students specializing in ecology and evolution may be required to take additional courses as advised by committee.

2. First-year paper: The paper should be read, commented upon and agreed to as satisfactory by two EcoEvo faculty by May 15. This can be satisfied in a number of ways which all involve new writing, undertaken since entering the Stanford program. These may include:
  - a. A new draft research manuscript (a previously published paper is not acceptable).
  - b. Some other piece of new writing, such as a review paper from a course, or an initial literature review of a potential thesis topic. In this case the paper should ordinarily be not less than 10 double-spaced pages in usual sized font, and not more than 10 single spaced pages, plus references. It should be written in the style of a standard scientific paper.
3. Two-part qualifying exam: Each student must pass the exam in their second year.

- a. *Dissertation proposal*: During Spring Quarter of the second year, the student must prepare a written dissertation proposal that outlines the student's projected dissertation research, including an expert assessment of the current literature; deadline is May 15.
- b. *Oral examination*: Held after submission of the written proposal to the dissertation proposal committee. The student should prepare a presentation of the goals of the thesis, typically including preliminary data, models, etc. as appropriate which are relevant to at least the first goal, and should be prepared thereafter to discuss questions raised by the committee in professional scientific depth. Deadline is June 15.

*Emeriti Professors*: Bruce S. Baker, Winslow R. Briggs, Allan M. Campbell, David Epel, Donald Kennedy, Harold A. Mooney, Peter Ray, Joan Roughgarden, Robert Schimke, George N. Somero, Ward B. Watt, Norman K. Wessells, Dow O. Woodward, Charles Yanofsky

*Emeritus Professor (Research)*: R. Paul Levine

*Emeritus Professor (Teaching)*: Carol L. Boggs

*Chair*: Tim P. Stearns

*Professors*: Barbara A. Block, Steven M. Block, Larry B. Crowder, Martha S. Cyert, Gretchen C. Daily, Giulio De Leo, Mark W. Denny, Rodolfo Dirzo, Paul R. Ehrlich, Marcus W. Feldman (on leave autumn & spring), Russell D. Fernald, Christopher B. Field, Wolf Frommer, Judith Frydman, William F. Gilly, Deborah M. Gordon, Elizabeth A. Hadly, Philip C. Hanawalt, H. Craig Heller, Patricia P. Jones, Richard G. Klein, Ron R. Kopito, Sharon R. Long (on leave autumn), Liqun Luo, Susan K. McConnell, Fiorenza Micheli, W. James Nelson, Stephen R. Palumbi, Dmitri Petrov, Jonathan Pritchard, Noah A. Rosenberg, Robert M. Sapolsky, Carla J. Shatz, Kang Shen, Michael A. Simon, Robert D. Simoni (on leave), Tim P. Stearns, Stuart H. Thompson, Shripad Tuljapurkar, Peter Vitousek, Virginia Walbot

*Associate Professors*: Dominique Bergmann, Or Gozani, Christopher Lowe, Mary Beth Mudgett, Mark J. Schnitzer (on leave spring)

*Assistant Professors*: Xiaoke Chen, Scott J. Dixon, Jessica L. Feldman, Hunter B. Fraser (on leave winter), Tadashi Fukami (on leave spring), Jeremy A. Goldbogen, Erin Mordecai, Ashby Morrison, Kabir Peay, M. Kristy Red-Horse, Jan M. Skotheim (on leave winter-spring)

### Units

*Courtesy Professors*: Joseph Berry, Carlos D. Bustamante, Daniel Fisher, Arthur R. Grossman, Joseph S. Lipsick, Terry Root, Matthew P. Scott, Alfred Spormann, Irving Weissman, Wing Wong

*Courtesy Associate Professors*: Kathryn Barton, David Ehrhardt, Sue Rhee, Zhiyong Wang

*Courtesy Assistant Professors*: José R. Dinneny, Martin Jonikas, Jonathan Payne, Paula V. Welander

*Lecturers*: Daria Hekmat-Safe, Jamie Imam, Waheeda Khalfan, Shyamala D. Malladi, Patricia Seawell, Andrew Todhunter, James Watanabe

*Consulting Professors*: Cathy Laurie, Marc Tessier-Lavigne

*Librarian*: Michael Newman

## Overseas Studies Courses in Biology

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPAUSTL 10	Coral Reef Ecosystems	3
OSPAUSTL 25	Freshwater Systems	3
OSPAUSTL 30	Coastal Forest Ecosystems	3
OSPPARIS 83	The Cancer Problem: Causes, Treatment, and Prevention	4-5
OSPPARIS 88	Principles of Biochemistry	3
OSPSANTG 85	Marine Ecology of Chile and the South Pacific	5

## Biophysics

Courses offered by the Biophysics Program are listed under the subject code BIOPHYS on the Stanford Bulletin's ExploreCourses web site.

The Biophysics Program offers instruction and research opportunities leading to the Ph.D. in Biophysics. Students admitted to the program may perform their graduate research in any appropriate department.

The Stanford Biophysics Program is an interdisciplinary, interdepartmental training program leading to the Ph.D. Degree in biophysics. The program centers on understanding biological function in terms of physical and chemical principles. The Program comprises faculty from 16 departments in the Schools of Humanities and Sciences, Medicine, Engineering, and the Stanford Synchrotron Radiation Laboratory. Research in the Program involves two overlapping branches of biophysics: the application of physical and chemical principles and methods to solving biological problems, and the development of new methods.

The Biophysics Program aims to train students in quantitative approaches to biological problems, while also developing their perspective in choosing forefront biological problems. A balanced academic program is tailored to the diverse backgrounds of the students. The program requires graduate-level coursework in physical and biological sciences, participation in seminar series, and most importantly achievement of a high level of proficiency in independent research.

## Learning Outcomes (Graduate)

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Biophysics. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Biophysics and to interpret and present the results of such research.

## Graduate Program in Biophysics

For information on the University's basic requirements for the Ph.D. degree, see the "Graduate Degrees" (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>) section of this bulletin.

A small number of qualified applicants are admitted to the program each year. Applicants should present strong undergraduate backgrounds in the physical sciences and mathematics. The graduate course program, beyond the stated requirements, is worked out for each student individually with the help of appropriate advisers from the Committee on Biophysics.

The requirements and recommendations for applying to the Ph.D. Program in Biophysics include:

		Units
CHEM 131	Organic Polyfunctional Compounds	3
CHEM 171	Physical Chemistry I	3
CHEM 173	Physical Chemistry II	3
CHEM 175	Physical Chemistry III	3
BIOC 200	Applied Biochemistry	2

**Ph.D. students in the Program in Biophysics are required to complete the following course requirements:**

		Units
BIOPHYS 241	Biological Macromolecules	3-5
or BIOE 300A	Molecular and Cellular Bioengineering	
BIOPHYS 242	Methods in Molecular Biophysics	3
BIOPHYS 250	Seminar in Biophysics	1
MED 255	The Responsible Conduct of Research	1
AND, 4 graduate level courses in physical or biological science, with at least 1 course in physical science		
at least 1 course in literature-based biological science		

1. Training in a major with connections to biophysics such as physics, chemistry, or biology, with a quantitative background equivalent to that of an undergraduate physics or chemistry major at Stanford.
2. Opportunities for teaching are available during the first nine quarters, at the discretion of the advising committee.
3. The student must prepare a dissertation proposal defining the research to be undertaken, including methods of procedure. This proposal should be submitted by Autumn Quarter of the second year, and it must be approved by a committee of at least three members, including the principal research adviser and at least one member from the Biophysics Program. The candidate must defend the dissertation proposal in an oral examination. The dissertation reading committee normally evolves from the dissertation proposal review committee.
4. The student must present a Ph.D. dissertation as the result of independent investigation that expresses a contribution to knowledge in the field of biophysics.
5. The student must pass the University oral exam, taken only after the student has substantially completed the dissertation research. The examination is preceded by a public seminar in which the research is presented by the candidate.

*Director:* Vijay Pande (Chemistry)

*Professors:*

- Russ Altman (Genetics, Medical Informatics)
- Steve Block (Applied Physics, Biology)
- Steven Boxer (Chemistry)
- Axel Brunger (Molecular and Cellular Physiology)
- Gilbert Chu (Oncology)
- Steven Chu (Physics, Molecular and Cellular Physiology)
- Mark Davis (Microbiology and Immunology)
- Sebastian Doniach (Physics, Applied Physics)
- James Ferrell (Chemical and Systems Biology)
- Daniel Fisher (Applied Physics)
- Judith Frydman (Biology)
- K. Christopher Garcia (Molecular and Cellular Physiology, Structural Biology)
- Gary Glover (Radiology)

- Philip C. Hanawalt (Biology)
- Daniel Herschlag (Biochemistry)
- Keith O. Hodgson (Chemistry)
- Theodore Jardetzky (Structural Biology)
- Chaitan Khosla (Chemical Engineering, Chemistry)
- Peter S. Kim (Biochemistry)
- Brian Kobilka (Molecular and Cellular Physiology)
- Eric Kool (Chemistry)
- Ron Kopito (Biology)
- Roger D. Kornberg (Structural Biology)
- Craig Levin (Radiology)
- Michael Levitt (Structural Biology)
- Richard Lewis (Molecular and Cellular Physiology)
- Sharon Long (Biology)
- Tobias Meyer (Chemical and Systems Biology)
- W. E. Moerner (Chemistry)
- Vijay Pande (Chemistry)
- Norbert Pelc (Bioengineering, Radiology)
- Joseph D. Puglisi (Structural Biology)
- Stephen Quake (Bioengineering)
- Stephen J. Smith (Molecular and Cellular Physiology)
- Edward I. Solomon (Chemistry)
- James A. Spudich (Biochemistry, Developmental Biology)
- Julie Theriot (Biochemistry)
- Thomas Wandless (Chemical & Systems Biology)
- William I. Weis (Structural Biology, Molecular and Cellular Physiology)
- Richard N. Zare (Chemistry)

*Associate Professors:*

- Annelise Barron (Bioengineering)
- Zev Bryant (Bioengineering)
- Jennifer Cochran (Bioengineering)
- Ron Dror (Computer Science)
- Miriam Goodman (Molecular and Cellular Physiology)
- Pehr Harbury (Biochemistry)
- KC Huang (Bioengineering)
- Jan Liphardt (Bioengineering)
- Merritt Maduke (Molecular and Cellular Physiology)
- Beth Pruitt (Mechanical Engineering)
- Jianghong Rao (Radiology)
- Mark Schnitzer (Biology, Applied Physics)
- Andrew Spakowitz (Chemical Engineering)

*Assistant Professors:*

- Onn Brandman (Biochemistry)
- Manish Butte (Pediatrics)
- Lynette Cegelski (Chemistry)
- Ovijit Chaudhuri (Mechanical Engineering)
- Bianxiao Cui (Chemistry)
- Rhiju Das (Biochemistry)
- Adam de la Zerda (Structural Biology)
- Alexander Dunn (Chemical Engineering)
- Liang Feng (Molecular and Cellular Physiology)
- Polly Fordyce (Genetics)
- William Greenleaf (Genetics)
- Jin Billy Li (Genetics)
- Lingyin Li (Biochemistry)

- Manu Prakash (Bioengineering)
- Ingmar Riedel-Kruse (Bioengineering)
- Julia Salzman (Biochemistry)
- Jan Skotheim (Biology)
- Sindy Tang (Mechanical Engineering)
- Mary Teruel (Chemical and Systems Biology)
- Bo Wang (Bioengineering)

## Chemistry

Courses offered by the Department of Chemistry are listed under the subject code CHEM on the Stanford Bulletin's ExploreCourses web site.

Chemistry is central to many scientific disciplines. It enables developments in biotechnology, nanotechnology, catalysis, human health, materials, and earth and environmental sciences. Developing new probes of biological molecules, modeling protein folding and reactivity, manipulating carbon nanotubes, developing new oxidation and polymerization catalysts, and synthesizing organic molecules to probe ion-channels are all research areas that are pursued actively in the Chemistry Department. The overarching theme of these pursuits is a focus at the atomic and molecular levels, whether this concerns probing the electronic structure and reactivity of molecules as small as dihydrogen or synthesizing large polymer assemblies. The ability to synthesize new molecules and materials and to modify existing biological structures allows the properties of complex systems to be analyzed and harnessed for scientific and societal benefit.

## Undergraduate Program

### Mission

The mission of the undergraduate program in Chemistry is to provide students with the fundamental concepts of the molecular sciences through a program of coursework and laboratory experiences. Students acquire in-depth knowledge of the principles of chemistry, the methodologies necessary to solve complex problems, and the ability to articulate their ideas effectively to the scientific community. The Chemistry program has a long-standing tradition of encouraging undergraduate majors to become involved in research during the academic year and through a ten-week summer research program. The major is designed to provide students with excellent preparation for further study in graduate or professional schools as well as careers in chemistry.

### Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to:

1. understand the knowledge and master the skills to solve problems in the synthesis, measurement and modeling of chemical systems.
2. critically assess and integrate the reasoning process used in chemical science and communicate it effectively in written and spoken form.
3. apply the knowledge and skills gained by study of specific chemical systems to understand and predict the chemistry of a broad range of complex systems of scientific and societal interest.
4. apply the understanding of synthesis, measurement and modeling to extract new chemical information from experimental data and to propose new chemical investigations.

### Chemistry Premedical Recommendations

The department recommends that students interested in a health profession take the following courses for a letter grade:

Select one of the following:

CHEM 31A & CHEM 31B	Chemical Principles I and Chemical Principles II	
CHEM 31X	Chemical Principles Accelerated	
CHEM 33	Structure and Reactivity	5
CHEM 35	Synthetic and Physical Organic Chemistry	5
CHEM 130	Organic and Bio-organic Chemistry Laboratory	3
CHEM 131	Organic Polyfunctional Compounds	3
CHEM 135 or CHEM 171	Physical Biochemistry or Physical Chemistry I	3
CHEM 181	Biochemistry I	3

Historically, these courses have fulfilled the chemistry requirements at most medical schools. For information on medical school advising and resources, download the Undergraduate Advising and Research publication ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_planning\\_school\\_GraduateSchool.html#5](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_planning_school_GraduateSchool.html#5)).

## Graduate Program

The University's basic requirements for the M.S. and Ph.D. degrees are discussed in the "Graduate Degrees (p. 45)" section of this bulletin.

### Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Chemistry and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in the field of chemistry. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of chemistry and to interpret and present the results of such research.

### Fellowships and Scholarships

In addition to University and school fellowships and scholarships open to properly qualified students, there are several department fellowships in chemistry awarded based on merit. Teaching assistantships and research assistantships are provided to eligible graduate students. Teaching assistantships beyond the required quarters are available for those interested. Graduate fellowships, scholarships, and teaching assistantships are administered through the Department of Chemistry student services office.

### Teaching Credentials

The requirements for certification to teach chemistry in the secondary schools of California may be ascertained by consulting the section on credentials under the "School of Education (p. 153)" section of this bulletin and the Credential Administrator of the School of Education.

### Chemical Physics

Students with an exceptionally strong background in physics and mathematics may, with special arrangement, pursue a program of studies in chemical physics.

Units  
5-10

## Bachelor of Science in Chemistry

### Entrance Preparation

Entrance credit in the preparatory subjects of chemistry, physics, and especially mathematics provides flexibility in creating a four-year schedule for students intending to major in Chemistry.

### Degree Requirements

Additional information on the undergraduate program, including suggested course schedules, can be found on the Department of Chemistry web site beginning with the section on Requirements for the B.S. Degree (<http://chemistry.stanford.edu/undergradprograms/requirements-bs-degree>). All degree courses must be taken for a letter grade.

### Lab Courses

Lab courses have a mandatory, non-refundable fee. Students who have not yet taken a lab course must purchase a department-approved lab coat and safety glasses. The department makes these available for purchase at the lowest possible price during the first few days of each quarter.

### Chemistry Option

Requirements for students choosing the Chemistry Option:

Select one of the following: Units  
5-10

CHEM 31A & CHEM 31B	Chemical Principles I and Chemical Principles II	
CHEM 31X	Chemical Principles Accelerated	

#### Required Chemistry Courses

CHEM 33	Structure and Reactivity	5
CHEM 35	Synthetic and Physical Organic Chemistry	5
CHEM 130	Organic and Bio-organic Chemistry Laboratory	3
CHEM 131	Organic Polyfunctional Compounds	3
CHEM 132	Synthesis Laboratory	3
CHEM 134	Analytical Chemistry Laboratory	5
CHEM 151	Inorganic Chemistry I	3
CHEM 153	Inorganic Chemistry II	3
CHEM 171	Physical Chemistry I	3
CHEM 173	Physical Chemistry II	3
CHEM 174	Electrochemical Measurements Lab	3
CHEM 175	Physical Chemistry III	3
CHEM 176	Spectroscopy Laboratory	3

#### Mathematics or CME

MATH 41	Calculus	
MATH 42	Calculus	

Select one of the following series:

Series A 11-15

MATH 51	Linear Algebra and Differential Calculus of Several Variables	
MATH 51M or CME 192 or CS 106A	Introduction to MATLAB for Multivariable Mathematics or Introduction to MATLAB Programming Methodology	
MATH 53	Ordinary Differential Equations with Linear Algebra	

Series B 15

CME 100	Vector Calculus for Engineers	
CME 102	Ordinary Differential Equations for Engineers	
CME 104	Linear Algebra and Partial Differential Equations for Engineers	

**Physics Required Courses**

PHYSICS 41	Mechanics	4
PHYSICS 42	Classical Mechanics Laboratory	1
PHYSICS 43	Electricity and Magnetism	4
PHYSICS 44	Electricity and Magnetism Lab	1
Total Units		86-95

**Biological Chemistry Option**

Requirements for students choosing the Biological Chemistry Option.

Select one of the following: **Units**  
5-10

CHEM 31A & CHEM 31B	Chemical Principles I and Chemical Principles II	
CHEM 31X	Chemical Principles Accelerated	

**Required Chemistry and Biology courses**

CHEM 33	Structure and Reactivity	5
CHEM 35	Synthetic and Physical Organic Chemistry	5
CHEM 130	Organic and Bio-organic Chemistry Laboratory	3
CHEM 131	Organic Polyfunctional Compounds	3
CHEM 132	Synthesis Laboratory	3
CHEM 134	Analytical Chemistry Laboratory	5
CHEM 151	Inorganic Chemistry I	3
CHEM 171	Physical Chemistry I	3
CHEM 173	Physical Chemistry II	3
CHEM 176	Spectroscopy Laboratory	3
CHEM 181	Biochemistry I	3
CHEM 183	Biochemistry II	3
CHEM 184	Biological Chemistry Laboratory	4
CHEM 185	Biophysical Chemistry	3
BIO 42	Cell Biology and Animal Physiology	5

**Mathematics or CME**

MATH 41	Calculus	
MATH 42	Calculus	

Select one of the following Series:

Series A **Units** 11-15

MATH 51	Linear Algebra and Differential Calculus of Several Variables	
MATH 51M	Introduction to MATLAB for Multivariable Mathematics	
or CME 192	Introduction to MATLAB	
or CS 106A	Programming Methodology	
MATH 53	Ordinary Differential Equations with Linear Algebra	

Series B **Units** 15

CME 100	Vector Calculus for Engineers	
CME 102	Ordinary Differential Equations for Engineers	
CME 104	Linear Algebra and Partial Differential Equations for Engineers	

**Required Physics Courses**

PHYSICS 41	Mechanics	4
PHYSICS 42	Classical Mechanics Laboratory	1
PHYSICS 43	Electricity and Magnetism	4
PHYSICS 44	Electricity and Magnetism Lab	1

**Elective** **Units** 3-4

Select one graduate-level elective course related to your biochemical interests.

CHEM 221	Advanced Organic Chemistry	
CHEM 223	Advanced Organic Chemistry	

CHEM 225	Advanced Organic Chemistry	
CHEM 227	Therapeutic Science at the Chemistry - Biology Interface <small>strongly recommended</small>	
CHEM 235	Applications of NMR Spectroscopy	
CHEM 255	Advanced Inorganic Chemistry	
CHEM 271	Advanced Physical Chemistry	
CHEM 277	Materials Chemistry and Physics <small>not offered 2014-15</small>	
CHEM 297	Bio-Inorganic Chemistry	
BIOC 241	Biological Macromolecules	
BIOPHYS 232	Advanced Imaging Lab in Biophysics	
BIOE 214	Representations and Algorithms for Computational Molecular Biology	
BIOE 300A	Molecular and Cellular Bioengineering	
BIOE 224	Probes and Applications for Multi-modality Molecular Imaging of Living Subjects	
BIOE 331	Protein Engineering	
BIOE 335	Molecular Motors I	
BIO 214	Advanced Cell Biology	
BIO 230	Molecular and Cellular Immunology	
BIO 232	Advanced Imaging Lab in Biophysics	
CSB 220	Chemistry of Biological Processes	
CSB 260	Concepts and Applications in Chemical Biology	
Total Units		98-108

For further information on the undergraduate program, see the Department of Chemistry (<http://chemistry.stanford.edu/undergraduate-programs>) web site.

**Chemistry Major Schedule**

Below are possible schedules for the traditional concentration and the biological chemistry concentration, each followed by an accelerated schedule.

**Schedule for Traditional Concentration**

First Year	Units		
	Autumn	Winter	Spring
Chemical Principles I (CHEM 31A)		5	
Calculus (MATH 41)		5	
Chemical Principles II (CHEM 31B)			5
Calculus (MATH 42)			5
Structure and Reactivity (CHEM 33)			5
Linear Algebra and Differential Calculus of Several Variables (MATH 51)			5
Year Total:		10	10

Second Year	Units		
	Autumn	Winter	Spring
Synthetic and Physical Organic Chemistry (CHEM 35)	5		
Introduction to MATLAB for Multivariable Mathematics (MATH 51M)	1		
Ordinary Differential Equations with Linear Algebra (MATH 53)	5		
Organic and Bio-organic Chemistry Laboratory (CHEM 130)			3
Organic Polyfunctional Compounds (CHEM 131)			3
Mechanics (PHYSICS 41)			4
Classical Mechanics Laboratory (PHYSICS 42)			1
Analytical Chemistry Laboratory (CHEM 134)			5
Electricity and Magnetism (PHYSICS 43)			4
Electricity and Magnetism Lab (PHYSICS 44)			1
Year Total:	11	11	10

Third Year	Units		
	Autumn	Winter	Spring
Synthesis Laboratory (CHEM 132)			3
Inorganic Chemistry I (CHEM 151)			3
Physical Chemistry I (CHEM 171)			3
Year Total:		6	3

Fourth Year	Units		
	Autumn	Winter	Spring
Physical Chemistry II (CHEM 173)	3		
Electrochemical Measurements Lab (CHEM 174)	3		
Physical Chemistry III (CHEM 175)			3
Spectroscopy Laboratory (CHEM 176)			3
Inorganic Chemistry II (CHEM 153)			3
Year Total:	6	6	3

Total Units in Sequence: 86

### Accelerated Schedule for the Traditional Concentration

First Year	Units		
	Autumn	Winter	Spring
Chemical Principles Accelerated (CHEM 31X)	5		
Linear Algebra and Differential Calculus of Several Variables (MATH 51)	5		
Introduction to MATLAB for Multivariable Mathematics (MATH 51M)	1		
Structure and Reactivity (CHEM 33)			5
Mechanics (PHYSICS 41)			4
Classical Mechanics Laboratory (PHYSICS 42)			1
Synthetic and Physical Organic Chemistry (CHEM 35)			5
Electricity and Magnetism (PHYSICS 43)			4
Electricity and Magnetism Lab (PHYSICS 44)			1
Year Total:	11	10	10

Second Year	Units		
	Autumn	Winter	Spring
Organic and Bio-organic Chemistry Laboratory (CHEM 130)	3		
Organic Polyfunctional Compounds (CHEM 131)	3		
Synthesis Laboratory (CHEM 132)			3
Inorganic Chemistry I (CHEM 151)			3
Ordinary Differential Equations with Linear Algebra (MATH 53)			5
Analytical Chemistry Laboratory (CHEM 134)			5
Physical Chemistry I (CHEM 171)			3
Year Total:	6	11	8

Third Year	Units		
	Autumn	Winter	Spring
Physical Chemistry II (CHEM 173)	3		
Electrochemical Measurements Lab (CHEM 174)	3		
Physical Chemistry III (CHEM 175)			3
Spectroscopy Laboratory (CHEM 176)			3
Inorganic Chemistry II (CHEM 153)			3
Year Total:	6	6	3

Total Units in Sequence: 71

### Schedule for Biological Chemistry Concentration

First Year	Units		
	Autumn	Winter	Spring
Chemical Principles I (CHEM 31A)	5		
Calculus (MATH 41)	5		
Chemical Principles II (CHEM 31B)			5
Calculus (MATH 42)			5
Structure and Reactivity (CHEM 33)			5
Linear Algebra and Differential Calculus of Several Variables (MATH 51)			5
Year Total:	10	10	10

Second Year	Units		
	Autumn	Winter	Spring
Synthetic and Physical Organic Chemistry (CHEM 35)	5		
Introduction to MATLAB for Multivariable Mathematics (MATH 51M)	1		
Ordinary Differential Equations with Linear Algebra (MATH 53)	5		
Organic and Bio-organic Chemistry Laboratory (CHEM 130)			3
Organic Polyfunctional Compounds (CHEM 131)			3
Mechanics (PHYSICS 41)			4
Classical Mechanics Laboratory (PHYSICS 42)			1
Analytical Chemistry Laboratory (CHEM 134)			5
Physical Chemistry I (CHEM 171)			3
Year Total:	11	11	8

Third Year	Units		
	Autumn	Winter	Spring
Biochemistry I (CHEM 181)	3		
Inorganic Chemistry I (CHEM 151)			3
Biochemistry II (CHEM 183)			3
Cell Biology and Animal Physiology (BIO 42)			5
Electricity and Magnetism (PHYSICS 43)			4
Electricity and Magnetism Lab (PHYSICS 44)			1
Year Total:	3	11	5

Fourth Year	Units		
	Autumn	Winter	Spring
Physical Chemistry II (CHEM 173)	3		
Synthesis Laboratory (CHEM 132)			3
Spectroscopy Laboratory (CHEM 176)			3
Biological Chemistry Laboratory (CHEM 184)			4
Biophysical Chemistry (CHEM 185)			3
Therapeutic Science at the Chemistry - Biology Interface (CHEM 227)			3
Year Total:	3	6	10

Total Units in Sequence: 98

### Accelerated Schedule for the Biological Chemistry Concentration

First Year	Units		
	Autumn	Winter	Spring
Chemical Principles Accelerated (CHEM 31X)	5		
Linear Algebra and Differential Calculus of Several Variables (MATH 51)	5		
Introduction to MATLAB for Multivariable Mathematics (MATH 51M)	1		
Structure and Reactivity (CHEM 33)			5
Mechanics (PHYSICS 41)			4
Classical Mechanics Laboratory (PHYSICS 42)			1
Synthetic and Physical Organic Chemistry (CHEM 35)			5
Electricity and Magnetism (PHYSICS 43)			4
Electricity and Magnetism Lab (PHYSICS 44)			1
Year Total:	11	10	10

Second Year	Units		
	Autumn	Winter	Spring
Organic and Bio-organic Chemistry Laboratory (CHEM 130)	3		
Organic Polyfunctional Compounds (CHEM 131)	3		
Ordinary Differential Equations with Linear Algebra (MATH 53)	5		
Synthesis Laboratory (CHEM 132)			3
Inorganic Chemistry I (CHEM 151)			3
Cell Biology and Animal Physiology (BIO 42)			5
Analytical Chemistry Laboratory (CHEM 134)			5
Physical Chemistry I (CHEM 171)			3
Year Total:	11	11	8

Third Year	Units			
	Autumn	Winter	Spring	
Physical Chemistry II (CHEM 173)		3		
Biochemistry I (CHEM 181)		3		
Spectroscopy Laboratory (CHEM 176)			3	
Biochemistry II (CHEM 183)			3	
Biological Chemistry Laboratory (CHEM 184)			4	
Biophysical Chemistry (CHEM 185)			3	
Therapeutic Science at the Chemistry - Biology Interface (CHEM 227)			3	
Year Total:		6	6	10

Total Units in Sequence: 83

## Related Courses

Courses offered by other departments that may be of interest to Chemistry majors include:

		Units
BIO 41	Genetics, Biochemistry, and Molecular Biology	5
BIO 42	Cell Biology and Animal Physiology	5
BIO 43	Plant Biology, Evolution, and Ecology	5
CHEMENG 20	Introduction to Chemical Engineering	3
CHEMENG 120A	Fluid Mechanics	4
CHEMENG 120B	Energy and Mass Transport	4
CHEMENG 130	Separation Processes	3
CS 106A	Programming Methodology (recommended for students planning graduate study)	3-5
CS 106B	Programming Abstractions (recommended for students planning graduate study)	3-5
ENGR 50	Introduction to Materials Science, Nanotechnology Emphasis	4
MATH 106	Functions of a Complex Variable	3
MATH 109	Applied Group Theory	3
MATH 113	Linear Algebra and Matrix Theory	3
MATH 131P	Partial Differential Equations I	3
MATSCI 151	Microstructure and Mechanical Properties	4
PHYSICS 110	Advanced Mechanics	4
STATS 110	Statistical Methods in Engineering and the Physical Sciences	4-5
STATS 116	Theory of Probability	3-5

## American Chemical Society (ACS) Certification

Students who wish to be certified as having met the minimum requirements of the American Chemical Society for professional training must complete, in addition to the above requirements:

		Units
CHEM 181	Biochemistry I	3
CHEM 183	Biochemistry II	3
PHYSICS 45	Light and Heat	4
PHYSICS 46	Light and Heat Laboratory	1
CHEM 190	Advanced Undergraduate Research (6 units)	1-5

## Honors Program

A bachelor's degree in Chemistry with honors is available to those students interested in chemical research. Admission to the honors program requires a grade point average (GPA) of 3.3 in science courses and an overall GPA of 3.0 in all University courses. Beyond the standard B.S. course requirements for each track, 9 units of research credit and 9

units of course work need to be completed during the junior and senior academic years. A thesis, approved by the honors adviser, must be completed during the senior year. The theses must be submitted to the honors adviser, at least one week before the end of regular classes in Spring Quarter, and must be completed by May 15 to be considered for the Firestone or Golden award. The use of a single course for multiple requirements for honors, major, minor, or coterminal requirements is not allowed. Students who wish to be admitted to the honors program should register with the student services manager in the Mudd Chemistry Building in Spring Quarter of their junior year.

CHEM 190 Advanced Undergraduate Research research units towards honors may be completed, after being accepted into the program, in any laboratory within Chemistry or with courtesy faculty in Chemistry. Other chemical research can be approved through a formal petitioning of the Undergraduate Affairs Committee. At least 3 units must be completed during the senior year. Participation in a summer research program in an academic setting between junior and senior years may be used in lieu of 3 units of CHEM 190 Advanced Undergraduate Research. For each quarter, a progress report reflecting the units undertaken is required. This report must be signed by the honors adviser, and filed in the department student services office before the last day of finals in the quarter during which the research is performed.

The 9 units of course work for honors must be completed from courses approved by the Undergraduate Affairs Committee and taken for a letter grade. At least six of these units need to be taken from the following CHEM courses:

		Units
CHEM 153	Inorganic Chemistry II	3
CHEM 174	Electrochemical Measurements Lab	3
CHEM 175	Physical Chemistry III	3
CHEM 181	Biochemistry I	3
CHEM 183	Biochemistry II	3
CHEM 185	Biophysical Chemistry	3
CHEM 221	Advanced Organic Chemistry	3
CHEM 223	Advanced Organic Chemistry	3
CHEM 225	Advanced Organic Chemistry	3
CHEM 235	Applications of NMR Spectroscopy	3
CHEM 251	Advanced Inorganic Chemistry	3
CHEM 255	Advanced Inorganic Chemistry	3
CHEM 271	Advanced Physical Chemistry	3
CHEM 273	Advanced Physical Chemistry	3
CHEM 275	Advanced Physical Chemistry	3
CHEM 291	Introduction to Nuclear Magnetic Resonance	3
CHEM 297	Bio-Inorganic Chemistry	3

## Minor in Chemistry

Courses required for a minor are:

		Units
CHEM 33	Structure and Reactivity	5
CHEM 35	Synthetic and Physical Organic Chemistry	5
CHEM 130	Organic and Bio-organic Chemistry Laboratory	3
CHEM 131	Organic Polyfunctional Compounds	3
CHEM 134	Analytical Chemistry Laboratory	5
CHEM 151	Inorganic Chemistry I	3
CHEM 171	Physical Chemistry I Prerequisite MATH 51 and (Math 51M or CME 192 or CS 106A)	3

Total Units 27

## Master of Science in Chemistry

The Master of Science is available only to current Ph.D. students or as part of a coterminal program. Applicants for the M.S. degree in Chemistry are required to complete, in addition to the requirements for the bachelor's degree, a minimum of 45 graduate-level units and a M.S. thesis. Of the 45 units, approximately two-thirds must be in the department and must include at least 12 units of graduate level lecture courses exclusive of the thesis.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

Courses offered in previous years that may count toward the M.S. include CHEM 285.

Of the 12 units, at least 6 units must be from:

CHEM 221	Advanced Organic Chemistry	3
CHEM 223	Advanced Organic Chemistry	3
CHEM 225	Advanced Organic Chemistry	3
CHEM 235	Applications of NMR Spectroscopy	3
CHEM 251	Advanced Inorganic Chemistry	3
CHEM 253	Advanced Inorganic Chemistry	3
CHEM 255	Advanced Inorganic Chemistry	3
CHEM 271	Advanced Physical Chemistry	3
CHEM 273	Advanced Physical Chemistry	3
CHEM 275	Advanced Physical Chemistry	3
CHEM 277	Materials Chemistry and Physics	3
CHEM 280	Single-Molecule Spectroscopy and Imaging	3
CHEM 291	Introduction to Nuclear Magnetic Resonance	3
CHEM 297	Bio-Inorganic Chemistry	3

## Doctor of Philosophy in Chemistry

### Process to Candidacy

Graduate students are eligible to become formal candidates for the Ph.D. degree after taking the department placement examinations, satisfactory completion of most of the formal lecture course requirements, and satisfactory progress on a dissertation research project. There is

no foreign language requirement for the Ph.D. degree. Admission to candidacy for the Ph.D. degree must be done before June of the second year of graduate registration.

### Placement Examinations

Each new graduate student must take placement examinations upon entrance. These consist of three written examinations of two hours each in the fields of inorganic, organic, and physical chemistry, and cover such material as ordinarily is given in a rigorous one-year undergraduate course in each of these subjects. Students concentrating in biophysical chemistry or chemical physics must take examinations in biophysical or chemical physics, physical chemistry, and organic or inorganic chemistry. Students concentrating in chemical biology must take examinations in biophysical, organic chemistry, and physical chemistry or inorganic chemistry. All placement examinations are given the week before instruction begins in Autumn Quarter, and must be taken at that time. Each new graduate student meets with a member of the graduate study committee to define a program of courses based on results of the placement examinations.

### General Requirements

After taking the departmental placement examinations, students select a research adviser by interviewing members of the Chemistry faculty. An Application to Start Research form is submitted to the Department as research begins under the supervision of the adviser. All students in good standing are required to start research by the end of February, during Winter Quarter of the first year of graduate registration.

Candidates for the Ph.D. degree are required to participate continually in the department colloquium (CHEM 300 Department Colloquium) and in the division seminar of the major subject (CHEM 229 Organic Chemistry Seminar, CHEM 259 Inorganic Chemistry Seminar, or CHEM 279 Physical Chemistry Seminar).

Candidates for advanced degrees must have a minimum grade point average (GPA) of 3.0 for all Chemistry lecture courses as well as for all courses taken during graduate study. Required courses must be taken for a letter grade. Most course work ends in the second year of studies, and students will then focus on full-time dissertation research.

**Units** Students may major in organic, chemical biology, physical, biophysical, chemical physics, or inorganic chemistry. All graduate students are required to take six graduate-level lecture courses (course numbers greater than 199) of at least 3 units each in chemistry or related disciplines (e.g., biochemistry, electrical engineering, mathematics, chemical engineering, chemical and systems biology, physics, materials science), to be selected in consultation with their research adviser and the Graduate Study Committee. All six courses must be taken for a letter grade. At least three of the six courses should be taken within the Chemistry Department. A minimum of four courses should be completed by the end of the first year.

### Course Requirements

**Students majoring in organic chemistry or chemical biology must complete:**

		Units
CHEM 231	Organic Chemistry Seminar Presentation (Autumn, Winter, and Spring of the second year)	1
CHEM 233A	Creativity in Organic Chemistry (Research Progress)	1
CHEM 233B	Creativity in Organic Chemistry (Research Progress)	1
CHEM 233C	Creativity in Organic Chemistry (Research Progress)	1

**Students majoring in physical or biophysical chemistry or chemical physics must complete:**

CHEM 271	Advanced Physical Chemistry (in the first year)	3
CHEM 273	Advanced Physical Chemistry (in the first year)	3
CHEM 275	Advanced Physical Chemistry (in the first year)	3
CHEM 278A	Research Progress in Physical Chemistry	1
CHEM 278B	Research Progress in Physical Chemistry	1
<b>Students majoring in inorganic chemistry must complete:</b>		
CHEM 258A	Research Progress in Inorganic Chemistry	1
CHEM 258B	Research Progress in Inorganic Chemistry (Seminar Presentation)	1
CHEM 258C	Research Progress in Inorganic Chemistry (Research Proposal)	1

Continuous enrollment in CHEM 301 Research in Chemistry is expected after the student has chosen a research supervisor.

## Post-Candidacy

Before candidates may request scheduling of the University oral examination, clearance must be obtained from the dissertation adviser and an academic review meeting made with the Student Services Manager for the Department of Chemistry.

During the period in which a dissertation is being read by members of the faculty, candidates must be available for personal consultation until the dissertation has received final department approval.

## Ph.D. Minor in Chemistry

Candidates for the Ph.D. degree in other departments who wish to obtain a minor in chemistry must complete, with a GPA of 3.0 or higher, 20 graduate-level units in Chemistry including four lecture courses of at least three units each.

*Emeriti:* (Professors) Hans C. Andersen, John I. Brauman, James P. Collman, Wray H. Huestis, Robert Pecora, John Ross

*Chair:* Keith O. Hodgson

*Vice Chair:* T. Daniel P. Stack

*Professors:* Carolyn R. Bertozzi, Steven G. Boxer, Hongjie Dai, Michael D. Fayer, Keith O. Hodgson, Chaitan Khosla, Eric T. Kool, Todd J. Martinez, W. E. Moerner, Vijay S. Pande, Edward I. Solomon, Barry M. Trost, Robert M. Waymouth, Paul A. Wender, Richard N. Zare

*Associate Professors:* Christopher E. D. Chidsey, Bianxiao Cui, Justin Du Bois, T. Daniel P. Stack

*Assistant Professors:* Noah Z. Burns, Lynette Cegelski, Matthew Kanan, Hemamala Karunadasa, Thomas E. Markland, Yan Xia

*Courtesy Professors:* Zhenan Bao, Stacey F. Bent, Karlene A. Cimprich, Curtis W. Frank, Daniel Herschlag

*Courtesy Associate Professors:* James K. Chen, Yi Cui, Jianghong Rao, Thomas J. Wandless

*Lecturers:* Charles Cox, Megan McClory, Jennifer Schwartz Poehlmann, Heidi Vollmer-Snarr

## Classics

Courses offered by the Department of Classics are listed on the *Stanford Bulletin's* ExploreCourses web site under the subject code CLASSICS (<https://explorecourses.stanford.edu/search?q=CLASSICS&view=catalog&page=0&academicYear=&filter-coursestatus-Active=on&filter-departmentcode-CLASSICS=on&collapse=&filter-catalognumber-CLASSICS=on>).

The study of Classics has traditionally centered on the literature and material culture of ancient Greece and Rome, including Greek and Latin language, literature, philosophy, history, art, and archaeology. At Stanford, Classics also explores connections with other ancient cultures and with the modern world, as well as specialized fields such as ancient economics, law, papyrology, and science. The department's faculty approaches Classics from an interdisciplinary perspective that crosses geographical, temporal, and thematic territories. Studying ancient epic poetry can lead to looking at modern cinema afresh; ancient Athenian politics opens new perspectives on modern politics; and the study of Rome presents parallels with other empires just as Latin illuminates the history of English and the Romance languages. In short, Classics at Stanford is an interdisciplinary subject concerned not only with Greek and Roman civilization but also with the interaction of cultures and societies that influenced the ancient Mediterranean basin and continue to influence human society across the globe.

## Mission of the Undergraduate Program in Classics

The mission of the undergraduate program in Classics is to provide students with a broad background centered on the literature and material culture of ancient Greece and Rome, including Greek and Latin language, literature, philosophy, history, art, and archaeology. At Stanford, students in the Classics program also explore the connections between ancient cultures and the modern world as well as specialized fields such as ancient economics, law, papyrology, and science. The program's faculty approaches Classics from an interdisciplinary perspective that crosses geographical, temporal and thematic territories. The program is concerned not only with Greek and Roman civilization but also with the interaction of cultures and societies that influenced the ancient Mediterranean basin and continue to influence human society across the globe.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. The ability to develop effective and nuanced lines of interpretation.
2. Critical thinking skills using primary source materials.
3. Facility with the methodologies and presuppositions underlying interpretive positions in secondary literature and in their own work.
4. Well-developed analytical writing skills and close reading skills.

## Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Classics and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Classics. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Classics and to interpret and present the results of such research.

## Course Numbering

CLASSICS courses are numbered according to level and area of study.

Digit	Area
001-099	Introductory Courses

001-030	Beginning and Intermediate Language and Introductory Seminars
031-050	General Topics
051-075	Art And Archaeology
076-099	Ancient History
100-199	Undergraduate Language, Core, Electives, and Independent Study
100-110	Advanced Language
111-150	General Topics
151-175	Art and Archaeology
176-196	Ancient History
197-199	Independent Study
200-299	Graduate Language Surveys and Electives
200-210	Language
211-250	General Topics
251-275	Art and Archaeology
276-297	Ancient History
298-299	Independent Study
300-399	Graduate Seminars and Dissertation Research
300-310	Workshops
311-350	General Topics
351-375	Art and Archaeology
376-398	Ancient History
399	Independent Study (dissertation research)

## Bachelor of Arts in Classics

Those interested in majoring in Classics are encouraged to declare by spring of sophomore year, but are urged to discuss their plans with the undergraduate director as early as possible. Students who choose the Greek and Latin field of study (option 5 below) should begin the curriculum as soon as possible because it is difficult to complete the language requirements without an early start; those with no previous knowledge of Latin or Greek should begin study in the freshman year, in a summer program following freshman year, or at the beginning of the sophomore year.

### How to Declare

To declare the major, a student must fill out the Declaration of Major on Axess and meet with the Director of Undergraduate Studies in the Department of Classics. At that time, the Director Undergraduate Studies assigns the student a department adviser. To build a mentoring relationship, students should meet with their adviser at least once a quarter. At the time of declaration, the student should also schedule an orientation with the Department of Classics' student services officer. Each student's progress towards fulfillment of the major requirements is recorded in a file kept in the student services officer's office. It is the student's responsibility to work with the adviser and student services officer to keep this file up to date.

### Grade and Course Requirements

A letter grade is required for all courses taken for the major. No course receiving a grade lower than 'C' is counted toward fulfilling major requirements. Enrollment in an independent study section (CLASSICS 198 Directed Readings) requires the prior approval of the Director of Undergraduate Studies, and a maximum of three such enrollments for a maximum total of 10 units may be counted toward the major. University credit earned by placement tests or advanced placement work in secondary school is not counted towards any major requirement in

the department. Work done at other universities or colleges is subject to department evaluation and the university's transfer credit process. Counting graduate courses or cognate courses towards the major requires advance approval by the Director of Undergraduate Studies. Students are encouraged to meet with the Director of Undergraduate Studies to discuss options for pursuing a period of study in the Mediterranean region (see Study Abroad below).

The B.A. degree may be earned by fulfilling the requirements for one of the following fields of study. These fields of study are declared on Axess; they appear on the transcript but not on the diploma. The fields of study are:

- Classical Studies
- Ancient History
- Greek
- Latin
- Greek and Latin

The Philosophy and Literature focus described below may be added to some of the major plans. This focus is not declared on Axess, and does not appear on the transcript or diploma.

### A. Classical Studies

This major is recommended for students who wish to study classical civilizations in depth but do not wish to study the languages to the extent required by the Greek, Latin or Greek and Latin options described below. It is not suitable for students who wish to do graduate work in Classics or to teach Latin or Greek in high school, as the language work is insufficient for these purposes.

#### Units

Students must complete at least 60 units of approved courses including: <sup>+</sup>

CLASSICS 150	Majors Seminar	5
at least two courses in Latin or Greek at the intermediate-level or higher <sup>1</sup>		6-20
CLASSICS 11L	Intermediate Latin: Introduction to Literature	
CLASSICS 12L	Intermediate Latin: Petronius and Martial	
CLASSICS 13L	Intermediate Latin: Selections from Vergil's Aeneid, Books 7 - 12	
CLASSICS 101L	Advanced Latin: Tacitus	
CLASSICS 102L	Advanced Latin: Virgil's Eclogues and Georgics	
CLASSICS 103L	Advanced Latin: Letters of Cicero and Pliny	
CLASSICS 11G	Intermediate Greek: Prose	
CLASSICS 12G	Intermediate Greek: Euripides' Medea	
CLASSICS 13G	Intermediate Greek: Homer's Iliad	
CLASSICS 101G	Advanced Greek: Plato on Poetry	
CLASSICS 102G	Advanced Greek: Funeral Orations by Lysias, Gorgias, Thucydides and Plato	
CLASSICS 103G	Advanced Greek: Aristophanes' "The Frogs"	
or one course in one of the languages at the intermediate-level or higher, plus the beginning series of the other language <sup>1</sup>		
CLASSICS 1L	Beginning Latin	
CLASSICS 2L	Beginning Latin	
CLASSICS 3L	Beginning Latin	
CLASSICS 1G	Beginning Greek	
CLASSICS 2G	Beginning Greek	
CLASSICS 3G	Beginning Greek	
remaining units from your choice of CLASSICS courses <sup>2</sup>		35-49
Total Units		60

+ Students enrolled in the CS+Classics joint major program must complete the Major's Seminar (5 units), all language courses (10 or 20 units), ePortfolio (2 units), senior capstone project (5 units), and additional CLASSICS courses for a total minimum of 55 units. See the Joint Major with CS (p. 380) tab for more information.

<sup>1</sup> Language courses may be repeated for credit towards the degree only with advance written permission from the Director of Undergraduate Studies.

<sup>2</sup> Up to 8 units of THINK 10, THINK 16, THINK 35/THINK 35A (note that this is the same course), ESF 7/ESF 7A (note that this is the same course), IHUM 39A,B, IHUM 69A, the Autumn Quarter of SIMILE, or SLE may be counted toward the major; IHUM courses are no longer offered.

## B. Ancient History:

Students must complete at least 60 units of approved courses and must satisfy the following requirements: <sup>+</sup>

Writing in the Major (WIM)	5
CLASSICS 150 Majors Seminar	5
<b>Core Requirement</b>	<b>6-10</b>

Complete two survey courses in ancient history; some such courses offered this year include:

CLASSICS 81 Ancient Empires: Near East	
CLASSICS 82 The Egyptians	
CLASSICS 83 The Greeks	
CLASSICS 84 The Romans	

**Depth Requirement** 33

Complete at least 33 units of ancient history and civilization courses, drawn from CLASSICS 31-99 and CLASSICS 110-197. <sup>1,2</sup>

### Breadth Requirements

Complete at least 4 units in each of the following three areas <sup>3</sup>

1. Archaeology and art; suggested courses include CLASSICS 51-75 and CLASSICS 151-175: <sup>4</sup>

2. Comparative ancient civilizations: complete a course on the ancient world outside the Mediterranean and western Asia.

Suggested courses include:

ANTHRO 3 Introduction to Prehistoric Archeology	
ANTHRO 24N Maya Hieroglyphic Writing	
ANTHRO 100B Lifeways of the Ancient Maya	
ANTHRO 101 The Aztecs and Their Ancestors: Introduction to Mesoamerican Archaeology	
ANTHRO 102A Ancient Civilizations: Complexity and Collapse	
ANTHRO 105 Ancient Cities in the New World	
ANTHRO 106 Incas and their Ancestors: Peruvian Archaeology	
ANTHRO 115B Peoples and Cultures of Ancient Mesoamerica	
ANTHRO 124 Maya Mythology and the Popol Vuh	
ANTHRO 139A Forgotten Africa: An Introduction to the Archaeology of Africa	
CHINGEN 141 Emergence of Chinese Civilization from Caves to Palaces	

3. Historical and social theory. Suggested courses include: <sup>4-5</sup>

ANTHRO 1 Introduction to Cultural and Social Anthropology	
ANTHRO 90B Theory of Cultural and Social Anthropology	
ANTHRO 90D Social Theory in the Anthropological Sciences	
SOC 1 Introduction to Sociology at Stanford	
SOC 140 Introduction to Social Stratification	
SOC 142 Sociology of Gender	
SOC 170 Classics of Modern Social Theory	
HUMBIO 2B Culture, Evolution, and Society	

Total Units 60

+ Students enrolled in the CS+Classics joint major program must complete the Major's Seminar (5 units), two history core courses (10 units), courses in ancient history and civilization (21 units), ancient history breadth courses (12 units), ePortfolio (2 units) and the senior capstone project (5 units) for a total minimum of 55 units. See the Joint Major with CS (p. 380) tab for more information.

<sup>1</sup> 4 units of THINK 10, THINK 16, THINK 35A, IHUM 39A or B, IHUM 69A, or Autumn Quarter of SIMILE may be counted toward this requirement (IHUM courses are no longer offered).

<sup>2</sup> Latin and Ancient Greek courses may also count toward this requirement if approved by the Director of Undergraduate Studies.

<sup>3</sup> The courses chosen must be approved in advance by the undergraduate director, and are normally chosen from the list of areas noted.

<sup>4</sup> IHUM 40B may be counted toward this requirement (this course is no longer offered).

## C. Greek

Students must complete at least 60 units of approved courses including: <sup>+</sup>

CLASSICS 150 Majors Seminar	5
-----------------------------	---

At least 31 units of Ancient Greek courses at the intermediate-level or higher. It is recommended that these include CLASSICS 105A/B, though this series should not be taken until students have completed three years of Greek. <sup>1</sup>

CLASSICS 11G Intermediate Greek: Prose	
CLASSICS 12G Intermediate Greek: Euripides' Medea	
CLASSICS 13G Intermediate Greek: Homer's Iliad	
CLASSICS 101G Advanced Greek: Plato on Poetry	
CLASSICS 102G Advanced Greek: Funeral Orations by Lysias, Gorgias, Thucydides and Plato	
CLASSICS 103G Advanced Greek: Aristophanes' "The Frogs"	

At least three additional CLASSICS courses from CLASSICS 31-99 or 110-197 <sup>2</sup>

Recommended additional coursework in Latin, Sanskrit, Biblical Greek or ancient history.

CLASSICS 1L Beginning Latin	
CLASSICS 2L Beginning Latin	
CLASSICS 3L Beginning Latin	
CLASSICS 6G Biblical Greek	
CLASSICS 7G Biblical Greek	
SPECLANG 183 First-Year Sanskrit, First Quarter	
SPECLANG 183 First-Year Sanskrit, Second Quarter	
CLASSICS 81 Ancient Empires: Near East	
CLASSICS 82 The Egyptians	
CLASSICS 83 The Greeks	
CLASSICS 84 The Romans	

Total Units 60

+ Students enrolled in the CS+Classics joint major program must complete the Major's Seminar (5 units), Greek courses at the intermediate-level or higher (31 units), additional CLASSICS courses (12 units), ePortfolio (2 units) and the senior capstone project (5 units) for a total minimum of 55 units. See the Joint Major with CS (p. 380) tab for more information.

<sup>1</sup> Language courses may be repeated for credit towards the degree only with advance written permission from the Director of Undergraduate Studies.

<sup>2</sup> Up to 8 units of THINK 10, THINK 16, THINK 35/THINK 35A (note that this is the same course), ESF 7/ESF 7A (note that this is the same course), IHUM 39A/B, IHUM 69A, the Autumn Quarter of SIMILE, or SLE may be counted toward the major (IHUM courses are no longer offered).

### D. Latin

Students must complete at least 60 units of approved courses including:<sup>+</sup>

CLASSICS 150	Majors Seminar	5
--------------	----------------	---

At least 31 units of Latin courses at the intermediate-level or higher. It is recommended that this include CLASSICS 104A/B, though this series should not be taken until students have completed three years of Latin.<sup>1</sup>

CLASSICS 11L	Intermediate Latin: Introduction to Literature	
CLASSICS 12L	Intermediate Latin: Petronius and Martial	
CLASSICS 13L	Intermediate Latin: Selections from Vergil's Aeneid, Books 7 - 12	
CLASSICS 101L	Advanced Latin: Tacitus	
CLASSICS 102L	Advanced Latin: Virgil's Eclogues and Georgics	
CLASSICS 103L	Advanced Latin: Letters of Cicero and Pliny	

At least three additional CLASSICS courses from CLASSICS 31-99 or 110-197.<sup>2</sup>

Recommended additional coursework in Ancient Greek, Biblical Greek or ancient history

CLASSICS 1G	Beginning Greek	
CLASSICS 2G	Beginning Greek	
CLASSICS 3G	Beginning Greek	
CLASSICS 6G	Biblical Greek	
CLASSICS 7G	Biblical Greek	
CLASSICS 81	Ancient Empires: Near East	
CLASSICS 82	The Egyptians	
CLASSICS 83	The Greeks	
CLASSICS 84	The Romans	

Total Units: 60

<sup>+</sup> Students enrolled in the CS+Classics joint major program will need to complete the Major's Seminar (5 units), Latin courses at the intermediate-level and above (31 units), additional CLASSICS courses (12 units), ePortfolio (2 units) and the senior capstone project (5 units) for a total minimum of 55 units. See the Joint Major with CS (p. 380) tab for more information.

<sup>1</sup> Language courses may be repeated for credit towards the degree only with advance written permission from the Director of Undergraduate Studies.

<sup>2</sup> Up to 8 units of THINK 10, THINK 16, THINK 35/THINK 35A (note that this is the same course), ESF 7/ESF 7A (note that this is the same course), IHUM 39A/B, IHUM 69A, the Autumn Quarter of SIMILE, or SLE may be counted toward the major (IHUM courses are no longer offered).

### E. Greek and Latin

Students must complete at least 65 units of approved courses including:<sup>+</sup>

CLASSICS 150	Majors Seminar	5
--------------	----------------	---

At least 30 units of Latin courses at the intermediate-level and higher.<sup>1,2</sup>

OR at least 30 units of Latin at the beginning-level and higher, as long as Greek is at the intermediate-level and higher

#### Units

CLASSICS 1L	Beginning Latin	
CLASSICS 2L	Beginning Latin	
CLASSICS 3L	Beginning Latin	
CLASSICS 11L	Intermediate Latin: Introduction to Literature	
CLASSICS 12L	Intermediate Latin: Petronius and Martial	
CLASSICS 13L	Intermediate Latin: Selections from Vergil's Aeneid, Books 7 - 12	
CLASSICS 101L	Advanced Latin: Tacitus	
CLASSICS 102L	Advanced Latin: Virgil's Eclogues and Georgics	
CLASSICS 103L	Advanced Latin: Letters of Cicero and Pliny	
CLASSICS 104A	Latin Syntax	
CLASSICS 104B	Latin Syntax	
At least 30 units of Ancient Greek courses at the intermediate-level or higher. <sup>1,2</sup>		
OR at least 30 units of Greek at the beginning-level and higher, as long as Latin is at the intermediate-level and higher		
CLASSICS 1G	Beginning Greek	
CLASSICS 2G	Beginning Greek	
CLASSICS 3G	Beginning Greek	
CLASSICS 11G	Intermediate Greek: Prose	
CLASSICS 12G	Intermediate Greek: Euripides' Medea	
CLASSICS 13G	Intermediate Greek: Homer's Iliad	
CLASSICS 101C	Advanced Greek: Plato on Poetry	
CLASSICS 102G	Advanced Greek: Funeral Orations by Lysias, Gorgias, Thucydides and Plato	
CLASSICS 103C	Advanced Greek: Aristophanes' "The Frogs"	
CLASSICS 105A	Greek Syntax: Prose Composition	
CLASSICS 105E	Greek Syntax: Prose Composition	
Recommended additional coursework in Biblical Greek, Sanskrit or ancient history <sup>3</sup>		
SPECLANG 183	First-Year Sanskrit, First Quarter	
SPECLANG 183B	First-Year Sanskrit, Second Quarter	
SPECLANG 184	Second-Year Sanskrit, First Quarter	
SPECLANG 184B	Second-Year Sanskrit, Second Quarter	
SPECLANG 184C	Second-Year Sanskrit, Third Quarter	
CLASSICS 6G	Biblical Greek	
CLASSICS 7G	Biblical Greek	
CLASSICS 81	Ancient Empires: Near East	
CLASSICS 82	The Egyptians	
CLASSICS 83	The Greeks	
CLASSICS 84	The Romans	
Total Units:		60

<sup>+</sup> Students enrolled in the CS+Classics joint major program must complete the Major's Seminar (5 units), Latin courses (24 units), Greek courses (24 units), ePortfolio (2 units) and the senior capstone project (5 units) for a total minimum of 60 units. See the Joint Major with CS (p. 380) tab for more information.

<sup>1</sup> Language courses may be repeated for credit towards the degree only with advance written permission from the Director of Undergraduate Studies.

<sup>2</sup> It is recommended that this include CLASSICS 104A and CLASSICS 104B (for Latin); and CLASSICS 105A and CLASSICS 105B (for Greek). But this series should not be taken until completion of advanced-level course work in the relevant language.

<sup>3</sup> Sanskrit is only allowed if both Greek and Latin requirements are fulfilled with course work at the intermediate-level and above.

#### Units

## F. Philosophy and Literature Focus:

Students may apply a focus in Classics and Philosophy to the Classical Studies, Latin, or Greek major tracks. A focus is not reflected in the transcript or diploma, but provides a guided curriculum for those interested in this interdisciplinary study. Students who choose this focus must still complete the Majors' Seminar and language courses required by their chosen track. In addition, all students must take a set of core requirements and breadth requirements as described below.

### Core Requirements for all Philosophy and Literature Focuses

	Units
PHIL 81 Philosophy and Literature	5
PHIL 80 Mind, Matter, and Meaning	5
one course in each of the following areas:	
<b>1. aesthetics, ethics, and social and political philosophy</b>	3-5
PHIL 170 Ethical Theory	
PHIL 170D Trust and Trustworthiness	
<b>2. philosophy of language, mind, metaphysics, and epistemology</b>	3-5
PHIL 180 Metaphysics	
PHIL 180A Realism, Anti-Realism, Irrealism, Quasi-Realism	
<b>3. history of philosophy (course with subject code PHIL at the 100-level or above)</b>	3-5
Two related courses in Classics or Philosophy. Discuss your course selection in advance with the Director of Undergraduate Studies.	6-10
One capstone seminar. Discuss your course selection in advance with the Director of Undergraduate Studies.	3-5

### Breadth Requirements for Classical Studies: Philosophy and Literature Focus

	Units
one CLASSICS course in ancient history	3-5
one CLASSICS course in art and archaeology	3-5
one CLASSICS course in literature in translation	
one CLASSICS course in philosophy and history of science	3-5
one CLASSICS course in religion/mythology	3-5

### Breadth Requirements for Greek: Philosophy and Literature Focus

	Units
one CLASSICS course in ancient history or archaeology	3-5
one CLASSICS course in religion, philosophy, or ancient science	3-5
one CLASSICS course in literature in translation	3-5

### Breadth Requirements for Latin: Philosophy and Literature Focus

	Units
one CLASSICS course in ancient history or archaeology	3-5
one CLASSICS course in literature in translation	3-5
one CLASSICS course in religion, philosophy, or ancient science	3-5

## Honors Program

A minimum grade point average (GPA) of 3.6 within the major is required for students to enroll in the honors program. To be considered for honors in Classics, the student must select a professor who can supervise his or her honors thesis. A preliminary proposal, approved by the supervisor, is due April 15 of the junior year, and a final version is due at the beginning of the senior year. The proposal must outline the project in detail, list relevant courses that have been taken, and name the supervisor. The department gives approval only if a suitable faculty supervisor is available and if it is satisfied that the student has a sufficient basis of knowledge derived from department course work in the general areas the thesis covers, such as art, Greek, Latin, history, literature, or philosophy. If the proposal is approved, the student may sign up for CLASSICS 199 Undergraduate Thesis: Senior Research, during the senior year for a maximum of 6 units per term, up to an overall total of 10 units.

These units may be counted towards fulfillment of the student's major requirements if relevant. Honors are awarded only if the essay receives a grade of 'B+' or higher from the supervisor and a second reader, who is chosen by the department. In addition, students must graduate with a GPA of 3.6 or higher within the major to receive honors.

## Study Abroad

Classics students may travel for several reasons: to complete accredited coursework (typically language courses or history surveys) for transfer towards the degree, to participate in archaeological digs of ancient sites, and to perform independent travel-research related to an honors project or independent study. Students considering academic programs sponsored by other institutions are encouraged to review Stanford's policies on transfer credit and to discuss possible programs with the Director of Undergraduate Studies before applying. Students seeking archaeological dig experience should inquire for opportunities through the Classics Department and through the Stanford Archaeology Center (<http://archaeology.stanford.edu>). Students who would like to construct an independent travel-research project should discuss their goals and itinerary with the Director of Undergraduate Studies.

While Classics-specific coursework is not always available through the Bing Overseas Program, students sometimes find Classics faculty at Bing campuses who are willing to provide independent instruction for credit. Pre-approval of courses and independent study syllabi by the Director of Undergraduate Studies is required for credit towards the major or minor.

Some departmental funding is available for summer language programs in the United States, and departmental funds are also available for travel and study in the Mediterranean. Students are encouraged to seek out multiple sources of funding, including offerings from UAR, to supplement their departmental applications. After discussing their plans with the Director of Undergraduate Study, applicants submit a departmental research grant application that includes expenses, a statement of purpose, and an endorsement by the student's faculty adviser. Food expenses are not normally reimbursed. Limited funding is available each year; preference is shown to majors and students with strong records.

## Joint Major Program: Classics and Computer Science

The joint major program (JMP), authorized by the Academic Senate for a pilot period of six years beginning in 2014-15, permits students to major in both Computer Science and one of ten Humanities majors. See the "Joint Major Program (p. 26)" section of this bulletin for a description of University requirements for the JMP. See also the Undergraduate Advising and Research JMP web site and its associated FAQs.

Students completing the JMP receive a B.A.S. (Bachelor of Arts and Science).

Because the JMP is new and experimental, changes to procedures may occur; students are advised to check the relevant section of the bulletin periodically.

## Classics Major Requirements in the Joint Major Program

See the "Computer Science Joint Major Program (p. 231)m" section of this bulletin for details on Computer Science requirements.

Students majoring in the joint major program in Classics and Computer Science complete the degree requirements for Classics with the following changes:

1. Completion of 5 less overall units than a usual Classics major. The + footnote on each track describes where the unit relief may be taken.
2. ePortfolio course (2 units): The ePortfolio is preparation for the capstone project, and as such, must be taken by Spring quarter of the Junior year. The ePortfolio will reflect on the intersections (and

possible disjunctions) between Computer Science and Classics. This may be an independent study or group seminar class. Topics might center on critical review of existing projects that join Computer Science and Classics, including analyses and reflections on two-to-three different digital humanities projects in the field of Classics. It might also include a commentary from a Classicist perspective on work in foundational Computer Science courses, an analysis of the implications of computational technology for historical or literary study in Classics, or the application of Classicists' methodologies to technological problems or issues.

- Senior capstone project (5 units): The capstone project will be an original and integrative research project, guided by advisers in both departments, drawing on knowledge and skills in both areas, and counting towards the joint major on the Classics side. This will likely be independent study with Classics faculty or a course with a required project. It is also possible for honors thesis work in Classics to count towards this requirement, if the thesis project has a significant computational component. Projects might include analysis of archaeological or historical data, digital editions of texts, analyses of ancient corpora, digital representations and engagements with historical problems in the study of the ancient world, study of natural language processing as applied to literary analysis of ancient texts.

All ePortfolio and senior capstone projects must be approved by the Director of Undergraduate Studies.

## Declaring a Joint Major Program

To declare the joint major, students must first declare each major through Axess, and then submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>) The Major-Minor and Multiple Major Course Approval Form ([http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin\\_MultMaj.pdf](http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin_MultMaj.pdf)) is required for graduation for students with a joint major.

## Dropping a Joint Major Program

To drop the joint major, students must submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>). Students may also consult the Student Services Center (<http://studentservicescenter.stanford.edu>) with questions concerning dropping the joint major.

## Transcript and Diploma

Students completing a joint major graduate with a B.A.S. degree. The two majors are identified on one diploma separated by a hyphen. There will be a notation indicating that the student has completed a "Joint Major". The two majors are identified on the transcript with a notation indicating that the student has completed a "Joint Major".

## Minor in Classics

The Director of Undergraduate Studies meets with each student who opts for the minor to discuss curriculum choices and assigns the student an adviser in the relevant field. Students are required to work closely with their advisers to create a cohesive curriculum within each area. Students who minor in Classics are required to take CLASSICS 150 Majors Seminar, which is writing intensive. Completion of the minor requires a minimum of 20 units.

Students may choose among four fields of study for the minor in Classics:

- Classical Languages
- Ancient History
- Literature and Philosophy

- Classical Studies

These fields of study are declared on Axess; they do not appear on the transcript or the diploma.

## I. Classical Languages

Students are required to take a minimum of five courses in Greek or in Latin. In addition to the five required courses, students must take CLASSICS 150 Majors Seminar. Students wishing to combine Greek and Latin may only do so if courses for one of the two languages are all intermediate level or above. Choose from the following courses this year:

		Units
CLASSICS 1L	Beginning Latin	5
CLASSICS 2L	Beginning Latin	5
CLASSICS 3L	Beginning Latin	5
CLASSICS 11L	Intermediate Latin: Introduction to Literature	5
CLASSICS 12L	Intermediate Latin: Petronius and Martial	5
CLASSICS 13L	Intermediate Latin: Selections from Vergil's Aeneid, Books 7 - 12	5
CLASSICS 101L	Advanced Latin: Tacitus	3-5
CLASSICS 102L	Advanced Latin: Virgil's Eclogues and Georgics	4-5
CLASSICS 103L	Advanced Latin: Letters of Cicero and Pliny	3-5
CLASSICS 1G	Beginning Greek	5
CLASSICS 2G	Beginning Greek	5
CLASSICS 3G	Beginning Greek	5
CLASSICS 11G	Intermediate Greek: Prose	5
CLASSICS 12G	Intermediate Greek: Euripides' Medea	5
CLASSICS 13G	Intermediate Greek: Homer's Iliad	5
CLASSICS 101G	Advanced Greek: Plato on Poetry	3-5
CLASSICS 102G	Advanced Greek: Funeral Orations by Lysias, Gorgias, Thucydides and Plato	3-5
CLASSICS 103G	Advanced Greek: Aristophanes' "The Frogs"	3-5

## II. Ancient History

Students are required to take a minimum of five courses in history, art history, and archaeology (any course within CLASSICS 51-99 or CLASSICS 151-197). Courses taken outside of the department may be substituted for one or more of these courses with prior, written approval from the Director of Undergraduate Studies. In addition to the five required courses, students must take CLASSICS 150 Majors Seminar. Courses offered in Latin and Greek that focus on historical topics or authors may count toward this minor with prior, written approval from the Director of Undergraduate Studies. Students may count up to 4 units of IHUM 69A or the fall quarter of SIMILE towards the breadth requirement; note that IHUM courses are no longer offered. Choose from the following courses this year:

		Units
CLASSICS 51	Introduction to Greek Archaeology	3-5
CLASSICS 52	Introduction to Roman Archaeology	3-5
CLASSICS 54	Introduction to World Architecture	5
CLASSICS 56	Introduction to the Visual Arts: Prehistoric through Medieval	5
CLASSICS 76	Global History: The Ancient World	3-5
CLASSICS 81	Ancient Empires: Near East	4-5
CLASSICS 82	The Egyptians	3-5
CLASSICS 83	The Greeks	4-5
CLASSICS 84	The Romans	3-5
CLASSICS 88	Origins of History in Greece and Rome	4-5
CLASSICS 151	Ten Things: An Archaeology of Design	3
CLASSICS 153	Ancient Urbanism	5

CLASSICS 154	Sailing the Wine-Dark Sea: Maritime Archaeology of the Ancient Mediterranean	3-4
CLASSICS 156	Design of Cities	3-5
CLASSICS 158	Iconoclasm	5
CLASSICS 164	Roman Gladiators	3-5
CLASSICS 166	The Body in Roman Art	4-5
CLASSICS 167	Archaeology of Roman Slavery	4-5
CLASSICS 159	Appropriations of Greek Art	4-5
CLASSICS 161	Introduction to Greek Art I: The Archaic Period	4
CLASSICS 162	Introduction to Greek Art II: The Classical Period	4
CLASSICS 163	Greek Art In and Out of Context	4-5
CLASSICS 168	Engineering the Roman Empire	4-5
CLASSICS 169	Archaeology of Britannia	3-4

### III. Literature and Philosophy

Students are required to take a minimum of five courses in classical literature or philosophy, including classical science. Courses taken outside of the department (for instance, from the Philosophy department) may be substituted for one or more of these courses with prior, written approval from the Director of Undergraduate Studies. In addition to the five required courses, students must take CLASSICS 150 Majors Seminar. Courses offered in Latin and Greek that focus on philosophical or literary topics or authors may count toward the minor. Choose from the following courses this year:

		Units
CLASSICS 16N	Sappho: Erotic Poetess of Lesbos	4-5
CLASSICS 35	Becoming Like God: An Introduction to Greek Ethical Philosophy	3-5
CLASSICS 42	Philosophy and Literature	5
CLASSICS 121	Ecology in Philosophy and Literature	3-5
CLASSICS 136	The Greek Invention of Mathematics	3-5
CLASSICS 181		4-5

### IV. Classical Studies

Students are required to take a minimum of five courses in Classics (any course with subject code CLASSICS) plus CLASSICS 150 Majors Seminar. Students may count up to 4 units of THINK 10, THINK 16, THINK 35 (no longer offered), IHUM 39A, IHUM 69A (IHUM courses no longer offered), SLE or fall quarter of SIMILE towards the breadth requirement.

## Master of Arts in Classics

University requirements for the master's degree are described in the "Graduate Degrees (p. 45)" section of this bulletin.

### I and II. Language and Literature, and Philosophy Fields of Study

Students who have completed an undergraduate major in Classics (Greek, Latin, or Greek and Latin fields of study) or equivalent may be accepted as candidates for the M.A. degree in Classics and may expect to complete the program in twelve months (usually three quarters of course work plus three months study for the thesis or examination). Students with an undergraduate major in Classics (Ancient History or Classical Studies fields of study) or without an undergraduate major in Classics may also be accepted as candidates, though they may require a longer period of study before completing the requirements for the degree. These requirements are:

1. Attaining a standard of scholarship such as would be reached by three quarters of study in the department after fulfilling the requirements for an undergraduate major in the department.

Normally, this means completing at least 25 units of graduate courses and 20 units of work at the 100 level or higher.

2. Completion of one Greek language course at the 100 level (if the undergraduate major field of study was Latin) or one Latin language course at the 100 level (if the undergraduate major field of study was Greek). This requirement is waived for students with an undergraduate major in Classics (Greek and Latin field of study).
3. Passing an examination testing the candidate's ability to translate into English from a selected list of Greek and/or Latin authors. This exam is a minimum of two hours, requiring a grade of "B" or higher to pass.
4. Completion of the syntax sequence in at least one language. For Latin, this is CLASSICS 204A Latin Syntax and CLASSICS 204B Latin Syntax. For Greek, this is CLASSICS 205A Greek Syntax: Prose Composition and CLASSICS 205B Greek Syntax: Prose Composition.
5. Writing a thesis, or passing of an examination on a particular author or topic, or having written work accepted by the graduate committee as an equivalent. Three completed and satisfactory seminar papers are normally an acceptable equivalent, provided each paper has earned the grade of B+ or higher.
6. Students must pass a reading exam in one of the following languages: German, French or Italian. In exceptional circumstances, the Graduate Committee will permit a different language, e.g. Modern Greek or Russian, to be substituted in keeping with research plans. As of September 2014, modern language exams will be based on individualized reading lists: five academic monographs or equivalent, chosen by the student in consultation with the Director of Graduate Studies and agreed in writing at least two months in advance. Students will be allowed to use paper and online dictionaries. Exams will be offered twice a year: at the start of the Fall term and the end of the Spring term. Incoming graduates may choose to be tested as early as the Fall term exam. The department strongly encourages students to take modern language exams as early as possible in the program. If the first attempt to pass the exam is unsuccessful, the student will be allowed to retake the test only once. Failing the second examination will mean automatic dismissal from the program. A grade of B- or higher is required to pass.
7. Completion and approval of a Program Proposal for a Master's Degree form during the first quarter of enrollment, at least five days prior to the Final Study List deadline.

Candidates for the Ph.D. degree in Classics may also, on the recommendation of the department, become candidates for the M.A. degree. In this case, requirement 5 above is waived provided that the student has completed some work beyond the course requirements listed under requirements 1 and 2 above. Current Stanford graduate students in other degree programs may be considered for the M.A. degree, but must be admitted into the program and must complete all requirements listed above.

### III. Classical Archaeology

Students who have completed an undergraduate major in Classics with a Classical Archaeology field of study, or in a closely related field, may be accepted as candidates for the M.A. degree in Classics with a Classical Archaeology field of study, and may expect to complete the program in twelve months (usually three quarters of course work plus three months study for the thesis or examination). Students without an undergraduate major in Classics with a Classical Archaeology field of study may also be accepted as candidates, though they may require a longer period of study before completing the requirements for the degree. These requirements are:

1. Attaining a standard of scholarship such as would be reached by three quarters of study in the department after fulfilling the requirements for an undergraduate major in the department. Normally, this means completing at least 25 units of graduate courses and 20 additional units of work at the 100 level or higher.

2. Completion with a grade of 'B' or higher of at least 15 units of graduate-level courses in classical archaeology, in addition to CLASSICS 331 Words and Things in the History of Classical Scholarship. (see 4).
  3. Passing an examination testing the candidate's ability to translate into English from a selected list of Greek and/or Latin authors. This exam is a minimum of two hours, requiring a grade of "B" or higher to pass.
  4. Completion with a grade of 'B' or higher of CLASSICS 331 Words and Things in the History of Classical Scholarship, or an equivalent course on the history of thought in classical archaeology approved by the Classics department's graduate committee.
  5. Writing a thesis, or passing an exam on a particular topic, or having written work accepted by the graduate committee as an equivalent. Three completed and satisfactory seminar papers are normally an acceptable equivalent, provided each paper has earned the grade of B+ or higher.
  6. Students must pass a reading exam in one of the following languages: German, French or Italian. In exceptional circumstances, the Graduate Committee will permit a different language, e.g. Modern Greek or Russian, to be substituted in keeping with research plans. As of September 2014, modern language exams will be based on individualized reading lists: five academic monographs or equivalent, chosen by the student in consultation with the Director of Graduate Studies and agreed in writing at least two months in advance. Students will be allowed to use paper and online dictionaries. Exams will be offered twice a year: at the start of the Fall term and the end of the Spring term. Incoming graduates may choose to be tested as early as the Fall term exam. The department strongly encourages students to take modern language exams as early as possible in the program. If the first attempt to pass the exam is unsuccessful, the student will be allowed to retake the test only once. Failing the second examination will mean automatic dismissal from the program. A grade of B- or higher is required to pass.
  7. Completion and approval of a Program Proposal for a Master's Degree form during the first quarter of enrollment, at least five days prior to the Final Study List deadline.
4. Writing a thesis, or passing an exam on a particular topic, or having written work accepted by the Graduate Committee as an equivalent. Three completed and satisfactory seminar papers are normally an acceptable equivalent, provided each paper has earned the grade of B+ or higher.
  5. Students must pass a reading exam in one of the following languages: German, French or Italian. In exceptional circumstances, the Graduate Committee will permit a different language, e.g. Modern Greek or Russian, to be substituted in keeping with research plans. As of September 2014, modern language exams will be based on individualized reading lists: five academic monographs or equivalent, chosen by the student in consultation with the Director of Graduate Studies and agreed in writing at least two months in advance. Students will be allowed to use paper and online dictionaries. Exams will be offered twice a year: at the start of the Fall term and the end of the Spring term. Incoming graduates may choose to be tested as early as the Fall term exam. The department strongly encourages students to take modern language exams as early as possible in the program. If the first attempt to pass the exam is unsuccessful, the student will be allowed to retake the test only once. Failing the second examination will mean automatic dismissal from the program. A grade of B- or higher is required to pass.
  6. Completion and approval of a Program Proposal for a Master's Degree form during the first quarter of enrollment, at least five days prior to the Final Study List deadline.

Candidates for the Ph.D. degree may also (on the recommendation of the department) become candidates for the M.A. degree. In their case, requirement 4 above is waived provided that they have completed some work beyond the course requirements listed under requirements 1 and 2 above. Current Stanford graduate students in other degree programs may be considered for the M.A. degree, but must be admitted into the program and must complete all requirements listed above.

## Coterminal Master's Degree in Classics

Stanford students in any undergraduate major who wish to pursue graduate work in Classics may apply for Stanford's coterminal master's program. Students considering a coterm are encouraged to consult with the Director of Undergraduate Studies and the department's student services officer about their plans before filing an application. Applicants must have a minimum GPA of 3.7 in the major, and no Incomplete grades on record. Undergraduate course work in Greek and Latin and one of the required modern languages is normally a prerequisite for graduate-level work.

To apply, students submit the Application for Admission to Coterminal Master's Program (<https://stanford.box.com/CotermApplic>) form, two letters of recommendation from Classics faculty, a sealed, official copy of their undergraduate transcript, a 1-3 page statement of purpose and a 10-15 page writing sample to the student services officer. GRE scores are not required. Applications are due in early January of the intended graduation year for the undergraduate degree; please see the departmental web site (<http://classics.stanford.edu>) for the specific deadline.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer

Candidates for the Ph.D. degree may also, on the recommendation of the department, become candidates for the M.A. degree. In their case, requirement 5 above is waived provided that the student has completed some work beyond the course requirements listed under requirements 1 and 2 above. Current Stanford graduate students in other degree programs may be considered for the M.A. degree, but must be admitted into the program and must complete all requirements listed above.

## IV. Ancient History

Students who have completed an undergraduate major in Classics with an Ancient History field of study, or in a closely related field may be accepted as candidates for the M.A. degree in Classics with an Ancient History field of study, and may expect to complete the program in twelve months (usually three quarters of course work plus three months study for the thesis or examination). Students without an undergraduate major in Classics with an Ancient History field of study may also be accepted as candidates, though they may require a longer period of study before completing the requirements for the degree. These requirements are:

1. Attaining a standard of scholarship such as would be reached by three quarters of study in the department after fulfilling the requirements for an undergraduate major in the department. Normally, this means completing 30 units of graduate courses and 15 additional units of work at the 100 level or higher.
2. Satisfactory completion of 20 units of graduate-level courses in Classics and of 10 units of graduate-level courses in other programs.
3. Satisfactory completion of 15 additional units of courses in either ancient Greek or Latin at the 100 level or higher.

of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken during or after the first quarter of the sophomore year are eligible for consideration for transfer to the graduate career; the timing of the first graduate quarter is not a factor. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

## Doctor of Philosophy in Classics

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin. There are four specializations within the Classics Ph.D. program: language and literature; classical archaeology; ancient history; and the joint program in ancient philosophy. These specializations will appear on the transcript and the diploma.

### I. Language and Literature

Candidates for the Ph.D. degree in Classics with specialization in language and literature must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor's degree no later than the end of the fourth year. These must include the following courses:

		Units
CLASSICS 201L	Survey of Latin Literature: Literature of the Roman Republic	3-5
CLASSICS 202L	Survey of Latin Literature: Augustan Age Latin	3-5
CLASSICS 203L	Survey of Latin Literature: Imperial Latin	3-5
CLASSICS 201G	Survey of Greek Literature: Archaic Greek	3-5
CLASSICS 202G	Survey of Greek Literature: Classical Greek	3-5
CLASSICS 203G	Survey of Greek Literature: Hellenistic and Late Greek	3-5
CLASSICS 204A	Latin Syntax	4
CLASSICS 204B	Latin Syntax	2
CLASSICS 205A	Greek Syntax: Prose Composition	2
CLASSICS 205B	Greek Syntax: Prose Composition	4
CLASSICS 206A	The Semantics of Grammar	2
CLASSICS 206B	The Semantics of Grammar	2

Plus twelve graduate seminars, nine of which must be Classics seminars, and one of the remaining three of which must be outside the department. The other two seminars may be in Classics, from other departments (with the graduate director's approval), and/or directed readings.<sup>1,2</sup>

<sup>1</sup> No more than two directed readings may be counted towards this requirement.

<sup>2</sup> Classics seminars are sometimes offered for a spread of units (3, 4 or 5). In some cases, instructors allow a student to complete a seminar for less units without requiring a written paper but with completion of all other requirements.

2. Maintain satisfactory progress throughout the degree program. The Classics department sets a higher standard for satisfactory progress than the University minimum requirements. To maintain that standard, students are expected to:

- Maintain good grades (within the Classics department, this normally means grades in the A range; an accumulation of grades of B+ or lower may indicate problems).
- pass all required exams by the required deadlines
- write a *minimum* of three seminar papers per year in the first three years
- demonstrate high quality research and writing
- take no more than one incomplete grade at a time (unless given special permission by the Director of Graduate Studies)
- take incomplete grades only occasionally and finish any Incompletes in a timely manner
- demonstrate effective teaching when serving as a Teaching Assistant or Teaching Fellow

Students who fail to maintain satisfactory progress will have travel and discretionary funds withheld until the situation is redressed.

3. Students must apply and be approved to advance to candidacy by the end of Summer Quarter of their second year.
4. Examinations:
  - As soon as students arrive, they must take diagnostic exams in Greek and Latin. Depending on performance, students may be required to enroll in undergraduate language classes in that language to improve their skills to the level required for graduate work.
  - Students must take Greek and Latin translation exams at the end of each survey sequence (Spring Quarter of the first and second years). Students are exempted from the final exam in Spring Quarter Survey in order to prepare for these translations exams. These exams are based on the Greek and Latin reading lists available on the Classics Department (<http://classics.stanford.edu>) web site. Greek and Latin survey courses cover less than half of the material on which the translation exams test, and students need to prepare much of the work on their own. It is possible to take both exams in the first year if the student chooses. However, the student cannot choose to delay the first year exam to take both in the second year. The exam consists of a choice of six of eight passages, and students are allowed three hours. A grade of 'B-' or higher, on every passage, is required to pass. If a student does not attain a 'B-', the exam must be retaken and passed later in the summer before registering for the Autumn Quarter, in order to continue in the program. The exam can only be retaken once.
  - Students must pass two modern language translation exams: (1) German and (2) French or Italian. In exceptional circumstances, the Graduate Committee will permit a different language, e.g. Modern Greek or Russian, to be substituted for (2), in keeping with dissertation research plans. Students are allowed to use paper and online dictionaries. Exams will be offered once per quarter. Incoming graduates may choose to be tested as early as the Fall term of their first year. The department strongly encourages students to take modern language exams as early as possible in the program (at least one modern language by the end of the first year), and certainly after any summer language courses they may have taken. Students will have two opportunities to the pass the modern language examinations. Failing the second opportunity will mean automatic dismissal from the program. At the latest, students are required to pass the first modern language exam by the end of the second year, and the second modern language exam by the end of the third year, in order to maintain satisfactory progress. A grade of B- or higher is required to pass.
  - Students must take general examinations in Greek literature and Latin literature, and choose two more exams from the following fields: Ancient Philosophy, Greek history, Roman history, Greek archaeology and Roman archaeology. The first exam is administered in Fall Quarter of the second year, while

the remaining three exams are administered in Fall Quarter of the third year. Moving the timing of any of the exams, or increasing the number of exams requires prior consultation and approval by the Director of Graduate Studies. All exam choices must be approved by the Director of Graduate Studies in the Spring Quarter prior to examination. To prepare for the exams, students must take at least one course in each of their chosen exam fields (in the case of ancient philosophy, a seminar or its equivalent) and may also consult with the faculty examiner. Reading lists for each of the exams are posted on the Classics website.

- The University oral examination, which is a defense of the candidate's dissertation. In order to take this exam, a significant portion of the dissertation must be completed and approved by the dissertation adviser(s), the exam committee must have been established and approved by the Chair, and a date and time must have been arranged with the department. The exam consists of a public presentation with question and answer period (no longer than an hour), followed by a private examination between the student and the exam committee (also no longer than an hour).
5. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Failure to pass this re-examination results in dismissal. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate and the dissertation director collaborate to select an appropriate dissertation reading committee in accordance with University rules.
  6. Students are required to undertake the equivalent of four one-quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Under certain circumstances, summer teaching may satisfy this requirement.

## II. Classical Archaeology

Candidates for the Ph.D. degree in Classics with a specialization in classical archaeology must fulfill the requirements following below.

Students are encouraged to enroll in or audit other undergraduate courses that may fill gaps in their undergraduate training. All students are expected to take part in archaeological fieldwork in the classical world areas. At least three consecutive quarters of course work must be taken at Stanford.

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor's degree at the end of the candidate's fourth year, including:

CLASSICS 331	Words and Things in the History of Classical Scholarship <sup>1</sup>	4-5
At least three graduate (200 or 300) level courses in Latin and/or Greek literature <sup>3</sup>		
CLASSICS 201	Survey of Latin Literature: Literature of the Roman Republic	
CLASSICS 202	Survey of Latin Literature: Augustan Age Latin	
CLASSICS 203	Survey of Latin Literature: Imperial Latin	
CLASSICS 201	Survey of Greek Literature: Archaic Greek	
CLASSICS 202	Survey of Greek Literature: Classical Greek	

CLASSICS 203	Survey of Greek Literature: Hellenistic and Late Greek	
The interdepartmental graduate core sequence in archaeology. The Archaeology Center announces the courses which fulfill this requirement. The core sequence currently comprises a seminar in archaeology theory and a course on archaeological methods.		
ANTHRO 303	Introduction to Archaeological Theory	
ANTHRO 307	Archaeological Methods	
At least one further course outside the Classics department. <sup>2</sup>		3-5
At least five graduate seminars in classical archaeology. <sup>2</sup>		15-25
CLASSICS 352	Doing Business in Classical Antiquity: Mediterranean Exchange	
CLASSICS 353	Archaeology: Post-Humanist Agendas	
CLASSICS 355	Landscape & Archaeology	
CLASSICS 356	Mediterranean Regionalism	
CLASSICS 358	The Archaeology of Ancient Mediterranean Environments	
CLASSICS 367	Mediterranean Networks	
CLASSICS 372	Archaeology of Roman Slavery	
CLASSICS 373	Reception and Literacy in Roman Art	
At least three graduate seminars in ancient history. Suggested courses this year include: <sup>2</sup>		9-15
CLASSICS 376	Art, Ekphrasis, and Music in Byzantium and Islam	
CLASSICS 377	Animation, Performance, Presence in Medieval Art	
CLASSICS 378	Ancient Greek Law and Justice	
CLASSICS 380	Ancient Empires	
CLASSICS 381		
CLASSICS 382	High-Stakes Politics: Case Studies in Political Philosophy, Institutions, and Interests	
CLASSICS 384	Ancient Greek Economic Development	
CLASSICS 384	Ancient Greek Economic Development	
CLASSICS 391	Early Empires: Han and Rome	
CLASSICS 396	Humanities+Design: Visualizing the Grand Tour	

2. <sup>1</sup> Must be taken as early as possible in the candidate's Stanford career.
- <sup>2</sup> Students may petition to count independent study courses in place of up to two required courses, but no more.
- <sup>3</sup> Students who enter the program with only one ancient language at the level needed for graduate study are strongly encouraged to take additional course work to reach graduate (200 and above) level in another language.

Maintain satisfactory progress throughout the degree program. The Classics department sets a higher standard for satisfactory progress than the University minimum requirements. To maintain that standard, students are expected to:

- Units**
- Maintain good grades (within the Classics department, this normally means grades in the A range; an accumulation of grades of B+ or lower may indicate problems).
  - pass all required exams by the required deadlines
  - write a *minimum* of three seminar papers per year in the first three years
  - demonstrate high quality research and writing
  - take no more than one incomplete grade at a time (unless given special permission by the Director of Graduate Studies)
  - take incomplete grades only occasionally and finish any Incompletes in a timely manner

- demonstrate effective teaching when serving as a Teaching Assistant or Teaching Fellow

Students who fail to maintain satisfactory progress will have travel and discretionary funds withheld until the situation is redressed.

3. Students must apply and be approved to advance to candidacy by the end of Summer Quarter of their second year.
4. Examinations:
  - As soon as students arrive, they must take diagnostic exams in Greek and Latin. Depending on performance, students may be required to enroll in undergraduate language classes in that language to improve their skills to the level required for graduate work.
  - Students must pass two modern language translation exams: (1) German and (2) French or Italian. In exceptional circumstances, the Graduate Committee will permit a different language, e.g. Modern Greek or Russian, to be substituted for (2), in keeping with dissertation research plans. Students are allowed to use paper and online dictionaries. Exams will be offered once per quarter. Incoming graduates may choose to be tested as early as the Fall term of their first year. The department strongly encourages students to take modern language exams as early as possible in the program (at least one modern language by the end of the first year), and certainly after any summer language courses they may have taken. Students will have two opportunities to pass the modern language examinations. Failing the second opportunity will mean automatic dismissal from the program. At the latest, students are required to pass the first modern language exam by the end of the second year, and the second modern language exam by the end of the third year, in order to maintain satisfactory progress. A grade of B- or higher is required to pass.
  - Students must demonstrate graduate-level competency with an ancient language in one of two ways:
    - Option 1:* A translation examination from Latin or Greek into English. This examination must be taken Spring Quarter of the first year or Spring Quarter of the second year. A grade of 'B-' or higher on every passage is required to pass. If a student does not meet that standard, the exam must be retaken and passed later in the summer before registering for Autumn Quarter, in order to continue in the program. The exam can only be retaken once.
    - Option 2:* Students must complete the course and take the final offered at the end of each quarter of Greek or Latin survey. Students must earn a 'B-' or higher on each final to pass.
  - Students must take general examinations in Greek archaeology and Roman archaeology, and choose two more exams from the following fields: Ancient Philosophy, Greek history, Roman history, Greek literature and Latin literature. The first exam is administered in Fall Quarter of the second year, while the remaining three exams are administered in Fall Quarter of the third year. Moving the timing of any of the exams, or increasing the number of exams requires prior consultation and approval by the Director of Graduate Studies. All exam choices must be approved by the Director of Graduate Studies in the Spring Quarter prior to examination. To prepare for the exams, students must take at least one course in each of their chosen exam fields (in the case of ancient philosophy, a seminar or its equivalent) and may also consult with the faculty examiner. Reading lists for each of the exams are posted on the Classics website.
  - The University oral examination, which is a defense of the candidate's dissertation. In order to take this exam, a significant portion of the dissertation must be completed and approved by the dissertation adviser(s), the exam committee must have been established and approved by the Chair, and a date and time must

have been arranged with the department. The exam consists of a public presentation with question and answer period (no longer than an hour), followed by a private examination between the student and the exam committee (also no longer than an hour).

5. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Failure to pass this re-examination results in dismissal. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate and the dissertation director collaborate to select an appropriate dissertation reading committee in accordance with University rules.
6. Students are required to undertake the equivalent of four one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Under certain circumstances, summer teaching may satisfy this requirement.

### III. Ancient History

Candidates for the Ph.D. degree in Classics with specialization in ancient history must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor's degree at the end of the fourth year. These must include:
 

HISTORY 304	Approaches to History	5
Two proseminars. These introduce students to primary sources of evidence for ancient history that require special training: papyrology, epigraphy, paleography, numismatics, and archaeology. <sup>1,2</sup>		8-10
CLASSICS 213 Proseminar: Documentary Papyrology		
CLASSICS 214 Ancient Numismatics		
CLASSICS 215 Paleography of Medieval and Early Modern Manuscripts		
CLASSICS 216 Advanced Paleography		
Three skills courses relevant to the individual student's chosen research approach. For example, a student could take classes in economics, demography, legal history, or anthropology. Courses can also be used to learn other ancient or modern languages, either by course work or directed reading. <sup>1</sup>		9-15
Ten graduate seminars (200-level or above). At least five of these seminars must be taken in the department. <sup>2,3</sup>		30-50
ANCIENT LANGUAGE COURSEWORK		
Option 1: Students focus more on one ancient language by taking 15 units of one survey series (CLASSICS 201L/202L/203L or CLASSICS 201G/202G/203G) and 5 units of the alternate series, plus the following courses: <sup>4</sup>		30
CLASSICS 206A The Semantics of Grammar		
CLASSICS 206B The Semantics of Grammar		
CLASSICS 204A Latin Syntax		
CLASSICS 204B Latin Syntax		
CLASSICS 205A Greek Syntax: Prose Composition		
CLASSICS 205B Greek Syntax: Prose Composition		
Option 2: Student emphasize broader linguistic skills. This requires students to take both ancient language surveys.		30

CLASSICS 201 Survey of Latin Literature: Literature of the Roman Republic

CLASSICS 202 Survey of Latin Literature: Augustan Age Latin

CLASSICS 203 Survey of Latin Literature: Imperial Latin

CLASSICS 201 Survey of Greek Literature: Archaic Greek

CLASSICS 202 Survey of Greek Literature: Classical Greek

CLASSICS 203 Survey of Greek Literature: Hellenistic and Late Greek

- 1 Students must consult their advisers and the graduate director to determine the appropriate coursework.
  - 2 With the approval of their advisers and graduate director, students may take seminars outside of the department or at another university with which Stanford has an exchange agreement to fulfill this requirement.
  - 3 Two of these seminars may be replaced by directed readings with adviser and graduate director approval.
  - 4 Students who select Greek for their primary language should consult with the graduate director for a course to replace the Semantics of Grammar requirement.
2. Maintain satisfactory progress throughout the degree program. The Classics department sets a higher standard for satisfactory progress than the University minimum requirements. To maintain that standard, students are expected to: Students who fail to maintain satisfactory progress will have travel and discretionary funds withheld until the situation is redressed.
- Maintain good grades (within the Classics department, this normally means grades in the A range; an accumulation of grades of B+ or lower may indicate problems).
  - pass all required exams by the required deadlines
  - write a *minimum* of three seminar papers per year in the first three years
  - demonstrate high quality research and writing
  - take no more than one incomplete grade at a time (unless given special permission by the Director of Graduate Studies)
  - take incomplete grades only occasionally and finish any Incompletes in a timely manner
  - demonstrate effective teaching when serving as a Teaching Assistant or Teaching Fellow

Students who fail to maintain satisfactory progress will have travel and discretionary funds withheld until the situation is redressed.

3. Students must apply and be approved to advance to candidacy by the end of Summer Quarter of their second year.
4. Examinations:
  - As soon as students arrive, they must take diagnostic exams in Greek and Latin, as well as Greek and Roman history. Depending on performance, students may be required to enroll in undergraduate language classes in that language to improve their skills to the level required for graduate work. The history exams are mainly on narrative history, especially important names, dates, and events. Depending on performance, students may be asked to sit in on the undergraduate history courses and take a directed reading or a graduate survey if offered.
  - Students must take the final offered at the end of each quarter of Greek or Latin survey (for Option 1 above) or both Greek and Latin surveys (for Option 2 above). Students must earn a 'B-' or higher on each final to pass.
  - Students must pass two modern language translation exams: (1) German and (2) French or Italian. In exceptional circumstances, the Graduate Committee will permit a different language, e.g. Modern Greek or Russian, to be substituted for (2), in keeping with dissertation research plans. Students are allowed to use paper and online dictionaries. Exams will be offered once per

quarter. Incoming graduates may choose to be tested as early as the Fall term of their first year. The department strongly encourages students to take modern language exams as early as possible in the program (at least one modern language by the end of the first year), and certainly after any summer language courses they may have taken. Students will have two opportunities to pass the modern language examinations. Failing the second opportunity will mean automatic dismissal from the program. At the latest, students are required to pass the first modern language exam by the end of the second year, and the second modern language exam by the end of the third year, in order to maintain satisfactory progress. A grade of B- or higher is required to pass.

- Students must take general examinations in Greek history and Roman history, and choose two more exams from the following fields: Ancient Philosophy, Greek archaeology, Roman archaeology, Greek literature and Latin literature. The first exam is administered in Fall Quarter of the second year, while the remaining three exams are administered in Fall Quarter of the third year. Moving the timing of any of the exams, or increasing the number of exams requires prior consultation and approval by the Director of Graduate Studies. All exam choices must be approved by the Director of Graduate Studies in the Spring Quarter prior to examination. To prepare for the exams, students must take at least one course in each of their chosen exam fields (in the case of ancient philosophy, a seminar or its equivalent) and may also consult with the faculty examiner. Reading lists for each of the exams are posted on the Classics website.
  - The University oral examination, which is a defense of the candidate's dissertation. In order to take this exam, a significant portion of the dissertation must be completed and approved by the dissertation adviser(s), the exam committee must have been established and approved by the Chair, and a date and time must have been arranged with the department. The exam consists of a public presentation with question and answer period (no longer than an hour), followed by a private examination between the student and the exam committee (also no longer than an hour).
5. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Failure to pass this re-examination results in dismissal. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate and the dissertation director collaborate to select an appropriate dissertation reading committee in accordance with University rules.
  6. Candidates are required to undertake the equivalent of four one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Under certain circumstances, summer teaching may satisfy this requirement.

#### IV. Joint Program in Ancient Philosophy

This specialization is jointly administered by the departments of Classics and Philosophy and is overseen by a joint committee composed of members of both departments. It provides students with the training, specialist skills, and knowledge needed for research and teaching in ancient philosophy while producing scholars who are fully trained as either philosophers or classicists.

Graduate students admitted by the Classics department receive their Ph.D. from the Classics department. This specialization includes training in ancient and modern philosophy. Each student in the program is advised by a committee consisting of one professor from each department.

Candidates for the Ph.D. degree in Classics with specialization in ancient philosophy must fulfill the following requirements:

Students must take three courses in the Philosophy department <sup>1</sup>

One course in logic which can be fulfilled at the 100-level or higher

One course in aesthetics, ethics, or political philosophy (200-level or higher)

One course in metaphysics, epistemology, philosophy of mind, or philosophy of science.

At least three courses in ancient philosophy at the 200 level or above, 9-15 one of which must be in the Philosophy department. <sup>1</sup>

- <sup>1</sup> All courses taken in the Philosophy department count for seminar credit (i.e., as contributing to the 12-seminar requirement in the Language and Literature track in the Classics department).

Complete 135 units of academic credit or equivalent in study beyond the bachelor's degree at the end of the fourth year. This includes all the requirements listed for the language and literature specialization in the graduate program in Classics (see above). Students must also take the below courses focusing on philosophy.

- Examinations:* The requirements are the same as those listed in the language and literature specialization, except that one of the four areas of general examination must be taken in ancient philosophy in addition to the exams in Greek literature and Latin literature.
- Dissertation Proposal:* The requirements are the same as those listed in the language and literature specialization.
- Teaching:* The requirements are the same as those listed in the language and literature specialization.

## Classics and a Minor Field

The Ph.D. in Classics may be combined with a minor in another field, such as anthropology, history, humanities, or classical linguistics. Requirements for the minor field vary, but can include about six graduate-level courses in the field and one written examination, plus a portion of the University oral exam (dissertation defense). Students must consult with the department in which the minor is offered for exact requirements. Students who pursue this are expected to take five years. The department encourages such programs for especially able and well prepared students. The following timetable would be typical for a five-year program:

- First Year: course work, almost entirely in Classics. One translation exam taken in June. One or both modern language exams taken.
- Second Year: course work, both in Classics and the minor field. Second translation exam completed. French and German exams completed.
- Third Year: course work, both in Classics and the minor field. General examinations in Classics.
- Fourth Year: remaining course work, both in Classics and the minor field. General examination in the minor field. Preparation for dissertation.
- Fifth Year: dissertation, University oral examination.

## Ph.D. Minor in Classics

For a graduate minor, the department recommends at least 20 units in Latin or Greek at the intermediate-level or above, and at least one course at the graduate (200) level or above. Students interested in this minor

must discuss their proposed course plan with the Director of Graduate Studies as well as their Ph.D. department before obtaining Classics department approval.

*Emeriti: (Professors)* Mark W. Edwards, Marsh H. McCall, Jr.\*, Susan Treggiari

*Chair:* Grant Parker

*Director of Graduate Studies:* Susan A. Stephens

**Units** 9-15 *Director of Undergraduate Studies and Joint Major Advisor:* John Klopacz

*Professors:* Alessandro Barchiesi (on leave), Andrew M. Devine, Richard P. Martin, Ian Morris, Reviel Netz (on leave), Andrea Nightingale, Josiah Ober (Classics, Political Science; on leave Aut, Win), Anastasia-Erasmia Peponi (on leave), M. Rush Rehm (Classics, TAPS; on leave Aut), Richard Saller (Classics, History), Walter Scheidel (Classics, History; on leave), Michael Shanks, Susan A. Stephens

*Associate Professors:* Giovanna Ceserani, Christopher B. Krebs (on leave), Jody Maxmin (Art and Art History, Classics), Grant Parker, Jennifer Trimble

*Assistant Professor:* Justin Leidwanger

*Courtesy Professors:* Fabio Barry (Art and Art History), Chris Bobonich (Philosophy), Alan Code (Philosophy), Charlotte Fonrobert (Religious Studies), Ian Hodder (Anthropology), Bissera Pentcheva (Art and Art History), Caroline Winterer (History), Yiqun Zhou (East Asian Languages and Cultures)

*Visiting Professor:* Bernhard Woytek

*Lecturers:* Maud Gleason (on leave), Catherine Kearns, John Klopacz

\* Recalled to active duty.

## Communication

Courses offered by the Department of Communication are listed under the subject code COMM on the Stanford Bulletin's ExploreCourses web site.

Stanford's Department of Communication focuses on media in all its forms. The department studies the processes and effects of mass communication: the nature and social role of the various media; their structure, function, and ethics; and their impact on the political system, culture, and society. In this context, it considers not only traditional mass media, such as newspapers, magazines, radio, television, and film, but also information technology, online media, virtual reality, and the Internet. Students are trained as social scientists who can study the media and as potential practitioners in the use of the media in journalism, mass communications, and digital media. The department combines theory and practice and fosters individual research opportunities for its students, employing both quantitative and qualitative approaches.

The Department of Communication engages in research in communication and offers curricula leading to the B.A., M.A., and Ph.D. degrees. The M.A. degree prepares students for a career in journalism. The department also offers current Stanford University undergraduates a coterminal program with an M.A. emphasis in Media Studies. The Ph.D. degree leads to careers in university teaching and research-related specialties.

The John S. Knight Journalism Fellowships foster journalistic innovation, entrepreneurship, and leadership. Knight Fellows are outstanding journalists and journalism entrepreneurs from around the world who spend a year at Stanford to pursue and test their ideas for improving the quality of news and information reaching the public. The John S.

and James L. Knight Foundation sponsors twelve U.S. Fellows. They are joined by eight International Fellows sponsored by the Lyle and Corrine Nelson International Fellowship Fund, the Knight Foundation, Yahoo! Inc., the Enlight Foundation, and others.

## Mission of the Undergraduate Program in Communication

The mission of the undergraduate program in Communication is to expose students to a broad-based understanding of communication theory and research. Students in this major are expected to become familiar with the fundamental concerns, theoretical approaches, and methods of the field, and to acquire advanced knowledge in one or more sub-areas of the discipline. This is accomplished by several levels of study: a core curriculum; intermediate-level electives; and optional internships. Majors also have the opportunity to do advanced research projects. The department is committed to providing students with analytical and critical skills needed for success in graduate programs, professional schools, or immediate career entry.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of core knowledge within the discipline of communication.
2. the ability to communicate ideas clearly and persuasively in writing.
3. the ability to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
4. the ability to evaluate theory and critique research within the discipline of communication.

## Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Communication and to prepare students for professional careers or doctoral studies. This is achieved through completion of courses in the primary field, as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Communication. Through completion of advanced coursework and rigorous training in research, the doctoral program prepares students to make original contributions to the knowledge of Communication and to interpret and present the results of such research.

## Admission

*Prospective Undergraduates:* Applications are available at Undergraduate Admissions (<http://admission.stanford.edu>).

*Prospective Coterminial Students:* Applications are available on the University Registrar's (<http://studentaffairs.stanford.edu/registrar/forms/coterm>) web site.

*Prospective Graduate Students:* Applications are available online at Graduate Admissions (<http://gradadmissions.stanford.edu>).

The department requires that applicants for graduate admission submit verbal, quantitative, and analytic scores from the Graduate Record Examination (GRE). Admission to each graduate degree program is competitive and based on the pool of applicants each year rather than on standard criteria that can be stated in advance. See Communication Department admission procedures and requirements (<http://comm/phd/>

[general/commdeptapplicationguide.pdf](http://general/commdeptapplicationguide.pdf)) for detailed information about admission to the department.

## Bachelor of Arts in Communication

### Preparation

Before declaring the major, students must have completed or be concurrently enrolled in one of the following:

		Units
COMM 1A	Mass Media, Society, and Democracy	5
COMM 1B	Media, Culture, and Society	5
COMM 106	Communication Research Methods	5
COMM 108	Media Processes and Effects	5

Students interested in declaring the major should apply via Axess and meet with the student services administrator in Building 120, Room 110A, during scheduled office hours. Students are required to take at least 60 units (approximately 12 courses), not counting statistics, to complete the major.

### Program of Study

The undergraduate curriculum is intended for liberal arts students who wish to develop an understanding of communication in society, drawing on the perspective of the social sciences. Undergraduates majoring in Communication are expected to become acquainted with the fundamental concerns, theoretical approaches and methods of the field, and to acquire advanced knowledge in one or more of the sub-areas of communication: institutions, processes, and effects.

While the department does not attempt to provide comprehensive practical training at the undergraduate level, the curriculum provides a diverse range of internship opportunities, including professional print journalism, some of which are funded by the department's Rebele Internship Program. The department is committed to providing students with analytical and critical skills for future success in graduate programs, professional schools, or immediate career entry.

The major is structured to provide several levels of study: a core curriculum intended to expose students to a broad-based understanding of communication theory and research, and a number of intermediate-level options and electives. Majors also have the opportunity to do advanced research in the form of an honors thesis.

All undergraduate majors are required to complete a set of core communication courses which include:

		Units
COMM 1A	Mass Media, Society, and Democracy	5
or COMM 1B	Media, Culture, and Society	
COMM 106	Communication Research Methods	5
COMM 108	Media Processes and Effects	5
COMM 104W	Reporting, Writing, and Understanding the News	5
or COMM 120W	Digital Media in Society	
or COMM 137W	The Dialogue of Democracy	
or COMM 142W	Media Economics	
or COMM 143W	Communication Policy and Regulation	

COMM 104W, 120W, 137W, 142W, and 143W satisfy the WIM (Writing in the Major) requirement. Core courses are usually offered only once each year.

The department also requires completion of or concurrent registration in an introductory statistics course (STATS 60 Introduction to Statistical Methods: Pre-calculus) when registering for COMM 106 Communication Research Methods in preparation for courses in methodology and

advanced courses in communication processes and effects. It is recommended that this be done as soon as possible so as not to prevent registration in a course requiring statistical understanding. The statistics course does not count toward the 60 units to complete the Communication major.

In addition to the core courses and the statistics requirement, undergraduate majors select courses from the two areas described below. Many of the courses require core courses as prerequisites. Majors select a total of four area courses, taking at least one from each area.

### Area I: Communication Processes and Effects

Area I emphasizes the ways in which communication scholars conduct research in, and consider the issues of, human communication. These studies aim to provide expert guidance for social policy makers and media professionals and include the following courses:

		Units
COMM 121	Behavior and Social Media	5
COMM 122	Content Analysis: Studying Communication Artifacts	5
COMM 124	Digital Deception	5
COMM 135	Deliberative Democracy and its Critics	3-5
COMM 137W	The Dialogue of Democracy	5
COMM 160	The Press and the Political Process	5
COMM 162	Campaigns, Voting, Media, and Elections	5
COMM 164	The Psychology of Communication About Politics in America	4
COMM 166	Virtual People	5
COMM 172	Media Psychology	5
COMM 326	Advanced Topics in Human Virtual Representation	1-5

### Area II: Communication Systems and Institutions

Area II considers the roles and interaction of institutions such as broadcasting, journalism, constitutional law, and business within communication and mass communication contexts and includes the following courses:

		Units
COMM 104W	Reporting, Writing, and Understanding the News	5
COMM 113	Computational Methods in the Civic Sphere	5
COMM 116	Journalism Law	5
COMM 120W	Digital Media in Society	5
COMM 125	Perspectives on American Journalism	5
COMM 131	Media Ethics and Responsibility	5
COMM 140	Digital Media Entrepreneurship	3-5
COMM 142W	Media Economics	5
COMM 143W	Communication Policy and Regulation	5
COMM 151	The First Amendment: Freedom of Speech and Press	5
COMM 152	Constitutional Law	3
COMM 157	Information Control in Authoritarian Regimes	5
COMM 177A	Computational Journalism	4
COMM 177I	Becoming a Watchdog: Investigative Reporting Techniques	5

## Additional Requirements

The remainder of the 60 required units may be fulfilled with any elective Communication courses or crosslisted courses in other departments.

To be recommended for the B.A. degree in Communication, the student must complete at least 60 units (approximately 12 courses) in the department. No more than 10 units of course work outside of the

department or transfer credit may be applied to meet department requirements. Communication majors must receive a letter grade for all Communication courses unless they are offered only for satisfactory/no credit (S/NC), and must maintain a grade point average (GPA) of 2.0 (C) in courses towards the major. Only courses with a grade of 'C-' or above count towards the major. Therefore, majors who receive a grade of 'D+' or below in one of the core courses must repeat the course.

## Honors Program

The honors program provides Communication majors the opportunity to undertake a significant program of research in an individual professor/student mentoring relationship. The aim is to guide students through the process of research, analysis, drafting, rethinking, and redrafting, which is essential to excellence in scholarship. Working one-on-one with a faculty adviser, seniors earn 15 Communication units culminating in an honors thesis. In order to be eligible for the honors program, interested majors must have a GPA of 3.3 in Communication courses, completed the following requirements, and received a grade of 'B+' or better in COMM 106, Communication Research Methods:

### 1. Core Requirements

Complete the following core requirements:

		Units
COMM 1A	Mass Media, Society, and Democracy	5
or COMM 1B	Media, Culture, and Society	
COMM 106	Communication Research Methods (receive a grade of B+ or better)	5
COMM 108	Media Processes and Effects	5
STATS 60/ PSYCH 10	Introduction to Statistical Methods: Precalculus	5

### 2. Select an adviser; and

### 3. Submit an application to the department by the end of their junior year. See the department's honors web site to download an application form (<http://comm.stanford.edu/undergraduate/honors>).

Students are expected to make steady progress on their honors thesis throughout the year.

A final copy of the honors thesis must be read and approved by the adviser and submitted to the department by the eighth week of Spring Quarter (exact date to be arranged). It becomes part of a permanent record held by the department. Honors work may be used to fulfill Communication elective credit, but must be completed and a letter grade submitted prior to graduation. A student failing to fulfill all honors requirements may still receive independent study credit for work completed, which may be applied toward fulfilling major requirements.

The designation "with honors" is awarded by the Department of Communication to those graduating seniors who, in addition to having completed all requirements for the Communication major:

1. complete an honors thesis;
2. maintain a distinguished GPA in all Communication course work;
3. are recommended by the Communication faculty.

## Minor in Communication

### Preparation

Before declaring the minor, students must have completed or be concurrently enrolled in one of the following:

		Units
COMM 1A	Mass Media, Society, and Democracy	5
COMM 1B	Media, Culture, and Society	5
COMM 106	Communication Research Methods	5

COMM 108	Media Processes and Effects	5
----------	-----------------------------	---

Students interested in declaring the minor should do so no later than Spring Quarter of their junior year by applying via AxBSS and meeting with the student services administrator in building 120, room 110A, during scheduled office hours.

## Program of Study

The minor is structured to provide a foundation for advanced course work in communication through a broad-based understanding of communication theory and research.

Students are required to take 35 units (approximately 7 courses), not counting statistics, to complete the minor. The curriculum consists of three introductory communication core courses that include:

COMM 1A	Mass Media, Society, and Democracy	5
or COMM 1B	Media, Culture, and Society	
COMM 106	Communication Research Methods	5
COMM 108	Media Processes and Effects	5

Core courses are usually offered only once each year. The department also requires completion of – or concurrent registration in – an introductory statistics course (STATS 60 Introduction to Statistical Methods: Precalculus) when registering for COMM 106 Communication Research Methods in preparation for courses in methodology and advanced courses in communication processes and effects. It is recommended that this be done as soon as possible so as not to prevent registration in a course requiring statistical understanding. The statistics course does not count toward the 35 units to complete the Communication minor.

In addition to the three core courses and the statistics course, students are required to take one course in each of the two areas as specified below.

The remainder of the 35 required units may be fulfilled with any intermediate-level elective Communication courses or crosslisted courses in other departments. No more than 5 units of course work outside of the department or transfer credit may be applied to meet department requirements. Communication minors must receive a letter grade for all Communication courses unless they are offered only for satisfactory/no credit (S/NC), and must maintain a grade point average (GPA) of 2.0 (C) in courses towards the minor. Only courses with a grade of C- or above count towards the minor. Some courses are not offered every year. Refer to ExploreCourses (<http://explorecourses.stanford.edu>) for details.

## Area I: Communication Processes and Effects

Select one of the following:

COMM 121	Behavior and Social Media	5
COMM 122	Content Analysis: Studying Communication Artifacts	5
COMM 124	Digital Deception	5
COMM 135	Deliberative Democracy and its Critics	5
COMM 137W	The Dialogue of Democracy	5
COMM 160	The Press and the Political Process	5
COMM 162	Campaigns, Voting, Media, and Elections	5
COMM 164	The Psychology of Communication About Politics in America	5
COMM 166	Virtual People	5
COMM 172	Media Psychology	5

COMM 326	Advanced Topics in Human Virtual Representation	1-5
----------	---	-----

## Area II: Communication Systems/Institutions

Units

Select one of the following:

COMM 104W	Reporting, Writing, and Understanding the News	5
COMM 113	Computational Methods in the Civic Sphere	5
COMM 116	Journalism Law	5
COMM 120W	Digital Media in Society	5
COMM 125	Perspectives on American Journalism	5
COMM 131	Media Ethics and Responsibility	5
COMM 140	Digital Media Entrepreneurship	3-5
COMM 142W	Media Economics	5
COMM 143W	Communication Policy and Regulation	5
COMM 151	The First Amendment: Freedom of Speech and Press	5
COMM 152	Constitutional Law	3
COMM 157	Information Control in Authoritarian Regimes	5
COMM 177A	Computational Journalism	4
COMM 177I	Becoming a Watchdog: Investigative Reporting Techniques	5

## Elective courses

Totaling 10 units.

## Master of Arts in Communication / Graduate Program in Journalism

University requirements for the master's degree are described in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

The department awards a terminal M.A. degree in Communication with a subplan in Journalism. This subplan prints on the transcript, but not on the diploma. Applicants for this program are evaluated for admission on different criteria. Work to fulfill graduate degree requirements must be in courses numbered 100 or above.

Stanford students who are completing an M.A. degree and who desire entry into the Ph.D. program must file a Graduate Program Authorization Petition (<http://studentaffairs.stanford.edu/registrar/students/grad-auth-pet>) in AxBSS. Such students are considered alongside all other doctoral applicants.

## Journalism

Stanford's graduate program in Journalism focuses on the knowledge and skills required to report, analyze, and write authoritatively about public issues and digital media. The curriculum combines a sequence of specialized reporting and writing courses with seminars and courses devoted to deepening the students' understanding of the roles and responsibilities of American news media in their coverage of public issues.

The program emphasizes preparation for the practice of journalism and a critical perspective from which to understand it. The program's objective is twofold:

1. to graduate talented reporters and writers to foster public understanding of the significance and consequences of public issues and the debates they engender; and
2. to graduate thoughtful journalists to respond openly and eloquently when called upon to explain and defend the methods and quality of their reporting and writing.

## Curriculum

The curriculum includes several required courses as shown below, including a master's project class:

		Units
COMM 216	Journalism Law	4
COMM 225	Perspectives on American Journalism	4
COMM 273D	Public Affairs Data Journalism I	4
COMM 274D	Public Affairs Data Journalism II	4
COMM 275	Multimedia Storytelling: Reporting and Production Using Audio, Still Images, and Video	3-4
COMM 279	News Reporting & Writing Fundamentals	3-4
COMM 289P	Journalism Thesis	4
COMM 291	Graduate Journalism Seminar	1

Additionally, students are usually required to take two specialized reporting courses, chosen from a list of seven or eight, and three approved electives from among graduate-level courses in the Department of Communication, or from among courses on campus that deal substantively with issues of public importance. The M.A. degree in Communication (Journalism) requires a minimum of 45 units. Coterminal journalism students may count coursework taken after Summer of freshman year towards the 45 units of unduplicated work with approval by the Director of the Graduate Program in Journalism.

Except for COMM 291 Graduate Journalism Seminar and COMM 289P Journalism Thesis, all courses must be taken for a letter grade. To remain in good academic standing, students must maintain a grade point average (GPA) of 3.0 or better. Graduation requires a GPA of 3.0 or better.

### Journalism Project

The Journalism Thesis (COMM 289P), a requirement for graduation, is intended as an opportunity for students to showcase their talents as writers and reporters. It is also an opportunity to undertake an in-depth critique of an area of journalism in which the author has a special interest. Work on the project usually begins during Winter Quarter and continues through Spring Quarter in the form of the class Journalism Thesis (COMM 289P). Completed master's projects must be submitted to the project adviser no later than the last day of classes in the Spring Quarter.

The project represents a major commitment of time, research, and writing. Although it is not a requirement that the project be published, it must be judged by a member of the faculty to be of a quality acceptable for publication. At a minimum, the project should demonstrate the rigor and discipline required of good scholarship and good journalism; it should offer ample evidence of students' ability to gather, analyze, and synthesize information in a manner that goes beyond what ordinarily appears in daily news media.

## Coterminal Master's Program in Communication

The Department of Communication offers current Stanford University undergraduates the opportunity to apply for a one-year coterminal master's program with an M.A. subplan in Media Studies or Journalism. This subplan prints on the transcript, but not on the diploma.

### Admission

Applicants must submit their application and, if admitted, respond to the offer of admission no later than the quarter prior to the expected completion of their undergraduate degree. Applicants must have declared an undergraduate major and earned a minimum of 120 units toward graduation (UTG) as shown on the undergraduate unofficial transcript

(including allowable advanced placement (AP) and transfer credit) and completed at least six academic quarters.

Applications must be submitted no later than January 21, 2016, for admission beginning in either Spring Quarter 2015-16 or Autumn or Winter Quarter 2016-17. Journalism track students may begin the program only in Spring Quarter of their senior year.

Requirements include:

- Application for Admission to Coterminal Masters' Program (<https://stanford.box.com/CotermApplic>) form
- preliminary program proposal
- statement of purpose
- letters of recommendation and recommendation forms from Stanford professors (two for media studies, three for journalism track)
- a written statement from a Communication professor agreeing to act as a graduate adviser (media studies track only)
- three samples of writing (journalism track only)
- a current unofficial Stanford transcript

GRE scores are not required.

Coterminal applications are submitted directly to the department.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken during or after the first quarter of the sophomore year are eligible for consideration for transfer to the graduate career; the timing of the first graduate quarter is not a factor. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

### Degree Requirements

The coterminal master's program in Communication provides a broad introduction to scholarly literature in mass communication and offers a media studies and a journalism track.

Journalism track students may begin the program only in Spring Quarter of their senior year during which time one elective course is typically taken towards the master's program and any remaining requirements for the undergraduate degree are completed. In the following academic year, journalism track students follow the same curriculum as students in the Graduate Program in Journalism (see Master of Arts, Journalism section, above), less one elective course.

Media studies track students must satisfy the following four requirements:

1. **Required Units and GPA:** students must complete a minimum of 45 units in Communication and related areas, including items 2 and 3 below. Courses must be taken for a letter grade if offered. Courses in related areas outside the department must be approved by the student's adviser. A minimum of 36 units must be in the Communication department. No more than two courses (not including the statistics prerequisite) may be at the 100 level. To remain in good academic standing students must maintain a grade point average (GPA) of 3.0 or better. Graduation requires a GPA of 3.0 or better.
2. **Core Requirements:** students must complete COMM 206 Communication Research Methods, COMM 208 Media Processes and Effects and an approved statistics course such as STATS 160 Introduction to Statistical Methods: Precalculus. Other courses occasionally are approved as a substitute before the student is admitted to the program. The statistics course does not count toward the 45 units.
3. **Six Media Studies Courses:** Students must complete a minimum of six additional Communication courses concerned with the study of media from the following list. Not all the listed courses are offered every year and the list may be updated from one year to the next. In addition to the core requirements and a minimum of six courses listed below, students may choose additional courses from the list and any related course approved by the student's adviser.

		Units
COMM 211	Mass Media, Society, and Democracy	4
COMM 213	Computational Methods in the Civic Sphere	4
COMM 216	Journalism Law	4
COMM 220	Digital Media in Society	4
COMM 222	Content Analysis: Studying Communication Artifacts	4
COMM 224	Digital Deception	4
COMM 225	Perspectives on American Journalism	4
COMM 231	Media Ethics and Responsibility	4
COMM 235	Deliberative Democracy and its Critics	3-5
COMM 237	The Dialogue of Democracy	4
COMM 240	Digital Media Entrepreneurship	3-5
COMM 242	Media Economics	4
COMM 243	Communication Policy and Regulation	4
COMM 251	The First Amendment: Freedom of Speech and Press	4
COMM 252	Constitutional Law	3
COMM 257	Information Control in Authoritarian Regimes	4
COMM 260	The Press and the Political Process	4
COMM 262	Campaigns, Voting, Media, and Elections	4
COMM 264	The Psychology of Communication About Politics in America	4
COMM 266	Virtual People	4
COMM 272	Media Psychology	4
COMM 277A	Computational Journalism	4
or COMM 277C	Specialized Writing and Reporting: Environmental Journalism	
or COMM 277I	Becoming a Watchdog: Investigative Reporting Techniques	
or COMM 277S	Specialized Writing and Reporting: Sports Journalism	
or COMM 271	Moving Pictures: How the Web, Mobile and Tablets are Revolutionizing Video Journalism	

or COMM 275	Multimedia Storytelling: Reporting and Production Using Audio, Still Images, and Video	
or COMM 276	Advanced Digital Media Production	
COMM 326	Advanced Topics in Human Virtual Representation	1-5
COMM 331G	Communication and Media Ethics	1-5

4. **The Media Studies M.A. Project:** students following the media studies track enroll in COMM 290 Media Studies M.A. Project to complete a project over two consecutive quarters that must be preapproved and supervised by the adviser. The completed M.A. project must be submitted to the adviser no later than the last day of classes of the second consecutive quarter. Additional courses are chosen in consultation with an academic adviser.

## Doctor of Philosophy in Communication

University requirements for the Ph.D. are described in the "Graduate Degrees (p. 45)" section of this bulletin. The minimum number of academic units required for the Ph.D. at Stanford is 135, up to 45 of which can be transferred either from a master's degree at the University or from another accredited institution.

The department offers a Ph.D. in Communication, which focuses on theory and research. First-year students are required to complete introductory courses in communication theory and research, research methods, and statistics. These core courses, grounded in the social science literature, emphasize how people respond to media and how media institutions function. In addition, Ph.D. students must complete a minimum of three literature survey courses and related advanced seminars in Communication. Students also take significant course work outside the department in their area of interest. Each student builds a research specialty relating communication to current faculty interests in such areas as ethics, computational journalism, information processing, information technology, law, online communities, politics and voting, and virtual reality. Regardless of the area of specialization, the Ph.D. program is designed primarily for students interested in university research and teaching or other research or analyst positions.

The Ph.D. program encompasses four to five years of graduate study (subsequent to completion of the Bachelor's degree) during which, in addition to fulfilling University residency requirements, Ph.D. candidates are required to:

1. Complete all departmental course requirements listed below with grades of 'B+' or above, with the exception of STATS 160 ('B' minimum) and an advanced methods course ('B-' minimum). Required courses:

		Units
COMM 206	Communication Research Methods	4
COMM 208	Media Processes and Effects	4
COMM 301	Communication Research, Curriculum Development and Pedagogy	1
COMM 311	Theory of Communication	1-5
COMM 314	Qualitative Social Science Research Methods	1-5
COMM 317	The Philosophy of Social Science	1-5
COMM 318	Quantitative Social Science Research Methods	1-5
STATS 160	Introduction to Statistical Methods: Precalculus	5

One advanced methods course.

2. Pass the general qualifying examinations by the end of the second academic year of study and pass a specialized area examination by the end of the fourth academic year of study.

3. Demonstrate proficiency in tools required in the area of research specialization. Identified with the advice of the faculty, such tools may

include detailed theoretical knowledge, advanced statistical methods, a foreign language, computer programming, or other technical skills.

4. Complete at least two pre-dissertation research projects (the Major Project and the Minor Project) by the end of the student's 11th academic quarter.

5. Teach or assist in teaching at least two courses offered by the Department of Communication, preferably two different courses, at least one of which is ideally a core undergraduate course:

		Units
COMM 1A	Mass Media, Society, and Democracy	5
COMM 1B	Media, Culture, and Society	5
COMM 106	Communication Research Methods	5
COMM 108	Media Processes and Effects	5

6. Complete a dissertation proposal and proposal meeting approved by the dissertation committee.

7. Apply for candidacy by the end of the first week of the student's sixth quarter.

8. Complete a dissertation satisfactory to a reading committee of three or more faculty members in the Department of Communication and one faculty member outside of the Department of Communication.

9. Pass the University oral examination, which is a defense of the dissertation.

Because the multifaceted nature of the department makes it possible for the Ph.D. student to specialize in areas that draw on different related disciplines, the plan of study is individualized and developed between the faculty adviser and the student.

Ph.D. candidacy is valid for five years.

Additional information is available on the Ph.D. program page (<http://comm.stanford.edu/phd/rules>) of the department web site.

## Ph.D. Minor in Communication

Candidates for the Ph.D. degree in other departments who elect a minor in Communication are required to complete a minimum of 20 units of graduate courses in the Department of Communication, including a total of three theory or research methods courses, and are examined by a representative of the department. A department adviser in consultation with the individual student determines the particular communication theory and methods courses.

*Emeriti:* (Professors) Donald F. Roberts; (Professor, Teaching) Marion Lewenstein

*Chair:* Fred Turner

*Director, Doctoral Program in Communication:* Jeremy Bailenson

*Director, John S. Knight Journalism Fellowships:* James R. Bettenger

*Director, Journalism:* James T. Hamilton

*Director, Media Studies:* Byron Reeves

*Director, Undergraduate Studies:* James T. Hamilton

*Managing Director, John S. Knight Journalism Fellowships:* Dawn E. Garcia

*Professors:* Jeremy Bailenson, James S. Fishkin, Theodore L. Glasser, James T. Hamilton, Jeffrey T. Hancock, Shanto Iyengar, Jon Krosnick, Byron B. Reeves, Fred Turner

*Assistant Professor:* Jennifer Pan

*Courtesy Professors:* Jan Krawitz, Nathaniel Persily, Walter Powell, Kristine M. Samuelson

*Lorry I. Lokey Professor of the Practice:* Ann Grimes

*Hearst Professionals in Residence:* Daniel Nguyen, Cheryl Phillips

*Lorry I. Lokey Visiting Professor in Professional Journalism:* Geri Migielicz

*Carlos Kelly McClatchy Visiting Lecturer:* Janine Zacharia

*Lecturers:* Steve Hawk, Gary Pomerantz, Philip Taubman, David Voelker, James Wheaton

## Overseas Studies Courses in Communication

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPBEIJ 20	Communication, Culture, and Society: The Chinese Way	4
OSPBEIJ 42	Chinese Media Studies	4
OSPFLOR 49	On-Screen Battles: Filmic Portrayals of Fascism and World War II	5

## Comparative Literature

Courses offered by the Department of Comparative Literature, are listed under the subject code COMPLIT on the Stanford Bulletin's ExploreCourses web site.

The Department of Comparative Literature offers courses in the history and theory of literature through comparative approaches. The department accepts candidates for the degrees of Bachelor of Arts and Doctor of Philosophy. The department is a part of the Division of Literatures, Cultures, and Languages (p. 416).

The field of Comparative Literature provides students the opportunity to study imaginative literature in all its forms. While other literary disciplines focus on works of literature as parts of specific national or linguistic traditions, Comparative Literature draws on literature from multiple contexts in order to examine the nature of literary phenomena from around the globe and from different historical moments, while exploring how literature interacts with other elements of culture and society. We study literary forms such as fictional narratives, performance and poetry, as well as cinema, music, and emerging aesthetic media.

Along with the traditional model of comparative literature that juxtaposes two or more national literary cultures, the department supports teaching and research that examine literary phenomena with additional tools of inquiry such as literary theory, the relationship between literature and philosophy, and the enrichment of literary study with other disciplinary methodologies. Comparative Literature also encourages the study of aspects of literature that surpass national boundaries, such as transnational literary movements or the creative adaptation of particular

genres to local cultures. In each case, students emerge from the program with enhanced verbal and writing skills, a command of literary studies, the ability to read analytically and critically, and a more global knowledge of literature.

## Mission of the Undergraduate Program in Comparative Literature

The mission of the undergraduate program in Comparative Literature is to enhance students' verbal and written communication skills, their ability to read analytically and critically as well as to develop their global knowledge of literary cultures and the specific properties of literary texts. The program provides students with the opportunity to study imaginative literature in all of its forms, investigating the complex interplay of the literary imagination and historical and social experience.

Along with providing core courses that introduce students to major literary forms in a comparative frame, our program of study is flexible in order to accommodate student interest in areas such as specific geographic regions, historical periods, and interdisciplinary connections between literature and other fields such as philosophy, music, the visual arts, gender and queer theory, studies in race and ethnicity. A Comparative Literature major prepares a student to become a better reader and interpreter of literature, through enhanced examination of texts and the development of a critical vocabulary with which to discuss them. Attention to verbal expression and interpretive argument serves students who plan to proceed into careers requiring strong language and communication skills, as well as deeper cross-cultural knowledge of the world.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. the ability to interpret a literary text in a non-native language or to compare literary texts from different linguistic traditions, which may be read in translation.
2. a self-reflective understanding of the critical process necessary to read and understand texts.
3. skills in writing effectively about literature.
4. skills in oral communication and public speaking about literature.

## Graduate Programs in Comparative Literature

The department offers a Doctor of Philosophy and a Ph.D. minor in Comparative Literature.

## Learning Outcomes (Graduate)

Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to

1. make original contributions to the knowledge of Comparative Literature and to interpret and present the results of such research,
2. teach literary analysis and interpretation at all levels with broad historical, cultural and linguistic understanding, and
3. apply such analysis, interpretation and understanding to a range of fields and vocations.

## Bachelor of Arts in Comparative Literature

The major in Comparative Literature requires students to enroll in a set of core courses offered by the department, to complete electives in

the department, and to enroll in additional literature courses, or other courses approved by the Chair of Undergraduate Studies, offered by other departments. This flexibility to combine literature courses from several departments and to address literature from multiple traditions is the hallmark of the Comparative Literature major. Students may count courses which read literature in translation; however, students, and especially those planning to pursue graduate study in Comparative Literature, are encouraged to develop a command of non-native languages.

## Declaring the Major

Students declare the major in Comparative Literature through Axess. Students should meet with the Chair of Undergraduate Studies to discuss appropriate courses and options within the major, and to plan the course of study. Majors are also urged to attend department events such as public talks and conferences.

## Advising

Students majoring in Comparative Literature should consult with the Chair of Undergraduate Studies at least once a quarter. The chair monitors progress to completion of the degree. Students are also encouraged to develop relationships with other faculty members who may act as mentors.

## Overseas Campuses and Abroad Programs

The Department of Comparative Literature encourages time abroad, both for increased proficiency in language and the opportunity for advanced course work. Course work done at campuses other than Stanford is counted toward the major at the discretion of the Chair of Undergraduate Studies and is contingent upon the Office of the University Registrar's approval of transfer credit. To that end, students abroad are advised to save syllabi, notes, papers, and correspondence.

## Degree Requirements

All majors in Comparative Literature (including honors) are required to complete the following requirements. All courses applied to the major must be taken for a letter grade, and a grade point average (GPA) of 2.0 or better must be achieved in each core course.

1. **COMPLIT 101 What Comparative Literature Is.** This gateway to the major is normally taken by the end of sophomore year. It provides an introduction to literature and its distinctions from other modes of linguistic expression, and a fundamental set of interpretive skills. This course fulfills the Writing in the Major requirement.
2. **Core Courses (5 units each)**  
Students should complete these courses as soon as possible. Each course draws on examples from multiple traditions to ask questions about the logic of the individual genres.

		Units
COMPLIT 121	Poems, Poetry, Worlds	5
COMPLIT 122	Literature as Performance: The Potentials of Theater	5
COMPLIT 123	The Novel	5

3. **COMPLIT 199 Senior Seminar: The Pleasures of Reading.** This senior seminar is designed as a culmination to the course of study while providing reflection on the nature of the discipline. Topics vary.
4. **Electives:** Majors must complete at least 40 units of electives. 15 of the 40 units must be COMPLIT courses. The remaining courses should form a coherent intellectual focus requiring approval from the Director of Undergraduate Studies and may be drawn from Comparative Literature offerings, from other literature departments, or from other fields of interdisciplinary relevance. Up to 10 units of Thinking Matters or SLE courses may be counted towards the elective requirement. Electives are subject to adviser consultation and approval.

5. *Total unit load*: Students must complete course work for a total of at least 65 units.

## Philosophical and Literary Thought

Undergraduates may major in Comparative Literature and Philosophy. The Philosophy specification is not declared in Axxess and does not appear on either the transcript or the diploma. Students in this option take courses alongside students from other departments that also have specialized options associated with the program for the study of Philosophical and Literary Thought. Each student in this option is assigned an adviser in Comparative Literature, and student schedules and courses of study must be approved in writing by the advisor, the Chair of Undergraduate Studies of Comparative Literature, and the Chair of Undergraduate Studies of the program. See the Philosophy + Literature @ Stanford (<http://phililit.stanford.edu>) web site.

A total of 65 units must be completed for this option, including the following requirements:

1. Seven courses taught by Comparative Literature faculty. Of the seven, the following five (5 units each) are required courses:

COMPLIT 101	What Comparative Literature Is	5
COMPLIT 121	Poems, Poetry, Worlds	5
COMPLIT 122	Literature as Performance: The Potentials of Theater	5
COMPLIT 123	The Novel	5
COMPLIT 199	Senior Seminar: The Pleasures of Reading	5

The remaining two courses must be instructed by Comparative Literature faculty and approved by the Chair of Undergraduate Studies.

2. *Philosophy and Literature Gateway Course (4 units)*: COMPLIT 181 Philosophy and Literature. This course should be taken as early as possible in the student's career, normally in the sophomore year.
3. *Philosophy Writing in the Major (5 units)*: PHIL 80 Mind, Matter, and Meaning. Prerequisite: introductory philosophy class.
4. *Aesthetics, Ethics, Political Philosophy (ca. 4 units)*: One course from the PHIL 170 series.
5. *Language, Mind, Metaphysics, and Epistemology (ca. 4 units)*: One course from the PHIL 180 series.
6. *History of Philosophy (ca. 8 units)*: Two courses in the history of philosophy, numbered above PHIL 100.
7. *Related Courses (ca. 8 units)*: Two upper division courses relevant to the study of philosophy and literature as identified by the committee in charge of the program. A list of approved courses is available from the undergraduate advisor of the program in philosophical and literary thought.
8. One course, typically in translation, in a literature distant from that of the student's concentration and offering an outside perspective on that literary tradition.
9. *Capstone Seminar (ca. 4 units)*: In addition to COMPLIT 199 Senior Seminar: The Pleasures of Reading, students take a capstone seminar of relevance to philosophy and literature approved by the undergraduate adviser of the program in philosophical and literary thought. The student's choice of a capstone seminar must be approved in writing by the Chair of Undergraduate Studies of Comparative Literature and by the Chair of Undergraduate Studies of the program. Offered this year are:

		Units
ENGLISH 106E	Dante and Aristotle	5
ENGLISH 113A	Desire, Identity, Modernity	5

COMPLIT 258A	Existentialism, from Moral Quest to Novelistic Form	3-5
RELIGST 271A	Dante's Spiritual Vision	4-5

1. *Seminar Paper Requirement*: Students must write at least one seminar paper that is interdisciplinary in nature. This paper brings together material from courses taken in philosophy and literature, and may be an honors paper (see below), an individual research paper (developed through independent work with a faculty member), or a paper integrating materials developed for two separate courses (by arrangement with the two instructors). Though it may draw on previous course work, the paper must be an original composition, 18-20 pages in length. It must be submitted to the Chair of Undergraduate Studies and receive approval no later than the end of Winter Quarter in the fourth year of study.

At least two of the courses counted toward requirements 1, 2, 7, 8, and 9 must be taught by Comparative Literature faculty. Transfer units may not normally be used to satisfy requirements 2, 3, 4, 5, 6 and 9. Units devoted to acquiring language proficiency are not counted toward the 65-unit requirement.

## Units Honors Program

Comparative Literature majors with an overall grade point average (GPA) of 3.3 or above, and who maintain a 3.5 (GPA) in major courses, are eligible to participate in the DLCL's honors program. Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty, in their junior year, preferably by March 1, but no later than May 1. During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL Honors application and an outline of planned course work for their senior year.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40-90 pages not including bibliography and notes. Please consult the DLCL Honors Handbook for more details on declaring and completing the honors thesis.

Honors students are encouraged to participate in the honors college hosted by Bing Honors College ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_uual/OO\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_uual/OO_honors_BingHonors.html)) and coordinated by the Division of Literatures, Cultures, and Languages. The honors college is offered at the end of the summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted through the Bing program. For more information, view the Bing Honors ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_uual/OO\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_uual/OO_honors_BingHonors.html)) website.

*Enrollment*: A minimum of 10 units total, described below, and a completed thesis is required. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15th of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

1. Spring Quarter of the junior year (optional): DLCL 189C Honors Thesis Seminar, 2-4 units S/NC, under the primary thesis adviser. Drafting or revision of the thesis proposal. The proposal is reviewed by the Chair of Undergraduate Studies and the Director of the department and will be approved or returned for submission.
2. Autumn Quarter of the senior year (required): DLCL 189A Honors Thesis Seminar, 4 units S/NC, taught by a DLCL appointed faculty member. Course focuses on researching and writing the honors thesis.

- Winter Quarter of the senior year (required): DLCL 189B Honors Thesis Seminar, 2-4 units letter grade, under the primary thesis adviser. Focus is on writing under guidance of primary adviser. The letter grade will determine if honors is granted or not.
- Spring quarter of the senior year (option; mandatory if not taken during junior year): DLCL 189C Honors Thesis Seminar, 2-4 units S/NC, under the primary thesis adviser. Honors essays are due to the thesis adviser and Student Service Officer no later than 5:00 p.m. on May 15th of the terminal year.
- Spring Quarter of the senior year (required) DLCL 199 Honors Thesis Oral Presentation, 1 unit S/NC. Enroll with primary thesis adviser.

## Joint Major Program: Comparative Literature and Computer Science

The joint major program (JMP), authorized by the Academic Senate for a pilot period of six years beginning in 2014-15, permits students to major in both Computer Science and one of ten Humanities majors. See the "Joint Major Program (p. 26)" section of this bulletin for a description of University requirements for the JMP. See also the Undergraduate Advising and Research JMP web site and its associated FAQs.

Students completing the JMP receive a B.A.S. (Bachelor of Arts and Science).

Because the JMP is new and experimental, changes to procedures may occur; students are advised to check the relevant section of the bulletin periodically.

### Comparative Literature Major Requirements in the Joint Major Program

See the "Computer Science Joint Major Program (p. 231)" section of this bulletin for details on Computer Science requirements.

### Degree Requirements

All majors in Comparative Literature (including honors) are required to complete the following requirements. All courses applied to the major must be taken for a letter grade, and a grade of 'C' or better must be achieved in each core course.

- COMPLIT 101 What is Comparative Literature?. This gateway to the major is normally taken by the end of sophomore year. It provides an introduction to literature and its distinctions from other modes of linguistic expression, and a fundamental set of interpretive skills. This course fulfills the Writing in the Major requirement.

#### 2. Core Courses (5 units each)

Students should complete these courses as soon as possible. Each course draws on examples from multiple traditions to ask questions about the logic of the individual genres.

		Units
COMPLIT 121	Poems, Poetry, Worlds	5
COMPLIT 122	Literature as Performance: The Potentials of Theater	5
COMPLIT 123	The Novel	5

3. COMPLIT 199 Senior Seminar: The Pleasures of Reading. This senior seminar is designed as a culmination to the course of study while providing reflection on the nature of the discipline. Topics vary.

4. *Capstone Project*: Senior year, the student enrolls in a 2-unit independent study DLCL 299 with a DLCL faculty member. The faculty member advising this project must sign off on this description. In order to have it approved as their capstone Complit and Computer Science project, the student must submit a description of the project to the Chair

of Undergraduate Studies in Complit by May 15 of their junior year or no later than October 1 of their senior year.

5. *Electives*: Majors must complete at least 28 units of electives. 15 of the 28 units must be COMPLIT courses. The remaining courses should form a coherent intellectual focus requiring approval from the Chair of Undergraduate Studies and may be drawn from Comparative Literature offerings, from other literature departments, or from other fields of interdisciplinary relevance. Up to 10 units of Thinking Matters or SLE courses may be counted towards the elective requirement. Electives are subject to adviser consultation and approval.

### Declaring a Joint Major Program

To declare the joint major, students must first declare each major through Axess, and then submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>) The Major-Minor and Multiple Major Course Approval Form ([http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin\\_MultMaj.pdf](http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin_MultMaj.pdf)) is required for graduation for students with a joint major.

### Dropping a Joint Major Program

To drop the joint major, students must submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>). Students may also consult the Student Services Center (<http://studentservicescenter.stanford.edu>) with questions concerning dropping the joint major.

### Transcript and Diploma

Students completing a joint major graduate with a B.A.S. degree. The two majors are identified on one diploma separated by a hyphen. There will be a notation indicating that the student has completed a "Joint Major". The two majors are identified on the transcript with a notation indicating that the student has completed a "Joint Major".

## Minor in Comparative Literature

The undergraduate minor in Comparative Literature represents an abbreviated version of the major. It is designed for students who are unable to pursue the major, but who nonetheless seek an opportunity to gain a deeper understanding of literature. Plans for the minor should be discussed with the Chair of Undergraduate Studies. All courses must be taken for a letter grade. Up to 5 units of SLE or Independent Study, may count towards one of the four additional Comparative Literature courses with approval from the Chair of Undergraduate Studies. Requirements for the minor in Comparative Literature include:

	Units
COMPLIT 101 What Comparative Literature Is	5
Select one of the following:	5
COMPLIT 121 Poems, Poetry, Worlds	
COMPLIT 122 Literature as Performance: The Potentials of Theater	
COMPLIT 123 The Novel	
At least four other Comparative Literature courses.	12-20

## Minor in Modern Languages

The Division of Literatures, Cultures, and Languages offers an undergraduate minor in Modern Languages. This minor draws on literature and language courses offered in this and other literature departments. See the "Literatures, Cultures, and Languages (p. 418)" section of this bulletin for requirements.

## Doctor of Philosophy in Comparative Literature

University requirements for the Ph.D. are described in the "Graduate Degrees (p. 45)" section of this bulletin.

The Ph.D. program is designed for students whose linguistic background, breadth of interest in literature, and curiosity about the problems of literary scholarship and theory (including the relation of literature to other disciplines) make this program more appropriate to their needs than the Ph.D. in one of the individual literatures. Students take courses in at least three literatures (one may be that of the native language), to be studied in the original. The program is designed to encourage familiarity with the major approaches to literary study prevailing today.

Before starting graduate work at Stanford, students should have completed an undergraduate program with a strong background in one literature and some work in a second literature studied in the original language. Since the program demands an advanced knowledge of two non-native languages and a reading knowledge of a third non-native language, students should at the time of application have an advanced enough knowledge of one of the three to take graduate-level courses in that language when they enter the program. They should be making enough progress in the study of a second language to enable them to take graduate courses in that language not later than the beginning of the second year, and earlier if possible. Language courses at the 100- or 200-level may be taken with approval from the Chair of the department or the Chair of Graduate Studies. Applicants are expected to take an intensive course in the third language before entrance.

Students are admitted under a financial plan which attempts to integrate financial support and completion of residence requirements with their training as prospective university teachers. Tenure as a Ph.D. student, assuming satisfactory academic progress, is for a maximum of five years.

### Application Procedures

Competition for entrance into the program is extremely keen. The program is kept small so that students have as much opportunity as possible to work closely with faculty throughout the period of study. Applicants should review all course and exam requirements, advancement requirements, and teaching obligations carefully before applying to the program. Because of the special nature of comparative literary studies, the statement of purpose included in the application for admission must contain the following information:

1. A detailed description of the applicant's present degree of proficiency in each of the languages studied, indicating the languages in which the applicant is prepared to do graduate work at present and outlining plans to meet additional language requirements of the program.
2. A description of the applicant's area of interest (for instance, theoretical problems, genres, periods) within literary study and the reasons for finding comparative literature more suitable to his or her needs than the study of a single literature. Applicants should also indicate their most likely prospective primary field, including the literatures on which they intend to concentrate.
3. An explanation of how the applicant's undergraduate education has prepared them for work in our program. If there are any gaps in the applicant's preparation, they should explain how they plan to address those gaps.
4. The applicant's specific reasons for wishing to study in our department of Comparative Literature.
5. All applicants should arrange to have the results of the general section of the Graduate Record Examination sent to Stanford University, ETS code 4704.

6. A letter of recommendation that focuses on the applicant's language skills, or a current ACTFL Oral Proficiency Interview (OPI) certificate, or a critical paper written in a non-native language.
7. Recommendations should, if possible, come from faculty in at least two of the literatures in which the student proposes to work.
8. Applicants must submit a copy of an undergraduate term paper which they consider representative of their best work, preferably containing a comparative analysis.

For further information see the Graduate Admissions (<http://gradadmissions.stanford.edu>) web site.

### Degree Requirements

#### Residence

A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the B.A. degree. The student must take 135 units of graduate work, in addition to the doctoral dissertation. At least three consecutive quarters of course work must be taken at Stanford.

#### Languages

Students must know three non-native languages, two of them sufficiently to qualify for graduate courses in these languages and the third sufficiently to demonstrate the ability to read a major author in this language. Only the third language may be certified by examination. The other two are certified by graduate-level course work specified below. Language preparation must be sufficient to support graduate-level course work in at least one language during the first year and in the second language during the second year. Students must demonstrate a reading knowledge of the third non-native language no later than the beginning of the third year.

Literatures made up of works written in the same language (such as Spanish and Latin American) are counted as one. One of the student's three literatures usually is designated as the primary field, the other two as secondary fields, although some students may offer two literatures at the primary level (six or more graduate courses).

#### Teaching

Students, whatever their sources of financial support, are ordinarily required to undertake a total of five quarters of supervised apprenticeships and teaching at half time. Students must complete whatever pedagogy courses are required by the departments in which they teach. The department's minimum teaching requirement is a total of three quarters.

#### Minimum Course Requirements

Students are advised that the range and depth of preparation necessary to support quality work on the dissertation, as well as demands in the present professional marketplace for coverage of both traditional and interdisciplinary areas of knowledge, render these requirements as bare minimums. The following are required:

1. Required Courses:

		Units
COMPLIT 369	Introduction to the Profession of "Literary Studies" for Graduate Students	1-2
DLCL 301	The Learning and Teaching of Second Languages	3

2. A sufficient number of courses (six or more) in the student's primary field to assure knowledge of the basic works in one national literature from its beginnings until the present.
3. At least two additional complementary courses, with most of the reading in the original, in each of two different national literatures. Students whose primary field is a non-native language are required to take two courses in one additional literature not their own.

Minimum course requirements must be completed before the student is scheduled to take the University oral examination. These requirements are kept to a minimum so that students have sufficient opportunity to seek out new areas of interest. A course is an offering of 3-5 units. Independent study may take the place of up to two of the required courses, but no more; classroom work with faculty and other students is central to the program. The principal conditions for continued registration of a graduate student are the timely and satisfactory completion of the university, department, and program requirements for the degree, and fulfillment of minimum progress requirements. Failure to meet these requirements results in corrective measures which may include a written warning, academic probation, and/or the possible release from the program.

### Dissertation Reading Committee

Every doctoral dissertation is read and approved by the three members of the student's doctoral dissertation reading committee. The doctoral dissertation reading committee consists of the principal dissertation adviser and, typically, two other readers. The doctoral dissertation reading committee must have three members and may not have more than five members. At least one member must be from the student's major department. Normally, all committee members are members of the Stanford University Academic Council or are emeritus Academic Council members. The student's department chair may, in some cases, approve the appointment of a reader who is not a current or emeritus member of the Academic Council, if that person is particularly well qualified to consult on the dissertation topic and holds a Ph.D. or equivalent foreign degree. Former Stanford Academic Council members and non-Academic Council members may thus, on occasion, serve on a reading committee. A non-Academic Council member (including former Academic Council members) may replace only one of three required members of dissertation reading committees. If the reading committee has four or five members, at least three members (comprising the majority) must be current or emeritus members of the Academic Council.

### Examinations

Three examinations are required. The first two are one-hour exams. The first of these two is taken at the end of the student's first year of study; the second is taken at the start of the second year. Students should meet with the members of the exam committee to discuss their plans for the exams. The first of these is on literary genre, designed to demonstrate the student's knowledge of a substantial number of literary works in a single genre, ranged over several centuries and over at least three national literatures. This exam is also designed to demonstrate the student's grasp of the theoretical problems involved in his or her choice of genre and in the matter of genre in general. The second of these examinations is on literary theory and criticism, designed to demonstrate the student's knowledge of a particular problem in the history of literary theory and criticism, or the student's ability to develop a particular theoretical position. In either case, this exam should demonstrate wide reading in theoretical and critical texts from a variety of periods. The third and last is the University oral examination, which covers a literary period, to consist of in-depth knowledge of a period of approximately a century in three or more literatures with primary emphasis on a single national literature or, in occasional cases, two national literatures.

1. *First One-Hour Examination:* The genre exam is generally administered the second week of April of the student's first year. All first-year students take the exam during the same period, with an examination committee established by the department. Exam lists should be approved by the Chair of Graduate Studies well in advance of the exam. Students are urged to focus on poetry, drama, or the novel or narrative, combining core recommendations from the department with selections from their individual areas of concentration. Any student who does not pass the exam has the opportunity to retake the exam the second week of May of the same quarter. Students who do not pass this exam a second time may be dismissed from the program.

2. *Second One-Hour Examination:* The theory exam is administered the Autumn Quarter of the student's second year. All second-year students take the exam during the same period, with an examination committee established by the department. Exam lists should be approved by the Chair of Graduate Studies well in advance of the exam. Any student who does not pass the exam has the opportunity to retake the exam the second week of the Winter Quarter. Students who do not pass this exam a second time may be dismissed from the program.
3. *University Oral Examination:* Students are required to take this exam during the Autumn Quarter of their third year. The oral exam is individually scheduled, with a committee established by the student in consultation with the Chair of Graduate Studies. The reading list covers chiefly the major literary texts of a period of approximately one hundred years but may also include some studies of intellectual backgrounds and modern critical discussions of the period. Students must demonstrate a grasp of how to discuss and define this period as well as the concept of periods in general. This examination is not to be on the dissertation topic, on a single genre, or on current criticism, but rather on a multiplicity of texts from the period. Students whose course work combines an ancient with a modern literature have the option of dividing the period sections into two wholly separate periods.

### Qualifying Procedures Candidacy

Admission to candidacy is an important decision grounded in an overall assessment of a student's ability to successfully complete the PhD program. Per University policy, students are expected to complete department qualifying procedures and apply for candidacy by the end of the second year in residence. In reviewing a student for admission to candidacy, the faculty considers a student's academic progress including but not limited to: advanced language proficiency, coursework, performance on the Qualifying Exam (Genre Exam), and successful completion of teaching and research assistantships. A student must also have completed at least 3 units of work with each of 4 Stanford faculty members prior to consideration for candidacy. In addition to successful completion of department prerequisites, a student is only admitted to candidacy if the faculty makes the judgment that the student has the potential to successfully complete the requirements of the degree program. Candidacy is determined by faculty vote. Failure to advance to candidacy results in the dismissal of the student from the doctoral program. Candidacy is valid for five years and students are required to maintain active candidacy through conferral of the doctoral degree. All requirements for the degree must be completed before candidacy expires. The Department of Comparative Literature conducts regular reviews of each student's academic performance, both prior to and following successful admission to candidacy. Failure to make satisfactory progress to degree may result in dismissal from the doctoral program. Additional information about University candidacy policy is available in the Bulletin (p. ) and GAP (<http://gap.stanford.edu/4-6.html>).

### Yearly Review

The faculty provide students with timely and constructive feedback on their progress toward the Ph.D. In order to evaluate students' progress and to identify potential problem areas, the department's faculty reviews the academic progress of each student at the end of the academic year. The yearly reviews are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. Possible outcomes of the yearly review include (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period on probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; or (2)

continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program. Students leaving the program at the end of the first or second year are usually allowed to complete the requirements to receive an M.A. degree, if this does not involve additional residency or financial support.

### Prospectus Colloquium

The prospectus colloquium normally takes place during the spring of the third year. The student should furnish the committee with a five-page prospectus, 20-page draft of a chapter, and working bibliography well before the colloquium. The colloquium lasts one hour, begins with a brief introduction to the dissertation prospectus by the student lasting no more than five minutes, and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium.

The prospectus must be prepared in close consultation with the dissertation adviser during the months preceding the colloquium. It must be submitted in its final form to the readers no later than one week before the colloquium. A prospectus should not exceed ten double spaced pages, in addition to which it should include a working bibliography of primary and secondary sources. It should offer a synthetic overview of the dissertation, describe its methodology and the project's relation to prior scholarship on the topic, and lay out a complete chapter by chapter plan.

It is the student's responsibility to schedule the colloquium no later than the first half of the quarter after that quarter in which the student passed the University Oral Examination. The student should arrange the date and time in consultation with the department administrator and with the three examiners. The department administrator schedules an appropriate room for the colloquium.

Members of the dissertation reading committee are ordinarily drawn from the University oral examination committee.

## Ph.D. Minor in Comparative Literature

This minor is designed for students working toward the Ph.D. in the various foreign language departments. Students working toward the Ph.D. in English are directed to the program in English and Comparative Literature described among the Department of English offerings. Students must have:

1. A knowledge of at least two foreign languages, one of them sufficient to qualify for graduate-level courses in that language, the second sufficient to read a major author in the original language.
2. A minimum of six graduate courses, of which three must be in the department of the second literature and three in the Department of Comparative Literature, the latter to include a seminar in literary theory or criticism. At least two of the three courses in comparative literature should originate in a department other than the one in which the student is completing the degree. Except for students in the Asian languages, students must choose a second literature outside the department of their major literature.

## Faculty in Comparative Literature

*Emeriti:* (Professors) John Freccero, René Girard, Herbert Lindenberger, Elisabeth Mudimbe-Boyi, Mary Pratt

*Director:* Amir Eshel (Fall), Roland Greene (Winter and Spring)

*Chair of Graduate Admissions:* Roland Greene

*Chair of Graduate Studies:* Hans U. Gumbrecht

*Chair of Undergraduate Studies:* David Palumbo-Liu

*Professors:* Vincent Barletta (Comparative Literature, Iberian and Latin American Cultures), John Bender (Comparative Literature, English) (on leave, Autumn), Russell Berman (Comparative Literature, German Studies), Margaret Cohen (Comparative Literature, English), Amir Eshel (Comparative Literature, German Studies), Roland Greene (Comparative Literature, English), Hans U. Gumbrecht (Comparative Literature, French and Italian), Joshua Landy (Comparative Literature, French and Italian) Franco Moretti (English, Comparative Literature) (on leave, Autumn), David Palumbo-Liu (Comparative Literature), Patricia Parker (Comparative Literature, English), Joan Ramón Resina (Comparative Literature, Iberian and Latin American Cultures), José David Saldívar (Comparative Literature) (on leave), Ramón Saldívar (Comparative Literature, English), Ban Wang (Comparative Literature, East Asian Languages and Cultures, )

*Associate Professors:* Monika Greenleaf (Comparative Literature, Slavic Languages and Literature, Haiyan Lee (Comparative Literature, East Asian Languages and Cultures) (on leave), Indra Levy (Comparative Literature, East Asian Languages and Cultures)

*Assistant Professor:* Marie Huber (on leave, Autumn), Alexander Key (Comparative Literature), Alvan Ikoku (Comparative Literature, Medicine)

*Senior Lecturer:* Vered K. Shemtov

*Lecturers:* Petra Dierkes-Thrun, Burcu Karahan, Giddon Ticotsky

*Courtesy Professor:* Nancy Ruttenburg

## Comparative Studies in Race and Ethnicity (CSRE)

The Undergraduate Program in Comparative Studies in Race and Ethnicity is home to five areas of study:

- Asian American Studies (courses listed as ASNAMST (<https://explorecourses.stanford.edu/search?q=ASNAMST&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-ASNAMST=on&filter-catalognumber-ASNAMST=on>) on ExploreCourses)
- Chicana/o-Latina/o Studies (courses listed as CHILATST ([https://explorecourses.stanford.edu/search?q=CHILATST&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=\)](https://explorecourses.stanford.edu/search?q=CHILATST&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=))) on ExploreCourses)
- Comparative Studies (courses listed as CSRE (<https://explorecourses.stanford.edu/search?q=CSRE&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-CSRE=on&filter-catalognumber-CSRE=on>) on ExploreCourses)
- Jewish Studies (courses listed as JEWISHST (<https://explorecourses.stanford.edu/search?q=JEWISHST&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-JEWISHST=on&filter-catalognumber-JEWISHST=on>) on ExploreCourses)
- Native American Studies (courses listed as NATIVEAM (<https://explorecourses.stanford.edu/search?q=NATIVEAM&view=catalog&page=0&catalog=71&filter-term->

Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-NATIVEAM=on&filter-catalognumber-NATIVEAM=on) on ExploreCourses)

Students can pursue a major or minor in any of these five areas, and are encouraged to build their interdisciplinary study around a focus or theme. Students can then select from more than 150 course options from across many departments and schools to put together a curriculum, in consultation with our staff and faculty. The major requires 60 units of study and a culminating research project (either a senior paper or honors thesis).

## Mission of the Undergraduate Program in Comparative Studies in Race and Ethnicity

The Interdepartmental Program in Comparative Studies in Race and Ethnicity (CSRE) is an interdisciplinary program offering students the opportunity to investigate the significance of race and ethnicity in all areas of human life.

Devoted to a rigorous analysis of race and ethnicity and using a comparative and interdisciplinary approach, CSRE is committed to promoting and deepening students' understanding of the multiple meanings of racial and ethnic diversity both in the United States and abroad in ways that prepare students for living and working effectively in a multicultural, global society.

The interdisciplinary and integrated nature of our academic programs means that students can take courses from across the university including: anthropology, art, communication, economics, education, history, languages, linguistics, literature, music, philosophy, political science, psychology, religion, sociology, theater and performance, among others.

## Learning Outcomes (Undergraduate)

The Program in Comparative Studies in Race and Ethnicity expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the undergraduate program. Students are expected to:

1. demonstrate an understanding of interdisciplinary approaches to the knowledge of experiences related to race and ethnicity in the United States.
2. demonstrate the ability to employ diverse analytical resources and comparative modes of study as tools to frame and address research questions.
3. be critical readers of both primary and secondary sources, who can use and properly cite both types of evidence in their written work.
4. actively and critically engage in verbal and/or written discussion of issues.
5. demonstrate analytical writing skills that convey their understanding of the topic.
6. expand their ability to think critically about issues in political, social, scientific, economic and cultural life stemming from the diversity of experiences related to race and ethnicity.

## Undergraduate Program in Comparative Studies in Race and Ethnicity

### Majors: Core Curriculum

The Interdepartmental Program in Comparative Studies in Race and Ethnicity (CSRE) provides students the opportunity to structure a major or minor in comparative ethnic studies or to focus their course work in a single ethnic studies area. Five majors and minors (Asian

American Studies, Chicana/o-Latina/o Studies, Comparative Studies, Jewish Studies, and Native American Studies) are offered as part of the IDP in CSRE. All core courses taken for the major must be taken for a letter grade. The directors of the program and of each major constitute the CSRE curriculum committee, the policymaking body for the interdisciplinary program.

Students who declare any of the five majors participate in a common curriculum consisting of at least two core courses, a methodologies course, and a senior seminar.

There are two types of introductory courses taught by senior CSRE affiliated faculty: core courses that are interdisciplinary and compare how race and ethnicity have historically appeared across groups; and foundational courses that focus on a specific racial or ethnic group. These requirements illustrate how different disciplines approach the study and interpretation of race and ethnicity and provide a foundation for the student's program of study.

### Minors

Students who wish to minor in the study areas must complete a minimum of 30 units from the approved course list, one of which must be a core course and a second that is foundational to the area of study. Proposals for the minor must be approved by the director of each study area.

### Directed Reading and Research

Directed reading and research allows students to focus on a special topic of interest. In organizing a reading or research plan, the student consults with the director of the major and one or more faculty members specializing in the area or discipline.

Courses that fulfill directed reading and research requirements:

	Units
ASNAMST 200R Directed Research	1-5
ASNAMST 200W Directed Reading	1-5
CHILATST 200R Directed Research	1-5
CHILATST 200W Directed Reading	1-5
CSRE 200R Directed Research	1-5
CSRE 200W Directed Reading	1-5
NATIVEAM 200R Directed Research	1-5
NATIVEAM 200W Directed Reading	1-5

### Senior Seminar

Research and writing of the senior honors thesis or senior paper is under the supervision of a faculty project adviser. All majors in the IDP in CSRE, even those who opt to write honors theses in other departments and programs, must enroll in CSRE 200X CSRE Senior Seminar, offered in Autumn Quarter. The course takes students through the process of researching an honors thesis, including conceptualization, development of prospectus, development of theses, research, analysis, and finally the process of drafting and writing. This course meets the Writing in the Major requirement (WIM). Those who opt to write senior papers are organized into tutorial groups in Autumn Quarter.

### Special Programs

CSRE majors have several unique opportunities available to them. The program supports full-time paid summer research internships for those who apply to complete a self-designed research project in collaboration with a community agency. The Public Policy Institute is a two week, pre-Autumn Quarter seminar that provides exposure to critical public policy issues. The residence-based institute provides room and board and all seminar materials for participants, including a visit to Sacramento to meet with policy makers. CSRE also sponsors quarterly luncheons and community programs for all majors and minors, and has a number

of service learning courses that couple academic work with work in communities.

## Murray House

Murray House, 566 Governor's Avenue, is an undergraduate residence with a CSRE focus that is devoted to developing an intellectual community amongst students interested in the study of race and ethnicity. Programs, including an in-house seminar, are developed with the guidance of CSRE faculty to increase the understanding of issues of race and ethnicity amongst its residents through social events and discussions. Students may apply for pre-assignment to Murray House to participate in the CSRE Focus. Contact Residential Education for more information.

## Honors Program in Comparative Studies in Race and Ethnicity

### For Majors in Comparative Studies in Race and Ethnicity

The Interdepartmental Program in Comparative Studies in Race and Ethnicity offers a program leading to honors for majors in:

- Asian American Studies
- Chicana/o-Latina/o Studies
- Comparative Studies
- Jewish Studies
- Native American Studies

The honors program offers an opportunity to do independent research for a senior thesis. It is open to majors who have maintained a grade point average (GPA) of at least 3.5 in the major and 3.3 overall. The honors thesis is intended to enable students to synthesize skills to produce a document or project demonstrating a measure of competence in their specialty.

The application for honors must be submitted by May 20 of the junior year, but students are encouraged to apply earlier. The application includes a proposal describing the project that is approved by the faculty adviser and director of the undergraduate program. Students are required to identify both a faculty adviser and a second reader for the thesis project. The faculty adviser for the honors thesis must be an academic council faculty member and affiliated faculty of the student's major.

Honors students take CSRE 200X CSRE Senior Seminar, which fulfills the program's WIM requirement, and also enroll in CSRE 200Y CSRE Senior Honors Research and CSRE 200Z CSRE Senior Honors Research, in Winter and Spring quarters to continue to access peer and faculty support as they write their theses. Senior Honors Research (CSRE 200Y and CSRE 200Z) courses cannot count for the 60 units towards your major but do count for the 180 units towards your bachelor's degree. Students must complete their theses with a grade of 'B+' to receive honors in CSRE.

An honors colloquium held near the end of Spring Quarter affords students an opportunity to present their research formally. Prizes for best undergraduate honors thesis are awarded annually by the CSRE curriculum committee.

Applications are available in the CSRE Undergraduate Program office and on the program web site (<http://csre.stanford.edu/honors.php>).

### For Majors in Other Departments

The Interdisciplinary Honors Program for Non-Majors in Comparative Studies in Race and Ethnicity is intended to complement study in any major. Students who participate in the honors program receive their degree from their program of study with departmental honors in Comparative Studies in Race and Ethnicity.

Honors certification will be open to students majoring in any field with a GPA in their chosen major of 3.5 and an overall GPA of 3.3. As a prerequisite, students apply for entry by Spring Quarter of the junior year (deadline June 1), but students are encouraged to begin earlier. During the application process, students outline a plan for course work and design an honors project in consultation with their proposed thesis adviser and the CSRE senior seminar coordinator.

The application describes how the student may fulfill the course requirements for interdisciplinary honors in CSRE and includes a proposal describing the project that is approved by the faculty adviser and director of the undergraduate program. Students are required to identify both a faculty adviser and a second reader for the thesis project. The faculty adviser for the honors thesis must be an academic council faculty member and affiliated faculty of the Center for Comparative Studies in Race and Ethnicity. Applications are available in the CSRE undergraduate program office and on the program web site (<http://csre.stanford.edu/honors.php>).

Students pursuing a minor in Asian American Studies, Chicana/o-Latina/o Studies, Comparative Studies in Race and Ethnicity, Jewish Studies or Native American Studies who wish to pursue honors in their area of study, apply through the process for non-majors. Students may use their course work for the minor toward the requirements of the interdisciplinary honors program.

### Requirements:

Students applying for the interdisciplinary honors program in CSRE are required to take the following courses:

		Units
CSRE 196C	Introduction to Comparative Studies in Race and Ethnicity	5

And a second course identified as core or foundational to CSRE.

### Core Courses

		Units
ANTHRO 32	Theories in Race and Ethnicity: A Comparative Perspective	5
CSRE 125V	The Voting Rights Act	5
CSRE 148	Comparative Ethnic Conflict	4
CSRE 184C	Zionism and the State of Israel	5
CSRE 196C	Introduction to Comparative Studies in Race and Ethnicity	5
CSRE 200X	CSRE Senior Seminar	5
CSRE 220	Public Policy Institute	3-5
CSRE 226	Race and Racism in American Politics	5
CSRE 245	Understanding Racial and Ethnic Identity Development	3-5
CSRE 246	Constructing Race and Religion in America	4-5
HISTORY 64	Racial and Ethnic Diversity in Modern America	4-5
HISTORY 184	Zionism and the State of Israel	5
JEWISHST 106	Reflection on the Other: The Jew and the Arab in Literature	3-5
JEWISHST 184	Zionism and the State of Israel	5
PSYCH 75	Introduction to Cultural Psychology	5

### Foundational Courses

		Units
AFRICAAM 43	Introduction to English III: Introduction to African American Literature	5
AFRICAAM 105	Introduction to African and African American Studies	5

ASNAMST 146S	Asian American Culture and Community	3-5
CHILATST 171	Mexicans in the United States	5
JEWISHST 71	Jews and Christians: Conflict and Coexistence	3
JEWISHST 183	The Holocaust	4
NATIVEAM 16	Native Americans in the 21st Century: Encounters, Identity, and Sovereignty in Contemporary America	5
NATIVEAM 138	American Indians in Comparative Historical Perspective	4
NATIVEAM 139	American Indians in Contemporary Society	4

These courses must be completed with a grade of 'B+' or better for the honors program.

In addition, students are required to take:

	Units
A core, foundational, thematic, or cognate course related to the topic of the proposal or honors research (selected in consultation with the thesis advisor)	
CSRE 200X CSRE Senior Seminar	5
CSRE 200Y CSRE Senior Honors Research (in Winter and Spring quarters)	1-10
CSRE 200Z CSRE Senior Honors Research (in Winter and Spring quarters)	1-10

These courses must be completed with a minimum grade of 'B+'. Throughout the year, students work with faculty adviser and the senior seminar coordinator to complete their theses. Students must complete their theses with a minimum grade of 'B+' to receive honors in CSRE.

An honors colloquium held near the end of Spring Quarter affords students an opportunity to present their research formally. Prizes for best undergraduate honors thesis are awarded annually by the CSRE curriculum committee.

## Asian American Studies

*Director: Jeanne Tsai*

Asian American Studies (AAS) provides an interdisciplinary approach to understanding the historical and current experiences of persons of Asian ancestry in the United States. In using the term Asian American, the AAS faculty recognize that the term seeks to name a rapidly developing, complex, and heterogeneous population and that there is neither a single Asian American identity nor one community that comprises all Asian Americans. Asian Americans include those with ancestral ties to countries or regions in East Asia, South Asia, Southeast Asia, or the Philippines, among others.

AAS brings together courses that address the artistic, historical, humanistic, political, and social dimensions of Asian Americans and is an appropriate course of study for students interested in a variety of concerns related to Asian Americans, including: artistic and cultural contributions; current social significance; historical experiences; immigration, intellectual, and policy issues; relationships with other social groups; and the construction of the notion of Asian American as it addresses important theoretical and practical issues.

### 1. Core Curriculum

Asian American majors must take the 15-unit CSRE core curriculum including two core courses and a senior seminar taken in Autumn Quarter of the senior year. One foundational course that focuses on a non-Asian ethnic group may be counted toward the 15-unit core requirement.

ANTHRO 32	Theories in Race and Ethnicity: A Comparative Perspective	5
CSRE 125V	The Voting Rights Act	5
CSRE 148	Comparative Ethnic Conflict	4
CSRE 184C	Zionism and the State of Israel	5
CSRE 196C	Introduction to Comparative Studies in Race and Ethnicity	5
CSRE 200X	CSRE Senior Seminar	5
CSRE 220	Public Policy Institute	3-5
CSRE 226	Race and Racism in American Politics	5
CSRE 245	Understanding Racial and Ethnic Identity Development	3-5
CSRE 246	Constructing Race and Religion in America	4-5
HISTORY 64	Racial and Ethnic Diversity in Modern America	4-5
HISTORY 184	Zionism and the State of Israel	5
JEWISHST 106	Reflection on the Other: The Jew and the Arab in 3-5 Literature	
JEWISHST 184	Zionism and the State of Israel	5
PSYCH 75	Introduction to Cultural Psychology	5

### 2. Foundational Course

Majors are required to take one foundational course in Asian American Studies. Students who completed ENGLISH 43C/143C in a previous year may count this toward their Foundational Course Requirement.

ASNAMST 146S/ COMPLIT 146/ CSRE 146S	Asian American Culture and Community	3-5
--	--------------------------------------	-----

### 3. Area Study

Majors must complete an additional 35 units of course work from an approved list. One course must have an international dimension, preferably a focus on Asia. One course should have a comparative focus, not restricted to Asian American identity. The remaining courses must have an Asian American focus and must be selected from social science and humanities departments.

### 4. Language Study (optional)

Students may obtain credit for their study of a related Asian language towards their degree. If students take 15 or more units of an Asian language relevant to Asian American Studies, they may apply 5 of those units toward their Asian American Studies degree.

### 5. Research/Methodology Requirement

Majors are required to complete 5 units of course work focused on research methods relevant to their disciplinary approach as a student in Asian American Studies. Students select the research and/or methodology course in consultation with their faculty adviser.

### 6. Community Engagement Requirement

All students in one of the CSRE majors are required to complete at least one service-learning experience. This requirement may be fulfilled by enrolling in a service-learning course, participating in a service-learning Alternative Spring Break, participating in the Community Summer Research Internship program, or enrolling in CSRE 198 – Public Service Internship while completing independent service work.

### 7. Senior Paper or Honors Thesis

All Asian American Studies majors complete a culminating research paper under the supervision of a faculty adviser. Honors students take CSRE 200X CSRE Senior Seminar, which fulfills the program's

WIM requirement, and also enroll in CSRE 200Y CSRE Senior Honors Research and CSRE 200Z CSRE Senior Honors Research, in Winter and Spring quarters to continue to access peer and faculty support as they write their theses. Senior Honors Research (CSRE 200Y and CSRE 200Z) courses cannot count for the 60 units towards your major but do count for the 180 units towards your bachelor's degree. Students must complete their theses with a grade of 'B+' to receive honors in CSRE.

## Chicana/o-Latina/o Studies

Director: Guadalupe Valdés

Chicana/o-Latina/o Studies is an interdisciplinary major focusing on the U.S. population with origins in the countries of Mexico, Latin America, and/or South America. Students who major or minor in Chicana/o-Latina/o Studies have an opportunity to select from courses in the humanities, social sciences, and courses offered by affiliated faculty in the School of Education. The Chicana/o-Latina/o Studies program affords students an opportunity to explore the culture, society, economy, and politics of this important and growing segment of our national population.

## Bachelor of Arts in Chicana/o-Latina/o Studies

A total of 60 units of course work are required for the major.

### 1. Core Curriculum

Chicana/o-Latina/o Studies majors must take the 15-unit CSRE core curriculum including two core courses and a senior seminar taken in Autumn Quarter of the senior year. One foundational course that focuses on a non-Latino origin group may be counted toward the 15-unit core requirement.

ANTHRO 32	Theories in Race and Ethnicity: A Comparative Perspective	5
CSRE 125V	The Voting Rights Act	5
CSRE 148	Comparative Ethnic Conflict	4
CSRE 184C	Zionism and the State of Israel	5
CSRE 196C	Introduction to Comparative Studies in Race and Ethnicity	5
CSRE 200X	CSRE Senior Seminar	5
CSRE 220	Public Policy Institute	3-5
CSRE 226	Race and Racism in American Politics	5
CSRE 245	Understanding Racial and Ethnic Identity Development	3-5
CSRE 246	Constructing Race and Religion in America	4-5
HISTORY 64	Racial and Ethnic Diversity in Modern America	4-5
HISTORY 184	Zionism and the State of Israel	5
JEWISHST 106	Reflection on the Other: The Jew and the Arab in Literature	3-5
JEWISHST 184	Zionism and the State of Israel	5
PSYCH 75	Introduction to Cultural Psychology	5

### 2. Foundational Courses

Majors are required to take one foundational course in Chicana/o-Latina/o Studies. Students who completed CHICANST/SOC 166 in a previous year may count this toward their foundational course requirement.

CHILATST 180E		5
CHILATST 171	Mexicans in the United States	5

### 3. Thematic Concentration

Chicana/o-Latina/o Studies majors select a thematic concentration which allows students to customize their curriculum and to synthesize course work taken across various departments into a coherent focus. Majors complete an additional 35 units of courses relevant to the thematic concentration and approved by the adviser.

### 4. Language Study (optional)

Students may obtain credit for the study of the Spanish language towards their degree. If students take 15 or more units of Spanish language relevant to Chicana/o-Latina/o Studies, they may apply 5 of those units toward their Chicana/o-Latina/o Studies degree.

### 5. Research/Methodology Requirement

Majors are required to complete 5 units of course work focused on research methods relevant to their disciplinary approach as a student in Chicana/o-Latina/o Studies. Students select the research and/or methodology course in consultation with their faculty adviser.

### 6. Community Engagement Requirement

All students in one of the CSRE majors are required to complete at least one service-learning experience. This requirement may be fulfilled by enrolling in a service-learning course, participating in a service-learning Alternative Spring Break, participating in the Community Summer Research Internship program, or enrolling in CSRE 198 – Public Service Internship while completing independent service work.

### 7. Senior Paper or Honors Thesis

All Chicana/o-Latina/o Studies majors complete a culminating research paper under the supervision of a faculty adviser. Honors students take CSRE 200X CSRE Senior Seminar, which fulfills the program's WIM requirement, and also enroll in CSRE 200Y CSRE Senior Honors Research and CSRE 200Z CSRE Senior Honors Research, in Winter and Spring quarters to continue to access peer and faculty support as they write their theses. Senior Honors Research (CSRE 200Y and CSRE 200Z) courses cannot count for the 60 units towards your major but do count for the 180 units towards your bachelor's degree. Students must complete their theses with a grade of 'B+' to receive honors in CSRE.

#### Units

## Comparative Studies in Race and Ethnicity

Director: Tomás Jiménez

Comparative Studies in Race and Ethnicity does not focus on a particular ethnic group. Rather, a student in consultation with the adviser designs a curriculum in relation to a thematic concentration that compares various ethnic groups or explores topics that cut across group experiences in the United States and elsewhere in the world. For example, students may compare groups within the U.S., or compare groups in the U.S. to ethnic groups elsewhere, or study the diaspora of a single group or the sovereignty of indigenous peoples within and across different national contexts. Students in this major are able to take advantage of courses in over 22 fields offered by the affiliated faculty of CSRE.

## Bachelor of Arts in Comparative Studies in Race and Ethnicity

A total of 60 units of course work are required for the major.

### 1. Core Curriculum

All CSRE majors enroll in the 15-unit core curriculum, which consists of two core courses and a senior seminar taken in Autumn Quarter of the senior year. One foundational course may be counted toward the 15-unit core requirement.

#### Units

ANTHRO 32	Theories in Race and Ethnicity: A Comparative Perspective	5
CSRE 125V	The Voting Rights Act	5

PSYCH 75	Introduction to Cultural Psychology	5

**2. Thematic Concentration**

Comparative Studies majors complete another 40 units of course work relevant to the thematic concentration (p. 407) they have chosen in consultation with the adviser.

**3. Research/Methodology Requirement**

Majors are required to complete 5 units of coursework focused on research methods relevant to their disciplinary approach as a student in Comparative Studies. Students select the research and/or methodology course in consultation with their faculty adviser.

**4. Community Engagement Requirement**

All students in one of the CSRE majors are required to complete at least one service-learning experience. This requirement may be fulfilled by enrolling in a service-learning course, participating in a service-learning Alternative Spring Break, participating in the Community Summer Research Internship program, or enrolling in CSRE 198 – Public Service Internship while completing independent service work.

**5. Senior Paper or Honors Thesis**

All CSRE majors complete a culminating research paper under the supervision of a faculty adviser. Honors students take CSRE 200X CSRE Senior Seminar, which fulfills the program's WIM requirement, and also enroll in CSRE 200Y CSRE Senior Honors Research and CSRE 200Z CSRE Senior Honors Research, in Winter and Spring quarters to continue to access peer and faculty support as they write their theses. Senior Honors Research (CSRE 200Y and CSRE 200Z) courses cannot count for the 60 units towards your major but do count for the 180 units towards your bachelor's degree. Students must complete their theses with a grade of 'B+' to receive honors in CSRE.

**Jewish Studies**

*Director:* Charlotte Fonrobert

The Jewish Studies major provides students with an understanding of Jewish history, language, literature, religion, thought and politics. Jewish culture originated in the ancient Near East and continues today in many different forms across the globe. Drawing from the Humanities, the Social Sciences and from courses offered by affiliated faculty in the School of Education, the Jewish Studies major seeks to help students understand Jewish identity, thought and self-expression within larger historical and

social contexts, and to develop their ability to analyze human experience from different disciplinary perspectives.

In addition to the undergraduate major and minor offered through the interdepartmental program in CSRE, the Taube Center for Jewish Studies offers a full range of guest lectures, conferences, and symposia. Graduate students interested in Jewish Studies should see the separate Jewish Studies (p. 536) section of this bulletin for program information, opportunities, and additional course descriptions.

**Bachelor of Arts in Jewish Studies**

A total of 60 units of course work are required for the major.

**1. Core Curriculum**

Jewish Studies majors must take the 15-unit CSRE core curriculum including two core courses and a senior seminar taken in Autumn Quarter of the senior year.

ANTHRO 32	Theories in Race and Ethnicity: A Comparative Perspective	5
CSRE 125V	The Voting Rights Act	5
CSRE 148	Comparative Ethnic Conflict	4
CSRE 184C	Zionism and the State of Israel	5

JEWISHST 184	Zionism and the State of Israel	5
PSYCH 75	Introduction to Cultural Psychology	5

**2. Foundational Courses**

Majors are required to take one foundational course in Jewish Studies. Courses offered this year include:

JEWISHST 71	Jews and Christians: Conflict and Coexistence	3
JEWISHST 183	The Holocaust	4

**3. Thematic Concentration**

Jewish Studies majors select a thematic concentration which allows students to customize their curriculum and to synthesize course work taken across various departments into a coherent focus. Majors complete at least 20 units of courses at the 100 level or above relevant to the thematic concentration as approved by the Jewish Studies director.

**4. Language**

One year of Hebrew or another approved Jewish language. Students able to satisfy the first year Hebrew requirement through a proficiency exam are still expected to take an additional year of Hebrew at a higher level or a first year in an additional Jewish language. A maximum of 15 units of language may be counted toward the 60 unit total required for the major.

**5. Research/Methodology Requirement**

Majors are required to complete 5 units of coursework focused on research methods relevant to their disciplinary approach as a student in Jewish Studies. Students select the methodology course(s) in consultation with their faculty adviser.

**6. Community Engagement Requirement**

All students in one of the CSRE majors are required to complete at least one service-learning experience. This requirement may be fulfilled by enrolling in a service-learning course, participating in a service-learning Alternative Spring Break, participating in the Community Summer Research Internship program, or enrolling in CSRE 198 – Public Service Internship while completing independent service work.

**7. Senior Paper or Honors Thesis**

All Jewish Studies majors complete a culminating research paper under the supervision of a faculty adviser. Honors students take CSRE 200X CSRE Senior Seminar, which fulfills the program's WIM requirement, and also enroll in CSRE 200Y CSRE Senior Honors Research and CSRE 200Z CSRE Senior Honors Research, in Winter and Spring quarters to continue to access peer and faculty support as they write their theses. Senior Honors Research (CSRE 200Y and CSRE 200Z) courses cannot count for the 60 units towards your major but do count for the 180 units towards your bachelor's degree. Students must complete their theses with a grade of 'B+' to receive honors in CSRE.

		Units

**2. Foundational Courses**

Majors are required to take one foundational course in Native American Studies. Students who completed NATIVEAM/ANTHRO 16 in a previous year may count this course toward their Foundational Course requirement.

Select one of the following:

		Units
NATIVEAM 138	American Indians in Comparative Historical Perspective	4
NATIVEAM 139	American Indians in Contemporary Society	4

**3. Area Study**

Majors complete an additional 40 units of course work that satisfy three categories in their area of study: Native American focus, comparative focus, and a methodology/research course.

**4. Language Study (optional)**

Students may obtain credit for their study of a related native language towards their degree. If students take 15 or more units of a native language relevant to Native American Studies, they may apply 5 of those units toward their Native American Studies degree.

**5. Research/Methodology Requirement**

Majors are required to complete 5 units of coursework focused on research methods relevant to their disciplinary approach as a student in Native American Studies. Students select the research and/or methodology course in consultation with their faculty adviser.

**6. Community Engagement Requirement**

All students in one of the CSRE majors are required to complete at least one service-learning experience. This requirement may be fulfilled by enrolling in a service-learning course, participating in a service-learning Alternative Spring Break, participating in the Community Summer Research Internship program, or enrolling in CSRE 198 – Public Service Internship while completing independent service work.

**7. Senior Paper or Honors Thesis**

All Native American Studies majors complete a culminating research paper under the supervision of a faculty adviser. Honors students take CSRE 200X CSRE Senior Seminar, which fulfills the program's WIM requirement, and also enroll in CSRE 200Y CSRE Senior Honors Research and CSRE 200Z CSRE Senior Honors Research, in Winter and Spring quarters to continue to access peer and faculty support

**Native American Studies**

Director: C. Matthew Snipp

Native American Studies (NAS) provides an intensive approach to understanding the historical and contemporary experiences of Native American people. Attention is paid not only to the special relationship between tribes and the federal government, but to issues across national boundaries, including tribal nations within Canada, and North, Central, and South America. In using the term Native American, the NAS faculty recognize the heterogeneous nature of this population. Native Americans include the Alaska Native population, which comprises Aleuts, Eskimo, and other Native American people residing in Alaska, as well as Native Hawaiian communities.

The purpose of the Native American Studies major and minor is to introduce students to approaches in the academic study of Native American people, history, and culture. Students who major in Native American Studies have the opportunity of doing advanced work in related fields, including literature, sociology, education, and law. In addition to specialized course work on Native American issues, students also are expected to concentrate in a traditional discipline such as anthropology, history, or psychology to ensure a well rounded educational experience. The area of concentration and related course work should be chosen in consultation with a faculty adviser in Native American Studies. All courses in the program promote the discussion of how academic knowledge about Native Americans relates to the historical and contemporary experiences of Native American people and communities.

**Bachelor of Arts in Native American Studies**

A total of 60 units of course work are required for the major.

**1. Core Curriculum**

Native American Studies majors must take the 15-unit CSRE core curriculum, including two core courses and a senior seminar taken in Autumn Quarter of the senior year. One foundational course that focuses on a non-Native American group may be counted toward the 15-unit core requirement.

as they write their theses. Senior Honors Research (CSRE 200Y and CSRE 200Z) courses cannot count for the 60 units towards your major but do count for the 180 units towards your bachelor's degree. Students must complete their theses with a grade of 'B+' to receive honors in CSRE.

## Thematic Concentration in American Diversity

The American Diversity concentration is designed for students who wish to explore how the United States was and is constituted with relation to issues of race and ethnicity. The concentration investigates how American domestic and foreign policy, law, history, culture, and society are formed within conversations, debates, policies and studies regarding race and ethnicity. Issues of immigration, citizenship, empire and expansion, defense, diplomacy, human rights, public welfare, social justice and law, educational rights and other topics are explored from the angle of how racial and ethnic difference impacts debate and policy.

The concentration is not declared on Axess; it does not appear on the transcript or diploma. Students interested in the American Diversity thematic concentration should contact the CSRE undergraduate program office.

The American Diversity concentration requires 15 units including two approved CSRE core courses and CSRE 200X CSRE Senior Seminar (WIM), taken Autumn Quarter of the senior year. One foundational course may be counted toward the 15 unit core requirement. In addition to the core curriculum, students complete a Research/Methodology requirement (5 units). The remaining 40 units of course work should be relevant to the thematic concentration and selected in consultation with the faculty adviser.

Students may find the following courses useful in fulfilling requirements in the American Diversity thematic concentration.

		Units
AFRICAAM 166	Introduction to African American History - the Modern Freedom Struggle	3-5
AMSTUD 183	Re- Imagining American Borders	5
CSRE 14N	Growing Up Bilingual	3
CSRE 45Q	Understanding Race and Ethnicity in American Society	4
CSRE 108	Introduction to Feminist, Gender, and Sexuality Studies	4-5
CSRE 125V	The Voting Rights Act	5
CSRE 127A	Can't Stop Won't Stop: A History Of The Hip-Hop Arts	4
CSRE 150	Race and Political Sociology	3
CSRE 164	Immigration and the Changing United States	4
CSRE 201B	From Racial Justice to Multiculturalism: Movement-based Arts Organizing in the Post Civil Rights Era	3
CSRE 203A	The Changing Face of America: Building Leaders for Civil Rights and Education	5

HISTORY 166B	Immigration Debates in America, Past and Present	3-5
POLISCI 120B	Campaigns, Voting, Media, and Elections	4-5
POLISCI 125V	The Voting Rights Act	5
POLISCI 327	Minority Behavior and Representation	5

SOC 135	Poverty, Inequality, and Social Policy in the United States	3
SOC 140	Introduction to Social Stratification	3
SOC 150	Race and Political Sociology	3
SOC 155	The Changing American Family	4
SOC 164	Immigration and the Changing United States	4

## Thematic Concentration in Education, Access, and Equity

The concentration in Education, Access, and Equity explores history, policy, and practice in education to understand how educational opportunity is shaped by issues of race, ethnicity, and difference. The goal of the concentration is to develop an understanding of the core issues facing educators and policy makers so that students may learn how they can contribute to the social and political discourse surrounding issues of education and opportunity policy in the U.S.

The concentration is not declared on Axess; it does not appear on the transcript or diploma. Students interested in the Education, Access, and Equity concentration should contact the CSRE undergraduate program office.

The Education, Access, and Equity concentration requires 15 units including two approved CSRE core courses and CSRE 200X CSRE Senior Seminar(WIM), taken Autumn Quarter of the senior year. One foundational course may be counted toward the 15 unit core requirement. In addition to the core curriculum, students complete a Research/Methodology requirement (5 units). The remaining 40 units of course work should be relevant to the thematic concentration and selected in consultation with the faculty adviser.

Students may find the following courses useful in fulfilling requirements in the Education, Access, and Equity thematic concentration.

		Units
AFRICAAM 112	Urban Education	3-4
AFRICAST 111	Education for All? The Global and Local in Public Policy Making in Africa	5
CSRE 11W	Service-Learning Workshop on Issues of Education Equity	1
CSRE 121X	Hip Hop, Youth Identities, and the Politics of Language	3-4
CSRE 126B	Curricular Public Policies for the Recognition of Afro-Brazilians and Indigenous Population	3-4
CSRE 203A	The Changing Face of America: Building Leaders for Civil Rights and Education	5
CSRE 216X	Education, Race, and Inequality in African American History, 1880-1990	3-5

LINGUIST 65	African American Vernacular English	3-5
SOC 132	Sociology of Education: The Social Organization of Schools	4

## Thematic Concentration in Identity, Diversity and Aesthetics (IDA)

Students in the Comparative Studies in Race and Ethnicity major can choose a concentration in Identity, Diversity and Aesthetics (IDA). The Identity, Diversity, and Aesthetics Concentration in Comparative Studies in Race & Ethnicity is a program designed to explore the intersections of culture, race, the arts, and social transformation. In IDA courses taught by Stanford faculty, lecturers, and distinguished Visiting Artists, students learn how the arts, activism, and the academy interact to produce aesthetic and societal change.

The concentration is not declared in Axess; it does not appear on the transcript or diploma. Students interested in IDA should contact the CSRE undergraduate program office.

The IDA concentration requires 15 units including two approved CSRE core courses and CSRE 200X CSRE Senior Seminar (WIM), taken Autumn Quarter of the senior year. One foundational course may be counted toward the 15 unit core requirement. CSRE majors are also required to take a course in research methods (5 units). In addition to the core curriculum, students complete 40 units of course work relevant to the thematic concentration. Thematic courses may focus on artistic practice and performance, art history, creative writing, community arts, art and social change, writing for performance, critical studies in art and performance, and critical arts theory.

Additionally, IDA concentration students must complete a creative senior project. Possible senior projects include a stage production, a set of recorded music, an anthology of creative writing, a curated or solo exhibition, or a community arts workshop. Students who elect to write an honors thesis may incorporate their project as the basis for their thesis.

Students may find the following courses useful in fulfilling requirements in the Identity, Diversity and Aesthetics (IDA) concentration.

		Units
AFRICAAM 18B	Jazz History: Bebop to Present, 1940-Present	3
AFRICAAM 36	REPRESENT! Covering Race, Culture, and Identity In The Arts through Writing, Media, and Transmedia.	5
AFRICAAM 45	Dance Improvisation Techniques and Strategies Lab: From Hip Hop to Contact	2
AFRICAAM 181Q	Alternative Viewpoints: Black Independent Film	4
AFRICAAM 188	Who We Be: Art, Images & Race in Post-Civil Rights America	2-4
CHILATST 179	Chicano & Chicana Theater: Politics In Performance	4
COMPLIT 290	Human Rights in a Global Frame: Race, Place, Redress, Resistance	3-5
CSRE 8	Conjure and Manifest: Building a Sustainable Artistic Practice	3
CSRE 15N	Imagining India: Art, Culture, Politics in Modern India	3
CSRE 51Q	Comparative Fictions of Ethnicity	4
CSRE 121X	Hip Hop, Youth Identities, and the Politics of Language	3-4

CSRE 122E	Art in the Streets: Identity in Murals, Site-specific works, and Interventions in Public Spaces	4
CSRE 123A	American Indians and the Cinema	5
CSRE 123B	Literature and Human Experimentation	3-5
CSRE 127A	Can't Stop Won't Stop: A History Of The Hip-Hop Arts	4
CSRE 129B	Literature and Global Health	3-5
CSRE 134	Museum Cultures: Material Representation in the Past and Present	3-5
CSRE 142	The Literature of the Americas	5
CSRE 145B	Africa in Atlantic Writing	3-5
CSRE 147L	Studies in Music, Media, and Popular Culture: Latin American Music and Globalization	3-4
CSRE 165C	Mexican American History through Film	5
CSRE 172	Out of Place: (W)riting Home	4
CSRE 177	Writing for Performance: The Fundamentals	4
CSRE 177B	Introduction to Dance on the Global Stage	4
CSRE 179C	Chroniclers of Desire: Creative Non-Fiction Writing Workshop	3-5
CSRE 179G	Indigenous Identity in Diaspora: People of Color Art Practice in North America	3-5
CSRE 201B	From Racial Justice to Multiculturalism: Movement-based Arts Organizing in the Post Civil Rights Era	3
DANCE 30	Chocolate Heads Movement Band Performance Workshop	2
DANCE 39	Intro/Beginning Contemporary Modern	1
DANCE 45	Dance Improvisation Techniques and Strategies Lab: From Hip Hop to Contact	2
DANCE 118	Developing Creativity In Dance	2
DANCE 141	Advanced Contemporary Modern Technique	2
DANCE 197	Dance in Prison: The Arts, Juvenile Justice, and Rehabilitation in America	4
ENGLISH 152G	Harlem Renaissance and Modernism	5
ILAC 193	The Cinema of Pedro Almodovar	3-5

NATIVEAM 134	Museum Cultures: Material Representation in the Past and Present	3-5
NATIVEAM 167	Performing Indigeneity on Global Stage	4
TAPS 156	Performing History: Race, Politics, and Staging the Plays of August Wilson	4

## Thematic Concentration in Intersectionality

The intersectionality concentration is designed for students who wish to explore the intersections between race and ethnicity and other social identities including gender, sexuality, class, and ability. This concentration investigates how notions of racial and ethnic identity are complicated by gender, sexuality and other categories. Students will examine the construction of power systems to better contextualize how certain identities become privileged over others. Drawing from contributions of women of color feminism and queer of color studies, this concentration challenges normative constructions of 'race' and 'ethnicity' by equipping students with analytical tools from feminist theory, queer theory, post-colonial theory, critical race theory, and other critical methods.

The concentration is not declared on Axess; it does not appear on the transcript or diploma. Students interested in Intersectionality thematic concentration should contact the CSRE undergraduate program office.

The Intersectionality concentration requires 15 units including two approved CSRE core courses and CSRE 200X CSRE Senior Seminar (WIM), taken Autumn Quarter of the senior year. One foundational course may be counted toward the 15 unit core requirement. In addition to the core curriculum, students complete a Research/Methodology requirement (5 units). The remaining 40 units of course work should be relevant to the thematic concentration and selected in consultation with the faculty adviser.

Students may find the following courses useful in fulfilling requirements in the Intersectionality thematic concentration.

		Units
AFRICAAM 54N	African American Women's Lives	3-4
AFRICAAM 121X	Hip Hop, Youth Identities, and the Politics of Language	3-4
AMSTUD 106	SPECTACULAR TRIALS: SEX, RACE AND VIOLENCE IN MODERN AMERICAN CULTURE	5
ARTHIST 176	Feminism and Contemporary Art	4
COMPLIT 110	Introduction to Comparative Queer Literary Studies	3-5
CSRE 28SI	What is Whiteness? Historical and Contemporary Definitions of White Racial Identity in the U.S.	1-2
CSRE 63N	The Feminist Critique: The History and Politics of Gender Equality	3-4
CSRE 108	Introduction to Feminist, Gender, and Sexuality Studies	4-5
CSRE 133B	Covering Islam: On What We Learn to See, Think and Hear about Islam & Muslims	3-5
CSRE 147L	Studies in Music, Media, and Popular Culture: Latin American Music and Globalization	3-4
CSRE 162	Women in Modern America	4-5
CSRE 168	New Citizenship: Grassroots Movements for Social Justice in the U.S.	5
CSRE 172	Out of Place: (W)riting Home	4
CSRE 179G	Indigenous Identity in Diaspora: People of Color Art Practice in North America	3-5
CSRE 183	Re- Imagining American Borders	5
CSRE 192E	Sexual Violence in America	4-5
CSRE 289E	Queer of Color Critique: Race, Sex, Gender in Cultural Representations	3-5
FEMGEN 103	Feminist Theories and Methods Across the Disciplines	2-5
FEMGEN 188Q	Imagining Women: Writers in Print and in Person	4-5
HISTORY 257C	LGBT/Queer Life in the United States	4-5
LINGUIST 156	Language and Gender	4
NATIVEAM 103S	Native American Women, Gender Roles, and Status	5
PHIL 153	Feminist Theories and Methods Across the Disciplines	2-5
TAPS 160N	Chican@/Latin@ Performance in the U.S.	4
TAPS 164T	Queer Art and Performance	4-5

## Thematic Concentration in Public Service

The Public Service thematic concentration is open to students in any major in the Comparative Studies in Race and Ethnicity Undergraduate Program. The concentration allows a student to develop an area of study focused on community development, public service, and social change. Studying how issues of race and ethnicity impact and are impacted by community and social problems, this concentration is designed to ensure that students interested in service and community have access to a structured curriculum that provides a solid grounding in the theory and practice of community and civic engagement in order to provide the skills

and experiences that enable students to become leaders and actors in the sphere of public life.

Students who wish to pursue a thematic concentration in public service must organize their studies to include 15 units, including two approved CSRE core courses and CSRE 200X CSRE Senior Seminar (WIM), taken Autumn Quarter of the senior year. One foundational course may be counted toward the 15 unit core requirement. In addition to the core curriculum, students complete a Research/Methodology requirement (5 units). Public Service concentration students should also prepare to complete 25 units (at least 5 courses) relevant to the theme of public service. Three of these courses should include a service learning component (i.e., require the student to participate in service in the local community as a central component to the course).

Students who select a thematic concentration in public service must complete an internship as part of their program of study. This internship can be completed during the academic year for credit or during the summer, but must be at least 300 hours.

Finally, students who pursue the concentration in public service should select a topic for their senior paper or honors thesis that reflects their interest in community work (i.e., service or organizing) or a community issue or concern that is addressed through public service.

This concentration is not declared on Axxess; it does not appear on the transcript or diploma. Students interested in this thematic concentration should contact the CSRE Undergraduate Program Office for details about its requirements.

Students may find the following courses useful in fulfilling requirements for the Public Service thematic concentration:

		Units
AFRICAAM 166	Introduction to African American History - the Modern Freedom Struggle	3-5
ANTHRO 169A	New Citizenship: Grassroots Movements for Social Justice in the U.S.	5
ASNAMST 112	Public Archaeology: Market Street Chinatown Archaeology Project	4-5
ASNAMST 144	Transforming Self and Systems: Crossing Borders of Race, Nation, Gender, Sexuality, and Class	5
ASNAMST 146S	Asian American Culture and Community	3-5
CHILATST 177A	Well-Being in Immigrant Children & Youth: A Service Learning Course	3
CHILATST 183X	Practicum in English-Spanish School & Community Interpreting	3-4

URBANST 122	Ethics and Politics of Public Service	5

## Thematic Concentration in Race and Health

The concentration in Race and Health is designed for students who are seeking an interdisciplinary exploration of health disparities, health access, and health policy. Through course work, students examine how health experiences are influenced by issues of race and ethnicity.

The concentration is not declared on Axxess; it does not appear on the transcript or diploma. Students interested in the Race and Health concentration should contact the CSRE undergraduate program office.

The Race and Health concentration requires 15 units including two approved CSRE core courses and CSRE 200X CSRE Senior Seminar (WIM), taken Autumn Quarter of the senior year. One foundational course may be counted toward the 15 unit core requirement. In addition to the core curriculum, students complete a Research/Methodology requirement (5 units). The remaining 40 units of course work should be relevant to the thematic concentration and selected in consultation with the faculty adviser.

Students may find the following courses useful in fulfilling requirements in the Race and Health thematic concentration.

		Units
ANTHRO 82	Medical Anthropology	4
ANTHRO 138	Medical Ethics in a Global World: Examining Race, Difference and Power in the Research Enterprise	5
ANTHRO 185A	Race and Biomedicine	3-5
CSRE 41A	Genes and Identity	3
CSRE 138	Medical Ethics in a Global World: Examining Race, Difference and Power in the Research Enterprise	5
EDUC 340	Psychology and American Indian Mental Health	3-5

NATIVEAM 240	Psychology and American Indian Mental Health	3-5
PEDS 150	Social and Environmental Determinants of Health	3
PEDS 222	Beyond Health Care: Seeking Health in Society	3
PEDS 250	Social and Environmental Determinants of Health	3
PSYCH 101	Community Health Psychology	4

## Thematic Concentration in Race and the American City

The Race and the American City concentration is designed for students who wish to develop methodologies, data, and theoretical and conceptual materials concerning how urban life, infrastructure, and policies are influenced by race and ethnicity. As virtual laboratories of social interaction, cities embody negotiations around resources, residences, financial districting, economic flow, health and educational resources, environmental policies, and city planning. A primary goal is for students to learn how they might contribute to the social and political discourse on race and ethnicity in the U.S. Participation in a public service internship and/or Stanford in Washington is encouraged.

The concentration is not declared on Axxess; it does not appear on the transcript or diploma. Students interested in the Race and the American City concentration should contact the CSRE undergraduate program office.

The Race and the American City concentration requires 15 units including two approved CSRE core courses and CSRE 200X CSRE Senior Seminar (WIM), taken Autumn Quarter of the senior year. One foundational course may be counted toward the 15 unit core requirement. In addition to the core curriculum, students complete a Research/Methodology requirement (5 units). The remaining 40 units of course work should be relevant to the thematic concentration and selected in consultation with the faculty adviser.

Students may find the following courses useful in fulfilling requirements in the Race and the American City thematic concentration.

		Units
CSRE 260	California's Minority-Majority Cities	4-5
PEDS 250	Social and Environmental Determinants of Health	3
SOC 135	Poverty, Inequality, and Social Policy in the United States	3
SOC 155	The Changing American Family	4
URBANST 112	The Urban Underclass	4
URBANST 114	Urban Culture in Global Perspective	5
URBANST 162	Managing Local Governments	4

## Asian American Studies Minor

A total of 30 units of approved course work is required for the minor. One CSRE core course and at least one foundational course are needed to fulfill the requirements for the minor. Proposals must be approved by the director.

Students in Asian American Studies may find the following courses useful in fulfilling course requirements in the major or minor.

### Core Courses

		Units
ANTHRO 32	Theories in Race and Ethnicity: A Comparative Perspective	5
CSRE 125V	The Voting Rights Act	5
CSRE 148	Comparative Ethnic Conflict	4

CSRE 184C	Zionism and the State of Israel	5
CSRE 196C	Introduction to Comparative Studies in Race and Ethnicity	5
CSRE 200X	CSRE Senior Seminar	5
CSRE 220	Public Policy Institute	3-5
CSRE 226	Race and Racism in American Politics	5
CSRE 245	Understanding Racial and Ethnic Identity Development	3-5
CSRE 246	Constructing Race and Religion in America	4-5
HISTORY 64	Racial and Ethnic Diversity in Modern America	4-5
HISTORY 184	Zionism and the State of Israel	5
JEWISHST 106	Reflection on the Other: The Jew and the Arab in Literature	3-5
JEWISHST 184	Zionism and the State of Israel	5
PSYCH 75	Introduction to Cultural Psychology	5

## Foundational Courses

Students who completed ASNAMST 159/HISTORY 159 or ENGLISH 43C/143C last year may count this toward their Foundational Course Requirement. These are not offered in 2012-13.

	Units
ASNAMST 146S Asian American Culture and Community	3-5

## Thematic Courses

	Units
ASNAMST 112 Public Archaeology: Market Street Chinatown Archaeology Project	4-5
ASNAMST 52D Asian American Human Development: Cultural Perspectives on Psychology, Education and Critical Issues	3
ASNAMST 185A Race and Biomedicine	3-5
ASNAMST 131 Trauma, healing, and empowerment in Asian America	3-5
ASNAMST 107 Asian American Leadership: Controversies, Dilemmas, and Decision-Making Strategies (adding new course for spring quarter)	3-5
ASNAMST 187 Geography, Time, and Trauma in Asian American Literature	5
ASNAMST 189 The Vietnamese Experience in America	3
ASNAMST 265 Writing Asian American History	5

## Chicana/o-Latina/o Studies Minor

A total of 30 units of approved course work is required for the minor. One CSRE core course and at least one foundational course are needed to fulfill the requirements for the minor. Proposals must be approved by the director.

Students in Chicana/o-Latina/o Studies may find the following courses useful in fulfilling course requirements in the major or minor.

### Core Courses

	Units
ANTHRO 32 Theories in Race and Ethnicity: A Comparative Perspective	5
CSRE 125V The Voting Rights Act	5
CSRE 148 Comparative Ethnic Conflict	4
CSRE 184C Zionism and the State of Israel	5
CSRE 196C Introduction to Comparative Studies in Race and Ethnicity	5

CSRE 200X	CSRE Senior Seminar	5
CSRE 220	Public Policy Institute	3-5
CSRE 226	Race and Racism in American Politics	5
CSRE 245	Understanding Racial and Ethnic Identity Development	3-5
CSRE 246	Constructing Race and Religion in America	4-5
HISTORY 64	Racial and Ethnic Diversity in Modern America	4-5
HISTORY 184	Zionism and the State of Israel	5
JEWISHST 106	Reflection on the Other: The Jew and the Arab in Literature	3-5
JEWISHST 184	Zionism and the State of Israel	5
PSYCH 75	Introduction to Cultural Psychology	5

## Foundational Courses

	Units
CHILATST 180E	5

## Thematic Courses

	Units
CHILATST 14N Growing Up Bilingual	3
CHILATST 125S Chicano/Latino Politics	5
CHILATST 179 Chicano & Chicana Theater: Politics In Performance	3-5
CHILATST 125S Chicano/Latino Politics	5
CHILATST 172 Theories of Citizenship and Sovereignty in a Transnational Context	4-5
CHILATST 164 Immigration and the Changing United States	4
CHILATST 177A Well-Being in Immigrant Children & Youth: A Service Learning Course	3
CHILATST 177B Well-Being in Immigrant Children & Youth: A Service Learning Course	1-3
CHILATST 177C Well-Being in Immigrant Children & Youth: A Service Learning Course	1-3
CHILATST 183X Practicum in English-Spanish School & Community Interpreting	3-4
CHILATST 200 Latin@ Literature	3-5
CHILATST 201B From Racial Justice to Multiculturalism: Movement-based Arts Organizing in the Post Civil Rights Era	5
CHILATST 201C Critical Concepts in Chican@ Literature	3-5
CHILATST 275B History of Modern Mexico	5

## Comparative Studies Minor

Students who wish to minor in Comparative Studies must complete a minimum of 30 units from the approved course list. Two core courses (or one core and one foundational course) are needed to fulfill the minor requirements.

Students in Comparative Studies may find the following courses useful in fulfilling course requirements in the major or minor.

### Core Courses

	Units
ANTHRO 32 Theories in Race and Ethnicity: A Comparative Perspective	5
CSRE 125V The Voting Rights Act	5
CSRE 148 Comparative Ethnic Conflict	4
CSRE 184C Zionism and the State of Israel	5
CSRE 196C Introduction to Comparative Studies in Race and Ethnicity	5

CSRE 200X	CSRE Senior Seminar	5
CSRE 220	Public Policy Institute	3-5
CSRE 226	Race and Racism in American Politics	5
CSRE 245	Understanding Racial and Ethnic Identity Development	3-5
CSRE 246	Constructing Race and Religion in America	4-5
HISTORY 64	Racial and Ethnic Diversity in Modern America	4-5
HISTORY 184	Zionism and the State of Israel	5
JEWISHST 106	Reflection on the Other: The Jew and the Arab in Literature	3-5
JEWISHST 184	Zionism and the State of Israel	5
PSYCH 75	Introduction to Cultural Psychology	5

## Foundational Courses

		Units
AFRICAAM 43	Introduction to English III: Introduction to African American Literature	5
AFRICAAM 105	Introduction to African and African American Studies	5
ASNAMST 146S	Asian American Culture and Community	3-5
CHILATST 171	Mexicans in the United States	5
JEWISHST 71	Jews and Christians: Conflict and Coexistence	3

CSRE 260	California's Minority-Majority Cities	4-5
CSRE 279C	Chroniclers of Desire: Creative Non-Fiction Writing Workshop	3-5
CSRE 279G	Indigenous Identity in Diaspora: People of Color Art Practice in North America	3-5
CSRE 289E	Queer of Color Critique: Race, Sex, Gender in Cultural Representations	3-5

## Jewish Studies Minor

Students who wish to minor in Jewish Studies must complete one CSRE core course, one Jewish Studies foundational course, at least one quarter of the Hebrew language or another approved Jewish language, and draw remaining courses from an approved list of Jewish Studies courses. A total of 30 units of approved course work is required for the Jewish Studies minor. Proposals must be approved by the director.

Students in Jewish Studies may find the following courses useful in fulfilling course requirements in the major or minor.

## Foundational Courses

		Units
JEWISHST 71	Jews and Christians: Conflict and Coexistence	3
JEWISHST 183	The Holocaust	4

## Thematic Courses

Students may take any JEWISHST courses in fulfillment of this requirements

		Units
JEWISHST 4N	A World History of Genocide	3-5
JEWISHST 5	Biblical Greek	3-5
JEWISHST 5B	Biblical Greek	3-5
JEWISHST 37Q	Zionism and the Novel	4
JEWISHST 101A	First-Year Hebrew, First Quarter	5
JEWISHST 102A	Second-Year Hebrew, First Quarter	4
JEWISHST 104	Hebrew Forum	2-4
JEWISHST 104A	First-Year Yiddish, First Quarter	4
JEWISHST 120	Sex and Gender in Judaism and Christianity	3
JEWISHST 127D	Readings in Talmudic Literature	1
JEWISHST 139	Rereading Judaism in Light of Feminism	4
JEWISHST 143	Literature and Society in Africa and the Caribbean	4
JEWISHST 144B	Poetic Thinking Across Media	4
JEWISHST 147A	The Hebrew Bible in Literature	3-5
JEWISHST 199B	Directed Reading in Yiddish, Second Quarter	1-5
JEWISHST 282	Circles of Hell: Poland in World War II	5
JEWISHST 286	Jews Among Muslims in Modern Times	4-5
JEWISHST 287S	Research Seminar in Middle East History	4-5
JEWISHST 291X	Knowing God: Learning Religion in Popular Culture	4
JEWISHST 299A	Directed Reading in Yiddish, First Quarter	1-5

## Native American Studies Minor

Students who wish to minor in Native American Studies must complete one CSRE core course and at least one foundational course in Native American Studies. Additional courses relevant to the area of concentration selected by the student in consultation with a faculty adviser must also be completed. A total of 30 units of approved course work is required for the minor. Proposals must be approved by the director.

Students in Native American Studies may find the following courses useful in fulfilling course requirements in the major or minor.

### Core Courses

		Units
ANTHRO 32	Theories in Race and Ethnicity: A Comparative Perspective	5
CSRE 125V	The Voting Rights Act	5
CSRE 148	Comparative Ethnic Conflict	4
CSRE 184C	Zionism and the State of Israel	5
CSRE 196C	Introduction to Comparative Studies in Race and Ethnicity	5
CSRE 200X	CSRE Senior Seminar	5
CSRE 220	Public Policy Institute	3-5
CSRE 226	Race and Racism in American Politics	5
CSRE 245	Understanding Racial and Ethnic Identity Development	3-5
CSRE 246	Constructing Race and Religion in America	4-5
HISTORY 64	Racial and Ethnic Diversity in Modern America	4-5
HISTORY 184	Zionism and the State of Israel	5
JEWISHST 106	Reflection on the Other: The Jew and the Arab in Literature	3-5
JEWISHST 184	Zionism and the State of Israel	5
PSYCH 75	Introduction to Cultural Psychology	5

## Foundational courses

Students who completed NATIVEAM/ANTHRO 16 may count this course toward their Foundational Course requirement. This course is not offered in 2012-13.

		Units
NATIVEAM 138	American Indians in Comparative Historical Perspective	4
NATIVEAM 139	American Indians in Contemporary Society	4

## Thematic courses

		Units
NATIVEAM 103S	Native American Women, Gender Roles, and Status	5
NATIVEAM 115	Introduction to Native American History	5
NATIVEAM 139	American Indians in Contemporary Society	5
NATIVEAM 143A	American Indian Mythology, Legend, and Lore	3-5
NATIVEAM 167	Performing Indigeneity on Global Stage	4
NATIVEAM 240	Psychology and American Indian Mental Health	3-5

Asian American Studies

*Director:* Jeanne Tsai (Psychology)

*Affiliated Faculty and Teaching Staff:* Gordon Chang (History), Hien Do (Asian American Studies) Kathryn Gin Lum (Religious Studies), Pamela Lee (Art and Art History), Jean Ma (Art and Art History), David Palumbo-Liu (Comparative Literature), Stephen Sano (Music), Stephen Sohn (English), Stephen Murphy-Shigematsu (Asian American Studies), Jeanne L. Tsai (Psychology), Linda Uyechi (Music), Barbara Voss (Anthropology), Christine Min Wotipka (Education), Sylvia Yanagisako (Anthropology)

## Chicana/o-Latina/o Studies

*Director:* Guadalupe Valdés (Education)

## Comparative Studies in Race and Ethnicity

*Director:* Tomás Jiménez (Sociology)

*Core Affiliated Faculty:*

- Anthropology: Duana Fullwiley, Angela Garcia, Barbara Voss, Sylvia Yanagisako
- Comparative Literature: David Palumbo-Liu, José David Saldívar, Alexander Key
- Drama: Jennifer Brody, Harry Elam, Cherrie Moraga
- English: Michele Elam, Paula Moya, Vaughn Raspberry, Ramón Saldívar
- History: Al Camarillo, James Campbell, Gordon Chang, Allyson Hobbs, Ana Minian,
- Iberian and Latin American Cultures: Lisa Surwillo, Hector Hoyos
- Linguistics: John Rickford
- Political Science: Gary Segura, Lauren Davenport
- Psychology: Jennifer Eberhardt, Hazel Markus, Jeanne Tsai
- Religious Studies: Kathryn Gin Lum, Charlotte Fonrobert
- Sociology: Corey Fields, Tomás Jiménez, Matthew Snipp, Aliya Saperstein

- Taube Center for Jewish Studies: Vered Shemtov
- Graduate School Education: H. Samy Alim, Anthony Antonio, Prudence Carter, Teresa LaFromboise, Guadalupe Valdes, Christine Min Wotipka, Ari Kelman
- School of Law: Richard Banks, Richard Ford
- Lecturers: Karen Biestman, Stephen Murphy-Shigematsu, Hilton Obenzinger, Laura Saldívar, James Steyer

*Affiliated Faculty and Teaching Staff:* David Abernethy (Political Science, emeritus), Arnetha Ball (Education), Lucius Barker (Political Science, emeritus), Donald Barr (Pediatrics), Bryan Brown (Education), Cheryl Brown (African and African American Studies), Martin Carnoy (Education), Clayborne Carson (History), Jeff Chang (Comparative Studies in Race and Ethnicity), Karen Cook (Sociology), Michele Dauber (Law), Linda Darling-Hammond (Education), Carolyn Duffey (American Studies), Jennifer Eberhardt (Psychology), Ala Ebtekar (Comparative Studies in Race and Ethnicity), Paulla Ebron (Anthropology), Penny Eckert (Linguistics), James Ferguson (Anthropology), Shelley Fisher Fishkin (English), James Fishkin (Communication), Estelle Freedman (History), Susana Gallardo (Chicana/o Studies), Gabriel Garcia (Medicine), Kathryn Gin Lum (Religious Studies), Leah Gordon (Education), David Grusky (Sociology), Sean Hanretta (History), Gina Hernandez-Clarke (Comparative Studies in Race and Ethnicity), Miyako Inoue (Anthropology), Shanto Iyengar (Communication), Tomás Jiménez (Sociology), Gavin Jones (English), Terry Karl (Political Science), Pamela Karlan (Law), Matthew Kohrman (Anthropology), Jan Krawitz (Art and Art History), Jon Krosnick (Communication), Teresa LaFromboise (Education), David Laitin (Political Science), Liisa Malkki (Anthropology), Hazel Markus (Psychology), Ruben Martínéz (Comparative Studies in Race and Ethnicity), Barbaro Martínez-Ruiz (Art and Art History), Douglas McAdam (Sociology), Jisha Menon (Theater and Performance Studies), Ana Minian (History), Elisabeth Mudimbe-Boyi (French and Italian), Thomas S. Mullaney (History), Stephen Murphy-Shigematsu (Asian American Studies), Hilton Obenzinger (American Studies), Susan Olzak (Sociology), Amado Padilla (Education), Arnold Rampersad (English), Vaughn Rasberry (English), Robert Reich (Political Science), Cecilia Ridgeway (Sociology), Richard Roberts (History), Aron Rodrigue (History), Michael Rosenfeld (Sociology), Joel Samoff (History), Debra Satz (Philosophy), Vered Shemtov (Division of Literatures, Cultures and Languages), C. Matthew Snipp (Sociology), Paul Sniderman (Political Science), Jayashiri Srikantiah (Law), Ewart Thomas (Psychology), Jeanne L. Tsai (Psychology), Linda Uyechi (Music), Gregory Walton (Psychology), Richard White (History), Jeremy Weinstein (Political Science), Michael Wilcox (Anthropology), Bryan Wolf (Art and Art History), Sylvia Yanagisako (Anthropology), Yvonne Yarbro-Bejarano (Iberian and Latin American Cultures), Steven Zipperstein (History)

*Teaching Fellows:* Annie Atura, Kody Manke

*Senior Seminar Coordinator:* Mark Gardiner

## Jewish Studies

*Director:* Charlotte Fonrobert (Religious Studies)

*Affiliated Faculty and Teaching Staff:* Zachary Baker (Stanford University Libraries), Joel Beinín (History), Jonathan Berger (Music), Arnold Eisen (Religious Studies, emeritus), Amir Eshel (German Studies), John Felstiner (English, emeritus), Shelley Fisher Fishkin (English), Charlotte Fonrobert (Religious Studies), Avner Greif (Economics), Katherine Jolluck (History), Ari Kelman (Education), Jon Levitow (Language Center), Mark Mancall (History, emeritus), Norman Naimark (History), Reviel Netz (Classics), Jack Rakove (History), Aron Rodrigue (History), Noah Rosenberg (Biology), Gabriella Safran (Slavic Languages and Literatures), Vered Karti Shemtov (Language Center, Comparative Literature), Lee Shulman (Education, emeritus), Peter Stansky (History, emeritus), Marie-Pierre Ulloa (French), Amir Weiner (History), Sam Wineburg (Education), Steven Zipperstein (History)

*Hebrew Instructional Staff:* Gallia Porat, Estee Greif

*Visiting Faculty:* Avi Tchamni (Music)

*Writer in Residence:* Maya Arad

## Native American Studies

*Director:* C. Matthew Snipp (Sociology)

*Affiliated Faculty and Teaching Staff:* JoEllen Anderson (Native American Studies), Jared Aldern (Native American Studies), Karen Biestman (Native American Studies), Kenneth Fields (English), Teresa LaFromboise (Education), Samantha Peralto (Language Center), Delphine Red Shirt Shaw (Native American Studies), C. Matthew Snipp (Sociology), Michael Wilcox (Anthropology)

## Asian American Studies

Students in Asian American Studies may find the following related courses useful in fulfilling course requirements in the major or minor.

		Units
COMPLIT 41Q	Ethnicity and Literature	5
EDUC 181	Multicultural Issues in Higher Education	4
EDUC 193F	Psychological Well-Being on Campus: Asian American Perspectives	1
ENGLISH 172	Modernity and the Vernacular in Indian Literature	5
HISTORY 166B	Immigration Debates in America, Past and Present	3-5
HISTORY 265	Writing Asian American History	5
MUSIC 17Q	Perspectives in North American Taiko	4
PSYCH 217	Topics and Methods Related to Culture and Emotion	1-3

## Chicana/o-Latina/o Studies

Students in Chicana/o-Latina/o Studies may find the following related courses useful in fulfilling course requirements in the major or minor.

		Units
EDUC 149	Theory and Issues in the Study of Bilingualism	3-5
EDUC 193B	Peer Counseling in the Chicano/Latino Community	1
EDUC 277	Education of Immigrant Students: Psychological Perspectives	4
HISTORY 165	Mexican American History through Film	5
HISTORY 166B	Immigration Debates in America, Past and Present	3-5
HISTORY 201	Introduction to Public History and Public Service	4-5
HISTORY 203E	Global Catholicism	5
ILAC 193	The Cinema of Pedro Almodovar	3-5
POLISCI 125V	The Voting Rights Act	5
POLISCI 327	Minority Behavior and Representation	5
RELIGST 203	Myth, Place, and Ritual in the Study of Religion	3-5
TAPS 160N	Chican@/Latin@ Performance in the U.S.	4

## Comparative Studies in Race and Ethnicity

Students in Comparative Studies in Race and Ethnicity may find the following related courses useful in fulfilling course requirements in the major or minor.

		Units
AFRICAAM 21	African American Vernacular English	3-5
AFRICAAM 43	Introduction to English III: Introduction to African American Literature	5
AFRICAAM 47	History of South Africa	3

AFRICAAM 54N	African American Women's Lives	3-4	EDUC 193B	Peer Counseling in the Chicano/Latino Community	1
AFRICAAM 64C	From Freedom to Freedom Now!: African American History, 1865-1965	3	EDUC 193C	Psychological Well-Being On Campus: Perspectives Of The Black Diaspora	1
AFRICAAM 105	Introduction to African and African American Studies	5	EDUC 193F	Psychological Well-Being on Campus: Asian American Perspectives	1
AFRICAAM 115	South African Encounters	1	EDUC 193N	Peer Counseling in the Native American Community	1
AFRICAAM 147	History of South Africa	5	EDUC 201	History of Education in the United States	3-5
AFRICAAM 152G	Harlem Renaissance and Modernism	5	EDUC 232	Culture, Learning, and Poverty	2-3
AFRICAAM 166	Introduction to African American History - the Modern Freedom Struggle	3-5	EDUC 340	Psychology and American Indian Mental Health	3-5
AFRICAAM 188	Who We Be: Art, Images & Race in Post-Civil Rights America	2-4	EDUC 367	Cultural Psychology	3-5
AFRICAAM 261E	Mixed Race Literature in the U.S. and South Africa	5	EDUC 381	Multicultural Issues in Higher Education	4
AFRICAAM 262D	African American Poetics	5	ENGLISH 15SC	A New Millennial Mix: The Art & Politics of the "Mixed Race Experience"	2
AFRICAST 119			ENGLISH 152G	Harlem Renaissance and Modernism	5
AFRICAST 211	Education for All? The Global and Local in Public Policy Making in Africa	5	ENGLISH 262C	African American Literature and the Retreat of Jim Crow	5
AFRICAST 212	AIDS, Literacy, and Land: Foreign Aid and Development in Africa	5	FEMGEN 140D	LGBT/Queer Life in the United States	4-5
AMSTUD 106	SPECTACULAR TRIALS: SEX, RACE AND VIOLENCE IN MODERN AMERICAN CULTURE	5	FEMGEN 154	Black Feminist Theory	5
AMSTUD 140	Stand Up Comedy and the "Great American Joke" Since 1945	5	FEMGEN 188Q	Imagining Women: Writers in Print and in Person	4-5
ANTHRO 22N	Ethnographies of North America: An Introduction to Cultural and Social Anthropology	3-4	HISTORY 48Q	South Africa: Contested Transitions	4
ANTHRO 30Q	The Big Shift	4	HISTORY 50B	19th Century America	3
ANTHRO 32	Theories in Race and Ethnicity: A Comparative Perspective	5	HISTORY 50C	The United States in the Twentieth Century	3
ANTHRO 82	Medical Anthropology	4	HISTORY 54N	African American Women's Lives	3-4
ANTHRO 102	Urban Ethnography	5	HISTORY 130A	In Sickness and In Health: Medicine and Society in the United States: 1800-Present	5
ANTHRO 106A	Gang Colors: The Racialization of Violence and the American City	5	HISTORY 150B	19th-Century America	5
ANTHRO 320A	Race, Ethnicity, and Language	3-4	HISTORY 150C	The United States in the Twentieth Century	5
ARTHIST 176	Feminism and Contemporary Art	4	HISTORY 158C	History of Higher Education in the U.S.	3-5
CHILATST 179	Chicano & Chicana Theater: Politics In Performance	4	HISTORY 201	Introduction to Public History and Public Service	4-5
CHILATST 183X	Practicum in English-Spanish School & Community Interpreting	3-4	HISTORY 203E	Global Catholicism	5
COMM 160	The Press and the Political Process	4-5	HISTORY 255	Martin Luther King, Jr.: The Social Gospel and the Struggle for Justice	5
COMPLIT 41Q	Ethnicity and Literature	5	HISTORY 255E	Education, Race, and Inequality in African American History, 1880-1990	3-5
COMPLIT 110	Introduction to Comparative Queer Literary Studies	3-5	HISTORY 257C	LGBT/Queer Life in the United States	4-5
COMPLIT 290	Human Rights in a Global Frame: Race, Place, Redress, Resistance	3-5	HISTORY 259A	Poverty and Homelessness in America	4-5
CSRE 108	Introduction to Feminist, Gender, and Sexuality Studies	4-5	HISTORY 261	Race, Gender, and Class in Jim Crow America	5
DANCE 30	Chocolate Heads Movement Band Performance Workshop	2	HRP 212	Cross Cultural Medicine	3
DANCE 45	Dance Improvisation Techniques and Strategies Lab: From Hip Hop to Contact	2	HUMBIO 120	Health Care in America: An Introduction to U.S. Health Policy	4
DANCE 197	Dance in Prison: The Arts, Juvenile Justice, and Rehabilitation in America	4	HUMBIO 121E	Ethnicity and Medicine	1-3
EDUC 100A	EAST House Seminar: Current Issues and Debates in Education	1	HUMBIO 122S	Social Class, Race, Ethnicity, and Health	4
EDUC 100B	EAST House Seminar: Current Issues and Debates in Education	1	HUMBIO 129	Critical Issues in International Women's Health	4
EDUC 103B	Race, Ethnicity, and Linguistic Diversity in Classrooms: Sociocultural Theory and Practices	3-5	ILAC 193	The Cinema of Pedro Almodovar	3-5
EDUC 149	Theory and Issues in the Study of Bilingualism	3-5	JEWISHST 183	The Holocaust	4
EDUC 165	History of Higher Education in the U.S.	3-5	JEWISHST 185B	Jews in the Contemporary World: Faith and Ethnicity, Vulnerability and Visibility	5
EDUC 178	Latino Families, Languages, and Schools	3-5	LINGUIST 65	African American Vernacular English	3-5
			LINGUIST 150	Language in Society	2-4
			LINGUIST 156	Language and Gender	4
			MED 159A	Service-Learning in Migrant Health	2
			MED 159B	Service-Learning in Migrant Health	2
			MUSIC 17Q	Perspectives in North American Taiko	4
			PEDS 150	Social and Environmental Determinants of Health	3
			PHIL 153	Feminist Theories and Methods Across the Disciplines	2-5
			POLISCI 28N	The Changing Nature of Racial Identity in American Politics	3

POLISCI 120B	Campaigns, Voting, Media, and Elections	4-5
POLISCI 121L	Racial-Ethnic Politics in US	5
POLISCI 327	Minority Behavior and Representation	5
PSYCH 25N	Psychology, Inequality, and the American Dream	3
PSYCH 27N	The Psychology of Prejudice	3
PSYCH 29N	Growing Up in America	3
PSYCH 75	Introduction to Cultural Psychology	5
PSYCH 101	Community Health Psychology	4
PSYCH 150	Race and Crime	3
PSYCH 183	SPARQshop: Social Psychological Answers to Real-world Questions	2
PSYCH 215	Mind, Culture, and Society	3
PSYCH 217	Topics and Methods Related to Culture and Emotion	1-3
PSYCH 245	Social Psychological Perspectives on Stereotyping and Prejudice	3
RELIGST 188A	Issues in Liberation: Central America	5
SOC 46N	Race, Ethnic, and National Identities: Imagined Communities	3
SOC 118	Social Movements and Collective Action	4
SOC 119	Understanding Large-Scale Societal Change: The Case of the 1960s	5
SOC 120	Interpersonal Relations	4
SOC 132	Sociology of Education: The Social Organization of Schools	4
SOC 133	Law and Wikinomics: The Economic and Social Organization of the Legal Profession	1-5
SOC 135	Poverty, Inequality, and Social Policy in the United States	3
SOC 136	Sociology of Law	4
SOC 140	Introduction to Social Stratification	3
SOC 141	Controversies about Inequality	5
SOC 142	Sociology of Gender	5
SOC 145	Race and Ethnic Relations in the USA	4
SOC 155	The Changing American Family	4
TAPS 156	Performing History: Race, Politics, and Staging the Plays of August Wilson	4

URBANST 114	Urban Culture in Global Perspective	5
URBANST 123B	Approaching Research in the Community: Design and Methods	3
URBANST 140	Urban Ethnography	5

## Native American Studies

Students in Native American Studies may find the following related courses useful in fulfilling course requirements in the major or minor.

		Units
ANTHRO 162	Indigenous Peoples and Environmental Problems	3-5
EDUC 193N	Peer Counseling in the Native American Community	1
RELIGST 203	Myth, Place, and Ritual in the Study of Religion	3-5
RELIGST 303	Myth, Place, and Ritual in the Study of Religion	3-5
SPECLANG 189A	First-Year Hawaiian, First Quarter	4
SPECLANG 189B	First-Year Beginning Hawaiian, Second Quarter	4
SPECLANG 189C	First-Year Hawaiian, Third Quarter	4
SPECLANG 247A	First-Year Lakota, First Quarter	4

SPECLANG 247B	First-Year Lakota, Second Quarter	4
SPECLANG 247C	First-Year Lakota, Third Quarter	4
SPECLANG 248	Introduction to Siouan Language & Culture II	5

## Overseas Studies Courses in Comparative Studies in Race and Ethnicity

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPCPTWN 18	Xhosa Language and Culture	2
OSPCPTWN 33	Southern Africa: from Liberation Struggles to Region-Building	4
OSPCPTWN 38	Genocide: African Experiences in Comparative Perspective	3-5
OSPMADRD 62	Spanish California: Historical Issues	4
OSPMADRD 74	Islam in Spain and Europe: 1300 Years of Contact	4
OSPMADRD 75	Sefarad: The Jewish Community in Spain	4

## Division of Literatures, Cultures, and Languages

Courses offered by the Division of Literatures, Cultures, and Languages are listed under the subject code DLCL on the Stanford Bulletin's ExploreCourses web site.

The Division of Literatures, Cultures, and Languages consists of five academic departments (Comparative Literature (p. 394), French and Italian (p. 465), German Studies (p. 481), Iberian and Latin American Cultures (p. 508), and Slavic Languages and Literatures (p. 628)), five focal groups (Digital Humanities, Humanities Education, Philosophy and Literature, Poetics, and Renaissances) as well as the Language Center (p. 537), which oversees language instruction at Stanford.

All the departments of the division offer academic programs leading to B.A., M.A., and Ph.D. degrees.

The division brings together scholars and teachers dedicated to the study of literatures, cultures, and languages from humanistic and interdisciplinary perspectives. The departments in the division are distinguished by the quality and versatility of their faculty, a wide variety of approaches to cultural traditions and expressions, and the intense focus on the mastery of languages. This wealth of academic resources, together with small classes and the emphasis on individual advising, creates a superior opportunity for students who wish to be introduced to or develop a deeper understanding of non-English speaking cultures.

The division's departments and the Language Center offer instruction at all levels, including introductory and general courses that do not require knowledge of a language other than English. These courses satisfy a variety of undergraduate requirements and can serve as a basis for developing a minor or a major program in the member departments. The more advanced and specialized courses requiring skills in a particular

language are listed under the relevant departments, as are descriptions of the minor and major programs.

The DLCL itself offers four undergraduate minor programs, one Ph.D. minor program, and several graduate courses focused on the teaching of second languages, the teaching of literature, and academic professionalization.

## Focal Groups

While the five departments in the Division of Literatures, Cultures, and Languages serve common interests in literary and cultural traditions and their languages, the DLCL's Focal Groups bring together faculty members and graduate students who share topics and approaches that range across languages and national literatures. These groups are designed to respond directly to the research interests of the faculty as a community, and reflect long-term commitments by the participants. They are conceived as portals that open from the Division outward to the wider community of literary and humanities scholars at Stanford. The membership may include any member of the Stanford faculty or any Ph.D. student with an interest in the topic. Most Focal Groups include participants from several humanities departments outside the DLCL.

Thus the DLCL is characterized by two axes of intellectual inquiry:

- the departmental axis, which is organized by language, nation, and culture
- the focal axis, which may be organized by genre, period, methodology, or other criteria.

The convergence of the two axes, departments and Focal Groups, locates faculty members and graduate students in at least two intersecting communities. The DLCL believes that this convergence gives institutional form to the intellectual conditions under which many scholars of literature and culture presently work.

Each Focal Group maintains a standing research workshop at which both faculty and graduate student members discuss their work. Several Focal Groups offer formal courses; and all groups are responsible for overseeing research-oriented activities and extracurricular events in the relevant area, including sponsoring conferences, publications, podcasts, and other activities that disseminate the outcomes of their research.

## Digital Humanities

Chairs: Amir Eshel (Comparative Literature, German Studies) Mike Widner (Academic Technology Specialist)

Faculty Members: Cécile Alduy (French and Italian), John Bender (Comparative Literature, English), Russell Berman (Comparative Literature, German Studies), Dan Edelstein (French and Italian), Amir Eshel (Comparative Literature, German Studies), Roland Greene (Comparative Literature, English), Alexander Key (Comparative Literature), Marília Librandi-Rocha (Iberian and Latin American Cultures), David Palumbo-Liu (Comparative Literature), Kathryn Starkey (German Studies)

The Digital Humanities Focal Group (DHFG) promotes faculty and graduate research in the digital humanities through lectures series, praxis workshops, curriculum, and the identification and development of digital humanities research projects, especially those eligible for grant-funding opportunities. DHFG sponsors a lecture series and convenes regular workshops alternating between praxis and theory. These activities provide fora in which faculty and graduate students can share work in progress, discuss the state of the field, and identify important research that should be shared with the DLCL and broader academic communities. Crucially, the DHFG promotes digital research on underrepresented literatures and cultures to counteract the English-language dominance of much work in the field.

The DHFG also establishes strategic partnerships with similar endeavors at Stanford such as the Center for Spatial and Textual Analysis (<http://cesta.stanford.edu>), the Literary Lab (<http://litlab.stanford.edu>), HCI (<http://hci.stanford.edu>), etc. and with the larger academic community through organizations like the Association for Computers and the Humanities (<http://ach.org>), the Praxis Network (<http://praxis-network.org>), and HASTAC (<http://www.hastac.org>).

## Humanities Education

Chair: Russell A. Berman (Comparative Literature, German Studies)

Faculty Members: Cécile Alduy (French and Italian), Elizabeth Bernhardt (German Studies, Language Center), Eamonn Callan (School of Education), Adrian Daub (German Studies), Thomas Ehrlich (School of Education), Marisa Galvez (French and Italian), Pam Grossman (School of Education), David Lummus (French and Italian), Orrin Robinson (German Studies), Gabriella Safran (Slavic Languages and Literatures), Kathryn Starkey (German Studies), Mitchell Stevens (School of Education), Guadalupe Valdés (School of Education)

Web Site: <http://dlcl.stanford.edu/groups/humanities-education>

The Focal Group on Humanities Education explores issues concerning teaching and learning in the humanities, including research on student learning, innovation in pedagogy, the role of new technologies in humanities instruction, and professional issues for humanities teachers at all educational levels.

## Philosophy and Literature

Chairs: R. Lanier Anderson (Philosophy), Joshua Landy (French and Italian)

Faculty Members: Keith Baker (History), John Bender (Comparative Literature, English), Russell Berman (Comparative Literature, German Studies), Alexis Burgess (Philosophy), Martín Dornbach (German Studies), Jean-Pierre Dupuy (French and Italian), Amir Eshel (Comparative Literature, German Studies), Gregory Freidin (Slavic Languages and Literatures), Robert Harrison (French and Italian), David Hills (Philosophy), Héctor Hoyos (Iberian and Latin American Cultures), Michelle Karnes (English), Alexander Key (Comparative Literature), Sianne Ngai (English), Marília Librandi Rocha (Iberian and Latin American Cultures), Joan Ramon Resina (Iberian and Latin American Cultures, Comparative Literature), Nariman Skakov (Slavic Languages and Literatures), Blakey Vermeule (English), Laura Wittman (French and Italian), Lee Yearley (Religious Studies)

Web Site: <http://philit.stanford.edu>

The Focal Group on Philosophy and Literature brings together faculty and students from nine departments to investigate questions in aesthetics and literary theory, philosophically-inflected literary texts, and the form of philosophical writings. Fields of interest include both continental and analytic philosophy, as well as cognitive science, political philosophy, rational choice theory, and related fields. The group offers undergraduate tracks within eight majors, a graduate workshop, and a lecture series.

## Workshop in Poetics

Chairs: Roland Greene (Comparative Literature, English), Nicholas Jenkins (English)

Faculty Members: Marisa Galvez (French and Italian), Alexander Key (Comparative Literature), David Lummus (French and Italian), Michael Predmore (Iberian and Latin American Cultures)

Web Site: <http://dlcl.stanford.edu/groups/workshop-poetics>

The Workshop in Poetics Focal Group is concerned with the theoretical and practical dimensions of the reading and criticism of poetry. During

the four years of its existence, the Workshop has become a central venue at Stanford enabling participants to share their individual projects in a general conversation outside of disciplinary and national confinements. The two dimensions that the workshop sees as urgent are:

- poetics in its specificity as an arena for theory and interpretive practice.
- historical poetics as a particular set of challenges for the reader and scholar.

The core mission is to offer Stanford graduate students a space to develop and critique their current projects.

## Renaissances

Chair: Roland Greene (Comparative Literature, English)

Faculty Members: Cécile Alduy (French and Italian), Shahzad Bashir (Religious Studies), Paula Findlen (History), Tamar Herzog (History), Nicholas Jenkins (English), Alexander Key (Comparative Literature), David Lummus (French and Italian), Bissera Pentcheva (Art and Art History), Morten Steen Hansen (Art and Art History).

Web Site: <http://dlcl.stanford.edu/groups/renaissances>

The Renaissances Group brings together faculty members and students from over a dozen departments at Stanford to consider the present and future of early modern literary studies (a period spanning the fourteenth through the seventeenth centuries). Taking seriously the plural form of the group's name, we seek to explore the early modern period from a wide range of disciplinary, cultural, linguistic, and geographical perspectives.

## Minor in Medieval Studies

Faculty Director: Kathryn Starkey

The Division of Literatures, Cultures, and Languages offers an undergraduate minor in Medieval Studies. The minor in Medieval Studies:

- provides Stanford students with the historical knowledge and framework, through which to view globalism;
- embeds the study of medieval culture in a coherent framework that resonates with contemporary issues of community building, the virtual world and mobility;
- and promotes an innovative crossdisciplinary and skill-based approach to Medieval Studies.

Students in any field qualify for the minor by meeting the following requirements:

Students complete a total of 25 units (including a core course) in courses relevant to the major in departments across the University including, but not restricted to, English, East Asian Studies, History, Religious Studies, Music, and DLCL courses (Comparative Literature, German, French, Italian, Iberian and Latin American Cultures, and Slavic Languages and Literatures), and Classics.

One of the following three introductory core courses is required to be taken for 5 units. Students engage creatively with the Middle Ages and produce projects that will be collected in a database and shared with the Stanford community. The core courses are offered on a regular basis by faculty across the University.

		Units
DLCL 122	The Digital Middle Ages	3-5
FRENCH 205	Songs of Love and War: Gender, Crusade, Politics (counts for DLCL 121)	3-5
DLCL 123	Medieval Journeys: Tales of Devotion and Discovery	3-5

Electives may be selected from a large number of offerings in a variety of disciplines according to student interests, but they must follow a coherent course of study. This course of study must be approved by the faculty director. Up to 5 units may be taken in a medieval language, such as (but not limited to) Old English, Old Norse, Medieval Latin, Old French, Middle High German, Classical Arabic. No transfer credit may be used toward the Medieval Studies minor. Appropriate courses offered through BOSP may count toward this minor.

Course work in this minor may not duplicate work counted toward other majors or minors. Advanced placement credit and transfer credit do not apply to this minor. All courses must be taken for a letter grade. By University policy, no more than 36 units may be required in this minor. Students declare the Minor in Medieval Studies through Axess.

## Minor in Modern Languages

The Division of Literatures, Cultures, and Languages offers an undergraduate minor that draws upon courses in literature and language within the division's departments and elsewhere in the University. The minor in Modern Languages is offered to students who want to supplement the course work in their major with course work in modern languages and literatures. The minor must be approved by the chairs of undergraduate studies of the respective language departments.

Students in any field qualify for the minor by meeting the following requirements:

	Units
A minimum of 16 units (8 units per language) at the intermediate level (second year) or beyond, not including conversational, oral communication, business, or medical language courses in two languages other than English offered by the DLCL.	16
At least one additional course, at the 100 level or above, in each modern language being studied in the minor. These courses must be taught by DLCL Academic Council members or other senior members of the DLCL faculty.	6-10

Students are recommended to study, work, or intern abroad for at least eight weeks at a location where one of the languages is spoken. Course work in this minor may not duplicate work counted toward other majors or minors. Advanced Placement credit and transfer credit do not apply to this minor. All courses must be taken for a letter grade. By University policy, no more than 36 units may be required in this minor. Students declare the minor in Modern Languages through Axess.

For further information including procedures for declaring the minor, contact Denise Winters at [denisew1@stanford.edu](mailto:denisew1@stanford.edu).

## Minor in Translation Studies

Faculty Director: Indra Levy

Minor Adviser: Cintia Santana ([csantana@stanford.edu](mailto:csantana@stanford.edu))

The Division of Literatures, Cultures, and Languages, in cooperation with East Asian Languages and Cultures and the English Department, teaches undergraduates to develop and apply their foreign language knowledge to the production and analysis of translations. The minor is designed to give students majoring in a variety of fields the tools to consider the practical and theoretical issues brought up by translation as an aesthetic, cultural, and ethical practice.

Course work in this minor may not duplicate work counted toward other majors or minors. Course selection must be approved by the minor adviser. For further information, contact the minor adviser, Cintia Santana ([csantana@stanford.edu](mailto:csantana@stanford.edu)).

Students must take a minimum of 23 units for a letter grade, in fulfillment of the following requirements:

	Units
1. Prerequisite: Complete or test out of a first-year course in the language of interest.	
2. Core course: At least 4 units in a Translation Studies core course: ENGLISH/DLCL 293 or JAPANGEN 122/KORGEN 122 *	4
3. Language study: At least 8 units, second year or beyond (not including conversation/oral communication) and/or relevant literature courses taught in the target language. OSP and transfer units may be considered in consultation with the minor adviser.	8
4. Literature study: At least 7 units in relevant literature courses at the 100-level or above, taught in a DLCL department, East Asian Languages and Cultures, or Classics, and determined in consultation with the minor adviser. For students interested in translation from English into another language, appropriate literature courses in the English department may be substituted.	7
5. Electives: At least 4 units in a creative writing course, or a course that foregrounds translation in departments such as Anthropology, any DLCL department, English, East Asian Languages and Cultures, Classics, Linguistics (e.g., LINGUIST 130A), or Computer Science (e.g., CS 124), determined in consultation with the minor adviser.	4
6. Final Project: Students must also complete a capstone project: a significant translation and/or translation studies project (e.g. 20 pages of prose, 10 poems, or similar appropriate amount to be determined in consultation with the minor adviser). This work may be carried out under the supervision of an instructor in a required course or as an independent study.	
<b>Total Units</b>	<b>23</b>

\* Core course JAPANGEN 121 will be offered in 2016-17.

## Minor in Middle Eastern Languages, Literatures, and Cultures

*Faculty Director:* Alexander Key (akey@stanford.edu)

The undergraduate minor in Middle Eastern Languages, Literatures, and Cultures (MELLAC) has been designed to give students majoring in other departments an opportunity to gain a substantial introduction to Arabic, Hebrew, Middle Eastern, and African languages, and the cultures and civilizations of the Middle East and Africa. Contact the faculty director, Alexander Key <akey@stanford.edu> before declaring the minor:

- Courses for the minor must be taken for a letter grade unless only offered for faculty-elected satisfactory/no credit.
- All courses must be completed with a letter grade of 'C' or better.
- Students may not overlap (double-count) courses for completing major and minor requirements
- Students declaring the minor must do so no later than the last day of Spring Quarter of their junior year.

The minor in Middle Eastern Languages, Literatures and Cultures (MELLAC) has two tracks. Their requirements are as follows.

### Minor in Middle Eastern Languages, Literatures, and Cultures, Arabic Track

Requirements for the minor include:

- Completion of four ARABLANG courses at the second-year level or higher, for a total of 20 units
- Up to 5 units of transfer credit may count towards this minor with the Faculty Director's approval.

- Two literature courses taught with Arabic texts, generally offered in Comparative Literature (COMPLIT) for a total of 6-10 units
- One course relating to Arabic taught with English texts, generally offered in Comparative Literature (COMPLIT), for a total of 3-5 units.
- Students must test for Proficiency in Arabic through the Language Center by Winter Quarter of the senior year.
  - Students should minimally receive a notation of 'intermediate-High'.
  - Those requiring outside tutoring are advised to seek resources are available through the DLCL.
- All courses must be approved by the faculty director.

### Minor in Middle Eastern Languages, Literatures, and Cultures, Hebrew, Persian, Turkish, or African Languages, Literatures and Cultures Track

Requirements for the minor include:

- Three language classes in Hebrew, Persian, Turkish, or an African language.
  - All three courses must be in the same language and first year or beyond.
- 20 additional units from relevant literature and culture courses.
  - Courses are offered through the Language Center and DLCL departments.
  - One of these courses must be a (COMPLIT) Comparative Literature course.
  - Additional courses are offered through Jewish Studies (JEWISHST), and the Center for African Studies (AFRICAST).
- The faculty director may approve some upper-level language classes to count towards the 20 additional units.
- All courses must be approved by the faculty director.

## Ph.D. Minor in the Humanities

*Faculty Director:* Matthew W. Smith

*Faculty Director, Philosophy, Literature, and the Arts Subplan:* R. Lanier Anderson, Philosophy

*Director of Graduate Studies, Philosophy, Literature, and the Arts Subplan:* Adrian Daub, German Studies

### Overview

The Ph.D. Minor in the Humanities provides interdisciplinary training in the humanities through programs in two tracks:

- a general Ph.D. Minor in the Humanities
- a Ph.D. minor with a subplan in philosophy, literature, and the arts

The general minor prepares students for interdisciplinary humanities research and teaching by providing broad training in cultural history, focused around five period seminars (ancient, medieval, early-modern, enlightenment, and modern).

The track in Philosophy, Literature, and the Arts prepares students for focused interdisciplinary work at the boundary between philosophy and literary/arts criticism; the program offers structured, disciplined training in the student's minor field together with in-depth investigation of special topics arising from connections across the two domains of research.

### Application and Admission

Students declare the minor after admission to candidacy and before attaining TGR status by submitting:

- an Application for Ph.D. Minor ([http://studentaffairs.stanford.edu/sites/default/files/registrar/files/app\\_phd\\_minor.pdf](http://studentaffairs.stanford.edu/sites/default/files/registrar/files/app_phd_minor.pdf)) form
- a one-page statement of intent
- students pursuing the philosophy, literature, and the arts track should indicate this on the form.

## Requirements

- Students in the general minor must meet with the faculty director every Spring Quarter to review progress.
- Students in the philosophy, literature, and the arts subplan must meet annually with the subplan director of graduate studies (DGS) or with the minor adviser designated by the DGS who reports the results of the meeting to the DGS.
- Fulfillment of all program requirements must be completed before the student attains TGR status. The minor and subplan, if declared, are published on the transcript.
- All students in the minor from both tracks participate in the Autumn Quarter Interdisciplinary Humanities Symposium; the symposium features student presentations of their independent work on the role of the interdisciplinary humanities scholar/teacher in the changing university.
- Per University requirements, all course work taken toward the Ph.D. minor must be completed at Stanford; no transfer units from other institutions may be counted toward the Ph.D. minor.
- To be awarded the Ph.D. Minor in the Humanities, students must have satisfied all requirements of the admitting department for their Ph.D. degree, and they must complete a minimum of 20 unduplicated units of graduate-level course work as described below.

*Note 1:* Mastery of one or more foreign language(s) may be needed to support the interdisciplinary work of the minor. Although the minor itself has no foreign language requirement, students should work closely with their minor adviser to identify any needed language skills; students are advised to begin developing these skills early in their graduate careers.

*Note 2:* Although official declaration of the minor must occur after a student advances to candidacy, students are advised to begin planning a course of study and taking courses toward the minor earlier, particularly if the candidacy decision occurs at the end of the second year or later, so that they have ample time to complete the requirements before turning TGR.

### Requirements for the General Ph.D. Minor in the Humanities

Students complete preparatory work for the symposium plus three interdisciplinary seminars from the set covering five historical periods: antiquity, medieval, early-modern, enlightenment, and modern.

		Units
DLCL 220	Humanities Education (or DLCL 222, or other independent work in preparation for the Interdisciplinary Humanities symposium)	1
Complete three of the five core seminars		
DLCL 321	Classical Seminar: Rethinking Classics	4-5
DLCL 322	Medieval Seminar	3-5
DLCL 323	Early Modern Seminar	3-5
DLCL 324	The Enlightenment	3-5
DLCL 325	Modern Seminar (for AY 14-15 COMPLIT 321A satisfies for DLCL 325)	3-5

Take one additional graduate course (numbered 200 or above) on one of these periods (usually corresponding to the student's area of specialization) in a department other than the student's home department.

If the required courses for the minor do not total 20 units, students may satisfy the 20 unit requirement by taking units of DLCL 220: Humanities Education, or else by taking additional period seminars at their discretion.

### Requirements for the Ph.D. Minor in the Humanities, Philosophy, Literature, and the Arts Subplan

The Philosophy, Literature, and the Arts Subplan of the Ph.D. Minor in the Humanities offers rigorous, structured training for students interested in the interdisciplinary intersection of philosophy with criticism in literature and the arts.

All students in the Ph.D. Minor in the Humanities, Philosophy, Literature, and the Arts Subplan take:

1. PHIL 333/DLCL 333 Philosophy, Literature, and the Arts Core Seminar, team taught by faculty from philosophy and from a literature or arts department.
2. At least three units of independent work registered either under a departmental independent work number, or under DLCL 220 Humanities Education or DLCL 222 Philosophy and Literature. This work should be undertaken with a faculty adviser identified to the subplan DGS; it should lead up to the student's participation in the Autumn Quarter Interdisciplinary Humanities Symposium, and should concern interdisciplinary humanities research and teaching.
3. Two additional courses at the 200 level or above which are deemed by the subplan Committee in Charge to include material of substantial special relevance to the domain of philosophy, literature, and the arts. At least one of these courses should be offered in a participating department other than the student's major department (e.g., a philosophy course for students in literature and arts departments, a literature or arts course for philosophy students).
4. All students in the subplan take two graduate-level courses providing a structured program of course work in the student's minor field (such as philosophy for literature and arts students, or literary or arts criticism for philosophy students):
  - Graduate students in Philosophy take two graduate-level courses in a single literature, or in one of the arts.
  - Graduate students in literature or arts departments, including Classics, take two graduate-level courses in Philosophy, at least one of which must be in metaphysics, epistemology, or the philosophies of language, mind, or action (the PHIL 280s series and related upper-level seminars), and at least one of which must be in value theory (understood to include ethics, aesthetics, and political philosophy, the PHIL 270s series and related upper-level seminars)
  - Graduate students in other departments submit a plan of study for approval by the DGS reflecting graduate-level course work that provides a background both within philosophy and within the study of literature or the arts that is substantially equivalent to that achieved by philosophy, literature, or arts students in their minor field. Students are advised that this plan of study may involve more course work than would be needed for students whose major field is in literature, arts, or philosophy departments.
5. If the six required courses do not total 20 units, students may satisfy the 20 unit requirement by taking units of DLCL 222 Philosophy and Literature or by taking additional graduate level courses of special relevance at their discretion and with the agreement of their minor adviser.

### Notes:

- Students are encouraged to include a member from the minor field on the University Oral Committee or on another of the general examination committees if that is judged more appropriate by the student's departmental and minor advisers. Students in departments which deploy the University Oral as a dissertation defense are advised that a member from the student's minor field should be

involved on the dissertation committee throughout the dissertation writing period.

- Students are encouraged to develop crossdisciplinary breadth through course work for the minor, particularly through the courses of special relevance in section 3 above. The period seminars of the General Ph.D. Minor in the Humanities (DLCL 321, DLCL 322, DLCL 323, DLCL 324, and DLCL 325) are often eligible to count as courses of special relevance.
- Courses of special relevance taken to fulfill requirement 3 that are owned or crosslisted by the student's home department may be counted toward area or distribution requirements of the major Ph.D. program in addition to the minor requirement, as long as the student either a) completes at least 20 other unduplicated units toward the minor, or b) does not count the course in question toward the unit requirement for the admitting Ph.D. major department, so that the course itself is unduplicated in the sense of the general University 20 unit requirement for Ph.D. minors.

## Certificate in Language Program Management

*Faculty Director:* Elizabeth Bernhardt

Programs in contemporary foreign language teaching preparation entail a knowledge base that has grown over the past 30 years, rooted in data from an explosion of linguistic as well as applied linguistic research.

In tandem with the Language Center's primary focus on learning research and theory, which graduate students explore in the teaching preparation program, the Language Program Management certificate focuses on developing the professional leadership and academic skills necessary for a career that includes the coordination and management of language learning.

The program funds summer internships which enable the completion of a certificate in Language Program Management and are intended to help Stanford graduate students prepare themselves for such work in complement to their literary studies. The certificate program is not declared on Axess and does not appear on the transcript or diploma.

### Prerequisites

1. Foreign language acquisition: Oral Proficiency Interview (OPI) rating of at least advanced mid
2. Academic and professional development:
  - DLCL 301 The Learning and Teaching of Second Languages
  - Modified Oral Proficiency Interview (MOPI) Assessment workshop (2 days)
  - Limited OPI Tester Certification (average 6 months)
  - Teaching of three first-year language courses through the Language Center

These are generally met by the end of a graduate student's second year in the PhD program. Once meeting these criteria, the student may be admitted to the Program.

### Requirements

Upon admission to the program, students must complete the following:

1. DLCL 302 The Learning and Teaching of Second-Language Literatures: a course designed to focus student attention on the development of oral language proficiency through the upper levels and emphasize the need for upper register speaking and writing for literature learning and teaching.
2. OPI workshop (additional 2 days of training at the Advanced and Superior levels): this workshop is the extension of the MOPI. It focuses on upper register performance on the FSI-ACTFL scale.

Hosted by either the Language Center, regional workshop, or at the national meeting of the ACTFL.

3. Completion of Writing Proficiency Familiarization workshop (Winter Quarter): Workshop conducted by a certified writing tester and structured in parallel to the MOPI/OPI assessment paradigm.
4. DLCL 303 Language Program Management (Summer Quarter): an administrative internship including, but not limited to, experiences with the following:
  - Shadow faculty and staff in select areas of administration and supervision within the Language Center and DLCL
  - Placement testing and student advisement
  - Technology in teaching and learning
  - Processes for teacher observation and feedback
  - Procedures in staff supervision and human resources
  - Course scheduling, budgeting, staffing, and searches
  - Interface with external programs (e.g., BOSP, Bechtel, VPTL)

*Division Chair:* Dan Edelstein

*DLCL Senior Lecturer:* Cintia Santana

## East Asian Languages and Cultures

Courses offered by the Department of East Asian Languages and Cultures are listed on the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) web site under the subject codes:

- CHINGEN (Chinese General)
- CHINLIT (Chinese Literature)
- JAPANGEN (Japanese General)
- JAPANLIT (Japanese Literature)
- KORGEN (Korean General)
- KORLIT (Korean Literature) (<https://explorecourses.stanford.edu/search?view=catalog&academicYear=&q=KORLIT&filter-departmentcode=KORLIT=on&filter-coursestatus=Active=on&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&page=0>)
  - Courses with the suffix -GEN do not require reading knowledge of an Asian language.

Language courses are listed on the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) web site under:

- CHINLANG (Chinese Language)
- JAPANLNG (Japanese Language)
- KORLANG (Korean Language)

The Department of East Asian Languages and Cultures offers programs for students who wish to engage with the cultures of China, Japan, and Korea as articulated in language, linguistics, literature, film, cultural studies, and visual arts. Students emerge with a sophisticated understanding of culture as a dynamic process embodied in language and other representational media, especially the verbal and visual forms that are central to humanistic study. Department faculty represent a broad range of research interests and specialties, and visiting scholars and postdoctoral fellows from the Stanford Humanities Center, the Andrew W. Mellon Fellowship of Scholars in the Humanities, the Freeman Spogli Institute for International Studies, and the Center for East Asian Studies add to the intellectual vitality of the department.

East Asian Languages and Cultures offers a full range of courses at the undergraduate and graduate levels. Undergraduate courses concentrate on language, literature, and other cultural forms from the earliest times to the present, covering traditional and contemporary topics from Confucian conceptions of self and society to inflections of gender in the twentieth

century. Emphasis in classes is on developing powers of critical thinking and expression that will serve students well no matter what their ultimate career goals. Graduate programs offer courses of study involving advanced language training, engagement with primary texts and other materials, literary history, and training in research methodologies and critical approaches.

East Asian language skills provide a foundation for advanced academic training and professional careers in fields such as business, diplomacy, education, and law. The department also offers opportunities for students who choose to double-major or minor in other academic disciplines, including anthropology, art history, economics, education, history, linguistics, philosophy, political science, religious studies, and sociology.

The department accepts candidates for the degrees of Bachelor of Arts, Master of Arts, and Doctor of Philosophy in Chinese and Japanese, and Bachelor of Arts in East Asian Studies. It also offers undergraduate minors and the Ph.D. minor in Chinese or Japanese language and literature.

For information concerning other opportunities for study about Asian history, societies, and cultures, see the following departments and programs: Anthropology, Art and Art History, Business, Comparative Literature, East Asian Studies, Economics, History, Law, Linguistics, Philosophy, Political Science, Religious Studies, and Sociology.

## Undergraduate Mission Statements for East Asian Languages and Cultures

### Chinese Major

The mission of the undergraduate program in Chinese is to expose students to a variety of perspectives in Chinese language, culture, and history by providing them with training in writing and communication, literature, and civilization. Emphasis in courses is on developing powers of critical thinking and expression that serve students well no matter what their ultimate career goals are. The program prepares students for diverse professions and enterprises, including business, government service, and academia.

### Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. effective and nuanced skills interpreting primary and secondary source materials.
2. in their own work a good grasp of the course material and methodologies in the studies of Chinese.
3. analytical writing skills and close reading skills.
4. effective oral communication skills.

### Japanese Major

The mission of the undergraduate program in Japanese is to expose students to a variety of perspectives in Japanese language, culture, and history by providing students with training in writing and communication, literature, and civilization. Emphasis in classes is on developing powers of critical thinking and expression that will serve students well no matter what their ultimate career goals are. The program prepares students for diverse professions and enterprises, including business, government service, and academia.

### Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning

outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. effective and nuanced skills interpreting primary and secondary source materials.
2. in their own work a good grasp of the course material and methodologies in the studies of Japanese.
3. analytical writing skills and close reading skills.
4. effective oral communication skills.

### East Asian Studies Major

The mission of the program in East Asian Studies is to enable students to obtain a comprehensive understanding of East Asia broadly conceived, which is the area stretching from Japan through Korea and China to the contiguous areas of the Central Asian land mass. Majors are expected to have a good mastery of an East Asian language, and focus on a particular sub-region or a substantive issue involving the region as a whole. Emphasis in classes is on developing powers of critical thinking and expression to serve students well no matter what their ultimate career goals in business, government service, academia, or the professions.

### Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. effective and nuanced skills interpreting primary and secondary source materials.
2. in their own work a good grasp of the course material and methodologies in East Asian studies.
3. analytical writing skills and close reading skills.
4. effective oral communication skills.

### Study Abroad

There are several exciting opportunities for Stanford students interested in Japan and China. The Kyoto Center for Japanese Studies (KCJS (<http://www.kcjs.jp>)), is designed for undergraduates wishing to do advanced work in Japanese language and Japanese studies. The language requirement is two years of Japanese. Students may attend either one or two semesters.

The BOSP Kyoto program (<https://undergrad.stanford.edu/programs/bosp/explore/kyoto>) combines a Winter and/or Spring quarter of academic study with an optional internship in Japan. Founded in collaboration with the School of Engineering, it provides students with the opportunity to fit language immersion and practical classroom experience into their busy schedules. It also welcomes students in the sciences, social sciences, and humanities. Winter quarter participants must have completed JAPANLNG 1. Spring quarter participants must have completed JAPANLNG 2. Preference is given to students with additional language study, as well as those who have taken courses in Japanese literature and culture. It is hosted on the Doshisha University campus in the heart of Kyoto. For information about either program in Kyoto, students should contact the Bing Overseas Studies Program office in Sweet Hall.

The Inter-University Center for Japanese Language Studies (IUC) (<https://web.stanford.edu/dept/IUC/cgi-bin>), located in Yokohama, is designed for students who seek the most advanced level of training in Japanese. This program accepts students with high intermediate Japanese language skills who seek Japan-related careers.

Undergraduates interested in studying Chinese language, history, culture, and society are encouraged to apply to the Stanford Program in Beijing (<https://undergrad.stanford.edu/programs/bosp/explore/beijing>), also

offered through the Bing Overseas Studies Program. This program is located at Peking University and is open Autumn and Spring Quarters. There is no language prerequisite for the fall quarter; for spring quarter, students must take CHINLANG 2.

Students should take note of the Inter-University Program for Chinese Language Studies (IUP) (<http://ieas.berkeley.edu/iup>) at Tsinghua University ([iub@socrates.berkeley.edu](mailto:iub@socrates.berkeley.edu); 510-642-3873) and the Inter-University Center (IUC) for Japanese Language Studies (<http://stanford.edu/dept/IUC>) in Yokohama ([stacey.campbell@stanford.edu](mailto:stacey.campbell@stanford.edu); 650-725-1490). Stanford is a member of these consortia.

Graduate students interested in the graduate exchange program with the Department of Chinese at Peking University in Beijing should consult the chair of the department early in the academic year.

## Graduate Programs in East Asian Languages and Cultures

### Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in East Asian Languages and Cultures and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in East Asian Languages and Cultures. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of East Asian Languages and Cultures and to interpret and present the results of such research.

### Admission

All students contemplating application for admission to graduate study must have a creditable undergraduate record. The applicant need not have majored in Chinese or Japanese as an undergraduate, but must have had the equivalent of at least three years of training in the language in which he or she intends to specialize, and must also demonstrate a command of English adequate for the pursuit of graduate study. Applicants should not wish merely to acquire or improve language skills, but to pursue study in one of the following fields: Chinese archaeology, Chinese linguistics, Chinese literature, Chinese philosophy, Japanese cultural history, Japanese literature, Japanese linguistics, and Japanese visual culture.

## Bachelor of Arts

The department offers the following degrees:

- Bachelor of Arts in Chinese
- Bachelor Arts in Japanese
- Bachelor of Arts in East Asian Studies

## Bachelor of Arts in Chinese

These requirements are in addition to the University's basic requirements for the bachelor's degree. Letter grades are mandatory for required courses.

The following courses as well as their prerequisites must be completed with a grade point average (GPA) of 2.0 or better.

### Course List

#### I. Gateway Course

CHINGEN 91	Introduction to China	5
------------	-----------------------	---

#### II. First-year Modern Chinese

Select one the following series		8-15
---------------------------------	--	------

##### Series A

CHINLANG 1	First-Year Modern Chinese, First Quarter
------------	--

CHINLANG 2	First-Year Modern Chinese, Second Quarter
------------	---

CHINLANG 3	First-Year Modern Chinese, Third Quarter
------------	--

##### Series B

CHINLANG 1B	First-Year Modern Chinese for Bilingual Students, First Quarter
-------------	---

CHINLANG 2B	First-Year Modern Chinese for Bilingual Students, Second Quarter
-------------	--

CHINLANG 3B	First-Year Modern Chinese for Bilingual Students, Third Quarter
-------------	---

##### Series C

CHINLANG 5	Intensive First-Year Modern Chinese
------------	-------------------------------------

#### III. Second-year Modern Chinese

Select one of the following series:		8-15
-------------------------------------	--	------

##### Series A

CHINLANG 21	Second-Year Modern Chinese, First Quarter
-------------	---

CHINLANG 22	Second-Year Modern Chinese, Second Quarter
-------------	--

CHINLANG 23	Second-Year Modern Chinese, Third Quarter
-------------	---

##### Series B

CHINLANG 21B	Second-Year Modern Chinese for Bilingual Students, First Quarter
--------------	--

CHINLANG 22B	Second-Year Chinese for Bilingual Students, Second Quarter
--------------	--

CHINLANG 23B	Second-Year Chinese for Bilingual Students, Third Quarter
--------------	---

##### Series C

CHINLANG 25	Intensive Second-Year Modern Chinese
-------------	--------------------------------------

#### IV. Third-year Modern Chinese

Select one of the following series:		9-15
-------------------------------------	--	------

##### Series A

CHINLANG 101	Third-Year Modern Chinese, First Quarter
--------------	--

CHINLANG 102	Third-Year Modern Chinese, Second Quarter
--------------	---

CHINLANG 103	Third-Year Modern Chinese, Third Quarter
--------------	--

##### Series B

CHINLANG 101	Third-Year Modern Chinese for Bilingual Students, First Quarter
--------------	---

CHINLANG 102B	Third-Year Modern Chinese for Bilingual Students, Second Quarter
---------------	--

CHINLANG 103	Third-Year Modern Chinese for Bilingual Students, Third Quarter
--------------	---

#### V. Classical Chinese

CHINLIT 125	Beginning Classical Chinese, First Quarter	4-5
-------------	--	-----

or CHINLIT 126	Beginning Classical Chinese, Second Quarter
----------------	---

or CHINLIT 127	Beginning Classical Chinese, Third Quarter
----------------	--

#### VI. Additional Courses

		22-25
--	--	-------

Three CHINGEN or CHINLIT courses at the 100 level with one in each of the following areas: pre-modern China, modern China, and Chinese linguistics. Five other content courses, as approved by the undergraduate faculty adviser

CHINGEN 133	Literature in 20th-Century China (required, satisfies WIM requirement)
-------------	--

CHINGEN 135	Chinese Bodies, Chinese Selves
-------------	--------------------------------

CHINGEN 138	Love, Passion, and Politics in Chinese Film
-------------	---

CHINGEN 145	
-------------	--

#### Units

CHINGEN 146	Gods, Ghosts, and Ancestors: Anthropology of Chinese Folk Religion	
CHINGEN 148	Love and Revenge	
CHINGEN 153	Beijing and Shanghai: Twin Cities in Chinese History	
CHINGEN 155	Cultural Images in China-US Relations	
CHINLIT 191	The Structure of Modern Chinese	
CHINLIT 192	The History of Chinese	
CHINGEN 194	The History and Culture of Peking Opera	
<b>VII. Capstone</b>		
CHINGEN 198	Senior Colloquium in Chinese Studies	1
Total Units		57-81

## Honors Program

Majors with an overall grade point average (GPA) of 3.5 may apply for the honors program by submitting a senior thesis proposal to the honors committee during Winter or Spring Quarter of the junior year. The proposal must include:

- a thesis outline
- a list of all relevant courses the student has taken or plans to take
- a preliminary reading list including a work or works in Chinese,
- the name of a faculty member who has agreed to act as honors supervisor.

If the proposal is approved:

1. Research begins in Spring Quarter of the junior year, or by Autumn Quarter of the senior year at the latest, when the student enrolls in CHINLIT 189A Honors Research.
2. In Winter Quarter of the senior year, students enroll for 5 units in independent study, CHINLIT 199 Individual Reading in Chinese, with the thesis supervisor while writing the thesis, and the finished essay (normally about 15,000 words) is submitted to the committee no later than April 15 of the senior year.
3. Students enroll in CHINGEN 198 Senior Colloquium in Chinese Studies in the senior year to polish and present their theses (instead of writing a capstone essay).
4. 8-11 units of credit are granted for honors course work and the finished thesis.

## Bachelor of Arts in Japanese

These requirements are in addition to the University's basic requirements for the bachelor's degree. Letter grades are mandatory for required courses. The following courses as well as their prerequisites must be completed with a grade point average (GPA) of 2.0 or better:

<b>I. Gateway Course</b>		
JAPANGEN 92	Introduction to Japan (Gateway course)	5
<b>II. First-year Japanese</b>		
15		
JAPANLNG 1	First-Year Japanese Language, Culture, and Communication, First Quarter	
JAPANLNG 2	First-Year Japanese Language, Culture, and Communication, Second Quarter	
JAPANLNG 3	First-Year Japanese Language, Culture, and Communication, Third Quarter (or JAPANLANG 5)	
<b>III. Second-year Modern Japanese</b>		
15		
JAPANLNG 21	Second-Year Japanese Language, Culture, and Communication, First Quarter	
JAPANLNG 22	Second-Year Japanese Language, Culture, and Communication, Second Quarter	

JAPANLNG 23	Second-Year Japanese Language, Culture, and Communication, Third Quarter (or JAPANLNG 20)	
<b>IV. Third-year Modern Japanese</b>		
15		
JAPANLNG 101	Third-Year Japanese Language, Culture, and Communication, First Quarter	
JAPANLNG 102	Third-Year Japanese Language, Culture, and Communication, Second Quarter	
JAPANLNG 103	Third-Year Japanese Language, Culture, and Communication, Third Quarter (or JAPANLNG 105)	
<b>V. Additional Courses</b>		
25		
Three JAPANGEN or JAPANLIT courses at the 100 level with one in each of the following areas: pre-modern Japan, modern Japan, and Japanese linguistics, as approved by the undergraduate adviser. Four other content courses dealing with Japan primarily at the 100 level, as approved by the undergraduate adviser.		
The following courses are offered in 2015-16:		
JAPANGEN 124	Manga as Literature	
JAPANGEN 138	Introduction to Modern Japanese Literature and Culture (Required WIM course for Japanese major.)	
JAPANLIT 146	Introduction to Premodern Japanese	
JAPANLIT 157	Points in Japanese Grammar	
JAPANGEN 185	Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868	
JAPANGEN 186	Theme and Style in Japanese Art	
JAPANGEN 287	The Japanese Tea Ceremony: The History, Aesthetics, and Politics Behind a National Pastime	
<b>VI. Capstone</b>		
JAPANGEN 198	Senior Colloquium in Japanese Studies (Completion of a capstone essay of approximately 7,500 words, written either in a directed reading course or one of the non-language courses above. Must have an adviser for the capstone essay by the beginning of Autumn Quarter, senior year.)	1
Total Units		76

- Students must also complete of a capstone essay of approximately 7,500 words, written either in a directed reading course or for one of the courses listed above.
- JAPANGEN 51 Japanese Business Culture and Systems/ JAPANGEN 251 Japanese Business Culture and Systems can not be counted toward the major.
- Students who complete third-year Japanese at KCJS satisfy the language requirement but are required to take a placement test if they wish to enroll in:
  - JAPANLNG 211 Fourth-Year Japanese, First Quarter
  - JAPANLNG 212 Fourth-Year Japanese, Second Quarter
  - JAPANLNG 213 Fourth-Year Japanese, Third Quarter

These requirements are in addition to the University's basic requirements for the bachelor's degree. Letter grades are mandatory for required courses.

## Honors Program

Majors with an overall grade point average (GPA) of 3.5 may apply for the honors program by submitting a senior thesis proposal to the honors committee during Winter or Spring Quarter of the junior year. The proposal must include a thesis outline, a list of all relevant courses the student has taken or plans to take, a preliminary reading list including a work or works in Japanese, and the name of a faculty member who has agreed to act as honors supervisor.

If the proposal is approved:

- research begins in spring quarter of the junior year, or by autumn quarter of the senior year at the latest, when the student enrolls in JAPANLIT 189A Honors Research
- In winter quarter of the senior year, students enroll for five units in independent study JAPANLIT 189B Honors Research with the thesis supervisor while writing the thesis, and the finished essay (normally about 15,000 words) is submitted to the committee no later than April 15 of the senior year.
- Students enroll in the Senior Colloquium in the senior year to polish and present their theses (instead of writing a capstone essay). JAPANGEN 198 Senior Colloquium in Japanese Studies
- Eight to eleven units of credit are granted for honors course work and the finished thesis.

## Bachelor of Arts in East Asian Studies

Majors in East Asian Studies begin or continue the mastery of Chinese, Japanese, or Korean. Within the humanities or social sciences, they may focus on a particular sub-region, for example, Japan; South China, Hong Kong, and Taiwan; or western China and Central Asia; or a substantive issue involving the region as a whole, such as environmental protection, public health, rural development, historiography, cultural expression, or religious beliefs. The major seeks to reduce the complexity of a region to intellectually manageable proportions and illuminate the interrelationships among the various facets of a society.

Potential majors must submit a Student Proposal for a Major in East Asian Studies form not later than the end of the first quarter of the junior year. Majors must complete at least 75 units of course work on China, Japan, and/or Korea in addition to a one unit Senior Colloquium. Courses to be credited toward major requirements must be completed with a grade of 'C' or better. Requirements are:

1. Language: proficiency in Chinese, Japanese, or Korean language at the second-year level or above, to be met either by course work or examination. Students who meet the requirement through examination are still expected to take an additional 15 units of language at a higher level, or literature courses taught in the language, or the first year in an additional Asian language. No more than 30 units of language courses are counted toward the major.
2. Area Courses: a minimum of three area courses, one in each category below (courses listed are examples and by no means exhaustive; if uncertain whether a particular course fits into one of these categories, contact the department to check.
  - a. Humanities

CHINGEN 91	Introduction to China	5
CHINGEN 132	Chinese Fiction and Drama in Translation	4
CHINGEN 133	Literature in 20th-Century China	4-5
CHINGEN 135	Chinese Bodies, Chinese Selves	3-5
CHINGEN 194	The History and Culture of Peking Opera	3-4
CHINGEN 198	Senior Colloquium in Chinese Studies	1
JAPANGEN 92	Introduction to Japan	5
JAPANGEN 124	Manga as Literature	3-5
JAPANGEN 138	Introduction to Modern Japanese Literature and Culture	3-4
JAPANGEN 184	Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting	4
KORGEN 101N	Kangnam Style: Korean Media and Pop Culture	4
KORGEN 121	Doing the Right Thing: Ethical Dilemmas in Korean Film	3-4

RELIGST 50	Exploring Buddhism	5
RELIGST 55	Exploring Zen	4
RELIGST 56	Exploring Chinese Religions	4

### b. History

HISTORY 11SC	How Is a Buddhist	2
HISTORY 13	The Historical and Geographical Background of Current Global Events	3
HISTORY 92A	The Historical Roots of Modern East Asia	4-5
HISTORY 93S		5
HISTORY 95	Modern Korean History	3
HISTORY 95C	Modern Japanese History: From Samurai to Pokemon	3
HISTORY 106A	Global Human Geography: Asia and Africa	5
HISTORY 194B	Japan in the Age of the Samurai	5
HISTORY 195	Modern Korean History	5
HISTORY 195C	Modern Japanese History: From Samurai to Pokemon	5
HISTORY 292F	Culture and Religions in Korean History	4-5
HISTORY 295J	Chinese Women's History	5

### c. Social Sciences

JAPANGEN 51	Japanese Business Culture and Systems	3-5
EASTASN 217	Health and Healthcare Systems in East Asia	3-5
LAW 245	China Law and Business	3
IPS 244	U.S. Policy toward Northeast Asia	5
IPS 246	China on the World Stage	3-5
POLISCI 148	Chinese Politics: The Transformation and the Era of Reform	5
POLISCI 211	Political Economy of East Asia	3-5
SOC 116	Chinese Organizations and Management	5
SOC 117A	China Under Mao	5
SOC 167A	Asia-Pacific Transformation	5

3. Substantive Concentration: additional courses on East Asia, one of which must be a seminar above the 100 level. Majors are encouraged to distribute their course work among at least three disciplines and two subregions in Asia. The subregions need not be traditionally defined. Examples include China, Japan, or Korea; or, in recognition of the new subregions which are emerging, South China and Taiwan, or Central Asia. At least four courses must have a thematic coherence built around a topic. Examples include:

- East Asian religions and philosophies
- Culture and society of modern Japan
- Ethnic identities in East Asia
- Arts and literature in late imperial China
- Foreign policy in East Asia
- Social transformation of modern Korea
- China's political economy

See ExploreCourses under CHINGEN (<https://explorecourses.stanford.edu/search?q=CHINGEN&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-CHINGEN=on&filter-catalognumber-CHINGEN=on>) or CHINLIT (<https://explorecourses.stanford.edu/search?q=CHINLIT&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter->

catalognumber-CHINLIT=on&filter-catalognumber-CHINLIT=on), EASTASN, JAPANGEN (<https://explorecourses.stanford.edu/search?q=JAPANGEN&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-JAPANGEN=on&filter-catalognumber-JAPANGEN=on>), JAPANLIT (<https://explorecourses.stanford.edu/search?q=JAPANLIT&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-JAPANLIT=on&filter-catalognumber-JAPANLIT=on>), and KORGEN or other relevant departments (<https://explorecourses.stanford.edu/search?q=KORGEN&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-KORGEN=on&filter-catalognumber-KORGEN=on>).

4. Capstone Essay: completion of a paper of approximately 7,500 words, written either in a directed reading course or for one of the courses in item 3 above, which should be built upon the student's thematic interest. CHINGEN 198 Senior Colloquium in Chinese Studies, JAPANGEN 198 Senior Colloquium in Japanese Studies or KORGEN 198 Senior Colloquium in Japanese Studies (1 unit), is required of majors during their senior year to develop and present the capstone essay or honors paper. A faculty adviser for the capstone essay must be submitted by beginning of autumn quarter.
5. At least one quarter overseas in the country of focus.
6. An East Asian Studies course that satisfies the University Writing in the Major requirement (WIM) should be completed before beginning the senior essay. This year, CHINGEN 133 Literature in 20th-Century China and JAPANGEN 138 Introduction to Modern Japanese Literature and Culture satisfy the WIM requirement.
7. The courses for the major must add up to at least 76 units, comprised of the one-unit Senior Colloquium and at least 75 additional units, all taken for a letter grade. Courses must be at least three units to be counted towards the degree.

These requirements are in addition to the University's basic requirements for the bachelor's degree. Letter grades are mandatory for required courses.

## Honors Program

Majors with an overall grade point average (GPA) of 3.5 may apply for the honors program by submitting a senior thesis proposal to the honors committee during Winter or Spring Quarter of the junior year. The proposal must include a thesis outline, a list of all relevant courses the student has taken or plans to take, a preliminary reading list including a work or works in Chinese or Japanese, and the name of a faculty member who has agreed to act as honors supervisor.

If the proposal is approved, research begins in Spring Quarter of the junior year, or by Autumn Quarter at the latest, when the student enrolls in 2-5 units of credit for independent study. In Winter Quarter, students enroll for five units in independent study with the thesis supervisor while writing the thesis, and the finished essay (normally about 15,000 words) is submitted to the committee no later than April 15 of the senior year. Students enroll in the Senior Colloquium, CHINGEN 198 Senior Colloquium in Chinese Studies, KORGEN 198 Senior Colloquium in Japanese Studies, or JAPANGEN 198 Senior Colloquium in Japanese Studies, in the senior year to polish and present their theses (instead of writing a capstone essay). Eight to eleven units of credit are granted for honors course work and the finished thesis. One advanced level colloquium or seminar dealing with China, Japan, or Korea is required as well.

## Overseas Studies

Courses approved for the East Asian Languages and Cultures majors which are taught overseas can be found in the "Overseas Studies (p. 94)" section of this Bulletin, or in the Overseas Studies office, Sweet Hall. To find course offerings in ExploreCourses, click on OSPKYOTO or OSPBEIJ.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) web site or the Bing Overseas Studies (<http://bosp.stanford.edu>) web site. Students should consult with their faculty adviser for applicability of Overseas Studies courses to a major or minor program.

## Minor in Chinese or Japanese

The undergraduate minors in Chinese and Japanese have been designed to give students majoring in other departments an opportunity to gain a substantial introduction to Chinese or Japanese language, as well as an introduction to the culture and civilization of East Asia. The minors consist of a minimum of 20 units from the following requirements: One introductory core course, below. Three other departmental courses in the relevant field approved by the adviser, and language requirement as listed below.

1. Completion of language study through the second-year level for students with no previous training in Chinese or Japanese.

a.

Select one of the following Series: 9-15

Series A

CHINLANG 21 Second-Year Modern Chinese, First Quarter

CHINLANG 22 Second-Year Modern Chinese, Second Quarter

CHINLANG 23 Second-Year Modern Chinese, Third Quarter

Series B

CHINLANG 21 Second-Year Modern Chinese for Bilingual Students, First Quarter

CHINLANG 22 Second-Year Chinese for Bilingual Students, Second Quarter

CHINLANG 23 Second-Year Chinese for Bilingual Students, Third Quarter

CHINLANG 24 Intensive Second-Year Modern Chinese

Series C

JAPANLNG 2 Second-Year Japanese Language, Culture, and Communication, First Quarter

JAPANLNG 22 Second-Year Japanese Language, Culture, and Communication, Second Quarter

JAPANLNG 23 Second-Year Japanese Language, Culture, and Communication, Third Quarter

JAPANLNG 20 Intensive Second-Year Japanese

- b. Students who already have first-year competence in Chinese or Japanese must complete the third-year course.

Select one of the following Series: 9-15

Series A

CHINLANG 10 Third-Year Modern Chinese, First Quarter

CHINLANG 11 Third-Year Modern Chinese, Second Quarter

CHINLANG 10 Third-Year Modern Chinese, Third Quarter

Series B

CHINLANG 10 Third-Year Modern Chinese for Bilingual Students, First Quarter

CHINLANG 11 Third-Year Modern Chinese for Bilingual Students, Second Quarter

Units

Units

CHINLANG 100B Third-Year Modern Chinese for Bilingual Students, Third Quarter

Series C

JAPANLNG 100 Third-Year Japanese Language, Culture, and Communication, First Quarter

JAPANLNG 101 Third-Year Japanese Language, Culture, and Communication, Second Quarter

JAPANLNG 103 Third-Year Japanese Language, Culture, and Communication, Third Quarter

- c. Students who already have a competence at the second-year level may fulfill the language component of the minor by taking three courses in the department using materials in either Chinese or Japanese. These courses may be language courses such as the third-year sequence mentioned above, the fourth-year language sequence, or they may be advanced literature and linguistics courses, depending on the capabilities and interests of the student.

2. The core courses: CHINGEN 91 for Chinese minors or JAPANGEN 92 for Japanese minors.

CHINGEN 91	Introduction to China	5
JAPANGEN 92	Introduction to Japan	5

3. Three courses selected from among the department's other offerings in the literature, linguistics, and civilization of the relevant minor area (CHINGEN, CHINLIT, JAPANGEN, JAPANLIT). All courses for the minor must be taken for a letter grade and completed with a GPA of 2.0 or better. Consult with the Undergraduate Studies Adviser to potentially count one of the OSPKYOTO courses taught by a Stanford home campus faculty member toward the minor.

CHINGEN 120	Soldiers and Bandits in Chinese Culture	3-5
CHINGEN 133	Literature in 20th-Century China	4-5
CHINGEN 143	Images of Women in Ancient China and Greece	3-5
CHINGEN 145		
CHINGEN 146	Gods, Ghosts, and Ancestors: Anthropology of Chinese Folk Religion	3-5
CHINGEN 153	Beijing and Shanghai: Twin Cities in Chinese History	3-5
CHINGEN 155	Cultural Images in China-US Relations	3-5
CHINGEN 194	The History and Culture of Peking Opera	3-4
CHINLIT 125	Beginning Classical Chinese, First Quarter	2-5
JAPANGEN 92	Introduction to Japan	5
JAPANGEN 122	Translating Cool: Globalized Popular Culture in Asia	3-4
JAPANGEN 124	Manga as Literature	3-5
JAPANGEN 138	Introduction to Modern Japanese Literature and Culture	3-4
JAPANLIT 146	Introduction to Premodern Japanese	3-5
JAPANLIT 157	Points in Japanese Grammar	2-4
JAPANGEN 184	Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting	4
JAPANGEN 185	Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868	4
JAPANGEN 186	Theme and Style in Japanese Art	4
JAPANGEN 287A	The Japanese Tea Ceremony: The History, Aesthetics, and Politics Behind a National Pastime	5

JAPANLIT 287	Pictures of the Floating World: Images from Japanese Popular Culture	5
--------------	--	---

## Minor in East Asian Studies

The goal of the minor in East Asian Studies is to provide the student with a broad background in East Asian culture as a whole, while allowing the student to focus on a geographical or temporal aspect of East Asia. The minor may be designed from the following, for a total of six courses and a minimum of 20 units. All courses should be taken for a letter grade.

1. Three area courses, one in each category (see East Asian Studies major for listing of area courses).
2. One undergraduate seminar above the 100 level and two other courses from among those listed as approved for East Asian Studies majors, including literature courses but excluding language courses. These courses are listed under the East Asian Studies major in this bulletin.

Applications for the minor should be submitted online through Axess and are due no later than the second quarter of the junior year.

## Units - Minors in Other Departments

### Minor in Translation Studies

Minor Adviser: *Cintia Santana* (csantana@stanford.edu)

*The DLCL offers a "Minor in Translation Studies" which may be of interest to students in EALC. See the DLCL's "Minors (p. 418)" tab for the full requirements; go to the menu in the right hand column and click on the link to the "Minor in Translation Studies".*

The Division of Literatures, Cultures, and Languages, in cooperation with East Asian Languages and Cultures and the English Department, teaches undergraduates to develop and apply their foreign language knowledge to the production and analysis of translations. The minor is designed to give students majoring in a variety of fields the tools to consider the practical and theoretical issues brought up by translation as an aesthetic, cultural, and ethical practice.

## Master of Arts Programs in East Asian Languages and Cultures

1. The M.A. is granted in Chinese and in Japanese. The normal length of study for the degree is two years.
2. No financial aid is available for those applicants who wish to obtain the M.A. only.
3. Students who wish to spend the first year of graduate study at the Beijing or Yokohama centers must obtain department approval first.
4. Candidates for the degree must be in residence at Stanford in California during the final quarter of registration.
5. A thesis or an annotated translation of a text of suitable literary or historical worth is required for the M.A. degree. Under special circumstances, a paper approved by the graduate adviser may be substituted.
6. The University's basic requirements for the master's degree, including a 45-unit minimum requirement, are given in the "Graduate Degrees (p. 45)" section of this Bulletin. Department requirements are set forth below.

## Master of Arts in Chinese

The M.A. program in Chinese is designed for students with strong academic records and an interest in pursuing postgraduate research in Chinese literature, philosophy, or linguistics, but who have not yet acquired the language skills or disciplinary foundation necessary to enter a Ph.D. program. (Note: Students who wish to pursue advanced

language training in preparation for post-graduate research in other fields of Chinese studies are referred to the interdisciplinary M.A. program in the Center for East Asian Studies.)

The candidate must finish third-year Chinese, and one course in advanced classical Chinese with a letter grade of 'B' or higher. Placement tests in modern and in classical Chinese will be given for incoming students during orientation week, Autumn Quarter. Those who fail to place into advanced level classical must take beginning classical Chinese. Qualified students may, upon consultation with the graduate adviser, be permitted to certify that they have attained the equivalent level of proficiency by passing examinations.

1. Demonstrate proficiency in both modern and classical Chinese through completion of one of the tracks of third-year Chinese with a letter grade of 'B' or higher :

CHINLANG 103	Third-Year Modern Chinese, Third Quarter	5
CHINLANG 103B	Third-Year Modern Chinese for Bilingual Students, Third Quarter	3

2. One of three advanced classical Chinese courses:

CHINLIT 221	Advanced Classical Chinese: Philosophical Texts	3-5
CHINLIT 222	Advanced Classical Chinese: Historical Narration	2-5
CHINLIT 223	Advanced Classical Chinese: Literary Essays	3-5

3. Complete the following for a letter grade of 'B' or higher:

CHINLIT 201	Proseminar: Bibliographic and Research Methods in Chinese Studies	3-5
-------------	---	-----

4. Four courses in CHINGEN or CHINLIT numbered above 200:

The following courses are offered this year:

CHINLIT 201	Proseminar: Bibliographic and Research Methods in Chinese Studies	3-5
CHINLIT 205	Beginning Classical Chinese, First Quarter	2-5
CHINLIT 206	Beginning Classical Chinese, Second Quarter	2-5
CHINLIT 207	Beginning Classical Chinese, Third Quarter	2-5
CHINGEN 218	Constructing National History in East Asian Archaeology	3-5
CHINLIT 222	Advanced Classical Chinese: Historical Narration	2-5
CHINGEN 233	Literature in 20th-Century China	4-5
CHINGEN 235	Chinese Bodies, Chinese Selves	3-5
CHINGEN 238	Love, Passion, and Politics in Chinese Film	4-5
CHINLIT 221	Advanced Classical Chinese: Philosophical Texts	3-5
CHINLIT 222	Advanced Classical Chinese: Historical Narration	2-5
CHINLIT 274	Modern Chinese Novel: Theory, Aesthetics, History	4
CHINGEN 241	Emergence of Chinese Civilization from Caves to Palaces	3-4
CHINGEN 246	Gods, Ghosts, and Ancestors: Anthropology of Chinese Folk Religion	3-5
CHINGEN 248		
CHINLIT 255	Classical Poetry: Reading, Theory, Interpretation	4
CHINGEN 294	The History and Culture of Peking Opera	3-4

CHINGEN 255	Cultural Images in China-US Relations	3-5
CHINGEN 345		
CHINLIT 283	China's Dynastic Founders	3-5
CHINLIT 291	The Structure of Modern Chinese	2-4
CHINLIT 295J	Chinese Women's History	5
CHINLIT 392B	Law and Society in Late Imperial China	4-5

5. Two upper-division or graduate-level courses in fields such as Chinese anthropology, art history, history, philosophy, politics, religious studies, or another relevant field, as approved by the graduate adviser in consultation with the student's individual adviser
6. A master's thesis

CHINLIT 299	Master's Thesis or Translation	1-5
-------------	--------------------------------	-----

### Units

## Master of Arts in Chinese, Archaeology Subplan

The M.A. in Chinese, Archaeology subplan, is designed for students with an interest in pursuing postgraduate research in Chinese archaeology who have not yet acquired the language skills or disciplinary foundation necessary to enter a Ph.D. program. The subplan is declared on Axxess. Subplans are printed on the transcript and the diploma and are elected via the Declaration or Change to a Field of Study (<https://studentaffairs.stanford.edu/sites/default/files/registrar/files/grad-subplan-change.pdf>) form.

### Units

## Degree Requirements

A candidate must:

1. Demonstrate proficiency in both modern and classical Chinese by completing:
  - a. third-year Chinese through with a minimum grade of 'B+'.
  - b. one of three advanced classical Chinese courses:

### Units

CHINLIT 221	Advanced Classical Chinese: Philosophical Texts	3-5
CHINLIT 222	Advanced Classical Chinese: Historical Narration	2-5
CHINLIT 223	Advanced Classical Chinese: Literary Essays	3-5

- c. Qualified students may, upon consultation with the graduate adviser, be permitted to certify that they have attained the equivalent level of proficiency by passing examinations or presenting documentary evidence of attendance at a bachelor's institution in which Chinese is the language of instruction. Exemptions may also be granted to students who study prehistoric archaeology. Instead, these students should take required course work relating to archaeology which is offered in the Stanford Archaeology Center. For details students should consult with the supervisor or the graduate adviser.

2. Complete 45 units, including the following four graduate level CHINGEN or ANTHRO subject code courses appropriate to the Chinese Archaeology track. All courses must be passed with a minimum grade of 'B+'.

CHINGEN 241	Emergence of Chinese Civilization from Caves to Palaces	3-4
CHINGEN 218	Constructing National History in East Asian Archaeology	3-5
ANTHRO 303	Introduction to Archaeological Theory	5

Units

Units

Units

ANTHRO 307 Archaeological Methods 5

3. Two upper-division or graduate-level courses in fields such as Chinese anthropology, archaeology, art history, history, philosophy, political science and religious studies, as approved by the graduate adviser in consultation with the student's individual adviser.
4. Master's thesis.

## Master of Arts in Japanese

The M.A. program in Japanese is designed for students with strong academic records and an interest in pursuing postgraduate research in Japanese literature, cultural history, or linguistics, but who have not yet acquired the language skills or disciplinary foundation necessary to enter a Ph.D. program. *Note:* Students who wish to pursue advanced language training in preparation for postgraduate research in other fields of Japanese studies are referred to the interdisciplinary M.A. program in the Center for East Asian Studies.

The candidate must:

1. Complete third-year:

JAPANLNG 101	Third-Year Japanese Language, Culture, and Communication, First Quarter	5
JAPANLNG 102	Third-Year Japanese Language, Culture, and Communication, Second Quarter	5
JAPANLNG 103	Third-Year Japanese Language, Culture, and Communication, Third Quarter	5

2. Complete fourth-year Japanese and classical Japanese with a letter grade of 'B' or higher:

Fourth-year Japanese	9-15
JAPANLNG 21 Fourth-Year Japanese, First Quarter	
JAPANLNG 21 Fourth-Year Japanese, Second Quarter	
JAPANLNG 21 Fourth-Year Japanese, Third Quarter	
Classical Japanese	5-10
JAPANLIT 246 Introduction to Premodern Japanese	
JAPANLIT 247 Readings in Premodern Japanese	

- *Note:* qualified students may, upon consultation with the graduate adviser, be permitted to certify that they have attained the equivalent level of proficiency by passing examinations.

3. Complete the following with a letter grade of 'B' or higher:

- a. four adviser-approved courses in Japanese literature, culture, or linguistics from among the offerings of the Department of East Asian Languages and Cultures, not including courses taken to fulfill the language requirement.

JAPANGEN 238	Introduction to Modern Japanese Literature and Culture	3-4
JAPANGEN 285		
JAPANGEN 286	Theme and Style in Japanese Art	4
JAPANGEN 287	The Japanese Tea Ceremony: The History, Aesthetics, and Politics Behind a National Pastime	5
JAPANLIT 224	Dramatic Manga	2-4
JAPANLIT 235	Academic Readings in Japanese I	2-4
JAPANLIT 246	Introduction to Premodern Japanese	3-5
JAPANLIT 257	Points in Japanese Grammar	2-4
JAPANLIT 279	Research in Japanese Linguistics	2-4

JAPANLIT 296 Modern Japanese Literature 2-5

- b. Complete JAPANLIT 201 Proseminar: Introduction to Graduate Study in Japanese (2-5 units).
- c. Two upper-division or graduate-level courses in fields such as Japanese anthropology, art history, history, philosophy, politics, and religion, as approved by the graduate adviser in consultation with the student's individual adviser.
- d. A master's thesis; enroll in JAPANLIT 299 Master's Thesis or Translation (1-5 units).

## Coterminal Master of Arts Programs in East Asian Languages and Cultures

With department approval, students may apply to combine programs for the B.A. and M.A. degrees in Chinese or Japanese. Prospective applicants must consult with the graduate adviser.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

Under this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

Those interested in a coterminal program with an M.A. in East Asian Studies should contact the Center for East Asian Studies (p. 432) for application procedures and deadlines.

## Doctor of Philosophy Programs in East Asian Languages and Cultures

The Ph.D. degree is granted in Chinese and Japanese. Candidates for the degree are expected to acquire a thorough familiarity with Chinese or Japanese literature and linguistics, an adequate command of relevant languages, and a comprehensive knowledge of East Asian history, social institutions, and thought. The University's basic requirements for the Ph.D. are given in the "Graduate Degrees (p. 45)" section of this bulletin. Department requirements are set forth below.

### Admission to Candidacy

Students are evaluated by the graduate faculty during their second year at Stanford. The evaluation is based on a research paper of 25-30 pages documented and with a bibliography, written for an EALC major seminar above the 200 level. Students are also expected to have a GPA of at least 'A-' and demonstrate satisfactory work as a teaching assistant.

If the faculty have serious doubts about a student's ability to work for the Ph.D., they convey this to the student. During the subsequent Spring Quarter, the faculty formally decide by vote whether a student should be admitted to candidacy for the Ph.D. or offered an extension. In cases of extension of pre-candidacy, a clear plan is developed for the student, and a reassessment completed within two academic quarters.

If a student goes to the Inter-University Program for Chinese Language Studies (IUP) at Tsinghua University or the Inter-University Center (IUC) for Japanese Language Studies in Yokohama during the first two years of study, the department may consider an extension for admission to candidacy. The timing of the evaluation of a student admitted with an M.A. in East Asian Studies is decided on an individual basis.

Candidacy is a milestone different from the comprehensive exams, which are regularly held in the third year. Mastery of the field exams is not to be equated with the potential for doing research. Admission to candidacy indicates that the department faculty consider the student qualified to pursue a program of study leading to the Ph.D.

## Doctor of Philosophy in Chinese

The Ph.D. program in Chinese is designed to prepare students for a doctoral degree in Chinese literature, philosophy, or linguistics. Applicants must have a minimum of three years of Chinese language study at Stanford or the equivalent to be considered for admission. Ph.D. students will complete the M.A. as described above on the way to advancing to Ph.D. candidacy (see department guidelines for admission to candidacy above). The majority of required course work for Ph.D. students demands the ability to read primary and secondary materials in Chinese. Advanced standing may be considered for students entering the Ph.D. program who have already completed an M.A. in Chinese literature or linguistics elsewhere only in cases when the level of prior course work and research is deemed equivalent to departmental requirements for the Ph.D. All courses must be taken for a letter grade.

A candidate must fulfill the following requirements:

1. Complete the department's requirements for the M.A. in Chinese and two of three advanced classical Chinese Courses CHINLIT 221 Advanced Classical Chinese: Philosophical Texts. CHINLIT 222 Advanced Classical Chinese: Historical Narration. CHINLIT 223 Advanced Classical Chinese: Literary Essays. All incoming Ph.D. students must take a placement test in classical Chinese held during Orientation Week of fall quarter. Those who fail to place into the advanced level must take Beginning Classical Chinese.
2. Demonstrate proficiency in at least one supporting language, to be chosen in consultation with the primary adviser according to the candidate's specific research goals. Reading proficiency must be certified through a written examination or an appropriate amount of course work, to be determined on a case-by-case basis. When deemed necessary by the student's adviser(s), working knowledge of a third language may also be required.
3. Complete two relevant seminars at the 300 level. These seminars must be in different subjects.

The following course is offered this year:

CHINGEN 345

4. Pass a set of three comprehensive written examinations, one of which tests the candidate's methodological competence in the relevant discipline. The remaining two fields are chosen, with the approval of the graduate adviser in consultation with the student's individual adviser, from the following: archaeology, anthropology, art, Chinese literature, history, Japanese literature, linguistics, philosophy, and religion. With the adviser's approval, a Ph.D. minor in a supporting field may be deemed equivalent to the completion of one of these three examinations.

5. Demonstrate pedagogical proficiency by serving as a teaching assistant for a minimum of one quarter, and taking DLCL 301 The Learning and Teaching of Second Languages.
6. Pass the University Oral Examination—General regulations governing the oral examination are found in the "Graduate Degrees (p. 45)" section of this Bulletin. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.
7. Submit a dissertation demonstrating ability to undertake original research based on primary and secondary materials in Chinese.

## Doctor of Philosophy in Chinese, Archaeology Subplan

Subplans are printed on the transcript and diploma and are elected via the "Declaration or Change to a Field of Study (<https://studentaffairs.stanford.edu/sites/default/files/registrar/files/grad-subplan-change.pdf>)" form.

1. Complete one of three advanced classical Chinese courses and the requirements for the M.A. Qualified students may, upon consultation with the graduate adviser, be permitted to certify that they have attained the equivalent level of proficiency by passing examinations or presenting documentary evidence. Exemptions may be granted to students who study prehistoric archaeology. Instead, these students should take coursework offered in the Stanford Archaeology Center. Consult with graduate adviser.

		Units
CHINLIT 221	Advanced Classical Chinese: Philosophical Texts	3-5
CHINLIT 222	Advanced Classical Chinese: Historical Narration	2-5
CHINLIT 223	Advanced Classical Chinese: Literary Essays	2-5

2. Demonstrate proficiency in at least one supporting foreign language (in addition to Chinese and English), or in a laboratory skill, to be chosen in consultation with the primary adviser according to the candidate's specific research goals. Proficiency (in language(s) and/or laboratory skill must be certified through a written examination or an appropriate amount of coursework, to be determined on a case-by-case basis.

3. Six graduate level CHINGEN or ANTHRO courses appropriate to the Chinese Archaeology track, as approved by the adviser:

		Units
The following courses are offered this year:		
CHINGEN 218	Constructing National History in East Asian Archaeology	3-5
CHINGEN 241	Emergence of Chinese Civilization from Caves to Palaces	3-4
ANTHRO 303	Introduction to Archaeological Theory	5
ANTHRO 307	Archaeological Methods	5
ANTHRO 308	Proposal Writing Seminar in Cultural and Social Anthropology	5
ANTHRO 311G	Introduction to Culture and Society Graduate Studies in Anthropology	2
ANTHRO 310G	Introduction to Graduate Studies	2

4. Serve as a teaching assistant for two quarters and research assistant in an archaeology laboratory for two quarters.
5. Pass qualifying examinations in Chinese archaeology.
6. Carry out fieldwork related to dissertation research.

7. Pass University oral examination. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.

8. Submit a dissertation demonstrating ability to undertake original research based on primary materials in Chinese or data related to China.

## Doctor of Philosophy in Japanese

The Ph.D. program in Japanese is designed to prepare students for a doctoral degree in Japanese literature, cultural history, or linguistics. Applicants must have a minimum of three years of Japanese language study at Stanford or the equivalent to be considered for admission. Ph.D. students will complete M.A. requirements on the way to advancing to Ph.D. candidacy (see department guidelines for admission to candidacy above). The majority of required course work for Ph.D. students demands the ability to read primary and secondary materials in Japanese. Advanced standing may be considered for students entering the Ph.D. program who have already completed an M.A. in Japanese literature or linguistics elsewhere only in cases when the level of prior course work and research is deemed equivalent to departmental requirements for the Ph.D. All courses must be taken for a letter grade.

A candidate must fulfill the following requirements:

1. Demonstrate proficiency in both modern and classical Japanese language by completing the following courses, or by demonstrating an equivalent level of linguistic attainment by passing the appropriate certifying examinations:

Fourth-Year Japanese:

JAPANLNG 213	Fourth-Year Japanese, Third Quarter	3-5
--------------	-------------------------------------	-----

Premodern Japanese:

JAPANLIT 246	Introduction to Premodern Japanese	3-5
JAPANLIT 247	Readings in Premodern Japanese	2-5

2. Demonstrate proficiency in at least one supporting language, to be chosen in consultation with the primary adviser according to the candidate's specific research goals. Reading proficiency must be certified through a written examination or an appropriate amount of course work, to be determined on a case-by-case basis. When deemed necessary by the student's adviser(s), working knowledge of a third language may also be required. Students concentrating in classical Japanese literature are normally expected to fulfill this requirement by completing *kanbun*:

Classical Japanese

JAPANLIT 248	Readings in Classical Japanese	5
--------------	--------------------------------	---

JAPANLIT 249 (not offered this year) also fulfills this requirement

Or, First-year Classical Chinese; take the following three courses:

CHINLIT 205	Beginning Classical Chinese, First Quarter	2-5
CHINLIT 206	Beginning Classical Chinese, Second Quarter	2-5
CHINLIT 207	Beginning Classical Chinese, Third Quarter	2-5

3. Complete eight adviser-approved courses numbered above 200 from among the offerings of the Department of East Asian Languages and Cultures. At least four of these eight courses must be advanced seminars numbered above 300. At least one of these eight courses must deal with Japanese linguistics. For students focusing on modern literature, at least two of these eight courses must deal with premodern material, and for students focusing on premodern literature, at least two of the eight courses must deal with modern material.

JAPANGEN 221	Translating Japan, Translating the West	3-4
JAPANLIT 224	Dramatic Manga	2-4

JAPANGEN 286	Theme and Style in Japanese Art	4
JAPANGEN 287	Romance, Desire, and Sexuality in Modern Japanese Literature	3-4
JAPANGEN 238	Introduction to Modern Japanese Literature and Culture	3-4
JAPANLIT 257	Points in Japanese Grammar	2-4
JAPANLIT 270	The Tale of Genji and Its Historical Reception	4
JAPANLIT 276	Modern Japanese Short Stories	2-4
JAPANLIT 279	Research in Japanese Linguistics	2-4
JAPANLIT 281	Japanese Pragmatics	2-4
JAPANLIT 287	Pictures of the Floating World: Images from Japanese Popular Culture	5
JAPANGEN 287A	The Japanese Tea Ceremony: The History, Aesthetics, and Politics Behind a National Pastime	5
JAPANLIT 296	Modern Japanese Literature	2-5
JAPANLIT 298	The Theory and Practice of Japanese Literary Translation	2-5
JAPANGEN 384	Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting	4
JAPANLIT 396	Modern Japanese Literature Seminar	2-5

4. Complete two upper-division or graduate-level courses in two supporting fields, for a total of four courses outside of Japanese literature or linguistics. Supporting fields, to be determined in consultation with the student's primary adviser, may include Japanese anthropology, art, history, philosophy, politics, and religion, Chinese literature, comparative literature, etc.

Units

5. JAPANLIT 201 Proseminar: Introduction to Graduate Study in Japanese 2-5

Units

6. Pass a comprehensive qualifying examination that tests the candidate's breadth and depth in the primary field of research and methodological competence in the relevant discipline.
7. Demonstrate pedagogical proficiency by serving as a teaching assistant for a minimum of one quarter and taking DLCL 301 The Learning and Teaching of Second Languages (3 units).
8. Pass the University Oral Examination. General regulations governing the oral examination are found in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this Bulletin. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.
9. Submit a dissertation demonstrating ability to undertake original research based on primary and secondary materials in Japanese.

Units

## Doctor of Philosophy in Japanese, Linguistics Track

1. Demonstrate proficiency in both modern and classical Japanese language by completing the following courses, or by demonstrating an equivalent level of linguistic attainment by passing the appropriate certifying examinations:

JAPANLNG 213	Fourth-Year Japanese, Third Quarter	3-5
JAPANLIT 246	Introduction to Premodern Japanese	3-5
JAPANLIT 247	Readings in Premodern Japanese	2-5

Units

2. Demonstrate proficiency in at least one supporting language, to be chosen in consultation with the primary adviser according to the candidate's specific research goals. Reading proficiency must be certified through a written examination or an appropriate amount of course work, to be determined on a case-by-case basis. When deemed

Units

necessary by the student's adviser(s), working knowledge of a third language may also be required.

3. Complete six adviser-approved courses numbered above 200 from among the offerings of the Department of East Asian Languages and Cultures. At least one of these six courses must be an advanced seminar numbered above 300. At least one of these six courses must deal with Japanese literature.
4. Complete five upper-division or graduate-level courses in linguistics and other supporting fields. To be determined in consultation with the student's primary adviser, these may include applied linguistics, Chinese linguistics, psychology, education, anthropology, sociology, etc.
5. Complete JAPANLIT 279 Research in Japanese Linguistics
6. Submit two qualifying papers presenting substantial research in two different subfields of Japanese linguistics.
7. Submit an annotated bibliography pertaining to the topic of dissertation.
8. Demonstrate pedagogical proficiency by serving as a teaching assistant for a minimum of one quarter and taking DLCL 301 The Learning and Teaching of Second Languages
9. Pass the University Oral Examination. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.
10. Submit a dissertation demonstrating ability to undertake original research based on primary and secondary materials in Japanese.

## Ph.D. Minor in East Asian Languages and Cultures

A student taking a Ph.D. minor in Chinese or Japanese must complete at least 30 units of work within the department at the 200 and 300 level, chosen in consultation with a department adviser. The student must take either CHINLIT 201 Proseminar: Bibliographic and Research Methods in Chinese Studies or JAPANLIT 201 Proseminar: Introduction to Graduate Study in Japanese unless the department is satisfied that work done elsewhere has provided similar training. The student must also pass a written examination in the Chinese or Japanese language.

*Emeriti:* (Professors) Albert E. Dien, Makoto Ueda, John Wang;

(Associate Professor) Susan Matisoff; (Senior Lecturer) Yin Chuang

*Chair:* Ronald Egan

*Directors of Graduate Studies:* Steven Carter (Japanese), Ban Wang (Chinese)

*Directors of Undergraduate Studies:* Yiqun Zhou

*Professors:* Steven D. Carter, Ronald Egan, Li Liu (on leave 2015-16), Yoshiko Matsumoto, Chao Fen Sun, Melinda Takeuchi (East Asian Languages and Cultures, Art and Art History), Ban Wang (East Asian Languages and Cultures, Comparative Literature)

*Acting Professors:* Thomas Bartlett, Yanli Gao

*Associate Professors:* Haiyan Lee (on leave 2015-16), Indra Levy, James Reichert (on leave 2015-16), Yiqun Zhou

*Assistant Professors:* Dafna Zur

*Consulting Professor:* Richard Dasher

*Lecturers:* Paul Festa, Regina Llamas

*Postdoctoral Fellows:* Rebecca Corbett

Chinese-Japanese Area Studies Faculty:

*Professors:* Gordon Chang (History), Richard Dasher (Center for Integrated Systems), Mark E. Lewis (History), Paul Harrison (Religious Studies), John Kieschnick (Religious Studies), Jean Oi (Political Science), David Palumbo-Liu (Comparative Literature), Gi-Wook Shin (Sociology), Matthew Sommer (History), Richard Vinograd (Art and Art History), Andrew Walder (Sociology), Kären Wigen (History), Lee H. Yearley (Religious Studies), Xueguang Zhou (Sociology)

*Associate Professors:* Miyako Inoue (Anthropology), Matthew Kohrman (Anthropology), Yumi Moon (History), Thomas Mullaney (History), Jun Uchida (History),

*Assistant Professors:* Phillip Lipsy (Political Science), Jean Ma (Art and Art History)

## East Asian Studies

Courses offered by the Center for East Asian Studies are listed under the subject code EASTASN on the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) web site. The EASTASN courses listed on ExploreCourses deal primarily with China, Japan, and Korea. Literature courses are listed with the subject codes of CHINGEN (<https://explorecourses.stanford.edu/search?filter-term=Autumn=on&filter-catalognumber=CHINGEN&filter-coursestatus=Active=on&view=catalog&filter-term=Spring=on&collapse=&filter-term=Winter=on>), CHINLIT (<https://explorecourses.stanford.edu/search?filter-term=Autumn=on&filter-catalognumber=CHINLIT=on&filter-term=Summer=on&page=0&q=CHINLIT&filter-coursestatus=Active=on&view=catalog&filter-term=Spring=on&collapse=&filter-term=Winter=on>), JAPANGEN (<https://explorecourses.stanford.edu/search?filter-term=Autumn=on&filter-catalognumber=JAPANGEN=on&filter-term=Summer=on&page=0&q=JAPANGEN&filter-coursestatus=Active=on&view=catalog&filter-term=Spring=on&collapse=&filter-term=Winter=on>), JAPANLIT (<https://explorecourses.stanford.edu/search?filter-term=Autumn=on&filter-catalognumber=JAPANLIT=on&filter-term=Summer=on&page=0&q=JAPANLIT&filter-coursestatus=Active=on&view=catalog&filter-term=Spring=on&filter-term=Winter=on>), KORGEN (<https://explorecourses.stanford.edu/search?filter-term=Autumn=on&filter-catalognumber=KORGEN=on&filter-term=Summer=on&page=0&q=KORGEN&filter-coursestatus=Active=on&view=catalog&filter-term=Spring=on&collapse=&filter-term=Winter=on>), and KORLIT (<https://explorecourses.stanford.edu/search?q=KORLIT&view=catalog&page=0&academicYear=&filter-term=Autumn=on&filter-term=Winter=on&filter-term=Spring=on&filter-term=Summer=on&collapse=&filter-catalognumber=KORLIT=on&filter-coursestatus=Active=on&filter-catalognumber=KORLIT=on>) on ExploreCourses.

Courses in Chinese, Japanese, and Korean language instruction use the subject codes CHINLANG, JAPANLNG, and KORLANG. Courses in Classical Chinese are listed under the subject code CHINLIT (<https://explorecourses.stanford.edu/search?filter-term=Autumn=on&filter-catalognumber=CHINLIT=on&filter-term=Summer=on&page=0&q=CHINLIT&filter-coursestatus=Active=on&view=catalog&filter-term=Spring=on&collapse=&filter-term=Winter=on>).

## Mission

The Center for East Asian Studies (CEAS) supports teaching and research on East Asia-related topics across all disciplines; disseminates knowledge about East Asia through projects of local, regional, national,

and international scope; and serves as the intellectual gathering point for a collaborative and innovative community of scholars and students of East Asia. CEAS works with all schools, departments, research centers, and student groups to facilitate and enhance all aspects of East Asia-related research, teaching, outreach and exchange across the Stanford campus.

CEAS is part of Stanford Global Studies (<http://sgs.stanford.edu>) in the School of Humanities and Sciences (<http://humsci.stanford.edu>). As an East Asia National Resource Center (NRC), supported by the U.S. Department of Education, CEAS serves to strengthen access to and training in the major languages of East Asia, and to broaden East Asia area studies training across all disciplines.

Many other theoretical and methodological courses within various departments at Stanford are taught by faculty who are East Asian specialists; these courses often have a substantial East Asian component and a list of current applicable courses from outside departments may be found on the "Approved Courses" tab of this bulletin.

## Undergraduate Programs in East Asian Studies

Undergraduates interested in East Asia can become involved by attending CEAS events, taking courses in the subject codes listed above, or earning a Minor or Bachelor of Arts degree in East Asian Studies. These undergraduate degrees in East Asian Studies are now administered by the Department of East Asian Cultures and Languages (p. 421). Stanford Global Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/sgs>) offers internship opportunities in East Asia, and the Bing Overseas Study Program (<http://bosp.stanford.edu>) offers study abroad opportunities in East Asia.

For language study, CEAS provides undergraduate fellowships for language study in China, Japan, or Korea; students must simultaneously apply to a pre-approved language program abroad. Applications are due in February each year. Deadlines and application information can be found on the CEAS web site (<http://ceas.stanford.edu/students/ceas-prizes-and-fellowships.php>). In addition, undergraduates can obtain a coterminal M.A. degree in East Asian Studies (<http://ceas.stanford.edu/students/how-to-apply.php>) while concurrently working on their undergraduate major by applying during the regular admissions cycle no later than their senior year.

## Graduate Programs in East Asian Studies

### Master's Program

Stanford's interdisciplinary M.A. program in East Asian Studies is designed both for students who plan to complete a Ph.D. but who have not yet decided on the particular discipline in which they prefer to work, and for students who wish to gain a background in East Asian Studies in connection with a career in nonacademic fields such as business, law, education, journalism, or government service. The program permits the student to construct a course of study suited to individual intellectual interests and career needs, and may be completed within 1 to 3 years, depending on the course load taken and the amount of foreign language training required. Advanced language students or students who are native speakers of Chinese, Japanese, or Korean can potentially complete the program within one year. Students interested in pursuing professional careers are encouraged to plan for additional training through internships or additional graduate professional programs, in conjunction with obtaining an M.A. in East Asian Studies.

The M.A. program allows students a great deal of flexibility in combining language training, interdisciplinary area studies, and a disciplinary concentration. Students are required to demonstrate third year level proficiency in Chinese, Korean or Japanese, according to their research-

area focus (either through coursework at Stanford or testing at the 4th year or higher in language-placement exams), to take the one-unit core course in East Asian Studies, and to complete at least nine area studies graduate courses, three of which must be in a single department or in the same thematic focus. An M.A. thesis, usually an expansion of a paper written for a graduate seminar or colloquium, is required.

### Learning Outcomes

The purpose of the master's program is to further develop specialized knowledge and skills in East Asian Studies, and to prepare students for a professional career or doctoral studies. This is achieved through the completion of East Asia content courses, language training as necessary, and experience with independent research.

### Postdoctoral Programs

The Center for East Asian Studies offers a postdoctoral fellowship in Chinese Studies (<http://ceas.stanford.edu/resources/chinesePostdoctoral.php>) each year. Postdoctoral fellowships in other areas are available from campus units including but not limited to the Freeman-Spogli Institute for International Studies (<http://fsi.stanford.edu/fellowships>), the Walter H. Shorenstein Asia-Pacific Research Center (<http://aparc.fsi.stanford.edu/fellowships>), and the Stanford Humanities Center (<http://shc.stanford.edu/fellowships>).

### Financial Aid

CEAS offers various types of funding for new and continuing students. See the fellowships page (<http://ceas.stanford.edu/students/ceas-prizes-and-fellowships.php>) of the CEAS web site for the most up-to-date offerings.

## Master of Arts in East Asian Studies

University requirements for the master's degree are described in the "Graduate Degrees (p. 45)" section of this bulletin.

The master's degree program allows a great deal of flexibility in combining language training, interdisciplinary area studies, and a disciplinary concentration. The Director of the Center assigns preliminary faculty advisers to all students. Members of the staff and faculty are available for academic and career planning. The M.A. program is designed to be completed in one year and students are urged to complete the degree requirements within that first year (3 quarters) unless their goals and background dictate otherwise.

Applicants must submit scores for the General Test of the Graduate Record Examination, official transcripts and a writing sample along with their online application. Foreign applicants are also required to take the Test of English as a Foreign Language (TOEFL). Applications for admission and financial aid should be made online; see the Graduate Admissions (<http://gradadmissions.stanford.edu>) web site. The deadline for submitting applications for the 2016-17 academic year is December 8, 2015.

### Coterminal Master's Program in East Asian Studies

The center admits a limited number of Stanford undergraduates to work toward a coterminal M.A. degree in East Asian Studies. Applications are accepted once a year during the regular CEAS M.A. application cycle. The deadline for the 2016-17 academic year is December 8, 2015. Students may apply after completing 120 units, but no later than the quarter prior to the expected completion of the undergraduate degree. Applicants are expected to meet the same standards as those seeking admission to the M.A. program, and they must submit the following directly to the Center's office:

- a completed Application for Admission to Coterminal Masters' Program (<https://stanford.box.com/CotermApplic>)
- a written statement of purpose (<https://stanford.box.com/CotermApplic>)

- an unofficial Stanford transcript
- three letters of recommendation, at least two of which should be from members of the department of concentration
- first 15 pages of a representative writing sample (such as a seminar paper, term paper, honors thesis, or journal article.)
- copy of scores from the General Test of the Graduate Record Exam (official score should be sent to Stanford's school code 4704)
- a list of courses the applicant intends to take to fulfill degree requirements.

Coterm applications are reviewed along with peer applications by the M.A. Admissions Committee of the Center for East Asian Studies (CEAS) (<http://ceas.stanford.edu/students/how-to-apply.php>).

Students must meet all requirements for both B.A. and M.A. degrees. They must complete a total of 15 full-time quarters or the equivalent, or three full quarters after completing 180 units for a total of 226 units. Coterminals are not eligible for University financial aid, but are eligible to apply for Foreign Language and Area Studies (FLAS) (<http://ceas.stanford.edu/students/ceas-prizes-and-fellowships.php>) and other fellowships administered by CEAS.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

## Degree Requirements

### Language Requirement

Students must complete the equivalent of Stanford's first three full years of language training in Chinese, Japanese, or Korean. Other East Asian languages may be accepted by petition. Students entering the program without any language preparation should complete first- and second-year Chinese, Japanese, or Korean within the first year of residence at Stanford if they intend to graduate within two years (this would necessitate completing a summer language program). All language courses taken at Stanford used towards fulfilling the language requirement must be for letter grades and completed with a grade of 'B' or higher. Conversation classes cannot be used for meeting this requirement, and units from the language courses numbered 1-99 do not count toward the 46 units required for the degree. Language courses numbered 100 and above can be used towards meeting the 46 units minimum for the degree, but cannot be used towards fulfilling the

content courses requirement unless the language course is at the fourth-year level or above, and the student is specializing in literature.

The language requirement may be satisfied in part or in full by placing into an appropriate Stanford language class through the language proficiency exam given by the Language Center. Students who fulfill this minimum three-year language requirement before completing other requirements are encouraged to continue language study, or take courses in which Chinese, Japanese, or Korean are used, for as long as they are in the program.

The language used to meet the three-year language proficiency requirement should match the student's country/region of focus.

Students in the M.A. program are also eligible to apply for the Inter-University language programs in Beijing and Yokohama. Work completed in one of these programs may be counted toward the M.A. degree's language requirement if students take and pass the corresponding Stanford language proficiency exam after the program. Work completed in these overseas programs will not be counted towards the overall unit requirements.

Language courses are listed under the following subject codes on the Stanford Bulletin's ExploreCourses web site: CHINLANG, JAPANLNG, and KORLANG.

### M.A. Thesis Requirement

A master's thesis, representing a substantial piece of original research, should be filed with the center's program office as part of the graduation requirements. With the adviser's approval, the master's thesis requirement may be satisfied by expanding a research paper written for an advanced course, and should have a minimum of 10,000 words in the main body of the thesis (excluding references, citations, appendices, etc.). The M.A. thesis is due at noon on the last day of classes, of the quarter in which the student applies to graduate; see the Academic Calendar (p. 3) for specific dates.

### Area Studies and Unit Requirements

Students must complete a minimum total of 46 units for the degree at Stanford, comprised of:

1. 1-unit core course, EASTASN 330 Core Seminar: Issues and Approaches in East Asian Studies
2. At least 9 approved content courses, at least 30 units of which must be at or above the 200 level (at or above 300 level for HISTORY courses) and meeting the following criteria:
  - a. Are on the approved East Asian Studies course list (see Approved Courses tab (p. 436)), or have been approved by petition (maximum 3 petitions)
  - b. Taken for a letter grade and completed with a 'B' or higher ('P' or higher in GSB courses and Law courses)
  - c. Taken for 3 units or more
  - d. Do not count as part of the language requirement (language courses beyond third-year level are accepted for students specializing in literature)
  - e. At least 3 of the 9 courses must be either in the same department or within the same thematic focus across several departments (see sample themes below).
3. Additional courses as necessary to reach the minimum 46 units for the degree meeting the following criteria:
  - a. Taken for a letter grade
  - b. At least level 100 or above (above 200 for HISTORY courses)
  - c. Must be an academic content course - such as a lecture, seminar, or colloquium (no activity courses, EFS language

classes, etc.). Language classes are okay if the course number is above level 100 and it is taken for a letter grade.

- The cumulative grade point average (GPA) for all courses must be 3.0 or higher; grades for the 9 content courses must be a 'B' or higher.

### Sample Theme 1

		Units
ANTHRO 253A	Population and social trends in Japan	3-5
HISTORY 392D	Japan in Asia, Asia in Japan	4-5
HISTORY 396D	Historiography of Modern Japan	4-5

### Sample Theme 2

		Units
KORGEN 201	Kangnam Style: Korean Media and Pop Culture	4
EASTASN 289K	The Korean Economy: Past, Present and Future	3
HISTORY 392G	Modern Korea	4-5

### Sample Theme 3

		Units
IPS 246	China on the World Stage	3-5
POLISCI 340L	China in World Politics	5
POLISCI 348	Chinese Politics: The Transformation and the Era of Reform	5

## Course Petitions and Directed Reading

Some theory-oriented or methodological courses may be used to meet part of the 9 courses requirements, provided that they are demonstrably useful for understanding East Asian problems. A course petition (<http://ceas.stanford.edu/students/forms.php>) and syllabus must be submitted no later than the end of the second week of the quarter in which the course is offered. Students are limited to 3 petitions total. Credit toward the area studies requirement is not given for courses taken before entering the M.A. program, however students may take courses for exchange credit at the University of California, Berkeley, with the approval of their adviser and the Office of the University Registrar.

Students may choose to enroll in a directed reading course with a faculty member if the current course offerings do not meet a particular research or study need. Directed reading courses are independent study projects a student may undertake with a relevant Stanford faculty member. Once the student has found a faculty member to support his or her studies, the student must inform the Student Services Coordinator immediately so that the appropriate section can be added for EASTASN 300 Graduate Directed Reading. The limitations for directed reading units are:

- A maximum of 5 units may apply towards the 46-unit degree requirement.
- If applying the units to the 9 courses requirement, the student must submit a detailed syllabus approved by their directed reading instructor prior to enrolling in the course.
- It must be taken for a letter grade.

## Joint and Dual Degree Programs in East Asian Studies

### East Asian Studies and Law

This joint degree program grants an M.A. degree in East Asian Studies and a Doctor of Jurisprudence (J.D.) degree. It is designed to train students interested in a career in teaching, research, or the practice of law related to East Asian legal affairs. Students must apply separately to the East Asian Studies M.A. program and to the Stanford School of Law and be accepted by both. Completing this combined course of study requires approximately four academic years, depending on the student's background and level of training in Chinese, Japanese, or

Korean. Up to 45 units of approved courses may be counted towards both degrees. For more information, see the "Joint Degree Programs (<http://web.stanford.edu/dept/registrar/bulletin1112/7376.htm>)" section of this bulletin and the Stanford Law School's web site (<http://www.law.stanford.edu/degrees/joint>). Students who have been accepted by both programs should consult with the departments to determine which courses can be double-counted.

### East Asian Studies and Education

This dual degree program grants an M.A. degree in East Asian Studies and a secondary school teaching credential in social studies. To be eligible for this program, students should apply to the M.A. program in East Asian Studies and then apply to the Stanford Teacher Education Program during the first year at Stanford. Completing the dual program requires at least two years, including one summer session when beginning the education component of the program. Admissions processes for both programs are completely independent of each other and units from courses can only be applied to one degree or the other, not both.

### East Asian Studies and Business

This dual degree program grants an M.A. degree in East Asian Studies and a Master of Business Administration degree. Students must apply separately to the East Asian Studies M.A. program and the Graduate School of Business and be accepted by both. Completing this combined course of study requires approximately three academic years (perhaps including summer sessions), depending on the student's background and level of training in Chinese, Japanese, or Korean language. Admissions processes for both programs are completely independent of each other and units from courses can only be applied to one degree or the other, not both.

*Director:* Gordon Chang

*Affiliated Faculty and Staff:*

*Anthropology:* Lisa M. Curran, Miyako Inoue, James Holland Jones (on leave 2015-16), Matthew Kohrman, Stephen Murphy-Shigematsu, Barbara Voss, Sylvia J. Yanagisako

*Art and Art History:* Jean Ma, Melinda Takeuchi, Richard Vinograd, Xiaoze Xie

*Biology:* Marcus W. Feldman (on leave AUT & SPR), Peter Vitousek

*Business:* William Barnett, Charles M. Lee, Hau Lee, Joseph Piotroski, Kenneth Singleton, David W. Brady, Condoleezza Rice

*Center for International Security and Cooperation:* Chaim Braun

*Civil and Environmental Engineering:* David Freyberg (on leave 2015-16), Renate Fruchter, Leonard Ortolano (on leave AUT)

*Communication:* James Fishkin

*Comparative Literature:* David Palumbo-Liu

*Earth System Science:* Page Chamberlain, Eric F. B. Lambin, Rosamond L. Naylor

*East Asian Languages and Cultures:* Steven Carter, Ronald Egan, Haiyan Lee (on leave 2015-16), Indra Levy, Li Liu (on leave 2015-16), Yoshiko Matsumoto, James Reichert (on leave 2015-16), Chao Fen Sun, Melinda Takeuchi, Ban Wang, John C. Y. Wang (emeritus), Yiqun Zhou, Dafna Zur

*East Asian Studies:* Jindong Cai, Alice L. Miller, Xiaoneng Yang

*Economics:* Kalina Manova

*Education:* Anthony L. Antonio, Martin Carnoy, Francisco O. Ramirez, Christine M. Wotipka

*Electrical Engineering:* Richard Dasher

*Freeman Spogli Institute for International Studies:* Michael H. Armacost, Karl W. Eikenberry, Donald K. Emmerson (emeritus), Thomas Fingar, Francis Fukuyama, Takeo Hoshi, Charlotte Lee, Yong Suk Lee, Scott D. Rozelle, Daniel C. Sneider, David Straub, Mark Thurber, Li-Tai Xu

Note: Faculty leave information is correct as of August 3, 2015. Latest information can be found on the relevant departmental section of this bulletin.

## Approved Content Courses

Because East Asian Studies is an interdisciplinary major, the majority of the courses that apply toward the degree are listed under other departments. In addition to courses listed under the EASTASN subject code, students should check the list below, as well as on the Stanford Bulletin's ExploreCourses site (<http://explorecourses.stanford.edu>) for courses in other departments that will meet the degree requirements for East Asian Studies; such departments include (but are not limited to) Anthropology, East Asian Languages and Cultures, History, Political Science, Religious Studies, and Sociology. Not all courses offered by other departments that have East Asia content may be listed below or on the CEAS web site. If there is a course not listed below that has East Asia content, check with the Center for East Asian Studies to verify whether or not it can be used to fulfill the degree requirements.

The following course list represents courses that may, with the adviser's approval, be used to fulfill degree requirements (please see the Law

School (<http://www.law.stanford.edu/organizations/offices/office-of-the-registrar/stanford-non-law-student-course-registration>) or GSB (<http://www.gsb.stanford.edu/nongsbreg>) web sites for instructions on how to enroll in their courses):

## China

## Economics

Courses offered by the Department of Economics (<http://economics.stanford.edu>) are listed under the subject code ECON on the Stanford Bulletin's ExploreCourses web site.

The department's purpose is to acquaint students with the economic aspects of modern society, to familiarize them with techniques for the analysis of contemporary economic problems, and to develop in them an ability to exercise judgment in evaluating public policy. There is training for the general student as well as for those who plan careers as economists in civil service, private enterprise, teaching, or research.

The department's curriculum is an integral part of Stanford's programs in International Relations, Public Policy, and Urban Studies.

The faculty interests and research cover a wide spectrum of topics in most fields of economics, including behavioral economics, comparative institutional analysis, econometrics, economic development, economic history, experimental economics, industrial organization, international trade, labor, macro- and microeconomic theory, mathematical economics, environmental economics, and public finance.

## Mission of the Undergraduate Program in Economics

The mission of the undergraduate program in Economics is to acquaint students with the economic aspects of modern society, to familiarize them with techniques for the analysis of contemporary economic problems, and to develop in them an ability to exercise judgment in evaluating public policy. The program introduces students to macro- and microeconomic theory, teaches them to think and write clearly about economic problems and policy issues and to apply the basic tools of economic analysis. The undergraduate major provides an excellent background for those who plan careers in government and private enterprise as well as those pursuing graduate degrees in professional schools or in the field of economics.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning

outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. understanding of core knowledge within Economics.
2. ability to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
3. ability to write clearly and persuasively and communicate ideas clearly.
4. ability to evaluate theory and critique research within the discipline.

## Graduate Programs in Economics

The primary objective of the graduate program is to educate students as research economists. In the process, students also acquire the background and skills necessary for careers as university teachers and as practitioners of economics. The curriculum includes a comprehensive treatment of modern theory and empirical techniques. Currently, 20 to 25 students are admitted each year.

Graduate programs in economics are designed to ensure that students receive a thorough grounding in the methodology of theoretical and empirical economics, while at the same time providing specialized training in a wide variety of subfields and a broad understanding of associated institutional structures. Toward these ends, the program is arranged so that the student has little choice in the curriculum at the outset but considerable latitude later on.

Students admitted to graduate standing in the department are expected to have a strong background in college-level economics, mathematics, and statistics. Preparation ordinarily consists of a college major in economics, a year-long calculus sequence that includes multivariate analysis, a course in linear algebra, and a rigorous course in probability and statistics.

## Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Economics and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Economics. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Economics and to interpret and present the results of such research.

## Fellowships and Assistantships

The department awards a number of fellowships for graduate study. Many first-year and a few second- or third-year students are typically awarded full fellowships, including a stipend and tuition. All students whose records justify continuation in the program may be assured support for the second through fourth years in the form of employment as a teaching or research assistant. These half-time appointments provide a stipend and tuition allowance. Entering students are not normally eligible for research or teaching assistantships.

## Bachelor of Arts in Economics

The total number of units required for the major is 80. Students are encouraged to complete the core courses 1-6 below, as early as possible. Ideally, students should complete the core during the sophomore year, before taking upper division courses. Courses may not be taken before the prerequisites are completed. The required number of field courses is

five. There is great flexibility in the choice of electives, including upper-division math and statistics.

Of the 80 units required for the major, at least 55 must be taken at Stanford in California. Students cannot declare Economics as their major or minor until they have completed ECON 50 Economic Analysis I with a grade of 'B' or better. All courses required for the economics major must be taken for a letter grade.

## Requirements for the Economics Major (80 Units)

### Core Courses; 30 units

		Units
ECON 1	Principles of Economics	5
ECON 50	Economic Analysis I (Prerequisites: ECON 1 and MATH 51 (letter grade required))	5
ECON 51	Economic Analysis II (Prerequisite: ECON 50)	5
ECON 52	Economic Analysis III (Prerequisites: ECON 50)	5
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists (Prerequisite: MATH 41 or equivalent) <sup>1</sup>	5
ECON 102B	Applied Econometrics (Prerequisite: ECON 102A) <sup>2</sup>	5

<sup>1</sup> It is recommended that students satisfy this basic statistics requirement before proceeding with the rest of the program.

<sup>2</sup> Material in ECON 102B Applied Econometrics is used in a number of field courses. Students are advised to design their program of study so that ECON 102B Applied Econometrics is not taken in their senior year but early in their program.

### Field Courses; 25 units

Must be taken at Stanford in California. Select five of the following courses.

Select five of the following:	Units
ECON 102C Advanced Topics in Econometrics	25
ECON 111 Money and Banking	
ECON 112 Financial Markets and Institutions: Recent Developments	
ECON 113 Economics of Innovation (not offered this year)	
ECON 118 Development Economics	
ECON 125 Economic Development, Microfinance, and Social Networks	
ECON 126 Economics of Health and Medical Care	
ECON 128 Economic Development: A Historical Perspective	
ECON 135 Finance for Non-MBAs <sup>2</sup>	
ECON 136 Market Design (not offered this year) <sup>1</sup>	
ECON 137 Decision Modeling and Information <sup>4</sup>	
ECON 140 Introduction to Financial Economics <sup>2</sup>	
ECON 141 Public Finance and Fiscal Policy	
ECON 145 Labor Economics	
ECON 146 Economics of Education	
ECON 149 The Modern Firm in Theory and Practice	
ECON 153 Economics of the Internet	
ECON 155 Environmental Economics and Policy	
ECON 157 Imperfect Competition	
ECON 158 Regulatory Economics	
ECON 160 Game Theory and Economic Applications <sup>3</sup>	
ECON 164 (not offered this year)	
ECON 165 International Finance (not offered this year)	
ECON 166 International Trade	

ECON 179	Experimental Economics (not offered this year)
ECON 180	Honors Game Theory <sup>3</sup>
ECON 181	Honors Information and Incentives <sup>4</sup>
ECON 182	Honors Market Design <sup>1</sup>
ECON 198	Junior Honors Seminar
ECON 199D	Honors Thesis Research

<sup>1</sup> Students may not count units from both ECON 136 and ECON 182 Honors Market Design towards their field course requirements as the courses cover similar subject matter.

<sup>2</sup> Students may not count units from both ECON 135 Finance for Non-MBAs and ECON 140 Introduction to Financial Economics towards their major as the courses are too similar in content.

<sup>3</sup> Students may not count units from both ECON 160 Game Theory and Economic Applications and ECON 180 Honors Game Theory towards their field course requirements as the courses cover similar subject matter.

<sup>4</sup> Students may not count units from both ECON 137 and ECON 181 towards their field course requirements as the courses are too similar in content.

### Writing in the Major Course; 5 units

Must be taken at Stanford in California. This course should be taken only after completing ECON 51 Economic Analysis II and ECON 52 Economic Analysis III, ECON 102B Applied Econometrics, and at least two field courses.

	Units
ECON 101 Economic Policy Seminar	5

### Electives; 20 units

20 units in addition to the field courses taken; choose from ECON courses numbered from 100 through 198 (excluding Econ 152).

	Units
Up to 10 units may be satisfied by:	
MATH 113 Linear Algebra and Matrix Theory	3
MATH 115 Functions of a Real Variable	3
MATH 136 Stochastic Processes	3
MATH 151 Introduction to Probability Theory	3
MATH 171 Fundamental Concepts of Analysis	3
MATH 175 Elementary Functional Analysis	3
STATS 200 Introduction to Statistical Inference	3
STATS 206 Applied Multivariate Analysis	3
STATS 207 Introduction to Time Series Analysis	3
STATS 217 Introduction to Stochastic Processes	3
STATS 218 Introduction to Stochastic Processes	3
STATS 237 Theory of Investment Portfolios and Derivative Securities	3
CS 161 Design and Analysis of Algorithms	3-5
CS 221 Artificial Intelligence: Principles and Techniques	3-4
CS 227B General Game Playing	3
CS 229 Machine Learning	3-4

A maximum of 10 units of transfer credit OR of ECON 139D Directed Reading, may be taken under this section. Suitable transfer credit must be approved in writing by the Associate Director of Undergraduate Studies. Advanced undergraduate majors with strong quantitative preparation may enroll in graduate (200-level) courses with permission of the Director of Undergraduate Studies and the course instructor. Some courses offered by Overseas Studies may be counted towards this requirement. The department does not give credit for internships.

## Other Requirements

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit, and 55 of the 80 units required for the major must be taken at Stanford in California.

Students scoring a 5 on both the advanced placement microeconomics and advanced placement macroeconomics exam may petition the Director of Undergraduate Studies to have the ECON 1 Principles of Economics course requirement waived. Students do not receive units credit for placing out of ECON 1 Principles of Economics .

A grade point average (GPA) of 2.0 (C) or better must be received for all units applied toward the preceding requirements.

To use transfer credit in partial satisfaction of the requirements, the student must obtain written consent from the department's Associate Director of Undergraduate Study, who establishes the amount of credit to be granted toward the department requirements (see the Information Book for Economics Majors). Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics major.

Course prerequisites are enforced. Students taking courses to satisfy prerequisites in another department or institution must petition for Stanford course substitution or transfer credit approval in order to satisfy course prerequisites.

The time limit for satisfactory completion of a course is one year from the date an incomplete is given, although instructors may set a shorter time limit. Students are responsible for seeing that all grades of 'incomplete' are cleared within the time limit.

## Flexible Tracks

Flexible Tracks listings of upper-division economics courses are provided to emphasize the diverse interests of Economics majors. Flexible Tracks do not add major requirements. Flexible Tracks may be examined in the department's Information Book for Economics Majors (<http://economics.stanford.edu/undergraduate>). Flexible Tracks are provided for the following areas of emphasis (field courses are in bold):

- Finance (Econ **111, 112, 140 (or 135), 141, 165**, 110, 183, 190)
- Policy (Econ **113, 126, 141, 145, 146, 155, 158**, 150, 154, 159)
- Research (Econ **102C, 136 (or 182), 137 (or 181), 160 (or 180), 198, 199D, 202, 210**, 103)
- Strategy (Econ **136 (or 182), 137 (or 181), 149, 153, 157, 158, 160 (or 180)**, 191)
- International & Development (Econ **113, 118, 125, 128, 165, 166, 164, 106, 114, 117, 121, 127**)
- Behavioral (Econ **178, 179, 136 (or 182), 137 (or 181), 160 (or 180), 144**)

## Honors Program

The honors program offers an opportunity for independent research, creativity, and achievement. It is designed to encourage a more intensive study of economics than is required for the normal major, with course and research work of exceptional quality. Honors students submit their theses in writing and present them during the Honors Research Symposium during Spring Quarter. The honors program requires:

1. Completing all requirements for the major; plus five additional units, bringing the total to 85 units.
2. Achieving a grade point average (GPA) of at least 3.5 for the required courses of the Economics major (excluding ECON 139D Directed Reading and ECON 199D Honors Thesis Research). See details in the Information Book for Economics Majors.
3. Complete ECON 102B Applied Econometrics and at least two lecture courses most relevant for the proposed topic of the honors thesis

by the end of the junior year. (These can be included in the basic 80 units.)

4. Candidates must write an honors thesis in their senior year for at least one unit and up to 10 units of credit (ECON 199D Honors Thesis Research). Winter registration for one unit under the supervision of the Director of the Honors Program is mandatory for all honors students. The thesis must be of very high quality and written under the direction of a member of the department or its affiliated faculty. Units of ECON 199D Honors Thesis Research do not count toward the course work requirements for the basic economics major, or in the computation of the GPA requirement for honors.

Juniors interested in the honors program should contact the honors program director for more information. Prospective candidates for the honors program should submit an application to the director no later than the end of the first month of the third quarter before graduation (typically Autumn Quarter of the senior year). Also required, in the same quarter, is a three-page thesis proposal that must be approved by the thesis adviser.

## Minor in Economics (35 Units)

The minor in Economics has two main goals: to acquaint students with the rudiments of micro- and macroeconomic theory that are required of all majors; and to allow students to build competence in the application of this theory to two fields of economics of their choosing, and the opportunity to specialize further in any one of these fields by taking one additional advanced course in the Department of Economics.

## Course Work

		Units
ECON 1	Principles of Economics	5
ECON 50	Economic Analysis I (Prerequisites: ECON 1 and MATH 51 (letter grade required))	5
ECON 51	Economic Analysis II (Prerequisite: ECON 50)	5
ECON 52	Economic Analysis III (Prerequisites: ECON 50 and 1)	5
Select two of the following: <sup>1</sup>		10
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	
ECON 102B	Applied Econometrics	
ECON 102C	Advanced Topics in Econometrics	
ECON 107	Causal Inference and Program Evaluation	
ECON 111	Money and Banking	
ECON 112	Financial Markets and Institutions: Recent Developments	
ECON 113	Economics of Innovation	
ECON 118	Development Economics	
ECON 125	Economic Development, Microfinance, and Social Networks	
ECON 126	Economics of Health and Medical Care	
ECON 128	Economic Development: A Historical Perspective	
ECON 135	Finance for Non-MBAs <sup>3</sup>	
ECON 136	Market Design <sup>2</sup>	
ECON 137	Decision Modeling and Information	
ECON 140	Introduction to Financial Economics <sup>3</sup>	
ECON 141	Public Finance and Fiscal Policy	
ECON 145	Labor Economics	
ECON 149	The Modern Firm in Theory and Practice	
ECON 153	Economics of the Internet	
ECON 155	Environmental Economics and Policy	
ECON 157	Imperfect Competition	
ECON 158	Regulatory Economics	

ECON 160	Game Theory and Economic Applications <sup>4</sup>
ECON 164	(not offered this year)
ECON 165	International Finance ( )
ECON 166	International Trade
ECON 178	Behavioral Economics
ECON 179	Experimental Economics
ECON 180	Honors Game Theory <sup>4</sup>
ECON 182	Honors Market Design <sup>2</sup>
ECON 198	Junior Honors Seminar
ECON 202	Microeconomics I <sup>5</sup>
ECON 210	Macroeconomics I <sup>5</sup>

<sup>1</sup> Must be taken at Stanford in California

<sup>2</sup> Students may not count units from both ECON 136 and ECON 182 towards their major as the courses cover similar subject matter.

<sup>3</sup> Students may not count units from both ECON 135 Finance for Non-MBAs and ECON 140 Introduction to Financial Economics towards their minor as the courses are too similar in content.

<sup>4</sup> Student may not count units from both ECON 160 Game Theory and Economic Applications and ECON 180 Honors Game Theory towards their major as the courses cover similar subject matter.

<sup>5</sup> Students may enroll with permission of the Director of Undergraduate Studies and the course instructor.

### Other Requirements

At least 20 out of the 35 units for the minor must be taken at Stanford. Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics minor.

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit.\* The combined total of all units for the minor must equate to the grade point average (GPA) of 2.0 (C) or better.

Students must complete their declaration of the minor no later than the last day of the preceding quarter before their degree conferral.

\*Students cannot declare an Economics Minor until they complete Econ 50 with a grade of B or better.

## Master of Arts in Economics

University requirements for the master's degree are described in the "Graduate Degrees" (p. 45) section of this bulletin.

The department does not admit students who plan to terminate their graduate study with the M.A. degree. Economics students may, but need not, elect to add this degree in addition to their current Ph.D. degree. A master's option is also available to currently enrolled Ph.D. candidates from other departments.

### Admission

Prospective students must have completed the Stanford requirements for a B.A. in Economics or approximately equivalent training. Since students are required to take some of the same courses as Ph.D. candidates, similar preparation in mathematics and statistics generally is expected. In order to add this degree to their program plan, current Ph.D. students should submit a Graduate Authorization petition via Axess and submit a M.A. program proposal form to the student services manager for approval.

### Degree Requirements

A master's program must satisfy these criteria:

1. Completing, at Stanford, at least 45 units of credit beyond those required for the bachelor's degree, of which at least 40 units must be in the Department of Economics. Students must complete ECON 202 Microeconomics I and at least three other 200-level courses. They must receive a grade of 'B-' or better in ECON 202 Microeconomics I. Undergraduate courses must be numbered 105 or higher (with the exception of the ECON 102A Introduction to Statistical Methods (Postcalculus) for Social Scientists, ECON 102B Applied Econometrics, ECON 102C Advanced Topics in Econometrics sequence listed below). No seminar courses numbered 300 or above can be counted.
2. Demonstrating competence in empirical methodology by receiving a grade of 'B-' or better in both ECON 270 Intermediate Econometrics I and ECON 271 Intermediate Econometrics II, or by receiving a grade of 'B-' or above in each of ECON 102A Introduction to Statistical Methods (Postcalculus) for Social Scientists, ECON 102B Applied Econometrics, and ECON 102C Advanced Topics in Econometrics.
3. Submitting two term papers (or a thesis of sufficient quality). At least one of these papers must be deemed to represent graduate-level work. Normally, this means that it is written in connection with a 200-level course. A maximum of 10 units of credit can be earned for a thesis (Econ 400 or comparable thesis course in home department) toward the 45-unit degree requirement. In lieu of this paper requirement, students may elect to take two additional 200+ level Economics courses.
4. A grade point average (GPA) of 3.0 must be maintained for all master's level work. All courses must be taken for a letter grade.

## Doctor of Philosophy in Economics

University requirements for the Ph.D. are described in the "Graduate Degrees (p. 45)" section of this bulletin.

Students admitted to graduate standing in the department are expected to have a strong background in college-level economics, mathematics, and statistics. Preparation ordinarily consists of a college major in economics, a year-long calculus sequence that includes multivariate analysis, a course in linear algebra, and a rigorous course in probability and statistics. When deemed appropriate, a student may be required to complete the necessary background preparation at Stanford. All students take a common core curriculum at the outset and later branch out into the desired fields of specialization.

Well-prepared students should anticipate spending, with some overlap, approximately two years in course work and another two years in seminars, independent study, and dissertation research. A minimum of 135 completed units is required for the degree. The goal is to complete the program in four years, although some types of research programs may require at least five years to complete. The department has a strong commitment to guiding students through the program expeditiously.

Questions and petitions concerning the program and the admissions process should be addressed to the Director of Graduate Study, who has responsibility for administering the graduate program.

Specific requirements are best discussed in two stages, the first consisting of requirements for admission to candidacy and the second involving further requirements for earning the degree.

### Admission to Candidacy for Ph.D.

A student may apply for admission to candidacy when the following minimal requirements are met:

1. Successful completion of core sequences in microeconomics, macroeconomics, and econometrics:

#### A. Microeconomics

ECON 202	Microeconomics I
----------	------------------

Units

2-5

ECON 203	Microeconomics II	2-5
ECON 204	Microeconomics III	2-5

**B. Macroeconomics**

ECON 210	Macroeconomics I	2-5
ECON 211	Macroeconomics II	2-5
ECON 212	Macroeconomics III	2-5

**C. Econometrics**

ECON 270	Intermediate Econometrics I	2-5
ECON 271	Intermediate Econometrics II	2-5
ECON 272	Intermediate Econometrics III	2-5

To pass a sequence, an overall grade of B is required for the sequence, and individual course grades must be B- or better.

- Completing the requirements in two additional advanced fields of specialization from the list below or, if approved in advance by the Director of Graduate Study, in one such field together with a substantial amount of work toward a second field taught in a related department (e.g. GSB Finance). Students may request permission from the Director of Graduate Study to create a field not listed as an advanced field below. Requirements for completing a field can usually be satisfied by completing two courses and a paper, although students in some fields may be advised to add a third course, which can then be counted toward the distribution requirement discussed later. A minimum grade average of B is required to pass a field sequence. Individual course grades cannot be less than a B- in order to count for field course credit. Specific requirements for completing each field can be found on the Economics department website (<http://economics.stanford.edu>).
- Completing a candidacy paper, normally written in conjunction with one of the advanced specialty fields selected above. Submission of this paper or another research paper is required by the first day of Autumn Quarter of the third year. Satisfactory presentation of this paper is required in the Autumn quarter third year seminar. It is expected that the student meet, and indeed exceed, the above standards by the end of the first quarter in the third year of residency. When this is not possible for any reason, the Director of Graduate Study should be consulted as early as possible during the third year.

Once it is deemed that the above standards have been met, the student should complete the Application for Candidacy for Degree of Doctor of Philosophy. After a student fulfills the department prerequisites for applying for candidacy and submits their candidacy application form, the faculty will vote to determine whether the student has the potential to successfully complete the requirements of the degree program. If approved, candidacy remains valid for five years (although it can be terminated earlier by the department if progress is deficient); it can be renewed or extended beyond this period only under unusual circumstances. Failure to advance to candidacy results in dismissal from the program.

**Further Requirements for the Ph.D. Degree**

- Third Year Seminar*: presentation of an expanded research paper in Spring Quarter of the third year.
- Distribution Requirement*: Students must complete four other graduate-level courses meeting the following requirements:
  - at least one course from the area of economic history, unless history is one of the two fields of specialization.
  - courses in at least two fields other than the two fields of specialization. Distribution courses cannot be crosslisted in those fields.
  - with advance approval of the Director of Graduate Study, some of these distribution courses may be drawn from related fields taught in other departments. However, including courses taken to meet either the specialization or distribution requirements,

no more than two courses in total may be taken outside the Economics department.

- all courses used to fulfill distribution requirements must be passed with a grade of B or better.
- Teaching Experience*: Each student must serve as a teaching assistant for at least one quarter. It is strongly recommended that this requirement be satisfied before the fourth year of residence.
  - Seminar Participation*: Each student is expected to participate in at least two all-year research seminars by the end of the fourth year of residence. Normally, participation in a seminar requires one or more oral presentations and the submission of a research paper (which, however, need not be completely separate from dissertation research). Detailed information on fulfilling the seminar requirements can be found on the Economics department website (<http://economics.stanford.edu>).
  - Ph.D. Dissertation*: The process involves selecting a topic, choosing an appropriate adviser, submitting a prospectus (signed by the adviser) outlining the proposed research, selecting a three-member reading committee (usually all from the Department of Economics, although exceptions can be made under certain circumstances), passing the University oral examination at which these three faculty (and two other members of the Academic Council) ask questions about the completed research, and submitting a final draft of the work signed by all members of the reading committee. The student is advised to initiate this process as early as possible.

**Graduate Fields****A. Economic Development**

To receive credit for this field, students must complete two courses from the following list and present a research proposal in each course :

		Units
ECON 214	Development Economics I	2-5
ECON 215	Economic Development II	2-5
ECON 216	Development Economics III	2-5
ECON 217	Topics in International Macroeconomics: Theory and Evidence for Latin America:	2-5

Students must pass an oral exam at the end of the second year. Regular attendance at the development economics workshop is required.

**B. Economic History/Institutions**

Students must complete two courses from the following list and develop a research proposal in each course.

		Units
ECON 225	Economics of Technology and Innovation	2-5
ECON 226	U.S. Economic History	2-5
ECON 227	European Economic History	2-5
ECON 228	Institutions and Organizations in Historical Perspective	2-5

Presentation of a research proposal is required at the end of the second year. Regular attendance (at least four quarters) at the economic history workshop is required.

**C. Macroeconomics**

Requirements for this field are completion of two courses from:

		Units
ECON 233	Advanced Macroeconomics I	2-5
ECON 235	Advanced Macroeconomics III	2-5
ECON 236	Financial Economics I	2-5

ECON 237	Financial Economics II	2-5
----------	------------------------	-----

Presentation of a research proposal in each course is required. Econ 236 and 237 may not be double-counted towards both the macroeconomics and the finance field.

### D. Public Economics

To receive credit for the field, students must complete:

ECON 241	Public Finance and Taxation I	2-5
ECON 242	Public Finance and Taxation II	2-5

Regular attendance at the Public Economics workshop is required.

### E. Finance

To receive credit for the field, students must complete two courses from:

		Units
ECON 236	Financial Economics I	2-5
ECON 237	Financial Economics II	2-5
FINANCE 622	Dynamic Asset Pricing Theory	4
FINANCE 624	Corporate Finance Theory	4
FINANCE 625	Empirical Asset Pricing	4

A 20 minute research project proposal is required.

### F. Economics of Labor

To receive credit for this field, students must complete two courses and term papers from:

		Units
ECON 246	Labor Economics I	2-5
ECON 247	Labor Economics II	2-5
ECON 248	Labor Economics III	2-5

### G. Industrial Organization

To receive credit for the field, students must complete:

		Units
ECON 257	Industrial Organization I	2-5
ECON 258	Industrial Organization IIA <sup>1</sup>	2-5

<sup>1</sup> Econ 251 can substitute for Econ 258 only, as long as the student is not also using Econ 251 to fulfill requirements for the Environmental field.

<sup>2</sup> Students who select Industry as a primary focus are expected to also take Econ 260.

### H. International Economics

To receive credit for this field, students must complete two courses and research papers from:

		Units
ECON 265	International Economics I	2-5
ECON 266	International Economics II	2-5
ECON 267	Topics in International Trade (recommended)	2-5

Students writing a thesis in International Economics should take all three courses in the sequence.

### I. Econometrics

To receive credit for this field, students must complete two courses from the following:

ECON 273	Advanced Econometrics I	2-5
----------	-------------------------	-----

ECON 274	Advanced Econometrics II	2-5
ECON 275	Time Series Econometrics	2-5
ECON 276	Limited Dependent Variables	2-5

### J. Microeconomic Theory

To receive credit for this field, students must complete two courses from the following and give a research presentation:

		Units
ECON 282	Contracts, Information, and Incentives	2-5
ECON 286	Game Theory and Economic Applications	2-5
ECON 291	Social and Economic Networks	2-5

### K. Environmental, Resource and Energy Economics

To receive credit for this field, students must complete:

		Units
ECON 250	Environmental Economics	2-5
ECON 251	Natural Resource and Energy Economics	2-5

### L. Behavioral and Experimental Economics

To receive credit for this field, students must take the following three courses:

ECON 278	Behavioral and Experimental Economics I	2-5
ECON 279	Behavioral and Experimental Economics II	2-5
ECON 277	Behavioral and Experimental Economics III	2-5

Research papers and presentations are requirements of these courses.

### M. Market Design

To receive credit for this field, students must take two from the following and give a research presentation:

ECON 283	Theory and Practice of Auction Market Design	2-5
ECON 285	Matching and Market Design	2-5
ECON 289	Advanced Topics in Game Theory and Information Economics	2-5

## Ph.D. Minor in Economics

To be recommended for the Ph.D. degree with Economics as a minor subject, a student must qualify in three fields of economics, at least one of which must be in the core economics sequence (Microeconomics, Macroeconomics, Econometrics). The standard of achievement in these fields is the same for minor as for major candidates, including minimum grade requirements, paper submissions and research presentations where appropriate. All courses used for the Ph.D. minor must be taken for a letter grade.

## Joint Degree Programs in Economics with the School of Law

### J.D./M.A. and J.D./PH.D.

The Department of Economics and the School of Law offer a joint program leading to either a J.D. degree combined with an M.A. degree in Economics, or to a J.D. degree combined with a Ph.D. in Economics.

The J.D./M.A. and J.D./Ph.D. degree programs are designed for students who wish to prepare themselves for careers in areas relating to both law and economics. Students interested in either joint degree program must apply and gain entrance separately to the School of Law and the Department of Economics and, as an additional step, must secure permission from both academic units to pursue degrees in those units as part of a joint degree program. Interest in either joint degree program should be noted on the student's admission applications

and may be considered by the admission committee of each program. Alternatively, an enrolled student in either the Law School or the Economics department may apply for admission to the other program and for joint degree status in both academic units after commencing study in either program.

Joint degree students may elect to begin their course of study in either the School of Law or the Department of Economics. Faculty advisers from each academic unit participate in the planning and supervising of the student's joint program. Students must be enrolled full time in the Law School for the first year of law school, and, at some point during the joint program, may be required to devote one or more quarters largely or exclusively to studies in the Economics program regardless of whether enrollment at that time is in the Law School or in the Department of Economics. At all other times, enrollment may be in the graduate school or the Law School, and students may choose courses from either program regardless of where enrolled. Students must satisfy the requirements for both the J.D. and the M.A. or Ph.D. degrees as specified in this bulletin or by the School of Law.

The Law School approves courses from the Economics Department that may count toward the J.D. degree, and the Economics department approves courses from the Law School that may count toward the M.A. or Ph.D. degree in Economics. In either case, approval may consist of a list applicable to all joint degree students or may be tailored to each individual student's program. The list may differ depending on whether the student is pursuing an M.A. or a Ph.D. in Economics.

In the case of a J.D./M.A. program, no more than 45 quarter hours of approved courses may be counted toward both degrees. In the case of a J.D./Ph.D. program, no more than 54 quarter hours of approved courses may be counted toward both degrees. In either case, no more than 36 quarter hours of courses that originate outside the Law School may count toward the Law degree. To the extent that courses under this joint degree program originate outside the Law School but count toward the Law degree, the Law School credits permitted under Section 17(1) of the Law School Regulations shall be reduced on a unit-per-unit basis, but not below zero. The maximum number of Law School credits that may be counted toward the M.A. or the Ph.D. in Economics is the greater of: (a) 5 quarter hours in the case of the M.A. and 10 quarter hours in the case of the Ph.D.; or (b) the maximum number of hours from courses outside of the department that M.A. or Ph.D. candidates in Economics are permitted to count toward the applicable degree under general departmental guidelines or in the case of a particular student's individual program.

Tuition and financial aid arrangements are normally made through the school in which the student is then enrolled.

For more information, see the Law School's Degrees and Joint Degrees (<http://www.law.stanford.edu/program/degrees>) web site.

## Joint Degree Program in Ph.D. in Economics and Master of Public Policy

The Ph.D./M.P.P. joint degree is designed for students who wish to prepare themselves for careers in areas relating to both policy and economics. Students interested in this degree first apply to the Economics Department, indicating an interest in the joint program. There is one admissions application and one fee. If the decision is made by the department to admit the applicant, the file is then forwarded to the M.P.P. program. An admission decision, based on the information in the Ph.D. application, is made promptly, and the department informs the student of the decision.

Students may also apply to the M.P.P. after having commenced study in the Economics Department at Stanford, by first receiving the consent of the Director of Graduate Studies in Economics and then applying to the Public Policy program.

Students must have a faculty adviser from the Economics Department to assist with the planning and supervising of the joint program. The adviser is usually chosen from among the department's Public Policy-affiliated faculty.

Tuition and financial aid arrangements are made through the Economics Department.

## Requirements for the M.P.P./Ph.D. in Economics

### Core M.P.P. curriculum of 45 units

		Units
PUBLPOL 301B	Economic Policy Analysis for Policymakers	4-5
PUBLPOL 302A	Introduction to American Law	3-5
PUBLPOL 302B	Economic Analysis of Law	4
PUBLPOL 304A	Collective Action Problems: Ethics, Politics, & Culture	3-4
PUBLPOL 305A	Problem Solving and Decision Making for Public Policy and Social Change	4
PUBLPOL 305B	Public Policy and Social Psychology: Implications and Applications	4
PUBLPOL 306	Writing and Rhetoric for Policy Audiences	4
PUBLPOL 307	Justice	4-5
PUBLPOL 309	Practicum	1-10
PUBLPOL 311	Public Policy Colloquium	1
Total Units		32-46

## Other Programs

Other programs leading to dual degrees may be arranged. For example, the Ph.D. in Economics combines with one or two years of study in the School of Law, leading to the nonprofessional Master of Legal Studies (M.L.S.) degree. A dual degree program does not permit counting any courses toward both the Economics and the Law degrees. For more information, see the Law School's Degrees and Joint Degrees (<http://www.law.stanford.edu/program/degrees>) web site.

*Emeriti:* (Professors) Takeshi Amemiya, Theodore Anderson, Kenneth J. Arrow, Paul A. David, Victor R. Fuchs, John G. Gurley, Peter J. Hammond, Donald Harris, Bert G. Hickman, Mordecai Kurz, Lawrence J. Lau, Roger G. Noll, Nathan Rosenberg, Thomas Sargent, David A. Starrett, Joseph E. Stiglitz, Gavin Wright

*Honorary Emerita:* (Professor) Anne O. Krueger

*Chair:* B. Douglas Bernheim

## Overseas Studies Courses in Economics

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

Course Code	Course Title	Units
OSPBEIJ 58	China in the World Economy: Han Dynasty to the Present	5
OSPBER 115X	The German Economy: Past and Present	4-5
OSPBER 161X	The German Economy in the Age of Globalization	4-5
OSPMADRD 54	Contemporary Spanish Economy and the European Union	4
OSPPARIS 86	Measuring Well-Being and Sustainability in Today's World	5
OSPPARIS 91	Globalization and Its Effect on France and the European Union	5
OSPSANTG 119X	The Chilean Economy: History, International Relations, and Development Strategies	5
OSPSANTG 130X	The Chilean Economy in Comparative Perspective	5

## English

Courses offered by the Department of English are listed under the subject code ENGLISH on the Stanford Bulletin's ExploreCourses web site.

## Mission of the Department of English

To study English at Stanford is to explore – deeply and rewardingly – the rich legacy of literature written in English, past and present. We offer a wealth of courses on individual authors, the history of literary genres, literary theory, new media, and creative writing. Given the emphasis on critical thinking and interpretation, the English major is in turn an excellent preparation for many professional fields, including teaching, journalism, law, publishing, medicine, and business. The graduate program features rigorous training in the research and analysis of British, American, and Anglophone literary histories and texts, preparing students to produce scholarship of originality and importance, and to teach literature at the highest levels.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of major theories, methods, and concepts of literary study and critical analysis.
2. an awareness of how authors and texts develop in relation to their historical contexts.
3. a comprehension of the formal qualities of key literary genres, forms, and styles.
4. an effective style of writing and a powerful use of language.

## Bachelor of Arts in English

In the undergraduate program, students explore the traditions of literature in English. Courses emphasize interpretive thinking and creative writing, examining the dynamics of literary and cultural history, the structures of literary form and genre, and the practices of reading, writing, and critical analysis.

## Graduate Program in English

The graduate program features rigorous training in the research and analysis of British, American and Anglophone literary histories and texts, preparing students to produce scholarship of originality and importance, and to teach literature at advanced levels.

## Units Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in English and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in English. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of English and to interpret and present the results of such research.

## Other Programs in English

### Ph.D. in Modern Thought and Literature

Stanford also offers a Ph.D. degree in Modern Thought and Literature. Under this program, students devote approximately half of their time to a modern literature from the Enlightenment to the present, and the other half to interdisciplinary studies. Interested students should see the "Modern Thought and Literature" section of this bulletin and consult the director of the program.

### Creative Writing Fellowships

The Creative Writing Program each year offers five two-year fellowships in poetry and five two-year fellowships in fiction. These are not degree-granting fellowships. Information is available in the Creative Writing office, (650) 725-1208.

## Bachelor of Arts in English

The English major is designed to provide students with both an understanding of the development of literatures in English and an

appreciation of the variety and richness of literary texts. It offers a rigorous training in interpretive thinking and precise expression.

## Suggested Preparation for the Major

Prospective English majors are advised to consider Thinking Matters courses that relate to literature to satisfy this requirement. Also recommended is any introductory seminar taught by English department faculty through Stanford Introductory Studies.

### Thinking Matters Courses

ESF 1	Education as Self-Fashioning: The Active, Inquiring, Beautiful Life	7
THINK 31	Race and American Memory	4
THINK 49	Stories Everywhere	4

### Introductory Seminars

ENGLISH 32N	Reading Digitally	3
ENGLISH 40N	Theatrical Wonders from Shakespeare to Mozart	3
ENGLISH 48N	The American Songbook and Love Poetry	3
ENGLISH 51N	The Sisters: Poetry & Painting	3
ENGLISH 52N	Mixed-Race Politics and Culture	3
ENGLISH 68N	Mark Twain and American Culture	4
ENGLISH 79N	The Renaissance: Culture as Conflict	3

## Degree Requirements

Students interested in majoring in English are encouraged to declare during their sophomore year, but no later than the beginning of their junior year. They are urged to discuss their plans with the undergraduate student services specialist as early as possible, and to take recommended preparatory courses for the major in their freshman and sophomore years. To declare the major, a student must fill out the Declaration of Major in Axxess; choose a faculty advisor; and submit a completed program proposal form approved by the adviser. It is recommended that a student meet with the adviser at least once per quarter to discuss progress towards degree completion. Students who declared prior to September 2015 should refer to previous guidelines and requirements for the major.

With the exception of the required courses listed below, which must be taken for a letter grade, any two of the elective courses may be taken on a credit/no credit basis at the discretion of the instructor. Transfer students only may apply as many as four literature courses taken at approved universities toward the English major electives. Approval of such courses toward the major is at the discretion of the Director of Undergraduate Studies. Request for transfer credit, including course syllabi and official transcripts, should be submitted to the undergraduate student services specialist, and to the Office of the Registrar's external credit evaluation section. In the case of all other students, literature courses taken outside the department will not normally be accepted for credit unless they are taken as part of BOSP. No petitions for courses taken outside the department will be granted retrospectively.

The total number of units required to graduate for each degree option is specified in the relevant section following. All courses should be taken for 5 units. Irrespective of field of study or degree option, all English majors must complete the following requirements:

## Required Courses (35 units)

### Historical courses

ENGLISH 10A	Introduction to English I: Medieval and Renaissance Lives <sup>1</sup>	5
	or ENGLISH 10I Introduction to English I: Poetics and Politics in Medieval and Renaissance Literature	

ENGLISH 11A	Introduction to English II: From Milton to the Romantics <sup>2</sup>	5
	or ENGLISH 11B Introduction to English II: American Literature and Culture to 1855	

ENGLISH 12A	Introduction to English III: Introduction to African American Literature <sup>3</sup>	5
	or ENGLISH 12I Introduction to English III: Metamorphoses of Literature 1850-2000	

### Units Methodology courses

ENGLISH 160	Poetry and Poetics	5
ENGLISH 161	Narrative and Narrative Theory	5
ENGLISH 162W	Writing Intensive Seminar in English (WIM)	5

### Also Required

One pre-1800 historical course <sup>4 5</sup>	5
---	---

Total Units	35
-------------	----

<sup>1</sup> For students who declared prior to the 2015-16 academic year this requirement may be satisfied by the following course:

- ENGLISH 100A. Literary History I (no longer offered)

<sup>2</sup> For students who declared prior to the 2015-16 academic year this requirement may be satisfied by the following course:

- ENGLISH 100B. Literary History II (no longer offered)

<sup>3</sup> For students who declared prior to the 2015-16 academic year this requirement may be satisfied by the following course:

- ENGLISH 100C. Literary History III (no longer offered)

<sup>4</sup> In 2015-16 the following courses satisfy the pre-1800 historical requirement:

- ENGLISH 105H Medievalism
- ENGLISH 106E Dante and Aristotle
- ENGLISH 113A Desire, Identity, Modernity
- ENGLISH 115C Hamlet and the Critics
- ENGLISH 115D Shakespeare, Language, Contexts
- ENGLISH 163 Shakespeare
- ENGLISH 184H Text Technologies: A History
- ENGLISH 201 The Bible and Literature
- ENGLISH 202 History of the Book

<sup>5</sup> This requirement may also be fulfilled with the following Thinking Matters or SLE courses:

- ESF 1 Education as Self-Fashioning: The Active, Inquiring, Beautiful Life
- THINK 7 Journeys
- THINK 49 Stories Everywhere
- SLE 91 Structured Liberal Education, SLE 92 Structured Liberal Education, and SLE 93 Structured Liberal Education.

Rules that apply to all English majors irrespective of field of study or degree option

- Courses can only be counted once, i.e., can only satisfy one requirement.
- Two of the elective courses may be taken on a credit/no credit basis at the discretion of the instructor.

## Fields of Study

Because the Department of English recognizes that the needs and interests of literature students vary, it has approved several major programs of study. Each of these has different objectives and requirements; students should consider carefully which program of study corresponds most closely to their personal and intellectual objectives. The department offers the following fields of study for degrees in English:

- Literature
- Literature with Creative Writing Emphasis

- Literature and Interdisciplinary Studies
- Literature and Foreign Language Literature
- Literature and Philosophy

### I. Literature (35 units)

This field of study is not declared in Axess. It does not appear on either the official transcript or the diploma. This program provides for the interests of students who wish to understand the range and historical development of British, American and Anglophone literatures and a variety of critical methods by which their texts can be interpreted. The major emphasizes the study of literary forms and genres and theories of textual analysis. In addition to the degree requirements required of all majors and listed above, students must complete at least 35 additional units of courses consisting of:

1. Seven additional approved elective courses, only one of which may be a creative writing course, chosen from among those offered by the Department of English. In place of one of these seven elective courses, students may choose one upper-division course in a foreign literature read in the original language.

### II. Literature with Creative Writing Emphasis (40 units)

This subplan is printed on the transcript and diploma and is elected in Axess. This program is designed for students who want a sound basic knowledge of the English literary tradition as a whole and at the same time want to develop skills in writing poetry or prose. In addition to the degree requirements required of all majors and listed above, students must complete at least 40 additional units of approved courses, in either the prose or poetry concentration:

#### Prose Concentration

		Units
ENGLISH 90	Fiction Writing	5
	or ENGLISH 91 Creative Nonfiction	
ENGLISH 92	Reading and Writing Poetry (Can be fulfilled with a poetry literature seminar)	5
ENGLISH 146	Development of the Short Story: Continuity and Innovation	5
ENGLISH 190	Intermediate Fiction Writing (or any 190 series or 191 series)	5
	or ENGLISH 191 Intermediate Creative Nonfiction	
4 elective literature courses (One of the courses may be fulfilled with a creative writing workshop).		20
Total Units		40

#### Poetry Concentration

		Units
ENGLISH 90	Fiction Writing (Can be fulfilled with a prose literature seminar)	5
	or ENGLISH 91 Creative Nonfiction	
ENGLISH 92	Reading and Writing Poetry	5
ENGLISH 192	Intermediate Poetry Writing (or any 192 series)	5
One literature course in poetry approved by a Creative Writing Professor		5
4 elective literature courses (One of the courses may be fulfilled with a creative writing workshop)		20
Total Units		40

### III. Literature and Interdisciplinary Studies (40 units)

This subplan is printed on the transcript and diploma and is elected in Axess. This program is intended for students who wish to combine the study of one broadly defined literary topic, period, genre, theme or problem with an interdisciplinary program of courses (generally chosen from one other discipline) relevant to that inquiry. In addition to the

degree requirements required of all majors and listed above, students must complete at least 40 additional units of approved courses including:

1. Five elective literature courses chosen from among those offered by the Department of English. Students must select two of these courses in relation to their interdisciplinary focus.
2. Three courses related to the area of inquiry. These courses may be chosen from another department or interdisciplinary program within the School of Humanities and Sciences including (but not limited to) such as African American Studies (<http://www.stanford.edu/dept/AAAS>), Anthropology (<https://www.stanford.edu/dept/anthropology/cgi-bin/web>), Art and Art History (<http://art.stanford.edu>), Classics (<http://www.stanford.edu/dept/classics/cgi-bin/web>), Comparative Literature (<http://www.stanford.edu/dept/DLCL/cgi-bin/web/dept/complit>), Comparative Studies in Race and Ethnicity (<http://ccsre.stanford.edu>), Feminist Studies (<http://www.stanford.edu/dept/femstudies>), Human Biology (<https://humbio.stanford.edu>), Music (<http://music.stanford.edu/Home>), Philosophy (<http://philosophy.stanford.edu>), Political Science (<http://politicalscience.stanford.edu>), Psychology (<http://psychology.stanford.edu>), Religious Studies (<http://www.stanford.edu/dept/relstud>), Science, Technology, and Society (<http://sts.stanford.edu>), and Sociology (<http://sociology.stanford.edu>). These courses should form a coherent program and must be relevant to the focus of the courses chosen by the student to meet the requirement. Each of these courses must be approved in advance by the interdisciplinary program director.
3. In addition, students in this program must write at least one interdisciplinary paper. This may be completed with ENGLISH 194 Individual Research, ENGLISH 197 Seniors Honors Essay, ENGLISH 198 Individual Work, ENGLISH 199 Senior Independent Essay, or a paper integrating the material in two courses the student is taking in two different disciplines.

The final course plan and interdisciplinary paper must be approved by the faculty adviser and the interdisciplinary adviser by the time the student applies to graduate.

### IV. Literature and Foreign Language Literature (40 units)

This subplan is printed on the transcript and diploma and is elected in Axess. This track provides a focus in British and American literature with additional work in French literature; German literature; Italian literature; or Spanish literature. These subplans appear on the diploma as follows: English & French Literature, English & German Literature, English & Italian Literature, and English & Spanish Literature. In addition to the degree requirements required of all majors and listed above, students must complete at least 40 additional units of approved courses including:

1. Four elective courses chosen from among those offered by the Department of English, one of which may be a creative writing course.
2. A coherent program of four courses in the foreign language literature, read in the original language, approved by the Director of Undergraduate Studies in English and by the relevant foreign language department.

### V. Literature and Philosophy (40-50 units)

This subplan is printed on the transcript and diploma and is elected in Axess. Students should meet with the undergraduate director concerning the Literature and Philosophy focus. This track is for students who wish to explore interdisciplinary studies at the intersection of literature and philosophy while acquiring knowledge of the English language literary tradition as a whole. In addition to the degree requirements required of all majors and listed above, students must complete at least 40-50 additional units of approved courses including:

1. PHIL 80 Mind, Matter, and Meaning (WIM): Prerequisite: introductory philosophy course.

2. Gateway course: ENGLISH 81 Philosophy and Literature. This course should be taken as early as possible in the student's career, normally in the sophomore year.
3. Aesthetics, Ethics, Political Philosophy: one course from PHIL 170 Ethical Theory series.
4. Language, Mind, Metaphysics, and Epistemology: one course from PHIL 180 Metaphysics series.
5. History of Philosophy: one course in the history of Philosophy, numbered above PHIL 100 Greek Philosophy.
6. Two upper division courses of special relevance to the study of Philosophy and Literature. Both of these courses must be in the English department. A list of approved courses (<http://philit.stanford.edu/programs/relevance.html>) is available on the Philosophy and Literature web site.
7. Two additional elective courses in the English department.
8. One capstone seminar (<http://philit.stanford.edu/programs/capstone.html>) of relevance to the study of Philosophy and Literature.

## Honors Program

Students wishing to undertake a formal program of advanced literary criticism and scholarship, including the honors seminar and independent research, are invited to apply for the honors program in the Winter Quarter of the junior year. Any outstanding student is encouraged to engage in an honors thesis project.

Admission is selective. Provisional admission is announced in March. Permission to continue in the program is contingent upon submission, by May 15 of the junior year, of a senior honors essay proposal with a bibliography. Honors students are encouraged to complete before the start of their senior year the three methodology courses that are English major requirements:

		Units
ENGLISH 160	Poetry and Poetics	5
ENGLISH 161	Narrative and Narrative Theory	5
ENGLISH 162W	Writing Intensive Seminar in English	5

In September before the senior year, students are encouraged to participate in the Bing Honors College. In Autumn Quarter of the senior year, students take a 5-unit honors seminar on critical approaches to literature. The senior-year seminar is designed to introduce students to the analysis and production of advanced literary scholarship. Students who are studying at Oxford or at other institutions may be exempted from this requirement on request and with the approval of the director of the honors program.

In Winter and Spring quarters of the senior year, honors students complete the senior honors essay for a total of 10 units under supervision of a faculty adviser.

The deadline for submitting the honors essay is May 15. Essays that receive a grade of 'A-' or above are awarded honors.

Students in the honors program complete the requirements of the major and the following:

		Units
ENGLISH 196A	Honors Seminar: Critical Approaches to Literature	5
ENGLISH 197	Seniors Honors Essay	10

## Advanced Research Options

### Individual Research

Students taking 100- or 200-level courses may, with the consent of the instructor, write a follow-up 5-unit paper based on the course material and due no later than the end of the succeeding quarter (register for

ENGLISH 194 Individual Research). The research paper is written under the direct supervision of the professor; it must be submitted first in a preliminary draft and subsequently in a final version.

### Senior Independent Essay

The senior independent essay gives senior English majors the opportunity to work throughout the year on a sustained piece of critical or scholarly work of around 10,000 words on a topic of their choice, with the close guidance of a faculty adviser. Each student is responsible for finding an adviser, who must approve the proposed topic before the end of the third quarter prior to expected graduation. The senior essay is read and graded by the adviser and one other member of the English faculty. Senior independent essay students register for ENGLISH 199 Senior Independent Essay.

## Overseas Studies or Study Abroad

The flexibility of the English major permits students to attend an overseas campus in any quarter, but it is advisable, and in some cases essential, that students spend their senior year at Stanford if they wish to participate in the honors program or in a special in-depth reading course. For more information on Stanford overseas programs, see the "Overseas Studies (p. 94)" section of this bulletin.

Students should consult their advisers and the undergraduate program officer to make sure that they can fulfill the requirements before graduation. The Stanford Program in Oxford usually offers courses which apply toward both University requirements and area requirements for the English major. In either case, students should save the syllabi from their courses if they wish to apply to use them to fulfill an English major requirement.

### Overseas Studies Courses in English

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPOXFRD 17	Novels of Sensation: Gothic, Detective Story, Prohibition, and Transgression in Victorian Fiction	5
OSPOXFRD 57	The Rise of the Woman Writer 1660-1860	5
OSPOXFRD 60	Shakespeare and his Contemporaries	5

## Joint Major Program: English and Computer Science

The joint major program (JMP), authorized by the Academic Senate for a pilot period of six years beginning in 2014-15, permits students to major in both Computer Science and one of ten Humanities majors. See the "Joint Major Program (p. 26)" section of this bulletin for a description of University requirements for the JMP. See also the Undergraduate Advising and Research JMP web site and its associated FAQs.

Students completing the JMP receive a B.A.S. (Bachelor of Arts and Science).

Because the JMP is new and experimental, changes to procedures may occur; students are advised to check the relevant section of the bulletin periodically.

## English Major Requirements in the Joint Major Program

The joint major is structured to let students thoughtfully explore the intersection of Computer Science and literary studies. Students would ideally declare the program during the sophomore year. Students are required to complete requirements in English and Computer Science. See the "Computer Science Joint Major Program (p. 231)" section of this bulletin for details on Computer Science requirements.

The requirements for English are adapted from the English major and are stated in full below. Students in the CS+English JMP are required to complete 58 total units in English compared to 68-80 units which is typically required by the English major. Students in CS+English are not required to take a Critical Methods course nor an English senior seminar. Additionally, students in CS+English only have to fulfill five electives. The University Writing in the Major requirement for students in the CS+English JMP is fulfilled by the Computer Science Writing in the Major requirement. To declare the CS+English JMP, students must complete a program proposal. (<https://stanford.box.com/shared/static/ebxcg5vwbwn7rvdnc29bqim1hpsa5vrd.pdf>)

Students are encouraged to compile an ePortfolio of reflections, ideas, and work on the interplay between humanities and computer science.

### Integrative Experience

In the senior year, students are required to undertake a capstone project which involves both programming and literary research, and could include work on digital editions, analyses of corpora, the creation of electronic literature, digital representations of literary venues, studies of natural language processing as applied to literary analysis, or any other project that draws integrally on both disciplines. All capstone projects must be approved by both the student's Computer Science adviser and English adviser. This project normally takes one quarter, and should be taken concurrently with the Computer Science capstone requirement. In English, students are required to complete 3 units of ENGLISH 198 Individual Work with a faculty adviser in English as part of the integrative project. In preparation for the Independent Study in English, students must secure an adviser, complete the CS+English Capstone form (<https://stanford.box.com/shared/static/hl0zna48liez8u10ulqs.pdf>), and submit a written proposal of the project.

Required Core Courses (30 Units)

#### Historical courses

ENGLISH 10A	Introduction to English I: Medieval and Renaissance Lives <sup>1</sup>	5
or ENGLISH 10B	Introduction to English I: Poetics and Politics in Medieval and Renaissance Literature	
ENGLISH 11A	Introduction to English II: From Milton to the Romantics <sup>2</sup>	5
or ENGLISH 11B	Introduction to English II: American Literature and Culture to 1855	
ENGLISH 12A	Introduction to English III: Introduction to African American Literature <sup>3</sup>	5
or ENGLISH 12B	Introduction to English III: Metamorphoses of Literature 1850-2000	
One additional history of literature course <sup>4 5</sup>		5

#### Methodology courses

ENGLISH 160	Poetry and Poetics	5
ENGLISH 161	Narrative and Narrative Theory	5
Total Units		30

<sup>1</sup> For students who declared prior to the 2015-16 academic year this requirement may be satisfied by the following course: ENGLISH 100A. Literary History I (no longer offered)

<sup>2</sup> For students who declared prior to the 2015-16 academic year this requirement may be satisfied by the following course: ENGLISH 100B. Literary History II (no longer offered)

<sup>3</sup> For students who declared prior to the 2015-16 academic year this requirement may be satisfied by the following course: ENGLISH 100C. Literary History III (no longer offered)

<sup>4</sup> In 2015-16 the following courses satisfy the history of literature requirement

- ENGLISH 105H Medievalism
- ENGLISH 106E Dante and Aristotle
- ENGLISH 113A Desire, Identity, Modernity
- ENGLISH 115C Hamlet and the Critics
- ENGLISH 115D Shakespeare, Language, Contexts
- ENGLISH 163 Shakespeare
- ENGLISH 184H Text Technologies: A History
- ENGLISH 201 The Bible and Literature
- ENGLISH 202 History of the Book

<sup>5</sup> This requirement may also be fulfilled with the following Thinking Matters or SLE courses:

- ESF 1 Education as Self-Fashioning: The Active, Inquiring, Beautiful Life
- THINK 7 Journeys
- THINK 49 Stories Everywhere
- SLE 91 Structured Liberal Education, SLE 92 Structured Liberal Education, and SLE 93 Structured Liberal Education.

Rules that apply to all English majors irrespective of field of study or degree option

1. Courses can only be counted once, i.e. can only satisfy one requirement.
2. Two of the elective courses may be taken on a credit/no credit basis at the discretion of the instructor.

### Field of Study Electives (25 Units)

Because the Department of English recognizes that the needs and interests of CS+English students vary, it has approved two major programs of study: Literature and Literature with Creative Writing. Each of these has different objectives and requirements; students should consider carefully which program of study corresponds most closely to their personal and intellectual objectives.

#### Units

#### I. Literature

This field of study is not declared in Axess. It does not appear on either the official transcript or the diploma. This program provides for the interests of students who wish to understand the range and historical development of British, American and Anglophone literatures and a variety of critical methods by which their texts can be interpreted. The major emphasizes the study of literary forms and genres and theories of textual analysis. In addition to the degree requirements required of all joint majors and listed above, students must complete at least 25 additional units of courses consisting of five additional approved elective courses, only one of which may be a creative writing course, chosen from among those offered by the Department of English. In place of one of these five elective courses, students may choose one upper-division course in a foreign literature read in the original language.

#### II. Literature with Creative Writing Emphasis

This subplan is printed on the transcript and diploma and is elected in Axess. This program is designed for students who want a sound basic knowledge of the English literary tradition as a whole and at the same time want to develop skills in writing poetry or prose. In addition to the degree requirements required of all joint majors and listed above,

students must complete at least 25 additional units of approved courses, in either the prose or poetry concentration:

#### Prose Concentration –

ENGLISH 90	Fiction Writing or ENGLISH 91 Creative Nonfiction	5
ENGLISH 92	Reading and Writing Poetry	5
ENGLISH 146	Development of the Short Story: Continuity and Innovation	5
ENGLISH 190	Intermediate Fiction Writing (or any 190 series or 191 series) or ENGLISH 191 Intermediate Creative Nonfiction	5
One elective literature course		5
Total Units		25

#### Poetry Concentration –

ENGLISH 92	Reading and Writing Poetry	5
ENGLISH 90	Fiction Writing or ENGLISH 91 Creative Nonfiction	5
ENGLISH 192	Intermediate Poetry Writing (or any 192 series)	5
One literature course in poetry		5
One elective literature course		5
Total Units		25

#### Integrative Experience (3 Units)

ENGLISH 198	Individual Work <sup>1</sup>	3
-------------	------------------------------	---

<sup>1</sup> Students in the CS+English JMP are required to enroll for three units of ENGLISH 198 Individual Work with a faculty adviser in English as part of the integrative project. These units should be completed concurrently with the Computer Science capstone requirement.

#### Declaring a Joint Major Program

To declare the joint major, students must first declare each major through Axess, and then submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>) The Major-Minor and Multiple Major Course Approval Form ([http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin\\_MultMaj.pdf](http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin_MultMaj.pdf)) is required for graduation for students with a joint major.

#### Dropping a Joint Major Program

To drop the joint major, students must submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>). Students may also consult the Student Services Center (<http://studentservicescenter.stanford.edu>) with questions concerning dropping the joint major.

#### Transcript and Diploma

Students completing a joint major graduate with a B.A.S. degree. The two majors are identified on one diploma separated by a hyphen. There will be a notation indicating that the student has completed a "Joint Major". The two majors are identified on the transcript with a notation indicating that the student has completed a "Joint Major".

#### Minor in English Literature

The minor in English Literature offers some flexibility for those students who want to pursue specific interests within British and American

literature, while still requiring certain courses that ensure coverage of a variety of periods, genres, and methods of studying literature.

#### Degree Requirements

In order to graduate with a minor in English, students must complete the following program of seven 5-unit courses, at least one of which must be a seminar, for a total of 35 units:

#### Required Courses for the Minor

	Units
<b>Historical courses</b>	
Select two of the following:	10
ENGLISH 10A Introduction to English I: Medieval and Renaissance Lives <sup>1</sup>	5
or ENGLISH 10B Introduction to English I: Poetics and Politics in Medieval and Renaissance Literature	
ENGLISH 11A Introduction to English II: From Milton to the Romantics <sup>2</sup>	5
or ENGLISH 11B Introduction to English II: American Literature and Culture to 1855	
ENGLISH 12A Introduction to English III: Introduction to African American Literature <sup>3</sup>	5
or ENGLISH 12B Introduction to English III: Metamorphoses of Literature 1850-2000	
<b>Methodology courses</b>	
Select two of the following:	10
ENGLISH 160 Poetry and Poetics	
ENGLISH 161 Narrative and Narrative Theory	
ENGLISH 162W Writing Intensive Seminar in English <sup>4</sup>	
<b>Elective courses</b>	
Three elective courses from those offered in the English department (only one of which may be a course in Creative Writing).	15

<sup>1</sup> For students who declared prior to the 2015-16 academic year this requirement may be satisfied by the following course:

- English 100A. Literary History I (no longer offered)

<sup>2</sup> For students who declared prior to the 2015-16 academic year this requirement may be satisfied by the following course:

- ENGLISH 100B. Literary History II (no longer offered)

<sup>3</sup> For students who declared prior to the 2015-16 academic year this requirement may be satisfied by the following course:

- ENGLISH 100C. Literary History III (no longer offered)

<sup>4</sup> This requirement may be fulfilled by the following three SLE courses:

- SLE 91 Structured Liberal Education
- SLE 92 Structured Liberal Education
- SLE 93 Structured Liberal Education

#### Minor in Creative Writing (30 units)

The minor in Creative Writing offers a structured environment in which students interested in writing prose or poetry develop their skills while receiving an introduction to literary forms. Students choose a concentration in either prose or poetry.

#### Degree Requirements

In order to graduate with a minor in Creative Writing, students must complete the following program of six 5-unit courses for a total of 30 units. All courses must be taken for a letter grade. Courses taken abroad or at other institutions may not be counted towards the minor.

## Required Courses for the Minor

Students must complete at least 30 units of approved courses, in either the prose or poetry concentration:

### Prose concentration

ENGLISH 90	Fiction Writing	Units	5
or ENGLISH 91 Creative Nonfiction			
ENGLISH 92	Reading and Writing Poetry		5
ENGLISH 146	Development of the Short Story: Continuity and Innovation		5
Select two of the following intermediate or advanced prose classes:			
any ENGLISH 190 series			10
any ENGLISH 191 series			
ENGLISH 198L Individual Work: Levinthal Tutorial			
ENGLISH 290 Advanced Fiction Writing			
One course in pre-1800 literature <sup>1</sup>			5
<b>Total Units</b>			<b>30</b>

<sup>1</sup> In 2015-16, pre-1800 courses include:

- ENGLISH 10A Introduction to English I: Medieval and Renaissance Lives
- ENGLISH 10B Introduction to English I: Poetics and Politics in Medieval and Renaissance Literature
- ENGLISH 11A Introduction to English II: From Milton to the Romantics
- ENGLISH 105H Medievalism
- ENGLISH 106E Dante and Aristotle
- ENGLISH 113A Desire, Identity, Modernity
- ENGLISH 115D Shakespeare, Language, Contexts
- ENGLISH 163 Shakespeare
- ENGLISH 184H Text Technologies: A History
- ENGLISH 201 The Bible and Literature
- ENGLISH 202 History of the Book

### Poetry concentration

ENGLISH 90	Fiction Writing	Units	5
or ENGLISH 91 Creative Nonfiction			
ENGLISH 92	Reading and Writing Poetry		5
ENGLISH 160	Poetry and Poetics		5
Select two of the following intermediate or advanced poetry classes:			
any ENGLISH 192 series			10
ENGLISH 198L Individual Work: Levinthal Tutorial			
ENGLISH 292 Advanced Poetry Writing			
One course in pre-1800 literature <sup>1</sup>			5
<b>Total Units</b>			<b>30</b>

<sup>1</sup> In 2015-16, pre-1800 courses include:

- ENGLISH 10A Introduction to English I: Medieval and Renaissance Lives
- ENGLISH 10B Introduction to English I: Poetics and Politics in Medieval and Renaissance Literature
- ENGLISH 11A Introduction to English II: From Milton to the Romantics
- ENGLISH 105H Medievalism
- ENGLISH 106E Dante and Aristotle
- ENGLISH 113A Desire, Identity, Modernity
- ENGLISH 115D Shakespeare, Language, Contexts
- ENGLISH 163 Shakespeare
- ENGLISH 184H Text Technologies: A History
- ENGLISH 201 The Bible and Literature
- ENGLISH 202 History of the Book

## Minor in Digital Humanities

The minor in Digital Humanities combines humanistic inquiry with digital methods and tools to generate new questions and to foster innovative research. Students will develop critical skills that are applicable within and beyond an academic setting. The minor consists of three clusters: Spatial Humanities, Quantitative Textual Analysis, and Text Technologies. Students may choose to specialize in one of these areas.

- Spatial Humanities ranges from theory (space as a category of analysis) to technical representation/analysis of spatial distribution through algorithms. It can draw upon anthropology, geography, and other disciplines with a tradition of interest in space; meanwhile, it can feed into (for instance) literary studies.
- Quantitative Textual Analysis includes anything that uses computers to quantify formal properties of texts, ranging from word frequencies to chapter divisions to character networks. Genre, authorship, sentiment analysis, "opinion mining" -- all of these can play a role. It intersects with linguistics/NLP; Classics and Cognitive Psychology can also be allies.
- Text Technologies encompasses technologies of communication; social media analysis; database creation, coding, TEI; technologies of publishing and text access; digital curation of virtual exhibitions (which allows us to bring in the arts, digital imaging, etc.).

## Degree Requirements

Students must take a minimum of twenty units: at least one core course (5 units), and at least five other courses of at least three credits each. Students complete twenty or more units in courses relevant to the major in departments across the university including Anthropology, Art, Communications, Computer Science, East Asian Languages and Cultures, Engineering, English, French, History, Italian, Linguistics, Music, Philosophy, Religious Studies, and Theatre and Performance. These electives are to be determined in consultation with the advisor to the minor (a faculty member in English).

## Required Courses for the Minor

	Units	Units
<b>Required Introductory Course</b>		
Select one of the following:		5
HISTORY 104 Introduction to Geospatial Humanities (Spatial Humanities concentration)		
ENGLISH 184E Literary Text Mining (Quantitative Textual Analysis concentration)		
ENGLISH 184H Text Technologies: A History (Text Technologies concentration)		
<b>Elective Courses</b>		
Five courses in the chosen concentration		15
<b>Total Units</b>		<b>20</b>

## Coterminal Master of Arts in English

Current Stanford undergraduate majors in English who are interested in further postgraduate work may apply for the coterminal M.A. in English. The Admissions Committee also considers applicants from related fields, such as Modern Thought and Literature, Comparative Literature, and American Studies, if they have fulfilled the requirements for the B.A. in English. The committee does, however, give preference to English majors.

Candidates for a coterminal master's degree must fulfill all requirements for the M.A. in English (including the graduate language requirement), as well as general and major requirements for the B.A. in English. No courses used to satisfy the B.A. requirements (either as General Education Requirements or department requirements) may be applied toward the M.A. No courses taken more than two quarters prior to admission to the coterminal master's program may be used to meet

the 45-unit University minimum requirement for the master's degree. A minimum GPA of 3.7 in the major is required of those applying for the coterminal master's degree. Students must also take the general GRE exam in the year in which they apply. The department accepts applications once a year; the application deadline is February 1 for admission in the Spring Quarter immediately following. There are no exceptions to this deadline. All application materials are submitted directly to the English undergraduate student services office. The department does not fund coterminal M.A. students.

## Admission Requirements

To apply for admission to the English coterminal M.A. program, students must submit the coterminal application and the following:

1. A statement of purpose giving the reasons the student wishes to pursue this program and its place in his or her future plans.
2. A writing sample of critical or analytical prose, about 12-25 pages in length.
3. An official undergraduate transcript
4. GRE: General Section (verbal, quantitative, and analytical)—copy of ETS score report required.
5. Three letters of recommendation from members of the faculty who know the applicant well and who can speak directly to the question of his or her ability to do graduate-level work.
6. Preliminary Master's Program Proposal; this is a form in the application packet. Specify at least 45 units of course work relevant to the degree program.
7. Coterminal Course Approval Form (this form is required only if transferring courses from undergraduate to the graduate program at the time of application; students will be allowed to transfer courses between their undergraduate and graduate careers for a limited time). To be eligible for transfer, courses must have been taken in the two quarters preceding admission to the M.A. program (please note that no courses taken earlier than Autumn quarter of the senior year may count toward the M.A.).

## University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken two quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

## Degree Requirements

- M.A. candidates must complete with a 3.0 (B) grade point average (GPA) at least nine courses (a minimum of 45 units), at least two of which must be 300-level courses.
- Ordinarily, graduate students enroll in courses numbered 200 and above. They may take no more than two 100-level courses without the consent of the Director of Graduate Studies. No more than two courses may be taken outside the department and these must be pre-approved by the Director of Graduate Studies.
- The master's student may take no more than 5 units of ENGLISH 398 Research Course.
- No creative writing courses may be used to fulfill the requirements.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (p. 42)" section of this bulletin. For University coterminal master's degree application forms, see the Registrar's Publications page (<https://studentaffairs.stanford.edu/registrar/publications/#Coterm>).

## Required Courses

	Units
<b>Historical Courses</b>	20
Two courses in literature pre-1800	
Two courses in literature post-1800	
<b>Elective Courses</b>	25
Five courses from those offered in the English department <sup>1 2</sup>	
<b>Additional Requirement</b>	
Reading knowledge of a foreign language <sup>3</sup>	
<b>Total Units</b>	<b>45</b>

<sup>1</sup> Five elective courses should represent a mixture of survey and specialized courses chosen to guarantee familiarity with a majority of the works on the qualifying exam reading list for doctoral candidates

<sup>2</sup> Candidates who can demonstrate unusually strong preparation in the history of English literature may undertake a 40 to 60 page master's thesis. Candidates register for 10 units of ENGLISH 399 Thesis and are required to take only three elective courses.

<sup>3</sup> Reading knowledge of a foreign languages: may be fulfilled in any of the following ways:

- A reading examination given each quarter by the various language departments, except for Latin and Greek.
- For Latin and Greek, an examination given by one of the Department of English faculty.
- Passage with a grade of 'B' or higher of a course in literature numbered 100 or higher in a foreign language department at Stanford.
- Passage of the following, respectively, with a grade of 'B' or higher: FRENLANG 250 Reading French, FRENLANG 250S Reading French, GERLANG 250 Reading German, ITALLANG 250 Reading Italian, SPANLANG 250 Reading Spanish.

## Coterminal Program with School of Education

Students interested in becoming middle school and high school teachers of English may apply for admission to the coterminal teaching program (CTP) of the Stanford Teacher Education Program (STEP) in the School of Education.

CTP students complete a special curriculum in English language, composition, and literature that combines a full English major with supplemental course work in subjects commonly taught in California public schools and a core program of foundational courses in educational theory and practice. They are then admitted to STEP for a fifth year of pedagogical study and practice teaching. Students who complete the

curriculum requirements are able to enter STEP without the necessity of taking either the GRE or the usual subject matter assessment tests.

At the end of five years, CTP students receive a B.A. in English, an M.A. in Education, and a California Secondary Teaching Credential.

Students normally apply to the coterminal teaching program at the end of their sophomore year or at the beginning of their junior year. For complete program details and for information on how to apply, consult the Director of Undergraduate Studies in English or the CTP coordinator in the School of Education.

## Doctor of Philosophy in English

### Admission

Students with a bachelor's degree in English or a closely related field may apply to pursue graduate work toward an advanced degree in English at Stanford. Applicants for admission to graduate work must take the General Test of the Graduate Record Examination and the Subject Test in Literature. International students whose first language is not English are also required to take the TOEFL examination (with certain exceptions: see the Office of Graduate Admissions (<http://gradadmissions.stanford.edu>) web site).

### University Degree Requirements

University requirements for the Ph.D. are described in the "Graduate Degrees (<http://stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

### Department Degree Requirements

The following department degree requirements, which apply to students entering the program in Autumn Quarter 2013, deal with such matters as residence, dissertation, and examinations, and are in addition to the University's basic requirements for the doctorate. Students should also consult the most recent edition of the English Ph.D. Handbook.

A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the bachelor's degree. Candidates are required to complete at least 135 units of graduate work in addition to the doctoral dissertation. At least three consecutive quarters of graduate work, and the final course work in the doctoral program, must be taken at Stanford.

A student may count no more than 65 units of non-graded courses toward the 135 course units required for the Ph.D., without the written consent of the Director of Graduate Studies. A student takes at least 70 graded units (normally fourteen courses) of the 135 required total units. 5 of these 70 units may be fulfilled with ENGLISH 398 Research Course or ENGLISH 398R Revision and Development of a Paper. ENGLISH 396L Pedagogy Seminar I does not count toward the 70 graded units. No more than 10 units (normally two courses) may come from 100-level courses

This program is designed to be completed in five years.

One pedagogical seminar and four quarters of supervised teaching constitute the teaching requirement for the Ph.D. Typically a student teaches three times as a teaching assistant in a literature course. For the fourth course, students have the option of applying to design and teach ENGLISH 162W. Writing Intensive Seminar in English (WISE) for undergraduate English majors or teaching a fourth quarter as a T.A..

- 1st year: One quarter as T.A. (leading 1-2 discussion sections of undergraduate literature)
- 2nd year: One quarter as T.A. (leading 1-2 discussion sections of undergraduate literature)
- 4th/5th years: Two quarters of teaching, including the possibility of TA'ing or teaching an undergraduate tutorial.

## I. English and American Literature

Students are expected to do course work across the full range of English and American literature. Students are required to fulfill the following requirements. Note: fulfillment of requirements 1, 2, and 3 must be through Stanford courses; students are not excused from these three requirements or granted credit for course work done elsewhere.

- |    |   | Units |
|----|---|-------|
| 1. | Required Courses:   |       |
|    | ENGLISH 396 Introduction to Graduate Study for Ph.D. Students | 5     |
|    | ENGLISH 396L Pedagogy Seminar I                               | 2     |
2. Graduate-level (at least 200-level) course work in English literature before 1700, and English or American literature after 1700 (at least 5 units of each).
  3. Graduate-level (at least 200-level) course work in some aspect of literary theory such as courses in literary theory itself, narrative theory, poetics, rhetoric, cultural studies, gender studies (at least 5 units).
  4. Students concentrating in British literature are expected to take at least one course (5 units) in American literature; students concentrating in American literature are expected to take at least one course (5 units) in British literature.
  5. Of all courses taken, a minimum of six courses for a letter grade must be graduate colloquia and seminars, of which at least three must be graduate seminars. The colloquia and seminars should be from different genres and periods, as approved by the adviser.
  6. The remaining units of graded, graduate-level courses and seminars should be distributed according to the adviser's judgment and the candidate's needs. A student may receive graduate credit for no more than two 100-level courses in the Department of English.
  7. Consent of the adviser if courses taken outside the Department of English are to count toward the requirement of 70 graded units of course work.
  8. An oral qualifying examination based on a reading guide, to be taken at the end of the summer after the first year of graduate work. The final decision as to qualification is made by the graduate studies committee in consideration of the student's overall record for the first year's work in conjunction with performance on the examination. Note: A student coming to the doctoral program who has done graduate work at another university must petition in the first year at Stanford for transfer credit for course work completed elsewhere. The petition should list the courses and grades, and describe the nature and scope of course work, as well as the content, contact hours, and writing requirements. A syllabus must be included. The Director of Graduate Studies considers the petition in conjunction with the student's overall performance.
  9. *University Oral Examination*—A University oral examination covering the field of concentration (as defined by the student and the student's adviser). Students take 10 units of an Orals Preparation workshop led by the Director of Graduate Studies in Spring quarter of the second year. The oral examination, based on a reading list established by the candidate in consultation with his or her adviser, is taken no later than the Autumn Quarter of the third year of graduate study.
  10. *Dissertation*—As early as possible during graduate study, a Ph.D. candidate is expected to find a topic requiring extensive original research and to seek out a member of the department as his or her adviser. The adviser works with the student to select a committee to supervise the dissertation. candidates should take this crucial step as early in their graduate careers as possible. The committee may well advise extra preparation within or outside the department, and time should be allowed for such work. After the dissertation topic has been approved, the candidate should file a formal reading committee form as prescribed by the University. Once a first chapter

has been drafted, the student meets with the full reading committee for a one hour colloquium. The dissertation must be submitted to the adviser as a rough draft, but in substantially final form, at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree.

11. *Closing Colloquium*—Prior to the submission of the dissertation the student and the dissertation committee holds a closing colloquium designed to look forward toward the next steps; identify the major accomplishments of the dissertation and the major questions/ issues/problems that remain; consider possibilities for revision, book or article publication, etc. and to provide some intellectual closure to the dissertation.

## II. English and Comparative Literature

The Ph.D. program in English and Comparative Literature is designed for students wishing an extensive knowledge of the literature, thought, and history of England and of at least one foreign country, for one period. Approximately half of the student's course work and reading is devoted to this period, with the remainder of the time given to other periods of English and American literature since 1350.

This degree, administered by the Department of English, is to be distinguished from the Ph.D. in Comparative Literature. The latter program is intended for students unusually well prepared in foreign languages and involves advanced work in three literatures, one of which may be English. Interested students should consult a Department of English adviser, but faculty from Comparative Literature may also provide useful supplementary information.

The requirements are as follows:

1. Knowledge of the basic structure of the English language and of Chaucer. This requirement may be met by examination, or by taking 10 units of courses chosen from among those offered in linguistics, English philology, and early and middle English literature including Chaucer. No particular courses are required of all students.

2.

Required Courses:

ENGLISH 396	Introduction to Graduate Study for Ph.D. Students	5
ENGLISH 396L	Pedagogy Seminar I	2

3. A knowledge of one foreign language sufficient to take graduate-level literature courses in a foreign-language department and an advanced reading knowledge of a second language.
4. A minimum of 45 units in the history, thought, and literature of one period, in two or more languages, one of which must be English and one foreign. Students normally include at least two courses in a foreign literature read in the original language and two courses listed under Comparative Literature or Modern Thought and Literature. As many as 20 units of this requirement may be satisfied through courses in reading and research. A student may receive graduate credit for no more than two 100-level courses in the Department of English.
5. A minimum of six courses for a letter grade from graduate colloquia and graduate seminars, of which three must be graduate seminars and of which at least four must be in the Department of English. Among these courses, students should take one in literary theory or criticism. These colloquia and seminars should be in different genres and periods as approved by the adviser.
6. An oral qualifying examination: see item 8 under requirements of the Ph.D. program in English Literature. For qualifications in the doctoral program in English and Comparative Literature, candidates are not held responsible for literature before 1350, but instead include on their reading list a selection of works from a foreign literature read in the original language.

7. *University Oral Examination*—A University oral examination covering the field of concentration (as defined by the student and the student's adviser). Students take 10 units of an Orals Preparation workshop led by the Director of Graduate Studies in Spring quarter of the second year. The oral examination, based on a reading list established by the candidate in consultation with his or her adviser, is taken no later than the Autumn Quarter of the third year of graduate study.
8. *Dissertation*—As early as possible during graduate study, a Ph.D. candidate is expected to find a topic requiring extensive original research and to seek out a member of the department as his or her adviser. The adviser works with the student to select a committee to supervise the dissertation. Candidates should take this crucial step as early in their graduate careers as possible. The committee may well advise extra preparation within or outside the department, and time should be allowed for such work. After the dissertation topic has been approved, the candidate should file a formal reading committee form as prescribed by the University. Once a first chapter has been drafted, the student meets with the full reading committee for a one hour colloquium. The dissertation must be submitted to the adviser as a rough draft, but in substantially final form, at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree.
9. *Closing Colloquium*—Prior to the submission of the dissertation the student and the dissertation committee hold a closing colloquium designed to look forward toward the next steps; identify the major accomplishments of the dissertation and the major questions/ issues/problems that remain; consider possibilities for revision, book or article publication, etc. and to provide some intellectual closure to the dissertation.

## Language Requirements

Candidates for the Ph.D. degree (except those in English and Comparative Literature, for whom special language requirements prevail) must demonstrate a reading knowledge of two foreign languages.

Candidates in the earlier periods must offer Latin and one of the following languages: French, German, Greek, Italian, or Spanish. In some instances, they may be required to offer a third language. Candidates in the later period (that is, after the Renaissance) must offer either French, German, or Latin as one language and may choose the second language from the following: Greek, Latin, French, German, Italian, Spanish, Russian, or another language relevant to the student's field of study. In all cases, the choice of languages offered must have the approval of the candidate's adviser. Any substitution of another language must be approved by the Director of Graduate Studies.

The graduate studies committee does not accept courses taken as an undergraduate in satisfaction of the language requirement for doctoral candidates. For students coming to doctoral work at Stanford from graduate work done elsewhere, satisfaction of a foreign language requirement is determined by the Director of Graduate Studies based on the contact hours, syllabus, reading list, etc. Transfer is not automatic.

The candidate must satisfy one language requirement by the end of the first year (that is, before the qualifying examination), and the other by the end of the third year.

Foreign language requirements for the Ph.D. may be fulfilled in any of the following ways:

1. A reading examination given each quarter by the various language departments, except for Latin and Greek.
2. For Latin and Greek, an examination given by one of the Department of English faculty.
3. Passage with a grade of 'B' or higher of a course in literature numbered 100 or higher in a foreign language department at Stanford. As an alternative for Latin, French, Italian, German, and

Spanish, passage of the following, respectively, with a grade of 'B' or higher:

		Units
FRELANG 250	Reading French	4
FRELANG 250S	Reading French	2-4
GERLANG 250	Reading German	4
ITALLANG 250	Reading Italian	4
SPANLANG 250	Reading Spanish	3

*Emeriti: (Professors)* George H. Brown, W. B. Carnochan, W. S. Di Piero, John Felstiner, Albert J. Gelpi, Barbara C. Gelpi, Shirley Heath, John L'Heureux, Herbert Lindenberger, Andrea A. *Consulting Professor:* Valerie Miner

*Visiting Professors:* Louise Glück, Jane Hirshfield, Philip Gourevitch, Larissa MacFarquhar, Daniel Mason

## Overseas Studies Courses in English

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPOXFRD 17	Novels of Sensation: Gothic, Detective Story, Prohibition, and Transgression in Victorian Fiction	5
OSPOXFRD 57	The Rise of the Woman Writer 1660-1860	5
OSPOXFRD 60	Shakespeare and his Contemporaries	5

## Ethics in Society Program

The Program in Ethics in Society consists of an interdisciplinary honors program and a minor that are open to undergraduates in all majors.

### Mission of the Program in Ethics in Society

The Program in Ethics in Society, which operates under the umbrella of the Bowen H. McCoy Family Center for Ethics in Society, is designed to foster scholarship, teaching, and moral reflection on fundamental issues in personal and public life. The program is grounded in moral and political philosophy, but it extends its concerns across a broad range of traditional disciplinary domains. The program is guided by the idea that ethical thought has application to current social questions and conflicts, and it seeks to encourage moral reflection and practice in areas such as business, international relations, law, medicine, politics, science, and public service.

### Ethics in Society Courses

Courses offered by the Program in Ethics in Society are listed under the subject code ETHICSOC on the Stanford Bulletin's ExploreCourses (<https://explorecourses.stanford.edu/search?q=ETHICSOC&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-ETHICSOC=on&filter-catalognumber-ETHICSOC=on>) web site. There are many course offerings at Stanford that address moral and political questions, only some of which are crosslisted by the Program in Ethics in Society.

### Honors in Ethics in Society

The Program in Ethics in Society offers undergraduates the opportunity to write a senior honors thesis within a community of interdisciplinary scholars. The course of study combines the analytical rigor of moral and political philosophy with the subject matter of each student's self-chosen major to develop a sophisticated understanding of problems of social concern. Such problems include: the nature and implications of treating people with equal dignity and respect; the scope of liberty; the legitimacy of government; and the meaning of responsibility. The program poses these issues and others in the context of debates which arise in our common public life. It thus extends moral concern and reflection across disciplines such as medicine, law, economics, political science, sociology, international relations, and public policy.

Students in the program write honors theses on topics which use moral and political philosophy to address practical problems. Previous theses have considered questions such as the just distribution of health care, obligations to future generations, the role of moral values in education, the moral implications of genetic engineering, and the relationship between gender inequality and the structures of work and family. Students in the program have won scholarships to graduate study including Marshall, Rhodes, and Fulbright fellowships. Others have taken the step from moral analysis to moral commitment, pursuing careers of public service.

The honors program in Ethics in Society is open to majors in every field and must be taken in addition to a department major. Applicants must declare a major before applying to the program. Applicants should have a grade of B+ or higher in all courses taken to fulfill program requirement. Required courses must be taken for a letter grade.

Students interested in pursuing honors in Ethics in Society can apply for early acceptance in June of their sophomore year or the regular deadline in mid November of their junior year. Students should contact the program coordinator for more information and to begin the application process.

## Requirements

### Core Courses

ETHICSOC 20	Introduction to Moral Philosophy or ETHICSOC 171 Ethical Theory	4-5
ETHICSOC 171	Justice	4-5
ETHICSOC 190	Ethics in Society Honors Seminar	3

### Electives

Two 4- or 5-unit undergraduate courses on a subject approved by the faculty director, designed to support research conducted for or connected to the honors thesis. 8-10

**Thesis units spread across Autumn, Winter, and Spring quarters** 10

ETHICSOC 200	Ethics in Society Honors Thesis	
ETHICSOC 200B	Ethics in Society Honors Thesis	
ETHICSOC 200C	Ethics in Society Honors Thesis	

Thesis subject must be approved by the honors adviser and students must receive a grade of 'B+' or higher on their thesis to receive honors in Ethics in Society.

Typically, ETHICSOC 20 or ETHICSOC 170 and ETHICSOC 171 are completed before the Winter Quarter of the junior year. The Ethics in Society Honors Seminar (ETHICSOC 190) is offered only in Winter Quarter and should be taken in the junior year. Specialization courses can be completed at any time and courses taken prior to acceptance in the Program can be used to fulfill this requirement.

Students can elect to receive up to 10 units for writing their theses in their senior year in ETHICSOC 200A, ETHICSOC 200B, and ETHICSOC 200C. Up to 5 units may be taken in one quarter.

The honors thesis is written during Autumn and Winter quarters of the senior year and is generally due the first Monday in May. Students also complete preliminary and final thesis presentations in the senior year and an oral examination after submission of the thesis. To receive honors in Ethics in Society, students must fulfill all requirements, maintain an overall 3.3 GPA or demonstrate academic excellence, and receive a grade of 'B+' or higher on their thesis. Courses taken to fulfill the Ethics in Society honors requirements may be double-counted for any major. Exceptions to this must be approved by the faculty director.

## Minor in Ethics in Society

The Ethics in Society minor is open to students in any department who wish to explore moral issues in personal and public life.

Students must declare the minor in Axxess no later than the last day of Autumn Quarter of their senior year, although they are advised to declare sooner. The student should discuss the minor with an adviser and prepare a proposal that includes a list of courses planned to fulfill the requirements, theme of minor study, and the name of the faculty adviser. The faculty director approves this proposal. Students interested in pursuing a minor in Ethics in Society should contact the program coordinator for more information and to begin the planning process.

A minor in Ethics in Society requires six courses for a minimum of 25 and a maximum of 30 units and courses must be taken for a letter grade.

## Requirements

	Units
ETHICSOC 20 Introduction to Moral Philosophy or ETHICSOC 171 Ethical Theory	4-5
ETHICSOC 171 Justice	4-5
Three courses at the 100-level or above that addresses some dimensions of moral or political problems, in either theory or practice, relating to theme of minor.	14-15
One course at the 200-level or above that addresses some dimensions of moral or political problems, in either theory or practice, relating to theme of minor.	3-5

The 100- and 200-level courses should be focused around a central theme such as biomedical ethics, ethics and economics, ethics and politics, or environmental ethics (or a theme approved by the faculty director). The courses at the 100 and 200 level are normally taken after completion of the core courses.

See the course list in the "Related Courses (p. 457)" section of this bulletin for approved 100- and 200-level courses taken by students in recent years. The faculty director may approve additional courses.

Courses credited to the Ethics in Society minor may not be double-counted toward major requirements.

*Faculty Director:* Brent Sockness

*Affiliated Faculty:* Kenneth Arrow (Economics, emeritus), Donald Barr (Pediatrics), Michael Bratman (Philosophy), Eamonn Callan (Education), Jorah Dannenberg (Philosophy), Barbara Fried (Law), Leah Gordon (Education), Nadeem Hussain (Philosophy), Allyson Hobbs (History), Pam Karlan (Law), Alison McQueen (Political Science), Benoît Monin (Psychology, Graduate School of Business), Josiah Ober (Classics, Political Science), Rob Reich (Political Science, Philosophy), Eric Roberts (Computer Science), Debra Satz (Philosophy), Tamar Schapiro (Philosophy), Brent Sockness (Religious Studies), David K. Stevenson (Pediatrics), Allen Wood (Philosophy, emeritus), Lee Yearley (Religious Studies)

## Related Courses

This is a partial list of courses that have been counted as specialization courses (honors requirement) or 100- and 200-level courses (minor requirement) in recent years. Courses not on this list may be submitted to the faculty director for approval.

	Units	
ANTHRO 90B	Theory of Cultural and Social Anthropology	5
ANTHRO 179	Cultures of Disease: Cancer and HIV/AIDS	5
ANTHRO 282	Medical Anthropology	4
ARTHIST 203	Greek Art In and Out of Context	5
COMM 131	Media Ethics and Responsibility	4-5
CS 181	Computers, Ethics, and Public Policy	4
ECON 118	Development Economics	5
EDUC 165/265	History of Higher Education in the U.S.	3-5
EDUC 201	History of Education in the United States	3-5
EDUC 220C	Education and Society	4-5
EDUC 247	Moral and Character Education	3
ETHICSOC 178M	Introduction to Environmental Ethics	4-5
HUMBIO 122S	Social Class, Race, Ethnicity, and Health	4
HUMBIO 129	Critical Issues in International Women's Health	4
HUMBIO 170	Justice, Policy, and Science	5

HUMBIO 172B	Children, Youth, and the Law	5
HUMBIO 174	Foundations of Bioethics	3
IPS 241	International Security in a Changing World	5
INTNLREL 140A	International Law and International Relations	5
MS&E 254	The Ethical Analyst	1-3
PHIL 187	Philosophy of Action	4
PHIL 194T	Practical Reason	4
POLISCI 1	The Science of Politics	5
POLISCI 122	Introduction to American Law	3-5
POLISCI 123	Politics and Public Policy	4-5
POLISCI 125P	The First Amendment: Freedom of Speech and Press	4-5
POLISCI 226	Race and Racism in American Politics	5
PUBLPOL 106	Law and Economics	4-5
PUBLPOL 183	Philanthropy and Social Innovation	4
SOC 135	Poverty, Inequality, and Social Policy in the United States	3

Ethics in Society (ETHICSOC) courses given this year are listed here by quarter offered. Each quarter is linked to ExploreCourses where you can find times and locations.

## Autumn Quarter

ETHICSOC 232T	Theories of Civil Society, Philanthropy, and the Nonprofit Sector	5
ETHICSOC 234R	Ethics On the Edge: Business, Non-Profit Organizations, Government, and Individuals	3
ETHICSOC 280	Transitional Justice, Human Rights, and International Criminal Tribunals	3-5

## Feminist, Gender, and Sexuality Studies

Courses offered by the Program in Feminist, Gender, and Sexuality Studies are listed under the subject code FEMGEN on the Stanford Bulletin's ExploreCourses web site.

The Program in Feminist, Gender, and Sexuality Studies offers an undergraduate major and minor, and an interdisciplinary honors program that is open to students in all majors. Each Feminist, Gender, and Sexuality Studies student builds an individual program of study around a self-defined thematic focus, integrating courses from multiple departments. The program encourages work in the arts and supports creative honors theses. Feminist, Gender, and Sexuality Studies majors may declare Arts & Culture, Global Studies, Health, or LGBT/Queer Studies as a subplan, or may design their own thematic focus. Subplans are printed on the diploma; individual thematic foci are not printed on the diploma. See the "Bachelor's" (p. 459) tab of this section of the bulletin for descriptions of the subplans.

Curriculum guidelines and forms for the undergraduate major, minor, and honors programs are available on the program web site (<https://feminist.stanford.edu/undergraduates>). See the program web site for additional contact information (<https://feminist.stanford.edu/about>).

The Program in Feminist, Gender, and Sexuality Studies offers the option of a Ph.D. minor to graduate students already enrolled in a Ph.D. program at Stanford University. The Ph.D. minor in Feminist, Gender, and Sexuality Studies provides graduate students pursuing Ph.D.s broad interdisciplinary knowledge in the field and prepares them to teach courses in the subject. The goal of the program is to bring together graduate students and faculty from different departments, programs, and schools who use feminist and queer perspectives in their research.

## Mission of the Undergraduate Program in Feminist, Gender, and Sexuality Studies

The interdepartmental Program in Feminist, Gender, and Sexuality Studies provides students with knowledge and skills to investigate the significance of gender and sexuality in all areas of human life. Feminist, Gender, and Sexuality Studies examines how societies structure gender roles, relations, and identities, and how these intersect with other hierarchies of power, such as class, race, nationality, ethnicity, sexuality, ability, and age. The program coordinates courses offered across the University in feminist and lesbian, gay, bisexual, transgender, and queer studies. Students learn to employ critical gender and sexuality studies methodologies to analyze the assumptions about gender and sexuality that inform the study of individuals, cultures, social institutions, policy, and areas of scholarly inquiry. The program prepares majors for graduate study in humanities and social sciences and for professional schools.

## Learning Outcomes (Undergraduate)

The program expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the undergraduate program. Students are expected to demonstrate:

1. understanding of how social hierarchies related to gender, sexuality, race and ethnicity have developed historically, cross-culturally, and transnationally.
2. knowledge of the histories of feminist, gender, sexuality, and/or LGBT/queer social movements and their intersections with other social movements.
3. knowledge and comprehension of feminist, gender, sexuality, and/or LGBT/queer theories and methods for social, historical, literary and cultural analysis.
4. skill in making and communicating feminist, gender, sexuality, and/or LGBT/queer analyses of data, texts, and arguments.
5. competence in applying theory to practical experience for social transformation and citizenship.

## Bachelor of Arts in Feminist, Gender, and Sexuality Studies

The major in Feminist, Gender, and Sexuality Studies requires 63 units and may be taken as a single major, as one of multiple majors, or as a secondary major. FEMGEN core courses must be taken for a letter grade. A student wishing to major in Feminist, Gender, and Sexuality Studies should declare the major via Axess, by Autumn Quarter of the junior year. The student then selects a subplan or develop an individualized proposal describing a thematic focus and outlining a course of study, approved by a prospective adviser from the list of affiliated faculty. The proposal is then submitted to the Program Office (Bldg. 460, Room 216) for approval by the Director.

A maximum of 10 of the 63 units for the major may be taken on a credit/no credit or satisfactory/no credit basis; a maximum of 10 units may be taken as independent study or directed reading.

If taken as one of multiple majors, none of the 63 units counted toward the major in Feminist, Gender, and Sexuality Studies may overlap with units counted toward the major in another department or program. If taken as a secondary major, up to 30 of the units counted toward the Feminist, Gender, and Sexuality Studies major may also be counted as fulfilling the major requirements in another department or program if that department or program consents.

### Curriculum

The major in Feminist, Gender, and Sexuality Studies includes a total of at least 12 approved courses for a minimum of 63 units. The courses are divided among the core, the focus, and electives to reach the total course requirement. Not all courses are offered every year; consult ExploreCourses for current course offerings. Courses not listed below that relate to the themes of Feminist, Gender, and Sexuality Studies may potentially be counted towards the major as well; contact the academic services administrator, (rmeisels@stanford.edu) for more information.

### The Core

#### 1. Introductory Course

FEMGEN 101	Introduction to Feminist, Gender, and Sexuality Studies	5
------------	---	---

#### 2. Feminist Theories and Method

FEMGEN 103	Feminist Theories and Methods Across the Disciplines	2-5
------------	--	-----

#### 3. Junior and Senior Seminars and Practica

FEMGEN 104A	Junior Seminar and Practicum	1
FEMGEN 104B	Senior Seminar and Practicum	2
<b>4. One feminist, gender, or sexuality theory course from approved course list below.</b>		3-5

FEMGEN 14N	Imagining India: Art, Culture, Politics in Modern India
FEMGEN 63N	The Feminist Critique: The History and Politics of Gender Equality
FEMGEN 130S	Sex and the Novel
FEMGEN 134	The Marriage Plot
FEMGEN 144	Women and Gender in Science, Medicine and Engineering
FEMGEN 154	Black Feminist Theory
FEMGEN 155	The Changing American Family
FEMGEN 163	Queer America
FEMGEN 212X	Knights, Monks, and Nobles: Masculinity in the Middle Ages
FEMGEN 215	Saints and Sinners: Women and Religion in the Medieval World
FEMGEN 239	Queer Theory
FEMGEN 314	Performing Identities
FEMGEN 330	Transnational Sexualities
FEMGEN 389E	Queer of Color Critique: Race, Sex, Gender in Cultural Representations
ANTHRO 90B	Theory of Cultural and Social Anthropology
COMPLIT 133	Gender and Modernism
COMPLIT 250	Literature, History and Memory

#### 5. One Feminist, Gender, and Sexuality Studies or a related course in the social sciences

Subjects include Anthropology, Communication, Education, History, Human Biology, Law, Medicine, Political Science, Psychology, or Sociology

#### 6. One Feminist, Gender, and Sexuality Studies or a related course in the humanities

Subjects include English, Linguistics, Philosophy, Religious Studies, the arts, and languages

Total Units	19-28
-------------	-------

### Writing in the Major (WIM)

Majors in Feminist, Gender, and Sexuality Studies may satisfy the Writing in the Major (WIM) requirement by taking one of the approved WIM courses in the list below. Honors students satisfy the WIM requirement through their honors work.

WIM Courses for Majors		Units
AMSTUD 160	Perspectives on American Identity	4-5
ANTHRO 90B	Theory of Cultural and Social Anthropology	
LINGUIST 150	Language in Society	
Total Units		4-5

### Practicum

The practicum courses (FEMGEN 104A Junior Seminar and Practicum, FEMGEN 104B Senior Seminar and Practicum) bring together theory and practical experience. The practicum involves field research, community service, or other relevant experience such as a public service internship. Students plan their practicum during Winter Quarter of the junior year in FEMGEN 104A Junior Seminar and Practicum (1 unit). The practicum is normally done over the summer between junior and senior year and may be taken for additional units. It is followed by FEMGEN 104B Senior Seminar and Practicum (2 units), in Autumn Quarter of the senior year.

Units

## The Focus

All Feminist, Gender, and Sexuality Studies majors must complete the Feminist, Gender, and Sexuality Studies major core requirements (7 courses) and an additional 5 courses constituting an area of focus. Those 5 courses should be chosen in consultation with the student's adviser and the Associate Director.

FGSS majors have the option of declaring a formal subplan *or* of designing an individualized thematic focus. Subplans are noted on student transcripts and diplomas; individually designed thematic foci are not noted on the transcript or diploma. The following are the four formal subplans:

### Arts & Culture Subplan

The Arts & Culture subplan is appropriate for fields of study focusing on interpretation, production, and consumption of messages of feminism, gender, and sexuality through arts, media, literature and performance. Courses that may fulfill requirements include but are not limited to:

		Units
FEMGEN 14N	Imagining India: Art, Culture, Politics in Modern India	3
FEMGEN 28N	Queer Lives in Music	3
LINGUIST 52N	Spoken Sexuality: Language and the Social Construction of Sexuality	3
FEMGEN 109	Looking Back, Moving Forward: Raising Critical Awareness in Gender and Sports	3
FEMGEN 130S	Sex and the Novel	5
FEMGEN 134	The Marriage Plot	5
FEMGEN 139B	American Women Writers, 1850-1920	5
FEMGEN 144F	Female Modernists: Women Writers in Paris Between the Wars	5
FEMGEN 159	James Baldwin & Twentieth Century Literature	5
FEMGEN 177	Writing for Performance: The Fundamentals	4
FEMGEN 183	Re- Imagining American Borders	5
FEMGEN 188Q	Imagining Women: Writers in Print and in Person	4-5
FEMGEN 313	Performance and Performativity	1-4
FEMGEN 314	Performing Identities	4
FEMGEN 330	Transnational Sexualities	4
FEMGEN 389E	Queer of Color Critique: Race, Sex, Gender in Cultural Representations	3-5

### Health Subplan

The Health subplan is appropriate for fields of study focusing on feminist perspectives of science and technologies, gender justice and human rights, gender health and medicine, access/disparities/needs regarding health and sexuality, and women's roles as practitioners and researchers. Courses that may fulfill requirements include but are not limited to:

		Units
FEMGEN 105C	Human Trafficking: Historical, Legal, and Medical Perspectives	5
FEMGEN 114	SEXUAL DIVERSITY AND HEALTH	1
FEMGEN 129	Critical Issues in International Women's Health	4
FEMGEN 144	Women and Gender in Science, Medicine and Engineering	5
FEMGEN 156H	Women and Medicine in US History: Women as Patients, Healers and Doctors	5
FEMGEN 193G	Psychological Well-Being on Campus: A Focus on Gender and Sexual Identities	1
FEMGEN 206	Global Medical Issues Affecting Women	1
FEMGEN 216X	Narrating Queer Trauma	4-5

FEMGEN 224	Challenging Sex and Gender Dichotomies in Medicine	1
FEMGEN 230	Sexual Function and Diversity in Medical Disciplines	1-3
FEMGEN 237	Health and Medical Impact of Sexual Assault across the Lifecourse	1-3
FEMGEN 241	Sex and Gender in Human Physiology and Disease	2-3
FEMGEN 256	Current Topics and Controversies in Women's Health	2-3
FEMGEN 260	Women and Disabilities	5

### Global Studies Subplan

The Global Studies subplan is appropriate for fields of study focusing cross-cultural perspectives on gender, gender justice and human rights, race/class/gender intersections, gender/spirituality/religion, geopolitical contexts of feminism and LGBTQ activism, and gender and education. Courses that may fulfill requirements include but are not limited to:

		Units
FEMGEN 14N	Imagining India: Art, Culture, Politics in Modern India	3
FEMGEN 105C	Human Trafficking: Historical, Legal, and Medical Perspectives	5
FEMGEN 129	Critical Issues in International Women's Health	4
FEMGEN 144F	Female Modernists: Women Writers in Paris Between the Wars	5
FEMGEN 206	Global Medical Issues Affecting Women	1
FEMGEN 212X	Knights, Monks, and Nobles: Masculinity in the Middle Ages	4-5
FEMGEN 215	Saints and Sinners: Women and Religion in the Medieval World	5
FEMGEN 330	Transnational Sexualities	4

### LGBT/Queer Studies subplan

The LGBT/Queer Studies subplan is appropriate for fields of study focusing on history and theories of lesbian, gay, bisexual, transgender, and queer identities, communities, cultural practices, politics, and legal and medical issues. Courses that may fulfill requirements include but are not limited to:

		Units
FEMGEN 28N	Queer Lives in Music	3
FEMGEN 36N	Gay Autobiography	4
LINGUIST 52N	Spoken Sexuality: Language and the Social Construction of Sexuality	3
FEMGEN 113	Transgender Studies	3-4
FEMGEN 114	SEXUAL DIVERSITY AND HEALTH	1
FEMGEN 116	Narrating Queer Trauma	4-5
FEMGEN 121	Intro to Queer Studies	4-5
FEMGEN 124	Challenging Sex and Gender Dichotomies in Medicine	1
FEMGEN 140D	LGBT/Queer Life in the United States	4-5
FEMGEN 159	James Baldwin & Twentieth Century Literature	5
FEMGEN 163	Queer America	4
FEMGEN 258	Sexual Violence in America	4-5
FEMGEN 330	Transnational Sexualities	4
FEMGEN 389E	Queer of Color Critique: Race, Sex, Gender in Cultural Representations	3-5
SOC 155	The Changing American Family	4

## Overseas Studies Courses in Feminist, Gender, and Sexuality Studies

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) web site or the Bing Overseas Studies (<http://bosp.stanford.edu>) web site. Students should consult the Associate Director for applicability of Overseas Studies courses to a major or minor program.

## Honors Program in Feminist, Gender, and Sexuality Studies

### For Majors in Feminist, Gender, and Sexuality Studies

**Admission**—The honors program offers an opportunity to do independent research for a senior thesis. It is open to students with a grade point average (GPA) of 3.5 or better in course work in Feminist, Gender, and Sexuality Studies, or demonstrated academic competence. Students should begin the application process by consulting with the Program Director or the Associate Director as early as possible in the junior year, preferably by the end of Winter Quarter.

During the application process, students design a project in consultation with their proposed thesis advisers and the Associate Director. A proposal describing the project and the number of units to be taken toward the honors directed project must be submitted to the program office for final approval. All projects must have a primary focus on gender or sexuality. See the honors section of the program web site (<https://feminist.stanford.edu/undergraduates/honors-program>) for additional details.

### Requirements

1. Students enroll for 2-3 units per quarter in FEMGEN 199A, FEMGEN 199B, and FEMGEN 199C Feminist, Gender, and Sexuality Studies Honors Workshop.
2. Students in the honors program also enroll for FEMGEN 105 Honors Work with their respective advisers, for an additional 2-3 units each quarter. The combined number of units in 199 and 105 must be 5 per quarter, unless permission is granted by the Director or Associate Director for a different formulation.
3. A semifinal draft of the thesis is due early in Spring Quarter of the senior year.
4. The final thesis must be submitted by May 15 (or the following Monday should May 15 fall on a weekend). The completed thesis must be submitted with the Thesis Completion Form, which requires the adviser's signature of approval. Creative projects must include a section of critical analysis. For guidelines, see the honors section of the program web site (<https://feminist.stanford.edu/undergraduates/honors-program>).

### For Majors in Other Departments

Interdisciplinary Honors in Feminist, Gender, and Sexuality Studies for majors in other departments or programs, as distinguished from honors for students pursuing a major in Feminist, Gender, and Sexuality Studies, is intended to complement study in any major. Feminist, Gender, and Sexuality Studies minors who wish to pursue honors in Feminist, Gender, and Sexuality Studies should apply through the process for non-majors.

### Admission

The Feminist, Gender, and Sexuality Studies honors program is open to students majoring in any field with an overall GPA of 3.5 or better or demonstrated academic competence.

Students must complete the following with a grade of 'B+' or better:

1. Either FEMGEN 101 Introduction to Feminist, Gender, and Sexuality Studies or FEMGEN 103 Feminist Theories and Methods Across the Disciplines, and one other designated feminist theory course, or

2. Three Feminist, Gender, and Sexuality Studies courses and/or approved courses relevant to the proposed honors research.

Students should begin the application process by consulting with the Program Director or the Associate Director as early as possible in the junior year, preferably by the end of Winter Quarter. During the application process, students design a project in consultation with their proposed thesis advisers and the Associate Director. A proposal describing the project and the number of units to be taken toward the honors directed project must be submitted to the program office for final approval. All projects must have a primary focus on gender or sexuality. See the honors section of the program web site (<https://feminist.stanford.edu/undergraduates/honors-program>) for additional details.

### Requirements

1. Students enroll for 2-3 units per quarter in FEMGEN 199A, FEMGEN 199B, and FEMGEN 199C Feminist, Gender, and Sexuality Studies Honors Workshop.
2. Students in the honors program also enroll for FEMGEN 105 Honors Work with their respective advisers, for an additional 2-3 units each quarter. The combined number of units in 199 and 105 must be 5 per quarter unless permission is granted by the Director or Associate Director for a different formulation.
3. A semifinal draft of the thesis is due early in Spring Quarter of the senior year.
4. The final thesis must be submitted by May 15 (or the following Monday should May 15 fall on a weekend). The completed thesis must be submitted with the Thesis Completion Form, which requires the adviser's signature of approval. Creative projects must include a section of critical analysis. For guidelines, see the honors section of the program web site (<https://feminist.stanford.edu/undergraduates/honors-program>).

## Minor in Feminist, Gender, and Sexuality Studies

A student wishing to minor in Feminist, Gender, and Sexuality Studies should apply to the minor via Axess, preferably by Winter Quarter of the junior year. The student then develops an individualized proposal describing a thematic focus and outlining a course of study, approved by a prospective adviser from the list of affiliated faculty. The proposal is then submitted to the Program Office (Bldg. 460, Room 216) for approval by the Director.

The minor in Feminist, Gender, and Sexuality Studies consists of at least six courses of 3 or more units each at the 100 level or above for a maximum of 36 units. None of the units for the minor may count towards the student's major.

### Requirements

	Units
<b>1. Introductory Course</b>	
FEMGEN 101 Introduction to Feminist, Gender, and Sexuality Studies	5
<b>2. One of the feminist, gender, or sexuality theory courses from the approved course list below</b>	
FEMGEN 103 (FEMGEN 101 is a prerequisite of FEMGEN 103)	
FEMGEN 130S Sex and the Novel	
FEMGEN 134 The Marriage Plot	
FEMGEN 138 Violence Against Women: Theory, Issues, and Prevention	
FEMGEN 144 Women and Gender in Science, Medicine and Engineering	
FEMGEN 154 Black Feminist Theory	
FEMGEN 155 The Changing American Family	

FEMGEN 163	Queer America
FEMGEN 239	Queer Theory
FEMGEN 314	Performing Identities
FEMGEN 389E	Queer of Color Critique: Race, Sex, Gender in Cultural Representations
ANTHRO 90B	Theory of Cultural and Social Anthropology
COMPLIT 133	Gender and Modernism
COMPLIT 250	Literature, History and Memory

**Focus Courses** 12

At least 4 courses or 3 or more units each at the 100 level or higher; see "The Focus" section following below.

Total Units 20-22

**The Focus**

At least 4 of the courses for the minor should relate to a thematic focus defined by the student and faculty adviser. See the suggested clusters listed in the "Bachelor of Arts in Feminist, Gender, and Sexuality Studies (p. 459)" section of this bulletin. At least one course within the thematic focus should address race/ethnicity and/or global perspectives on feminist, gender, and sexuality studies.

**Ph.D Minor in Feminist, Gender, and Sexuality Studies**

The Ph.D. minor in Feminist, Gender, and Sexuality Studies provides graduate students pursuing Ph.D.s broad interdisciplinary knowledge in the field and prepares them to teach courses in the subject. The goal of the program is to bring together graduate students and faculty from different departments, programs, and schools who use feminist and queer perspectives in their research.

**Application and Acceptance**

Prospective students submit a Ph.D. minor application form outlining an academic plan with courses and quarters to satisfy the minor requirements. The form must be signed by the student's home department faculty adviser.

An Application for Ph.D. Minor ([http://studentaffairs.stanford.edu/sites/default/files/registrar/files/app\\_phd\\_minor.pdf](http://studentaffairs.stanford.edu/sites/default/files/registrar/files/app_phd_minor.pdf)) outlining a program of study must be approved by the major and minor departments and submitted to the Student Services Center. This form is submitted at the time of admission to candidacy or at the appropriate time thereafter. Prior to that time, students are expected to have been working with an adviser from the affiliated faculty in Feminist, Gender, and Sexuality Studies to ensure that all the requirements can be met without delaying progress to degree or to TGR status. Students are encouraged to consult with the Director or Associate Director as soon as they have developed an interest in pursuing the minor. A student who is planning to apply for a master's degree on the way to the Ph.D. should plan out the course of study carefully, since units for the minor may not also be counted toward a Stanford master's degree.

An accepted student selects a Feminist, Gender, and Sexuality Studies faculty adviser with assistance from the program director. The adviser meets with the student to discuss and sign the academic plan outlined on the Application for Ph.D. Minor form. The plan represents a student's best estimate of courses planned to meet the minor requirements. Students who wish to enroll in the minor after the Winter Quarter of their first year must demonstrate that their participation will not delay their time to degree or their time to TGR.

Students must remain in good academic standing in their home departments.

**Requirements**

To receive the Ph.D. Minor in Feminist, Gender, and Sexuality Studies, students fulfill the following requirements, for a minimum of 20 units at the graduate level (typically 200-level or higher).

		Units
FEMGEN 203	Feminist Theories and Methods Across the Disciplines	3-5
A feminist theory course such as:		4-5
ANTHRO 201	Introduction to Cultural and Social Anthropology	
FEMGEN 238	Violence Against Women: Theory, Issues, and Prevention	
FEMGEN 239	Queer Theory	
HISTORY 212	Knights, Monks, and Nobles: Masculinity in the Middle Ages	
HISTORY 215	Saints and Sinners: Women and Religion in the Medieval World	
ILAC 282	Queer Film	
ILAC 382	Latin@ Literature	
SOC 242	Sociology of Gender	
SOC 252	The Social Determinants of Health	
SOC 255	The Changing American Family	
FEMGEN 314	Performing Identities	
FEMGEN 330	Transnational Sexualities	
FEMGEN 389E	Queer of Color Critique: Race, Sex, Gender in Cultural Representations	
10 units of elective graduate-level courses or related courses (a minimum of 2 courses, but 3 courses if necessary in order to achieve 10 units): graduate-level courses or related courses in Feminist, Gender, and Sexuality Studies, one of which may be from the student's home department. The following are examples of appropriate elective courses. Check ExploreCourses for scheduling information.		10
AMSTUD 258	Sexual Violence in America	
ANTHRO 282	Medical Anthropology	
ANTHRO 349	Anthropology of Capitalism	
ARTHIST 376	Feminism and Contemporary Art	
CHILATST 201	Critical Concepts in Chican@ Literature	
CHINGEN 235	Chinese Bodies, Chinese Selves	
CHINGEN 250	Sex, Gender, and Power in Modern China	
COMPLIT 226A	Queer Literature and Film	
COMPLIT 236	Literature and Transgression	
COMPLIT 312	Oscar Wilde and the French Decadents	
CSRE 279G	Indigenous Identity in Diaspora: People of Color Art Practice in North America	
EDUC 273	Gender and Higher Education: National and International Perspectives	
FAMMED 245	Women and Health Care	
FEMGEN 238	Violence Against Women: Theory, Issues, and Prevention	
FEMGEN 255	The Changing American Family	
FEMGEN 299	Graduate Workshop: Feminist, Gender, and Sexuality Studies	
FEMGEN 358	Sexual Violence in America	
FEMGEN 360	Women and Disabilities	
HISTORY 221B	The 'Woman Question' in Modern Russia	
HISTORY 358	Sexual Violence in America	
HISTORY 366B	Immigration Debates in America, Past and Present	
HISTORY 395J	Gender and Sexuality in Chinese History	
ILAC 380E	Critical Concepts in Chican@ Literature	

ILAC 382	Latin@ Literature	
ILAC 389E	Queer of Color Critique: Race, Sex, Gender in Cultural Representations	
ILAC 393	The Cinema of Pedro Almodovar	
INDE 215	Queer Health and Medicine	
INDE 260	Journeys in Women's Health and Sex and Gender in Medicine	
JAPANGEN 287	Romance, Desire, and Sexuality in Modern Japanese Literature	
LAW 255	Constitutional Law: The Fourteenth Amendment	
LAW 307	Gender, Law, and Public Policy

## Academic Progress

Students submit an annual progress report listing the courses completed towards the minor and courses planned in future quarters. This form is approved by both the main faculty adviser and the Feminist, Gender, and Sexuality Studies faculty adviser. Students meet with their Feminist, Gender, and Sexuality Studies faculty adviser to discuss their progress report.

## Notation

Students who complete all the requirements receive the following notation on their transcript and diploma: "Ph.D. Minor in Feminist, Gender, and Sexuality Studies."

## Sponsorship

The Ph.D. minor in Feminist, Gender, and Sexuality Studies is sponsored by the Program in Modern Thought and Literature. The minor is administered by the Program in Feminist, Gender, and Sexuality Studies.

## Program Director

Christine Min Wotipka (Education)

## Associate Director

Patti Hanlon-Baker

## Faculty Affiliates

*American Studies:* Shelley Fisher Fishkin

*Anthropology:* Paulla Ebron, Miyako Inoue, S. Lochlann Jain, Matthew Kohrman, Barbara Voss, Sylvia Yanagisako

*Art and Art History:* Terry Berlier, Pamela Lee, Jean Ma, Richard Meyer

*Comparative Literature:* Petra Dierkes-Thrun, Patricia Parker

*Developmental Biology:* Ellen Porzig

*East Asian Languages and Cultures:* Haiyan Lee, Yoshiko Matsumoto, James Reichert, Melinda Takeuchi

*Education:* Myra Strober (emerita), Christine Min Wotipka

*English:* Eavan Boland, Helen Brooks, Terry Castle, Michele Elam, Shelly Fisher Fishkin, Barbara Gelpi (emerita), Claire Jarvis, Andrea Lunsford, Paula Moya, Stephen Orgel, Ramón Saldivar, Elizabeth Tallent

## Overseas Studies Courses in Feminist, Gender, and Sexuality Studies

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students

should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPBER 174	Sports, Culture, and Gender in Comparative Perspective	5
OSPFLOR 34	The Virgin Mother, Goddess of Beauty, Grand Duchess, and the Lady: Women in Florentine Art	4
OSPFLOR 67	The Celluloid Gaze: Gender, Identity and Sexuality in Cinema	4
OSPMADRD 45	Women in Art: Case Study in the Madrid Museums	4
OSPOXFRD 57	The Rise of the Woman Writer 1660-1860	5
OSPOXFRD 117W	Gender and Social Change in Modern Britain	4-5
OSPSANTG 14	Women Writers of Latin America in the 20th Century	4-5

### Related Courses

The following is a partial list of related courses for Feminist, Gender, and Sexuality Studies. See ExploreCourses for course descriptions and General Education Requirements (GER)/WAYS information. See degree requirements above or check with the program associate director for applicability of these courses toward specific major or minor program requirements.

		Units
AMSTUD 139B	American Women Writers, 1850-1920	5
AMSTUD 156H	Women and Medicine in US History: Women as Patients, Healers and Doctors	5
AMSTUD 161	Women in Modern America	4-5
AMSTUD 183	Re- Imagining American Borders	5
AMSTUD 214	The American 1960s: Thought, Protest, and Culture	5
AMSTUD 258	Sexual Violence in America	4-5
ANTHRO 201	Introduction to Cultural and Social Anthropology	3-5

SOC 142	Sociology of Gender	5
SOC 152	The Social Determinants of Health	4

SOC 155	The Changing American Family	4
TAPS 314	Performing Identities	4

## French and Italian

Courses offered by the Department of French and Italian are listed on the Stanford Bulletin's ExploreCourses web site under the subject codes FRENCH (French General and Literature) and ITALIAN (Italian General and Literature). For courses in French or Italian language instruction with the subject code FRENLANG or ITALLANG, see the "Language Center (p. 537)" section of this bulletin.

The department is a part of the Division of Literatures, Cultures, and Languages (p. 416).

### French Section

The French section provides students with the opportunity to pursue course work at all levels in French language, literature, cultural and intellectual history, theory, film, and Francophone studies. It understands the domain of French Studies as encompassing the complex of cultural, political, social, scientific, commercial, and intellectual phenomena associated with French-speaking parts of the world, from France and Belgium to Canada, Africa, and the Caribbean.

Three degree programs are available in French: a B.A., a terminal M.A., and a Ph.D. A Ph.D. in French and Italian is also available.

Visiting faculty and instructors contribute regularly to the life of the French section. The section maintains contacts with the Ecole Normale Supérieure, the Institut d'Etudes Politiques, and the Ecole Polytechnique.

A curator for Romance languages oversees the extensive French collection at Green Library. The Hoover Institute on War, Revolution, and Peace also includes materials on 20th-century France and French social and political movements.

### Stanford Center for Interdisciplinary Studies

The center, founded in partnership with the French Ministry of Foreign Affairs, aims to bridge the disciplines of the humanities, social sciences, sciences, engineering, business, and law, to address historical and contemporary issues. Its programs bring faculty and students from across Stanford's departments and schools in contact with colleagues in France to explore issues of common intellectual concern. The center invites French-speaking scholars to offer courses or give lectures or seminars on campus. It facilitates internships for Stanford students in computer science and engineering in Sophia-Antipolis, France's new high-tech center near Nice.

### Stanford in Paris

The Bing Overseas Studies Program in Paris offers undergraduates the opportunity to study in France during Autumn, Winter, and Spring quarters. It provides a wide range of academic options, including course work at the Stanford center and at the University of Paris, independent study projects, and internships. In addition, the program promotes interaction with the local community through volunteer employment, homestays, and internships. The minimum language requirement for admission into Stanford in Paris is one year of French at the college level.

Courses offered in Paris may count toward fulfillment of the requirements of the French major or minor. Students should consult with the Chair of Undergraduate Studies before and after attending the program, in order to ensure that course work and skills acquired abroad can be coordinated appropriately with their degree program. Detailed information, including program requirements and curricular offerings, may be obtained from the "Overseas Studies" section of this bulletin, the Stanford in Paris (<http://>

[osp.stanford.edu/program/paris](http://osp.stanford.edu/program/paris)) web site, or the Overseas Studies Program Office in Sweet Hall.

### La Maison Française

La Maison Française, 610 Mayfield, is an undergraduate residence that serves as a campus French cultural center, hosting in-house seminars as well as social events, film series, readings, and lectures by distinguished representatives of French and Francophone intellectual, artistic, and political life. Assignment is made through the regular housing draw.

### Mission of the Undergraduate Program in French

The mission of the undergraduate in French is to expose students to a variety of perspectives in French language, culture, and history by providing majors and minors with training in writing and communication as well cultural, textual, and historical analysis. Through such skills, students develop into critical and global thinkers prepared for careers in business, social service, journalism, and government, or for graduate study in French.

### Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. oral proficiency in French beyond the interpersonal level with presentational language abilities.
2. writing proficiency in French beyond the interpersonal level with presentational language abilities.
3. close reading skills of authentic texts in French.
4. the ability to develop effective and nuanced lines of interpretation.

### Italian Section

The Italian section offers graduate and undergraduate programs in Italian language, literature, culture, and intellectual history. Course offerings range from small, specialized graduate seminars to general courses open to all students on authors such as Dante, Boccaccio, and Machiavelli.

Two degree programs are available in Italian: a B.A., and a Ph.D. A Ph.D. in French and Italian is also available.

Collections in Green Research Library are strong in the medieval, Renaissance, and contemporary periods; the Italian section is one of the larger constituents of the western European collection at the Hoover Institution for the Study of War, Revolution, and Peace; and the Music Library has excellent holdings in Italian opera.

### La Casa Italiana

La Casa Italiana, 562 Mayfield, is an undergraduate residence devoted to developing an awareness of Italian language and culture. It works closely with the Italian Cultural Institute in San Francisco and with other local cultural organizations. It hosts visiting representatives of Italian intellectual, artistic, and political life. A number of departmental courses are taught at the Casa, which also offers in-house seminars. Assignment is made through the regular undergraduate housing draw.

### Stanford in Florence

The Bing Overseas Studies Program in Florence affords undergraduates with at least three quarters of Italian language the opportunity to take advantage of the unique intellectual and visual resources of the city and to focus on two areas: Renaissance history and art, and contemporary Italian and European studies. The program is structured to help integrate students into Italian culture through homestays, Florence University

courses, the Language Partners Program, research, internship and public service opportunities, and by conducting some of the program's classes in Italian. Many courses offered in Florence may count toward the fulfillment of requirements for the Italian major or minor. Students are encouraged to consult with the Italian undergraduate adviser before and after a sojourn in Florence to ensure that their course selections meet Italian section requirements. Information on the Florence program is available in the "Overseas Studies" section of this bulletin, the Stanford in Florence (<http://osp.stanford.edu/program/florence>) web site, or at the Overseas Studies office in Sweet Hall.

## Mission of the Undergraduate Program in Italian

The mission of the undergraduate program in Italian is to expose students to a variety of perspectives in Italian language, culture, and history by providing majors with training in writing and communication as well as cultural, textual, and historical analysis in order to develop students into critical and global thinkers prepared for careers in business, social service, and government, or for graduate study in Italian.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. oral proficiency in Italian beyond the interpersonal level with presentational language abilities.
2. writing proficiency in Italian beyond the interpersonal level with presentational language abilities.
3. close reading skills of authentic texts in Italian.
4. the ability to develop effective and nuanced lines of interpretation.

## Graduate Programs in French and Italian

The department offers a Ph.D. and terminal M.A. in French, a Ph.D. in Italian, and a Ph.D. in French and Italian.

## Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in French or Italian and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in French, Italian, or French and Italian. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of French, Italian, or French and Italian and to interpret and present the results of such research.

## Bachelor of Arts in French

The French section offers a major and a minor in French. Students are encouraged to pursue a course of study tailored to their individual needs and interests. A degree in French serves as a stepping stone to entering international business, law, translation, and teaching, or as preparation for graduate studies in French, history, or comparative literature.

The French major allows students to combine their work in French with work from another field such as African studies, linguistics, art history, music, economics, history, education, medicine, international relations, political science, or other foreign languages and literatures. The literature and philosophy specialization offers students the opportunity to pursue

interdisciplinary studies at the intersection of literature and philosophy in a structured manner and alongside similarly interested students from a variety of humanistic disciplines.

To graduate with a major in French, students must complete a minimum of 56 units of course work in the major. These units may not be used towards any other major or minor. Courses applied to the major must be taken for a letter grade, and a grade point average (GPA) of 2.0 or better must be achieved in each course. Relevant courses from other departments or programs may also earn credit toward the major as electives with the prior consent of the Chair of Undergraduate Studies. Up to 12 units of coursework completed at another university or earned through AP credit may be counted toward the major, with approval by the Chair of Undergraduate Studies. No more than 12 units of coursework for the major should be taken as independent study courses. To enroll in all French literature courses, students must have successfully completed FRENLANG 124 Advanced French: Composition, Writing, and Presentation, or successfully tested above this level through the Language Center.

1. *Gateway Courses.* Students are recommended to take two of the three courses listed below.

		Units
FRENCH 101	The View From Paris	3-5
FRENCH 120	Coffee and Cigarettes: The Making of French Intellectual Culture	4-5
FRENCH 129	Camus	4-5

2. *Introductory Culture and Literature Courses.* Students must take a minimum of three of the following courses. Any one of these courses fulfills the Writing in the Major (WIM) requirement.

		Units
FRENCH 130	Introduction to Medieval and Renaissance French Literature	4
FRENCH 131	Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France	4
FRENCH 132	Literature, Revolutions, and Changes in 19th- and 20th-Century France	4
FRENCH 133	Literature and Society in Africa and the Caribbean	4

3. *Medieval/Early Modern Courses.* Students must take one course that concerns the period before 1800. Courses from the department must be at or above the 140 level.

4. *Capstone Course.* Students must take at least one 200 level FRENCH culture or literature course.

Students must take the Oral Proficiency Interview (OPI) two quarters prior to degree conferral. Students should contact the Undergraduate Student Affairs Officer for the major to begin the process.

5. *Electives.* Students must complete a total of 56 units towards the major. A maximum of 28 units can be elective courses. Elective Courses can be taken within the following parameters.

- Course work within the department. Additional FRENCH courses taught by French faculty (may be taught in English or French) at the 100- or 200- level.
- Language Course work. Up to three language courses in French at or above FRENLANG 21C for a maximum of 13 units.
- Coursework in other departments relevant to the degree, with approval by the Chair of Undergraduate Studies.
- Bing Overseas Program. Courses taken at the Bing Overseas Studies in Paris program with prior approval of the Chair of Undergraduate Studies.

- Thinking Matters or Education as Self-Fashioning courses taught at least partially by a faculty member of the French and Italian Department. Students may count a maximum of 10 units.
- Structured Liberal Education. Students may count up to 10 units of SLE towards the major electives.
- Digital Humanities Course. Student work must reflect French interests. Prior approval of the Chair of Undergraduate Studies. Maximum of 5 units.

## French and Philosophy Option

The French and Philosophy option requires a total of 65 units as described below. This option is not declared in Axess and does not appear on the transcript nor the diploma. Substitutions and transfer credit are not normally permitted. Up to 10 units of courses taken in the Philosophy department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade. Students interested in this option should review the Philosophy and Literature web site (<http://philit.stanford.edu>).

### Required French Coursework

1. *Advanced Language*. FRENLANG 124 Advanced French: Composition, Writing, and Presentation

2. *Introductory Culture and Literature Courses*. Students must take three of the following core courses.

		Units
FRENCH 130	Introduction to Medieval and Renaissance French Literature	4
FRENCH 131	Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France	4
FRENCH 132	Literature, Revolutions, and Changes in 19th- and 20th-Century France	4
FRENCH 133	Literature and Society in Africa and the Caribbean	4

3. *Upper division French Courses*. At least three courses numbered FRENCH 140 or higher.

Students must take the Oral Proficiency Interview (OPI) two quarters prior to degree conferral. Students should contact the Undergraduate Student Affairs Officer for the major to begin the process.

### Required Philosophy Coursework

1. *Philosophy Writing in the Major*.

		Units
PHIL 80	Mind, Matter, and Meaning	5

2. *Philosophy and Literature Gateway Course*. This course should be taken as early as possible in the student's career, normally in the sophomore year.

		Units
FRENCH 181	Philosophy and Literature	5

*Aesthetics, Ethics, Political Philosophy*. One course from the PHIL 170 Ethical Theory series.

*Language, Mind Metaphysics, and Epistemology*. One course from the PHIL 180 series.

*History of Philosophy*. Two courses in the history of Philosophy, numbered above PHIL 100.

Two additional elective courses of special relevance to the study of philosophy and literature. Students must consult with their advisers, the

Chair of Undergraduate Studies, and the undergraduate adviser of the program in philosophical and literary thought.

3. *Capstone*. One of the courses must be taken in the student's senior year.

		Units
ENGLISH 106E	Dante and Aristotle	5
ENGLISH 113A	Desire, Identity, Modernity	5
COMPLIT 258A	Existentialism, from Moral Quest to Novelistic Form	3-5
RELIGST 271A	Dante's Spiritual Vision	4-5

## Honors Program

French majors with an overall grade point average (GPA) of 3.3 or above, and who maintain a 3.5 (GPA) in major courses, are eligible to participate in the DLCL's honors program. Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty, in their junior year, preferably by March 1, but no later than May 1. During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL Honors application and an outline of planned course work for their senior year.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40-90 pages not including bibliography and notes. Please consult the DLCL Honors Handbook for more details on declaring and completing the honors thesis.

Honors students are encouraged to participate in the honors college hosted by Bing Honors College ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/OO\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/OO_honors_BingHonors.html)) and coordinated by the Division of Literatures, Cultures, and Languages. The honors college is offered at the end of the summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted through the Bing program. For more information, view the Bing Honors ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/OO\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/OO_honors_BingHonors.html)) web site.

*Enrollment*. A minimum of 10 units total, described below, and a completed thesis is required. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15th of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

1. Spring Quarter of the junior year (optional) DLCL 189C Honors Thesis Seminar (2-4 units S/NC) under the primary thesis adviser. Drafting or revision of the thesis proposal. The proposal is reviewed by the Chair of Undergraduate Studies and the Director of the department and will be approved or returned for submission.
2. Autumn Quarter of the senior year (required) DLCL 189A Honors Thesis Seminar (4 units S/NC) taught by a DLCL appointed faculty member. Course focuses on researching and writing the honors thesis.
3. Winter Quarter of the senior year (required) DLCL 189B Honors Thesis Seminar (2-4 units Letter grade) under the primary thesis adviser. Focus is on writing under guidance of primary adviser. The letter grade determines if honors is granted or not.
4. Spring Quarter of the senior year (option; mandatory if not taken during junior year) DLCL 189C Honors Thesis Seminar (2-4 units S/NC) under the primary thesis adviser. Honors essays are due to the

thesis adviser and student services officer no later than 5:00 p.m. on May 15th of the terminal year.

- Spring Quarter of the senior year (required) DLCL 199 Honors Thesis Oral Presentation (1 unit S/NC). Enroll with primary thesis adviser.

## Bachelor of Arts in Italian

To graduate with a major in Italian, students must complete a minimum of 56 units of course work in the major. These 56 units may not be used towards any other major or minor. Courses applied to the major must be taken for a letter grade, and a grade point average (GPA) of 2.0 or better must be achieved in each course. Relevant courses from other departments or programs may also earn credit toward the major as electives with the approval of the Chair of Undergraduate Studies. Up to 12 units of coursework completed at another university or earned through AP credit may be counted toward the major, with approval by the Chair of Undergraduate Studies. No more than 12 units of coursework for the major should be taken as independent study courses. To enroll in all ITALIAN or ITALLANG courses taught in Italian at or above the 100 level, students must have successfully completed ITALLANG 22A or the equivalent.

1. *Gateway Courses.* Students are recommended to take two courses in the Italian gateway series, taught in translation.

		Units
ITALIAN 100	Masterpieces: Dante	3-5
ITALIAN 101	Italy: The Good, the Bad and the Ugly	3
ITALIAN 155	The Mafia in Society, Film, and Fiction	4

2. *Intermediate Language.* Students may earn up to 12 units in second-year language courses (maximum 12 units).

		Units
ITALLANG 21	Second Year Italian, First Quarter	3-4
ITALLANG 22	Second-Year Italian, Second Quarter	3-4
ITALLANG 23	Second-Year Italian, Third Quarter	3-4

or

		Units
ITALLANG 21A	Accelerated Second-Year Italian, Part 1	4-5
ITALLANG 22A	Accelerated Second-Year Italian, Part 2	4-5

3. *Bridge Courses.* Students must enroll in at least one bridge course taught in Italian, either in language or culture (minimum 3 units).

		Units
ITALLANG 101	Advanced Oral Communication: Italian Opera	3
ITALLANG 103	Advanced Oral Communication: Italian Classic Cinema	3
ITALLANG 114	Advanced Stylistics and Composition	3-4
ITALLANG 115	Academic and Creative Writing	3-4

4. *Core Culture Courses.* Students must take all three of the following core courses at Stanford (12 units). Any one of these courses fulfills the Writing in the Major (WIM) requirement.

		Units
ITALIAN 127	Inventing Italian Literature	4
ITALIAN 128	The Italian Renaissance and the Path to Modernity	4
ITALIAN 129	Modern Italian Culture: Avant-garde and Politics	4

5. *Studies in Italian Culture.* Students must complete a minimum of 10 additional units (2-3 courses) in ITALIAN coursework (may be taught in English or Italian).

6. *Electives.* A maximum of 23 elective units in courses dealing with Italy may be applied to the major. Prior approval from the Chair of Undergraduate Studies is required. The following courses have been pre-approved as electives:

- Course work within the department. Additional ITALIAN courses taught by Italian faculty (*may be taught in English or Italian*).
- Bing Overseas Program. Courses taken at the Bing Overseas Studies in Florence program with prior approval of the Chair of Undergraduate Studies.
- Thinking Matters or Education as Self-Fashioning courses taught at least partially by a faculty member of the French and Italian Department. Maximum of 10 units.
- Structured Liberal Education. Students may count 10 units of SLE towards the major electives. Maximum of 10 units.
- Digital Humanities Course. Student work must reflect Italian interests. Prior approval of the Chair of Undergraduate Studies. Maximum of 5 units.

7. *Additional Requirements* Students must take the Oral Proficiency Interview (OPI) two quarters prior to degree conferral. Students should contact the Undergraduate Student Affairs Officer for the major to begin the process.

## Italian and Philosophy Option

### Required Italian Course Work

The Italian and Philosophy option requires a total of 72 units as described below. This option is not declared in Axxess and does not appear on the transcript or diploma. Substitutions and transfer credit are not normally permitted. Up to 10 units of courses taken in the Philosophy department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade. Students interested in this option should review the Philosophy and Literature web site (<http://philit.stanford.edu>).

1. *Intermediate Language.* Students may earn up to 12 units in second-year language courses (maximum 12 units).

		Units
ITALLANG 21	Second Year Italian, First Quarter	4
ITALLANG 22	Second-Year Italian, Second Quarter	4
ITALLANG 23	Second-Year Italian, Third Quarter	3-4

or

		Units
ITALLANG 21A	Accelerated Second-Year Italian, Part 1	5
ITALLANG 22A	Accelerated Second-Year Italian, Part 2	5

2. *Bridge Courses.* Students must enroll in at least one bridge courses taught in Italian, either in language or culture (minimum 3 units).

		Units
ITALLANG 101	Advanced Oral Communication: Italian Opera	3
ITALLANG 103	Advanced Oral Communication: Italian Classic Cinema	3
ITALLANG 114	Advanced Stylistics and Composition	3-4
ITALLANG 115	Academic and Creative Writing	3-4

3. *Core Culture Courses.* Students must take all three of the following core courses at Stanford (12 units) Any one of these courses fulfills the Writing in the Major (WIM) requirement.

ITALIAN 127	Inventing Italian Literature	4
ITALIAN 128	The Italian Renaissance and the Path to Modernity	4
ITALIAN 129	Modern Italian Culture: Avant-garde and Politics	4

4. *Studies in Italian Culture.* Students must complete a minimum of 10 additional units (2-3 courses) in ITALIAN coursework (taught in English or Italian).

5. *Additional Requirements.* Students must take the Oral Proficiency Interview (OPI) two quarters prior to degree conferral. Students should contact the Undergraduate Student Affairs Officer for the major to begin the process.

Required Philosophy Coursework

1. *Philosophy Writing in the Major.*

PHIL 80	Mind, Matter, and Meaning	5
---------	---------------------------	---

2. *Philosophy and Literature Gateway Course.* This course should be taken as early as possible in the student's career, normally in the sophomore year:

ITALIAN 181	Philosophy and Literature	5
-------------	---------------------------	---

3. *Aesthetics, Ethics, Political Philosophy.* One course from the PHIL 170 Ethical Theory series.

4. *Language, Mind, Metaphysics, and Epistemology.* One course from the PHIL 180 Metaphysics series.

5. *History of Philosophy.* Two courses in the history of philosophy, numbered above PHIL 100.

6. Two additional elective courses of special relevance to the study of philosophy and literature. Students must consult with their advisers, the Chair of Undergraduate Studies, and the undergraduate adviser of the program in philosophical and literary thought.

7. *Capstone Seminar* (at least 4 units): One of these courses must be taken in the student's senior year.

ENGLISH 106E	Dante and Aristotle	5
ENGLISH 113A	Desire, Identity, Modernity	5
COMPLIT 258A	Existentialism, from Moral Quest to Novelistic Form	3-5
RELIGST 271A	Dante's Spiritual Vision	4-5

## Honors Program

Italian majors with an overall grade point average (GPA) of 3.3 or above, and who maintain a 3.5 (GPA) in major courses, are eligible to participate in the DLCL's honors program. Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty, in their junior year, preferably by March 1, but no later than May 1. During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL Honors application and an outline of planned course work for their senior year.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40-90 pages not including bibliography and notes. Please consult the DLCL Honors Handbook for more details on declaring and completing the honors thesis.

Honors students are encouraged to participate in the honors college hosted by Bing Honors College ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_uual/OO\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_uual/OO_honors_BingHonors.html)) and coordinated by the Division of Literatures, Cultures, and Languages. The honors college is offered at the end of the summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted through the Bing program. For more information, view the Bing Honors ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_uual/OO\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_uual/OO_honors_BingHonors.html)) website.

Enrollment: A minimum of 10 units total, described below, and a completed thesis is required. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15th of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

Spring Quarter of the junior year (optional) DLCL 189C Honors Thesis Seminar (2-4 units S/NC) under the primary thesis adviser. Drafting or revision of the thesis proposal. The proposal is reviewed by the Chair of Undergraduate Studies and the Director of the department and will be approved or returned for submission.

Autumn Quarter of the senior year (required) DLCL 189A Honors Thesis Seminar (4 units S/NC) taught by a DLCL appointed faculty member. Course will focus on researching and writing the honors thesis.

Winter Quarter of the senior year (required) DLCL 189B Honors Thesis Seminar (2-4 units Letter grade) under the primary thesis adviser. Focus will be on writing under guidance of primary adviser. The letter grade will determine if honors is granted or not.

Spring Quarter of the senior year (option; mandatory if not taken during junior year) DLCL 189C Honors Thesis Seminar (2-4 units S/NC) under the primary thesis adviser. Honors essays are due to the thesis adviser and Student Service Officer no later than 5:00 p.m. on May 15th of the terminal year.

Spring Quarter of the senior year (required) DLCL 199 Honors Thesis Oral Presentation (1 unit S/NC). Enroll with primary thesis adviser.

## Units Joint Major Programs in French and Computer Science and in Italian and Computer Science

The joint major program (JMP), authorized by the Academic Senate for a pilot period of six years beginning in 2014-15, permits students to major in both Computer Science and one of ten Humanities majors. See the "Joint Major Program (p. 26)" section of this bulletin for a description of University requirements for the JMP. See also the Undergraduate Advising and Research JMP web site and its associated FAQs.

Students completing the JMP receive a B.A.S. (Bachelor of Arts and Science).

Because the JMP is new and experimental, changes to procedures may occur; students are advised to check the relevant section of the bulletin periodically.

## French Major Requirements in the Joint Major Program

See the "Computer Science Joint Major Progra (p. 231)m (p. 224)" section of this bulletin for details on Computer Science requirements.

To graduate with a joint major in Computer Science and French, students must complete a minimum of 46 units of coursework in French in addition to the Computer Science requirements for the joint major. These 46 units may not be used towards any other major or minor. Courses applied to the major must be taken for a letter grade, and a grade point average (GPA) of 2.0 or better must be achieved in each course. Relevant courses from other departments or programs may also earn credit toward the major as electives with the prior consent of the Chair of Undergraduate Studies. Up to 12 units of coursework completed at another university or earned through AP credit may be counted toward the major, with approval by the Chair of Undergraduate Studies. No more than 12 units of coursework for the major should be taken as independent study courses. To enroll in all FRENCH courses taught in French at or above the 130-level, students must have successfully completed FRENLANG 124, Mastering Advanced French Grammar: Grammar through Contemporary Literature and Culture, or successfully tested above this level through the Language Center.

1. *Gateway Courses.* Students are recommended to take two of the three courses listed below.

		Units
FRENCH 101	The View From Paris	3-5
FRENCH 120	Coffee and Cigarettes: The Making of French Intellectual Culture	4-5
FRENCH 129	Camus	4-5

2. *Introductory Culture and Literature Courses.* Students must take a minimum of three of the following courses. Any one of these courses fulfills the Writing in the Major (WIM) requirement

		Units
FRENCH 130	Introduction to Medieval and Renaissance French Literature	4
FRENCH 131	Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France	4
FRENCH 132	Literature, Revolutions, and Changes in 19th- and 20th-Century France	4
FRENCH 133	Literature and Society in Africa and the Caribbean	4

3. *Medieval/Early Modern Courses.* Students must take one course that concerns the period before 1800. Courses from the department must be at or above the 140 level.

4. *Two Capstone Courses.* Students must take at least one 200 level FRENCH culture or literature course and a blended capstone project. Senior year the student enrolls in a 2 unit independent study FRENCH 199 with a DLCL faculty member. The faculty member advising this project must sign off on this description. In order to have it approved as their capstone French and Computer Science project, the student must submit a description of their project to the Chair of Undergraduate Studies in French.

Students must take the Oral Proficiency Interview (OPI) two quarters prior to degree conferral. Students should contact the undergraduate student services officer for the major to begin the process.

5. *Electives.* Students must complete a total of 46 units towards the major. A maximum of 18 units can be elective courses. Elective courses can be taken within the following parameters.

- Course work within the department. Additional FRENCH courses taught by French faculty (may be taught in English or French) at the 100- or 200- level..
- Language Course work. Up to three language courses in French at or above FRENLANG 21C for a maximum of 13 units.
- Coursework in other departments relevant to the degree, with approval by the Chair of Undergraduate Studies.
- Bing Overseas Program. Courses taken at the Bing Overseas Studies in Paris program with prior approval of the Chair of Undergraduate Studies.
- Thinking Matters or Education as Self-Fashioning courses taught at least partially by a faculty member of the French and Italian Department. Students may count a maximum of 10 units.
- Structured Liberal Education. Students may count up to 10 units of SLE towards the major electives.
- Digital Humanities Course. Student work must reflect French interests. Prior approval of the Chair of Undergraduate Studies. Maximum of 5 units.

## Honors Program

Students have the option to complete the Honors Program for Computer Science and French, by completing an honors thesis that is partially or fully integrated with Computer Science; such a thesis would fulfill both the capstone and honors requirements for this degree. Students also have the option to complete the honors program for French only; such a thesis would not fulfill the capstone requirement for this degree.

French majors with an overall grade point average (GPA) of 3.3 or above, and who maintain a 3.5 (GPA) in major courses, are eligible to participate in the DLCL's honors program. Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty, in their junior year, preferably by March 1, but no later than May 1. During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL honors application and an outline of planned course work for their senior year.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40-90 pages not including bibliography and notes. See the DLCL Honors Handbook for more details on declaring and completing the honors thesis.

Honors students are encouraged to participate in the honors college hosted by Bing Honors College ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_uual/OO\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_uual/OO_honors_BingHonors.html)) and coordinated by the Division of Literatures, Cultures, and Languages. The honors college is offered at the end of the summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted through the Bing program. For more information, view the Bing Honors ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_uual/OO\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_uual/OO_honors_BingHonors.html)) web site.

Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15th of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

## Italian Major Requirements in the Joint Major Program

See the "Computer Science Joint Major Progra (p. 231)m (p. 231)" section of this bulletin for details on Computer Science requirements.

To graduate with a joint major in Computer Science and Italian Studies, students must complete a minimum of 50 units of course work in Italian in addition to the Computer Science requirements for the dual major. These 50 units may not be used towards any other major or minor. Courses applied to the major must be taken for a letter grade, and a grade point average (GPA) of 2.0 or better must be achieved in each course. Relevant courses from other departments or programs may also earn credit toward the major as electives, with the approval of the Chair of Undergraduate Studies. Up to 12 units of coursework completed at another university or earned through AP credit may be counted toward the major, with approval by the Chair of Undergraduate Studies. No more than 12 units of coursework for the major should be taken as independent study courses. To enroll in all ITALIAN or ITALLANG courses taught in Italian at or above the 100-level, students must have successfully completed ITALLANG 22A or the equivalent.

**1. Gateway Courses.** Students are recommended to take two courses in the Italian gateway series, taught in translation.

		Units
ITALIAN 100	Masterpieces: Dante	3-5
ITALIAN 101	Italy: The Good, the Bad and the Ugly	3-5
ITALIAN 155	The Mafia in Society, Film, and Fiction	4

**2. Intermediate Language.** Students may earn up to 12 units in second-year language courses (maximum 12 units)

		Units
ITALLANG 21	Second Year Italian, First Quarter	3-4
ITALLANG 22	Second-Year Italian, Second Quarter	3-4
ITALLANG 23	Second-Year Italian, Third Quarter	3-4

or

		Units
ITALLANG 21A	Accelerated Second-Year Italian, Part 1	4-5
ITALLANG 22A	Accelerated Second-Year Italian, Part 2	4-5

**3. Bridge Courses.** Students must enroll in at least one bridge course taught in Italian, either in language or culture (minimum 3 units).

		Units
ITALLANG 101	Advanced Oral Communication: Italian Opera	3
ITALLANG 103	Advanced Oral Communication: Italian Classic Cinema	3
ITALLANG 114	Advanced Stylistics and Composition	3-4
ITALLANG 115	Academic and Creative Writing	3-4

**4. Core Culture Courses.** Students must take all three of the following core courses at Stanford (12 units). Any one of these courses fulfills the Writing in the Major (WIM) requirement

		Units
ITALIAN 127	Inventing Italian Literature	4
ITALIAN 128	The Italian Renaissance and the Path to Modernity	4
ITALIAN 129	Modern Italian Culture: Avant-garde and Politics	4

**5. Studies in Italian Culture.** Students must complete a minimum of 10 additional units (2-3 courses) in ITALIAN coursework (may be taught in English or Italian).

**6. Capstone Course.** Senior year the student will enroll in a 2 unit independent study ITALIAN 199 with a DLCL faculty member. The faculty member advising this project must sign off on this description. In order to have it approved as their capstone Italian and Computer Science project the student will need to submit a description of their project to the Chair of Undergraduate Studies in Italian.

**7. Electives.** A maximum of 15 elective units dealing with Italy may be applied to the major. Prior approval from the Chair of Undergraduate Studies is required. The following courses have been pre-approved as electives:

- Course work within the department. Additional ITALIAN courses at the 100- or 200-level taught by Italian faculty.
- Bing Overseas Program. Courses taken at the Bing Overseas Studies in Florence program with prior approval of the Chair of Undergraduate Studies.
- Thinking Matters or Education as Self-Fashioning courses taught at least partially by a faculty member of the French and Italian Department. Maximum of 10 units.
- Structured Liberal Education. Students may count 10 units of SLE towards the major electives. Maximum of 10 units.
- Digital Humanities Course. Student work must reflect Italian interests. Prior approval of the Chair of Undergraduate Studies. Maximum of 5 units.

**8. Additional Requirements.** Students must take the Oral Proficiency Interview (OPI) two quarters prior to degree conferral. Students should contact the Undergraduate Student Affairs Officer for the major to begin the process.

Honors Program

Students have the option to complete the honors program for Computer Science and Italian, by completing an honors thesis that is partially or fully integrated with Computer Science; such a thesis would fulfill both the capstone and Honors requirements for this degree. Students also have the option to complete the honors program for Italian only; such a thesis would not fulfill the capstone requirement for this degree.

Italian majors with an overall grade point average (GPA) of 3.3 or above, and who maintain a 3.5 (GPA) in major courses, are eligible to participate in the DLCL's honors program. Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty, in their junior year, preferably by March 1, but no later than May 1. During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL Honors application and an outline of planned course work for their senior year.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40-90 pages not including bibliography and notes. See the DLCL Honors Handbook for more details on declaring and completing the honors thesis.

Honors students are encouraged to participate in the honors college hosted by Bing Honors College ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_uual/00\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_uual/00_honors_BingHonors.html)) and coordinated by the Division of Literatures, Cultures, and Languages. The honors college is offered at the end of the summer, during the weeks directly preceding the start of the academic year, and is designed to

help students develop their honors thesis projects. Applications must be submitted through the Bing program. For more information, view the Bing Honors ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/00\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/00_honors_BingHonors.html)) website.

Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15th of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

## Declaring a Joint Major Program

To declare the joint major, students must first declare each major through Axess, and then submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>) The Major-Minor and Multiple Major Course Approval Form ([http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin\\_MultMaj.pdf](http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin_MultMaj.pdf)) is required for graduation for students with a joint major.

## Dropping a Joint Major Program

To drop the joint major, students must submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>). Students may also consult the Student Services Center (<http://studentservicescenter.stanford.edu>) with questions concerning dropping the joint major.

## Transcript and Diploma

Students completing a joint major graduate with a B.A.S. degree. The two majors are identified on one diploma separated by a hyphen. There will be a notation indicating that the student has completed a "Joint Major". The two majors are identified on the transcript with a notation indicating that the student has completed a "Joint Major".

## Minor in French

To earn a minor in French, students must complete a minimum of 24 units of course work in the department. These 24 units may not be used towards any other major or minor. Courses applied to the minor must be taken for a letter grade, and a grade point average (GPA) of 2.0 or better must be achieved in each course. To enroll in all French literature courses, students must have successfully completed FRENLANG 124 Advanced French: Composition, Writing, and Presentation or successfully tested above this level through the Language Center.

1. *Introductory Culture and Literature Courses:* Students must take a minimum of three French Literature courses. Two must be from the FRENCH 130 sequence (8 units):

		Units
FRENCH 130	Introduction to Medieval and Renaissance French Literature	4
FRENCH 131	Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France	4
FRENCH 132	Literature, Revolutions, and Changes in 19th- and 20th-Century France	4
FRENCH 133	Literature and Society in Africa and the Caribbean	4

2. *Electives.* A maximum of 12 elective units may be applied to the minor. Prior approval from the Chair of Undergraduate Studies is required. The following courses have been pre-approved as electives:

		Units
FRENLANG 21C	Second-Year French: Cultural Emphasis, First Quarter	4

FRENLANG 22C	Second-Year French: Cultural Emphasis, Second Quarter	4
FRENLANG 23C	Second-Year French: Cultural Emphasis, Third Quarter	4
FRENLANG 120	Advanced French Oral Communication	3
FRENLANG 124	Advanced French: Composition, Writing, and Presentation	4-5

OSPPARIS courses. Courses taken at the Bing Overseas Studies in Paris program with prior approval of the Chair of Undergraduate Studies (language of instruction must be French)

Education as Self-Fashioning and, Thinking Matters courses taught at least partially by a faculty member in French. Maximum of 5 units.

Structured Liberal Education Students may count 5 units of SLE towards the major electives. Maximum of 5 units.

Digital Humanities Course. Student work must reflect French interests. Prior approval of the Chair of Undergraduate Studies. Maximum of 5 units.

## Minor in Italian

To earn a minor in Italian, students must complete a minimum of 24 units of coursework in Italian language and culture. These 24 units may not be used towards any other major or minor. Courses applied to the minor must be taken for a letter grade, and a grade point average (GPA) of 2.0 or better must be achieved in each course. To enroll in all ITALIAN or ITALLANG courses taught in Italian at or above the 100 level, students must have successfully completed ITALLANG 22A or the equivalent.

1. *Intermediate Language.* Students may earn up to 12 units in second-year language courses (maximum 12 units)

		Units
ITALLANG 21	Second Year Italian, First Quarter	4
ITALLANG 22	Second-Year Italian, Second Quarter	4
ITALLANG 23	Second-Year Italian, Third Quarter	3-4

or

ITALLANG 21A	Accelerated Second-Year Italian, Part 1	5
ITALLANG 22A	Accelerated Second-Year Italian, Part 2	5

2. *Bridge Courses and Core Culture Courses.* Students must take at least two of the following courses taught in Italian at Stanford (minimum 6 units):

ITALLANG 101	Advanced Oral Communication: Italian Opera	3
ITALLANG 103	Advanced Oral Communication: Italian Classic Cinema	3
ITALLANG 114	Advanced Stylistics and Composition	3-4
ITALLANG 115	Academic and Creative Writing	3-4
ITALIAN 127	Inventing Italian Literature	4
ITALIAN 128	The Italian Renaissance and the Path to Modernity	4
ITALIAN 129	Modern Italian Culture: Avant-garde and Politics	4

\* With approval of the Chair of Undergraduate Studies, one of these courses may be replaced by a course taken at BOSP Florence.

3. *Electives.* A maximum of 10 elective units may be applied to the minor. Prior approval from the Chair of Undergraduate Studies is required. The following courses have been pre-approved as electives:

- Coursework within the department. Additional ITALIAN courses at the 100- or 200-level taught by Italian faculty.

- Bing Overseas Program. Courses taken at the Bing Overseas Studies in Florence program with prior approval of the Chair of Undergraduate Studies.
- Thinking Matters or Education as Self-Fashioning courses taught at least partially by a faculty member in Italian. Maximum of 5 units.
- Structured Liberal Education. Students may count 5 units of SLE towards the major electives. Maximum of 5 units.
- Digital Humanities Course. Student work must reflect Italian interests. Prior approval of the Chair of Undergraduate Studies. Maximum of 5 units.

## Minor in Modern Languages

The Division of Literatures, Cultures, and Languages offers a minor in Modern Languages. This minor draws on literature and language courses offered through this and other literature departments. See the "Division of Literatures, Cultures, and Languages (p. )" section of this bulletin for further details about the minor and its requirements.

## Coterminal Master's Program in French

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (p. 42)" section of this bulletin. For University coterminal master's degree application forms, see the Registrar's Publications page (<https://studentaffairs.stanford.edu/registrar/publications/#Coterm>).

Each year the department admits a small number of undergraduates to the coterminal M.A. degree in French. Applications for Autumn quarter must be submitted by January 31 of the senior year to the Director of the Department and must include:

- a written statement of purpose
- two letters of recommendation from faculty at Stanford
- a transcript.

Students accepted into the coterminal program must have been undergraduate majors in French and must meet all requirements both for the B.A. and the M.A.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken during or after the first quarter of the sophomore year are eligible for consideration for transfer to the graduate career; the timing of the first graduate quarter is not a factor. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

## Master of Arts in French

University regulations pertaining to the M.A. are listed in the "Graduate Degrees (p. 45)" section of this bulletin.

The terminal M.A. in French provides a flexible combination of language, literature, cultural history, and methodology course work designed to enhance the preparation of secondary school, junior college, or college teachers.

Candidates must complete a minimum of 45 units of graduate work, all courses being taken for a letter grade, with a minimum grade point average (GPA) of 3.3, as well as pass the master's examination at the end of their studies. To fulfill the requirements in a single year, enrollment must be for an average of 15 units per quarter.

Candidates must take one cultural history course (to be taken either inside or outside the Department of French and Italian). All remaining units are to be taken in advanced French literature courses (200 level or above), three of which must be concerned with the pre-revolutionary period of French cultural history.

Applicants should consult Graduate Admissions (<http://gradadmissions.stanford.edu>) for information related to the application process. Candidates for this degree are not eligible for financial aid or for teaching assistantships.

## Examination

The terminal M.A. examination is administered between the third and fifth week of Spring Quarter by a three-member committee, selected each year by the Chair of Graduate Studies. It consists of two parts:

### 1. Written Exam

The two-hour written exam tests the candidate's general knowledge of French literature and is based on the French Ph.D. reading list which may be obtained from the chair of Graduate Studies, Student Affairs Officer, or by referencing the French and Italian Graduate Student Handbook.

The exam requires that the candidate answer two questions (out of three) in a manner that demonstrates his/her ability to synthesize and draw parallels between periods, genres, and systems of representation on the basis of the standard reading list. One question must be answered in French. Use of a dictionary is allowed.

If the student's performance on the exam is deemed a 'pass' by two out of three of the members of the examining committee, the student is then permitted to go on to the oral examination (taken later the same week). Should the candidate fail the M.A. written exam, he/she is given a second chance at the end of Spring Quarter.

### 2. Oral Exam

The 90-minute oral exam is based upon the student's answers on the written exam. It examines the candidate's knowledge and understanding of French literary history on the basis of the standard reading list.

At the conclusion of the oral exam, the examination committee meets in closed session and discusses the student's performance on the written and the oral portions of the examination. If it is judged adequate, the M.A. degree is granted. In no event may the master's written and oral exams be taken more than twice.

## Doctor of Philosophy in French

University regulations pertaining to the Ph.D. are listed in the "Graduate Degrees (p. 45)" section of this bulletin.

## Degree Requirements

### 1. Coursework

A candidate for the Ph.D. degree must complete at least 135 units of graduate-level study. 72 of the 135 units must be taken within the department. All course work should be selected in consultation with the Chair of Graduate Studies.

*Required Courses—*

		Units
FRENCH 369	Introduction to the Profession of "Literary Studies" for Graduate Students (must be taken in first year of studies)	1-2
DLCL 301	The Learning and Teaching of Second Languages (must be taken in the first year of studies)	3
DLCL 311	Professional Workshop (highly recommended)	1
A minimum of five courses on French literature and culture taught at the graduate level. Three of the required five courses must be taken within the first year.		15

*Elective Courses—* Apart from the required courses above, students are granted considerable freedom in structuring a course of study appropriate to their individual needs. During the first year, most course work is done within the French and Italian department, in order to ensure an adequate preparation for the qualifying examination. Students are encouraged to take a variety of courses in order to be exposed to different periods and issues. Students are not allowed to take Independent Study during their first year. In the second and third years, however, the program of study is tailored to the specific interests of the student.

### 2. Examinations

Completion of all department and University examinations.

### 3. Dissertation

Submission and approval of a dissertation.

### 4. Teaching

Ph.D. students are required to teach a minimum of five courses within their five years of funding.

### 5. Language Requirements

Attaining a native or near-native fluency in French is a requirement to qualify for the Ph.D. degree. Upon entering the program, candidates must contact the Language Center and arrange to take the OPI (Oral Proficiency Interview) to determine their fluency in French. An advanced level or above must have been reached by the time candidates take their qualifying exam in Autumn Quarter of the second year of study. If a student fails to score in the advanced bracket of the OPI test upon entering, he/she is tested again at the beginning of the second year. It is the responsibility of the candidates to design a course of study to improve his or her proficiency in French. Candidates who do not meet the minimum language requirement must discuss their plans to meet this requirement with the Chair of Graduate Studies.

In addition, candidates are required to achieve a high level of proficiency in one additional foreign language, with the language in question to be determined by the student and adviser as a function of the student's area of specialization. Such proficiency may be demonstrated either by completing a graduate seminar in the language in question, or by passing an exam that establishes a third-year or above level of competence in writing, reading, and speaking. In the case of ancient Greek and Latin, a high level of proficiency means a level superior to a second-year collegiate level of proficiency in reading and writing. The second foreign language requirement must be completed by the end of the third year.

### 6. Candidacy

Admission to candidacy is an important decision grounded in an overall assessment of a student's ability to successfully complete

the Ph.D. program. Per University policy, students are expected to complete department qualifying procedures and apply for candidacy by the end of the second year in residence. In reviewing a student for admission to candidacy, the faculty considers a student's academic progress including but not limited to: advanced language proficiency, coursework, performance on the Qualifying Exam (or Field Exam for those with a waiver of the Qualifying Exam), and successful completion of teaching and research assistantships. A student must also have completed at least 3 units of work with each of 4 Stanford faculty members prior to consideration for candidacy. In addition to successful completion of department prerequisites, a student is only admitted to candidacy if the faculty makes the judgment that the student has the potential to successfully complete the requirements of the degree program. Candidacy is determined by faculty vote. Failure to advance to candidacy results in the dismissal of the student from the doctoral program. Candidacy is valid for five years and students are required to maintain active candidacy through conferral of the doctoral degree. All requirements for the degree must be completed before candidacy expires. The Department of French and Italian conducts regular reviews of each student's academic performance, both prior to and following successful admission to candidacy. Failure to make satisfactory progress to degree may result in dismissal from the doctoral program. Additional information about University candidacy policy is available in the Bulletin (p. 47) and GAP (<http://gap.stanford.edu/4-6.html>).

### 7. TGR Status

Doctoral students who have been admitted to candidacy, completed all required courses and degree requirements other than the dissertation, completed 135 units, and submitted a Doctoral Dissertation Reading Committee form, must request Terminal Graduate Registration status to complete their dissertations. Each quarter, all TGR students must enroll in FRENCH 802 TGR Dissertation for zero units, in the appropriate section for their adviser.

### Grading

Doctoral students in the department must take required courses for a letter grade if available and are expected to earn a grade of 'B+' or better in each course. Any grade of 'B' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty: while the grade will stand, the student may be required to revise and resubmit the work associated with that course.

### Examinations

There are three examinations: the Qualifying Examination, the Field Examination, and the University Oral Examination. Students may not take any department or University exam while coursework is incomplete.

### Qualifying Examination

The first oral examination, which takes place in the week prior to autumn quarter of the second year of study, tests the student's knowledge of language and literature and his/her aptitude for critical thinking. The examining committee, determined by the Director of French and Italian, schedules the precise exam date and time.

The exam is based on a standard reading list covering major works from all periods of literature in the language(s) of study, from the Middle Ages to present day. The list may be expanded to reflect a student's particular interests, but not abridged. The reading list may be obtained from the Chair of Graduate Studies, the Graduate Student Affairs Officer, or by referencing the French and Italian student handbook.

The exam is 90 minutes in length and consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given in English or in the language of study and should engage, in a succinct manner, an issue or set of issues of broad relevance to the literary history of the language(s) of study. The presentation must not simply be a text

read aloud, but rather must be given from notes. It is meant to be suggestive and not exhaustive, so as to provoke further discussion. You may bring a single letter-sized page of notes, printed in 12-point font, with no full sentences except for quotations; you must hand it in at the end of the exam.

2. A 70-minute question and answer period in which the examining committee follows up on the candidate's presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in the language(s) of study. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit and demonstrate the ability to formulate an original point of view on such texts and contexts.

Students who do not pass the Qualifying Exam their first time may be placed on probation with limited enrollment and be allowed to retake the exam at the end of Autumn Quarter. Should the student not pass the retake exam, his or her studies in the Ph.D. program will be concluded.

Students already holding an advanced degree in the relevant area may request to be excused from the Qualifying Exam. However, the student must present a formal request for a waiver to the Chair of Graduate Studies by the end of autumn quarter of the first year. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the Qualifying Exam would involve considerable repetition of already completed work is such a waiver likely to be granted.

### Field Examination

The second oral examination takes place in week prior to autumn quarter of the third year of study. Students waived from the Qualifying Exam will take the Field Exam in the week prior to autumn quarter of the second year of study. The exam is 100 minutes in length and consists of two parts:

1. A 20-minute presentation by the student on a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his/her adviser and the Chair of Graduate Studies. The student should design this research project so that it has the focus of an article or a seminar he/she might teach. The student should discuss the proposed topic with the Chair of Graduate Studies before the end of the quarter preceding the quarter in which he/she plans to take the exam; together they choose a committee of three faculty members with interests close to the proposed topic. In most cases, one of these committee members is the student's adviser. This presentation is followed by a 20-minute discussion.
2. A 60-minute discussion of a reading list, assembled by the student, which covers about a century of writing. The reading list should include works in all genres relevant to the period covered and should be around two single-spaced pages in length. The list may well include critical and scholarly works or texts from outside the traditional domain of literary studies in the chosen tradition (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student's field. Students are required to discuss the reading list for the examination with the Chair of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be submitted to the committee no later than two weeks preceding the examination. Each member of the committee is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications. The aim of these questions is to establish the student's credentials as a specialist in the period of his/her choosing, so the core of the reading list must be made up of texts

that are essential to any specialist. It follows that reading lists must not focus on the narrow area of the student's research interest. The tendency to bias reading lists towards the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work may prove relevant, but students should also remember that the examination is the central means of certifying their expertise in a literary period.

### The University Oral Examination

This examination takes the form of a dissertation proposal defense. It is to be taken no later than Spring Quarter of the student's third year. Students must have completed all course work and language requirements before the quarter in which they take the University Oral examination. One quarter prior to the University Oral examination, students must schedule the exam date and time as well as work with their primary adviser to obtain an outside chair for the examination.

Two weeks before the exam, the student must submit to the committee a 25-35 page proposal, which must contain the following parts:

1. a clear presentation of the student's central thesis
2. a synthetic overview of the dissertation
3. a description of the methodology that is used in the dissertation
4. an in-depth discussion of current secondary sources on the topic.

The student must also append a bibliography, but this does not take the place of number 4. The proposal must be prepared in close consultation with the dissertation director during the months preceding the exam.

The exam committee consists of four members, in addition to a committee chair from outside the Division of Literatures, Cultures, and Languages, whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list.

After a 20-minute presentation on the part of the candidate, each member of the committee (apart from the committee chair) questions the student for 20 minutes. At the end of the hour and forty minutes, the faculty readers vote on the outcome of the exam. If the outcome is favorable, (four out of five votes in favor of the student passing), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory, the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second exam. A student who fails a second time will be released from the Ph.D. program and awarded a terminal M.A. degree.

### Advising

Given the interdisciplinary nature of the Ph.D. programs and the opportunity they afford each student to create an individualized program of study, regular consultation with an adviser is of the utmost importance. The adviser for all entering graduate students is the Chair of Graduate Studies, whose responsibility it is to assist students with their course planning and to keep a running check on progress in completing the course, teaching, and language requirements. By the end of the second year of study, each student should have chosen a faculty adviser whose expertise is appropriate to his/her own area of research and interests.

### Yearly Review

The faculty provide students with timely and constructive feedback on their progress toward the Ph.D. In order to evaluate students' progress and to identify potential problem areas, the department's faculty reviews the academic progress of each student at the end of the academic year. The yearly reviews are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given

constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. Possible outcomes of the yearly review include (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period on probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; (2) continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program. Students leaving the program at the end of the first or second year are usually allowed to complete the requirements to receive an M.A. degree, if this does not involve additional residency or financial support.

## Doctor of Philosophy in Italian

University regulations pertaining to the Ph.D. are listed in the "Graduate Degrees" section of this bulletin.

### Degree Requirements

#### 1. Coursework

A candidate for the Ph.D. degree must complete at least 135 units of graduate-level study. 72 of the 135 units must be taken within the department. All course work should be selected in consultation with the Chair of Graduate Studies.

*Required Courses—*

ITALIAN 369	Introduction to the Profession of "Literary Studies" for Graduate Students (must be taken in the first year of studies)	1-2
DLCL 301	The Learning and Teaching of Second Languages (must be taken in the first year of studies)	3
DLCL 311	Professional Workshop (highly recommended)	1
A minimum of five courses on Italian literature and culture taught at the graduate level. Three of the required five courses must be taken within the first year.		15

*Elective Courses—* Apart from the required courses above, students are granted considerable freedom in structuring a course of study appropriate to their individual needs. During the first year, most course work is done within the French and Italian department, in order to ensure an adequate preparation for the qualifying examination. Students are encouraged to take a variety of courses in order to be exposed to different periods and issues. Students are not allowed to take Independent Study during their first year. In the second and third years, however, the program of study is tailored to the specific interests of the student.

#### 2. Examinations

Completion of all department and University examinations.

#### 3. Dissertation

Submission and approval of a dissertation.

#### 4. Teaching

Ph.D. students are required to teach a minimum of five courses within their five years of funding.

#### 5. Language Requirements

Attaining a native or near-native fluency in Italian is a requirement to qualify for the Ph.D. degree. Upon entering the program, candidates must contact the Language Center and arrange to take the OPI (Oral Proficiency Interview) to determine their fluency in Italian. An advanced level or above must have been reached by the time candidates take their qualifying exam in the Autumn Quarter of the second year of study. If a student fails to score in the advanced bracket of the OPI test upon entering, he/she is tested again at the beginning of the second year. It is the responsibility of the candidates to design a course of study to improve their proficiency in Italian.

Candidates who do not meet the minimum language requirement must discuss their plans to meet this requirement with the Chair of Graduate Studies. By the end of the third year, students must have passed reading examinations in two additional foreign languages. If the candidate's period of concentration is earlier than the Romantic period, one of these must be Latin; if Romantic or later, French.

#### 6. Candidacy

Admission to candidacy is an important decision grounded in an overall assessment of a student's ability to successfully complete the Ph.D. program. Per University policy, students are expected to complete department qualifying procedures and apply for candidacy by the end of the second year in residence. In reviewing a student for admission to candidacy, the faculty considers a student's academic progress including but not limited to: advanced language proficiency, coursework, performance on the Qualifying Exam, and successful completion of teaching and research assistantships. A student must also have completed at least 3 units of work with each of 4 Stanford faculty members prior to consideration for candidacy. In addition to successful completion of department prerequisites, a student is only admitted to candidacy if the faculty makes the judgment that the student has the potential to successfully complete the requirements of the degree program. Candidacy is determined by faculty vote. Failure to advance to candidacy results in the dismissal of the student from the doctoral program. Candidacy is valid for five years and students are required to maintain active candidacy through conferral of the doctoral degree. All requirements for the degree must be completed before candidacy expires. The Department of Italian Studies conducts regular reviews of each student's academic performance, both prior to and following successful admission to candidacy. Failure to make satisfactory progress to degree may result in dismissal from the doctoral program. Additional information about University candidacy policy is available in the Bulletin (p. 47) and GAP (<http://gap.stanford.edu/4-6.html>).

#### Units

#### 7. TGR Status

Doctoral students who have been admitted to candidacy, completed all required courses and degree requirements other than the dissertation, completed 135 units, and submitted a Doctoral Dissertation Reading Committee form, must request Terminal Graduate Registration status to complete their dissertations. Each quarter, all TGR students must enroll in ITALIAN 802 TGR Dissertation for zero units, in the appropriate section for their adviser.

### Grading

Doctoral students in the department must take required courses for a letter grade if available and are expected to earn a grade of 'B+' or better in each course. Any grade of 'B' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty: while the grade will stand, the student may be required to revise and resubmit the work associated with that course.

### Examinations

There are three examinations: the Qualifying Examination, the Field Examination, and the University Oral Examination. Students may not take any department or University exam while coursework is incomplete.

#### Qualifying Examination

The first oral examination, which takes place in the first two weeks of October of the second year of study, tests the student's knowledge of language and literature and his/her aptitude for critical thinking. The examining committee, determined by the Director of French and Italian, schedules the precise exam date and time.

The exam is based on a standard reading list covering major works from all periods of literature in the language(s) of study, from the Middle Ages to present day. The list may be expanded to reflect a student's particular interests, but not abridged. The reading list may be obtained from the

Chair of Graduate Studies, the Graduate Student Affairs Officer, or by referencing the French and Italian student handbook.

The exam is 90 minutes in length and consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given in English or in the language of study and should engage, in a succinct manner, an issue or set of issues of broad relevance to the literary history of the language(s) of study. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggesting and not exhaustive, so as to provoke further discussion.
2. A 70-minute question and answer period in which the examining committee follows up on the candidate's presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in the language(s) of study. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit and demonstrate the ability to formulate an original point of view on such texts and contexts.

Students who do not pass the Qualifying Exam their first time may be placed on probation with limited enrollment and be allowed to retake the exam at the end of Autumn Quarter. Should the student not pass the retake exam, his/her studies in the Ph.D. program will be concluded.

Students already holding an advanced degree in the relevant area may request to be excused from the Qualifying Exam. However, the student must present a formal request for a waiver to the Chair of Graduate Studies upon arrival at Stanford. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the Qualifying Exam would involve considerable repetition of already completed work is such a waiver likely to be granted.

### Field Examination

The second oral examination takes place in the Autumn Quarter of the third year of study. The exam is 100 minutes in length and consists of two parts:

1. A 20-minute presentation by the student on a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his/her adviser and the Chair of Graduate Studies. The student should design this research project so that it has the focus of an article or a seminar he/she might teach. The student should discuss the proposed topic with the Chair of Graduate Studies before the end of the quarter preceding the quarter in which he/she plans to take the exam; together they choose a committee of three faculty members with interests close to the proposed topic. (In most cases, one of these committee members is the student's adviser.) This presentation is followed by a 20-minute discussion.
2. A 60-minute discussion of a reading list, assembled by the student, which covers about a century of writing. The reading list should include works in all genres relevant to the period covered and should be around two single-spaced pages in length. The list may well include critical and scholarly works or texts from outside the traditional domain of literary studies in the chosen tradition (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student's field. Students are required to discuss the reading list for the examination with the Chair of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be submitted to the committee no later than two weeks preceding the examination. Each member of the committee is assigned a 20-minute period

to question the candidate on the reading list and its intellectual-historical implications. The aim of these questions is to establish the student's credentials as a specialist in the period of his/her choosing, so the core of the reading list must be made up of texts that are essential to any specialist. It follows that reading lists must not focus on the narrow area of the student's research interest. The tendency to bias reading lists towards the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work may prove relevant, but students should also remember that the examination is the central means of certifying their expertise in a literary period.

### The University Oral Examination

This examination takes the form of a dissertation proposal defense. It is to be taken no later than Autumn Quarter of the student's fourth year. Students must have completed all course work and language requirements before the quarter in which they take the University Oral examination. One quarter prior to the University Oral examination, students must schedule the exam date and time as well as work with their primary adviser to obtain an outside chair for the examination.

Two weeks before the exam, the student must submit to the committee a 25-35 page proposal, which must contain the following parts:

1. a clear presentation of the student's central thesis
2. a synthetic overview of the dissertation
3. a description of the methodology that is used in the dissertation
4. an in-depth discussion of current secondary sources on the topic.

The student must also append a bibliography, but this does not take the place of number 4. The proposal must be prepared in close consultation with the dissertation director during the months preceding the exam.

The exam committee consists of four members, in addition to a committee chair from outside the Division of Literatures, Cultures, and Languages, whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list.

After a 20-minute presentation on the part of the candidate, each member of the committee (apart from the committee chair) questions the student for 20 minutes. At the end of the hour and forty minutes, the faculty readers vote on the outcome of the exam. If the outcome is favorable, (four out of five votes in favor of the student passing), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory, the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second exam. A student who fails a second time will be released from the Ph.D. program and awarded a terminal M.A. degree.

### Advising

Given the interdisciplinary nature of the Ph.D. programs and the opportunity they afford each student to create an individualized program of study, regular consultation with an adviser is of the utmost importance. The adviser for all entering graduate students is the Chair of Graduate Studies, whose responsibility it is to assist students with their course planning and to keep a running check on progress in completing the course, teaching, and language requirements. By the end of the second year of study, each student should have chosen a faculty adviser whose expertise is appropriate to his/her own area of research and interests.

### Yearly Review

The faculty provide students with timely and constructive feedback on their progress toward the Ph.D. In order to evaluate students' progress

and to identify potential problem areas, the department's faculty reviews the academic progress of each student at the end of the academic year. The yearly reviews are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. Possible outcomes of the yearly review include (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period on probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; or (2) continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program. Students leaving the program at the end of the first or second year are usually allowed to complete the requirements to receive an M.A. degree, if this does not involve additional residency or financial support.

## Doctor of Philosophy in French and Italian

University regulations pertaining to the Ph.D. are listed in the "Graduate Degrees" section of this bulletin.

### Degree Requirements

#### 1. Coursework—

A candidate for the Ph.D. degree must complete at least 135 units of graduate-level study. 72 of the 135 units must be taken within the department. All course work should be selected in consultation with the Chair of Graduate Studies. Required courses—

FRENCH/ ITALIAN 369	Introduction to the Profession of "Literary Studies" for Graduate Students (must be taken in first year of studies)	1-2
DLCL 301	The Learning and Teaching of Second Languages (must be taken in first year of studies)	3
DLCL 311	Professional Workshop (highly recommended)	1
A minimum of four advanced courses on French literature and culture, and four advanced courses on Italian literature and culture. Four of the required eight courses must be taken within the first year.		24

Elective Courses— Apart from the required courses above, students are granted considerable freedom in structuring a course of study appropriate to their individual needs. During the first year, most course work is done within the French and Italian department, in order to ensure an adequate preparation for the qualifying examination. Students are encouraged to take a variety of courses in order to be exposed to different historical periods and issues. Students are not allowed to take Independent Study during their first year. In the second and third years, however, the program of study is tailored to the specific interests of the student.

#### 2. Examinations

Successful completion of all department and University examinations.

#### 3. Dissertation

Submission and approval of a dissertation. The dissertation topic must include a substantial quotient of material from both the French and Italian tradition, and the dissertation must include either (1) at least one chapter on French materials and one chapter on Italian materials, or (2) at least two chapters focusing on a comparison between French and Italian materials.

#### 4. Teaching

Ph.D. students are required to teach a minimum of five courses within their five years of funding. Of these five courses the student is required to teach at least one French language course and one Italian language course.

#### 5. Language Requirements

Attaining a native or near-native fluency in both French and Italian is the individual responsibility of all candidates in the Ph.D. program, and remedial course work needed to achieve such fluency cannot count towards the Ph.D. degree.

For students specializing in areas (a) medieval and renaissance and (b) renaissance and early modern, proficiency in Latin equivalent to a second year collegiate level of proficiency (the equivalent of CLASSICS 11L, CLASSICS 12L, and CLASSICS 13L) in reading is also required. Such proficiency may be demonstrated by successfully completing a course in the language in question (at least second-year level, but preferably a graduate seminar); or by passing an exam that establishes a second-year or above level of competence. In no case is passage of a standard reading competence exam considered sufficient.

For students specializing in area (c) modern and contemporary, proficiency in a third language (beyond French and Italian) is not required; students are, however, encouraged to acquire competency in a third language or area that is relevant to their research (e.g. German).

The language requirements should be completed as soon as possible, but in any case not later than the end of the third year.

#### 6. Candidacy

Admission to candidacy is an important decision grounded in an overall assessment of a student's ability to successfully complete the PhD program. Per University policy, students are expected to complete department qualifying procedures and apply for candidacy by the end of the second year in residence. In reviewing a student for admission to candidacy, the faculty considers a student's academic progress including but not limited to: advanced language proficiency, coursework, performance on the Qualifying Exam (or Field Exam for those with a waiver of the Qualifying Exam), and successful completion of teaching and research assistantships. A student must also have completed at least 3 units of work with each of 4 Stanford faculty members prior to consideration for candidacy. In addition to successful completion of department prerequisites, a student is only admitted to candidacy if the faculty makes the judgment that the student has the potential to successfully complete the requirements of the degree program. Candidacy is determined by faculty vote. Failure to advance to candidacy results in the dismissal of the student from the doctoral program. Candidacy is valid for five years and students are required to maintain active candidacy through conferral of the doctoral degree. All requirements for the degree must be completed before candidacy expires. The Department of French Studies conducts regular reviews of each student's academic performance, both prior to and following successful admission to candidacy. Failure to make satisfactory progress to degree may result in dismissal from the doctoral program. Additional information about University candidacy policy is available in the Bulletin (p. 47) and GAP (<http://gap.stanford.edu/4-6.html>).

#### 7. TGR Status

Doctoral students who have been admitted to candidacy, completed all required courses and degree requirements other than the dissertation, completed 135 units, and submitted a Doctoral Dissertation Reading Committee form, must request Terminal Graduate Registration status to complete their dissertations. Each quarter, all TGR students must enroll in FRENCH 802 TGR Dissertation or ITALIAN 802 TGR Dissertation for zero units, in the appropriate section for their adviser.

### Grading

Doctoral students in the department must take required courses for a letter grade if available and are expected to earn a grade of 'B+' or better in each course. Any grade of 'B' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty: while the

grade will stand, the student may be required to revise and resubmit the work associated with that course.

## Examinations

There are three examinations: the Qualifying Examination, the Field Examination, and the University Oral Examination. Students may not take any department or University exam while coursework is incomplete.

### Qualifying Examination

The first oral examination, which takes place in the first two weeks of October of the second year of study, tests the student's knowledge of language and literature and his/her aptitude for critical thinking. The examining committee, determined by the Director of French and Italian, schedules the precise exam date and time.

Students may take either two qualifying exams, one in French and one in Italian, or a single qualifying exam in French and Italian. The combined French and Italian qualifying exam covers one of three periods, (a) medieval and renaissance, (b) renaissance and early modern, or (c) modern and contemporary. For each period it is based on a standard reading list. The list may be expanded to reflect a student's particular interests, but not abridged. One third of the combined exam takes place in English, one third in French, and one third in Italian (with the student free to choose which portion transpires in which language). The reading lists may be obtained from the Chairs of Graduate Studies, the Graduate Student Affairs Officer, or by referencing the French and Italian student handbook.

The exam is 90 minutes in length and consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given in English or in the language of study and should engage, in a succinct manner, an issue or set of issues of broad relevance to the literary history of the language(s) of study. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggesting and not exhaustive, so as to provoke further discussion.
2. A 70-minute question and answer period in which the examining committee follows up on the candidate's presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in the languages of study. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit, and demonstrate the ability to formulate an original point of view on such texts and contexts.

Students who do not pass the Qualifying Exam their first time may be placed on probation with limited enrollment and be allowed to retake the exam at the end of Autumn Quarter. If the student does not pass the second exam, his/her studies in the Ph.D. program will be concluded.

If, at the qualifying exam stage, a student's work is judged insufficient for admission to candidacy for the Ph.D., the student may petition to continue in French only or Italian only. This petition is reviewed by the qualifying exam committee, the relevant Chair of Graduate Studies, and the Director of the Department of French and Italian.

Students already holding an advanced degree in the relevant area may request to be excused from the Qualifying Exam. However, the student must present a formal request for a waiver to the Chair of Graduate Studies upon arrival at Stanford. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the Qualifying Exam would involve considerable repetition of already completed work is such a waiver likely to be granted.

### Field Examination

The second oral examination takes place in the Autumn quarter of the third year of study. The exam is 100 minutes in length and consists of two parts:

1. A 20-minute presentation by the student on a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his/her adviser and the Chair of Graduate Studies. The student should design this research project so that it has the focus of an article or a seminar he/she might teach. The student should discuss the proposed topic with the Chairs of Graduate Studies before the end of the quarter preceding the quarter in which he/she plans to take the exam; together they choose a committee of three faculty members with interests close to the proposed topic. (In most cases, one of these committee members is the student's adviser.) This presentation is followed by a 20-minute discussion.
2. A 60-minute discussion of a reading list, assembled by the student, which covers about a century of writing. The reading list should include works in all genres relevant to the period covered and should be around two single-spaced pages in length. The list may well include critical and scholarly works or texts from outside the traditional domain of literary studies in the chosen tradition (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student's field. Students are required to discuss the reading list for the examination with the Chairs of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be submitted to the committee no later than two weeks preceding the examination. Each member of the committee is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications. The aim of these questions is to establish the student's credentials as a specialist in the period of his/her choosing, so the core of the reading list must be made up of texts that are essential to any specialist. It follows that reading lists must not focus on the narrow area of the student's research interest. The tendency to bias reading lists towards the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work may prove relevant, but students should also remember that the examination is the central means of certifying their expertise in a literary period.

### The University Oral Examination

This examination takes the form of a dissertation proposal defense. It is to be taken no later than Autumn Quarter of the student's fourth year. Students must have completed all course work and language requirements before the quarter in which they take the University Oral examination. One quarter prior to the University Oral examination, students must schedule the exam date and time as well as work with their primary adviser to obtain an outside chair for the examination.

Two weeks before the exam, the student must submit to the committee a 25-35 page proposal. This proposal must contain the following parts:

1. a clear presentation of the student's central thesis
2. a synthetic overview of the dissertation
3. a description of the methodology that is used in the dissertation
4. an in-depth discussion of current secondary sources on the topic.

The student must also append a bibliography, but this does not take the place of number 4. The reading list should include works in both French

and Italian in all genres relevant to the period covered. The proposal must be prepared in close consultation with the dissertation director during the months preceding the exam.

The exam committee consists of four members, in addition to a committee chair from outside the Division of Literatures, Cultures, and Languages, whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list.

After a 20-minute presentation on the part of the candidate, each member of the committee (apart from the committee chair) questions the student for 20 minutes. At the end of the hour and forty minutes, the faculty readers vote on the outcome of the exam. If the outcome is favorable (four out of five votes in favor of the student passing), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory, the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second exam. A student who fails a second time will be released from the Ph.D. program and awarded a terminal M.A. degree.

### Advising

Given the interdisciplinary nature of the Ph.D. programs and the opportunity they afford each student to create an individualized program of study, regular consultation with an adviser is of the utmost importance. The adviser for all entering graduate students is the Chair of Graduate Studies, whose responsibility it is to assist students with their course planning and to keep a running check on progress in completing the course, teaching, and language requirements. By the end of the second year of study, each student should have chosen a faculty adviser whose expertise is appropriate to his/her own area of research and interests.

### Yearly Review

The faculty provide students with timely and constructive feedback on their progress toward the Ph.D. In order to evaluate students' progress and to identify potential problem areas, the department's faculty reviews the academic progress of each student at the end of the academic year. The yearly reviews are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. Possible outcomes of the yearly review include (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period on probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; or (2) continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program. Students leaving the program at the end of the first or second year are usually allowed to complete the requirements to receive an M.A. degree, if this does not involve additional residency or financial support.

## Ph.D. Minor in French or Italian

The Ph.D. may be combined with a minor in a related field, including Comparative Literature, Linguistics, Modern Thought and Literature, Art History, History, Music, Philosophy, and Spanish. Ph.D. candidates in French may minor in Italian, and vice versa. Students interested in a minor should design their course of study with their adviser(s).

### Ph.D. Minor in French Literature

The department offers a minor in French Literature. The requirement for a minor in French is completion of 24 units of graduate course work in the French section. Interested students should consult the graduate adviser.

### Ph.D. Minor in Italian Literature

The department offers a minor in Italian Literature. The requirement for a minor in Italian is a minimum of 24 units of graduate course work in Italian literature. Interested students should consult the graduate adviser.

*Emeriti:* (Professors) John G. Barson, Marc Bertrand, Robert G. Cohn, John Freccero, René Girard, Ralph M. Hester, Elisabeth Mudimbe-Boyi, Michel Serres

*Director:* Cécile Alduy

*Chairs of Graduate Studies:* Dan Edelstein (French), Laura Wittman (Italian)

*Chairs of Undergraduate Studies:* Marisa Galvez (French), David Lummus (Italian)

*Professors:* Jean-Marie Apostolidès (Emeriti, recalled 2015-16), Jean-Pierre Dupuy, Dan Edelstein, Hans U. Gumbrecht, Joshua Landy, Robert Harrison, Carolyn Springer

*Associate Professors:* Cécile Alduy, Laura Wittman

*Assistant Professors:* Marisa Galvez, David Lummus

*Lecturers:* Mark Braude, Biliana Kassabova, Marie-Pierre Ulloa

*Courtesy Professor:* Keith Baker, Margaret Cohen, James P. Daughton, Paula Findlen, Michael Marrinan

*Visiting Associate Professor:* Ewa Domanska (Spring)

## Overseas Studies Courses in French

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPPARIS 30	The Avant Garde in France through Literature, Art, and Theater	4
OSPPARIS 32	French Politics in Cross-National Perspective	5
OSPPARIS 34	Franco-American Encounters: Paris-New York in the 20th Century	4
OSPPARIS 54	The Artist's World: The Workshop, Patronage and Public in 19th and 20th Century France	4
OSPPARIS 81	France During the Second World War: Between History and Memory	5
OSPPARIS 92	Building Paris: Its History, Architecture, and Urban Design	4
OSPPARIS 186F	Contemporary African Literature in French	4

## Overseas Studies Courses in Italian

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPFLOR 34	The Virgin Mother, Goddess of Beauty, Grand Duchess, and the Lady: Women in Florentine Art	4
OSPFLOR 41	The Florentine Sketchbook: A Visual Arts Practicum	4
OSPFLOR 48	Sharing Beauty in Florence: Collectors, Collections and the Shaping of the Western Museum Tradition	4
OSPFLOR 49	On-Screen Battles: Filmic Portrayals of Fascism and World War II	5
OSPFLOR 54	High Renaissance and Mannerism: the Great Italian Masters of the 15th and 16th Centuries	4
OSPFLOR 58	Space as History: Social Vision and Urban Change	4
OSPFLOR 67	The Celluloid Gaze: Gender, Identity and Sexuality in Cinema	4
OSPFLOR 71	A Studio with a View: Drawing, Painting and Informing your Aesthetic in Florence	4
OSPFLOR 75	Florence in the Renaissance: Family, Youth and Marriage in the Fourteenth and Fifteenth Centuries	5
OSPFLOR 111Y	From Giotto to Michelangelo: The Birth and Flowering of Renaissance Art in Florence	4
OSPFLOR 115Y	Building the Cathedral and the Town Hall: Constructing and Deconstructing Symbols of a Civilization	4

## German Studies

Courses offered by the Department of German Studies are listed on the *Stanford Bulletin's* ExploreCourses web site under the subject code GERMAN. For courses in German language instruction with the subject code GERLANG, see the "Language Center" section of this bulletin.

The department is a part of the Division of Literatures, Cultures, and Languages (p. 416).

The department provides students with the linguistic and analytic ability to explore the significance of the cultural traditions and political histories of the German-speaking countries of Central Europe. At the same time, the interdisciplinary study of German culture, which can include art, economics, history, literature, media theory, philosophy, political science, and other fields, encourages students to evaluate broader and contradictory legacies of the German past, the history of rapid modernization and the status of Germany, Austria, and Switzerland today.

The German experience of national identity, political unification, and integration into the European Union sheds light on wider issues of cultural cohesion and difference, as well as on the causes and meaning of phenomena such as racial prejudice, anti-Semitism, and the Holocaust. In general, an education in German Studies not only encourages the student to consider the impact of German-speaking thinkers and artists, but also provides a lens through which the contours of the present and past, in Europe and elsewhere, can be evaluated.

The department offers students the opportunity to pursue course work at all levels in the languages, cultures, literatures, and societies of the German-language traditions. Whether interested in German literature, the influence of German philosophy on other fields in the humanities, or the character of German society and politics, students find a broad range of

courses covering language acquisition and refinement, literary history and criticism, cultural history and theory, history of thought, continental philosophy, and linguistics.

By carefully planning their programs, students may fulfill the B.A. requirements for a double major in German Studies and another subject. A coterminal program is offered for the B.A. and M.A. degrees in German Studies. Doctoral students may elect Ph.D. minors in Comparative Literature, Humanities, Linguistics, and Modern Thought and Literature.

Special collections and facilities at Stanford offer possibilities for extensive research in German Studies and related fields pertaining to Central Europe. Facilities include the Stanford University Libraries and the Hoover Institution on War, Revolution, and Peace. Special collections include the Hildebrand Collection (texts and early editions from the 16th to the 19th century), the Austrian Collection (with emphasis on source material to the time of Maria Theresa and Joseph II, the Napoleonic wars, and the Revolution of 1848), and the Stanford Collection of German, Austrian, and Swiss Culture. New collections emphasize culture and cultural politics in the former German Democratic Republic. The Hoover Institution has a unique collection of historical and political documents pertaining to Germany and Central Europe from 1870 to the present. The department also has its own reference library.

Haus Mitteleuropa, the German theme house at 620 Mayfield, is an undergraduate residence devoted to developing an awareness of the culture of Central Europe. A number of department courses are regularly taught at the house, and there are in-house seminars and conversation courses. Assignment is made through the regular undergraduate housing draw.

## Mission of the Undergraduate Program in German Studies

The mission of the undergraduate program in German Studies is to provide students with the German language skills, the ability to interpret literature and other cultural material, and the capacity to analyze the societies of the German-speaking countries of Central Europe. In addition, its interdisciplinary component prepares students to understand other cultures from the perspectives of multiple disciplines. The program prepares students for careers in business, social service, and government, and for graduate work in German Studies.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. oral proficiency in German beyond the interpersonal level with presentational language abilities.
2. writing proficiency in German beyond the interpersonal level with presentational language abilities.
3. close reading skills of authentic texts in German.
4. the ability to develop effective and nuanced lines of interpretation.

## Graduate Programs in German Studies

The University requirements for the M.A. and Ph.D. degrees are described in the "Graduate Degrees" section of this bulletin.

## Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in German Studies and to prepare students for a professional career or doctoral studies. This is achieved through completion of

courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in German Studies. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of German Studies and to pursue career tracks in higher education and in other sectors.

### German Studies and a Minor Field

Students may work toward a Ph.D. in German Studies with minors in such areas as Comparative Literature, History, Humanities, Linguistics, or Modern Thought and Literature. Students obtaining a Ph.D. in such combinations may require additional training.

## Bachelor of Arts in German Studies

Majors must demonstrate basic language skills, either by completing GERLANG 1,2,3, First-Year German, or the equivalent such as an appropriate course of study at the Stanford in Berlin Center. Students also enroll in intermediate and advanced courses on literature, culture, thought, or language. A maximum of 10 Advance Placement (AP) units may be counted towards the major with the approval of the Chair of Undergraduate Studies. No more than ten units may be taken on a credit/no credit basis. Courses listed below are highly recommended. Substitutes are permitted with the approval of the Chair of Undergraduate Studies. Students can combine a major in German Studies with a major in any other field. Relevant courses in other fields can count towards the German Studies major.

### Degree Requirements

Completion of 60 units. Units earned towards the Bachelor of Arts in German Studies with honors degree may be applied to the 60 unit total.

#### 1. Writing in the Major (WIM Requirement)

GERMAN 116	Writing About Germany: New Topics, New Genres	3-4
------------	---	-----

#### 2. Completion of three GERMAN courses at the 120-level or approved substitutes. The courses offered at this level change each year. These are the offerings for 2015-16.

GERMAN 120	Contemporary Politics in Germany	3-5
GERMAN 121	Why So Serious? German Earnestness and its Cultural Origin	3-5
GERMAN 124	Introduction to German Lyric Poetry	3-5

#### 3. Completion of German Studies Core series or approved substitutes:

GERMAN 131	What is German Literature?	3-5
GERMAN 132	Dynasties, Dictators and Democrats: History and Politics in Germany	3-5
GERMAN 133	Marx, Nietzsche, Freud	3-5

#### 4. Senior Capstone Project:

GERMAN 191	German Capstone Project	1
------------	-------------------------	---

#### 5. Students must take the Oral Proficiency Interview (OPI) two quarters prior to degree conferral. Students should contact the Undergraduate Student Affairs Officer for the major to begin the process.

#### 6. Remaining units should be completed through elective courses approved in consultation with the Chair of Undergraduate Studies. Structured Liberal Education courses and all courses taken at the

Berlin Overseas campus may count toward the major electives. Thinking Matters courses approved by the Chair of Undergraduate Studies may also be counted toward the electives. Subject to approval by the Chair of Undergraduate Studies, courses from other fields may count if they contribute to the student's language skills, the ability to interpret literature and other cultural material, or the capacity to analyze societies.

## German and Philosophy

The German and Philosophy major option offers students the opportunity to combine studies in literature and philosophy. Students take most of their courses from departments specializing in the intersection of literature and philosophy. This option is not declared in Axxess; it does not appear on the transcript or diploma. This option requires a minimum of 16 courses, for a minimum total of 65 units.

### Degree Requirements

#### German Studies:

1. Completion of GERMAN116 and two GERMAN courses at the 120-level or approved substitutes (see above for 2015-16 course offerings)
2. Completion of three GERMAN courses at the 130-level or approved substitutes:

		Units
GERMAN 131	What is German Literature?	3-5
GERMAN 132	Dynasties, Dictators and Democrats: History and Politics in Germany	3-5
GERMAN 133	Marx, Nietzsche, Freud	3-5

3. GERMAN 191 German Capstone Project
4. Students must take the Oral Proficiency Interview (OPI) two quarters prior to degree conferral. Students should contact the undergraduate student services officer for the major to begin the process.

#### Philosophy:

1. PHIL 80 Mind, Matter, and Meaning
2. GERMAN 181 Philosophy and Literature
3. Aesthetics, Ethics, Political Philosophy: one course from PHIL 170 series.
4. Language, Mind Metaphysics, and Epistemology: one course from PHIL 180 series.

#### Units

5. History of Philosophy: one course in the history of Philosophy, numbered above PHIL 100.
6. Two additional elective courses of special relevance to the study of philosophy and literature as identified by the committee in charge of the program. Students must consult with their advisers, the Chair of Undergraduate Studies, and the undergraduate adviser of the program in philosophical and literary thought.

#### Units

7. Capstone: One of the courses must be taken in the student's senior year. When choosing courses, students must consult with their advisers, the Chair of Undergraduate Studies, and the undergraduate adviser of the program in philosophical and literary thought:

		Units
ENGLISH 106E	Dante and Aristotle	5
ENGLISH 113A	Desire, Identity, Modernity	5
COMPLIT 258A	Existentialism, from Moral Quest to Novelistic Form	3-5
RELIGST 271A	Dante's Spiritual Vision	4-5

Units devoted to meeting the department's language requirement are not counted toward the 65-unit requirement.

The capstone seminar and the two related courses must be approved by both the German Studies Chair of Undergraduate Studies and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. Substitutions, including transfer credit, are not normally permitted for items 3b, 3c, and 3d, and are not permitted under any circumstances for items 2, 3a, and 5. Up to 10 units taken in the Philosophy Department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade.

## Honors

German majors with an overall grade point average (GPA) of 3.3 or above, and who maintain a 3.5 (GPA) in major courses, are eligible to participate in the DLCL's honors program. Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty, in their junior year, preferably by March 1, but no later than May 1. During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL Honors application and an outline of planned course work for their senior year.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40-90 pages not including bibliography and notes. Please consult the DLCL Honors Handbook for more details on declaring and completing the honors thesis.

Honors students are encouraged to participate in the honors college hosted by Bing Honors College ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/00\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/00_honors_BingHonors.html)) and coordinated by the Division of Literatures, Cultures, and Languages. The honors college is offered at the end of the summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted through the Bing program. For more information, view the Bing Honors ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/00\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/00_honors_BingHonors.html)) website.

Enrollment: A minimum of 10 units total, described below, and a completed thesis is required. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15th of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

1. Spring Quarter of the junior year (optional) DLCL 189C Honors Thesis Seminar (2-4 units S/NC) under the primary thesis adviser. Drafting or revision of the thesis proposal. The proposal is reviewed by the Chair of Undergraduate Studies and the Director of the department and will be approved or returned for submission.
2. Autumn Quarter of the senior year (required) DLCL 189A Honors Thesis Seminar (4 units S/NC) taught by a DLCL appointed faculty member. The course will focus on researching and writing the honors thesis.
3. Winter Quarter of the senior year (required) DLCL 189B Honors Thesis Seminar (2-4 units Letter grade) under the primary thesis adviser. Focus will be on writing under guidance of primary adviser. The letter grade will determine if honors is granted or not.
4. Spring Quarter of the senior year (option; mandatory if not taken during junior year) DLCL 189C Honors Thesis Seminar (2-4 units S/NC) under the primary thesis adviser. Honors essays are due to the thesis adviser and Student Service Officer no later than 5:00 p.m. on May 15th of the terminal year.
5. Spring Quarter of the senior year (required) DLCL 199 Honors Thesis Oral Presentation (1 unit S/NC). Enroll with primary thesis adviser.

## Overseas Studies and Internships in German Studies

All students who are planning to study at Stanford in Berlin or engage in an internship are encouraged to consult with the Chair of Undergraduate Studies and the Overseas Studies office about integrating work done abroad into their degree program. Through the Center, students with at least two years of college-level German can also take courses at the Freie Universität, Technische Universität, or Humboldt Universität.

All credits earned in Berlin can be applied to the undergraduate major in German Studies. For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses (<http://explorecourses.stanford.edu>) web site, or the Bing Overseas Studies (<http://bossp.stanford.edu>) web site.

Internships in Germany are arranged through the Bing Overseas Studies Program. In addition, students may consult with the department to arrange local internships involving German language use or issues pertaining to Germany or Central Europe. Returning interns who wish to develop a paper based on their experience should enroll in GERMAN 116 Writing about Germany.

## Joint Major Program: German Studies and Computer Science

The joint major program (JMP), authorized by the Academic Senate for a pilot period of six years beginning in 2014-15, permits students to major in both Computer Science and one of ten Humanities majors. See the "Joint Major Program (p. 26)" section of this bulletin for a description of University requirements for the JMP. See also the Undergraduate Advising and Research JMP web site and its associated FAQs.

Students completing the JMP receive a B.A.S. (Bachelor of Arts and Science).

Because the JMP is new and experimental, changes to procedures may occur; students are advised to check the relevant section of the bulletin periodically.

## German Studies Major Requirements in the Joint Major Program

See the "Computer Science Joint Major Progra (p. 231)m (p. 231)" section of this bulletin for details on Computer Science requirements.

To graduate with a joint major in Computer Science and German Studies, students must complete a minimum of 50 units. Majors must demonstrate basic language skills, either by completing GERLANG 1,2,3, First-Year German, or the equivalent such as an appropriate course of study at the Stanford in Berlin Center. Students also enroll in intermediate and advanced courses on literature, culture, thought, or language. A maximum of 10 Advance Placement (AP) units may be counted towards the major with the approval of the Chair of Undergraduate Studies. No more than 10 units may be taken on a credit/no credit basis. Courses listed below are recommended. Substitutes are permitted with the approval of the Chair of Undergraduate Studies. Relevant courses in other fields can count towards the German Studies major.

## Degree Requirements

Completion of 50 units.

1. Writing in the Major (WIM Requirement)

GERMAN 116	Writing About Germany: New Topics, New Genres	3-4
------------	---	-----

2. Completion of three GERMAN courses at the 120-level or approved substitutes. The courses offered at this level change each year. These are the offerings for 2015-16.

GERMAN 120	Contemporary Politics in Germany	3-5
GERMAN 121	Why So Serious? German Earnestness and its Cultural Origin	3-5
GERMAN 124	Introduction to German Lyric Poetry	3-5

3. Completion of German Studies Core series or approved substitutes:

GERMAN 131	What is German Literature?	3-5
GERMAN 132	Dynasties, Dictators and Democrats: History and Politics in Germany	3-5
GERMAN 133	Marx, Nietzsche, Freud	3-5

4. Senior Capstone Project:

GERMAN 191	German Capstone Project	1
GERMAN 199	Individual Work (Enroll in two units GERMAN 199 and preferably take concurrently with the Computer Science capstone requirement.)	1-12

5. Senior year, the student enrolls in a 2 unit independent study GERMAN 199 with a DLCL faculty member. The faculty member advising this project must sign off on this description. In order to have it approved as their capstone German Studies and Computer Science project, the student must submit a description of their project to the Chair of Undergraduate Studies in German.
6. Students must take the Oral Proficiency Interview (OPI) two quarters prior to degree conferral. Students should contact the Undergraduate Student Affairs Officer for the major to begin the process.
7. The remaining units needed to reach 50 units could be completed through elective courses taken in German Studies, at the BOSP Berlin Center, or in other departments, as approved by the Chair of Undergraduate Studies.

- Structured Liberal Education courses.
- All courses taken at the Berlin Overseas campus may count toward the major electives.
- Thinking Matters courses approved by the Chair of Undergraduate Studies may also be counted toward the electives.
- Subject to approval by the Chair of Undergraduate Studies, courses from other fields may count if they contribute to the student's language skills, the ability to interpret literature and other cultural material, or the capacity to analyze societies.

of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL honors application and an outline of planned course work for their senior year.

#### Units

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40-90 pages not including bibliography and notes. Consult the DLCL Honors Handbook for more details on declaring and completing the honors thesis.

#### Units

Honors students are encouraged to participate in the honors college hosted by Bing Honors College ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/OO\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/OO_honors_BingHonors.html)) and coordinated by the Division of Literatures, Cultures, and Languages. The honors college is offered at the end of the summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted through the Bing program. For more information, see the Bing Honors ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/OO\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/OO_honors_BingHonors.html)) website.

Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15th of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

### Declaring a Joint Major Program

To declare the joint major, students must first declare each major through Axess, and then submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>) The Major-Minor and Multiple Major Course Approval Form ([http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin\\_MultMaj.pdf](http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin_MultMaj.pdf)) is required for graduation for students with a joint major.

### Dropping a Joint Major Program

To drop the joint major, students must submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>) . Students may also consult the Student Services Center (<http://studentservicescenter.stanford.edu>) with questions concerning dropping the joint major.

### Transcript and Diploma

Students completing a joint major graduate with a B.A.S. degree. The two majors are identified on one diploma separated by a hyphen. There will be a notation indicating that the student has completed a "Joint Major". The two majors are identified on the transcript with a notation indicating that the student has completed a "Joint Major".

### Minor in German Studies

The Department of German Studies offers a minor in German Studies. The minor requires at least six courses and at least 24 units of course work. 15 units must be taken in the department of German Studies or otherwise with faculty members from German Studies. GERLANG courses from the Language Center and courses at the Bing Overseas Studies Center in Berlin may be counted toward this requirement. Units may not be double counted. Students may use 5 units from SLE and/or a Thinking Matters course taught by a German Studies faculty member toward their electives for the minor. A maximum of 5 units of transfer credit may be applied with the approval of the Chair of Undergraduate Studies. All courses must be taken for a letter grade, except where letter grades are not offered.

## Honors Program

Students have the option to complete the honors program for Computer Science and German Studies, by completing an honors thesis that is partially or fully integrated with Computer Science; such a thesis would fulfill both the capstone and honors requirements for this degree. Students also have the option to complete the honors program for German Studies only; such a thesis would not fulfill the capstone requirement for this degree.

German Studies majors with an overall grade point average (GPA) of 3.3 or above, and who maintain a 3.5 (GPA) in major courses, are eligible to participate in the DLCL's honors program. Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty, in their junior year, preferably by March 1, but no later than May 1. During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair

## Minor in Modern Languages

The Division of Literatures, Cultures, and Languages offers a minor in Modern Languages. This minor draws on literature and language courses offered through this and other literature departments. See the "Literatures, Cultures, and Languages" section of this bulletin for further details about this minor and its requirements.

## Master of Arts in German Studies

This program is designed for those who do not intend to continue studies through the Ph.D. degree. Students desiring the M.A. degree must complete a minimum of 45 units of graduate work. If students enroll for three quarters for a minimum of 15 units per quarter, they will be able to fulfill the M.A. requirements in one year. The program requires M.A. students to take the three graduate core courses (GERMAN 320, GERMAN 321, and GERMAN 322). These courses cover texts from our core reading lists in three areas of German Studies: pre-1700, 1700-1900, and post-1900. The remaining courses may be selected by the student but they must be graduate-level courses in German and/or approved courses in related fields such as art history, comparative literature, linguistics, history, or philosophy.

M.A. candidates must take an oral examination toward the end of their last quarter. In preparation for the oral exam students are to submit a reading list comprised of 15 items from each of the three core reading lists and 10 additional items of their own choice for a total of 55 items. This M.A. reading list must be compiled in consultation with the advisor.

## Coterminal Program

Students may apply to combine programs for the B.A. and M.A. degrees in German Studies. Coterminal students in German Studies may count eligible courses taken three non-summer quarters back from your first graduate quarter. Students are reminded that course transfer is subject to approval of the undergraduate and graduate departments.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken during or after the first quarter of the sophomore year are eligible for consideration for transfer to the graduate career; the timing of the first graduate quarter is not a factor. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

## Doctor of Philosophy in German Studies

The requirements for the Ph.D. in German Studies include:

1. *Required Courses.* A total of 135 units is required for the Ph.D.; doctoral candidates must complete at least one course with each member of the department. During the autumn, winter, and spring quarters in year one, students are required to enroll in and complete at least two graduate courses taught by German Studies faculty and submit at least one seminar paper each quarter. GERMAN 320, GERMAN 321, and GERMAN 322 are required courses for all graduate students. During the summer quarter, students may take a language course, or conduct research abroad, but they must also enroll in independent study units with their adviser (GERMAN 399) and complete a research paper. In year two, students are required to enroll and complete one graduate course and submit one seminar paper each quarter (autumn, winter, spring). During the second summer quarter, students enroll in independent study units (GERMAN 399) with their adviser and complete a Dissertation Chapter or Prospectus. All graduate students must participate in the German Graduate Colloquium (students may enroll in GERMAN 397 Graduate Studies Colloquium for 1 unit per quarter). For more information, see the Graduate Handbook 2015-2016.

- a. *First Year.* Students must enroll in 10 graduate units each quarter during their first year of graduate study, including the Summer Quarter. During the autumn, winter, and spring of the first year, students should select courses that provide an introduction to the major areas of the discipline. During the summer of the first year, students prepare a research paper on a topic from their presumed area of specialization. For more information, see the Graduate Handbook 2015-2016.

GERMAN 320	German Literature 1: How Stories are Told (ca. 1170-1600)	1-5
GERMAN 321	German Literature 2: Selfhood and History	1-5
GERMAN 322	German Literature 3: Myth and Modernity	1-5
GERMAN 399	Individual Work	1-12
DLCL 301	The Learning and Teaching of Second Languages	3

- b. *Second Year.* Students must enroll in 10 graduate units each quarter during their second year of graduate study, including the Summer Quarter. In the autumn quarter students enroll in "Individual Work" with a faculty adviser to refine the research paper written over the summer. A committee comprised of three faculty members will review this "Qualifying Paper" at the end of the autumn quarter. For more information, see the Graduate Handbook 2015-2016. In the winter and spring quarters, students take seminars that will help them to refine their dissertation topic. During the second summer, students prepare a draft chapter or extensive prospectus for their dissertation, which is presented to a faculty committee at the beginning of the autumn quarter. For more information, see the Graduate Handbook 2015-2016. Second year required coursework:

- c.
 

GERMAN 399	Individual Work (Autumn and Summer quarters)	1-10
------------	--	------

- d. *Third Year.* Students who have not reached TGR status (135 units) must complete 10 units each quarter during their third year of graduate study until TGR status is achieved. Third year required coursework:

GERMAN 399	Individual Work (winter and spring quarters)	1-10
------------	--	------

2. *Qualifying Examination.* Immediately following the end of classes in the spring quarter of the first year, all Ph.D. students must take their Qualifying Examination. This examination is designed to cover the full range of German literary history. It is based on the German Studies reading list available in the Graduate Handbook 2015-2016 and builds

- on the core courses GERMAN 320, GERMAN 321, and GERMAN 322. For more information on the Qualifying Examination, please see the Graduate Handbook 2015-2016. Students who fail this examination may request to retake it once before October 15. A second fail of the Qualifying Exam will result in dismissal from the Ph.D. program.
3. *Language Requirement.* A reading knowledge of one language other than English and German is required. Students in Medieval Studies must also have a reading knowledge of Latin. Reading knowledge will be assessed by an examination administered by the Language Center. The language requirement must be satisfied by the end of the third year.
  4. *Qualifying Paper Submission.* Based upon summer independent study and progress in GERMAN 399 Individual Work, the Ph.D. student will submit a polished research paper in autumn quarter of their second year. The paper must be submitted by December 1 and will be reviewed by a committee of three faculty members, including the adviser, who must approve it. A Qualifying Paper that does not meet approval may be revised and resubmitted by February 15. A second failure to submit a paper meeting approval of the faculty readers will result in dismissal from the program.
  5. *Dissertation Chapter Defense.* Building on work in winter and spring quarters of the student's second year, and ideally on the Qualifying Paper, students will spend the summer quarter of the second year completing a draft chapter of the dissertation or a detailed preliminary dissertation prospectus. It must be discussed in a one-hour session of the reading committee at the beginning of the autumn quarter. The reading committee is comprised of three faculty members. At least two members of the reading committee must have primary appointments in German Studies. Students select members of the reading committee in consultation with the primary adviser.
  6. *The University Oral Examination.* The University Oral Examination in the Department of German Studies involves a defense of a substantial portion of the dissertation, normally at least three draft chapters, and takes place no later than the end of Autumn Quarter of the fifth year.. The student's work must be distributed to the committee at least four weeks before the formal University Oral examination. The committee consists of the dissertation committee (three faculty members), one additional reader, plus an outside chair, selected in consultation with the primary adviser. The examination lasts no longer than two hours. It begins with a brief statement by the candidate (no longer than 15 minutes) followed by questions from the four examiners, each of whom is limited to 20 minutes. The remaining time is reserved for optional questions from the chair of the examination. Students who fail the University Oral Exam are allowed one opportunity to retake it. A second fail of the University Oral Exam results in dismissal from the Ph.D. program.
  7. Submission and approval of a dissertation.
  8. *Teaching Assistant.* The teaching requirement includes four quarters of language teaching during the second and third years of study and is mandatory for continued enrollment or support in the program. Students must also teach a fifth course which may be a language course, but they may alternatively request to teach or co-teach a literature course at a later time in the course of study, normally once their dissertation has reached an advanced stage, contingent upon department need and subject to approval of the Director of German Studies. Such teaching does not extend the length or scope of support. Graduate students are advised to develop skills in the teaching of literature by participating in the teaching of undergraduate courses beyond language courses. Students may enroll in independent studies with faculty members to gain experience as apprentices in undergraduate teaching.
  9. *Research Assistant.* The department expects candidates to demonstrate research skills appropriate to their special areas of study.
  10. *Graduate Studies Colloquium.* Enrollment and/or participation in the Colloquium is mandatory for all students (students conducting research abroad are exempt). The Colloquium meets every two weeks throughout the year and involves presentation of student work and professionalization workshops.
  11. *German Studies Lecture Series.* Regular attendance at lectures sponsored by the Department is required.
  12. The principal conditions for continued registration of a graduate student are the timely and satisfactory completion of University, department, and program requirements for the degree, and fulfillment of minimum progress requirements. Failure to meet these requirements results in corrective measures, which may include a written warning, academic probation, and/or dismissal from the program.
  13. *Candidacy.* Admission to candidacy is an important decision grounded in an overall assessment of a student's ability to successfully complete the Ph.D. program. Per University policy, students are expected to complete department qualifying procedures and apply for candidacy by the end of the second year in residence. In reviewing a student for admission to candidacy, the faculty considers a student's academic progress including but not limited to: advanced language proficiency, course work, performance on the Qualifying Exam, the Qualifying Paper, and successful completion of teaching/research assistantships. For more information on the Candidacy File, see the Graduate Handbook 2015-2016. In addition to successful completion of department prerequisites, a student is only admitted to candidacy if the faculty makes the judgment that the student has the potential to successfully complete the requirements of the degree program. Candidacy is determined by faculty vote. Failure to advance to candidacy results in the dismissal of the student from the doctoral program. Candidacy is valid for five years and students are required to maintain active candidacy through conferral of the doctoral degree. All requirements for the degree must be completed before candidacy expires. Additional information about University candidacy policy is available in the Bulletin (p. 47) and GAP (<http://gap.stanford.edu/4-6.html>).
  14. *Annual Review.* The Department of German Studies conducts annual reviews of each student's academic performance at the end of the spring quarter. All students are given feedback from the Chair of Graduate Studies, helping them to identify areas of strength and potential weakness. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. At any point during the degree program, evidence that a student is performing at a less than satisfactory level may be cause for a formal academic review of that student. Possible outcomes of the spring review include: continuation of the student in good standing, or placing the student on probation, with specific guidelines for the period of probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: restoration to good standing; continued probation, with guidelines for necessary remedial steps; or dismissal from the program.

## Ph.D. Minor in German Studies

The department offers a Ph.D. Minor in German Studies. The requirement for the Ph.D. minor is completion of 25 units of graduate course work in German Studies classes. Interested students should consult the Director of Graduate Studies.

## Faculty in German Studies

*Emeriti:* (Professors) Theodore M. Andersson, Gerald Gillespie, Katharina Mommsen, Kurt Müller-Vollmer, Orrin W. Robinson III

*Director:* Kathryn Starkey

*Chair of Graduate Studies:* Russell Berman

*Chair of Undergraduate Studies:* Adrian Daub

*Professors:* Russell A. Berman, Elizabeth Bernhardt, Amir Eshel, Kathryn Starkey

*Associate Professor:* Adrian Daub, Matthew Wilson Smith

*Assistant Professors:* Márton Dornbach

*Lecturers:* Karen Kramer (Autumn)

*Courtesy Professors:* Christopher Krebs, Elaine Treharne, Laura Stokes, Norman Narimark, Edith Sheffer, Thomas S. Grey, Karol Berger, Marisa Galvez, Stephen Hinton, R. Lanier Anderson, Nadeem Hussain, Michael Friedman, Thomas Sheehan, Charolette Fonrobert, Hester Gelber

*Visiting Professor:* Carola Groppe (Winter)

## Overseas Studies Courses in German Studies

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPBER 15	Shifting Alliances? The European Union and the U.S.	4-5
OSPBER 17	Split Images: A Century of Cinema	3-4
OSPBER 66	Theory from the Bleachers: Reading German Sports and Culture	3
OSPBER 70	The Long Way to the West: German History from the 18th Century to the Present	4-5
OSPBER 101A	Contemporary Theater	5
OSPBER 115X	The German Economy: Past and Present	4-5
OSPBER 126X	A People's Union? Money, Markets, and Identity in the EU	4-5
OSPBER 161X	The German Economy in the Age of Globalization	4-5
OSPBER 174	Sports, Culture, and Gender in Comparative Perspective	5

## History and Philosophy of Science

Courses offered by the Program in History and Philosophy of Science are listed under the subject code HPS on the Stanford Bulletin's ExploreCourses web site.

The Program in History and Philosophy of Science (HPS) teaches students to examine the sciences, medicine and technology from a number of perspectives, conceptual, historical and social. The community of scholars includes core faculty and students in History and Philosophy and affiliated members in Classics, Anthropology, English, Political Science, Communication, and other disciplines. Together, they draw upon the multiple methods of their disciplines to study the development, functioning, applications, and social and cultural engagements of the sciences.

Stanford's Program in History and Philosophy of Science is a collaborative enterprise of the departments of History and Philosophy. Each department has its own undergraduate and graduate degree programs in this area, but these overlap and interact through the structure of requirements, advising, team-taught courses, an active graduate student community and a shared colloquium series (<http://HPS.stanford.edu/colloquia.html>).

The program's courses span from antiquity to the late 20th century, with emphasis on:

- ancient science
- Renaissance science
- the Scientific Revolution
- Enlightenment and transatlantic science
- history of medicine and the body
- history and philosophy of biology
- history and philosophy of modern physics
- history of the philosophy of science from the early modern period to the present
- central issues in contemporary philosophy of science
- gender, science, and technology

## Undergraduate Degrees

HPS offers undergraduates the opportunity to study science, medicine and technology by combining scientific and humanistic perspectives in a single program. Students can pursue HPS through the two departments (History and Philosophy) that coordinate this interdisciplinary program.

The HPS Program offers students an in-depth understanding of the nature and evolution of scientific ideas, practices, and institutions; their contemporary significance to intellectual life; and their material transformation of the modern world.

The Department of History offers an interdisciplinary track in History of Science, and Medicine (p. 491). This track is especially well suited to students who wish to combine history and science, or who are interested in studying the history of science and medicine in combination with premed science requirements in preparation for a future career in medicine and public health.

The Department of Philosophy offers a special program in History and Philosophy of Science (p. 573). This program is especially well suited to students who want to combine their concentration in Philosophy with the study of science and its history.

Students interested in HPS should contact the faculty advisors (in 2015-16 Paula Findlen for History and Michael Friedman for Philosophy) to discuss the undergraduate program.

## Graduate Degrees

Graduate students in the Program in History and Philosophy of Science can pursue a Ph.D. either in History, through its Ph.D. concentration in History of Science, Medicine, and Technology, or in Philosophy, through its Ph.D. subplan in History and Philosophy of Science. Diplomas will be issued by the respective departments, but the HPS study will not be noted on the transcript nor on the diploma. Ph.D. students completing the requirements of the HPS program will receive a certificate issued by the Program.

Graduate students in the Program in History and Philosophy of Science that wish to pursue a Ph.D. in Philosophy must fulfill Departmental degree requirements (p. 579) and the following requirements:

1. HPS colloquium series attendance
2. One of the following graduate level Philosophy of Science courses: 263, 264, 264A, 265, 265C, 266, 267A or 267B

3. One elective seminar in the history of science
4. One elective seminar (in addition to the course satisfying requirement 2) in philosophy of science

Philosophy Ph.D. students declaring the HPS subplan in Axxess will have it appear on the official transcript but is not printed on the diploma.

The Program in History and Philosophy of Science degree requirements for the Ph.D. in History of Science, Medicine and Technology, in addition to the general History Department Ph.D. degree requirements (p. 502), are:

1. HPS colloquium series attendance
2. the History Department core seminar in History of Science, Medicine and Technology
3. Four other courses in the history of science, technology and/or medicine
4. One course in the philosophy of science
5. Four additional courses in a given geographical or national field of research, one of which must be a core course

The courses described above must include two research seminars, at least one of which must be in the history of science, technology and/or medicine. Students are expected to write papers on substantially different topics for each seminar. You should also aim to present your research at the annual meeting of a professional society associated with the history of science, technology and/or medicine sometime during your third or fourth year. For more information, see the program's (<http://hps.stanford.edu/grad.html>) web site.

## Bachelor of Arts Programs

HPS offers undergraduates the opportunity to study science, medicine and technology by combining scientific and humanistic perspectives in a single program. Students can pursue HPS through the two departments (History and Philosophy) that coordinate this interdisciplinary program.

The HPS Program offers students an in-depth understanding of the nature and evolution of scientific ideas, practices, and institutions; their contemporary significance to intellectual life; and their material transformation of the modern world.

The Department of History offers an interdisciplinary track in History of Science, and Medicine (p. ). This track is especially well suited to students who wish to combine history and science, or who are interested in studying the history of science and medicine in combination with premed science requirements in preparation for a future career in medicine and public health.

The Department of Philosophy offers a special program in History and Philosophy of Science (p. ). This program is especially well suited to students who want to combine their concentration in Philosophy with the study of science and its history.

Students interested in HPS should contact the faculty advisers (in 2015-16 Paula Findlen for History and Michael Friedman for Philosophy) to discuss the undergraduate program.

### Course Sequences

The following courses are offered in 2015-16 in the area of History and Philosophy of Science.

### Introductory

		Units
HPS/PHIL 60	Introduction to Philosophy of Science	5
HPS 61	Philosophy and the Scientific Revolution	5

## Science in History

This sequence is designed to introduce students to the history of Science from antiquity to the 20th century. Students are advised to take most or all of this sequence as a core foundation.

		Units
HISTORY 40/140	World History of Science	3
HISTORY 140A	The Scientific Revolution	5
HISTORY 44/144	Women and Gender in Science, Medicine and Engineering	3
HISTORY 44Q	Gendered Innovations in Science, Medicine, Engineering, and Environment	4-5
HISTORY 240/340	The History of Evolution	4-5
HISTORY 203C/303C	History of Ignorance	5
HISTORY 232D	Rome: The City and the World, 1300-1800	4-5
HISTORY 332G	When Worlds Collide: The Trial of Galileo	4-5
HISTORY 342	Darwin in the History of Life	4-5
HISTORY 431	Early Modern Things	4-5
MATH 163	The Greek Invention of Mathematics	3-5
OSPFLOR 44		
HISTORY 243C/343C	People, Plants, and Medicine: Atlantic World Amerindian, African, and European Science	4-5
HISTORY 344F	Gender Methods in History, Medicine, and Technology	4-5
HISTORY 202B/302B	Coffee, Sugar, and Chocolate: Commodities and Consumption in World History, 1200-1800	4-5
HISTORY 234	The Enlightenment	3-5
HISTORY 204D/304D	Advanced Topics in Agnotology	4-5
HISTORY 205A/305A	The History of Information	4-5
HISTORY 241K/341K	Technology in Modern American Culture	4-5
HISTORY 444	Graduate Research Seminar: Gender in Science, Medicine, and Engineering	5
HISTORY 430	Graduate Research Seminar: Early Modern Europe	4-5

## Medicine in History

This sequence is designed to introduce students to the history of medicine from antiquity to the 20th century.

		Units
HISTORY 40	World History of Science	3
HISTORY 41Q	Madwomen: The History of Women and Mental Illness in the U.S.	3
HISTORY 130A	In Sickness and In Health: Medicine and Society in the United States: 1800-Present	5
AMSTUD 156H	Women and Medicine in US History: Women as Patients, Healers and Doctors	5
HISTORY 243G/343G	Tobacco and Health in World History	4-5
HISTORY 244C	The History of the Body in Science, Medicine, and Culture	4-5
HISTORY 264G	The Social History of Mental Illness in the United States	5

## Philosophical Perspectives on Science, Medicine, and Technology

This sequence is designed to introduce students to the philosophy of science. Students are advised to take HPS 60 Introduction to Philosophy of Science above as a starting point, and combine a number of the electives listed below in conjunction with courses in the other concentrations that address their specific interests.

		Units
PHIL 153/253	Feminist Theories and Methods Across the Disciplines	2-5
PHIL 164/264	Central Topics in the Philosophy of Science: Theory and Evidence	4
PHIL 165/265	Philosophy of Physics	4
PHIL 166/266	Probability: Ten Great Ideas About Chance	4
PHIL 167D	Philosophy of Neuroscience	4
PHIL 326	Kant's Transcendental Deduction	4
PHIL 348	Evolution of Signalling	2-4
PHIL 361	Social Dimensions of Scientific Knowledge	4
PHIL 362	Grad Seminar on Philosophy of Science	4
PHIL 374F	Science, Religion, and Democracy	4

## Advanced Course Sequences

### Contemporary Perspectives on Science, Medicine and Technology

The following courses focus on contemporary cultural and social science approaches to science, technology, and medicine.

		Units
HPS 199	Directed Reading	1-15
HPS 299	Graduate Individual Work	1-15
ANTHRO 180	Science, Technology, and Gender	3-5
HISTORY 243S/443A	Human Origins: History, Evidence, and Controversy	4-5

## Graduate Degrees

Graduate students in the Program in History and Philosophy of Science can pursue a Ph.D. either in History, through its Ph.D. concentration in History of Science, Medicine, and Technology, or in Philosophy, through its Ph.D. subplan in History and Philosophy of Science. Diplomas will be issued by the respective departments, but the HPS study will not be noted on the transcript nor on the diploma. Ph.D. students completing the requirements of the HPS program will receive a certificate issued by the Program.

Graduate students in the Program in History and Philosophy of Science that wish to pursue a Ph.D. in Philosophy must fulfill Departmental degree requirements (p. ) and the following requirements:

1. HPS colloquium series attendance
2. One of the following graduate level Philosophy of Science courses: 263, 264, 264A, or 266
3. One elective seminar in the history of science
4. One elective seminar (in addition to the course satisfying requirement 2) in philosophy of science

Philosophy Ph.D. students declaring the HPS subplan via the Declaration or Change to a Field of Study form (<http://studentaffairs.stanford.edu/sites/default/files/registrar/files/grad-subplan-change.pdf>) will have it appear on the official transcript but is not printed on the diploma.

The Program in History and Philosophy of Science degree requirements for the Ph.D. in History of Science, Medicine and Technology, in addition

to the general History Department Ph.D. degree requirements (p. ), are:

1. HPS colloquium series attendance
2. the History Department core seminar in History of Science, Medicine and Technology
3. Four other courses in the history of science, technology and/or medicine
4. One course in the philosophy of science
5. Four additional courses in a given geographical or national field of research, one of which must be a core course

The courses described above must include two research seminars, at least one of which must be in the history of science, technology and/or medicine. Students are expected to write papers on substantially different topics for each seminar. You should also aim to present your research at the annual meeting of a professional society associated with the history of science, technology and/or medicine sometime during your third or fourth year. For more information, see the program's (<http://HPST.stanford.edu/grad.html>) web site.

## Course Sequences

See the Bachelors tab for all History and Philosophy of Science courses offered in 2015-2016.

*Co-chairs:* Paula Findlen (History), Michael Friedman (Philosophy)

*Committee-in-Charge:* Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History), Jessica Riskin (History), Thomas Ryckman (Philosophy)

*Program Committee:* Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Tom Mullaney (History), Reviel Netz (Classics), Robert Proctor (History), Jessica Riskin (History), Thomas Ryckman (Philosophy), Londa Schiebinger (History)

*Professors:* Keith Baker (History), Paula Findlen (History), Michael Friedman (Philosophy), David Holloway (History, Institute for International Studies, Political Science), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History), Londa Schiebinger (History), Richard White (History), Caroline Winterer (History)

*Associate Professors:* Thomas Mullaney (History), Jessica Riskin (History), Fred Turner (Communication), Sarah Jain (Anthropology), Priya Satia (History)

*Professor (Teaching):* Thomas Ryckman (Philosophy)

*Professor (Research):* Rega Wood (Philosophy, emerita)

*Lecturer:* Margo Horn, Kristen Haring

*Other Affiliation:* Henry Lowood (Stanford University Libraries), Larry Lagerstrom (UAR)

*Visiting Scholar:* Adrienne Mayor (Classics)

## Overseas Studies Courses in History and Philosophy of Science

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bossp.stanford.edu>).

OSPFLOR 77 The Convergence of the Arts and Sciences Since the Renaissance

Units  
3

## History

Courses offered by the Department of History are listed under the subject code History on the Stanford Bulletin's ExploreCourses web site. (<https://explorecourses.stanford.edu/search?view=catalog&academicYear=&page=0&q=HISTORY&filter-catalognumber=HISTORY=on&filter-coursestatus=Active=on&filter-term-Summer=on>)

## Mission of the Department of History

History courses teach the analytical, interpretive, and writing knowledge and skills necessary for understanding the connections between past and present. History is a pragmatic discipline in which the analysis of change over time involves sifting the influences and perspectives that affect the course of events, and evaluating the different forms of evidence historians exploit to make sense of them. Teaching students how to weigh these sources and convert the findings into persuasive analysis lies at the heart of the department's teaching. Graduates with a History major pursue careers and graduate study in law, public service, business, writing, education, and journalism.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of what it means to think historically: locating subjects in time and place and being sensitive to the contingencies of context and to change over time.
2. critical and interpretive thinking skills using course's primary source materials.
3. the ability to identify different types of sources of historical knowledge.
4. analytical writing skills and close reading skills.
5. effective oral communication skills.

## Degrees Offered

The Department of History offers the following degree programs: Bachelor of Arts, Bachelor of Arts and Sciences, Master of Arts, and Doctor of Philosophy.

## Graduate Programs in History

The primary goal of the Stanford Department of History's graduate program is the training of scholars. Most students who receive doctorates in the program go on to teach at colleges or universities. Other students have obtained positions in university administration and research.

## Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in History and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in History. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of History and to interpret and present the results of such research.

## History Course Catalog Numbering System

Location	Introductory Seminars: Freshman	Sources	Lectures	Colloquia	Research Seminars and Workshops

## Bachelor of Arts in History

### Prerequisites for the Major

Before declaring the History major, students must take one lecture course. They must take a second lecture course within one year of declaring. Fulfilling this requirement are courses numbered HISTORY 1-199 (with the exception of Freshman (xxN) and Sophomore (xxQ) Introductory Seminars).

The choices for 2015-16 are:

		Units
HISTORY 1A	Global History: The Ancient World	3-5
HISTORY 1B	Global History: The Early Modern World, 1300 to 1800	3-5
HISTORY 1C	Global History: Empires, Technology, and Modernity	3-5
HISTORY 102	History of the International System	5
HISTORY 102C	Heretics to Headscarves	5
HISTORY 103D	Human Society and Environmental Change	4
HISTORY 103E	The International History of Nuclear Weapons	5
HISTORY 103F	The Changing Face of War: Introduction to Military History	5
HISTORY 104	Introduction to Geospatial Humanities	3-5
HISTORY 105C	Human Trafficking: Historical, Legal, and Medical Perspectives	5
HISTORY 106A	Global Human Geography: Asia and Africa	5
HISTORY 106B	Global Human Geography: Europe and Americas	5
HISTORY 110C	The Problem of Modern Europe	5
HISTORY 114	Origins of History in Greece and Rome	4-5
HISTORY 115D	The Civilization and Culture of the Middle Ages	3-5
HISTORY 130A	In Sickness and In Health: Medicine and Society in the United States: 1800-Present	5
HISTORY 131	Leonardo's World: Science, Technology, and Art in the Renaissance	3-5
HISTORY 134A	The European Witch Hunts	5
HISTORY 138A	Germany and the World Wars	5
HISTORY 139	Modern Britain and the British Empire	5
HISTORY 140	World History of Science	5
HISTORY 140A	The Scientific Revolution	5
HISTORY 144	Women and Gender in Science, Medicine and Engineering	5
HISTORY 145B	Africa in the 20th Century	5
HISTORY 146	History of Humanitarian Aid in sub-Saharan Africa	5
HISTORY 147	History of South Africa	5
HISTORY 150A	Colonial and Revolutionary America	5
HISTORY 150B	19th-Century America	5
HISTORY 150C	The United States in the Twentieth Century	5
HISTORY 152	History of American Law	5
HISTORY 161	Women in Modern America	4-5
HISTORY 165	Mexican American History through Film	5
HISTORY 165D	The Pacific World	5

HISTORY 166	Introduction to African American History - the Modern Freedom Struggle	3-5
HISTORY 170	Colonial Latin America, 1400-1830	5
HISTORY 173	Mexican Migration to the United States	3-5
HISTORY 181B	Formation of the Contemporary Middle East	5
HISTORY 184	Zionism and the State of Israel	5
HISTORY 187	The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan	5
HISTORY 190	Early Chinese Thought	3-5
HISTORY 194B	Japan in the Age of the Samurai	5
HISTORY 195	Modern Korean History	5
HISTORY 195C	Modern Japanese History: From Samurai to Pokemon	5
HISTORY 196	Gandhi in His Times and Ours	5
HISTORY 198	History of Modern China	5

### Bachelor of Arts Requirements

Completion of the major requires planning. History majors should plan to meet with their faculty advisers twice yearly, once in the Autumn and once in the Winter or Spring quarters. These meetings should take place within the first three weeks of the quarter, before the final study list deadline.

History majors are required to complete a minimum of 63 units (i.e. a minimum of 13 courses) to include:

	Units	
<b>1. One Sources and Methods Seminar (HISTORY 1S-99S) <sup>1</sup></b>	5	
Sources and Methods courses offered this year are:		
HISTORY 4S	Crimes Against Humanity	5
HISTORY 6S	Wealth, Empire, and the Making of the Modern Economy, 1800 to Present	5
HISTORY 34S	Newspapers, Salons and Coffeehouses: The Rise of the Public in Early Modern Europe	5
HISTORY 37S	Voyagers to Tourists: Travel and Modern European Identity	5
HISTORY 48S	History of Health, Science and Medicine in 20th Century Africa	5
HISTORY 54S	The American Civil War	5
HISTORY 69S	Race, Science, and Medicine in U.S. History	5
HISTORY 73S	History of the Police in the United States: Slave Patrols to Ferguson	5
HISTORY 83S	Refugees of Palestine and Syria: History, Identity, and Politics of Exile in the Middle East	5
HISTORY 86S	Zionism Considered: Jewish Thinkers and the Quest for a Jewish Home	5
<b>2. Two 200-level undergraduate colloquia (HISTORY 200-298) <sup>2</sup></b>	10	
<b>3. At least one other small group course</b>	5	
To be chosen among the department's undergraduate 200-level courses (excluding HISTORY 209S), Sources & Methods seminars or Stanford Introductory Seminars		
<b>4. Two lecture courses <sup>3</sup></b>	10	
One of which must be either		
A Europe survey course such as:		
HISTORY 110C The Problem of Modern Europe		
Or, or a United States survey course such as:		
HISTORY 150A Colonial and Revolutionary America		
HISTORY 150B 19th-Century America		
HISTORY 150C The United States in the Twentieth Century		
The second must be a lecture course in African, Asian, Middle East, or Latin American History.		

**5. Completion of the Writing in the Major (WIM) requirement**<sup>4</sup>

HISTORY 209S Research Seminar for Majors 5

**6. At least 6 additional courses to total a minimum of 63 units.** 28

- <sup>1</sup> Sources and Methods seminars constitute the department's "skills" class and should be taken as early as possible in a student's course of study. They are designed for freshmen and sophomores considering or beginning the History major. This requirement must be completed prior to enrolling in HISTORY 209S Research Seminar for Majors.
- <sup>2</sup> ExploreCourses lists all colloquia offered this year (<https://explorecourses.stanford.edu/search?filter-term-Summer=on&filter-component-COL=on&filter-coursestatus-Active=on&filter-term-Spring=on&filter-term-Winter=on&filter-term-Autumn=on&filter-academiclevel-UG=on&page=0&q=HISTORY&view=catalog&filter-catalognumber-HISTORY=on&collapse=%2c6%2c7%2c&academicYear=20142015>).
- <sup>3</sup> Students may count courses they took as prerequisites to the major for this requirement.
- <sup>4</sup> In completing this course, students must write a 20-25 page essay based on original research and including at least two drafts. HISTORY 209S Research Seminar for Majors may be taken in either the junior or the senior year. Students must complete the Sources and Methods seminar before enrolling in the Research Seminar.

**Additional Requirements**

1. Courses comprising the 63 units must be taken for a letter grade, and the student must maintain a grade point average (GPA) in History courses of 2.0 or higher.
2. At least nine courses must be taken from within the Stanford Department of History. Transfer students and those who study abroad may be granted exemptions from this requirement at the discretion of the Director of Undergraduate Studies.
3. At least six quarters of enrollment in the major. Each candidate for the B.A. in History should declare the major by the Autumn Quarter of the third year of study or earlier, if possible.
4. One HISTORY 299S Undergraduate Directed Research and Writing taken for 3-5 units and for a letter grade may be applied toward the thirteen courses required for the B.A. in History.
5. *Capstone*: The History department organizes a series of luncheon workshops quarterly, at which students present their research essays and honors theses.
6. The department encourages students to acquire proficiency in foreign languages and study at one of Stanford's overseas programs. Such studies are not only valuable in themselves; they can provide an opportunity for independent research and a foundation for honors essays and graduate study.
7. Advanced Placement credits do not fulfill any major requirements.

For further information on History courses' satisfaction of major requirements, see the Department of History (<http://history.stanford.edu/programs/undergraduate>) web site.

**Writing in the Major (WIM) Requirement**

History's Writing in the Major requirement is satisfied by completing HISTORY 209S Research Seminar for Majors.

This course may be taken in either the junior or senior year, but not before completing the sources and methods seminar requirement. Students write a 20-25 page research essay. Original research and revision are important parts of the research essay. Students must conduct substantial research in the libraries and must submit at least two drafts (a rough draft and a final draft) of the essay. Students who wish to write an honors thesis should take HISTORY 209S Research

Seminar for Majors in the junior year. Where appropriate, a student can use the research seminar to begin working on the honors thesis.

HISTORY 209S Research Seminar for Majors fulfills the WIM requirement only. It does not fulfill geographical requirements or small group course requirements.

Students select their research topics based on the general topics of each quarter's offerings.

- HISTORY 209S Research Seminar for Majors
  - Autumn: Modern Times; Latina/o History; History of Science/Honors
  - Winter: Identity in American History; Comparative Colonialism
  - Spring: Open Topic

**Honors Program**

For a limited number of majors, the department offers a special program leading to Departmental Honors in History. Students accepted for this program, in addition to fulfilling the general requirements stated above, begin work as early as Spring Quarter of the junior year and complete the essay by mid-May of the senior year. In addition to HISTORY 299H Junior Honors Colloquium, students must enroll in 11-15 units of Senior Research in the senior year, to be distributed as best fits their specific project. For students in the Honors program, Senior Research units (HISTORY 299A Senior Research I, HISTORY 299B Senior Research II, HISTORY 299C Senior Research III) are taken in addition to the thirteen required courses in History.

To enter this program, the student must be accepted by a member of the department who agrees to advise the research and writing of the essay, and must complete the Junior Honors Colloquium (299H) offered in Winter Quarter. An exception to the latter requirement may be made for those studying overseas Winter Quarter of the junior year, but such students should consult with the director of the honors program, if possible, prior to going overseas. Students who study abroad for the entire junior year and want to write an honors thesis should plan to take the Research Seminar for Majors in the first quarter following completion of the study abroad program. Under exceptional circumstances, students are admitted to the program in Autumn Quarter of the senior year. Such students must not enroll in any HISTORY 299A Senior Research I, HISTORY 299B Senior Research II, HISTORY 299C Senior Research III, units until HISTORY 209S Research Seminar for Majors, has been completed.

In considering an applicant for such a project, the adviser and director of the honors program take into account general preparation in the field of the project and expect a GPA of at least 3.5 in the student's previous work in History and a 3.3 in overall University work. Students completing the thesis with a grade of 'B+' or higher are eligible for Departmental Honors in History. To enter the Honors program, apply at the Department of History office.

Outstanding honors essays may be considered for the University's Robert M. Golden Medals, as well as for departmental James Birdsall Weter prizes.

*Honors Program Requirements*—To graduate with departmental honors in History, students must:

1. complete HISTORY 299H Junior Honors Colloquium in the junior year.
2. maintain a GPA of at least 3.3 in overall University work and a 3.5 in the History major during the final 5 quarters of enrollment/thesis preparation, or obtain the consent of the Director of the Honors Program.
3. select both a primary thesis adviser (who is a member of the Stanford History faculty) and a secondary adviser (who is a Stanford University

faculty member with an active teaching appointment for the duration of academic year 2015-16) no later than Autumn Quarter of the senior year.

- submit on May 9, 2016 by noon a 16,250- 30,000 words honors thesis including bibliography that receives a grade of 'B+' or better.
- enroll in the 11-15 units of Senior Research as specified below.
- participate in mandatory Honors Program activities throughout senior year (including, but not limited to, writing workshops and the annual Honors Presentation Luncheon) as specified in the Honors Program Handbook.

HISTORY 299A Senior Research I, HISTORY 299B Senior Research II, HISTORY 299C Senior Research III do not fulfill any history major requirements other than honors, but the units do count towards the 180 required for B.A. degree conferral.

*Required Course*—To be taken in the junior year:

HISTORY 299H	Junior Honors Colloquium	Units 1
--------------	--------------------------	------------

*Required Course*—Recommended to be taken in junior year:

HISTORY 209S	Research Seminar for Majors	Units 5
--------------	-----------------------------	------------

An exception (for HISTORY 299H Junior Honors Colloquium) may be made for those studying overseas Winter Quarter of the junior year, but such students should consult with the Director of the Honors Program prior to going overseas.

To be taken in the senior year:

HISTORY 299A	Senior Research I	Units 1-5
HISTORY 299B	Senior Research II	1-5
HISTORY 299C	Senior Research III	1-5

## Overseas Studies or Study Abroad

Courses offered by Stanford's Bing Overseas Studies Program and appearing on the History department's cognate course list automatically receive credit towards the major or minor in History. Course work completed in non-Stanford Study Abroad programs is evaluated for major/minor credit by designated History department faculty on a case-by-case basis. Students in non-Stanford Study Abroad programs are advised to take classes with reading and writing components comparable to History department course loads.

## History Fields of Study or Degree Options

The Department of History offers the following tracks to the B.A. in History. These tracks are not declared on Axiom; they do not appear on the transcript or on the diploma. The tracks are:

- General History
- Global Affairs and World History
- History, Philosophy, and the Arts
- History of Science and Medicine
- History and Law
- Public History/Public Service

The General History track emphasizes breadth of study among historical areas and periods as well as concentration in one selected field. The Global Affairs and World History track emphasizes an understanding of today's world through a historical examination of its evolution, from the early modern to the contemporary era. The four tracks with interdisciplinary emphasis (History, Philosophy, and the Arts; History

of Science and Medicine; History and Law; and Public History/Public Service) combine the study of history with the methods and approaches of other disciplines, and involve substantial course work outside of History.

## General History Track

In addition to completing the requirements for all History majors, the student in the General History track is required to satisfy breadth and concentration requirements.

- Breadth Requirements*: to ensure chronological and geographical breadth, at least two courses must be completed in a pre-modern chronological period and in each of three geographical fields:
  - Field I (Africa, Asia, and Middle East)
  - Field II (the Americas)
  - Field III (Europe, including Western Europe, Eastern Europe, and Russia).
  - Courses fulfilling the pre-modern chronological period (Field IV) may also count for Fields I-III.

2. Courses for 2015-16 follow below.

- Concentration*: to develop some measure of expertise, students must complete four courses in a single area (including one undergraduate colloquium or research seminar). The proposed concentration must be approved by the major adviser; a proposal for a thematic concentration must be approved by both the adviser and the department's director of undergraduate studies. Areas of concentration are:

- Africa
- Asia
- Eastern Europe and Russia
- Europe before 1700
- Europe since 1700
- Jewish History
- Latin America
- Science and Medicine
- The United States
- The Middle East
- International History
- Comparative Empires and Cultures
- or a thematic subject treated comparatively, such as war and revolution, work, gender, family history, popular culture, or high culture.

- Required course*: HISTORY 102 History of the International System is a required course for students who select the International History concentration. This course is offered in Spring Quarter.

### Field I: Africa/Asia/Middle East

		Units
HISTORY 45B	Africa in the Twentieth Century	3
HISTORY 47	History of South Africa	3
HISTORY 48S	History of Health, Science and Medicine in 20th Century Africa	5

HISTORY 208D	Pre-Modern Warfare	4-5
HISTORY 212	Knights, Monks, and Nobles: Masculinity in the Middle Ages	4-5
HISTORY 215	Saints and Sinners: Women and Religion in the Medieval World	5
HISTORY 232A	Power, Art, and Knowledge in Renaissance Italy	4-5

HISTORY 232D	Rome: The City and the World, 1300-1800	4-5
HISTORY 232F	The Scientific Revolution	5
HISTORY 244	Egyptomania! The Allure of Ancient Egypt Over the Past 3,500 Years	5
HISTORY 291G	Pre-Modern Chinese Warfare	4-5

#### Global Affairs and World History Track

The Global Affairs and World History track is designed to offer an empirically rich curriculum for Stanford students interested in international affairs. The goal is to impart an understanding of today's world through a historical examination of its evolution, from the early modern to the contemporary era. This track appeals to students who are aiming for a career in the international arena, and who seek to inform themselves about the complexities of cultural diversity and spatial differentiation on the ground. Deploying both connective and comparative modes of analysis, majors who choose this track will acquire a robust understanding of the relevance of the past to current events.

The Global Affairs and World History track features gateway courses in Global Human Geography, a recommended skills component, a geographical concentration, and a core cluster of global and comparative offerings. Students choosing this track also develop proficiency in a foreign language at the second-year level or above. Incorporating primary sources in a language other than English into the capstone seminar or honors thesis is encouraged.

*Gateway Courses (two courses):* Students must complete two of the following courses:

		Units
HISTORY 1A	Global History: The Ancient World	3-5
HISTORY 1B	Global History: The Early Modern World, 1300 to 1800	3-5
HISTORY 1C	Global History: Empires, Technology, and Modernity	3-5
HISTORY 13	The Historical and Geographical Background of Current Global Events	3
HISTORY 106A	Global Human Geography: Asia and Africa	5
HISTORY 106B	Global Human Geography: Europe and Americas	5

*Note:* If a student wishes to do more than two of these courses, the course is applied to the methodological cluster.

*Geographical Cluster (four courses):* Students select four History courses in one geographic area, such as Europe, Latin America, Asia, Middle East, or Africa. The faculty coordinator must pre-approve all courses in this cluster.

*Global and Comparative Courses (Methodological Cluster) (six courses):* Majors selecting this track take at least 6 thematic history courses of global scope. Courses offered in 2015-16 are:

		Units
HISTORY 1A	Global History: The Ancient World	3-5
HISTORY 1B	Global History: The Early Modern World, 1300 to 1800	3-5
HISTORY 1C	Global History: Empires, Technology, and Modernity	3-5
HISTORY 4S	Crimes Against Humanity	5
HISTORY 5C	Human Trafficking: Historical, Legal, and Medical Perspectives	3
HISTORY 6S	Wealth, Empire, and the Making of the Modern Economy, 1800 to Present	5
HISTORY 8N	Women Against War!	4
HISTORY 10C	The Problem of Modern Europe	3

HISTORY 10N	Thinking About War	3	HISTORY 195C	Modern Japanese History: From Samurai to Pokemon	5
HISTORY 13	The Historical and Geographical Background of Current Global Events	3	HISTORY 196	Gandhi in His Times and Ours	5
HISTORY 38A	Germany and the World Wars	3	HISTORY 198	History of Modern China	5
HISTORY 39	Modern Britain and the British Empire	3	HISTORY 201A	The Global Drug Wars	4-5
HISTORY 40	World History of Science	3	HISTORY 201E	Life under Nazism	4-5
HISTORY 40A	The Scientific Revolution	3	HISTORY 202	International History and International Relations Theory	4-5
HISTORY 44	Women and Gender in Science, Medicine and Engineering	3	HISTORY 202B	Coffee, Sugar, and Chocolate: Commodities and Consumption in World History, 1200-1800	4-5
HISTORY 44Q	Gendered Innovations in Science, Medicine, Engineering, and Environment	4-5	HISTORY 202G	Peoples, Armies and Governments of the Second World War	5
HISTORY 45B	Africa in the Twentieth Century	3	HISTORY 203C	History of Ignorance	5
HISTORY 47	History of South Africa	3	HISTORY 203E	Global Catholicism	5
HISTORY 48S	History of Health, Science and Medicine in 20th Century Africa	5	HISTORY 203G	Mobile Food: A Global Food History	4-5
HISTORY 63N	The Feminist Critique: The History and Politics of Gender Equality	3-4	HISTORY 203J	Water in World History	4-5
HISTORY 65D	The Pacific World	3	HISTORY 204	What is History?	5
HISTORY 70A	Colonial Latin America, 1400-1830	3	HISTORY 204D	Advanced Topics in Agnotology	4-5
HISTORY 78N	Film and History of Latin American Revolutions and Counterrevolutions	3	HISTORY 204G	War and Society	4-5
HISTORY 84	Zionism and the State of Israel	3	HISTORY 205A	The History of Information	4-5
HISTORY 86S	Zionism Considered: Jewish Thinkers and the Quest for a Jewish Home	5	HISTORY 205E	Comparative Historical Development of Latin America and East Asia	4-5
HISTORY 87	The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan	3	HISTORY 207G	The Age of Discovery: Maritime Science and Empire, 1400-1850	4-5
HISTORY 90	Early Chinese Thought	3-5	HISTORY 208D	Pre-Modern Warfare	4-5
HISTORY 95	Modern Korean History	3	HISTORY 209C	Liberalism and Violence	4-5
HISTORY 95C	Modern Japanese History: From Samurai to Pokemon	3	HISTORY 224A	The Soviet Civilization	4-5
HISTORY 95N	Maps and the Modern Imagination	4-5	HISTORY 224C	Genocide and Humanitarian Intervention	3
HISTORY 96	Gandhi in His Times and Ours	3	HISTORY 226E	Famine in the Modern World	3
HISTORY 98	The History of Modern China	3	HISTORY 227	East European Women and War in the 20th Century	4-5
HISTORY 102	History of the International System	5	HISTORY 243C	People, Plants, and Medicine: Atlantic World Amerindian, African, and European Science	4-5
HISTORY 103D	Human Society and Environmental Change	4	HISTORY 243G	Tobacco and Health in World History	4-5
HISTORY 103E	The International History of Nuclear Weapons	5	HISTORY 244	Egyptomania! The Allure of Ancient Egypt Over the Past 3,500 Years	5
HISTORY 103F	The Changing Face of War: Introduction to Military History	5	HISTORY 245	Violence and Identity in the African Great Lakes Region	4-5
HISTORY 105C	Human Trafficking: Historical, Legal, and Medical Perspectives	5	HISTORY 246	The Dynamics of Change in Africa	4-5
HISTORY 106A	Global Human Geography: Asia and Africa	5	HISTORY 246E	Refugees and the Making of the Modern World	4-5
HISTORY 106B	Global Human Geography: Europe and Americas	5	HISTORY 247	Violence in African History: Conflict and Healing in sub-Saharan Africa	4-5
HISTORY 110C	The Problem of Modern Europe	5	HISTORY 252K	America as a World Power: U.S. Foreign Relations, 1914 to Present	5
HISTORY 138A	Germany and the World Wars	5	HISTORY 256	350 Years of America-China Relations	4-5
HISTORY 139	Modern Britain and the British Empire	5	HISTORY 266C	The Cold War: An International History	5
HISTORY 140	World History of Science	5	HISTORY 276	Modern Brazil	4-5
HISTORY 140A	The Scientific Revolution	5	HISTORY 282F	History of Modern Turkey	5
HISTORY 144	Women and Gender in Science, Medicine and Engineering	5	HISTORY 284K	Violence, Imperialism, and the Collapse of the Ottoman Empire	5
HISTORY 145B	Africa in the 20th Century	5	HISTORY 286	Jews Among Muslims in Modern Times	4-5
HISTORY 147	History of South Africa	5	HISTORY 288	Palestine and the Arab-Israeli Conflict	4-5
HISTORY 165D	The Pacific World	5	HISTORY 290	North Korea in Historical Perspective	4-5
HISTORY 170	Colonial Latin America, 1400-1830	5	HISTORY 291G	Pre-Modern Chinese Warfare	4-5
HISTORY 181B	Formation of the Contemporary Middle East	5	HISTORY 292D	Japan in Asia, Asia in Japan	4-5
HISTORY 184	Zionism and the State of Israel	5	HISTORY 293D	Global Intellectual History	4-5
HISTORY 187	The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan	5	HISTORY 295J	Chinese Women's History	5
HISTORY 190	Early Chinese Thought	3-5	HISTORY 303C	History of Ignorance	4-5
HISTORY 195	Modern Korean History	5			

**Proficiency in a foreign language:** Students electing the Global Affairs and World History track must acquire proficiency in a foreign language through two years of college-level course work (second-year, third-quarter) or by passing a proficiency exam. Language courses do not count toward the 13 required courses in the major; students may, however, be interested in pairing this track in the History major with a foreign language minor.

**Skills Training:** Students in the Global Affairs and World History track are encouraged to acquire technical proficiencies relevant for geo-historical analysis and fieldwork abroad. Please see the Undergraduate Student Services Coordinator for further information on these courses.

Those planning to pursue research overseas are also advised to enroll in the one-credit workshop, HISTORY 299X Preparing for International Field Work: Public Service or Research in Spring Quarter.

**Overseas Study Experience:** Students electing this track are encouraged to study abroad, with a Stanford BOSP program or another program approved by the directors of the track. Course work taken overseas may be accepted for credit in the track on a case by case basis, in consultation with a faculty coordinator.

**Research Seminar for Majors:** HISTORY 209S Research Seminar for Majors fulfills Writing in the Major requirement.

#### General Requirements:

As for all History majors, students in this track must complete two lecture courses (one Europe or U.S., and one Africa, Asia, Middle East, or Latin America), two 200-level courses, a Sources and Methods seminar, and HISTORY 209S Research Seminar for Majors.

## History Tracks with Interdisciplinary Emphasis (HMIE)

There are four History Tracks with Interdisciplinary Emphasis:

- History, Philosophy, and the Arts
- History of Science and Medicine
- History and the Law
- Public History/Public Service

These tracks are designed for students who are interested in other disciplines who want to focus on the historical aspects of the subject matter covered by that discipline, who want to understand how interdisciplinary approaches can deepen their understanding of history, or who are primarily interested in developing interdisciplinary approaches to historical scholarship by combining the careful attention to evidence and context that motivates historical research with the analytic and methodological tools of science and the humanities.

In pursuing the designated requirements for all History majors, students in HMIE are required to complete their thirteen courses for the major as follows:

**Gateway Course:** Students are required to take the appropriate gateway course for their interdisciplinary track. This course introduces students to the application of particular interdisciplinary methods to the study of history. See the section on each HMIE for the gateway course appropriate to that major track. *Note:* The History and the Law track has no gateway course requirement.

**Methodological Cluster:** This cluster is designed to acquaint students with the ways in which interdisciplinary methods are employed in historical scholarship, by practicing historians and scholars in other disciplines whose work is historical. This program of study must provide methodological coherence and must be approved in advanced by the student's adviser. See the section on each HMIE for the appropriate historical methods courses.

**Geographic Cluster:** History is embedded in time and place. This cluster is designed to emphasize that the purpose of studying methodology is to more fully understand the history of a particular region of the world. Students select a particular geographic region, as specified in the History major, and complete four courses in that area.

**Interdisciplinary Cluster:** These courses, taken outside the Department of History, acquaint students with the methods and approaches of another discipline appropriate for the interdisciplinary study of history. This program of study must provide methodological coherence and must be approved in advance by the student's adviser. See the section on each HMIE for appropriate interdisciplinary courses.

**Research Seminar for Majors:** HISTORY 209S Research Seminar for Majors fulfills Writing in the Major Requirement.

HMIE tracks do not mandate the breadth or concentration requirements of the General History track. IHUM courses taught by History faculty may apply to HMIE tracks only insofar as their content is specifically appropriate to the particular methodological or geographic cluster; IHUM courses are no longer offered.

## History, Philosophy, and the Arts

The History, Philosophy, and the Arts (HPA) track is designed for the student who wishes to complement his or her work in History with study in literature and philosophy, particularly in a foreign language. For the purposes of this track, Arts are defined broadly, including fine art and art history, drama, films, memoirs and autobiography, poetry and novels, as well as canonical works in philosophy, political science, and history of political thought. It appeals to students who are interested in studying the humanities and its conceptual and linguistic worlds in their historical context, or who want to focus on both the literature and history of a specific geographical area while also learning the language of that area.

**Gateway Courses (two courses):** Students must take two of the following courses:

- HISTORY 140A The Scientific Revolution
- HISTORY 187 The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan
- HISTORY 190 Early Chinese Thought
- HISTORY 209C Liberalism and Violence
- HISTORY 234 The Enlightenment

**Methodological Cluster (two courses):** This two-course cluster teaches students how historians, in particular, analyze literary texts and philosophical works as documentary sources for writing cultural and intellectual history. Students choose two courses from among the pre-approved HPA methodology curriculum. These courses need not be in the student's geographic concentration. For 2015-16, these courses are:

		Units
HISTORY 1C	Global History: Empires, Technology, and Modernity	3-5
HISTORY 6S	Wealth, Empire, and the Making of the Modern Economy, 1800 to Present	5
HISTORY 16N	Heloise: Love, Learning, and Desire (for God?) in the Twelfth Century	3
HISTORY 17N	Intimacy, Secrets and the Past: Biography in History and Fiction	3-4
HISTORY 31	Leonardo's World: Science, Technology, and Art in the Renaissance	3-5
HISTORY 34S	Newspapers, Salons and Coffeehouses: The Rise of the Public in Early Modern Europe	5
HISTORY 36N	Gay Autobiography	4
HISTORY 50A	Colonial and Revolutionary America	3

HISTORY 54N	African American Women's Lives	3-4
HISTORY 55N	Social Movements through Song in Modern America	3-4
HISTORY 84	Zionism and the State of Israel	3
HISTORY 86S	Zionism Considered: Jewish Thinkers and the Quest for a Jewish Home	5
HISTORY 87	The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan	3
HISTORY 96	Gandhi in His Times and Ours	3
HISTORY 102C	Heretics to Headscarves	5
HISTORY 115D	The Civilization and Culture of the Middle Ages	3-5
HISTORY 131	Leonardo's World: Science, Technology, and Art in the Renaissance	3-5
HISTORY 140A	The Scientific Revolution	5
HISTORY 150A	Colonial and Revolutionary America	5
HISTORY 150C	The United States in the Twentieth Century	5
HISTORY 152	History of American Law	5
HISTORY 166	Introduction to African American History - the Modern Freedom Struggle	3-5
HISTORY 184	Zionism and the State of Israel	5
HISTORY 187	The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan	5
HISTORY 190	Early Chinese Thought	3-5
HISTORY 196	Gandhi in His Times and Ours	5
HISTORY 198	History of Modern China	5
HISTORY 202B	Coffee, Sugar, and Chocolate: Commodities and Consumption in World History, 1200-1800	4-5
HISTORY 204G	War and Society	4-5
HISTORY 208D	Pre-Modern Warfare	4-5
HISTORY 209C	Liberalism and Violence	4-5
HISTORY 215	Saints and Sinners: Women and Religion in the Medieval World	5
HISTORY 230C	Paris: Capital of the Modern World	4-5
HISTORY 232A	Power, Art, and Knowledge in Renaissance Italy	4-5
HISTORY 232D	Rome: The City and the World, 1300-1800	4-5
HISTORY 234	The Enlightenment	3-5
HISTORY 237K	Speed and Power in the Twentieth Century	4-5
HISTORY 267A	Martin Luther King, Jr. and the Global Freedom Struggle	5
HISTORY 269	Thinking About Capitalism	4-5
HISTORY 282F	History of Modern Turkey	5
HISTORY 284K	Violence, Imperialism, and the Collapse of the Ottoman Empire	5
HISTORY 293D	Global Intellectual History	4-5

*Note:* HISTORY 187 The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan is a non-Western lectures that students in the the History, Philosophy, and the Arts (HPA) track can use towards both an HPA methodology course and as the non-Western lecture requirement.

*Geographical Cluster (four courses):* Students select four History courses in one geographic area. These are: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East, or Africa. These four courses must be taken in addition to the two methodological courses required above.

*Interdisciplinary Cluster (four courses):* Four courses, taken outside the Department of History, must address the literature and arts, broadly defined, of the area chosen for the geographic concentration. The student's adviser must pre-approve all courses in this cluster; these

courses may not be double-counted towards a minor or major other than History.

*Research Seminar for Majors:* HISTORY 209S Research Seminar for Majors fulfills Writing in the Major requirement.

*General Requirements:* Like all History majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or U.S, one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources and Methods seminar, and a Research Seminar for Majors.

## History of Science and Medicine

The History of Science and Medicine (HS&M) track is a collaborative program of the Department of History and the Program in the History and Philosophy of Science. The major is designed for students interested in both sciences and humanities, and in the interactions between the two. It is also especially useful for students contemplating medical school, since it allows them to study the history of medicine, biology, and allied sciences in conjunction with fulfilling the premed science requirements.

*Gateway Course (one course):* HISTORY 140A The Scientific Revolution

*Methodological Cluster (three courses):* These History courses focus on the history of science and medicine. For 2015-16, these courses are:

		Units
HISTORY 31	Leonardo's World: Science, Technology, and Art in the Renaissance	3-5
HISTORY 34S	Newspapers, Salons and Coffeehouses: The Rise of the Public in Early Modern Europe	5
HISTORY 40	World History of Science	3
HISTORY 40A	The Scientific Revolution	3
HISTORY 41Q	Madwomen: The History of Women and Mental Illness in the U.S.	3
HISTORY 44	Women and Gender in Science, Medicine and Engineering	3
HISTORY 44Q	Gendered Innovations in Science, Medicine, Engineering, and Environment	4-5
HISTORY 46N	Science and Magic in History	4-5
HISTORY 48S	History of Health, Science and Medicine in 20th Century Africa	5
HISTORY 69S	Race, Science, and Medicine in U.S. History	5
HISTORY 103D	Human Society and Environmental Change	4
HISTORY 103E	The International History of Nuclear Weapons	5
HISTORY 130A	In Sickness and In Health: Medicine and Society in the United States: 1800-Present	5
HISTORY 131	Leonardo's World: Science, Technology, and Art in the Renaissance	3-5
HISTORY 140	World History of Science	5
HISTORY 144	Women and Gender in Science, Medicine and Engineering	5
HISTORY 202B	Coffee, Sugar, and Chocolate: Commodities and Consumption in World History, 1200-1800	4-5
HISTORY 203C	History of Ignorance	5
HISTORY 203G	Mobile Food: A Global Food History	4-5
HISTORY 203J	Water in World History	4-5
HISTORY 204D	Advanced Topics in Agnotology	4-5
HISTORY 205A	The History of Information	4-5
HISTORY 207G	The Age of Discovery: Maritime Science and Empire, 1400-1850	4-5
HISTORY 232F	The Scientific Revolution	5
HISTORY 234	The Enlightenment	3-5

HISTORY 240	The History of Evolution	4-5
HISTORY 241K	Technology in Modern American Culture	4-5
HISTORY 243C	People, Plants, and Medicine: Atlantic World Amerindian, African, and European Science	4-5
HISTORY 243G	Tobacco and Health in World History	4-5
HISTORY 264G	The Social History of Mental Illness in the United States	5

**Geographical Cluster (four courses):** Students select four History courses in one geographic area. Examples include: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East, or Africa. These four courses must be taken in addition to the three methodological cluster courses. Courses in the history of science, technology, and medicine that have a geographic focus may be used to fulfill this requirement, but cannot be double-counted in the methodological cluster.

**Interdisciplinary Cluster (four courses):** Students select four courses in scientific disciplines and/or in philosophy of science, anthropology of science, or sociology of science. These courses require faculty adviser pre-approval.

**Research Seminar for Majors:** HISTORY 209S Research Seminar for Majors fulfills the Writing in the Major requirement.

**General Requirements:** As with all History majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or U.S., one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources and Methods seminar, and a Research Seminar for Majors.

## History and Law

The History and Law (HL) interdisciplinary track is for students who want to explore the intersections between historical and legal studies. The HL curriculum focuses on the role of legal institutions, policies, and structures in various societies. HL track majors enroll in at least four History department courses that focus on issues of law in civil societies and four courses that provide a geographic concentration. In addition, students enroll in four courses outside History that provide disciplinary or interdisciplinary perspectives on the role of law in shaping societies and a Research Seminar for Majors.

**Gateway Course:** There is no gateway course for this track. Instead, students take an extra course in the Methodological cluster.

**Methodological Cluster (four courses):** Students enroll in at least four History department courses, including courses outside History taught by faculty affiliated with the department, that focus on how law, policies, constitutions, and legal structures affect the development of various societies. *Note:* The Methodological Cluster for this HIP contains one extra course since there is no Gateway course.

For 2015-16, these courses are:

		Units
HISTORY 4S	Crimes Against Humanity	5
HISTORY 5C	Human Trafficking: Historical, Legal, and Medical Perspectives	3
HISTORY 6S	Wealth, Empire, and the Making of the Modern Economy, 1800 to Present	5
HISTORY 34A	European Witch Hunts	3
HISTORY 38A	Germany and the World Wars	3
HISTORY 63N	The Feminist Critique: The History and Politics of Gender Equality	3-4
HISTORY 87	The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan	3

HISTORY 96	Gandhi in His Times and Ours	3
HISTORY 105C	Human Trafficking: Historical, Legal, and Medical Perspectives	5
HISTORY 134A	The European Witch Hunts	5
HISTORY 138A	Germany and the World Wars	5
HISTORY 187	The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan	5
HISTORY 196	Gandhi in His Times and Ours	5
HISTORY 201A	The Global Drug Wars	4-5
HISTORY 201E	Life under Nazism	4-5
HISTORY 202	International History and International Relations Theory	4-5
HISTORY 203C	History of Ignorance	5
HISTORY 204G	War and Society	4-5
HISTORY 209C	Liberalism and Violence	4-5
HISTORY 224A	The Soviet Civilization	4-5
HISTORY 234	The Enlightenment	3-5
HISTORY 243G	Tobacco and Health in World History	4-5
HISTORY 252	Originalism and the American Constitution: History and Interpretation	5
HISTORY 253D	Approaches to American Legal History	5
HISTORY 258	Sexual Violence in America	4-5
HISTORY 260	California's Minority-Majority Cities	4-5
HISTORY 269	Thinking About Capitalism	4-5
HISTORY 282F	History of Modern Turkey	5
HISTORY 284K	Violence, Imperialism, and the Collapse of the Ottoman Empire	5
HISTORY 293D	Global Intellectual History	4-5

*Note:* HISTORY 187 The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan is a non-Western lecture that students in the History and Law track can use towards both a Law methodology course and as the non-Western lecture requirement.

**Geographical Cluster (four courses):** Students select four History courses in one geographic area. These are: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East, or Africa. These four courses must be taken in addition to the three methodological courses required above.

**Interdisciplinary Cluster (four courses):** Students may select from courses offered in the School of Law, School of Education, and others as appropriate. *Note:* Courses in the School of Law and School of Education require the permission of the instructor before undergraduate students can enroll, since these are graduate-level courses.

**Research Seminar for Majors:** HISTORY 209S Research Seminar for Majors fulfills the Writing in the Major requirement.

**General Requirements:** Like all history majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or U.S., one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources and Methods seminar, and a Research Seminar for Majors.

## Public History/Public Service

The Public History/Public Service (PH/PS) interdisciplinary history track is designed for students who wish to include in their course of studies the application of historical study in (1) public settings such as museums and heritage sites, national and state parks, public agencies, and private foundations, and (2) public service settings in non-profit organizations, public agencies, and educational institutions.

PH/PS majors enroll in a gateway course on public history and public service and in four History department courses that provide a geographic concentration as well as completing a two-course methodological requirement. PH/PS majors must also complete an internship through a regularly offered service-learning course or through a summer internship or fellowship. In addition, students, in consultation with the PH/PS faculty coordinator, must complete four courses from outside the History department (see the annual listing of service-learning courses provided by the Haas Center for Public Service).

*Gateway Course (one course):* Contact Faculty Coordinator, Katherine Jolluck, jolluck@stanford.edu.

*Geographical Cluster (four courses):* Students select four History courses in one geographic area, such as the United States, Europe, Latin America, Asia, Middle East, or Africa. The faculty coordinator must pre-approve all courses in this cluster.

*Interdisciplinary Cluster (four courses):* Students select four courses from outside the History department that addresses a theme or topic of interest. The faculty coordinator must pre-approve all courses in this cluster.

*Methodological Cluster (two courses):* Students must enroll in one Sources and Methods seminar course and one additional 200-level History course. The Writing in the Major (WIM) requirement must be completed in a Research Seminar for Majors.

*Public Service/Service Learning Internship (one course):* Students must engage in at least a one quarter internship through a service learning course or through a full-time public service or public history summer internship or fellowship. This internship must be pre-approved by the faculty coordinator.

Students who complete a paid summer internship in lieu of one for academic credit must enroll in 3 units of HISTORY 299S Undergraduate Directed Research and Writing with the faculty coordinator of the PH/PS track and write a 20-page research paper related to their internship work. This research paper is in addition to that required for the Research Seminar for Majors.)

The following History service-learning courses are offered in 2015-16:

		Units
HISTORY 5C	Human Trafficking: Historical, Legal, and Medical Perspectives	3
HISTORY 6W	Service-Learning Workshop on Human Trafficking Part I	3
HISTORY 7W	Service-Learning Workshop on Human Trafficking Part II	3
HISTORY 105C	Human Trafficking: Historical, Legal, and Medical Perspectives	5
HISTORY 130A	In Sickness and In Health: Medicine and Society in the United States: 1800-Present	5
HISTORY 165	Mexican American History through Film	5
HISTORY 201A	The Global Drug Wars	4-5
HISTORY 209C	Liberalism and Violence	4-5
HISTORY 243G	Tobacco and Health in World History	4-5
HISTORY 260	California's Minority-Majority Cities	4-5

If students elect to fulfill the internship requirement through a History Department service-learning course, they must enroll in an additional course in either the geographical cluster or the Interdisciplinary cluster in order to complete the 13 courses required for the major.

*Research Seminar for Majors:* HISTORY 209S Research Seminar for Majors fulfills Writing in the Major requirement.

*General Requirements:* As with all history majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or US, one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources and Methods seminar, and a Research Seminar for Majors.

## History Secondary Teacher's Credential

Applicants for the Single Subject Teaching Credential (Secondary) in the social studies may obtain information regarding this program from the Credential Administrator, School of Education.

## Joint Major Program in History and Computer Science

The joint major program (JMP), authorized by the Academic Senate for a pilot period of six years beginning in 2014-15, permits students to major in both Computer Science and one of ten Humanities majors. See the "Joint Major Program (p. 26)" section of this bulletin for a description of University requirements for the JMP. See also the Undergraduate Advising and Research JMP web site and its associated FAQs.

Students completing the JMP receive a B.A.S. (Bachelor of Arts and Science).

Because the JMP is new and experimental, changes to procedures may occur; students are advised to check the relevant section of the bulletin periodically.

## History Major Requirements in the Joint Major Program

See the "Computer Science Joint Major Program (p. 231)" section of this bulletin for details on Computer Science requirements.

Students majoring in the History and Computer Science joint major program fulfill all of the breadth, focus, and WIM requirements of the standard History major. Students in the JMP are excused from completing one elective course, reducing the required unit count of the History major from 63 to 59 units (i.e., from a minimum of 13 courses to 12 courses). All courses comprising the major must be taken for a letter grade.

For details on the requirements of the History major, see the Bachelor's tab (p. 491) of this section of this bulletin.

## Integrative Capstone Experience

One of the highlights of the JMP is an integrative capstone experience, which enables students to work with faculty mentors in the two departments to devise and complete original projects that bring together the different fields. Some students may choose to complete capstone projects under the auspices of HISTORY 209S Research Seminar for Majors which is the required Writing in the Major requirement for all History majors including those in the JMP. Others may choose to complete their capstones under the auspices of other courses in Computer Science or History, or in the context of senior honors projects in one or the other or both departments. In keeping with University policy, units obtained from a capstone course taken within a particular department can be applied to only that department's requirements.

## Declaring a Joint Major Program

To declare the joint major, students must first declare each major through Axess, and then submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>) The Major-Minor and Multiple Major Course Approval Form ([http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin\\_MultMaj.pdf](http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin_MultMaj.pdf)) is required for graduation for students with a joint major.

## Dropping a Joint Major Program

To drop the joint major, students must submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>). Students may also consult the Student Services Center (<http://studentservicescenter.stanford.edu>) with questions concerning dropping the joint major.

## Transcript and Diploma

Students completing a joint major graduate with a B.A.S. degree. The two majors are identified on one diploma separated by a hyphen. There will be a notation indicating that the student has completed a "Joint Major". The two majors are identified on the transcript with a notation indicating that the student has completed a "Joint Major".

## Minor in History

Students must declare the minor in History no later than Autumn Quarter of the senior year via Axess. Minor declarations are approved by the Department of History and confirmation is sent via email to the student.

Candidates for the minor in History must complete six courses, at least three of which must have a field or thematic focus. Students completing the minor may choose to concentrate in such fields as African, American, Asian, British, European (medieval, early modern, or modern), Russian and East European history, comparative empires and cultures, or such thematic topics as the history of gender, the family, religion, technology, or revolution. Students may also petition to have a concentration of their own design count toward the minor.

## Degree Requirements

All six courses must be of at least 3 units each and must be taken for a letter grade. The student must maintain a grade point average (GPA) in History courses of 2.0 (C) or higher. Two of the six courses must be small-group in format (Stanford Introductory Seminars, Sources and Methods Seminars, departmental colloquia, and research seminars). History courses taken at Stanford overseas campuses may count toward the minor, but at least three of the six courses must be taken from Stanford History faculty.

Advanced Placement credits do not fulfill any minor requirements.

## Optional Courses for the Minor

History courses taken at non-Stanford Study Abroad programs may count toward the minor (provided the History Department approves them), but at least three of the six courses must be taken from Stanford History faculty. One course from certain Introduction to the Humanities courses and Thinking Matters courses (those taught by History faculty) may count toward the six-course requirement, but not for the three-course field of concentration. One Undergraduate Directed Research and Writing HISTORY 299S) course may count toward the minor, if taken for 3-5 units and for a letter grade. A maximum of three transfer courses may be used toward the minor.

## Coterminal Master's Program in History

The department each year admits a limited number of undergraduates for coterminal M.A. degree in History. Coterminal applications are accepted during Autumn Quarter for admission in Spring Quarter. Applicants are responsible for checking their compliance with University coterminal requirements listed in the "Coterminal Bachelor's and Master's Degrees (p. 42)" section of this bulletin.

## Admission

Applicants must meet the same general standards as those seeking admission to the M.A. program; they must submit a written statement of purpose, a transcript, GRE test scores, and three letters of recommendation, at least two of which should be from members of the Department of History faculty. To be competitive, coterminal

applicants should have a 3.75 GPA in their undergraduate history major (or equivalent if they are entering without a History major.) The decision on admission rests with the department faculty upon recommendation by the Graduate Admissions Committee. Students must meet all requirements for both degrees. They must complete 15 full-time quarters (or the equivalent), or three full-time quarters after completing 180 units, for a total of 225 units. During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three courses that fall within a single Ph.D. field.

The application filing deadline is December 1, 2015.

The coterminal M.A. program is not declarable on Axess.

## University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

## Master of Arts in History

University requirements for the M.A. are described in the "Graduate Degrees (p. 45)" section of this bulletin.

The department requires the completion of nine courses (totaling not less than 45 units) of graduate work; seven courses of this work must be Department of History courses. Of the seven, one must be a seminar and four must be either graduate colloquia or graduate seminars. Directed reading may be counted for a maximum of 10 units. A candidate whose undergraduate training in history is deemed inadequate must complete nine courses of graduate work in the department. The department does not recognize for credit toward the M.A. degree any work that has not received the grade of 'A' or 'B.'

## Terminal M.A. Program

Applicants who do not wish to continue beyond the M.A. degree are admitted to this program at the discretion of the faculty in individual fields (U.S., modern Europe, and so on). Students admitted may not apply to enter the Ph.D. program in History during the course of work for the M.A. degree.

## M.A. in Teaching (History)

The department cooperates with the School of Education in offering the Master of Arts in Teaching degree. For the general requirements, see the "School of Education (p. )" section of this bulletin. For certain

additional requirements made by the Department of History, contact the department office. Candidates must possess a teaching credential or relevant teaching experience.

## Admission

Applicants for admission to graduate work must take the General Test of the Graduate Record Examination. It may be taken at most American colleges and in nearly all foreign countries. For details, see the Graduate Admissions (<http://gradadmissions.stanford.edu>) web site.

Students admitted to graduate standing do not automatically become candidates for a graduate degree. With the exception of students in the terminal M.A. program, they are admitted with the expectation that they will be working toward the Ph.D. degree and may become candidates to receive the M.A. degree after completing three quarters of work.

The application filing deadline is December 1, 2015.

## Doctor of Philosophy in History

University requirements for the Ph.D. are described in the "Graduate Degrees (p. 45)" section of this bulletin.

Students planning to work for the doctorate in history should be familiar with the general degree requirements of the University outlined in the "Graduate Degrees (p. 45)" section of this bulletin. Those interested in applying for admission to the M.A. and Ph.D. programs should contact the graduate program coordinator in the History department. Online applications are available in September of the year prior to intended enrollment. The application filing deadline is December 1, 2015. Applicants must file a report of their general scores on the Graduate Record Examination and submit a writing sample of 10-25 pages on a historical topic. Successful applicants for the M.A. and Ph.D. programs may enter only in Autumn Quarter.

Upon enrollment in the graduate program in History, the student has a member of the department designated as an adviser with whom to plan the Ph.D. program. Much of the first two years of graduate study is spent taking courses, and, from the outset, the student should be aware that the ultimate objective is not merely the completion of courses but preparation for general examinations and for writing a dissertation.

Admission to the Department of History in the graduate division does not establish any rights respecting candidacy for an advanced degree. At the end of the first year of graduate study, students are evaluated by the faculty and given a progress report. A decision as to whether the student is admitted to candidacy for the Ph.D. is normally made by the start of the student's third year.

After the completion of certain further requirements, students must apply for acceptance for candidacy for the doctorate in the graduate division of the University.

## Admission

Applicants for admission to graduate work must take the General Test of the Graduate Record Examination. It may be taken at most American colleges and in nearly all foreign countries. For details, see the Office of Graduate Admissions (<http://gradadmissions.stanford.edu>) web site.

Students admitted to graduate standing do not automatically become candidates for a graduate degree. With the exception of students in the terminal M.A. program, they are admitted with the expectation that they will be working toward the Ph.D. degree and may become candidates to receive the M.A. degree after completing three quarters of work.

The application filing deadline is December 1, 2015.

## Degree Requirements Required Courses

Units

### For all first-year Ph.D. students

HISTORY 304	Approaches to History	4-5
HISTORY 305	Graduate Pedagogy Workshop	1

### For first-year and second-year Ph.D. students in American History

HISTORY 351A	Core in American History, Part I	4-5
HISTORY 351B	Core in American History, Part II	4-5
HISTORY 351C	Core in American History, Part III	4-5
HISTORY 351D	Core in American History, Part IV	4-5
HISTORY 351E	Core in American History, Part V	4-5
HISTORY 351F	Core in American History, Part VI	4-5

Other Graduate Core Colloquia required for Ph.D. students studying in fields other than the above are listed in the Department of History's Graduate Handbook.

### University Oral Examinations

The student is expected to take the University oral examination in the major concentration in the third graduate year.

### Dissertation

The student must complete and submit a dissertation which is the result of independent work and is a contribution to knowledge. It should evidence the command of approved techniques of research, ability to organize findings, and competence in expression. For details and procedural information, inquire in the department.

### Dissertation Committee

The reading committee consists of the principal dissertation adviser (first reader), and two additional members of the Department (second and third readers) agreed upon by the adviser and the student.

### Financial Support

Students who are admitted with financial support are provided multiple years of support through fellowships, teaching and research assistantships, and tuition grants. Applicants should indicate on the admissions application whether they wish to be considered for such support. No separate application for financial aid is required.

U.S. citizens and permanent resident aliens who are interested in area language studies in East Asia, Africa, and the republics of the former Soviet Union may request a Foreign Language and Area Studies (FLAS) fellowship application from the FLAS coordinator of the respective programs offering the FLAS (CEAS, CAS, CREEES). The FLAS application deadlines are in January and February (CAS).

### Resources

The degree requirements section relates to formal requirements, but the success of a student's graduate program depends in large part on the quality of the guidance received from faculty and on the library resources available. Prospective graduate applicants are advised to study the list of History faculty and the courses this faculty offers. As to library resources, no detailed statement is possible in this bulletin, but areas in which library resources are unusually strong are described following.

The University Library maintains strong general collections in almost all fields of history. It has a very large microtext collection, including, for instance, all items listed in Charles Evans' American Bibliography, and in the Short-Title Catalogues of English publications, 1474-1700, and virtually complete microfilmed documents of the Department of State to 1906. It also has a number of valuable special collections including the Borel Collection on the History of California; many rare items on early American and early modern European history; the Brasch Collection

on Sir Isaac Newton and scientific thought during his time; the Gimon Collection on French political economy, and other such materials.

The rich collection of the Hoover Institution on the causes, conduct, and results of WW I and WW II are being augmented for the post-1945 period. The materials include government documents, newspaper and serial files, and organization and party publications (especially the British and German Socialist parties). There are also important manuscript collections, including unpublished records of the Paris Peace Conference of 1919 and the Herbert Hoover archives, which contain the records of the Commission for Relief in Belgium, the American Relief Administration, the various technical commissions established at the close of WW I for reconstruction in Central and Eastern Europe, the personal papers of Herbert Hoover as United States Food Administrator, and other important personal papers. Other materials for the period since 1914 relate to revolutions and political ideologies of international importance; colonial and minority problems; propaganda and public opinion; military occupation; peace plans and movements; international relations; international organizations and administration including the publications of the United Nations, as well as principal international conferences. The Hoover Institution also possesses some of the richest collections available anywhere on the British labor movement; Eastern Europe, including the Soviet Union; East Asia (runs of important newspapers and serials and extensive documentary collections, especially for the period of WW II); and Africa since 1860, especially French-speaking Africa, the former British colonies, and South Africa.

## Requirements

1. In consultation with the adviser, students select an area of study from the list below in which to concentrate their study and later take the University oral examination. The major concentrations are:
  - Europe, 300-1500
  - Europe, 1400-1800
  - Europe since 1700
  - Jewish History
  - Russia
  - Eastern Europe
  - Middle East and Central Asia
  - South Asia
  - East Asia before 1600
  - China since 1600
  - Japan since 1600
  - Korea since 1800
  - Africa
  - Britain and the British Empire since 1460
  - Latin America
  - The United States (including colonial America)
  - The History of Science and Medicine
  - Transnational, International, and Global
2. The department seeks to provide a core colloquium in every major concentration. Students normally enroll in this colloquium during the first year of graduate study.
3. Students are required to take two research seminars, at least one in the major concentration. Normally, research seminars are taken in the first and second years.
4. Each student, in consultation with the adviser, defines a secondary concentration. This concentration should represent a total of four graduate courses or their equivalents, and it may be fulfilled by working in a historical concentration or an interdisciplinary concentration. The historical concentrations include:
  - a. One of the concentrations listed above (other than the student's major concentration).
  - b. One of the concentrations listed below, which falls largely outside the student's major concentration:
    - The Ancient Greek World
    - The Roman World
    - Europe, 300-1000
    - Europe, 1000-1400
    - Europe, 1400-1600
    - Europe, 1600-1789
    - Europe, 1700-1871
    - Europe since 1848
    - England, 450-1460
    - Britain and the British Empire, 1460-1714
    - Britain and the British Empire since 1714
    - Russia to 1800
    - Russia since 1800
    - Eastern Europe to 1800
    - Eastern Europe since 1800
    - Jewish History
    - Middle East and Central Asia to 1800
    - Middle East and Central Asia since 1800
    - Africa
    - South Asia
    - China before 1600
    - China since 1600
    - Japan before 1600
    - Japan since 1600
    - Latin America to 1825
    - Latin America since 1810
    - The United States (including Colonial America) to 1865
    - The United States since 1850
    - The History of Science and Medicine
    - Transnational, International, and Global
  - c. Work in a national history of sufficiently long time to span chronologically two or more major concentrations. For example, a student with Europe since 1700 as a major concentration may take France from 1000 to the present as a secondary concentration.
  - d. A comparative study of a substantial subject across countries or periods. The secondary concentration requirement may also be satisfied in an interdisciplinary concentration. Students plan these concentrations in consultation with their advisers. Interconcentrations require course work outside the Department of History which is related to the student's training as a historian. Interdisciplinary course work can either add to a student's technical competence or broaden his or her approach to the problems of the research concentration.
5. Each student, before conferral of the Ph.D., is required to satisfy the department's teaching requirement.
6. There is no University or department foreign language requirement for the Ph.D. degree. A reading knowledge of one or more foreign languages is required in concentrations where appropriate. The faculty in the major concentration prescribes the necessary languages. In no concentration is a student required to take examinations in more than two foreign languages. Certification of competence in commonly taught languages (that is, French, German, Italian, Portuguese, Russian, and Spanish) for candidates seeking to fulfill the language requirement in this fashion is done by the appropriate language department of the University. Certification of competence in other languages is determined in a manner decided on by faculty in the major concentration. In either case, certification of

language competence must be accomplished before a student takes the University oral examination.

7. The student is expected to take the University oral examination in the major concentration in the third graduate year.
8. The student must complete and submit a dissertation which is the result of independent work and is a contribution to knowledge. It should evidence the command of approved techniques of research, ability to organize findings, and competence in expression. For details and procedural information, inquire in the department.

## Ph.D. in History and Humanities

The department of History participated in the Graduate Program in Humanities leading to a Ph.D. degree in History and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities; no new students are being accepted. The University remains committed to a broad-based graduate education in the humanities; the courses, colloquium, and symposium continue to be offered, and the Division of Literatures, Cultures, and Languages provides advising for students already enrolled who may contact DLCL Student Affairs at 650-724-1333 or dlcl@stanford.edu for further information. Courses are listed under the subject code HUMNTIES and may be viewed on the Stanford Bulletin's ExploreCourses web site.

## Ph.D. Minor in History

Students pursuing a Ph.D. other than in History may apply for the Ph.D. Minor in History. Ph.D. students cannot pursue a minor in their own program. The minimum University requirement for a Ph.D. minor is 20 units of History course work at the graduate level (courses numbered 300 and above) at Stanford. All units should be in a single field. Units taken for the minor can be counted as part of the overall requirement for the Ph.D. of 135 units taken at Stanford. Courses used for a minor may not be used to meet the requirements for a master's degree.

### Degree Requirements

20 units of History course work at the graduate level (HISTORY 300-399W and 400-499X) at Stanford. All units should be in a single field.

### Optional Courses for the Minor

A Ph.D. minor form outlining the program of study must be approved by the major and minor departments.

*Emeriti:* (Professors) Barton J. Bernstein, Peter Duus, Terence Emmons, Harold L. Kahn, David M. Kennedy, Carolyn Lougee Chappell, Mark Mancall, Peter Paret, Paul A. Robinson, Paul Seaver, James J. Sheehan, Peter Stansky, David B. Tyack, Lyman P. Van Slyke; (Senior Lecturer) Joseph J. Corn

*Chair:* Paula Findlen

*Professors:* Keith M. Baker, Joel Beinin, Albert Camarillo, James T. Campbell, Clayborne Carson, Gordon Chang, Paula Findlen, Zephyr Frank, Estelle Freedman, Fiona Griffiths, Stephen Haber, David Holloway, Nancy S. Kollmann, Mark E. Lewis, Norman M. Naimark, Robert Proctor, Jack N. Rakove, Jessica Riskin, Richard L. Roberts, Aron Rodrigue, Richard P. Saller, Walter Scheidel, Londa Schiebinger, Matthew H. Sommer, Richard White, Kären E. Wigen, Caroline Winterer, Steven J. Zipperstein

*Associate Professors:* David R. Como, Robert Crews, James P. Daughton, Yumi Moon, Thomas S. Mullaney, Priya Satia, Laura Stokes, Jun Uchida, Amir Weiner

*Assistant Professors:* Jennifer Burns, Jonathan Gienapp, Allyson V. Hobbs, Aishwary Kumar, Ana Raquel Minian, Edith Sheffer, Mikael D. Wolfe, Ali Yacyioglu

*Courtesy Professors:* Giovanna Ceserani, Daniel Edelstein, Lawrence Friedman, Leah Gordon, Avner Greif, Amalia Kessler, David F. Labaree, Kathryn Gin Lum, Reviel Netz, Fred Turner, Sam Wineburg

*Senior Lecturers:* Katherine Jolluck, Martin W. Lewis

*Acting Assistant Professor:* Jill Rosenthal

*Lecturers:* Anne Austin

## Overseas Studies Courses in History

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		<b>Units</b>
OSPAUSTL 40	Australian Studies	3
OSPBEIJ 67	China-Africa and Middle East Relations	4
OSPBER 70	The Long Way to the West: German History from the 18th Century to the Present	4-5
OSPCPTWN 33	Southern Africa: from Liberation Struggles to Region-Building	4
OSPCPTWN 38	Genocide: African Experiences in Comparative Perspective	3-5
OSPCPTWN 58		
OSPFLOR 49	On-Screen Battles: Filmic Portrayals of Fascism and World War II	5
OSPFLOR 58	Space as History: Social Vision and Urban Change	4
OSPFLOR 75	Florence in the Renaissance: Family, Youth and Marriage in the Fourteenth and Fifteenth Centuries	5
OSPFLOR 115Y	Building the Cathedral and the Town Hall: Constructing and Deconstructing Symbols of a Civilization	4
OSPISTAN 64	Travels in the Ottoman History with Evliya Çelebi	4
OSPKYOTO 25	Japan and China in the Early Modern World	5
OSPMADR 62	Spanish California: Historical Issues	4
OSPOXFRD 15	British Architecture and the Renaissance: 1500-1850	4-5
OSPOXFRD 70	The History of London	5
OSPOXFRD 221Y	Art and Society in Britain	4-5
OSPPARIS 81	France During the Second World War: Between History and Memory	5
OSPSANTG 68	The Emergence of Nations in Latin America	4-5

## Human Biology

Courses offered by the Program in Human Biology are listed under the subject code HUMBIO on the Stanford Bulletin's ExploreCourses web site.

The program offers a Bachelor of Arts in Human Biology, as well as a minor and an honors program.

## Mission of the Undergraduate Program in Human Biology

The mission of the undergraduate program in Human Biology is to provide students with an interdisciplinary approach to understanding human beings from biological, behavioral, social, and cultural perspectives. Courses in the major allow students to see connections and parallels with other fields as they learn to formulate and evaluate health, environmental, and other public policy issues that influence human welfare. The program prepares majors to pursue advanced training in professional or graduate programs.

To achieve these goals, all students complete a 30-unit core sequence, normally in the sophomore year, which provides the foundation for the major. Also during the sophomore year, students consult with student advisers to choose a faculty adviser and complete the declaration process. Together they plan a road map of course work designed to help each student focus on an area of interest within Human Biology. Early planning and subsequent refining of an individualized course of study, in consultation with student and faculty advisers, is a strength and requirement of the program. The curriculum draws on faculty from across the University. To complete a B.A. in Human Biology, students must take courses from within the program and from other University departments. Most Human Biology majors go on to advanced training in professional schools, or graduate programs in the behavioral, natural, and social sciences, including coterminal master's degree programs in other University departments. Additional information about the major may be obtained from the program's offices or at the Program in Human Biology (<https://humanbiology.stanford.edu>) web site.

## Learning Outcomes (Undergraduate)

The program expects its undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Program in Human Biology. Students are expected to demonstrate:

1. ability to acquire and synthesize scientific information from a variety of sources.
2. ability to apply analytical tools to support a conclusion, address original hypotheses, and evaluate policy.
3. ability to interpret knowledge in meaningful and appropriate ways as they draw conclusions about the significance of their findings.
4. ability to communicate their scientific ideas clearly and persuasively.

### Student Advisers

Human Biology has an advising program comprising faculty and student advisers. Before declaring Human Biology as the undergraduate major, each student must meet with one of six student advisers who assist in developing a coherent study plan based on an individualized area of concentration, and the selection of foundation, concentration, and upper-division courses. The student advisers also assist students in selecting an appropriate faculty adviser and a suitable internship for their area of concentration and career goals. Student advisers offer drop-in services during scheduled office hours every weekday and some evenings. The student advisers also sponsor events including the Internship Faire, Beyond HumBio, and declaration workshops. To maintain high standards of advising that respond to the needs of individual students, student advisers meet weekly with the program's faculty advising chairs and the student services coordinator to review the program's policies and specific student inquiries and petitions concerning the program.

### Storey House

Storey House, 544 Lasuen Mall, is an undergraduate resident theme house for Human Biology, devoted to developing an intellectual community among Human Biology majors at Stanford, and allowing faculty and students to become acquainted and share their Human

Biology interests and research. Its goals are to foster intellectual discussion in the residential lives of the students living in Storey House, mentoring relationships between upperclassmen and core students in the house, and stimulating events for all Human Biology majors facilitated by academic theme associates. Assignment is made through the regular undergraduate housing draw.

## Bachelor of Arts in Human Biology Declaring the Major

A prospective major must consult with the student and faculty advisers to obtain detailed information about the program and guidance in the development of an individual course of study.

At the time the major is declared, the student must submit a written statement (3-5 pages) of academic and long-term goals and the proposed list of courses satisfying the requirements for the major. The proposal is then reviewed by the student advisers who help identify an appropriate faculty adviser.

It is important to declare early in the sophomore year, once a student in good academic standing has passed two of six courses in the Core. The University requires students to declare a major by the end of Spring Quarter of the sophomore year. Under special circumstances students may declare as late as Autumn Quarter of the junior year. Petitions to declare late require additional documentation and are less likely to be approved.

Students who plan to pursue graduate work should be aware of the admission requirements of the schools to which they intend to apply. Early planning is advisable to guarantee completion of major and graduate school requirements.

## Degree Requirements

The B.A. in Human Biology (HUMBIO) requires a minimum of 87 units in the major divided among four levels of courses:

1. Fundamental Program: at least 38 units, to include
  - a. Human Biology Core (30 units); see "Human Biology Core" below for more information. The Human Biology Core refers to:

HUMBIO 2A	Genetics, Evolution, and Ecology	5
HUMBIO 2B	Culture, Evolution, and Society	5
HUMBIO 3A	Cell and Developmental Biology	5
HUMBIO 3B	Behavior, Health, and Development	5
HUMBIO 4A	The Human Organism	5
HUMBIO 4B	Environmental and Health Policy Analysis	5

- b. Statistics (3-5 units). The core and statistics courses must be taken for a letter grade by majors. The minimum grade requirement is "C-". (*Note:* Students who are not declared before Monday, September 21, 2015, may not use STATS 60 to fulfill the statistics requirement.) Statistics may be chosen from courses such as:

BIO 141	Biostatistics	3-5
CS 109	Introduction to Probability for Computer Scientists	3-5
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	5
EDUC 200C	Introduction to Statistical Methods in Education	3-4
HUMBIO 85A	Essential Statistics for Human Biology	4
HUMBIO 88	Introduction to Statistics for the Health Sciences	4

HUMBIO 89	Statistics in the Health Sciences	3
SOC 181B	Sociological Methods: Statistics	5

- c. Internship: HUMBIO 197 Human Biology Internship, 4 units, a mentored non-classroom project, is graded satisfactory/no credit only.
- Foundation Courses: 20-unit minimum. Total units vary, depending on the focus of study chosen by the student for the area of concentration. They may include introductory-level courses from across the University and lab courses. The minimum grade requirement for foundation courses is 'C-.'
  - Area of Concentration: a minimum of five courses totaling at least 20 units. This in-depth area of study enables the student to focus on educational and post-baccalaureate goals. Courses are non-introductory, theory-based, and are usually numbered over 100. Three or more departments must be represented in the concentration. Each course must be taken for a minimum of 3 units. The area of concentration is individually designed by the student in consultation with the student advisers and faculty adviser. Final approval of the concentration rests with the student advisers and faculty adviser. All area of concentration courses must be taken for a letter grade. The minimum grade requirement for area of concentration courses is 'C-'. The area of concentration generally has an emphasis in one, and sometimes more than one, of the following eight areas:

#### Area 1: Environment and Environmental Policy

- Environment
- Environmental Policy
- Culture/Demography/Human Ecology

#### Area 2: Health and Health Policy

- Health Policy
- Public Health
- International Health

#### Area 3: Human Performance

#### Area 4: Human Development

- Biological Development
- Psychological Development
- Education

#### Area 5: Biomedical Science

- Genetics
- Molecular Biology
- Human Physiology
- Infectious Diseases

#### Area 6: Brain and Behavior

#### Area 7: Ethics and Medical Humanities

#### Area 8: Evolution

A non-exclusive list of possible courses for each emphasis is available at the student advisers' office or at the Area of Concentration Course List (<https://humbio.stanford.edu/courses/aoc>) web site.

- Upper-Division Courses: students must take three Human Biology upper-division courses numbered 100 to 189. These courses should be used to explore subjects outside the area of concentration. One upper-division course may be taken satisfactory/no credit. Each course must be taken for a minimum of 3 units. Minimum grade

requirement for Upper Division courses is "C-". All non-laboratory advanced HUMBIO courses (those numbered 100 to 189) fulfill the Human Biology upper-division requirement. A list of Human Biology overseas courses can be found at the Related Courses (<http://www.stanford.edu/dept/humbio/cgi-bin/?q=node/1382>) web site.

## Human Biology Core

Required core sequences (HUMBIO 2A Genetics, Evolution, and Ecology, HUMBIO 2B Culture, Evolution, and Society, HUMBIO 3A Cell and Developmental Biology, HUMBIO 3B Behavior, Health, and Development, and HUMBIO 4A The Human Organism, HUMBIO 4B Environmental and Health Policy Analysis) introduce the biological and social sciences, and most importantly, relationships between the two. Classes meet throughout the academic year. Students must register concurrently for the A and B series. Students should initiate the core in Autumn Quarter of the sophomore year. Freshmen are not permitted to enroll. Majors must earn a minimum letter grade of 'C-' in core courses. The Human Biology core consists of the following courses:

		Units
HUMBIO 2A	Genetics, Evolution, and Ecology	5
HUMBIO 2B	Culture, Evolution, and Society	5
HUMBIO 3A	Cell and Developmental Biology	5
HUMBIO 3B	Behavior, Health, and Development	5
HUMBIO 4A	The Human Organism	5
HUMBIO 4B	Environmental and Health Policy Analysis	5

## Honors Program

The honors program in Human Biology provides qualified majors the opportunity to work closely with faculty on an individual research project, culminating in an honors thesis. Students may begin honors research from a number of starting points including topics introduced in the core or upper-division courses; independent interests stemming from an internship experience; or collaborating with faculty from the natural, social, or behavioral sciences.

Students may apply to the honors program if they have completed the Human Biology core with a minimum GPA of 3.0, have an overall Stanford GPA of 3.2, and meet other requirements detailed in the honors handbook. Interested students should consult the Human Biology Honors Handbook (<https://humbio.stanford.edu/node/152>) and meet with the Human Biology Associate Director or student services officer.

Most honors projects involve a total of 10-15 units of course work in HUMBIO 193 and 194:

		Units
HUMBIO 193	Research in Human Biology	1-5
HUMBIO 194	Honors	1-10

Admission to the honors program is by submission of an intention to undertake honors research in early February, followed by the application in early March of the junior year. Students planning to undertake honors begin research or preparation as early as completion of the sophomore year.

The honors thesis is normally completed by the middle of Spring Quarter of the senior year. Honors students then present summaries of their research at the Human Biology Honors Poster Symposium in May.

Human Biology also holds a Summer Honors College just prior to Autumn Quarter each year for students who have applied to the honors program. Students apply to Summer Honors College in April of the junior year. For applications, contact the program office.

## Minor in Human Biology

A minor in Human Biology provides an introductory background to the relationship between the biological and social aspects of humanity's origin, development, and prospects. Many of the major problems facing human civilization today involve both biological and social aspects. Scientific approaches to these problems are essential, but they must be broadly conceived, integrating what is known of the biological with an understanding of the social and cultural setting in which they exist. Students with a minor in Human Biology are expected to develop a strong background in the integration between the biological and social aspects of human beings.

Students declaring a minor in Human Biology must do so no later than two quarters prior to their intended quarter of degree conferral (for example, a student must declare a minor before the end of Autumn Quarter to graduate the following Spring Quarter).

To minor in Human Biology, students must take the Human Biology Core:

- HUMBIO 2A Genetics, Evolution, and Ecology
- HUMBIO 2B Culture, Evolution, and Society
- HUMBIO 3A Cell and Developmental Biology
- HUMBIO 3B Behavior, Health, and Development
- HUMBIO 4A The Human Organism
- HUMBIO 4B Environmental and Health Policy Analysis
- and one additional upper-division course (for example, any HUMBIO course numbered 100-189).

The student must earn a minimum letter grade of 'C'. Courses that count towards the fulfillment of major requirements may not be counted towards the minor.

*Emeriti:* (Professors) Doug Brutlag (Biochemistry), Sanford Dornbusch (Sociology), Stanley Falkow (Microbiology/Immunology), A. Dale Kaiser (Biochemistry), Herant Katchadourian (Human Biology), Donald Kennedy (Biology), Ellen FitzSimmons Porzig (Developmental Biology), Carol Winograd (Medicine)

*Director:* Paul Fisher (Neurology)

*Associate Director:* Katherine Preston

*Professors:* Laurence Baker (Health Research and Policy), Ben Barres (Neurobiology), Donna Bouley (Comparative Medicine), William H. Durham (Anthropology), Heidi Feldman (Pediatrics: Neonatology), Russell D. Fernald (Biology), Paul Fisher (Neurology), Margaret Fuller (Developmental Biology), Garry Gold (Rad/Musculoskeletal Imaging), Lawrence H. Goulder (Economics), James J. Gross (Psychology), H. Craig Heller (Biology), Jill Helms (Surgery), Richard Klein (Anthropology), Tanya Luhrmann (Anthropology), Yvonne Maldonado (Pediatrics: Infectious Diseases), Michael Marmor (Ophthalmology), Gordon Matheson (Orthopaedic Surgery), Roeland Nusse (Developmental Biology), Julie Parsonnet (Medicine: Infectious Diseases), Allan Reiss (Interdisciplinary Brain Science Research), Thomas Robinson (Pediatrics), Robert Sapolsky (Biology), Walter Scheidel (Classics), Randall Stafford (Stanford Prevention Research Center), William Talbot (Developmental Biology), Shripad Tuljapurkar (Biology), Jeffrey Wine (Psychology), Paul Wise (Pediatrics)

*Associate Professors:* M. Kate Bundorf (Health Research and Policy), Firdaus Dhabhar (Psychiatry and Behavioral Sciences), Anne Fernald (Psychology), Brenda Golianu (Anesthesia), Joachim Hallmayer (Psychiatry and Behavioral Sciences - Child and Adolescent Psychiatry and Child Development), James Jones (Anthropology), Peter Kao (Med/Pulmonary and Critical Care Medicine), Norman G. Miller (Medicine/PCOR), Rob Reich (Political Science), John Rick (Anthropology), Matthew Smith (German)

*Assistant Professors:* Sanjay Basu (Medicine: Stanford Prevention Research Center), Eran Bendavid (General Internal Medicine), Jorah Dannenberg, (Philosophy), Jeremy Goldhaber-Fiebert (Medicine/PCOR), Alvan Ikoku (Comparative Literature), Michelle Monje-Deisseroth (Neurology), Jelena Obradovic (Education), Jamie Zeitzer (Psychiatry and Behavioral Sciences)

*Professor (Research):* Christopher Gardner (Stanford Prevention Research Center), David Lyons (Psychiatry and Behavioral Sciences), Marcia Stefanick (Stanford Prevention Research Center)

*Associate Professors (Research):* Karen Parker (Psychiatry and Behavioral Sciences)

*Professors (Teaching):* Donald Barr (Pediatrics), David Magnus (Pediatrics/SCBE), Robert Siegel (Microbiology and Immunology)

*Associate Professors (Teaching):* Catherine Heaney (Psychology), Lianne Kurina (Med/General Internal Medicine), Eunice Rodriguez (Pediatrics), Kristin Sainani (Health Research and Policy – Epidemiology)

*Clinical Associate Professors:* Mary Therese Jacobson (Obstetrics and Gynecology)

*Clinical Assistant Professors:* Cynthia Nguyen (Psychiatry and Behavioral Sciences), Rita Popat (Health Research and Policy, Epidemiology)

*Senior Research Scholar:* Wesley F. Alles (Med/HIP/BeWell)

*Other Teaching Faculty and Staff:* William Abrams, Maya Adam (Pediatrics - Infectious Diseases), Judy Chu, Sophia Colamarino (Psychiatry and Behavioral Sciences), Anne Firth-Murray, Anne Friedlander, Ronald Garcia (Center for Excellence), Renu Heller (Biology), Lisa Medoff, Joe Nation (Public Policy), Katherine Preston, Lisa Goldman Rosas (Medicine: Stanford Prevention Research Center), Annette Salmeen, Darwin Scott Smith (Microbiology and Immunology), Rebecca Shultz (Orthopaedic Surgery - Sports Medicine), Jennifer Wolf (Graduate School of Education), Nathan Wolfe

*Course Associates:* Anne Marie Barber, Rachel Bent, Michael Levy, Charlotte Martin, Veronica Patterson, Julia Quintero, Amy Ransohoff, Estevan Santiago

*Honors Chair:* Katherine Preston

## Overseas Studies Courses in Human Biology

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPAUSTL 10	Coral Reef Ecosystems	3
OSPAUSTL 25	Freshwater Systems	3
OSPAUSTL 30	Coastal Forest Ecosystems	3
OSPCPTWN 43	Public and Community Health in Sub-Saharan Africa	4
OSPCPTWN 63	Socio-Ecological Systems	3
OSPCPTWN 64	Behavior Change for Promoting Health	4

OSPFLOR 85	Bioethics: the Biotechnological Revolution, Human Rights and Politics in the Global Era	4
OSPMADRD 57	Health Care: A Contrastive Analysis between Spain and the U.S.	4
OSPMADRD 72	Issues in Bioethics Across Cultures	4
OSPOXFRD 27	Medical Ethics through Literature and Film	4
OSPPARIS 51	Development and Education of Young Children	4
OSPPARIS 83	The Cancer Problem: Causes, Treatment, and Prevention	4-5
OSPPARIS 88	Principles of Biochemistry	3
OSPPARIS 153X	Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time	5

## Iberian and Latin American Cultures

Courses offered by the Department of Iberian and Latin American Cultures, formerly the Department of Spanish and Portuguese, are listed under the subject code ILAC on the Stanford Bulletin's ExploreCourses web site. For courses in Catalan, Portuguese, and Spanish language instruction with the subject codes CATLANG, PORTLANG and SPANLANG, see the "Language Center (<http://www.stanford.edu/dept/registrar/bulletin/5966.htm>)" section of this bulletin.

The Language Center offers a series of second- and third-year courses designed for students who grew up in homes where Spanish is spoken (heritage speakers) and who wish to develop their existing linguistic strengths. See the "Language Center (<http://www.stanford.edu/dept/registrar/bulletin/5966.htm>)" section of this bulletin.

The department is a part of the Division of Literatures, Cultures, and Languages (p. 416).

## Mission of the Undergraduate Program in Iberian and Latin American Cultures

Studying Iberian and Latin American cultures at Stanford means engaging in a deep and compelling exploration of the languages, literatures, and cultures of the Iberian Peninsula, Latin America (including Brazil), and Latina/o populations of the United States. To achieve our goal of training students as experts in these areas, we balance an emphasis on literary studies with philosophical, historical, and social approaches to cultural issues. As a result of our focus on critical thinking, open discussion, and close textual analysis, our undergraduate majors provide excellent preparation for a large number of professional fields, including business, education, international relations, law, and medicine. Our graduate program provides rigorous and highly individualized advanced training in the analysis of Iberian, Latin American (including Brazil), and Latina/o literatures, and our students go on to produce innovative original research and find excellent jobs, both in academe and beyond.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. oral proficiency in Catalan, Portuguese, and/or Spanish beyond the interpersonal level with presentational language abilities;
2. close reading skills of authentic texts in Catalan Portuguese, and/or Spanish;
3. writing proficiency in Catalan, Portuguese, and/or Spanish beyond the interpersonal level with presentational language abilities.

## Bachelor of Arts in Iberian and Latin American Cultures

In this major, students engage in a thoroughly transnational and cross-linguistic study of Iberian and Latin American (including Brazil) literatures and cultures. Courses emphasize critical thinking and close textual analysis, with an emphasis on the deep and often understudied intersections between literature written in Catalan, Portuguese, and Spanish from the medieval period to the present day.

## Bachelor of Arts in Spanish

This undergraduate program is designed for students who want to move towards fluency in reading, listening, speaking, and writing Spanish while developing a contextualized understanding of the language through linguistic and cultural study. This degree emphasizes critical use of the Spanish language in a global perspective.

## Learning Outcomes (Graduate)

The purpose of the terminal M.A. program in Iberian and Latin American Cultures is for students to develop further the knowledge and skills acquired as undergraduates, and to prepare students for a professional career or doctoral studies. This is achieved through the completion of graduate courses in the student's major area of interest as well as in related areas.

The Ph.D. in Iberian and Latin American Cultures is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis with respect to the areas and traditions taught by the department. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to develop innovative research and to present the results of this research to the world in compelling ways.

## Bachelor of Arts in Iberian and Latin American Cultures

This program is designed for students who wish to engage in a transitional and cross-linguistic study of Iberian and Latin American literatures and cultures. Courses emphasize critical thinking and close textual analysis, with an emphasis on the deep and often understudied intersections between literature written in Catalan, Portuguese, and Spanish from the medieval period to the present day. B.A. Iberian and Latin American Cultures appears on the official transcript and on the diploma. The major in Iberian and Latin American Cultures required 60 units of coursework. Courses cannot be duplicated for two degrees. All courses must be taken for a letter grade.

## Prerequisites

For all ILAC courses taught in Spanish, students must have successfully completed SPANLANG 102 Composition and Writing Workshop or successfully tested above this level through the Language Center. One course above 100 and one core course, or consent of the instructor, are prerequisites for 200-level courses.

## Declaring the Major

Students declare the major in Iberian and Latin American Cultures through Axess. Students should meet with the Chair of Undergraduate Studies to discuss appropriate courses and options within the major, and to plan the course of study. Majors are also urged to attend department events such as public talks and conferences.

## Double Majors

The major in ILAC is designed to combine with a second major in another field and with study abroad. Students should be aware, however, that

university policy prevents one course from counting for both degree programs.

## General Course Requirements

Students must complete a total of 60 units for the major. The first four requirements listed below are considered core requirements and must be taken at Stanford University.

1. A Writing in the Major (WIM) course: 5 units are required, and this is a prerequisite for every course in the major; however, concurrent enrollment is allowed.

ILAC 201	Modern Spanish Theater	3-5
----------	------------------------	-----

1. Core courses in literature. All three courses must be completed

ILAC 136	Modern Iberian Literatures	3-5
----------	----------------------------	-----

ILAC 157	Medieval and Early Modern Iberian Literatures (WIM 2015-2016)	3-5
----------	---	-----

ILAC 161	Modern Latin American Literature	3-5
----------	----------------------------------	-----

2. Core courses in culture, history, and civilization. Choose at least one.

ILAC 130	Introduction to Iberia: Cultural Perspectives	3-5
----------	---	-----

ILAC 131	Introduction to Latin America: Cultural Perspectives	3-5
----------	--	-----

3. Senior Seminar. Students must take one of the following:

4. ILAC 278	Senior Seminar: Don Quijote	3-5
-------------	-----------------------------	-----

5. Elective Courses. Elective courses can be taken within the following parameters:

- Up to 15 units of language courses (not including conversational courses) in Spanish, Portuguese, or Catalan.
- Additional 100- or 200- level ILAC literature courses.
- Up to 15 units of pre-approved coursework from Stanford Study Abroad programs in Barcelona, Madrid, or Santiago. A course taught abroad by a core member of the ILAC faculty does not count against this limit.
- Up to 5 units of pre-approved coursework from outside ILAC
- Up to 10 units of Thinking Matters courses taught at least partially by an ILAC faculty member
- Up to 10 units of coursework in Structured Liberal Education (SLE).

6. In addition to course requirements for the major, students must also take an Oral Proficiency Interview (OPI) in Catalan, Portuguese, or Spanish through the Language Center two quarters prior to degree conferral.

## Bachelor of Arts in Spanish

This program is designed for students who want to move towards fluency in reading, listening, speaking, and writing Spanish while developing a contextualized understanding of the language through linguistic and cultural study. This degree emphasizes critical use of the language in a global perspective. "B.A. Spanish" appears on the official transcript and on the diploma. The major in Spanish requires 60 units of coursework. All coursework must be done in Spanish. If a class is taught in a language other than Spanish, then written work (e.g. final papers) must be completed in Spanish. Courses cannot be duplicated for two degrees. All courses must be taken for a letter grade.

## Prerequisites

Students must be at or above the level of SPANLANG 13 or successfully tested above this level through the Language Center.

## Declaring the Major

Students declare the major in Spanish through Axess. Students should meet with the Chair of Undergraduate Studies to discuss appropriate courses and options within the major, and to plan the course of study. Majors are also urged to attend department events such as public talks and conferences.

## Double Majors

The Spanish major is designed to combine with a second major in another field and with study abroad. Students should be aware, however, that university policy prevents one course from counting for both degree programs.

## General Course Requirements

Students must complete a total of 60 units for the major. The first five requirements listed below are core requirements and must be taken at Stanford University.

1. A Writing in the Major (WIM) course. 5 units are required. This is a prerequisite for every course in the major; however, concurrent enrollment is allowed.

ILAC 201	Modern Spanish Theater	3-5
----------	------------------------	-----

2. Core courses in culture, history, and civilization. Choose at least one.

		<b>Units</b>
--	--	--------------

ILAC 130	Introduction to Iberia: Cultural Perspectives	3-5
----------	---	-----

ILAC 131	Introduction to Latin America: Cultural Perspectives	3-5
----------	--	-----

3. Senior Seminar

		<b>Units</b>
ILAC 277	Spanish and Society: Rock en Español	3-5

4. Elective Courses. Elective courses can be taken within the following parameters:

- Additional 100- or 200-level ILAC courses.
- Up to 15 units of pre-approved coursework from Stanford study abroad programs in Barcelona, Madrid, or Santiago. A course abroad taught by a core member of the ILAC faculty does not count against this limit.
- Up to 5 units of pre-approved coursework from outside ILAC.
- Up to three courses of SPANLANG at the second year level or above.

5. In addition to the course requirements listed above, all majors must test their proficiency in Spanish through the Language Center by winter quarter of their senior year. Students must receive a notation of at least "Advanced Mid" to be deemed adequately proficient. Those needing outside tutoring will be advised to do so (resources available through the CTL and ILAC). The proficiency examination will consist of both an oral interview and a writing proficiency test.

## Honors Program

ILAC majors and Spanish majors with an overall grade point average (GPA) of 3.3 or above, and who maintain a 3.5 (GPA) in major courses, are eligible to participate in the DLCL's honors program. Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty, in their junior year, preferably by March

1, but no later than May 1. During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL Honors application and an outline of planned course work for their senior year.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40-90 pages not including bibliography and notes. Please consult the DLCL Honors Handbook for more details on declaring and completing the honors thesis.

Honors students are encouraged to participate in the honors college hosted by Bing Honors College ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/OO\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/OO_honors_BingHonors.html)) and coordinated by the Division of Literatures, Cultures, and Languages. The honors college is offered at the end of the summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted through the Bing program. For more information, view the Bing Honors ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/OO\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/OO_honors_BingHonors.html)) website.

Enrollment: A minimum of 10 units total, described below, and a completed thesis is required. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15th of the terminal year. If an essay is found deserving of a grade of 'A' or better by the thesis adviser, honors are granted at the time of graduation.

- Spring Quarter of the junior year (optional) DLCL 189C Honors Thesis Seminar (2-4 units S/NC) under the primary thesis adviser. Drafting or revision of the thesis proposal. The proposal is reviewed by the Chair of Undergraduate Studies and the Director of the department and will be approved or returned for submission.
- Autumn Quarter of the senior year (required) DLCL 189A Honors Thesis Seminar (4 units S/NC) taught by a DLCL appointed faculty member. Course will focus on researching and writing the honors thesis.
- Winter Quarter of the senior year (required) DLCL 189B Honors Thesis Seminar (2-4 units Letter grade) under the primary thesis adviser. Focus will be on writing writing under guidance of primary adviser. The letter grade will determine if honors is granted or not.
- Spring Quarter of the senior year (option; mandatory if not taken during junior year) DLCL 189C Honors Thesis Seminar (2-4 units S/NC) under the primary thesis adviser. Honors essays are due to the thesis adviser and Student Service Officer no later than 5:00 p.m. on May 15th of the terminal year.
- Spring Quarter of the senior year (required) DLCL 199 Honors Thesis Oral Presentation (1 unit S/NC). Enroll with primary thesis adviser.

## Joint Major Programs: ILAC and Computer Science & Spanish and Computer Science

The joint major program (JMP), authorized by the Academic Senate for a pilot period of six years beginning in 2014-15, permits students to major in both Computer Science and one of ten Humanities majors. See the "Joint Major Program (p. 26)" section of this bulletin for a description of University requirements for the JMP. See also the Undergraduate Advising and Research JMP web site and its associated FAQs.

Students completing the JMP receive a B.A.S. (Bachelor of Arts and Science).

Because the JMP is new and experimental, changes to procedures may occur; students are advised to check the relevant section of the bulletin periodically.

### Declaring a Joint Major Program

To declare the joint major, students must first declare each major through Axess, and then submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>) The Major-Minor and Multiple Major Course Approval Form ([http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin\\_MultMaj.pdf](http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin_MultMaj.pdf)) is required for graduation for students with a joint major.

### Dropping a Joint Major Program

To drop the joint major, students must submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>). Students may also consult the Student Services Center (<http://studentservicescenter.stanford.edu>) with questions concerning dropping the joint major.

### Transcript and Diploma

Students completing a joint major graduate with a B.A.S. degree. The two majors are identified on one diploma separated by a hyphen. There will be a notation indicating that the student has completed a "Joint Major". The two majors are identified on the transcript with a notation indicating that the student has completed a "Joint Major".

## Iberian and Latin American Studies Major Requirements in the Joint Major Program

See the "Computer Science Joint Major Progra (p. 231)m" section of this bulletin for details on Computer Science requirements.

This program is designed for students who wish to engage in a transitional and cross-linguistic study of Iberian and Latin American literatures and cultures. Courses emphasize critical thinking and close textual analysis, with an emphasis on the deep and often understudied intersections between literature written in Catalan, Portuguese, and Spanish from the medieval period to the present day. B.A. Iberian and Latin American Cultures appears on the official transcript and on the diploma. The major in Iberian and Latin American Cultures required 50 units of coursework. Courses cannot be duplicated for two degrees. All courses must be taken for a letter grade.

### Prerequisites

For all ILAC courses taught in Spanish, students must have successfully completed SPANLANG 102 Composition and Writing Workshop tested above this level through the Language Center. One course above 100 and one core course, or consent of the instructor, are prerequisites for 200-level courses.

### Requirements

Students must complete a total of 50 units for the major. The first four requirements listed below are considered core requirements and must be taken at Stanford University.

1. A Writing in the Major (WIM) course: 5 units are required, and this is a prerequisite for every course in the major; however, concurrent enrollment is allowed.

ILAC 157	Medieval and Early Modern Iberian Literatures (WIM 2015-2016)	Units 3-5
----------	---	--------------

2. Core courses in literature. All three courses must be completed

ILAC 136	Modern Iberian Literatures	Units 3-5
----------	----------------------------	--------------

ILAC 157	Medieval and Early Modern Iberian Literatures (WIM 2015-16)	3-5
ILAC 161	Modern Latin American Literature	3-5

3. Core courses in culture, history, and civilization. Choose at least one.

ILAC 130	Introduction to Iberia: Cultural Perspectives	3-5
ILAC 131	Introduction to Latin America: Cultural Perspectives	3-5

4. Senior Seminar. Students must take one of the following:

ILAC 278	Senior Seminar: Don Quijote	3-5
----------	-----------------------------	-----

5. *Capstone Project*: Senior year, the student enrolls in a 2-unit DLCL 299 with a DLCL faculty member. The faculty member advising this project must sign off on this description. In order to have it approved as their capstone Computer Science and ILAC project must be written in proficient Spanish, Portuguese, or Catalan. The student must submit a description of the project to the Chair of Undergraduate Studies in ILAC by May 15 of the junior year or no later than October 1 of the senior year.

6. Elective Courses. Elective courses can be taken within the following parameters:

- Up to 15 units of language courses (not including conversational courses) in Spanish, Portuguese, or Catalan.
- Additional 100- or 200- level ILAC literature courses.
- Up to 15 units of pre-approved course work from Stanford Study Abroad programs in Barcelona, Madrid, or Santiago. A course taught abroad by a core member of the ILAC faculty does not count against this limit.
- Up to 5 units of pre-approved course work from outside ILAC
- Up to 10 units of Thinking Matters courses taught at least partially by an ILAC faculty member
- Up to 10 units of course work in Structured Liberal Education (SLE).

7. In addition to course requirements for the major, students must also take an Oral Proficiency Interview (OPI) in Catalan, Portuguese, or Spanish through the Language Center two quarters prior to degree conferral.

## Spanish Major Requirements in the Joint Major Program

See the "Computer Science Joint Major Program (p. 231)" section of this bulletin for details on Computer Science requirements.

This program is designed for students who want to move towards fluency in reading, listening, speaking, and writing Spanish while developing a contextualized understanding of the language through linguistic and cultural study. This degree emphasizes critical use of the language in a global perspective. All course work must be done in Spanish. If a class is taught in a language other than Spanish, then written work (such as final papers) must be completed in Spanish. Courses cannot be duplicated for two degrees. All courses must be taken for a letter grade.

### Prerequisites

Students must be at or above the level of SPANLANG 13 or tested above this level through the Language Center.

## Requirements

Students must complete a total of 50 units for the major. The first five requirements listed below are core requirements and must be taken at Stanford University.

**Units** A Writing in the Major (WIM) course. 5 units are required. This is a prerequisite for every course in the major; however, concurrent enrollment is allowed.

ILAC 157	Medieval and Early Modern Iberian Literatures (WIM 2015-2016)	3-5	<b>Units</b>
----------	---	-----	--------------

2. Core courses in culture, history, and civilization. Choose at least one.

ILAC 130	Introduction to Iberia: Cultural Perspectives	3-5	<b>Units</b>
ILAC 131	Introduction to Latin America: Cultural Perspectives	3-5	

3. Senior Seminar

ILAC 277	Spanish and Society: Rock en Español	3-5	<b>Units</b>
----------	--------------------------------------	-----	--------------

*Capstone Project*: Senior year, the student enrolls in a 2-unit independent study DLCL 299 with a DLCL faculty member. The faculty member advising this project must sign off on this description. In order to have it approved as their capstone Spanish and Computer Science project must be written in proficient Spanish. The student must submit a description of the project to the Chair of Undergraduate Studies in ILAC by May 15 of the junior year or no later than October 1 of the senior year.

4. Elective Courses. Elective courses can be taken within the following parameters:

- Additional 100- or 200-level ILAC courses.
- Up to 15 units of pre-approved coursework from Stanford study abroad programs in Barcelona, Madrid, or Santiago. A course abroad taught by a core member of the ILAC faculty does not count against this limit.
- Up to 5 units of pre-approved coursework from outside ILAC.
- Up to three courses of SPANLANG at the second year level or above.

5. In addition to the course requirements listed above, all majors must test their proficiency in Spanish through the Language Center by winter quarter of their senior year. Students must receive a notation of at least "Advanced Mid" to be deemed adequately proficient. Those needing outside tutoring will be advised to do so (resources available through the VPTL and ILAC). The proficiency examination will consist of both an oral interview and a writing proficiency test.

## Minors in Spanish and Portuguese

Both the minor in Portuguese and the minor in Spanish are for students who want to combine acquisition of linguistic competence with the study of the literatures and cultures of the Lusophone or Spanish-speaking worlds. Each minor requires six courses totaling a minimum of 23 units. Each course must be taken for a letter grade.

Up to three courses of second-year Spanish language (for Spanish minor) or Portuguese (for Portuguese minor) or above may count towards the degree, not including conversational, oral communication, business, or medical language courses.

With the approval of the Chair of Undergraduate Studies, Independent Study and the following courses may count towards the degree.

Up to two courses from abroad may apply towards the minor. One or both may be a language course at second-year or above. One may be a literature or culture course listed as authorized by the ILAC department on the BOSP website. (A literature or culture course taught by a core member of the ILAC faculty abroad does not count against this limit.)

One 3-5 unit (5 unit maximum) course on a related topic from another department, Thinking Matters or SLE if taught partially by a member of the ILAC faculty.

AP credit and Transfer credit from other Universities do not count towards this minor.

## Minor in Portuguese

### Required Courses:

1. Two 100- or 200-level courses in literature or culture with a Lusophone component
2. Any additional 100- or 200-level courses in literature and culture to complete the required 23 units and six courses

Units  
23

## Minor in Spanish

### Required Courses:

1. A 100- or 200-level course in ILAC with a significant component of Iberian literature, film, or other cultural texts.
2. A 100- or 200-level course in ILAC with a significant component of Latin American literature, film, or other cultural texts.
3. Any additional 100- or 200-level courses in literature and culture to complete the required 23 units and six courses.

Units  
23

## Master of Arts in Iberian and Latin American Cultures

The purpose of the terminal M.A. program in Iberian and Latin American Cultures is for students to develop further the knowledge or skills acquired as undergraduates, and to prepare students for a professional career or doctoral studies. This is achieved through the completion of graduate courses in the student's major area of interest as well as in related areas. Students in this program may not apply concurrently for entrance to the Ph.D. program.

### Coterminal Master of Arts in Iberian and Latin American Cultures

The coterminal degree program allows undergraduates to study for a master's degree in Iberian and Latin American Cultures while completing their bachelor's degree(s) in ILAC or a different department. The course requirements for the coterminal M.A. are the same as those for the terminal M.A., and students should be aware that University policy prevents one course from counting for both the B.A. and M.A. degrees.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken during or after the first quarter of the sophomore year are eligible for consideration for transfer to the graduate career; the timing of the first graduate quarter is not a factor. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

### Degree Requirements for the Master of Arts in Iberian and Latin American Cultures

Students must complete a minimum of 45 graduate-level units, 36 of which must be taken at Stanford. All 45 units must have a letter grade of 'B' or above. Students enrolled in the terminal M.A. program must file a Program Proposal for a Master's Degree during their first quarter of enrollment. Any changes to the proposal should be reviewed and approved by the Chair of Graduate Studies.

The requirements for the terminal M.A. and coterminal M.A. are:

1. A 200-level or above course in literary or cultural theory
2. Two 200-level or above courses in Latin American (including Brazilian) or Latino/Chicano literature and culture
3. Two 200-level or above courses in Iberian literature and culture
4. One 300-level course in Latin American (including Brazilian) or Latino/Chicano literature and culture
5. One 300-level course in Iberian literature and culture
6. Enrollment in at least two graduate seminars (200- or 300- level) offered in the department each quarter
7. Intermediate-high proficiency in Portuguese or Catalan (equivalent to one year of university study).

Independent study courses (ILAC 299 Individual Work, ILAC 399 Individual Work) and crosslisted courses originating outside the department may not be used to fulfill requirements except by consent of the Chair of Graduate Studies.

## Doctor of Philosophy in Iberian and Latin American Cultures

The Ph.D. in Iberian and Latin American Cultures is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis with respect to the areas and traditions taught by the department. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to develop innovative research and to present the results of this research to the world in compelling ways.

University requirements for the Ph.D. are described in the "Graduate Degrees (p. 45)" section of this bulletin. The requirements of the Ph.D. in Iberian and Latin American Cultures (ILAC) are:

### 1. Course work

A total of 135 units is required for the Ph.D. During each quarter preceding advancement to TGR status, students are required to enroll in and complete at least two graduate courses (200- or 300- level) offered through the Department of Iberian and Latin American Cultures for three units each. Students should make every effort to take a seminar with a core member of the faculty each quarter. Students may take independent study courses (ILAC 299, 399) only during the summer quarter until they achieve TGR status. Any exceptions must be made in consultation with

the ILAC Chair of Graduate Studies and with the relevant faculty member and/or the student's faculty adviser. During the spring quarters of their first three years, students must consult their primary advisor and the Chair of Graduate Studies to plan their course of study for the 10 units to be completed during the summer quarter. Students who transfer graduate units from another institution may adjust the course of study outlined below. See the Graduate Handbook for details.

Doctoral students in the department must take required courses for a letter grade if available and are expected to earn a grade of B+ or better in each course instructed in the DLCL. Any grade of B or below is considered to be less than satisfactory. Grades of B or below are reviewed by faculty and the following actions may be taken: 1) the grade stands and the student's academic performance is monitored to ensure that satisfactory progress is being made; 2) the grade stands and the student is required to revise and resubmit the work associated with the course; or 3) the student may be required to retake the course.

In consultation with the Chair of Graduate Studies, students in their first year choose one major field and two minor areas of study from the following:

- A1. Medieval and Early Modern Iberian Literature and Culture
- A2. Eighteenth- and Nineteenth-Century Iberian Literature and Culture
- A3. Twentieth- and Twenty-First-Century Iberian Literature and Culture
- B1. Colonial to Nineteenth-Century Latin American Literature and Culture
- B2. Twentieth- and Twenty-First-Century Latin American Literature and Culture
- B3. Luso-Brazilian Literature and Culture
- C. US Latin/Chicano Literature and Culture

Students must select one minor area from a group (A, B, C) other than that in which their major area falls. At least four graduate-level courses must be taken in the major area of study. At least two graduate-level courses must be taken in each minor area.

### 1a. First Year

Students must enroll in and complete a minimum of 30 graduate units during their first year of graduate study as well as 10 units during the summer. First year-required coursework:

- A 200-level or above course in literary or cultural theory (Recommended DLCL 369 Introduction to the Profession of "Literary Studies" for Graduate Students)
- Three 200-level or above courses in Latin American (including Brazil) or Latino/Chicano literature and culture
- Three 200-level or above courses in Iberian literature and culture
- Enrollment in and completion of DLCL 301 The Learning and Teaching of Second Languages
- Intermediate-high proficiency in Portuguese or Catalan (equivalent to one year of university study)

### 1b. Second Year

Students must enroll in and complete a minimum of 30 graduate units during their second year of graduate study as well as 10 units during the summer. In addition, second-year students must enroll in and complete at least two graduate seminars (200- or 300- level) offered in the department each quarter.

### 1c. Third Year

Students must enroll in and complete a minimum of 30 graduate units during their third year of graduate study as well as 10 units during the summer. In addition, third-year students must enroll in and complete at

least two graduate seminars (200- or 300- level) offered in the department each quarter.

### 1d. Fourth Year

Students must enroll in and complete 15 units of graduate work during the autumn and winter quarters of their fourth year.

## 2. Language

All students are required to have advanced-high proficiency in English and Spanish by the time they take the comprehensive examination.

In addition, students specializing in Iberian literature and culture must attain intermediate-mid proficiency in Catalan and Portuguese (equivalent to two quarters of university study for each language); for students specializing in Latin American and/or US Latino/Chicano literature and culture, the level of advanced-low proficiency in Portuguese (equivalent to four quarters of university study) must be attained. Alternatively, they may substitute one quarter of Catalan or a Native American language such as Quechua for the fourth quarter in Portuguese. This requirement must be fulfilled before students take the comprehensive examination. Students wishing to satisfy the language requirements in Catalan and/or Portuguese may do so by passing a proficiency exam administered by the Language Center.

## 3. Examinations

All students must pass the following: 1) a Qualifying Exam; 2) a written and oral Comprehensive examination; and 3) a University Oral examination.

### 3a. Qualifying Exam

In the Autumn quarter of their first year, students will receive a digital reader containing 21 secondary texts related to all areas of Iberian and Latin American literature and culture. These texts will serve as the basis for the Qualifying Exam, which will be administered the week after classes begin for the Autumn quarter of the student's second year of study. During the one hour oral examination, students must answer questions in English and/or in Spanish from all active members of the ILAC faculty. Students who fail this examination may request to retake it during the Winter quarter of the same year.

### 3b. Comprehensive examination

This exam consists of two parts: 1) the submission of a written paper; and 2) oral question and answer period. It is designed for students to demonstrate intellectual competence in multiple areas of study. This exam occurs during Spring Quarter of the third year of graduate study, and it must be completed prior to the last day of instruction in that same quarter. Students with transferred credits may take this exam earlier in the third year. Students must select a major and two minor areas for the exam from the following options:

- A1. Medieval and Early Modern Iberian Literature and Culture
- A2. Eighteenth- and Nineteenth-Century Iberian Literature and Culture
- A3. Twentieth- and Twenty-First-Century Iberian Literature and Culture
- B1. Colonial to Nineteenth-Century Latin American Literature and Culture
- B2. Twentieth- and Twenty-First-Century Latin American Literature and Culture
- B3. Luso-Brazilian Literature and Culture
- C. US Latin/Chicano Literature and Culture

Students must select one minor area from a group (A, B, C) other than that in which their major area falls.

The committee for the Comprehensive Exam is formed by asking three ILAC professors to serve on the committee, one for each of the three examination areas chosen by the student. In consultation with each member of the committee, the student must develop a list of twenty-one

themes (seven for each area of study) plus a reading list of 130 texts and critical works (approximately 60 for the major area and 35 for each of the minor areas). In addition, the student will submit a 6,000-word research paper on a topic preferably related to the dissertation. This paper must be written in English. The comprehensive exam reading list and research paper must be presented to committee members and to the Graduate Student Services Coordinator at least two weeks prior to the oral portion of the Comprehensive Exam. The oral exam will be based upon the submitted list and research paper and will last no more than two hours.

### 3c. University Oral examination

Ph.D. candidates in ILAC are required to take a University Oral examination after successfully completing the Comprehensive Examination and before the end of the spring quarter of their fourth year. Students with transferred credits may take this exam earlier in the fourth year. This examination is a defense of the dissertation prospectus. During the examination, the candidate speaks for approximately 20 minutes on the proposed dissertation, the methods to be used in research and the conclusions the candidate expects to reach. Afterward, each member of the committee, in an order established by the Chair of the committee, questions the candidate further. The examination will last no more than two hours.

The University Oral examination committee must be finalized no later than the last week of the quarter during which the student successfully completes the comprehensive examination. The examination committee should include the dissertation adviser and three other members, usually from the Reading Committee, and a Chair from outside the department, for a total of five members. All members must belong to the Academic Council. The adviser and two other members must be ILAC faculty. Once a committee and date are finalized, the student must submit the University Oral Examination form to the Graduate Student Services Coordinator. The members of the Oral Examination committee must receive copies of the dissertation prospectus no later than three weeks prior to the examination.

The dissertation prospectus should consist of 20-25 pages (approximately 7,000 words) and follow the most recent MLA Style guidelines. The dissertation prospectus must contain a title along with the following sections: 1) Statement of Thesis; 2) Statement of Significance and Impact; 3) Brief Literature Review; 4) Outline of Theoretical Framework (i.e., a definition of key terms and concepts); 5) Chapter Outline; 6) Preliminary Biography; 7) Timetable for Completion.

## 4. Teaching

Each Ph.D. candidate must teach a minimum of five quarters of undergraduate courses (three are taught during the second year and the remaining two during the third year). Language course assignments are arranged through the Language Center. In preparation for teaching, Ph.D. candidates are required to take DLCL 301 *The Learning and Teaching of Second Languages* during the Spring quarter of their first year. All students must complete one full year (three quarters) plus an additional quarter during the regular academic year of teaching in the Language Center. Students then may apply to co-teach an ILAC literature or culture course with a core ILAC faculty member or they may choose to teach another course in the Language Center to satisfy the requirement of five quarters of undergraduate teaching. Other additional teaching opportunities may arise, but do not satisfy the teaching requirement.

## 5. Ph.D. Dissertation

The doctoral dissertation should demonstrate the student's ability to carry out original research and to organize and present the results in publishable form. A copy of the completed dissertation must be submitted to each member of the reading committee at least eight weeks before the University filing deadline in the quarter during which the candidate expects to receive the Ph.D. degree. Committee members will

have three weeks to read the dissertation before determining whether to approve or require changes. Ph.D. dissertations must be completed and approved within five years from the date of admission to candidacy. Students taking more than five years must apply for reinstatement of candidacy which is reviewed on a case by case basis.

## Yearly review

The Iberian and Latin American Cultures conducts annual reviews of each student's academic performance at the end of the spring quarter. All students are given feedback from the Chair of Graduate Studies, helping them to identify areas of strength and potential weakness. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. At any point during the degree program, evidence that a student is performing at a less than satisfactory level may be cause for a formal academic review of that student. Possible outcomes of the spring review include: continuation of the student in good standing, or placing the student on probation, with specific guidelines for the period of probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: restoration to good standing; continued probation, with guidelines for necessary remedial steps; or dismissal from the program.

## Candidacy

Admission to candidacy is an important decision grounded in an overall assessment of a student's ability to successfully complete the Ph.D. program. Per University policy, students are expected to complete department qualifying procedures and apply for candidacy by the end of the second year in residence. In reviewing a student for admission to candidacy, the faculty considers a student's academic progress including but not limited to: advanced language proficiency, coursework, performance on the Qualifying Exam, and successful completion of teaching and research assistantships. A student must also have completed at least 3 units of work with each of 4 Stanford faculty members prior to consideration for candidacy. In addition to successful completion of department prerequisites, a student is only admitted to candidacy if the faculty makes the judgment that the student has the potential to successfully complete the requirements of the degree program. Candidacy is determined by faculty vote. Failure to advance to candidacy results in the dismissal of the student from the doctoral program. Candidacy is valid for five years and students are required to maintain active candidacy through conferral of the doctoral degree. All requirements for the degree must be completed before candidacy expires. The Department of Iberian and Latin American Studies conducts regular reviews of each student's academic performance, both prior to and following successful admission to candidacy. Failure to make satisfactory progress to degree may result in dismissal from the doctoral program. Additional information about University candidacy policy is available in the Bulletin (p. ) and GAP (<http://gap.stanford.edu/4-6.html>).

## Ph.D. Minor in Iberian and Latin American Cultures

Stanford Ph.D. students wishing to earn a minor in Iberian and Latin American Cultures must complete 25 units, with a grade point average (GPA) of 3.0 or above, selected from courses numbered 200 or higher.

For more information, students should speak with the ILAC Chair of Graduate Studies. Students in the Ph.D. program in ILAC who choose a minor in another department should consult with advisers in that department.

## Faculty in Iberian and Latin American Cultures

*Emeriti:* (Professors) Bernard Gicovate, Mary Pratt, Michael P. Predmore, Sylvia Wynter (Teaching) María-Paz Haro (Teaching)

*Director:* Lisa Surwillo

*Chair of Graduate Studies:* Marília Librandi Rocha

*Chair of Undergraduate Studies:* Jorge Ruffinelli (Autumn, Winter), Lisa Surwillo (Spring)

*Professors:* Joan Ramon Resina (Comparative Literature, Iberian and Latin American Cultures), Jorge Ruffinelli, Yvonne Yarbrow-Bejarano

*Associate Professors:* Vincent Barletta (Comparative Literature, Iberian and Latin American Cultures), Lisa Surwillo

*Assistant Professors:* Héctor M. Hoyos, Marília Librandi Rocha

*Lecturer:* Ximena Briceño

*Courtesy Professors:* John Fellstiner, Roland Greene, Hans U. Gumbrecht, Ramon Saldivar, James A. Fox, Paula Moya

*Visiting Professor:* Juan Carlos Rulfo (Autumn), Joan Manuel Tresserras Gaju (Autumn)

## Overseas Studies Courses in Iberian and Latin American Cultures

### Study Abroad Programs in Iberian and Latin American Cultures

All majors are encouraged to study abroad. To transfer credits from non-Stanford programs abroad, consult the Bing Overseas Studies Office. Course work taken abroad may be applied toward both our major and minor programs. Students planning to study abroad must consult with the Chair of Undergraduate Studies to coordinate the course work from abroad with their degree program. The maximum number of units is identified in the elective section for each major.

The department and Bechtel International Center maintain information on study abroad programs. Stanford supports the options listed below and credits course work taken in academically sound programs. Students considering different options are encouraged to speak with the Director of the department or the Chair of Undergraduate Studies.

### Stanford in Santiago de Chile and Madrid or Barcelona, Spain

The Bing Overseas Studies Programs in Santiago de Chile and Madrid, Spain require a certain level of proficiency in Spanish. For more information, students should consult the program summary of their interested campus. Course work is primarily in Spanish. Information is available in the "Overseas Studies" section of this bulletin or at the Bing Overseas Studies web site. Internships and research opportunities may be arranged for students staying for two quarters.

For ILAC majors with an interest in Iberian Studies, the department recommends study in Barcelona through the Consortium for Advanced Study in Barcelona (CASB), a consortium of U.S. universities of which Stanford is a participating member. This program combines courses at the program's center with open access to courses at three Barcelona universities: Universitat Pompeu Fabra, University of Barcelona, and Autonomous University of Barcelona. Visiting faculty from Brown, Chicago, Columbia, Cornell, Duke, Harvard, Northwestern, Princeton, and

Stanford complement the offerings of these three major universities. Admission is highly competitive.

The department also recognizes other programs, and students are encouraged to discuss their interests with the Director of the department or with the Chair of Undergraduate Studies.

## Brazil and Portugal

The University maintains a relationship with the State University of Rio de Janeiro in Brazil at the graduate level. Students interested in study in Brazil should contact Professor Marília Librandi Rocha. Students interested in study in Portugal should contact Professor Vincent Barletta.

## Bing Overseas Studies Program

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPMADR 43	The Jacobean Star Way and Europe: Society, Politics and Culture	5
OSPMADR 45	Women in Art: Case Study in the Madrid Museums	4
OSPMADR 46	Drawing with Four Spanish Masters: Goya, Velazquez, Picasso and Dali	3
OSPMADR 61	Society and Cultural Change: The Case of Spain	4
OSPMADR 62	Spanish California: Historical Issues	4
OSPMADR 83	Narrating the Nation: National and Post-National Spanish and Latin American Literature	4
OSPSANTG 14	Women Writers of Latin America in the 20th Century	4-5
OSPSANTG 68	The Emergence of Nations in Latin America	4-5
OSPSANTG 116X	Modernization and its Discontents: Chilean Politics at the Turn of the Century	5
OSPSANTG 118X	Artistic Expression in Latin America	5

## International Policy Studies

Courses offered by the Ford Dorsey Program in International Policy Studies are listed under the subject code IPS on the Stanford Bulletin's ExploreCourses web site (<http://explorecourses.stanford.edu/search;jsessionid=CD85410D8306285785D60502AD7D575F?page=0&q=ips&filter-coursestatus-Active=on&view=timeschedule&collapse=&catalog=71>).

The Ford Dorsey Program in International Policy Studies (IPS), established in 1982, is an interdisciplinary program devoted to rigorous analysis of international policy issues in diplomacy, governance, security, global health, and international economic policy. Its goal is to provide students with exposure to issues they will face in the international arena, and to develop the skills and knowledge to address those issues. The program allows students to specialize in democracy, development, and the rule of law; energy, environment, and natural resources; global health; international political economy; or international security and cooperation.

The IPS program combines a rigorous scholarly focus with practical training designed to prepare students for careers in public service and other settings where they can have an impact on international issues.

The program is designed to integrate perspectives from political science, law, economics, history, and other disciplines, while also incorporating research opportunities and a focus on implementation and administration of solutions addressing global problems.

University requirements for the M.A. degree are described in the "Graduate Degrees (p. 45)" section of this bulletin.

## Learning Outcomes (Graduate)

The purpose of the master's program is to help students develop knowledge and skills in preparation for professional careers in international policy and related fields. This is achieved through completion of required courses in the global, quantitative, and skills core, as well as courses in an area of concentration and the capstone practicum course. Students are also encouraged to gain experience through a summer internship and research skills through assistantships with Stanford faculty.

## Admission

To apply or for information on graduate admission, see the Office of Graduate Admissions (<http://studentaffairs.stanford.edu/gradadmissions>) website. Applications for admission in Autumn Quarter must be filed with supporting credentials by January 5, 2016.

## Language Requirement

In order to earn the M.A. degree in International Policy Studies, students must be proficient in a foreign language. Foreign language proficiency can be demonstrated by:

- Completion of three years of university-level coursework in a foreign language (verified by a transcript)
- Passing an oral and written proficiency exam at Stanford prior to graduation
- Status as a non-native English speaker

## Prerequisite Course Work

The IPS program requires the completion of five prerequisite courses prior to matriculation. These are microeconomics, macroeconomics, statistics, international trade and international finance. International trade and international finance are often covered in a single international economics course. Prerequisite courses may be taken at community colleges, at four-year institutions, or through online courses, and must be taken for a letter grade. Proof of completion, which is usually verified by a transcript, is required. Stanford courses satisfying these requirements are:

### Microeconomics and Macroeconomics

ECON 51	Economic Analysis II
ECON 52	Economic Analysis III
International Finance and International Trade	
ECON 166	International Trade
ECON 165 (not offered this year) also counts toward this requirement	

## Application Materials

In addition to the web-based application, applicants must submit the following materials:

- Statement of purpose on relevant personal, academic, and career plans and goals
- Official transcripts (two hard copies, which are mailed to the IPS program office, and one copy electronically uploaded to the online application)

- Stanford students, and alumni with an active SUNet ID and password, may request an official eTranscript to be sent from Stanford University and automatically deposited into the application; in this case, hard copies are not required..

- Three letters of recommendation
- Graduate Record Examination (GRE) scores
- Academic writing sample (written in English, 7-15 pages in length, and double-spaced)
- Resume or curriculum vitae
- TOEFL scores (only required of applicants who are non-native English speakers and who did not attend undergraduate institutions where English is the language of instruction; please see Graduate Admissions (<http://studentaffairs.stanford.edu/gradadmissions/faq-gre-toefl>) for additional information)

Applicants are expected to have a B.A. or B.S. degree from an accredited school.

## Master of Arts in International Policy Studies (IPS)

University requirements for the master's degree are described in the "Graduate Degrees (p. 45)" section of this bulletin.

## Degree Requirements

To earn the M.A. degree in International Policy Studies, students must complete the courses listed in the curriculum below. These requirements include:

- The IPS Director's Seminar
- Four courses in the quantitative core
- Four courses in the skills core
- Six or more courses in the area of concentration, including the gateway course
- The practicum or master's thesis

The minimum number of units required to graduate is 73.

During the first year of the program, students must complete required coursework in statistics, econometrics, international economics, advanced economics, international relations theory, policy writing, and an introductory (gateway) course in the area of concentration. During the second year of the program, students are required to complete either the practicum or master's thesis during Autumn and Winter Quarters. Only students with two or more years of relevant policy work may petition to write a master's thesis.

### Units

### Curriculum

		Units
<b>Global Core</b>		
Director's Seminar (*):		1
IPS 300	Issues in International Policy Studies	
<b>Quantitative Core</b>		
Statistics Course (*):		5
Note: POLISCI 350A is an advanced-level course that requires approval from professor of course and IPS Faculty Director; in some years course may not be available to IPS students		
IPS 205	Introductory Statistics for Policy	
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	
POLISCI 350A	Political Methodology I: Regression	
Econometrics Course - Select one of the following (*):		5

Note: POLISCI 350B is an advanced-level course that requires approval from professor of course and IPS Faculty Director; in some years course may not be available to IPS students

IPS 206	Applied Statistics for Policy	
ECON 102B	Applied Econometrics	
POLISCI 350B	Political Methodology II: Causal Inference	
International Economics Course - Select one of the following (*):		5
IPS 202	Topics in International Macroeconomics	
IPS 203	Issues in International Economics	
Advanced Economics Course - Select one of the following:		4-5
IPS 202	Topics in International Macroeconomics	
IPS 203	Issues in International Economics	
IPS 204A	Microeconomics	
IPS 204B	Economic Policy Analysis for Policymakers	

#### Skills Core

Policy Writing - Select one of the following (*):		5
IPS 210	The Politics of International Humanitarian Action	
IPS 211	The Transition from War to Peace: Peacebuilding Strategies	
IPS 213	International Mediation and Civil Wars	
IPS 244	U.S. Policy toward Northeast Asia	
IPS 264	Behind the Headlines: An Introduction to US Foreign Policy in South and East Asia	
IPS 270	The Geopolitics of Energy	
IPS 316S	Decision Making in U.S. Foreign Policy	

Justice - Select one of the following:		4-5
IPS 208	Justice	
IPS 208A	International Justice	
POLISCI 336	Introduction to Global Justice	

Decision Making - Select one of the following:		4
ECON 137	Decision Modeling and Information	
ENVRES 380	Collaborating with the Future: Launching Large Scale Sustainable Transformations	
GSBGEN 646	Behavioral Decision Making	
IPS 207A	Problem Solving and Decision Making for Public Policy and Social Change	
IPS 207B	Public Policy and Social Psychology: Implications and Applications	
MS&E 152	Introduction to Decision Analysis	
MS&E 252	Decision Analysis I: Foundations of Decision Analysis	
POLISCI 352	Introduction to Game Theoretic Methods in Political Science	

Skills Elective - Select one of the skills electives listed below. The skills elective may also be fulfilled by completing an additional elective in the student's area of concentration, an additional policy writing course, an additional quantitative course, or a pre-approved course in one of the four other areas of concentration (see "Related Courses" tab):

CEE 251	Negotiation	
ENGR 103	Public Speaking	
FINANCE 221	Finance for Non-MBAs	
GSBGEN 315	Strategic Communication	
IPS 204B	Economic Policy Analysis for Policymakers	
LAW 615	Negotiation	
LAW 650	Advanced Negotiation: Public Policy	
ME 377	Design Thinking Studio: Experiences in Innovation and Design	
STRAMGT 323	DESIGN THINKING GLOBAL ORGS	

**Area of Concentration: Gateway and elective courses:** 29

**Capstone**  
Select one to be completed during Autumn and Winter quarters of the second year: 8

IPS 209	Practicum
IPS 209A	IPS Master's Thesis

\* indicates courses which must be completed during the first year of the program

Total Units 73-77

#### Area of Concentration Curriculum

Students are required to choose one area of concentration from the list below and complete at least six courses within the concentration for a minimum of 29 total units. Each area of concentration has a gateway course, which must be taken during the first year and prior to enrolling in subsequent courses. Additionally, each area of concentration has a list of approved elective courses, which can be found under the 'Related Courses (p. 520)' tab of this page. Courses not listed under the 'Related Courses (p. 520)' tab have not been approved and need to be petitioned. Petitions are reviewed by the IPS Faculty Director. The petition form (<http://ips.stanford.edu/resources>) can be found on the IPS website.

#### Area of Concentration Requirements:

- Students must select an area of concentration during the first year of the program.
- Students must complete a minimum of six courses within the area of concentration, including the gateway course, for a minimum total of 29 units.
  - The gateway course counts towards the six courses within the area of concentration.
  - Each of the six courses must be taken for a minimum of three units.
  - Additional one or two-unit courses may be applied to the concentration in order to reach the minimum of 29 units
  - One-unit courses must be petitioned since they are generally only offered as C/NC.
- All coursework must be taken for a letter grade.
- Students concentrating in International Political Economy are required to take IPS 202 Topics in International Macroeconomics for the international economics requirement and IPS 203 Issues in International Economics for the area of concentration gateway. In addition, they must complete IPS 204A Microeconomics or IPS 204B Economic Policy Analysis for Policymakers to fulfill the advanced economics requirement.
- Students from any other area of concentration may fulfill the advanced economics requirement by taking IPS 204A Microeconomics, IPS 204B Economic Policy Analysis for Policymakers, or the second course in the international economics category listed within the Quantitative Core.

#### Area of Concentration Gateway Courses

	Units
<b>Democracy, Development, and Rule of Law Gateway Course:</b>	5
IPS 230 Democracy, Development, and the Rule of Law	
<b>Energy, Environment, and Natural Resources Gateway Course:</b>	3-5
CEE 207A Understanding Energy	
<b>Global Health Gateway Course:</b>	4
HUMBIO 129S Global Public Health	
<b>International Political Economy Gateway Course:</b>	5

<b>International Security and Cooperation Gateway Course:</b>		5
Students with an advanced background may petition to be exempted from the gateway course and instead take six elective courses in the concentration. Consultation with the student services officer and approval from the faculty director are required for this option.		
IPS 241	International Security in a Changing World	

## IPS-specific Academic Policies

The University's general requirements, applicable to all graduate degrees at Stanford, are listed in the Graduate Degrees (p. 47) overview of the University Bulletin. In addition, the IPS-specific degree requirement academic policies are listed below.

### Course Petitions

Students may petition for units from a course that is not currently listed in the Related Course (p. 520)s tab to fulfill area of concentration requirements. A course petition may also be used to apply for an exemption from a core course that covers coursework previously completed at the graduate level. The course petition (<http://ips.stanford.edu/resources>) must be submitted no later than the end of the second week of the quarter in which the course is offered. The IPS Faculty Director reviews the petition and renders a decision within one week of the petition submission.

### Directed Readings

Students may arrange directed reading courses if the current course offerings do not meet particular research or study needs. Directed reading courses are independent study projects students may undertake with Stanford faculty members. Once the student has identified a faculty member to support his or her studies, the student must submit the directed reading petition (<http://ips.stanford.edu/resources>) to the IPS office for review by the IPS faculty director. Directed reading petitions must be submitted no later than the end of the second week of the quarter to allow sufficient time to for review. If approved, the IPS staff creates a section number for the specific instructor so the student can enroll in the course. The course is listed as IPS 299 Directed Reading and the section number assigned is based on the particular instructor. The restrictions for directed reading units include:

1. Students can receive credit for a maximum of five units per directed reading course.
2. Students must receive a letter grade for the directed reading course.

### Academic Standing & Grade Requirement

IPS graduate students must maintain a minimum 3.0 cumulative GPA in order to maintain good academic standing. In addition, a minimum 3.0 cumulative GPA is required for conferral of the M.A. degree.

All courses taken to fulfill requirements for the M.A. degree in International Policy Studies must be taken for a letter grade. The only exceptions are: IPS 300 Issues in International Policy Studies, which is only offered as "S/NC"; courses taken in the Law School, the School of Medicine, or the Graduate School of Business where a letter grade may not be offered; or one-unit elective courses, which are only offered as "S/NC", that have been approved via petition in the area of concentration. Pre-approval is required from the IPS student services officer in order to apply a non-letter grade course in Law, Medicine, or the Graduate School of Business toward the IPS degree.

### Language Requirement

Proficiency in a foreign language is required and may be demonstrated by completion of three years of university-level course work in a foreign language or by passing an oral and written proficiency examination prior to graduation. International students who speak English as a second language already meet this requirement.

## Additional Academic Requirements

1. Students are not required to repeat a course that covers material they have already mastered. In such cases, students may petition to substitute a different course for a core required course. This flexibility does not reduce the unit requirements for the M.A. degree.
2. All graduate degree candidates must submit a Master's Degree Program Proposal (i.e., IPS Program Proposal) to the International Policy Studies office by the end of the eighth week of Spring Quarter. Submission of the IPS Program Proposal requires scheduling a 30-minute advising session with the IPS Student Services Advisor to review degree progress and outline coursework that needs to be completed in order to graduate. This document must be on file in order for the student to apply to graduate. Failure to complete this process will result in a hold being placed on the student's account.
3. All first-year graduate students in IPS are required to submit the list of courses for which they have enrolled to the IPS Student Services Officer no later than the third Wednesday of each academic quarter, which is two days prior to the Final Study List Deadline.
4. A maximum of 10 undergraduate units can be applied towards the IPS degree (ECON 102A Introduction to Statistical Methods (Postcalculus) for Social Scientists, ECON 102B Applied Econometrics, and MS&E 152 Introduction to Decision Analysis do not count towards the 10-unit maximum allowance). Courses listed at the 100-level or below are considered to be at the undergraduate level. The exceptions are History and Political Science, which list undergraduate courses at the 200-level and below. In addition, Public Policy courses listed at the 200-level may be considered undergraduate-level (please consult with IPS and Public Policy before assuming these courses do not apply to the maximum of 10 undergraduate units that can be applied toward the IPS degree).
5. Units from language courses do not count towards the IPS degree requirements, except in cases in which they are used to substitute for units that were made available through an exemption from a core course.
6. Only students with two or more years of relevant policy work may petition to write a master's thesis (IPS 209A IPS Master's Thesis)

## Coterminal Program

Undergraduates at Stanford may apply for admission to the coterminal master's program in IPS when they have earned a minimum of 120 units toward graduation, including Advanced Placement and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. The co-terminal application requires the following supporting materials:

- Two letters of recommendation from University faculty
- Academic writing sample of at least eight double-spaced pages
- Statement of purpose focusing on relevant personal, academic, and career plans and goals
- Resume

Applications must be filed together with supporting materials by January 5, 2016.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (p. 42)" section of this bulletin. For University coterminal master's degree application forms, see the Registrar's Publications page (<https://registrar.stanford.edu/resources-and-help/forms/publications-and-online-guides/#Coterm>).

## University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements

for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

## Exchange Program

### Stanford–Vienna Academic Exchange

The Stanford–Vienna Academic Exchange is an Autumn Quarter exchange program between the Ford Dorsey Program in International Policy Studies and the Diplomatic Academy of Vienna. Two second-year students from each institution are selected by application to receive fellowships to spend Autumn Quarter in an academic exchange at the other institution, where they take courses as full-time students, pursue extracurricular activities, and participate in the academic life of the host institution.

IPS students participating in the Stanford-Vienna Academic Exchange must complete all requirements listed in the M.A. curriculum. However, the minimum number of Stanford units required to graduate will be 58. In addition to the minimum requirement of 58 units, students must complete at minimum the equivalent of three full-time courses at the Diplomatic Academy of Vienna (DA), of which one course must be IPS 209 Practicum.

The IPS Practicum is offered as an independent study course in Vienna, and students receive a credit/no credit grade for their participation in the course during Autumn Quarter. Students register for a total of 4 units of IPS Practicum during Winter Quarter at Stanford.

IPS students' status is listed as active, but they are not considered enrolled at Stanford during their participation in the exchange program with the DA. In addition, IPS students receive an academic transcript from the DA for Autumn Quarter. Hence, there is no reference to the exchange on IPS students' Stanford transcripts.

For further information, please see the "Stanford-Vienna Academic Exchange (<http://ips.stanford.edu/content/stanford-vienna-academic-exchange>)" section of the IPS website.

## Joint Degree Programs

Up to a maximum of 45 units, or one year, of the University residency requirement can be credited toward both graduate degree programs (i.e., the joint degree may require up to 45 fewer units than the sum of the individual degree unit requirements). For example, an M.A./M.P.P. has a three-year residency requirement, one year less than what is required for the separate degrees. The reduced requirement recognizes the subject matter overlap between the fields comprising the joint degree.

## Juris Doctor and Master of Arts in International Policy Studies (J.D./M.A.)

Students may choose to pursue a joint J.D./M.A. in IPS degree. The joint degree program combines the strengths of the Law School and IPS. Prospective students interested in the joint J.D./M.A. in IPS program may apply concurrently to both the Stanford Law School and the IPS program. Two separate application forms are required and applicants must submit LSAT scores to the Law School and GRE scores to the IPS program.

Students already enrolled at Stanford Law School may apply to the joint J.D./M.A. in IPS program no later than the end of the second year of Law School. The IPS program will make rolling admissions decisions based on the student's original application materials (GRE scores are not required in addition to LSAT scores in this case). Submission of the following is required for consideration:

- IPS Joint Degree Application Form (available from the IPS web site ([http://ips.stanford.edu/joint\\_program](http://ips.stanford.edu/joint_program)))
- Law School Joint Degree Petition (available from the Law School Registrar's Office (<http://www.law.stanford.edu/program/degrees/joint>))
- Graduate Program Authorization Petition (submitted via Axess (<http://axess.stanford.edu>))
- Enrollment Agreement for Students with Multiple Programs (available for download on the University Registrar's forms page (<http://studentaffairs.stanford.edu/registrar/forms/grad/#enrollment>))
- Current resume or curriculum vitae

For further information, see the "Joint Degree Programs (p. 49)" section of this bulletin and the University Registrar's site (<http://studentaffairs.stanford.edu/registrar/students/jdp-information>).

## Master of Arts in International Policy Studies and Master of Public Policy (M.A./M.P.P.)

Admission to the joint degree program requires admission to and matriculation in Stanford's Ford Dorsey program in International Policy Studies and consent of that program.

Applicants should apply to IPS, indicating an interest in the joint program. There is one admissions application and one fee. When a decision is made to admit such a student to the IPS program, that student's file will be forwarded to Public Policy for review. An admission decision, based on the information in the IPS application, will be made promptly. Students may also apply after they have matriculated in IPS.

Details on the joint degree curriculum can be found at [http://publicpolicy.stanford.edu/jt\\_mips\\_mpp](http://publicpolicy.stanford.edu/jt_mips_mpp).

For further information, see the "Joint Degree Programs (p. 49)" section of this bulletin and the University Registrar's site (<http://studentaffairs.stanford.edu/registrar/students/jdp-information>).

## Dual Degree Programs

Students who have attended Stanford for at least one term and who are currently enrolled may submit a Graduate Program Authorization Petition to seek to add a new degree program in a different department to be pursued concurrently with the existing program.

It is important that the attempt to add degree programs be made while the student is enrolled. Otherwise, a new Application for Graduate Admission must be submitted and an application fee paid. Similarly, enrollment must be continuous if a new degree program is added after completion of an existing program. Summer quarter enrollment is optional for students who intend to begin a new degree program in the Autumn quarter, provided that they have been enrolled the prior Spring quarter.

Graduate Program Authorization Petitions are filed electronically in Axess (<https://axess.stanford.edu>) and approved by the current and the new department. In addition, petitions from international students will be routed to the Bechtel International Center for review. Upon all approvals, the student's record will automatically update with the requested changes.

## Master of Business Administration and Master of of Arts in International Policy Studies

The dual degree is designed for students who want to work at the intersection of business and the state both in the U.S. and abroad.

Prospective students interested in the MBA/M.A. in IPS dual degree program may apply concurrently to both the Stanford Graduate School of Business and the IPS program. Two separate applications are required and applicants must submit GRE scores with each application.

Students already enrolled at the Stanford Graduate School of Business may apply to the MBA/M.A. in IPS dual degree program no later than the end of the first year. The IPS program will make rolling admissions decisions based on the student's original application materials. Submission of the following is required for consideration:

- IPS/GSB Dual Degree Application Form (available from the IPS web site ([http://ips.stanford.edu/joint\\_program](http://ips.stanford.edu/joint_program)))
- Stanford Official Transcript
- Graduate Program Authorization Petition (submitted via Axess (<http://axess.stanford.edu>))
- Enrollment Agreement for Students with Multiple Programs (available for download on the University Registrar's forms page (<http://studentaffairs.stanford.edu/registrar/forms/grad/#enrollment>))

Completing this combined course of study requires approximately three academic years, depending on the student's background and quantitative preparation. Admissions processes for both programs are completely independent of each other and units from courses can only be applied to one degree or the other, not both.

### Director:

Kathryn Stoner (Freeman Spogli Institute for International Studies)

### Executive Committee Co-chairs:

Michael McFaul (Political Science)  
Norman Naimark (History)

### Executive Committee:

Coit D. Blacker (Freeman Spogli Institute for International Studies)

Arye Carmon  
Beth van Shaack

## Area of Concentration Curriculum

The Ford Dorsey Program in International Policy Studies (IPS) offers five areas of concentration:

- Democracy, Development and Rule of Law (p. ) (DDRL)
- Energy, Environment, and Natural Resources (p. ) (EENR)
- Global Health (p. ) (GH)
- International Political Economy (p. ) (IPE)
- International Security and Cooperation (p. ) (ISC)

Each concentration is guided by one -or more- major international research centers at Stanford. This collaboration provides IPS students with exposure to cutting-edge research on global policy issues. Students are required to choose one area of concentration and complete at least six courses within the concentration for a minimum of 29 total units. Each area of concentration requires the completion of a gateway course (indicated on the Master's tab), which must be taken during the first year and prior to enrolling in subsequent courses. Additionally, each area of concentration has a list of approved elective courses, as shown below. See the Master's tab for information on how to petition to apply a course toward the area of concentration that is not included in the lists below.

## International Relations

Courses offered by the Program in International Relations (IR) are listed under the subject code INTNLREL (<https://explorecourses.stanford.edu/search?view=catalog&academicYear=&q=INTNLREL&filter-departmentcode=INTNLREL=on&filter-coursestatus=Active=on&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&page=0>) on the Stanford Bulletin's ExploreCourses web site.

The Program in International Relations offers an undergraduate Bachelor of Arts program, an honors program, and a minor in International Relations.

### Mission of the Undergraduate Program in International Relations

The undergraduate program in International Relations is an interdisciplinary undergraduate major allowing students to explore how global, regional and domestic factors influence relations between actors on the world stage. The program equips students with the skills and knowledge necessary to analyze choices and challenges that arise in this arena. IR majors pursue study in world politics, including courses in political science, economics, history, and language, focusing on issues such as international security, political economy, economic development, and democratization. Students must spend at least one quarter overseas. The major prepares students for careers in government and the corporate sector, and for admission into graduate programs in law, business, economics, and political science.

### Learning Outcomes (Undergraduate)

The program expects its undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Program in International Relations. Students are expected to demonstrate:

1. understanding of core knowledge necessary to understand contemporary world politics.
2. ability to analyze international issues and draw correct inferences using qualitative and/or quantitative analysis.
3. ability to write clearly and persuasively, communicating ideas clearly.
4. ability to evaluate theory and critique research within the discipline.

### Coterminal Programs in Related Fields

It is possible for students majoring in International Relations to work simultaneously for a coterminal master's degree in a number of related fields. Coterminal students should consult advisers in both departments or programs to ensure that they fulfill the degree requirements in both fields. For information on the M.A. program in International Policy Studies, see the "International Policy Studies (p. 516)" section in this bulletin. University requirements for the coterminal M.A. are described in the "Coterminal Degree (p. 42)s" section of this bulletin. For University coterminal degree program rules and University application forms, see the Publications and Online Guides (<http://studentaffairs.stanford.edu/registrar/publications/#Coterm>) web site.

### Honors Program

The International Relations honors program offers qualified students the opportunity to conduct a major independent research project under faculty guidance. Such a project requires a high degree of initiative and dedication, significant amounts of time and energy, and demonstrated skills in research and writing.

In their junior year, students should consult with prospective honors advisers, choose the courses that provide academic background in their areas of inquiry, and demonstrate an ability to conduct independent research. Students can also select to complete an Interdisciplinary honors thesis with other programs on campus.

Prerequisites for participation include a 3.5 grade point average (GPA), a strong overall academic record, good academic standing, successful experience in writing a research paper, and submission of an acceptable thesis proposal. Students should submit their honors thesis proposal late in Winter Quarter of the junior year; please check with IR office for the exact deadline. Students are required to enroll in INTNLREL 200A International Relations Honors Field Research, in Spring Quarter of their junior year and should consider participating in Honors College ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/OO\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/OO_honors_BingHonors.html)). In their senior year, honors students must enroll in INTNLREL 200B International Relations Honors Seminar in Autumn Quarter, INTNLREL 200C IR Honors Thesis Writing in Winter Quarter, and in research units through INTNLREL 198 Senior Thesis each quarter of their senior year (Autumn, Winter, and Spring) with their faculty adviser. Honors students present a formal defense of their theses in mid-May. Students must receive at least a grade of 'B+' in order to graduate with honors in International Relations.

### Bachelor of Arts in International Relations

Students are encouraged to declare by the end of their sophomore year to ensure timely completion of the program. Students must submit an acceptable major proposal to the Director of the Program in International Relations (IR) and declare IR in Axess. Students completing a double major, fulfilling International Relations as a secondary major, or who have a minor, are also required to file a Major-Minor and Multiple Major Course Approval form by the end of the second quarter of the junior year.

Students majoring in International Relations must complete a minimum of 70 units (30 units of core courses as well as 40 units of specialization courses). As part of the core curriculum, IR majors must take an Introductory economics course. Effective Autumn Quarter 2013-14, the Economics department is offering ECON 1 Principles of Economics, replacing the former ECON 1A and 1B.

- Students who have already completed two introductory ECON courses (ECON 1A, 1B, 50, 51, 52) prior to Autumn Quarter 2013-14 complete 35 units of core courses and 35 units of specialization courses in order to meet the 70 units required for the major.
- Effective Autumn Quarter 2013-14, students who complete only ECON 1 Principles of Economics or the old ECON 1A complete 30 units of core courses and 40 units of specialization courses in order to meet the 70 units required for the major.

Students who declared the major prior to September 1, 2013 should consult the Stanford Bulletin for the year in which they submitted their declaration. Requirements for students declaring the major after September 1, 2013 are as follows:

### Core Courses (30 units):

	Units
<b>Required Courses:</b>	
International Politics:	5
POLISCI 101 Introduction to International Relations	
Comparative Governance (Select one of the following):	5
HISTORY 102 History of the International System	
POLISCI 104 Introduction to Comparative Politics	
POLISCI 114D Democracy, Development, and the Rule of Law	
American Foreign Policy (Select one of the following):	5
INTNLREL 154 The Cold War: An International History	

INTNLREL 168	America as a World Power: U.S. Foreign Relations, 1914 to Present	
INTNLREL 173	Presidents and Foreign Policy in Modern History	
INTNLREL 174	Diplomacy on the Ground: Case Studies in the Challenges of Representing Your Country	
POLISCI 110C	America and the World Economy	
POLISCI 110D	War and Peace in American Foreign Policy	
POLISCI 110G	Governing the Global Economy	
POLISCI 214R	Challenges and Dilemmas in American Foreign Policy	
Introductory Economics (Select one of the following):		5
ECON 1	Principles of Economics	
ECON 50	Economic Analysis I	
ECON 51	Economic Analysis II	
ECON 52	Economic Analysis III	
Skills Classes (Select one of the following):		5
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	
STATS 60	Introduction to Statistical Methods: Precalculus	
Applied Economics Courses (Select one of the following):		5
ECON 106	World Food Economy	
ECON 111	Money and Banking	
ECON 118	Development Economics	
ECON 119	The Russian Economy	
ECON 122		
ECON 123		
ECON 124	Economic Development and Challenges of East Asia	
ECON 125	Economic Development, Microfinance, and Social Networks	
ECON 126	Economics of Health and Medical Care	
ECON 127	Economics of Health Improvement in Developing Countries	
ECON 128	Economic Development: A Historical Perspective

PUBLPOL 184	Poverty and Policies in Developing Economies	
SIW 103	Economic Growth and Development Patterns, Policies, and Prospects	
SOC 114	Economic Sociology	
Total Units		30

## Specialization Courses (40 units):

The ten specializations are:

1. Africa
2. Comparative International Governance
3. East and South Asia
4. Economic Development/World Economy
5. Europe (East and West) & Russia
6. International History and Culture
7. International Security
8. Latin America and Iberian Studies
9. Middle East and Central Asia (MECA)
10. Social Development/Human Well-Being

Students on the old IR plan (declared prior to Autumn Quarter 2013-14) who completed two introductory economics courses must complete a total of at least 35 units (usually seven 5 unit courses) in their primary and secondary specializations. 20 units must be from the student's primary specialization; 15 units from the secondary specialization. Functional specializations are not declared on Axess nor are they printed on the diploma or transcript.

Students who have only taken one introductory economics course must take 40 units of specialization courses in order to meet the 70 units required for the major. 20-25 units must be from the student's primary specialization; 15-20 units from the secondary specialization. Functional specializations are not declared on Axess nor are they printed on the diploma or transcript.

The following courses are approved for each functional specialization.

### Africa

Crosslisted courses may appear in the list below multiple times. Crosslisted courses may only be taken once for credit.

		Units

### Additional Policies/Requirements:

- At least one course must be an upper-division seminar or colloquium.
- At least one writing intensive course designated as Writing in the Major (WiM) for International Relations.
- All courses must be taken for a letter grade, and a minimum grade of 'C' is required for courses to count towards major requirements.
- Completion of one quarter of academic study overseas, either through the Stanford Overseas Studies Program or an approved non-Stanford program. Non-Stanford programs must be pre-approved by the IR office before the student enrolls in the program.
- All IR majors must demonstrate proficiency in a foreign language by either completing two years of course work (second-year, third-quarter) or passing a proficiency exam. Foreign language units do not count towards the major.
- Upon approval, a maximum of 15 non-Stanford units may be applied to the major for credit.

### Independent Study/Honors

		Units
INTNLREL 197	Directed Reading in International Relations	1-5
INTNLREL 198	Senior Thesis	2-10
INTNLREL 200A	International Relations Honors Field Research	3
INTNLREL 200B	International Relations Honors Seminar	3

## INTNLREL 200C IR Honors Thesis Writing

**Honors Program**

The International Relations honors program offers qualified students the opportunity to conduct a major independent research project under faculty guidance. Such a project requires a high degree of initiative and dedication, significant amounts of time and energy, and demonstrated skills in research and writing.

In their junior year, students should consult with prospective honors advisers, choose the courses that provide academic background in their areas of inquiry, and demonstrate an ability to conduct independent research. Students can also select to complete an Interdisciplinary honors thesis with other programs on campus.

Prerequisites for participation include a 3.5 grade point average (GPA), a strong overall academic record, good academic standing, successful experience in writing a research paper, and submission of an acceptable thesis proposal. Students should submit their honors thesis proposal in the Winter Quarter of the junior year; please check with IR office for the exact deadline. Students are required to enroll in INTNLREL 200A International Relations Honors Field Research, in the Spring Quarter of their junior year and should consider participating in Honors College ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/OO\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/OO_honors_BingHonors.html)). In their senior year, honors students must enroll in INTNLREL 200B International Relations Honors Seminar in Autumn Quarter, INTNLREL 200C IR Honors Thesis Writing in Winter Quarter, and in research units through INTNLREL 198 Senior Thesis each quarter of their senior year (Autumn, Winter, and Spring) with their faculty adviser. Honors students present a formal defense of their theses in mid-May. Students must receive at least a grade of 'B+' in order to graduate with honors in International Relations. For more information, refer to the International Relations (<http://internationalrelations.stanford.edu>) website.

**Minor in International Relations**

A minor in International Relations (IR) is intended to provide an interdisciplinary background allowing a deeper understanding of contemporary international issues. To declare the IR minor, students must complete the application for a minor in Axxess and complete the IR Minor Declaration and Course Proposal form and submit this to the IR office.

Students complete the minor by taking 35 units from the IR curriculum that do not duplicate with the student's major, including the following:

**Required Courses:**

International Politics	5
POLISCI 101 Introduction to International Relations	
American Foreign Policy (Select one of the following):	5
INTNLREL 154 The Cold War: An International History	
INTNLREL 168 America as a World Power: U.S. Foreign Relations, 1914 to Present	
INTNLREL 173 Presidents and Foreign Policy in Modern History	
INTNLREL 174 Diplomacy on the Ground: Case Studies in the Challenges of Representing Your Country	
POLISCI 110C America and the World Economy	
POLISCI 110D War and Peace in American Foreign Policy	
POLISCI 110G Governing the Global Economy	
POLISCI 214R Challenges and Dilemmas in American Foreign Policy	
Upper Division Specialization Courses (25 units)	25
Total Units	35

1 Complete at least 25 units in one of the following specializations below.

- Africa
- Comparative International Governance
- East and South Asia
- Economic Development/World Economy
- Europe (East and West) & Russia
- International History and Culture
- International Security
- Latin America and Iberian Studies
- Middle East and Central Asia (MECA)
- Social Development/Human Well-Being

*Director:* Michael Tomz (Political Science).

*Faculty Committee:* Kyle Bagwell (Economics), Judith L. Goldstein (Political Science), Norman Naimark (History), Kenneth Schultz (Political Science), Kenneth Scheve (Political Science), Kathryn Stoner (Freeman Spogli Institute).

*Affiliated Faculty:* Lisa Blaydes (Political Science), Gordon Chang (History), Joshua Cohen (Political Science), Larry J. Diamond (Hoover Institution), Amir Eshel (German Studies), James Fearon (Political Science), Zephyr Frank (History), Lawrence H. Goulder (Economics), Stephen H. Haber (Political Science), David J. Holloway (History, Political Science), Karen Jusko (Political Science), Terry L. Karl (Political Science), Stephen D. Krasner (Political Science), Philip Lipsky (Political Science), Beatrice Magaloni (Political Science), Robert McGinn (Management Science and Engineering), Rosamond Naylor (Freeman Spogli Institute for International Studies), Jean C. Oi (Political Science), William J. Perry (Freeman Spogli Institute for International Studies, Management Science and Engineering), Richard Roberts (History), Jonathan Rodden (Political Science), Scott Sagan (Political Science), Debra M. Satz (Philosophy), Andrew Walder (Sociology), Amir Weiner (History), Jeremy Weinstein (Political Science).

*Other Affiliation:* Jasmina Bojic (International Relations), Christophe Crombez (Freeman Spogli Institute for International Studies), John Dunlop (Hoover Institution), Erica Gould (International Relations), Kathleen Janus (Freeman Spogli Institute for Program on Social Entrepreneurship, International Relations), Katherine Jolluck (History), Timothy Josling (International Relations, Senior Member of Academic Council, Professor at the Food Research Institute, Emeritus), Anjini Kochar (Stanford Institute for Economic Policy Research), Martin W. Lewis (History), Pawel Lutomski (International Relations), Abbas Milani (Hoover Institution, Iranian Studies), Alice Lyman Miller (Hoover Institution), Bertrand Patenaude (Hoover Institution, International Relations), Robert Rakove (International Relations), Margaret Sena (El Centro Chicano, International Relations), Stephen Stedman (Political Science), Richard Steinberg (Stanford Global Studies), Gil-Li Vardi (Hoover Institution, International Relations).

**Overseas Studies Courses in International Relations**

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bossp.stanford.edu>).

## Jewish Studies

The Taube Center for Jewish Studies investigates all aspects of Jewish culture, history, religion, literature, language and education from biblical times to the present. Courses are offered on the undergraduate and graduate levels in a program complemented by a full range of guest lectures, conferences, and symposia. The Center annually sponsors the Donald and Robin Kennedy Undergraduate Award for the best undergraduate essay on any theme in Jewish Studies, the Dr. Bernard Kaufman Undergraduate Research Award in Jewish Studies awarded to an undergraduate engaged in research on Jews in modernity, and the Koret Award for best essay written in Hebrew by an undergraduate.

Graduate students must apply and enroll in the program through the departments of English, History, Comparative Literature, Religious Studies, or the School of Education, and meet the requirements of those departments. All graduate students in the university with an academic interest in Jewish Studies are encouraged to participate in the Colloquium for Jews, Judaism and Jewish Culture, an ongoing opportunity to share work and meet with faculty and visiting scholars. For more information about graduate studies in Jewish Studies, please contact the Center manager or Director.

## Undergraduate Program in Jewish Studies

An undergraduate program in Jewish Studies is offered through Comparative Studies in Race and Ethnicity (CSRE) (p. ). It is interdisciplinary in that it that draws together a wide range of disciplines including history, literary studies, religious studies, gender studies, education and other fields. Through its courses and extra-curricular programs, the Taube Center seeks to introduce students to the ideas and experience of the Jewish people over its entire history, from the biblical period to the Holocaust and contemporary Israeli culture.

Undergraduates interested in completing a major or minor in Jewish Studies should visit the Comparative Studies in Race and Ethnicity (CSRE) (p. 400) section of this bulletin for program descriptions and courses.

*Director:* Charlotte Fonrobert (Religious Studies)

*Affiliated Faculty and Teaching Staff:* Zachary Baker (Stanford University Libraries), Joel Beinin (History), Jonathan Berger (Music), Arnold Eisen (Religious Studies, emeritus), Amir Eshel (German Studies), John Felstiner (English, emeritus), Shelley Fisher Fishkin (English), Charlotte Fonrobert (Religious Studies), Avner Greif (Economics), Katherine Jolluck (History), Ari Y. Kelman (Education), Jon Levitow (Language Center), Mark Mancall (History, emeritus), Norman Naimark (History), Reviel

Netz (Classics), Jack Rakove (History), Aron Rodrigue (History), Noah Rosenberg (Biology), Gabriella Safran (Slavic Languages and Literatures), Vered Karti Shemtov (Language Center, Comparative Literature), Lee Shulman (Education, emeritus), Peter Stansky (History, emeritus), Marie-Pierre Ulloa (French), Amir Weiner (History), Sam Wineburg (Education), Steven Zipperstein (History)

*Hebrew Instructional Staff:* Gallia Porat, Estee Greif

*Visiting Faculty:* Avi Tchamni (Music)

*Writer in Residence:* Maya Arad

## Language Center

The Stanford Language Center oversees all language instruction at Stanford. The center's charge is to guarantee that Stanford language programs are of the highest quality; to develop and administer achievement and proficiency tests needed to implement the language requirement; to provide technical assistance and support to the graduate students, lecturers, and faculty who deliver Stanford's language instruction; and to take leadership in research and development efforts in language learning. The Language Center is a unit within the Division of Literatures, Cultures, and Languages (p. 416).

## Courses

Courses offered by the Language Center are listed under the following subject codes on the Stanford Bulletin's ExploreCourses web site:

- AMELANG (African and Middle Eastern Languages and Literatures)
- ARABLANG (Arabic Language) (<https://explorecourses.stanford.edu/search?view=catalog&catalog=71&page=0&q=ARABLANG&filter-catalognumber-ARABLANG=on&filter-coursestatus-Active=on>)
- CATLANG (Catalan Language)
- CHINLANG (Chinese Language)
- EFSLANG (English for Foreign Students)
- FRENLANG (French Language)
- GERLANG (German Language)
- ITALLANG (Italian Language)
- JAPANLANG (Japanese Language)
- KORLANG (Korean Language)
- PORTLANG (Portuguese Language)
- SLAVLANG (Slavic Language)
- SPANLANG (Spanish Language)
- SPECLANG (Special Language)
- TIBETLANG (Tibetan Language)

### Beginning-Level, First-Year Courses

Beginning-level, first-year language courses require no previous knowledge of the language. The beginning-level sequence emphasizes development of the full range of language skills, reading, listening comprehension, the use of grammatical structures, and oral and written communication, through a variety of learning themes. Individual, small group, interactive work and multimedia-based activities reinforce language skills and provide the platform for adapting the curriculum to specific student learning goals. Cultural awareness is a strong component of the curriculum.

### Intermediate-Level, Second-Year Courses

Intermediate-level, second-year language courses require completion of the beginning sequence, corresponding placement or consent of the program coordinator. The intermediate-level sequence focuses on continuous mastery and development of skills that help students to converse and present accurately and more fluently, incorporate more

advanced grammatical structures in their oral and written work, use idiomatic expressions in the right context, and read and write more sophisticated compositions. Curricular objectives and enhanced cultural understanding are built into the courses through a multimodal approach.

### Advanced-Level, Third-Year Courses

Advanced-level, third-year language courses require completion of the intermediate-year sequence, corresponding placement or consent of the program coordinator. The advanced-level sequence focuses on accurate understanding and use of structures through authentic texts and multimedia materials, and readings from various genres. Individual learning goals and student proficiency are taken into account to provide a learning environment that helps students become more autonomous learners.

## Proficiency in Foreign Language Notation

A student who demonstrates levels of achievement equivalent to those expected at the end of the third quarter of the third year of study in a language may be awarded the notation "proficiency in" that language on the official transcript. Successful candidates tend to have completed the third year or beyond of language study at Stanford and spent considerable time studying abroad in the foreign language.

In order to receive the proficiency notation and for it to appear on the official transcript, the student must complete the following oral and written requirements according to the timeline below. The notation is available only for languages where external assessment is offered through Language Testing International. Successful completion of the oral component is required before proceeding with the written component.

Both oral and written components must be completed no later than the quarter preceding the graduating quarter.

For more information, contact [languagecenter@stanford.edu](mailto:languagecenter@stanford.edu).

### Application and Oral Component: Two quarters prior to graduation

1. Notify the Language Center via email of the intent to pursue the notation and request an official Oral Proficiency Interview (OPI). Since this is a formal interview conducted according to national academic and professional standards, at least two quarters of lead time are essential for scheduling.
2. Complete the 30-minute Oral Proficiency Interview as scheduled through the Language Center and conducted by a certified OPI tester. The interview must take place no later than one quarter prior to graduation and be administered on campus.
3. Receive an official rating of Advanced Low or higher on the Foreign Service Institute/American Council on the Teaching of Foreign Languages (FSI/ACTFL) scale of oral proficiency, except in the non-cognate languages which require a minimum rating of Intermediate High. Students who do not meet the minimum level for the notation will nonetheless receive an official OPI rating, which carries national recognition of their oral proficiency.

### Writing Component: One quarter prior to graduation

1. Once approved to continue with the writing component, schedule a Writing Proficiency Test (WPT) through the Language Center. As an official writing assessment, the 90-minute exam must take place no later than one quarter prior to graduation and as soon as possible after the interview. The WPT is administered on campus and rated by a certified WPT rater.
2. Receive an official rating of Advanced Low or higher on the Foreign Service Institute/American Council on the Teaching of Foreign Languages (FSI/ACTFL) scale of writing proficiency, except in the non-cognate languages which require a minimum rating of Intermediate High. Students who do not meet the minimum level for

the notation will nonetheless receive an official WPT rating, which carries national recognition of their writing proficiency.

### Proficiency Notation Timetable

1. Graduating Spring/Summer: Apply Autumn; interview Autumn/Winter; writing Winter.
2. Graduating Autumn: Apply Winter; interview Winter/Spring; writing Spring.
3. Graduating Winter: Apply Spring; interview Spring/Autumn; writing Autumn.

## Overseas Studies Courses in the Language Center

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) web site or the Bing Overseas Studies (<http://bosp.stanford.edu>) web site. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

## African and Middle Eastern Languages and Literatures Program

The African and Middle Eastern Languages and Literatures Program offers classes in Hebrew, Persian, Swahili, Turkish, and African languages not regularly taught at Stanford. Based on current funding and student requests, the courses planned for 2015-16 are listed in the "ExploreCourses" section of this Bulletin under the AMELANG program. Additional languages may still be offered upon request, provided funding is available. Requests for the 2016-17 academic year should be made by Spring Quarter of this year to the AME program office by email to [khalil@stanford.edu](mailto:khalil@stanford.edu) ([ebarnhar@stanford.edu](mailto:ebarnhar@stanford.edu)).

First, second, and third year each refer to the yearly sequence of language study. Letter suffixes refer to the quarter within the sequence: "A" courses are typically taught in Autumn; "B" courses, in Winter; and "C" courses in Spring. Courses are 4 or 5 units as listed. In some circumstances, a beginning or intermediate course may be offered in alternate years. Language courses may not be repeated for credit, and must be taken in sequence.

### Fulfilling the Language Requirement in AME

Students can fulfill the language requirement by taking an African or Middle Eastern Language. At least 12 units are needed to complete the requirement. Students who have taken courses in the relevant language at another institution, or have previous knowledge of the language, can request to be tested. Tests are comprised of two parts, written and oral. Students must display first-year level proficiency in the requested language to fulfill the requirement. Testing is guaranteed only for languages currently offered. Students planning to take a test must contact the AME Program no later than the Spring Quarter of their sophomore year. To submit a request for language testing, or to request that a language be taught, and for further information on the program, see the African and Middle Eastern Language Program (<https://www.stanford.edu/dept/lc/language/courses/africanMidEastern>) web site.

## Special Language Program

The Special Language Program (SLP) offers foreign languages not otherwise taught at Stanford. Based on current funding and student requests, the courses planned for 2015-16 are listed in the "Explore Courses (<http://explorecourses.stanford.edu>)" section of this Bulletin under the Special Languages (SPECLANG) Program; however, not every course listed is taught. Additional languages may still be offered upon request, provided funding is available. Requests for the 2016-17

academic year should be made by Spring Quarter of this year at the Special Language Program office ([epriomas@stanford.edu](mailto:epriomas@stanford.edu)).

First-year courses are offered for 4 or 5 units, as listed. First, second, and third year each refer to the yearly sequence of language study. Letter suffixes refer to the quarter within the sequence: "A" courses are typically taught in Autumn; "B" courses, in Winter; and "C" courses in Spring. In some circumstances, a beginning or intermediate course may be offered in alternate years. Language courses may not be repeated for credit, and must be taken in sequence. For additional information, see the Special Language Program (<http://www.stanford.edu/dept/SLP>) web site.

## Fulfilling the Language Requirement in Special Language Program

Students can fulfill the language requirement by taking courses offered by the Special Language Program. At least 12 units are needed to complete the requirement. Students who have already taken courses in the relevant language at another institution, or who have previous knowledge of the language, can request to be tested. Tests are comprised of written and oral parts. A student must display first-year level proficiency in the requested language in order to fulfill the requirement. Testing is guaranteed only for these languages currently offered. Students planning to take a test must contact the Special Language Program no later than the Spring Quarter of sophomore year. To submit a request for language testing, or to request that a language be taught, and for further information on the program, contact the Special Language Program office ([epriomas@stanford.edu](mailto:epriomas@stanford.edu)).

## Minors in the Division of Literatures, Cultures, and Languages (DLCL)

The Division of Literatures, Cultures, and Languages (p. 416), of which the Language Center is a part, offers the following minors that may be of interest to foreign language students. For more information, consult the contact specified in the relevant minor following.

### Minor in Modern Languages

The Division of Literatures, Cultures, and Languages offers an undergraduate minor that draws upon courses in literature and language within the division's departments and elsewhere in the University. The minor in Modern Languages is offered to students who want to supplement the course work in their major with course work in modern languages and literatures. The minor must be approved by the chairs of undergraduate studies of the respective language departments.

Students in any field qualify for the minor by meeting the following requirements:

	Units
A minimum of 16 units (8 units per language) at the intermediate level (second year) or beyond, not including conversational, oral communication, business, or medical language courses in two languages other than English offered by the DLCL.	16
At least one additional course, at the 100 level or above, in each modern language being studied in the minor. These courses must be taught by DLCL Academic Council members or other senior members of the DLCL faculty.	6-10

Students are recommended to study, work, or intern abroad for at least eight weeks at a location where one of the languages is spoken. Course work in this minor may not duplicate work counted toward other majors or minors. Advanced Placement credit and transfer credit do not apply to this minor. All courses must be taken for a letter grade. By University policy, no more than 36 units may be required in this minor. Students declare the minor in Modern Languages through Axess.

For further information including procedures for declaring the minor, contact Denise Winters at [denisew1@stanford.edu](mailto:denisew1@stanford.edu).

## Minor in Translation Studies

*Faculty Director:* Indra Levy

*Minor Adviser:* Cintia Santana ([csantana@stanford.edu](mailto:csantana@stanford.edu))

The Division of Literatures, Cultures, and Languages, in cooperation with East Asian Languages and Cultures and the English Department, teaches undergraduates to develop and apply their foreign language knowledge to the production and analysis of translations. The minor is designed to give students majoring in a variety of fields the tools to consider the practical and theoretical issues brought up by translation as an aesthetic, cultural, and ethical practice.

Course work in this minor may not duplicate work counted toward other majors or minors. Course selection must be approved by the minor adviser. For further information, contact the minor adviser, Cintia Santana ([csantana@stanford.edu](mailto:csantana@stanford.edu)).

Students must take a minimum of 23 units for a letter grade, in fulfillment of the following requirements:

	Units
1. Prerequisite: Complete or test out of a first-year course in the language of interest.	
2. Core course: At least 4 units in a Translation Studies core course: ENGLISH/DLCL 293 or JAPANGEN 122/KORGEN 122*	4
3. Language study: At least 8 units, second year or beyond (not including conversation/oral communication) and/or relevant literature courses taught in the target language. OSP and transfer units may be considered in consultation with the minor adviser.	8
4. Literature study: At least 7 units in relevant literature courses at the 100-level or above, taught in a DLCL department, East Asian Languages and Cultures, or Classics, and determined in consultation with the minor adviser. For students interested in translation from English into another language, appropriate literature courses in the English department may be substituted.	7
5. Electives: At least 4 units in a creative writing course, or a course that foregrounds translation in departments such as Anthropology, any DLCL department, English, East Asian Languages and Cultures, Classics, Linguistics (e.g., LINGUIST 130A), or Computer Science (e.g., CS 124), determined in consultation with the minor adviser.	4
6. Final Project: Students must also complete a capstone project: a significant translation and/or translation studies project (e.g. 20 pages of prose, 10 poems, or similar appropriate amount to be determined in consultation with the minor adviser). This work may be carried out under the supervision of an instructor in a required course or as an independent study.	
<b>Total Units</b>	<b>23</b>

\* Core course JAPANGEN 121 will be offered in 2016-17.

## Minor in Middle Eastern Languages, Literatures, and Cultures

*Faculty Director:* Alexander Key ([akey@stanford.edu](mailto:akey@stanford.edu))

The undergraduate minor in Middle Eastern Languages, Literatures, and Cultures (MELLAC) has been designed to give students majoring in other departments an opportunity to gain a substantial introduction to Arabic, Hebrew, Middle Eastern, and African languages, and the cultures and civilizations of the Middle East and Africa. Contact the faculty director, Alexander Key <[akey@stanford.edu](mailto:akey@stanford.edu)> before declaring the minor:

- Courses for the minor must be taken for a letter grade unless only offered for faculty-elected satisfactory/no credit.
- All courses must be completed with a letter grade of 'C' or better.
- Students may not overlap (double-count) courses for completing major and minor requirements
- Students declaring the minor must do so no later than the last day of Spring Quarter of their junior year.

The minor in Middle Eastern Languages, Literatures and Cultures (MELLAC) has two tracks. Their requirements are as follows.

### Minor in Middle Eastern Languages, Literatures, and Cultures, Arabic Track

Requirements for the minor include:

- Completion of four ARABLANG courses at the second-year level or higher, for a total of 20 units
- Up to 5 units of transfer credit may count towards this minor with the Faculty Director's approval.
- Two literature courses taught with Arabic texts, generally offered in Comparative Literature (COMPLIT) for a total of 6-10 units
- One course relating to Arabic taught with English texts, generally offered in Comparative Literature (COMPLIT), for a total of 3-5 units.
- Students must test for Proficiency in Arabic through the Language Center by Winter Quarter of the senior year.
  - Students should minimally receive a notation of 'intermediate-High'.
  - Those requiring outside tutoring are advised to seek resources are available through the DLCL.
- All courses must be approved by the faculty director.

### Minor in Middle Eastern Languages, Literatures, and Cultures, Hebrew, Persian, Turkish, or African Languages, Literatures and Cultures Track

Requirements for the minor include:

- Three language classes in Hebrew, Persian, Turkish, or an African language.
  - All three courses must be in the same language and first year or beyond.
- 20 additional units from relevant literature and culture courses.
  - Courses are offered through the Language Center and DLCL departments.
  - One of these courses must be a (COMPLIT) Comparative Literature course.
  - Additional courses are offered through Jewish Studies (JEWISHST), and the Center for African Studies (AFRICAST).
- The faculty director may approve some upper-level language classes to count towards the 20 additional units.
- All courses must be approved by the faculty director.

## Certificate in Language Program Management

*Faculty Director:* Elizabeth Bernhardt

Programs in contemporary foreign language teaching preparation entail a knowledge base that has grown over the past 30 years, rooted in data from an explosion of linguistic as well as applied linguistic research.

In tandem with the Language Center's primary focus on learning research and theory, which graduate students explore in the teaching preparation

program, the Language Program Management certificate focuses on developing the professional leadership and academic skills necessary for a career that includes the coordination and management of language learning.

The program funds summer internships which enable the completion of a certificate in Language Program Management and are intended to help Stanford graduate students prepare themselves for such work in complement to their literary studies. The certificate program is not declared on Axxess and does not appear on the transcript or diploma.

## Prerequisites

1. Foreign language acquisition: Oral Proficiency Interview (OPI) rating of at least advanced mid
2. Academic and professional development:
  - DLCL 301 The Learning and Teaching of Second Languages
  - Modified Oral Proficiency Interview (MOPI) Assessment workshop (2 days)
  - Limited OPI Tester Certification (average 6 months)
  - Teaching of three first-year language courses through the Language Center

These are generally met by the end of a graduate student's second year in the PhD program. Once meeting these criteria, the student may be admitted to the Program.

## Requirements

Upon admission to the program, students must complete the following:

1. DLCL 302 The Learning and Teaching of Second-Language Literatures: a course designed to focus student attention on the development of oral language proficiency through the upper levels and emphasize the need for upper register speaking and writing for literature learning and teaching.
2. OPI workshop (additional 2 days of training at the Advanced and Superior levels): this workshop is the extension of the MOPI. It focuses on upper register performance on the FSI-ACTFL scale. Hosted by either the Language Center, regional workshop, or at the national meeting of the ACTFL.
3. Completion of Writing Proficiency Familiarization workshop (Winter Quarter): Workshop conducted by a certified writing tester and structured in parallel to the MOPI/OPI assessment paradigm.
4. DLCL 303 Language Program Management (Summer Quarter): an administrative internship including, but not limited to, experiences with the following:
  - Shadow faculty and staff in select areas of administration and supervision within the Language Center and DLCL
  - Placement testing and student advisement
  - Technology in teaching and learning
  - Processes for teacher observation and feedback
  - Procedures in staff supervision and human resources
  - Course scheduling, budgeting, staffing, and searches
  - Interface with external programs (e.g., BOSP, Bechtel, VPTL)

*Director:* Elizabeth Bernhardt

*Associate Director:* Joan Molitoris

## African and Middle Eastern Languages

*Coordinator:* Khalil Barhoum

*Lecturers:* Ameneh Shervin Emami (Persian), Ebru Ergul (Turkish), Jon Levitov (Yiddish), Samuel Mukoma (Swahili), Gallia Porat (Hebrew), Vered Shemtov (Sr. Lecturer in Jewish Language & Literature)

## Arabic Language

*Coordinator:* Khalid Obeid

*Lecturers:* Salem Aweiss, Khalil Barhoum (Sr. Lecturer), Thoraya Boumehti, Ramzi Salti

## Catalan Language

*Coordinator:* Joan Molitoris (Associate Director, Language Center)

*Teaching Assistant:* Cortney Miller

## Chinese Language

*Coordinator:* Chao Fen Sun (Professor, Asian Languages and Cultures)

*Lecturers:* Marina Chung, Michelle DiBello, Sik Lee Dennig, Nina Lin, Yuhwa Liao Rozelle, Le Tang, Huazhi Wang, Hong Zeng, Youping Zhang, Xiaofang Zhou

## English for Foreign Students

*Director and Senior Lecturer:* Philip Hubbard

*Lecturers:* Robyn Brinks Lockwood, Kristopher Geda, Carole Mawson, Andrea Kevech, Kenneth Romeo, Constance Rylance, Seth Streichler, Dominic Wang

## French Language

*Coordinator:* Heather Howard

*Lecturers:* Maria Comsa, Marie Lasnier, Alix Mazuet, Vera Shapirshteyn

## German Language

*Coordinator:* Paul Nissler

*Lecturers:* Jason Kooiker, William E. Petig (Sr. Lecturer)

## Italian Language

*Coordinator:* Anna Cellinese

*Lecturers:* Marta Baldocchi, Alessandra McCarty, Giovanni Tempesta

## Japanese Language

*Coordinator:* Yoshiko Matsumoto (Professor, Asian Languages and Cultures)

*Lecturers:* Momoyo Kubo Lowdermilk, Emiko Yasumoto Magnani, Emi Mukai, Chie Muramatsu, Momoe Saito Fu, Kayoko Takeuchi, Yoshiko Tomiyama

## Korean Language

*Coordinator:* Hee-Sun Kim

*Lecturer:* Hannah Yoon

## Portuguese Language

*Coordinator and Senior Lecturer:* Lyris Wiedemann

*Lecturer:* Agripino Silveira

## Slavic Language

*Coordinator:* Eugenia Khassina

*Senior Lecturer:* Rima Greenhill

## Spanish Language

*Coordinator:* Alice Miano

*Lecturers:* Vivian Brates, Citlalli del Carpio, Irene Corso, Joan Molitoris (Associate Director, Language Center), Carimer Ortiz Cuevas, Kara Sanchez, Ana Maria Sierra, Maria Cristina Urruela, Ana Vivancos, Hae-Joon Won

## Special Language Program

*Coordinator:* Eva Prionas, Modern Greek Language and Literature

*Lecturers:* Cathy Haas (ASL), Dzuong Nguyen (Vietnamese), Brajesh Samarth (Hindi)

*Fulbright Scholars:* Jan Rich Guira (Tagalog), Afroja Sultana (Bengali)

## Tibetan Language Program

*Lecturer and Coordinator:* Robert W. Clark

## Overseas Studies Courses in the Language Center

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

## Overseas Studies Courses in Chinese

		Units
OSPBEIJ 1C	First-Year Modern Chinese, First Quarter	5
OSPBEIJ 3C	First-Year Modern Chinese, Third Quarter	5
OSPBEIJ 6C	Beginning Conversational Chinese, First Quarter	2
OSPBEIJ 8C	Beginning Conversational Chinese, Third Quarter	2
OSPBEIJ 21C	Second-Year Modern Chinese	5
OSPBEIJ 23C	Second-Year Modern Chinese	5
OSPBEIJ 101C	Third-Year Modern Chinese	5
OSPBEIJ 103C	Third-Year Modern Chinese	5
OSPBEIJ 211C	Fourth-Year Modern Chinese	5
OSPBEIJ 213C	Fourth-Year Modern Chinese	5

## Overseas Studies Courses in French

		Units
OSPPARIS 22P	Intermediate French I	5
OSPPARIS 23P	Intermediate French II	5
OSPPARIS 124P	Advanced French I	5
OSPPARIS 125P	Advanced French II	5

## Overseas Studies Courses in German

		Units
OSPBER 1Z	Accelerated German: First and Second Quarters	8
OSPBER 2Z	Accelerated German, Second and Third Quarters	8
OSPBER 3B	German Language and Culture	7
OSPBER 21B	Intermediate German	7
OSPBER 100B	Berlin Heute	2
OSPBER 101B	Advanced German	5

## Overseas Studies Courses in Italian

		Units
OSPFLOR 21F	Accelerated Second-Year Italian, Part A	5
OSPFLOR 22F	Accelerated Second-Year Italian Part B	5

OSPFLOR 31F	Advanced Oral Communication: Italian	3
-------------	--------------------------------------	---

## Overseas Studies Courses in Japanese

		Units
OSPKYOTO 2K	First-Year Japanese Language, Culture, and Communication, Second Quarter	5
OSPKYOTO 3K	First-Year Japanese Language, Culture, and Communication, Third Quarter	5
OSPKYOTO 21K	Second-Year Japanese Language, Culture, and Communication, First Quarter	5
OSPKYOTO 22K	Second-Year Japanese Language, Culture, and Communication, Second Quarter	5
OSPKYOTO 23K	Second-Year Japanese Language, Culture, and Communication, Third Quarter	5
OSPKYOTO 102K	Third-Year Japanese Language, Culture, and Communication, Second Quarter	5
OSPKYOTO 103K	Third-Year Japanese Language, Culture, and Communication, Third Quarter	5
OSPKYOTO 210K	Advanced Japanese	5

## Overseas Studies Courses in Spanish

		Units
OSPMADRD 12M	Accelerated Second-Year Spanish I	5
OSPMADRD 13M	Accelerated Second-Year Spanish II	5
OSPMADRD 102M	Composition and Writing Workshop for Students in 3-5 Madrid	
OSPSANTG 12S	Accelerated Second-Year Spanish, Part I: Chilean Emphasis	5
OSPSANTG 13S	Accelerated Second-Year Spanish, Part II: Chilean Emphasis	5
OSPSANTG 102S	Composition and Writing Workshop for Students in 3-5 Santiago	

## Latin American Studies

Courses offered by the Interdisciplinary Program in Latin American Studies are listed under the subject code LATINAM on the Stanford Bulletin's ExploreCourses web site (<https://explorecourses.stanford.edu>).

The Center for Latin American Studies (CLAS) supports research and teaching in all fields of study as they relate to Latin America. Academic programs encourage interdisciplinary approaches and draw on the expertise of nearly sixty active affiliated faculty members representing Stanford's various schools and departments. Stanford University Libraries' substantial Latin American collections are valuable resources for students, faculty, and visiting researchers alike. Each year CLAS hosts a number of Tinker Visiting Professors, highly distinguished Latin American and Iberian scholars who come to Stanford to teach a course in their field of specialization. The Center for Latin American Studies maintains a highly active public events calendar and provides funding to students and faculty for a variety of research, teaching, internship, and conference activities. Stanford offers three formal academic programs in Latin American Studies: an Undergraduate Minor, Interdisciplinary Honors, and a Master of Arts degree. The Center is a U.S. Department of Education Title VI National Resource Center for Latin America.

## Undergraduate Programs in Latin American Studies

Stanford Global Studies offers a minor with a Latin American Studies Specialization. Although there is no undergraduate major in Latin American Studies, students may concentrate on Latin America through other departmental and interdisciplinary degree programs, such as

Anthropology (p. 315), History (p. 490), Political Science (p. 588), Iberian and Latin American Cultures (p. 508), or International Relations (p. 524). Interested students should consult the relevant departmental web sites and sections of this bulletin for further information.

Undergraduates can obtain a coterminal M.A. degree in Latin American Studies while concurrently working on their undergraduate major by applying during the regular admissions cycle no later than their senior year.

### Financial Aid

Each summer, CLAS awards grants to a small number of undergraduates to complete internships in Latin America. Applications include a proposal, academic transcript, and letters of recommendation. Students from any department are eligible to apply. See the Center for Latin American Studies (<http://las.stanford.edu>) website.

Students in undergraduate programs who plan to enroll in Portuguese, Quechua, or Nahuatl language and area or international studies courses may be eligible for Academic Year and Summer Foreign Language and Area Studies (FLAS) fellowships. Recipients of FLAS fellowships must be American citizens or permanent residents. For detailed program information and eligibility, see the Center for Latin American Studies (<http://las.stanford.edu>) website.

## Graduate Programs in Latin American Studies

The one-year master's program in Latin American Studies is designed for students who have experience working, living, or studying in Latin America or Iberia and little prior course work on Latin America.

Stanford University does not offer a Ph.D. program in Latin American Studies; however, doctoral candidates may concentrate on Latin America through other departmental programs, such as Anthropology, History, Political Science, or Iberian and Latin American Cultures. Interested applicants should consult the relevant departmental web sites and sections of this bulletin for admissions information and further details.

### Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Latin American Studies and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

### Admission

The application deadline for the 2016-17 academic year is December 8, 2015. Applicants submit an online application, including a 500-word statement of purpose, resumé, 10-15 page double-spaced academic writing sample, and three letters of recommendation. In addition, all applicants must submit official transcripts and GRE general test scores. TOEFL scores are required of applicants whose first language is not English or who did not earn a degree from an undergraduate institution where English is the primary language of instruction. For information on university graduate admissions and to access the online application, visit the Office of Graduate Admissions (<http://gradadmissions.stanford.edu>) website.

Applicants must meet the University admission requirements, have a working knowledge of Spanish or Portuguese at the university third-year level or higher, and have experience working, living, or studying in Latin America or Iberia prior to admission.

CLAS takes a broad approach to evaluating applications for admission. As important as GRE scores and grades are the applicant's essay, letters

of recommendation, academic writing sample, and the experiences and goals conveyed through the personal statement and resume.

Students interested in pursuing the joint degree program in Latin American Studies and Law (J.D.) or a dual degree in Latin American Studies and Business (M.B.A.) or Medicine (M.D.) must apply to each program separately and be accepted by both. Details about the joint and dual degree programs can be found in the "Master's (p. 543)" tab in this section.

### Financial Aid

The Center for Latin American Studies provides several graduate fellowships as well as limited course assistantships with the Tinker Visiting Professors each quarter.

Students in graduate programs who plan to enroll in Portuguese, Quechua, or Nahuatl language and area or international studies courses may be eligible for Academic Year and Summer Foreign Language and Area Studies (FLAS) fellowships. Recipients of FLAS fellowships must be American citizens or permanent residents. Applicants to the M.A. program have priority in the annual FLAS competition; in recent years CLAS has also awarded FLAS fellowships to students enrolled in the Professional Schools. For detailed program information and eligibility, see the Center for Latin American Studies (<http://las.stanford.edu>) website.

CLAS awards Working Group grants to graduate students across the University who wish to organize events such as lectures, speaker series, symposia, exchange of working papers, and collaborative research efforts. For detailed program information and eligibility, see the Center for Latin American Studies (<http://las.stanford.edu>) website.

*The minor in Latin American Studies is no longer accepting applicants. It has been replaced by the minor in Global Studies with Latin American Studies Specialization. Students currently enrolled in the pre-existing minor in Latin American Studies should consult the Stanford Bulletin (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/latinamericanstudies/archive/#text>) of the year in which they declared the minor for degree requirements.*

## Minor in Global Studies with Latin American Studies Specialization

The minor in Stanford Global Studies, Latin American Studies specialization, consists of a core set of courses surveying the history, politics, society, ecology, and culture of the Latin American region; advanced language training; and in-depth course work.

Students from any major interested in applying for admission to this minor program should consult Stanford Global Studies. Students who wish to complete the minor must declare online (through Axess (<http://axess.stanford.edu>)) and submit a proposal of course work no later than the second quarter of the junior year. The minor must be completed by the second quarter of the senior year. Units taken for a student's major cannot be double-counted towards the minor.

Students consult with their minor adviser to develop individual programs. The minor is especially well-suited for undergraduates who plan to make service, research, or study abroad in Latin America a part of their Stanford experience.

The Global Studies Minor with Specialization in Latin American Studies is open to students in any major.

Upon completion of all requirements, final certification of the minor is made by the Center for Latin American Studies subcommittee on undergraduate programs. The minor and the specialization appear on the transcript but they do not appear on the diploma.

## Declaring the Global Studies Minor with Latin American Studies Specialization

To declare the Global Studies minor with Latin American Studies specialization, students must:

1. Set up an appointment with Elizabeth Saenz-Ackerman, <esaenz@stanford.edu (asaenz@stanford.edu)>, Associate Director for the Latin American Studies Center to discuss your academic plan.
2. Declare the Global Studies minor in Axess (<http://axess.stanford.edu>).
3. Complete the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program ([https://studentaffairs.stanford.edu/sites/default/files/registrar/files/change\\_UG\\_program.pdf](https://studentaffairs.stanford.edu/sites/default/files/registrar/files/change_UG_program.pdf)) form in order to declare the Latin American Studies specialization. Submit the form to the minor adviser Elizabeth Saenz-Ackerman in Bolivar House, 582 Alvarado Row.

## Requirements

1. Completion of 28 units as follows. Students may not double-count courses for completing major and minor requirements. At least 13 of the 28 units must be completed at Stanford. All courses to be counted toward the minor must be taken for a letter grade.
  - a. GLOBAL 101 Global Studies Gateway Course (3 units)
  - b. A 5-unit course surveying Latin America, either ILAC 131 Introduction to Latin America: Cultural Perspectives or an approved substitute.
  - c. 20 additional units in courses which together comprise a coherent focus on a theoretical problem or issue of the region, such as but not limited to
    - i culture and identity
    - ii political economy
    - iii sustainable development.
  - d. All courses, with the exception of Overseas Studies courses, must be at the 100-level or higher. For approved courses, see the "Related Courses" tab in this section.
  - e. At least 13 of the 28 units must be completed at Stanford. All courses to be counted toward the minor must be taken for a letter grade.
2. Foreign Language Requirement. The minimum requirement for completion of the minor in Global Studies with Latin American Studies Specialization is advanced proficiency in Spanish or Portuguese by one of the following:
  - a. Completion of seven quarters of college-level study of Spanish or Portuguese.
  - b. Completion of a course taught in Spanish or Portuguese at the 100-level or higher, with a letter grade of 'B' or higher. This may be a course on Spanish or Portuguese language or literature, or some other subject.
  - c. Achievement of the advanced proficiency level on the ACTFL scale in a test administered by the Stanford Language Center. Contact the Stanford Language Center (p. 537) for test dates and procedures.
3. Recommended: experience in Latin America such as study abroad, field research, or an internship.
  - Students present their work in an end-of-year capstone seminar with other SGS minors and led by SGS faculty.

## Course List

For a representative, rather than comprehensive, list of courses that count towards the minor, see the Related Courses tab in this section of the Bulletin. Other courses may also fulfill the requirements; students

should consult their Latin American Studies minor adviser concerning which courses might fulfill minor requirements.

## Master of Arts in Latin American Studies

The Master of Arts in Latin American Studies is an interdisciplinary program. The curriculum consists of a core set of courses surveying the history, politics, society, ecology, and culture of the Latin American region; advanced language training; and in-depth course work. In consultation with a faculty adviser, students select a course of study suited to their individual interests.

## Coterminal Master's Degrees in Latin American Studies

Undergraduates at Stanford may apply for admission to the coterminal master's program in Latin American Studies when they have earned a minimum of 120 units toward graduation, including advanced placement and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. The application deadline for the 2016-17 academic year is December 8, 2015.

Coterminal applicants must submit:

- the Application for Admission to Coterminal Masters' Program form (<https://stanford.box.com/CotermApplic>)
- a 500-word statement of purpose
- a resumé
- a 10-15 page double-spaced academic writing sample
- three letters of recommendation
- a Stanford transcript
- GRE general test scores

Coterminal applicants must have a minimum cumulative GPA of 3.5 and a working knowledge of Spanish or Portuguese at a university third-year level or higher.

## University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

## Degree Requirements

University requirements for the master's degree are described in the "Graduate Degrees General Requirements (p. 45)" section of this bulletin.

The program requires completion of a minimum of 45 graduate units. Each student is assigned a faculty adviser who works with the student to develop a customized program of study. All courses for the M.A. degree must be at the 100-level or higher, with at least half being at the 200-level or higher.

Candidates to the M.A. in Latin American Studies must complete the following:

#### Required Courses

##### a. Culture and Society

HISTORY 371	Graduate Colloquium: Explorations in Latin American Social History (students must register for 5 units)	5
-------------	---	---

##### b. Environment, Ecology, and Sustainability

ANTHRO 262	Indigenous Peoples and Environmental Problems	5
------------	---	---

##### c. Political Economy

POLISCI 348S	Latin American Politics	5
--------------	-------------------------	---

<b>Seminar Requirement: once per quarter.</b>		<b>3</b>
---	--	----------

LATINAM 200	Seminar on Contemporary Issues in Latin American Studies	
-------------	--	--

Total Units		18
-------------	--	----

1. Core courses (15 units): one core 5-unit course in each of three fields of specialization: Culture and Society; Environment, Ecology, and Sustainability, and Political Economy. See above for courses offered this year.
2. *Related courses (15 units)*: three courses (5 units each), one from each of the three fields of specialization listed in '1' above. For approved courses, see the "Related Courses (p. 545)" tab in this section.
3. *Elective courses (10-15 units)*: three elective courses (3-5 units each) in one of the three fields of specialization (see '1' above) from across the University's offerings, selected with guidance and approval from the faculty adviser.
4. *Language requirement*: at least 3 units of course work on a second Latin American language. Students proficient in both Spanish and Portuguese must take either an advanced third-year language course in either Spanish or Portuguese or beginning Quechua; students proficient in only Spanish or only Portuguese must take a basic course in the language in which they are not already proficient. Up to 6 units of foreign language coursework may be applied toward the M.A. degree. All foreign language coursework must be taken at the 100-level or higher.
5. *Seminar requirement*: 3 units (1 per quarter) of LATINAM 200 Seminar on Contemporary Issues in Latin American Studies.
6. *Thesis option*: students may elect to write a master's thesis; they may register for LATINAM 398 Master's Thesis for up to 10 units of thesis research under the guidance of an Academic Council faculty member. Thesis units may be counted toward the elective field unit requirements (requirement number 3, above).
7. *Grade requirements*: All courses to be counted toward the MA (with the only exception being LATINAM 200 Seminar on Contemporary Issues in Latin American Studies) must be taken for a letter grade and earn a B- or better. M.A. candidates must maintain a cumulative GPA of 3.0 or higher.

## Joint Degree Program in Latin American Studies and Law

The joint degree program in Latin American Studies and Law allows students to pursue the M.A. degree in Latin American Studies concurrently with the Doctor of Jurisprudence (J.D.) degree, with a significant number of courses that may apply to both degrees. It is designed to train students interested in a career in teaching, research,

or the practice of law related to Latin American legal affairs. Students must apply separately to the Latin American Studies M.A. program and to the Stanford School of Law and be accepted by both. Completing this combined course of study requires approximately four academic years, depending on the student's background and level of language training. For more information, see the "Joint Degree Programs (p. )" section of this bulletin and consult with the program offices for the two programs.

## Units Dual Master's Degree with Medicine or Business

Stanford offers dual degree programs that grant an M.A. degree in Latin American Studies and a Master of Business Administration degree or a Medical Doctor degree. Students must apply separately to and be accepted by both the Latin American Studies M.A. program and the Graduate School of Business or School of Medicine.

*Director of the Center*: Rodolfo Dirzo

*Associate Director*: Elizabeth Sáenz-Ackermann

*Tinker Visiting Professors*: Amin Bassrei (Winter), Maria Epele (Winter, Spring), Geraldo W. Fernandes (Autumn, Winter), Joan Manuel Tresserras Gaju (Autumn), Marcelo Moreira (Winter), Juan Carlos Rulfo (Autumn), Henry Alexander Tantalean (Autumn)

*Affiliated Faculty and Staff*:

*Anthropology*: Clifford Barnett (emeritus), George Collier (emeritus), Lisa Curran, Carolyn Duffey, William Durham, James Fox, Angela Garcia, John Rick

*Art and Art History*: Enrique Chagoya

*Biology*: Gretchen Daily, Rodolfo Dirzo, Harold Mooney (emeritus), Peter Vitousek, Virginia Walbot

*BOSP Santiago*: Ivan Jaksic

*Carnegie Institution for Science*: Gregory Asner

*Comparative Literature*: Roland Greene, Hans Ulrich Gumbrecht, José David Saldivar

*Earth Sciences, School of*: Pamela Matson

*Economics*: Roger Noll (emeritus)

*Education, Graduate School of*: Paulo Blikstein, Martin Carnoy, Amado Padilla, Guadalupe Valdés

*Engineering, School of*: Jenna Davis, Leonard Ortolano

*English*: Ramón Saldivar (also Comparative Literature)

*Freeman Spogli Institute for International Studies*: Rosamond Naylor

*History*: Zephyr Frank, Ana Raquel Minian Andjel, Mikael Wolfe

*Hoover Institute*: Herbert Klein

*Human Biology*: Anne Firth Murray

*Iberian and Latin American Cultures*: Héctor Hoyos, Marília Librandi Rocha, Michael Predmore, Joan Ramon Resina, Jorge Ruffinelli, Lisa Surwillio, Yvonne Yarbro-Bejarano

*Language Center*: Alice Miano, Ana Sierra, Agripino Silveira, Lyriss Wiedemann

*Law, School of:* James Cavallaro, Jonathan Greenberg, Thomas Heller (emeritus)

*Linguistics:* John Rickford

*Medicine, School of:* Michele Barry, Gabriel Garcia, Grant Miller, Paul Wise

*Political Science:* Stephen Haber, Terry Karl, Beatriz Magaloni, Robert Packenham (emeritus), Gary Segura, Michael Tomz

*Religious Studies:* Thomas Sheehan

*Sociology:* Tomás Jiménez, Michael Rosenfeld

*Stanford University Libraries:* Adán Griego, Sergio Stone, Robert Trujillo

## Latin American Studies Related Courses

The following courses may be used to satisfy requirements for the M.A. in Latin American Studies or minor in Stanford Global Studies, Latin American Studies specialization. Consult the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) web site for full course descriptions and class schedules.

When selecting courses from this list, note the following:

1. Overseas Studies courses, denoted by the subject code OSPSANTG, apply only to the undergraduate minor program and are not options for M.A. students.
2. Courses with numbers ending in the letter N or Q are Introductory Seminars for undergraduates and are not options for M.A. students. Courses ending in N give preference to freshmen; courses ending in Q give preference to sophomores.
3. All courses to be counted toward the master's or minor must be taken at the 100-level or higher, with the exception of Overseas Studies courses (see also note 1, above).
4. All courses to be counted toward the master's or minor must be taken for a letter grade.
5. For the M.A. degree, related courses must be taken for 5 units each. M.A. elective courses may be taken for 3-5 units each.
6. Some courses have prerequisites or special enrollment requirements. Students are responsible for making sure they have completed any prerequisites and/or secured an instructor's permission, as needed.

## Culture and Society

Courses related to the Culture and Society field of specialization include:

		Units
ANTHRO 102B	Aztec Language and Culture	3
ANTHRO 108A	The Formation of Political State in the Peruvian Andes	3-5
ANTHRO 124N	Maya Mythology and the Popol Vuh	3
ANTHRO 206A	Incas and their Ancestors: Peruvian Archaeology	3-5
ANTHRO 215B	Peoples and Cultures of Ancient Mesoamerica	5
ANTHRO 222A	Race and Culture in Mexico and Central America	3-5
ANTHRO 371	Living and Dying in the Contemporary World	5
CSRE 126B	Curricular Public Policies for the Recognition of Afro-Brazilians and Indigenous Population	3-4
FILMSTUD 316	International Documentary	4
HISTORY 106B	Global Human Geography: Europe and Americas	5
HISTORY 112	Medicine and Disease in the Ancient World	5
HISTORY 170	Colonial Latin America, 1400-1830	5
HISTORY 170B	Culture, Society and Politics in Latin America	5
HISTORY 173	Mexican Migration to the United States	3-5
HISTORY 203E	Global Catholicism	5

HISTORY 274E	Urban Poverty and Inequality in Latin America	5
HISTORY 301A	The Global Drug Wars	4-5
HISTORY 303J	Water in World History	4-5
HISTORY 366B	Immigration Debates in America, Past and Present	3-5
HISTORY 371	Graduate Colloquium: Explorations in Latin American Social History	4-5
HISTORY 373E	The Emergence of Nations in Latin America: Independence Through 1880	4-5
HISTORY 375C	History of Modern Mexico	4-5
HISTORY 379	Latin American Development: Economy and Society, 1800-2014	4-5
HISTORY 477	Transnational Latina/o History	4-5
ILAC 114N	Introduction to Lyric Poetry	3-5
ILAC 131	Introduction to Latin America: Cultural Perspectives	3-5
ILAC 161	Modern Latin American Literature	3-5
ILAC 224	Literature Inspired by the Spanish Republic and the Spanish Civil War	3-5
ILAC 245	Brazil's Rhythm and Songs	3-5
ILAC 247	Film and Politics: Argentina in the Hour of the Furnaces	3-5
ILAC 252	Guerillas	3-5
ILAC 253	Poverty, Redemption and Writing: Franciscanism in Latin America	3-5
ILAC 268	Cultural Policies in Latin America and Europe. 1980-2015.	3-5
ILAC 277	Spanish and Society: Rock en Español	3-5
ILAC 278A	Senior Seminar: Machado de Assis. Discourse Networks and the Novel in Brazil	3-5
ILAC 279	Searching for identity	3-5
ILAC 341	Roberto Bolaño	3-5
ILAC 363	Visions of the Andes	3-5
ILAC 367	João/Joyce: Guimarães Rosa and the World Novel	3-5
ILAC 382	Latin@ Literature	3-5
LAW 681E	Human Rights and Film	1
LAW 695	International Human Rights: Media and Education	2
RELIGST 188A	Issues in Liberation: Central America	5
SOC 350W	Workshop: Migration, Race, Ethnicity and Nation	1-3

## Environment, Ecology, and Sustainability

Courses related to the Environment, Ecology, and Sustainability field of specialization include:

		Units
ANTHRO 260	Social and Environmental Sustainability: The Costa Rican Case	3-5
ANTHRO 262	Indigenous Peoples and Environmental Problems	3-5
ANTHRO 278	Evolution and Conservation in Galapagos	5
ANTHRO 337B	Anthropological Approaches to Health Issues in Contemporary Latin America	5
BIO 234	Conservation Biology: A Latin American Perspective	3
BIO 355	Ecology and Conservation of the Brazilian Cerrado: a neglected Latin American Ecosystem	2
BIOE 371	Global Biodesign: Medical Technology in an International Context	3
EARTHSYS 121	Building a Sustainable Society: New Approaches for Integrating Human and Environmental Priorities	3
ETHICSOC 278M	Introduction to Environmental Ethics	4-5

GEOPHYS 212	Topics in Climate Change	2
HISTORY 303J	Water in World History	4-5
HISTORY 305E	Comparative Historical Development of Latin America and East Asia	4-5
HUMBIO 129	Critical Issues in International Women's Health	4
HUMBIO 129S	Global Public Health	4

## Political Economy

Courses related to the Political Economy field of specialization include:

		Units
ECON 103	Econometric Methods: Theory and Applications	5
ECON 106	World Food Economy	5
EDUC 306A	Economics of Education in the Global Economy	5
HISTORY 172A	Mexico: From Colony to Nation, or the History of an impossible Republic?	5
HISTORY 177D	U.S. Intervention and Regime Change in 20th Century Latin America	5
INTNLREL 141A	Camera as Witness: International Human Rights Documentaries	5
IPS 241	International Security in a Changing World	5
LAW 413T	Policy Practicum: Human Rights in the Americas: the Inter-American System	3-4
LAW 799	Regional Human Rights Protections: The Inter-American System	3
POLISCI 244C	Political Change in Latin America: The contemporary challenge to democracy	5
POLISCI 247G	Governance and Poverty	5
POLISCI 348S	Latin American Politics	3-5
POLISCI 440B	Comparative Political Economy	5

## Overseas Studies Courses in Latin American Studies

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPSANTG 14	Women Writers of Latin America in the 20th Century	4-5
OSPSANTG 29	Sustainable Cities: Comparative Transportation Systems in Latin America	4-5
OSPSANTG 41	Political Economy: Chile in Comparative Perspective	5
OSPSANTG 58	Living Chile: A Land of Extremes	5
OSPSANTG 62	Topics in Chilean History	4-5
OSPSANTG 68	The Emergence of Nations in Latin America	4-5
OSPSANTG 71	Santiago: Urban Planning, Public Policy, and the Built Environment	4-5
OSPSANTG 85	Marine Ecology of Chile and the South Pacific	5
OSPSANTG 116X	Modernization and its Discontents: Chilean Politics at the Turn of the Century	5

OSPSANTG 118X	Artistic Expression in Latin America	5
OSPSANTG 119X	The Chilean Economy: History, International Relations, and Development Strategies	5
OSPSANTG 129X	Latin America in the International System	4-5
OSPSANTG 130X	The Chilean Economy in Comparative Perspective	5

## Linguistics

Courses offered by the Department of Linguistics are listed under the subject code LINGUIST on the Stanford Bulletin's ExploreCourses web site.

Linguistics concerns itself with the fundamental questions of what language is and how it is related to the other human faculties. In answering these questions, linguists consider language as a cultural, social, and psychological phenomenon and seek to determine what is unique in languages, what is universal, how language is acquired, and how it changes. Linguistics is, therefore, one of the cognitive sciences; it provides a link between the humanities and the social and natural sciences, as well as education, and hearing and speech sciences.

The department offers courses at the undergraduate and graduate levels in the areas central to linguistic theory and analysis. Many of them deal with the analysis of structural patterns in the different components that make up language, including sounds (phonetics and phonology), meanings (semantics and pragmatics), words (morphology), sentences (syntax), and the ways they vary and change over time. Other courses integrate the analysis of linguistic structure with phenomena that directly concern other disciplines. These include courses in computational linguistics, language acquisition, the philosophy of language, psycholinguistics, and sociolinguistics.

A variety of open forums provide for the discussion of linguistic issues, including colloquia and regularly scheduled workshops in child language, computational linguistics, phonetics and phonology, psycholinguistics, semantics and pragmatics, sociolinguistics, and syntax.

## Mission of the Undergraduate Program in Linguistics

The mission of the undergraduate program in Linguistics is to provide students with basic knowledge in the principal areas of linguistics (phonetics, phonology, morphology, syntax, semantics, pragmatics, historical linguistics, and sociolinguistics) and the skills to do more advanced work in these subfields. Courses in the major also involve interdisciplinary work with connections to other departments including computer science, psychology, cognitive science, communication, anthropology, and foreign language. The program provides students with excellent preparation for further study in graduate or professional schools as well as careers in business, social services, government agencies, and teaching.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. By the end of the program, students are expected to be able to:

1. formulate theoretically interesting and tractable research questions;
2. find and collect information relevant to answering their research questions;
3. bring linguistic theory to bear in analyzing and evaluating information;
4. articulate the questions and outcomes of the process described in 1-3; and

- 5. engage with peers in an intellectual community around linguistic issues.

## Graduate Programs in Linguistics

The department offers an M.A., Ph.D., and Ph.D. minor in Linguistics.

### Learning Outcomes (Graduate)

The purpose of the master's program is to develop students' knowledge and skills in Linguistics and to prepare them for a professional career or doctoral studies. This is achieved through completion of courses, including course work in an area of specialization within the field, and experience with independent research.

The Ph.D. is conferred upon candidates who have demonstrated the ability to conduct substantive, independent research in Linguistics. Through completion of advanced coursework and rigorous methodological and analytical training, the doctoral program prepares students to make original contributions to knowledge in linguistics, to articulate the results of their work, and to demonstrate its significance to linguistics and related fields.

### Cognitive Science

Linguistics is participating with the departments of Philosophy and Psychology in an interdisciplinary program in Cognitive Science for doctoral students. The program is intended to provide an interdisciplinary education as well as a deeper concentration in linguistics. Students who complete the Linguistics and Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Linguistics.

To receive this designation, students must complete 30 units of approved course work. The 30 units cannot include courses counted elsewhere towards the Ph.D. Courses may be drawn from the participating departments, as well as from other departments, as long as their content is appropriate to the designation. At least 18 of the 30 units must be from outside the student's major department and must include course work in at least two other departments. Special topic seminars are excluded from the approved list in favor of more foundational courses.

## Linguistics Course Catalog Numbering System

Courses numbered under 100 are designed primarily for pre-majors. Courses with 100-level numbers are designed for majors, minors, and M.A. and Ph.D. minor candidates in Linguistics. Those with numbers 200 and above are primarily for graduate students, but with consent of the instructor some of them may be taken for credit by qualified undergraduates. At all levels, the course numberings indicate a special area, as follows:

Number	Special Area
00-04	General
05-09	Phonetics
10-14	Phonology
15-19	Morphology
20-29	Syntax
30-39	Semantics, Pragmatics, Discourse
40-49	Language Acquisition, Psycholinguistics
50-62	Sociolinguistics, Language Variation, Change
63-73	Language and Culture, Structure of a Language

74-79	Methods, Mathematical Linguistics, Statistics
80-89	Computational Linguistics
90-99	Directed Work, Theses, Dissertations

## Bachelor of Arts in Linguistics

The undergraduate major stresses the study of language both as a fundamental human faculty and as a changing social institution. At the core of the program is a set of departmental courses on the nature of human language; the major also draws on courses offered by other departments and programs.

The Linguistics major cuts across the humanities and the social and physical sciences. It provides a solid general education as a background for advanced studies in such disciplines as anthropology, cognitive science, communication, computer science, education (language, literacy, and culture), hearing and speech sciences, languages, law, linguistics, philosophy, and psychology.

### Degree Requirements

Requirements for the B.A. include at least 50 units of course work; at least 28 of these units must be in Linguistics. The remaining units may be in Linguistics or in related fields, with approval from the Undergraduate Adviser. Of the 50 units required for the major, no more than 12 may be below the 100 level. All required courses must be taken for a letter grade of C- or better. No more than two other courses used towards the 50 units of course work may be taken on a credit/no credit basis (CR/NC).

### Required Courses:

Specified Courses	Units
LINGUIST 105 Phonetics or LINGUIST Introduction to Phonology	
LINGUIST 196 Introduction to Research for Undergraduates (to be taken Autumn Quarter, junior year)	
LINGUIST 197A Undergraduate Research Seminar (to be taken Winter Quarter, senior year)	
Two 200-level courses in Linguistics (see explorecourses for current options)	
<b>Breadth Courses</b>	
Take one course each from three of the areas below, or one course each from two of the areas below plus LINGUIST 1.	
Courses that fulfill the breadth requirement include the following (specific courses that count to be revisited annually)	
LINGUIST 1 Introduction to Linguistics (may be counted toward the major only if taken before senior year)	
<b>LANGUAGE CHANGE AND TYPOLOGY</b>	
LINGUIST 160 Introduction to Language Change	
LINGUIST 162 History Through Language	
LINGUIST 167 Languages of the World	
<b>MORPHOLOGY AND SYNTAX</b>	
LINGUIST 116 Morphology	
LINGUIST 120 Introduction to Syntax	
LINGUIST 121A The Syntax of English	
LINGUIST 121B Crosslinguistic Syntax	
LINGUIST 184 Syntactic Theory and Implementation	
LINGUIST 222A Foundations of Syntactic Theory I	
LINGUIST 222B Foundations of Syntactic Theory II	
<b>SEMANTICS AND PRAGMATICS</b>	

LINGUIST 130A Introduction to Semantics and Pragmatics

LINGUIST 130B Introduction to Lexical Semantics

LINGUIST 230A Introduction to Semantics and Pragmatics

LINGUIST 230B Semantics and Pragmatics I

LINGUIST 232A Lexical Semantics

**SOCIOLINGUISTICS**

LINGUIST 150 Language in Society

LINGUIST 250 Sociolinguistic Theory and Analysis

**PSYCHOLINGUISTICS**

LINGUIST 140 Language Acquisition I

LINGUIST 240 Language Acquisition I

LINGUIST 141 Language and Gesture

LINGUIST 144 Minds and Machines

PSYCH 131 Language and Thought

**COMPUTATIONAL LINGUISTICS**

LINGUIST 180 From Languages to Information

LINGUIST 280 From Languages to Information

LINGUIST 183 Programming and Algorithms for Natural Language Processing

LINGUIST 188 Natural Language Understanding

LINGUIST 278 Programming for Linguists

## Other Requirements

*Other course work*— additional courses counting toward the 50 unit requirement should form a coherent program of study. Majors should discuss this course work with faculty and the mentor in the major, and get specific approval for courses outside the department from the Undergraduate Adviser.

*Language*— majors must have competence in at least one language other than English as part of their understanding of the field of linguistics and its study. This is usually demonstrated by the completion of six quarters of language study at Stanford or equivalent; level of proficiency is determined by the Language Center or the relevant language department.

Majors may petition to be exempted from the language requirement if they have grown up speaking a language other than English and can use it for everyday purposes and for linguistic analysis.

## Honors Program

Students who wish to undertake a more intensive program of study, including independent research, should pursue departmental honors. Students should apply for honors by the end of Spring Quarter of their junior year. As part of the application, the student must write a research proposal describing the honors project, which must be approved by the faculty adviser. Approval is given only to students who have maintained a grade point average (GPA) of 3.3 (B+) or better in the courses required for the major.

Honors students complete a total of 60 units including the 50 units for the major, plus 10 additional units of Independent Study and Honors Research. In addition, they must complete an honors thesis based on research conducted with a principal adviser who must be a member of the Linguistics faculty, and a secondary faculty adviser who may, with the approval of the Undergraduate Studies Committee, be a member of another department. In the Autumn Quarter of the senior year, honors students enroll in LINGUIST 199 Independent Study, to work closely with one of their advisers on the research project. In Winter and Spring quarters, honors students enroll in LINGUIST 198 Honors Research, with the student's principal adviser for close supervision of the honors thesis. The thesis must be submitted in final, acceptable, form by May 15. The thesis topic is presented orally at a department Honors Colloquium late in Spring Quarter.

## Joint Major Program in Linguistics and Computer Science

The joint major program (JMP), authorized by the Academic Senate for a pilot period of six years beginning in 2014-15, permits students to major in both Computer Science and one of ten Humanities majors. See the "Joint Major Program (p. 26)" section of this bulletin for a description of University requirements for the JMP. See also the Undergraduate Advising and Research JMP web site and its associated FAQs.

Students completing the JMP receive a B.A.S. (Bachelor of Arts and Science).

Because the JMP is new and experimental, changes to procedures may occur; students are advised to check the relevant section of the bulletin periodically.

### Linguistics Major Requirements in the Joint Major Program

See the "Computer Science Joint Major Program (p. 231)" section of this bulletin for details on Computer Science requirements.

All majors must take at least 50 units of course work in linguistics and related fields, with no more than 12 units below the 100 level and at least 8 units above the 200 level. No more than two courses (and none from the breadth list above) can be taken on a credit/no credit basis (CR/NC).

Students in the joint major must take LINGUIST 180 From Languages to Information as one of these breadth courses. Students may count LINGUIST 180/CS 124 towards both major requirements as long as the units are not double-counted. If LINGUIST 180/CS 124 is required for both Linguistics and a student's specific CS track, Linguistics works with the student to identify another course (possibly directed reading/independent study for 3-4 units) that would benefit the academic plan. (In this scenario, LINGUIST 180/CS 124 fulfills major requirements in both Linguistics and CS, but the units are only counted towards CS; additional units of work would be identified in Linguistics to meet the unit requirements.)

All majors must take LINGUIST 196 Introduction to Research for Undergraduates, usually in the junior year, and all majors must take LINGUIST 197A Undergraduate Research Seminar, usually in the senior year.

Within the 50 unit total, students in the joint major are encouraged to sign up for Directed Research units as part of completing the integrative capstone project. The expectation is that this project is supervised by a Linguistics faculty member. The specific number of units varies and is decided by the student and faculty adviser.

Different from Linguistics majors, CS + Linguistics joint majors are not required to display competence in a language other than English and therefore are not required to complete the equivalent of six quarters of language study.

For breadth within Linguistics, each joint major must take at least one course each from five of the following eight areas. Courses offered that fulfill the breadth requirement include the following (specific courses that count to be revisited annually):

		Units
<b>General Linguistics</b>		
LINGUIST 1	Introduction to Linguistics (may be counted toward the major only if taken before senior year)	4
<b>Phonetics and Phonology</b>		
LINGUIST 105	Phonetics	3-4
LINGUIST 110	Introduction to Phonology	4

LINGUIST 205A	Phonetics	3-4
LINGUIST 210A	Phonology	3-4
<b>Language Change and Typology</b>		
LINGUIST 160	Introduction to Language Change	4
LINGUIST 162	History Through Language	3-4
LINGUIST 167	Languages of the World	3-4
<b>Morphology and Syntax</b>		
LINGUIST 120	Introduction to Syntax	4
LINGUIST 121A	The Syntax of English	4
LINGUIST 121B	Crosslinguistic Syntax	4
LINGUIST 184	Syntactic Theory and Implementation	4
LINGUIST 222A	Foundations of Syntactic Theory I	3-4
<b>Semantics and Pragmatics</b>		
LINGUIST 130A	Introduction to Semantics and Pragmatics	4
	or LINGUIST 230A Introduction to Semantics and Pragmatics	
LINGUIST 130B	Introduction to Lexical Semantics	3-4
<b>Sociolinguistics</b>		
LINGUIST 65	African American Vernacular English	3-5
LINGUIST 150	Language in Society	2-4
LINGUIST 156	Language and Gender	4
LINGUIST 157	Sociophonetics	1-4
LINGUIST 250	Sociolinguistic Theory and Analysis	3-4
<b>Psycholinguistics</b>		
LINGUIST 140	Language Acquisition I	4
LINGUIST 141	Language and Gesture	3
LINGUIST 144	Minds and Machines	4
PSYCH 131	Language and Thought	4
<b>Computational Linguistics</b>		
LINGUIST 180	From Languages to Information	3-4
LINGUIST 188	Natural Language Understanding	3-4

## Declaring a Joint Major Program

To declare the joint major, students must first declare each major through Axxess, and then submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>) The Major-Minor and Multiple Major Course Approval Form ([http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin\\_MultMaj.pdf](http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin_MultMaj.pdf)) is required for graduation for students with a joint major.

## Dropping a Joint Major Program

To drop the joint major, students must submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>) . Students may also consult the Student Services Center (<http://studentservicescenter.stanford.edu>) with questions concerning dropping the joint major.

## Transcript and Diploma

Students completing a joint major graduate with a B.A.S. degree. The two majors are identified on one diploma separated by a hyphen. There will be a notation indicating that the student has completed a "Joint Major". The two majors are identified on the transcript with a notation indicating that the student has completed a "Joint Major".

## Minor in Linguistics

Requirements for the minor include at least 28 units of course work (typically seven courses) in Linguistics and related fields, approved in advance by the Linguistics undergraduate studies adviser. No more than two courses, neither of which is among the required courses, may be taken on a credit/no credit basis. The courses counting towards the

minor must be units beyond those needed to satisfy the student's major course of study.

1.

### Required courses for the minor:

LINGUIST 1 Introduction to Linguistics  
Take one course each from two of the three areas below: 8

#### PHONETICS AND PHONOLOGY

LINGUIST 105 Phonetics

LINGUIST 110 Introduction to Phonology

#### SYNTAX

LINGUIST 120 Introduction to Syntax

LINGUIST 121A The Syntax of English

LINGUIST 121B Crosslinguistic Syntax

#### SEMANTICS AND PRAGMATICS

LINGUIST 130 Introduction to Semantics and Pragmatics

LINGUIST 130B Introduction to Lexical Semantics

Select one of the following: 4

LINGUIST 150 Language in Society

LINGUIST 160 Introduction to Language Change

or, in advance consultation with the Linguistics undergraduate studies adviser, a course in historical linguistics or the history of a language.

2. At least four other courses determined in advance consultation with the Linguistics undergraduate studies adviser. Students are encouraged to take at least one 200-level Linguistics course. Students may also choose to do independent work with a faculty member of their choice.

## Master of Arts in Linguistics

The University's basic requirements for the master's degree are discussed in the "Graduate Degrees (p. 45)" section of this bulletin. The following are additional departmental requirements. Candidates should review the department's Guidelines for the M.A. Degree in Linguistics for further particulars concerning these requirements.

1. *Courses*—Individual programs should be worked out in advance with an adviser in Linguistics keeping the following requirements and guidelines in mind. The M.A. degree requires the completion of 45 units; at least 36 of these must be in Linguistics. The course work must include one introductory graduate-level course in each of the areas of syntax, semantics, and sound structure, as well as four courses in the student's area of specialization. If the student can make a compelling case, the department may allow up to 9 of the 45 units to be in a department other than Linguistics. Courses from outside the department must have clear linguistic content or contribute methodological knowledge that facilitates the thesis project; furthermore, if the student is simultaneously enrolled in a degree program in another department, not all of these 9 units can be earned in that department. No more than two courses should be at the 100 level. The majority of the courses taken towards the 45 units of degree program course work must be taken for a letter grade; these should include the three required introductory courses and the four courses constituting the specialization, which should all be completed with at least a 'B'. The overall course work grade point average (GPA) must be at least 3.0 (B).
2. *Language*—Students must complete a language requirement. There are two options for fulfilling the requirement:
  - a. the student may demonstrate reading knowledge of a non-native language in which a substantial linguistic literature is written, with sufficient facility to understand and interpret linguistic research published in that language, or

Units

- b. the student must complete an original paper demonstrating the ability to carry out in-depth research on the structure of a non-native language.
3. *Thesis or Thesis Project*—A research paper supervised by a committee of three faculty (normally fulfilled by up to 6 units of LINGUIST 398 Directed Research).

## Coterminal Master's Degree Program in Linguistics

The Department of Linguistics admits a limited number of undergraduates to the coterminal degree program. Students are required to submit to the department a complete application, which includes a statement of purpose identifying a thesis topic, a Stanford transcript, three letters of recommendation (at least one of which must be from a faculty member in Linguistics), and a proposed course of study (worked out in advance with a Linguistics adviser). Applicants for the coterminal degree may apply as early as their eighth quarter and no later than early in the eleventh quarter of undergraduate study. Decisions on admission to the coterminal degree program rest with the Graduate Admissions Committee of the Department of Linguistics.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

## Doctor of Philosophy in Linguistics

The following requirements are in addition to the basic University requirements for the degree sought; see the "Graduate Degrees (p. 45)" section of this bulletin. Candidates should review the department's Guidelines for the Degree of Ph.D. in Linguistics (<https://linguistics.stanford.edu/department-resources>) for further particulars concerning these requirements.

1. *Language*—candidates must demonstrate the ability to read at least one foreign language in which a substantial linguistic literature is written, with sufficient facility to understand and to interpret linguistic research published in that language. (Particular areas of specialization may require additional research languages.) In addition, each candidate must demonstrate an explicit in-depth knowledge of the structure of at least one language (normally neither

the candidate's native language nor the language used for the reading exam).

2. *Courses*—a minimum of 135 units of graduate work beyond the bachelor's degree, or 90 units beyond the master's degree. The course requirements detailed in the Department of Linguistics Ph.D. Handbook guarantee that each candidate covers a sufficient set of subareas within the field. Candidates must maintain a satisfactory record in the number and distribution of units completed. The overall course work GPA must be at least 3.0 (B), and all of the basic courses should be completed with at least a 'B'.
3. *Research*—the prospective Ph.D. candidate is expected to complete two substantial qualifying papers. The deadline for completion of the first qualifying paper is the end of Autumn Quarter of the second year; the deadline for completion of the second qualifying paper is the end of Autumn Quarter of the third year. The subject matter of the two papers, although it may be related (for example, same language), must be clearly distinct. The requirement is fulfilled by one quarter of LINGUIST 395 Research Workshop (1-2 units), and by oral discussion with a committee of at least three faculty members selected by the student and the faculty.
4. *Candidacy*—students must complete a prescribed portion of the basic course requirement (see item 2 above), one language requirement (see item 1 above), and one qualifying paper (see item 3 above) by the end of their sixth academic quarter, normally the Spring Quarter of the second year. The department faculty reviews each sixth quarter student and votes on whether to admit the student to candidacy. A student is only admitted to candidacy if, in addition to the student's fulfilling the specified department prerequisites, the faculty makes the judgment that the student has the ability to complete the remaining stages of the Ph.D. program at a level of superior quality. Students who are not admitted to candidacy will be terminated from the program; at the department's discretion, they may be allowed to complete any requirements that remain for the M.A. degree and receive this degree.
5. *Teaching*—at least three quarters serving as a teaching assistant in Linguistics courses.
6. *Dissertation*—
  - a. appointment of a dissertation committee.
  - b. an approved written dissertation proposal is required by the end of Autumn Quarter of the fourth year.
  - c. oral discussion of the dissertation proposal with an augmented dissertation committee by Spring Quarter of the fourth year.
  - d. passing a University oral examination on the dissertation and related areas which includes a public presentation of the dissertation research.
  - e. dissertation (up to 15 units of LINGUIST 399 Dissertation Research).

## Ph.D. Minor in Linguistics

1. *Courses*—the candidate must complete 30 units of course work in linguistics. The University requires that at least 20 of these units be at the 200 level or above; the remaining 10 units must be at the 100 level or above. The coursework for the minor must include one introductory course in each of sound structure, syntax, and semantics/pragmatics; this requirement is typically fulfilled by LINGUIST 105 Phonetics or LINGUIST 110 Introduction to Phonology, LINGUIST 121A The Syntax of English or LINGUIST 121B Crosslinguistic Syntax, LINGUIST 130A Introduction to Semantics and Pragmatics or LINGUIST 130B Introduction to Lexical Semantics or by 200-level introductory courses in the same areas. Courses submitted for the minor must be incremental units beyond those used to satisfy the major. Individual programs should be worked out in advance with the student's Ph.D. minor adviser in Linguistics. The

majority of the courses taken towards the 30 units of coursework must be taken for a letter grade; these should include the three required introductory courses, which should all be completed with at least a 'B'. The overall coursework grade point average (GPA) must be at least 3.0 (B).

2. *Research Project (optional)*—the candidate may elect to present a paper which integrates the subject matter of linguistics into the field of specialization of the candidate.
3. The Linguistics minor adviser or designee serves on the candidate's University oral examination committee and may request that up to one-third of the examination be devoted to the minor subject.

### Faculty

*Emeriti:* (Professors) Joan Bresnan, Clara N. Bush, Shirley Brice Heath, William R. Leben, Stanley Peters, Elizabeth C. Traugott, Thomas A. Wasow

*Chair:* Daniel Jurafsky

*Professors:* Eve V. Clark (on leave Spring), Penelope Eckert, Daniel Jurafsky, Martin Kay, Paul Kiparsky, Beth Levin (on leave Spring), Christopher Manning, John R. Rickford

*Associate Professors:* Arto Anttila, Christopher Potts, Meghan Sumner

*Assistant Professors:* Vera Gribova (on leave Spring), Boris Harizanov, Daniel Lassiter, Robert Podesva (on leave AY 15-16)

*Professor (Research):* Cleo Condoravdi

*Courtesy Professors:* Herbert H. Clark, Kenji Hakuta, Yoshiko Matsumoto, James McClelland, Orrin W. Robinson III, Chao Fen Sun

*Courtesy Associate Professors:* H. Samy Alim, James A. Fox, Miyako Inoue, Michael C. Frank

*Courtesy Assistant Professors:* Noah Goodman

*Senior Lecturer:* Philip L. Hubbard, Language Center

*Lecturers:* Bill MacCartney, Sarah Ogilvie

*Consulting Professors:* Jared Bernstein, Ronald Kaplan, Lauri Karttunen, Paul Kay, Livia Polanyi, Annie Zaenen, Arnold Zwicky

## Mathematical and Computational Science

Courses offered by Mathematical and Computational Science program are listed under the subject code MCS on the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) website.

This interdisciplinary undergraduate degree program in MCS is administrated by the departments of Mathematics, Computer Science, and Statistics. It provides a core of mathematics basic to all the mathematical sciences and an introduction to concepts and techniques of computation, optimal decision making, probabilistic modeling, and statistical inference.

Using the faculty and courses of the departments listed above, this major prepares students for graduate study or employment in the mathematical and computational sciences or in those areas of applied mathematics which center around the use of computers and are concerned with the problems of the social and management sciences. A biology option is offered for students interested in applications of mathematics, statistics, and computer science to the biological sciences (bioinformatics, computational biology, statistical genetics, neurosciences); and in a similar spirit, an engineering and statistics option.

## Undergraduate Mission Statement for Mathematical and Computational Science

The mission of the Mathematical and Computational Science Program is to provide students with a core of mathematics basic to all the mathematical sciences and an introduction to concepts and techniques of computation, optimal decision making, probabilistic modeling and statistical inference. The program is interdisciplinary in its focus, and students are required to complete course work in mathematics, computer science, statistics, and management science and engineering. A computational biology track is available for students interested in biomedical applications. The program prepares students for careers in academic, financial and government settings as well as for study in graduate or professional schools.

### Learning Outcomes

The program expects undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to be able to demonstrate:

1. understanding of principles and tools of statistics.
2. command of optimization and its applications and the ability to analyze and interpret problems from various disciplines.
3. an understanding of computer applications emphasizing modern software engineering principles.
4. an understanding of multivariate calculus, linear algebra, and algebraic and geometric proofs.

## Bachelor of Science in Mathematical and Computational Science

The requirement for the bachelor's degree, beyond the University's basic requirements, is an approved course program of 78-84 units, distributed as follows:

	<b>Units</b>
<b>Mathematics (MATH)</b>	<b>28</b>
MATH 41      Calculus <sup>1</sup>	5
MATH 42      Calculus <sup>1</sup>	5
Select one of the following:	5
MATH 51      Linear Algebra and Differential Calculus of Several Variables	
MATH 51H     Honors Multivariable Mathematics	
Select one of the following:	5
MATH 52      Integral Calculus of Several Variables	
MATH 52H     Honors Multivariable Mathematics	
Select one of the following:	5
MATH 53      Ordinary Differential Equations with Linear Algebra	
MATH 53H     Honors Multivariable Mathematics	
Select one of the following:	3
MATH 104     Applied Matrix Theory	
MATH 113     Linear Algebra and Matrix Theory	
<b>Computer Science (CS)</b>	<b>22-24</b>
CS 103          Mathematical Foundations of Computing	5
CS 106A          Programming Methodology <sup>1</sup>	5
and	
CS 106B          Programming Abstractions	5
or	
CS 106X          Programming Abstractions (Accelerated)	5
Select two of the following:	7-9

CME 108	Introduction to Scientific Computing	
CS 107	Computer Organization and Systems	
CS 154	Introduction to Automata and Complexity Theory	
CS 161	Design and Analysis of Algorithms	
CS 181W	Computers, Ethics, and Public Policy	
<b>Management Science and Engineering (MS&amp;E)</b>		7-11
MS&E 211	Linear and Nonlinear Optimization	
MS&E 221	Stochastic Modeling	
Or select three of the following:		
MS&E 111	Introduction to Optimization	
MS&E 121	Introduction to Stochastic Modeling	
MS&E 211	Linear and Nonlinear Optimization	
MS&E 221	Stochastic Modeling	
MS&E 251	Stochastic Control	
<b>Statistics (STATS)</b>		11-12
STATS 116	Theory of Probability	5
STATS 200	Introduction to Statistical Inference	3
Select one of the following:		3
STATS 191	Introduction to Applied Statistics	
STATS 203	Introduction to Regression Models and Analysis of Variance	

<sup>1</sup> Students who scored a 5 on both the Calculus AB and BC advanced placement exams (total of 10 units) can be waived out of MATH 41 and MATH 42; A score of 4 or 5 in Computer Science A will receive credit for CS106A (5 units). See also the Registrar's Advanced Placement (<https://studentaffairs.stanford.edu/registrar/students/ap>) web site (AP (<https://studentaffairs.stanford.edu/registrar/students/baccalaureate-credit>) or IB (<https://studentaffairs.stanford.edu/registrar/students/baccalaureate-credit>) exams).

## Writing in the Major Requirement

The University requires students to complete at least one approved writing-intensive course in each of their majors. See the Hume Center for Writing and Speaking (<https://undergrad.stanford.edu/tutoring-support/hume-center/writing/writing-major>) web site for a full description of the WIM (<https://undergrad.stanford.edu/tutoring-support/hume-center/writing/writing-major/overview-wim-requirement>) requirement.

Choose one from the M&CS designated WIM courses to fulfill the Writing in the Major requirement:		<b>Units</b> 3-4 units
MATH 109	Applied Group Theory	
MATH 110	Applied Number Theory and Field Theory	
MATH 120	Groups and Rings	
MATH 171	Fundamental Concepts of Analysis	
CS 181W	Computers, Ethics, and Public Policy	
STATS 155	Statistical Methods in Computational Genetics	

## Mathematical and Computational Science Electives

Choose three courses in Mathematical and Computational Science 100-level or above, at least 3 units each from two different departments. At least one must be from following list:

Choose three courses from the following:		<b>Units</b> 9 units
ECON 102C	Advanced Topics in Econometrics	
ECON 107	Causal Inference and Program Evaluation	
ECON 140	Introduction to Financial Economics	

ECON 160	Game Theory and Economic Applications	
ECON 179	Experimental Economics	
EE 261	The Fourier Transform and Its Applications	
EE 263	Introduction to Linear Dynamical Systems	
EE 278	Introduction to Statistical Signal Processing	
EE 282	Computer Systems Architecture	
EE 364A	Convex Optimization I	
EE 364B	Convex Optimization II	
MS&E 220	Probabilistic Analysis	
MS&E 223	Simulation	
MS&E 251	Stochastic Control	
MCS 100	Mathematics of Sports	
MATH 104	Applied Matrix Theory	
MATH 106	Functions of a Complex Variable	
MATH 108	Introduction to Combinatorics and Its Applications	
MATH 113	Linear Algebra and Matrix Theory	
MATH 115	Functions of a Real Variable	
MATH 116	Complex Analysis	
MATH 131P	Partial Differential Equations I	
MATH 171	Fundamental Concepts of Analysis	
MATH 172	Lebesgue Integration and Fourier Analysis	
MATH 174	Calculus of Variations	
PHIL 151	Metalogic (Winte)	
STATS 202	Data Mining and Analysis	
STATS 206	Applied Multivariate Analysis	
STATS 207	Introduction to Time Series Analysis	
STATS 208	Introduction to the Bootstrap	
STATS 215	Statistical Models in Biology	
STATS 216	Introduction to Statistical Learning	
STATS 217	Introduction to Stochastic Processes	
STATS 218	Introduction to Stochastic Processes	
STATS 219	Stochastic Processes	
STATS 240	Statistical Methods in Finance	
STATS 270	Bayesian Statistics I	

For Computer Science (CS), electives can include courses not taken as units under the CS list above and the following:

CME 206	Introduction to Numerical Methods for Engineering	
CME 211	Software Development for Scientists and Engineers	
CME 302	Numerical Linear Algebra	
CS 108	Object-Oriented Systems Design	
CS 110	Principles of Computer Systems	
CS 140	Operating Systems and Systems Programming	
CS 143	Compilers	
CS 157	Logic and Automated Reasoning	
CS 161	Design and Analysis of Algorithms	
CS 194	Software Project	
CS 221	Artificial Intelligence: Principles and Techniques	
CS 223A	Introduction to Robotics	
CS 225A	Experimental Robotics	
CS 228	Probabilistic Graphical Models: Principles and Techniques	
CS 229	Machine Learning	
CS 243	Program Analysis and Optimizations	
CS 246	Mining Massive Data Sets	
CS 248	Interactive Computer Graphics	

The following courses are not offered this year but may be used by students who completed them in fulfillment of this requirement:CS 164

With the adviser's approval, courses other than those offered by the sponsoring departments may be used to fulfill part of the elective requirement. These may be in fields such as biology, economics, electrical engineering, industrial engineering, and medicine, etc., that might be relevant to a mathematical sciences major, depending on a student's interests.

- At least three quarters before graduation, majors must file with their advisers a plan for completing degree requirements.
- All courses used to fulfill major requirements must be taken for a letter grade with the exception of courses offered satisfactory/no credit only.
- The student must have a grade point average (GPA) of 2.0 or better in all course work used to fulfill the major requirement.
- Electives that are not offered this year, but may be offered in subsequent years, are eligible for credit toward the major.

### Mathematical and Computational Science Biology Track (Option)

Students in the Biology track take the introductory courses for the Mathematics and Computational Science major with the following allowable substitutions as electives.

STATS/BIO 141	Biostatistics <sup>1</sup>	<b>Units</b> 3-5
Take three courses from the Biology Core:		10
BIO 41	Genetics, Biochemistry, and Molecular Biology	
BIO 42	Cell Biology and Animal Physiology	
BIO 43	Plant Biology, Evolution, and Ecology	
Or take two courses from the core and one of the following:		3-4
BIO 136	Evolutionary Paleobiology	
BIO 143	Evolution	
BIO 144	Conservation Biology: A Latin American Perspective	
BIO 183	Theoretical Population Genetics	
BIO 230	Molecular and Cellular Immunology	
Honors students select the following three courses:		1-4
STATS 155	Statistical Methods in Computational Genetics	
BIO 113	Fundamentals of Molecular Evolution	
BIO 146	Population Studies	

The following courses are not offered this year but may be used by students who completed them in fulfillment of this requirement: BIO102, 160A & 160B

<sup>1</sup> Can replace STATS 191 Introduction to Applied Statistics or STATS 203 Introduction to Regression Models and Analysis of Variance

### Mathematical and Computational Science Engineering Track (Option)

Students in the Engineering track take the introductory courses for the Mathematics and Computational Sciences major with the following allowable substitutions.

With consent of an MCS advisor, MATH 51-52-53 series may be substituted for CME 100-102-104. Depending on the exact material taught in relevant years, an additional math course might be necessary <sup>\*\*</sup>

CME 100	Vector Calculus for Engineers	
CME 102	Ordinary Differential Equations for Engineers	
CME 104/ ENGR 155B	Linear Algebra and Partial Differential Equations for Engineers	
STATS 116 may be replaced by:		3-5
STATS 110	Statistical Methods in Engineering and the Physical Sciences	
STATS 191/STATS 203 may be replaced by:		3-4
STATS 202	Data Mining and Analysis	
Engineering Track Electives:		
Select one of the following:		3-4
MATH 106	Functions of a Complex Variable	
MATH 108	Introduction to Combinatorics and Its Applications	
MATH 116	Complex Analysis	
MATH 118	Mathematics of Computation	
MATH 132	Partial Differential Equations II	
MATH 174	Calculus of Variations	
PHIL 151	Metalogic	
Select two of the following:		3-5
ENGR 15	Dynamics	
ENGR 20	Introduction to Chemical Engineering	
ENGR 25B	Biotechnology	
ENGR 30	Engineering Thermodynamics	
ENGR 40	Introductory Electronics	
ENGR 50	Introduction to Materials Science, Nanotechnology Emphasis	
ENGR 105	Feedback Control Design	

<sup>\*\*</sup> Only M&CS majors pursuing the engineering track may petition their adviser to substitute the required Math series for CME courses listed above.

### Mathematical and Computational Science Statistics Track (Option)

Students in the Statistics track take the introductory courses for the Mathematics and Computational Sciences major with the following additional courses - (87 units total)

<b>Required:</b>		
STATS 217	Introduction to Stochastic Processes	<b>Units</b> 3
Advanced CS, such as:		
CS 246	Mining Massive Data Sets	3-4
Advanced MS&E, such as:		
MS&E 220	Probabilistic Analysis	3-4
or		
MS&E 223	Simulation	
Statistics Track Electives:		
Select three of the following:		9
STATS 202	Data Mining and Analysis	
STATS 206	Applied Multivariate Analysis	
STATS 207	Introduction to Time Series Analysis	
STATS 208	Introduction to the Bootstrap	
STATS 216	Introduction to Statistical Learning	
STATS 219	Stochastic Processes	
STATS 270	Bayesian Statistics I	

## Honors Program

The honors program is designed to encourage a more intensive study of mathematical sciences than the B.S. program. In addition to meeting all requirements for the B.S., the student must:

1. Maintain an average letter grade equivalent to at least a 3.5 in all academic work.
2. Complete at least 15 units in mathematical sciences in addition to the requirements for the major listed above. Include in these 15 units at least one of the following:
  - a. An approved upper-level or graduate course
  - b. Participation in a small group seminar
  - c. At least 3 units of directed reading
3. Prepare a statement describing major area of concentration for honors work.
4. Describe how each course selected added to the student's knowledge and understanding in area chosen for concentration.
5. Students interested in honors should consult with their adviser by last quarter of their junior year to prepare their program of study. Honors work may be concentrated in fields such as biological sciences, environment, physics, etc.
6. Suggested electives for students pursuing Honors: CME 206, CS 229, CS 248, EE 364, MATH 171, MATH 172, STATS 202, STATS 216, STATS 217.

## Minor in Mathematical and Computational Science

The minor in Mathematical and Computational Science is intended to provide an experience of the four constituent areas: Computer Science, Mathematics, Management Science and Engineering, and Statistics. Five basic courses are required:

Select two of the following: 10

CS 106A	Programming Methodology
and	
CS 106B	Programming Abstractions

or

CS 106X	Programming Abstractions (Accelerated)
---------	--

Select one of the following: 3-5

MATH 51	Linear Algebra and Differential Calculus of Several Variables
---------	---

or

MATH 104	Applied Matrix Theory
----------	-----------------------

Select one of the following: 3-4

MS&E 211	Linear and Nonlinear Optimization
----------	-----------------------------------

or

MS&E 221	Stochastic Modeling
----------	---------------------

Select two of the following: 8

STATS 116	Theory of Probability
-----------	-----------------------

and either

STATS 191	Introduction to Applied Statistics
-----------	------------------------------------

or

STATS 200	Introduction to Statistical Inference
-----------	---------------------------------------

In addition to the above, the minor requires three courses from the following, two of which must be in different departments:

Select three of the following:

CME 108	Introduction to Scientific Computing
---------	--------------------------------------

CS 103	Mathematical Foundations of Computing
CS 107	Computer Organization and Systems
CS 154	Introduction to Automata and Complexity Theory
CS 161	Design and Analysis of Algorithms
EE 261	The Fourier Transform and Its Applications
ECON 160	Game Theory and Economic Applications
MS&E 251	Stochastic Control
MATH 104	Applied Matrix Theory
MATH 106	Functions of a Complex Variable
MATH 108	Introduction to Combinatorics and Its Applications
MATH 109	Applied Group Theory
MATH 110	Applied Number Theory and Field Theory
MATH 115	Functions of a Real Variable
MATH 131P	Partial Differential Equations I
MATH 171	Fundamental Concepts of Analysis
MATH 174	Calculus of Variations
PHIL 151	Metalogic
STATS 191	Introduction to Applied Statistics
STATS 200	Introduction to Statistical Inference
STATS 202	Data Mining and Analysis
STATS 203	Introduction to Regression Models and Analysis of Variance
STATS 217	Introduction to Stochastic Processes

Other upper-division courses appropriate to the program major may be substituted with consent of the program director. Undergraduate majors in the constituent programs may not count courses in their own departments.

*Co-Directors:* Bradley Efron, Susan Holmes

*Steering Committee:* Takeshi Amemiya (Economics, emeritus), Emmanuel Candes (Mathematics, Statistics), Gunnar Carlsson (Mathematics), Richard Cottle (Management Science and Engineering, emeritus), Bradley Efron (Statistics), Margot Gerritsen (ICME), Peter Glynn (Management Science and Engineering), Susan Holmes (Statistics), Lester Mackey (Statistics), Parviz Moin (Engineering), George Papanicolaou (Mathematics), Eric Roberts (Computer Science), David Rogosa (Education), Tim Roughgarden (Computer Science), Chiara Sabatti (Statistics), Amin Saberi (Management Science and Engineering), David Siegmund (Statistics), Jonathan Taylor (Statistics), Brian White (Mathematics).

## Mathematics

Courses offered by the Department of Mathematics are listed under the subject code MATH on the Stanford Bulletin's ExploreCourses web site.

The Department of Mathematics offers programs leading to the degrees of Bachelor of Science, Master of Science, and Doctor of Philosophy in Mathematics, and also participates in the program leading to the B.S. in Mathematical and Computational Science, and the M.S. and Ph.D. degree programs offered through the Institute for Computational & Mathematical Engineering.

## Mission of the Undergraduate Program in Mathematics

The mission of the undergraduate program in Mathematics is to provide students with a broad understanding of mathematics encompassing logical reasoning, generalization, abstraction, and formal proof.

Courses in the program teach students to create, analyze, and interpret mathematical models and to communicate sound arguments based on mathematical reasoning and careful data analysis. The mathematics

Units  
9

degree prepares students for careers in the corporate sector and government agencies, and for graduate programs in mathematics.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. problem solving skills,
2. the ability to formulate proofs and to structure mathematical arguments,
3. the ability to communicate mathematical ideas via extended written presentation.

### Advanced Placement in Mathematics for Freshmen

Students with strong ability in mathematics often take one or more semesters of college-equivalent courses in mathematics while they are still in high school. Under certain circumstances, it is possible for such students to secure both advanced placement and credit toward the bachelor's degree. A decision as to placement and credit is made by the department after consideration of the student's performance on the Advanced Placement Examination in Mathematics (forms AB or BC) of the College Entrance Examination Board, and also after consideration of transfer credit in mathematics from other colleges and universities.

The department does not give its own advanced placement examination. Students can receive either 5 or 10 units of advanced placement credit, depending on their scores on the CEEB Advanced Placement Examination or the IB Exam. Entering students who have credit for two quarters of single variable calculus (10 units) are encouraged to enroll in:

Select one of the following series:

Standard Series		
MATH 51	Linear Algebra and Differential Calculus of Several Variables	5
MATH 52	Integral Calculus of Several Variables	5
MATH 53	Ordinary Differential Equations with Linear Algebra	5
Honors Series		
MATH 51H	Honors Multivariable Mathematics	5
MATH 52H	Honors Multivariable Mathematics	5
MATH 53H	Honors Multivariable Mathematics	5

These three-course sequences, which can be completed during the freshman year, supply the necessary mathematics background for most majors in science and engineering. They also serve as excellent background for the major or minor in Mathematics, or in Mathematical and Computational Science.

Students who have credit for one quarter of single variable calculus (5 units) should take:

Units		
MATH 42	Calculus (Autumn Quarter)	5
MATH 51	Linear Algebra and Differential Calculus of Several Variables (Winter Quarter)	5

Options available in Spring Quarter include:

MATH 52	Integral Calculus of Several Variables	5
or MATH 53	Ordinary Differential Equations with Linear Algebra	

For proper placement, contact the Department of Mathematics.

## Bachelor of Science in Mathematical and Computational Science

The Department of Mathematics participates with the departments of Computer Science, Management Science and Engineering, and Statistics in a program leading to a B.S. in Mathematical and Computational Science. See the "Mathematical and Computational Science (p. 551)" section of this bulletin.

### Introductory and Undergraduate Courses

The department offers two sequences of introductory courses in single variable calculus.

1. MATH 41 and MATH 42 present single-variable calculus at a fast pace. Differential calculus is covered in the first quarter, integral calculus in the second.
2. MATH 19, MATH 20, and MATH 21 cover the material in MATH 41, MATH 42 in three quarters instead of two.

There are options for studying multivariable mathematics:

1. MATH 51 Linear Algebra and Differential Calculus of Several Variables, MATH 52 Integral Calculus of Several Variables, and MATH 53 Ordinary Differential Equations with Linear Algebra cover differential and integral calculus in several variables, linear algebra, and ordinary differential equations. These topics are taught in an integrated fashion and emphasize applications. MATH 51 covers differential calculus in several variables and introduces matrix theory and linear algebra; MATH 52 covers integral calculus in several variables and vector analysis; MATH 53 studies further topics in linear algebra and applies them to the study of ordinary differential equations. This sequence is strongly recommended for incoming freshmen with 10 units of advanced placement credit.
2. MATH 51H Honors Multivariable Mathematics, MATH 52H Honors Multivariable Mathematics, and MATH 53H Honors Multivariable Mathematics cover the same material as MATH 51, MATH 52, MATH 53, and much more with more emphasis on theory and rigor.

The department offers three classes on linear algebra:

Units		
MATH 51	Linear Algebra and Differential Calculus of Several Variables	5
or MATH 51H	Honors Multivariable Mathematics	
MATH 104	Applied Matrix Theory	3
MATH 113	Linear Algebra and Matrix Theory	3

## Learning Outcomes (Graduate)

The Master's Degree is conferred upon candidates who have developed advanced knowledge and skills in Mathematics. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Mathematics. Through completion of advanced coursework and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Mathematics and to interpret and present the results of such research.

## Bachelor of Science in Mathematics

The following department requirements are in addition to the University's basic requirements for the bachelor's degree:

Students wishing to major in Mathematics must satisfy the following requirements:

1. Department of Mathematics courses totaling at least 49 units credit; such courses must be taken for a letter grade. For the purposes of this requirement, STATS 116 Theory of Probability, PHIL 151 Metalogic, and PHIL 152 Computability and Logic count as Department of Mathematics courses.
2. Additional courses taken from Department of Mathematics courses numbered 101 and above or from approved courses in other disciplines with significant mathematical content, totaling at least 15 units credit. At least 9 of these units must be taken for a letter grade.
3. A Department of Mathematics adviser must be selected, and the courses selected under items '1' and '2' above must be approved by the department's director of undergraduate studies, acting under guidelines laid down by the department's Committee for Undergraduate Affairs. The Department of Mathematics adviser can be any member of the department's faculty.
4. To receive the department's recommendation for graduation, a student must have been enrolled as a major in the Department of Mathematics for a minimum of two full quarters, including the quarter immediately before graduation.

Students are normally expected to complete either the sequence MATH 19 Calculus, MATH 20 Calculus, MATH 21 Calculus or the sequence MATH 41 Calculus, MATH 42 Calculus (but not both). Students with an Advanced Placement score of at least 4 in BC math or 5 in AB math may receive 10 units credit and fulfill requirement '1' by taking at least 39 units of Department of Mathematics courses numbered 51 and above. Students with an Advanced Placement score of at least 3 in BC math or at least 4 in AB math may receive 5 units credit and fulfill requirement '1' by taking at least 44 units of Department of Mathematics courses numbered 42 and above.

Sophomore seminar courses may be counted among the choice of courses under item '1'. Other variations of the course requirements laid down above (under items '1' and '2') may, in some circumstances, be allowed. For example, students transferring from other universities may be allowed credit for some courses completed before their arrival at Stanford. However, at least 24 units of the 49 units under item '1' above and 9 of the units under item '2' above must be taken at Stanford. In all cases, approval for variations in the degree requirements must be obtained from the department's Committee for Undergraduate Affairs. Application for such approval should be made through the department's director of undergraduate studies. The policy of the Mathematics Department is that no courses other than the MATH 50 series and below may be double-counted toward any other University major or minor.

It is to be emphasized that the above regulations are minimum requirements for the major; students contemplating graduate work in mathematics are strongly encouraged to include the courses MATH 116 Complex Analysis, MATH 120 Groups and Rings, MATH 121 Galois Theory, MATH 147 Differential Topology or MATH 148 Algebraic Topology, and MATH 171 Fundamental Concepts of Analysis in their selection of courses, and in addition, take at least three Department of Mathematics courses over and above the minimum requirements laid out under items '1' and '2' above, including at least one 200-level course. Such students are also encouraged to consider the possibility of taking the honors program, discussed below.

To help develop a sense of the type of course selection (under items '1' and '2' above) that would be recommended for math majors with various backgrounds and interests, see the following examples. These represent only a few of a very large number of possible combinations of courses that could be taken in fulfillment of the Mathematics major requirements:

### Example 1

A general program (a balanced program of both pure and applied components, without any particular emphasis on any one field of mathematics or applications) as follows:

Units

Select one of the following series or Advanced Placement credit (see the Overview tab for details):

MATH 19 & MATH 20 & MATH 21	Calculus and Calculus and Calculus	
MATH 41 & MATH 42	Calculus and Calculus	
Math 50 Series:		15
MATH 51 & MATH 52 & MATH 53	Linear Algebra and Differential Calculus of Several Variables and Integral Calculus of Several Variables and Ordinary Differential Equations with Linear Algebra	
MATH 104 or MATH 113	Applied Matrix Theory Linear Algebra and Matrix Theory	3
MATH 106	Functions of a Complex Variable	3
MATH 109	Applied Group Theory	3
MATH 110	Applied Number Theory and Field Theory	3
MATH 115	Functions of a Real Variable	3
Plus any selection of at least eight of the following courses, including three Department of Mathematics courses:		24
MATH 108	Introduction to Combinatorics and Its Applications	
MATH 131P	Partial Differential Equations I	
MATH 132	Partial Differential Equations II	
MATH 143	Differential Geometry	
MATH 146	Analysis on Manifolds	
MATH 147	Differential Topology	
MATH 148	Algebraic Topology	
MATH 152	Elementary Theory of Numbers	
MATH 161	Set Theory	
CME 108	Introduction to Scientific Computing	
ECON 50	Economic Analysis I	
PHYSICS 41	Mechanics	
PHYSICS 43	Electricity and Magnetism	
PHYSICS 45	Light and Heat	
STATS 116	Theory of Probability	
Total Units		64

The courses from other departments are only meant as examples; there are many suitable courses in several departments that can be taken to fulfill part or all of requirement '2'.

### Example 2

A theoretical program recommended for those contemplating possible later graduate work providing an introduction to the main areas of mathematics both broader and deeper than the general program outlined above:

Units

Select one of the following series or Advanced Placement credit (see the Overview tab for details):

MATH 19 & MATH 20 & MATH 21	Calculus and Calculus and Calculus	
MATH 41 & MATH 42	Calculus and Calculus	
Math 50 Series:		15
MATH 51	Linear Algebra and Differential Calculus of Several Variables	
or MATH 51H Honors Multivariable Mathematics		

MATH 52	Integral Calculus of Several Variables or MATH 52H Honors Multivariable Mathematics	
MATH 53	Ordinary Differential Equations with Linear Algebra or MATH 53H Honors Multivariable Mathematics	
In addition to the series, the following courses are recommended:		
MATH 106	Functions of a Complex Variable	3
or MATH 116	Complex Analysis	
MATH 113	Linear Algebra and Matrix Theory	3
MATH 120	Groups and Rings	3
MATH 171	Fundamental Concepts of Analysis	3
Plus nine or more 3-unit math courses numbered 121 or higher (the logic courses PHIL 151 and PHIL 152 are considered to be such courses), including at least one algebra course, one analysis course, and one geometry/topology course. (See the description of the honors program below)		27
<b>Total Units</b>		<b>64</b>

In addition, those contemplating eventual graduate work in Mathematics should consider including at least one graduate-level math course such as MATH 205A Real Analysis, MATH 210A Modern Algebra I, or MATH 215A Complex Analysis, Geometry, and Topology or MATH 215B Complex Analysis, Geometry, and Topology. Such students should also consider the possibility of entering the honors program.

### Example 3

An applied mathematics\* program:

Select one of the following series or Advanced Placement credit (see the Overview tab for details):	<b>Units</b>
MATH 19 Calculus & MATH 20 and Calculus & MATH 21 and Calculus	10
MATH 41 Calculus & MATH 42 and Calculus	
Math 50 Series:	15
MATH 51 Linear Algebra and Differential Calculus of Several & MATH 52 Variables & MATH 53 and Integral Calculus of Several Variables and Ordinary Differential Equations with Linear Algebra	
MATH 104 Applied Matrix Theory	3
MATH 106 Functions of a Complex Variable	3
MATH 108 Introduction to Combinatorics and Its Applications	3
MATH 109 Applied Group Theory	3
MATH 110 Applied Number Theory and Field Theory	3
MATH 115 Functions of a Real Variable	3
MATH 131P Partial Differential Equations I	3
MATH 132 Partial Differential Equations II	3
STATS 116 Theory of Probability	3-5
Plus at least 12 units of additional courses in applied mathematics, including, for example, suitable courses from the departments of Physics, Computer Science, Economics, Engineering, and Statistics.	12
<b>Total Units</b>	<b>64-66</b>

\* Students interested in applied mathematics, but desiring a broader-based program than the type of program suggested in Example 3, including significant computational and/or financial and/or statistical components, are encouraged to also consider the Mathematics and Computational Science program.

### Honors Program

The honors program is intended for students who have strong theoretical interests and abilities in mathematics. The goal of the program is to give students a thorough introduction to the main branches of mathematics, especially analysis, algebra, and geometry. Through the honors thesis, students may be introduced to a current or recent research topic, although occasionally more classical projects are encouraged. The program provides an excellent background with which to enter a Master's or Ph.D. program in Mathematics. Students completing the program are awarded a B.S. in Mathematics with Honors.

It is recommended that the sequence MATH 51H Honors Multivariable Mathematics, MATH 52H Honors Multivariable Mathematics, and MATH 53H Honors Multivariable Mathematics be taken in the freshman year. To graduate with a B.S. in Mathematics with Honors, the following conditions apply in addition to the usual requirements for math majors:

1. The selection of courses under items '1' and '2' above must contain:

MATH 106	Functions of a Complex Variable	3
or MATH 116	Complex Analysis	
MATH 120	Groups and Rings	3
MATH 171	Fundamental Concepts of Analysis	3

And must also include seven additional 3-unit Math courses numbered 121 or higher. (The logic courses PHIL 151 Metalogic and PHIL 152 Computability and Logic can also be used.) These seven courses must include at least:

One Algebra Course:

MATH 121	Galois Theory	3
MATH 122	Modules and Group Representations	3
MATH 152	Elementary Theory of Numbers	3
MATH 154	Algebraic Number Theory	3

One Analysis Course:

MATH 131P	Partial Differential Equations I	3
MATH 132	Partial Differential Equations II	3
MATH 136	Stochastic Processes	3
MATH 151	Introduction to Probability Theory	3
MATH 155	Analytic Number Theory	3
MATH 172	Lebesgue Integration and Fourier Analysis	3
MATH 173	Theory of Partial Differential Equations	3
MATH 175	Elementary Functional Analysis	3

One Geometry/Topology Course:

MATH 143	Differential Geometry	3
MATH 144		3
MATH 145	Algebraic Geometry	3
MATH 146	Analysis on Manifolds	3
MATH 147	Differential Topology	3
MATH 148	Algebraic Topology	3
MATH 149		3

2. All courses counting towards the honors requirements (MATH 106/MATH 116, MATH 120, MATH 171, all 7 additional Math courses used to fulfill the major requirement, and MATH 197) must be taken for a letter grade.
3. Students must have an average GPA of at least a 3.0 across all math classes counting towards the major at the time of applying for honors to be eligible for acceptance into the honors program, as well as upon graduation to graduate with honors.

Units

Units

4. Majors interested in honors can apply in winter quarter of their junior year at the earliest, and no later than the last day of classes in the spring quarter of junior year.
5. Students in the honors program must write a senior thesis. In order to facilitate this, the student must, by the end of the junior year, choose an undergraduate thesis adviser from the Department of Mathematics faculty and map out a concentrated reading program under the direction and guidance of the adviser. This will occur when the student applies for honors. During the senior year, the student must enroll in MATH 197 Senior Honors Thesis with his/her adviser for a total of 6 units (recommended to be spread over three quarters), and work toward completion of the thesis under the direction and guidance of the thesis adviser. The thesis may contain original material, or be a synthesis of work in current or recent research literature. The 6 units of credit for MATH 197 Senior Honors Thesis are required in addition to the 64 units required of the major. (See the major requirements at the top of the page.)
6. The deadline for the senior thesis final draft is the Monday of week 8 of the student's graduation quarter.

In addition to the minimum requirements laid out above, it is strongly recommended that students take at least one graduate-level course (that is, at least one course in the 200 plus range). MATH 205A Real Analysis, MATH 210A Modern Algebra I, and MATH 215A Complex Analysis, Geometry, and Topology or MATH 215B Complex Analysis, Geometry, and Topology are especially recommended in this context.

Students with questions about the honors program should see the department's director of undergraduate studies.

## Minor in Mathematics

To qualify for the minor in Mathematics, a student should complete, for a letter grade, at least six Department of Mathematics courses numbered 51 or higher, totaling a minimum of 24 units. For the purposes of this requirement, STATS 116 Theory of Probability, PHIL 151 Metalogic, and PHIL 152 Computability and Logic count as Department of Mathematics courses. No other courses from outside the Department of Mathematics may be used towards the minor in Mathematics.

It is recommended that these courses include:

### Math Minor

		Units
MATH 51	Linear Algebra and Differential Calculus of Several Variables	5
or MATH 51H	Honors Multivariable Mathematics	
MATH 52	Integral Calculus of Several Variables	5
or MATH 52H	Honors Multivariable Mathematics	
MATH 53	Ordinary Differential Equations with Linear Algebra	5
or MATH 53H	Honors Multivariable Mathematics	
Plus three additional MATH courses		9
Total Units		24

At least 12 of the units applied toward the minor in Mathematics must be taken at Stanford. The policy of the Mathematics Department is that no courses other than the MATH 50 series and below may be double-counted toward any other University major or minor.

## Master of Science in Mathematics

The University's basic requirements for the master's degree are discussed in the "Graduate Degrees (p. 45)" section of this bulletin. Students should pay particular attention to the University's course requirements for graduate degrees.

## University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

The following are specific departmental requirements:

Candidates must complete an approved course program of 45 units of courses beyond the department requirements for the B.S. degree, of which at least 36 units must be Mathematics Department courses, taken for a letter grade. The Mathematics Department courses must include at least 18 units numbered 200 or above. The candidate must have a grade point average (GPA) of 3.0 (B) over all course work taken in Mathematics, and a GPA of 3.0 (B) in the 200-level courses considered separately. Course work for the M.S. degree must be approved during the first quarter of enrollment in the program by the department's Director of Graduate Studies.

The Financial Mathematics M.S. degree program is no longer offered through the School of Humanities and Sciences. The Institute for Computational and Mathematical Engineering (ICME (<https://icme.stanford.edu>)) now offers a master's degree track in Mathematical and Computational Finance (p. 253).

## Doctor of Philosophy in Mathematics

The University's basic requirements for the doctorate (residence, dissertation, examinations, etc.) are discussed in the "Graduate Degrees (p. 45)" section of this bulletin. The following are specific departmental requirements.

To be admitted to candidacy, the student must have successfully completed 27 units of graduate courses (that is, courses numbered 200 and above). In addition, the student must pass qualifying examinations given by the department.

Beyond the requirements for candidacy, the student must complete a course of study approved by the Graduate Affairs Committee of the Department of Mathematics and submit an acceptable dissertation. In accordance with University requirements, Ph.D. students must complete a total of 135 course units beyond the bachelor's degree. These courses should be Department of Mathematics courses or approved courses from other departments. The course program should display substantial breadth in mathematics outside the student's field of application. The student must receive a grade point average (GPA) of 3.0 (B) or better in courses used to satisfy the Ph.D. requirement. In addition, the student

must pass the Department area examination and the University oral examination.

Experience in teaching is emphasized in the Ph.D. program. Each student is required to complete nine quarters of such experience. The nature of the teaching assignment for each of those quarters is determined by the department in consultation with the student. Typical assignments include teaching or assisting in teaching an undergraduate course or lecturing in an advanced seminar.

For further information concerning degree programs, fellowships, and assistantships, inquire of the department's student services office.

## Ph.D. Minor in Mathematics

Requirements for the Ph.D. Minor in Mathematics are:

Complete both of the following Sequences: <sup>1,2</sup>

### Sequence 1

MATH 106	Functions of a Complex Variable	3
or MATH 116	Complex Analysis	

MATH 131P	Partial Differential Equations I	3
-----------	----------------------------------	---

MATH 132	Partial Differential Equations II	3
----------	-----------------------------------	---

### Sequence 2

MATH 113	Linear Algebra and Matrix Theory	3
----------	----------------------------------	---

MATH 120	Groups and Rings	3
----------	------------------	---

or MATH 152	Elementary Theory of Numbers	
-------------	------------------------------	--

### Additional Courses

21 units of 200-level MATH courses <sup>3</sup>	21
---	----

Total Units	36
-------------	----

<sup>1</sup> The 100-level courses may have been completed during undergraduate study, and their equivalents from other universities are acceptable.

<sup>2</sup> A third coherent sequence designed by the student, subject to the approval of the graduate committee, may be considered as a substitute for Sequence 1 or 2.

<sup>3</sup> The 200-level courses must be taken at Stanford and approved by the Department of Mathematics Ph.D. minor adviser.

*Emeriti:* Gregory Brumfiel, Gunnar Carlsson, Solomon Feferman, Robert Finn, Yitzhak Katznelson, Joseph Keller, Georg Kreisel, Harold Levine, Tai-Ping Liu, R. James Milgram, Donald Ornstein, Richard Schoen, Leon Simon

*Chair:* Brian White

*Professors:* Simon Brendle (on leave), Daniel Bump, Emmanuel Candes, Sourav Chatterjee, Ralph L. Cohen, Brian Conrad, Amir Dembo (on leave Winter), Persi Diaconis, Yakov Eliashberg, Jacob Fox, Soren Galatius, Eleny Ionel (on leave), Steven Kerckhoff, Jun Li, Rafe Mazzeo, Maryam Mirzakhani (on leave Autumn), George Papanicolaou, Lenya Ryzhik, Kannan Soundararajan, Ravi Vakil, Andras Vasy, Akshay Venkatesh, Brian White, Lexing Ying, Zhiwei Yun

*Assistant Professors:* Thomas Church, Jack Poulson, John Pardon

*Szegö Assistant Professors:* Riddhipratim Basu, Alexei Entin, Yu Gu, Hilaf Hasson, Yu-Shen Lin, Davi Maximo, Jenny Wilson, Tian Yang, Tianyi Zheng, Xuwen Zhu

*Lecturers:* Marion Campisi, Susie Kimport, Mark Lucianovic, George Schaeffer, Wojciech Wieczorek

*Courtesy Professors:* Renata Kallosh

*Consulting Professors:* Brian Conrey, David Hoffman

*Clay Fellow:* Alex Wright

*Distinguished Poncaire Professor:* Tadashi Tokieda

## Medieval Studies

Stanford Center for Medieval and Early Modern Studies (CMEMS) is a multidisciplinary community working together to produce new perspectives on medieval and early modern studies. The mission of CMEMS is to promote innovative research and foster a lively dialogue among faculty, students, librarians, and research affiliates, to rethink the nature of the field across time, space, and disciplinary boundaries, and to explore the significance of these earlier periods for our understanding of today's world.

**Units** There are a number of programs and courses related to medieval and early modern studies. To learn more, see the center's web site (<http://cmems.stanford.edu>).

The Division of Literatures, Cultures, and Languages (p. 416) offers a Medieval Studies minor.

## Minor in Medieval Studies

Faculty Director: Kathryn Starkey

The Division of Literatures, Cultures, and Languages offers an undergraduate minor in Medieval Studies. The minor in Medieval Studies:

- provides Stanford students with the historical knowledge and framework, through which to view globalism;
- embeds the study of medieval culture in a coherent framework that resonates with contemporary issues of community building, the virtual world and mobility;
- and promotes an innovative crossdisciplinary and skill-based approach to Medieval Studies.

Students in any field qualify for the minor by meeting the following requirements:

Students complete a total of 25 units (including a core course) in courses relevant to the major in departments across the University including, but not restricted to, English, East Asian Studies, History, Religious Studies, Music, and DLCL courses (Comparative Literature, German, French, Italian, Iberian and Latin American Cultures, and Slavic Languages and Literatures), and Classics.

One of the following three introductory core courses is required to be taken for 5 units. Students engage creatively with the Middle Ages and produce projects that will be collected in a database and shared with the Stanford community. The core courses are offered on a regular basis by faculty across the University.

		Units
DLCL 122	The Digital Middle Ages	3-5
FRENCH 205	Songs of Love and War: Gender, Crusade, Politics (counts for DLCL 121)	3-5
DLCL 123	Medieval Journeys: Tales of Devotion and Discovery	3-5

Electives may be selected from a large number of offerings in a variety of disciplines according to student interests, but they must follow a coherent course of study. This course of study must be approved by the faculty director. Up to 5 units may be taken in a medieval language, such as (but not limited to) Old English, Old Norse, Medieval Latin, Old French, Middle High German, Classical Arabic. No transfer credit may be used

toward the Medieval Studies minor. Appropriate courses offered through BOSP may count toward this minor.

Course work in this minor may not duplicate work counted toward other majors or minors. Advanced placement credit and transfer credit do not apply to this minor. All courses must be taken for a letter grade. By University policy, no more than 36 units may be required in this minor. Students declare the Minor in Medieval Studies through Axess.

*Affiliated Faculty:* Benjamin Albritton (Library), Vincent Barletta (Iberian and Latin American Cultures), Shahzad Bashir (Religious Studies), Carl Bielefeldt (Religious Studies), George H. Brown (English, Emeritus), Steven Carter (Asian Languages), Ronald Egan (Asian Languages), Fiona Griffiths (History), Paula Findlen (History), Charlotte Fonrobert (Religious Studies), Marisa Galvez (French and Italian), Hester Gelber (Religious Studies), Avner Greif (Economics), Hans Ulrich Gumbrecht (French and Italian), Robert Harrison (French and Italian), Michelle Karnes (English), Alexander Key (Comparative Literature), Nancy S. Kollmann (History), Mark E. Lewis (History), Ivan Lupic (English), David Lummus (French and Italian), William Mahrt (Music), Patricia Parker (Comparative Literature, English), Bissera Pentcheva (Art and Art History), Barbara Pitkin (Religious Studies, *Lecturer*), Orrin W. Robinson (German Studies, Emeritus), David Riggs (English, Emeritus), Jesse Rodin (Music), Behnam Sadeki (Religious Studies), Carolyn Springer (French and Italian), Kathryn Starkey (German Studies), Laura Stokes (History), Elaine Treharne (English), Ali Yaycioglu (History)

## Modern Thought and Literature

Courses offered by the Program in Modern Thought and Literature are listed under the subject code MTL on the Stanford Bulletin's ExploreCourses web site.

The program in Modern Thought and Literature admits students for the Ph.D. and a limited number for a coterminal B.A./M.A. Program.

## Graduate Programs in Modern Thought and Literature

Modern Thought and Literature (MTL) is an interdisciplinary humanities graduate program advancing the study of critical issues in the modern world. Since 1971, MTL students have helped to redefine the cutting edge of many interdisciplinary fields and to reshape the ways in which disciplinary scholarship is understood and practiced. MTL graduates are leaders in fields such as American studies, ethnic studies, film studies, social and cultural studies, and women's studies, as well as English and comparative literature.

The program trains students to understand the histories and methods of disciplines and to test their assumptions. It considers how disciplines shape knowledge and, most importantly, how interdisciplinary methods reshape objects of study. MTL students produce innovative analyses of diverse texts, forms, and practices, including those of literature, history, philosophy, anthropology, law, and science; film, visual arts, popular culture, and performance; and material culture and technology.

Each student constructs a unique program of study suited to his or her research. Students have focused on such areas as gender and sexuality; race and ethnicity; science, technology, and medicine; media and performance; legal studies; and critical and social theory. The program's affiliated faculty is drawn from fields throughout the humanities and humanistic social sciences, as well as from education and law. As interdisciplinary study is impossible without an understanding of the disciplines under consideration, each student is expected to master the methods of literary analysis and to gain a foundation in a second field or discipline.

## Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in interdisciplinary literary studies and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in interdisciplinary literary studies. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of interdisciplinary literary studies and to interpret and present the results of such research.

## Master of Arts

The Master of Arts is available to students who are admitted to the doctoral program and have not been awarded an M.A. previously. Students are not admitted into the program for the purpose of earning a terminal Master of Arts degree. Candidates for the Ph.D. who satisfy the committee of their progress and satisfactorily complete 45 units of course work forming a coherent program of study, may apply for an M.A. in Modern Thought and Literature.

## Coterminal Master's Program in Modern Thought and Literature

Each year, one or two undergraduates who are exceptionally well prepared in literature and at least one foreign language and whose undergraduate course work includes a strong interdisciplinary component, may petition to be admitted to the program for the purpose of completing a coterminal M.A. degree. Admission to this program is granted only on condition that in the course of working on their master's degrees they do not apply to enter the Ph.D. program in Modern Thought and Literature. The deadline for application is early February.

To apply, applicants submit:

1. An unofficial grade transcript from Axess.
2. An Application for Admission to Coterminal Masters' Program (<https://stanford.box.com/CotermApplic>).
3. A statement giving the reasons the student wishes to pursue this program and its place in his or her future plans. This statement should pay particular attention to the reasons why the student could not pursue the studies he or she desires in some other way.
4. An initial plan of study listing, quarter by quarter, each course by name, units, and instructor, to be taken in order to fulfill the requirements for the degree for a total of 45 units, including at least 20 units of advanced work in one literature, and at least 20 units in a coherent interdisciplinary program of courses taken in non-literature departments. Students may include appropriate coursework taken during the two quarters prior to the quarter of expected matriculation in the program. Except in unusual cases, this will mean courses taken in the autumn and winter quarters of the year of application for admission. (Changes in the course list are to be expected.)
5. A writing sample of critical or analytical prose, 20 pages maximum.
6. Two letters of recommendation from members of the faculty who know the applicant well and who can speak directly to the question of his or her ability to do graduate-level work.
7. A designated adviser from among the Stanford faculty; normally one letter of recommendation will be from this faculty member.

## University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the

"Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken two quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

## Degree Requirements

The candidate for the M.A. must complete at least 45 units of graduate work, to be divided in the following manner:

1. The introductory seminar, MTL 334A Concepts of Modernity I: Philosophical Foundations, 5 units; students may substitute MTL 334B Concepts of Modernity II: Culture, Aesthetics, and Society in the Age of Globalization, with the director's permission.
2. At least 20 units of advanced course work in literature, to be approved by the director.
3. At least 20 units of course work in a coherent and individually arranged interdisciplinary program, to be approved by the director.

By the end of the course of study, each candidate must also demonstrate a reading knowledge of at least one foreign language.

## Doctor of Philosophy in Modern Thought and Literature

University requirements for the Ph.D. are discussed in the "Graduate Degrees (p. 45)" section of this bulletin.

A candidate for the Ph.D. degree in Modern Thought and Literature must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the B.A. degree. He or she is expected to complete at least 18 courses of graduate work in addition to the dissertation. Students may spend one year of graduate study abroad.

Requirements for the Ph.D. in Modern Thought and Literature are:

1.

MTL 334A	Concepts of Modernity I: Philosophical Foundations	5
MTL 334B	Concepts of Modernity II: Culture, Aesthetics, and Society in the Age of Globalization	5
MTL 299	Edgework: New Directions in the Study of Culture (Spring Quarter; required of all first-year students)	1-3
2. A coherent program of eight courses of advanced work in literary studies to be worked out with the adviser, of which at least six must be regularly scheduled courses in literature. Courses in the teaching of composition, independent study, or thesis registration may not be counted among these six courses; ENGLISH 396L Pedagogy Seminar

I, MTL 399 Reading for Orals, MTL 802 TGR Dissertation may not be counted toward these requirements under any circumstances. Petitions to modify this requirement to substitute a course from a non-literature department for one or more of the required eight literature courses must be approved by the MTL Committee in Charge.

3. Eight courses of advanced work in non-literature departments, the core of which is completion of either a departmental minor or an interdepartmental concentration, typically consisting of six courses. Departmental minors are available from the departments of Anthropology, Art and Art History, Communication, History, Philosophy, Political Science, Religious Studies, and Sociology (see the relevant information in those sections of this bulletin). Individually designed concentrations may be approved by petition to the director. In addition to the required six courses in a minor or a concentration, two additional courses from non-literature departments are chosen in consultation with the student's academic adviser. At the end of the first year, each student must submit to the director a preliminary statement of approximately 1500 words outlining the scope and coherence of the interdisciplinary focus, either as it relates to the departmental minor or to the interdepartmental concentration. In either case, the student should note the relevance of any proposed coursework to the overall program (see #7 below). Course restrictions noted above in item 2 also apply.
4. *Qualifying Paper*: This certifies that students are likely to be able to undertake the quality of research, sustained argumentation, and cogent writing demanded in a doctoral dissertation. The qualifying paper must be a substantial revision of a seminar paper written at Stanford during the first year and should embody a substantial amount of independent research, develop an intellectual argument with significant elements of original thinking, and demonstrate the ability to do interdisciplinary work. Each paper is evaluated by two or three readers (designated before the end of the first year of graduate study), one of whom must be a member of the Committee in Charge or have been a member within the previous five years. Qualifying papers must be submitted to the program office no later than the end of the third week of the fifth quarter of enrollment, normally, Winter Quarter of the second year.
5. *Teaching*, an essential part of the program, is normally undertaken in conjunction with the Department of English. Candidates are required to demonstrate competence in teaching.
6. Students must demonstrate, by the end of the third quarter of the first year, a reading knowledge of one foreign language and, by the beginning of the first quarter of the third year, a reading knowledge of one other foreign language. Reading knowledge means the ability to make a genuine scholarly use of the language: that is, to read prose of ordinary difficulty. Students may not take the University oral examination before completion of the foreign language requirement.
7. *Candidacy*: At the end of the second year, students apply for candidacy. The decision to advance a student to candidacy is a judgment of the faculty. The student is only admitted to candidacy if, in addition to the student's fulfilling departmental prerequisites, the faculty makes the judgment that the student has the potential to successfully complete the requirements of the degree program. The following qualifications are required before candidacy can be certified:
  - the earlier submission of a satisfactory qualifying paper;
  - demonstration of a reading knowledge of one foreign language;
  - satisfactory progress in course work;
  - a list of courses applicable to the degree, distinguishing between courses appropriate to the literary component and courses appropriate to the non-literary component;
  - designation of a departmental minor or an interdisciplinary concentration; and,

Units

- the submission of a statement outlining the scope and coherence of the interdisciplinary component of the program in relation to the literary component, and noting the relevance of the course work to that program.
8. *Annual Review*: The program and progress of each student must be approved by the Committee in Charge at the end of each academic year. First-year students will submit the preliminary interdisciplinary statement along with the first year-end report (see #3 above).
  9. *University Oral Examination*: This examination, covering the student's areas of concentration, is normally taken in the third year of graduate study. It is a two-hour oral examination administered by four faculty members specializing in the student's areas of concentration, and a chair from another department. The exam is based on a substantial reading list prepared by the student in conjunction with the faculty committee and designed to cover the areas of expertise pertinent to the student's dissertation project.
  10. *Dissertation Proposal and Colloquium*: Within one quarter after the University oral examination, the student writes up the dissertation proposal. The recommended length for the dissertation proposal is 5 pages double-spaced (with a maximum length of 8 pages). It should contain (additionally) a full bibliography. The proposal is submitted to the program director and the dissertation committee for approval. After completion of the first chapter of the dissertation, the student sets up a meeting with the dissertation committee for one hour to discuss the work accomplished in the first chapter and plans for completing the rest of the dissertation.
  11. *Dissertation*: The fourth and fifth years are devoted to the dissertation, which should be a substantial and original contribution acceptable to the Committee in Charge of Modern Thought and Literature. The subject is drawn from the literature of specialization and the area of nonliterary studies. The dissertation project will conclude with a two-hour defense. The first hour is open to the public and includes a brief presentation of the dissertation project on the part of the Ph.D. candidate. The second hour is reserved to the candidate and his/her Dissertation Committee.

## Ph.D. Minor in Feminist, Gender, and Sexuality Studies

The Program in Modern Thought and Literature sponsors a Ph.D. minor in Feminist, Gender, and Sexuality Studies. The Ph.D. minor is administered by the Program in Feminist, Gender, and Sexuality Studies. (p. 462)

*Director*: Michele Elam

*Committee in Charge*: Adam Banks, Scott Bukatman (on leave 2015-16), Shelley Fisher Fishkin, Zephyr Frank, Héctor Hoyos, Claire Jarvis, Vaughn Rasberry, Alison McQueen, Thomas Mullaney, José David Saldívar (on leave 2015-16)

*Affiliated Faculty*: H. Samy Alim (*Education*), Lanier Anderson (*Philosophy*), Russell Berman (*German Studies*), Jennifer Brody (*Theater & Performance Studies*), Scott Bukatman (*Art & Art History*), Gordon Chang (*History*), Joshua Cohen (*Political Science, Philosophy, Law*), Adrian Daub (*German Studies*), Jean-Pierre Dupuy (*French & Italian*), Paulla Ebron (*Anthropology*), Harry Elam (*Theater & Performance Studies*), Michele Elam (*English*), Amir Eshel (*German Studies, Comparative Literature*), Shelley Fisher Fishkin (*English*), Zephyr Frank (*History*), Estelle Freedman (*History*), Hans U. Gumbrecht (*French & Italian, Comparative Literature*), Thomas Hansen (*Anthropology*), David Hills (*Philosophy*), Héctor Hoyos (*Iberian & Latin American Cultures*), Lochlain Jain (*Anthropology*), Claire Jarvis (*English*), Tomas Jimenez (*Sociology*), Matthew Kohrman (*Anthropology*), Charles Kronengold (*Music*), Aishwary Kumar (*History*), Joshua Landy (*French & Italian, Comparative Literature*), Pavle Levi (*Art & Art History*), Helen Longino (*Philosophy*), Andrea Lunsford (*English*), Saikat Majumdar (*English*), Douglas McAdam (*Sociology*), Mark McGurl (*English*), Alison McQueen (*Political Science*), Jisha Menon (*Theater & Performance Studies*), Lynn

Messtell (*Anthropology*), Franco Moretti (*English, Comparative Literature*), Paula Moya (*English*), Thomas Mullaney (*History*), Alex Nemerov (*Art & Art History*), Sianne Ngai (*English*), David Palumbo-Liu (*Comparative Literature*), Peggy Phelan (*Theater & Performance Studies*), Robert Proctor (*History*), Vaughn Rasberry (*English*), Robert Reich (*Political Science*), Jessica Riskin (*History*), José David Saldívar (*Comparative Literature*), Ramón Saldívar (*English, Comparative Literature*), Londa Schiebinger (*History*), Sharika Thiranagama (*Anthropology*), Fred Turner (*Communication*), Ban Wang (*East Asian Languages and Cultures*), Richard White (*History*), Gail Wight (*Art & Art History*), Alex Woloch (*English*), Yvonne Yarbro-Bejarano (*Iberian & Latin American Cultures*)

## Music

Courses offered by the Department of Music are listed under the subject code MUSIC on the Stanford Bulletin's ExploreCourses web site.

## Mission of the Department of Music

The Department of Music promotes the practice, understanding and enjoyment of music in the University, offering a broad array of educational opportunities with specialization in composition, performance, musicology, ethnomusicology, and music technology.

## Learning Outcomes (Undergraduate)

Music majors work toward a foundation in theory, history, and intensive written analysis in order to acquire the skills needed for a comprehensive understanding of tonal music. The following learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to:

1. select and outline a topic in tonal music analysis; choose methodologies for the explication of the topic.
2. demonstrate understanding of the underlying principles of tonal music analysis through the use of scholarly references and analytical tools and methodologies.
3. utilize primary source materials in written and oral presentations.
4. utilize secondary source materials in written and oral presentations.
5. demonstrate proficiency in academic writing on the subject of tonal music.
6. develop the skills to present a musical analysis to an audience.

## Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Music, including concentration in the fields of Composition, Music History, Computer-Based Music Theory and Acoustics, or Music, Science, and Technology, and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge and practice of Music and to interpret and present the results of such work in appropriate venues and publications.

The Doctor of Philosophy (Ph.D.) is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in either Musicology or Computer-Based Music Theory and Acoustics, based at the Center for Computer Research in Music and Acoustics (CCRMA).

The Doctor of Musical Arts (D.M.A.) in Composition is conferred upon candidates who have demonstrated substantial abilities in creating new musical works as demonstrated by their completed works under the supervision of composition faculty.

## Bachelor of Arts in Music

The undergraduate major in Music is built around a series of foundational courses in theory, musicianship, and music history, in addition to performance and the proficiency requirements outlined below. Majors must complete a minimum of 62 units within the department to earn a Bachelor of Arts degree. All required courses for the B.A. in any concentration must be taken for a letter grade. Electives may be taken credit/no credit, but any courses taken toward concentration requirements must carry a letter grade.

### Suggested Preparation for the Major

Students should allow more than two years for completion of the major, in part because of sequence courses with prerequisite requirements. Early planning is especially important for students wishing to double-major, for those contemplating overseas study, and for those wishing to pursue a concentration within the Music major. Music majors should attempt to complete MUSIC 21 Elements of Music I, MUSIC 22 Elements of Music II, and MUSIC 23 Elements of Music III in the freshman year; the series should be completed no later than Autumn Quarter of the junior year. It is recommended that majors complete MUSIC 40 Music History to 1600, MUSIC 41 Music History 1600-1830, MUSIC 42 Music History Since 1830 in the sophomore year; the series should be completed by the end of the junior year.

Suggested Preparatory Course:

MUSIC 19A	Introduction to Music Theory	3
MUSIC 19B	Intermediate Music Theory	3

### Fields of Study or Degree Options

#### Concentrations

Areas of concentration (subplans) are offered in five areas: Performance, Conducting, Composition, History and Theory, and Music, Science, and Technology. Subplans are declared in Axess, and appear on the student's transcript and diploma. Guidelines and further information are available from the Department of Music office. In order to complete requirements in a timely manner, students are urged to select this option no later than the end of the junior year for single-area concentrators and the middle of the sophomore year for multiple-area concentrators. Students pursuing multiple concentrations must fulfill all the requirements of each.

#### Departmental Honors

Honors in Music are awarded by the faculty to majors who have produced an independent project of exceptional quality through the Concentration program. Students who wish to pursue Honors must declare their Concentration(s) by May 31 of the Junior year (see the undergraduate student services officer for concentration-specific requirements). To receive Honors students must also have earned an overall GPA of 3.60 or higher and a GPA of 3.70 or higher in courses required for the Music major. Honors are conferred solely through faculty adjudication. For students concentrating in multiple areas, a single jury will be convened.

### Degree Requirements

Prospective majors are required to choose a faculty adviser and submit a course plan. (Course plans and adviser agreement forms are available from the undergraduate student services officer.) It is recommended that students schedule a consultation meeting with the undergraduate student services officer as early as possible to plan a program of study.

#### Required Courses

The following courses are required of all majors.

##### 1. Theory

MUSIC 21	Elements of Music I	3
----------	---------------------	---

MUSIC 22	Elements of Music II	3
MUSIC 23	Elements of Music III	3
MUSIC 24A	Ear Training I	1
MUSIC 24B	Ear Training II	1
MUSIC 24C	Ear Training III	1

#### Additional Music Theory Requirements

- *Piano Proficiency:* Majors are required to pass a Piano Proficiency examination as part of the music theory core (MUSIC 21 Elements of Music I, MUSIC 22 Elements of Music II, MUSIC 23 Elements of Music III). The examination is given in the first two weeks of MUSIC 21. Students who do not pass the Piano Proficiency examination are required to enroll in either MUSIC 12A Introductory Piano Class, MUSIC 12B Introductory Piano Class, or MUSIC 12C Introductory Piano Class concurrently with the music theory core until they are able to pass the examination. The examination consists of scales and arpeggios, performance of a simple tune to be set by the examiner, sight-reading, and the performance of prepared pieces. Download additional information regarding the proficiency examination (<https://music.stanford.edu/sites/default/files/pianoprofexaminfo.pdf>).
- *Elective:* In addition to the Theory requirements listed above, majors must successfully complete one unit of an ear training elective course from the list below:

	Units	
MUSIC 65A	Voice Class I	1
MUSIC 126	Introduction to Thoroughbass	1-3
MUSIC 127	Instrumentation and Orchestration	3
Or any course, upon approval from Ear Training Advisor		

- *Exit Exam:* in conjunction with the Music Theory series, majors are required to pass an aural skills proficiency examination administered at the end of the junior year. This examination tests the ability to transcribe, represent, and reproduce music vocally and at the keyboard, and must be passed before June of the senior year.

#### 2. History

	Units	
MUSIC 40	Music History to 1600	4
MUSIC 41	Music History 1600-1830	4
MUSIC 42	Music History Since 1830	4

#### 3. Analysis

	Units	
MUSIC 122A	Counterpoint	4
MUSIC 122B	Analysis of Tonal Music	4
MUSIC 122C	Introduction to 20th-Century Composition	4

#### 4. Writing in the Major (WIM)

Select three courses, including at least two at the 4-unit level, as follows:

##### One course numbered 140, 141, or 142

MUSIC 140: Studies in Music of the Middle Ages

Pre- or corequisites for WIM credit: MUSIC 21, MUSIC 40\*

MUSIC 141: Studies in Music of the Renaissance

Pre- or corequisites for WIM credit: MUSIC 21, MUSIC 40\*

MUSIC 142: Studies in Music of the Baroque

Pre- or corequisites for WIM credit: MUSIC 22, MUSIC 41\*

##### One course numbered 143, 144, or 145

MUSIC 143: Studies in Music of the Classical Period

Pre- or corequisites for WIM credit: MUSIC 22, MUSIC 41\*

Units  
3

MUSIC 144: Studies in Music of the Romantic Period  
Pre- or corequisites for WIM credit: MUSIC 23, MUSIC 42\*

MUSIC 145: Studies in Western Art Music Since 1900  
Pre- or corequisites for WIM credit: MUSIC 23, MUSIC 42\*

**One course, numbered 146, 147, 148, or 251**

MUSIC 146: Studies in Ethnomusicology  
Pre- or corequisites for WIM credit: MUSIC 22\*

MUSIC 147: Studies in Music, Media, and Popular Culture  
Pre- or corequisites for WIM credit: MUSIC 22\*

MUSIC 148: Studies in Performance Practice  
Pre- or corequisites for WIM credit: MUSIC 22\*

MUSIC 251: Psychophysics and Music Cognition

\*Any additional pre- and co-requisites will be indicated in the annual course bulletin.

\*For complete enrollment requirements, consult the course description in the "ExploreCourse (<http://explorecourses.stanford.edu>)" section of this bulletin.

## 5. Applied

- A minimum of five quarters totaling 15 units of private instruction in instrumental and/or vocal performance (MUSIC 172/272-177/277). Students who do not qualify for private instruction at the intermediate or advanced level, but who wish to pursue the major may take introductory voice (MUSIC 65A Voice Class I and MUSIC 73 Intermediate Voice Class), piano (MUSIC 12A Introductory Piano Class and MUSIC 72A Intermediate Piano Class), or guitar (MUSIC 74C Classical Guitar Class) to reach the minimum proficiency levels required to be accepted into a private studio and then complete their five quarters. Requirements for the minimum levels of proficiency in each instrument for private instruction are posted at: <http://music.stanford.edu/Academics/Auditions.html>.
- A minimum of five quarters totaling at least 5 units of work in one or more of the department's performance organizations or chamber groups. To fulfill the ensemble requirement, Music majors need at least three quarters of participation in the department's traditional large ensembles (MUSIC 159–167), with the exception of students whose primary instrument is harp, keyboard, or guitar, who need to participate at least one quarter in the ensembles above, but who may fulfill the rest of the requirement with chamber music (MUSIC 171 Chamber Music). MUSIC 156 "sic": Improvisation Collective may count for up to two of the ensemble-unit requirements for the Music major.

Note—The following courses do not satisfy this requirement:

		Units
MUSIC 128	Stanford Laptop Orchestra: Composition, Coding, and Performance	1-5
MUSIC 160B	Stanford New Ensemble	1
MUSIC 161C	Red Vest Band	1
MUSIC 161D	Stanford Brass Ensemble	1

## Concentration Requirements

### A. Concentration in Performance

In addition to degree requirements required of majors listed above, students in the Performance concentration must:

- Complete at least 6 additional, graded course units in one area of performance. Acceptable courses are described under "Applied" in the section describing private instruction and ensemble course work above. Additional courses might include, but are not limited to:

MUSIC 126	Introduction to Thoroughbass	1-3
MUSIC 154	History of Electronic Music	1-5

MUSIC 182	Diction for Singers	1
MUSIC 269	Research in Performance Practices	1-5
MUSIC 183A	German Art Song Interpretation	1
MUSIC 183B	French Art Song Interpretation	1
MUSIC 184A	Editing and Performing Early Music	1-3
MUSIC 184B	Topics in Opera Stagecraft	1-3

- Register for an independent project (MUSIC 198 Concentrations Project, 4 units) in the senior year under faculty supervision, leading to a faculty adjudicated senior recital with a writing component.

In preparation for the senior recital, students should reference the Recitals-at-a-Glance planning document (<https://sites.stanford.edu/music-dept/venues-spaces/reserve/recitals>), provided by the Department for all dates and appropriate deadlines.

### B. Concentration in Conducting

In addition to degree requirements required of majors listed above, students in the Conducting concentration must:

- Complete at least 6 additional, graded elective course units in conducting. Additional courses might include, but are not limited to:

		Units
MUSIC 127	Instrumentation and Orchestration	3
MUSIC 130A	Introduction to Conducting	3
MUSIC 130B	Elementary Orchestral Conducting	3
MUSIC 130C	Elementary Choral Conducting	3
MUSIC 230	Advanced Orchestral Conducting	2-4
MUSIC 231	Advanced Choral Conducting	2-4

- Register for an independent project (MUSIC 198 Concentrations Project, 4 units) in the senior year under faculty supervision, leading to a senior conducting project.

In preparation for the senior recital, students should refer to the Recitals-at-a-Glance planning document (<https://sites.stanford.edu/music-dept/venues-spaces/reserve/recitals>), provided by the Department for all dates and appropriate deadlines.

### C. Concentration in Composition

In addition to degree requirements required of majors listed above, students in the Composition concentration must:

- Complete MUSIC 127 Instrumentation and Orchestration
- Composition concentrators must take at least 2 quarters of individual study in composition MUSIC 125 Individual Undergraduate Projects in Composition, and at least one quarter of MUSIC 123 Undergraduate Seminar in Composition. These may count as 3 of the 5 quarters of required applied music classes for the major (the remaining two quarters of applied music must be taken in an instrumental or vocal area, as defined in the requirements for the music major).
- Complete at least 3 additional, graded elective course units in composition. Additional courses might include, but are not limited to:

		Units
MUSIC 123	Undergraduate Seminar in Composition	3
MUSIC 125	Individual Undergraduate Projects in Composition	1-3
MUSIC 127	Instrumentation and Orchestration	3
MUSIC 150	Musical Acoustics	3
MUSIC 154	History of Electronic Music	1-5
Select one of the following Series:		

#### Series A

		Units
MUSIC 220A	Fundamentals of Computer-Generated Sound	2-4
MUSIC 220B	Compositional Algorithms, Psychoacoustics, and Computational Music	2-4

MUSIC 220C	Research Seminar in Computer-Generated Music	2-4
------------	--	-----

**Series B**

Any of the series in computer-generated sound, music, and composition

4. Register for an independent project (MUSIC 198 Concentrations Project, 4 units) in the senior year under faculty supervision, leading to a faculty-adjudicated composition project. In preparation for the senior recital, students should refer to the Recitals-at-a-Glance planning document (<https://sites.stanford.edu/music-dept/venues-spaces/reserve/recitals>), provided by the Department for all dates and appropriate deadlines.

**D. Concentration in History and Theory**

In addition to degree requirements required of majors listed above, students in the History and Theory concentration must:

1. Complete at least 6 additional, graded course units in history and theory. Additional courses might include, but are not limited to:

Select any course not taken in fulfillment of the major requirement:

MUSIC 221	Topics in the History of Theory	3-5
MUSIC 140	Studies in Music of the Middle Ages	
MUSIC 141	Studies in Music of the Renaissance	
MUSIC 142	Studies in Music of the Baroque	
MUSIC 143	Studies in Music of the Classical Period	
MUSIC 144	Studies in Music of the Romantic Period	
MUSIC 145	Studies in Western Art Music Since 1900	
MUSIC 146	Studies in Ethnomusicology	
MUSIC 147	Studies in Music, Media, and Popular Culture	
MUSIC 148	Studies in Performance Practice	

2. Register for an independent project (MUSIC 198 Concentrations Project 4 units) in the senior year under faculty supervision, leading to a senior research paper.

**E. Concentration in Music, Science, and Technology**

Requires completion of 62 units of course work that differs from that of the major and is delineated below. This field of study is designed for those students interested in the musical ramifications of rapidly evolving computer technology and digital audio, and in the acoustic and psychoacoustic foundations of music. This program can serve as a complementary major to students in the sciences and engineering. Students in the program are required to include the following courses in their studies:

1. Theory and Analysis

MUSIC 21	Elements of Music I	3
MUSIC 24A	Ear Training I	1
MUSIC 22	Elements of Music II	3
MUSIC 24B	Ear Training II	1
MUSIC 23	Elements of Music III (includes passing the piano and ear-training proficiency examinations, as described for the major)	3
MUSIC 24C	Ear Training III	1
MUSIC 150	Musical Acoustics	3
MUSIC 122B	Analysis of Tonal Music	4
MUSIC 251	Psychophysics and Music Cognition	4
MUSIC 220A	Fundamentals of Computer-Generated Sound	4
MUSIC 220B	Compositional Algorithms, Psychoacoustics, and Computational Music	4

MUSIC 220C	Research Seminar in Computer-Generated Music	4
------------	--	---

MUSIC 220D	Research in Computer-Generated Music	4
------------	--------------------------------------	---

MUSIC 250A	Physical Interaction Design for Music	4
------------	---------------------------------------	---

2. Majors are required to pass a Piano Proficiency examination as part of the music theory core as described above in the "Degree Requirements" section, item 6. Additional Requirements. Download additional information regarding the proficiency examination (<http://music.stanford.edu/private/downloads/PIANO%20PROFICIENCY%20EXAM.doc>).

3. In addition to the three ear training courses above, MST students are also required to take an elective course in ear training, and pass an aural skills proficiency examination at the end of the junior year. This examination tests the ability to accurately transcribe, represent, and reproduce music vocally and at the keyboard.

4. Applied

- Individual studies in performance, MUSIC 172/272-177/277 (6 units) or MUSIC 192A Foundations of Sound-Recording Technology and MUSIC 192B Advanced Sound Recording Technology (6 units)
- A minimum of five quarters totaling at least 5 units of work in one or more of the department's performance organizations or chamber groups, or 5 units of MUSIC 192C Session Recording. To fulfill the ensemble requirement, Music majors need at least three quarters of participation in the department's traditional large ensembles (MUSIC 159-167), with the exception of students whose primary instrument is harp, keyboard, or guitar, who need to participate at least one quarter in the ensembles above, but who may fulfill the rest of the requirement with chamber music (MUSIC 192C Session Recording). MUSIC 156 "sic": Improvisation Collective may count for up to two of the ensemble-unit requirements for the Music major.

**Units**

5. History

Select two of the following:		8
MUSIC 40	Music History to 1600	4
MUSIC 41	Music History 1600-1830	4
MUSIC 42	Music History Since 1830	4

**Units**

6. Research Project

The program requires a senior research project (4 units) completed under faculty guidance. May be completed in conjunction with enrollment in any of the following:

MUSIC 220D	Research in Computer-Generated Music	4
MUSIC 199	Independent Study	4
MUSIC 198	Concentrations Project	4

**Units****Units****Overseas Study or Study Abroad**

Courses in Music are often available at Stanford overseas programs, especially in Berlin, Paris, Florence, and Oxford. See the "Overseas Studies Program" section of this bulletin for this year's listings. Music majors and minors should talk to the Department of Music undergraduate administrator prior to going overseas.

**Joint Major Program in Music and Computer Science**

The joint major program (JMP), authorized by the Academic Senate for a pilot period of six years beginning in 2014-15, permits students to major in both Computer Science and one of ten Humanities majors. See the "Joint Major Program (p. 26)" section of this bulletin for a description

of University requirements for the JMP. See also the Undergraduate Advising and Research JMP web site and its associated FAQs.

Students completing the JMP receive a B.A.S. (Bachelor of Arts and Science).

Because the JMP is new and experimental, changes to procedures may occur; students are advised to check the relevant section of the bulletin periodically.

## Music Major Requirements in the Joint Major Program

Because the Joint Major Program is new and experimental, some changes to the following may occur. Questions concerning a concentration project in addition to the basic requirements for a Joint Major in Music and Computer Science should be directed to the Department of Music student services office in Braun Music Center, Room 101.

See the "Computer Science Joint Major Program (p. 231)" section of this bulletin for details on Computer Science requirements.

Students majoring in the joint major program in Computer Science and Music must complete the following:

### 1. Music Theory

		Units
MUSIC 21	Elements of Music I	3
MUSIC 22	Elements of Music II	3
MUSIC 23	Elements of Music III	3
MUSIC 24A	Ear Training I	1
MUSIC 24B	Ear Training II	1
MUSIC 24C	Ear Training III	1
Total Units		12

### Additional Music Theory Requirements

- *Piano Proficiency:* Majors are required to pass a Piano Proficiency examination as part of the music theory core (MUSIC 21 Elements of Music I, MUSIC 22 Elements of Music II, MUSIC 23 Elements of Music III). The examination is given in the first two weeks of MUSIC 21. Students who do not pass the Piano Proficiency examination are required to enroll in either MUSIC 12A Introductory Piano Class, MUSIC 12B Introductory Piano Class, or MUSIC 12C Introductory Piano Class concurrently with the music theory core until they are able to pass the examination. The examination consists of scales and arpeggios, performance of a simple tune to be set by the examiner, sight-reading, and the performance of prepared pieces. For additional information about this requirement, see Piano Proficiency Examination (<https://music.stanford.edu/sites/default/files/pianoprofexaminfo.pdf>).
- *Elective:* In addition to the Theory requirements listed above, majors must successfully complete one unit of an ear training elective course from the list below:

		Units
MUSIC 65A	Voice Class I	1
MUSIC 126	Introduction to Thoroughbass	1
MUSIC 127	Instrumentation and Orchestration	3
Or any course upon approval of the Ear Training adviser		

- *Exit Exam:* in conjunction with the Music Theory series, majors are required to pass an aural skills proficiency examination administered at the end of the junior year. This examination tests the ability to accurately transcribe, represent, and reproduce music vocally and at the keyboard, and must be passed before June of the senior year.

### 2. Music History

		Units
Select 2 of 3 from the list below		8
MUSIC 40	Music History to 1600	4
MUSIC 41	Music History 1600-1830	4
MUSIC 42	Music History Since 1830	4

### 3. Analysis

		Units
MUSIC 122B	Analysis of Tonal Music	4

### 4. Computing and Music

		Units
MUSIC 220A	Fundamentals of Computer-Generated Sound	4
MUSIC 256A	Music, Computing, Design I: Art of Design for Computer Music	4
Total Units		8

### 5. WIM

		Units
WIM at 4 units must be taken. Course below is recommended, but can be replaced with any Music WIM course depending on student's area of interest.		
MUSIC 251	Psychophysics and Music Cognition	4
Total Units		4

### 6. Electives

		Units
Students must submit 12 unit elective course plan to the JMP faculty adviser for approval no later than the beginning of the junior year. MUSIC 220B and MUSIC 250A are recommended, but elective course plan can consist of any courses from list below, or other Music department course(s) with permission of adviser.		
MUSIC 122A	Counterpoint	4
MUSIC 122C	Introduction to 20th-Century Composition	4
MUSIC 128	Stanford Laptop Orchestra: Composition, Coding, and Performance	4
MUSIC 150	Musical Acoustics	3
MUSIC 220B	Compositional Algorithms, Psychoacoustics, and Computational Music	4
MUSIC 220C	Research Seminar in Computer-Generated Music	4
MUSIC 250A	Physical Interaction Design for Music	4
MUSIC 256B	Music, Computing, Design II: Virtual and Augmented Reality for Music	4

### 7. Applied Music

Students may elect to take either of the following to fulfill the applied music requirement:

#### 7.1 Lesson and Ensemble Study

- 6 units of individual studies in performance, MUSIC 172/272-177/277 and
- 5 quarters totaling 5 units of work in one or more of the department's ensembles or chamber music groups. To fulfill the ensemble requirement, Music majors need at least three quarters of participation in the department's traditional large ensembles (MUSIC 159-167) with the exception of students whose primary instrument is harp, keyboard, or guitar, who need to participate at least one quarter in the ensembles above, but who may fulfill the rest of the requirement with chamber music.

## 7.2 Sound Recording

- 1 quarter (3 units) of MUSIC 192A Foundations of Sound-Recording Technology
- 1 quarter (3 units) of MUSIC 192B Advanced Sound Recording Technology
- 5 units of MUSIC 192C Session Recording

## 8. Capstone Project

		Units
MUSIC 220D	Research in Computer-Generated Music (3 units taken in conjunction with CS Capstone)	3

## 9. Optional Concentrations

Students who would also like to complete an additional capstone project in Performance, Conducting, Composition, Music History and Theory, or Music, Science, and Technology must consult the Department of Music student services office in Braun Music Center, Room 101 to submit a proposal for an optional concentration.

## Declaring a Joint Major Program

To declare the joint major, students must first declare each major through Axess, and then submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>) The Major-Minor and Multiple Major Course Approval Form ([http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin\\_MultMaj.pdf](http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin_MultMaj.pdf)) is required for graduation for students with a joint major.

## Dropping a Joint Major Program

To drop the joint major, students must submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>). Students may also consult the Student Services Center (<http://studentservicescenter.stanford.edu>) with questions concerning dropping the joint major.

## Transcript and Diploma

Students completing a joint major graduate with a B.A.S. degree. The two majors are identified on one diploma separated by a hyphen. There will be a notation indicating that the student has completed a "Joint Major". The two majors are identified on the transcript with a notation indicating that the student has completed a "Joint Major".

## Minor in Music

The Music minor provides students with a core of essential Music courses in the disciplines that establish both a foundation for informed appreciation of music and a basis for more advanced study, should the student wish to pursue it.

## Degree Requirements

Total of 36 units required course work as delineated below, and passage of the piano proficiency examination.

### Required Courses: General Music

#### 1. Theory

		Units
MUSIC 21	Elements of Music I	3
MUSIC 22	Elements of Music II	3
MUSIC 23	Elements of Music III	3
MUSIC 24A	Ear Training I	1
MUSIC 24B	Ear Training II	1
MUSIC 24C	Ear Training III	1

### Additional Music Theory Requirements

- **Piano Proficiency:** minors are required to pass a Piano Proficiency examination as part of the music theory core (MUSIC 21 Elements of Music I, MUSIC 22 Elements of Music II, MUSIC 23 Elements of Music III). The examination is given in the first two weeks of MUSIC 21. Students who do not pass the Piano Proficiency examination are required to enroll in either MUSIC 12A Introductory Piano Class, MUSIC 12B Introductory Piano Class, or MUSIC 12C Introductory Piano Class concurrently with the music theory core until they are able to pass the examination. The examination consists of scales and arpeggios, performance of a simple tune to be set by the examiner, sight-reading, and the performance of prepared pieces. Download additional information regarding the proficiency examination (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/music/pianoprofexaminfo.pdf>).
- **Exit Exam:** in conjunction with the Music Theory series, minors are required to pass an aural skills proficiency examination administered at the end of the junior year. This examination tests the ability to accurately transcribe, represent, and reproduce music vocally and at the keyboard, and must be passed before June of the senior year.

### 2. History

		Units
MUSIC 40	Music History to 1600	4
MUSIC 41	Music History 1600-1830	4
MUSIC 42	Music History Since 1830	4

### 3. Applied: Ensemble

Two quarters, 2 units total.

		Units
MUSIC 159	Early Music Singers	1
MUSIC 160	Stanford Symphony Orchestra	1
MUSIC 160C	Stanford Baroque Soloists	1
MUSIC 160S	Summer Orchestra	1
MUSIC 161A	Stanford Wind Symphony	1
MUSIC 161B	Jazz Orchestra	1
MUSIC 162	Symphonic Chorus	1
MUSIC 163	Memorial Church Choir	1
MUSIC 165	Chamber Chorale	1
MUSIC 167	University Singers	1
MUSIC 167S	Summer Chorus	1

### 4. Applied: Individual

Two quarters at 3 units per quarter, 6 units total.

		Units
MUSIC 159	Early Music Singers	1
MUSIC 160	Stanford Symphony Orchestra	1
MUSIC 160C	Stanford Baroque Soloists	1
MUSIC 160S	Summer Orchestra	1
MUSIC 161A	Stanford Wind Symphony	1
MUSIC 161B	Jazz Orchestra	1
MUSIC 162	Symphonic Chorus	1
MUSIC 163	Memorial Church Choir	1
MUSIC 165	Chamber Chorale	1
MUSIC 167	University Singers	1
MUSIC 167S	Summer Chorus	1

**4. WIM, 4 units**

4 units in any course numbered Music 140-149, except MUSIC 140G, or MUSIC 251. Offerings in 2014-2015 include:

MUSIC 140J	Studies in Music of the Middle Ages: Music and Memory	4
MUSIC 141J	Studies in Music of the Renaissance	2-4
MUSIC 143J	Studies in Music of the Classical Period: Franz Joseph Haydn	4
MUSIC 144J	Studies in Music of the Romantic Period: Faust in 19th-century Music	4
MUSIC 145J	Studies in Western Art Music Since 1900: The Music & Ideas of Charles Ives	4
MUSIC 146J	Studies in Ethnomusicology: Listening to the Local: Music Ethnography of the Bay Area	4
MUSIC 147J	Studies in Music, Media, and Popular Culture: The Soul Tradition in African American Music	4
MUSIC 147K	Studies in Music, Media, and Popular Culture: Music and Urban Film	4
MUSIC 147L	Studies in Music, Media, and Popular Culture: Latin American Music and Globalization	4
MUSIC 148J	Studies in Perf Practice: Reactions to the Record: Early Recordings, Lost Styles, and Music's Future	4
MUSIC 251	Psychophysics and Music Cognition	4

**Required Courses: Music, Science and Technology****1. Theory**

		Units
MUSIC 21	Elements of Music I	3
MUSIC 22	Elements of Music II	3
MUSIC 23	Elements of Music III	3
MUSIC 24A	Ear Training I	1
MUSIC 24B	Ear Training II	1
MUSIC 24C	Ear Training III	1
MUSIC 150	Musical Acoustics	3
MUSIC 220A	Fundamentals of Computer-Generated Sound	2-4
MUSIC 220B	Compositional Algorithms, Psychoacoustics, and Computational Music	2-4

**2. Applied**

		Units
MUSIC 192A	Foundations of Sound-Recording Technology	3
MUSIC 192B	Advanced Sound Recording Technology	3
MUSIC 192C	Session Recording (two quarters, 3 units total)	1-2

Alternatively, students pursuing the MST minor may elect to fulfill the applied music requirement with ensemble units and individual lessons as described in the Applied requirements for the General Music minor above.

**3. WIM, 4 units**

MUSIC 251	Psychophysics and Music Cognition	4
-----------	-----------------------------------	---

**Performance Certificate Program for Non Music Majors**

As a locus of great academic and artistic depth and diversity, the Department of Music's performance programs have long engaged students who, even though they are not music majors, are serious and dedicated to furthering their skills in music performance. The Certificate in Music Performance program provides a select cohort of these students the opportunity for further recognition of their artistic achievement.

This program is open by audition to undergraduate students who already demonstrate a high degree of accomplishment in their area of music performance, study privately with one of the Department of Music's faculty, and who wish to bolster their performance studies with coursework that may be drawn from the Department of Music's other areas of academic focus: history, theory, computer music, and composition. The Certificate in Music Performance is issued by the Department of Music and will not appear on any University record, including the student's transcript.

**Admission**

Students are admitted to the Certificate in Music Performance program based on an audition adjudicated by Department of Music faculty at the beginning of Spring Quarter. To request an audition, the student should speak with the private lesson instructor and the Department of Music's undergraduate student services officer. Email [ugmusicinquiries@lists.stanford.edu](mailto:ugmusicinquiries@lists.stanford.edu) ([ugmusicinquiries@stanford.edu](mailto:ugmusicinquiries@stanford.edu)) for additional information. At the time of the audition, students must have already declared a major outside of music.

**Requirements**

Once admitted into the program, students must complete a course plan to be approved by department faculty based on the requirements below

**1. Performance**

- A minimum of six quarters of individual lessons of private instruction and/or vocal performance (MUSIC 172/272-177/277). Any quarters of instruction taken prior to admission into the program may also count towards these requirements. Requirements for the minimum levels of proficiency in each instrument for private instruction are posted on the Music Department's (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/music/%20http://music.stanford.edu/Academics/Auditions.html.html>) web site (<https://sites.stanford.edu/music-dept/academics/undergraduates>). All six quarters of lesson study must be in the same instrument area.
- A minimum of six quarters of ensemble experience in the Department of Music's ensembles and chamber groups. For students whose primary instrument area is guitar, keyboard or harp, at least one quarter of ensemble experience must be in one of the department's traditional large ensembles (MUSIC 159-167, MUSIC 184). The remaining ensemble requirements may be filled with chamber music (MUSIC 171). Keyboard students may also take MUSIC 171 Chamber Music, MUSIC 171 Chamber Music, and MUSIC 171 Chamber Music to fulfill this requirement. All non-keyboard, guitar or harp students must successfully complete three quarters in the department's traditional large ensembles (MUSIC 159-167, MUSIC 184), and three quarters in conductor-less, small ensembles such as chamber music or jazz combos MUSIC 171 Chamber Music. MUSIC 156 "sic": Improvisation Collective may count for up to two of the ensemble unit requirements. Any quarters of ensemble taken prior to admission into the program may also count towards these requirements.

**2. Music Theory**

Students are required to complete one course in Music Theory (MUSIC 21 Elements of Music I, MUSIC 22 Elements of Music II, or MUSIC 23 Elements of Music III). For the purposes of the Performance Certificate, the student may elect to take these courses on a Credit/No Credit grading basis. However, students must also pass the associated Piano Proficiency Exam and take one course in Ear Training.

**3. Elective Courses**

6 or more total course units in Music, dependent upon course plan document submitted following acceptance into the program.

**4. Final Project**

To complete the Performance Certificate, students must enroll in a 4-unit MUSIC 199 Independent Study or 4-unit MUSIC 198 Concentrations Project and complete a final, performance-based capstone project.

Students must pass faculty adjudication, and, in addition, complete a writing project (essay or program notes) pre-approved by the lesson instructor. Students should refer to the Department of Music website's Recitals-at-a-Glance (<https://sites.stanford.edu/music-dept/venues-spaces/reserve/recitals>) page for appropriate recital planning dates and deadlines.

## Master of Arts in Music

University requirements for the M.A. are described in the "Graduate Degrees (p. 45)" section of this bulletin.

None of Stanford's required undergraduate courses may be credited toward an advanced degree unless specifically required for both degrees. Only work that receives a grade of 'A,' 'B,' or 'Satisfactory' (a passing grade in an instructor-mandated credit/no credit course) in Music courses numbered 100 or higher taken as a graduate student is recognized as fulfilling the advanced-degree requirements. Students may need to devote more than the minimum time in residence if preparation for graduate study is inadequate.

### Admission

Applicants are required to submit evidence of accomplishment (scores, recordings, and/or research papers) when they complete the application form. Applicants should arrange to take the Graduate Record Examination (GRE) well in advance of the second Tuesday in December application deadline. All components of the application are due by the second Tuesday in December. International students whose first language is not English are also required to take the TOEFL exam (with certain exceptions: see the Office of Graduate Admissions (<http://studentaffairs.stanford.edu/gradadmissions>) web site).

### Degree Options

All of the following fields of study are declarable as subplans in Axess via the "Declaration or Change to a Field of Student" form; they appear on the transcript and the diploma:

- Master of Arts degree (M.A.) in Music—Composition subplan.
- Master of Arts degree (M.A.) in Music—Music History subplan.
- Master of Arts degree (M.A.) in Music—Computer-Based Music Theory and Acoustics subplan.
- Master of Arts degree (M.A.) in Music—Music, Science, and Technology subplan
  - Note: The M.A./M.S.T. program is the only terminal master's degree; it is two years in duration. It is available to current Stanford undergraduates as a coterminal MA, current Stanford graduates, and external applicants.

### Degree Requirements

A minimum of 45 academic units is required for the master's degree in Music. The Department of Music does not accept students for study only towards the M.A. degree except in the Music, Science, and Technology program, described below.

#### 1. Composition

Students are not admitted into the M.A. as a terminal degree for composition: rather, students in the D.M.A. program in composition who enter directly from the bachelor's level may, upon completing 45 graduate-level units and advancing to candidacy by passing the qualifying examination, be recommended for the M.A. degree in composition.

#### 2. Music History

Students are not admitted into the M.A. as a terminal degree for music history: rather, students in the Ph.D. program in musicology who enter directly from the bachelor's level may, upon completing 45 graduate-level units and advancing to candidacy by passing the

qualifying examination, be recommended for the M.A. degree in music history.

#### 3. Computer-Based Music Theory and Acoustics

Students are not admitted into the M.A. as a terminal degree for computer-based music theory and acoustics: rather, students in the Ph.D. program in computer-based music theory and acoustics who enter directly from the bachelor's level may, upon completing 45 graduate-level units and advancing to candidacy by passing the qualifying examination, be recommended for the M.A. degree in computer-based music theory and acoustics.

#### 4. Music, Science, and Technology (M.S.T.)

The M.A. in Music, Science, and Technology is the department's only terminal master's degree. This is a two-year program of 45 graduate-level units focusing on the integration of music perception, music-related signal processing and controllers, synthesis, performance, and composition. The program is designed for students who have an undergraduate music, engineering, or science degree.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken during or after the first quarter of the sophomore year are eligible for consideration for transfer to the graduate career; the timing of the first graduate quarter is not a factor. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

Required course work is listed below. A complete program with an individually-tailored list of electives will be formed in consultation with the student's adviser.

#### Units

#### Required Courses

MUSIC 201	CCRMA Colloquium
MUSIC 220A	Fundamentals of Computer-Generated Sound
MUSIC 251	Psychophysics and Music Cognition
MUSIC 255	Intermedia Workshop
MUSIC 256A	Music, Computing, Design I: Art of Design for Computer Music
MUSIC 320A	Introduction to Audio Signal Processing Part I: Spectrum Analysis
MUSIC 320B	Introduction to Audio Signal Processing Part II: Digital Filters

#### Electives

The remaining units of graduate level work are determined in consultation with the student's adviser and include CCRMA electives, and may include courses taken outside the department.

## Doctor of Musical Arts (D.M.A.) and Doctor of Philosophy (Ph.D.) in Music

University requirements for the D.M.A. and Ph.D. are described in the "Graduate Degrees" section of this bulletin. The following statements apply to all the graduate degrees described below, unless otherwise indicated.

### Admission

Applicants are required to submit evidence of accomplishment (scores, recordings, and/or research papers, according to the proposed field of concentration) when they complete the application form. Applicants should arrange to take the Graduate Record Examination (GRE) well in advance of the application deadline of the second Tuesday in December. All components of the application are due by the second Tuesday in December. International students whose first language is not English are also required to take the TOEFL exam (with certain exceptions: see the Office of Graduate Admissions (<http://studentaffairs.stanford.edu/gradadmissions>) web site).

### Department Examinations

All entering doctoral graduate students are required to take:

1. a diagnostic examination testing the student in theory (counterpoint, harmony, and analysis), a proficiency examination in sight-singing; and,
2. for musicologists and composers only, a proficiency examination in piano sight-reading; and
3. for musicologists only, the history of Western art music.

These exams are given the week before classes begin in September each year. Teaching Assistant assignments and the funding associated with this portion of a graduate student's financial aid package are determined based upon successful completion of these exams.

### Graduate Credit

None of Stanford's required undergraduate courses may be credited toward an advanced degree unless specifically required for both degrees. Only work that receives a grade of 'A,' 'B,' or 'S' (a passing grade in an instructor-mandated credit/no credit course) in music courses numbered 100 or higher taken as a graduate student is recognized as fulfilling the advanced-degree requirements. Students may need to devote more than the minimum time in residence if preparation for graduate study is inadequate.

The following may be taken as electives for graduate credit:

1. any course in another department numbered 100 or over (with adviser's consent)
2. any course in the Music department numbered 100 or over except those required for the B.A. degree. A letter grade of 'A,' 'B,' or 'S' (a passing grade in an instructor-mandated credit/no credit course) is required.
3. Music department group instruction (enroll in MUSIC 199 Independent Study after speaking with instructor):

MUSIC 72A	Intermediate Piano Class	1
MUSIC 72C	Harpsichord Class	1
MUSIC 72D	Jazz Piano Class	1
MUSIC 73	Intermediate Voice Class	1
MUSIC 74C	Classical Guitar Class	1

MUSIC 74D	Harp Class	1
MUSIC 75B	Renaissance Wind Instruments Class	1
MUSIC 76	Brass Instruments Class	1
MUSIC 77	Percussion Class	1

### Degree Options

All of the following fields of study are declarable as subplans in Axxess via the "Declaration or Change to a Field of Study for Graduate Students" form; they appear on the transcript and the diploma:

- **Doctor of Musical Arts degree (D.M.A.) in Composition**

The D.M.A. is offered to a limited number of students who demonstrate substantial training in the field and high promise of attainment as composers. Students may work in acoustic and/or electronic forms. Breadth is given through studies in other branches of music and in relevant fields outside music, as desirable. The final project for this degree is a large-scale composition.

- **Doctor of Philosophy degree (Ph.D.) in Musicology**

- **Doctor of Philosophy degree (Ph.D.) in Computer-Based Music Theory and Acoustics**

The Ph.D. is offered in areas of the research of Stanford's graduate faculty: Musicology, and Computer-Based Music Theory and Acoustics (CBMTA) at the Center for Computer Research in Music and Acoustics (CCRMA). The department seeks students who demonstrate substantial scholarship, high promise of attainment, and the ability to do independent investigation and present the results of such research in a dissertation.

### Degree Requirements

#### Residence

The candidate must complete a minimum of 135 academic units (see *Residency* under the Graduate Degrees (p. 45) section of this bulletin). Doctoral candidates working on Ph.D. dissertations or Doctor of Musical Arts (D.M.A.) final projects that require consultation with faculty members continue enrollment in the University under Terminal Graduate Registration (TGR), after they have reached the required 135 academic units and have completed their Special Area Examinations.

#### Qualifying Examination

A written and oral examination given just prior to the fourth quarter of residence for D.M.A. students and Ph.D. students in the Computer-Based Music Theory and Acoustics programs; for Ph.D. students in Musicology, the exams are given just prior to the eighth quarter of residence. This exam tests knowledge of history, theory, repertory, and analysis. For D.M.A. students a *Special Area Examination* topic proposal is due at the time of the *Qualifying Examination*.

#### Admission to Candidacy

Upon successful completion of the Qualifying Examination and 45 units of graduate level work, faculty consider the student's overall progress and academic achievement and determines if the student has the potential to successfully complete the requirements of the degree program. If a student's progress and potential are deemed sufficient to continue in the degree program, the student is directed to complete the Application for Candidacy for Doctoral Degree (<http://studentaffairs.stanford.edu/sites/default/files/registrar/files/appcanddoct.pdf>). Failure to advance to candidacy will result in the dismissal of the student from the program.

#### Teaching

**Units** All students in the Ph.D. or D.M.A. degree programs, regardless of sources of financial support, are required to complete six quarters of supervised teaching (Teaching Assistantship) at half time. MUSIC 280 TA Training Course (offered in Spring Quarter and taken at the end of the first year) is a required course for Teaching Assistants. Additional quarters of teaching may be offered by the department.

## I. Composition

The Doctor of Musical Arts (D.M.A.) degree in Composition is given breadth through collateral studies in other branches of music and in relevant studies outside music as seems desirable. In addition to degree requirements required of all doctoral graduate students and listed above, students must complete the following required courses:

Required Courses		Units
MUSIC 280	TA Training Course	1
MUSIC 305C	Analysis and Repertoire: Late-Romantic to Contemporary	4
MUSIC 323	Doctoral Seminar in Composition (4 quarters within the first two years of study)	3-4
MUSIC 324	Graduate Composition Forum *	1
MUSIC 325	Individual Graduate Projects in Composition †	1-5

One elective course from the Ph.D. CBMTA curricula chosen from the following:

MUSIC 220A	Fundamentals of Computer-Generated Sound	
MUSIC 251	Psychophysics and Music Cognition	
MUSIC 255	Intermedia Workshop	
MUSIC 256A	Music, Computing, Design I: Art of Design for Computer Music	
MUSIC 320A	Introduction to Audio Signal Processing Part I: Spectrum Analysis	3-4
MUSIC 320B	Introduction to Audio Signal Processing Part II: Digital Filters	3-4

\* The requirement is for all six quarters during years 1 & 2, and a minimum of three quarters during years 3 & 4.

† Two or more quarters per year are required until advancement to candidacy; by the end of the second year the student shall have enrolled with a minimum of two different faculty members; but the end of the third year the student shall have enrolled with a minimum of three different faculty.

- Besides those requirements listed above, candidates are expected to produce a number of works demonstrating their ability to compose in a variety of forms and for the common media: vocal, instrumental, and electronic music. If possible, the works submitted are presented in public performance prepared by the composer. Annual progress is reviewed by the composition faculty with a major portfolio review conducted during the Fall Quarter of the third year.
- Foreign Language Requirement*—At the time of advancement to candidacy, all D.M.A. students are required to have demonstrated a reading knowledge of one language other than English and the ability to translate it into idiomatic English.
- Special-Area Examination*—A written examination in the candidate's field of concentration, one-hour presentation followed by questions in MUSIC 324 Graduate Composition Forum, sample course syllabus, and final project proposal are required to be completed during the Winter Quarter of the fourth year of study, no later than the ninth week of classes.
- Final Project Presentation*—Required during the last quarter of residence, no later than the ninth week of classes, the purpose of the presentation is to demonstrate the ability of the candidate to organize and present the topic of the final project for public review. It should be one hour in length, followed by questions, treating aspects of the final project. Details regarding the D.M.A. final project presentation may be found in the Department of Music Graduate Handbook.
- Final Project*—Candidate's work culminates in a required Final Project. The final project in composition must be a substantial composition, the scope of which shall be agreed upon by the members of the

committee. Typically, work on the final project encompasses several quarters. Usually, smaller works, for specific performances, are composed at the same time.

- Reading Committee*—The membership of the reading committee is the principal final project adviser and a minimum of two additional members. The notice of appointment of a D.M.A. Final Project Reading Committee should be submitted to the department at the same time as the approved final project proposal and the completion of the Special Area Exam. It is the responsibility of the student, with the advice of his or her adviser, to approach appropriate faculty members and obtain their consent to serve on the reading committee. Obtain the D.M.A. reading committee form from the department office; fill it out; obtain committee members' signatures; return to the department office.

## II. Musicology

In addition to degree requirements required of all doctoral graduate students and listed above, students must complete the following required courses:

Required Courses		Units
MUSIC 200A	Proseminar in Musicology and Music Bibliography (required of all entering students)	3-4
MUSIC 200B	Proseminar in Ethnomusicology	3-5
MUSIC 280	TA Training Course	1
MUSIC 300A	Medieval Notation	3-4
MUSIC 300B	Renaissance Notation	4
MUSIC 305A	Analysis and Repertoire: Medieval and Renaissance	4
MUSIC 305B	Analysis and Repertoire: Baroque to Early Romantic	4
MUSIC 305C	Analysis and Repertoire: Late-Romantic to Contemporary	4
MUSIC 310	Research Seminar in Musicology *	3-5
MUSIC 312A	Aesthetics and Criticism of Music, Ancients and Moderns: Plato to Nietzsche	4
MUSIC 312B	Aesthetics and Criticism of Music, Contemporaries: Heidegger to Today	4
MUSIC 330	Musicology Dissertation Colloquium †	1

One elective course from the D.M.A. Composition of Ph.D. CBMTA curricula chosen from the following (or other, by instructor and advisor consent):

MUSIC 220A	Fundamentals of Computer-Generated Sound
MUSIC 251	Psychophysics and Music Cognition
MUSIC 253	Symbolic Musical Information
MUSIC 254	Music Query, Analysis, and Style Simulation
MUSIC 323	Doctoral Seminar in Composition
MUSIC 324	Graduate Composition Forum

\* The requirement is for eight seminars of 3-5 units each. Up to two graduate seminars in other departments may be counted toward this requirement, pending adviser's approval.

† The requirement is for enrollment each Spring Quarter beginning in year four and continuing to graduation.

- Foreign Language Requirement*—At the time of advancement to candidacy, all Ph.D. students in Musicology must have passed a Ph.D. Language examination in German and in a second language, chosen from French, Italian, or Latin (or, on a case-by-case basis, another language, if it has significant bearing on the candidate's field of study). If one of these languages is the student's native language, the student may be exempted from an examination.

2. **Special-Area Examination**—A written and oral examination testing the student's knowledge of music and research in the student's field of concentration is completed during the fourth year of study, no later than the last day of classes in Autumn Quarter of that year. This includes an oral defense of the dissertation proposal. The examining committee comprises prospective readers of the dissertation.
3. **University Oral Examination**—Taken once the dissertation is substantially under way; an oral presentation is a defense of dissertation research methods and results.
4. **Dissertation**—After the first two years of graduate study, the student concentrates on research and writing of the dissertation. The dissertation demonstrates the student's ability to work systematically and independently to produce an essay of competent scholarship.
5. **Reading Committee**—The minimum membership of the reading committee is 1) the principal dissertation adviser, 2) a second member from the department, and 3) a third member from the major department or another department. If a third member is from another institution, a fourth member must be appointed from the department. The principal dissertation adviser and all other members of the committee must belong to the Academic Council. The notice of appointment of a Reading Committee should be submitted to the department at the same time as the approved dissertation proposal and the completion of the Special-Area Exam. It is the responsibility of the student, with the advice of his or her adviser, to approach appropriate faculty members and obtain their consent to serve on the reading committee.

### III. Computer-Based Music Theory and Acoustics

In addition to degree requirements required of all doctoral graduate students and listed above, students must complete the following required courses:

#### Required Courses

MUSIC 220A	Fundamentals of Computer-Generated Sound	4
MUSIC 220B	Compositional Algorithms, Psychoacoustics, and Computational Music	4
MUSIC 220C	Research Seminar in Computer-Generated Music	2-4
MUSIC 220D	Research in Computer-Generated Music *	1-10
MUSIC 251	Psychophysics and Music Cognition	1-5
MUSIC 280	TA Training Course	1
MUSIC 305C	Analysis and Repertoire: Late-Romantic to Contemporary	4
MUSIC 320A	Introduction to Audio Signal Processing Part I: Spectrum Analysis	3-4
MUSIC 320B	Introduction to Audio Signal Processing Part II: Digital Filters	3-4

\* The requirement is for 12 units.

1. **Foreign Language Requirement**—At the time of advancement to candidacy, all Ph.D. students in computer-based music theory and acoustics are required to have demonstrated a reading knowledge of one language other than English and the ability to translate it into idiomatic English.
2. **Special-Area Examination**—A written and oral examination testing the student's knowledge of music and research in the student's field of concentration is completed during the fourth year of study, no later than the last day of classes in Autumn Quarter of that year. This includes an oral defense of the dissertation proposal. The examining committee comprises prospective readers of the dissertation.
3. **University Oral Examination**—Taken once the dissertation is substantially under way; an oral presentation is a defense of dissertation research methods and results.
4. **Dissertation**—After the first two years of graduate study, the student concentrates on research and writing of the dissertation. The

dissertation demonstrates the student's ability to work systematically and independently to produce an essay of competent scholarship.

5. **Reading Committee**—The minimum membership of the reading committee is 1) the principal dissertation adviser, 2) a second member from the department, and 3) a third member from the major department or another department. If a third member is from another institution, a fourth member must be appointed from the department. The principal dissertation adviser and all other members of the committee must belong to the Academic Council. The notice of appointment of a Reading Committee should be submitted to the department at the same time as the approved dissertation proposal and the completion of the Special-Area Exam. It is the responsibility of the student, with the advice of his or her adviser, to approach appropriate faculty members and obtain their consent to serve on the reading committee.

**Emeriti (Professors)** John M. Chowning, Albert Cohen, George Houle, William H. Ramsey; **(Professors, Performance)** Arthur P. Barnes, Marie Gibson

**Chair:** Stephen M. Sano

**Professors:** Jonathan Berger (on leave Winter & Spring), Karol Berger (on leave), Chris Chafe, Brian Ferneyhough, Thomas Grey (on leave Autumn), Stephen Hinton, Julius O. Smith

**Associate Professors:** Mark Applebaum, Heather Hadlock, Jaroslaw Kapuscinski, William P. Mahrt, Jesse Rodin

**Assistant Professors:** Takako Fujioka, Charles Kronengold, Anna Schultz, Ge Wang

**Professors (Teaching):** George Barth (Piano), Stephen M. Sano (Director of Choral Studies)

**Courtesy Professor:** Paul DeMarinis

**Senior Lecturers:** Giancarlo Aquilanti (Director of Theory; Wind Ensemble), Talya Berger (Theory; on leave Autumn), Stephen Harrison (Cello), Thomas Schultz (Piano), Gregory A. Wait (Voice; Director of Vocal Studies), Frederick R. Weldy (Piano)

**Lecturers:** Akwasi Papa Abrefah (Steelpan), Kumaran Arul (Piano), Erika Arulanantham (Theory), Fredrick Berry (Jazz Ensemble), Mark Brandenburg (Clarinet), Marie-Louise Catsalis (Voice), Marjorie Chauvel (Harp), Tony Clements (Tuba), Laura Dahl (Resident Collaborative Pianist), Anthony Doheny (Violin), John Dornenburg (Viola da Gamba), Greer Ellison (Flute, Baroque Flute), Charles A. Ferguson (Guitar), Debra Fong (Violin), Claire Giovannetti (Voice), Dawn Harms (Violin, Viola), Alexandra Hawley (Flute), David Henderson (Classical Saxophone), Wendy Hillhouse (Voice), Melody Holmes-Vedder (Flute), Nova Jiménez (Voice), McDowell Kenley (Trombone), Jay LeBeouf (CCRMA), Joo-Mee Lee (Violin), Mary Linduska (Voice, Summer), Murray Low (Jazz Piano), Adam Luftman (Trumpet), Anthony Martin (Baroque Violin), Robin May (Oboe), Seward McCain (Jazz Bass), Charles McCarthy (Jazz Saxophone), Robert Huw Morgan (University Organist, Organ), Bruce Moyer (Contrabass), Herbert Myers (Early Winds), James Nadel (Jazz), Rufus Olivier (Bassoon), Lawrence Ragent (French Horn), David Rokeach (Drum Set), Kelly Savage (Theory), Robin Sharp (Violin), Livia Sohn (Violin), Elaine Thornburgh (Harpichord), Erik Ulman (Composition, Theory), Linda Uyechi (Taiko), Rick Vandivier (Jazz Guitar), Mark Veregge (Percussion), John Worley (Jazz Trumpet), Hui (Daisy) You (Gu-Zheng), Timothy Zerlang (University Carillonneur, Piano)

**Consulting Professors:** Jonathan Abel (CCRMA), David Berners (CCRMA), Marina Bosi (CCRMA), Poppy Crum (CCRMA), Pierre Divenyi (CCRMA), Walter Hewlett (Computer-Assisted Research in the Humanities), Thomas Rossing (CCRMA), Eleanor Selfridge-Field (Computer-Assisted Research in the Humanities), Malcolm Slaney (CCRMA)

*Assistant Consulting Professors:* Gautham Mysore (CCRMA), Craig Sapp (Computer-Assisted Research in the Humanities), Jeffrey C. Smith (CCRMA)

*Artists-in-Residence (St. Lawrence String Quartet):* Geoff Nuttall (Violin), Owen Dalby (Violin), Lesley Robertson (Viola), Christopher Costanza (Cello)

## Philosophy

Courses offered by the Department of Philosophy are listed under the subject code PHIL on the Stanford Bulletin's ExploreCourses web site.

Philosophy concerns itself with fundamental problems. Some are abstract and deal with the nature of truth, justice, value, and knowledge; others are more concrete, and their study may help guide conduct or enhance understanding of other subjects. Philosophy also examines the efforts of past thinkers to understand the world and people's experience of it.

Although it may appear to be an assortment of different disciplines, there are features common to all philosophical inquiry. These include an emphasis on methods of reasoning and the way in which judgments are formed, on criticizing and organizing beliefs, and on the nature and role of fundamental concepts.

Students of almost any discipline can find something in philosophy which is relevant to their own specialties. In the sciences, it provides a framework within which the foundations and scope of a scientific theory can be studied, and it may even suggest directions for future development. Since philosophical ideas have had an important influence on human endeavors of all kinds, including artistic, political, and economic, students of the humanities and social sciences should find their understanding deepened by acquaintance with philosophy.

## Mission of the Undergraduate Program in Philosophy

The mission of the undergraduate program in Philosophy is to train students to think clearly and critically about the deepest and broadest questions concerning being, knowledge, and value, as well as their connections to the full range of human activities and interests. The Philosophy major presents students with paradigms and perspectives of past thinkers and introduces students to a variety of methods of reasoning and judgment formation. Courses in the major equip students with core skills involved in critical reading, analytical thinking, sound argumentation, and the clear, well-organized expression of ideas. Philosophy is an excellent major for those planning a career in law, medicine, business, or the non-profit sector. It provides analytical skills and a breadth of perspective helpful to those called upon to make decisions about their own conduct and the welfare of others. Philosophy majors who have carefully planned their undergraduate program have an excellent record of admission to professional and graduate schools.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. the ability to communicate philosophical ideas effectively orally and in writing.
2. close reading, argument evaluation, and analytical writing.
3. dialectical ability to identify strengths and weaknesses of an argument and devise appropriate and telling responses.
4. the ability to think critically and demonstrate clarity of conceptualization.

5. the ability to differentiate good from unpromising philosophical questions.
6. the ability to sustain an argument of substantial scope, showing control over logical, argumentative, and evidential relations among its parts.

## Special and Joint Majors

The Special Program in the History and Philosophy of Science enables students to combine interests in science, history, and philosophy. Students interested in this program should see the special adviser.

The Special Option in Philosophy and Literary Thought enables students to combine interests in philosophy and literary studies. Interested students should see the Director of Undergraduate Studies for Philosophy and Literature.

The combined major in Philosophy and Religious Studies joins courses from both departments into a coherent theoretical pattern.

The joint major in Philosophy and Computer Science provides opportunities for the systematic study of computation together with philosophy in the broadest sense.

## Graduate Program in Philosophy

The Department of Philosophy offers an M.A. and a Ph.D. degree. The University's basic requirements for the M.A. and Ph.D. degrees are discussed in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

## Learning Outcomes (Graduate)

The purpose of the master's program is to develop knowledge and skills in Philosophy and to prepare students for a professional career or doctoral studies. This is achieved through completion of core courses, with an option for further specialization. (See below for details.)

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Philosophy. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Philosophy and to interpret and present the results of such research.

## Library and Associations

The Tanner Memorial Library of Philosophy contains an excellent working library and ideal conditions for study. Graduate students and undergraduate majors in philosophy have formed associations for discussion of philosophical issues and the reading of papers by students, faculty, and visitors.

## Bachelor of Arts in Philosophy

There are three ways of majoring in Philosophy:

- The General Program
- The Special Program in the History and Philosophy of Science
- The Special Option in Philosophy and Literature.

A student completing any of these receives a B.A. degree in Philosophy. There is also a major program offered in Philosophy and Religious Studies. To declare a major, a student should consult with the Director of Undergraduate Study and see the undergraduate student services administrator to be assigned an adviser and work out a coherent plan. The department recommends proficiency in at least one foreign language.

## General Program

1. Course requirements, minimum 55 units:
  - a. preparation for the major: an introductory course (under 100) and PHIL 80 Mind, Matter, and Meaning. (PHIL 80 should normally be taken no later than the first quarter after declaring the major.) Students taking a Philosophy Thinking Matters course may count 4 units toward the introductory Philosophy requirement. Students who took the Winter/Spring Philosophy Introduction to the Humanities (IHUM) track may count 5 units toward the Introductory Philosophy requirement. (IHUM courses are no longer offered).
  - b. the core: 24 additional Philosophy units as follows:
    - i logic: Select one of the following. More advanced logic courses may also be counted for this requirement by petition.

Select one of the following:

PHIL 49	Survey of Formal Methods	4
PHIL 50	Introductory Logic	4
PHIL 150	Mathematical Logic	4
PHIL 151	Metalogic	4
PHIL 154	Modal Logic	4

- ii Philosophy of science: This requirement may be satisfied by PHIL 60, PHIL 61, or an intermediate philosophy of science course numbered between PHIL 160 - 169.
- iii Moral and political philosophy: This requirement may be satisfied by PHIL 2 or any intermediate course devoted to central topics in moral and political philosophy numbered between PHIL 170 - 172 or 174-176.
- iv Contemporary theoretical philosophy: This requirement may be satisfied by any intermediate course numbered between PHIL 180 - 189.
- v History of philosophy:

Select both of the following

PHIL 100	Greek Philosophy	4
PHIL 102	Modern Philosophy, Descartes to Kant	4

- c. one undergraduate philosophy seminar from the PHIL 194 series.
  - d. electives: courses numbered 10 or above, at least 9 units of which must be in courses numbered above 99.
2. Units for Tutorial, Directed Reading (PHIL 196 Tutorial, Senior Year, PHIL 197 Individual Work, Undergraduate, PHIL 198 The Dualist), The Dualist (PHIL 198 The Dualist), Honors Seminar (PHIL 199 Seminar for Prospective Honors Students), or affiliated courses may not be counted in the 55-unit requirement. No more than 10 units completed with grades of 'satisfactory' and/or 'credit' may be counted in the 55-unit requirement.
  3. A maximum of 10 transfer units or two courses can be used for the departmental major. In general, transfer courses cannot be used to satisfy the six area requirements or the undergraduate seminar requirement. Students may not substitute transfer units for the PHIL 80 requirement.

## Special Program in History and Philosophy of Science

Undergraduates may major in Philosophy with a field of study in History and Philosophy of Science. This field of study is declared on Axess. Each participating student is assigned an adviser who approves the course of study. A total of 61 units are required for the sub-major, to be taken according to requirements 1 through 5 below. Substitutions for the listed courses are allowed only by written consent of the undergraduate adviser for History and Philosophy of Science. Students are encouraged to consider doing honors work with an emphasis on the history and

philosophy of science. Interested students should see the description of the honors thesis in Philosophy and consult their advisers for further information.

1. Three science courses (for example, biology, chemistry, physics) for 12 units.
2. The following Philosophy (PHIL) core courses must be completed with a letter grade by the end of the junior year:
  - a.
 

Select one of the following:		3
PHIL 49	Survey of Formal Methods	4
PHIL 50	Introductory Logic	4
PHIL 150	Mathematical Logic	4
PHIL 151	Metalogic	4
PHIL 154	Modal Logic	4
  - b. either PHIL 60 Introduction to Philosophy of Science or PHIL 61 Philosophy and the Scientific Revolution.
  - c. PHIL 80 Mind, Matter, and Meaning.
3. Three history of science courses.
4. Three philosophy of science courses, of which one must be PHIL 164 Central Topics in the Philosophy of Science: Theory and Evidence.
5. Three additional courses related to the major, in philosophy or history, to be agreed on by the adviser.
6. At least six courses in the major must be completed at Stanford with a letter grade. Units for Tutorial, Directed Reading, or The Dualist (PHIL 196 Tutorial, Senior Year, PHIL 197 Individual Work, Undergraduate, PHIL 198 The Dualist) may not be counted in the 61-unit requirement. No more than 10 units completed with grades of 'satisfactory' and/or 'credit' may be counted in the 61-unit requirement.
7. Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring a major. Transfer courses are strictly limited when used to satisfy major requirements.

## Special Option in Philosophy and Literature

1. Core requirements for the major in Philosophy, including:
  - a. an introductory course
  - b. PHIL 80 Mind, Matter, and Meaning
  - c. the core distribution requirements listed in section 1b of the general program above.
2. Gateway course in philosophy and literature (PHIL 81 Philosophy and Literature). This course should be taken as early as possible in the student's career, normally in the sophomore year.
3. Three courses in a single national literature, chosen by the student in consultation with the adviser and the program director of undergraduate studies. This normally involves meeting the language proficiency requirements of the relevant literature department.
4. Electives within Philosophy beyond the core requirements totaling at least 5 units, and drawn from courses numbered 100 or higher.
5. Two upper division courses of special relevance to the study of philosophy and literature, as identified by the committee in charge of the program. A list of approved courses is available from the program director of undergraduate studies, and is published on the web at <http://philit/programs/relevance.html>
6. Capstone seminar in the PHIL 194 series.
7. Capstone seminar of relevance to the study of philosophy and literature, as approved by the program committee. In some cases, with approval of the Philosophy Director of Undergraduate Study and the program director of undergraduate studies, the same course may be used to meet requirements 6 and 7 simultaneously. In any case, the student's choice of a capstone seminar must be approved in writing by the Philosophy Director of Undergraduate Study and

the program director of undergraduate studies. This year's capstone seminars include:

Select one of the following:

		Units
PHIL 193D	Dante and Aristotle	5
PHIL 194L	Montaigne	4
FRENCH 228E	Getting Through Proust	3-5
COMPLIT 217	The Poetry of Friedrich Holderlin	3-5

Students are encouraged to consider doing honors work in a topic related to philosophy and literature through the Philosophy honors program.

The following rules also apply to the special option:

1. Units for Honors Tutorial, Directed Reading (PHIL 196 Tutorial, Senior Year, PHIL 197 Individual Work, Undergraduate, PHIL 198 The Dualist), The Dualist (PHIL 198 The Dualist), Honors Seminar (PHIL 199 Seminar for Prospective Honors Students) may not be counted toward the 65-unit requirement. No more than 10 units with a grade of 'satisfactory' or 'credit' may be counted toward the unit requirement.
2. A maximum of 15 transfer units may be counted toward the major, at most 10 of which may substitute for courses within Philosophy. Transfer credits may not substitute for PHIL 80 or PHIL 81, and are approved as substitutes for the five area requirements or PHIL 194 only in exceptional cases.
3. Courses offered in other departments may be counted toward requirements 3, 5 and 7, but such courses, including affiliated courses, do not generally count toward the other requirements. In particular, such courses may not satisfy requirement 4.
4. Units devoted to meeting the language requirement are not counted toward the 65-unit requirement.

## Honors Program

Students who wish to undertake a more intensive and extensive program of study, including seminars and independent work, are invited to apply for the honors program during Winter Quarter of the junior year. Admission is selective on the basis of demonstrated ability in Philosophy, including an average grade of at least 'A-' in a substantial number of Philosophy courses and progress towards satisfying the requirements of the major.

With their application, candidates should submit an intended plan of study for the remainder of the junior and the senior years. It should include at least 5 units of Senior Tutorial (PHIL 196 Tutorial, Senior Year) during Autumn and/or Winter quarter(s) of the senior year. Students who are applying to Honors College may use the same application for philosophy honors. In the quarter preceding the tutorial, students should submit an essay proposal to the Philosophy undergraduate director and determine an adviser.

Students applying for honors should enroll in Junior Honors Seminar (PHIL 199 Seminar for Prospective Honors Students) during the Spring Quarter of the junior year.

The length of the honors essay may vary considerably depending on the problem and the approach; usually it falls somewhere between 7,500 and 12,500 words. This essay may use work in previous seminars and courses as a starting point, but it cannot be the same essay that has been used, or is being used, in some other class or seminar. It must be a substantially new and different piece of work reflecting work in the tutorials.

A completed draft of the essay is submitted to the adviser at the end of the Winter Quarter of the senior year. Any further revisions must be finished by the fifth full week of the Spring Quarter, when three copies

of the essay are to be given to the undergraduate secretary. The honors essay is graded by the adviser together with a second reader, chosen by the adviser in consultation with the student. The student also provides an oral defense of the thesis at a meeting with the adviser and second reader. The essay must receive a grade of 'A-' or better for the student to receive honors.

Honors tutorials represent units in addition to the 55-unit requirement.

For further information, contact the Honors' Director.

## Philosophy and Religious Studies Combined Major

The undergraduate major in Philosophy and Religious Studies consists of 60 units of course work with approximately one third each in the philosophy core, the religious studies core, and either the general major or the special concentration. Affiliated courses cannot be used to satisfy this requirement.

No courses in either the philosophy or religious studies core may be taken satisfactory/no credit or credit/no credit.

In general, transfer units cannot be used to satisfy the core requirements. Transfer units and substitutions must be approved by the director of undergraduate studies in the appropriate department.

### Core Requirements

1. Philosophy (PHIL) courses:
  - a. Required course: PHIL 80 Mind, Matter, and Meaning
  - b. 16 units, including at least one Philosophy course from each of the following areas:
    - i. Logic and philosophy of science: Students take either one from this list or an intermediate philosophy of science course numbered PHIL 160-169.
 

PHIL 49	Survey of Formal Methods	4
PHIL 50	Introductory Logic	4
PHIL 60	Introduction to Philosophy of Science	5
PHIL 61	Philosophy and the Scientific Revolution	5
PHIL 150	Mathematical Logic	4
PHIL 151	Metalogic	4
PHIL 154	Modal Logic	4
    - ii. Ethics and value theory: This requirement may be satisfied by PHIL 2 or any intermediate course devoted to central topics in moral and political philosophy numbered between PHIL 170 – 172 or 174-176.
    - iii. Contemporary theoretical philosophy: Take either PHIL 1 Introduction to Philosophy or an intermediate course numbered PHIL 180-189.
    - iv. History of philosophy: Select one of
 

PHIL 100	Greek Philosophy	4
PHIL 101	Introduction to Medieval Philosophy	4
PHIL 102	Modern Philosophy, Descartes to Kant	4
PHIL 103	19th-Century Philosophy	4

2. Religious Studies (RELIGST) courses: 20 units, chosen in consultation with the student's adviser, including:
  - a. RELIGST 290 Majors Seminar (5 units; Winter Quarter; recommended junior year; fulfills WIM requirement)

- b. at least one course in philosophy of religion, broadly construed, chosen in consultation with, and approved by, the Religious Studies Director of Undergraduate Studies.
- c. diversity requirement: Students may not take all their religion courses in one religious tradition.

## General Major Requirements

Five additional courses (approximately 20 units) divided between the two departments. No more than 5 of these units may come from courses numbered under 99 in either department. Each student must also take at least one undergraduate seminar in religious studies and one undergraduate seminar in philosophy.

## Special Concentration

With the aid of an adviser, students pursue a specialized form of inquiry in which the combined departments have strength; for example, American philosophy and religious thought, philosophical and religious theories of human nature and action, philosophy of religion. Courses for this concentration must be approved in writing by the adviser.

## Directed Reading and Satisfactory/No Credit Units

Units of directed reading for fulfilling requirements of the combined major are allowed only with special permission. No more than 10 units of work with a grade of 'satisfactory' count toward the combined major.

## Honors Program

Students pursuing a major in Philosophy and Religious Studies may also apply for honors by following the procedure for honors in either of the departments.

## Joint Major Program in Philosophy and Computer Science

The joint major program (JMP), authorized by the Academic Senate for a pilot period of six years beginning in 2014-15, permits students to major in both Computer Science and one of ten Humanities majors. See the "Joint Major Program (p. 26)" section of this bulletin for a description of University requirements for the JMP. See also the Undergraduate Advising and Research JMP web site and its associated FAQs.

Students completing the JMP receive a B.A.S. (Bachelor of Arts and Science).

Because the JMP is new and experimental, changes to procedures may occur; students are advised to check the relevant section of the bulletin periodically.

The joint major in Philosophy and Computer Science provides opportunities for the systematic study of computation together with philosophy in the broadest sense.

The joint major is appropriate for three distinct groups of students:

1. students with separate interests in the two fields who wish to begin thinking about their interaction (or else applications of one set to the other);
2. students interested in exploring philosophical issues in, and foundations of, computing;
3. students who would like to pursue philosophical investigations using computational methods.

## Philosophy Major Requirements in the Joint Major Program

See the "Computer Science Joint Major Program (p. 231)m" section of this bulletin for details on Computer Science requirements.

Students in the joint major are required to complete the same introductory and core requirements as other Philosophy majors, with the exception of a more demanding logic requirement. In addition, joint majors must complete a senior capstone seminar in Philosophy (PHIL 194), and are normally expected to complete (separately from PHIL 194) an integrative senior capstone project, developed with faculty adviser(s) in CS and/or Philosophy, and approved in writing by the joint major's faculty adviser in Philosophy. Students may register for 5-10 units Individual Work, Undergraduate (PHIL 197) in association with the integrative capstone. These units may be taken across one or two quarters, and must be taken for a letter grade. Such projects must integrate the student's CS and philosophical learning.

In recognition of the student's work in the CS side of the joint major, the normal elective units required for Philosophy majors are reduced by 5 units for joint majors. Thus, the joint major requires 50 units within Philosophy.

Because logic is a core area of intersection between Philosophy and CS, students are in the best position to leverage the intersection of their work in the two fields if they develop a strong background in logical methods, and have a clear understanding of the way those formal methods are or can be used within Philosophy. Joint majors are therefore required to complete training in logic at least through successful completion of PHIL 150.

Thus, the Philosophy requirements of the joint major are:

1. An Introductory course (numbered under 100)
2. PHIL 80 (writing in the major)
3. Core requirements in philosophy
  - a. One course in logic (PHIL 150 or higher);
  - b. One course in philosophy of science;
  - c. One course in moral or political philosophy (normally PHIL 2 or PHIL 170s)
  - d. One course in contemporary theoretical philosophy (PHIL 180s)
  - e. Two courses in the history of philosophy, namely
    - i PHIL 100 (ancient philosophy)
    - ii PHIL 102 (modern philosophy)
4. Capstone seminar within philosophy (PHIL 194s)
5. Expected integrative independent capstone project
6. Electives sufficient to bring the student's overall program up to a minimum total of 50 units in Philosophy.

Units for Independent Work, Directed Reading, the Dualist, and Honors Seminar (PHIL 196, 197, 198, 199) do not count toward the overall requirement of 50 units within Philosophy. No more than 10 units of courses completed with grades of 'Satisfactory' or 'Credit' may be counted toward the 50-unit requirement.

Students in the joint major should register their major declaration not only with the Director of Undergraduate Study (DUS) of Philosophy but also with the joint major's faculty adviser in Philosophy. In consultation with the faculty adviser (ideally beginning in the sophomore year), each joint major should work out an individualized program of courses to develop her/his philosophical interests and to explore the connections between them and her/his interests in computation. Each student should meet with the faculty adviser quarterly for a program update, during which there is discussion of opportunities for integrating the ongoing

work in Philosophy and CS through course work, employment, projects, or other extracurricular activities. The faculty adviser assists students to develop coherent programs of study leading toward integrative senior experiences. If the normal expectation of a senior project turns out not to be suitable in individual cases, the student must obtain approval in writing from the faculty adviser of the substitute integrative activities and the faculty advisor of the joint major.

## Learning Objectives

Because the joint major seeks to develop deep disciplinary knowledge within Philosophy, the learning objectives of the general philosophy major also apply in the case of the joint major. In this aspect, students are expected to demonstrate:

1. the ability to communicate philosophical ideas effectively orally and in writing.
2. close reading, argument evaluation, and analytical writing.
3. dialectical ability to identify strengths and weaknesses of an argument and devise appropriate and telling responses.
4. the ability to think critically and demonstrate clarity of conceptualization.
5. the ability to differentiate good from unpromising philosophical questions.
6. the ability to sustain an argument of substantial scope, showing control over logical, argumentative, and evidential relations among its parts.

In addition, the joint major has the ambition to develop key knowledge and capacities that are relevant to the intersection of Philosophy and CS. In this domain, students in the joint major are expected to:

1. develop problem solving skills suitable to their work in the Computer Science side of the major, in accordance with learning goals specified for the joint major by Computer Science.
2. develop mastery of logical and formal methods adequate to support their work at the intersection of computing and philosophy.
3. demonstrate a deep understanding of at least one particular area of intersection between the two fields, or of how methods and ideas from one of the disciplines can inform or be applied to the other.

## Declaring a Joint Major Program

To declare the joint major, students must first declare each major through Axess, and then submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>) The Major-Minor and Multiple Major Course Approval Form ([http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin\\_MultMaj.pdf](http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin_MultMaj.pdf)) is required for graduation for students with a joint major.

## Dropping a Joint Major Program

To drop the joint major, students must submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>) . Students may also consult the Student Services Center (<http://studentservicescenter.stanford.edu>) with questions concerning dropping the joint major.

## Transcript and Diploma

Students completing a joint major graduate with a B.A.S. degree. The two majors are identified on one diploma separated by a hyphen. There will be a notation indicating that the student has completed a "Joint Major". The two majors are identified on the transcript with a notation indicating that the student has completed a "Joint Major".

## Minor in Philosophy

A minor in Philosophy consists of at least 30 units of Philosophy courses satisfying the following conditions:

1. Students taking a Philosophy Thinking Matters course may count it as equivalent to a maximum of 4 units of Philosophy courses under 100. Students who took the Winter/Spring Philosophy Introduction to the Humanities (IHUM) track may count these courses as equivalent to a maximum of 5 units of Philosophy courses under 100. (IHUM courses are no longer offered).
2. The 30 units must include one of:
  - a. a history of philosophy course numbered 100 or above
  - b. one quarter of Philosophy Thinking Matters (THINK)
  - c. two quarters of IHUM (only 5 of the 10 units can count towards 30-unit requirement). IHUM courses are no longer offered.
3. Minors must take one course from any two of the following three areas (PHIL):

a. Philosophy of Science and Logic: For philosophy of science, either PHIL 60, PHIL 61, or an intermediate philosophy of science courses numbered between PHIL 160 - 169; or else, for logic, one of:		
b.	Logic	
	PHIL 49	Survey of Formal Methods 4
	PHIL 50	Introductory Logic 4
	PHIL 150	Mathematical Logic 4
	PHIL 151	Metalogic 4
	PHIL 154	Modal Logic 4

- c. Moral and political philosophy: This requirement may be satisfied by PHIL 2 or any intermediate course devoted to central topics in moral and political philosophy numbered between PHIL 170 - 172, or 174-176.
  - d. Contemporary theoretical philosophy: This requirement may be satisfied by most intermediate courses numbered between PHIL 180 - 189.
4. At least 10 units must be from courses numbered 100 or above.
  5. Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring. The number of transfer units is generally limited to a maximum of 10.
  6. No more than 6 units completed with grades of 'satisfactory' or 'credit' count towards the 30-unit requirement.
  7. Units for tutorials, directed reading, and affiliated courses may not be counted.

Students must declare their intention to minor in Philosophy in a meeting with the Director of Undergraduate Study. This formal declaration must be made no later than the last day of the quarter two quarters before degree conferral. The Permission to Declare a Philosophy Minor (signed by the Director of Undergraduate Study) lists courses taken and to be taken to fulfill minor requirements. This permission is on file in the department office. Before graduation, a student's record is checked to see that requirements have been fulfilled, and the results are reported to the University Registrar.

## Master of Arts in Philosophy

University requirements for the M.A. are discussed in the "Graduate Degrees (p. 45)" section of this bulletin.

Three programs lead to the M.A. in Philosophy. One is a general program providing a grounding in all branches of the subject. The others provide special training in one branch.

## Coterminal Bachelor's and Master's Degrees in Philosophy

It is possible to earn an M.A. in Philosophy while earning a B.A. or B.S. This can usually be done by the end of the fifth undergraduate year, although a student whose degree is not in Philosophy may require an additional year. Standards for admission to, and completion of, this program are the same as for M.A. applicants who already have the bachelor's degree when matriculating. Applicants for the coterminal program are not, however, required to take the Graduate Record Exam.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (p. 42)" section of this bulletin. For University coterminal degree program rules and University application forms, see the Registrar's coterminal forms (<https://registrar.stanford.edu/resources-and-help/forms/coterminal-forms>) web site.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken during or after the first quarter of the sophomore year are eligible for consideration for transfer to the graduate career; the timing of the first graduate quarter is not a factor. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

### Admissions

All prospective master's students, including those currently enrolled in other Stanford programs, must apply for admission to the program. No fellowships are available. Entering students must meet with the director of the master's program and have their advisor's approval, in writing, of program proposals. The master's program should not be considered a stepping stone to the doctoral program; these two programs are separate and distinct.

### Unit Requirements

Each program requires a minimum of 45 units in philosophy. Students in a special program may be allowed or required to replace up to 9 units of philosophy by 9 units in the field of specialization. Although the requirements for the M.A. are designed so that a student with the equivalent of a strong undergraduate philosophy major at Stanford might complete them in one year, most students need longer. Students should also keep in mind that although 45 units is the minimum required by the University, quite often more units are necessary to complete department requirements. Up to 6 units of directed reading in philosophy may be allowed. There is no thesis requirement, but an optional master's thesis or project, upon faculty approval, may count as the equivalent of up to 8 units. A special program may require knowledge of a foreign language.

At least 45 units in courses numbered 100 or above must be completed with a grade of 'B-' or better at Stanford. Students are reminded of the University requirements for advanced degrees, and particularly of the fact that for the M.A., students must complete three full quarters as measured by tuition payment.

### General Program

The General Program requires a minimum of 45 units in Philosophy courses numbered above 99. These courses must be taken for a letter grade, and the student must receive at least a 'B-' in the course. Courses taken to satisfy the undergraduate core or affiliated courses may not be counted in the 45 units. The requirement has three parts:

#### 1. Undergraduate Core

Students must have when they enter, or complete early in their program, the following undergraduate courses (students entering from other institutions should establish equivalent requirements with a master's adviser upon arrival or earlier):

##### a. Logic:

Select one of the following:

PHIL 49	Survey of Formal Methods	4
PHIL 50	Introductory Logic	4
PHIL 150	Mathematical Logic	4
PHIL 151	Metalogic	4
PHIL 154	Modal Logic	4

- ##### b. Philosophy of science:
- This requirement may be satisfied by PHIL 60, PHIL 61, or any intermediate philosophy of science course numbered between PHIL 160 - 169.
- ##### c. Moral and political philosophy:
- This requirement may be satisfied by any intermediate course devoted to central topics in moral and political philosophy numbered between PHIL 170 - 172, or PHIL 174-176.
- ##### d. Contemporary theoretical philosophy:
- This requirement may be satisfied by any intermediate course numbered between PHIL 180 - 189.
- ##### e. History of philosophy:
- two history of philosophy courses numbered 100 or above

#### 2. Graduate Core

Students must take at least one course numbered over 105 from three of the following five areas (courses used to satisfy the undergraduate core cannot also be counted toward satisfaction of the graduate core). Crosslisted and other courses taught outside the Department of Philosophy do not count towards satisfaction of the core.

- Logic and semantics
- Philosophy of science and history of science
- Ethics, value theory, and moral and political philosophy
- Metaphysics, epistemology, philosophy of mind, and philosophy of language
- History of philosophy

#### 3. 200-Level Course Requirement

Each master's candidate must take at least two courses numbered above 200; these cannot be graduate sections of undergraduate courses.

#### 4. Specialization

Students must take at least three courses numbered over 105 in one of the five areas.

## Special Program in Symbolic Systems

Students should have the equivalent of the Stanford undergraduate major in Symbolic Systems. Students who have a strong major in one of the basic SSP disciplines (philosophy, psychology, linguistics, computer science) may be admitted, but are required to do a substantial part of the undergraduate SSP core in each of the other basic SSP fields. This must include the following philosophy courses:

		Units
PHIL 80	Mind, Matter, and Meaning	5
PHIL 151	Metalogic	4
And one of the following:		
PHIL 181	Philosophy of Language	4
PHIL 184	Epistemology	4
PHIL 186	Philosophy of Mind	4
PHIL 187	Philosophy of Action	4

This work does not count towards the 45-unit requirement.

### Course Requirements

- Four courses in philosophy at the graduate level (numbered 200 or above), including courses from three of the following five areas:
  - Philosophy of language
  - Logic
  - Philosophy of mind
  - Metaphysics and epistemology
  - Philosophy of science

At most two of the four courses may be graduate sections of undergraduate courses numbered 100 or higher.

- Three courses numbered 100 or higher from outside Philosophy, chosen in consultation with an advisor. These courses should be from two of the following four areas:
  - Psychology
  - Linguistics
  - Computer Science
  - Education

Remaining courses are chosen in consultation with and approved by an advisor.

## Special Program in the Philosophy of Language

Admission is limited to students with substantial preparation in philosophy or linguistics. Those whose primary preparation has been in linguistics may be required to satisfy all or part of the undergraduate core requirements as described in the "General Program" subsection above. Those whose preparation is primarily in philosophy may be required to take additional courses in linguistics.

### Course Requirements

- Philosophy of language: two approved courses in the philosophy of language numbered 180 or higher.
- Syntactic theory and generative grammar:

		Units
PHIL 384	Seminar in Metaphysics and Epistemology	4
LINGUIST 230A	Introduction to Semantics and Pragmatics	4

- Logic: at least two approved courses numbered PHIL 151 Metalogic or higher.
- An approved graduate-level course in mathematical linguistics or automata theory.

## Doctor of Philosophy in Philosophy

Prospective graduate students should see the Office of Graduate Admissions (<http://gradadmissions.stanford.edu>) web site for information and application materials. Applicants should take the Graduate Record Examination by October of the year the application is submitted.

The University's basic requirements for the Ph.D. degree including residence, dissertation, and examination are discussed in the "Graduate Degrees (p. 45)" section of this bulletin. The requirements detailed here are department requirements. These requirements are meant to balance structure and flexibility in allowing students, in consultation with their advisers, to take a path through the program that gives them a rigorous and broad philosophical education, with room to focus on areas of particular interest, and with an eye to completing the degree with an excellent dissertation and a solid preparation for a career in academic philosophy.

Normally, all courses used to satisfy the distribution requirements for the Philosophy Ph.D. are Stanford courses taken as part of a student's graduate program. In special circumstances, a student may petition to use a very small number of graduate-level courses taken at other institutions to satisfy a distribution requirement. To be approved for this purpose, the student's work in such a graduate-level course would need to involve an appropriate subject matter and would need to be judged by the department to be at the level of an 'A' in a corresponding graduate-level course at Stanford.

Courses used to satisfy any course requirement in Philosophy must be passed with a letter grade of 'B-' or better (no satisfactory/no credit), except in the case of a course/seminar used to satisfy the third-year course/seminar requirement and taken for only 2 units. Such a reduced-unit third-year course/seminar must be taken credit/no credit.

At the end of each year, the department reviews the progress of each student to determine whether the student is making satisfactory progress, and on that basis to make decisions about probationary status and termination from the program where appropriate.

Any student in one of the Ph.D. programs may apply for the M.A. when all University and department requirements have been met.

### Proficiency Requirements

- First-year Ph.D. Proseminar*: a one quarter, topically focused seminar offered in Autumn Quarter, and required of all first-year students.
- Distribution requirements during the first six quarters*. Intended to ensure a broad and substantial exposure to major areas of philosophy while allowing for considerable freedom to explore.
  - six courses distributed across three areas as follows:
    - two courses in value theory including ethics, aesthetics, political philosophy, social philosophy, philosophy of law. At least one of the courses satisfying this distribution requirement must be in ethics or political philosophy.
    - Two courses in language, mind, and action. One course satisfying this requirement must be drawn from the language related courses, and one from mind and action related courses.
    - two courses in metaphysics and epistemology (including metaphysics, epistemology, philosophy of science). At least one of the courses satisfying this requirement must be drawn from either metaphysics or epistemology.
    - Instructors indicate which courses may satisfy particular requirements. If a course potentially satisfies more than one requirement the student may use it for only one of those area requirements; no units may be double-counted. Students

must develop broad competencies in all these areas. Those without strong backgrounds in these areas would normally satisfy these distribution requirements by taking more basic courses rather than highly specialized and focused courses. Students should consult with their adviser in making these course decisions, and be prepared to explain these decisions when reviewed for candidacy; see requirement 6 below.

- b. Logic requirement: PHIL 150 Mathematical Logic or equivalent.
- c. History/logic requirement. One approved course each in ancient and modern philosophy, plus either another approved history of philosophy course or PHIL 151 Metalogic.
- d. Students should normally take at least 64 graduate level units at Stanford during their first six quarters (in many cases students would take more units than that) and of those total units, at least 49 units of course work are to be in the Philosophy department. These courses must be numbered above 110, but not including Teaching Methods (PHIL 239 Teaching Methods in Philosophy) or affiliated courses. Units of Individual Directed Reading are normally not to be counted toward this 49-unit requirement unless there is special permission from the student's adviser and the Director of Graduate Studies.

### 3. *Writing Requirement*

A qualifying paper of professional quality and approximately 8000 words. Students must complete a version of the paper, which is itself likely to be a revision of a paper written during the first year of course work, by the beginning of their fourth quarter. The paper is read by a committee of two faculty who make suggestions for additional revision. The final version must be submitted by the first day of the sixth quarter, normally Spring Quarter of the second year.

### 4. *Teaching Assistancy*

A minimum of five quarters of teaching assistancy are required for the Ph.D. Normally one of these quarters is as a teaching assistant for the Philosophy Department's Writing in the Major course, PHIL 80 Mind, Matter, and Meaning. It is expected that students not teach in their first year and that they teach no more than two quarters in their second year. Students are required to take PHIL 239 Teaching Methods in Philosophy during Spring Quarter of their first year and during Autumn Quarter of their second year. Teaching is an important part of students' preparation to be professional philosophers.

### 5. *Review at the End of the Second Year for Advancement to Candidacy*

By the fourth week of the sixth quarter students must submit a one-page explanation of their first- and second-year course plan and their writing requirement paper. The faculty's review of each student includes a review of the student's record, an assessment of the qualifying paper, and an assessment of the student's preparation for work in her/his intended area of specialization, as well as recommendations of additional preparation, if necessary.

### 6. *Candidacy*

To continue in the Ph.D. program, each student must apply for candidacy during the sixth academic quarter, normally the Spring Quarter of the student's second year. Students may be approved for or denied candidacy by the end of that quarter by the department.

In some cases, where there are only one or two outstanding deficiencies, the department may defer the candidacy decision and require the student to re-apply for candidacy in a subsequent quarter.

In such cases, definite conditions for the candidacy re-application will be specified, and the student must work with his/her adviser and the DGS to meet those conditions in a timely fashion. A failure to maintain timely progress in satisfying the specified conditions will constitute grounds for a denial of advancement to candidacy.

### 7. *Dissertation Development Seminar in the summer after the second year. This is the point at which students are expected to transition*

from spending much of their time on coursework to focusing on their thesis project. By the end of the summer, students are expected to have a plan for moving forward with the project in the third year; they should have formed advising relationships with faculty and should have made headway towards identifying a specific topic.

8. Upon completion of the summer dissertation development seminar, students will sign up for independent study credit, PHIL 240 Individual Work for Graduate Students, with their respective advisers each quarter. A plan at the beginning, and a report at the end of each quarter will be signed by both student and adviser and submitted to the Graduate Administrator for inclusion in the student's file. This will be the process every quarter up until the completion of the departmental oral.
9. In autumn and winter quarters of the third year, students will register in and satisfactorily complete PHIL 301 Dissertation Development Proseminar. Students meet to present their work in progress and discuss their thesis project. Participation in these seminars is required.
10. During the third and fourth years in the program, a student should complete at least three graduate-level courses/seminars, at least two of them in philosophy (a course outside philosophy can be approved by the adviser), and at least two of them in the third year. At most one can be taken credit/no-credit, and at most one can be taken for reduced (2) units (in which case it must be taken credit/no-credit); others must be passed with a B- or better. Courses required for candidacy are not counted toward satisfaction of this requirement. This light load of courses allows students to deepen their philosophical training while keeping time free for thesis research.
11. *Dissertation Work and Defense*

The third and following years are devoted to dissertation work. The few requirements in this segment of the program are milestones to encourage students and advisers to ensure that the project is on track.

- a. *Dissertation Proposal*—By Spring Quarter of the third year, students should have selected a dissertation topic and committee. A proposal sketching the topic, status, and plan for the thesis project, as well as an annotated bibliography or literature review indicating familiarity with the relevant literature, must be received by the committee one week before the meeting on graduate student progress late in Spring Quarter. The dissertation proposal and the reading committee's report on it will constitute a substantial portion of the third year review.
- b. *Departmental Oral*—During Autumn Quarter of the fourth year, students take an oral examination based on at least 30 pages of written work, in addition to the proposal. The aim of the exam is to help the student arrive at an acceptable plan for the dissertation and to make sure that student, thesis topic, and advisors make a reasonable fit. It is an important chance for the student to clarify their goals and intentions with the entire committee present.
- c. *Fourth-Year Colloquium*—No later than Spring Quarter of the fourth year, students present a research paper in a 60-minute seminar open to the entire department. This paper should be on an aspect of the student's dissertation research. This is an opportunity for the student to make their work known to the wider department, and to explain their ideas to a general philosophical audience.
- d. *University Oral Exam*—Ph.D. students must submit a completed draft of the dissertation to the reading committee at least one month before the student expects to defend the thesis in the University oral exam. If the student is given consent to go forward, the University oral can take place approximately two weeks later. A portion of the exam consists of a student presentation based on the dissertation and is open to the public. A closed question period follows. If the draft is ready by Autumn

Quarter of the fourth year, the student may request that the University oral count as the department oral.

b. one graduate course in computational linguistics, typically LINGUIST 288 Natural Language Understanding

4. At least two additional graduate seminars at a more advanced level, in the general area of the program, independent of department. These would typically be in the area of the student’s proposed dissertation project.

The requirements for the third year and subsequent years are the same as for other third-year graduate students in philosophy: The dissertation committee must include at least one member of the Department of Philosophy and one member of the Program in Symbolic Systems outside the Department of Philosophy.

**Interdisciplinary Study**

The department supports interdisciplinary study. Courses in Stanford’s other departments and programs may be counted towards the degree, and course requirements in Philosophy are designed to allow students considerable freedom in taking such courses. Dissertation committees may include members from other departments. Where special needs arise, the department is committed to making it possible for students to obtain a philosophical education and to meet their interdisciplinary goals. Students are advised to consult their advisers and the department’s student services office for assistance.

**Interdepartmental Programs**

**Graduate Program in Cognitive Science**

Philosophy participates with the departments of Computer Science, Linguistics, and Psychology in an interdisciplinary program in Cognitive Science. It is intended to provide an interdisciplinary education, as well as a deeper concentration in philosophy, and is open to doctoral students. Students who complete the requirements within Philosophy and the Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Philosophy. To receive this field designation, students must complete 30 units of approved courses, 18 of which must be taken in two disciplines outside of philosophy. The list of approved courses can be obtained from the Cognitive Science program located in the Department of Psychology.

**Special Track in Philosophy and Symbolic Systems**

Students interested in interdisciplinary work relating philosophy to artificial intelligence, cognitive science, computer science, linguistics, or logic may pursue a degree in this program.

*Prerequisites*—Admitted students should have covered the equivalent of the core of the undergraduate Symbolic Systems Program requirements as described in the "Symbolic Systems (p. 651)" section of this bulletin, including courses in artificial intelligence (AI), cognitive science, linguistics, logic, and philosophy. The graduate program is designed with this background in mind. Students missing part of this background may need additional course work. In addition to the required course work below, the Ph.D. requirements are the same as for the regular program, with the exception that one course in value theory and one course in history may be omitted.

*Courses of Study*—The program consists of three years of courses and two years of dissertation work. Students are required to take the following courses in the first two years:

1. Philosophy courses:
  - a. at least three graduate seminars in the general area of symbolic systems other than logic, such as philosophy of mind and philosophy of language.
  - b. two quarters of graduate logic courses from among:

PHIL 350A	Model Theory	3
PHIL 351A	Recursion Theory	3
PHIL 353A		

2. Five cognitive science and computer science courses:
  - a. at least two courses in cognitive psychology
  - b. two or three graduate courses in computer science, at least one in AI and one in theory
3. Three linguistics and computational linguistics courses:
  - a. graduate courses on natural language that focus on two of the following areas: phonetics and phonology, syntax, semantics, or pragmatics

**Joint Program in Ancient Philosophy**

This program is jointly administered by the Departments of Classics and Philosophy and is overseen by a joint committee composed of members of both departments. It provides students with the training, specialist skills, and knowledge needed for research and teaching in ancient philosophy while producing scholars who are fully trained as either philosophers with a strong specialization in ancient languages and philology, or classicists with a concentration in philosophy.

Students are admitted to the program by either department. Graduate students admitted by the Philosophy department receive their Ph.D. from the Philosophy department; those admitted by the Classics department receive their Ph.D. from the Classics department. For Philosophy graduate students, this program provides training in classical languages, literature, culture, and history. For Classics graduate students, this program provides training in the history of philosophy and in contemporary philosophy.

Each student in the program is advised by a committee consisting of one professor in each department.

*Requirements for Philosophy Graduate Students:* These are the same as the proficiency requirements for the Ph.D. in Philosophy.

One year of Greek is a requirement for admission to the program. If students have had a year of Latin, they are required to take 3 courses in second- or third-year Greek or Latin, at least one of which must be in Latin. If they have not had a year of Latin, they are then required to complete a year of Latin, and take two courses in second- or third-year Greek or Latin.

Students are also required to take at least three courses in ancient philosophy at the 200 level or above, one of which must be in the Classics department and two of which must be in the Philosophy department.

**Ph.D. Subplan in History and Philosophy of Science**

Graduate students in the Philosophy Ph.D. program may pursue a Ph.D. subplan in History and Philosophy of Science. The subplan is declared in Axxess and subplan designations appear on the official transcript, but are not printed on the diploma.

Students must fulfill Departmental degree requirements and the following requirements:

1. Attendance at the HPS colloquium series.
2. Philosophy of Science courses:

Select one of the following:

PHIL 263	Significant Figures in Philosophy of Science	4
PHIL 264	Central Topics in the Philosophy of Science: Theory and Evidence	4
PHIL 264A	Central Topics in Philosophy of Science: Causation	4
PHIL 265	Philosophy of Physics	4
PHIL 265C	Philosophy of Physics: Probability and Relativity	4
PHIL 266	Probability: Ten Great Ideas About Chance	4

**Units**

PHIL 267A	Philosophy of Biology	2-4
PHIL 267B	Philosophy, Biology, and Behavior	4

3. One elective seminar in the history of science.
4. One elective seminar (in addition to the course satisfying requirement 2) in philosophy of science.

## Ph.D. Minor in Philosophy

To obtain a Ph.D. minor in Philosophy, students must follow these procedures:

1. Consult with the Director of Graduate Study to establish eligibility, and select a suitable adviser.
2. Give to the graduate administrator a signed copy of the program of study (designed with the adviser) which offers:
  - a. 30 units of courses in the Department of Philosophy with a letter grade of 'B-' or better in each course. No more than 3 units of directed reading may be counted in the 30-unit requirement.
  - b. At least one course or seminar numbered over 99 to be taken in each of these six areas:
    - i Logic
    - ii Philosophy of science
    - iii Ethics, value theory, and moral and political philosophy
    - iv Metaphysics and epistemology
    - v Language, mind and action
    - vi History of philosophy
  - c. Two additional courses numbered over 199 to be taken in one of those (b) six areas.
3. A faculty member from the Department of Philosophy (usually the student's adviser) serves on the student's doctoral oral examination committee and may request that up to one third of this examination be devoted to the minor subject.
4. Paperwork for the minor must be submitted to the department office before beginning the program.

*Emeriti (Professors):* Solomon Feferman, Dagfinn Føllesdal, John Perry, Thomas Wasow, Allen Wood, Rega Wood, Denis Phillips (Courtesy Professor)

*Chair:* Krista Lawlor

*Director of Graduate Study:* Michael Bratman

*Director of Undergraduate Study:* Nadeem Hussain

*Honors Director and Undergraduate Outreach Coordinator:* Nadeem Hussain

*Faculty Advisor for Joint Major with Computer Science:* Thomas Icard

*Professors:* R. Lanier Anderson, Chris Bobonich, Michael Bratman, Rachael Briggs, Alan Code, John Etchemendy, Michael Friedman, Krista Lawlor, Helen Longino, Thomas Ryckman (Teaching), Debra Satz, Brian Skyrms (Spring), Kenneth Taylor, Johan van Benthem (Spring)

*Associate Professors:* Mark Crimmins, Graciela De Pierris, David Hills (Teaching), Nadeem Hussain, Tamar Schapiro

*Assistant Professors:* Jorah Dannenberg, Thomas Donaldson, Thomas Icard, Anna-Sara Malmgren

*Acting Assistant Professor:* Juliana Bidadanure

*Courtesy Professors:* Eamonn Callan, Reviel Netz, Josiah Ober, Thomas Sheehan

*Courtesy Associate Professor:* Rob Reich

*Courtesy Assistant Professor:* Kristi Olson

*Visiting Professor:* John Broome (Winter), Herlinde Pauer-Studer (Spring), Kendall Walton (Spring), Leif Wenar (Spring)

*Lecturers:* Facundo Alonso, Eli Alshanetsky, Willie Costello, Shane Duarte, Karola Kreitmair, Grant Rozeboom, Paul Skokowski, Richard Sommer, Jennifer Wang

### Cognate Courses

The following courses have substantial philosophical content. However, in the absence of special permission these courses cannot generally be used to satisfy requirements for the Philosophy major or graduate degrees in Philosophy.

		Units
MATH 161	Set Theory	3
RELIGST 279	After God: Why religion at all?	4
RELIGST 183	Atheism: Hegel to Heidegger	5

## Physics

Courses offered by the Department of Physics are listed under the subject code PHYSICS on the Stanford Bulletin's ExploreCourses web site.

## Mission of the Undergraduate Program in Physics

The mission of the undergraduate program in Physics is to provide students with a strong foundation in both classical and modern physics. The goal of the program is to develop both quantitative problem solving skills and the ability to conceive experiments and analyze and interpret data. These abilities are acquired through both course work and opportunities to conduct independent research. The program prepares students for careers in fields that benefit from quantitative and analytical thinking, including physics, engineering, teaching, medicine, law, science writing, and science policy, in government or the private sector. In some cases, the path to this career will be through an advanced degree in physics or a professional program.

## Learning Outcomes (Undergraduate)

Students develop an understanding of the fundamental laws that govern the universe, and a strong foundation of mathematical, analytical, laboratory, and written communication skills. They will also be presented with opportunities for learning through research. Upon completion of the Physics degree, students should have acquired the following knowledge and skills:

1. a thorough quantitative and conceptual understanding of the core areas of physics, including mechanics, electricity and magnetism, thermodynamics, statistical physics, and quantum mechanics, at a level compatible with admission to graduate programs in physics at peer institutions.
2. the ability to analyze and interpret quantitative results, both in the core areas of physics and in complex problems that cross multiple core areas.
3. the ability to apply the principles of physics to solve new and unfamiliar problems. This ability is often described as "thinking like a physicist."
4. the ability to use contemporary experimental apparatus and analysis tools to acquire, analyze and interpret scientific data.
5. the ability to communicate scientific results effectively in written papers and presentations or posters.

## Course Work

The course work is designed to provide students with a sound foundation in both classical and modern physics. Students who wish to specialize in astronomy, astrophysics, or space science should also consult the "Astronomy Program (p. 346)" section of this bulletin.

Three introductory series of courses include labs in which undergraduates carry out individual experiments. The Intermediate and Advanced Physics Laboratories offer facilities for increasingly complex individual work, including the conception, design, and fabrication of laboratory equipment. Undergraduates are also encouraged to participate in research; most can do this through the senior thesis and/or the summer research program.

The study of physics is undertaken by three principal groups of undergraduates: those including physics as part of a general education; those preparing for careers in professional fields that require a knowledge of physics, such as medicine or engineering; and those preparing for careers in physics or related fields, including teaching and research in colleges and universities, research in federally funded laboratories and industry, and jobs in technical areas. Physics courses numbered below 100 are intended to serve all three of these groups. The courses numbered above 100 mainly meet the needs of the third group, but also of some students majoring in other branches of science and engineering.

### Entry-Level Sequences in Physics

The Department of Physics offers three year-long, entry-level physics sequences, the PHYSICS 20, 40, and 60 series. The first of these (the 20 series) is non-calculus-based, and is intended primarily for those who are majoring in biology. Students with AP Physics credit, particularly those who are considering research careers, may wish to consider taking the PHYSICS 40 series, rather than using AP placement. These introductory courses provide a depth and emphasis on problem solving that has significant value in biological research, given today's considerable physics-based technology.

For those intending to major in engineering or the physical sciences, or simply wanting a stronger background in physics, the department offers the PHYSICS 40 and 60 series. Either of these satisfies the entry-level physics requirements of any Stanford major. The 60 series is intended for those who have already taken a Physics course at the level of the 40 series, or at least have a strong background in mechanics, some background in electricity and magnetism, and a strong background in calculus.

The PHYSICS 40 series begins with PHYSICS 41 Mechanics in Winter Quarter, PHYSICS 43 Electricity and Magnetism in Spring Quarter, and PHYSICS 45 Light and Heat in Autumn Quarter. While it is recommended that most students begin the sequence with PHYSICS 41 in Winter Quarter, those who have had strong physics preparation in high school (such as a score of at least 4 on the Physics AP C exam) may start the sequence with PHYSICS 45 in Autumn Quarter.

PHYSICS 41A is an optional one-unit companion course to PHYSICS 41 that provides additional problem solving for students with less preparation in math and physics

The Physics Tutoring Center offers help to students in the Entry-Level courses. It is staffed Monday through Friday. For more detailed schedule and location. See schedule at <http://physicstutor.stanford.edu>.

### Entry-Level Course List

One course from the following is recommended for the humanities or social science student who wishes to become familiar with the methodology and content of modern physics:

PHYSICS 15	Stars and Planets in a Habitable Universe	
------------	---	--

PHYSICS 16	The Origin and Development of the Cosmos	3
PHYSICS 17	Black Holes and Extreme Astrophysics	3
PHYSICS 19		

The 20 series (below) is recommended for general students and for students preparing for medicine or biology:

		Units
PHYSICS 21	Mechanics, Fluids, and Heat	4
PHYSICS 22	Mechanics, Fluids, and Heat Laboratory	1
PHYSICS 23	Electricity, Magnetism, and Optics	4
PHYSICS 24	Electricity, Magnetism, and Optics Laboratory	1
PHYSICS 25	Modern Physics	4
PHYSICS 26	Modern Physics Laboratory	1

The 40 series (below) is for students majoring in engineering, chemistry, earth sciences, mathematics, or physics:

		Units
PHYSICS 41	Mechanics	4
PHYSICS 42	Classical Mechanics Laboratory	1
PHYSICS 43	Electricity and Magnetism	4
PHYSICS 44	Electricity and Magnetism Lab	1
PHYSICS 45	Light and Heat	4
PHYSICS 46	Light and Heat Laboratory	1

The 60 series (below), or advanced freshman series, is for students who have had strong preparation in physics and calculus in high school. Students who have had the appropriate background and wish to major in physics should take this introductory series:

		Units
PHYSICS 61	Mechanics and Special Relativity	4
PHYSICS 62	Mechanics Laboratory	1
PHYSICS 63	Electricity, Magnetism, and Waves	4
PHYSICS 64	Electricity, Magnetism and Waves Laboratory	1
PHYSICS 65	Quantum and Thermal Physics	4
PHYSICS 67	Introduction to Laboratory Physics	2

### Physics Placement Diagnostic

Students who are planning to take either of the calculus-based sequences (PHYSICS 40 or 60 sequence) are advised to take the Physics Placement Diagnostic (<https://physics.stanford.edu/undergraduate-program/placement-test>) that is offered twice at the beginning of the school year: during New Student Orientation and on the evening of the first day of instruction in the Autumn quarter. Advice will be sent to each student with guidance on placement in the 40 or 60 sequence. See this page for details: <https://physics.stanford.edu/undergraduate-program/placement-diagnostic>. Students who do not plan to take the 40 or 60 sequence do *not* need to take the Placement Diagnostic.

## Graduate Programs in Physics

Graduate students find opportunities for research in the fields of astrophysics, particle astrophysics, cosmology, experimental particle physics, particle theory, string theory, intermediate energy physics, low temperature physics, condensed matter physics, materials research, atomic physics, laser physics, quantum electronics, coherent optical radiation, novel imaging technologies, and biophysics. Faculty advisers are drawn from many departments, including Physics, Applied Physics, Materials Science and Engineering, Electrical Engineering, and Biology. Opportunities for research are also available with the faculty at SLAC in the areas of theoretical and experimental particle physics, particle astrophysics, cosmology, accelerator design, and photon science.

Units	
	3

The number of graduate students admitted to the Department of Physics is strictly limited. Students should submit applications by Tuesday, December 15, 2015 for matriculation the following Autumn Quarter. Graduate students may normally enter the department only at the beginning of Autumn Quarter.

### Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in physics and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis using the tools of Physics. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of physics and to interpret and present the results of such research.

### Fellowships and Assistantships

The Department of Physics makes an effort to support all its graduate students through fellowships, teaching assistantships, research assistantships, or a combination of sources. More detailed information is provided with the offer of admission.

## Laboratories and Institutes

The Russell H. Varian Laboratory of Physics, the Physics and Astrophysics Building, the W. W. Hansen Experimental Physics Laboratory (HEPL), the E. L. Ginzton Laboratory, the Center for Nanoscale Science and Engineering and the Geballe Laboratory for Advanced Materials (GLAM) together house a range of physics activities from general courses through advanced research. Ginzton Lab houses research on optical systems, including quantum electronics, metrology, optical communication and development of advanced lasers. GLAM houses research on novel and nanopatterned materials, from high-temperature superconductors and magnets to organic semiconductors, subwavelength photon waveguides, and quantum dots. GLAM also supports the materials community on campus with a range of characterization tools: it is the site for the Stanford Nanocharacterization Lab (SNL) and the NSF-sponsored Center for Probing the Nanoscale (CPN). The SLAC National Accelerator Laboratory is just a few miles from the Varian Laboratory. SLAC is a national laboratory funded by the Offices of Basic Energy Sciences and High Energy Physics of the Department of Energy. Scientists at SLAC conduct research in photon science, accelerator physics, particle physics, astrophysics and cosmology. The laboratory hosts a two-mile-long linear accelerator that can accelerate electrons and positrons. The Stanford Synchrotron Radiation Light Source (SSRL) uses intense x-ray beams produced with a storage ring on the SLAC site. The Linac Coherent Light Source (LCLS), completed in 2009, is the world's first x-ray free-electron laser and has opened new avenues of research in ultra-fast photon science.

The Kavli Institute for Particle Astrophysics and Cosmology (KIPAC), formed jointly with the SLAC National Accelerator Laboratory, provides a focus for theoretical, computational, observational, and instrumental research programs. A wide range of research areas in particle astrophysics and cosmology are investigated by students, postdocs, research staff and faculty. The two major projects with which KIPAC is heavily involved are the Fermi Gamma-Ray Space Telescope (FGST) and the Large Synoptic Survey Telescope (LSST). KIPAC members also participate fully in the Cryogenic Dark Matter Search (CDMS), the Solar Dynamics Observatory (SDO), the EXO-200 double beta decay experiment, the Dark Energy Survey (DES), the NuSTAR and Astro-H X-ray satellites, and several cosmic microwave background experiments (BICEP, KECK, QUIET and POLAR-1).

The Ginzton Laboratory, HEPL, GLAM, KIPAC, SLAC, and SSRL are listed in the "Centers, Laboratories, and Institutes (p. 715)" section of this bulletin. Students may also be interested in research and facilities at two other independent labs: the Center for Integrated Systems, focused on electronics and nanofabrication; and the Clark Center, an interdisciplinary biology, medicine, and bioengineering laboratory.

The Stanford Institute for Theoretical Physics is devoted to the investigation of the basic structure of matter (particle theory, string theory, M-theory, quantum cosmology, condensed matter physics).

## Physics Course Numbering System

Course numbers beyond 99 are numbered in accordance with a three-digit code. The first digit indicates the approximate level of the course:

Digit	Description
100	intermediate and advanced undergraduate courses
200	first-year graduate courses
300	more advanced courses
400	research, special, or current topics

The second digit indicates the general subject matter:

Digit	Description
00	laboratory
10,20,30	general courses
40	nuclear physics, nuclear energy, energy
50	elementary particle physics
60	astrophysics, cosmology, gravitation
70	condensed matter physics
80	optics and atomic physics
90	miscellaneous courses

## Bachelor of Science in Physics

To help in deciding which introductory sequence is most suitable, students considering a major in Physics may contact the undergraduate program coordinator ([elva@stanford.edu](mailto:elva@stanford.edu)) to arrange an advising appointment. Also see the Physics Placement Diagnostic web site (<https://physics.stanford.edu/undergraduate-program/placement-test>). Although it is possible to complete the Physics major in three years, students who contemplate starting the major during sophomore year should make an advising appointment to map out their schedule. Students who have had previous college-level courses (including EPGY) should make an advising appointment for placement and possible transfer credit. For advanced placement advice, see the Registrar's web site (<http://studentaffairs.stanford.edu/registrar/students/ap>).

Prospective Physics majors are advised to take PHYSICS 59 Frontiers of Physics Research in their freshman or sophomore year.

### Required Courses for Majors

All courses for the Physics major must be taken for a letter grade, and a grade of 'C-' or better must be received for all units applied toward the major.

For sample schedules illustrating how to complete the Physics major, see the Department of Physics (<https://physics.stanford.edu/undergraduate-program/four-year-plans>) web site.

Introductory Sequence	Units
Complete either the 40 Series or the 60 Series	19-20

## 40 Series (19-20 units):

PHYSICS 41	Mechanics
PHYSICS 42	Classical Mechanics Laboratory
PHYSICS 43	Electricity and Magnetism
PHYSICS 44	Electricity and Magnetism Lab or PHYSICS 67 Introduction to Laboratory Physics
PHYSICS 45	Light and Heat
PHYSICS 46	Light and Heat Laboratory
PHYSICS 70	Foundations of Modern Physics

## 60 Series (16 units):

PHYSICS 61	Mechanics and Special Relativity
PHYSICS 62	Mechanics Laboratory
PHYSICS 63	Electricity, Magnetism, and Waves
PHYSICS 64	Electricity, Magnetism and Waves Laboratory
PHYSICS 65	Quantum and Thermal Physics
PHYSICS 67	Introduction to Laboratory Physics

Physics majors who complete the PHYSICS 60 series must take one additional PHYSICS course numbered 100 or above, selected from this list (3-4 units):

PHYSICS 100	Introduction to Observational Astrophysics
PHYSICS 112	Mathematical Methods of Physics
PHYSICS 113	Computational Physics
PHYSICS 134	Advanced Topics in Quantum Mechanics
PHYSICS 152	Introduction to Particle Physics I
PHYSICS 160	Introduction to Stellar and Galactic Astrophysics
PHYSICS 161	Introduction to Cosmology and Extragalactic Astrophysics
PHYSICS 172	Solid State Physics
PHYSICS 211	Continuum Mechanics
PHYSICS 212	Statistical Mechanics
PHYSICS 216	Back of the Envelope Physics
PHYSICS 220	Classical Electrodynamics
PHYSICS 230	Graduate Quantum Mechanics I
PHYSICS 231	Graduate Quantum Mechanics II
PHYSICS 262	General Relativity

**Required Math Courses (21-23 units)**

MATH 51	Linear Algebra and Differential Calculus of Several Variables	5
or MATH 51H	Honors Multivariable Mathematics	
MATH 52	Integral Calculus of Several Variables	5
or MATH 52H	Honors Multivariable Mathematics	
MATH 53	Ordinary Differential Equations with Linear Algebra	5
or MATH 53H	Honors Multivariable Mathematics	
MATH 131P	Partial Differential Equations I	3
or MATH 173	Theory of Partial Differential Equations	
Plus one advanced mathematics elective (3-5 units)		3-5
Select one of the following:		
Any MATH (101 or higher)		
PHYSICS 112	Mathematical Methods of Physics	
STATS 116	Theory of Probability	
EE 261	The Fourier Transform and Its Applications	

**Intermediate Sequence**

PHYSICS 105	Intermediate Physics Laboratory I: Analog Electronics	4
PHYSICS 107	Intermediate Physics Laboratory II: Experimental Techniques and Data Analysis	4
PHYSICS 112	Mathematical Methods of Physics (recommended) <sup>1</sup>	

PHYSICS 113	Computational Physics (recommended) <sup>2</sup>	
PHYSICS 120	Intermediate Electricity and Magnetism I	4
PHYSICS 121	Intermediate Electricity and Magnetism II	4
<b>Advanced Sequence</b>		
PHYSICS 108	Advanced Physics Laboratory: Project	4
PHYSICS 110	Advanced Mechanics	4
PHYSICS 130	Quantum Mechanics I	4
PHYSICS 131	Quantum Mechanics II	4
PHYSICS 134	Advanced Topics in Quantum Mechanics <sup>2</sup>	
PHYSICS 170	Thermodynamics, Kinetic Theory, and Statistical Mechanics I	4
PHYSICS 171	Thermodynamics, Kinetic Theory, and Statistical Mechanics II	4
Total Units		80-83

<sup>1</sup> Those wishing to pursue theoretical physics in graduate school may wish to take a collection of courses in the Department of Mathematics rather than or in addition to PHYSICS 112 Mathematical Methods of Physics.

<sup>2</sup> These courses are not required. PHYSICS 113 Computational Physics is recommended for students planning to work in technical fields. Both PHYSICS 113 Computational Physics and PHYSICS 134 Advanced Topics in Quantum Mechanics are recommended for students who intend to complete a Ph.D. in Physics.

**Concentrations in Physics**

The primary purpose of concentrations in the Physics major is to provide consistent and more formal advising to students who want to concentrate in a particular area of physics during their undergraduate education, or prepare for future graduate studies in a particular area of physics. Physics majors are not required to choose a concentration and a concentration does not add any formal requirements to the Physics major. Upon graduation, students receive a certificate of completion of a concentration.

Students seeking further advice on a given concentration should contact the professor whose name appears next to the respective title of each section below. Within the chosen concentration below, complete at least four courses from the list or three courses plus a senior thesis. No more than one of the courses can be taken for CR/NC.

**A. Applied Physics (Hari Manoharan (manoharan@stanford.edu))**

		Units
Solid State		
PHYSICS 172	Solid State Physics	3
APPPHYS 270	Magnetism and Long Range Order in Solids	3
MATSCI 195	Waves and Diffraction in Solids	3-4
Lasers		
EE 236A	Modern Optics	3
EE 236C	Lasers	3
Lab Methods		
APPPHYS 207	Laboratory Electronics	4
APPPHYS 304	Lasers Laboratory	4

**B. Astrophysics (Roger Romani (rwr@astro.stanford.edu), Sarah Church (church@stanford.edu))**

		Units
PHYSICS 100	Introduction to Observational Astrophysics	4
PHYSICS 160	Introduction to Stellar and Galactic Astrophysics	3
PHYSICS 161	Introduction to Cosmology and Extragalactic Astrophysics	3
Select one of the following:		3-4

PHYSICS 211	Continuum Mechanics	
PHYSICS 262	General Relativity	
PHYSICS 312	Basic Plasma Physics (not offered 2015-16)	
GS 122	Planetary Systems: Dynamics and Origins	3-4

### C. Biophysics and Medical Physics ( Seb Doniach (SXDWC@SLAC.Stanford.Edu))

		Units
BIOC 202	Biochemistry Bootcamp	1
BIOPHYS 228	Computational Structural Biology	3
BIO 141	Biostatistics	3-5
BIO 217	Neuronal Biophysics (not offered 2015-16)	4
BIOE 221	Physics and Engineering of Radionuclide Imaging	3
BIOE 222	Instrumentation and Applications for Multi-modality Molecular Imaging of Living Subjects	4

It is recommended that Physics majors interested in pursuing a career in biophysics consider a minor in Biology.

### D. Geophysics ( Simon Klemperer (sklemp@stanford.edu))

The following requirements apply to students matriculating 2010-11 or later:

		Units
GEOPHYS 110	Earth on the Edge: Introduction to Geophysics	3
GEOPHYS 120	Ice, Water, Fire	3-5
Select one of the following:		
GEOPHYS 130	Introductory Seismology	
GEOPHYS 186	Tectonophysics	
GEOPHYS 190	Near-Surface Geophysics	

Physics majors matriculating prior to 2010-11 who wish to complete a concentration in Geophysics should consult Prof. Klemperer.

### E. Theoretical Physics ( Andrei Linde (alinde@stanford.edu))

		Units
PHYSICS 152	Introduction to Particle Physics I	3
PHYSICS 160	Introduction to Stellar and Galactic Astrophysics	3
PHYSICS 161	Introduction to Cosmology and Extragalactic Astrophysics	3
PHYSICS 262	General Relativity	3
PHYSICS 330	Quantum Field Theory I	3
PHYSICS 331	Quantum Field Theory II	3
PHYSICS 332	Quantum Field Theory III	3
PHYSICS 351	Standard Model of Particle Physics	3

Notes to students taking this concentration:

1. Students should discuss the choice of courses with members of the Institute for Theoretical Physics and/or their major adviser.
2. Students may attend PHYSICS 330 Quantum Field Theory I after taking PHYSICS 130 Quantum Mechanics I, PHYSICS 131 Quantum Mechanics II and PHYSICS 134 Advanced Topics in Quantum Mechanics. Prior study of special topics in quantum mechanics (PHYSICS 232, not offered this year) may be helpful.
3. Students who took PHYSICS 362 or PHYSICS 364 in previous years may also count these towards fulfillment of this requirement.

## Senior Thesis

The department offers Physics majors the opportunity to complete a senior thesis. These are the guidelines:

1. Students must submit a Senior Thesis Application form once they identify a physics project, either theoretical or experimental, in consultation with individual faculty members. Proposal forms are available from the undergraduate coordinator and must be submitted by the week prior to the Thanksgiving break of the academic year in which the student plans to graduate.
2. Credit for the project is assigned by the adviser within the framework of PHYSICS 205 Senior Thesis Research. A minimum of 3 units of PHYSICS 205 Senior Thesis Research must be completed for a letter grade during the senior year. Work completed in the senior thesis program may not be used as a substitute for regular required courses for the Physics major.
3. A written report and a presentation of the work at its completion are required for the senior thesis. By mid-May, the senior thesis candidate is required to present the project at the department's Senior Thesis Presentation Program. This event is publicized and open to the general public. The expectation is that the student's adviser, second reader, and all other senior thesis candidates attend.

## Honors Program

Physics majors are granted a Bachelor of Science in Physics with Honors if they satisfy these three requirements beyond the general Physics major requirements:

1. The student files for entry into the Honors Program by completing an Honors Program Application (available from the undergraduate coordinator) by the same deadline as the Senior Thesis Application. Eligibility is confirmed by the department.
2. The student completes a senior thesis by meeting the deadlines and requirements described above.
3. The student completes course work with an overall GPA of 3.30 or higher, and a GPA of 3.50 or higher in courses required for the Physics major.

## Minor in Physics

The Physics minor allows the student to select a concentration in Physics or Astronomy. The Astronomy concentration has a technical and non-technical option.

All courses for the minor must be taken at Stanford University for a letter grade, and a grade of 'C-' or better must be received for all units applied toward the minor except as noted in the following paragraph.

Students who take the PHYSICS 20, 40, or 60 series at Stanford in support of their major may count those units towards the minor. Those who have fulfilled Physics requirements at the 20 or 40 level by enrollment at another accredited university, or through advanced placement credits, may count credits towards PHYSICS 21, PHYSICS 23, and PHYSICS 24, or PHYSICS 41/PHYSICS 42 and PHYSICS 43/PHYSICS 44.

PHYSICS 25/PHYSICS 26, or PHYSICS 45 /PHYSICS 46 for a minor in Physics or the technical minor concentration in Astronomy, must be taken at Stanford even if similar material has been covered elsewhere.

The minor declaration deadline is three quarters before graduation, typically the beginning of Autumn Quarter if the student is graduating at the end of Spring Quarter.

## Concentration in Physics

An undergraduate minor in Physics requires a minimum of 25 units with the following course work:

	Units
Select one of the following Series:	16-19
Series A (19 units)	

PHYSICS 41	Mechanics	
& PHYSICS 42	and Classical Mechanics Laboratory	
PHYSICS 43	Electricity and Magnetism	
& PHYSICS 44	and Electricity and Magnetism Lab <sup>1</sup>	
PHYSICS 45	Light and Heat	
& PHYSICS 46	and Light and Heat Laboratory	
PHYSICS 70	Foundations of Modern Physics	
Series B (16 units)		
PHYSICS 61	Mechanics and Special Relativity	
& PHYSICS 62	and Mechanics Laboratory	
PHYSICS 63	Electricity, Magnetism, and Waves	
& PHYSICS 64	and Electricity, Magnetism and Waves Laboratory	
PHYSICS 65	Quantum and Thermal Physics	
& PHYSICS 67	and Introduction to Laboratory Physics	
At least three PHYSICS courses numbered 100 or above from the following courses: PHYSICS 100, 105, 107, 108, 110, 112, 113, 120, 121, 130, 131, 134, 152, 160, 161, 170, 171, 172, 211, 212, 216, 220, 230, 231, or 262.		9-12
Total Units		25-31

<sup>1</sup> PHYSICS 67 Introduction to Laboratory Physics may be substituted for PHYSICS 44 Electricity and Magnetism Lab.

## Minor in Physics with Concentration in Astronomy

Students wishing to pursue advanced work in astrophysical sciences should major in Physics (p. 584) and concentrate in astrophysics. However, students outside of Physics with a general interest in astronomy may organize their studies by completing one of the following Physics minor concentration programs.

Students who take the 20, 40, or 60 series at Stanford in support of their major may count those units towards the minor.

An undergraduate Physics minor with a concentration in Astronomy requires the following courses:

### Non-Technical

For students whose majors do not require the PHYSICS 40 or 60 series:

PHYSICS 21	Mechanics, Fluids, and Heat	4
PHYSICS 23	Electricity, Magnetism, and Optics	4
PHYSICS 25	Modern Physics	4
& PHYSICS 26	and Modern Physics Laboratory	
PHYSICS 50	Observational Astronomy Laboratory	3-4
or PHYSICS 10	(Introduction to Observational Astrophysics)	
Select two of the following:		6
PHYSICS 15	Stars and Planets in a Habitable Universe	
PHYSICS 16	The Origin and Development of the Cosmos	
PHYSICS 17	Black Holes and Extreme Astrophysics	
Total Units		21-22

### Technical

For students whose majors require the PHYSICS 40 or 60 series:

Select one of the following Series:

Series A	
PHYSICS 41	Mechanics
PHYSICS 43	Electricity and Magnetism

PHYSICS 45	Light and Heat	
& PHYSICS 46	and Light and Heat Laboratory	
PHYSICS 70	Foundations of Modern Physics	
Series B		
PHYSICS 61	Mechanics and Special Relativity	
PHYSICS 63	Electricity, Magnetism, and Waves	
PHYSICS 65	Quantum and Thermal Physics	
PHYSICS 67	Introduction to Laboratory Physics	
And take the following three courses:		
PHYSICS 100	Introduction to Observational Astrophysics	4
PHYSICS 160	Introduction to Stellar and Galactic Astrophysics	3
PHYSICS 161	Introduction to Cosmology and Extragalactic Astrophysics	3
Total Units		24-27

Students are also encouraged to take the electricity and magnetism/optics lab of the appropriate PHYSICS series, PHYSICS 24, PHYSICS 44 or PHYSICS 64 for 1 additional unit.

## Master of Science

The department does not offer a coterminal degree program, or a separate program for the M.S. degree, but this degree may be awarded for a portion of the Ph.D. degree work.

University requirements for the master's degree, discussed in the "Graduate Degrees (p. 45)" section of this bulletin, include completion of 45 units of unduplicated course work after the bachelor's degree. Among the department requirements are a grade point average (GPA) of at least 3.0 (B) for the following required courses (or their equivalents):

	Units	
PHYSICS 212	Statistical Mechanics	3
PHYSICS 220	Classical Electrodynamics	3
Plus one of the following courses:		
PHYSICS 230	Graduate Quantum Mechanics I	3
PHYSICS 231	Graduate Quantum Mechanics II	3
PHYSICS 234	Advanced Topics in Quantum Mechanics	3
PHYSICS 330	Quantum Field Theory I	3
PHYSICS 331	Quantum Field Theory II	3
PHYSICS 332	Quantum Field Theory III	3
Plus two 3 unit graduate level courses in Physics or Applied Physics.		6

Up to 6 of these required units may be waived on petition if a thesis is submitted.

## Doctor of Philosophy in Physics

The University's basic requirements for the Ph.D. are discussed in the "Graduate Degrees (p. 45)" section of this bulletin.

The minimum department requirements for the Ph.D. degree in Physics consist of completing all courses listed below and at least one course from each of two subject areas outside the student's primary area of research (among biophysics, condensed matter, quantum optics and atomic physics, astrophysics and gravitation, and nuclear and particle physics). For this requirement students must choose from courses numbered above PHYSICS 234, excluding 290 and 294.

**Units** The requirements in the following list may be fulfilled by passing the 14-17 course at Stanford or passing an equivalent course elsewhere:

	Units	
PHYSICS 212	Statistical Mechanics	3
PHYSICS 220	Classical Electrodynamics	3

PHYSICS 290	Research Activities at Stanford	1
PHYSICS 294	Teaching of Physics Seminar	1
Plus one of the following courses:		
PHYSICS 230	Graduate Quantum Mechanics I	3
PHYSICS 231	Graduate Quantum Mechanics II	3
PHYSICS 234	Advanced Topics in Quantum Mechanics	3
PHYSICS 330	Quantum Field Theory I	3
PHYSICS 331	Quantum Field Theory II	3
PHYSICS 332	Quantum Field Theory III	3

A grade point average (GPA) of at least 3.0 (B) is required for courses taken toward the degree.

All Ph.D. candidates must have math proficiency equivalent to the following Stanford MATH courses:

		Units
MATH 106	Functions of a Complex Variable	3
MATH 113	Linear Algebra and Matrix Theory	3
MATH 116	Complex Analysis	3
MATH 132	Partial Differential Equations II	3

Prior to making an application for candidacy, each student is required to pass a comprehensive oral qualifying examination. A thesis proposal must be submitted during the third year. In order to assess the direction and progress toward a thesis, an oral report and evaluation are required during the fourth year. After completion of the dissertation, each student must take the University oral examination (defense of dissertation).

Three quarters of teaching (including a demonstrated ability to teach) are a requirement for obtaining the Ph.D. in Physics.

Students interested in applied physics and biophysics research should also take note of the Ph.D. granted independently by the Department of Applied Physics and by the Biophysics Program. Students interested in astronomy, astrophysics, or space science should also consult the "Astronomy Course Program (p. 346)" section of this bulletin.

## Ph.D. Minor in Physics

Doctoral students seeking a minor in Physics must take at least six courses from the following list: 210, 211, 212, 216, 220, 230, 231, and 234 among the 20 required units. All prospective minors must obtain approval of their Physics course program from the Physics Graduate Study Committee at least one year before conferral of the Ph.D.

*Emeriti:* (Professors) Alexander L. Fetter, William A. Little, Douglas D. Osheroff, David M. Ritson, H. Alan Schwettman, Robert V. Wagoner, John Dirk Walecka, Stanley G. Wojcicki, Mason R. Yearian; (Professors, Research) John A. Lipa, Todd I. Smith, John P. Turneaure; (Professors, Courtesy) Peter A. Sturrock (Applied Physics), Richard Taylor (SLAC National Accelerator Laboratory)

*Chair:* Peter M. Michelson

*Associate Chair:* Mark Kasevich

*Professors:* Roger Blandford, Phil Bucksbaum, Patricia Burchat, Blas Cabrera, Steven Chu, Sarah Church, Persis Drell, Savas G. Dimopoulos, Sebastian Doniach, David Goldhaber-Gordon, Giorgio Gratta, Patrick Hayden, Kent Irwin, Shamit Kachru, Steven Kahn, Renata E. Kallosh, Aharon Kapitulnik, Mark Kasevich, Steven A. Kivelson, Robert B. Laughlin, Andrei D. Linde, Bruce Macintosh, Kathryn Moler, Peter F. Michelson, Vahe Petrosian, Roger W. Romani, Zhi-Xun Shen, Stephen Shenker, Eva Silverstein, Leonard Susskind, Carl Wieman, Shoucheng Zhang

*Associate Professors:* Tom Abel, Steven Allen, Chao-Lin Kuo, Hari Manoharan, Xiao-liang Qi, Risa Wechsler

*Assistant Professors:* Peter Graham, Sean Hartnoll, Jason Hogan, Srinivas Raghu, Monica Schleier-Smith, Leonardo Senatore, Lauren Tompkins

*Professors (Research):* Leo Hollberg, Phillip H. Scherrer

*Courtesy Professors:* Daniel Akerib, Rhiju Das, Benjamin Lev, Craig Levin, Stephen Quake, Thomas Shutt, Richard N. Zare

*Lecturers:* Chaya Nanavati, Rick Pam

*Consulting Professors:* Ralph Devoe, Gerald Fisher

## Political Science

Courses offered by the Department of Political Science are listed under the subject code POLISCI on the Stanford Bulletin's ExploreCourses web site.

## Mission of the Undergraduate Program in Political Science

The mission of the undergraduate program in Political Science is to provide students with a solid grasp of the American political system and other political systems within the context of global forces, international conflicts, social movements, ideological systems and diversity. Courses in the major are designed to help students gain competency in the primary subfields of political science including American and comparative politics, international relations, and the theory/philosophy of politics; to introduce students to a variety of research methodologies and analytical frameworks; and to develop students' written and oral communication skills. Students in the program have excellent preparation for further study in graduate or professional schools as well as careers in government, business, and not-for-profit organizations.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of core knowledge within the discipline of political science.
2. the ability to communicate ideas clearly and persuasively in writing.
3. the ability to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
4. the ability to evaluate theory and critique research within the discipline of Political Science.

## Graduate Programs in Political Science

The Department of Political Science offers two types of advanced degrees:

- the Doctor of Philosophy
- the Master of Arts in Political Science which is available to Stanford students who are currently enrolled in other advanced degree programs.

The department does not have a terminal M.A. program for external applicants.

The principal goal of the Stanford Ph.D. program in Political Science is the training of scholars. Most students who receive doctorates in the program do research and teach at colleges or universities. The department offers courses and research opportunities in a wide variety

of fields in the discipline, including American politics, comparative politics, international relations, political theory, and political methodology.

The program is built around small seminars that analyze critically the literature of a field or focus on a research problem. These courses prepare students for the Ph.D. comprehensive exam requirement within a two-year period and for work on the doctoral dissertation.

Admission to the graduate program in Political Science is highly selective. Approximately 14-18 students, chosen from a large pool of applicants, enter the program each year. The small size of the student body allows more individual work with members of the faculty than most graduate programs. It also makes possible financial assistance to most students admitted to the Ph.D. program.

Additional information on the admissions process is available on the Department of Political Science website (<https://politicalscience.stanford.edu/graduate-program/prospective-students/phd-admissions>).

## Learning Outcomes (Graduate)

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Political Science. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Political Science and to interpret and present the results of such research.

Pursued in combination with a doctoral degree, the master's program furthers students' knowledge and skills in Political Science. This is achieved through completion of courses in three subfields, and experience with independent work and specialization.

Political Science has developed a new version of the major starting in 2015-16. Undergraduates who enter the University in 2015-16 and thereafter must follow the guidelines for the new major with the five tracks. This version is listed at the top of this page.

Undergraduates who entered the University in 2014-15 and prior have the option of declaring the major under the new major requirements or the old major version of the major. Students who have already declared the major under the old requirements have the option to switch to the new requirements or remain on the old requirements. The previous major information is listed at the bottom of this page.

The overall unit count for the major remains at 70 units.

## Bachelor of Arts in Political Science (effective 2015-16)

To receive a B.A. in Political Science, a student must:

1. Submit a Political Science major proposal during a meeting with the undergraduate administrator and declare on Axess. Forms are available in Encina Hall West, room 100, or at the Department of Political Science website (<https://politicalscience.stanford.edu/undergraduate-major/major>). For additional information, students may visit the Political Science office or phone (650) 723-1608.
2. Complete 70 units including:
  - a. 5 unit introductory class, POLISCI 1 The Science of Politics, preferably taken before the end of sophomore year.
  - b. 40 Political Science course units in a primary and secondary track combined. Each major must declare a primary track and take at least 25 units in this track. The secondary track must be completed with at least 15 units. The five track options include:
    - i. Justice and Law

POLISCI 24Q	Law and Order	3
POLISCI 29N	Mixed-Race Politics and Culture	3
POLISCI 31N	Political Freedom: Rights, Justice, and Democracy in the Western Tradition	3
POLISCI 33S	Religion, Democracy, and Human Rights	3
POLISCI 102	Politics and Public Policy	4-5
POLISCI 103	Justice	4-5
POLISCI 114D	Democracy, Development, and the Rule of Law	5
POLISCI 122	Introduction to American Law	3-5
POLISCI 123	Politics and Public Policy	4-5
POLISCI 124R	The Federal System: Judicial Politics and Constitutional Law	5
POLISCI 125P	The First Amendment: Freedom of Speech and Press	4-5
POLISCI 126P	Constitutional Law	3
POLISCI 128S	The Constitution: A Brief History	5
POLISCI 131A	Collective Action Problems: Ethics, Politics, & Culture	3-4
POLISCI 131L	Modern Political Thought: Machiavelli to Marx and Mill	5

## c. A 5-unit methods requirement satisfied by:

Select one of the following:	5	
POLISCI 155	Political Data Science	
STATS 60	Introduction to Statistical Methods: Precalculus	
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	
CS 106A	Programming Methodology	

- d. 20 additional Political Science units including no more than 5 units of directed reading. 5 units of ECON 1 Principles of Economics may substitute for one 5-unit POLISCI course.
- e. No more than two 3 unit Stanford Introductory Seminar courses can be applied toward the 70 unit major requirement.
3. Demonstrate the capacity for sustained research and writing in the discipline. This requirement is satisfied by taking a Political Science course designated as a Writing in the Major (WIM) course and does not need to be taken in your primary track.

4. Take at least one 5-unit, 200-level or 300-level undergraduate seminar in Political Science and may be within your primary or secondary track.
5. Students may petition a maximum of ten units towards the major. Transfer students are allowed to petition up to twenty units towards the major. A maximum of 15 units may be applied towards the concentrations and 5 towards other Political Science course units. All Stanford-in-Washington courses and transfer credit from outside of Stanford require petitions which must be reviewed and approved by the Director of Undergraduate Studies. Petitions must be submitted to the undergraduate administrator within one quarter of course completion or within one quarter of declaring the major. Cognate courses do not require a petition unless the units are being applied to primary or secondary tracks.
6. Directed reading and Oxford tutorial units also require a petition and may only be applied towards related course work units. These units may not be used in the concentrations, and no more than 10 combined units of directed reading and Oxford tutorial units may count toward the required 70 Political Science units.
7. All courses for the major must be completed with a letter grade of 'C' or better.

## For students enrolled prior to 2015-16 Bachelor of Arts in Political Science

To receive a B.A. in Political Science, a student must:

1. Submit a Political Science major proposal during a meeting with the undergraduate administrator and declare on Axxess. Forms are available in Encina Hall West, room 100, or at the Department of Political Science (<http://polisci.stanford.edu/bachelors>) web site. For additional information, come to the office or phone (650) 723-1608.
2. Complete 70 units including:
  - a. 45 Political Science course units in the primary and secondary concentration combined. Each major should declare a primary concentration in one subfield and take at least 30 units in this concentration, including the introductory course for that subfield. The secondary concentration must be completed with at least 15 units, including the introductory course for that subfield. Subfields include:
    - i International Relations:

POLISCI 101	Introduction to International Relations	5
POLISCI 110D	War and Peace in American Foreign Policy	5
POLISCI 110G	Governing the Global Economy	5
POLISCI 110Y	War and Peace in American Foreign Policy	5

POLISCI 355C	Causal Inference for Social Science	5

POLISCI 358	Data-driven Politics	3-5
-------------	----------------------	-----

- b. A 5-unit methods requirement satisfied by:  
Select one of the following: 5
- |             |  |
|-------------|--|
| STATS 60    | Introduction to Statistical Methods: Precalculus                         |
| ECON 102A   | Introduction to Statistical Methods (Postcalculus) for Social Scientists |
| POLISCI 155 | Political Data Science   |
- c. 20 additional Political Science units including no more than 5 units of directed reading. 5 units of ECON 1 Principles of Economics may substitute for one 5-unit POLISCI course.
- d. No more than two 3-unit Stanford Introductory Seminar courses can be applied toward the 70-unit major requirement.

3. *Introductory Courses:* Each student must take two from the following Political Science courses, one of which must be in the primary concentration, the other in the secondary concentration. These courses should be completed by the end of sophomore year.

	Units	Units
POLISCI 101	Introduction to International Relations	5
POLISCI 102	Politics and Public Policy	4-5
POLISCI 103	Justice	4-5
POLISCI 104	Introduction to Comparative Politics	5

4. Demonstrate the capacity for sustained research and writing in the discipline. This requirement is satisfied by taking a Political Science course designated as a Writing in the Major (WIM) course and may be in any subfield of the major.
5. Take at least one 5-unit, 200-level or 300-level undergraduate seminar in Political Science and may be within your primary or secondary concentration.
6. Students may petition a maximum of ten units towards the major. Transfer students are allowed to petition up to twenty units towards the major. A maximum of 15 units may be applied towards the concentrations and 5 towards other Political Science course units. All Stanford-in-Washington courses and transfer credit from outside of Stanford require petitions which must be reviewed and approved by the Director of Undergraduate Studies. Petitions must be submitted to the undergraduate administrator within one quarter of course completion or within one quarter of declaring the major. Cognate courses do not require a petition unless the units are being applied to primary or secondary concentrations.
7. Directed reading and Oxford tutorial units also require a petition and may only be applied towards related course work units. These units may not be used in the concentrations, and no more than 10 combined units of directed reading and Oxford tutorial units may count toward the required 70 Political Science units.
8. All courses for the major must be completed with a letter grade of 'C' or better.

## Research Honors Track

The Research Honors Track in Political Science leads to a B.A.H. (Bachelor of Arts with Honors) in Political Science. This program is designed to provide its students with the analytical tools they need to write honors theses and collaborate with Stanford faculty and Ph.D. students. Professor Paul Sniderman is the 2014-15 program director.

To receive a B.A.H. in Political Science, students must apply and be accepted to the Research Honors Track. Students must apply to the program in the Spring Quarter of the freshman or sophomore year or Autumn Quarter of the sophomore or junior year. A complete application includes a transcript; a letter of recommendation from a member of the Stanford Political Science faculty or from a teaching assistant in a

Political Science course; and an essay outlining the student's interest in the Research Honors Track.

To fulfill the research honors track major requirements, a student must:

1. Complete 70 units

- a. All courses taken for the research honors track must receive a letter grade of 'C' or better. Junior research honors track courses (see 1e) must receive a 'B' or better to count toward the major. Students unable to meet these requirements may be removed from the track.
- b. 10 units of introductory course work in Political Science.
- i. Students must complete at least two of the following courses, preferably by the end of Spring Quarter of sophomore year:

Select two of the following:	10
POLISCI 1 The Science of Politics	
POLISCI 101 Introduction to International Relations	
POLISCI 102 Politics and Public Policy	
POLISCI 103 Justice	
POLISCI 104 Introduction to Comparative Politics	

- c. 10 units of statistics, which can be completed by taking one of the following sequences:

Select one of the following:	10
STATS 60 Introduction to Statistical Methods: & POLISCI 15 Precalculus and Data Science for Politics	
ECON 102A Introduction to Statistical Methods & POLISCI 150 (Postcalculus) for Social Scientists and Data Science for Politics	
ECON 102A Introduction to Statistical Methods & ECON 102B (Postcalculus) for Social Scientists and Applied Econometrics	

- d. Students are also encouraged (but not required) to complete one of the following calculus sequences:

Select one of the following Series:	15
Series A	
MATH 19 Calculus	
MATH 20 Calculus	
MATH 21 Calculus	
Series B	
MATH 41 Calculus	
MATH 42 Calculus	
MATH 51 Linear Algebra and Differential Calculus of Several Variables	

- e. Three courses designed for the research honors track, to be taken during sophomore or junior year:

POLISCI 291 Political Institutions	5
POLISCI 292 Political Behavior	5
POLISCI 293 Research Design	5

- f. To accommodate students studying at overseas campuses during their junior year, these courses are offered during the Winter and Spring quarters.
- g. Two 200-level, 300-level, or 400-level graduate elective courses.
- h. Three 100-level Stanford POLISCI courses that must be approved by the student's adviser. One of these courses must be a POLISCI Writing in the Major (WIM) course.

- i. 10 units of honors thesis writing. To satisfy this requirement, students must take POLISCI 299Q Honors Thesis Seminar, during the Autumn of their senior year, and must complete the remaining units by taking POLISCI 299A Honors Thesis, POLISCI 299B Honors Thesis, and/or POLISCI 299C Honors Thesis with their thesis adviser.

2. Complete at least one intensive summer research experience by participating in the Political Science Department's Summer Research College (SRC) program, or by completing an independent project under the direction of a Political Science faculty member. Independent projects must be approved by the director of the research honors track prior to completion and a research project form should be submitted to the undergraduate administrator with a description of the project.
3. Students may petition a maximum of 10 units to count for the major. Transfer students are allowed to petition a maximum of 20 units. All petitions and transfer courses require approval from the research honors track director.

## Minor in Political Science

Students must complete their declaration of the minor on Axess no later than Autumn of their senior year. They must submit the minor declaration form to the undergraduate administrator in Encina Hall West 100. This form can be found in Encina Hall West 100 or on the Political Science web site (<https://politicalscience.stanford.edu/undergraduate-program/political-science-minor>).

To receive a minor in Political Science, a student must complete a minimum of 30 unduplicated units. All units must be in Political Science courses or related courses. All courses for the minor must be taken for a letter grade. Students must receive a minimum letter grade of 'C' in all courses for the minor.

### Introductory Course

The student should enroll in POLISCI 1 The Science of Politics preferably in their freshman or sophomore year.

### Track

The student selects a track in which four courses are taken. These courses are at a more advanced level (numbered above 100) and should follow enrollment in POLISCI 1. There are five track options: Justice and Law, International Relations, Data Science, Political Economy and Development, and Elections, Representation, and Governance.

### Additional Course Work

This may include courses within any of the five tracks or a directed reading, Stanford in Washington, or cognate courses. A maximum of 5 units of directed reading may count if supervised by a member of the Political Science department. Any Stanford in Washington (SIW) course may be petitioned to count toward additional course work. Cognate courses may be applied only to additional course work as well.

### Transfer Work

A maximum of 10 units of work completed outside Stanford may be given Political Science credit toward the minor for transfer students. A maximum of 5 units of work completed outside of Stanford for non-transfer students may be given Political Science credit toward the minor. All such cases must be individually reviewed and approved by the Director of Undergraduate Studies.

## Minor in Political Science for students who declared their minor prior to 2015-16

Students must complete their declaration of the minor on Axess no later than Autumn of their senior year. They must submit the minor declaration

form to the undergraduate administrator in Encina Hall West 100. This form can be found in Encina Hall West 100 or on the Political Science web site (<https://politicalscience.stanford.edu/undergraduate-program/political-science-minor>).

To receive a minor in Political Science, a student must complete a minimum of 30 unduplicated units. All units must be in Political Science courses or cognate courses. All courses for the minor must be taken for a letter grade. Students must receive a minimum letter grade of 'C' in all courses for the minor.

### Concentration

The student selects a primary subfield in which three courses are taken. One of these courses must be the introductory course, the other two are at a more advanced level (numbered above 100). The concentration corresponds to one of the subfields the department already has in place, namely, American politics, comparative politics, international relations, and political theory.

### Distribution

Three courses must be in the primary concentration, as specified above, for 15 units. An additional 10 units of intermediate and advanced courses (100 level or above) must be in two additional subfields. The final 5 units may be in any related subfield. ECON 1 Principles of Economics, cognate course, including overseas courses, or any of the Political Science related courses may also be used to satisfy the last five units.

### Petitioned courses

Students may petition for a maximum of 5 units to count towards the minor. This includes directed readings and Stanford in Washington courses. Directed readings and Stanford in Washington courses may only count towards the last five related units for the minor. Transfer students can petition a maximum of 10 units towards the minor. Petitions must be submitted within one quarter of course completion or within one quarter of declaring the minor. All petitioned courses must be individually reviewed and approved by the Director of Undergraduate Studies. Students can download the petition form from the Political Science website or pick one up from Encina Hall West, room 100. Students must submit petitions to the undergraduate administrator in Encina Hall West, room 100.

## Master of Arts in Political Science

The Political Science department does not offer a terminal M.A. degree. An M.A. degree may only be pursued in combination with a doctoral degree from another department within the University or with an advanced degree from one of the University's professional schools. Students interested in pursuing the M.A. should discuss the application requirements with the graduate administrator in Political Science.

Students from within the department and from other degree programs who have applied to the M.A. program may elect to take the M.A. degree in Political Science when they have met the following requirements:

1. Completion of at least three quarters of residency as a graduate student with 45 units of credit of which at least 25 units must be taken in Political Science graduate seminars of 300 level and above. Not more than 25 units of the 45-unit requirement may be taken in a single field.
2. At least two graduate seminars in each of two fields and at least one graduate seminar in a third field.
3. The remaining 20 units must come from courses numbered above 100. Of those 20 units, not more than 10 units of work from related departments may be accepted in lieu of a portion of the work in Political Science. Not more than 10 units may be taken as directed reading.

4. A grade point average (GPA) of 2.7 (B-) or better must be attained for directed readings and all course work. No thesis is required.

The department does not offer a coterminal bachelor's and master's degree.

Political Science doctoral candidates may pursue master's degrees from other departments. Recent examples include but are not restricted to master's degrees in Statistics and Economics. Students interested in this option should consult the relevant sections of this Bulletin for both University and department requirements for master's degrees.

## Doctor of Philosophy in Political Science

The University's basic requirements for the Ph.D. degree are discussed in the "Graduate Degrees (p. 45)" section of this bulletin.

Programs of study leading to the Ph.D. degree are designed by the student, in consultation with advisers and the Director of Graduate Studies, to serve his or her particular interests as well as to achieve the general department requirements. A student is recommended to the University Committee on Graduate Studies to receive the Ph.D. degree in Political Science when the following program of study has been completed:

1. **Statement of Purpose:** By the beginning of the fourth quarter in residence, each graduate student submits a statement of purpose to the student's adviser. This statement indicates the student's proposed major fields of study, the courses taken and those planned to be taken to cover those fields, the student's plan for meeting language and/or skill requirements, plans for scheduling of comprehensive examinations and/or research papers, and, where possible, dissertation ideas or plans. This statement is discussed with, and must be approved by, the student's adviser. In the Autumn Quarter following completion of their first year, students are reviewed at a regular meeting of the department faculty. The main purposes of this review are, in order of importance: to advise and assist the student to realize his or her educational goals; to provide an opportunity for clarifying goals and for identifying ways to achieve them; and to facilitate assessment of progress toward the degree.
2. **Two Major Fields:** The candidate for the Ph.D. degree must demonstrate proficiency in two major fields: American politics, comparative politics, international relations, methodology, and political theory. Students demonstrate proficiency by fulfilling, depending on the field, combinations of the following: written qualifying examinations, research papers, or course work. Each field offers a series of three or four courses designed to familiarize students with the literature of that field. In addition, a field may require that students take one or more elective courses covering a specific aspect of the field. All courses that a student uses to fulfill a major field requirement must be taken for a letter grade of 'B' or better.
3. **Third Minor Field:** The candidate for the Ph.D. degree must also complete a third minor field. The third field requirement is usually satisfied by taking two courses for at least three units each from among courses approved by the field convener. All courses used to fulfill the third minor field requirement must be taken for a letter grade of 'B' or better. The third field cannot be satisfied by courses taken as a requirement for a major field. A third field in political theory requires two courses in addition to the five units necessary to fulfill the political theory program requirement (see item 4). A third concentration in methodology requires 10 units in addition to the 10 units necessary to fulfill the quantitative methods program requirement (see item 5).
4. **Political Theory Requirement:** Every Ph.D. candidate must complete at least one quarter of graduate-level instruction in political theory. All courses used to fulfill the political theory requirement must be taken for a letter grade of 'B' or better.

5. Quantitative Methods Requirement Every Ph.D. candidate must take POLISCI 350A Political Methodology I: Regression and POLISCI 350B Political Methodology II: Causal Inference in order to fulfill the quantitative methods requirement. Credit for equivalent classes is at the discretion of the political methodology field convener. All courses used to fulfill the quantitative methods requirement must be taken for a letter grade of 'B' or better.
6. Competence in a Language and/or Skill: The Ph.D. candidate is required to demonstrate competence in a language and/or skill that is likely to be relevant to the dissertation research. The level of competence needed for completion of the research is determined by the student's adviser. Previous instruction can be counted towards this requirement only if approved by the Director of Graduate Studies.
7. Comprehensive Exams: Students must take the comprehensive exams in two major fields by the end of their second year in the program. Students are expected to have passed these examinations by the end of their second year.
8. Second-year Research Paper: Prior to being advanced to candidacy, each student must produce a research paper (field paper) demonstrating the capacity to produce research at a level expected of students preparing to write a high quality Ph.D. dissertation. The second-year research paper is given considerable weight as the faculty consider an application for candidacy. Students are advised to begin work on their second-year research papers in the summer between their first and second years in the program, and to submit a first draft to their advisers sometime in the Autumn Quarter of their second year. Second-year research papers are considered incomplete until approved by the two faculty readers. Students are expected to have submitted an approved field paper by the end of their second year.
9. Advancement to candidacy In accordance with University guidelines, Ph.D. students are expected to advance to candidacy by the end of their sixth quarter in the program (i.e., by the end of their Spring Quarter in their second year in the program). It is the department's practice that all students in their sixth quarter be considered for candidacy at a special meeting of the faculty (typically in Week 10 of Spring Quarter). All the requirements for advancing to candidacy listed below must be completed by this meeting. Should a student not be advanced to candidacy by the end of the sixth quarter, the student is at risk of being dismissed from the Ph.D. program. To be eligible for advancement to candidacy, students must complete the requirements listed below.
  - a. two major fields
  - b. a third minor field
  - c. the political theory requirement
  - d. the quantitative methods requirement
  - e. the second-year research paper
  - f. Advancement to candidacy is not automatic upon completion of these requirements. Advancement to candidacy is an expression by the faculty of their confidence that the student can successfully complete the Ph.D. program, and in particular, complete a doctoral dissertation that is an original contribution to scholarship that exemplifies the highest standard of the discipline.
10. Dissertation Prospectus: During the third year, a formal dissertation prospectus must be submitted to and approved by the student's dissertation adviser and the Director of Graduate Studies. The dissertation prospectus must be approved by the end of the third year. Students must also make a dissertation prospectus presentation in the third year.
11. TA Requirement: A candidate for the Ph.D. in Political Science is required to serve as a teaching assistant (TA) in the department for a minimum of three quarters. Many students need to TA for up to five quarters as part of their funding package.
12. Oral Examination: The candidate must pass the University oral examination on the area of the dissertation at a time, after the passing of the written comprehensive examinations, suggested by the candidate's dissertation committee.
13. Dissertation: The candidate must complete a dissertation satisfactory to the dissertation reading committee.
14. Adequate Progress In addition to the specific program requirements listed above, at each stage of the Ph.D. program, the department has the following minimum standards for adequate academic progress:
  - Except in rare circumstances, no more than two of the following on the transcript at any given time: incomplete ('I'); grade not reported ('GNR'); not passed or no credit ('NP' or 'NC'); or withdraw ('W').
  - Adequate grades in all courses taken each term ('B-' and below are regarded as inadequate).
  - Graduate students in the first year must enroll for at least 15 units and must pass at least 8 units per term by the end of the term. Graduate students in years 2, 3 and 4 must register for at least 8 units and must pass at least 6 units by the end of each term.
  - Advance to candidacy by close of sixth quarter (i.e., for most students, the end of their second academic year in the Ph.D. program);
  - Dissertation prospectus presentation made and approval of dissertation prospectus on file by the end of the third year.
  - Dissertation reading committee formed by end of the fourth year.
  - Advance to TGR status by end of the fourth year.
  - Substantial progress toward completion of the dissertation in fourth and fifth years.

## Ph.D. Minor in Political Science

Candidates in other departments which accept a minor in Political Science select two concentrations in political science in consultation with the Director of Graduate Studies and submit to her or him a program of study for approval. Written approval for the program must be obtained from the Director of Graduate Studies before application for doctoral candidacy. Students are required to complete at least 20 units in Political Science courses. Courses must be 300 level and above. Grades must be a GPA of 3.0 (B) or better.

*Emeriti:* (Professors) David B. Abernethy, Lucius J. Barker, Richard A. Brody, Joshua Cohen, David Danielski, Charles Drekmeier, Richard R. Fagen, John A. Ferejohn, John W. Lewis, John Manley, James March, Hubert R. Marshall, Daniel Okimoto, Robert A. Packenham, Philippe Schmitter, Hans N. Weiler

## Overseas Studies Courses in Political Science

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

## Psychology

Courses offered by the Department of Psychology are listed under the subject code PSYCH on the Stanford Bulletin's ExploreCourses web site.

The department, housed in Jordan Hall, maintains many computer-equipped laboratories and the Stanford Center for Cognitive and Neurobiological Imaging (CNI). Bing Nursery School, located on campus at 850 Escondido Road, provides a laboratory for child observation, training in nursery school teaching, and research. It was constructed with funding from the National Science Foundation and a special grant from Mrs. Anna Bing Arnold and Dr. Peter Bing.

The department provides

- courses designed for the general student
- a major program leading to the degree of Bachelor of Arts, including options for honors and a specialization in one of four content area tracks
- an undergraduate minor program
- a coterminal master's degree program leading to the degree of Master of Arts
- programs of graduate study and research leading to the degree of Doctor of Philosophy
- a Ph.D. minor

Applications are not accepted for the master's degree except as noted below.

## Mission of the Undergraduate Program in Psychology

The mission of the undergraduate program in Psychology is to introduce students to the theories and empirical studies of human behavior. This includes the study of aging, achievement, child development, cognitive processes, conflict, culture, decision making, emotion, group behavior, health, identity, infancy, language, learning and memory, morality, motivation, personality, psychopathology, race, self, social perception, visual perception, and other related topics. The major provides students

with knowledge and skills relevant to professional careers in technology, business, counseling, education, public policy, law, and medicine, as well as graduate studies in Psychology.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of core knowledge within the discipline of psychology including relevant theory and research.
2. the ability to analyze a problem correctly using discipline specific methodology.
3. the ability to draw sound inferences and conclusions from data.
4. the ability to write and communicate ideas clearly.

## Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Psychology and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Psychology. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Psychology and to disseminate this knowledge.

## Bachelor of Arts in Psychology

### Major Requirements

Students declaring a major in Psychology must complete a minimum of 70 units of course work in Psychology, 60 of which must be taken in the Psychology department. The remaining 10 units can be taken outside of the Psychology department but must be pre-approved by the student services office or faculty adviser. These courses should represent a coherent thematic focus. One way to achieve this focus is through a field of study. Courses taken to satisfy the 70-unit requirement must be taken for a grade of C- or better (except for courses offered only on a satisfactory/no credit basis). Majors must take PSYCH 1 Introduction to Psychology, and PSYCH 10 Introduction to Statistical Methods: Precalculus. Advanced placement (AP) credit may no longer be used toward the Psychology major requirements. Beyond these two required courses, students must complete at least five of the following eleven core Psychology courses, with a minimum of two from each area A and B:

Area A		Units
PSYCH 30	Introduction to Perception	3
PSYCH 35	Minds and Machines	4
PSYCH 45	Introduction to Learning and Memory	3
PSYCH 50	Introduction to Cognitive Neuroscience	4
Area B		Units
PSYCH 60	Introduction to Developmental Psychology	4
PSYCH 70	Introduction to Social Psychology	4
PSYCH 75	Introduction to Cultural Psychology	5
PSYCH 80	Introduction to Personality and Affective Science	3
PSYCH 90	Introduction to Clinical Psychology	3
PSYCH 95	Introduction to Abnormal Psychology	3

Students must take one Writing in the Major (WIM) course in Psychology, and should check the Stanford Bulletin yearly as these courses may change. The department also strongly recommends that all majors take at least one advanced seminar.

Students may count up to 10 units of research, independent study, and practica (including but not limited to PSYCH 194 Reading and Special Work, PSYCH 195 Special Laboratory Projects, PSYCH 281 Practicum in Teaching) toward the Psychology major. Students who are teaching assistants for a Psychology course or are enrolled in the senior honors program are allowed up to 15 units in independent study and research. Any units beyond the limit of 10 or 15 may be counted toward the 180 units required for graduation.

Students who are double majoring or completing a minor degree in another department may not overlap (double-count) courses, unless the overlapping courses constitute introductory skill requirements, such as PSYCH 10 Introduction to Statistical Methods: Precalculus. In this instance, while the course requirement would be satisfied, the units for the course can only be applied to one program of study, not both. Consult the student services office for further clarification.

Summer Quarter Psychology courses are not equivalent to courses given during the regular academic year and, while applicable toward the 70 units needed for the major, may not be used to fulfill core course requirements. Therefore, PSYCH 1, PSYCH 10, and the Area A and B courses cannot be taken during Summer Quarter to fulfill the major requirements. Additionally, a course taken during the Summer Quarter cannot be used to replace the grade of a non-Summer Quarter course, even if the title and units of the two courses are the same.

### Beyond the Minimal Requirements

The following recommendations may be helpful to students who wish to plan a program that goes beyond the minimal requirements listed above:

1. Within the general major, the student may take advanced undergraduate or graduate courses (although some require the consent of the instructor), including seminars. The student may also take advantage of widespread opportunities for directed research, working closely with individual faculty and graduate students.
2. The student may apply to the senior honors program, described below.
3. The student may elect to pursue one of four specialization tracks of study: Cognitive Sciences; Health and Development; Mind, Culture, and Society; or Neuroscience, described below.

The training obtained from the pursuit of any of these options is valuable not only for students considering graduate work in Psychology, but also for those thinking of professional careers outside of Psychology in fields such as technology, business, counseling, education, law, public policy or medicine.

### Credit from Outside the Department

Psychology majors must complete at least 60 units of course work toward their major at Stanford within the Psychology department. Psychology majors may count no more than a total of 10 units credit from outside the department toward the major. Both majors and minors, under extenuating circumstances, may use one course from outside the department to fulfill core course requirements. Additional courses may be used to fulfill the 70-unit major requirement, but may not be counted as core courses. Please see the student services office for further clarification.

Petition for transfer of credit is rarely granted. In cases where petitioning is necessary, there are two types of credit from outside the department: external transfer credit for courses taken at institutions other than Stanford and credit for courses in other Stanford departments. A student must have already declared Psychology as a major or minor in order

to submit a petition for transfer credit. Stanford credit for courses completed at other institutions must have been granted by the External Credit Evaluation section of the Registrar's Office; those units may be applied toward the 180 units required for graduation. To have credit from outside the department evaluated to fulfill requirements toward the Psychology major or minor, students must complete an Undergraduate Petition form, available from the student services office, and submit it with a course syllabus. Students requesting external transfer credit must also submit a copy of the signed transcript from the External Credit Evaluation section of the Registrar's Office showing the number of Stanford units granted for the course. The Psychology department then evaluates external credit courses and courses from other Stanford departments to determine if they can be applied toward Psychology major or minor requirements.

## Specialization Tracks

Students in the major program, including those in the senior honors program, may elect to specialize in one of four specialization tracks:

- Cognitive Sciences
- Health and Development
- Mind, Culture, and Society
- Neuroscience

These tracks consist of a coherent set of courses leading to advanced undergraduate or even graduate-level courses in an area. In the ideal case, the student who specializes would acquire an understanding of a range of psychological processes, as well as an appreciation of the significance of these processes in the chosen area of application. Specialization in one of the tracks can facilitate preparation for a professional career as well as for graduate work in Psychology.

Participation in a specialization track is optional, although students who do not wish to complete all the requirements for a track may still want to use the track as a guideline for an integrated program in Psychology. Students who choose to complete a specialization track must meet the requirements for the major plus the additional requirements designated for the track. Typically, the courses required for a track include one or two required courses, four to six recommended courses in Psychology, one or two advanced seminars, and three or four courses in related disciplines. Psychology courses completed for the track count toward satisfying the major requirements. Courses from other departments listed for the track may count toward the 10 outside units for the major requirement, but must be pre-approved by the student services office or faculty adviser.

These specialization tracks are declared on Axxess upon approval of faculty adviser. They appear on the transcript but not on the diploma.

## Honors Program

The senior honors program is designed for exceptionally able Psychology majors who wish to pursue a year of intensive supervised independent research. Admission to the program is made at the end of the student's junior year on the basis of:

- excellent academic performance
- previous research experience
- two letters of recommendation by faculty and/or graduate students

Applications are available in April and are to be submitted to the department's student services office with a current transcript and recommendations prior to the student's senior year.

Students interested in the program should involve themselves in research as early as possible and should acquire a broad general background in Psychology, including statistics, and a deep background in their chosen area. Typically, students work in their honor thesis adviser's lab for at least one quarter. The honors program is particularly appropriate for

students planning to go to graduate school in Psychology or in other social sciences, as well as in computer science, business, counseling education, law, public policy and medicine.

During Autumn Quarter of their senior year, honors program students participate in a weekly seminar and meet with their advisers to develop their experimental program and begin data collection. Winter and Spring Quarters are devoted to completing the research, analyzing the data, and writing the thesis, which is submitted mid-May. Students give oral presentations of their projects at the annual Honors Convention. This convention is attended by undergraduates, graduate students, and faculty.

## Minor in Psychology

### Declaration

Students who wish to declare a minor field of concentration in Psychology must do so no later than the deadline for their application to graduate.

### Degree Requirements

Completion of a minimum of 35 units in Psychology is required for the minor, including PSYCH 1 Introduction to Psychology and PSYCH 10 Introduction to Statistical Methods: Precalculus, or a comparable statistics course. Advanced placement (AP) credit may no longer be used towards the Psychology minor.

The minor must include three of eleven core courses with a minimum of one from each of two areas and elective Psychology courses of at least three units each, totaling 35 units:

#### Units

#### Area A

Select a minimum of one of the following:

PSYCH 30	Introduction to Perception
PSYCH 35	Minds and Machines
PSYCH 45	Introduction to Learning and Memory
PSYCH 50	Introduction to Cognitive Neuroscience

#### Area B

Select a minimum of one of the following:

PSYCH 60	Introduction to Developmental Psychology
PSYCH 70	Introduction to Social Psychology
PSYCH 75	Introduction to Cultural Psychology
PSYCH 80	Introduction to Personality and Affective Science
PSYCH 90	Introduction to Clinical Psychology
PSYCH 95	Introduction to Abnormal Psychology

#### Elective Psychology Courses

Students who declared a Psychology minor prior to the 2002-03 academic year may choose any three of the eleven core courses.

Students who declared a Psychology minor prior to the 2005-06 academic year may choose to complete seven total courses:

		Units
PSYCH 1	Introduction to Psychology	5
PSYCH 10	Introduction to Statistical Methods: Precalculus	5
Three core courses		
Two elective courses		

Independent study, research, and practica cannot be counted toward the minor. Summer Quarter Psychology courses are not applicable toward the 35 units needed for the minor.

All courses used to fulfill the requirements of the minor must be passed with a grade of C- or better, except for courses offered only on a satisfactory/no credit basis. No more than 10 units of transfer credit may be counted toward the Psychology minor.

## Master of Arts in Psychology

The Department of Psychology offers a Master of Arts degree only to students concurrently enrolled in other Stanford programs.

A Master of Arts degree is available to students enrolled in the Department's Ph.D. program. For such students, the requirements of the M.A. degree are listed in the "Doctoral" tab of this section.

A separate program called the Coterminal Master's Program (described below) is available to Stanford undergraduates. The Psychology department has decided to terminate the coterminal program. 2015-16 is the final year the department will accept applications and admit coterminal students to the MA in Psychology.

In exceptional cases, students concurrently enrolled in another doctoral or professional program at Stanford may also apply for the M.A. degree. In such cases, the applicable admissions and degree requirements are determined on a case by case basis. Such applicants should consult with the student services office in the Department of Psychology.

All applicants must satisfy University residency requirements for the degree and are responsible for consulting with their primary departments or the Financial Aid Office about the effects of the proposed program on their current funding. General University requirements for the master's degree are described in the "Graduate Degrees (p. 45)" section of this bulletin.

## Coterminal Master's Program

*The Psychology department has decided to terminate the coterminal program. 2015-16 is the final year the department will accept applications and admit coterminal students to the MA in Psychology.*

Stanford undergraduates who would like advanced training in Psychology may apply for a coterminal M.A. degree in Psychology. Applicants are required to submit the following documents with a coterminal program application, to the Student Services office by the application deadline:

1. a statement of purpose
2. a preliminary program plan specifying the courses in which they intend to enroll to fulfill degree requirements
3. at least two letters of recommendation from Stanford faculty members familiar with their academic work
4. a current Stanford undergraduate transcript
5. a written nomination by a member of the Psychology faculty who has agreed to serve as the student's master's degree adviser

This program is limited in size and admission is selective. Applicants must have earned a minimum of 120 units towards graduation as shown on the undergraduate transcript. The department's deadline for the submission of an application to the coterminal program is January 29, 2016.

Admission to the coterminal program may not be deferred. Students must start in the quarter (usually Autumn Quarter) for which they are admitted.

Students in the Coterminal program may be terminated if they no longer have an adviser, or if they are not making satisfactory progress in course work or research.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University

requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

### Degree Requirements for a Coterminal Master's Degree

*Course work:* For the coterminal master's degree, students must complete at least 45 units of Psychology courses, none of which may duplicate courses taken for the undergraduate degree, and none of which may be courses taken in the Summer Quarter. Courses to be counted toward the master's degree must be passed with a grade of B- or better, unless the course is offered only on a satisfactory/no credit basis.

Of these 45 required units, at least 27 must be in Psychology courses numbered 200 or above. Units from research, teaching, practica, independent study, and lab courses may not be counted toward these 27 units, but may be counted as part of the remaining 18 required units. Examples of such course that may not be counted toward these 27 units include:

		Units
PSYCH 246	Cognitive and Neuroscience Friday Seminar	1
PSYCH 258	Graduate Seminar in Social Psychology Research	1-3
PSYCH 269	Graduate Seminar in Affective Science	1
PSYCH 275	Graduate Research	1-15
PSYCH 281	Practicum in Teaching	1-5
PSYCH 282	Practicum in Teaching PSYCH 1	1-2
PSYCH 297	Seminar for Coterminal Master of Arts	1-2

Included in the 27 units of graduate-level courses must be at least one 3-unit course from each of Area A (cognitive science and neuroscience) and Area B (affective, developmental, and social psychology), and at least one upper division statistics course that has been approved by the student's adviser. The specific courses in Area A and Area B available to coterminal master students vary from year to year, and prospective students should consult with the department's Student Services Office for up-to-date information on courses available and their assignment to Area A and Area B.

*Research:* Demonstration of competence in the design and execution of psychological research is also required for receipt of the master's degree. This demonstration entails completion of a master's thesis containing original research. If the student is currently writing a senior honors thesis, this honors thesis may be accepted as proof of research competence, provided the honors thesis is judged to be master's level research by the student's adviser and the department's graduate program committee. If the student has completed an honors thesis in Psychology in the prior year, the student would be expected to continue independent research

during the coterminal year and to submit this research in a written report that, together with the completed honors thesis, would constitute the master's thesis. All students are required to make an oral presentation of their research during the Spring Quarter, and to present their thesis or written report at the end of that Quarter.

## Doctor of Philosophy in Psychology

There are no specific course requirements for admission to the doctoral program. However, an applicant should have research experience as an undergraduate, as well as the equivalent of an undergraduate major in Psychology. The major focus of the doctoral program is on research training, and admission is highly selective.

Applicants for admission must submit their scores on the general Graduate Record Examination as part of the application. GRE subject scores are recommended.

General University requirements for the Ph.D. are described in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

In addition to fulfilling Stanford University requirements for the degree, the following departmental requirements are stipulated.

### First-Year Course Requirements

During the first year of graduate study, the student must take PSYCH 207 Professional Seminar for First-Year Ph.D. Graduate Students, at least one approved graduate statistics course, and at least two core courses from the following list:

		Units
PSYCH 202	Cognitive Neuroscience	3
PSYCH 205	Foundations of Cognition	1-3
PSYCH 211	Developmental Psychology	1-3
PSYCH 212 or PSYCH 215	Social Psychology Mind, Culture, and Society	1-3
PSYCH 213	Affective Science	3

Students in each area may be required to take up to two additional non-core graduate courses in their area of specialization.

The student is expected to spend at least half of the time in research from the beginning of the first year of graduate study to the completion of the Ph.D., taking no more than 10 units of course work each quarter. At the end of the first year of graduate study, the student must file with the department a written report of the first-year research activities.

### Second-Year Course Requirements

By the end of the second year of graduate study, the student should complete the core courses listed above and take a second approved graduate course in statistics.

*Optional Application for Conferral of the M. A. Degree:* Graduate students, who have complete (a) the first-year and second-year course requirements, and (b) at least 45 units of Psychology courses, may apply for conferral of the M.A. degree. This application should be discussed with the Student Services office in the Department of Psychology.

### Third-Year and Beyond

Students are expected to form a research committee, which must include the dissertation reading committee, before the initiation of the dissertation research. The research committee includes the dissertation adviser and consists of at least three faculty members, at least two of whom should have primary appointments in the Psychology department. For University guidelines for the composition of the dissertation reading

committee, see the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

The research committee should meet no later than the last day of classes of Spring Quarter of the third year, and determines the timeline for further development of the dissertation research project. Subsequent meetings are triggered by the completion of one of two documents: a dissertation proposal (DP) or a conceptual analysis of the dissertation area (CADA). The timing and sequencing of the DP and CADA are developed by the student in consultation with the committee. As a general guide, one of the two preliminary elements (CADA or DP) should be completed by the end of the third Summer Quarter and the second should be completed by the end of the fourth Spring Quarter. Students are free to alter the membership of the committee at any time during the process, subject to consultation with the adviser.

The DP should be a description of the proposed research. The CADA provides a framework for the research topic of the dissertation, addresses the central issues within the specialty area, and reviews the pertinent literature.

### Advanced Course or Minor Requirements

The candidate must complete 12 units of advanced graduate course work or a Ph.D. minor in another department. If a student waives the minor requirement in favor of the 12 advanced units, the student must fulfill the advanced course requirement by taking (a) non-core graduate courses required by a particular area, or (b) graduate-level courses in other departments comparable in quality to Psychology's graduate courses. If there is any question about comparability, the student should consult the adviser, student services, and, in some cases, the graduate program committee chair before taking the course.

### Orals

The candidate must pass the University oral examination, which also serves as a dissertation defense. A committee is formed to review the oral examination, including the dissertation reading committee, an additional faculty member, and one oral examination committee chair from outside the Psychology department. The oral examination consists of a 40-45-minute presentation to the department of the completed dissertation research. Parents and friends are welcome to attend. Following the presentation, the student and the committee convene for a discussion of the dissertation and the presentation.

### Dissertation Requirements

The candidate must complete a dissertation satisfactory to the dissertation reading committee prior to the oral examination. Minor revisions to formatting may be made after the oral examination.

Ph.D. candidacy expires five years after admission to candidacy at the end of the second year of study. Reapplication requires department reexamination.

### Student Evaluations

*First-Year Evaluation:* It is the department's policy to evaluate the progress of each graduate student at the end of the first year of graduate study. As part of the procedure, each student is required to file with the department a report of the first-year research activities.

Students should discuss this report and the evaluation procedures with their adviser as early as possible in their first year. If the student fulfills the academic promise displayed upon entrance, he or she is invited to continue working towards the doctorate.

The first-year evaluation is primarily based on three factors:

1. quality of research carried out in the first year
2. performance in courses (especially required courses)

3. recommendations of the adviser (including a commitment on the part of that adviser to continue in that role).

*Second-Year and Beyond Evaluation:* A similar evaluation is conducted at the end of each year of graduate training involving the same criteria as the first year; however, the student is not required to submit a paper. Students who are not making satisfactory progress may be dropped from the program.

## The Doctoral Training Program

As indicated by the requirements described above, a student concentrates in any one of several areas within Psychology. Regardless of area, however, the training program places emphasis on the development of research competence, and students are encouraged to develop those skills and attitudes that are appropriate to a career of continuing research productivity.

Two kinds of experience are necessary for this purpose. One is the learning of substantial amounts of technical information. A number of courses and seminars are provided to assist in this learning, and a student is expected to work out a program, with his or her adviser, to attain this knowledge in the most stimulating and economical fashion.

A second aspect of training is one that cannot be gained from the courses or seminars. This is firsthand knowledge of, and practical experience with, the methods of psychological investigation and study. These methods include ways of behaving with the subjects being studied. Students are provided with whatever opportunities they need to reach those levels of competence representative of doctoral standing. Continuing research programs, sponsored by members of the faculty, offer direct opportunities for experience in fields represented by the faculty's many research interests.

Each student achieves competence in unique ways and at different rates. Each student and adviser share in planning a program leading to the objectives discussed. The student is expected to spend half of his or her time on research and takes no more than 10 units of course work per quarter. For further information please contact the student services office and the department graduate guide.

## Teaching Requirement

The department views experience in supervised teaching as an integral part of its graduate program. Regardless of the source of financial support, all students serve as teaching assistants for at least five Psychology courses during their graduate study. Of these five teaching occasions, two must involve PSYCH 1, or a Statistics course (i.e., PSYCH 10, PSYCH 252, PSYCH 253, and PSYCH 254).

PSYCH 1	Introduction to Psychology	5
or PSYCH 10	Introduction to Statistical Methods: Precalculus	
PSYCH 252	Statistical Methods for Behavioral and Social Sciences	1-6
or PSYCH 253	Statistical Theory, Models, and Methodology	
or PSYCH 254	Lab in Experimental Methods	

Students are discouraged from participating in teaching during the first year of graduate study. However, all first and second year students are strongly encouraged to attend a one-day TA Training Workshop offered in September before the autumn quarter. Students typically progress from closely supervised teaching to more independent work. Some students may be invited to offer a supervised, but essentially independent, seminar during their final year of graduate study.

## Psychology Colloquium

The Psychology Colloquium meets on most Wednesday afternoons at 3:45 p.m. Speakers from Stanford and other institutions present topics

of current interest. Graduate students are expected to attend. Additional announcements may be found at the Colloquium Schedule (<http://www.stanford.edu/dept/psychology/colloquium>) web site.

## Ph.D. Minor in Psychology

Candidates for the Ph.D. degree in other departments may elect a minor in Psychology. To obtain a minor, the student must complete 20 units of course work at the graduate level in the Department of Psychology, excluding PSYCH 275 Graduate Research. Crosslisted graduate courses can be used to satisfy this requirement. All courses counting toward the Ph.D. minor must be passed with a grade of 'B-' or better, unless the course is offered only on a credit/no credit basis.

*Emeriti: (Professors)* Nalini Ambady, Albert Bandura, Gordon H. Bower, John H. Flavell, Leonard M. Horowitz, Mark R. Lepper, Eleanor Maccoby, Karl Pribram, Roger N. Shepard, Claude M. Steele, Barbara Tversky, Philip G. Zimbardo

*Chair:* Ian H. Gotlib

*Professors:* Laura L. Carstensen, Herbert H. Clark, Geoffrey Cohen, Carol Dweck, Ian H. Gotlib, James J. Gross, Stephen Kosslyn, John D. Krumboltz, Ellen M. Markman, Hazel R. Markus, James L. McClelland, Dale Miller, Benoit Monin, Russell A. Poldrack, Lee D. Ross, Ewart A. C. Thomas, Anthony D. Wagner, Brian Wandell, Jeffrey J. Wine

*Professor (Research):* Anthony Norcia

*Associate Professors:* Jennifer L. Eberhardt, Anne Fernald, Michael C. Frank, Kalanit Grill-Spector, Brian Knutson, Jeanne L. Tsai, Gregory M. Walton

*Associate Professor (Teaching):* Catherine Heaney

*Assistant Professors:* Alia Crum, Justin Gardner, Noah Goodman, Hyowon Gweon, Jamil Zaki

*Lecturers:* Amie Haas, Beverley Hartman, Jennifer Winters

*Courtesy Professors:* William C. Dement, Gary H. Glover, Jon Krosnick, Fei-Fei Li, Tanya Luhmann, Robert MacCoun, William T. Newsome, Robb Willer

## Public Policy

Courses offered by the Public Policy Program are listed under the subject code PUBLPOL on the Stanford Bulletin's ExploreCourses website.

The Public Policy program offers a Bachelor of Arts, an honors program, a minor for undergraduates, a coterminal M.A. in Public Policy, a two-year professional Master of Public Policy (M.P.P.) degree, and a one-year non-professional Master of Arts in Public Policy (M.A.).

Admission to the M.P.P. and M.A. programs is restricted to current Stanford undergraduates and graduate students, recent (class of 2009 to current) Stanford alumni, and external applicants seeking a joint degree.

## Mission of the Undergraduate Program in Public Policy

The mission of the undergraduate program in Public Policy is to provide students with the concepts and tools used in evaluating policy options and outcomes, and to prepare students for entry-level positions in organizations concerned with such analysis. The focus is chiefly on issues such as health, education, environmental, regulation, and science and technology policy, applicable anywhere in the world.

Courses in the major provide students with a background in economics and quantitative methods, political science, law, philosophy, ethics,

organizational behavior, and social psychology. Economics and quantitative analyses are central to but not sufficient for modern public policy analysis; political science, law, philosophy, organizational behavior, and psychology are among other necessary disciplinary perspectives. Political science offers insights to the decision-making process and information needs of a democracy. Political philosophy and ethics form the foundations of public policy. Organizational behavior focuses on the decisions made outside the market environment in hierarchies, bureaucracies, and teams. Nearly all public policy is formulated as law, and economic analysis of legal rules and institutions is key to effective implementation of policy decisions.

Seniors have a research capstone requirement consisting either of an honors thesis or participation in a team practicum project, conducting applied policy research for an outside client, typically a nonprofit or government agency. Students majoring in Public Policy are prepared for careers in a wide variety of fields, including elected or appointed public office; business, law, and governmental agencies; research institutes; or for further study in graduate programs.

## Learning Outcomes (Undergraduate)

The Public Policy Program expects its undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the program. Students are expected to:

1. Demonstrate knowledge and understanding of public policy analytical tools.
2. Communicate complex ideas clearly and persuasively in written and oral forms.
3. Evaluate applied theoretical and empirical work in policy-relevant research.
4. Apply skills and knowledge acquired in the curriculum to analyze policy issues and make policy recommendations.
5. Demonstrate mastery of the above outcomes in the senior capstone project.

## Mission of the Graduate Program in Public Policy

The mission of the graduate program in Public Policy is to provide students with the advanced skills necessary to assess the performance of alternative approaches to policy making and implementation, evaluate program effectiveness, understand the political constraints faced by policy-makers, and appreciate the conflicts in fundamental human values that often animate policy debate. After completing the graduate core curriculum, students apply these skills by focusing their studies in a two-quarter, 10-unit practicum for the M.P.P. degree or a 5-unit master's thesis for the M.A. degree. Each student in the M.P.P. program also completes at least one concentration tailored to the student's primary degree program or the student's interests and skills. Current concentrations include:

- Education Policy
- Health Care Policy
- International and National Security Policy
- Legal and Regulatory Intervention
- Political and Moral Philosophy
- Resources, Environment, and Energy Policy
- Science and Technology Policy
- Self-designed
- Urban and Regional Policy

### The graduate program in Public Policy offers two master's degrees:

- Master of Public Policy (M.P.P.), a two-year professional degree program; available to current Stanford students and recent Stanford alumni
- Master of Arts (M.A.), a one-year program, not intended as a professional degree; available to current Stanford students

### The following joint degree programs, which permit students to complete requirements for two degrees with a reduced number of total residency units, are also offered:

- Juris Doctor with a Master of Public Policy (J.D./M.P.P.)
- Juris Doctor with an M.A. in Public Policy (J.D./M.A.)
- Doctor of Medicine with a Master of Public Policy (M.D./M.P.P.)
- Doctor of Philosophy in Economics, Education, Management Science and Engineering, Psychology, Sociology or Structural Biology with a Master of Public Policy (Ph.D./M.P.P.)
- Master of Business Administration with a Master of Public Policy (M.B.A./M.P.P.)
- Master of Arts in Education (Policy, Organization, and Leadership subplan) with a Master of Public Policy (M.A./M.P.P.)
- Master of Arts in International Policy Studies with a Master of Public Policy (M.A./M.P.P.)
- Master of Science in Management Science and Engineering with a Master of Public Policy (M.S./M.P.P.)

Requirements for the joint degrees differ from the requirements of completing the two degrees separately. See the "Master's Degrees in Public Policy (<http://www.stanford.edu/dept/registrar/bulletin/69277.htm>)" section for more details.

University requirements for the master's degree are described in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this Bulletin.

## Learning Outcomes (Graduate)

The purpose of the master's program is to develop knowledge and skills in public policy and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The M.P.P. or M.A. degree is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in public policy. Through completion of advanced course work and rigorous skills training, the graduate program prepares students to make original contributions to the knowledge of public policy and to interpret and present the results of such research.

## Bachelor of Arts in Public Policy

The Public Policy undergraduate major develops the skills necessary for understanding the political constraints faced by policy makers, assessing the performance of alternative approaches to policy implementation, evaluating the effectiveness of policies, and appreciating the sharp conflicts in fundamental human values that often animate the policy debate.

There are four course elements to the major: preparatory, core, concentration, and senior capstone. Freshman and sophomore years are generally devoted to completing preparatory courses offered in economics, math, and psychology. After completing core courses during the junior year, students apply these skills by focusing their studies in one of several areas of concentration. The areas of concentration address a specific field of public policy, various types of institutions, or a deeper development of the tools of policy analysis. Seniors may complete

the senior capstone either by participating in a practicum, a team policy research project for an outside client and/or by writing an honors thesis.

Completion of the Bachelor of Arts degree in Public Policy requires a minimum of 77 units of course work.

Students must complete the Public Policy core, concentration, and the senior capstone requirement for a letter grade and with an overall grade point average of 2.3 (C+) or higher.

Public Policy students are encouraged to secure a faculty adviser within the first two quarters in the major, and must secure a faculty adviser no later than the end of Winter Quarter of the junior year. The director, student services staff, and peer advisers can assist by suggesting suitable faculty advisers. Advisers must be approved by the program director. The adviser need not be affiliated with the Public Policy program, but does need to be a member of Stanford's Academic Council.

The Public Policy program encourages students to attend the Bing Stanford in Washington Program (<http://bsiw.stanford.edu>) and to participate in appropriate Stanford internship programs, especially those available through the Haas Center for Public Service (<http://haas.stanford.edu>) and Stanford in Government (<http://sig.stanford.edu>).

### Preparatory Courses (34 units)

		Units
ECON 1	Principles of Economics	5
ECON 50	Economic Analysis I (must be taken for a letter grade)	5
ECON 51	Economic Analysis II (must be taken for a letter grade)	5
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	5
ECON 102B	Applied Econometrics	5
MATH 51	Linear Algebra and Differential Calculus of Several Variables (must be taken for a letter grade)	5
Select one of the following:		4
MS&E 180	Organizations: Theory and Management	
PSYCH 70	Introduction to Social Psychology	
PSYCH 138	Wise Interventions	

A maximum of 10 units of preparatory course work, with the exception of MATH 51 Linear Algebra and Differential Calculus of Several Variables, ECON 50 Economic Analysis I, and ECON 51 Economic Analysis II, may be taken as credit/no credit.

### Core Courses (23-25 units)

All core courses must be completed for a letter grade. Variable unit courses must be taken for 5 units.

		Units
PUBLPOL 101	Politics and Public Policy	5
PUBLPOL 103C	Justice	5
	or PUBLPOL 13 Ethics On the Edge: Business, Non-Profit Organizations, Government, and Individuals	
PUBLPOL 103E	Ethics on the Edge Public Policy Core Seminar (students who take 134 must also take 103E)	
PUBLPOL 104	Economic Policy Analysis	5
Select one of the following WIM courses:		5
PUBLPOL 106	Law and Economics	
PUBLPOL 154	Politics and Policy in California	
PUBLPOL 156	Health Care Policy and Reform	
Select one of the following advanced empirical methods courses:		3-5
ECON 102C	Advanced Topics in Econometrics	

PUBLPOL 105 Empirical Methods in Public Policy (preferred course)

PUBLPOL 303D Applied Econometrics for Public Policy

STATS 202 Data Mining and Analysis

### Concentration (15 units)

Majors must complete at least 15 units of course work for a letter grade in an area of concentration. This post-core course work must be approved by the student's faculty adviser and the program director no later than the end of Spring Quarter of the junior year. Any subsequent changes made to a student's concentration must be approved by the student's faculty adviser. Students select their concentration in Axxess as a degree subplan. Subplans are printed on transcripts. Areas of concentration include, but are not limited to:

- Advanced Policy Analysis
- Design of Public Institutions
- Development and Growth Policies
- Discrimination, Crime, and Poverty Policy
- Education Policy
- Healthcare Policy
- International and National Security Policy
- Law and the Legal System
- Political and Moral Philosophy
- Resources, Environment, and Energy Policy
- Science and Technology Policy
- Urban and Regional Policy

### Capstone Research Requirement

Seniors are required to demonstrate competency in applied policy research. This requirement is fulfilled either by participating in a practicum project in which small student teams analyze real world policy problems faced by a government or nonprofit organization and produce a report for use by the client or by writing an honors thesis. A seminar for honors students is offered Autumn Quarter (PUBLPOL 200H Senior Honors Seminar, 3 units). The Practicum is offered Autumn, Winter and Spring quarters (PUBLPOL 200A Senior Practicum, 5 units; PUBLPOL 200B Senior Practicum, 5 units; and PUBLPOL 200C Senior Practicum, 5 units). The capstone research requirement must be completed for a letter grade.

### Honors Program

The Public Policy Program offers students the opportunity to pursue honors work during the senior year. The honors thesis must address a policy issue and demonstrate mastery of relevant analytical tools.

### Eligibility and Preparation

In order to be eligible to write an honors thesis, students must achieve a grade point average (GPA) of 3.5 or above in the Public Policy core courses and concentration courses taken by the time of application for the honors program. If accepted, the student must maintain a GPA of 3.5 in the course requirements for a B.A.H. in Public Policy (Public Policy core courses, concentration courses, PUBLPOL 200H Senior Honors Seminar and PUBLPOL 199 Senior Research). Please note that courses not taken at Stanford are not included in calculating the GPA.

Students who intend to pursue honors work should plan their academic schedules so that most of the core courses are completed before the beginning of the senior year, and all of the core and concentration courses are completed by the end of Winter Quarter of senior year. It is strongly encouraged that students pursuing honors work complete their advanced empirical methods course by the end of Spring Quarter of the junior year. All students pursuing honors are required to take PUBLPOL 200H Senior Honors Seminar during Autumn Quarter of

their senior year. This scheduling gives students both the time and the necessary course background to complete their honors thesis during senior year. In addition, prospective honors students are encouraged to attend Bing Honors College and enroll in the PUBLPOL 197 Junior Honors Seminar. This course focuses on developing a research plan and learning the skills necessary to complete an honors thesis.

## Application Process

A student must submit a completed application to the Public Policy Program office with a brief description of the thesis no later than October 9, 2015. Honors applications are found online (<https://publicpolicy.stanford.edu/academics/undergraduate/forms>). Prior to submitting an application to the honors program, the student must meet with the director of the honors program and obtain the sponsorship of a faculty member who approves the thesis description and agrees to serve as a thesis adviser. Students intending to write a thesis involving more than one discipline may wish to have two advisers, at least one of whom is affiliated with the Public Policy Program. Staff, executive committee members, lecturers, and affiliated faculty in Public Policy are available to provide assistance in selecting a thesis topic and adviser. At least one of the faculty advisers must be a member of Stanford's Academic Council. A student's proposal must be approved by the thesis adviser and the director of the honors program.

## Enrollment and Milestones

During senior year, the student must enroll in at least 8 but no more than 15 units of PUBLPOL 199 Senior Research, with the thesis adviser. The student needs to contact the program office to have his or her thesis adviser listed as a 199 instructor. An 'N' grade will be given by the adviser in quarters prior to Spring, when the thesis is completed and presented. All PUBLPOL 199 Senior Research units must receive a final grade of at least a 'B+' in order to graduate with honors. In addition, the student must maintain a GPA of 3.5 in the course requirements for a B.A.H. in Public Policy (Public Policy core courses, concentration courses, PUBLPOL 200H Senior Honors Seminar and PUBLPOL 199 Senior Research). Courses not taken at Stanford are not included in calculating the GPA in order to graduate with honors from the Public Policy Program.

Public Policy Core Courses	Units
Concentration	15
PUBLPOL 200H Senior Honors Seminar	3
PUBLPOL 199 Senior Research	8-15

A set of preliminary results on the research question is due to the thesis adviser and the honors program director by February 15. A first draft of the thesis is due to the thesis adviser and honors program director by April 1. The thesis adviser sets the deadline for receiving the final draft of the thesis. The final draft of the honors thesis must be submitted electronically and in a bound copy to the thesis adviser, the director of the honors program and the Public Policy Program office. In order to be considered for University and department awards, the final thesis must be submitted to the program office no later than the second Wednesday in May. Each student will give an oral presentation of their thesis the following week. All other theses must be submitted by the last Friday in May.

Graduation with honors requires that the thesis be approved by both the adviser and the honors program director. The role of the honors program director is to assure that the thesis addresses an issue of public policy and satisfies the program's standards of excellence. However, the grade for the honors thesis (PUBLPOL 199 Senior Research units) is determined solely by the adviser.

## Minors in Public Policy

The Public Policy Program offers a minor that is intended to provide undergraduates in other majors with interdisciplinary training in applied social sciences.

Students who pursue the minor are required to take the courses listed below for a total of 35 units in Public Policy and its supporting disciplinary departments. Because University rules prohibit double-counting courses, the requirements for a minor differ according to the student's major requirements. Public Policy minor requirements may vary depending on a student's major requirements, therefore it is required that you review your course plans with a program administrator. *Note:* Economics majors are permitted to double-count ECON 1 Principles of Economics, ECON 50 Economic Analysis I, and ECON 51 Economic Analysis II because such courses satisfy only introductory skill requirements for the Economics major.

All courses for the minor must be completed for a letter grade.

Public Policy students are never required to take a course that duplicates material they have already mastered. Students may, by petition, substitute a different course for a requirement whose material would be duplicative. This flexibility does not reduce the number of units required for the minor.

Students who pursue the minor must complete the Multiple Major/Minor Form ([http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin\\_MultMaj.pdf](http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin_MultMaj.pdf)) and have it reviewed by all applicable departments/programs the beginning of the quarter in which the degree is conferred.

## Required Course Work

	Units
ECON 1 Principles of Economics	5
ECON 50 Economic Analysis I	5
ECON 51 Economic Analysis II	5
ECON 102A Introduction to Statistical Methods (Postcalculus) for Social Scientists	5
ECON 102B Applied Econometrics	5
PUBLPOL 104 Economic Policy Analysis	5
Select one of the following depending on major requirements:	
PUBLPOL 101 Politics and Public Policy	5
PUBLPOL 103C Justice	5
or PUBLPOL 134 Ethics On the Edge: Business, Non-Profit Organizations, Government, and Individuals	5
PUBLPOL 103E Ethics on the Edge Public Policy Core Seminar <sup>*134 and 103E taken together</sup>	5
PUBLPOL 106 Law and Economics	5

## Coterminal M.A. in Public Policy

The coterminal M.A. in Public Policy is a degree program designed to impart the basic analytical tools of public policy analysis, or to permit Public Policy majors to specialize in an applied field of policy analysis. Most students complete their M.A. in a fifth year at Stanford; occasionally students may be able to complete both their B.A. and coterminal M.A. in the fourth year.

Undergraduates with strong academic records may apply for admission upon completion of 120 units, but no later than the quarter prior to the expected completion of the undergraduate degree. The University requires that units for a given course may not be counted to meet the requirements of more than one degree; that is, no units may be double-counted. However, Public Policy students are never required to take a course which duplicates material they have already mastered. Students

may, by petition, substitute a different course for a requirement whose material would be duplicative.

The coterminal M.A. is also a gateway to the M.P.P. degree program. Stanford undergraduates may apply to the coterminal M.A. in Public Policy and then, after one quarter in the M.A. program, apply to the M.P.P. program by submitting an unofficial transcript and statement of purpose to the program director. Students accepted to the M.P.P. program must confer their bachelor's degree, submit the Graduate Authorization Petition in Axess, withdraw from the M.A. degree program, and complete the requirements for the 90-unit M.P.P. degree. This does not reduce the total number of units required for the bachelor's or master's degree. Earning the B.A. and M.P.P. typically takes at least five years. Students considering this option should be familiar with the University's coterminal degree policies and procedures and should consult the director and staff of the Public Policy program early in their planning. There is a \$125 fee for submitting the Graduate Authorization Petition to change the M.A. to the M.P.P. degree.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken two quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

All courses counting towards the master's degree not considered core requirements must be approved by petition by the Public Policy Program.

## Degree Requirements

All applicants should have completed, or be currently enrolled in, the required preparatory course work prior to applying. These courses do not count towards the 45 unit M.A. requirement:

		Units
MATH 51	Linear Algebra and Differential Calculus of Several Variables	5
ECON 1	Principles of Economics	5
ECON 50	Economic Analysis I	5
ECON 51	Economic Analysis II	5
ECON 52	Economic Analysis III	5
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	5
ECON 102B	Applied Econometrics	5

To graduate with a coterminal M.A. in Public Policy, students must:

1. Follow one of three tracks (A, B, or C) through the program, as described below.
2. Take all courses applied to the coterminal master's degree for a letter grade (with the exception of PUBLPOL 311 Public Policy Colloquium, which is only offered S/NC). For courses with variable units, coterminal students should, in their graduate career, enroll in the course for 4 units. Courses offered only for C/NC or other non-letter grade system may be applied upon approval of a petition to the program director.
3. Secure a faculty adviser by the end of the first quarter enrolled in the coterminal M.A. degree program. The director and student services staff can assist by suggesting suitable faculty advisers. The adviser need not be affiliated with the Public Policy Program, but does need to be a member of Stanford's Academic Council.
4. Achieve a cumulative grade point average (GPA) of 3.0 (B) or better for all courses taken towards the M.A.
5. Coterminal M.A. students who are admitted to the M.P.P. must transfer all applicable M.A. units to the M.P.P. degree.
6. Comply with all relevant University and program deadlines and policies.

### Track A

Public Policy majors follow Track A, which consists of at least 45 units of course work, including:

1. 29 or more units in an area of concentration. The concentration is referred to as a degree subplan. Subplans are printed on the transcript and are elected via the Declaration or Change to a Field of Study form (<http://studentaffairs.stanford.edu/sites/default/files/registrar/files/grad-subplan-change.pdf>). Current concentrations include:
  - Education Policy
  - Health Care Policy
  - International and National Security Policy
  - Legal and Regulatory Intervention
  - Political and Moral Philosophy
  - Resources, Environment, and Energy Policy
  - Science and Technology Policy
  - Self-designed (requires detailed statement of study goals, relationship of each proposed course to those goals, and commitment by a supervising faculty member)
  - Urban and Regional Policy

Each concentration includes a set of gateway courses and a variety of electives. Gateway courses may vary year to year based on availability. Review the Concentration Elective List ([http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/publicpolicy/Approved\\_Electives\\_List\\_2015-16.pdf](http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/publicpolicy/Approved_Electives_List_2015-16.pdf)) for current gateway courses. Students must present a coherent written study plan to support concentration course choices, designed in consultation with a faculty adviser and approved by the program director. At least one faculty adviser must be a member of the Academic Council.

2. All Public Policy graduate students are required to attend and enroll in three quarters of PUBLPOL 311 Public Policy Colloquium (3 units). Attendance and participation are mandatory.
3. Completion of PUBLPOL 309 Practicum or a faculty-supervised internship or thesis (5-10 units).
4. All 45 units must be taken in upper division (100-level) courses, and at least 25 of those units must be at the graduate level (200-level and above).

## Track B

Economics majors typically follow the requirements detailed below in Track C; however, some Economics majors take courses for their major that also satisfy the content requirements of the Public Policy coterminal M.A. The following Economics courses, if taken for the undergraduate degree, can be used to fulfill content requirements, but not unit requirements, for the Public Policy coterminal M.A. In place of these courses, students may take advanced policy skills courses, or an approved (by petition) policy-related elective.

		Units
ECON 150	Economic Policy Analysis (fulfills the PUBLPOL 204 or PUBLPOL 301B requirement)	4-5
ECON 154	Law and Economics (fulfills the PUBLPOL 206 or PUBLPOL 302B requirement)	4-5
ECON 102C	Advanced Topics in Econometrics (fulfills the ECON 102C, PUBLPOL 205, PUBLPOL 303D, or STATS 202 requirement)	5

## Track C

Students who are not pursuing a major in Public Policy or Economics follow Track C, which consists of at least 45 units of course work in the analysis of public policy.

1. The following core courses are required and count toward the required minimum 45 units:

PUBLPOL 201	Politics and Public Policy or PUBLPOL 308 Political Analysis for Public Policymakers	4
PUBLPOL 206	Law and Economics or PUBLPOL 311 Economic Analysis of Law	4
PUBLPOL 301B	Economic Policy Analysis for Policymakers or PUBLPOL 204 Economic Policy Analysis	4
PUBLPOL 307	Justice	4
Select one of the following courses:		2-5
ECON 137	Decision Modeling and Information	
GSBGEN 646	Behavioral Decision Making	
MS&E 152	Introduction to Decision Analysis	
MS&E 252	Decision Analysis I: Foundations of Decision Analysis	
MS&E 384	Groups and Teams	
MS&E 453	Decision Analysis Applications: Business Strategy and Public Policy	
PUBLPOL 305	Problem Solving and Decision Making for Public Policy and Social Change <sup>*preferred course</sup>	
Select one of the following courses:		4
MS&E 280	Organizational Behavior: Evidence in Action	
PSYCH 138	Wise Interventions	
Select one of the following advanced empirical methods courses:		3-5
ECON 102C	Advanced Topics in Econometrics	
PUBLPOL 205	Empirical Methods in Public Policy <sup>*preferred course</sup>	
PUBLPOL 303D	Applied Econometrics for Public Policy	
STATS 202	Data Mining and Analysis	

2. Complete a concentration of at least 15 units, under the guidance of a faculty adviser and the Public Policy program director.
3. All Public Policy graduate students are required to attend and enroll in three quarters of PUBLPOL 311 Public Policy Colloquium (3 units total). Attendance and participation are mandatory.
4. Students must petition to count additional advanced policy skills courses (if needed) to meet the 45-unit degree requirement. All 45 units must be taken in upper division (100+ level) courses and at

least 25 of those units must be taken at the graduate level (200-level and above).

Coterminal M.A. students must select a faculty adviser upon acceptance to the program. Advisers must confirm that the courses proposed are likely to be taught during the applicable period, or that appropriate substitute courses are available. Students may refer to the Concentration Electives List ([http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/publicpolicy/Approved\\_Electives\\_List\\_2015-16.pdf](http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/publicpolicy/Approved_Electives_List_2015-16.pdf)), as well as to the Concentrations Page (<https://publicpolicy.stanford.edu/academics/coterminal-degree/requirements/requirements-public-policy-majors>) for Track A coterm students, for a selection of pre-approved elective courses. Public Policy student services staff can verify scheduling of courses. At least one faculty adviser must be a member of the Academic Council.

## Application and Admission

There are two coterminal degree application deadlines for the 2015-16 academic year: November 12, 2015 and February 18, 2016. Applicants may be contacted for an interview. A \$125 fee is charged when adding the M.A. degree program in Axess.

To apply for admission to the Public Policy coterminal M.A. program, students should submit the following materials directly to the Public Policy office by the appropriate deadline:

1. The coterminal application (<http://studentaffairs.stanford.edu/registrar/forms/coterm>)
2. Statement of purpose, 500 words maximum (indicate interest in M.P.P. degree, if applicable)
3. One-page resume
4. GRE Scores; official GRE scores sent to Stanford University and an unofficial copy submitted with the application
5. A preliminary program proposal
6. A current unofficial undergraduate transcript
7. Two confidential letters of recommendation from Stanford faculty members familiar with the student's academic work

## Financial Aid

The Public Policy Program does not provide financial assistance to coterminal students. For information on student loans and other sources of support, consult the Stanford Financial Aid Office (<http://financialaid.stanford.edu>). Students who enter public service employment with local, state, or federal agencies; schools; or certain not-for-profit organizations may obtain forgiveness for educational loans, based on years of public service employment.

## Master's Degrees in Public Policy

The program offers two master's degrees in Public Policy. The Master of Public Policy (M.P.P.) is a two-year professional degree, and the Master of Arts in Public Policy (M.A.) is a one-year non-professional degree.

At this time, eligibility for admission to the M.P.P. and M.A. programs is restricted to current Stanford undergraduate and graduate students, recent (Class of 2009-current) Stanford alumni, and external applicants seeking a joint degree. If you do not meet these criteria, you are not eligible for admission to the M.A. or the M.P.P. degree programs.

1. Public Policy Joint Degrees. Students enrolled in or applying to certain degree programs in the Schools of Business, Education, Engineering, Humanities and Sciences, Law, and Medicine are eligible to apply for Public Policy joint degrees. For further information, see the "Joint Degree Programs (p. 49)" section of this Bulletin and the University Registrar's site (<http://studentaffairs.stanford.edu/registrar/students/jdp-information>). All Public Policy joint degree programs, with the exception of the J.D./M.A., require at least one

year of study at Stanford beyond the requirements for the other joint or dual degree.

- Juris Doctor and Master of Public Policy (J.D./M.P.P.)
  - Juris Doctor and Master of Arts of Public Policy (J.D./M.A.)
  - Doctor of Medicine and Master of Public Policy (M.D./M.P.P.)
  - Doctor of Philosophy in Education and Master of Public Policy (Ph.D./M.P.P.)
  - Doctor of Philosophy in Economics and Master of Public Policy (Ph.D./M.P.P.)
  - Doctor of Philosophy in Management Science & Engineering and Master of Public Policy (Ph.D./M.P.P.)
  - Doctor of Philosophy in Psychology and Master of Public Policy (Ph.D./M.P.P.)
  - Doctor of Philosophy in Sociology and Master of Public Policy (Ph.D./M.P.P.)
  - Doctor of Philosophy in Structural Biology and Master of Public Policy (Ph.D./M.P.P.)
  - Master of Business Administration and Master of Public Policy (M.B.A./M.P.P.)
  - Master of Arts in Education: Policy, Organization, and Leadership subplan and Master of Public Policy (M.A./M.P.P.)
  - Master of Arts in International Policy Studies and Master of Public Policy (M.A./M.P.P.)
  - Master of Science in Management Science & Engineering and Master of Public Policy (M.S./M.P.P.)
2. Dual Degrees. Any other Stanford graduate student (i.e., not covered in '1' above), Stanford senior, or recent alumnus/a is eligible to apply for a Public Policy dual degree. Stanford graduate students may subsequently withdraw from their original degree programs, if desired.
- Master of Public Policy (M.P.P.)
  - Master of Arts in Public Policy (M.A.): Available only to current Stanford graduate students

## Prerequisites

Graduate students in Public Policy are expected to be literate in mathematics and microeconomics at a level equivalent to MATH 51 Linear Algebra and Differential Calculus of Several Variables and ECON 50 Economic Analysis I before beginning the curriculum. A no-credit refresher course in mathematics and economics is offered in the two weeks preceding the start of Autumn Quarter.

## M.P.P. and M.A. Degree Requirements

1. All graduate degree candidates must submit a Program Proposal for a Master's Degree (<http://studentaffairs.stanford.edu/sites/default/files/registrar/files/progpropma.pdf>) to the Public Policy office by the end of Autumn Quarter and must amend this proposal formally if plans for meeting the degree requirements change.
2. Public Policy students are never required to take a course which duplicates material they have already mastered. Students may petition a different course for a core requirement whose material would be duplicative. This flexibility does not reduce the unit requirements for any degree.
3. All Public Policy graduate students must secure a faculty adviser within the first quarter they are enrolled in the M.A. or M.P.P. degree program. The director and student services staff can assist by suggesting suitable faculty advisers. The adviser need not be affiliated with the Public Policy Program, but does need to be a member of Stanford's Academic Council.
4. M.P.P. degree students are not permitted to enroll in PUBLPOL 309 Practicum, without having completed the following core courses: PUBLPOL 301A Microeconomics, PUBLPOL 301B

Economic Policy Analysis for Policymakers, ECON 102A Introduction to Statistical Methods (Postcalculus) for Social Scientists, PUBLPOL 303D Applied Econometrics for Public Policy, and PUBLPOL 306 Writing and Rhetoric for Policy Audiences.

## Curriculum Requirements

		Units
PUBLPOL 301A	Microeconomics	4
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	5
PUBLPOL 301B	Economic Policy Analysis for Policymakers	4
PUBLPOL 206	Law and Economics	4
	or PUBLPOL 30 Economic Analysis of Law	
PUBLPOL 303D	Applied Econometrics for Public Policy	4
Select one of the following courses:		2-5
ECON 137	Decision Modeling and Information	
GSBGEN 646	Behavioral Decision Making	
MS&E 152	Introduction to Decision Analysis	
MS&E 252	Decision Analysis I: Foundations of Decision Analysis	
MS&E 384	Groups and Teams	
MS&E 453	Decision Analysis Applications: Business Strategy and Public Policy	
PUBLPOL 305A	Problem Solving and Decision Making for Public Policy and Social Change <sup>*preferred course</sup>	
PUBLPOL 306	Writing and Rhetoric for Policy Audiences <sup>*requirement for MPP students only. MA students may take as an elective</sup>	4
PUBLPOL 307	Justice	4
PUBLPOL 308	Political Analysis for Public Policymakers	4

All core courses listed above must be taken for a letter grade and must be completed with an overall grade point average (GPA) of 3.0 or better.

1. Core Curriculum (shown above)
2. At least two electives are taken during the first year. At least one must be from the Concentration Electives List ([http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/publicpolicy/Approved\\_Electives\\_List\\_2015-16.pdf](http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/publicpolicy/Approved_Electives_List_2015-16.pdf)).
3. Colloquium: All Public Policy graduate students are required to attend and enroll in three quarters of PUBLPOL 311 Public Policy Colloquium (3 units) during their first year of the program. Attendance and participation are mandatory.
4. Practicum (M.P.P. and Track A Coterminal M.A. students): Completion of the two quarter practicum course, PUBLPOL 309 Practicum (10 units, Autumn and Winter quarters), in which interdisciplinary student teams analyze real-world policy issues for outside clients.
5. Master's Thesis (non-coterminal M.A. students): Completion of a 5-unit master's thesis, written under the guidance of a Public Policy-affiliated faculty adviser who is a member of Academic Council on a topic approved in advance by the program director. Students give the program office the name of their thesis adviser and enroll in PUBLPOL 310 Master of Arts Thesis units during quarter(s) of their choosing. The 5 units may be spread over multiple quarters, and an 'N' (continuing course) grade is given during any quarters prior to degree conferral. The thesis must be submitted to the Public Policy program office in both electronic and printed form no later than the last Friday before the end of the quarter. The final grade for PUBLPOL 310 is determined solely by the faculty adviser.

6. Concentration (M.P.P. students only): Advanced coursework in a specialized field, chosen from the approved list of concentration courses with the prior approval of the student's faculty adviser and the program director. The Registrar will list your concentration as a "Degree Subplan." Subplans are printed on the transcript and are elected by the student via the Declaration or Change to a Field of Study form (<http://studentaffairs.stanford.edu/sites/default/files/registrar/files/grad-subplan-change.pdf>).

Current concentrations include:

- Education Policy
- Health Care Policy
- International and National Security Policy
- Legal and Regulatory Intervention
- Political and Moral Philosophy
- Resources, Environment, and Energy Policy
- Science and Technology Policy
- Self-designed (requires detailed statement of study goals, relationship of each proposed course to those goals, and commitment by a supervising faculty member)
- Urban and Regional Policy

## Public Policy Joint Degree Requirements

1. A joint degree (p. 49) is regarded by the University as distinct from either of its component degrees, and requirements for the joint degree differ from the sum of the requirements for the individual degrees.
2. Up to a maximum of 45 units, or one year, of the University residency requirement can be credited toward both graduate degree programs (i.e., the joint degree requirements may contain up to 45 units less than the sum of each program separately). For example, a J.D./M.P.P. has a four-year residency requirement, one year less than the sum of the requirements for the separate degrees. This recognizes that there is a subject matter overlap between the fields comprising the joint degree.
3. The Public Policy Program strives to encourage an intellectual, professional, and social community among its students. For this reason, joint degree students are strongly encouraged to devote one year of full-time study at Stanford entirely to the Public Policy Program rather than spacing Public Policy courses throughout their graduate careers. For joint degree Ph.D. students, the core requirements of the M.P.P. should be completed over two contiguous years of study, during which students may also be enrolled in courses from their Ph.D. program. Exceptions to this structure must be approved in advance by petition.
4. Joint degree students are expected to have and to consult regularly with an academic adviser. The adviser is generally a member of the faculty of both degree programs and must be a member of Academic Council. The program director and staff are available to make adviser recommendations.
5. In order to take advantage of the reduced residency requirement, joint M.P.P. students must define their area of concentration from among courses offered in their non-Public Policy program. Students wishing to concentrate in another field should apply for a dual, rather than a joint, M.P.P. degree.

## Application and Admissions

Applications for graduate study in Public Policy are only accepted from:

1. students currently enrolled in any Stanford graduate or undergraduate degree program
2. external applicants seeking a joint degree, or

3. recent Stanford alumni (2009-current).

External applicants for joint degrees must apply to the department or school offering the other graduate degree (i.e. Ph.D., M.D., M.A., M.S., M.B.A., or J.D.), indicating an interest in the joint degree program; applicants admitted to the other degree program are then evaluated for admission to the M.P.P. or M.A. program.

To be considered for matriculation beginning in the Autumn Quarter 2016-17, all application materials must be submitted no later than April 15, 2016. The early deadline for applications is Friday, January 29, 2016 with a final deadline on Friday, April 15, 2016. Early submission of M.P.P. applications is encouraged. Student funding is very limited. Admission notifications will be sent to applicants by May 1, 2016. Admitted students are required to respond to offers of admission by May 15, 2016.

## Stanford Alumni and Current Stanford Seniors

Visit the Stanford Office of Graduate Admissions (<http://studentaffairs.stanford.edu/gradadmissions>). The online application for the M.P.P. is available beginning Sunday, November 1, 2015. The application fee is \$125. The department is unable to refund an application fee, so prospective applicants are advised to refer to eligibility requirements before submitting an application.

Only complete applications submitted by the deadline are reviewed. A complete application includes the following:

1. Application (<http://studentaffairs.stanford.edu/gradadmissions>).
2. Official transcripts. Copies of student transcripts must bear the official seal of the institution and the signature of the registrar. Upload transcripts to the online application.
3. GRE scores.
4. Letters of recommendation: Three confidential letters of recommendation from a Stanford faculty member or an employer should be submitted electronically via the online application. See the Stanford Office of Graduate Admissions web site regarding letters of recommendation (<http://studentaffairs.stanford.edu/gradadmissions/applying/recommendations>). At least two letters must be from Stanford faculty members.
5. Statement of purpose (not to exceed two pages; upload to the online application).
6. Academic writing sample (upload to the online application): This can be on any topic and may be either something previously written or something written specifically for the application. It should be 6-10 pages (double-spaced) and should showcase academic writing ability.
7. Resume or curriculum vitae (upload to the online application).

## Stanford Current Graduate Students

1. Application for Current Stanford Graduate Students (<https://publicpolicy.stanford.edu/academics/graduate/admissions/current-graduate-students>).
2. Two confidential letters of recommendation, one of which must be from a Stanford faculty member familiar with applicant's academic work.
3. Undergraduate and graduate transcripts.
4. GRE, GMAT, LSAT or MCAT test scores.
5. Statement of purpose, not to exceed two pages.
6. Resume or curriculum vitae.
7. Preliminary program proposal.
8. Prerequisite completion statement, demonstrating completion of required prerequisite course work in multivariate calculus and intermediate microeconomics.

Applicants may be interviewed. If admitted, students will submit a Graduate Authorization Petition (<http://studentaffairs.stanford.edu/>)

registrar/students/grad-auth-pet) through Axess. A \$125 fee is charged when adding the M.A. or M.P.P. degree program in Axess.

*Director:* Gregory L. Rosston (Stanford Institute for Economic Policy Research)

*Director of Undergraduate Capstone Program and Senior Lecturer:* Mary Sprague (Public Policy)

*Director of Graduate Practicum Program and Professor of the Practice of Public Policy:* Joe Nation (Public Policy)

*Director of Domestic Policy Studies and Lecturer:* Lanhee J. Chen (Public Policy and Hoover Institution)

*Director of Honors Program and Lecturer:* Marcelo Clerici-Arias (Economics and Public Policy)

*Executive Committee Chair:* Mark Duggan (Economics, SIEPR)

*Executive Committee:* Laurence Baker (Medicine), Jonathan Bendor (Graduate School of Business), B. Douglas Bernheim (Economics, SIEPR), David Brady (Political Science, Hoover Institution, Graduate School of Business, SIEPR), Paul Brest (Law), Bruce Cain (Political Science, Bill Lane Center for the American West), Samuel Chiu (Management Science and Engineering), Thomas Dee (Education), David Kennedy (History, emeritus), David Grusky (Sociology), Eric Hanushek (Hoover Institution, SIEPR), Deborah Hensler (Law), Roger Noll (Economics, emeritus, SIEPR), Bruce Owen (Public Policy, emeritus, SIEPR), Madhav Rajan (Graduate School of Business), Gregory Rosston (SIEPR), Debra Satz (Philosophy), John Shoven (SIEPR, Economics)

*Affiliated Faculty:* William Abrams (Human Biology), Donald Barr (Medicine), Jonathan Bendor (Graduate School of Business), Eric Bettinger (Education), Jayanta Bhattacharya (Medicine), Coit Blacker (Freeman Spogli Institute for International Studies), Lisa Blaydes (Political Science), Adam Bonica (Political Science), Michael J. Boskin (Economics, Hoover Institution), Paul Brest (Law), Jeremy Bulow (Graduate School of Business), M. Kate Bundorf (Medicine), Bruce Cain (Political Science, Bill Lane Center for the American West), Eamonn Callan (Education), Martin Carnoy (Education), John Cogan (Hoover Institution), Joshua Cohen (Political Science, Philosophy, Law), Gary Cox (Political Science), Robert Crews (History), Larry Diamond (Freeman Spogli Institute for International Studies, Hoover Institution), Walter Falcon (Freeman Spogli Institute for International Studies, emeritus), Lawrence Friedman (Law), Francis Fukuyama (Freeman Spogli Institute for International Studies), Lawrence Goulder (Economics, Freeman Spogli Institute for International Studies), Justin Grimm (Political Science), Stephen Haber (Political Science, Hoover Institution), Deborah Hensler (Law), Pamela Hinds (Management Science and Engineering), Daniel Ho (Law), Nicholas Hope (Stanford Center for International Development), Caroline Hoxby (Economics, Hoover Institution, SIEPR), Daniel Kessler (Law, Hoover Institution, Graduate School of Business), Pete Klenow (Economics), Stephen Krasner (Political Science, Freeman Spogli Institute for International Studies, Hoover Institution), Jon A. Krosnick (Communication, Political Science), Mark Lemley (Law), Susanna Loeb (Education), Thomas MacCurdy (Economics, Hoover Institution), David Magnus (Medicine), Robert McGinn (Management Science and Engineering; Science, Technology and Society), Milbrey McLaughlin (Education), Terry Moe (Political Science, Hoover Institution), Joan Petersilia (Law), James Phillips (Graduate School of Business), A. Mitchell Polinsky (Law), Walter Powell (Education), Robert Reich (Political Science), Eunice Rodriguez (Medicine), Andrew Rutten (Political Science), Baba Shiv (Graduate School of Business), Ken Shotts (Graduate School of Business), Stephan Seiler (Graduate School of Business), Stephan Stedman (Freeman Spogli Institute for International Studies), Jeff Strnad (Law), Barton Thompson (Law, Woods Institute, Freeman Spogli Institute for International Studies), Michael Tomz (Political Science, SIEPR), Milana Trounce (Medicine), Michael Wald (Law), Greg Walton (Psychology), Jonathan Wand (Political Science), Barry Weingast

(Political Science, Hoover Institution), John Weyant (Management Science and Engineering), Robert M. White (Materials Science and Engineering), Frank Wolak (Economics, Freeman Spogli Institute for International Studies), Cristobal Young (Sociology)

*Lecturers:* Newsha Ajami (Woods Institute), Tanya Beder (Law), Frank Benest (Public Policy), David Crane (Public Policy, SIEPR), Dennis Gale (Urban Studies), Jonathan D. Greenberg (Law), Russell Hancock (Public Policy), Adrienne Jamieson (Bing Stanford in Washington), Michael Kieschnick (Urban Studies), Lawrence Litvak (Public Policy, Urban Studies), Susan Liautaud (Public Policy), Eva Meyersson Milgrom (SIEPR, Sociology), Alyssa O'Brien (Public Policy, Program in Writing and Rhetoric), Christine Pal Chee (Public Policy), Katharine Ricke (Public Policy)

## Overseas Studies Courses in Public Policy

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPCTWN 31	Political Economy of Foreign Aid	3
OSPFLOR 12	Constituting a Republic: Machiavelli, Madison, and Modern Issues	5
OSPFLOR 78	The Impossible Experiment: Politics and Policies of the New European Union	5
OSPFLOR 85	Bioethics: the Biotechnological Revolution, Human Rights and Politics in the Global Era	4
OSPISTAN 72	Religion, Secularism and Democracy in the World	4
OSPKYOTO 45	Japan's Energy-Environment Conundrum	4
OSPOXFRD 18	Making Public Policy: An Introduction to Political Philosophy, Politics, and Economics	4-5
OSPPARIS 153X	Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time	5
OSPSANTG 71	Santiago: Urban Planning, Public Policy, and the Built Environment	4-5
OSPSANTG 119X	The Chilean Economy: History, International Relations, and Development Strategies	5

## Religious Studies

Courses offered by the Department of Religious Studies are listed under the subject code RELIGST on the Stanford Bulletin's ExploreCourses web site.

## Mission of the Department

The Department of Religious Studies brings a variety of disciplinary perspectives to bear on the phenomenon of religion for the purpose of understanding and interpreting the history, literature, thought, social structures, and practices of the religious traditions of the world. Comprised of a dozen regular faculty with particular strengths in the study of Buddhism, Christianity, Islam, and Judaism, it enrolls about thirty graduate students (mostly doctoral) and roughly as many undergraduate majors, minors, and joint majors.

Religious Studies works closely with several related programs at Stanford: the Department of Philosophy, with which it offers a combined undergraduate major; the Ho Center for Buddhist Studies; the Taube Center for Jewish Studies; the Abbasi Program in Islamic Studies; the McCoy Center for Ethics in Society; and the Center for Medieval and Early Modern Studies.

While some undergraduates continue their study of religion in a graduate or professional program, most pursue meaningful and successful careers in business, government, the nonprofit sector, and medicine. In this respect, Religious Studies is an ideal interdisciplinary major in the liberal arts. Graduates of the department's doctoral program generally pursue academic careers and are routinely placed in the best universities and colleges in the country and overseas.

## Undergraduate Programs in Religious Studies

The department offers a Bachelor of Arts major, minor, and honors program in Religious Studies, and a combined major with the Philosophy Department in Philosophy and Religious Studies. Undergraduate courses in Religious Studies are designed to engage students existentially and to assist them in thinking about intellectual, ethical, and sociopolitical issues in the world's religions. The department's faculty seek to provide tools for understanding the complex encounters among religious ideas, practices, and communities, and the past and present cultures that have shaped and been shaped by religion. Courses therefore expose students to: leading concepts in the field of religious studies such as god(s), sacrifice, ritual, scripture, prophecy, and priesthood; approaches developed over the past century, including the anthropological, historical, psychological, philosophical, and phenomenological, that open religion to closer inspection and analysis; and major questions, themes, developments, features, and figures in the world's religious traditions. The department encourages and supports the acquisition of languages needed for engagement with sacred texts and interpretive traditions as well as study abroad at Stanford's overseas centers where religions can be observed and experienced in their contemporary contexts.

### Major in Philosophy and Religious Studies

The departments of Philosophy and Religious Studies jointly nominate for the B.A. in Philosophy and Religious Studies those students who have completed a major in the two disciplines. See a description of this combined major under the "Bachelor's" tab of the "Religious Studies" section of this bulletin (p. 612), in the "Philosophy" section of this bulletin (p. 573), or in the guidelines available from the undergraduate director of either department.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to:

1. demonstrate familiarity with a variety of methods used analytically in the field of Religious Studies.
2. demonstrate proficiency in writing papers in the style of academic writing in the field of Religious Studies.
3. demonstrate the ability to engage peer scholars' research in constructive and critical ways, and communicate feedback effectively.
4. demonstrate individual expertise through oral presentation of one's advanced research to peers.
5. complete an advanced research project consistent with standards for papers in the field of Religious Studies.

## Graduate Programs in Religious Studies

The graduate mission of the department is to provide students with an interdisciplinary setting of study within which to focus on their respective areas of specialization. The department offers an internal M.A. and a Ph.D. degree in Religious Studies. The master's program is restricted to current Stanford students.

## Learning Outcomes (Graduate)

*Master's Program:* The purpose of the Master's program is to develop knowledge and skills in Religious Studies. For some students this will serve as preparation for applications to Ph.D. programs. For others it will serve as a further capstone experience for their undergraduate program of study. The goals are achieved through the completion of courses, in the primary field as well as related areas, and experience with independent work and specialization. For some it will involve an optional Master's thesis.

*Doctoral Program:* The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Religious Studies. Through completion of advanced coursework and rigorous skills training, the doctoral program prepares students to make original contributions to the field of Religious Studies and to interpret and present the results of such research through teaching and publication.

## Bachelor of Arts in Religious Studies

### Suggested Preparation for the Major

There is no prescribed route or prerequisite to the major or minor in Religious Studies or the combined major in Philosophy and Religious Studies. Students typically find themselves selecting one of these paths after taking elective courses in the department and becoming acquainted with the faculty.

Students contemplating the major, the minor, or the Philosophy and Religious Studies major are invited to consult with the Director of Undergraduate Studies. The undergraduate student services associate in Building 70 can also field questions regarding the declaration procedure within the department.

### Degree Requirements

The curriculum for majors is designed to move students sequentially from foundational courses, through deeper investigations, culminating in integrative research courses. Thus, the introductory sequence is designed to lead to courses which build on this foundation with topics including: particular traditions such as Judaism or Buddhism; comparative studies such as nonviolence in Hinduism and Buddhism, or Muslim and Christian interpretations of scripture; specific topics such as mysticism, gender and religion, or theodicy; and distinctive approaches such as the philosophy of religion or ritual studies. Majors complete their careers with integrative courses that afford opportunity for research and consolidation of the knowledge and skills gained earlier.

### Required Courses

A Bachelor of Arts in Religious Studies requires 60 units of course work, distributed as follows:

1. Two courses (at least 3 units each) from courses numbered 1-49, including approved Thinking Matters or Introductory Seminars. Successful completion of SLE may count as one of these two courses. IHUM courses with Religious Studies content taught prior to 2012-13 also fulfill this requirement.
2. Two courses (at least 3 units each) from courses numbered 50-99.
3. Three integrative courses (at least five units each) as follows:

Majors' Seminar (5)		
RELIGST 290	Majors Seminar (Winter Quarter of junior year; fulfills WIM requirement; letter grade only)	5
Senior Essay or Honors Thesis Research (5)		
RELIGST 297	Senior Essay/Honors Essay Research (minimum 5 units; up to 10 units over two quarters; graded 'N' until completion of essay or thesis)	3-5
Senior Majors' Colloquium (5)		
RELIGST 298	Senior Colloquium (Spring Quarter; grading option S/NC)	5

4. At least 24 of the remaining units should be in courses numbered 100-289. At least two of these courses should be 200-level seminar courses.

### Additional Regulations

- Variations to the required distribution of courses under 1 and 2 above may be approved by the Director of Undergraduate Studies on an individual basis.
- All units must be in Religious Studies courses unless an exception is made by the Director of Undergraduate Studies.
- With the approval of the Director of Undergraduate Studies, up to two language courses relating to the student's program of study (such as Arabic, Biblical Hebrew, New Testament Greek, Chinese, Persian, or Japanese), but not counted towards the University language requirement, may be counted toward the major.
- No more than ten units of the total 60 (excluding RELIGST 298) may be taken for the grade of 'S/NC' or 'CR/NC.'
- Students may not take all courses in one religious tradition.

### Senior Essay

A 25-30 page essay on a topic chosen by the student and approved by the adviser upon receipt of a student's proposal by the end of the third quarter prior to expected graduation. The character and content of the essay, which is meant to allow the student to call into play knowledge and skills learned in the course of the major, may take several forms. For example, a student may return to a subject studied earlier but now pursued in more depth or from a new perspective, research a recent or new topic of interest in the field, or offer a carefully framed critical assessment of what has been learned in the major based on review of influential sources, theories, and methods of studying religion. The senior essay is read and graded by the student's adviser and one other member of the Religious Studies faculty.

### Honors Thesis

A 40-80 page research paper on a topic chosen by the student and approved by the adviser upon receipt of a proposal in the fourth quarter prior to expected graduation. The paper, supported by mastery of primary and secondary scholarship, advances a well-reasoned, supportable thesis. Writers of honors theses must have a grade point average (GPA) of 3.5 in Religious Studies courses, and at least 3.2 overall, and are expected to have already demonstrated success in writing research papers. The honors thesis is read and graded by the student's adviser and one other member of the Religious Studies faculty. Theses earning a grade of 'B+' or above receive honors.

## Philosophy and Religious Studies Combined Major

The undergraduate major in Philosophy and Religious Studies consists of 60 units of course work with approximately one third each in the philosophy core, the religious studies core, and either the general major

Units the special concentration. Affiliated courses cannot be used to satisfy this requirement.

No courses in either the philosophy or religious studies core may be taken satisfactory/no credit or credit/no credit.

In general, transfer units cannot be used to satisfy the core requirements. Transfer units and substitutions must be approved by the director of undergraduate studies in the appropriate department.

Please see a detailed description of the major in the "Philosophy" section of this Bulletin (p. ).

### Core Requirements

- Philosophy (PHIL) courses:
  - Required course: PHIL 80 Mind, Matter, and Meaning
  - 16 units, including at least one Philosophy course from each of the following areas:
    - logic and philosophy of science
    - ethics and value theory
    - epistemology, metaphysics, and philosophy of language
    - history of philosophy
- Religious Studies (RELIGST) courses: 20 units, chosen in consultation with the student's adviser, including:
  - Required Course: RELIGST 290 Majors Seminar ( 5 units; Winter Quarter; recommended junior year; fulfills WIM requirement).
  - At least one course in philosophy of religion, broadly construed, to be approved by the Director of Undergraduate Studies for Religious Studies.
  - Diversity requirement: Students may not take all their religion courses in one religious tradition.

### General Major Requirements

Five additional courses (approximately 20 units) divided between the two departments. No more than five of these units may come from courses numbered under 99 in either department. Each student must also take at least one undergraduate seminar in religious studies and one undergraduate seminar in philosophy.

### Special Concentration

With the aid of an adviser, students pursue a specialized form of inquiry in which the combined departments have strength; for example, American philosophy and religious thought, philosophical and religious theories of human nature and action, philosophy of religion. Courses for this concentration must be approved in writing by the adviser.

### Directed Reading and Satisfactory/No Credit Units

Units of directed reading for fulfilling requirements of the major are allowed only with special permission. No more than 10 units of work with a grade of 'satisfactory' count toward the Philosophy and Religious Studies major.

### Honors Program

Students pursuing a major in Philosophy and Religious Studies may also apply for honors by following the procedure for honors in either of the departments.

### Minor in Religious Studies

A Religious Studies minor is a complement to many majors throughout the University. Students contemplating the minor are invited to consult with the Director of Undergraduate Studies. The undergraduate student

services associate in Bldg. 70 can also field questions regarding the declaration procedure within the department.

## Degree Requirements

A minor in Religious Studies requires a minimum of 30 units. Students are encouraged to focus their program of study either on a religious tradition or on a theme that cuts across traditions. In consultation with their advisers, students may design the minor in Religious Studies to complement their major. The minor must be declared no later than the last day of the quarter, two quarters before degree conferral.

### Required Courses for the Minor

1. One course (at least 3 units) from courses numbered 1-49, including approved Thinking Matters or Introductory Seminars. IHUM courses with Religious Studies content taught prior to 2012-13 also fulfill this requirement.
2. One course (at least 3 units) from courses numbered 50-99.
3. At least 14 of the remaining units should be at the intermediate and advanced level (above 100), including at least one 200-level seminar course.

### Additional Regulations

1. All units must be in Religious Studies courses unless an exception is made by the Director of Undergraduate Studies.
2. With the approval of the Director of Undergraduate Studies, one language course relating to the student's program of study (such as Arabic, Biblical Hebrew, New Testament Greek, Chinese, Persian, or Japanese), but not counted towards the University language requirement, may be counted toward the minor.
3. No course may be taken on a 'S/NC' or 'CR/NC' basis.
4. Students may not take all courses in one religious tradition.
5. One course in directed reading (RELIGST 199 Individual Work) may be counted towards the minor.

## Master of Arts in Religious Studies

University requirements for the M.A. are described in the "Graduate Degrees (p. 45)" section of this bulletin. The department offers a one-year terminal M.A. program. Students can also earn their M.A. degree as part of their coterminal degree program.

The M.A. program serves two groups of students:

1. those who wish to prepare for a doctoral program in Religious Studies
2. those who wish to further deepen their knowledge in an area in which they have acquired some expertise during their undergraduate work.

At this time, eligibility for admission to the master's program is restricted to current Stanford undergraduates and graduate students.

## Degree Requirements

The following requirements are in addition to the University's basic requirements (p. 45).

The student completes at least 45 units of graduate work at Stanford beyond the B.A. degree, including RELIGST 300 Theory in the Study of Religion or RELIGST 290 Majors Seminar. Students who have taken this course as part of the B.A. need not take it again.

Residence may be completed by three quarters of full-time work or the equivalent.

The student's plan of courses is subject to approval by the Graduate Director. No field of specialization is expected, but students may focus work in particular areas. Advanced and graduate courses in other departments may be taken in consultation with the adviser. No thesis is required; a thesis, if elected, may count for as many as 9 units.

Each student demonstrates reading knowledge of at least one foreign language.

The department allows coterminals to count courses as early as their first quarter of sophomore year toward their master's degree. Course transfers require department approval and cannot be processed after the bachelor's degree has been conferred. All University coterminal policies apply.

## Application and Admissions

At this time, eligibility for admission to the master's program is restricted to current Stanford undergraduates and graduate students.

### Current Stanford Undergraduates

Religious Studies accepts coterminal applications in Winter Quarter (due end of the second week of classes) for admission starting Spring Quarter. Only complete applications submitted by the deadline are reviewed. A complete application includes the following:

- Complete Coterminal Application
- Two confidential letters of recommendation, one of which must be from a Stanford faculty member familiar with applicant's academic work
- Statement of purpose, not to exceed two pages
- Undergraduate transcript(s)
- Preliminary program proposal

### Current Stanford Graduate Students

- Application for Current Stanford Graduate Students
- Two confidential letters of recommendation, one of which must be from a Stanford faculty member familiar with applicant's academic work
- Undergraduate and graduate transcripts
- Statement of purpose, not to exceed two pages
- Preliminary program proposal

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken during or after the first quarter of the sophomore year are eligible for consideration for transfer to the graduate career; the timing of the first graduate quarter is not a factor. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

## Financial Aid

The Religious Studies department does not provide financial assistance to coterminal or master's students. For information on student loans and other sources of support, consult the Financial Aid Office (<http://financialaid.stanford.edu>).

## Doctor of Philosophy in Religious Studies

University requirements for the Ph.D. are described in the "Graduate Degrees (p. 45)" section of this bulletin. The Ph.D. in Religious Studies signifies special knowledge of an interdisciplinary field of study and potential mastery of an area of specialization within it. The faculty of the department have established certain fields of study in which the department's strengths and those of other Stanford departments cohere. They are: Buddhist studies, Islamic studies, Jewish studies, and modern religious thought, ethics, and philosophy. Students who wish to specialize in other fields must obtain early approval by the faculty. Each of these areas of specialization follows a shared structure of study.

## Degree Requirements

The following requirements are in addition to the University's basic requirements.

### 1. Residence

Each student completes three years (nine quarters) of full-time study, or the equivalent, in graduate work beyond the B.A. degree, and a minimum of 135 units of graduate course work (excluding the dissertation).

### 2. Required Courses

The 135 units of graduate course work must include the following:

a.			
	RELIGST 304A	Theories and Methods	4
	RELIGST 304B	Theories and Methods	4
	RELIGST 391	Teaching Religious Studies	3
	RELIGST 399	Recent Works in Religious Studies	1-2

- b. Two courses in an area outside the student's field.  
c. The remainder of the course work is individually designed, in consultation with the adviser.

### 3. Languages

Each student demonstrates a reading knowledge of two foreign languages, including French or German. One of those language requirements should be fulfilled by the time of advancing to candidacy at the end of the second year. Competence in the second language must be demonstrated at the time of the qualifying examination. Each student also demonstrates reading knowledge of other ancient or modern languages necessary for the field of study, area of specialization, and dissertation topic.

### 4. Candidacy

At the end of each academic year, the department's faculty recommend second-year students for candidacy on the basis of all relevant information, and especially on the student's candidacy dossier that includes the approved declaration of an area of specialization, certification for one foreign language, and two substantial papers written for courses during the previous two years. Students are required to take RELIGST 304A Theories and Methods, RELIGST 304B Theories and Methods, RELIGST 391 Teaching Religious Studies, and RELIGST 399 Recent Works in Religious Studies prior to candidacy.

### 5. Paper-in-Field

During the third year, under the supervision of their advisers, students prepare a paper suitable for submission to an academic journal in their field. The paper is read and approved by at least two faculty

members in the department. Students are encouraged to register for RELIGST 392 Paper in the Field while working on the paper.

### 6. Teaching Internship

At least one teaching internship under the supervision of faculty members is undertaken at a time negotiated with the Graduate Director. Students receive academic credit for the required internship, which is a part of academic training and not of employment.

### 7. Qualifying Examination

To qualify for writing a dissertation, the student must pass a comprehensive examination in the chosen field and the area of specialization, typically during the first quarter of their fourth year. The student must complete the second language requirement before taking the qualifying examination. The qualifying examination is normally conducted by a committee of at least three Academic Council members of the department, one of whom is the adviser. One faculty member may be from outside the department with permission of the Director of Graduate Studies.

### 8. Dissertation

The dissertation contributes to the humanistic study of religion and is written under the direction of the candidate's dissertation adviser and at least two other members of the Academic Council. The University Oral examination is a defense of a completed draft of the dissertation.

- a. *Dissertation Committee*—The dissertation committee is formed after successful completion of the qualifying examinations. It is normally composed of the dissertation adviser and at least two Academic Council members of the Religious Studies department. One non-departmental faculty member may serve as a reader when approved by the Director of Graduate Studies.

b. *Dissertation Proposal*—Candidates submit their dissertation proposal in consultation with their advisers. It is read and approved by the three members of the dissertation committee.

### 9. University Oral Examination

This examination, required by the University of Ph.D. students, is a defense of a completed draft of the dissertation. The composition of the examination committee is set by University regulation: five or more faculty, normally all of whom are members of the Academic Council, one of whom must be outside the department to serve as chair of the committee. Normally, the examining committee includes all members of the dissertation committee. A majority of those voting must be Academic Council faculty from within the department.

## Ph.D. Minor in Religious Studies

Candidates for the Ph.D. in other departments may select a Ph.D. minor in Religious Studies.

### Degree Requirements

The minor requires at least 24 units in Religious Studies at the 200 level or above. Four of the 24 units should be in:

		Units
RELIGST 304A	Theories and Methods	4
RELIGST 304B	Theories and Methods	4

### Optional Courses for the Minor

The student should choose any of the courses offered in the department at the 200 level or above, for the equivalent of at least 24 units. Other courses can be chosen in consultation with the Graduate Director.

## Faculty

*Emeriti: (Professors)* Carl W. Bielefeldt, Arnold Eisen, Bernard Faure, Hester G. Gelber, Robert C. Gregg, Van Harvey, René Girard (Courtesy Professor)

*Chair:* Paul Harrison

*Director of Graduate Study:* John Kieschnick

*Director of Undergraduate Study:* Lee Yearley

*Professors:* Shahzad Bashir, Paul Harrison, John Kieschnick, Jane Shaw, Thomas Sheehan, Lee Yearley

*Associate Professors:* Charlotte Fonrobert, Brent Sockness

*Assistant Professors:* Kathryn Gin Lum, Behnam Sadeghi

*Senior Lecturers:* Linda Hess, Barbara Pitkin

*Lecturers:* Kirsti Copeland, Alexandra Kaloyanides, Patricia Karlin-Neumann, Audrey Truschke, Yuhan S.-D. Vevaina

*Courtesy Professor:* Mark Lewis

*Courtesy Associate Professor:* Ari Y. Kelman

*Consulting Professor:* Paul Groner

*Affiliated Faculty:* Vincent Barletta (Iberian and Latin American Cultures), Jean-Pierre Dupuy (French and Italian)

## Cognate Courses

The following courses in other departments/programs have been approved by the Chair as fulfilling requirement 2 (p. ) for the bachelor's degree.

		Units
POLISCI 149S	Islam, Iran, and the West	5
HISTORY 293E	Female Divinities in China	4-5
EDUC 231X		4
PHIL 113L		5

## Overseas Studies Courses in Religious Studies

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPKYOTO 13	Contemporary Japanese Religion	4-5
OSPKYOTO 17R	Religion and Japanese Culture	4-5
OSPOXFRD 76		4
OSPMADRD 74	Islam in Spain and Europe: 1300 Years of Contact	4
OSPOXFRD 83		4

## Russian, East European and Eurasian Studies

Courses offered by the Center for Russian, East European and Eurasian Studies are listed under the subject code REES on the Stanford Bulletin's ExploreCourses web site.

The Center for Russian, East European and Eurasian Studies (CREEES) coordinates the University's teaching, research, and extracurricular activities related to Russia, Eastern Europe, Central Asia, and the Caucasus and administers a one-year interdisciplinary M.A. graduate degree program. Information on the center's degree programs and other activities is available at the CREEES (<http://CREEES.stanford.edu>) web site. CREEES and its degree programs are directed by the CREEES Steering Committee, composed of faculty members associated with the Center. The program draws on the strengths of nationally recognized area faculty and research affiliates and significant library and archival collections at Stanford. The Center is a U.S. Department of Education Title VI National Resource Center for Russia, East Europe, and Eurasia.

## Undergraduate Programs in Russian, East European and Eurasian Studies

Students interested in a minor should consult the Director of Undergraduate Studies in the Department of Slavic Languages and Literatures which offers the following relevant minors:

- Russian, East European and Eurasian Studies
- Russian Language
- Russian Language, Literature and Culture
- Russian Culture

### Slavic Theme House

Slavianskii Dom (SlavDom), at 650 Mayfield Avenue, is an undergraduate residence which houses 50 students and offers a wide variety of opportunities to expand knowledge, understanding and appreciation of Russia and the nations of East Europe, the Caucasus and Central Asia.

### Overseas Studies Programs

Undergraduates interested in the study of languages, history, culture and social organization of the countries of Russia, Eurasia and East Europe may apply to study at the Stanford centers in Istanbul and Berlin. Information about these programs is available at the Bing Overseas Studies Program (<http://bosp.stanford.edu>) at web site.

## Graduate Programs in Russian, East European and Eurasian Studies

The center offers an M.A. in Russian, East European and Eurasian Studies, a coterminal M.A. in Russian, East European and Eurasian Studies, and a joint M.A./J.D. in conjunction with the Stanford Law School.

### Learning Outcomes (Graduate)

The purpose of the master's program and the joint M.A./J.D. program is to further develop knowledge and skills in Russian, East European and Eurasian Studies and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

### Financial Aid

Subject to funding, CREEES may have a limited number of Foreign Language and Area Studies (FLAS) fellowships for U.S. citizens or permanent residents. Additional financial aid may also be available from CREEES. Applicants to the M.A. program have priority in the annual FLAS competition; in recent years CREEES has also awarded FLAS fellowships to students enrolled in the School of Education and the School of Law. Consult the CREEES associate director for further information about the application and award process. Applications for FLAS fellowships can be obtained at the CREEES (<http://CREEES.stanford.edu/grants>) web site.

## Doctoral Programs

Since the University does not offer a Ph.D. in Russian, East European and Eurasian Studies, students wishing to pursue a REEES-related doctoral program must apply to one of the departments offering a Ph.D. with an emphasis on Russia, Eurasia, or Eastern Europe, such as the departments of History, Anthropology, Political Science, or Slavic Languages and Literatures.

## Undergraduate Minor in Russian, East European, and Eurasian Studies

Students interested in a minor should consult the "Minors in Slavic Languages and Literatures (p. 634)" section of this bulletin which describes the following relevant minors:

- Russian, East European, and Eurasian Studies
- Russian Language
- Russian Language, Literature, and Culture
- Russian Culture

## Master of Arts in Russian, East European and Eurasian Studies

CREEES offers a one-year interdisciplinary master's degree program in Russian, East European and Eurasian Studies for students with a strong prior language and area studies background.

The program structure allows students the flexibility to pursue their particular academic interests, while providing intellectual cohesion through a required core curriculum that addresses historical and contemporary processes of change in the Russian Federation, Eastern Europe, the Caucasus, and Central Asia.

The core curriculum consists of three courses (one each quarter) and the REES 200 Current Issues in Russian, East European, and Eurasian Studies seminar series. The program may be taken separately or coterminally with a bachelor's degree program.

The interdisciplinary M.A. program typically serves three types of students:

1. Those who intend to apply to a Ph.D. program involving Russian, East European and Eurasian studies and who need to enhance their academic skills and credentials
2. Those who intend to pursue careers and/or advanced degrees in such fields as journalism, education, business, government, law, or medicine, and who wish to establish competence in Russian, East European and Eurasian studies.
3. Those who are mid-career professionals and/or students interested in gaining competence or continuing their interest in and wish to gain competence in Russian, East European and Eurasian studies.

## Advising

The advising structure is two-tiered: each M.A. candidate works with the CREEES associate director who advises on the program of course work and monitors the student's progress toward completing the degree. Candidates are also assigned a faculty adviser from the Academic Council faculty, who provides intellectual and academic guidance.

## Admission

Applicants apply electronically; see the Office of Graduate Admissions (<http://gradadmissions.stanford.edu>) web site for a link to the electronic application and general information regarding graduate admission. In addition, prospective applicants may consult with the CREEES associate director regarding the application process.

To qualify for admission to the program, the following apply:

1. Applicants must have earned a B.A. or B.S. degree, or the equivalent.
2. At least three years of college-level language study in Russian, an East European or Central Asian language is preferred. Candidates with fewer years of area language study will be considered.
3. A one-page statement of purpose that explains how the program would advance the applicant's academic or career goals.
4. Applicants must include the following additional materials in their online application: a writing sample of 20 pages or less in English on an academic topic in Russian, East European, or Eurasian studies and a resume of college-level courses taken that are relevant to Russian, East European & Eurasian Studies, including language courses, with self-reported final grades. These additional materials may be uploaded as "Additional Materials" in a single file along with the application.
5. Applicants must send official transcripts from all post-secondary institutions attended to CREEES.
6. All applicants must take the General Test of the Graduate Record Examination (GRE) and have the results sent to Graduate Admissions, Office of the University Registrar.
7. Applicants whose native language is not English and do not possess a U.S. bachelor's degree are expected to take the Test of English as a Foreign Language (TOEFL) and have the results sent to Graduate Admissions, Office of the University Registrar.

The deadline for submission of applications for admission and for financial aid is January 5, 2016. Admission is normally granted for Autumn quarter, but requests for exceptions are considered.

The successful applicant generally demonstrates the following strengths: requisite foreign language study, significant course work in Russian, East European and Eurasian studies in multiple disciplines, outstanding grades in previous academic work, strong analytical writing skills, high GRE scores (particularly verbal and analytical writing), study or work experience in the region, strong letters of recommendation from faculty members in the Russian, East European, and Eurasian Studies field (one letter may be from a language instructor), and a persuasive statement of purpose explaining how the program would advance the applicant's academic and career goals.

## Degree Requirements

Candidates for the M.A. degree must meet University requirements for an M.A. degree as described in the "Graduate Degrees (p. 45)" section of this bulletin.

The M.A. program in REEES can ordinarily be completed in one academic year by a well-prepared student; longer periods of study are permitted.

Requirements to complete the interdisciplinary M.A. degree are principally ones of distribution, with the exception of three required core courses and a core seminar, as described below. Each student, with the advice of the CREEES associate director, selects courses according to the student's interests, needs, and goals.

All students in the M.A. REEES program must complete a minimum of 48 academic credit units within the following guidelines.

1. *Core Courses:* Students must complete the following 3 core courses during the 2015-16 academic year for 5 units each: REES 301B History and Politics in Russian and Eastern European Cinema during Autumn Quarter (5 units), HISTORY 424A The Soviet Civilization during Winter quarter (5 units), and *either* SLAVIC 218 Modernist Journeys also in Winter Quarter or REES 313 Transformation of Socialist Societies during Spring Quarter (5 units).
2. *Core Seminar Series:* REES 200 Current Issues in Russian, East European, and Eurasian Studies is required of all students in the M.A. program in Autumn and Winter quarters (2 units total). The

goal of this seminar series is to survey current methodological and substantive issues in Russian, East European and Eurasian studies, acquaint students with Stanford resources and faculty, and present professional development and career options.

3. *Interdisciplinary Course Work*: All courses (other than language courses and approved activity courses) must be taken on the graduate level (200-level or higher). Courses in Russian, East European and Eurasian studies must be completed and distributed among at least three disciplines. All course work applied to the 48-unit minimum must deal primarily with Russian, Eurasian, or East European studies.
4. *Language Study*: Students in the program are encouraged to study Russian, an East European or Central Asian language, or a language from the Caucasus. Credit towards the 48-unit minimum (maximum 4 units per quarter, 12 units total) is allowed for advanced language work.
5. Course work qualifying for the 48-unit minimum must have a letter grade of 'B' or higher. ('B-' does not count for degree credit, nor does 'CR'). Students may apply a maximum of three units of course work with a final grade of 'S' to the 48-unit minimum. 'S' units counting towards the 48-unit minimum must be approved by the CREEES associate director.
6. All courses counting towards the 48-unit minimum must be approved by the CREEES associate director, who ensures that planned course work satisfies requirements towards the degree. The CREEES director and steering committee determine the requirements. The list of pre-approved courses for the current academic year appears below. Students can petition to have courses that do not appear on this list counted towards the degree.
7. *Capstone Requirement*: Students must complete a capstone project (research paper and/or research presentation) in consultation with a faculty advisor, the CREEES director and associate director. Students will enroll in REES 300 MA Capstone Seminar for 1 unit in Spring Quarter.

### Pre-approved courses for 2015-16

The following courses are those that have been pre-approved to satisfy the M.A. interdisciplinary course work requirement for 2015-16. Students may choose from:

		Units
HISTORY 301A	The Global Drug Wars	4-5
HISTORY 320G	Demons, Witches, Old Believers, Holy Fools, and Folk Belief: Popular Religion in Russia	4-5
HISTORY 302G	Peoples, Armies and Governments of the Second World War	4-5
HISTORY 306E/ POLISCI 316	International History and International Relations Theory	5
HISTORY 304G	War and Society	5
HISTORY 307E	Totalitarianism	4-5
HISTORY 324C	Genocide and Humanitarian Intervention	3
HISTORY 326E	Famine in the Modern World	3
HISTORY 327	East European Women and War in the 20th Century	4-5
HISTORY 330F	Surveillance in Modern Europe	4-5
HISTORY 424A	The Soviet Civilization	4-5
HISTORY 424B	The Soviet Civilization, Part 2	4-5
IPS 210	The Politics of International Humanitarian Action	3-5
ME 421	European Entrepreneurship and Innovation Thought Leaders Seminar	1
MS&E 293	Technology and National Security	3
LINGUIST 173	The Structure of Russian	2-4
REES 200	Current Issues in Russian, East European, and Eurasian Studies	1-2

REES 208C/ ARTHIST 408C	Architecture, Acoustics and Ritual in Byzantium	1-3
REES 209	Democratic Transition in Ukraine: Values, Political Culture, Conflicts	3-5
REES/HISTORY 224A	The Soviet Civilization	4-5
REES 231	Russia, the West and the Rest	4
REES 301B	History and Politics in Russian and Eastern European Cinema	5
REES 313	Transformation of Socialist Societies	3-5
REES 320	State and Nation Building in Central Asia	5
SLAVIC 218	Modernist Journeys	2-4
SLAVIC 224	The Russian Postmodern Text	2-4
SLAVIC 230	18th Century Russian Literature	5
SLAVIC 245	Slavic Literary Theory: Formalism Structuralism Semiotics, Formalism and Structuralism	2-4
SLAVIC 285	Cinematograph	3-5
SLAVIC 300B	Research Tools and Professionalization Workshop	1
SLAVIC 329	Russian Versification: History and Theory	3-4
SLAVIC 345	Survey of Russian Literature: The Age of Experiment	3-5
SLAVIC 346	The Great Russian Novel: Tolstoy and Dostoevsky	3-5
SLAVIC 348	Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin	3-5
SLAVIC 356	Nabokov in the Transnational Context	3-5
SLAVIC 370	Pushkin	2
SLAVIC 388/ HISTORY 224A	20th century Russian Poetry: From Aleksandr Blok to Joseph Brodsky	3-5
SLAVIC 395	Russian and East European Theater	3-5

This list of courses may be updated as relevant courses are offered.

Courses not appearing on this list may be counted towards the M.A. by special arrangement with the instructor and the CREEES associate director.

A description of the M.A. program is also available on the web at the CREEES (<https://creees.stanford.edu/content/ma-program>) web site and by request from the Center for Russian, East European and Eurasian Studies.

## Coterminal Master's Program in Russian, East European, and Eurasian Studies

To qualify for a coterminal M.A. degree in Russian, East European, and Eurasian Studies, besides completing University requirements for the B.A. degree, a student must:

1. Submit the Application for Admission to Coterminal Masters' Program (<https://stanford.box.com/CotermApplic>) for admission to the program by the CREEES M.A. admission deadline.
2. Include in the application a proposal which outlines, by quarter, the schedule of courses the student plans to complete toward the M.A. degree. The student should seek the advice of the CREEES associate director in drafting this schedule. The application also should include:
  - a. a current Stanford transcript
  - b. a one-page statement of purpose
  - c. three letters of recommendation from Stanford faculty (one may be from a language instructor)
  - d. a writing sample of 20 pages or less in English on an academic topic in Russian, East European, or Eurasian Studies
3. Applicants must have a grade point average (GPA) of at least 3.0 (B). Coterminal applicants must take the general test of the

Graduate Record Examination and have the results sent to Graduate Admissions, Office of the University Registrar.

4. Complete 15 full-time quarters or the equivalent, or three quarters in full-time residence after completing 180 units; and complete, in addition to the 180 units required for the bachelor's degree, a minimum of 48 units for the master's degree.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

## Joint Degree Program in Russian, East European, and Eurasian Studies

The joint degree program in Russian, East European, and Eurasian Studies and Law allows students to pursue the M.A. degree in REES concurrently with the Doctor of Jurisprudence (J.D.) degree, with a significant number of courses that may apply to both degrees. It is designed to train students interested in a career in teaching, research, or the practice of law related to REES legal affairs. Students must apply separately to the REES M.A. program and to the Stanford School of Law and be accepted by both. Completing this combined course of study requires approximately four academic years, depending on the student's background and level of language training. For more information, see the Joint Degree Programs (p. 49) section of this bulletin and the Stanford Law School (<http://www.law.stanford.edu>)'s website. Students who have been accepted by both programs should consult with the departments to determine which courses can be double-counted.

*Director of the Center:* Pavle Levi

### Affiliated Faculty and Staff:

*Anthropology:* Ewa Domanska, Alma Kunanbaeva

*Art and Art History:* Bissera Pentcheva

*Biology:* Dmitri Petrov

*Comparative Literature:* Burcu Karahan

*Economics:* Geoffrey Rothwell

*Education, School of:* Martin Carnoy

*Engineering, School of:* Margaret Brandeau, Siegfried Hecker, William Perry (emeritus)

*English:* Nancy Ruttenburg

*Freeman Spogli Institute for International Studies:* Coit Blacker, Chaim Braun, Christophe Crombez, Gail Lapidus (emerita), Kathryn Stoner

*Graduate School of Business:* Ilya Strebulaev

*History:* Robert Crews, Terence Emmons (emeritus), David Holloway, Katherine Jolluck, Nancy Kollmann, Norman Naimark, Aron Rodrigue, Edith Sheffer, Amir Weiner, Ali Yaycioglu, Steven Zipperstein

*Hoover Institute:* Elena Danielson (emerita), John Dunlop (emeritus), Timothy Garton Ash, Paul Gregory, Bertrand Patenaude, Anatol Shmelev, Maciej Siekierski

*International Policy Studies:* Eric Morris

*International Relations:* Jasmina Bojic, Robert Rakove

*Language Center:* Jara Dusatko, Shahla Fahimi, Rima Greenhill, Lessia Jarboe, Leelo Kask, Eugenia Khassina, Suzan Negip Schatt, Biseria Rakicevic, Eva Soos Szoke, Gerardina Malgorzata Szudelski

*Law, School of:* Allen Weiner

*Linguistics:* Vera Gribanova, Asya Pereltsvaig

*Medicine, School of:* Jayanta Bhattacharya, Grant Miller, Douglas Owens

*Political Science:* David Holloway, David Laitin, Michael McFaul

*Psychology:* Lera Boroditsky

*Religious Studies:* Shahzad Bashir

*Slavic Languages and Literatures:* Lazar Fleishman, Gregory Freidin (emeritus), Monika Greenleaf, Gabriella Safran, Richard Schubach (emeritus), Nariman Skakov

*Sociology:* Nancy Tuma (emerita), Patricia Young

*Stanford Humanities Center:* TBD

*Stanford Libraries:* Zachary Baker, Liisi Eglit, John Eilts, Karen Rondestvedt, Wojciech Zalewski (emeritus)

*Theater and Performance Studies:* Branislav Jakovljevic

## Science, Technology, and Society

Courses offered by the Program in Science, Technology, and Society are listed under the subject code STS on the (<https://explorecourses.stanford.edu/search?filter-term-Autumn=on&filter-catalognumber-STS=on&filter-term-Summer=on&page=0&q=STS&filter-coursestatus-Active=on&view=catalog&filter-term-Spring=on&collapse=&filter-term-Winter=on&academicYear=20142015>) ExploreCourses web site (<https://explorecourses.stanford.edu/search?filter-term-Autumn=on&filter-catalognumber-STS=on&filter-term-Summer=on&page=0&q=STS&filter-coursestatus-Active=on&view=catalog&filter-term-Spring=on&collapse=&filter-term-Winter=on&academicYear=20142015>).

## Mission of the Undergraduate Program in Science, Technology, and Society

The Program in Science, Technology, and Society (STS) aims to provide students with an interdisciplinary framework through which to understand the complex interactions of science, technology and the social world. To major in STS, students work through a common core of courses drawn from the social sciences, the humanities, the natural and physical sciences and engineering. Students pursue coursework in one of five specialized areas:

- Communication and Media
- Innovation and Organization
- Nature and Environment
- Life Sciences and Health
- Politics and Policy

Students may also undertake research in affiliated laboratories and through the honors program for course units. All students complete a capstone project, either by taking one of the senior capstone courses (STS 200) or by applying for and completing an STS honors thesis. Students are encouraged to pursue mastery in at least one field from within the humanities or social sciences and at least one field from within the sciences or engineering. Majors may declare either a B.A. or a B.S. degree (see the specific requirements for each degree).

The Program's affiliated faculty represent over a dozen departments, including Anthropology, Communication, Computer Science, Education, Electrical Engineering, History, Law, Management Science and Engineering, Political Science and Sociology. By learning to bring such a rich collection of disciplinary approaches to bear on questions of science and technology, students graduate uniquely equipped to succeed in professions that demand fluency with both technical and social frameworks. Recent graduates of STS have entered top-ranked Ph.D. and MBA programs and forged successful careers in a variety of fields, including business, engineering, law, public service, medicine and academia.

## Learning Outcomes (Undergraduate)

The Program expects undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Program in Science, Technology, and Society. Students are expected to demonstrate:

1. A knowledge of core theories and methods in the interdisciplinary field of STS.
2. An ability to deploy these theories and methods to analyze interactions between science, technology and society in particular historical and cultural contexts.
3. An ability to critically evaluate empirical evidence and theoretical claims in STS-related debates.
4. An ability to communicate clearly and persuasively about STS issues to a general audience in multiple media including oral presentation and writing.

## Advising and Course Selection

The Program in Science, Technology, and Society offers an advising process that includes faculty, staff and peer advisers. Prospective majors must first meet with a peer adviser and then with the Program's Student Services Officer to determine which degree they will pursue (the B.A. or B.S.) and how they will fulfill the Program's basic requirements. When they are ready to declare, they meet with the Program's Student Services Officer to submit their degree plan and then the Associate Director reviews the coursework for intellectual coherence. Majors are then assigned to a faculty adviser who serves as an intellectual mentor and helps them identify the core questions driving their interest in the field.

The Program also sponsors a wide variety of events designed to help students meet their colleagues and Program alumni, discover research and internship opportunities, and make their way toward the career of their choice.

## STS Core

The program offers a Bachelor of Arts and Bachelor of Science in Science, Technology, and Society. Both degree programs require that the student complete the STS Core.

### Units

With a grade of C or higher in each course, complete 8 courses satisfying the following requirements:

### A. Gateway Requirement

STS 1	The Public Life of Science and Technology	4
-------	---	---

**B. Disciplinary Requirement: six courses, one of these courses must be a STS WIM course and at least one of these courses must be a STS Global course.** Note 1 & 2

1. Social Sciences and Humanities Courses (complete 4 courses) Note 3 & 4 13-20

ANTHRO 41	Genes and Identity	
ANTHRO 90C	Theory of Ecological and Environmental Anthropology	
ANTHRO 126	Urban Culture in Global Perspective	
ANTHRO 138	Medical Ethics in a Global World: Examining Race, Difference and Power in the Research Enterprise	
ANTHRO 186	Culture and Madness	
CLASSICS 151	Ten Things: An Archaeology of Design	
COMM 120W	Digital Media in Society	
COMM 142W	Media Economics	
ECON 106	World Food Economy	
EDUC 120	Sociology of Science	
HISTORY 44Q	Gendered Innovations in Science, Medicine, Engineering, and Environment	
HISTORY 131	Leonardo's World: Science, Technology, and Art in the Renaissance	
HISTORY 140	World History of Science	
HISTORY 140A	The Scientific Revolution	
HISTORY 144	Women and Gender in Science, Medicine and Engineering	
HISTORY 203J	Water in World History	
HISTORY 232F	The Scientific Revolution	
PHIL 60	Introduction to Philosophy of Science	
POLISCI 233F	Science, technology and society and the humanities in the face of the looming disaster	
RELIGST 31	The Religious Life of Things	
SOC 114	Economic Sociology	

2. Engineering and Science Courses (complete 2 courses) 6-10

CEE 64	Air Pollution and Global Warming: History, Science, and Solutions	
CEE 146A	Engineering Economy	
CS 181W	Computers, Ethics, and Public Policy	
ENGR 131	Ethical Issues in Engineering	
HUMBIO 173	Science, Innovation and the Law	
ME 214	Good Products, Bad Products	
MS&E 193	Technology and National Security	
MS&E 197	Ethics, Technology, and Public Policy	

### C. Senior Requirement

4-10

STS 200A	Food and Society: Politics, Culture and Technology	
	or STS 200D Text Technologies: A History	

or STS 200H Ethics, Science, & Technology  
 or STS 200J Advanced Topics in Agnotology  
 or STS 200K Sciences of Learning

STS 299      Advanced Individual Work

Total Units      27-44

<sup>1</sup>WIM courses: ANTHRO 90C, COMM 120W, CS 181W, HISTORY 140A, HISTORY 232F, MS&E 193 or MS&E 197

<sup>2</sup>Global courses: ANTHRO 41, ANTHRO 126, ANTHRO 138, ANTHRO 186, ECON 106, HISTORY 131, HISTORY 140, HISTORY 44Q, HISTORY 144, HISTORY 203J, HISTORY 208A, CEE 64, POLISCI 233F

<sup>3</sup>May only take HISTORY 140A or HISTORY 232F

<sup>4</sup>May only take HISTORY 144 or HISTORY 44Q

## Concentration Area

In addition to the Core requirements common to all STS students, a minimum of 50 units, at least twelve courses, are required from among those designated on the appropriate Concentration Area course list (available in the Related Courses tab and on the STS website). All courses must be taken for a letter grade if offered and may not be double-counted with core coursework. Students may count no more than two course petitions outside the list of approved Concentration Area courses toward their STS degree plan. Thematic concentrations are organized around an STS-related area or topic:

1. Communication and Media
2. Innovation and Organization
3. Nature and Environment
4. Life Sciences and Health
5. Politics and Policy
6. Self-Designed Concentration

A student pursuing a Bachelor of Arts degree must take at least 8 classes from the Socio-Cultural Course menus, including at least 3 designated as Foundational, and at least 4 classes from the Technical Course menus.

A student pursuing a Bachelor of Science degree must take at least 8 classes from the Technical Course menu, and at least 4 classes from the Socio-Cultural Course menus, including at least 3 designated as Foundational.

Students in both degree programs are encouraged to pursue sequences of courses that build on one another to increase the coherence of their program and give depth to their skill set and knowledge related to STS.

Alternatively, subject to program approval, a student may choose to design a self-designed concentration. Students interested in designing their own concentration must work with the associate director and have their proposal approved at least 2 quarters prior to your graduating quarter. A proposal (5 to 10 pages) should (a) describe your intellectual objectives in detail, (b) explain why a self-designed concentration is the optimal way to pursue these objectives (as opposed to the five STS concentrations or other majors at Stanford), and (c) list at least 12 courses and 50 units that comprise the plan of study. Students with a self-designed concentration must fulfill the same core requirements as other STS students. More information can be found on the STS website (<https://sts.stanford.edu/major-sts/thematic-concentrations>).

Each student's Concentration Area, certified or self-designed, requires the approval of the STS Associate Director.

## Honors Program

The Stanford Program in Science, Technology, and Society (STS) invites STS majors to apply for admission to its Honors Program. An honors project is equivalent to a capstone course and one Socio-Cultural concentration course. Since the program was launched in 1978, STS honors students have carried out a wide array of innovative research projects. Honors projects present a unique undergraduate opportunity to pursue one's intellectual interests in depth, work closely with a faculty adviser, and develop a new set of research and analytical skills that are broadly applicable. STS honors signals expertise in a given field, organizational skills, and intellectual rigor, and students have used them as a springboard for graduate studies and for careers in fields such as information technology, entrepreneurship, finance, public policy, media, education, law, medicine, and the nonprofit sector. Often, the thesis project proves to be among the most rewarding and memorable experiences in a student's academic career at Stanford, as well as an important intellectual milestone. An STS honors thesis tackles a significant problem or question related to a particular area of STS. Students draw research methods from one or more of the disciplines that shape STS, such as history, sociology, communication, anthropology, environmental science, computer programming/modeling, engineering, economics, political science, and art history. Past honors projects are on file in the STS office library.

### Honors Program Eligibility and Admission Criteria

To be eligible to apply for the honors program, students must meet the following criteria at the beginning of their senior year:

1. Find an honors faculty adviser and develop research questions, methodology and plan
2. Attend at least one of the quarterly STS workshops offered for prospective honors students, take STS 191: Introduction to Research in STS, or speak with the STS Associate Director
3. Submit a complete honors program application and research proposal

For application and proposal parameters, see the document STS Honors Program, available on the STS web site.

### Honors Degree Requirements

To graduate with honors, seniors in the honors program must meet the following criteria:

1. Attend required monthly workshops for current STS honors students
2. Develop an original and complete thesis in consultation with honors faculty adviser
3. Submit a first draft of thesis to honors adviser no later than April 1
4. Submit the final thesis to honors adviser by May 1
5. Earn at least a grade of 'B' on final thesis
6. Have an overall Stanford GPA of 3.4 at the end of Winter Quarter, senior year, or demonstrated academic competence

As of September 1, 2012, STS is no longer admitting non-majors to the honors program.

## Interdisciplinary Honors in Science Technology, and Society

The Program in Science, Technology, and Society (STS) offers an opportunity for undergraduates to graduate with Interdisciplinary Honors

in STS. To achieve interdisciplinary honors, admitted students conduct research that addresses questions related to the relationships and interactions among science, technology, and society. The honors program is open to STS majors as well as students majoring in cognate fields. (Program majors interested in the departmental honors program should see the Bachelor's tab (p. 620) of this section.)

Students accepted into the program carry out an honors project. (This project also fulfills the requirements for a capstone course and one sociocultural concentration course for STS majors.) An STS honors thesis tackles a significant problem or question related to a particular area of STS. Students draw research methods from one or more of the disciplines that shape STS, such as history, sociology, communication, anthropology, environmental science, computer programming/modeling, engineering, economics, political science, and art history. STS interdisciplinary honors signals expertise in a given field, organizational skills, and intellectual rigor, and students have used it as a springboard for graduate studies and for careers in fields such as information technology, entrepreneurship, finance, public policy, media, education, law, medicine, and the nonprofit sector. Past honors projects are on file in the STS office library.

### Admission

Students may apply to the interdisciplinary honors program during the Spring Quarter of their junior year and up to October 1 of their senior year.

### For Majors in Science, Technology, and Society

In preparation for applying to the honors program in STS, students should:

1. Select an area of research interest in STS, prepare related research questions, and identify potential faculty advisers for the honors thesis.
2. Attend one or more of the quarterly STS workshops offered for prospective honors students, and/or take STS 191 Introduction to Research in STS, and/or speak with the STS Associate Director.
3. Submit an honors program application, following the application and proposal parameters set out at STS Honors Program (<https://sts.stanford.edu/major-sts/honors-program>) web site.

### For Majors in Other Departments and Programs

In preparation for applying, non-majors should:

1. Select an area of research interest in STS, prepare related research questions, and identify potential faculty advisers for the honors thesis
2. Attend one or more of the quarterly STS workshops offered for prospective honors students, and/or take STS 191 Introduction to Research in STS (offered Winter Quarter), and/or an alternative course on research methods approved by the STS Associate Director.
  - Non-majors are encouraged to speak with the Associate Director as early as possible to ensure that they have sufficient background in relevant methodology.
3. Satisfy one of:
  - Complete STS 1 The Public Life of Science and Technology, and either two courses approved as sociocultural foundational courses in STS, or two alternative courses approved by the STS Associate Director as relevant to the proposed honors research in STS; or
  - Complete three courses approved by the STS Associate Director as relevant to the proposed honors research in STS
4. Submit an honors program application, following the application and proposal parameters set out at the STS Honors Program (<https://sts.stanford.edu/major-sts/honors-program>) web site.

### Interdisciplinary Honors Requirements

To graduate with Interdisciplinary Honors in STS, seniors in the honors program must meet the following criteria:

1. Enroll in STS 299 with honors faculty advisor for a minimum of 10 units total, up to 5 units per quarter, over Autumn, Winter and Spring quarters
2. Attend required monthly workshops for current STS honors students
3. Develop an original and complete thesis in consultation with honors faculty adviser
  - A first draft of the thesis should be submitted to the honors adviser by April 1 of the honors year.
  - Final version of the thesis is due on May 1.
4. Earn at least a grade of 'B' on final thesis.
5. Have an overall Stanford GPA of 3.4 at the end of Winter Quarter, senior year, or demonstrated academic competence

### Minor in Science, Technology, and Society

The program no longer offers a minor. Students currently enrolled in the minor should consult the Stanford Bulletin 2011-12 (<http://www.stanford.edu/dept/registrar/bulletin1112/6074.htm>) for degree requirements.

### STS Affiliated Faculty

*Director and Professor of Education:* John Willinsky

*Associate Director:* Kyoko Sato

*Executive Board:* Paula Findlen (History), Duana Fullwiley (Anthropology), Mark Granovetter (Sociology), Hank Greely (Law), Sarah Lochlann Jain (Anthropology), Robert McGinn (Management Science and Engineering), Brad Osgood (Electrical Engineering), Eric Roberts (Computer Science), Scott Sagan (Political Science), Fred Turner (Communication), John Willinsky (Education)

*Affiliated Faculty and Staff:* Jeremy Bailenson (Communication), Adam Banks (Graduate School of Education), Thomas Byers (Management Science and Engineering), Jean-Pierre Dupuy (French), Paula Findlen (History), Duana Fullwiley (Anthropology), Mark Granovetter, (Sociology), Hank Greely (Law), Ann Grimes (Communication), James T. Hamilton (Communication), Martin Hellman (Electrical Engineering, Emeritus), Hector Hoyos (Iberian and Latin American Cultures), Miyako Inoue (Anthropology), Sarah Lochlann Jain (Anthropology), Robert Laughlin (Physics), Pamela Lee (Art and Art History), Sandra Soo-Jin Lee (Biomedical Ethics), Helen Longino (Philosophy), Henry Lowood (Stanford University Libraries), Robert McGinn (Management Science and Engineering), Thomas Mullaney (History), Brad Osgood (Electrical Engineering), Walter Powell (Education), Robert Proctor (History), Jessica Riskin (History), Eric Roberts (Computer Science), Scott Sagan (Political Science), Kyoko Sato (STS), Londa Schiebinger (History), Michael Shanks (Classics, Anthropology), Mitchell Stevens (Education), Elaine Treharne (English), Fred Turner (Communication), John Willinsky (Education)

*Emeriti:* James Adams (Management Science and Engineering, Mechanical Engineering), Barton Bernstein (History), Walter Vincenti (Aeronautics and Astronautics)

### Thematic Concentrations Course Lists

#### Communication and Media

Thematic concentration in Communication and Media:

#### Socio-Cultural Courses

AMSTUD 143X Starstuff: Space and the American Imagination

Units

ARTHIST 157A	Histories of Photography
ARTHIST 164A	Technology and the Visual Imagination
ARTHIST 245	Art, Business & the Law
ARTHIST 263B	The View through the Windshield: Cars and the American Landscape
ARTSTUDI 236	Future Media, Media Archaeologies
ARTSTUDI 285	Topics in Media Studies: Street Media
COMM 1A	Mass Media, Society, and Democracy
COMM 106	Communication Research Methods
COMM 108	Media Processes and Effects
COMM 120W	Digital Media in Society
COMM 137W	The Dialogue of Democracy
COMM 140	Digital Media Entrepreneurship
COMM 142W	Media Economics
COMM 166	Virtual People
COMM 169	Computers and Interfaces
COMM 172	Media Psychology
COMPLIT 271A	Futurity: Why the Past Matters
CS 181	Computers, Ethics, and Public Policy
CS 546	Seminar on Liberation Technologies
ECON 153	Economics of the Internet
EDUC 120	Sociology of Science
EDUC 226	Curating Experience: Representation in and beyond Museums
EDUC 358	Learning, Sharing, Publishing, and Intellectual Property
ENGLISH 202	History of the Book
ENGR 110	Perspectives in Assistive Technology (ENGR 110)
ENGR 131	Ethical Issues in Engineering
ENGR 145	Technology Entrepreneurship
FILMSTUD 110	Science Fiction Cinema
GERMAN 154	Poetic Thinking Across Media
HISTORY 205A	The History of Information
MS&E 180	Organizations: Theory and Management
MS&E 197	Ethics, Technology, and Public Policy
OSPBEIJ 17	Chinese Film Studies
OSPBEIJ 20	Communication, Culture, and Society: The Chinese Way
OSPBEIJ 42	Chinese Media Studies
OSPFLOR 48	Sharing Beauty in Florence: Collectors, Collections and the Shaping of the Western Museum Tradition
OSPFLOR 49	On-Screen Battles: Filmic Portrayals of Fascism and World War II
OSPMADR 45	Women in Art: Case Study in the Madrid Museums
OSPMADR 71	Sociology of Communication
OSPOXFRD 57	The Rise of the Woman Writer 1660-1860
OSPPARIS 30	The Avant Garde in France through Literature, Art, and Theater
PSYCH 30	Introduction to Perception
PSYCH 75	Introduction to Cultural Psychology
RELIGST 31	The Religious Life of Things
STS 140	Science, Technology and Politics
STS 160Q	Technology in Contemporary Society
STS 191	Introduction to Research in STS
SYMSYS 100	Minds and Machines
SYMSYS 245	Cognition in Interaction Design
<b>Technical Courses</b>	
ARTSTUDI 160	Intro to Digital / Physical Design

ARTSTUDI 177	Video Art I
ARTSTUDI 179	Digital Art I
ARTSTUDI 275	Introduction to Digital Photography and Visual Images
CEE 112A	Industry Applications of Virtual Design & Construction
CME 108	Introduction to Scientific Computing
CS 105	Introduction to Computers
CS 106A	Programming Methodology
CS 106B	Programming Abstractions
CS 106X	Programming Abstractions (Accelerated)
CS 107	Computer Organization and Systems
CS 108	Object-Oriented Systems Design
CS 109	Introduction to Probability for Computer Scientists
CS 110	Principles of Computer Systems
CS 124	From Languages to Information
CS 144	Introduction to Computer Networking
CS 145	Introduction to Databases
CS 147	Introduction to Human-Computer Interaction Design
CS 148	Introduction to Computer Graphics and Imaging
CS 224W	Social Information and Network Analysis
CS 247	Human-Computer Interaction Design Studio
CS 248	Interactive Computer Graphics
CS 255	Introduction to Cryptography
CS 376	Human-Computer Interaction Research
EE 101A	Circuits I
EE 101B	Circuits II
EE 102A	Signal Processing and Linear Systems I
EE 102B	Signal Processing and Linear Systems II
EE 108	Digital System Design
EE 168	Introduction to Digital Image Processing
EE 169	Introduction to Bioimaging
EE 180	Digital Systems Architecture
ENGR 40P	Physics of Electrical Engineering
FILMSTUD 6	Introduction to Digital Media
MS&E 107	Interactive Management Science
MS&E 111	Introduction to Optimization
MS&E 120	Probabilistic Analysis
MS&E 130	Information Networks and Services
MUSIC 220A	Fundamentals of Computer-Generated Sound
MUSIC 220B	Compositional Algorithms, Psychoacoustics, and Computational Music
MUSIC 254	Music Query, Analysis, and Style Simulation
MUSIC 257	Neuroplasticity and Musical Gaming

## Innovation and Organization

Thematic concentration in Innovation and Organization:

### Socio-Cultural Courses

ANTHRO 41	Genes and Identity
ANTHRO 136	The Anthropology of Global Supply Chains
ARTHIST 147	MODERNISM AND MODERNITY
ARTHIST 263B	The View through the Windshield: Cars and the American Landscape
ARTSTUDI 236	Future Media, Media Archaeologies
BIO 182	Modeling Cultural Evolution

Units

CEE 32B	Design Theory
CLASSICS 151	Ten Things: An Archaeology of Design
COMM 140	Digital Media Entrepreneurship
COMM 169	Computers and Interfaces
CS 181	Computers, Ethics, and Public Policy
CS 546	Seminar on Liberation Technologies
ECON 113	Economics of Innovation
ECON 116	American Economic History
ECON 118	Development Economics
ECON 145	Labor Economics
ECON 153	Economics of the Internet
ECON 158	Regulatory Economics
EDUC 120	Sociology of Science
ENGR 145	Technology Entrepreneurship
HISTORY 1C	Global History: Empires, Technology, and Modernity
HISTORY 44Q	Gendered Innovations in Science, Medicine, Engineering, and Environment
HISTORY 131	Leonardo's World: Science, Technology, and Art in the Renaissance
HISTORY 140	World History of Science
HISTORY 140A	The Scientific Revolution
HISTORY 144	Women and Gender in Science, Medicine and Engineering
HISTORY 203C	History of Ignorance
HISTORY 219C	Science, Technology, and Modernity in the Soviet Union
HISTORY 232F	The Scientific Revolution
HUMBIO 173	Science, Innovation and the Law
ME 120	History and Philosophy of Design
ME 177	Global Engineers' Education
ME 214	Good Products, Bad Products
ME 297	Forecasting for Innovators: Technology, Tools & Social Change
MS&E 175	Innovation, Creativity, and Change
MS&E 177	Creativity Rules
MS&E 180	Organizations: Theory and Management
MS&E 185	Global Work
MS&E 197	Ethics, Technology, and Public Policy
OSPBER 115X	The German Economy: Past and Present
OSPBER 126X	A People's Union? Money, Markets, and Identity in the EU
OSPBER 161X	The German Economy in the Age of Globalization
OSPCPTWN 36	The Archaeology of Southern African Hunter Gatherers
OSPFLOR 17	The Evolution of Modern Italian Design
OSPFLOR 20	Design Driven Innovation: Italian Excellence
OSPFLOR 41	The Florentine Sketchbook: A Visual Arts Practicum
OSPFLOR 48	Sharing Beauty in Florence: Collectors, Collections and the Shaping of the Western Museum Tradition
OSPFLOR 58	Space as History: Social Vision and Urban Change
OSPFLOR 115Y	Building the Cathedral and the Town Hall: Constructing and Deconstructing Symbols of a Civilization
OSPISTAN 62	Business Policy and Strategy in a Global Environment
OSPKYOTO 54	Innovation in Japan's Old and New Industries
OSPMADRDR 45	Women in Art: Case Study in the Madrid Museums
OSPMADRDR 71	Sociology of Communication
OSPPARIS 30	The Avant Garde in France through Literature, Art, and Theater
OSPPARIS 44	EAP: Analytical Drawing and Graphic Art
OSPPARIS 72	The Ceilings of Paris
OSPPARIS 92	Building Paris: Its History, Architecture, and Urban Design

MUSIC 257	Neuroplasticity and Musical Gaming

## Nature and Environment

Thematic concentration in Nature and Environment:

### Socio-Cultural Courses

AMSTUD 143X	Starstuff: Space and the American Imagination
ANTHRO 90C	Theory of Ecological and Environmental Anthropology
ANTHRO 126	Urban Culture in Global Perspective
ANTHRO 147	Nature, Culture, Heritage
ANTHRO 160	Social and Environmental Sustainability: The Costa Rican Case
ANTHRO 162	Indigenous Peoples and Environmental Problems
ANTHRO 166	Political Ecology of Tropical Land Use: Conservation, Natural Resource Extraction, and Agribusiness
ANTHRO 169	The Ecology of Cuisine: Food, Nutrition, and the Evolution of the Human Diet
ANTHRO 170	Australian Ecosystems: Human Dimensions and Environmental Dynamics
ARTHIST 263B	The View through the Windshield: Cars and the American Landscape
EARTHSYS 61C	Food and security
EARTHSYS 105	Food and Community: New Visions for a Sustainable Future
EARTHSYS 112	Human Society and Environmental Change
EARTHSYS 121	Building a Sustainable Society: New Approaches for Integrating Human and Environmental Priorities
EARTHSYS 181	Urban Agriculture in the Developing World
EARTHSYS 185	Feeding Nine Billion
ECON 106	World Food Economy
ECON 155	Environmental Economics and Policy
EDUC 120	Sociology of Science
ENGLISH 168	Imagining the Oceans
GERMAN 285	Environmentalism, Literature and Cultural Criticism

HISTORY 1C	Global History: Empires, Technology, and Modernity
HISTORY 131	Leonardo's World: Science, Technology, and Art in the Renaissance
HISTORY 140	World History of Science
HISTORY 140A	The Scientific Revolution
HISTORY 203C	History of Ignorance
HISTORY 203J	Water in World History
HISTORY 207G	The Age of Discovery: Maritime Science and Empire, 1400-1850
HISTORY 232F	The Scientific Revolution
HISTORY 254	Popular Culture and American Nature
HISTORY 278S	The Ethical Challenges of Climate Change
HUMBIO 2B	Culture, Evolution, and Society
HUMBIO 4B	Environmental and Health Policy Analysis
ME 297	Forecasting for Innovators: Technology, Tools & Social Change
MS&E 92Q	International Environmental Policy
OSPBER 115X	The German Economy: Past and Present
OSPCPTWN 36	The Archaeology of Southern African Hunter Gatherers
OSPKYOTO 45	Japan's Energy-Environment Conundrum
OSPPARIS 91	Globalization and Its Effect on France and the European Union
OSPSANTG 29	Sustainable Cities: Comparative Transportation Systems in Latin America
OSPSANTG 71	Santiago: Urban Planning, Public Policy, and the Built Environment
PHIL 60	Introduction to Philosophy of Science
POLISCI 110G	Governing the Global Economy
POLISCI 233F	Science, technology and society and the humanities in the face of the looming disaster
SIW 116	International Environmental Policy
STS 140	Science, Technology and Politics
STS 190	Issues in Technology and the Environment
STS 191	Introduction to Research in STS
URBANST 164	Sustainable Cities
<b>Technical Courses</b>	
BIO 43	Plant Biology, Evolution, and Ecology
BIO 101	Ecology
BIO 144	Conservation Biology: A Latin American Perspective
BIOHOPK 172H	Marine Ecology: From Organisms to Ecosystems
BIOHOPK 187H	Sensory Ecology
CEE 64	Air Pollution and Global Warming: History, Science, and Solutions
CEE 70	Environmental Science and Technology
CEE 100	Managing Sustainable Building Projects
CEE 107A	Understanding Energy
CEE 120A	Building Information Modeling Workshop
CEE 124	Sustainable Development Studio
CEE 176A	Energy Efficient Buildings
CEE 176B	Electric Power: Renewables and Efficiency
CEE 272R	Modern Power Systems Engineering
EARTHSYS 101	Energy and the Environment
EARTHSYS 102	Renewable Energy Sources and Greener Energy Processes
EARTHSYS 104	The Water Course
EARTHSYS 155	Science of Soils

### Units

EARTHSYS 180	Principles and Practices of Sustainable Agriculture
ENERGY 104	Sustainable Energy for 9 Billion
ENERGY 120	Fundamentals of Petroleum Engineering
ENERGY 160	Modeling Uncertainty in the Earth Sciences
ENGR 25E	Energy: Chemical Transformations for Production, Storage, and Use
ENGR 30	Engineering Thermodynamics
MATSCI 154	Thermodynamic Evaluation of Green Energy Technologies
MATSCI 156	Solar Cells, Fuel Cells, and Batteries: Materials for the Energy Solution
OSPAUSTL 10	Coral Reef Ecosystems
OSPAUSTL 25	Freshwater Systems
OSPAUSTL 30	Coastal Forest Ecosystems
OSPSANTG 85	Marine Ecology of Chile and the South Pacific
PHYSICS 240	Introduction to the Physics of Energy
PHYSICS 241	Introduction to Nuclear Energy

## Life Sciences and Health

Thematic concentration in Life Sciences and Health:

### Social-Cultural Courses

AMSTUD 156H	Women and Medicine in US History: Women as Patients, Healers and Doctors
ANTHRO 15	Sex and Gender
ANTHRO 41	Genes and Identity
ANTHRO 82	Medical Anthropology
ANTHRO 138	Medical Ethics in a Global World: Examining Race, Difference and Power in the Research Enterprise
ANTHRO 169	The Ecology of Cuisine: Food, Nutrition, and the Evolution of the Human Diet
ANTHRO 177	Environmental Change and Emerging Infectious Diseases
ANTHRO 186	Culture and Madness
ARTSTUDI 284	Art and Biology
BIOE 131	Ethics in Bioengineering
EDUC 120	Sociology of Science
EDUC 340	Psychology and American Indian Mental Health
FRENCH 219	The Renaissance Body in French Literature and Medicine
GENE 104Q	Law and the Biosciences
HISTORY 41Q	Madwomen: The History of Women and Mental Illness in the U.S.
HISTORY 44Q	Gendered Innovations in Science, Medicine, Engineering, and Environment
HISTORY 130A	In Sickness and In Health: Medicine and Society in the United States: 1800-Present
HISTORY 140	World History of Science
HISTORY 144	Women and Gender in Science, Medicine and Engineering
HISTORY 203C	History of Ignorance
HISTORY 243C	People, Plants, and Medicine: Atlantic World Amerindian, African, and European Science
HISTORY 243G	Tobacco and Health in World History
HISTORY 264G	The Social History of Mental Illness in the United States
HUMBIO 2B	Culture, Evolution, and Society
HUMBIO 3B	Behavior, Health, and Development

HUMBIO 4B	Environmental and Health Policy Analysis
HUMBIO 122S	Social Class, Race, Ethnicity, and Health
HUMBIO 174	Foundations of Bioethics
MED 157	Foundations for Community Health Engagement
OSPFLOR 85	Bioethics: the Biotechnological Revolution, Human Rights and Politics in the Global Era
OSPMADRD 57	Health Care: A Contrastive Analysis between Spain and the U.S.
OSPMADRD 72	Issues in Bioethics Across Cultures
OSPOXFRD 27	Medical Ethics through Literature and Film
OSPPARIS 153X	Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time
PHIL 60	Introduction to Philosophy of Science
PHIL 63S	Introduction to Bioethics
PHIL 167B	Philosophy, Biology, and Behavior
POLISCI 216E	International History and International Relations Theory
PSYCH 30	Introduction to Perception
PSYCH 75	Introduction to Cultural Psychology
PUBLPOL 122	Biosecurity and Bioterrorism Response
RELIGST 22	Method in the Sciences of Nature and Society
STS 140	Science, Technology and Politics
STS 190	Issues in Technology and the Environment
STS 191	Introduction to Research in STS

### Units

### Technical Courses

BIO 41	Genetics, Biochemistry, and Molecular Biology
BIO 42	Cell Biology and Animal Physiology
BIO 43	Plant Biology, Evolution, and Ecology
BIO 44X	Core Molecular Biology Laboratory
BIO 44Y	Core Plant Biology & Eco Evo Laboratory
BIO 109A	The Human Genome and Disease
BIO 109B	The Human Genome and Disease: Genetic Diversity and Personalized Medicine
BIO 144	Conservation Biology: A Latin American Perspective
BIO 150	Human Behavioral Biology
BIOE 44	Fundamentals for Engineering Biology Lab
BIOE 80	Introduction to Bioengineering (Engineering Living Matter)
BIOE 101	Systems Biology
BIOE 103	Systems Physiology and Design
BIOE 115	Computational Modeling of Microbial Communities
CHEM 31A	Chemical Principles I
CHEM 31B	Chemical Principles II
CHEM 31X	Chemical Principles Accelerated
CHEM 33	Structure and Reactivity
CHEM 35	Synthetic and Physical Organic Chemistry
CHEM 130	Organic and Bio-organic Chemistry Laboratory
CHEM 131	Organic Polyfunctional Compounds
CHEM 135	Physical Biochemistry
CHEM 171	Physical Chemistry I
COMP MED 87Q	Introduction to the Mouse in Biomedical Research
EE 102A	Signal Processing and Linear Systems I
EE 102B	Signal Processing and Linear Systems II
EE 169	Introduction to Bioimaging
HUMBIO 2A	Genetics, Evolution, and Ecology
HUMBIO 3A	Cell and Developmental Biology
HUMBIO 4A	The Human Organism

OSPAUSTL 10	Coral Reef Ecosystems
OSPAUSTL 25	Freshwater Systems
OSPAUSTL 30	Coastal Forest Ecosystems
OSPSANTG 85	Marine Ecology of Chile and the South Pacific

## Politics and Policy

Thematic concentration in Politics and Policy:

### Socio-Cultural Courses

AMSTUD 143X	Starstuff: Space and the American Imagination
ANTHRO 166	Political Ecology of Tropical Land Use: Conservation, Natural Resource Extraction, and Agribusiness
COMM 133	Need to Know: The Tension between a Free Press and National Security Decision Making
COMPLIT 171	Ethics of Jihad
COMPLIT 271A	Futurity: Why the Past Matters
CS 181	Computers, Ethics, and Public Policy
EARTHSYS 61C	Food and security
ECON 106	World Food Economy
EDUC 120	Sociology of Science
FRENCH 122	Nation in Motion: Film, Race and Immigration in Contemporary French Cinema
GERMAN 132	Dynasties, Dictators and Democrats: History and Politics in Germany
GERMAN 264	Post-Cold War German Foreign Policy
HISTORY 1C	Global History: Empires, Technology, and Modernity
HISTORY 102	History of the International System
HISTORY 103F	The Changing Face of War: Introduction to Military History
HISTORY 140	World History of Science
HISTORY 203C	History of Ignorance
HISTORY 203J	Water in World History
HISTORY 207G	The Age of Discovery: Maritime Science and Empire, 1400-1850
HISTORY 219C	Science, Technology, and Modernity in the Soviet Union
HISTORY 235	The Renaissance of War: Politics, Technology, and War in Late Medieval and Renaissance Italy
HISTORY 261G	Presidents and Foreign Policy in Modern History
HUMBIO 173	Science, Innovation and the Law
INTNLREL 140A	International Law and International Relations
INTNLREL 140C	The U.S., U.N. Peacekeeping, and Humanitarian War
INTNLREL 180A	Transitional Justice, Human Rights, and International Criminal Tribunals
IPS 203	Issues in International Economics
IPS 219	Intelligence and National Security
IPS 250	International Conflict Resolution
MS&E 193	Technology and National Security
MS&E 197	Ethics, Technology, and Public Policy
OSPCPTWN 43	Public and Community Health in Sub-Saharan Africa
OSPFLOR 49	On-Screen Battles: Filmic Portrayals of Fascism and World War II
OSPKYOTO 45	Japan's Energy-Environment Conundrum
OSPMADRDR 57	Health Care: A Contrastive Analysis between Spain and the U.S.

OSPPARIS 91	Globalization and Its Effect on France and the European Union
OSPPARIS 153	Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time
OSPSANTG 71	Santiago: Urban Planning, Public Policy, and the Built Environment

### Technical Courses

CHEM 31A	Chemical Principles I
CHEM 31B	Chemical Principles II
CHEM 31X	Chemical Principles Accelerated
CHEM 33	Structure and Reactivity
CHEM 35	Synthetic and Physical Organic Chemistry
CS 105	Introduction to Computers
CS 106A	Programming Methodology
CS 106B	Programming Abstractions
CS 106X	Programming Abstractions (Accelerated)
CS 107	Computer Organization and Systems
CS 108	Object-Oriented Systems Design
CS 109	Introduction to Probability for Computer Scientists
CS 110	Principles of Computer Systems
CS 255	Introduction to Cryptography
MS&E 93Q	Nuclear Weapons, Energy, Proliferation, and Terrorism
MS&E 107	Interactive Management Science
PHYSICS 41	Mechanics
PHYSICS 42	Classical Mechanics Laboratory
PHYSICS 43	Electricity and Magnetism
PHYSICS 240	Introduction to the Physics of Energy
PHYSICS 241	Introduction to Nuclear Energy

## Overseas Studies Courses in Science, Technology, and Society

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students

should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPAUSTL 10	Coral Reef Ecosystems	3
OSPAUSTL 25	Freshwater Systems	3
OSPAUSTL 30	Coastal Forest Ecosystems	3
OSPBEIJ 17	Chinese Film Studies	4
OSPBEIJ 20	Communication, Culture, and Society: The Chinese Way	4
OSPBEIJ 42	Chinese Media Studies	4
OSPBER 115X	The German Economy: Past and Present	4-5
OSPBER 126X	A People's Union? Money, Markets, and Identity in the EU	4-5
OSPBER 161X	The German Economy in the Age of Globalization	4-5
OSPCPTWN 36	The Archaeology of Southern African Hunter Gatherers	4
OSPCPTWN 43	Public and Community Health in Sub-Saharan Africa	4
OSPFLOR 17	The Evolution of Modern Italian Design	4
OSPFLOR 41	The Florentine Sketchbook: A Visual Arts Practicum	4
OSPFLOR 48	Sharing Beauty in Florence: Collectors, Collections and the Shaping of the Western Museum Tradition	4
OSPFLOR 49	On-Screen Battles: Filmic Portrayals of Fascism and World War II	5
OSPFLOR 58	Space as History: Social Vision and Urban Change	4
OSPFLOR 85	Bioethics: the Biotechnological Revolution, Human Rights and Politics in the Global Era	4
OSPFLOR 115Y	Building the Cathedral and the Town Hall: Constructing and Deconstructing Symbols of a Civilization	4
OSPISTAN 62	Business Policy and Strategy in a Global Environment	4
OSPKYOTO 45	Japan's Energy-Environment Conundrum	4
OSPKYOTO 54	Innovation in Japan's Old and New Industries	4
OSPMADRD 45	Women in Art: Case Study in the Madrid Museums	4
OSPMADRD 57	Health Care: A Contrastive Analysis between Spain and the U.S.	4
OSPMADRD 71	Sociology of Communication	5
OSPMADRD 72	Issues in Bioethics Across Cultures	4
OSPOXFRD 27	Medical Ethics through Literature and Film	4
OSPOXFRD 57	The Rise of the Woman Writer 1660-1860	5
OSPPARIS 30	The Avant Garde in France through Literature, Art, and Theater	4
OSPPARIS 44	EAP: Analytical Drawing and Graphic Art	2
OSPPARIS 72	The Ceilings of Paris	4
OSPPARIS 88	Principles of Biochemistry	3
OSPPARIS 91	Globalization and Its Effect on France and the European Union	5
OSPPARIS 153X	Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time	5
OSPSANTG 29	Sustainable Cities: Comparative Transportation Systems in Latin America	4-5

OSPSANTG 71	Santiago: Urban Planning, Public Policy, and the Built Environment	4-5
OSPSANTG 85	Marine Ecology of Chile and the South Pacific	5
OSPSANTG 119X	The Chilean Economy: History, International Relations, and Development Strategies	5
OSPSANTG 130X	The Chilean Economy in Comparative Perspective	5

## Slavic Languages and Literatures

Courses offered by the Department of Slavic Languages and Literatures are listed on the Stanford Bulletin's ExploreCourses web site (<http://bulletin.stanford.edu>) under the subject codes SLAVIC (Slavic Studies) (<https://explorecourses.stanford.edu/search?q=SLAVIC&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-SLAVIC=on>), and SLAVLANG (Slavic Language).

The department supports coordinated study of Russian language, literature, literary and cultural history, theory, and criticism. The department's programs may also be combined with the programs in Russian, East European and Eurasian Studies, Jewish Studies, Film Studies, Drama, International Relations, Stanford's Overseas Studies, and the Special Languages Program. The department is a part of the Division of Literatures, Cultures, and Languages (p. 416).

A full undergraduate program provides a choice of several tracks leading to a B.A. (with a major or a minor) or to a B.A. with Honors. The department offers a full graduate program leading to an M.A. in Russian and a Ph.D. in Slavic Languages and Literatures. Stanford undergraduates are eligible to apply to the department for a coterminal B.A./M.A. degree. Students in the department's Ph.D. program are required to choose among minor programs in other national literatures, linguistics, Russian, East European, and Eurasian Studies, Jewish Studies, art and music history, theater, or film studies; or they may design their own minor or choose the related field option.

The department runs a colloquium series, which brings distinguished speakers to Stanford; organizes international conferences and symposia; and since 1987 maintains a continuing publication series, Stanford Slavic Studies. Along with the Center for Russian, East European and Eurasian Studies, the department offers qualified undergraduates summer grants (on a competitive basis) for intensive Russian language instruction in accredited programs in Russia and the U.S.

Improving cultural understanding is a critical part of the department's mission, and the department offers a full range of courses at all levels devoted to Russian literature, music and visual arts that do not require specialized knowledge, as well as advanced research seminars for graduate students. The Slavic theme house, Slavianskii Dom, serves as an undergraduate residence for many students in the program and hosts program-related activities. Undergraduates may also choose to study in Moscow through the Stanford Overseas Studies Program. The undergraduate program has attracted students seeking careers in journalism, business, international relations, law, medicine, and human rights, as well as academia. Russian is still the lingua franca over the vast territory of the former Soviet Union, and a good command of this language offers a gateway to Eurasia's diverse cultures, ethnicities, economies, and religions.

Stanford students of Russian, East European and Eurasian Studies benefit from unmatched faculty resources. Green Library and the Hoover Institution libraries and archives hold world-renowned Russian and East European collections, which undergraduates and graduate students use in their research. Department students master a difficult language and a rich and challenging literature, and are rewarded by gaining entry into a

unique, powerful, and diverse civilization that defined major trends in the past century and plays an increasingly significant role in the world today.

## Mission of the Undergraduate Program in Slavic Languages and Literatures

The mission of the undergraduate program in Slavic Language and Literatures is to expose students to a variety of perspectives on Russian language, history, culture, literature, and philosophical thought. The program offers three tracks. Courses in the Russian Language and Literature track focus on the linguistic and philological study of literature, as well as the history of Russian literature. The Russian Language, Culture, and History track guides students through a comprehensive interdisciplinary study of Russian literature and culture in historic context. The Russian and Philosophy track provides students with a background in the Russian language and literary tradition with emphasis on philosophical thought.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

- oral proficiency in Russian or another Slavic language beyond the interpersonal level with presentational language abilities.
- writing proficiency in Russian or another Slavic language beyond the interpersonal level with presentational language abilities.
- close reading skills of authentic texts in Russian or another Slavic language.
- the ability to develop effective and nuanced lines of interpretation.

## Slavic Theme House

Slavianskii Dom, at 650 Mayfield Avenue, is an undergraduate residence that offers opportunities for students to expand their knowledge, understanding, and appreciation of Russia, Eastern Europe, and Eurasia. Assignment is made through the regular undergraduate housing draw.

## Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Slavic Languages and Literatures and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Slavic Languages and Literatures. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Slavic Languages and Literatures and to interpret and present the results of their research.

## Bachelor of Arts in Slavic Languages and Literatures

The major tracks in Russian Language and Literature and Russian Language, Culture, and History are declared on Axess and appear on the transcript but not on the diploma. The degree option in Russian and Philosophy is not declared on Axess and does not appear on the transcript or the diploma.

## Writing in the Major

Undergraduates are required by the University to pass at least one writing-intensive course in their field of concentration in order to

graduate. Majors in any Slavic track may satisfy the writing requirement in 2014-15 by passing SLAVIC 146 The Great Russian Novel: Tolstoy and Dostoevsky.

## Russian Language and Literature

The Russian Language and Literature field of study is designed for those students who wish to gain command of the Russian language and to study the nation's literary tradition. Emphasis is placed on the linguistic and philological study of literature, as well as the history of Russian literature and related media in the broader context of Russian culture. This major also welcomes students with an interest in Russian and Slavic linguistics.

Majors who concentrate in Russian Language and Literature must earn a grade point average (GPA) of 2.0 (C) or better in order to receive credit toward the major.

## Prerequisites

Completion of first year Russian, or the equivalent, as determined by the Language Center placement examination.

## Degree Requirements

Candidates for the B.A. degree with a Russian Language and Literature field of study must complete an additional 56 units according to the following distribution:

## Russian Language

A minimum of 12 units from:

		Units
SLAVLANG 111	Third-Year Russian, First Quarter	4
SLAVLANG 112	Third-Year Russian, Second Quarter	4
SLAVLANG 113	Third-Year Russian, Third Quarter	4
SLAVLANG 177	Fourth-Year Russian, First Quarter	3
SLAVLANG 178	Fourth-Year Russian, Second Quarter	3
SLAVLANG 179	Fourth-Year Russian, Third Quarter	3
SLAVLANG 181	Fifth-Year Russian, First Quarter	3
SLAVLANG 182	Fifth-Year Russian, Second Quarter	3
SLAVLANG 183	Fifth-Year Russian, Third Quarter	3

## Russian Literature

12 units from the core literature sequence consisting of SLAVIC 145, SLAVIC 146, and either SLAVIC 147 or SLAVIC 148:

		Units
SLAVIC 145	Survey of Russian Literature: The Age of Experiment	5
SLAVIC 146	The Great Russian Novel: Tolstoy and Dostoevsky	5
SLAVIC 147	Modern Russian Literature and Culture: The Age of War and Revolution	3-5
or SLAVIC 148	Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin	

## Electives

Students must take 32 units of electives. These courses are chosen in consultation with the department's chair of undergraduate studies. With department consent, work in related academic fields may be applied toward the degree requirements. Students who have completed a Thinking Matters Course instructed by Slavic faculty, with a grade of 'B' or better may count up to 10 units towards elective courses required for the major, as may students who have completed the SLE sequence.

Russian courses for 2015-16 include:

SLAVIC 77Q	Russia's Weird Classic: Nikolai Gogol	3-4
SLAVIC 115	Between Europe and Asia: Introduction to Russian Culture	3
SLAVIC 129	Russian Versification: History and Theory	4
SLAVIC 145	Survey of Russian Literature: The Age of Experiment	3-5
SLAVIC 146	The Great Russian Novel: Tolstoy and Dostoevsky	3-5
SLAVIC 181	Philosophy and Literature	5
THINK 21	Folklore and Literature in Russia and Beyond: Vampires, Talking Cats, and Frog Princesses	4

## Capstone

Students must designate a 300-level course taken in their junior or senior year as a capstone course. Before graduation, skills in writing, textual analysis, and discussion will be evaluated by the Chair of Undergraduate Studies based on work submitted for the capstone course.

## Language Assessment

All Slavic Languages and Literature majors must complete an oral and written language assessment two quarters prior to their graduation. This is coordinated with the Chair of Undergraduate Studies and the Undergraduate Student Affairs Officer.

## Russian Language, Culture, and History

The Russian Language, Culture, and History field of study is for students who want to obtain command of the Russian language and to pursue a broad, interdisciplinary study of Russian literature and culture in historical context. Emphasis is on the relation of the Russian literary tradition to other arts, including film, as well as the disciplines that have enriched the historical understanding of Russian literature: history, anthropology, art history, political science, and sociology. Majors in the Russian Language, Culture, and History must earn a GPA of 2.0 (C) or better in order to receive credit toward the major.

## Prerequisites

Completion of first year Russian, or the equivalent, as determined by the Language Center placement examination.

## Degree Requirements

Candidates for the B.A. degree with a Russian Language, Culture, and History field of study must complete an additional 56 units according to the following distribution.

## Russian Language

A minimum of 12 units from:

SLAVLANG 111	Third-Year Russian, First Quarter	4
SLAVLANG 112	Third-Year Russian, Second Quarter	4
SLAVLANG 113	Third-Year Russian, Third Quarter	4
SLAVLANG 177	Fourth-Year Russian, First Quarter	3
SLAVLANG 178	Fourth-Year Russian, Second Quarter	3
SLAVLANG 179	Fourth-Year Russian, Third Quarter	3
SLAVLANG 181	Fifth-Year Russian, First Quarter	3
SLAVLANG 182	Fifth-Year Russian, Second Quarter	3
SLAVLANG 183	Fifth-Year Russian, Third Quarter	3

## Units 19th-Century Russian Literature and History

A minimum of 8 units chosen from the following or the equivalent; students must choose one course from Slavic and one course from History.

One of the following:

SLAVIC 145	Survey of Russian Literature: The Age of Experiment	5
or SLAVIC 146	The Great Russian Novel: Tolstoy and Dostoevsky	
	A pre-revolutionary Russian history course.	5

## 20th-Century Russian Literature and History

A minimum of 8 units chosen from the following or the equivalent; students must choose one course from Slavic and one course from History.

	A post-revolutionary Russian history course.	5
SLAVIC 148	Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin	3-5

## Electives

Students must take 32- additional units of course work in Russian language, literature, history, or other fields, chosen in consultation with the Chair of Undergraduate Studies. Students who have completed IHUM 28A/B. Poetic Justice: Order and Imagination in Russian Culture, or Thinking Matters Courses instructed by Slavic faculty, with a grade of 'B' or better may count these 10 units towards elective courses required for the major, as may students who have completed the SLE sequence.

Russian courses for 2015-16 include:

SLAVIC 77Q	Russia's Weird Classic: Nikolai Gogol	3-4
SLAVIC 115	Between Europe and Asia: Introduction to Russian Culture	3
SLAVIC 129	Russian Versification: History and Theory	4
SLAVIC 145	Survey of Russian Literature: The Age of Experiment	3-5
SLAVIC 146	The Great Russian Novel: Tolstoy and Dostoevsky	3-5
SLAVIC 181	Philosophy and Literature	5
THINK 21	Folklore and Literature in Russia and Beyond: Vampires, Talking Cats, and Frog Princesses	4

## Capstone

Students must designate a 300-level course taken in their junior or senior year as a capstone course. Before graduation, skills in writing, textual analysis, and discussion will be evaluated by the Chair of Undergraduate Studies based on work submitted for the capstone course.

## Language Assessment

All Slavic Languages and Literature majors must complete an oral and written language assessment two quarters prior to their graduation. This is coordinated with the Chair of Undergraduate Studies and the Undergraduate Student Affairs Officer.

## Russian and Philosophy

The Russian and Philosophy option offers students the opportunity to gain a command of the Russian language and literary tradition, while gaining a background in philosophical thought, broadly construed. They take courses alongside students in other departments participating in the program in Philosophical and Literary Thought, administered through

the DLCL. This option is not declared on Axess, thus it does not appear on the transcript or diploma. Majors who concentrate in Russian and Philosophy must earn a grade point average (GPA) of 2.0 (C) or better in order to receive credit toward the major.

## Prerequisites

Completion of first year Russian, or the equivalent, as determined by the Language Center placement examination.

## Degree Requirements

Candidates for the B.A. degree with a concentration in Russian and Philosophy must complete an additional 67 units according to the following distribution:

## Russian Language

A minimum of 12 units from:

SLAVLANG 111	Third-Year Russian, First Quarter	4
SLAVLANG 112	Third-Year Russian, Second Quarter	4
SLAVLANG 113	Third-Year Russian, Third Quarter	4
SLAVLANG 177	Fourth-Year Russian, First Quarter	3
SLAVLANG 178	Fourth-Year Russian, Second Quarter	3
SLAVLANG 179	Fourth-Year Russian, Third Quarter	3
SLAVLANG 181	Fifth-Year Russian, First Quarter	3
SLAVLANG 182	Fifth-Year Russian, Second Quarter	3
SLAVLANG 183	Fifth-Year Russian, Third Quarter	3

## Russian Literature

A minimum of 16 units of Russian literature, including the following:

SLAVIC 145	Survey of Russian Literature: The Age of Experiment	3-5
SLAVIC 146	The Great Russian Novel: Tolstoy and Dostoevsky	3-5
SLAVIC 148	Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin	3-5

## Electives

At least 12 units of electives in Russian language and literature, chosen in consultation with the Chair of Undergraduate Studies.

## Philosophy and Literature Gateway Course

SLAVIC 181	Philosophy and Literature	5
------------	---------------------------	---

## Philosophy Writing in the Major

PHIL 80	Mind, Matter, and Meaning (prerequisite: introductory philosophy course)	5
---------	--	---

## Philosophy Core

12 units of the following:

A course in the PHIL 170 series (value theory)	4
A course in the PHIL 180 series (theories of the mind, language, action)	4
A course in PHIL 100-139 series (history of philosophy)	4

## Related Course

An upper-division course of special relevance to philosophy and literature. Major may choose from:

ENGLISH 106E	Dante and Aristotle	5
ENGLISH 113A	Desire, Identity, Modernity	5
COMPLIT 258A	Existentialism, from Moral Quest to Novelistic Form	3-5
RELIGST 271A	Dante's Spiritual Vision	4-5

## Language Assessment

All Slavic Languages and Literature majors must complete an oral and written language assessment two quarters prior to their graduation. This is coordinated with the Chair of Undergraduate Studies and the Undergraduate Student Affairs Officer.

## Capstone Seminar

One capstone seminar must be taken in the student's senior year. This year's capstone seminars are:

COMPLIT 199	Senior Seminar: The Pleasures of Reading	5
-------------	--	---

## Honors Program

Slavic Languages and Literature majors with an overall grade point average (GPA) of 3.3 or above, and who maintain a 3.5 (GPA) in major courses, are eligible to participate in the DLCL's honors program. Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty, in their junior year, preferably by March 1, but no later than May 1. During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL Honors application and an outline of planned course work for their senior year.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40-90 pages not including bibliography and notes. Please consult the DLCL Honors Handbook for more details on declaring and completing the honors thesis.

Honors students are encouraged to participate in the honors college hosted by Bing Honors College ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/00\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/00_honors_BingHonors.html)) and coordinated by the Division of Literatures, Cultures, and Languages. The honors college is offered at the end of the summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted through the Bing program. For more information, view the Bing Honors ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/00\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/00_honors_BingHonors.html)) website.

Enrollment: A minimum of 10 units total, described below, and a completed thesis is required. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15th of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

1. Spring Quarter of the junior year (optional) DLCL 189C Honors Thesis Seminar (2-4 units S/NC) under the primary thesis adviser. Drafting or revision of the thesis proposal. The proposal is reviewed by the Chair of Undergraduate Studies and the Director of the department and will be approved or returned for submission.

2. Autumn Quarter of the senior year (required) DLCL 189A Honors Thesis Seminar (4 units S/NC) taught by a DLCL appointed faculty member. Course will focus on researching and writing the honors thesis.
3. Winter Quarter of the senior year (required) DLCL 189B Honors Thesis Seminar (2-4 units Letter grade) under the primary thesis adviser. Focus will be on writing under guidance of primary adviser. The letter grade will determine if honors is granted or not.
4. Spring Quarter of the senior year (option; mandatory if not taken during junior year) DLCL 189C Honors Thesis Seminar (2-4 units S/NC) under the primary thesis adviser. Honors essays are due to the thesis adviser and Student Service Officer no later than 5:00 p.m. on May 15th of the terminal year.
5. Spring Quarter of the senior year (required) DLCL 199 Honors Thesis Oral Presentation (1 unit S/NC). Enroll with primary thesis adviser.

## Joint Major Program in Slavic Languages and Literatures and Computer Science

The joint major program (JMP), authorized by the Academic Senate for a pilot period of six years beginning in 2014-15, permits students to major in both Computer Science and one of ten Humanities majors. See the "Joint Major Program (p. 26)" section of this bulletin for a description of University requirements for the JMP. See also the Undergraduate Advising and Research JMP web site and its associated FAQs.

Students completing the JMP receive a B.A.S. (Bachelor of Arts and Science).

Because the JMP is new and experimental, changes to procedures may occur; students are advised to check the relevant section of the bulletin periodically.

## Slavic Languages and Literatures Major Requirements in the Joint Major Program

The major tracks in Russian Language and Literature and Russian Language, Culture, and History are declared on Axess and appear on the transcript but not on the diploma.

1. Senior year, the student enrolls in a 2 unit independent study SLAVIC 199 Individual Work for Undergraduates with a DLCL faculty member. The faculty member advising this project must sign off on this description. In order to have it approved as their capstone Slavic Languages and Literatures and Computer Science project, the student must submit a description of their project to the Chair of Undergraduate Studies in Slavic.
2. Students must take the Oral Proficiency Interview (OPI) two quarters prior to degree conferral. Students should contact the undergraduate student affairs officer for the major to begin the process.
3. The remaining units needed to reach 46 units could be completed through elective courses taken in Slavic, at the BOSP Center, or in other departments, as approved by the Chair of Undergraduate Studies.
4. Structured Liberal Education courses.
5. All courses taken at the BOSP Overseas campus may count toward the major electives.
6. Thinking Matters courses approved by the Chair of Undergraduate Studies may also be counted toward the electives.
7. Subject to approval by the Chair of Undergraduate Studies, courses from other fields may count if they contribute to the student's

language skills, the ability to interpret literature and other cultural material, or the capacity to analyze societies.

### Writing in the Major

Undergraduates are required by the University to pass at least one writing intensive course in their field of concentration in order to graduate. Majors in any Slavic track may satisfy the writing requirement in 2014-15 by passing SLAVIC 146 The Great Russian Novel: Tolstoy and Dostoevsky.

## Russian Language and Literature

The Russian Language and Literature field of study is designed for those students who wish to gain command of the Russian language and to study the nation's literary tradition. Emphasis is placed on the linguistic and philological study of literature, as well as the history of Russian literature and related media in the broader context of Russian culture. This major also welcomes students with an interest in Russian and Slavic linguistics.

Majors who concentrate in Russian Language and Literature must earn a grade point average (GPA) of 2.0 (C) or better in order to receive credit toward the major.

### Prerequisites

Completion of first year Russian, or the equivalent, as determined by the Language Center placement examination.

### Degree Requirements

Candidates for the B.A.S. degree with a Russian Language and Literature field of study must complete an additional 46 units according to the following distribution:

#### Russian Language

A minimum of 12 units from:

		Units
SLAVLANG 111	Third-Year Russian, First Quarter	4
SLAVLANG 112	Third-Year Russian, Second Quarter	4
SLAVLANG 113	Third-Year Russian, Third Quarter	4
SLAVLANG 177	Fourth-Year Russian, First Quarter	3
SLAVLANG 178	Fourth-Year Russian, Second Quarter	3
SLAVLANG 179	Fourth-Year Russian, Third Quarter	3
SLAVLANG 181	Fifth-Year Russian, First Quarter	3
SLAVLANG 182	Fifth-Year Russian, Second Quarter	3
SLAVLANG 183	Fifth-Year Russian, Third Quarter	3

#### Russian Literature

The 12 units from the core literature sequence consisting of SLAVIC 145, SLAVIC 146, and either SLAVIC 147 or SLAVIC 148:

		Units
SLAVIC 145	Survey of Russian Literature: The Age of Experiment	5
SLAVIC 146	The Great Russian Novel: Tolstoy and Dostoevsky	5
SLAVIC 148	Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin	3-5

### Electives

Students must take 22 units of electives. These courses are chosen in consultation with the department's chair of undergraduate studies. With department consent, work in related academic fields may be applied toward the degree requirements. Students who have completed a Thinking Matters Course instructed by Slavic faculty, with a grade of 'B' or

better may count up to 10 units towards elective courses required for the major, as may students who have completed the SLE sequence.

Russian courses for 2015-16 include:

		Units
SLAVIC 77Q	Russia's Weird Classic: Nikolai Gogol	3-4
SLAVIC 115	Between Europe and Asia: Introduction to Russian Culture	3
SLAVIC 129	Russian Versification: History and Theory	4
SLAVIC 145	Survey of Russian Literature: The Age of Experiment	3-5
SLAVIC 146	The Great Russian Novel: Tolstoy and Dostoevsky	3-5
SLAVIC 181	Philosophy and Literature	5
THINK 21	Folklore and Literature in Russia and Beyond: Vampires, Talking Cats, and Frog Princesses	4

## Capstone

The capstone for students majoring in the joint program in Slavic+CS should be completed in any 300-level Slavic course taken in the junior or senior year, in consultation with the professor of that class. Before graduation, skills in writing, textual analysis, and discussion are evaluated by the Chair of Undergraduate Studies based on work submitted for the capstone course.

## Language Assessment

All Slavic Languages and Literature majors must complete an oral and written language assessment two quarters prior to their graduation. This is coordinated with the Chair of Undergraduate Studies and the undergraduate student affairs officer.

## Russian Language, Culture, and History

The Russian Language, Culture, and History field of study is for students who want to obtain command of the Russian language and to pursue a broad, interdisciplinary study of Russian literature and culture in historical context. Emphasis is on the relation of the Russian literary tradition to other arts, including film, as well as the disciplines that have enriched the historical understanding of Russian literature: history, anthropology, art history, political science, and sociology. Majors in the Russian Language, Culture, and History must earn a GPA of 2.0 (C) or better in order to receive credit toward the major.

## Prerequisites

Completion of first year Russian, or the equivalent, as determined by the Language Center placement examination.

## Degree Requirements

Candidates for the B.A.S. degree with a Russian Language, Culture, and History field of study must complete an additional 46 units according to the following distribution.

## Russian Language

A minimum of 12 units from:

SLAVLANG 111	Third-Year Russian, First Quarter	4
SLAVLANG 112	Third-Year Russian, Second Quarter	4
SLAVLANG 113	Third-Year Russian, Third Quarter	4
SLAVLANG 177	Fourth-Year Russian, First Quarter	3
SLAVLANG 178	Fourth-Year Russian, Second Quarter	3
SLAVLANG 179	Fourth-Year Russian, Third Quarter	3
SLAVLANG 181	Fifth-Year Russian, First Quarter	3
SLAVLANG 182	Fifth-Year Russian, Second Quarter	3

SLAVLANG 183	Fifth-Year Russian, Third Quarter	3
--------------	-----------------------------------	---

## 19th-Century Russian Literature and History

A minimum of 8 units chosen from the following or the equivalent; students must choose one course from Slavic and one course from History.

One of the following:

		Units
SLAVIC 145	Survey of Russian Literature: The Age of Experiment	5
or SLAVIC 146	The Great Russian Novel: Tolstoy and Dostoevsky	
	A pre-revolutionary Russian history course.	5

## 20th-Century Russian Literature and History

A minimum of 10 units chosen from the following or the equivalent; students must choose one course from Slavic and one course from History.

		Units
	A post-revolutionary Russian history course.	5
SLAVIC 148	Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin	3-5

## Electives

Students must take 22 additional units of course work in Russian language, literature, history, or other fields, chosen in consultation with the Chair of Undergraduate Studies. Students who have completed IHUM 28A/B. Poetic Justice: Order and Imagination in Russian Culture, or Thinking Matters Courses instructed by Slavic faculty, with a grade of 'B' or better may count these 10 units towards elective courses required for the major, as may students who have completed the SLE sequence.

Russian courses for 2015-16 include:

		Units
SLAVIC 77Q	Russia's Weird Classic: Nikolai Gogol	3-4
SLAVIC 115	Between Europe and Asia: Introduction to Russian Culture	3
SLAVIC 129	Russian Versification: History and Theory	4
SLAVIC 145	Survey of Russian Literature: The Age of Experiment	3-5
SLAVIC 146	The Great Russian Novel: Tolstoy and Dostoevsky	3-5
SLAVIC 181	Philosophy and Literature	5
THINK 21	Folklore and Literature in Russia and Beyond: Vampires, Talking Cats, and Frog Princesses	4

## Capstone

Students must designate a 300-level course taken in their junior or senior year as a capstone course. Before graduation, skills in writing, textual analysis, and discussion will be evaluated by the Chair of Undergraduate Studies based on work submitted for the capstone course.

## Language Assessment

All Slavic Languages and Literature majors must complete an oral and written language assessment two quarters prior to their graduation. This is coordinated with the Chair of Undergraduate Studies and the undergraduate student affairs officer.

## Honors Program

Students have the option to complete the honors program for Computer Science and Slavic, by completing an honors thesis that is partially or fully integrated with Computer Science; such a thesis would fulfill both

the capstone and honors requirements for this degree. Students also have the option to complete the honors program for Slavic only; such a thesis would not fulfill the capstone requirement for this degree.

Slavic Languages and Literature majors with an overall grade point average (GPA) of 3.3 or above, and who maintain a 3.5 (GPA) in major courses, are eligible to participate in the DLCL's honors program. Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty, in their junior year, preferably by March 1, but no later than May 1. During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL Honors application and an outline of planned course work for their senior year.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40-90 pages not including bibliography and notes. Please consult the DLCL Honors Handbook for more details on declaring and completing the honors thesis.

Honors students are encouraged to participate in the honors college hosted by Bing Honors College ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/00\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/00_honors_BingHonors.html)) and coordinated by the Division of Literatures, Cultures, and Languages. The honors college is offered at the end of the summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted through the Bing program. For more information, view the Bing Honors ([http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/00\\_honors\\_BingHonors.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/00_honors_BingHonors.html)) website.

Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15th of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

## Declaring a Joint Major Program

To declare the joint major, students must first declare each major through Axess, and then submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>) The Major-Minor and Multiple Major Course Approval Form ([http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin\\_MultMaj.pdf](http://studentaffairs.stanford.edu/sites/default/files/registrar/files/MajMin_MultMaj.pdf)) is required for graduation for students with a joint major.

## Dropping a Joint Major Program

To drop the joint major, students must submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program. (<https://stanford.box.com/change-UG-program>). Students may also consult the Student Services Center (<http://studentservicescenter.stanford.edu>) with questions concerning dropping the joint major.

## Transcript and Diploma

Students completing a joint major graduate with a B.A.S. degree. The two majors are identified on one diploma separated by a hyphen. There will be a notation indicating that the student has completed a "Joint Major". The two majors are identified on the transcript with a notation indicating that the student has completed a "Joint Major".

## Minors in Slavic Languages and Literatures

The Department of Slavic Languages and Literatures offers three undergraduate minor options.

The minor is designed for students who, while pursuing a major in another program, seek a comprehensive introduction to Russian culture through Russian language courses, a combination of minimal proficiency in Russian and courses in the history of Russian culture, or a multidisciplinary introduction to Russian, East European, and Eurasian studies. Students seeking a Slavic minor are encouraged to take advantage of the Bing Overseas Studies Program in Moscow. Students who have chosen one of the minor programs in Russian may use 5 units from a Thinking Matters course taught by a Slavic faculty member towards their electives with permission from their adviser.

## Minor in Russian Language

### Prerequisites

The minor option in Russian Language requires completion of second year Russian, or the equivalent, as determined by the results of the Language Center placement examination.

### Requirements

Candidates for the B.A. degree with a minor option in Russian Language must complete 24 units of Russian language and literature courses according to the following distribution:

12 to 15 units of Russian language:

		Units
SLAVLANG 111	Third-Year Russian, First Quarter	4
SLAVLANG 112	Third-Year Russian, Second Quarter	4
SLAVLANG 113	Third-Year Russian, Third Quarter	4
SLAVLANG 177	Fourth-Year Russian, First Quarter	3
SLAVLANG 178	Fourth-Year Russian, Second Quarter	3
SLAVLANG 179	Fourth-Year Russian, Third Quarter	3

The remaining 9-12 units should be chosen from:

		Units
SLAVIC 145	Survey of Russian Literature: The Age of Experiment	3-5
SLAVIC 146	The Great Russian Novel: Tolstoy and Dostoevsky	3-5
SLAVIC 148	Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin	3-5
Other courses offered within the Slavic Languages and Literatures department.		
Or, with the approval of the department's Chair of Undergraduate Studies, courses in history, politics, linguistics, or other relevant programs.		
SLAVIC 187	History of 18th and 19th century Russian Poetry	3-4
SLAVIC 188	20th century Russian Poetry: From Aleksandr Blok to Joseph Brodsky	3-5

## Minor in Russian Language, Literature, and Culture

### Prerequisites

The minor option in Russian Language, Literature, and Culture requires completion of first year Russian, or the equivalent, as determined by the results of the Language Center placement examination.

### Requirements

Candidates for the B.A. degree with the minor option in Russian Language, Literature, and Culture must complete 28 units according to the following distribution:

A minimum of 12 units of courses on literature and culture including:

#### Option 1:

Two courses from the following:

SLAVIC 145	Survey of Russian Literature: The Age of Experiment	3-5
SLAVIC 146	The Great Russian Novel: Tolstoy and Dostoevsky	3-5
SLAVIC 148	Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin	3-5

#### Option 2:

One course from the following:

SLAVIC 145	Survey of Russian Literature: The Age of Experiment	3-5
SLAVIC 146	The Great Russian Novel: Tolstoy and Dostoevsky	3-5
SLAVIC 148	Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin	3-5

and one course from the following:

SLAVIC 187	History of 18th and 19th century Russian Poetry	3-4
SLAVIC 188	20th century Russian Poetry: From Aleksandr Blok to Joseph Brodsky	3-5

## Minor in Russian, East European, and Eurasian Studies

The minor in Russian, East European and Eurasian Studies offers students the opportunity to choose courses offered by the Center for Russian, East European and Eurasian Studies (subject code REES) in various departments for their minor.

### Requirements

Candidates for the B.A. degree with the minor option in Russian, East European, and Eurasian Studies must complete 28 units according to the following distribution:

- Two core courses: one on Russia and one on Eastern Europe or Eurasia, to be chosen by the student from an annual list of qualifying courses issued by CREES for their M.A. students.
- At least four additional REES courses, totaling at least 20 units.
- The student's core and additional courses must include 9 units of course work in the Slavic Department, either literature courses or Russian language in the third year or above. Courses must be distributed among at least three disciplines, such as Slavic, History, Political Science, Anthropology, Art and Art History, Economics, Religious Studies, and Sociology. The Slavic Chair of Undergraduate Studies determines which courses qualify for the minor.
- A capstone experience in CREES, including, but not limited to, one of the following:
  - a departmental seminar course for advanced undergraduates.
  - directed reading and research with a Stanford faculty member or a CREES-approved resident or visiting scholar.
  - participation in the Stanford Overseas Studies Program in Berlin.

### Foreign Language

The Slavic/REES minor has no language requirement, but students are strongly encouraged to attain working competence in Russian or another relevant language. Courses at the third-year level or above in Russian or another language of Central Asia, the Caucasus, or Eastern Europe may be counted towards the Slavic/REES minor, up to a maximum of 3 units per academic quarter, 9 units total.

### Additional Information

Courses taken at Stanford overseas campuses may count towards the REES minor, with the approval of the Slavic Chair of Undergraduate

Studies; at least three courses for the minor must be taken in residence at Stanford.

Students interested in pursuing the Slavic/REES minor should consult the Slavic Chair of Undergraduate Studies.

## Minor in Modern Languages

The Division of Literatures, Cultures, and Languages offers a minor in Modern Languages. This minor draws on literature and language courses offered in this and other literature departments. See the "Literatures, Cultures, and Languages (<http://www.stanford.edu/dept/registrar/bulletin/6009.htm>)" section of this bulletin for further details about this minor and its requirements.

## Coterminal Master's Program in Slavic Languages and Literatures

The department allows a limited number of undergraduates to work for the coterminal M.A. degree in Slavic Languages and Literatures with a concentration in Russian. In addition to University requirements for the B.A. degree, the student must:

- Submit an application for admission by January 31 of the senior year. Applicants must meet the same general standards as those seeking admission to an M.A. program. Applicants must submit: an application for admission; a written statement of purpose; a transcript; and three letters of recommendation, at least two of which should be from members of the Department of Slavic Languages and Literatures faculty.
- Meet all requirements for both the B.A. and M.A. degrees. Applicants must complete 15 full-time quarters (or the equivalent), or three full-time quarters after completing 180 units, for a total of 225 units. During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three graduate-level courses.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken during or after the first quarter of the sophomore year are eligible for consideration for transfer to the graduate career; the timing of the first graduate quarter is not a factor. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

## Master of Arts in Slavic Languages and Literatures

The Department of Slavic Languages and Literatures offers a Master of Arts degree only to students concurrently enrolled in other Stanford degree programs.

University requirements for the M.A. degree are discussed in the "Graduate Degrees (p. 45)" section of this bulletin.

### Admission

The requirements for admission to the master's degree program in Russian are:

1. A B.A. (or its equivalent) from an accredited college or university.
2. A command of the Russian language sufficient to permit the student to do satisfactory graduate work.
3. A familiarity with Russian literature sufficient to permit the student to perform adequately in courses at the graduate level.

The applicant's previous academic training in Russian language and literature normally serves as an indication of competence. Accordingly, the department does not ordinarily consider applications from students who have not had at least three years of college Russian and some undergraduate training in Russian literature of the 19th and 20th centuries. Before registering for the first quarter's work in the department, entering graduate students are required to take placement examinations in Russian. Students who fail to perform satisfactorily on such examinations must register for remedial courses in the areas in which they are deficient. Course work in third-year Russian and below carries no credit toward the M.A. degree.

### Course Requirements

Candidates for the M.A. should plan course work that ensures adequate preparation for the M.A. final examination at the end of the third quarter of work. Course work should be planned in consultation with the graduate adviser, whose approval of the overall course load is required.

Candidates for the M.A. must complete a program of 45 units, of which 36 units must be selected from courses given by the department.

### The Qualifying Paper

The Qualifying paper represents a complete article-length research paper (6,000-9,000 words) that, in both form and substance, qualifies for submission to English-language professional publications in the Slavic field. The Qualifying paper must be submitted to the thesis adviser no later than the eighth week of the final quarter of registration.

### Final Examination

A final examination may substitute for the Qualifying paper requirement. The final examination requires a student to demonstrate in a written examination:

1. command of the phonology, morphology, syntax, and lexicology of contemporary standard Russian sufficient to teach beginning and intermediate courses at the college level
2. an ability to read contemporary Standard Russian sufficiently to assist students studying contemporary Russian poetry or literary prose
3. sufficient familiarity with Russian literature of either the 19th or 20th century to successfully handle survey courses dealing with the chosen period of specialization.

The examination should be taken at the end of the final quarter of required course work.

## Doctor of Philosophy in Slavic Languages and Literatures

University requirements for the Ph.D. are discussed in the "Graduate Degrees (p. 45)" section of this bulletin.

Students enrolled in the Ph.D. program in Slavic Languages and Literatures are expected to fulfill the following requirements while meeting the program's deadlines in the course of their progress toward the degree:

### 1. Course Work, Breadth Requirements, and Overall Scheduling

In consultation with the Chair of Graduate Studies, students are expected to take 10 units of credit each quarter of their first year, 10 units each funded summer, and 10 units each quarter thereafter. They are expected to reach 135 units and attain TGR status in the spring of their fourth year. Entering graduate students must enroll in DLCL 369 Introduction to the Profession of "Literary Studies" for Graduate Students. For the Ph.D. degree students are free to select course work to suit their individual program of study. However, candidates must do so in consultation with their adviser (Chair of Graduate Studies or principal dissertation adviser) and are held responsible for all of the areas covered by the general examinations, regardless of whether they have registered for the department's offerings in a given field. For this reason, it is strongly recommended that before taking Ph.D. examinations, students complete seminar-level work directly related to the following broad areas:

- a. Russian poetry
- b. the Russian novel
- c. 20th-century Russian literature
- d. 19th-century Russian literature (the Age of Pushkin and after)
- e. 18th-century Russian literature (the early 1700's to the Age of Pushkin)
- f. medieval Russian literature
- g. a monograph course on a major Russian author
- h. theory of literature relevant to the major field

The candidate must have demonstrated commitment to graduate studies by completing a minimum of 21 content courses (not counting Summer Quarter) with a grade point average (GPA) of 3.3 or better in order to complete the requirements of the degree program. These must include 14 seminars in the Slavic Department.

### 1. Minor or Related Fields

During the course of study, students must develop substantial expertise in a field contiguous to the area of specialization. A candidate may elect to present a full minor or, in consultation with the graduate adviser, develop a special program in a related field, preferably no later than the second quarter of enrollment.

- a. *Related Field*—A student is required to complete a sequence of basic courses in a chosen discipline outside the department of Slavic Languages and Literatures. The choice of patterns is one of the following:
  - i a sequence of three courses in another literature, selected in consultation with the adviser, or
  - ii three basic courses in comparative literature chosen in consultation with the Chair of Graduate Studies (CGS), or
  - iii a sequence of three courses in another department selected in consultation with the CGS.
- b. *Minor*—Students electing a minor fulfill the Ph.D. minor requirements established by that department. Students considering minors should consult with their adviser, the CGS, the

Chair of Slavic Languages and Literatures, and the Chair of the minor department.

## 2. Admission to Candidacy

Admission to candidacy is an important decision grounded in an overall assessment of a student's ability to successfully complete the Ph.D. program. Per University policy, students are expected to complete department qualifying procedures and apply for candidacy by the end of the second year in residence. In reviewing a student for admission to candidacy, the faculty considers a student's academic progress including but not limited to: advanced language proficiency, course work, performance on the Qualifying Exam, and successful completion of teaching and research assistantships. Additionally, a student must have completed at least one class with each of 4 Stanford faculty members prior to consideration for candidacy. In addition to successful completion of department prerequisites, a student is only admitted to candidacy if the faculty makes the judgment that the student has the potential to successfully complete the requirements of the degree program. Candidacy is determined by faculty vote. Failure to advance to candidacy results in the dismissal of the student from the doctoral program. Candidacy is valid for five years and students are required to maintain active candidacy through conferral of the doctoral degree. All requirements for the degree must be completed before candidacy expires. The Department of Slavic Languages and Literatures conducts regular reviews of each student's academic performance, both prior to and following successful admission to candidacy. Failure to make satisfactory progress to degree may result in dismissal from the doctoral program. Additional information about University candidacy policy is available in the Bulletin (p. 47) and GAP (<http://gap.stanford.edu/4-6.html>).

## 3. Qualifying Paper

The candidate must submit a complete draft of a qualifying paper approved by the thesis adviser. The qualifying paper represents a complete article-length research paper (6,000-9,000 words) that qualifies in both form and substance for submission to an English language professional publication in the Slavic field. The deadline for the qualifying paper approval is the eighth week of the sixth quarter of registration. Failure to meet these requirements results in termination of enrollment from the Ph.D. program. Following such termination, the student who has fulfilled all of the M.A. requirements may be given the opportunity to take the M.A. written examination in the history of Russian literature. If successful, the student is then awarded the terminal M.A. degree. In exceptional cases, the written examination requirement may be waived at the discretion of the Chair of Graduate Studies and the Chair of the department.

## 4. Proficiency Test

Administered to all entering graduate students, this test determines whether the student's knowledge of Russian language and literature falls below the department's standard (Advanced Low on the OPI test). Students who fail are required to complete appropriate courses in the first year of graduate study. Courses required to meet the language proficiency are not counted towards the Course Work requirement of the Ph.D. degree.

## 5. Foreign Languages

A candidate must demonstrate reading knowledge of French or German, plus another language useful for the student's area of concentration, by passing written examinations, or receiving a grade of 'A-' or better in a qualifying class with consent of the CGS. The reading examination in German or French must be passed by the end of the first year of study. The reading examination in the second language of choice must be passed by the end of the second year of study.

## 6. Examinations

A candidate must pass the departmental general qualifying examinations. The comprehensive exam covers the history of Russian literature from the medieval period through the twenty-first century and is divided into six chronological sections. Two of these are taken early in the fourth quarter of enrollment and the remainder are taken in the seventh quarter of enrollment (preferably a day or two before the beginning of academic instruction). One section of the comprehensive exam is taken orally in Russian. The departmental oral qualifying examination follows no later than two weeks after completion of the comprehensive exams. The oral examination committee consists of four faculty members and may include one member representing the student's minor or related field; the rest must be drawn from among the Slavic Department faculty. The student makes a 20-minute presentation, following an academic conference format, and based possibly on the student's qualifying paper. Each examiner questions the student on the presentation and related topics in the history of Russian literature and the minor related field. Following the departmental examinations, a candidate must pass a University Oral examination, consisting of a defense of a doctoral dissertation prospectus and covering content relevant to the area of study, rationale for the proposed investigation, and strategy to be employed in the dissertation research. The prospectus defense is expected to be scheduled no later than the beginning of the tenth quarter of registration. Note: Ph.D. examinations are scheduled by the graduate student in consultation with the CGS.

## 7. Teaching

Students are required to complete five quarters of teaching within the funding period, including three quarters of first-year Russian and two quarters as a teaching assistant of literature for a faculty member, usually in the survey courses in translation:

SLAVIC 145	Survey of Russian Literature: The Age of Experiment	3-5
SLAVIC 146	The Great Russian Novel: Tolstoy and Dostoevsky	3-5
SLAVIC 147	Modern Russian Literature and Culture: The Age of War and Revolution	3-5
SLAVIC 148	Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin	3-5

b. Students are required to take in preparation for teaching.

## 8. Yearly Review

The faculty must provide students with timely and constructive feedback on their progress toward the Ph.D. In order to evaluate students' progress and to identify potential problem areas, the department's faculty reviews the academic progress of each student at the end of the academic year. The yearly reviews are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. Possible outcomes of the yearly review include:

- a. continuation of the student in good standing
- b. placing the student on probation, with specific guidelines for the period on probation and the steps to be taken in order to be returned to good standing.
  - i. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include:
    1. restoration to good standing

2. continued probation, again with guidelines for necessary remedial steps
3. termination from the program. Students leaving the program at the end of the first or second year are usually allowed to complete the requirements to receive an M.A. degree, if this does not involve additional residency or financial support.

## 9. Continuation

Continuation in the Ph.D. program is contingent on fulfilling the following criteria: for first-year students, a high quality of performance in course work (decided by department evaluation); for second-year students, satisfactory academic progress and approval of the qualifying paper as described above. The principal conditions for continued registration of a graduate student are the timely and satisfactory completion of the university, department, and program requirements for the degree, and fulfillment of minimum progress requirements. Failure to meet these requirements will result in corrective measures, which may include a written warning, academic probation, and/or release from the program.

## Ph.D. Minor in Slavic Languages and Literatures

The department offers a Ph.D. Minor in Slavic Languages and Literatures. The requirement for the Ph.D. minor is completion of 25 units of graduate course work in Slavic Literature and Culture classes. Interested students should consult the Chair of Graduate Studies.

## Faculty in Slavic Languages and Literatures

*Emeriti:* Gregory Freidin, Richard D. Schupbach, Joseph A. Van Campen

*Director:* Russell Berman (interim)

*Chair of Graduate Studies:* Monika Greenleaf (autumn and winter), Lazar Fleishman (spring)

*Chair of Undergraduate Studies:* Nariman Skakov

*Professors:* Lazar Fleishman, Gabriella Safran (on leave 2015-2016)

*Associate Professor:* Monika Greenleaf

*Assistant Professor:* Nariman Skakov, Yuliya Ilchuk

*Lecturer:* Jessica Merrill

*Courtesy Professor:* Nancy Ruttenburg

## Overseas Studies Courses in Slavic Languages and Literatures

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

	Units
OSPMOSC 44	5
OSPMOSC 45	5
OSPMOSC 46	5
OSPMOSC 68	5
OSPMOSC 72	5

## Sociology

Courses offered by the Department of Sociology are listed under the subject code SOC on the Stanford Bulletin's ExploreCourses web site.

Sociology seeks to understand all aspects of human social behavior, including the behavior of individuals as well as the social dynamics of small groups, large organizations, communities, institutions, and entire societies. Sociologists are typically motivated both by the desire to better understand the principles of social life and by the conviction that understanding these principles may aid in the formulation of enlightened and effective social policy. Sociology provides an intellectual background for students considering careers in the professions or business. Students may pursue degrees in sociology at the bachelor's, master's, or doctoral levels. The department organizes its courses by areas of study to assist students in tailoring their education and research to their academic interests and career goals.

## Mission of the Undergraduate Program in Sociology

The mission of the undergraduate program in Sociology is to provide students with the skills necessary to understand and address social problems and inequalities in global, institutional, and interpersonal social relations. At its core, the curriculum in the major is rooted in social theory and the scientific method. Sociology majors are given opportunities to develop a broad understanding of core sociological theories and the methodological skills used to evaluate human behavior and social organizations. Sociology provides an intellectual background for students considering careers in business, social services, public policy, government service, international nongovernmental organizations, foundations, or academia.

The Sociology major consists of a core curriculum plus elective courses intended to provide breadth of exposure to the variety of areas encompassed by sociology.

## Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of core knowledge within the discipline of sociology.
2. the ability to communicate ideas clearly and persuasively in writing.
3. the ability to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
4. the ability to evaluate theory and critique research within the discipline of sociology.

## Graduate Programs in Sociology

The Department of Sociology offers three types of advanced degrees:

- the Doctor of Philosophy
- the coterminal Master of Arts in Sociology which is restricted to currently enrolled Stanford undergraduates
- the Master of Arts in Sociology which is available to Stanford students who are currently enrolled in other advanced degree programs.

The department does not have a terminal M.A. program for external applicants.

## Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Sociology and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Sociology. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Sociology and to interpret and present the results of such research.

## Areas of Study

The Department of Sociology specializes in four general areas of study, allowing students to tailor their education and research to their academic interests and career goals. The five areas of study supported by the department are:

### Organizations, Business, and the Economy

Focus is on the arrangements which societies construct for the provision of material goods or services. A formal organization which provides goods or services for profit and sells them through a market is called a business, and the economic system is capitalism. Social needs are also met through government and not-for-profit organizations, such as garden clubs, hospitals, prisons, and the Red Cross; some private and social needs are met outside of organizations, such as health care provided by family members and exchange of favors among friends. Courses stress the factors that determine whether needs that people define are met through markets or non-market allocation, through organizations, or by other means. They also investigate the environmental and technical factors that shape organization structure, the determinants of how efficiently organizations operate, and the interpersonal processes that shape individual behavior within organizations. Careers related to this field include management and administration in business or public settings, management consulting and analysis, and legal studies related to corporations, organizations, and business.

### Social Movements, Comparative Politics, and Social Change

Focus is on the emergence, reproduction, and change of political systems and institutions, especially on why and how different political systems and social movements appear in different times and places, and how differences in political regimes and economic systems influence attempts to change these systems. The origins and significance of national and transnational social movements, transition to democracy, including revolution, nationalism, and other forms of collective action, in creating and sustaining these changes analyzed across countries and over time. Careers that are relevant to this field include law, public policy, government service, nonprofit and international nongovernmental organizations, business organizations (especially those with international interests), consulting, and managerial jobs.

### Social Psychology and Interpersonal Processes

Focus is on the social organization of individual identity, beliefs, and behavior, and upon social structures and processes which emerge in and define interpersonal interactions. Processes studied include social

acceptance and competition for prestige and status, the generation of power differences, the development of intimacy bonds, the formation of expectation states which govern performance in task oriented groups, and social pressures to constrain deviance. Foundation courses emphasize the effect of social processes on individual behavior and the analysis of group processes. This field provides training for careers with a significant interpersonal component, including advertising and marketing, business, education, law, management, medicine and health, or social work.

### Social Inequality

Focus is on forms of social inequality, including fields such as: the shape and nature of social inequalities; competition for power; allocation of privilege; production and reproduction of social cleavages; and consequences of class, race, and gender for outcomes such as attitudes, political behavior, and life styles. Many courses emphasize changes in the structure of social inequalities over time, and the processes which produce similarities or differences in stratification across nations. Topics include educational inequality, employment history, gender differences, income distributions, poverty, race, and ethnic relations, social mobility, and status attainment. Careers related to this field include administration, advertising, education, foreign service, journalism, industrial relations, law, management consulting, market research, public policy, and social service.

### Race, Gender, Immigration, Identity and Policy

Focus is on population diversity, primarily in the United States, and on how identity is formed and maintained. Classes in this subject area address segregation, integration, and assimilation. What does it mean to cross from one group to another? How has the law treated racial minorities, sexual minorities, and immigrants differently over time? Careers related to this field include social work, teaching, research, law, management, and population studies which can be applied to any industry.

## Joint Programs in Sociology with the School of Law

The School of Law and Department of Sociology conduct joint programs leading to either a combined J.D. degree with an M.A. degree in Sociology or to a combined J.D. degree with a Ph.D. in Sociology.

Law students interested in pursuing an M.A. in Sociology apply for admission to the Department of Sociology during the first year of Law school. Once admitted to the Department of Sociology, the student must complete standard departmental master's degree requirements as specified in this bulletin. Applications for the joint J.D./M.A. degree program must be approved by both the department and the Law school. Faculty advisers from each program participate in the planning and supervising of the student's academic program.

The J.D./Ph.D. degree program is designed for students who wish to prepare themselves for research or teaching careers in areas relating to both legal and sociological concerns. Students interested in the joint degree program must be admitted to both the School of Law and the Department of Sociology. Interest in the joint degree program must be noted on each of the student's applications. Alternatively, an enrolled student in either the Law School or the Sociology department may apply to the other program, preferably during their first year of study. Students participating in the joint degree program are not eligible to transfer and receive credit for a masters, or other degree, towards the Sociology Ph.D..

Upon admission, students are assigned a joint program faculty adviser who assists the student in planning an appropriate program and ensuring that all requirements for both degrees are satisfied. The faculty adviser serves in this capacity during the student's course of study regardless

of whether the student is enrolled in the School of Law or the Sociology department.

J.D./Ph.D. students may elect to begin their course of study in either the School of Law or the Department of Sociology. Students must be enrolled full-time in the Law school for the first year of Law school, and must enroll full time in the graduate school for the first year of the sociology program. After that time, enrollment may be in the graduate school or the Law school, and students may choose courses from either program regardless of where enrolled. Students must satisfy the requirements for both the J.D. and the Ph.D. degrees. Up to 81 quarter (54 semester) hours of approved courses may be counted toward both degrees, but no more than 36 quarter (24 semester) hours of courses that originate outside the Law school may count toward the Law degree. To the extent that courses under this joint degree program originate outside of the Law school but count toward the Law degree, the Law school credits permitted under Section 17(1) of the Law School Regulations for cross-registration in other schools or departments of Stanford University are reduced on a unit-per-unit basis, but not below zero. Students must complete the equivalent of 183 quarter units to complete both degrees. Tuition and financial aid arrangements normally are through the school in which the student is currently enrolled.

The law degree may be conferred upon completion of applicable law school requirements; it is not necessary to have both degrees conferred simultaneously.

For more information, see the Sociology (<https://sociology.stanford.edu/academics/phd-programs/jdphd>) web site, and the Law School web site on the J.D./Ph.D. (<https://www.law.stanford.edu/degrees/joint-degrees/law-and-sociology>)

## Bachelor of Arts in Sociology

### Declaring the Major in Sociology

To declare a major in Sociology, students should declare the B.A. in Axxess, then download the major declaration form from the department website. Complete the top portion of the form, sign, and email the Director of the Undergraduate Program in Sociology to set up an entrance advising meeting.

### Major Requirements

A 3.0 GPA is required to enter the Sociology major. The B.A. in Sociology requires 60 units of course work. Units applied to the major must be taken for a letter grade (except for independent study or directed reading), and all earned grades must be 'C' or better.

Unit values for courses can vary from year to year. If you have any questions, contact the undergraduate student services officer in Sociology.

### Core Curriculum for all Sociology Majors

Students are encouraged to complete some course work at the 200-level. Sociology majors are encouraged to participate in directed research or undertake independent research with Sociology faculty. See the department web site for additional information.

Units required for the Sociology B.A. are:

	Units
Sociology Core Courses (4 courses)	16
Sociology Foundation Courses (3 courses)	12
Social Science Electives (Units sufficient to bring the total # of units to 60—usually 4-6 courses)	27
Statistics (1 course)	5
<b>Total Units</b>	<b>60</b>

### Core Courses Required for the Major

The following core courses are required of all Sociology majors.

	Units	
SOC 1	Introduction to Sociology at Stanford	5
or SOC 170	Classics of Modern Social Theory	
SOC 180A	Foundations of Social Research	4
SOC 180B	Introduction to Data Analysis	4
SOC 200	Junior/Senior Seminar for Majors	4-5
or SOC 202	Preparation for Senior Research	
<b>Total Units</b>		<b>17-18</b>

- It is recommended that students take this required course during junior year or as early as possible during senior year. Students pursuing the regular B.A. should take SOC 200 Junior/Senior Seminar for Majors. Students considering honors are encouraged to enroll in SOC 202 Preparation for Senior Research instead of SOC 200 Junior/Senior Seminar for Majors.

### Foundation Courses Required for the Major

Sociology majors must complete 3 foundation courses; one course in three different areas for a total of three courses. For further information about Sociology areas of study, see the department web site.

Foundation courses, classified by area of study, are as follows:

#### Organizations, Business, and the Economy

	Units	
SOC 114	Economic Sociology	4
SOC 160	Formal Organizations	4
SOC 162	Markets and Governance	4

#### Social Movements, Comparative Politics, and Social Change

	Units	
SOC 118	Social Movements and Collective Action	4
SOC 119	Understanding Large-Scale Societal Change: The Case of the 1960s	5
SOC 130	Education and Society	4-5

#### Social Psychology and Interpersonal Processes

	Units	
SOC 2	Social Psychology: Self and Society	3
SOC 120	Interpersonal Relations	4
SOC 121	The Individual in Social Structure: Foundations in Sociological Social Psychology	5
SOC 127	Bargaining, Power, and Influence in Social Interaction	5

#### Social Inequality

	Units	
SOC 135	Poverty, Inequality, and Social Policy in the United States	3
SOC 140	Introduction to Social Stratification	3
SOC 141	Controversies about Inequality	5
SOC 144	Inequality and the Workplace	5
SOC 149	The Urban Underclass	4

#### Race, Gender, Immigration, Identity, and Policy

	Units	
SOC 142	Sociology of Gender	5
SOC 145	Race and Ethnic Relations in the USA	4
SOC 150	Race and Political Sociology	3

SOC 155 The Changing American Family 4

## Social Science Elective Courses

Social Science electives are required for the major, sufficient to bring the total number of units in the Sociology major to 60. You may take all elective courses in Sociology if you wish. Students may choose their elective courses according to personal interest. Non-Sociology courses must be approved by the director of undergraduate studies. A maximum of 10 units taken in other Social Science departments (Anthropology, Communication, Economics, Political Science, Psychology) may be counted towards the 60 units required for the Sociology B.A.

## Statistics Requirement

Sociology majors are required to take at least one statistics course. The department suggests the courses listed below, or other comparable course with approval of the director of undergraduate studies.

Suggested Statistics courses for Sociology majors:

		Units
PSYCH 10	Introduction to Statistical Methods: Precalculus	5
SOC 181B	Sociological Methods: Statistics	5
STATS 60	Introduction to Statistical Methods: Precalculus	5

## Honors Program

Sociology majors who wish to complete an independent scholarly project under the direction of a faculty member are encouraged to apply for admission to the department's honors program. Admission to the program requires a grade point average (GPA) of 3.5 or higher in courses taken within the major, and an overall GPA of 3.3 (B+) or higher in all undergraduate course work. Applicants are required to identify a Sociology faculty member to advise on the research and writing of the essay. With the approval of the Director of Undergraduate Studies, students may work with faculty advisers in other departments.

Students are encouraged to begin planning their honors thesis in their junior year; at this time they should enroll in SOC 202 Preparation for Senior Research, or SOC 200 Junior/Senior Seminar for Majors. Students begin designing their honors project in connection with this seminar and in consultation with the seminar leader. To apply for the honors program, students should complete the honors application, obtain an adviser's approval and signature, and submit the application with a brief description of the proposed project, and a copy of the student's unofficial undergraduate transcript, to the Director of Undergraduate Studies. Prospective candidates are asked to submit an honors application as soon as possible in their junior or senior year, ideally no later than the end of the fourth quarter prior to graduation (typically Spring Quarter of the junior year). Honors students may earn up to 12 independent study units for work leading to completion of the required honors thesis, excluding units associated with the Junior/Senior Seminar.

If the student is admitted to the program, students will be directed to declare the B.A.H. in Axess and drop the general B.A. Completion of honors in Sociology requires:

1. Application and acceptance into the Sociology honors program
2. Completion of all requirements of the Sociology major
3. Completion of an honors thesis with a grade of A- or higher
4. Participation in the Sociology Honors Colloquium in the Spring Quarter prior to graduation.

If honors program requirements are not met, students must drop the B.A.H. degree program in Axess and declare the B.A. before applying to graduate.

## Minor in Sociology

Students must complete a minimum of 35 units in Sociology for the minor. Courses must be taken for a letter grade, and a minimum grade point average (GPA) of 2.0 (C) must be achieved. Students who wish to declare a minor in Sociology must do so no later than the deadline for their application to graduate. Related course work from other departments may fulfill a minor requirement. All course substitutions must be pre-approved by the Sociology student services office and the Undergraduate Program Director; a student may not exceed 5 substitution units for the minor.

Course requirements for a minor in Sociology are as follows:

		Units
SOC 1	Introduction to Sociology at Stanford	5
or SOC 170	Classics of Modern Social Theory	
SOC 2	Social Psychology: Self and Society	3
or SOC 180A	Foundations of Social Research	
or SOC 180B	Introduction to Data Analysis	
	Two foundation courses: see foundation courses required for the major above	10
	Additional course work in the department (100- or 200-level courses)	17
	<b>Total Units</b>	<b>35</b>

## Coterminal Master of Arts in Sociology

Stanford undergraduates, regardless of undergraduate major, who wish to pursue an M.A. in Sociology may apply for the coterminal master's program. The coterminal M.A. in Sociology is a flexible, self-designed program. Most students complete their M.A. in a fifth year at Stanford; occasionally students are able to complete their B.A. and coterminal M.A. in the fourth year.

## Application and admission

Undergraduates must be admitted to the program and enrolled as a graduate student for at least one quarter prior to their B.A. conferral. A cumulative GPA of at least 3.5 in previous undergraduate work is required for admission; GRE test scores are required. It is highly recommended that applicants have completed at least one Sociology course at the 100 level with a grade of 'B' or better.

The department accepts applications once a year; the application deadline is January 15 for admission in the Spring Quarter immediately following. There are no exceptions to this deadline.

All application materials are submitted directly to the Sociology graduate student services office. The department does not fund coterminal M.A. students.

To apply for admission to the Sociology coterminal M.A. program, students must submit the following:

1. The Application for Admission to Coterminal Masters' Program (<https://stanford.box.com/CotermApplic>)
2. Statement of purpose; should be 2-5 pages double-spaced. Applicants should outline reasons for pursuing the M.A. in Sociology, including career aspirations and/or future plans for additional advanced degrees;
3. Preliminary program; this is a form in the application packet. Specify at least 45 units of course work relevant to the degree program with at least 40 units in Sociology;
4. Current unofficial undergraduate transcript;
5. Two letters of recommendation from Stanford faculty familiar with the student's academic work; additional letters from teaching

assistants, employers, or other individuals will be accepted as supplemental materials but are not required;

- GRE scores.

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

### Program requirements

Coterminal M.A. students are required to take 45 units of course work during their graduate career; 40 of these units must be in Sociology courses. All units for the coterminal M.A. must be taken at or above the 100 level; advanced-level course work is encouraged and a minimum of 20 units must be taken at the 200 level. Students who wish to take courses outside the department must seek prior approval from the Sociology student services office; coterminal master's students are limited to 5 units from outside of the department; outside courses must be taken in other Social Science departments. Students may transfer a maximum of 10 units from their undergraduate career; to be eligible for transfer, courses must have been taken in the three quarters preceding admission to the M.A. program. Courses cannot be transferred after a student's BA has been conferred. All units applied to the coterminal master's degree must be taken for a letter grade, and an overall grade point average (GPA) of 3.0 (B) or better is required for the degree. Because research methods are an important component of graduate training in the social sciences, coterminal students are encouraged to take SOC 180A Foundations of Social Research, and SOC 180B Introduction to Data Analysis, in sequence when possible. These methods courses provide skills for research opportunities within the department and in academic or professional careers. Coterminal M.A. students should meet with their assigned faculty adviser upon acceptance to the program.

Students are responsible for knowing and adhering to University and Departmental policies, standards, and requirements for coterminal students. For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/bulletin/4874.htm>. (<http://registrar.stanford.edu/pdf/CotermApplic.pdf.html>) For detailed information regarding the Sociology coterminal M.A. and how to apply, see the Department of Sociology (<http://www.stanford.edu/dept/soc/coterminal>) web site.

## Master of Arts in Sociology for Current Stanford Graduate Students

The M.A. degree in Sociology is available to current Ph.D. candidates in Sociology and to students in advanced degree programs (Ph.D., J.D., M.D.) from other Stanford departments and schools.

For the M.A. degree, students must complete a minimum of 45 units of Sociology course work with a grade point average (GPA) of 3.0 (B) or better. All 45 units must be taken in courses taught by Sociology faculty. Students must enroll in SOC course offerings; crosslisted offerings are not accepted. All courses must be taken for a letter grade if possible. Workshop, colloquia, research, directed reading, and independent study units do not count towards the M.A.

University regulations pertaining to the M.A. are listed in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

Students who wish to engage in more in-depth study in a specific area may do so by focusing on course work within an area of study.

No thesis is required.

While formal application to the M.A. program is not required, applicants from outside of the Sociology department must submit:

1. Graduate Authorization Petition form, available electronically through Axess (<https://axess.stanford.edu>);
2. Program Proposal for an M.A. form available for download from the registrar's office website, submitted to Sociology graduate student services officer;
3. Short statement of purpose; 1 page double-spaced, submitted to Sociology graduate student services officer.

Sociology Ph.D.s may receive their M.A. in their second or third year of graduate study. Interested students from other degree programs should visit the department's (<https://sociology.stanford.edu/academics/coterminal-masters-program/master-arts-sociology-current-stanford-graduate-students>) web site.

## Doctor of Philosophy in Sociology

The Ph.D. curriculum and degree requirements are designed to provide students with the knowledge and skills to become proficient scholars and teachers. Doctoral students in the department taking a substantive sociology course are expected to take "letter grade" whenever possible and are expected to earn a grade of 'B+' or better in each course. Any grade of 'B' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty and the following actions may take place: the grade stands and the student's academic performance is monitored to ensure that satisfactory progress is being made; the grade stands and the student is required to revise and resubmit the work associated with that course; or the student may be required to retake the course.

The following program requirements apply to students who entered the Ph.D program in 2010-11 or later; students admitted prior to 2010 should consult the department or the Bulletin from their year of admission ([http://www.stanford.edu/dept/registrar/bulletin\\_past](http://www.stanford.edu/dept/registrar/bulletin_past)) for requirements specific to their cohort.

Students must complete the following department requirements for the Ph.D. degree in Sociology:

1. Students must enroll in SOC 305 Graduate Proseminar in Autumn Quarter of the first year. The course provides an introduction and orientation to the field of sociology, and to the department and

faculty. One unit of credit is given for this course; grading is on a satisfactory/no credit basis.

2. Students must enroll in SOC 396 Sociology Colloquium in Autumn, Winter and Spring quarters of their first and second years. The Sociology Colloquium is a semimonthly seminar held throughout the academic year, in which distinguished scholars lecture about their cutting-edge research findings. Students must enroll for credit and it is required for all first and second year Sociology students.
3. Students are required to complete 45 units of course work in Sociology in the first academic year, then 15 units of Sociology course work in the second academic year. Course work excludes workshop, independent study, and directed reading units.
4. *Theory*: Students are required to take at least two courses in sociological theory. One course should be in either macro-sociological theory (SOC 370A Sociological Theory: Social Structure, Inequality, and Conflict), or micro-sociological theory (SOC 370B Social Interaction and Group Process), in the first year of the program. A second course, in research design, should be taken during the first year in the program SOC 372 Theoretical Analysis and Research Design).
5. *Methodology*: Students are required to complete a series of courses in methodology as well as one methods elective. Students with little background in statistics are encouraged to take an undergraduate statistics course in their first quarter of the program. The required methods sequence, to be taken in order, is listed below.
6. *Survey Courses*: Students must complete four broad survey courses to demonstrate command of a range of sociological literature. Each year the department specifies which courses meet this requirement. A list of courses that generally fulfill this requirement is listed below. Students should consult with their adviser to ensure that the combination of courses selected to meet this requirement exhibits sufficient breadth. This requirement is normally completed by the end of the second year of residency and must be met by the end of the third year of residency. The most current list of approved survey courses is available on the department website.
7. *Workshops*: Beginning in year two, doctoral students are required to enroll in at least one workshop each quarter. First year students may attend workshops but are not required to enroll. Sociology workshops are offered for 1-2 units on a credit/non-credit basis only and attendance is required to receive course credit. The Director of Graduate Studies may approve a student's petition to attend a workshop when enrollment is prohibited by unit constraints; such attendance is not noted on the transcript. A list of approved workshops that fulfill this requirement is listed in the requirements section below and also on the department website.
8. *Qualifying Exam #1*: The first comprehensive examination is designed to ensure that students enter their second year with a firm reading knowledge of two substantive subfields. Students write two essays in response to questions provided by the examining committee. The questions are due exactly one week later. Students choose one of two questions to write on for each subfield. Examinations are offered in the subject areas below, based on comprehensive readings lists that are available at the beginning of each academic year. Each subject area has one faculty point person or group leader. Group leaders are responsible for assembling essay questions and agree to meet with students as requested.

Exam subject areas for 2015 -16 are:

- Economic Sociology
- Gender
- Historical and Comparative Sociology
- Organizations
- Political Sociology
- Population, Family, Demography, and Marriage
- Race, Ethnicity, and Immigration

- Social Inequality;
- Social Movements
- Social Psychology

Students may work together to read and discuss the materials on the comprehensive reading lists (and in fact they are encouraged to do so). They may consult with faculty members as they study for the exams. However, once the examination questions are released, all such collaboration and consultation should stop, and students should work independently on their essays.

9. *Qualifying Exam #2*: The second qualifying examination is a longer critical essay that focuses on a bibliography devised by the student jointly with their faculty adviser. This exam provides students with a more focused critical engagement in a specialized subfield or research area, and serves as a test of the student's ability to work and think independently. Exam #2 is due May 15 of the second year in residence.

A two-person committee that includes the primary adviser evaluates the paper. Although the reading committee is usually comprised of two regular faculty members in the department, emeritus and other faculty outside of the department may serve as a committee member with prior approval. Examinations are graded by both committee members, and the grades on these qualifying exams are an important component of the decision to advance a student to candidacy.

To accommodate student interests and goals, there are two options for Exam #2, an analytic essay (Option 1) or research paper (Option 2); see department website for more detailed information <http://sociology/doctoral/degreq.html>. Students may employ one of the comprehensive examination reading lists (from Exam #1) for an area in which they did not take the exam to construct the bibliography. If students would like to be examined in a more specialized sub-area within one of the fields that they took for Exam #1, they should consult with their reading committee and receive approval from the Director of Graduate Studies. Students should submit the Second Year Qualifying Paper form to the department by the end of Autumn Quarter of the second year.

10. *Third Year Paper*: In preparation for a career of writing scholarly papers, each student must complete a research paper in the third year of residency. This third-year paper may be on any sociological topic, and may address theoretical, empirical, or methodological issues. The paper is expected to reflect original work and be of publishable quality. Students select a committee of at least two Sociology faculty members to serve as third year paper readers. Third-year students are required to enroll in SOC 385A Research Practicum I and SOC 385B Research Practicum II, both workshops assist in developing the front end of the research paper). To ensure that students are making adequate progress on their paper, students are required to provide a first draft of the paper to readers by April 1. The final deadline for paper submission is June 1. The committee provides a review that speaks to (1) whether the paper is publishable and whether the student should therefore invest in attempting to publish it, and (2) what types of revisions, insofar as the paper is publishable, that the student should be pursuing to ready the paper for publication. These comments are shared with the Director of Graduate Studies, and copies of the paper and faculty comments will go in the student file.
11. *TA requirement*: Students must complete three quarters of teaching apprenticeship in departmental courses, or in other courses by approval. Students working as either a teaching assistant (TA) under the supervision of a faculty member or as a teaching fellow (TF) fulfills this requirement. Students are required to take SOC 300, Workshop: Teaching Development, in Spring Quarter of the first year. In addition, students are encouraged to take advantage of department and University teacher training programs. Students

for whom English is a second language are expected to acquire sufficient facility in English to be an effective teacher.

12. *RA requirement:* As partial preparation for becoming an accomplished researcher, each student must complete three quarters of research experience, working under the supervision of one or more faculty members, including regular, emeritus, and affiliated faculty. The experience may involve paid (or unpaid) work as a Research Assistant (RA). With the approval of the Director of Graduate Studies, research experience may be acquired by involvement in research projects outside the department. It is recommended that students complete their research requirements early in their graduate program; the requirement must be completed by the end of the fourth year of residency.
13. Students are required to present at least two papers at a major professional meeting (e.g., ASA) in their first five years of graduate study
14. *Dissertation Prospectus and Prospectus Defense:* In order to demonstrate the ability to conduct independent scholarly work, each student must prepare and defend dissertation prospectus by the end of May during the fourth year in residence. Students should have their dissertation committee selected by the end of their third year in the program.
15. *Doctoral Dissertation and Defense:* Each student must complete and defend a doctoral dissertation. At the choice of the student (and in consultation with his/her adviser), the dissertation requirement may be met either by (1) submitting a book-length document, or (2) submitting three independent papers. The papers may address the same topic, but should be written as stand-alone, single-authored papers in standard journal format (i.e., AJS or ASR). None of these papers may overlap substantially with one another, and none of them may be co-authored. (The main criterion in judging substantial overlap is whether any standard journal, such as AJS, would regard the papers as too similar to publish both.) The dissertation must be submitted to all committee members at least 30 days in advance of the defense date. The dissertation defense serves as the Oral Examination required by the University. Assessment of satisfactory completion is determined by the student's doctoral committee members. All students are invited to present their dissertation findings at an informal department colloquium.

The faculty are responsible for providing students with timely and constructive feedback on their progress towards the Ph.D. In order to evaluate student progress and to identify potential problem areas, the department's faculty reviews the academic progress of each first-year student at the beginning of Winter and Spring quarters and again at the end of the academic year. The first two reviews are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if there are more serious concerns, a student may be placed on probation with specific guidelines for addressing the problems detected. The review at the end of the academic year is more thorough; each student's performance during the first year is reviewed and discussed. Possible outcomes of the spring review include: (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period of probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; (2) continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program. Students leaving the program at the end of the first year are usually allowed to complete the requirements to receive an M.A. degree, if this does not involve additional residence or financial support. All students are given feedback from their advisers at the end of their first year of graduate work, helping them to identify areas of strengths and potential weakness.

At the end of the second year of residency, students who are performing well are advanced to candidacy. This step implies that the student has

demonstrated the relevant qualities required for successful completion of the Ph.D. Future evaluations are based on the satisfactory completion of specific remaining department and University requirements. Students who are not advanced to candidacy will normally be terminated from the program and awarded an M.A. degree. In some cases, the department may require that a student complete outstanding work or complete unmet requirements before admission to candidacy. The University requires that all students must be admitted to candidacy by the beginning of the third year in residence in order to continue in the Ph.D. program. Therefore all requirements stipulated by the department must be met before registration for the fall quarter of the student's third year.

At any point during the degree program, evidence that a student is performing at a less than satisfactory level may be cause for a formal academic review of that student.

## Degree Requirements

### Survey Courses

Students must complete four courses from an approved list. This list is updated and circulated to students at the start of each academic year. *Note:* class offerings rotate; not all approved survey courses are offered every year. The following courses typically fulfill the survey course requirement:

	Units	
SOC 310	Political Sociology	
SOC 314	Economic Sociology	
SOC 316	Historical and Comparative Sociology	
SOC 318	Social Movements and Collective Action	
SOC 320	Foundations of Social Psychology	
SOC 323	Sociology of the Family (not offered 2012-13)	
SOC 339	Gender Meanings and Processes	
SOC 342B	Gender and Social Structure	
SOC 347		
SOC 357	Immigration and Assimilation	
SOC 358	Sociology of Immigration	
SOC 362	Organization and Environment	
SOC 363A	Seminar on Organizational Theory	
SOC 366A	Organizational Ecology	
SOC 376	Perspectives on Organization and Environment: Social Movement Organizations and Environments	

### Research Methods

Required methodology courses are listed below. Students are required to enroll in SOC 384 New Models and Methods in the Social Sciences, in their first or second year of the program.

		Units
SOC 381	Sociological Methodology I: Introduction	5
SOC 382	Sociological Methodology II: Principles of Regression Analysis	4-5
SOC 383	Sociological Methodology III: Models for Discrete Outcomes	5
SOC 384	New Models and Methods in the Social Sciences	3

### Theory

		Units
SOC 370A	Sociological Theory: Social Structure, Inequality, and Conflict	5
SOC 370B	Social Interaction and Group Process	3-5
SOC 372	Theoretical Analysis and Research Design	3-5

## Workshops

		Units
SOC 311A	Workshop: Comparative Studies of Educational and Political Systems	1-5
SOC 311B		1-5
SOC 311C		1-5
SOC 312W	Workshop: Political Sociology, Social Movements, and Collective Action	1-2
SOC 315W	Workshop: Economic Sociology and Organizations	1-2
SOC 317W	Workshop: Networks, Histories, and Theories of Action	1-2
SOC 321W	Workshop: Social Psychology and Social Structure	1-2
SOC 338W	Workshop: Sociology of Law	1-5
SOC 341W	Workshop: Inequality	1-2
SOC 350W	Workshop: Migration, Race, Ethnicity and Nation	1-3
SOC 368W	Workshop: China Social Science	1

## Ph.D. Minor in Sociology

Sociology offers a minor for currently enrolled doctoral students in other Stanford departments and schools. Students must complete a minimum of 30 graduate-level units with a grade point average (GPA) of 3.0 (B) or better. All 30 units for the minor are to be in courses taught by Sociology faculty. Students must enroll in the SOC course offerings (not cross-listed sections). There is one exception: 5 units may be taken in a statistics or methods course taught in another department. All units must be taken for a letter grade. Workshop, colloquia, research, directed reading, or independent study units do not count towards the Ph.D. minor. The program must be approved by a Sociology adviser and filed with the Sociology student services office. While there is not a formal application process, candidates must submit a short statement of purpose (2 pages), and a completed Application for Ph.D. Minor form ([http://studentaffairs.stanford.edu/sites/default/files/registrar/files/app\\_phd\\_minor.pdf](http://studentaffairs.stanford.edu/sites/default/files/registrar/files/app_phd_minor.pdf)) to the Sociology student services office. The Application for Ph.D. Minor form must have all Sociology or other courses to be applied to the minor listed, including course number, units, and final grades.

*Emeriti: (Professors)* Joseph Berger, Sanford M. Dornbusch, James G. March, John W. Meyer, Susan Olzak, W. Richard Scott, Nancy B. Tuma, Morris Zelditch Jr.

*Chair:* Xueguang Zhou

*Professors:* Karen Cook, Shelley Correll, Mark Granovetter, David Grusky, Michael T. Hannan, Douglas McAdam, Cecilia Ridgeway, Gi-Wook Shin, C. Matthew Snipp, Andrew Walder, Xueguang Zhou

*Associate Professors:* Tomás Jiménez, Michael Rosenfeld, Robb Willer

*Assistant Professors:* Corey Fields, Michelle Jackson, Paolo Parigi, Aliya Saperstein, Cristobal Young

*Courtesy Professors:* Glenn Carroll, Prudence Carter, Michele Landis Dauber, Larry Diamond, Daniel McFarland, Walter Powell, Francisco Ramirez, Hayagreeva Rao, Sean Reardon, Jesper Sorensen, Sarah Soule

*Courtesy Associate Professors:* Mitchell Stevens, Christine Min Wotipka

*Courtesy Assistant Professors:* Sharad Goel, Amir Goldberg

*Lecturers:* Dennis Bogusz, Patricia Young

*Consulting Professor:* Ruth Cronkite

## Overseas Studies Courses in Sociology

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

		Units
OSPBER 66	Theory from the Bleachers: Reading German Sports and Culture	3
OSPFLOR 46	Images of Evil in Criminal Justice	5
OSPMARD 61	Society and Cultural Change: The Case of Spain	4
OSPOXFRD 117W	Gender and Social Change in Modern Britain	4-5

## Statistics

Courses offered by the Department of Statistics are listed under the subject code STATS on the Stanford Bulletin's ExploreCourses web site.

The department's goals are to acquaint students with the role played in science and technology by probabilistic and statistical ideas and methods, to provide instruction in the theory and application of techniques that have been found to be commonly useful, and to train research workers in probability and statistics. There are courses for general students as well as those who plan careers in statistics in business, government, industry, and teaching.

The requirements for a degree in Statistics are flexible, depending on the needs and interests of the students. Some students may be interested in the theory of statistics and/or probability, whereas other students may wish to apply statistical and probabilistic methods to a substantive area. The department has long recognized the relation of statistical theory to applications. It has fostered this by encouraging a liaison with other departments in the form of joint and courtesy faculty appointments: Economics (Anderson, Romano), Education (Olkin, Rogosa), Electrical Engineering (Montanari), Geological and Environmental Sciences (Rajaratnam, Switzer), Health Research and Policy (Efron, Hastie, Johnstone, Lavori, Olshen, Tibshirani, Wong), Mathematics (Candés, Dembo, Diaconis), Political Science (Jackman), and the SLAC National Accelerator Laboratory (Friedman). The research activities of the department reflect an interest in applied and theoretical statistics and probability. There are workshops in biology/medicine and in environmental factors in health.

In addition to courses for Statistics students, the department offers a number of service courses designed for students in other departments. These tend to emphasize the application of statistical techniques rather than their theoretical development.

The department has always drawn visitors from other countries and universities. As a consequence, there is usually a wide range of seminars offered by both the visitors and the department's own faculty.

## Undergraduate Programs in Statistics

### Majoring in Statistics

Students wishing to build a concentration in probability and statistics are encouraged to consider declaring a major in Mathematical and Computational Science (<http://web.stanford.edu/group/mathcompsci>). This interdepartmental program is administered in the Department

of Statistics and provides core training in computing, mathematics, operations research, and statistics, with opportunities for further elective work and specialization. See the "Mathematical and Computational Science" section of this bulletin.

## Graduate Programs in Statistics

University requirements for the M.S. and Ph.D. degrees are discussed in the "Graduate Degrees (p. 45)" section of this bulletin.

## Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Statistics and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Statistics. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Statistics and to interpret and present the results of such research.

## Minor in Statistics

The undergraduate minor in Statistics is designed to complement major degree programs primarily in the social and natural sciences. Students with an undergraduate Statistics minor should find broadened possibilities for employment. The Statistics minor provides valued preparation for professional degree studies in postgraduate academic programs.

The minor consists of a minimum of six courses with a total of at least 20 units. There are two required courses (8 units) and four qualifying or elective courses (12 or more units). All courses for the minor must be taken for a letter grade. An overall 2.75 grade point average (GPA) is required for courses fulfilling the minor.

## Required Courses

		Units
STATS 116	Theory of Probability	3-5
STATS 200	Introduction to Statistical Inference	3

## Qualifying Courses

At most, one of these two courses may be counted toward the six course requirement for the minor:

		Units
MATH 52	Integral Calculus of Several Variables	5
STATS 191	Introduction to Applied Statistics	3-4

## Elective Courses

At least one of the elective courses should be a STATS 200-level course. The remaining two elective courses may also be 200-level courses. Alternatively, one or two elective courses may be approved courses in other departments. Special topics courses and seminars for undergraduates are offered from time to time by the department, and these may be counted toward the course requirement. Students may not count any Statistics courses below the 100 level toward the minor.

Examples of elective course sequences are:

### Data Analysis and Applied Statistics

STATS 202	Data Mining and Analysis	3
-----------	--------------------------	---

STATS 203	Introduction to Regression Models and Analysis of Variance	3
-----------	--	---

### Statistical Methodology

STATS 205	Introduction to Nonparametric Statistics	3
STATS 206	Applied Multivariate Analysis	3
STATS 207	Introduction to Time Series Analysis	3

### Economic Optimization

STATS 206	Applied Multivariate Analysis	3
ECON 160	Game Theory and Economic Applications	5

### Psychology Modeling and Experiments

STATS 206	Applied Multivariate Analysis	3
-----------	-------------------------------	---

### Signal Processing

STATS 207	Introduction to Time Series Analysis	3
EE 264	Digital Signal Processing	3
EE 279	Introduction to Digital Communication	3

### Genetic and Ecologic Modeling

STATS 217	Introduction to Stochastic Processes	3
BIO 283	Theoretical Population Genetics	3

### Probability and Applications

STATS 217	Introduction to Stochastic Processes	3
STATS 218	Introduction to Stochastic Processes	3

### Mathematical Finances

STATS 240	Statistical Methods in Finance	3-4
STATS 243	Financial Models and Statistical Methods in Active Risk Management	3-4
STATS 250	Mathematical Finance	3

## Master of Science in Statistics

The department requires that a master's student take 45 units of work from offerings in the Department of Statistics (<http://explorecourses.stanford.edu/search?view=catalog&filter-coursestatus=Active=on&page=0&catalog=&academicYear=&q=STATS&collapse=>) or from authorized courses in other departments. With the advice of the master's program advisers, each student selects his or her own set of electives.

All requirements for the Statistics master's degree, including the coterminal master's degree, must be completed within three years of their first quarter of graduate standing. Ordinarily, four or five quarters are needed to complete all requirements. Honors Cooperative students must finish within five years.

Units for a given course may not be counted to meet the requirements of more than one degree, with the exception that up to 45 units of a Stanford M.A. or M.S. degree may be applied to the residency requirement for the Ph.D., D.M.A. or Engineer degrees. (GAP 3.2 (<http://gap.stanford.edu/3-2.html>))

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

Students must submit a completed Coterminal Course Approval Form (<https://stanford.box.com/Coterm-Course-Approval>) with their Application for Admission to Coterminal Master's Program (<https://stanford.box.com/CotermApplic>) indicating which courses must be transferred from the student's undergraduate to graduate career

For further information about the Statistics master's degree program requirements, see the department web site (<https://statistics.stanford.edu/academics/ms-statistics>). (<https://statistics.stanford.edu/masters-program-proposal-form>)

Students must earn a 3.0 GPA in the following M.S. degree requirements:

### 1. Statistics core courses (must complete all four courses):

		Units
STATS 116	Theory of Probability	3-5
STATS 191	Introduction to Applied Statistics	3-4
STATS 200	Introduction to Statistical Inference	3
STATS 217	Introduction to Stochastic Processes	2-3

All must be taken for a letter grade. Students with prior background may replace each course with a more advanced course from the same area. Courses previously taken may be waived by the adviser, in which case they must be replaced by other graduate courses offered by the department.

### 2. Linear Algebra Mathematics requirement:

Select one of the following:

		Units
MATH 104	Applied Matrix Theory	3
MATH 113	Linear Algebra and Matrix Theory	3
MATH 115	Functions of a Real Variable	3
MATH 171	Fundamental Concepts of Analysis	3

All must be taken for a letter grade. Substitution of other courses in Mathematics and Computer Science may be made with consent of the adviser.

### 3. Programming requirement:

Select one of the following:

		Units
CS 106A	Programming Methodology	3
CS 106B	Programming Abstractions	3
CS 106X	Programming Abstractions (Accelerated)	3
CME 108	Introduction to Scientific Computing	3

All must be taken for a letter grade. Substitution of other courses in Mathematics and Computer Science may be made with consent of the adviser.

### 4. Additional Statistics Courses

At least four additional Statistics courses must be taken from graduate offerings in the department (STATS 202 through 390). All must be taken

for a letter grade, if offered. Students cannot count more than a total 6 units of the following toward the master's degree requirements:

		Units
STATS 260A	Workshop in Biostatistics	1-2
STATS 260B	Workshop in Biostatistics	1-2
STATS 260C	Workshop in Biostatistics	1-2
STATS 298	Industrial Research for Statisticians	1
STATS 299	Independent Study	1-10
STATS 390	Consulting Workshop	1

### 5. Elective Courses

Additional elective units to complete the requirements may be chosen from the list available from the department web site (<https://statistics.stanford.edu/academics/ms-statistics-elective-courses>). Other graduate courses (200 or above) may be authorized by the adviser if they provide skills relevant to statistics or deal primarily with an application of statistics or probability and do not overlap courses in the student's program. There is sufficient flexibility to accommodate students with interests in applications to business, computing, economics, engineering, health, operations research, and biological and social sciences.

Courses below 200 level are not acceptable, with the following exceptions:

		Units
STATS 116	Theory of Probability	3-5
STATS 191	Introduction to Applied Statistics	3-4
MATH 104	Applied Matrix Theory	3
MATH 113	Linear Algebra and Matrix Theory	3
MATH 115	Functions of a Real Variable	3
MATH 171	Fundamental Concepts of Analysis	3
MATH 180	Introduction to Financial Mathematics	3
CS 106A	Programming Methodology	3-5
CS 106B	Programming Abstractions	3-5
CS 106X	Programming Abstractions (Accelerated)	3-5
CS 140	Operating Systems and Systems Programming	3-4
CS 142	Web Applications	3
CS 143	Compilers	3-4
CS 144	Introduction to Computer Networking	3-4
CS 145	Introduction to Databases	3-4
CS 147	Introduction to Human-Computer Interaction Design	3-5
CS 148	Introduction to Computer Graphics and Imaging	3-4
CS 149		
CS 154	Introduction to Automata and Complexity Theory	3-4
CS 155	Computer and Network Security	3
CS 157	Logic and Automated Reasoning	3
CS 161	Design and Analysis of Algorithms	3-5
CS 170	Stanford Laptop Orchestra: Composition, Coding, and Performance	1-5
CS 181	Computers, Ethics, and Public Policy	4

#### At most, one of these courses may be counted:

		Units
MATH 104	Applied Matrix Theory	3
MATH 113	Linear Algebra and Matrix Theory	3
MATH 151	Introduction to Probability Theory	3
STATS 116	Theory of Probability	3-5

### 6. Master's Degree Program Proposal Form (degree milestone)

This form (<https://statistics.stanford.edu/masters-program-proposal-form>) is to be submitted by the student to the major department's student services administrator prior to the end of the first quarter of enrollment in the program. A revised program proposal must be submitted if your degree plans change.

There is no thesis requirement.

Students with a strong mathematical background who may wish to go on to a Ph.D. in Statistics should consider applying to the Ph.D. program.

### Master of Science in Statistics: Data Science (subplan)

The Department of Statistics and ICME have collaborated on a new specialization/subplan for the Master in Science degree focusing on big data in engineering and applied sciences. Students in the program will develop strong mathematical, statistical, computational, and programming skills through the ICME M.S. requirements and will gain a fundamental data science education by focusing 18 units of elective courses in the area of data science and related courses. Upon completion of the M.S. in Statistics with a specialization/subplan in Data Science, students will be prepared to continue on to their Ph.D. in Computer Science, ICME, or as a data science professional in industry.

The M.S. in Data Science specialization/subplan is overseen by a steering committee comprised of ICME and Statistics faculty members. Current members are Professors Guenther Walther, Trevor Hastie, Emmanuel Candes, and Margot Gerritsen.

Applicants will apply to the M.S. program in Statistics and declare their preference for the Data Science subplan within the application ("Department Specialization" option). Selection of the students is made by the Statistics admission committee, which has representation from the Data Science steering committee.

A Master's degree program proposal (<https://statistics.stanford.edu/stats-ds-program-proposal-form-pdf>), is to be submitted by the student to the major department's student services administrator prior to the end of the first quarter of enrollment in the program. A revised program proposal must be submitted if your degree plans change.

(Subplans are printed on the transcript and diploma.)

### Curriculum and Degree Requirements

The course work follows the requirements of the traditional ICME M.S. degree with additional restrictions placed on the general and focused electives. As defined in the general graduate student requirements, students must maintain a grade point average (GPA) of 3.0 or better and classes must be taken at the 200 level or higher. Students must complete 45 units of required coursework in Data Science.

Students must demonstrate breadth of knowledge in the field by completing the following core courses. Courses in this area must be taken for letter grade.

		Units
CME 302	Numerical Linear Algebra	3
CME 304	Numerical Optimization	3
CME 305	Discrete Mathematics and Algorithms	3

In addition to the three core courses, the students are required to take a course in Stochastics. They can take either CME 308 Stochastic Methods in Engineering or an equivalent course approved by the steering committee. Must be taken for a letter grade.

### Requirement 2: Advanced Scientific Programming and High Performance Computing Core (6 units)

To ensure that students have a strong foundation in programming, all students will be required to take 6 units of advanced programming, with

at least 3 units in parallel computing. Courses in this area must be taken for letter grade.

		Units
Approved Advanced Programming courses: (3 units)		
CME 212	Advanced Programming for Scientists and Engineers	3
CME 214	Software Design in Modern Fortran for Scientists and Engineers	3
CS 107	Computer Organization and Systems	3-5
CS 249B	Large-scale Software Development	3
Approved Parallel Computing/HCP courses: (3 units)		
CME 213	Introduction to parallel computing using MPI, openMP, and CUDA	3
CME 342	Parallel Methods in Numerical Analysis	3
CS 149		3-4
CS 315A	Parallel Computer Architecture and Programming	3
CS 316	Advanced Multi-Core Systems	3

Students who do not start the program with a strong computational and/or programming background will take an extra 3 units to prepare themselves by, for example, taking CME 211 Software Development for Scientists and Engineers or an equivalent course, such as CS106A/B/X. For Data Science track students, the 1-unit course in MapReduce offered by ICME annually is also highly recommended.

### Requirement 3: Statistics Core (12 units)

Courses in this area must be taken for letter grade.

The curriculum for the Data Science track requires 12 units of focused coursework in Statistics consisting of the following courses:

		Units
STATS 200	Introduction to Statistical Inference	3
STATS 203	Introduction to Regression Models and Analysis of Variance	3
or		
STATS 305	Introduction to Statistical Modeling	3
STATS 315A	Modern Applied Statistics: Learning	2-3
STATS 315B	Modern Applied Statistics: Data Mining	2-3

or equivalent courses as approved by the steering committee.

Of the following 15 units in Requirements **Four** and **Five** combined, 6 units must be taken for a letter grade.

### Requirement 4: Domain Specialization or preparatory courses (9 units)

Three courses in specialized areas. One or two of these courses may be used by the students that enter the program with insufficient linear algebra or programming experience to prepare for the core requirements in the MS track.

Specialized courses include courses that further deepen the data science core. Some possibilities include:

		Units
CS 347	Parallel and Distributed Data Management	3
CS 448	Topics in Computer Graphics	3-4
CS 224W	Social Information and Network Analysis	3-4
STATS 366	Modern Statistics for Modern Biology	3
BIOS 221	Modern Statistics for Modern Biology	
PSYCH 204A	Human Neuroimaging Methods	3
PSYCH 303	Human and Machine Hearing	3
OIT 367	Business Intelligence from Big Data	4
BIOMEDIN 215	Data Driven Medicine	3

ENERGY 240	Geostatistics	2-3
BIOE 214	Representations and Algorithms for Computational Molecular Biology	3-4

### Requirement 5: Practical component (6 units)

The students need 6 units of practical component that may include any combination of:

- Capstone project, supervised by a faculty member and approved by the steering committee: the capstone project should be computational in nature; students should submit a one-page proposal, supported by the faculty member, to the steering committee (gwalther@stanford.edu) for approval.
- Clinics, such as the Stanford Data Science Challenge Lab ENGR 250 Data Challenge Laboratory and Data Science Impact Lab ENGR 350 Data Impact Laboratory
- Other courses that have a strong hands-on and practical component, such as STATS 390 Statistical Consulting (up to 3 units).

## Doctor of Philosophy in Statistics

The department looks for students who wish to prepare for research careers in statistics or probability, either applied or theoretical. Advanced undergraduate or master's level work in mathematics and statistics provides a good background for the doctoral program. Quantitatively oriented students with degrees in other scientific fields are also encouraged to apply for admission. The program normally takes five years to complete.

### Program Summary

#### First-year core program

		Units
STATS 300	Advanced Topics in Statistics: Stochastic Block Models and Latent Variable Models (offered Summer Quarter)	2-3
STATS 300A	Theory of Statistics	2-3
STATS 300B	Theory of Statistics	2-4
STATS 300C	Theory of Statistics	2-4
STATS 305	Introduction to Statistical Modeling	3
STATS 306A	Methods for Applied Statistics	3
STATS 306B	Methods for Applied Statistics: Empirical Bayes Methods	2-3
STATS 310A	Theory of Probability	2-4
STATS 310B	Theory of Probability	2-3
STATS 310C	Theory of Probability	2-4

- Pass two of three parts of the qualifying examinations (end of first year); breadth requirement (second and third year); successfully complete the thesis proposal meeting (before end of third year); pass the University oral examination (fourth or fifth year); dissertation (fifth year).
- In addition, students are required to take nine units of advanced topics courses offered by the department. Recommended courses include the following:

		Units
STATS 314A	Advanced Statistical Theory	3
STATS 314B	Topics in Minimax Inference of Nonparametric Functionals	3
STATS 315A	Modern Applied Statistics: Learning	2-3
STATS 315B	Modern Applied Statistics: Data Mining	2-3
STATS 317	Stochastic Processes	3
STATS 318	Modern Markov Chains	3
STATS 330	An Introduction to Compressed Sensing	3

STATS 370	Bayesian Statistics I	3
STATS 376A	Information Theory	3
STATS 376B	Network Information Theory	3
EE 364A	Convex Optimization I	3

- Complete a minimum of three units of STATS 390 Consulting Workshop, taking it at least twice.
- Take STATS 319 Literature of Statistics once per year after passing the Qualifying Exam until the year after passing the dissertation proposal meeting.

### First-Year Core Courses

- STATS 300 Advanced Topics in Statistics: Stochastic Block Models and Latent Variable Models systematically surveys the ideas of estimation and of hypothesis testing for parametric and nonparametric models involving small and large samples.
- STATS 305 Introduction to Statistical Modeling is concerned with linear regression and the analysis of variance.
- STATS 306A Methods for Applied Statistics and STATS 306B Methods for Applied Statistics: Empirical Bayes Methods survey a large number of modeling techniques, related to but going beyond the linear models of STATS 305 Introduction to Statistical Modeling.
- STATS 310A Theory of Probability, STATS 310B Theory of Probability, and STATS 310C Theory of Probability are measure-theoretic courses in probability theory, beginning with basic concepts of the law of large numbers and martingale theory.
  - Students who do not have enough mathematics background can take STATS 310A,B,C after their first year but need to have their first-year program approved by the Ph.D. program adviser.

### Qualifying Examinations

These are intended to test the student's level of knowledge when the first-year program, common to all students, has been completed. There are separate examinations in the three core subjects of statistical theory and methods, applied statistics, and probability theory, and all are typically taken during the summer between the student's first and second years. Students are expected to show acceptable performance in two examinations. Letter grades are not given. After passing the qualifying exams, students will file for Ph.D. candidacy, a University milestone.

### Breadth Requirement

Students are required to take 15 units of coursework outside of the department and are advised to choose an area of concentration in a specific scientific field of statistical applications approved by the Ph.D. program adviser.

Popular areas with suggested course options include:

#### Computational Biology and Statistical Genomics

Students are expected to take 9 units of graduate courses in genetics or neurosciences (imaging), such as GENE 203/BIO 203 (Advanced Genetics), as well as 9 units of classes in Statistical Genetics or Bioinformatics:

		Units
STATS 345	Statistical and Machine Learning Methods for Genomics	3
STATS 366	Modern Statistics for Modern Biology	3
STATS 367	Statistical Models in Genetics	3

<sup>1</sup> The following courses are not offered this year but may be used by students who completed them in fulfillment of this requirement: STATS 345, STATS 367.

**Machine Learning**

Courses can be chosen from the following list:

**Statistical Learning**

STATS 315A	Modern Applied Statistics: Learning	2-3
STATS 315B	Modern Applied Statistics: Data Mining	2-3

**Data Bases**

CS 245	Database Systems Principles	3
CS 346	Database System Implementation	3-5
CS 347	Parallel and Distributed Data Management	3

**Probabilistic Methods in AI**

CS 221	Artificial Intelligence: Principles and Techniques	3-4
CS 354	Topics in Circuit Complexity	3

**Statistical Learning Theory and Pattern Classification**

CS 229	Machine Learning	3-4
--------	------------------	-----

**Applied Probability**

Students are expected to take 15 units of graduate courses in some of the following areas:

**Control and Stochastic Calculus**

MS&E 322	Stochastic Calculus and Control	3
MS&E 351	Dynamic Programming and Stochastic Control	3
MATH 237	Default and Systemic Risk	3

**Finance**

STATS 250	Mathematical Finance	3
FINANCE 622	Dynamic Asset Pricing Theory	4
MATH 236	Introduction to Stochastic Differential Equations	3

**Information Theory**

EE 376A	Information Theory	3
EE 376B	Network Information Theory	3

**Monte Carlo**<sup>1</sup>

STATS 318	Modern Markov Chains	3
STATS 345	Statistical and Machine Learning Methods for Genomics	3
STATS 362	Topic: Monte Carlo	3

**Queueing Theory**

MS&E 335	Queueing and Scheduling in Processing Networks	3
----------	--	---

**Stochastic Processes**

STATS 317	Stochastic Processes	3
MATH 234	Large Deviations Theory	3

<sup>1</sup> The following courses are not offered this year but may be used by students who completed them in fulfillment of this requirement: STATS 318, STATS 345, STATS 362.

**Earth Science Statistics**

Students are expected to take:

STATS 313	Introduction to Graphical Models	3
STATS 317	Stochastic Processes	3
STATS 318	Modern Markov Chains	3

In addition, students are expected to take three courses from the GS or Geophysics departments, such as GEOPHYS 210.

**Social and Behavioral Sciences**

Students are expected to take three advanced courses from the department with an applied orientation such as:

**Units** Courses can be chosen from the following list:<sup>1</sup>

STATS 261/262	Intermediate Biostatistics: Analysis of Discrete Data	3
STATS 324	Multivariate Analysis	2-3

<sup>1</sup> The following courses are not offered this year but may be used by students who completed them in fulfillment of this requirement: STATS 343, 354.

In addition, students must complete at least three advanced quantitative courses from departments such as Anthropology, Economics, Political Science, Psychology, and Sociology, and the schools of Education, Business, or Medicine.

**Dissertation Reading Committee, Dissertation Proposal Meeting and University Oral Examinations**

The dissertation reading committee consists of the student's adviser plus two faculty readers, all of whom are responsible for reading and approving the full dissertation.

**Units**

The dissertation proposal meeting is intended to demonstrate students' depth in some areas of statistics, and to examine the general plan for their research. It also confirms that students have chosen a Ph.D. faculty adviser and have started to work with that adviser on a research topic. In the meeting, they will give a short presentation and discuss their ideas for completing a Ph.D. thesis, with a committee consisting of the dissertation reading committee plus a fourth member. The meeting must be successfully completed before the end of their third year. "Successful completion" means that the general research plan is sound and has a reasonable chance of success. If they do not successfully complete the meeting to the satisfaction of the committee, then the meeting must be repeated. Repeated failure can lead to a loss of financial support.

The oral examination/dissertation defense is scheduled when the student has finished their dissertation and is in the process of completing their final draft. The oral exam consists of a 40-minute presentation on the thesis topic, followed by a question period. The questions relate both to the student's presentation and also explore the student's familiarity with broader statistical topics related to the thesis research. The oral examination is normally completed within the last few months of the student's Ph.D. period. The examining committee usually consists of the dissertation proposal meeting committee and a fifth faculty member from outside the department. Four out of five passing votes are required and no grades are given. Nearly all students can expect to pass this examination, although it is common for specific recommendations to be made regarding completion of the thesis.

For further information on University oral examinations and committees, see the Graduate Academic Policies and Procedures (GAP) Handbook, section 4.7 (<http://gap.stanford.edu/4-7.html>) or the "University Oral Examination (p. 47)" section of this bulletin.

**Doctoral and Research Advisers**

**Units**

From the student's arrival until the selection of a research adviser, the student's academic progress is monitored by the department Director of Graduate Studies. Each student should meet at least once a quarter with the Doctoral Adviser to discuss their academic plans and their progress towards choosing a thesis adviser.

**Financial Support**

Students accepted to the Ph.D. program are offered financial support. All tuition expenses are paid and there is a fixed monthly stipend determined to be sufficient to pay living expenses. Financial support can be continued for five years, department resources permitting, for students in good standing. The resources for student financial support derive from funds made available for student teaching and research assistantships.

**Units**

Students receive both a teaching and research assignment each quarter which, together, do not exceed 20 hours. Students are encouraged to apply for outside scholarships, fellowships, and other forms of financial support.

## Ph.D. Minor in Statistics

Students must complete 30 total units for the Ph.D. minor. 20 units must be from Statistics courses numbered 300 and above and taken for letter grades. The remaining 10 units can be from Statistics courses numbered 200 and above, and may be taken for credit. The selection of courses must be approved by the Director of Graduate Studies. The Application for the Ph.D. Minor form must be approved by both the student's Ph.D. department and the Statistics department.

For further information about the Statistics Ph.D. degree program requirements, see the department web site (<https://statistics.stanford.edu/academics/doctoral-program>).

*Emeriti:* Theodore W. Anderson, Jerome H. Friedman, Ingram Olkin, Charles Stein, Paul Switzer

*Chair:* Guenther Walther (Aut), Emmanuel Candés (Win, Spr, Sum)

*Professors:* Emmanuel Candés, Sourav Chatterjee, Amir Dembo, Persi Diaconis, David L. Donoho, Bradley Efron, Trevor J. Hastie, Susan P. Holmes, Iain M. Johnstone, Tze L. Lai, Art Owen, Joseph P. Romano, David O. Siegmund, Jonathan Taylor, Robert J. Tibshirani, Guenther Walther, Wing H. Wong

## Symbolic Systems

Courses offered by the Program in Symbolic Systems are listed under the subject code SYMSYS on the Stanford Bulletin's ExploreCourses web site.

The observation that both human beings and computers can manipulate symbols lies at the heart of Symbolic Systems, an interdisciplinary program focusing on the relationship between natural and artificial systems that represent, process, and act on information. Computer programs, natural languages, the human mind, and the Internet embody concepts whose study forms the core of the Symbolic Systems curriculum, such as computation, representation, communication, and intelligence. A body of knowledge and theory has developed around these notions, from disciplines such as philosophy, computer science, linguistics, psychology, statistics, neurobiology, and communication. Since the invention of computers, researchers have been working across these disciplines to study questions such as: in what ways are computers and computer languages like human beings and their languages; how can the interaction between people and computers be made easier and more beneficial?

The core requirements of the Symbolic Systems Program (SSP) include courses in symbolic logic, the philosophy of mind, formal linguistics, cognitive psychology, programming, the mathematics of

computation, statistical theory, artificial intelligence, and interdisciplinary approaches to cognitive science. These courses prepare students with the vocabulary, theoretical background, and technical skills needed for study and research at the advanced undergraduate and graduate levels. Most of the courses in SSP are drawn from affiliated departments. Courses designed specifically for the program are aimed at integrating and supplementing topics covered by the department-based offerings. The curriculum includes humanistic approaches to questions about language and intelligence, as well as training in science and engineering.

SSP offers B.S. and M.S. degree programs. Both programs require students to master a common core of required courses and to choose an area of specialization.

## Mission of the Undergraduate Program in Symbolic Systems

The undergraduate program in Symbolic Systems is an interdisciplinary program focusing on the relationships between natural and artificial systems that use symbols to communicate and to represent information. The mission of the program is to prepare majors with the vocabulary, theoretical background, and technical skills necessary to research questions about language, information, and intelligence, both human and machine. The curriculum offers a combination of traditional humanistic approaches to these questions as well as a training and familiarity with contemporary developments in the science and technology of computation. Students in the major take courses in cognitive science, computer programming, logic and computational theory, probability, cognitive psychology, philosophy of mind, linguistics, and artificial intelligence. The program prepares students for a variety of careers in the private and public sectors, especially those involving the human-facing sides of information systems/technology, as well as for further study and research in the cognitive and/or information sciences.

## Learning Outcomes (Undergraduate)

The program expects its undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Symbolic Systems Program. Students are expected to demonstrate:

1. ability to apply formal, philosophical, and/or computational analysis to experimental designs and data and vice versa.
2. ability to understand multiple formal, philosophical, and/or computational frameworks and how they are related to each other.
3. ability to map real world problems or observed phenomena onto formal, philosophical and/or computational frameworks and vice versa.

## Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Symbolic Systems and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses representing each of the core disciplines of Symbolic Systems as well as an individualized course program in support of the completion of a Master's thesis.

## Bachelor of Science in Symbolic Systems

The program leading to a B.S. in Symbolic Systems provides students with a core of concepts and techniques, drawing on faculty and courses from various departments. The curriculum prepares students for advanced training in the interdisciplinary study of language and information, or for postgraduate study in any of the main contributing disciplines. It is also excellent preparation for employment immediately after graduation.

Symbolic Systems majors must complete a core of required courses plus a field of study consisting of five additional courses. All major courses are to be taken for letter grades unless an approved course is offered satisfactory/no credit only. All core courses must be passed with a grade of 'C-' or better. Students who receive a grade lower than this in a core course must alert the program of this fact so that a decision can be made about whether the student should continue in the major.

## Core Requirements

In order to graduate with a B.S. in Symbolic Systems, a student must complete the following requirements. Some of these courses have other courses as prerequisites; students are responsible for completing each course's prerequisites before they take it. With the exception of the advanced small seminar requirement, courses cannot be used towards more than one area of the core requirements. For additional information, see the Symbolic Systems web site ([http://symsys.stanford.edu/undergraduate\\_programs](http://symsys.stanford.edu/undergraduate_programs)). *Note:* Students matriculating in the Class of 2018 or later must take SYMSYS 100 Minds and Machines before their declaration of the Symbolic Systems undergraduate major can be approved.

### 1. Introductory Core Course

Students matriculating in the Class of 2018 or later must take SYMSYS 100 Minds and Machines before their declaration of the Symbolic Systems undergraduate major can be approved.

SYMSYS 100 Minds and Machines

Units  
4

### 2. Continuous Fundamentals Level 1—Single Variable Calculus

Select one of the following Series:

**Series A** 10

10 units of Advanced Placement Calculus credit

**Series B** 10

MATH 19 Calculus  
& MATH 20 and Calculus  
& MATH 21 and Calculus

**Series C** 10

MATH 41 Calculus  
or MATH 41A Calculus ACE

MATH 42 Calculus  
or MATH 42A Calculus ACE

**Series D**

Equivalent preparation in Single Variable Calculus, as judged by student

Units

### 3. Continuous Fundamentals Level 2—Multivariable Calculus

Select one of the following:<sup>1</sup>

CME 100 Vector Calculus for Engineers 5

CME 100A Vector Calculus for Engineers, ACE 6

MATH 51 Linear Algebra and Differential Calculus of Several Variables 5

MATH 51A Linear Algebra and Differential Calculus of Several Variables, ACE 6

MATH 51H Honors Multivariable Mathematics 5

Units

<sup>1</sup> MATH 52 Integral Calculus of Several Variables and/or MATH 53 Ordinary Differential Equations with Linear Algebra, or CME 102 Ordinary Differential Equations for Engineers and/or CME 104 Linear Algebra and Partial Differential Equations for Engineers, are recommended and may be required for some optional higher level courses.

### 4. Continuous Fundamentals Level 3—Probability and Statistics

Units

Select one of the following:

CS 109 Introduction to Probability for Computer Scientists 3-5

STATS 110 Statistical Methods in Engineering and the Physical Sciences 4-5

STATS 116 Theory of Probability 3-5

MS&E 120 Probabilistic Analysis 5

EE 178 Probabilistic Systems Analysis 4

MATH 151 Introduction to Probability Theory 3

CME 106/ ENGR 155C Introduction to Probability and Statistics for Engineers 3-4

### 5. Discrete Fundamentals

Units

**a. Computing Level 1** 3-5

CS 106A Programming Methodology

Or equivalent preparation, as judged by student

**b. Computing Level 2** 3-5

Select one of the following:

CS 106B Programming Abstractions

CS 106X Programming Abstractions (Accelerated)

**c. Logic and Computational Theory** 3-5

Select one of the following:

CS 103 Mathematical Foundations of Computing

PHIL 150 Mathematical Logic

PHIL 150E Logic in Action: A New Introduction to Logic

### 6. Technical Depth

Two courses chosen from the list below (from either the same or different areas), appropriate to a student's concentration. Students concentrating in HCI, AI, or Computer Music must take CS 107 Computer Organization and Systems. Other concentrations may also restrict the particular courses that can be taken to fulfill this requirement. See concentration lists at <http://symsys.stanford.edu/viewing/htmldocument/16190>

Units

#### Area A. Computer Programming

CS 107 Computer Organization and Systems (required for HCI, AI, or Computer Music) 3-5

#### Area B. Computational Theory<sup>1</sup>

CS 154 Introduction to Automata and Complexity Theory 3-4

CS 161 Design and Analysis of Algorithms 3-5

PHIL 151A Recursion Theory 4

#### Area C. Logic

CS 157 Logic and Automated Reasoning 3

PHIL 151 Metalogic 4

PHIL 152 Computability and Logic 4

PHIL 154 Modal Logic 4

#### Area D. Decision Theory/Game Theory

CS 224M Multi-Agent Systems 3

ECON 160 Game Theory and Economic Applications 5

ECON 180 Honors Game Theory 5

MS&E 252	Decision Analysis I: Foundations of Decision Analysis	3-4
----------	---	-----

**Area E. Probability and Statistics**

STATS 200	Introduction to Statistical Inference	3
CS 228	Probabilistic Graphical Models: Principles and Techniques	3-4

<sup>1</sup> CS 156 is not offered in 2015-16 but may be used to fulfill this requirement.

**7. Philosophical Foundations Level 1**

**Introductory Philosophy <sup>1</sup>**

Select one of the following:

PHIL 1	Introduction to Philosophy
PHIL 2	Introduction to Moral Philosophy
PHIL 60	Introduction to Philosophy of Science
PHIL 102	Modern Philosophy, Descartes to Kant
PHIL 135	Existentialism
THINK 24	Evil

All three of the following SLE (must complete all three):

SLE 91	Structured Liberal Education
SLE 92	Structured Liberal Education
SLE 93	Structured Liberal Education

Other introductory courses taught in the Philosophy Department, if approved by the Program Director or Associate Director

<sup>1</sup> SLE 91, 92, 93 (Must complete entire sequence).

**8. Philosophical Foundations Level 2**

PHIL 80	Mind, Matter, and Meaning
---------	---------------------------

**9. Philosophical Foundations Level 3**

Select one of the following advanced undergraduate course in metaphysics/epistemology(post-PHIL 80): <sup>1</sup>

PHIL 107B	Plato's Metaphysics and Epistemology
PHIL 173B	Metaethics
PHIL 175	Philosophy of Law
PHIL 180	Metaphysics
PHIL 180A	Realism, Anti-Realism, Irrealism, Quasi-Realism
PHIL 181	Philosophy of Language
PHIL 182	Truth
PHIL 184	Epistemology
PHIL 186	Philosophy of Mind
PHIL 187	Philosophy of Action

Note: Symbolic Systems majors must take PHIL 182 for 3 or more units.

**10. Cognition and Neuroscience**

PSYCH 45	Introduction to Learning and Memory	3
PSYCH 50	Introduction to Cognitive Neuroscience	4

An additional undergraduate course in cognition and/or neurosciences <sup>1</sup>

Select one of the following:

BIO 20	Introduction to Brain and Behavior
BIO 150	Human Behavioral Biology
PSYCH 30	Introduction to Perception

PSYCH 45	Introduction to Learning and Memory
PSYCH 50	Introduction to Cognitive Neuroscience
PSYCH 60	Introduction to Developmental Psychology
PSYCH 70	Introduction to Social Psychology
PSYCH 131	Language and Thought
PSYCH 141	Cognitive Development
PSYCH 154	Judgment and Decision-Making

**11. Natural Language**

Units	Language and Mind	Units
3-5	Select one of the following:	4
	LINGUIST 1 Introduction to Linguistics	
	LINGUIST 106 Introduction to Speech Perception	
	LINGUIST 140 Language Acquisition I	
	PSYCH 131 Language and Thought	
	<b>Linguistic Theory</b>	4
	Select one of the following:	
	LINGUIST 105 Phonetics	
	LINGUIST 110 Introduction to Phonology	
	LINGUIST 120 Introduction to Syntax	
	LINGUIST 121A The Syntax of English	
	LINGUIST 121B Crosslinguistic Syntax	
	LINGUIST 130A Introduction to Semantics and Pragmatics	
	LINGUIST 130B Introduction to Lexical Semantics	
	LINGUIST 184 Syntactic Theory and Implementation	

**12. Computation and Cognition**

Units		Units
5	A course applying core technical skills to cognition	
	Select one of the following:	
	CS 221 Artificial Intelligence: Principles and Techniques	
	CS 224M Multi-Agent Systems	
	CS 228 Probabilistic Graphical Models: Principles and Techniques	
	CS 229 Machine Learning	
	LINGUIST 180/ CS 124 From Languages to Information	
	LINGUIST 182 Computational Theories of Syntax	
	PSYCH 204 Computation and cognition: the probabilistic approach	
	PSYCH 209 Neural network and deep learning models for cognition and cognitive neuroscience	
	PSYCH 239 Formal and Computational Approaches in Psychology and Cognitive Science	

**Advanced Small Seminar Requirement**

An upper-division, limited-enrollment seminar drawing on material from other courses in the core. Courses listed under Symbolic Systems Program offerings with numbers from SYMSYS 200 through SYMSYS 209 are acceptable, as are other courses found in the course list below (other courses may be added throughout the Autumn Quarter). Total enrollment must not exceed 20 students for a course to be approved as fulfilling the Advanced Small Seminar Requirement. A course taken to fulfill this requirement can also be counted toward another requirement, as part of either the core or a student's concentration, but not both.

		Units
LINGUIST 236	Seminar in Semantics: Modality and Conditionals	4
MUSIC 220C	Research Seminar in Computer-Generated Music	2-4

PHIL 194D	Capstone Seminar: Analyticity	4
PHIL 348	Evolution of Signalling	2-4
PHIL 359	Topics in Logic, Information and Agency	2-4
PHIL 385D	Topics in Philosophy of Language	2-4
PSYCH 145	Seminar on Infant Development	1-2
PSYCH 169	Advanced Seminar on Memory	3
PSYCH 232	Brain and Decision Making	3
PSYCH 251	Affective Neuroscience	3
SYMSYS 201	ICT, Society, and Democracy	3
SYMSYS 206	Philosophy of Neuroscience	4
SYMSYS 245	Cognition in Interaction Design	3

## Fields of Study

In addition to the core requirements listed above, the Symbolic Systems major requires each student to complete a field of study consisting of five courses that are thematically related to each other. Students select concentrations from the list below or design others in consultation with their advisers. The field of study is declared on Axess; it appears on the transcript but not on the diploma.

- Applied Logic
- Artificial Intelligence
- Cognitive Science
- Computer Music
- Decision Making and Rationality
- Human-Computer Interaction
- Learning
- Natural Language
- Neurosciences
- Philosophical Foundations

Note: A course may not count toward both a core and a concentration requirement, unless it is applied to the Advanced Small Seminar area within the core. A course that is applied to the Advanced Small Seminar requirement may also be counted toward a student's concentration or toward another core requirement, if appropriate, but not to both.

**Individually Designed Concentrations (IDCs)** consist of five courses in a coherent subject area related to symbolic systems. This relationship may be established through inclusion in an IDC of two or more courses that connect the proposed concentration to the core, i.e. courses that (a) directly apply disciplines included in the core and (b) are related by topic or methodology to the other courses in the proposed concentration.

Course selection is to be made in consultation with the student's adviser and is subject to approval by the adviser, the Associated Director, and the Director. For examples of IDCs completed by past SSP students, consult the list of alumni and apply the filter "Individually Designed Concentration".

Approval of an IDC must take place no less than two full quarters before a student plans to graduate, e.g. prior to the first day of Winter Quarter of the senior year if a student intends to graduate in June of that year. Failure to obtain approval by the required date will necessitate either completing the requirements for one of the suggested concentrations, or delaying graduation to the end of the second full quarter following approval of an IDC.

To get a proposed IDC approved, send an email message to [symsys-directors@lists.stanford.edu](mailto:symsys-directors@lists.stanford.edu), cc'd to your prospective concentration adviser, stating that the adviser has approved your proposal, and giving a title, one-paragraph description, and course plan for your proposed concentration.

## Undergraduate Research

The program encourages all SSP majors to gain experience in directed research by participating in faculty research projects or by pursuing independent study. In addition to the Symbolic Systems Honors Program (see below), the following avenues are offered.

*Summer Internships:* students work on SSP-related faculty research projects. Application procedures are announced in the winter quarter for SSP majors.

*Research Assistantships:* other opportunities to work on faculty research projects are typically announced to SSP majors as they arise during the academic year.

*Independent Study:* under faculty supervision. For course credit, students should enroll in SYMSYS 196 Independent Study.

Contact SSP for more information on any of these possibilities, or see the Symbolic Systems (<http://symsys.stanford.edu>) web site. In addition, the Undergraduate Advising and Research office offers grants and scholarships supporting student research projects at all levels; see [http://ual.stanford.edu/00/research\\_opps/Grants](http://ual.stanford.edu/00/research_opps/Grants).

## Honors Program

Seniors in SSP may apply for admission to the Symbolic Systems honors program prior to the beginning of their final year of study. Students who are accepted into the honors program can graduate with honors by completing an honors thesis under the supervision of a faculty member. Course credit for the honors project may be obtained by registering for SYMSYS 190 Senior Honors Tutorial any quarter while a student is working on an honors project. SYMSYS 191 Senior Honors Seminar, is recommended for honors students during the senior year. Contact SSP or visit the program's web site for more information on the honors program, including deadlines and policies.

## Minor in Symbolic Systems

Students may minor in Symbolic Systems by completing either Option 1 or Option 2. For additional information see the Symbolic Systems minors web site (<http://symsys.stanford.edu/viewing/htmldocument/13635>).

### Option 1

One course in each of the following core areas (please note that several of these courses have prerequisites):

Units

#### a. Cognition

Select one of the following:

SYMSYS 100	Minds and Machines <sup>1</sup>
PSYCH 45	Introduction to Learning and Memory
PSYCH 50	Introduction to Cognitive Neuroscience

#### b. Logic and Computation

Select one of the following:

3-5

PHIL 150	Mathematical Logic
PHIL 150E	Logic in Action: A New Introduction to Logic
PHIL 151	Metalogic
CS 103	Mathematical Foundations of Computing

#### c. Computer Programming

Select one of the following:

3-5

CS 106B	Programming Abstractions
CS 106X	Programming Abstractions (Accelerated)
CS 107	Computer Organization and Systems

#### d. Philosophical Foundations

Select one of the following:

SYMSYS 100 Minds and Machines <sup>1</sup>

PHIL 80 Mind, Matter, and Meaning

#### e. Linguistic Theory

Select one of the following:

LINGUIST 105 Phonetics

LINGUIST 110 Introduction to Phonology

LINGUIST 120 Introduction to Syntax

LINGUIST 121A The Syntax of English

LINGUIST 121B Crosslinguistic Syntax

LINGUIST 130A Introduction to Semantics and Pragmatics

LINGUIST 130B Introduction to Lexical Semantics

LINGUIST 184 Syntactic Theory and Implementation

#### f. Computation and Cognition

3-4

Select one of the following:

CS 221 Artificial Intelligence: Principles and Techniques

CS 224M Multi-Agent Systems

CS 228 Probabilistic Graphical Models: Principles and Techniques

CS 229 Machine Learning

LINGUIST 180 From Languages to Information

LINGUIST 182 Computational Theories of Syntax

PSYCH 204 Computation and cognition: the probabilistic approach

PSYCH 209 Neural network and deep learning models for cognition and cognitive neuroscience

PSYCH 239 Formal and Computational Approaches in Psychology and Cognitive Science

<sup>1</sup> SYMSYS 100 Minds and Machines may not be counted for both areas 'a' and 'd'.

## Option 2

SYMSYS 100 Minds and Machines, plus an interdisciplinary SSP concentration listed on the SSP (<http://symsys.stanford.edu/viewing/htmldocument/16190>) web site. To qualify, the selection of courses used for the minor must be interdisciplinary; it must either include courses from at least three departments, or include more than one course from each of two departments.

## Coterminal Master's Degrees in Symbolic Systems

Many SSP majors also complete coterminal M.S. or M.A. degrees in affiliated departments. In addition to the Symbolic Systems M.S. program, the Department of Philosophy offers a Special Program in Symbolic Systems track for interdisciplinary graduate level work leading to the Master of Arts in Philosophy (<http://www.stanford.edu/dept/registrar/bulletin/6567.htm>).

### University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 42)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 46)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer

of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate adviser be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

## Master of Science in Symbolic Systems

The University's basic requirements for the M.S. degree is discussed in the "Graduate Degrees (p. 45)" section of this bulletin.

The M.S. degree in Symbolic Systems is designed to be completed in the equivalent of one academic year by coterminal students or returning students who already have a B.S. degree in Symbolic Systems, and in two years or less by other students depending upon level of preparation. Admission is competitive, providing a limited number of students with the opportunity to pursue course and project work in consultation with a faculty adviser who is affiliated with the Symbolic Systems Program. The faculty adviser may impose requirements beyond those described here.

Admission to the program as a coterminal student is subject to the policies and deadlines described in the "Coterminal Bachelor's and Master's Degrees (p. 42)" section of this bulletin. Applicants to the M.S. program are reviewed each Winter Quarter. Information on deadlines, procedures for applying, and degree requirements are available from the program's student services coordinator in the Linguistics Department office (460-127E) and at the Symbolic Systems (<http://symsys.stanford.edu/viewing/htmldocument/13623>) web site.

### Degree Requirements

A candidate for the M.S. degree in Symbolic Systems must complete a program of 45 units. At least 36 of these must be graded units, passed with an average grade of 3.0 (B) or better, and any course taken as part of the 45 unit program must be taken for a letter grade unless the course is offered S/NC only. None of the 45 units to be counted toward the M.S. degree may include units counted toward an undergraduate degree at Stanford or elsewhere. Course requirements are waived only if evidence is provided that similar or more advanced courses have been taken, either at Stanford or another institution. Courses that are waived rather than taken may not be counted toward the M.S. degree. For additional information, see the Symbolic Systems web site ([http://symsys.stanford.edu/graduate\\_programs](http://symsys.stanford.edu/graduate_programs)).

Each candidate for the M.S. degree must fulfill the following requirements:

1. Submission to the Symbolic Systems Program office and approval of the following pre-project research documents:
  - a. Project Area Statement, endorsed with a commitment from a student's prospective project adviser no later than May 1 of the academic year prior to the expected graduation year; and
  - b. Qualifying Research Paper due no later than the end of the Summer Quarter prior to the expected graduation year.
2. Completion of a coherent plan of study, to be approved by the Graduate Studies Director in consultation with the student's adviser and designed to support a student's project. An initial plan of study should be delineated on the Program Proposal Form (<http://>

studentaffairs.stanford.edu/sites/default/files/registrar/files/proppropma.pdf) prior to the end of the student's first quarter of study, as required by the University, to be modified at the time of the Project Area Statement with the approval of a student's adviser and the Graduate Studies Director. The final version of the Program Proposal, which should specify all the courses the student has taken and proposes as fulfillment of the unit requirements for the degree, is due by the end of Finals Week in the quarter prior to the student's expected graduation quarter (i.e. end of Winter Quarter for a student graduating in the Spring). The plan of study must include courses taken for 3 units or more each that are more advanced than the Symbolic Systems undergraduate core in four main skill areas: formal, empirical, computational, and philosophical; and in at least three of the following departments: Computer Science, Linguistics, Philosophy, and Psychology. More advanced courses in each of the skill areas are defined as follows:

a) formal: a course in logic and computational theory beyond the level of PHIL 151 Metalogic. The courses below have been approved. Other courses may be approved if appropriate.

- PHIL 252 Computability and Logic
- PHIL 254 Modal Logic
- PHIL 350A Model Theory
- PHIL 355 Logic and Social Choice
- CS 154 Introduction to Automata and Complexity Theory
- CS 157 Logic and Automated Reasoning
- CS 161 Design and Analysis of Algorithms
- CS 364A Algorithmic Game Theory

b) empirical: a course drawing on experimental or observational data or methods, beyond the level of Psych 55, Ling 120, or Ling 130A. The courses below are examples of those that have been approved. Other courses may be approved if appropriate.

- COMM 268. Experimental Research in Advanced User Interfaces (same as COMM 168, COMM 368, ME 468)
- COMM 269. Computers and Interfaces: Psychological and Social Issues (same as COMM 169)
- CS 224N Natural Language Processing
- CS 376 Human-Computer Interaction Research
- LINGUIST 230B Semantics and Pragmatics I
- LINGUIST 241 Language Acquisition II
- LINGUIST 274C Linguistic Field Methods: Syntax
- NBIO 206 The Nervous System
- NBIO 258 Information and Signaling Mechanisms in Neurons and Circuits
- PSYCH 204 Computation and cognition: the probabilistic approach
- PSYCH 204A Human Neuroimaging Methods
- PSYCH 209 Neural Network and Deep Learning Models for Cognition and Cognitive Science
- PSYCH 252 Statistical Methods for Behavioral and Social Sciences
- PSYCH 254 Lab in Experimental Methods
- STATS 200 Introduction to Statistical Inference
- SYMSYS 245. Cognition in Interaction Design

c) computational: a course involving programming beyond the level of CS 107. The courses below have been approved. Other courses may be approved if appropriate.

- CS 108 Object-Oriented Systems Design
- CS 110 Principles of Computer Systems
- CS 124 From Languages to Information
- CS 142 Web Applications

- CS 143 Compilers
- CS 148 Introduction to Computer Graphics and Imaging
- CS 221 Artificial Intelligence: Principles and Techniques
- CS 224N Natural Language Processing
- CS 224W Social Information and Network Analysis
- CS 249A Object-Oriented Programming from a Modeling and Simulation Perspective

d) philosophical: a course in the area of Philosophy of Mind/Language/Science/Epistemology or Metaphysics at the 200 level or above, certified by the instructor as worthy of graduate credit. The courses below are examples of those that have been approved. Other courses may be approved if appropriate.

- PHIL 264 Central Topics in the Philosophy of Science: Theory and Evidence
- PHIL 267B Philosophy, Biology, and Behavior
- PHIL 280 Metaphysics
- PHIL 281 Philosophy of Language
- PHIL 285B Philosophy of Perception
- PHIL 286 Philosophy of Mind
- PHIL 287 Philosophy of Action
- PHIL 383B What's an Inference?
- SYMSYS 206 Philosophy of Neuroscience

3. Completion of three quarters of SYMSYS 291 Master's Program Seminar.

4. Completion of a substantial project appropriate to the program plan, represented by the M.S. Thesis, the last of the the M.S research documents (<http://symsys.stanford.edu/viewing/htmldocument/13678>). The project normally takes three quarters, and work on the project may account for up to 15 units of a student's program. The thesis must be read and approved for the master's degree in Symbolic Systems by two qualified readers approved by the program, at least one of whom must be a member of the academic council. A copy of the thesis must be submitted (in both print and electronic forms) to the Associate Director of Symbolic Systems, with the print version including the signatures of each reader indicating approval of the thesis for the degree of Master of Science, no later than 12 noon on the day of the University Dissertation/Thesis Submission Deadline (<https://studentaffairs.stanford.edu/registrar/students/dissertation-thesis>) for the quarter of a student's graduation.

*Director:* Thomas A. Wasow

*Director of Graduate Studies:* Thomas A. Wasow

*Associate Director:* Todd Davies

*Program Committee* Michael Bernstein, Herbert Clark, Todd Davies, Michael C. Frank, Daniel Jurafsky, Krista Lawlor, Christopher Manning, James McClelland, Stanley Peters, Christopher Potts, Eric Roberts, Kenneth A. Taylor, Johan van Benthem, Thomas A. Wasow, Daniel Lassiter, Thomas Icard

*Program Faculty:*

*Applied Physics:* Bernardo Huberman (Consulting Professor)

*Art and Art History:* Scott Bukatman (Professor)

*Classics:* Reviel Netz (Professor)

*Civil and Environmental Engineering:* John Kunz (Program Consultant)

**Communication:** Jeremy Bailenson (Associate Professor), Byron Reeves (Professor), Frederick Turner (Associate Professor)

**Computer Science:** Michael Bernstein (Assistant Professor), David Dill (Professor), Michael Genesereth (Associate Professor), Oussama Khatib (Professor), Daphne Koller (Consulting Professor), James Landay (Professor), Jean-Claude Latombe (Professor, emeritus), Marc Levoy (Professor, emeritus), Christopher Manning (Professor), Andrew Ng (Associate Professor), Nils Nilsson (Professor, emeritus), Vaughan Pratt (Professor, emeritus), Eric Roberts (Professor), Tim Roughgarden (Associate Professor), Mehran Sahami (Professor, Teaching), Yoav Shoham (Professor), Sebastian Thrun (Professor, Research), Terry Winograd (Professor, emeritus)

**Economics:** Muriel Niederle (Professor)

**Education:** BJ Fogg (Consulting Professor), Raymond P. McDermott (Professor), Roy Pea (Professor), Daniel Schwartz (Professor)

**Electrical Engineering:** Krishna Shenoy (Professor)

**French and Italian:** Jean-Pierre Dupuy (Professor)

**Genetics:** Russ B. Altman (Professor)

**Graduate School of Business:** Baba Shiv (Professor)

**History:** Jessica G. Riskin (Associate Professor)

**Linguistics:** Arto Anttila (Associate Professor), Joan Bresnan (Professor, emerita), Eve Clark (Professor), Cleo Condoravdi (Professor Research), Penelope Eckert (Professor), Daniel Jurafsky (Professor), Ronald Kaplan (Consulting Professor), Lauri Karttunen (Consulting Professor), Martin Kay (Professor), Daniel Lassiter (Assistant Professor), Beth Levin (Professor), Christopher Manning (Professor), Stanley Peters (Professor, emeritus), Christopher Potts (Associate Professor), Meghan Sumner (Associate Professor), Thomas A. Wasow (Professor, emeritus), Annie Zaenen (Consulting Professor),

**Management Science and Engineering:** Pamela Hinds (Associate Professor)

**Mathematics:** Persi Diaconis (Professor), Solomon Feferman (Professor, emeritus)

**Medicine:** Russ B. Altman (Professor), Mark Musen (Professor)

**Music:** Jonathan Berger (Professor), Christopher Chafe (Professor), Eleanor Selfridge-Field (Consulting Professor), Ge Wang (Assistant Professor)

**Neurobiology:** Ben Barres (Professor), William T. Newsome (Professor), Jennifer Raymond (Associate Professor)

**Philosophy:** Michael Bratman (Professor), Alexis Burgess (Assistant Professor), Mark Crimmins (Associate Professor), John Etchemendy (Professor), Solomon Feferman (Professor, emeritus), Dagfinn Føllesdal (Professor, emeritus), Thomas Icard III (Assistant Professor), Krista Lawlor (Associate Professor), Anna-Sara Malmgren (Assistant Professor), John Pery (Professor, emeritus), Brian Skyrms (Professor), Kenneth Taylor (Professor), Johan van Benthem (Professor), Thomas A. Wasow (Professor, emeritus)

**Psychiatry and Behavioral Sciences:** Vinod Menon (Professor, Research)

**Psychology:** Herbert H. Clark (Professor), Anne Fernald (Associate Professor), Michael C. Frank (Assistant Professor), Noah Goodman (Assistant Professor), Kalanit Grill-Spector (Associate Professor), Hyowon Gweon (Assistant Professor), Brian Knutson (Associate Professor), Ellen Markman (Professor), James McClelland (Professor), Samuel McClure (Assistant Professor), Barbara Tversky (Professor, emerita), Anthony Wagner (Professor), Brian Wandell (Professor)

**Statistics:** Persi Diaconis (Professor), Susan P. Holmes (Professor)

**Symbolic Systems:** Todd Davies (Lecturer), Jeff Shrager (Consulting Professor), Paul Skokowski (Consulting Professor)

**Other Affiliates:** David Barker-Plummer (CSLI Engineering Research Associate), Keith Devlin H-STAR Operation Senior Researcher), Daniel Flickinger (CSLI Research and Development Engineer)

## Cognate Courses for the Bachelor's Degree

The following is a list of cognate courses that may be applied to the B.S. in Symbolic Systems. Click on the course or see ExploreCourses for course descriptions and General Education Requirements (GER) information. Courses taken for a Symbolic Systems degree or Minor must be taken for 3 units (or more). See Degree Requirements for details.

### Core

		Units
BIO 20	Introduction to Brain and Behavior	3
CME 100	Vector Calculus for Engineers	5
CME 100A	Vector Calculus for Engineers, ACE	6
CS 103	Mathematical Foundations of Computing	3-5
CS 106A	Programming Methodology	3-5
CS 106B	Programming Abstractions	3-5
CS 106X	Programming Abstractions (Accelerated)	3-5
CS 107	Computer Organization and Systems	3-5
CS 109	Introduction to Probability for Computer Scientists	3-5
CS 124	From Languages to Information	3-4
CS 154	Introduction to Automata and Complexity Theory	3-4
CS 157	Logic and Automated Reasoning	3
CS 161	Design and Analysis of Algorithms	3-5
CS 221	Artificial Intelligence: Principles and Techniques	3-4
CS 224M	Multi-Agent Systems	3
CS 228	Probabilistic Graphical Models: Principles and Techniques	3-4
CS 229	Machine Learning	3-4
ECON 160	Game Theory and Economic Applications	5
EE 178	Probabilistic Systems Analysis	4
ENGR 155C	Introduction to Probability and Statistics for Engineers	4
ETHICSOC 20	Introduction to Moral Philosophy	5
LINGUIST 1	Introduction to Linguistics	4
LINGUIST 105	Phonetics	4
LINGUIST 106	Introduction to Speech Perception	4
LINGUIST 110	Introduction to Phonology	4
LINGUIST 120	Introduction to Syntax	4
LINGUIST 121A	The Syntax of English	4
LINGUIST 121B	Crosslinguistic Syntax	4
LINGUIST 130A	Introduction to Semantics and Pragmatics	4
LINGUIST 140	Language Acquisition I	4
LINGUIST 180	From Languages to Information	3-4
LINGUIST 182	Computational Theories of Syntax	3-4
LINGUIST 230A	Introduction to Semantics and Pragmatics	4
LINGUIST 240	Language Acquisition I	4
LINGUIST 282	Computational Theories of Syntax	3-4
MATH 19	Calculus	3
MATH 20	Calculus	3
MATH 21	Calculus	4

MATH 41	Calculus	5
MATH 41A	Calculus ACE	6
MATH 42	Calculus	5
MATH 42A	Calculus ACE	6
MATH 51	Linear Algebra and Differential Calculus of Several Variables	5
MATH 51A	Linear Algebra and Differential Calculus of Several Variables, ACE	6
MATH 151	Introduction to Probability Theory	3
MATH 162	Philosophy of Mathematics	4
MS&E 120	Probabilistic Analysis	5
MS&E 252	Decision Analysis I: Foundations of Decision Analysis	3-4
PHIL 1	Introduction to Philosophy	5
PHIL 2	Introduction to Moral Philosophy	5
PHIL 60	Introduction to Philosophy of Science	5
PHIL 80	Mind, Matter, and Meaning	5
PHIL 102	Modern Philosophy, Descartes to Kant	4
PHIL 150	Mathematical Logic	4
PHIL 151	Metalogic	4
PHIL 152	Computability and Logic	4
PHIL 154	Modal Logic	4
PHIL 162	Philosophy of Mathematics	4
PHIL 164	Central Topics in the Philosophy of Science: Theory and Evidence	4
PHIL 166	Probability: Ten Great Ideas About Chance	4
PHIL 167B	Philosophy, Biology, and Behavior	4
PHIL 169	Evolution of the Social Contract	4
PHIL 180	Metaphysics	4
PHIL 180A	Realism, Anti-Realism, Irrealism, Quasi-Realism	4
PHIL 181	Philosophy of Language	4
PHIL 182	Truth	2-4
PHIL 184	Epistemology	4
PHIL 184F	Feminist Theories of Knowledge	4
PHIL 184P	Probability and Epistemology	4
PHIL 185	Memory	4
PHIL 186	Philosophy of Mind	4
PHIL 187	Philosophy of Action	4
PHIL 188	Personal Identity	4
PHIL 189	Examples of Free Will	4
PHIL 280A	Realism, Anti-Realism, Irrealism, Quasi-Realism	4
PHIL 289	Examples of Free Will	4
PSYCH 30	Introduction to Perception	3
PSYCH 45	Introduction to Learning and Memory	3
PSYCH 50	Introduction to Cognitive Neuroscience	4
PSYCH 60	Introduction to Developmental Psychology	4
PSYCH 70	Introduction to Social Psychology	4
PSYCH 131	Language and Thought	4
PSYCH 141	Cognitive Development	3
PSYCH 154	Judgment and Decision-Making	3
PSYCH 204	Computation and cognition: the probabilistic approach	3-4
PSYCH 239	Formal and Computational Approaches in Psychology and Cognitive Science	3
PSYCH 262	Language and Thought	4
STATS 110	Statistical Methods in Engineering and the Physical Sciences	4-5
STATS 116	Theory of Probability	3-5

STATS 200	Introduction to Statistical Inference	3
SYMSYS 184	Syntactic Theory and Implementation	4

Note: Symbolic Systems majors must take PHIL 182 Truth for 3 or more units.

## Artificial Intelligence

		Units
CS 124	From Languages to Information	3-4
CS 154	Introduction to Automata and Complexity Theory	3-4
CS 157	Logic and Automated Reasoning	3
CS 223A	Introduction to Robotics	3
CS 224N	Natural Language Processing	3-4
CS 224S	Spoken Language Processing	2-4
CS 224U	Natural Language Understanding	3-4
CS 225A	Experimental Robotics	3
CS 225B	Robot Programming Laboratory	3-4
CS 227B	General Game Playing	3
CS 228	Probabilistic Graphical Models: Principles and Techniques	3-4
CS 229	Machine Learning	3-4
CS 270	Modeling Biomedical Systems: Ontology, Terminology, Problem Solving	3
CS 274	Representations and Algorithms for Computational Molecular Biology	3-4
ECON 160	Game Theory and Economic Applications	5
EE 263	Introduction to Linear Dynamical Systems	3
EE 364A	Convex Optimization I	3
EE 364B	Convex Optimization II	3
EE 376A	Information Theory	3
EE 376B	Network Information Theory	3
ENGR 205	Introduction to Control Design Techniques	3
ENGR 209A	Analysis and Control of Nonlinear Systems	3
LINGUIST 180	From Languages to Information	3-4
LINGUIST 188	Natural Language Understanding	3-4
LINGUIST 280	From Languages to Information	3-4
LINGUIST 284	Natural Language Processing	3-4
LINGUIST 288	Natural Language Understanding	3-4
PHIL 152	Computability and Logic	4
PHIL 154	Modal Logic	4
STATS 315A	Modern Applied Statistics: Learning	2-3
STATS 315B	Modern Applied Statistics: Data Mining	2-3

## Applied Logic

		Units
CS 154	Introduction to Automata and Complexity Theory	3-4
CS 157	Logic and Automated Reasoning	3
LINGUIST 230A	Introduction to Semantics and Pragmatics	4
MATH 161	Set Theory	3
PHIL 154	Modal Logic	4
PHIL 155	General Interest Topics in Mathematical Logic	4
PHIL 350A	Model Theory	3
PHIL 351A	Recursion Theory	3
PHIL 354	Topics in Logic	1-3
PHIL 391	Research Seminar in Logic and the Foundations of Mathematics	1-3

**Philosophical Foundations**

		Units
MATH 162	Philosophy of Mathematics	4
PHIL 9N	Philosophical Classics of the 20th Century	4
PHIL 14N	Belief and the Will	3
PHIL 102	Modern Philosophy, Descartes to Kant	4
PHIL 143	Quine	4
PHIL 152	Computability and Logic	4
PHIL 154	Modal Logic	4
PHIL 157	Topics in Philosophy of Logic	3
PHIL 162	Philosophy of Mathematics	4
PHIL 164	Central Topics in the Philosophy of Science: Theory and Evidence	4
PHIL 165	Philosophy of Physics	4
PHIL 166	Probability: Ten Great Ideas About Chance	4
PHIL 167B	Philosophy, Biology, and Behavior	4
PHIL 180A	Realism, Anti-Realism, Irrealism, Quasi-Realism	4
PHIL 181	Philosophy of Language	4
PHIL 184	Epistemology	4
PHIL 184P	Probability and Epistemology	4
PHIL 252	Computability and Logic	4
PHIL 254	Modal Logic	4
PHIL 264	Central Topics in the Philosophy of Science: Theory and Evidence	4
PHIL 265	Philosophy of Physics	4
PHIL 266	Probability: Ten Great Ideas About Chance	4
PHIL 267B	Philosophy, Biology, and Behavior	4
PHIL 280A	Realism, Anti-Realism, Irrealism, Quasi-Realism	4

**Cognitive Science**

		Units
BIO 20	Introduction to Brain and Behavior	3
BIO 150	Human Behavioral Biology	5
COMM 106	Communication Research Methods	4-5
CS 124	From Languages to Information	3-4
CS 154	Introduction to Automata and Complexity Theory	3-4
CS 205A	Mathematical Methods for Robotics, Vision, and Graphics	3
CS 224N	Natural Language Processing	3-4
CS 229	Machine Learning	3-4
ECON 160	Game Theory and Economic Applications	5
EE 376A	Information Theory	3
EE 376B	Network Information Theory	3
HUMBIO 21	Introduction to Brain and Behavior	3
HUMBIO 160	Human Behavioral Biology	5
LINGUIST 105	Phonetics	4
LINGUIST 110	Introduction to Phonology	4
LINGUIST 140	Language Acquisition I	4
LINGUIST 180	From Languages to Information	3-4
LINGUIST 205A	Phonetics	4
LINGUIST 240	Language Acquisition I	4
LINGUIST 241	Language Acquisition II	4
LINGUIST 280	From Languages to Information	3-4
LINGUIST 284	Natural Language Processing	3-4
MATH 113	Linear Algebra and Matrix Theory	3
MUSIC 251	Psychophysics and Music Cognition	1-5
NBIO 206	The Nervous System	8

NBIO 218	Neural Basis of Behavior	5
NBIO 220	Central Mechanisms in Vision-based Cognition	2-4
PHIL 152	Computability and Logic	4
PHIL 154	Modal Logic	4
PHIL 164	Central Topics in the Philosophy of Science: Theory and Evidence	4
PHIL 180A	Realism, Anti-Realism, Irrealism, Quasi-Realism	4
PHIL 181	Philosophy of Language	4
PHIL 184	Epistemology	4
PHIL 184P	Probability and Epistemology	4
PHIL 186	Philosophy of Mind	4
PHIL 187	Philosophy of Action	4
PHIL 188	Personal Identity	4
PHIL 189	Examples of Free Will	4
PHIL 264	Central Topics in the Philosophy of Science: Theory and Evidence	4
PHIL 280A	Realism, Anti-Realism, Irrealism, Quasi-Realism	4
PHIL 289	Examples of Free Will	4
PSYCH 1	Introduction to Psychology	5
PSYCH 30	Introduction to Perception	3
PSYCH 45	Introduction to Learning and Memory	3
PSYCH 50	Introduction to Cognitive Neuroscience	4
PSYCH 70	Introduction to Social Psychology	4
PSYCH 75	Introduction to Cultural Psychology	5
PSYCH 104	Uniquely Human	3
PSYCH 110	Research Methods and Experimental Design	5
PSYCH 131	Language and Thought	4
PSYCH 141	Cognitive Development	3
PSYCH 143	Developmental Anomalies	3
PSYCH 154	Judgment and Decision-Making	3
PSYCH 202	Cognitive Neuroscience	3
PSYCH 204A	Human Neuroimaging Methods	3
PSYCH 204B	Computational Neuroimaging: Analysis Methods	1-3
PSYCH 205	Foundations of Cognition	1-3
PSYCH 221	Applied Vision and Image Systems	1-3
PSYCH 226	Models and Mechanisms of Memory	1-3
PSYCH 232	Brain and Decision Making	3
PSYCH 250	High-Level Vision: Object Representation	3
PSYCH 251	Affective Neuroscience	3
PSYCH 252	Statistical Methods for Behavioral and Social Sciences	1-6
PSYCH 262	Language and Thought	4
PSYCH 272	Special Topics in Psycholinguistics	1-3
PSYCH 279	Topics in Cognitive Control	1-3
STATS 191	Introduction to Applied Statistics	3-4
STATS 200	Introduction to Statistical Inference	3

**Decision Making and Rationality**

		Units
BIO 150	Human Behavioral Biology	5
BIOMEDIN 251	Outcomes Analysis	4
COMM 106	Communication Research Methods	4-5
COMM 172	Media Psychology	4-5
COMM 206	Communication Research Methods	4-5
COMM 272	Media Psychology	4-5
CS 74N	Digital Dilemmas	3

CS 147	Introduction to Human-Computer Interaction Design	3-5	PHIL 267B	Philosophy, Biology, and Behavior	4
CS 154	Introduction to Automata and Complexity Theory	3-4	PHIL 270	Ethical Theory	4
CS 161	Design and Analysis of Algorithms	3-5	PHIL 355	Logic and Social Choice	4
CS 181	Computers, Ethics, and Public Policy	4	PHIL 366	Evolution and Communication	4
CS 224M	Multi-Agent Systems	3	PHIL 387	Intention and Normative Judgment	2-4
CS 228	Probabilistic Graphical Models: Principles and Techniques	3-4	POLISCI 123	Politics and Public Policy	4-5
CS 261	Optimization and Algorithmic Paradigms	3	POLISCI 152	Introduction to Game Theoretic Methods in Political Science	3-5
CS 364A	Algorithmic Game Theory	3	POLISCI 344U	Political Culture	5
ECON 50	Economic Analysis I	5	POLISCI 351A	Foundations of Political Economy	3
ECON 51	Economic Analysis II	5	PSYCH 45	Introduction to Learning and Memory	3
ECON 102B	Applied Econometrics	5	PSYCH 50	Introduction to Cognitive Neuroscience	4
ECON 102C	Advanced Topics in Econometrics	5	PSYCH 70	Introduction to Social Psychology	4
ECON 135	Finance for Non-MBAs	3	PSYCH 75	Introduction to Cultural Psychology	5
ECON 136	Market Design	5	PSYCH 80	Introduction to Personality and Affective Science	3
ECON 137	Decision Modeling and Information	5	PSYCH 110	Research Methods and Experimental Design	5
ECON 141	Public Finance and Fiscal Policy	5	PSYCH 152	Mediation for Dispute Resolution	3
ECON 150	Economic Policy Analysis	4-5	PSYCH 154	Judgment and Decision-Making	3
ECON 153	Economics of the Internet	5	PSYCH 158	Emotions: History, Theories, and Research	1-3
ECON 155	Environmental Economics and Policy	5	PSYCH 167	Seminar on Aggression	3
ECON 160	Game Theory and Economic Applications	5	PSYCH 179	The Psychology of Everyday Morality	4
ECON 179	Experimental Economics	5	PSYCH 205	Foundations of Cognition	1-3
ECON 286	Game Theory and Economic Applications	2-5	PSYCH 212	Social Psychology	1-3
ECON 288	Computational Economics	2-5	PSYCH 215	Mind, Culture, and Society	3
ECON 289	Advanced Topics in Game Theory and Information Economics	2-5	PSYCH 223	Social Norms	3
ECON 290	Multiperson Decision Theory	3	PSYCH 232	Brain and Decision Making	3
EDUC 247	Moral and Character Education	3	PSYCH 245	Social Psychological Perspectives on Stereotyping and Prejudice	3
EDUC 375A	Seminar on Organizational Theory	5	PSYCH 251	Affective Neuroscience	3
ENGR 60	Engineering Economy	3	PSYCH 252	Statistical Methods for Behavioral and Social Sciences	1-6
ENGR 62	Introduction to Optimization	4	PSYCH 253	Statistical Theory, Models, and Methodology	3
MS&E 111	Introduction to Optimization	4	PSYCH 270	The Psychology of Everyday Morality	4
MS&E 120	Probabilistic Analysis	5	PSYCH 279	Topics in Cognitive Control	1-3
MS&E 121	Introduction to Stochastic Modeling	4	PUBLPOL 102	Organizations and Public Policy	4-5
MS&E 180	Organizations: Theory and Management	4	PUBLPOL 202	Organizations and Public Policy	4-5
MS&E 197	Ethics, Technology, and Public Policy	5	PUBLPOL 302B	Economic Analysis of Law	3
MS&E 201	Dynamic Systems	3-4	SOC 114	Economic Sociology	4
MS&E 250A	Engineering Risk Analysis	3	SOC 115	Topics in Economic Sociology	5
MS&E 250B	Project Course in Engineering Risk Analysis	3	SOC 120	Interpersonal Relations	4
MS&E 252	Decision Analysis I: Foundations of Decision Analysis	3-4	SOC 121	The Individual in Social Structure: Foundations in Sociological Social Psychology	5
MS&E 254	The Ethical Analyst	1-3	SOC 126	Introduction to Social Networks	5
MS&E 299	Voluntary Social Systems	1-3	SOC 127	Bargaining, Power, and Influence in Social Interaction	5
MS&E 352	Decision Analysis II: Professional Decision Analysis	3-4	SOC 160	Formal Organizations	4
MS&E 355	Influence Diagrams and Probabilistic Networks	3	SOC 214	Economic Sociology	4
PHIL 154	Modal Logic	4	SOC 220	Interpersonal Relations	4
PHIL 164	Central Topics in the Philosophy of Science: Theory and Evidence	4	SOC 226	Introduction to Social Networks	5
PHIL 166	Probability: Ten Great Ideas About Chance	4	SOC 227	Bargaining, Power, and Influence in Social Interaction	5
PHIL 167B	Philosophy, Biology, and Behavior	4	SOC 260	Formal Organizations	4
PHIL 170	Ethical Theory	4	STATS 200	Introduction to Statistical Inference	3
PHIL 194C	Time and Free Will	4	STATS 211	Meta-research: Appraising Research Findings, Bias, and Meta-analysis	3
PHIL 194R	Epistemic Paradoxes	4	STATS 217	Introduction to Stochastic Processes	2-3
PHIL 264	Central Topics in the Philosophy of Science: Theory and Evidence	4	STATS 218	Introduction to Stochastic Processes	3
PHIL 266	Probability: Ten Great Ideas About Chance	4	STATS 310A	Theory of Probability	2-4

STATS 310B	Theory of Probability	2-3
STATS 310C	Theory of Probability	2-4
SYMSYS Majors must take for 3 or more units		

## Natural Language

		Units
CS 124	From Languages to Information	3-4
CS 154	Introduction to Automata and Complexity Theory	3-4
CS 224N	Natural Language Processing	3-4
CS 224S	Spoken Language Processing	2-4
CS 224U	Natural Language Understanding	3-4
CS 229	Machine Learning	3-4
CS 276	Information Retrieval and Web Search	3
LINGUIST 105	Phonetics	4
LINGUIST 110	Introduction to Phonology	4
LINGUIST 116	Morphology	4
LINGUIST 124	Introduction to Lexical Function Grammar	2-4
LINGUIST 130A	Introduction to Semantics and Pragmatics	4
LINGUIST 130B	Introduction to Lexical Semantics	3-4
LINGUIST 140	Language Acquisition I	4
LINGUIST 180	From Languages to Information	3-4
LINGUIST 188	Natural Language Understanding	3-4
LINGUIST 205B	Advanced Phonetics	2-4
LINGUIST 210A	Phonology	3-4
LINGUIST 210B	Advanced Phonology	2-4
LINGUIST 221A	Foundations of English Grammar	1-4
LINGUIST 221B	Studies in Universal Grammar	1-4
LINGUIST 222A	Foundations of Syntactic Theory I	3-4
LINGUIST 224	Introduction to Lexical Function Grammar	2-4
LINGUIST 224B	Advanced Topics in Lexical Functional Grammar	1-4
LINGUIST 230A	Introduction to Semantics and Pragmatics	4
LINGUIST 230B	Semantics and Pragmatics I	2-4
LINGUIST 232A	Lexical Semantics	2-4
LINGUIST 240	Language Acquisition I	4
LINGUIST 241	Language Acquisition II	4
LINGUIST 280	From Languages to Information	3-4
LINGUIST 281	Computational Models of Linguistic Formalism	1-4
LINGUIST 286	Information Retrieval and Web Search	3
LINGUIST 288	Natural Language Understanding	3-4
PHIL 154	Modal Logic	4
PHIL 181	Philosophy of Language	4
PSYCH 131	Language and Thought	4
PSYCH 134	Seminar on Language and Deception	3
PSYCH 262	Language and Thought	4

## Learning

		Units
CS 147	Introduction to Human-Computer Interaction Design	3-5
CS 224M	Multi-Agent Systems	3
CS 224N	Natural Language Processing	3-4
CS 228	Probabilistic Graphical Models: Principles and Techniques	3-4
CS 229	Machine Learning	3-4
EDUC 218	Topics in Cognition and Learning: Executive Function	3
EDUC 333A	Understanding Learning Environments	3

EDUC 342	Child Development and New Technologies	3
EE 376A	Information Theory	3
LINGUIST 140	Language Acquisition I	4
LINGUIST 240	Language Acquisition I	4
LINGUIST 241	Language Acquisition II	4
LINGUIST 284	Natural Language Processing	3-4
PSYCH 7Q	Language Understanding by Children and Adults	3
PSYCH 45	Introduction to Learning and Memory	3
PSYCH 50	Introduction to Cognitive Neuroscience	4
PSYCH 141	Cognitive Development	3
PSYCH 202	Cognitive Neuroscience	3
PSYCH 204	Computation and cognition: the probabilistic approach	3-4
PSYCH 239	Formal and Computational Approaches in Psychology and Cognitive Science	3
STATS 315A	Modern Applied Statistics: Learning	2-3
STATS 315B	Modern Applied Statistics: Data Mining	2-3

## Neurosciences

		Units
BIO 20	Introduction to Brain and Behavior	3
BIO 150	Human Behavioral Biology	5
BIO 153	Cellular Neuroscience: Cell Signaling and Behavior	4
BIO 154	Molecular and Cellular Neurobiology	4
BIO 158	Developmental Neurobiology	4
BIO 163	Neural Systems and Behavior	4
BIO 222	Exploring Neural Circuits	3
CS 205A	Mathematical Methods for Robotics, Vision, and Graphics	3
CS 223A	Introduction to Robotics	3
CS 229	Machine Learning	3-4
HUMBIO 21	Introduction to Brain and Behavior	3
HUMBIO 163	Neural Systems and Behavior	4
MATH 113	Linear Algebra and Matrix Theory	3
NBIO 206	The Nervous System	8
NBIO 218	Neural Basis of Behavior	5
NENS 220	Computational Neuroscience	4
PHIL 186	Philosophy of Mind	4
PSYCH 30	Introduction to Perception	3
PSYCH 45	Introduction to Learning and Memory	3
PSYCH 50	Introduction to Cognitive Neuroscience	4
PSYCH 110	Research Methods and Experimental Design	5
PSYCH 120	Cellular Neuroscience: Cell Signaling and Behavior	4
PSYCH 121	Ion Transport and Intracellular Messengers	1-3
PSYCH 143	Developmental Anomalies	3
PSYCH 204A	Human Neuroimaging Methods	3
PSYCH 204B	Computational Neuroimaging: Analysis Methods	1-3
PSYCH 221	Applied Vision and Image Systems	1-3
PSYCH 226	Models and Mechanisms of Memory	1-3
PSYCH 232	Brain and Decision Making	3
PSYCH 250	High-Level Vision: Object Representation	3
PSYCH 251	Affective Neuroscience	3
PSYCH 252	Statistical Methods for Behavioral and Social Sciences	1-6
PSYCH 279	Topics in Cognitive Control	1-3
STATS 141	Biostatistics	3-5
STATS 191	Introduction to Applied Statistics	3-4

STATS 200	Introduction to Statistical Inference	3
-----------	---------------------------------------	---

## Cognate Courses for the Master's Degree

The following is a list of cognate courses that may be applied to the M.S. in Symbolic Systems. Click on the course or see ExploreCourses for course descriptions and General Education Requirements (GER) information. Courses taken for a Symbolic Systems degree or Minor must be taken for 3 units (or more). See Degree Requirements for details.

		Units
BIO 153	Cellular Neuroscience: Cell Signaling and Behavior	4
BIO 154	Molecular and Cellular Neurobiology	4
BIO 222	Exploring Neural Circuits	3
BIO 258	Developmental Neurobiology	4
BIO 263	Neural Systems and Behavior	4
BIOMEDIN 251	Outcomes Analysis	4
CME 100	Vector Calculus for Engineers	5
CME 100A	Vector Calculus for Engineers, ACE	6
CME 106	Introduction to Probability and Statistics for Engineers	4
CME 108	Introduction to Scientific Computing	3-4
COMM 206	Communication Research Methods	4-5
COMM 220	Digital Media in Society	4-5
COMM 269	Computers and Interfaces	4-5
COMM 272	Media Psychology	4-5
CS 103	Mathematical Foundations of Computing	3-5
CS 106A	Programming Methodology	3-5
CS 106X	Programming Abstractions (Accelerated)	3-5
CS 107	Computer Organization and Systems	3-5
CS 108	Object-Oriented Systems Design	3-4
CS 109	Introduction to Probability for Computer Scientists	3-5
CS 142	Web Applications	3
CS 147	Introduction to Human-Computer Interaction Design	3-5
CS 148	Introduction to Computer Graphics and Imaging	3-4
CS 154	Introduction to Automata and Complexity Theory	3-4
CS 157	Logic and Automated Reasoning	3
CS 161	Design and Analysis of Algorithms	3-5
CS 170	Stanford Laptop Orchestra: Composition, Coding, and Performance	1-5
CS 181	Computers, Ethics, and Public Policy	4
CS 204	Legal Informatics	3
CS 205A	Mathematical Methods for Robotics, Vision, and Graphics	3
CS 221	Artificial Intelligence: Principles and Techniques	3-4
CS 223A	Introduction to Robotics	3
CS 224M	Multi-Agent Systems	3
CS 224N	Natural Language Processing	3-4
CS 224S	Spoken Language Processing	2-4
CS 224U	Natural Language Understanding	3-4
CS 225A	Experimental Robotics	3
CS 225B	Robot Programming Laboratory	3-4
CS 227B	General Game Playing	3
CS 228	Probabilistic Graphical Models: Principles and Techniques	3-4
CS 229	Machine Learning	3-4
CS 247	Human-Computer Interaction Design Studio	3-4
CS 261	Optimization and Algorithmic Paradigms	3
CS 270	Modeling Biomedical Systems: Ontology, Terminology, Problem Solving	3
CS 274	Representations and Algorithms for Computational Molecular Biology	3-4
CS 276	Information Retrieval and Web Search	3
CS 294H	Research Project in Human-Computer Interaction	3
CS 364A	Algorithmic Game Theory	0
CS 376	Human-Computer Interaction Research	3-4
CS 377	Topics in Human-Computer Interaction	2-3
CS 448B	Data Visualization	3
ECON 102B	Applied Econometrics	5
ECON 102C	Advanced Topics in Econometrics	5
ECON 135	Finance for Non-MBAs	3
ECON 136	Market Design	5
ECON 137	Decision Modeling and Information	5
ECON 141	Public Finance and Fiscal Policy	5
ECON 153	Economics of the Internet	5
ECON 155	Environmental Economics and Policy	5
ECON 160	Game Theory and Economic Applications	5
ECON 179	Experimental Economics	5
ECON 190	Introduction to Financial Accounting	5
ECON 289	Advanced Topics in Game Theory and Information Economics	2-5
EDUC 218	Topics in Cognition and Learning: Executive Function	3
EDUC 247	Moral and Character Education	3
EDUC 298	Seminar on Teaching Introductory Computer Science	1
EDUC 333A	Understanding Learning Environments	3
EDUC 342	Child Development and New Technologies	3
EDUC 375A	Seminar on Organizational Theory	5
EE 263	Introduction to Linear Dynamical Systems	3
EE 364A	Convex Optimization I	3
EE 364B	Convex Optimization II	3
EE 376A	Information Theory	3
ENGR 155C	Introduction to Probability and Statistics for Engineers	4
ENGR 205	Introduction to Control Design Techniques	3
ENGR 209A	Analysis and Control of Nonlinear Systems	3

## Theater and Performance Studies

Courses offered by the Department of Theater and Performance Studies are listed on the Stanford Bulletin's ExploreCourses web site under the subject codes TAPS (<https://explorecourses.stanford.edu/search?q=TAPS&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-TAPS=on>) and DANCE (<https://explorecourses.stanford.edu/search?q=DANCE&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-DANCE=on&filter-catalognumber-DANCE=on>).

### Mission of the Undergraduate Program in Theater and Performance Studies

The mission of the undergraduate program in Theater and Performance Studies is to provide a strong, non-conservatory program that joins the study and practice of performance within the context of a liberal arts curriculum. The department gives students a strong grasp of historical, cultural, and practical contexts in which live performance develops. With close faculty contact, department majors pursue areas of interest that may include acting, directing, writing, dance, devised theater, design, stage management, performance theory, and cultural studies. During the senior year students complete a senior project as part of fulfilling the 60 units required for the major.

### Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to achieve the following learning outcomes:

1. the ability to write analytically about theater and performance
2. the ability to put aesthetic and creative skills into practice
3. the ability to find meaningful ways of integrating theory and practice
4. the ability to research effectively
5. the ability to articulate ideas about theater, dance and live arts.

### Mission of the Graduate Program in Theater and Performance Studies

The mission of the graduate program in Theater and Performance Studies (TAPS) is to educate students who work on the leading edge of both scholarly and performance practice. The Ph.D. program includes the study of critical theory, dramatic literature, performance theory, theater history, and performance making. Graduate students complete a program with a rigorous study of critical theory, textual history, elements of production (directing, acting, choreography, writing, and design) and embodied research.

### Learning Outcomes (Graduate)

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Theater and Performance Studies. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge and production of Theater and Performance Studies, and to interpret and present the results of such research.

### Institute for Diversity in the Arts and Black Performing Arts Division

The Institute for Diversity in the Arts (IDA) is an interdisciplinary program in the humanities that involves students in the study of culture, identity and diversity through artistic expression. The Committee on Black Performing Arts (CBPA) and the Institute for Diversity in the Arts (IDA) merged in Autumn 2005. The mission of IDA/CBPA is to engage artists, students, and the local community collaboratively to create performance and visual art that examines the intersections among race, diversity, and social action through programming that includes artist residencies, classes, workshops, public performances, a lecture series, and symposia.

The division produces annual student productions and is a resource for student organizations promoting artistic expression through the exploration of the impact of ethnic representation in the arts, literature, media, and pop culture. The programs prepare students for work in areas including the arts and community development. Students have gone on to graduate-level critical studies, M.F.A. programs, public service, government and politics, arts administration, and teaching. Students can pursue an IDA concentration through the Comparative Studies in Race and Ethnicity major; students can also emphasize Black performance through the African and African American Studies major.

### Dance Division

The Stanford Dance Division offers a range of classes that approach dance as a performing art, a cultural practice, a political act and the embodiment of ideology and beliefs. Dance is learned through studying technique, choreographing and performing, and through viewing and critically assessing movement history.

### Bachelor of Arts in Theater and Performance Studies

The B.A. degree in Theater and Performance Studies provides students with historical, critical, and practical knowledge about theater and performance. Students are encouraged to declare the major in their sophomore year, if not sooner.

### Suggested Preparation for the Major

Prospective majors in the first two years of study at Stanford are encouraged to take part in casting opportunities in department productions.

### Degree Requirements - 60 units total for the Major

		Units
TAPS 1	Introduction to Theater and Performance Studies	4
TAPS 30	How Theater is Designed	4
or TAPS 101P	Intro to Directing and Devising Theatre	
TAPS 34	Stage Management Techniques	3
TAPS 39	Theatre Crew	2
or TAPS 39D	Small Project Stage Management	
TAPS 134	Stage Management Project	3
One Diversity course <sup>1</sup>		4

12 units in Theater and Dance Studies <sup>2,3</sup>	12
10 units in Performance Practice <sup>4</sup>	10
14 units of Electives <sup>5</sup>	14
TAPS 200 Senior Project <sup>6</sup>	4
<b>Total Units</b>	<b>60</b>

- <sup>1</sup> In 2015-16 the following courses satisfy the Diversity requirement:
- TAPS 12N To Die For: Antigone and Political Dissent
  - TAPS 14N Imagining India: Art, Culture, Politics in Modern India
  - TAPS 152 Introduction to Improvisation in Dance: From Salsa to Vodun to Tap Dance
  - TAPS 179 Chicano & Chicana Theater: Politics In Performance
- <sup>2</sup> One of the courses completed for this requirement must be a Writing in the Major course. In 2015-16 the Writing in the Major courses are:
- TAPS 153 Revenge: From Aeschylus to ABC
  - TAPS 161H Dance, History and Conflict
  - TAPS 167H Revolutions in Theater
- <sup>3</sup> In 2015-16 the following courses satisfy the Theater and Dance Studies requirement:
- TAPS 101 Theater History
  - TAPS 108 Introduction to Feminist, Gender, and Sexuality Studies
  - TAPS 151C Hamlet and the Critics
  - TAPS 153 Revenge: From Aeschylus to ABC
  - TAPS 159G The Theater of War: Art, Violence, and the Technologies of Death
  - TAPS 161 Dance & Conflict
  - TAPS 152 Introduction to Improvisation in Dance: From Salsa to Vodun to Tap Dance
  - TAPS 163 Introduction to Dance and History: From Postwar to the Present
  - TAPS 165 Introduction to Comparative Studies in Race and Ethnicity
  - TAPS 167 Introduction to Greek Tragedy: Gods, Heroes, Fate, and Justice
  - TAPS 167H Revolutions in Theater
  - TAPS 179 Chicano & Chicana Theater: Politics In Performance
  - TAPS 197 Dance in Prison: The Arts, Juvenile Justice, and Rehabilitation in America
- <sup>4</sup> Performance Practice courses fall into five areas: Acting, Dance, Design, and Directing and Playwriting. In 2015-16 the following courses satisfy the Performance Practice requirement:
- Acting**
- TAPS 103 Beginning Improvising
  - TAPS 115 Musical Theater
  - TAPS 120A Acting I: Scene Study
  - TAPS 120B Acting II: Period and Style
  - TAPS 121C Physical Characterization
  - TAPS 122P Undergrad Performance Project: Oh What a Lovely War!
  - TAPS 124D Acting for Non-Majors
  - TAPS 125 Acting Shakespeare
  - TAPS 127 Introduction to Movement for Actors
  - TAPS 127S Acting Through Song
- Dance**
- Any course with a DANCE subject code.
- Design**
- TAPS 28 Makeup for the Stage
  - TAPS 31 Introduction to Lighting and Production
  - TAPS 32F History of Costume and Fashion
  - TAPS 133 Stage Scenery Design
  - TAPS 140 Introduction to Projects in Theatrical Production
- Directing and Playwriting**
- TAPS 70 Introduction to Directing
  - TAPS 111 The American Dramatic Musical
  - TAPS 172 Out of Place: (W)riting Home
  - TAPS 177 Writing for Performance: The Fundamentals
  - TAPS 178B Intensive Playwriting

- <sup>5</sup> All courses in TAPS and DANCE qualify as electives.
- <sup>6</sup> All TAPS Majors must complete a Senior Project that represents significant work in any area of theater and/or performance. The project must be an original contribution and can consist of any of the following: devising a performance, choreographing a dance, stage managing a production, designing a large theater work, performing a major role, writing a play, directing a show, or researching and writing a senior essay. Work for this project normally begins in Spring Quarter of the junior year and must be completed by the end of the senior year. Students receive credit for senior projects through TAPS 200. A minimum of 4 units is required, but additional units are available for larger projects. Students pursuing senior projects must submit a two-page proposal to a faculty adviser of their choice, which must be approved by the undergraduate adviser and the department faculty no later than the end of Spring Quarter of the junior year.

Note: A course may be listed in more than one area; however, each course can only satisfy one major requirement. There is no double credit for a course. Students may petition the department undergraduate adviser to have additional courses offered by the department count towards requirements in areas 2, 3, and 4. TAPS 1 must be taken for a letter grade.

## Honors Program

For a select number of students, the department confers the degree of Bachelor of Arts with Departmental Honors in Theater and Performance Studies. To be considered for departmental honors, students must meet the following requirements in addition to the other requirements of the TAPS major:

1. Application involves a written submission (including transcript) establishing the student's work to date in the department and outlining the area of research that the student wishes to pursue. Students must have at least an overall University GPA of 3.3 and a 3.5 GPA in courses counting towards the major.
2. Students must have completed half of the courses in their specialization by the end of their junior year.
3. Students complete 4 units in the honors colloquia (TAPS 201A, TAPS 201B, TAPS 201C, TAPS 201D), beginning Spring Quarter of their junior year and continuing the following three regular quarters. Each quarter's colloquium is offered for 1 unit, S/NC. In extenuating circumstances (overseas study, for example), an honors program student may substitute other equivalent work for one quarter of the colloquium, with the approval of the honors adviser.
4. By the end of the sixth week of the quarter in which they plan to graduate, students in the honors program must submit an honors thesis (described below), to be read and evaluated by their thesis committee.
5. On the basis of a student's work in the TAPS core, in the area of specialization, on the senior project, in the honors colloquia, and on the honors thesis, three faculty readers determine and confer honors on graduating students who have successfully completed the honors program.
6. Entry into the honors program does not guarantee an honors degree. The final decision to confer an honors degree is made by the student's thesis committee, upon evaluating the quality of the senior project and the thesis.

## Honors Colloquium

The honors colloquia aim to engage honors program students in important issues in the field focusing on the students' areas of specialization and research. The honors program adviser convenes the colloquia three times per quarter and sets the agenda for meetings and discussion. Students discuss their work in the department and present and discuss their research for their honors thesis.

## Honors Thesis

The honors thesis typically consists of a long essay (40-60 pages) presenting the student's research on an important issue or subject, determined by the student. The honors program adviser, the senior project adviser, and another faculty member constitute the student's honors thesis committee. They read and evaluate the thesis, and make recommendations to the faculty at large regarding its strengths and weaknesses. Additionally, students have the option of using their own senior project as a case study. In these situations, the honors thesis will critically analyze the strengths and weaknesses of the creative work. Generally, these essays tend to be shorter (about 20-25 pages) because the creative work constitutes one-half of the honors project.

## Minor in Theater and Performance Studies

The TAPS Minor is offered with two distinct concentrations: The Theater and Performance Studies concentration provides students with historical, critical, and practical knowledge about theater and performance. The Dance concentration examines the field of dance.

### Minor Requirements – 30 units total for the minor

Each course can only satisfy one minor requirement. A student may petition to the department undergraduate adviser to have additional courses offered by the department count towards the requirements. Officer. TAPS 1 must be taken for a letter grade to satisfy the requirement. The minor is declared in Axess.

### Degree Requirements for the Minor (Theater and Performance Studies Concentration):

TAPS 1	Introduction to Theater and Performance Studies	4
TAPS 39	Theatre Crew	1
or TAPS 39D	Small Project Stage Management	
4 units in Theater and Dance Studies <sup>1</sup>		4
7 units in Performance Practice <sup>2</sup>		7
14 units of Electives <sup>3</sup>		14
<b>Total Units</b>		<b>30</b>

<sup>1</sup> In 2015-16 the following courses satisfy the Theater and Dance Studies requirement:

- TAPS 101 Theater History
- TAPS 108 Introduction to Feminist, Gender, and Sexuality Studies
- TAPS 151C Hamlet and the Critics
- TAPS 152 Introduction to Improvisation in Dance: From Salsa to Vodun to Tap Dance
- TAPS 153 Revenge: From Aeschylus to ABC
- TAPS 159G The Theater of War: Art, Violence, and the Technologies of Death
- TAPS 161 Dance & Conflict
- TAPS 163 Introduction to Dance and History: From Postwar to the Present
- TAPS 165 Introduction to Comparative Studies in Race and Ethnicity
- TAPS 167 Introduction to Greek Tragedy: Gods, Heroes, Fate, and Justice
- TAPS 167H Revolutions in Theater
- TAPS 179 Chicano & Chicana Theater: Politics In Performance
- TAPS 197 Dance in Prison: The Arts, Juvenile Justice, and Rehabilitation in America

<sup>2</sup> Performance Practice courses fall into five areas: Acting, Dance, Design, and Directing and Playwriting. In 2015-16 the following courses satisfy the Performance Practice requirement:

#### Acting

- TAPS 103 Beginning Improvising
- TAPS 115 Musical Theater
- TAPS 120A Acting I: Scene Study
- TAPS 120B Acting II: Period and Style
- TAPS 121C Physical Characterization
- TAPS 122P Undergrad Performance Project: Oh What a Lovely War!
- TAPS 124D Acting for Non-Majors
- TAPS 125 Acting Shakespeare
- TAPS 127 Introduction to Movement for Actors
- TAPS 127S Acting Through Song

#### Dance

- Any course with a DANCE subject code.

#### Design

- TAPS 28 Makeup for the Stage
- TAPS 31 Introduction to Lighting and Production
- TAPS 32F History of Costume and Fashion
- TAPS 133 Stage Scenery Design
- TAPS 140 Introduction to Projects in Theatrical Production

#### Directing and Playwriting

- TAPS 70 Introduction to Directing
- TAPS 172 Out of Place: (W)riting Home
- TAPS 177 Writing for Performance: The Fundamentals
- TAPS 178B Intensive Playwriting

<sup>3</sup> All courses in TAPS and DANCE qualify as electives.

### Degree Requirements for the Minor (Dance Concentration):

		Units
TAPS 1	Introduction to Theater and Performance Studies	4
TAPS 39	Theatre Crew	1
or TAPS 39D	Small Project Stage Management	
4 units in Dance Studies <sup>1</sup>		4
12 units in Dance Technique <sup>2</sup>		12
5 units in Choreography/Repertory/Performance <sup>3</sup>		5
4 units of Electives <sup>4</sup>		4
<b>Total Units</b>		<b>30</b>

<sup>1</sup> In 2015-16 the following courses satisfy the Dance Studies requirement:

- DANCE 152 Introduction to Improvisation in Dance: From Salsa to Vodun to Tap Dance
- DANCE 161H Dance, History and Conflict
- DANCE 163 Introduction to Dance and History: From Postwar to the Present
- DANCE 197 Dance in Prison: The Arts, Juvenile Justice, and Rehabilitation in America

<sup>2</sup> Students pursuing the Dance Concentration must complete six studio dance classes for the Technique requirement:

- At least three to four classes chosen from a specific dance form (e.g. Contemporary, Modern, Jazz, Hip-Hop, Ballet, or Social).
- At least two classes at the intermediate or advanced level in a style other than the primary concentration.

- <sup>3</sup> In 2015-16 the following courses satisfy the Choreography/Repertory/Performance requirement:
- DANCE 27 Faculty Choreography
  - DANCE 30 Chocolate Heads Movement Band Performance Workshop
  - DANCE 45 Dance Improvisation Techniques and Strategies Lab: From Hip Hop to Contact
  - DANCE 50 Contemporary Choreography
  - DANCE 63 Beginning Dance and Dance Making
  - DANCE 102 Musical Theater Dance Styles
  - DANCE 106 Choreography Project: Dancing, Recollected
  - DANCE 108 Hip Hop Meets Broadway

<sup>4</sup> All courses in TAPS and DANCE qualify as electives.

## Doctor of Philosophy in Theater and Performance Studies

The mission of the graduate program in Theater & Performance Studies (TAPS) is to educate students who work on the leading edge of both scholarly and performance practice. The Ph.D. program includes the study of critical theory, dramatic literature, performance theory, theater history, and performance making. Graduate students complete a program with a rigorous study of critical theory, textual history, elements of production (directing, acting, choreography, writing, and design) and embodied research.

### Admission

Applicants for the Ph.D. program can visit our Theater and Performance Studies (<http://taps.stanford.edu/phd.html>) web site for information. Online graduate applications are available at the Office of Graduate Admissions (<http://gradadmissions.stanford.edu>) web site. All applicants must submit the following as part of their application: Statement of purpose, Three recommendations, Artistic Statement, Summary of Production Experience and Resume/CV, and Two samples of written critical work, not exceeding 25 pages total. An invitation to interview may be extended by the end of January. Graduate students in the Department of Theater and Performance Studies begin study in Autumn Quarter of each academic year; there are no mid-year admissions.

### University Degree Requirements

University requirements for the Ph.D. are described in the "Graduate Degrees (<http://stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

### Degree Requirements

#### Units and Course Requirements

Stanford Ph.D. students must complete a minimum of 135 units of graduate courses and seminars in support of the degree. Within the 135 unit minimum, TAPS Ph.D. students must complete the following:

#### REQUIRED COURSES

##### Core Seminars

TAPS 311	Performance, Historiography, and Ethnography	4
TAPS 312	The Archive in the Repertoire	4
or TAPS 315	Dramaturgy	
TAPS 313	Performance and Performativity	1-4
TAPS 314	Performing Identities	4

##### TAPS Workshops

TAPS 371	Performance Making <sup>1</sup>	4
TAPS 372	Directing Workshop: The Actor-Director Dialogue <sup>2</sup>	4
TAPS 373	Theater Production Lab: Dramaturgy and Development <sup>3</sup>	4
TAPS 376	Projects in Performance <sup>4</sup>	4

##### Elective Seminars

Four additional graduate seminars within the Department of Theater and Performance Studies to be worked out with the adviser.

- <sup>1</sup> In the first year students take TAPS 371 Performance Making, which focuses on generating original creative work through a range of techniques.
- <sup>2</sup> In the first year, students usually take TAPS 372 Directing Workshop: The Actor-Director Dialogue, which explores the relationship between acting and directing and actors and directors.
- <sup>3</sup> In the second year students take TAPS 373 Theater Production Lab: Dramaturgy and Development which focuses on honing aesthetic and production skills for mounting a piece of work.
- <sup>4</sup> TAPS 376 Projects in Performance is the production and performance of creative work during the Winter quarter of the 2nd year, a project that is approved by the Graduate Studies Committee (GSC) and supervised by a faculty member.

Note: Students are allowed to take up to 6 units of TAPS 390 Directed Reading, to count towards the 135 units required for graduation.

### Language Requirement

The student must demonstrate reading knowledge of one foreign language in which there is a major body of dramatic literature. The language requirement must be met before the student can be advanced to candidacy. The language requirement may be fulfilled in any of the following ways:

1. achievement of a sufficiently high score (70th percentile) on the foreign language examination prepared by the Educational Testing Service (ETS). Latin and Greek are not tested by ETS.
2. a reading examination given each quarter by the various language departments, except for Latin and Greek.
3. pass with a grade of 'B' or higher a 100-level or higher foreign language course at Stanford.

### Assistantships

Students must participate in seven quarters of assistantship in Theater and Performance Studies:

*Research Assistantship:* Three quarters of research assistantship with faculty members are required. Generally, this requirement is fulfilled in the third year.

*Teaching Assistantship:* Four quarters of supervised TA-ship at half time are a required part of the Ph.D. program. The requirement is normally met by serving as a TA for three courses during the fourth year and one course during the fifth year.

### Examinations

Students must complete three examinations (comprehensive, qualifying, and department oral) by the end of the first three years of study at Stanford.

*First-Year Comprehensive Exam:* The first year exam is based on a reading list of dramatic works, choreography, and theoretical texts in theater and dance which is sent to students in the summer before the first quarter of study begins. The exam is an open book, take-home exam made up of several essay questions. Students sign up for the 2 unit course TAPS 336 Comprehensive 1st Year Exam to prepare.

*Second-Year Qualifying Exam:* The qualifying examination consists of two 20-25 page essays. Each of these essays should demonstrate knowledge of a historical pre-20th century period. Essay topics are chosen in consultation with a faculty adviser. The reading list for each essay must be approved by the end of the first year. These essays should not duplicate any written work from seminars. The Graduate Studies Committee reads and evaluates these essays. The first essay is due in the autumn quarter. Candidates must choose from the following

historical periods: Ancient/Classical, Medieval and Renaissance, and 17th-, 18th-, or early 19th-century. The performance project is completed in the winter quarter of the second year, and supervised by one or more faculty members. Faculty work with the student throughout autumn and winter quarters on the production, and attend a combination of dress rehearsals or final performances as part of the evaluation. After the performance, the student participates in a *viva voce*, or talk-back, with the supervising faculty. Students register for TAPS 376 Projects in Performance for 4 units while completing their 2<sup>nd</sup>-year project.

*Third-Year Department Oral Exam:* The department oral examination requires three faculty members, at least two from the Department of Theater and Performance Studies, who most likely form the dissertation reading committee. This exam is based on a 2-3 page summary of the project and several readings of the literature for the dissertation that the student creates in conjunction with the committee. This exam should be taken by the middle of spring quarter in the third year.

### Admission to Candidacy

At the end of the second year of study, the Graduate Studies Committee makes a decision on whether or not to admit an individual student to candidacy. Based on its evaluation of the student, the Graduate Studies Committee certifies the student's qualifications for candidacy. Candidacy is an important decision grounded in an overall assessment of a student's ability to complete the Ph.D. program at a high level. As detailed in the department's Graduate Handbook, there are prerequisites for admission to candidacy: the completion of specified coursework, the first-year qualifying exam, the second-year qualifying papers and the language requirement. However, fulfillment of these prerequisites and grades in courses constitute only a part of the evidence weighed by faculty in making this judgment. Since the Ph.D. is conferred upon candidates who have demonstrated through their dissertation the ability to conduct substantive, original research that contributes to knowledge in theater and performance studies, the candidacy decision also rests upon indicators of the student's ability to conduct work in the field. Upon favorable action, the student files a formal application for candidacy, as prescribed by the University, by the end of Summer Quarter of the second year. By University policy, candidacy is valid for five years unless terminated by the department. Failure to advance to candidacy results in the dismissal of the student from the program.

### Dissertation Prospectus

The dissertation prospectus must be approved by the candidate's adviser and by the departmental Graduate Studies Committee two quarters after taking the department oral. This should be done in, or before, the autumn quarter of the fourth year. Within 30 days of approval, a student should schedule a prospectus colloquium with the proposed reading committee (the dissertation director and two other faculty members). The prospectus must be prepared in close consultation with the dissertation adviser during the months preceding the colloquium. The prospectus should be 5-8 pages and minimally cover three things: the research question and context, the methodology for research, and a complete chapter by chapter plan.

### University Oral Examination

In Theater and Performance Studies, the University oral examination takes the form of a dissertation defense. A full draft of the dissertation must be submitted at least 75 days before the proposed degree conferral. The examining committee consists of five faculty members: one faculty chair from outside the department who does not share an appointment with the department of any of the examiners, the student's primary adviser, two additional readers who are familiar with the dissertation project, and a fifth faculty member attending the oral examination.

### Dissertation

The dissertation is an original work of scholarship created under the supervision of a primary dissertation advisor. The dissertation is the capstone of the Ph.D. in Theater & Performance Studies.

### Satisfactory Progress and Annual Review

The program and progress of each student must be evaluated by the Graduate Studies Committee at the end of each academic year. At the end of the first year, the Graduate Studies Committee evaluates the work of each student in classes, seminars, examinations, and performance. Production planning in the spring of each year for the following season is contingent upon students making satisfactory progress. Continuation in the program depends upon the recommendation of this faculty group. At the end of the second year, the committee reviews the student's work in consideration of being admitted to candidacy. By the beginning of the fourth year, students are expected to have developed an approved dissertation prospectus. Funding is contingent upon satisfactory progress. Failure to make satisfactory progress may result in dismissal from the program.

*Emeriti: (Professors)* Jean-Marie Apostolidès (TAPS; French and Italian), Michael Ramsaur, Alice Rayner, Carl Weber; (*Associate Professor*) William S. Eddelman; (*Senior Lecturer*) Patricia Ryan

*Chair:* Branislav Jakovljevic

*Director of Graduate Studies:* Janice Ross

*Director of Undergraduate Studies:* Jisha Menon

### Department of Theater and Performance Studies (TAPS)

*Professors:* Jennifer DeVere Brody (TAPS; Center for Comparative Studies in Race and Ethnicity), Harry J. Elam, Jr. (Vice Provost for Undergraduate Education), Peggy Phelan (TAPS; English), Rush Rehm (TAPS; Classics), Matthew Smith (TAPS; German Studies)

*Associate Professor:* Jisha Menon, Branislav Jakovljevic

*Assistant Professors:* Diana Looser

*Professors (Teaching):* Janice Ross

*Associate Professors (Teaching):* Helen Paris, Leslie Hill

*Senior Lecturer:* Connie Strayer

*Lecturers:* Peter Callender, Erik Flatmo Gambatese, Tracy Hazas, Laxmi Kumaran, Daniel Klein, Josh Kornbluth, Kathryn Amarotico-Kostopoulos, Lisa Rowland, Michael St. Clair, Jonah Willihnganz

*Artists in Residence:* Amy Freed, Cherrie Moraga

*IDA Faculty Director:* H. Samy Alim (Education and, by courtesy, Anthropology and Linguistics)

*Executive Director:* Jeff Chang

*Director:* Ellen Oh

### Dance Division

*Director:* Branislav Jakovljevic

*Lecturers:* Diane Frank, Aleta Hayes, Alex Ketley, Richard Powers, Ronnie Reddick

*Artist in Residence:* Robert Moses

*Mellon Post-Doctoral Fellow:* Rachel Carrico

Administrative Associate: Rosary 'Bee' David

## Overseas Studies Courses in Theater and Performance Studies

The Bing Overseas Studies Program (<http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (<https://undergrad.stanford.edu/programs/bosp/explore/search-courses>) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://bosp.stanford.edu>).

## Urban Studies

Courses offered by the Urban Studies Program are listed under the subject code URBANST on the (<https://explorecourses.stanford.edu/search?q=urbanst&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-urbanst=on&filter-catalognumber-urbanst=on>) Stanford Bulletin's ExploreCourses web site.

The Urban Studies program treats urbanism as an interdisciplinary field; it brings together students, faculty, and outside specialists concerned with cities, and the impacts of cities on society and people's lives. The Urban Studies major encourages students to inquire deeply into the nature of cities and the techniques used to modify urban environments. It prepares students to address urbanization, and gives students a knowledge base and theoretical, analytical, and practical skills to understand urban social systems and effect social change.

## Mission of the Undergraduate Program in Urban Studies

The mission of the undergraduate program in Urban Studies is to develop students' understanding of the nature of cities and their impacts on both the individual and society at large. The program is interdisciplinary in nature, drawing from fields in the social sciences, history, and education. Courses in the program focus on issues in contemporary urban society, and on the tools and concepts that can bring about change to improve urban life. Courses also address how cities have changed over time and how they continue to change today in societies around the world. Through a comprehensive program that includes course work, an internship, and independent research, a major in Urban Studies prepares students for careers and advanced academic pursuits in fields including architecture, community service, education, environmental planning, real estate development, urban design, and urban planning; many alumni have obtained graduate degrees in architecture, business, law, public policy, urban design, and urban planning from major universities across the country. Information on careers and graduate programs pursued by Urban Studies alumni is available from the Urban Studies program office.

## Learning Outcomes (Undergraduate)

The program expects its undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Program in Urban Studies. Students are expected to demonstrate ability:

1. to formulate a research question and assess its significance in relation to one or more relevant scholarly or professional literatures and, where relevant, to theoretical writings.

2. to collect data to answer the proposed research question.
3. to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
4. to write clearly and persuasively.

## Coterminal Programs In Urban Studies

Undergraduates in Urban Studies may enter coterminal master's degree programs in a number of departments and schools in the University. In recent years, Urban Studies majors have developed coterminal programs with the departments of Anthropology, Civil and Environmental Engineering, Communication, Earth Systems and Sociology, and with the School of Education. Information and applications for coterminal degree programs are available at Undergraduate Advising and Research. Students should discuss the coterminal program with a program director during their junior year.

For University coterminal degree program rules and University application forms, see the Publications and Online Guides (<http://registrar.stanford.edu/shared/publications.htm#Coterm>) web site.

## Bachelor of Arts in Urban Studies

The Urban Studies major requires students to complete four types of courses totaling at least 70 units:

1. 23 units in the core
2. 9 units (minimum) of skills courses in at least 3 courses of 3 units each
3. 20 units (minimum) in an area of concentration
4. 3 units (minimum) of an approved service-learning course or internship
5. 10 units in the capstone sequence

If units in these categories total less than 70, the remaining units may be fulfilled by courses in other concentrations or in Urban Studies courses numbered 100 or higher (except URBANST 198 Senior Research in Public Service and URBANST 199 Senior Honors Thesis).

Majors must complete one prerequisite: ECON 1 Principles of Economics; this prerequisite course may be taken S/NC, as the units for this course do not count toward the 70 units required for the major. URBANST 198 Senior Research in Public Service, URBANST 199 Senior Honors Thesis, and prerequisites for required courses and for electives also do not count towards the 70-unit minimum.

Urban Studies students interested in graduate school in business or urban planning are advised to obtain basic quantitative skills by completing MATH 19 Calculus, MATH 20 Calculus, and MATH 21 Calculus, or MATH 41 Calculus and MATH 42 Calculus, preferably before the junior year.

A course in statistical methods, such as STATS 60 Introduction to Statistical Methods: Precalculus, ECON 102A Introduction to Statistical Methods (Postcalculus) for Social Scientists or SOC 181B Sociological Methods: Statistics, is recommended for students interested in business or urban planning.

Urban Studies students are encouraged to spend at least one quarter studying overseas to learn how cities vary across societies. Some Urban Studies concentration courses, as well as electives, can be satisfied at Stanford overseas campuses. Courses offered overseas vary from year to year, and students should check in advance with Overseas Studies and Urban Studies concerning which courses meet Urban Studies requirements. Students may arrange to fulfill the internship requirement through a placement at one of Stanford's overseas locations.

Courses counted toward the 70-unit graduation requirement for the major must be taken for a letter grade, and a minimum grade of 'C' is required.

The only exceptions are Urban Studies courses numbered 100 and higher that are offered only on an S/NC basis, such as URBANST 201A Capstone Internship in Urban Studies. Students may count up to three non-Stanford courses, for a maximum of 15 units, toward the major. These units must first be approved by the Office of Transfer Credit in the Registrar's Office and subsequently approved by the Urban Studies program. Transfer credit is not awarded for internship. Students may not count more than 5 units of URBANST 197 Directed Reading, toward the major without permission of the Director. Qualified students may write a senior honors thesis and graduate with honors; see details in "Honors Program" below. Students interested in declaring Urban Studies as a major are required to meet first with the student services administrator and one of the program's advisers; they then declare the Urban Studies major on Axess.

## Urban Studies Core

Urban Studies majors should complete URBANST 110 Utopia and Reality: Introduction to Urban Studies, before Spring Quarter of the junior year. The following courses, totaling 23 units, are required:

		Units
URBANST 110	Utopia and Reality: Introduction to Urban Studies	4
URBANST 111	Political Power in American Cities	5
URBANST 112	The Urban Underclass	4
URBANST 113	Introduction to Urban Design: Contemporary Urban Design in Theory and Practice	5
URBANST 114	Urban Culture in Global Perspective	5

## Skills

A minimum of 9 units in 3 courses of at least 3 units each are required (for those who declare after August 1, 2014; 12 units for those declaring between August 1, 2011, and August 1, 2014; 8 units for those who declared before August 1, 2011), and should be taken before the end of the junior year. The following courses are recommended for most Urban Studies majors.

		Units
SOC 180A	Foundations of Social Research	4
EARTHSYS 144	Fundamentals of Geographic Information Science (GIS)	3-4

ANTHRO 130D Spatial Approaches to Social Science is an approved substitute for EARTHSYS 144.

The additional skills courses vary depending on a student's needs and interests. Student consult with an adviser to determine the best choice. Courses that fulfill the skills requirement are:

		Units
ANTHRO 91	Method and Evidence in Anthropology	5
ANTHRO 93B	Prefield Research Seminar: Non-Majors	5
ANTHRO 102	Urban Ethnography	5
CEE 31	Accessing Architecture Through Drawing	4
CEE 31Q	Accessing Architecture Through Drawing	4
CEE 130	Architectural Design: 3-D Modeling, Methodology, and Process	4
CEE 133F	Principles of Freehand Drawing	3
CEE 139	Design Portfolio Methods	4
EARTHSYS 127	GIS for good: Applications of GIS for International Development and Humanitarian Assistance	3-4
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	5
HUMBIO 82A	Qualitative Research Methodology	3
HUMBIO 82B	Advanced Data Analysis in Qualitative Research	3

MED 147	Methods in Community Assessment, Evaluation, and Research	3
PEDS 202C	Qualitative Research Methods and Study Design	3
POLISCI 155	Political Data Science	5
SOC 180B	Introduction to Data Analysis	4
URBANST 123B	Approaching Research in the Community: Design and Methods	3

## Concentrations

Students must complete at least 20 units in one of the following concentrations:

- Cities in Comparative and Historical Perspective,
- Urban Education,
- Urban Society and Social Change
- Urban Sustainability
- Self-Designed

Courses may not be double-counted within the major.

Students should consult an adviser to develop a program that meets their intellectual goals; relevant courses not listed here, including research methods courses taken in preparation for the capstone project, may be counted toward the concentration with the prior consent of an adviser.

These concentrations are declared to the department; they are not declared on Axess, and they do not appear on the transcript or the diploma.

### Cities in Comparative and Historical Perspective

Focus is on how cities have evolved over time, and how they are continuing to change today in societies around the world. Drawing on disciplinary approaches including anthropology, archaeology, art history, geography, and history, students place urban issues in perspective to improve their comprehension of the present as well as the past.

Students in this concentration are encouraged to study off campus, and preferably overseas, for at least one quarter. Many courses offered through the Overseas Studies Program can be counted toward the concentration. Similarly, internships offered at many of Stanford's overseas locations can be used to fulfill the Urban Studies internship requirement.

URBANST 119 Ancient Urbanism (offered alternate years) is required for the cities in comparative and historical perspectives concentration:

The following courses may be counted toward the Cities in Comparative and Historical Perspective concentration:

		Units
AMELANG 177	Middle Eastern Cities in Literature and Film	4-5
ANTHRO 42	Megacities	5
ANTHRO 105	Ancient Cities in the New World	3-5
ANTHRO 112	Public Archaeology: Market Street Chinatown Archaeology Project	4
ANTHRO 127	City and Sounds	5
ANTHRO 149	South Asia: History, People, Politics	5
ARTHIST 3	Introduction to World Architecture	5
ARTHIST 107A	St. Petersburg, a Cultural Biography: Architecture, Urban Planning, the Arts	4
ARTHIST 142	Architecture Since 1900	4
ARTHIST 143A	American Architecture	4
ARTHIST 188A	The History of Modern and Contemporary Japanese and Chinese Architecture and Urbanism	4
ARTHIST 205	Cairo and Istanbul: Urban Space, Memory, Protest	5

CEE 32Q	Place: Making Space Now	3
CEE 32R	American Architecture	4
CEE 32T	Making and Remaking the Architect: Edward Durell Stone and Stanford	4
CLASSICS 83	The Greeks	4-5
CLASSICS 84	The Romans	3-5
COMPLIT 144A	Istanbul the Muse: The City in Literature and Film	3-5
EARTHSYS 112	Human Society and Environmental Change	4
FILMSTUD 150	Cinema and the City	4
HISTORY 25	St. Petersburg: A Cultural Biography	1
HISTORY 31	Leonardo's World: Science, Technology, and Art in the Renaissance	3-5
HISTORY 106A	Global Human Geography: Asia and Africa	5
HISTORY 150C	The United States in the Twentieth Century	5
HISTORY 166	Introduction to African American History - the Modern Freedom Struggle	3-5
HISTORY 232B	Heretics, Prostitutes and Merchants: The Venetian Empire	5
HISTORY 232D	Rome: The City and the World, 1300-1800	4-5
HISTORY 274E	Urban Poverty and Inequality in Latin America	5
HISTORY 260	California's Minority-Majority Cities	4-5
ME 120	History and Philosophy of Design	3
MUSIC 11Q		2
OSPBARCL 127		5
OSPBEIJ 34		4
OSPBER 30	Berlin vor Ort: A Field Trip Module	1
OSPBER 60	Cityscape as History: Architecture and Urban Design in Berlin	5
OSPCPTWN 16	Sites of Memory	2
OSPCPTWN 24A & OSPCTWN 24B	Targeted Research Project in Community Health and Targeted Research Project in Community Health and Development	8
OSPCPTWN 43	Public and Community Health in Sub-Saharan Africa	4
OSPCPTWN 44		4
OSPCPTWN 51		4
OSPCPTWN 68		4
OSPFLOR 58	Space as History: Social Vision and Urban Change	4
OSPFLOR 71	A Studio with a View: Drawing, Painting and Informing your Aesthetic in Florence	3-5
OSPFLOR 75	Florence in the Renaissance: Family, Youth and Marriage in the Fourteenth and Fifteenth Centuries	5
OSPISTAN 63		4
OSPISTAN 67		4
OSPISTAN 68		5
OSPFLOR 115Y	Building the Cathedral and the Town Hall: Constructing and Deconstructing Symbols of a Civilization	4
OSPMARD 60	Integration into Spanish Society: Service Learning and Professional Opportunities	4
OSPOXFRD 70	The History of London	5
OSPPARIS 27		5
OSPPARIS 92	Building Paris: Its History, Architecture, and Urban Design	4
OSPSANTG 71	Santiago: Urban Planning, Public Policy, and the Built Environment	4-5
POLISCI 110C	America and the World Economy	5

URBANST 25Q	The Origins of the Modern American City, 1865-1920	3
URBANST 27Q	Sophomore Seminar: Three Detectives, Three Cities	3
URBANST 139	Urban Africa	5
URBANST 141	Gentrification	5
URBANST 144	Cities and Citizens in the Middle East	4
URBANST 145	International Urbanization Seminar: Cross-Cultural Collaboration for Sustainable Urban Development	4-5
URBANST 150	From Gold Rush to Google Bus: History of San Francisco	5
URBANST 160	Environmental Policy and the City in U.S. History	5
URBANST 161	U.S. Urban History since 1920	5
URBANST 166	East Palo Alto: Reading Urban Change	5
URBANST 169	California's Minority-Majority Cities	4-5
URBANST 174	Defining Smart Cities: Visions of Urbanism for the 21st Century	1

### Urban Education

The purpose of this concentration is to prepare students for a career in educational policy and practice in diverse settings. This concentration is a useful basis for graduate study in educational policy, law, or business, and for students who have been admitted by the School of Education to pursue a coterminal master's degree in the Stanford Teacher Education Program (STEP) or the Policy, Organization, and Leadership Studies Program (POLs). Stanford undergraduates can apply to the Stanford Teacher Education Program (STEP) in their Junior or Senior year.

Coterminal students applying to STEP are encouraged to take EDUC 101 Introduction to Teaching and Learning before applying to the program.

Additionally, students interested in STEP Secondary (Single Subject) must demonstrate subject matter competency in their intended teaching area. Transcripts should reflect coursework in the intended teaching subject even if it was not a student's undergraduate major.

For additional information please contact the STEP Admissions Officer at 723-2110, or consult the STEP web site (<http://suse-step.stanford.edu>).

The following course is required for the urban education concentration:

		Units
EDUC 112	Urban Education	3-4

The following courses may be counted toward the urban education concentration:

		Units
EDUC 101	Introduction to Teaching and Learning	4
EDUC 103A	Tutoring: Seeing a Child through Literacy	3-4
EDUC 103B	Race, Ethnicity, and Linguistic Diversity in Classrooms: Sociocultural Theory and Practices	3-5
EDUC 149	Theory and Issues in the Study of Bilingualism	3-5
EDUC 201	History of Education in the United States	3-5
EDUC 202	Introduction to Comparative and International Education	4
EDUC 203	Using International Test Results in Educational Research	4
EDUC 204	Introduction to Philosophy of Education	3
EDUC 216	Education, Race, and Inequality in African American History, 1880-1990	3-5
EDUC 220A	Introduction to the Economics of Education	4
EDUC 220C	Education and Society	4-5
EDUC 220D	History of School Reform: Origins, Policies, Outcomes, and Explanations	3-5

EDUC 221A	Policy Analysis in Education	4-5	HISTORY 106A	Global Human Geography: Asia and Africa	5
EDUC 233A & EDUC 233B	Counseling Theories and Interventions from a Multicultural Perspective and Adolescent Development and Mentoring in the Urban Context	6-8	HISTORY 106B	Global Human Geography: Europe and Americas	5
EDUC 283	Child Development In and Beyond Schools	2	HISTORY 255	Martin Luther King, Jr.: The Social Gospel and the Struggle for Justice	5
HISTORY 11W	Service-Learning Workshop on Issues of Education Equity	1	HISTORY 259A	Poverty and Homelessness in America	4-5
HUMBIO 142 or PSYCH 60	Adolescent Development Introduction to Developmental Psychology	4	HUMBIO 122S	Social Class, Race, Ethnicity, and Health	4
SOC 132	Sociology of Education: The Social Organization of Schools	4	HUMBIO 127A & HUMBIO 127B	Community Health: Assessment and Planning I and Community Health: Assessment and Planning II	8
			HUMBIO 128	Community Health Psychology	4
			MS&E 180	Organizations: Theory and Management	4
			or SOC 160	Formal Organizations	4
			POLISCI 236	Theories of Civil Society, Philanthropy, and the Nonprofit Sector	5

### Urban Society and Social Change

Focus is on issues in contemporary urban society and the tools and concepts that planners, policy makers, and citizens use to address those issues. Topics include environmental challenges, racial and class inequality, and the provision of adequate urban infrastructure. Students learn how community action, urban planning and design, and organizations in nonprofit, for-profit, and government sectors address urban social and environmental problems. This concentration prepares students to enter graduate programs concerned with urban affairs, community service, and public policy, and to work with local governmental agencies and for-profit and nonprofit organizations engaged in community service and development.

The following course is required for the urban society and social change concentration:

		Units
POLISCI 133	Ethics and Politics of Public Service	5

The following courses may be counted toward the urban society and social change concentration:

		Units			Units
ANTHRO 32	Theories in Race and Ethnicity: A Comparative Perspective	5	SOC 140	Introduction to Social Stratification	3
ANTHRO 106A	Gang Colors: The Racialization of Violence and the American City	5	SOC 141	Controversies about Inequality	5
ASNAMST 146S	Asian American Culture and Community	3-5	SOC 145	Race and Ethnic Relations in the USA	4
CEE 32A	Psychology of Architecture	3	SOC 146	Introduction to Comparative Studies in Race and Ethnicity	5
CEE 32B	Design Theory	4	SOC 160	Formal Organizations	4
CEE 48N	Managing Complex, Global Projects	3	SOC 161	The Social Science of Entrepreneurship	4
CEE 124	Sustainable Development Studio	1-5	SOC 164	Immigration and the Changing United States	4
CEE 131A	Professional Practice: Mixed-Use Design in an Urban Setting	3	SOC 166	Mexicans, Mexican Americans, and Chicanos in American Society	5
CEE 141A	Infrastructure Project Development	3	URBANST 104	Civic Dreams, Human Spaces: Urban Design with People	4
CEE 141B	Infrastructure Project Delivery	3	URBANST 107	Introduction to Urban and Regional Planning	3
CEE 171	Environmental Planning Methods	3	URBANST 111	Political Power in American Cities	5

			URBANST 174	Defining Smart Cities: Visions of Urbanism for the 21st Century	1

### Urban Sustainability

The Urban Sustainability concentration provides the basis for a holistic understanding of cities through the lens of environmental and social sustainability. By combining coursework in urban studies, history, sociology, and design with the STEM fields (science, technology, engineering and mathematics), students in the Urban Sustainability concentration are exposed to both the environmental and infrastructural aspects of cities, as issues of human development, urban societies, public policy, and social equity.

Students in the concentration acquire a foundation in sustainability concepts and skills for research and professional practices. The Urban Sustainability concentration helps prepare students to serve as social change agents in future roles as scholars, urban planners, designers, entrepreneurs, public servants, and advocates, to address the most pressing issues of urban development and its human impacts in cities around the world.

The following course is required for the urban sustainability concentration:

		Units
EARTHSYS 112	Human Society and Environmental Change	4

The following courses may be counted toward the Urban Sustainability Concentration. Students must select at least one course from each of the following categories:

1. environmental sustainability
2. social sustainability
3. project-based courses.

### Environmental Sustainability

Environmental sustainability refers to the biosphere, environmental planning and policy, natural resource planning and development, sustainable building design, and urban infrastructure systems.

		Units
CEE 64	Air Pollution and Global Warming: History, Science, and Solutions	3
CEE 100	Managing Sustainable Building Projects	4
CEE 129S	Climate Change Adaptation in the Coastal Built Environment	1
CEE 165C	Water Resources Management	3
CEE 171	Environmental Planning Methods	3
CEE 172	Air Quality Management	3
CEE 172S	Green House Gas Mitigation	1-3
CEE 176A	Energy Efficient Buildings	3-4
CEE 179X	Sustainable Urban System Seminar	1
CHEMENG 35N	Renewable Energy for a Sustainable World	3
CHEMENG 60Q	Environmental Regulation and Policy	3
EARTHSYS 10	Introduction to Earth Systems	4
EARTHSYS 41N	The Global Warming Paradox	3
EARTHSYS 101	Energy and the Environment	3

### Social Sustainability

Social sustainability refers to land use planning and its human impacts, distribution of public goods, human-centered design, human and community development, citizen participation, and social equity.

		Units
ANTHRO 156B	Environment, Nature and Race	3-5
ANTHRO 183B	Human Mobility and Adaptability	5
CEE 131B	Financial Management of Sustainable Urban Systems	3
EARTHSYS 37N	Climate Change: Science & Society	3
EARTHSYS 105	Food and Community: New Visions for a Sustainable Future	3
POLISCI 19N	Politics of Energy Efficiency	5
SOC 135	Poverty, Inequality, and Social Policy in the United States	3
URBANST 104	Civic Dreams, Human Spaces: Urban Design with People	4
URBANST 107	Introduction to Urban and Regional Planning	3
URBANST 163	Land Use Control	4
URBANST 165	Sustainable Urban and Regional Transportation Planning	4-5
URBANST 167	Green Mobilities for the Suburbs of the Future	3
URBANST 168	Housing & Community Development--Policy and Practice	3

### Project-Based Courses

Project-based courses enable students to work on a real-life urban sustainability issue in collaboration with local and international community partners. Students grapple with sustainability concepts while practicing community engagement and capacity building, fluency in crosscultural collaboration, human-centered design thinking, and developing a sense of one's place in relation to global society and the praxis of urban sustainability.

		Units
CEE 124	Sustainable Development Studio	1-5
CEE 177X	Current Topics in Sustainable Engineering	1-3
URBANST 145	International Urbanization Seminar: Cross-Cultural Collaboration for Sustainable Urban Development	4-5
URBANST 164	Sustainable Cities	4-5
URBANST 171	Urban Design Studio	5
URBANST 181	Urban Agriculture in the Developing World	3-4

Students interested in pursuing the concentration in urban sustainability should meet with an Urban Studies adviser to determine an appropriate course of study. Consult the Urban Studies website or see an adviser for sample course plans in this concentration.

## Self-Designed Concentration

Students who wish to concentrate in an area of urban studies other than one of the above concentrations must complete the Urban Studies core, skills, and capstone requirement, and design additional units to bring the total to at least 70 units. The self-designed portion of the major should concentrate on a particular area of urban study, such as urban health care or urban environmental management. Additional units must be approved by both the Director of Urban Studies and an academic adviser who is a member of the Academic Council and has expertise in the particular area of interest to the student. A proposal for a self-designed concentration should include a list of courses and a description of how each course meets the student's educational objectives. A proposal for a self-designed concentration must be accompanied by a letter to the Director of Urban Studies indicating that the academic adviser has examined and approved the student's plan.

Students pursuing a self-designed concentration must submit proposals for approval by the Director of Urban Studies by the beginning of the third quarter of the student's sophomore year. Applications received after that deadline are not considered. Students interested in designing their own concentration are strongly encouraged to meet with the Director of Urban Studies before the end of fall quarter of their sophomore year.

## Service Learning

Urban Studies students are required to engage in a service learning experience as part of their course of study. Students can fulfill their service learning requirement in two ways:

1. enroll in an approved course such as URBANST 164, URBANST 145, SINY 101, or ANTHRO 112; or
2. complete an independent internship in an office of a government agency or non-profit/community organization relevant to the major, while enrolled in URBANST 201A Capstone Internship in Urban Studies before Autumn Quarter of the senior year.

Students planning to carry out an internship should consult with the Program Manager for Service Learning no later than Winter Quarter of junior year and complete the internship before Autumn Quarter of senior year, or three quarters before graduation. Students who intern for a private sector organization may receive credit for URBANST 194, but cannot use URBANST 201A credits to meet the capstone requirement.

Urban Studies majors who wish to receive academic credit for additional internship work may enroll in URBANST 194. Students may not count more than 7 units of internship credit, including URBANST 194 Internship in Urban Studies and URBANST 201A Capstone Internship in Urban Studies, toward their major. Students can consult the Haas Center for Public Service for other courses with internship placements at community organizations.

## Capstone

All majors are required to complete a sequence of two seminars, totaling 10 units, in which students design a senior project, and write the results of their project. The capstone seminars can be used to satisfy the Writing in the Major requirement and to complete some work on an honors thesis. URBANST 202 Preparation for Senior Research, should be taken in the junior year, and URBANST 203 Senior Seminar in the senior year. Students who plan to be away during Winter Quarter of their junior year are advised to take URBANST 202 Preparation for Senior Research in the Winter Quarter of their sophomore year.

		Units
URBANST 202	Preparation for Senior Research	5
URBANST 203	Senior Seminar	5

## Honors Program

The honors program offers qualified students an opportunity to conduct independent research and to write a thesis summarizing the results.

Before being accepted to the honors program in Urban Studies, a student must:

1. declare a major in Urban Studies and complete at least 30 of the 70 required units including all prerequisites and core classes
2. complete URBANST 202 Preparation for Senior Research (offered Winter Quarter)
3. have an overall GPA of 3.3 and a GPA of at least 3.5 in Urban Studies
4. submit an application, including a one-page abstract and the signatures of an adviser and, if applicable, a second reader. If the adviser is not a member of Stanford's Academic Council, the student must have a second reader who is an Academic Council member. The application must be submitted to the program office no later than April 30 of the junior year, and it must then be approved by the Director of the Urban Studies honors program.

Honors students are expected to complete a portion of their honors work in URBANST 203 Senior Seminar, in Autumn Quarter. Additionally, they must register for 5-10 units total in URBANST 199 Senior Honors Thesis, over the course of their senior year. The units of URBANST 199 Senior Honors Thesis are in addition to the 70-units required for the major. Honors students are required to present their theses at the Senior Colloquium in Spring Quarter of senior year.

To graduate with honors, students must receive a grade of at least 'A-' in the honors work and have a GPA of at least 3.5 in courses for the Urban Studies major at the time of graduation.

## Minor in Urban Studies

The minor in Urban Studies is designed to introduce students to several disciplinary approaches to the study of cities, and provides the opportunity to explore one of four specialized options:

- Cities in comparative and historical perspective
- Urban education
- Urban society and social change
- Urban sustainability

The minor in Urban Studies requires completion of seven courses for a letter grade, including the five core courses, the required course in the student's chosen concentration area, and one additional course in that option as listed in the "Bachelor of Arts in Urban Studies (p. 669)" section of this bulletin.

*Director:* Zephyr Frank (History)

*Associate Director:* Michael Kahan (Lecturer, Urban Studies)

*Executive Committee:* Thomas Hansen (Anthropology), Michael Rosenfeld (Sociology), Barbara Voss (Anthropology), Jeff Wachtel (President's Office)
