STANFORD UNIVERSITY

STANFORD BULLETIN
2020-21

ACCREDITATION

Stanford University is accredited by the Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges (WASC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501; (510) 748-9001. In addition, certain programs of the University have specialized accreditation. For information, contact the Office of the University Registrar.

STATEMENT OF NONDISCRIMINATORY POLICY

Stanford University admits qualified students of any race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity, veteran status, or marital status to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, in the administration of the University's programs and activities, Stanford prohibits unlawful discrimination on the basis of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity or expression, veteran status, marital status or any other characteristic protected by applicable law; Stanford also prohibits unlawful harassment including sexual harassment and sexual violence. This policy applies to Stanford programs and activities both on and off-campus, including overseas programs.

The following person has been designated to handle inquiries regarding this nondiscrimination policy: Stanford's Director of the Diversity and Access Office, Rosa Gonzalez, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email). Stanford's Title IX Coordinator, Catherine Glaze, has been designated to handle inquiries regarding sexual harassment and sexual violence: Kingscote Gardens (2nd floor), 419 Lagunita Drive, Stanford, CA 94305, (650) 497-4955 (voice), (650) 497-9257 (fax), titleix@stanford.edu (email). Individuals may also file complaints directly with the Office for Civil Rights, within the United States Department of Education, by following the information on this website: https://www2.ed.gov/about/offices/list/ocr/complaintintro.html.

GOVERNING DOCUMENT/RESERVATION OF RIGHTS

Every effort is made to ensure that the degree requirement and course information, applicable policies, and other materials contained in the Stanford Bulletin are accurate and current. The University reserves the right to make changes at any time without prior notice. The Bulletin in the form as it exists online at Stanford Bulletin web site and ExploreCourses web site is therefore the governing document, and contains the then currently applicable policies and information. The University does not publish an official printed copy version of the Bulletin.

ADDITIONAL INFORMATION

Additional information on Stanford University can be obtained through Stanford's web site at http://www.stanford.edu.

COVID-19 AND ACADEMIC CONTINUITY

Changes in Academic Policies and Practices Due to the COVID-19 Pandemic

This page is being continuously updated as additional information is received. Effective dates noted in the following reflect the date upon which a decision was taken. However, many of these decisions have been retroactively applied.

Most recent update September 3, 2020.

Stanford University responded to the COVID-19 pandemic crisis by addressing a broad array of policy and procedure issues in order to maintain academic continuity, to ensure the continuing success of Stanford students, to support faculty in teaching and research, and to assist academic staff in fulfilling their duties to students and faculty.

These pages represent a compendium of the academic continuity changes made. Relevant sections of this bulletin have been updated to reflect these changes, and such changes are notated as pertaining to the COVID-19 pandemic crisis.

Additional notations concerning academic continuity changes have been noted on any degree program requirements page where such changes impact students.

As this page is published, Registrar Office staff continue to update this bulletin to reflect all academic continuity changes. Any member of the Stanford community may contact the bulletin (https://stanford.service-now.com/student_services/?id=sc_cat_item&sys_id=a623e6d4131b53c08a9175c36144b082) with additional information; please provide complete and detailed information in your request.

Additional Information

Students and faculty with COVID-19 questions or concerns should contact the Student Services Center (https://stanford.service-now.com/student_services/?id=sc_cat_item&sys_id=c791e84edba38050404aa4cb0b9619ce). Faculty and staff with policy questions are advised to consult their Dean's Office; they may also contact the Stanford Bulletin (https://stanford.service-now.com/student_services/?id=sc_cat_item&sys_id=a623e6d4131b53c08a9175c36144b082) and Registrar's Office staff will forward their questions to appropriate authorities

During the pandemic, the University is publishing extensive information for the Stanford Community on its HealthAlerts (https://healthalerts.stanford.edu/) and TeachAnywhere (https://teachanywhere.stanford.edu/) sites.

On July 30, 2020, the Academic Senate adopted the following policies regarding grading:

- All University courses offered for a letter grade must also offer students the option of taking the course for a "credit" or "no credit" grade, with the exception of courses offered by the Graduate School of Business, the School of Law, and the School of Medicine M.D. Program, unless opted in by those schools.
- Units of credit taken for a "credit" or "satisfactory" grade will not count toward the 36-unit maximum of credits (27 credits for transfer students) not taken for a letter grade that may be applied toward the 180 units required for the bachelor's degree.
- The senate urges deans, departments, and programs to consider adopting local policies to count courses taken for a "credit" or "satisfactory" grade toward the fulfillment of degree program requirements and/or alter program requirements as appropriate.
- Courses taken as "credit" or "no credit" may be eligible to fulfill general education requirements pending review by the Breadth Governance Board (for Ways of Thinking/Ways of Doing); the Thinking Matters Governance Board (for Thinking Matters); the Program in Writing and Rhetoric (for PRW1 and PRW2 classes); and the Writing and Rhetoric Review Board for Writing in the Major.

Final Examinations

The Faculty Senate has decided that there will be no three-hour final examination for undergraduates or graduate students in academic year 2020-21.

Coursework Deadline, Academic Year 2020-21

The academic year 2020-21 calendar (https://registrar.stanford.edu/academic-calendar/) is based upon 10-week academic quarters that do not include a dedicated end of quarter period. There will also be no final exam week.

All coursework is due by the last day of the last week of instruction in each quarter. No coursework deadlines or assessments should be assigned or scheduled after the last day of a quarter. Traditional 3-hour final exams are not allowable; however final assessments may be scheduled during the last class period.

Per standard practice and allowable by policy, instructors may grant individual and class-wide extensions of time on assignments. When an extended deadline falls after the grading deadline for a quarter and a student has completed satisfactorily a substantial part of the coursework, the student should request an Incomplete and arrange an alternative submission deadline with the instructor.

For students: if an instructor is not following this guidance, first raise the concern with the instructor. If the concern is not resolved, it should be escalated to the department chair or program director. The student should go to the relevant Dean's Office only if they are unable to resolve the issue within the department or program offering the course.

Rationale: The AY 2020-21 academic calendar includes different lengths of time between quarters to accommodate on-campus students who must pack and move out of their residences before the start of the next quarter. Making coursework due by the last day of the classes in a quarter is equitable for all students.

Questions may be directed to academic-continuity@stanford.edu.

Flex Term

Stanford will operate four full, 10-week academic terms in academic year 2020-21, Autumn Winter, Spring, and Summer. Undergraduates are expected to enroll in three of the four quarters during the 2020-21 academic year. The term in which an undergraduate is not required to enroll is called the Flex Term; students, however, may enroll in 5 free units during their Flex Term. Students declare their Flex Term via the Quarter Check-in in Axess. International undergraduates, however, are expected to enroll in three consecutive quarters during the 2020-21 academic year.

COVID-19 Policies on Undergraduate Leaves of Absence for Academic Year 2020-21

For academic year 2020-21, new leaves of absence taken during Autumn, Winter, Spring, or Summer quarters do not count towards the eight quarters maximum.

Undergraduates and coterms in the undergraduate tuition group are expected to enroll in three of four quarters during the 2020-21 academic year, with one quarter considered the student's Flex Term. If students are unable to or elect not to enroll in three quarters, they must apply for a leave of absence for those quarter(s). Leaves of absence information for International undergraduates can be found below in this bulletin section.

Undergraduates may take one quarter away from Stanford without having to file for a leave of absence (LOA), this term being considered the student's Flex Term. If a student takes more than one quarter away from Stanford, a Leave of Absence form is required. A student would be discontinued for no enrollment in any term in which they do not enroll after use of the Flex Term. See the Discontinuation and Reinstatement (p.) section below for further information.

COVID-19 Policy on Leaves of Absence for International Undergraduates

International undergraduates are expected to enroll in three consecutive quarters during the 2020-21 academic year. If undergraduates are unable to or elect to not enroll in three consecutive quarters, they must apply for a Leave of Absence for those quarter(s). International undergraduates are required to consult with a Bechtel International Center immigration advisor well before requesting a Leave of Absence. The Leave of Absence may complicate an international student's legal status and ability to remain and work in the U.S.

COVID-19 Policies on Discontinuation and Reinstatement for Academic Year 2020-21

In academic year 2020-21, a student's active status in their academic degree program may be discontinued if the student:

- fails to be enrolled by the study list deadline of their second term away from Stanford; or
- fails to be approved for a leave of absence by the start of the term of their second term away from Stanford; or
- fails to enroll by the study list deadline, or fails to file and be approved for a leave of absence in a subsequent quarter, after use of the Flex Term; or
- voluntarily terminates undergraduate studies; or
- is dismissed for academic reasons; or
- is expelled from the University.

Students who fail to be either enrolled by the final study list deadline of their second term away from Stanford, or who fail to submit a Leave of Absence petition by the published deadline in their second term away from Stanford, must apply for reinstatement through the Request to Return and Register in Undergraduate Study (https://undergrad.stanford.edu/planning/academic-policies/returning-students/).

This policy is applicable to the four quarters in academic year 2020-21 only; additional policy will be published prior to academic year 2021-22.

For complete policies, see the "Transfer Work (p. 82)" section of this bulletin.

COVID-19 Policies on Undergraduate Transfer Work for Academic Year 2020-21

- The 15-quarter unit cap on online work has been eliminated, students may apply for transfer credit for work that was or will be completed via an online/hybrid/correspondence instruction mode.The coursework must still meet all other conditions for transfer credit.
- Students may reach out to their departments for review/approval of transfer credit without having to first secure a review/approval from the Registrar's Office. Please note: students will want to confirm with departments what their transfer credit process is, if seeking a review of transfer credit for application towards major/minor requirements.
- Credit earned in U.S. military training and service may be eligible for transfer to Stanford if the work was completed at an accredited U.S. college or University or if the work appears on an official Joint Services Transcript (JST) and meets all other conditions for transfer credit. Joint Services Transcripts can be requested via the JST website (https://jst.doded.mil/official.html).

COVID-19 Policies on Graduate Transfer Work for Academic Year 2020-21

Students may apply for graduate residency transfer credit from work completed via an online/hybrid/correspondence instruction mode. The coursework must still meet all other conditions for graduate residency transfer credit.

For complete policies, see the "Undergraduate Special Registration Statuses (p. 41)" section of this bulletin

COVID-19 Policies on Undergraduate Special Registration Statuses for Academic Year 2020-21

- *Permit to Attend for Services Only (PSO):* Students approved for the PSO status will be assessed a $150 fee instead of the standard PSO fee.
- *13th Quarter:* this status will be available in the Summer Quarter, as Summer will not necessarily be the standard optional quarter for the Academic Year 2020-21.

ACADEMIC CALENDAR

Stanford Academic Calendar, 2020-21

Due to the ongoing COVID-19 pandemic, academic dates and deadlines published here may differ from the practices of previous year and they are subject to change. The Academic Senate has decided that there will be no final exams in 2020-21.

Autumn Quarter (p. 8) • Winter Quarter (p. 9) • Spring Quarter (p. 10) • Summer Quarter (p. 11)

Issued July 20, 2020. All dates are subject to change at the discretion of the University.

AUTUMN QUARTER 2020-21

August 17 (Mon) Stanford Bulletin (http://bulletin.stanford.edu/) publishes academic year 2020-21 degree requirements; ExploreCourses (https://explorecourses.stanford.edu/) opens with Autumn class offerings
August 17 (Mon) Axess opens for course enrollment for M.D. and M.S.P.A. students.
August 17 (Mon) Axess opens for course enrollment for J.D., J.S.M., L.L.M. and J.S.D. students.
August 24 (Mon) M.D. and MSPA first and second-year students, first day of instruction. See the School of Medicine academic calendar (https://med.stanford.edu/school/academic-calendar.html) website.
August 31 (Mon) Law School instruction begins for 1st-year J.D. students, J.S.M. and L.L.M. students. See the Law School academic calendar (https://law.stanford.edu/education/courses/calendar-deadlines/) website.
September 1 (Tues) Axess opens for course enrollment.
September 4 (Fri, 5:00 p.m.) At-status enrollment deadline in order to receive stipend or financial aid refund within the first week of term.
September 4 (Fri) M.B.A. 1st-year instruction begins.
September TBD New undergraduates arrive. Convocation (https://undergrad.stanford.edu/advising/freshman/new-student-orientation-nso/nso-volunteers/opening-convocation-student-speaker/). Undergraduate housing opens for new students; see Residential & Dining Enterprises Calendar (http://studenthousing.stanford.edu/calendar/).
September TBD Undergraduate housing opens for returning students; see Residential & Dining Enterprises Calendar (http://studenthousing.stanford.edu/calendar/).
September 14 (Mon) First day of quarter; instruction begins.
September 14 (Mon, 5:00 p.m.) Preliminary Study List deadline (http://exploredegrees.stanford.edu/students/enrolling-courses/preliminary-study-list-deadline-courses-or-units/). Students must be "at status"; i.e., students must have a study list with sufficient units to meet requirements for their status, whether full-time, 8-9-10 units (graduate students only), or approved Undergraduate Special Registration Status (https://sregistrar.stanford.edu/students/special-registration-and-leaves/special-registration-statuses-undergraduates/) or Graduate Special Registration Status (http://exploredegrees.stanford.edu/students/special-registration-and-leaves/special-registration-statuses-graduate-professional/).
September 14 (Mon, 5:00 p.m.) Deadline to submit Leave of Absence for full refund (see undergraduate leaves of absence (http://exploredegrees.stanford.edu/undergraduatedegreesandprograms/#leavesandreinstatementtext) and graduate leaves of absence (http://exploredegrees.stanford.edu/graduatedegrees/#leavereinstatementtext)). See Tuition and Refund Schedule (http://exploredegrees.stanford.edu/students/tuition-and-fees/tuition-refund-schedule/) for a full refund schedule.
September 14 (Mon) Law School instruction begins for 2nd/3rd-year J.D. and advanced degree students. See the Law School academic calendar (https://law.stanford.edu/education/courses/calendar-deadlines/) website.
September 15 (Tue) Autumn Quarter Cardinal Care Waiver Deadline; see the Cardinal Care (https://vaden.stanford.edu/insurance/) website.
September 21 (Mon) M.B.A. 2nd-year instruction begins.
September 21 (Mon) Stanford Teacher Education Program (STEP) instruction begins.
September 24 (Thu) Conferral of degrees, Summer Quarter 2019-20.
October 2 (Fri, 5:00 p.m.) Final Study List deadline (http://exploredegrees.stanford.edu/students/enrolling-courses/final-study-list-deadline-add-drop-swap-or-adjust-courses-or-units/), except GSB. Last day to add or drop a class; last day to adjust units on a variable-unit course. Last day for tuition reassessment for dropped courses or units. Students may withdraw from a course until the Course Withdrawal deadline and a 'W' notation will appear on the transcript.
October 23 (Fri, 5:00 p.m.) Term withdrawal deadline; last day to submit Leave of Absence to withdraw from the University with a partial refund.
November 6 (Fri, 5:00 p.m.) Change of grading basis deadline, except GSB.
November 6 (Fri, 5:00 p.m.) Course withdrawal deadline, except GSB, Law, and M.D.
November 6 (Fri, 5:00 p.m.) Application deadline for Autumn Quarter degree conferral (http://exploredegrees.stanford.edu/students/graduation/).
November 13 (Fri) Last day of Law classes for 2nd-year, 3rd-year J.D.,and advanced degree students.
November 14-17 (Sat-Tue) Law School 2nd-year, 3rd-year J.D., and advanced degree students Reading Period.
November 18-24 (Wed-Tue) Law School 2nd-year, 3rd-year J.D., and advanced degree students Law School examinations. See the Law School academic calendar (https://law.stanford.edu/education/courses/calendar-deadlines/) website.
November 20 (Fri) Last day of Law classes for 1st-year J.D. students. See the Law School academic calendar (https://law.stanford.edu/education/courses/calendar-deadlines/) website.
November 20 (Fri) Last day of classes (unless class meets on Sat.), except Law.
November 20 (Fri) Last opportunity to arrange Incomplete in a course, at last class.
November TBD Undergraduate housing closes for Winter Break; see Residential & Dining Enterprises Calendar (http://studenthousing.stanford.edu/calendar/).
November 23-27 (Mon-Fri) Thanksgiving Recess (no classes).
November 28 - December 3 (Sat-Thu) Law School 1st-year J.D. students Reading Period. See the Law School academic calendar (https://law.stanford.edu/education/courses/calendar-deadlines/) website.
November 30 - December 4 (Mon-Fri) End-Quarter Period for M.D. and MSPA students. See the School of Medicine academic calendar (http://med.stanford.edu/school/academic-calendar.html) website.
November 30 - December 4 (Mon-Fri) GSB End-Quarter examinations.
December 4 (Fri, noon) University thesis, D.M.A. final project, or Ph.D. dissertation, last day to submit.
December 4 (Fri, 5:00 p.m.) Late application deadline for Autumn Quarter degree conferral (http://exploredegrees.stanford.edu/students/graduation/) ($50 fee).
December 4-11 (Fri-Fri) Law School 1st-year J.D. students examinations. See the Law School academic calendar (https://law.stanford.edu/education/courses/calendar-deadlines/) website.
December 7-11 (Mon-Fri) End-Quarter examinations for M.D. and MSPA students. See the School of Medicine academic calendar (http://med.stanford.edu/school/academic-calendar.html) website.
December 7-11 (Mon-Fri) Programming for M.B.A. students.
December 8 (Tues, 11:59 p.m.) Grades due.
December TBD Undergraduate housing closes for Winter Break; see Residential & Dining Enterprises Calendar (http://studenthousing.stanford.edu/calendar/).
December 10 (Thu, 5:00 p.m.) Final Recommending Lists due. (Date changed due to the University's decision to close from December 14.)
December 14-January 1 (Mon-Fri) Winter Closure; the University is closed.
January 7 (Thu) Conferral of degrees, Autumn Quarter.
Top of page (p. 7)

WINTER QUARTER 2020-21

December 6 (Sun) Axess opens for course enrollment.
December 15 (Tues) Winter Quarter Cardinal Care Waiver Deadline; see the Cardinal Care (https://vaden.stanford.edu/insurance/) website.
January 1 (Fri) At-status enrollment deadline in order to receive stipend or financial aid refund within the first week of term.
January 4 (Mon) Law School instruction begins. See the Law School academic calendar (https://law.stanford.edu/education/courses/calendar-deadlines/) website.
January 4 (Mon) M.D. and MSPA instruction begins. See the School of Medicine academic calendar (http://med.stanford.edu/school/academic-calendar.html) website.
January 4 (Mon) M.B.A. instruction begins. See the full Graduate School of Business academic calendar. (https://www.gsb.stanford.edu/programs/mba/academic-experience/academic-calendar/)
January TBD Undergraduate housing opens for Winter Quarter; see Residential & Dining Enterprises Calendar (http://studenthousing.stanford.edu/calendar/).
January 8 (Fri) GSB course add/drop deadline. See the full Graduate School of Business academic calendar.
January 11 (Mon) First day of quarter; instruction begins for all students.
January 11 (Mon, 5:00 p.m.) Preliminary Study List deadline (http://exploredegrees.stanford.edu/students/enrolling-courses/preliminary-study-list-deadline-courses-or-units/). Students must be "at status"; i.e., students must have a study list with sufficient units to meet requirements for their status, whether full-time, 8-9-10 units (graduate students only), or approved Undergraduate Special Registration Status (http://exploredegrees.stanford.edu/students/special-registration-and-leaves/special-registration-statuses-undergraduates/) or Graduate Special Registration Status (http://exploredegrees.stanford.edu/students/special-registration-and-leaves/special-registration-statuses-graduate-professional/). The late study list fee is $200.
January 11 (Mon, 5:00 p.m.) Deadline to submit Leave of Absence for full refund (see undergraduate leaves of absence (http://exploredegrees.stanford.edu/undergraduatedegreesandprograms/#leavesandreinstatementtext) and graduate leaves of absence (http://exploredegrees.stanford.edu/graduatedegrees/#leavereinstatementtext)). See Tuition and Refund Schedule (http://exploredegrees.stanford.edu/students/tuition-and-fees/tuition-refund-schedule/) for a full refund schedule.
January 18 (Mon) Martin Luther King, Jr., Day (holiday, no classes).
January 29 (Fri, 5:00 p.m.) Final Study List deadline (http://exploredegrees.stanford.edu/students/enrolling-courses/final-study-list-deadline-add-drop-swap-or-adjust-courses-or-units/), except GSB. Final day to add or drop a class; last day to adjust units on a variable-unit course. Last day for tuition reassessment for dropped courses or units. Students may withdraw from a course until the Course Withdrawal deadline and a 'W' notation will appear on the transcript.
February 15 (Mon) Presidents' Day (holiday, no classes; Law does hold classes).
February 19 (Fri, 5:00 p.m.) Term withdrawal deadline; last day to submit Leave of Absence to withdraw from the University with a partial refund.
Februry 26 (Fri, 5:00 p.m.) Application deadline for Winter Quarter degree conferral (https://registrar.stanford.edu/students/graduation/).
March 5 (Fri, 5:00 p.m.) Change of grading basis deadline, except GSB.
March 5 (Fri, 5:00 p.m.) Course withdrawal deadline, except GSB, Law, and M.D.
March 8 (Mon) Last day of Law classes. See the Law School academic calendar web site.
March 8 (Mon) Last day of M.D. and M.S.P.A. classes. See the School of Medicine academic calendar (https://med.stanford.edu/school/academic-calendar.html) website.
March 8-12 (Mon-Fri) End-Quarter Period for M.D. and M.S.P.A. students. See the School of Medicine academic calendar (https://med.stanford.edu/school/academic-calendar.html) website.
March 9-11 (Tue-Thu) Law School Reading Period. See the Law School academic calendar web site.
March 12 (Fri, 5:00 p.m.) Late application deadline for Winter Quarter degree conferral (https://registrar.stanford.edu/students/graduation/) ($50 fee).
March 12-19 (Fri-Fri) Law School examinations. See the Law School academic calendar (https://law.stanford.edu/education/courses/calendar-deadlines/) website.
March 15-19 (Mon-Fri) End-Quarter examinations for M.D. and M.S.P.A. students. See the School of Medicine academic calendar (https://med.stanford.edu/school/academic-calendar.html) website.
March 19 (Fri) Last day of classes (unless class meets on Sat.)
March 19 (Fri) Last opportunity to arrange Incomplete in a course, at last class.
March 19 (Fri, noon) University thesis, D.M.A. final project, Ph.D. dissertation, last day to submit.
March TBD Undergraduate housing move-out; see Residential & Dining Enterprises Calendar (http://studenthousing.stanford.edu/calendar/).
March 23 (Tues, 11:59 p.m.) Grades due for graduating students
March 26 (Fri, 5:00 p.m.) Final Recommending Lists due
March 29 (Mon, 11:59 p.m.) Grades for non-graduating students due
April 1 (Thu) Conferral of degrees, Winter Quarter.
Top of page (p. 7)

SPRING QUARTER 2020-21

February 28 (Sun) Axess opens for course enrollment.
March 15 (Mon) Spring Quarter Cardinal Care Waiver Deadline; see the Cardinal Care (https://vaden.stanford.edu/insurance/) website.
March 19 (Fri) At-status enrollment deadline in order to receive stipend or financial aid refund within the first week of term.
March TBD Undergraduate housing move-in date for Spring Quarter; see Residential & Dining Enterprises Calendar (http://studenthousing.stanford.edu/calendar/).
March 29 (Mon) First day of quarter; instruction begins for all students.
March 29 (Mon, 5:00 p.m.) Preliminary Study List deadline (http://exploredegrees.stanford.edu/students/enrolling-courses/preliminary-study-list-deadline-courses-or-units/).Students must be "at status"; i.e., students must have a study list with sufficient units to meet requirements for their status, whether full-time, 8-9-10 units (graduate students only), or approved Undergraduate Special Registration Status (http://exploredegrees.stanford.edu/students/special-registration-and-leaves/special-registration-statuses-undergraduates/) or Graduate Special Registration Status (http://exploredegrees.stanford.edu/students/special-registration-and-leaves/special-registration-statuses-graduate-professional/). The late study list fee is $200.
March 29 (Mon, 5:00 p.m.) Deadline to submit Leave of Absence for full refund (see undergraduate leaves of absence (http://exploredegrees.stanford.edu/undergraduatedegreesandprograms/#leavesandreinstatementtext) and graduate leaves of absence (http://exploredegrees.stanford.edu/graduatedegrees/#leavereinstatementtext)). See See Tuition and Refund Schedule (http://exploredegrees.stanford.edu/students/tuition-and-fees/tuition-refund-schedule/) for a full refund schedule.
April 1 (Thu) GSB instruction begins (MBA and MSx courses only). See the full Graduate School of Business academic calendar (https://www.gsb.stanford.edu/nongsbreg/calendar-deadlines/).
April 6 (Tue) GSB course add/drop deadline. See the full Graduate School of Business academic calendar (https://www.gsb.stanford.edu/nongsbreg/calendar-deadlines/).
April 9 (Fri, 5:00 p.m.) Application deadline for Spring Quarter degree conferral (http://exploredegrees.stanford.edu/students/graduation/).
April 16 (Fri, 5:00 p.m.) Final Study List deadline, except GSB (http://exploredegrees.stanford.edu/students/enrolling-courses/final-study-list-deadline-add-drop-swap-or-adjust-courses-or-units/). Last day to add or drop a class; last day to adjust units on a variable-unit course. Last day for tuition reassessment for dropped courses or units. Students may withdraw from a course until the Course Withdrawal deadline and a "W" notation will appear on the transcript.
May 7 (Fri, 5:00 p.m.) Term withdrawal deadline; last day to submit Leave of Absence to withdraw from the University with a partial refund.
May 21 (Fri, 5:00 p.m.) Change of grading basis deadline, except GSB.
May 21 (Fri, 5:00 p.m.) Course withdrawal deadline, except GSB, Law, and M.D.
May 27 (Thu) Last day of Law classes. See the Law School academic calendar (https://law.stanford.edu/education/courses/calendar-deadlines/) website.
May 27 (Thu) Last day of M.D. and M.S.P.A. classes. See the School of Medicine academic calendar (https://med.stanford.edu/school/academic-calendar.html) website.
May 28 (Fri, 5:00 p.m.) Late application deadline for Spring Quarter degree conferral (https://registrar.stanford.edu/students/graduation/) ($50 fee).
May 28-31 (Fri-Mon) Law School reading Period. See the Law School academic calendar web site.
May 28-June 3 (Fri-Thu) End-Quarter Period for M.D. and MSPA students. See the School of Medicine academic calendar (https://med.stanford.edu/school/academic-calendar.html) website.
May 31 (Mon) Memorial Day (holiday, no classes).
June 1-5 (Tues-Sat) Law School examinations. See the Law School academic calendar web site.
June 4-9 (Fri-Wed) End-Quarter examinations for M.D. and MSPA students. See the School of Medicine academic calendar (https://med.stanford.edu/school/academic-calendar.html) website.
June 4 (Fri) Last day of classes.
June 4 (Fri) Last opportunity to arrange Incomplete in a course, at last class.
June 4 (Fri, noon) University thesis, D.M.A. final project, or Ph.D. dissertation, last day to submit.
June 7 (Monday, 11:59 p.m.) Grades for graduating students due.
June 9 (Wed, noon) Final Recommending Lists due.
June 12 (Sat) Senior Class Day.
June 12 (Sat) Baccalaureate Saturday.
June 12 (Sat) Law School Diploma Ceremony. See the Law School academic calendar (https://law.stanford.edu/education/courses/calendar-deadlines/) website.
June 12 (Sat) GSB Diploma Ceremony.
June 12 (Sat) Medical School Commencement Ceremony.
June 13 (Sun) Commencement.
June TBD Undergraduate Housing move-out date (for graduates and others involved in Commencement with permission); see Residential & Dining Enterprises Calendar (http://studenthousing.stanford.edu/calendar/).
June 15 (Tue, 11:59 p.m.) Grades for non-graduating students due.
June TBD Posting of degrees; degrees will be awarded with a confer date of Commencement.
Top of page (p. 7)

SUMMER QUARTER 2020-21

May 23 (Sun) Axess opens for course enrollment.
June 11 (Mon) At-status enrollment deadline in order to receive stipend or financial aid refund within the first week of term.
June 15 (Mon) Summer Quarter Cardinal Care Waiver Deadline; see the Cardinal Care (https://vaden.stanford.edu/insurance/) website.
June 21 (Mon) First day of quarter; instruction begins.
June 21 (Mon, 5:00 p.m.) Preliminary Study List deadline (http://exploredegrees.stanford.edu/students/enrolling-courses/preliminary-study-list-deadline-courses-or-units/). Undergraduates enrolling in this quarter must be "at status"; i.e., have a study list with sufficient units to meet requirements for their status, whether full-time or approved Undergraduate Special Registration Status. The late study list fee is $200
June 21 (Mon) Deadline to submit Leave of Absence for full refund (see undergraduate leaves of absence (http://exploredegrees.stanford.edu/undergraduatedegreesandprograms/#leavesandreinstatementtext) and graduate leaves of absence (http://exploredegrees.stanford.edu/graduatedegrees/#leavereinstatementtext)). See Tuition and Refund Schedule (http://exploredegrees.stanford.edu/students/tuition-and-fees/tuition-refund-schedule/) for a full refund schedule.
July 2 (Fri) or July 5 (Mon) Independence Day celebrated (holiday, no classes).
July 9 (Fri, 5:00 p.m.) Final Study List deadline (http://exploredegrees.stanford.edu/students/enrolling-courses/final-study-list-deadline-add-drop-swap-or-adjust-courses-or-units/).Final day to add or drop a class; last day to adjust units on a variable-unit course. Last day for tuition reassessment for dropped courses or units. Students may withdraw from a course until the Course Withdrawal deadline and a 'W' notation will appear on the transcript.
July 30 (Fri, 5:00 p.m.) Term withdrawal deadline; last day to submit Leave of Absence to withdraw from the University with a partial refund.
August 13 (Fri, 5:00 p.m.) Change of grading basis deadline.
August 13 (Fri, 5:00 p.m.) Course withdrawal deadline.
August 13 (Fri, 5:00 p.m.) Application deadline for Summer Quarter degree conferral (http://exploredegrees.stanford.edu/students/graduation/).
August 27 (Fri) Last day of classes.
August 27 (Fri) Last opportunity to arrange Incomplete in a course, at last class.
August 27 (Fri, noon) University thesis, D.M.A. final project, or Ph.D. dissertation, last day to submit.
August 27 (Fri, 5:00 p.m.) Late application deadline for Summer Quarter degree conferral (http://exploredegrees.stanford.edu/students/graduation/) ($50 fee).
September 7 (Tue, 11:59 p.m.) Grades due.
September 10 (Fri, 5:00 p.m.) Final Recommending Lists due
September 23 (Thu) Conferral of degrees, Summer Quarter.
Top of page (p. 7)

2021-22 First Day of Classes and End of Term

These dates are subject to change at the discretion of the University.

- Autumn 2021-22: September 20 and December 11
- Winter 2021-22: January 3 and March 18
- Spring 2021-22: March 28 and June 8 (Commencement June 12)
- Summer 2021-22: June 20 and August 13

STANFORD'S MISSION

The Stanford University Founding Grant (https://purl.stanford.edu/bz978md4965/) (pdf), dated November 11, 1885, outlines the founding principles of the University. The Founding Grant describes the "Nature, Object, and Purposes of the Institution" founded by Leland Stanford and Jane Lathrop Stanford in these terms:

> Its nature, that of a university with such seminaries of learning as shall make it of the highest grade, including mechanical institutes, museums, galleries of art, laboratories, and conservatories, together with all things necessary for the study of agriculture in all its branches, and for mechanical training, and the studies and exercises directed to the cultivation and enlargement of the mind;
>
> Its object, to qualify its students for personal success, and direct usefulness in life;
>
> And its purposes, to promote the public welfare by exercising an influence in behalf of humanity and civilization, teaching the blessings of liberty regulated by law, and inculcating love and reverence for the great principles of government as derived from the inalienable rights of man to life, liberty, and the pursuit of happiness.

Information about Stanford's seven schools and their academic programs and mission can be found by following the links below:

- School of Earth, Energy and Environmental Sciences (http://pangea.stanford.edu/about/)
- Graduate School of Business (http://www.gsb.stanford.edu/about/mission.html)
- School of Humanities and Sciences (https://humsci.stanford.edu/about/)
- School of Engineering (https://engineering.stanford.edu/about/)
- School of Medicine (http://med.stanford.edu/about/vision.html)
- Graduate School of Education (http://ed.stanford.edu/suse/aboutsuse/mission.html)
- Stanford Law School (https://law.stanford.edu/about/#slsnav-sls-distinctions)

A Brief History of Stanford

On October 1, 1891, more than 400 enthusiastic young men and women were on hand for opening day ceremonies at Leland Stanford Junior University. They came from all over: many from California, some who followed professors hired from other colleges and universities, and some simply seeking adventure in the West. They came to seize a special opportunity, to be part of the pioneer class in a brand new university. They stayed to help turn an ambitious dream into a thriving reality. As a pioneer faculty member recalled, "Hope was in every heart, and the presiding spirit of freedom prompted us to dare greatly."

For Leland and Jane Stanford on that day, the University was the realization of a dream and a fitting tribute to the memory of their only son, who died of typhoid fever weeks before his 16th birthday, at an age when many young men and women were planning their college education.

From the beginning, it was clear that Stanford would be different. It was coeducational at a time when single-sex colleges were the norm. It was non-sectarian when most private colleges were still affiliated with a church. And it offered a broad, flexible program of study while most schools insisted on a rigid curriculum of classical studies. Though there were many difficulties during the first months (housing was inadequate, microscopes and books were late in arriving from the East), the first year foretold greatness. As Jane Stanford wrote in the summer of 1892, "Even our fondest hopes have been realized."

What manner of people were this man and this woman who had the intelligence, the means, the faith, and the daring to plan a major university in Pacific soil, far from the nation's center of culture?

Leland and Jane Stanford

Although he was trained as a lawyer, Leland Stanford came to California in 1852 to join his five brothers in their mercantile business in the gold fields; Jane Stanford followed in 1855. They established large-scale operations in Sacramento, where Mr. Stanford became a leading figure in California business and politics. One of the "Big Four" who built the western link of the first transcontinental railroad, he was elected Governor of California and later United States Senator. One of the founders of the Republican Party in California, he was an ardent follower of Abraham Lincoln and is credited with keeping California in the Union during the Civil War.

The Case for a Liberal Education

Despite the enormous success they achieved in their lives, Governor and Mrs. Stanford had come from families of modest means and rose to prominence and wealth through a life of hard work. So it was natural that their first thoughts were to establish an institution where young men and women could "grapple successfully with the practicalities of life." As their thoughts matured, however, these ideas of "practical education" enlarged to the concept of producing cultured and useful citizens who were well prepared for professional success. In a statement of the case for liberal education that was remarkable for its time, Leland Stanford wrote, "I attach great importance to general literature for the enlargement of the mind and for giving business capacity. I think I have noticed that technically educated boys do not make the most successful businessmen. The imagination needs to be cultivated and developed to assure success in life. A man will never construct anything he cannot conceive."

Stanford Lands and Architecture

The campus occupies what was once Leland Stanford's Palo Alto Stock Farm and the favorite residence of the Stanford family. The Stanfords purchased an existing estate in 1876 and later acquired much of the land in the local watershed for their stock farm, orchards, and vineyards.

The name of the farm came from the tree El Palo Alto, a coast redwood (Sequoia sempervirens), that still stands near the northwest corner of the property on the edge of San Francisquito Creek. Many years ago, one of the winter floods that periodically rushed down the arroyo tore off one of its twin trunks, but half of the venerable old tree lives on, a gaunt and time-scarred monument. Named in 1769 by Spanish explorers, El Palo Alto has been the University's symbol and the centerpiece of its official seal.

The Stanfords gave their farm to the University in the Founding Grant of 1885. They personally financed the entire cost of the construction and operation of the University until 1903, when surviving founder Jane Stanford, who performed heroically in keeping the University functioning during difficult times following Leland Senior's death in 1893, turned over control to the Board of Trustees. The founding gift has been estimated at $25 million, not including the land and buildings.

The general concept for the University grounds and buildings was conceived by Frederick Law Olmsted, the designer of Central Park in New York. A brilliant young Boston architect, Charles Allerton Coolidge, further developed the concept in the style of his late mentor, Henry Hobson Richardson. The style, called Richardsonian Romanesque, is a blend of Romanesque and Mission Revival architecture. It is characterized by rectilinear sandstone buildings joined by covered arcades formed of

successive half-circle arches, the latter supported by short columns with decorated capitals.

More than one hundred years later, the University still enjoys 8,180 acres (almost 13 square miles) of grassy fields, eucalyptus groves, and rolling hills that were the Stanfords' generous legacy, as well as the Quadrangle of "long corridors with their stately pillars" at the center of campus. It is still true, as the philosopher William James said, during his stint as a visiting professor, that the climate is "so friendly . . . that every morning wakes one fresh for new amounts of work."

Current Perspectives

In other ways, the University has changed tremendously on its way to recognition as one of the world's great universities. At the hub of a vital and diverse Bay Area, Stanford is less than an hour's drive or Caltrain trip south of San Francisco and just a few miles north of Silicon Valley, an area dotted with computer and high technology firms largely spawned by the University's faculty and graduates. On campus, students and faculty enjoy new libraries, modern laboratories, sports facilities, and comfortable residences. Contemporary sculpture, as well as pieces from the Iris and B. Gerald Cantor Center for Visual Arts (http://museum.stanford.edu/) at Stanford University's extensive collection of sculpture by Auguste Rodin, can be found throughout the campus, providing unexpected pleasures at many turns.

The Cantor Center opened in January 1999. The center includes the historic Leland Stanford Junior Museum building and the Rodin Sculpture Garden. Next door is the Anderson Collection at Stanford University (https://anderson.stanford.edu/), which houses one of the nation's finest assemblies of modern American art. At the Stanford University Medical Center (http://stanfordmedicine.org/), world-renowned for its research, teaching, and patient care, scientists and physicians are searching for answers to fundamental questions about health and disease. Ninety miles down the coast, at Stanford's Hopkins Marine Station (https://hopkinsmarinestation.stanford.edu/) on the Monterey Bay, scientists are working to better understand the mechanisms of evolution and ecological systems.

The University is organized into seven schools: Earth, Energy and Environmental Sciences; Education; Engineering; the Graduate School of Business; Humanities and Sciences; Law; and Medicine. In addition, there are more than 30 interdisciplinary centers, programs, and research laboratories (p. 2505) including: the Hoover Institution on War, Revolution and Peace (http://www.hoover.org/); the Freeman Spogli Institute for International Studies (http://fsi.stanford.edu/); the Woods Institute for the Environment (http://woods.stanford.edu/); the SLAC National Accelerator Laboratory (http://www.slac.stanford.edu/); and the Stanford Program for Bioengineering, Biomedicine, and Biosciences (Bio-X) (http://biox.stanford.edu/), where faculty from many fields bring different perspectives to bear on issues and problems. Stanford's Bing Overseas Studies Program (http://bosp.stanford.edu/) offers undergraduates in all fields remarkable opportunities for study abroad, with campuses in Australia, Beijing, Berlin, Cape Town, Florence, Kyoto, Madrid, Oxford, Paris, and Santiago.

Stanford People

By any measure, Stanford's faculty, which numbers more than 2,100, is one of the most distinguished in the world. It includes 19 living Nobel laureates, 4 Pulitzer Prize winners, 19 National Medal of Science winners, 171 members of the National Academy of Sciences, 288 members of the American Academy of Arts and Sciences, 112 members of the National Academy of Engineering, and 27 members of the National Academy of Education. Yet beyond their array of honors, what truly distinguishes Stanford faculty is their commitment to sharing knowledge with their students. The great majority of professors teach undergraduates both in introductory lecture classes and in small freshman, sophomore, and advanced seminars.

Enrollment in Autumn Quarter 2019 totaled 16,385 of whom 6,994 were undergraduates and 9,310 were graduate students. Like the faculty, the Stanford student body is distinguished: 116 Stanford students have been named Rhodes Scholars and 90 have been named Marshall Scholars. The six-year graduation rate for freshmen who entered Stanford University full-time in 2010 was 94 percent. In 2018-19, Stanford awarded 1,893 bachelor's degrees, 2,393 master's degrees, and 1,040 doctoral degrees.

Stanford students also shine in an array of activities outside the classroom, from student government to music, theater, and journalism. Through the Haas Center for Public Service, students participate in dozens of community service activities, such as tutoring programs for children in nearby East Palo Alto, the Hunger Project, and the Arbor Free Clinic.

In the athletic arena, Stanford students have enjoyed tremendous success as well. Stanford fields teams in 36 Division I varsity sports. The Cardinal has won at least one national team championship 41 consecutive years, which leads the NCAA. Stanford has won the Director's Cup, which honors the most successful program in NCAA Division I sports, the last 24 years. Stanford scholar-athletes have earned 161 NCAA Postgraduate Scholarships—a national best.

Stanford graduates can be found in an extraordinary variety of places: in space (the late Sally Ride, '73, Ph.D. '78, was the first American woman in space); on the news (Ted Koppel, M.A. '62, created the successful program Nightline); Broadway (David Henry Hwang, '79, received a Tony Award for his celebrated work, M. Butterfly); in San Francisco live theater (Carey Perloff, '80, former artistic director of the American Conservatory Theater); at the helm of major corporations (Scott McNealy, '80, founded Sun Microsystems, Sergey Brin, M.S. '95, and Larry Page, M.S. '98, founded Google, and Chih-yuan (Jerry) Yang, '94, and David Filo, '90, founded Yahoo); and on the U.S. Supreme Court (two Stanford graduates, Anthony Kennedy, '58, and Stephen Breyer, '59, currently sit on the high court).

Looking Ahead

In her address to the Board of Trustees in July 1904, Jane Stanford said, "Let us not be afraid to outgrow old thoughts and ways, and dare to think on new lines as to the future of the work under our care."

Stanford's 11th president, Marc Tessier-Lavigne, echoed these thoughts in his inaugural address in 2016: "When I reflect on Stanford's 125-year history, I see a University that has pressed forward through thick and thin, gaining in stature as a leader in education and scholarship, to make increasingly important contributions to society and to human well-being. Thanks to over a century of inspired leadership, including by the distinguished presidents emeriti here today, Stanford has become the "University of high degree" its founders envisioned. Stanford's preeminence derives from its bedrock dedication to fostering education, research, and creativity for the benefit of humanity. But I believe it also stems from its optimism, its resilience, and its courage to evolve."

UNIVERSITY GOVERNANCE AND ORGANIZATION

Web Sites: http://www.stanford.edu/about/administration/ and http://facts.stanford.edu/administration/

Stanford University is a trust with corporate powers under the laws of the State of California. The University is a tax-exempt entity under section 501(c)3 of the Internal Revenue Code. Under the provisions of the Founding Grant, the Board of Trustees (with a maximum membership of 38) is custodian of the endowment and all the properties of Stanford University. The board administers the invested funds, sets the annual budget and determines policies for operation and control of the university. Among the powers given to the trustees by the Founding Grant is the power to appoint a president. The board delegates broad authority to the president to operate the university and to the faculty on certain academic matters. The formal legal name is "The Board of Trustees of the Leland Stanford Junior University."

Accreditation

Stanford University is accredited by the Accrediting Commission of Senior Colleges and Universities of the Western Association of Schools and Colleges. (https://www.wscuc.org/institutions/stanford-university/)

Stanford Administration

- Marc Tessier-Lavigne, President
- Persis Drell, Provost
- Susie Brubaker-Cole, Vice Provost for Student Affairs
- Sarah Church, Vice Provost for Faculty Development, Teaching and Learning and Vice Provost for Undergraduate Education
- Jon Denney, Vice President for Development
- Stephanie Kalfayan, Vice Provost for Academic Affairs
- Michael Keller, Vice Provost for Technology and Learning
- Farnaz Khadem, Vice President for University Communications
- Randall S. Livingston, Vice President for Business Affairs and Chief Financial Officer
- Megan Pierson, Chief of Staff to the President and Secretary of the Board of Trustees
- Robert Reidy, Vice President for Land, Buildings and Real Estate
- Martin Shell, Vice President and Chief External Relations Officer
- Matthew Snipp, Vice Provost for Faculty Diversity and Engagement
- Robert Wallace, Chief Executive Officer, Stanford Management Company
- Timothy Warner, Vice Provost for Budget and Auxiliaries
- Howard Wolf, Vice President for Alumni Affairs and President, Stanford Alumni Association
- Elizabeth Zacharias, Vice President for Human Resources
- Debra Zumwalt, Vice President and General Counsel

Executive Cabinet

- Marc Tessier-Lavigne, President
- Persis Drell, Provost
- Stacey Bent, Vice Provost for Graduate Education and Postdoctoral Affairs
- Condoleezza Rice, Director, Hoover Institution on War, Revolution and Peace (effective September 1, 2020)
- Stephan Graham, Dean, School of Earth, Energy & Environmental Sciences
- Chi-Chang Kao, Director, SLAC National Accelerator Laboratory
- Jonathan Levin, Dean, Graduate School of Business
- Jenny S. Martinez, Dean, School of Law
- Lloyd Minor, Dean, School of Medicine
- Kathryn Ann "Kam" Moler, Vice Provost and Dean of Research
- Debra Satz, Dean, School of Humanities & Sciences
- Dan Schwartz, Dean, Graduate School of Education
- Jennifer Widom, Dean, School of Engineering

The Board of Trustees

Powers and Duties

The Board of Trustees is custodian of the endowment and all properties of the University. The Board administers the invested funds, sets the annual budget, and determines policies for the operation and control of the University. The powers and duties of the Board of Trustees derive from the Founding Grant, amendments, legislation, and court decrees. In addition, the Board operates under its own bylaws and a series of resolutions on major policy.

Membership

Board membership is set at 38, including the President of the University who serves ex officio and with vote. Trustees serve a five-year term and are eligible for appointment to one additional five-year term. At the conclusion of that term, a Trustee is not eligible for reelection until after a lapse of one year. Eight of the Trustees are elected or appointed in accordance with the Rules Governing the Election or Appointment of Alumni Nominated Trustees. They serve a five-year term.

Officers of the Board

The officers of the board are a chair, one or more vice chairs, a secretary, and an associate secretary. Officers are elected to one-year terms at the annual meeting in June, with the exception of the chair, who serves a two-year term. Their terms of office begin July 1.

Committees

Standing committees of the Board are Audit, Compliance and Risk; Development; Finance; Land and Buildings; Student, Alumni and External Affairs; and Trusteeship. Special committees include Athletics, Compensation, and Investment Responsibility.

Meetings

The Board generally meets five times each year.

Members of the Board of Trustees as of June 1, 2020

- Felix J. Baker, Co-Founder and Managing Partner, Baker Brothers Investments, New York, NY
- Mary T. Barra, Chief Executive Officer, General Motors, Detroit, MI
- Aneel Bhusri, Co-Founder & CEO, Workday, San Francisco, CA
- Michael C. Camuñez, President & CEO, Monarch Global Strategies LLC, Los Angeles, CA
- Michelle R. Clayman, Managing Partner & Chief Investment Officer, New Amsterdam Partners LLC, New York, NY
- RoAnn Costin, President, Wilderness Point Investments, Cambridge, MA
- Dipanjan Deb, CEO & Co-Founder, Francisco Partners, San Francisco, CA
- Katherine B. Duhamel, San Francisco, CA
- Henry A. Fernandez, Chairman and CEO, MSCI Inc., New York, NY
- Angela S. Filo, Co-Founder, Yellow Chair Foundation, Palo Alto, CA
- Sakurako D. Fisher, San Francisco, CA
- Bradley A. Geier, Co-Managing Partner, Merlone Geier Partners, San Diego, CA

- James D. Halper, Senior Advisor, Leonard Green & Partners, Los Angeles, CA
- Ronald B. Johnson, Founder & CEO, Enjoy, Menlo Park, CA
- Marc E. Jones, Chairman & CEO, Aeris, San Jose, CA
- Tonia G. Karr, San Francisco, CA
- Sarah H. Ketterer, CEO, Causeway Capital, Los Angeles, CA
- Carol C. Lam, Attorney, La Jolla, CA
- Christy MacLear, CEO, Pace Experiential/NewCo, New York, NY
- Kenneth E. Olivier, Chairman Emeritus, Dodge and Cox, San Francisco, CA
- Carrie W. Penner, Chair of the Board, Walton Family Foundation, Aspen, CO
- Ruth M. Porat, Chief Financial Officer, Alphabet Inc. and Google Inc., Mountain View, CA
- Laurene Powell Jobs, Founder/President, Emerson Collective, Palo Alto, CA
- Jeffrey S. Raikes, Co-Founder, The Raikes Foundation, Seattle, WA
- Mindy B. Rogers, Atherton, CA
- Victoria B. Rogers, President, Rose Hills Foundation, Pasadena, CA
- Srinija Srinivasan, Palo Alto, CA
- Jeffrey E. Stone, Chairman Emeritus and Senior Partner, McDermott Will & Emery LLP, Chicago IL
- Gene T Sykes, Global Co-Head of M&A & Chairman, Goldman Sachs Group, Inc., Los Angeles, CA
- Marc Tessier-Lavigne, President, Stanford University, Stanford, CA
- Jerry Yang, AME Cloud Ventures, Palo Alto, CA
- Charles D. Young, Chief Operating Officer, Invitation Homes, Dallas, TX

The President

The Founding Grant prescribes that the Board of Trustees shall appoint the President of the University and that the Board shall give to the President the following powers:

- To prescribe the duties of the professors and teachers.
- To prescribe and enforce the course of study and the mode and manner of teaching.
- Such other powers as will enable the President to control the educational part of the University to such an extent that the President may justly be held responsible for the course of study therein and for the good conduct and capacity of the professors and teachers.

The President is also responsible for the management of financial and business affairs of the University, including operation of the physical plant.

The President is responsible for the safety of the campus and may take reasonable steps to protect the University including, but not limited to, barring people from campus who disrupt the normal business operations of the University or who present a threat to the safety of the University community. As an example, in extraordinary circumstances, the President may temporarily or permanently discontinue students who present a threat to the health and safety of the University community.

The President appoints the following, subject to confirmation by the Board: Provost, Vice President for Business Affairs and Chief Financial Officer, Chief Executive Officer of Stanford Management Company, Vice President for Alumni Affairs and President of Stanford Alumni Association, Vice President for Development, Vice President for Public Affairs, Vice President and General Counsel, Vice President for the SLAC National Accelerator Laboratory, and Vice President for Land, Buildings, and Real Estate.

For additional information, see the Office of the President web (http://www.stanford.edu/dept/president/) site.

Committees and Panels Appointed by the President

University Committees are appointed by and are primarily responsible to the President. Such committees deal with matters on which the responsibility for recommendation or action is clearly diffused among different constituencies of the University. In accordance with the Report on the Committee Structure of the University, Academic Council members are appointed to University Committees on nomination of the Senate Committee on Committees and student members on nomination of the Associated Students of Stanford University (ASSU) Committee on Nominations. The President takes the initiative in the appointment of staff members to such committees. Although immediately responsible to the President, University Committees may be called upon to report to the Senate of the Academic Council or the ASSU. Charges to such committees are set by the President on recommendation of the Committee on Committees and others. There are four University Committees, as follows:

- Committee on Athletics, Physical Education, and Recreation (C-APER)
- Committee on Environmental Health and Safety (C-EH&S)
- Committee on Faculty Staff Human Resources (C-FSHR)
- Public Art Committee (PAC)

Additionally there are eleven standing administrative panels which are appointed by the Vice Provost and Dean of Research, and which report through him/her to the President:

- Administrative Panel on Biosafety
- Administrative Panel on Human Subjects in Medical Research-01
- Administrative Panel on Human Subjects in Medical Research-03
- Administrative Panel on Human Subjects in Medical Research-04
- Administrative Panel on Human Subjects in Medical Research-05
- Administrative Panel on Human Subjects in Medical Research-06
- Administrative Panel on Human Subjects in Medical Research-07
- Administrative Panel on Human Subjects in Medical Research-08
- Administrative Panel on Human Subjects in Non-Medical Research-02
- Administrative Panel on Laboratory Animal Care
- Administrative Panel on Radiological Safety

The Provost

The Provost, as the chief academic and budget officer, administers the academic program (instruction and research in schools and other academic units) and University services in support of the academic program (including budgeting and planning, land and buildings, libraries and information resources, and student affairs). In the absence or inability of the President to act, the Provost becomes the Acting President of the University. The Provost shares with the President conduct of the University's relations with other educational institutions, groups, and associations.

Schools of the University

The program of instruction in the University is organized into seven schools:

- Graduate School of Business
- School of Earth, Energy and Environmental Sciences
- Graduate School of Education
- School of Engineering
- School of Humanities and Sciences

- Stanford Law School
- School of Medicine

The deans of the schools report to the Provost.

The Academic Council

Stanford Academic Council (http://academiccouncil.stanford.edu/) web site.

According to the Articles of Organization of the Faculty, originally adopted by the Board of Trustees in 1904 and revised in 1977, the powers and authority of the faculty are vested in the Academic Council consisting of:

1. the President of the University
2. tenure-line faculty: Assistant, Associate, and Full Professor
3. nontenure-line faculty: Associate and Full Professor followed by the parenthetical notation (Teaching), (Performance), (Applied Research), or (Clinical)
4. nontenure-line research faculty: Assistant Professor (Research), Associate Professor (Research), Professor (Research)
5. Senior Fellows in specified policy centers and institutes
6. certain specified officers of academic administration.

In the Spring of 1968, the Academic Council approved the charter for a Senate to be composed of 55 representatives elected by the Hare System of Proportional Representation and, as ex officio nonvoting members, deans of the academic schools and certain major officers of academic administration.

In the allocation of representation, each school constitutes a major constituency. The Senate may create from time to time other major constituencies as conditions warrant. Approximately one-half of the representatives are allocated to constituencies on the basis of the number of students in those constituencies and the remainder on the basis of the number of members of the Academic Council from each constituency.

Committees of the Academic Council

Committees of the Academic Council are created by and responsible to the Senate of the Academic Council and are appointed by the Committee on Committees of the Senate. Such committees deal with academic policy matters on which the primary responsibility for action and decision lies with the Academic Council or, by delegation, the Senate. Pursuant to the Senate's acceptance on September 25, 1969 of the Report from the Committee on Committees on the Committee Structure of the University and subsequent Senate action, the Senate has established seven standing Committees of the Academic Council, as follows:

- Committee on Academic Computing and Information Systems (C-ACIS)
- Committee on Graduate Studies (C-GS)
- Committee on Libraries (C-Lib)
- Committee on Research (C-Res)
- Committee on Review of Undergraduate Majors (C-RUM)
- Committee on Undergraduate Admissions and Financial Aid (C-UAFA)
- Committee on Undergraduate Standards and Policy (C-USP)

The Senate has also created a Planning and Policy Board of the Senate to consider long-range strategic issues of concern to the faculty. Information regarding charges to these committees is available from the Office of the Academic Secretary to the University.

Associated Students of Stanford University (ASSU)

Web Site: http://assu.stanford.edu

All registered undergraduates and graduate students are members of the ASSU. They are governed by the ASSU Constitution and Bylaws, which was last revised and approved by student vote in April 2013.

Executive

The President and Vice President serve as the chief executives and representatives for the Association. The Financial Manager acts as business manager of the ASSU, CEO of Stanford Student Enterprises (SSE), and controller of the Students' Organizations Fund in which ASSU and student organization funds are deposited.

Legislative

There are two legislative bodies, an Undergraduate Senate and a Graduate Student Council, that work together to determine the Association's budgetary, financial, investment, business, and operating policies. In addition, each entity provides funding for student organizations, participates in recommending student appointments to University Committees and advocates on behalf of its constituents. Each body has 15 elected representatives and an elected chair. Both meet regularly to conduct Association business and discuss and act on issues pertinent to student life at Stanford.

UNIVERSITY REQUIREMENTS

Nondiscrimination Policy

Stanford University admits qualified students of any race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity, veteran status, or marital status to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, in the administration of the University's programs and activities, Stanford prohibits unlawful discrimination on the basis of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity or expression, veteran status, marital status or any other characteristic protected by applicable law; Stanford also prohibits unlawful harassment including sexual harassment and sexual violence.

This policy applies to Stanford programs and activities both on and off-campus, including overseas programs.

The following person has been designated to handle inquiries regarding this nondiscrimination policy: Stanford's Director of the Diversity and Access Office, Rosa Gonzalez, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email). Stanford's Title IX Coordinator, Catherine Glaze, has been designated to handle inquiries regarding sexual harassment and sexual violence: Kingscote Gardens (2nd floor), 419 Lagunita Drive, Stanford, CA 94305, (650) 497-4955 (voice), (650) 497-9257 (fax), titleix@stanford.edu (email).

Individuals may also file complaints directly with the Office for Civil Rights, within the United States Department of Education, by following the information on this website: https://www2.ed.gov/about/offices/list/ocr/complaintintro.html.

University Communication with Students

Stanford University uses electronic means (such as email, texts, and the Internet) as a method of communication and of providing billing, payment, and enrollment services. For many University communications, email to a student's Stanford email account is the official form of notification to the student, and emails sent by University officials to such email addresses will be presumed to have been received and read by the student. Signatures or acknowledgements provided by a student electronically to the University via Stanford systems and/or @stanford.edu email are valid and legally binding.

Notification/Obligation to Read Email

For many University communications, email to a student's Stanford email account is the official form of notification to the student, and emails sent by University officials to such email addresses will be presumed to have been received and read by the student. Emails and forms delivered through a SUNet account by a student to the University may likewise constitute a formal communication, with the use of this password-protected account constituting the student's electronic signature.

ADMISSION AND FINANCIAL AID

Nondiscrimination Policy

Stanford University admits qualified students of any race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity, veteran status, or marital status to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, in the administration of the University's programs and activities, Stanford prohibits unlawful discrimination on the basis of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity or expression, veteran status, marital status or any other characteristic protected by applicable law; Stanford also prohibits unlawful harassment including sexual harassment and sexual violence.

This policy applies to Stanford programs and activities both on and off-campus, including overseas programs.

The following person has been designated to handle inquiries regarding this nondiscrimination policy: Stanford's Director of the Diversity and Access Office, Rosa Gonzalez, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email). Stanford's Title IX Coordinator, Catherine Glaze, has been designated to handle inquiries regarding sexual harassment and sexual violence: Kingscote Gardens (2nd floor), 419 Lagunita Drive, Stanford, CA 94305, (650) 497-4955 (voice), (650) 497-9257 (fax), titleix@stanford.edu (email).

Individuals may also file complaints directly with the Office for Civil Rights, within the United States Department of Education, by following the information on this website: https://www2.ed.gov/about/offices/list/ocr/complaintintro.html.

Visas

In order to register as students, Stanford University requires that all those who are not U.S. citizens or U.S. permanent residents obtain and maintain an appropriate visa status for their stay in the United States. The types of student visas sponsored by Stanford include the following:

1. Student Visa (F-1): The F-1 visa is obtained with an I-20 Certificate of Eligibility issued by Stanford University. The graduate student on an F-1 visa must enroll in a full course of study. The accompanying spouse or child enters on an F-2 visa. F-2 visa holders may not hold employment or engage in business under any circumstances. The F-2 spouse of an F-1 student may not engage in full-time study, and the F-2 child may only engage if the study is in an elementary or secondary school (kindergarten through twelfth grade). The F-2 spouse and child may, however, engage in study that is avocational or recreational in nature.
2. Exchange Visitor Visa (J-1): The J-1 visa is obtained with a DS-2019 Certificate of Eligibility issued by Stanford University or a sponsoring agency. This visa is often required for graduate students sponsored by certain agencies, foundations, and governments. In some cases, exchange visitors must leave the United States at the conclusion of their programs, and may not change to non-student visa status, and/or may not apply for permanent residency in the United States until they have returned to their home countries for at least two years. The accompanying spouse or child of an exchange visitor may obtain a J-2 visa and may, in some cases, obtain authorization to work by applying for an Employment Authorization Document from U.S. Citizenship and Immigration Services in order to be employed in the U.S. There is no regulatory restriction on study for J-2 dependents.

The Certificates of Eligibility (I-20 or DS-2019) are issued to admitted students after receipt of certifications of adequate financial support.

An F-1 student transferring from another U.S. school must obtain a new I-20 from Stanford and complete a transfer process at the Bechtel International Center no later than 15 days after the effective date of the transfer. A J-1 student or scholar transferring from another U.S. school must obtain a new DS-2019 from Stanford and complete a transfer process at the Bechtel International Center no later than 15 days after the effective date of the transfer.

Rescission

By applying for admission to Stanford University academic programs, applicants certify that the information they provide in their applications is complete, accurate, and their own work. As also noted in the application materials, Stanford reserves the right to withdraw an offer of admission under certain circumstances, including (but not limited to):

1. if there is a significant drop in academic performance, a failure to graduate (in the applicant's current program), or a failure to satisfy a prerequisite or condition of admission;
2. if there has been a misrepresentation in the application process or a breach of any of the terms of the application process; or
3. if the University learns that an individual has engaged in behavior prior to the first day of enrolled Stanford attendance that indicates a serious lack of judgment or integrity.

Indeed (and for example), Stanford may rescind an individual's admission at any time, including after attendance and after degree conferral, if it determines, for example, that an individual has been admitted to Stanford on the basis of having provided false information; has withheld requested information; or has engaged in behavior prior to the first day of enrolled Stanford attendance that indicates a serious lack of judgment or integrity.

The University reserves the right to require individuals to provide additional information (and/or authorization for the release of information) about any such matter, and to place a hold on registration and/or the conferral of a degree during the investigation into any such matter. Stanford also reserves the right in perpetuity to investigate the authenticity, accuracy, and authorship of materials submitted, information provided, and assertions made in connection with the application.

Similarly, Stanford University awards degrees on the basis of successful completion of all program requirements in accordance with Stanford's policies and procedures. The University reserves the right to rescind any degree or honors designation (even after conferral) if the program requirements have not been so completed, and to place a hold on issuing a degree during the investigation into any such matter.

For academic programs that require work authorization in the United States (such as to serve as a teaching assistant or research assistant), Stanford University reserves the right to rescind the admission and terminate the student status of any student who fails to timely obtain and maintain that work authorization status.

Holds

A hold can be placed on the registration of any student with unmet financial or other University obligations; in addition to being unable to register for and take classes, among other limitations, such a student cannot receive a transcript, statement of completion, degree certificate, or diploma until the hold is released. As a condition of attending Stanford, students accept this provision.

Undergraduate Admission

Stanford's undergraduate community is drawn from throughout the United States and the world. It includes students whose abilities, intellectual interests, and personal qualities allow them to benefit from and contribute to the University's wide range of teaching and research programs in the humanities, natural sciences, social sciences, and

engineering. The University admits students who love learning for its own sake; who exhibit energy, creativity, and curiosity; and who have distinguished themselves in and out of the classroom.

Stanford welcomes a diverse community that cuts across many dimensions. The University does not use quotas of any kind in its admission process: it does not favor particular schools or types of schools, nor any geographic region, nor does it have any racial, religious, ethnic, or gender-related quotas. The University believes that a student body that is both highly qualified and diverse in terms of factors including (but not limited to) culture, socioeconomic status, race, ethnicity, gender, work and life experiences, skills, and interests is essential to the educational process. Having a student body that is diverse in many ways (specifically including race and ethnicity) furthers Stanford's educational mission in that it promotes understanding among those from different backgrounds, contributes to the destruction of stereotypes, prepares students to be positive members of a diverse workforce and national and international communities, and shapes the next generation's leaders. Applications are encouraged from those take initiative and responsibility for their education and who would provide additional dimensions to the University and its programs.

Citizenship and immigration status are not a condition of admission to Stanford. The University welcomes applications from all students who are ready to make the most of the extraordinary academic opportunities available at Stanford. Undocumented undergraduate applicants with questions about admission or financial aid should visit the University's Undocumented at Stanford (https://undocumented.stanford.edu/) website.

In order to preserve the residential character of the University and to maintain a favorable student-faculty ratio, Stanford has a limited undergraduate enrollment. The anticipated size of the entering class is approximately 1,700+ students who are admitted for Autumn Quarter enrollment. Approximately 20-40 transfer students, entering either the sophomore or junior class, are also typically admitted for Autumn enrollment if space allows. Each year, the University receives many more applications from qualified students than there are places available.

Stanford is committed to meeting the University-computed financial need of each admitted student, and admission decisions are made without regard to the applicant's financial status, except in the case of international students who are neither U.S. citizens nor U.S. registered permanent residents.

Application procedures, requirements, and deadlines vary from year to year. See the Undergraduate Admission (http://admission.stanford.edu) website for the most recent information; or call the Office of Undergraduate Admission at (650) 723-2091.

Nonmatriculated Study (Undergraduate)

Permission to enroll at Stanford as a nonmatriculated student during Autumn, Winter, and Spring quarters is not routinely approved except under extenuating circumstances. Nonmatriculated students authorized to enroll at Stanford University are not admitted to any Stanford degree program and are permitted to register for a specific period, usually one, two, or three quarters. Financial assistance from Stanford University is not available. Permission to enroll as a nonmatriculated student does not imply subsequent admission as a matriculated student.

Nonmatriculated status is a privilege and not a right. The University reserves the right, at its discretion, to withhold registration from, or require withdrawal for the program by, any student or applicant. In addition, nonmatriculated status may be revoked at the University's discretion (and after consideration of such factors as the University considers relevant in the particular case) at the end of any quarter of enrollment.

Students interested in nonmatriculated status during the Autumn, Winter, and Spring quarters should contact the Office of the University Registrar, not the Office of Undergraduate Admission. Note: newly admitted Stanford students (that is, those admitted to a Stanford degree program) are not eligible to enroll for nonmatriculated study for any quarter, except with the permission of the Vice Provost for Undergraduate Education (or his or her designee) under extenuating circumstances.

High School Nonmatriculated Students

Local high school students are eligible to be considered to attend Stanford as nonmatriculated students on a limited basis when they have exhausted all of the courses in a given discipline offered by their high school. Nonmatriculated high school students are permitted to enroll in one course per quarter and are required to pay the applicable tuition. Permission from the academic department and the University Registrar is required. The Language Center does not allow high school students to enroll in language courses during the academic year. High school students who are accepted to participate in High School Summer College may enroll in language courses as part of Summer Session, space permitting.

Summer Session

Students wishing to enroll as nonmatriculated students during Summer Quarter should contact the Summer Session Office (http://summer.stanford.edu/) for more information about the Summer Visitor Program (https://summer.stanford.edu/program/undergraduate-domestic-and-international-students/). Admission to the Summer Visitor Program does not imply regular admission to Stanford for subsequent quarters or to one of Stanford's regular degree programs.

Graduate Admission

Matriculated Study (Graduate Students)

Applicants from colleges and universities of recognized standing who hold a U.S. bachelor's degree or its equivalent are eligible to be considered for admission for graduate study. Details regarding degrees offered in specific departments are given on the Graduate Admissions (http://gradadmissions.stanford.edu) web site. The number of applicants who can be admitted for work in a particular field of study at any time is limited by the facilities and programs of the school or department and by the number of matriculated students who continue their work in that field.

As with its undergraduate program (see the Undergraduate Admissions (p. 18) tab in this section of this bulletin), Stanford believes that a graduate student body that is both highly qualified and diverse in terms of factors such as culture, socioeconomic status, race, ethnicity, gender, work and life experience, skills, and interests is essential to the graduate educational process. It particularly welcomes applications from African Americans, Latinos, and Native Americans, as well as from others whose backgrounds and experiences would add additional dimensions to the University's educational programs.

Graduate admissions at Stanford are managed by individual schools; different graduate programs have different work and training requirements. Undocumented students should visit the University's Undocumented at Stanford (https://undocumented.stanford.edu/) web site and refer to the web site of the school they are interested in for admission information.

Honors Cooperative Program

The Honors Cooperative Program (HCP) is a part-time graduate program offered by Stanford University. It allows working professionals, who may be eligible for tuition support through their employer, an opportunity to earn a graduate degree in any of the engineering programs, applied physics, statistics, or biomedical informatics, on a part-time basis.

Prospective HCP students apply to the department in which they would like to pursue a graduate degree through the normal graduate admissions

process, and compete with all other applicants for admission to the program. Once admitted, HCP students arrange their part-time status and tuition payment options through the Stanford Center for Professional Development (SCPD). Courses are delivered online and broadcast locally. HCP students are also welcome to attend certain classes on campus, and some on-campus attendance may be required depending on the degree track.

To participate, HCP students must have the support of their employer as a participating company of the Stanford Center for Professional Development. For more information, see the Stanford Center for Professional Development (SCPD) (http://scpd.stanford.edu) web site, or phone (650) 725-3000.

The Coterminal Degree Program

This program permits matriculated Stanford undergraduates to study for a Master of Arts (M.A.) or Master of Science (M.S.) degree while completing their bachelor's degree(s) in the same or a different department. Application policies and procedures are established by each master's department or program. Interested Stanford undergraduates should directly contact the department or program in which they wish to pursue a master's degree and must adhere to the application deadlines. Stanford undergraduates may also choose to apply to Stanford graduate degree programs through the standard graduate admissions process. Such applicants are not coterminal students and coterminal policies do not apply. For more information, see the Coterminal Degrees (p. 56) section of this bulletin.

Application Process

Specific information regarding test requirements, other application procedures and requirements, and closing dates for filing applications and supporting credentials for admission and financial aid are listed on the Graduate Admissions (http://gradadmissions.stanford.edu) web site.

Graduate fellowship funds and assistantships are generally committed in March for the entire period comprising Autumn, Winter, and Spring quarters of the next academic year. Awards are seldom made to students who enter the University in Winter, Spring, and Summer quarters; such applicants must meet the same financial aid application requirements as those entering in Autumn Quarter.

Applications are to be submitted electronically for graduate programs in the schools of Business, Earth Sciences, Education, Engineering, Humanities and Sciences, and the Biosciences (non-M.D. programs in Medicine). Application instructions may be found at the Graduate Admissions (http://gradadmissions.stanford.edu) web site.

For admission to the following programs, apply directly via the web sites below.

Business

Admission information is available for the M.B.A., MSx Program, and Ph.D. programs at the Stanford Graduate School of Business Admissions (https://www.gsb.stanford.edu/programs/) web site. All applications must be submitted electronically.

Law

Applicants for the J.D. degree should see the Law School J.D. Admissions (https://law.stanford.edu/education/degrees/jd-program/) web site. Applicants for LLM, JSM, JSD, and MLS degrees can find instructions at the Advanced Degree Programs (https://law.stanford.edu/education/degrees/advanced-degree-programs/) web site. These applications are submitted to the Director of Admissions, School of Law, Stanford University, Stanford, CA 94305-8610. The Law School Admissions Test is required.

M.D. Program

Applicants should see the M.D. admissions (http://med.stanford.edu/md-admissions.html) web site or, for additional information about the M.D. program, write to Stanford University School of Medicine, Office of M.D. Admissions, 251 Campus Drive, MSOB X3C01, Stanford, CA 94305-5404. The American Medical College Application Service (AMCAS) application (https://students-residents.aamc.org/applying-medical-school/applying-medical-school-process/applying-medical-school-amcas/) is available at the AMCAS (http://aamc.org) web site. Deadlines for receipt of applications and transcripts are available there.. The Medical College Admissions Test (MCAT) is required.

Rescission

By applying for admission to Stanford University academic programs, applicants certify that the information they provide in their applications is complete, accurate, and their own work. As also noted in the application materials, Stanford reserves the right to withdraw an offer of admission under certain circumstances, including (but not limited to):

1. if there is a significant drop in academic performance, a failure to graduate (in the applicant's current program), or a failure to satisfy a prerequisite or condition of admission;
2. if there has been a misrepresentation in the application process or a breach of any of the terms of the application process; or
3. if the University learns that an individual has engaged in behavior prior to the first day of enrolled Stanford attendance that indicates a serious lack of judgment or integrity.

Indeed (and for example), Stanford may rescind an individual's admission at any time, including after attendance and after degree conferral, if it determines, for example, that an individual has been admitted to Stanford on the basis of having provided false information; has withheld requested information; or has engaged in behavior prior to the first day of enrolled Stanford attendance that indicates a serious lack of judgment or integrity.

The University reserves the right to require individuals to provide additional information (and/or authorization for the release of information) about any such matter, and to place a hold on registration and/or the conferral of a degree during the investigation into any such matter. Stanford also reserves the right in perpetuity to investigate the authenticity, accuracy, and authorship of materials submitted, information provided, and assertions made in connection with the application.

Similarly, Stanford University awards degrees on the basis of successful completion of all program requirements in accordance with Stanford's policies and procedures. The University reserves the right to rescind any degree or honors designation (even after conferral) if the program requirements have not been so completed, and to place a hold on issuing a degree during the investigation into any such matter.

For academic programs that require work authorization in the United States (such as to serve as a teaching assistant or research assistant), Stanford University reserves the right to rescind the admission and terminate the student status of any student who fails to timely obtain and maintain that work authorization status.

Holds

A hold can be placed on the registration of any student with unmet financial or other University obligations; in addition to being unable to register for and take classes, among other limitations, such a student cannot receive a transcript, statement of completion, degree certificate, or diploma until the hold is released. As a condition of attending Stanford, students accept this provision.

Nonmatriculated Study (Graduate Students)

Eligibility for consideration for nonmatriculated enrollment is restricted to two groups of applicants:

1. Stanford alumni who wish to return to Stanford to take courses that are prerequisites for Medical School admission, such as undergraduate Biology or Chemistry courses, are eligible to apply for nonmatriculated status. An application form, application fee, statement of purpose, and three letters of recommendation are required. The decision to admit or deny is made by the Director of Graduate Admissions on the basis of relevant factors, including at least a 3.0 GPA and positive letters of recommendation.
   a. Applicants who graduated from other universities are not eligible to take the prerequisites for Medical School at Stanford.
2. Individuals who hold a bachelor's degree or equivalent and wish to take courses in a specific department that allows non-degree students are eligible to apply for nonmatriculated status. An application form, application fee, statement of purpose, original transcripts, and three letters of recommendation are required. The decision to admit or deny is made by the chair of the department in which they wish to take courses and conveyed in writing to the Graduate Admissions Office. Applicants are notified of the decision by Graduate Admissions in the Office of the University Registrar.

Students who are granted nonmatriculated status are charged the 8-10 unit rate for each quarter in which they are enrolled, and may enroll for a maximum of a total of one academic year. Nonmatriculated status is a privilege and not a right; the nonmatriculated status may be revoked at the University's discretion (and after consideration of such factors as the University considers relevant in the particular case) at the end of any quarter of enrollment.

Nonmatriculated students are not permitted to enroll in certain courses, such as those in the following departments or programs: film and broadcasting courses in Art; introductory courses in Mathematics (i.e., numbered below 100); all courses in Computer Science, Electrical Engineering, International Policy Studies, and the School of Medicine. Nonmatriculated students in the School of Medicine may enroll in courses only with written approval by either the Senior Associate Dean of Graduate Education and Postdoctoral Affairs or the Senior Associate Dean for Medical Education. Nonmatriculated students must limit their enrollment to classes in the department in which they have been admitted. Nonmatriculated students receive academic credit for courses satisfactorily completed and may obtain an official transcript. As a general proposition, they may use University facilities and services. In classes of limited enrollment, students in degree programs have priority. Nonmatriculated students may apply for housing but have a low priority for assignment and are not guaranteed housing. No fellowships, assistantships, or Stanford loans are available for nonmatriculated students. Nonmatriculated students are not eligible for a leave of absence.

Nonmatriculated students who later apply for admission to a degree program must meet the standard admission requirements and should not anticipate special priority because of work completed as a nonmatriculated student. Students who are admitted to a degree program may apply a maximum of 15 units of nonmatriculated study toward the residency requirement for a master's degree and 30 units for the Engineer or Ph.D. degree, subject to the approval of the degree granting department.

Application forms for nonmatriculated status during the regular academic year are available from Graduate Admissions (https://gradadmissions.stanford.edu/about/), Office of the University Registrar. Deadlines for applying are included with the forms and are generally required two months before the start of the quarter.

Applicants interested in nonmatriculated student status for the Summer Quarter only should explore the Summer Session web site (http://summer.stanford.edu/).

Non-Degree-Granting Programs

Stanford University has established a limited number of formal non-degree-granting programs within individual departments. These include the Knight Fellowship Program for mid-career journalists (Communication Department), and the Stegner Fellows Program for selected authors (Creative Writing Program, within the English Department).

Individuals may apply to these programs directly. Application requirements, admissions decisions, tuition requirements and financial support are all handled by the specific program. Individuals who are admitted to these programs will be registered at Stanford as nonmatriculated graduate students in the appropriate program. Upon completion of their program, they will receive a transcript and certificate of program completion.

Individuals who commit violations of University policy, the Honor Code, or the Fundamental Standard are subject to termination. Individuals in non-degree granting programs are subject to removal or discipline according to the program's policies or practices, not through the Office of Community Standards.

Stanford Center for Professional Development

Qualified individuals may pursue graduate and professional certificates or take individual graduate and professional courses through the Stanford Center for Professional Development. Nonmatriculated students taking individual graduate courses for credit, or towards earning a graduate certificate, are charged tuition on a per-unit basis. For more information on available courses, applications, and deadlines visit http://scpd.stanford.edu or phone (650) 725-3000.

Postdoctoral Scholars

Postdoctoral scholars are trainees in residence at Stanford University pursuing advanced studies beyond the doctoral level in preparation for an independent career. Postdoctoral scholars are appointed for a limited period of time and may participate in Stanford research projects and/or may be supported by external awards or fellowships. In all cases, their appointment at Stanford is for the purpose of advanced studies and training under the sponsorship of a Stanford faculty member.

Postdoctoral appointments require initial full-time engagement in the designated research or study and are generally restricted to those who have earned a terminal degree such as Ph.D. or J.D. within the last three years or a medical degree such as M.D., M.B.B.S., or D.D.S. within the last six years. Requests for exceptions for individuals who are beyond these limits, or have not been actively engaged in research as their primary effort, must include a written statement from the sponsoring faculty member indicating what additional training outside the primary area of effort the individual plans to receive, and the reasons for which the exception is requested. Postdoctoral scholars are appointed at Stanford for fixed terms, typically one year but that may eventually total up to four years, and are subject to a strict five-year rule (that is, that the total postdoctoral appointment period is not to exceed a total of five years of postdoctoral research experience at all institutions combined). In cases of combined training, only the years of active research at the postdoctoral level are counted for salary and other purposes. Postdoctoral scholars who begin a second postdoctoral appointment in a new field may have training extended to a maximum total of up to six years. Postdoctoral scholars may request temporary reductions in effort and pay due to temporary family or other conditions.

All postdoctoral scholars appointed at Stanford must be supported by Stanford grants and contracts, training grants, departmental or school fellowship funds, or external fellowships, or by a combination of these sources. Scholars may not be self-supporting. In addition, all postdoctoral scholars are eligible for a benefits package including medical, dental, life, and disability insurance. Postdoctoral scholars are normally appointed for 100% time.

Postdoctoral scholars must be registered at Stanford during every academic quarter of their appointment. Registration entails payment of a quarterly postdoctoral fee by the academic department or school appointing the scholar.

Prospective postdoctoral scholars should write directly to the department in which they wish to study or check for postdoctoral openings at http://postdocs.stanford.edu/prospects/index.html (http://postdocs.stanford.edu/prospects/). For more information, see http://postdocs.stanford.edu.

Visiting Student Researchers

There are a limited number of instances when it would be to the benefit of Stanford faculty to permit graduate students currently enrolled at other universities to engage in research at Stanford using Stanford research facilities. These might include students at other universities who are engaged in research in a field of interest to a Stanford faculty member or a student who is doing a laboratory rotation as part of a larger research study or grant. Such students are known as Visiting Student Researchers (VSRs) and are appointed as nonmatriculated graduate students.

When agreeing to sponsor a VSR, faculty must be mindful of the need to place primary emphasis on providing research opportunities to regularly matriculated Stanford students. In addition, students sponsored as VSRs must be qualified to conduct research at a level comparable to that of other Stanford graduate students and the research must be of benefit to Stanford as well as the visitor.

Any Stanford faculty member in any department at Stanford may sponsor a VSR. The sponsoring faculty member and the department chair must sign the letter of invitation and thus assume responsibility for the VSR. The faculty director of an interdisciplinary program or research center or institute that is sponsoring a VSR may sign instead of a department chair. In most instances, faculty members in a department who also have an appointment in a research center or institute should sponsor a VSR within their department, since department staff have experience with student enrollments and financial policies.

The full Visiting Student Researcher policy is in the Research Policy Guide (RPH 10.7 Visiting Student Researchers (http://exploredegrees.stanford.edu/admissionandfinancialaid/handbook/non-faculty-research-appointments/visiting-student-researchers/)). The Registrar Office's website outlines the procedures for sponsoring and appointing a VSR (https://registrar.stanford.edu/staff/visiting-student-researchers/).

Undergraduate Visiting Researcher Interns (Nonmatriculated Study)

During the summer term, students from other universities who have not yet obtained a bachelor's degree (or its foreign equivalent) may be invited by Stanford faculty to conduct research on the Stanford campus. Participants must be a degree-seeking student for at least two years at the bachelor's level in a U.S. college or university accredited by a regional accrediting association or international college or university of recognized standing. Participation is contingent upon the approval of Graduate Admissions, Office of the University Registrar.

These students are registered as Undergraduate Visiting Research Interns. Appointments are limited to the Summer term. Invited persons must be qualified to conduct research at a level comparable to that of other Stanford undergraduates, and the research must be of benefit to Stanford as well as to the visitor. Forms for the appointment of Undergraduate Visiting Research Interns are submitted to Graduate Admissions, Office of the University Registrar by the department issuing the invitation.

Undergraduate Visiting Researcher Interns are charged a quarterly fee. They may waive the University's student medical insurance plan only if they have comparable coverage with another carrier and submit proof of the comparable coverage prior to the term start date. Visiting Research Interns are not entitled to any financial support from Stanford University. Funds intended for the support of matriculated Stanford students may not be used to support Visiting Researcher Interns. Stanford cannot certify visiting researchers for deferment of U.S. educational loans.

Students of New Faculty

Faculty who are being hired by Stanford University, and who are currently advising doctoral students in advanced stages of degree completion at their home university, may appoint one or more of these students as Students of New Faculty, a nonmatriculated graduate status, for the purpose of facilitating the completion of the student's doctoral research with their faculty adviser. To be eligible for this status, the student must:

- have completed at their home institution all degree requirements equivalent to those required for Stanford's TGR status (i.e., completed all curricular requirements, candidacy, and residency), and
- be in good academic standing at their home institution, and remain so while at Stanford, and
- demonstrate agreement to the terms and conditions for this appointment by signing the Students of New Faculty Representations.

Appointment of these students into nonmatriculated Stanford graduate status requires the approval of the incoming faculty member, that faculty member's Stanford department chair and school dean, and Stanford's office of the Vice Provost for Graduate Education, as well as of the appropriate office at the student's home institution.

Approval for these appointments is documented by means of an Affiliation Agreement between Stanford and the student's home institution, identifying the student(s) and describing the arrangements for their appointment at Stanford. Attachments to this agreement specify the timing of the appointment and the sources of financial support, if any, for each student.

Students are appointed into this status for one year at a time, up to a limit of three years. The Stanford department may request extensions beyond the third year. Approval for extensions requires the concurrence of the Stanford school dean's office and the Vice Provost for Graduate Education, along with the appropriate office(s) at the student's home institution.

Students of New Faculty must enroll in the appropriate TGR course during each quarter of the academic year while they are at Stanford, and will be charged TGR tuition during each enrolled quarter. Summer enrollment is optional subject to the relevant policies of Stanford and of the home institution. Students of New Faculty may be appointed and paid as Research Assistants. For more information, see GAP 2.4.1 (https://gap.stanford.edu/handbooks/gap-handbook/chapter-2/subchapter-4/page-2-4-1/).

Undergraduate Financial Aid

The University has a comprehensive need-based financial aid program for its undergraduates. Stanford is committed to meeting the University-computed financial need of each admitted student, and admission decisions are made without regard to the applicant's financial status,

except in the case of international students who are neither U.S. citizens nor U.S. registered permanent residents.

Before awarding institutional funds, the University assumes that students and their parents accept the first and primary responsibility for meeting educational costs. Stanford's policy generally is to exclude undergraduates from being considered financially independent of their parents for University-administered scholarship aid unless a student is an orphan, a ward of the court, or at least 25 years of age. Spouses of married undergraduate students share in the responsibility to meet educational costs.

Stanford expects financial aid applicants to apply for and use resources from state, federal, and private funding sources, contribute from their earnings during nonenrollment periods (for example, summer), and use earnings from part-time employment during the academic year to meet educational expenses. If Stanford determines that an applicant and his or her family cannot meet standard educational expenses remaining after these resources are applied, the University offers scholarship funds to help meet remaining costs.

The amount of scholarship or grant funds offered to students is determined by the difference between the comprehensive cost of attendance (including tuition, fees, room, board and allowances for books, supplies, personal expenses, and travel) and the amount the student and parents can reasonably be expected to contribute toward educational costs based on family financial circumstances. Scholarships from outside sources may change the University's financial aid award. When a student receives outside scholarships, these funds reduce or eliminate the student's responsibility to contribute from job earnings. If the total in outside scholarships exceeds the student's responsibility, the University then reduces institutional scholarship, dollar for dollar, by any additional amount.

Students are considered for University scholarship eligibility during their first four years of undergraduate enrollment. The Financial Aid Office (FAO) considers applicants for University scholarship eligibility beyond the twelfth quarter only if enrollment is essential in order to complete the minimum requirements for the first baccalaureate degree or major. Students who enroll for a fifth year in pursuit of a coterminal program, a minor, a second major, a second degree, or the B.A.S. degree are not eligible for University scholarship consideration but may apply for student loans and federal grants. Eligibility for federal student aid is limited to the equivalent of 18 quarters of full-time undergraduate enrollment, including course work taken at other colleges and universities. Students must also maintain satisfactory academic progress to retain financial aid eligibility.

For additional detailed information, refer to the FAO (http://financialaid.stanford.edu) web site.

Graduate Financial Aid

Graduate students at Stanford receive funding from a variety of sources. University fellowships, research assistantships, and teaching assistantships are offered primarily to doctoral students. In some cases, master's students also may receive fellowships and assistantships. In addition, outside agencies provide fellowships to many graduate students at Stanford. Students without fellowships or assistantships, and those whose funding does not cover all of their costs, may need to use student loans, savings, other personal assets, a spouse's earnings, or parental support to meet their educational expenses.

Veterans Education Benefits

The Office of the University Registrar serves as the liaison between the University, its students, and the various federal, state, and local agencies concerned with Veterans education benefits. Stanford certifies enrollment for students in degree seeking programs and VA approved certificate programs offered through the Stanford Center for Professional Development and Graduate School of Business. Other non-matriculated and certificate programs are not eligible. All students eligible to receive Veterans education benefits while attending the University are urged to complete arrangements with the appropriate agency in advance of enrollment.

Stanford University is required to certify only those courses that meet minimum graduation requirements. Courses not directly related to a student's degree program or courses beyond those required for a specific degree program are not certified. Undergraduates should meet with an advisor to develop a course enrollment plan. Graduate students should have their departments approve their study lists as meeting graduation requirements on a quarterly basis.

To comply with federal regulations concerning credit for previous training (38 CFR 21.4253), Stanford University is required to evaluate all previous education and training completed elsewhere to determine what credit, if any, should be granted to students eligible to receive Veterans educational benefits. Stanford is required to complete an evaluation; credit is granted when appropriate. Credit is evaluated toward the degree program registered with Veterans Affairs as determined by the Office of the University Registrar in conjunction with the relevant academic department(s) or program(s). All relevant policies regarding transfer credit apply. In addition, this evaluation occurs each time a student's degree program is changed.

Subject to current federal and University guidelines, students eligible for receipt of VA educational benefits have their prior education and training evaluated up to the credit limits outlined in the "Residency Policy for Graduate Students (p. 72)" section of this bulletin. As an exception to that policy, students in master's programs in the schools of Earth Sciences, Education, Engineering, Humanities and Sciences, Law, Medicine, and Graduate Business are allowed a maximum of 6 transfer (quarter) units. Students should consult with the VA Certifying Officer for consideration of optimal use of VA education benefits.

Stanford participates in the Yellow Ribbon provision of the Post 9/11 GI Bill (Ch. 33). If a matriculated student qualifies for Chapter 33 benefits at the 100% level, the student may be eligible to receive additional funding through the Yellow Ribbon Program. Under this program, Stanford provides an institutional award to supplement the Chapter 33 base tuition benefit. The VA also matches Stanford's Yellow Ribbon contribution. The amount of institutional contribution varies by school and program. See the U.S. Department of Veteran's Affairs Yellow Ribbon web site (https://www.benefits.va.gov/gibill/yellow_ribbon/yellow_ribbon_info_schools.asp) for additional information.

See the Office for Military Affiliated Communities (OMAC) website (https://military.stanford.edu/students/activate-va-education-benefits-stanford/) for additional information about Veterans education benefits.

TUITION, FEES, AND HOUSING

University Communication with Students

Stanford University uses electronic means (such as email, texts, and the Internet) as a method of communication and of providing billing, payment, and enrollment services. For many University communications, email to a student's Stanford email account is the official form of notification to the student, and emails sent by University officials to such email addresses will be presumed to have been received and read by the student. Signatures or acknowledgements provided by a student electronically to the University via Stanford systems and/or @stanford.edu email are valid and legally binding.

Notification/Obligation to Read Email

For many University communications, email to a student's Stanford email account is the official form of notification to the student, and emails sent by University officials to such email addresses will be presumed to have been received and read by the student. Emails and forms delivered through a SUNet account by a student to the University may likewise constitute a formal communication, with the use of this password-protected account constituting the student's electronic signature.

Obligation to Pay Charges

By accepting Stanford's offer of admission and enrolling in classes, each student accepts responsibility for paying all debts to the University, including tuition and fees, for which he or she is liable. An individual's registration as a Stanford student constitutes his or her agreement to make timely payment of all amounts due. Stanford students have access to financial literacy resources through the Mind Over Money program (https://mindovermoney.stanford.edu) including the Haven Money (https://sfs.stanford.edu/haven-money-management-tool/) tool and 1:1 financial coaching for personal finance education.

For complete tuition information, see the Registrar's tuition (https://registrar.stanford.edu/students/tuition-and-fees/) web site.

Quarterly tuition for the academic year 2020-21, payable Autumn, Winter, Spring, and Summer quarters.*

**In academic year 2020-21, tuition and fees are the same throughout each quarter. To review changes to instruction this year, visit the Re-Approaching Stanford website.*

Tuition Category	Tuition
Undergraduate	$18,491
Graduate 11-18 units	$18,105
Graduate 8,9,10-unit rate	$11,770
Each graduate unit above 18	$1,207
Graduate Engineering 11-18 units	$19,287
Graduate Engineering 8,9,10-unit rate	$12,540
Each graduate Engineering unit above 18	$1,286
Graduate School of Business (M.B.A. program—first year)*	$24,902
Graduate School of Business (M.B.A. program—second year)*	$24,354
School of Medicine (M.D. Program)*	$20,731
Law School	$21,450
GSB & Law Joint Program**	$22,444
Permit for Services Only (PSO)	$5,476
Permit to Attend (PTA)***	$5,476
TGR (Terminal Graduate Registration)	$3,531
Medical School Research Rate	$3,531

*Ph.D. students in the Biomedical Sciences and in the Graduate School of Business are assessed the standard graduate tuition rate.
**Law/GSB joint program tuition rate
***Policies concerning auditing are available in the Stanford Bulletin (p. 98).

- MSx: M.S. in Management for Experienced Leaders (GSB): TBD (annual, 4 quarters, Summer 2020 through Spring 2021)
- TGR students who carry 1, 2, or 3 units are assessed the TGR rate of $3,531.
- PostDoc Fee: $125
- Graduation Quarter: $150
- Campus Health Services Fee: $232
- VSR monthly fee: $1,177

Regular tuition fees apply to the undergraduate Overseas Studies and Stanford in Washington programs.

Eligibility for registration at reduced tuition rates is described below. Tuition exceptions may also be made for illness, disability, pregnancy, new-parent relief, or other instances at the discretion of the University. No reduction in tuition charges is made after the first two weeks of the quarter.

All students are advised, before registering at less than the regular full-tuition rate, to consider the effects of that registration on their degree progress and on their eligibility for financial aid and awards, visas, deferment of student loans, and residency requirements.

The University reserves the right to change at any time, without prior notice, tuition, room fees, board fees, or other charges.

Document Fee

A Document Fee of $250 is assessed once upon the first admission to Stanford as an undergraduate or graduate student, including Law, GSB, and Medicine students. Non-degree option (NDO) students, such as summer session and non-degree seeking SCPD students, are assessed a $125 Document Fee.

Tuition and Fees for 2020-21

Some or all instruction for all or part of the academic year 2020-21 may be delivered remotely. Tuition and mandatory fees have been set regardless of the method of instruction and will not be refunded in the event instruction occur remotely for any part of the academic year.

Undergraduate Student Tuition

During Autumn, Winter, and Spring quarters, undergraduates are expected to register at the regular full-tuition rate.

During Summer Quarter, Stanford undergraduates may register on a unit-basis. For Summer Quarter tuition rates and policies, see the Registrar's Summer tuition (https://registrar.stanford.edu/summer-tuition/) web site.

The following reduced-tuition categories can be requested by matriculated undergraduate students in the final stages of their degree program:

1. Permit to Attend for Services Only (PSO)

Undergraduates completing honors theses, clearing incompletes, or requiring a registration status, and who meet the PSO conditions listed in the "Special Registration Statuses (Undergraduate) (p. 41)" section of this Bulletin, may petition for PSO status one time only in their terminal quarter.

2. 13th Quarter

Undergraduates who meet the 13th Quarter conditions listed in the "Special Registration Statuses (Undergraduate) (p. 41)" section of this Bulletin may petition one time only to register for a minimum of eight units. For per-unit tuition rates, see the Registrar's tuition web site.

3. Graduation Quarter

Undergraduates may petition to register for Graduation Quarter registration status in the quarter in which they are receiving a degree if they are not using any University resources (including housing), have completed all University requirements, and meet the Graduation Quarter conditions listed in the "Special Registration Statuses (Undergraduate) (p. 41)" section of this bulletin. Graduation Quarter may be permitted one time only. The tuition for the Graduation Quarter is $150.

Coterminal students are only eligible for the Graduation Quarter special registration status if they are applying to confer both the undergraduate and graduate degree in the same quarter.

Coterminal Student Tuition

Coterminal students are assigned to either the undergraduate coterminal tuition group or the graduate coterminal tuition group, which dictates whether the student is charged undergraduate or graduate tuition. A coterminal student is subject to graduate tuition assessment and adjustment policies once placed in the coterminal graduate tuition group. Coterminal students are not eligible for undergraduate special registration statuses (with the exception of Graduation Quarter if the student is applying to confer both their undergraduate and graduate degrees in the same quarter). Coterminal students may only be eligible to apply for graduate special registration statuses once their undergraduate degrees have been conferred. Coterminal students should see the student policies and procedures for tuition assessment, as described in the "Coterminal Degrees (p. 57)" section of this bulletin.

Graduate Student Tuition

Matriculated graduate students are expected to enroll for at least eight units during the Autumn, Winter, and Spring quarters. Schools and departments may set a higher minimum. During the Autumn, Winter, and Spring quarters, matriculated graduate students in most departments may register at the reduced 8-, 9-, or 10-unit tuition rate if their enrollment plans are accepted by their departments. Students in the Stanford Law School, the MBA program in the Graduate School of Business, or the M.D. program in the School of Medicine, should consult appropriate school officers about tuition reduction eligibility.

Graduate students who are enrolled in more than one graduate degree at Stanford, where each program charges different tuition, are charged:

1. the tuition associated with a degree in the doctoral/professional category, if the other degree is in the master's category. Those degrees in the doctoral or professional category for tuition purposes are the Ph.D., D.M.A., J.S.D., M.D., and J.D. degrees. Those degrees in the master's category for tuition purposes are the Engineer, M.A., M.S., M.P.P., M.B.A., M.F.A., L.L.M., M.L.S., and J.S.M. degrees.
2. the higher tuition rate, if both degrees are in the same category.
3. a University-approved tuition rate if the student is in a special program for which specific tuition agreements have been approved by the Faculty Senate (e.g., all joint degree programs (JDPs) or the Master of Science in Medicine program).

As a general proposition, during the Summer Quarter registration is not required by Stanford University and does not substitute for registration during the academic year. Students are required to be enrolled Summer Quarter if, during that quarter, they will meet any of the criteria listed in the "Enrollment Requirements (p.)" section of the "Graduate Degrees" section of this bulletin. Graduate students who do enroll Summer Quarter may reduce their enrollment to a minimum of one unit (charged on a per-unit basis) unless the terms of a fellowship or other financial support, or of their particular degree program, require a higher level of enrollment. TGR students who enroll in summer pay the TGR rate and must enroll in the required zero-unit course. Students in the schools of Law, Business, or the M.D. program should consult appropriate school officers regarding summer enrollment requirements. Students possessing an F1 or J1 student visa may be subject to additional course enrollment requirements in order to retain their student visas.

Honors Cooperative students register at the per-unit rate. Graduate students who are faculty spouses, regular Stanford employees, or full-time educators in the Bay Area may also register at the per-unit rate.

Non-matriculated graduate students pay the same tuition rates as matriculated students but must register for at least 8 units. Visiting Student Researchers pay a monthly fee; they may not enroll in or audit courses. Within certain restrictions, postdoctoral scholars may enroll in courses if the appropriate unit rate for tuition is paid.

The following reduced-tuition categories can be requested by matriculated graduate students in the final stages of their degree programs:

1. Terminal Graduate Registration (TGR)

Doctoral students, master's students, and students pursuing Engineer degrees who have completed all degree requirements other than the University oral exam and dissertation (doctoral students) or a required project or thesis (Engineer or master's students) and meet the conditions listed in the "TGR (p. 79)" section of this bulletin may request Terminal Graduate Registration tuition status.

Each quarter, TGR students must enroll in the 801 (for master's and Engineer students) or 802 (for doctoral students) course in their department for zero units, in the appropriate section for their adviser. TGR students register at a special tuition rate as outlined above. TGR students may enroll in up to 3 units of course work per quarter at this tuition rate. Within certain restrictions, TGR students may enroll in additional courses at the applicable unit rate. The additional courses cannot be applied toward degree requirements since all degree requirements must be complete in order to earn TGR status.

2. Graduate Petition for Part-time Enrollment (formerly Graduate Tuition Adjustment)

Graduate students who need only 3 to 7 remaining units to complete degree requirements or to qualify for TGR status may apply to register for one quarter only on a unit basis (3 to 7 units) to cover the deficiency. Students with disabilities covered under the Americans with Disabilities Act that have an approved reduced course load recommended by the Office of Accessible Education (OAE) (https://oae.stanford.edu/) may also request a tuition adjustment for *each* quarter in which they take a reduced course load. For per-unit tuition rates, see the Registrar's tuition (https://registrar.stanford.edu/students/tuition-and-fees/) web site.

3. Graduation Quarter

Registration is required for the term in which a student submits a dissertation or has a degree conferred. Students who meet the conditions listed in the "Graduation Quarter (p. 79)" section of this bulletin are eligible to be assessed a special tuition rate of $150 for the quarter in which they are receiving a degree.

International Students

F-1 or J-1 visas are required by the U.S. Department of Homeland Security. International students must be registered as full-time students during the academic year. Summer Quarter registration is not required unless the I-20/DS-2019 notes the Summer Quarter as the start date. International graduate students comply with immigration regulations while enrolled for partial tuition if their Stanford fellowships or assistantships require part-time enrollment, if they are in TGR status, or if they are in the final quarter of a degree program. Nonmatriculated graduate students who are international students must register for at least 8 units.

Fees noted with an asterisk(*) have been updated for the 2020-21 Academic Year.

Application Fee

Contact the Undergraduate Admission Office (http://admission.stanford.edu/) for information about the undergraduate application fee and the Graduate Admission (http://gradadmissions.stanford.edu/) section of the Office of the University Registrar for the current graduate application fee. Application fees for the School of Law, the School of Medicine, and the Graduate School of Business vary by program. Fees are payable at the time of application and are not refundable.

ASSU Fees*

The Associated Students of Stanford University (ASSU) fees are established by student vote in Spring Quarter. Fees directly fund activities of student organizations and not operations of ASSU. The 2020-21 fees are:

- Undergraduates—$100 Autumn Quarter. Winter, Spring, Summer rate is TBD.
- Graduate Students—$35 Autumn Quarter. Winter, Spring, Summer rate is TBD.

ASSU fees are assessed in Autumn, Winter, and Spring quarters and can be waived subject to certain conditions*. Waivers can be requested during the first three weeks of each quarter. The window for requesting waivers begins on the first Monday of each quarter and remains open for three calendar weeks. Contact the ASSU (http://assu.stanford.edu/) for details. Waivers granted result in a credit to the student's University bill.

**This fee will be assessed for each quarter (Autumn, Winter, Spring, and Summer) during the 2020-21 Academic Year.*

Document Fee

Stanford charges a one-time Document Fee to all students admitted to a new degree or non-degree program. The fee is paid once only, regardless of the number of degrees a student may ultimately pursue. It covers the cost of a variety of University administrative services such as enrollment and degree certification, course drops, and adds done in Axess before published deadlines, diplomas, and official transcripts and their production.

The document fee for students admitted to a new degree or non-degree programs in 2019-20 is $250.

Campus Health Service Fee*

All students enrolled on the main Stanford campus are required to pay the Campus Health Service Fee. The Campus Health Service Fee covers most of the services provided by Vaden Health Center, including primary care medical visits, psychological evaluation and short-term therapy at Counseling and Psychological Services (CAPS), and health and wellness programs. The services provided by Vaden Health Center are not covered by Cardinal Care or a student's private health insurance. More information and answers to questions about the fee can be found at the Campus Health Service Fee (https://vaden.stanford.edu/about/fees/campus-health-service-fee-health-fee/) web site. The fee for 2020-21 is $232 per quarter.

**This fee will be assessed for each quarter (Autumn, Winter, Spring, and Summer) during the 2020-21 Academic Year.*

Health Insurance*

The University requires all registered students to carry medical insurance to provide coverage for services not provided by Vaden Health Center. Those who carry medical insurance through an alternate carrier are generally eligible for a waiver of the Stanford Cardinal Care health insurance plan. Students are automatically enrolled in and charged for the Stanford student health insurance plan, Cardinal Care, unless they have completed waiver procedures by the waiver deadline.

For complete information on health insurance, see the Vaden Health Center Insurance (http://vaden.stanford.edu/insurance/) web site.

**This fee will be assessed for each quarter (Autumn, Winter, Spring, and Summer) during the 2020-21 Academic Year.*

Special Fees

New Student Orientation Fee

A fee is charged to all entering undergraduates for the costs of orientation, including room and board, and for the cost of class dues to provide funds for later activities of the class.

Law Student Services Fee

A fee is charged each quarter to School of Law students for supplementary course materials.

Graduate School of Business M.B.A. Course Reader Fee

A fee is charged each quarter to M.B.A. students in the Graduate School of Business to cover the cost of in-class handouts and licensing fees.

Late Study List Fees

Charges are imposed for late submission of study lists. The amount is $200.

Laboratory Fee

Students in chemistry laboratory courses are charged a nonrefundable fee.

Course Fees

Courses for which special fees are charged, such as in Music Practice; Athletics, Physical Education, Recreation; and Dance, are indicated in the notes of the scheduled class on Axess (http://axess.stanford.edu) or ExploreCourses (http://explorecourses.stanford.edu).

Dissertation Fee

Each Ph.D. and D.M.A. candidate has the option to either submit electronically or on paper. Electronic submission is free. Students who choose to submit on paper are charged a fee to cover the cost of microfilming and binding the dissertation and the cost of publishing the abstract.

International Scholar Service Fee

A one-time fee for visa authorization documents is charged to international postdoctoral and visiting scholars.

Housing

University housing is available to enrolled Stanford degree-seeking undergraduates and graduate students and non-matriculated graduate students as space permits and according to policies described on the R&DE Student Housing (http://studenthousing.stanford.edu/) web site. Residential and Dining Enterprises (R&DE) Student Housing is responsible for managing and maintaining student residences, assigning students to housing, and operating the regional housing front desks. Information on university housing assignments, options, policies, application procedures, and deadlines may be obtained on the R&DE Student Housing (http://studenthousing.stanford.edu) web site, by telephone at (650) 725-2810, or by email at studenthousing@stanford.edu (housingassignments@lists.stanford.edu). Current and prospective students may also contact R&DE Student Housing by filing a ServiceNow (http://stanford.service-now.com/student_services/?id=sc_cat_item&sys_id=2e1c15ef13e8a74019813598d144b0f7) request. Information regarding off-campus housing may be obtained from the Community Housing (http://offcampus.stanford.edu) section of the R&DE Student Housing web site, by telephone at (650) 723-3906, or by email at communityhousing@stanford.edu. Due to COVID-19 our office at 408 Panama Mall, Suite 101, Stanford University, Stanford, CA 94305 is closed to in-person assistance.

Residential Education (http://resed.stanford.edu) (650-725-2800) and the Graduate Life Office (http://glo.stanford.edu) (650-736-7078) are responsible for residential education staff, educational programs, counseling, and crisis intervention in undergraduate and graduate housing respectively.

Housing Rates

Complete information on housing (https://rde.stanford.edu/studenthousing/housing-options/) is available on the R&DE Student Housing web site. Campus housing rates are generally below local area market rents.

- See Assignments and Contracts (https://rde.stanford.edu/studenthousing/assignments-contracts/) to learn how to apply for upperclass undergraduate, single graduate, couple without children, or student with children housing.
  - Undergraduate Housing: The R&DE Autumn Housing Allocation Website (https://rde.stanford.edu/studenthousing/2020-21TheAutumnHousingAllocation/) includes information about undergraduate housing and the 2020-21 Autumn Housing Allocation process, including rates.
  - Graduate Housing: Application information, descriptions of the graduate housing options, including rates are available at thelottery.stanford.edu (http://exploredegrees.stanford.edu/tuitionfeesandhousing/thelottery.stanford.edu).
- Rates for 2020-21 are posted online:
  - Undergraduate residence rates chart (https://rde.stanford.edu/studenthousing/undergraduate-residences-rates-chart-2018-19/)
  - Graduate residence rates chart (https://rde-stanford-edu.s3.amazonaws.com/Housing/PDF/2020-21_Grad_ResChart.pdf) (pdf)

All on-campus rates are per student and include utilities and coinless laundry. Off-campus, subsidized housing rates include utilities, but not laundry. Room rates are charged quarterly on the university bill. Information on payment options and procedures is discussed in assignment information sent out by R&DE Student Housing and in the "Payments" section of the Stanford Bulletin.

House Dues

A quarterly house dues fee for students is generally determined by the local residence staff and/or residents of each house and may be included with room and board charges on the university bill.

Technology Fee

Students who live in housing are automatically assessed a technology fee on their university bill that covers in-room network connections and a landline phone with telephone service (service provided on campus only).

Undergraduate Residences

Approximately 97 percent of undergraduates live in university housing, excepting students studying abroad during the academic year. All freshmen are required to live in on campus residences their first year and are automatically assigned housing following admission. Information on the housing assignment process is included in the R&DE Student Housing (https://undergrad.stanford.edu/advising/approaching-stanford/approaching-stanford-forms/first-year-housing-preferences/) section of Approaching Stanford (http://approaching.stanford.edu). Because freshmen must live in campus housing, losing eligibility for University housing also leads to a loss of student status until the student has returned to university housing unless an extraordinary exemption is granted from the Office of the Vice Provost for Undergraduate Education.

Residence assignments for continuing undergraduates are made on the basis of an annual lottery, called the Draw, and quarterly assignment rounds. Undergraduates are guaranteed four years of University housing (three years for transfer students) if:

1. they are in compliance with the university housing agreement and university policies,
2. they apply by the appropriate deadlines, and
3. they are willing to live anywhere on campus.

Undergraduate residences include traditional residence halls, language and culture theme houses, cross-cultural theme houses, student-managed and cooperative houses, apartments, suites, fraternities, and sororities.

Graduate Residences

Approximately 66 percent of matriculated graduate students live in housing provided by R&DE Student Housing, both on campus and off campus. Residence assignments are made on the basis of an annual lottery and quarterly assignment rounds. New matriculated students are guaranteed university housing for their first year of study if:

1. they are in compliance with the university housing agreement and university policies,

2. they apply by the first round application deadline for the autumn term, and
3. they are willing to live in any residence for which they are eligible

At Stanford University, new matriculated students are students who are in a graduate program for the first time. Students starting a second graduate degree are not considered new students and therefore are not guaranteed housing.

Coterminal students who opt to live on campus are required to live in undergraduate housing for the duration of their four years of guaranteed undergraduate housing regardless of their student status. Once these four years have been used, students can apply in the annual spring Lottery for graduate housing, where they apply with a low priority. Coterminal students are not guaranteed housing and are assigned after new first-year graduate students who are guaranteed housing and continuing students with remaining priority years.

Academic-year assignment priorities for graduate students are detailed on the Assignment Guarantee and Priorities (https://rde.stanford.edu/studenthousing/assignment-guarantee-and-priorities/) page of the R&DE Student Housing web site. Priorities are dependent upon degree level and number of years each student has already lived in housing.

Single graduate students may request assignment to furnished graduate apartments in a variety of configurations.

- Studios (private living/bedroom area, bath and kitchen)
- Shared premium two- and four-bedroom apartments (private bedroom and bath, shared kitchen and living/dining room)
- Shared standard two-, three- and four-bedroom apartments (private bedroom, shared bath, kitchen and living/dining room)
- Shared junior two-bedroom, two bath apartments (private bedroom and bath, shared eat-in kitchen, no living room)
- Shared junior two-bedroom, one bath apartments (private bedroom, shared bath, eat-in kitchen, no living room)

Couples housing is available to students who are married and to students who have a same-sex or opposite-sex domestic partner who is living with them at least 50% of each week. At Stanford University, a domestic partnership is defined as an established, long-term romantic partnership with an exclusive mutual commitment in which the partners share the necessities of life and ongoing responsibility for their common welfare. Couples without children may request assignment to a variety of furnished configurations.

- One-bedroom apartments (private bedroom, small den, kitchen and living/dining room)
- One-bedroom apartments with den (private bedroom and bath, small den, kitchen and living/dining room) - only a limited number available for two-student couples
- Two-bedroom apartments (private bedroom and bath, study room, kitchen and living /dining room) - only a limited number available for two-student couples
- Premium two bedroom, two bath apartments (private bedroom, two-baths, study room, kitchen and living /dining room)
- Premium studios (private living/bedroom area, bath and kitchen)
- Standard studios (smaller private living/bedroom area, bath and kitchen)

Housing for students with children is available to married couples, domestic partners, and single parents who have dependent children living with them at least 50% of each week. Housing is not provided for extended families. Parents/siblings of students and live-in day care staff are not permitted to live in university housing. Furnished apartments are available for students with children, based on the number of dependents.

- Two-bedroom apartments (two bedrooms, one bath, kitchen and living /dining room)
- Three-bedroom apartments (three bedrooms, one bath, kitchen and living /dining room)
- Four-bedroom apartments (four bedrooms, one bath, kitchen and living /dining room)

Community Housing

Community Housing provides resources to assist students in locating private rooms, houses, and apartments available for rent in surrounding communities. Students must make rental arrangements directly with landlords. An online listing service (https://rde.stanford.edu/studenthousing/housing-listings/) facilitates the process of making connections. Information on community housing may be obtained from the Community Housing (http://offcampus.stanford.edu) web site, by telephone at (650) 723-3906, or by email at communityhousing@stanford.edu. Due to COVID-19 our office at 408 Panama Mall, Suite 101, Stanford University, Stanford, CA 94305 is closed to in-person assistance.

Note that Stanford University does not investigate, endorse, or guarantee the accuracy of the information provided by any listing, or the condition of the accommodation. Furthermore, the University assumes no responsibility for housing arrangements made by persons using any of these services.

Meal Plans

For information on meal plans, see the meal plan rate page (https://rde.stanford.edu/dining/mealplans/) on the R&DE Stanford Dining website (http://dining.stanford.edu/).

Stanford University's Residential Education program promotes the philosophy that living and learning are integrated and that formal teaching, informal learning, and personal support in residences are integral to a Stanford education. Meals play a key role in this mission of community building, leading, and learning. Therefore, residents of designated university residence halls (Branner, Crothers/Crothers Memorial, Florence Moore, Gerhard Casper, Lakeside, Ricker, Stern, Toyon, Wilbur, Yost, Murray, and EAST) are required to participate in an R&DE Stanford Dining Meal Plan. R&DE Stanford Dining is "Committed to Excellence" by providing meal plans that offer significant value, the highest quality, and most flexibility of dining across campus, along with a daily variety of delicious, nutritious options including vegetarian (https://rde.stanford.edu/dining/vegetarian-vegan-dining/), vegan (https://rde.stanford.edu/dining/vegetarian-vegan-dining/), nut-free (https://rde.stanford.edu/dining/ricker-dining/), kosher (https://rde.stanford.edu/dining/kosher-dining-program-florence-moore/), and halal (https://rde.stanford.edu/dining/halal-options/). The Food Allergies @Stanford (https://rde.stanford.edu/dining/food-allergies/) program offers support and dining accommodations to students with food allergies or other dietary concerns. During Spring Break, to accommodate those staying on campus, Arrillaga Family Dining Commons is open for student meals.

All freshmen and upperclass students living in the above houses can choose an R&DE voluntary meal plan which offers expanded flexibility and numerous options for on campus use. Residents of Yost, Murray, and EAST have a dedicated row meal plan. Students assigned to the Governor's Corner Suites and the remaining row houses are required to purchase either a Dining Societies meal plan (Suites), or a house meal plan (managed through their self-operated or co-op row house staff).

Students are allowed to switch meal plans up until the last two weeks of the quarter. Meal plans are billed on a quarterly basis, and the cost is determined by the number of service days in each quarter. Cardinal Dollars do not expire and carry over from year to year as long as you are enrolled as a student. The remaining Meal Plan Dollar balance carries over at the end of each quarter and can be used throughout the academic

year as long as the student is enrolled in a meal plan. All Meal Plan Dollars expire at the end of Summer Quarter. Meal Plan Dollars provided per quarter as part of the Ultimate Flex, Premier Flex, Cardinal Select and Cardinal Light plans vary depending on the number of days in each quarter.

Meal Plans

Undergraduate students living in Branner, Crothers/Crothers Memorial, Florence Moore, Gerhard Casper, Lakeside, Ricker, Stern, Toyon, and Wilbur are required to be at a minimum on one of the Cardinal mandatory meal plans (Classic, Select and Light), but can choose to switch meal plans at any time, until the last two weeks of each quarter.

Cardinal Classic

- 19 meals per week served only in the dining halls
- 5 guest meals per quarter
- During home football games, a meal swipe can be used at the Stanford Stadium

Cardinal Select

- 14 meals per week plus 420 Meal Plan Dollars and 5 guest meals per quarter
- All 14 meals are served in the dining halls
- Meal Plan Dollars can be used in the dining halls, most R&DE cafés, Munger Market and late night venues
- During home football games, a meal swipe can be used at the Stanford Stadium
- The default meal plan for freshmen and upperclass students not living in Yost, Murray or EAST

Cardinal Light

- 10 meals per week plus 750 Meal Plan Dollars and 5 guest meals per quarter
- All 10 meals are served in the dining halls and the Meal Plan Dollars can be used in the dining halls, most R&DE cafés and late night venues
- During home football games, a meal swipe can be used at the Stanford Stadium
- This meal plan is only available for upperclass students.

Row House

Students living in Yost, Murray, or EAST are required to be on the Row House mandatory undergrad meal plan: 12 meals per week plus 345 meal plan and open kitchen dollars.

- 10 meals are served at the row house
- 2 meals can be eaten at any dining hall
- Meal Plan Dollars can be used in the dining halls, most R&DE cafés and late night venues
- Open kitchen funds are available for additional meals in the row house when meals are not being served
- During home football games, a meal swipe can be used at the Stanford Stadium

Payments

By accepting Stanford's offer of admission and enrolling in classes, each student accepts responsibility for paying all debts to the University, including tuition and fees, for which he or she is liable. An individual's registration as a Stanford student constitutes his or her agreement to make timely payment of all amounts due.

University Bill

Charges and credits from offices within the University are aggregated in a student's individual account and presented on the University bill (https://sfs.stanford.edu/student-accounts/pay-your-bill/understanding-your-student-account/). Student Financial Services publishes the University bill electronically to students monthly via Stanford ePay.

Authorized Payers

Students may designate 'Authorized Payers' via Stanford ePay to allow others to view the student account and make payment. Students and Authorized Payers may view the student account online 24 hours a day, seven days a week, via Stanford ePay (https://sfs.stanford.edu/student-accounts/pay-your-bill/). Payments should be made online through Stanford ePay. If necessary, the student or Authorized Payer may print a bill or receipt from Stanford ePay.

Due Dates and Unit Adjustments

A list of payment due dates throughout the academic year is available on the Student Financial Services website (https://sfs.stanford.edu/student-accounts/pay-your-bill/dates-and-deadlines/). To avoid late payment penalties, online payments via Stanford ePay can be made up to midnight PST on the 15th of the month; mailed payments must be received by 5:00 p.m. on the 15th of the month.

After the start of the term, adding units may result in additional tuition charges. Other fees, such as room damage repair charges, petition fees, late fees, lab fees, library fees, and other miscellaneous fees or charges are due on the 15th of the month after which they are billed.

Forms of Payment

Stanford's standard method of payment is the online service, Stanford ePay, which includes electronic check (eCheck) and foreign currency payment options. Stanford ePay foreign currency payment options offer students favorable exchange rates and eliminate bank fees typically charged for wire transfer. No fee is associated with ePay payments.

Alternatively, payers may use their personal online banking portal with any U.S. bank to pay the University bill. Stanford does not accept cash, credit cards or postdated checks for payments to the University bill.

Stanford offers an installment payment plan for undergraduates.

See Prepayment Installment Plan (https://sfs.stanford.edu/student-accounts/pay-your-bill/installment-payment-plan/) for information.

See University Bill Payment Methods (https://sfs.stanford.edu/student-accounts/pay-your-bill/methods-payment/) for information.

Credit Balances

Stanford uses Direct Deposit to refund credit balances to students. See the Direct Deposit enrollment instructions (https://sfs.stanford.edu/student-accounts/refunds/direct-deposit/) web site. Students are expected to enroll in Direct Deposit at the beginning of their Stanford career or as soon as possible thereafter. Direct Deposits reach the bank within 24-48 hours of processing. Receipt of funds will not be delayed by mail time, lost checks, or the need to go to the bank as is the case with paper checks.

Generally credit balances resulting from financial aid are refunded multiple times weekly. Credit balances resulting from an overpayment of cash (e.g. ePayment, check) remain on the student account to be applied to future charges. A refund of a cash overpayment may be provided at any time upon student request. Annually, in August, Student Financial Services will refund any remaining overpayment of cash to students who have graduated or otherwise discontinued their career at Stanford.

Account Fees and Actions

Late Payment Fees

The University must receive the full amount due on or before the due date indicated on the bill. If full payment is not received by the due date, a late fee of 1% of the amount past due may be assessed. Anticipated aid (aid

that has been accepted but not disbursed and is shown on the student account) reduces the total amount due prior to late fees being applied.

Holds

Accounts that become past due more than 30 days are subject to financial holds. Among other things, a financial hold blocks transcripts, diplomas, and enrollment eligibility.

Insufficient Funds

A non-refundable $25.00 administrative fee may be assessed for checks or eCheck payments returned due to insufficient funds. In addition, student accounts are subject to holds, and late payment penalties may apply.

Delinquent Accounts

Delinquent accounts may be reported to one or more of the national credit reporting agencies. Severely delinquent accounts may be referred to a collection agency and/or placed in litigation in accordance with state and federal laws. Students with delinquent accounts may be held responsible for collection costs, attorney fees, and court costs. Stanford may consider past delinquent accounts in determining whether to provide Stanford loans.

Refunds

Students who withdraw from the University before the end of a term may be eligible to receive refunds of portions of their tuition under certain limited circumstances.

See the Registrar's Tuition Refunds page for a schedule of refunds (https://registrar.stanford.edu/tuition-refund-schedule/).

Annulled Registration

Students who take a leave of absence or summer annulment from the University voluntarily before the first day of instruction may have their registrations annulled. Tuition is refunded in full if the student never attended. Such students are not included in University records as having registered for the term and new students do not secure any privileges for admission for any subsequent quarter as returning students. A leave of absence or summer annulment does not automatically cancel health coverage (both Cardinal Care and the Campus Health Services Fee) unless the leave of absence or summer annulment is granted before the first day of instruction. Financial aid recipients should be aware that a proportion of any refund is returned to the various sources of aid.

Cancellation of Registration or Suspension

Students who have their registrations canceled or are suspended from the University generally receive refunds on the same basis as those receiving leaves of absence unless otherwise specified. A student whose registration is canceled less than one week after the first day of instruction for an offense committed during a preceding quarter receives a full refund of tuition fees.

Institutional Interruption of Instruction

It is the University's intention to avoid the necessity of taking the actions described in this paragraph. However, should the University determine that continuation of some or all academic and other campus activities is illegal, impracticable, and/or in the reasonable judgment of the University, their continuation involves a significant threat of harm to persons or property, activities may be curtailed and students and others requested or required to leave the campus. In such an event, arrangements are made as soon as practical to offer students the opportunity to complete their courses, or substantially equivalent work, so that appropriate credit may be given. Alternatively, the University in its discretion may determine that students receive refunds on the same basis as those receiving leaves of absence, or on some other appropriate basis.

Leaves of Absence

A student in good standing who desires or is required to take a leave of absence from the University after the first day of instruction, but before the end of the first 60 percent of the quarter (term withdrawal deadline), may file a petition for a leave of absence and tuition refund. Graduate students submit the completed leave of absence form to the Student Services Center (http://studentservicescenter.stanford.edu/). Undergraduates who wish to withdraw from the current quarter, or from a quarter for which they have registered in advance and do not wish to attend, must file a Leave of Absence Petition (https://stanford.box.com/v/leaveofabsence/) with and receive approval from the office of the Vice Provost for Undergraduate Education, via the office of Undergraduate Advising and Research (UAR), Sweet Hall. A voluntary leave of absence after the first 60 percent of the quarter (term withdrawal deadline) is only granted for approved health and emergency reasons. For more information on leaves of absence, undergraduates should see the "Leaves of Absence and Reinstatement (Undergraduate) (p. 42)" section of this bulletin, and graduate students should see the "Leaves of Absence (Graduate) (p. 74)" section of this bulletin.

Room and Meal Plan Refunds

Students assigned to a University residence are subject to the terms of the University Residence Agreement, and are required to live in University Housing for the full duration of their signed contract. The text of the University Residence Agreement is available at the Residence Agreement (http://www.stanford.edu/dept/rde/shs/res_agree.htm) web site.

Room refunds are made only when students move out of the residence system and graduate from or cease to be enrolled at the University. Eligibility for refunds is listed in the Residence Agreement. Termination of Occupancy is filed in Axess. Filing a termination of occupancy form and moving out of Student Housing does not necessarily entitle a student to a refund. Students in greek letter houses are billed directly by the fraternity or sorority, and refunds are arranged between the student and the fraternity or sorority.

A meal plan refund is based on the date when a student moves out of University residence and is approved under conditions as specified in the Residence Agreement. If a student uses the meal plan after that date, an additional daily charge incurs.

Any decision to refund prepaid room and meal plan charges or to waive liability for deferred charges is made at the sole discretion of the University. Students with questions about refunds should contact Housing Assignments for room refunds or the central office of Stanford Dining for residential meal plan refunds.

UNDERGRADUATE DEGREES AND PROGRAMS

Degree Requirements

A Liberal Education

As do all major universities, Stanford provides the means for its undergraduates to acquire a liberal education, an education that broadens the student's knowledge and awareness in each of the major areas of human knowledge, that significantly deepens understanding of one or two of these areas, and that prepares him or her for a lifetime of continual learning and application of knowledge to career and personal life.

The undergraduate curriculum at Stanford allows considerable flexibility. It permits each student to plan an individual program of study that takes into account personal educational goals consistent with particular interests, prior experience, and future aims. All programs of study should achieve some balance between depth of knowledge acquired in specialization and breadth of knowledge acquired through exploration. Guidance as to the limits within which that balance ought to be struck is provided by the University's General Education Requirements and by the requirements set for major fields of study.

These educational goals are achieved through study in individual courses that bring together groups of students examining a topic or subject under the supervision of scholars. Courses are assigned credit units. To earn a bachelor's degree, the student must complete at least 180 allowable units and, in so doing, also complete the Writing Requirement, the Ways of Thinking, Ways of Doing (Ways) Requirement, the Language Requirement, and the requirements of a major.

The purpose of the Writing Requirement is to promote effective communication by ensuring that every undergraduate can write clear and effective English prose. Words are the vehicles for thought, and clear thinking requires facility in writing and speech.

The Language Requirement ensures that every student gains a basic familiarity with a foreign language. Foreign language study extends the student's range of knowledge and expression in significant ways, providing access to materials and cultures that otherwise would be out of reach.

The Ways Requirement provides guidance toward the attainment of breadth and stipulates that a significant share of a student's work must lie outside an area of specialization. These requirements ensure that every student is exposed to different ideas and different ways of thinking. They enable the student to approach and to understand the important ways of knowing how to assess their strengths and limitations, their uniqueness, and, no less important, what they have in common with others.

Depth, the intensive study of one subject or area, is provided through specialization in a major field. The major relates more specifically to a student's personal goals and interests than do the general requirements outlined above. Stanford's curriculum provides a wide range of standard majors through its discipline-oriented departments, a number of interdisciplinary majors in addition to department offerings, and the opportunity for students to design their own major programs.

Elective courses, which are not taken to satisfy requirements, play a special role in tailoring the student's program to individual needs. For most students, such courses form a large portion of the work offered for a degree. Within the limitations of requirements, students may freely choose any course for which previous studies have prepared them.

This section provides more detailed descriptions of these various requirements and the rationales upon which they are based.

Bachelor of Arts (B.A.), Bachelor of Science (B.S.)

Stanford University confers the degree of Bachelor of Arts (B.A.) or the degree of Bachelor of Science (B.S.) on those candidates who have been recommended by the Committee on Undergraduate Standards and Policy (C-USP), who have applied in advance for conferral of the degree, and who have fulfilled the following requirements:

1. A minimum of 180 units of allowable University work. (Units above the allowable limits for activity courses and for courses taken on a satisfactory/no credit and credit/no credit basis cannot be counted towards the 180-unit minimum.)
2. The Writing, General Education, and Language Requirements.
3. Curricular requirements of at least one major department or program and the recommendation of the department(s). (Descriptions of curricular and special degree requirements are included in each department's section of this bulletin.)
4. Students admitted as freshmen—A minimum of 135 units (including the last quarter in residence) at Stanford. In special cases, students who have earned at least 135 units in resident work may petition for a waiver of the last quarter-in-residence requirement for up to 15 units through the Last Units Out of Residence (https://stanford.app.box.com/v/last-units-out-of-residence/) petition.
5. Students admitted as transfers—A minimum of 90 units (including the last quarter in residence) at Stanford. In special cases, students who have earned at least 90 units in resident work may petition for a waiver of the last quarter-in-residence requirement for up to 15 units through the Last Units Out of Residence (https://stanford.app.box.com/v/last-units-out-of-residence/) petition.

Stanford confers the Bachelor of Science degree on candidates who fulfill these requirements in the School of Earth, Energy & Environmental Sciences, in the School of Engineering, or in the departments of Applied Physics, Biology, Chemistry, Human Biology, Mathematics, or Physics in the School of Humanities and Sciences. The University also awards B.S. degrees to candidates in the Program in Science, Technology, and Society; in the Program in Mathematical and Computational Science; in the Program in Symbolic Systems; and, when appropriate, in the Program for Individually Designed Majors. Candidates who fulfill these requirements in other schools or departments receive the Bachelor of Arts degree. For degree programs that offer both the B.A. and B.S. degrees in the same discipline, students cannot pursue both degree options and must select either the B.A. or B.S. degree.

Students who complete the requirements for two or more majors, which ordinarily would lead to the same degree (B.A. or B.S.), should review "The Major" section of this bulletin to ensure that they have an understanding of the requirements for multiple or secondary majors.

Bachelor of Arts and Science (B.A.S.)

The University confers the degree of Bachelor of Arts and Science (B.A.S.) on candidates who have completed the following:

1. with no overlapping courses, the curricular requirements of two majors which ordinarily would lead to different bachelor's degrees (that is, a Bachelor of Arts degree and a Bachelor of Science).
2. These students must have applied in advance for graduation with the B.A.S. degree instead of the B.A. or B.S. degree, as recommended by the Committee on Undergraduate Standards and Policy (C-USP),
3. Fulfilled a minimum of 180 units of University work described in point 1 of the "Bachelor of Arts (B.A.), Bachelor of Science (B.S.)" section.

4. The requirements of each major without applying any course towards the requirements of more than one major, according to "Multiple Majors" section of this bulletin. The Major-Minor and Multiple Major Course Approval Form (https://stanford.app.box.com/v/majmin-multmaj/) is required for graduation for students with the B.A.S degree.
5. The Writing, General Education, and Language requirements.
6. Students admitted as freshmen—A minimum of 180 units (including the last quarter in residence) at Stanford. In special cases, students who have earned at least 180 units in resident work may petition for a waiver of the last quarter-in-residence requirement for up to 15 units.
7. Students admitted as transfers—A minimum of 135 units (including the last quarter in residence) at Stanford. In special cases, students who have earned at least 135 units in resident work may petition for a waiver of the last quarter-in-residence requirement.

Students who cannot meet the requirements for both majors without overlapping courses are not eligible for the B.A.S., but may apply to have a secondary major recorded on their transcripts. (See "The Major" in the "Undergraduate Degrees and Programs" section of this bulletin.)

Dual Bachelor's Degrees (Concurrent B.A. and B.S.)

A Stanford undergraduate may work concurrently toward both a B.A. and a B.S. degree. To qualify for both degrees, a student must complete:

1. A minimum of 225 units of University work. Units above the allowable limits for activity courses and for courses taken on a satisfactory/no credit and credit/no credit basis cannot be counted towards the 225 unit minimum.
2. The requirements of each major without applying any course towards the requirements of more than one major, according to "Multiple Majors" section of this bulletin. The Major-Minor and Multiple Major Course Approval Form (https://stanford.app.box.com/v/majmin-multmaj/) is required for graduation for students with dual degrees.
3. The Writing, General Education, and Language requirements.
4. The curricular requirements of two majors (one of which leads to a Bachelor of Arts degree and the other to a Bachelor of Science degree).
5. Students admitted as freshmen—A minimum of 180 units (including the last quarter in residence) at Stanford. In special cases, students who have earned at least 180 units in resident work may petition for a waiver of the last quarter-in-residence requirement for up to 15 units.
6. Students admitted as transfers—A minimum of 135 units (including the last quarter in residence) at Stanford. In special cases, students who have earned at least 135 units in resident work may petition for a waiver of the last quarter-in-residence requirement.

A student interested in dual bachelor's degrees should declare them in Axess no later than two quarters in advance of completing the program.

Students who do not meet the higher unit and residence requirements of the dual degree option may be eligible instead for the B.A.S. degree as described above.

Second Bachelor's Degree

Stanford does not award a second Bachelor of Arts (B.A.) degree to an individual who already holds a Bachelor of Arts, nor a Bachelor of Science (B.S.) degree to an individual who already holds a Bachelor of Science degree. Nor does Stanford award a Bachelor of Arts and Sciences degree to the holder of either a B.A. or B.S.

However, the holder of a Bachelor of Arts degree from Stanford may apply to the C-USP Subcommittee on Academic Progress for admission to candidacy for a Bachelor of Science degree, and the holder of a Bachelor of Science degree from Stanford may apply for candidacy for a Bachelor of Arts degree. A recommendation of the major department for the second bachelor's degree must accompany the application. Generally, a holder of a B.A. or B.S. degree from Stanford may not apply for the Bachelor of Arts and Sciences degree, although a student may submit a petition for exception. The C-USP Subcommittee on Academic Progress determines whether the application for a second degree may be approved and/or the conditions a student must meet in order to be allowed to earn a second degree. The office of the Vice Provost for Undergraduate Education, via the office of Academic Advising, Sweet Hall, reviews these petitions. A student approved for this program may register as an undergraduate and is subject to the current rules and regulations affecting undergraduates. Requirements for a second Stanford bachelor's degree are the same as those described above for dual bachelor's degrees.

Approvals or denials of applications under this section are in the discretion of the University.

Finally, Second Bachelor's Degree pertains only to students who earned their bachelor's degree from Stanford, and does not apply to those who have earned their bachelor's degree elsewhere. Requests by such individuals for a second bachelor's degree at Stanford are not accepted.

Coterminal Bachelor's and Master's Degrees

See the "Coterminal Degrees (p. 56)" section of this Bulletin.

The Major

The primary purpose of the major is to encourage each student to explore a subject area in considerable depth. This in-depth study complements the breadth of study promoted by the General Education Requirements and, in many cases, by a student's choice of electives. Work in depth permits practice in critical analysis and the solving of problems. Because of its depth, such study also provides a sense of how knowledge grows and is shaped by time and circumstances.

The structure of a major should be a coherent reflection of the logic of the discipline it represents. Ideally, the student should be introduced to the subject area through a course providing a general overview, and upper-division courses should build upon lower-division courses. The course of study should, if feasible, give the student the opportunity and responsibility of doing original, creative work in the major subject. Benefits of the major program are greatest when it includes a culminating and synthesizing experience such as a senior seminar, an undergraduate thesis, or a senior project.

Degree Requirements

Undergraduates must select a major by the end of their sophomore year. All undergraduate major programs listed in this bulletin, except for certain honors degree programs that require application and admission in advance, are open to all students. Students may use Axess to declare, drop, or change a major. In some departments or programs, though, a late change could easily result in extending the period of undergraduate study. Students who have applied to graduate or who wish to declare an individually designed major must use the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program (https://stanford.app.box.com/v/change-ug-program/) to select or change a major. Students requiring assistance should contact the Student Services Center (https://studentservicescenter.stanford.edu/). For academic advising regarding majors, students should consult Academic Advising (http://undergrad.stanford.edu/).

Check individual department or program listings in this bulletin for the undergraduate degrees offered and for specific major requirements. If an

area of study has no baccalaureate degree, that discipline is not available as a regular undergraduate major.

Faculty set the minimum requirements for the major in each department. These requirements usually allow latitude for tailoring a major program to a student's specific educational goals. The responsibility for developing a major program within department or program requirements lies ultimately with the individual student working in consultation with the major adviser.

Limits of the Major

In order to achieve the values of study in depth, a well-structured major should constitute at least one-third of a student's program (55-65 units). To ensure the values of breadth, a major should comprise no more than two-thirds of a student's program (115-125 units); and, to avoid intellectual parochialism, a major program should not require a student to take more than about one-third of his or her courses from within a single department.

Major requirements in cognate subjects essential to the structure of a given major should be counted as part of the major program in applying these guidelines. Department or school requirements designed to provide extra disciplinary breadth should not be counted.

For a limited number of qualified students, many departments and programs offer special programs leading to degrees with honors. A student may apply to the major department or program for acceptance into the honors program. Demands on the student may vary, but all honors programs encourage creative, independent work at an advanced level in addition to the major requirements.

The guidelines set forth here are deliberately general; implementation must take into account the specific needs of a student's program and the nature of the discipline or disciplines involved. The exercise of responsibility in achieving the desired educational balance belongs first with the student, who, after all, has the strongest interest in the value of his or her education. It belongs secondarily to departments and major programs, which must set the requirements of competence in the many majors offered.

Multiple Majors

Although most students declare only one major, a student may formally declare more than one major within a single bachelor's degree (B.A., B.S., or B.A.S.) program. The student may do that either at the time of initial major declaration or, as may be more advisable given the planning required to complete more than one major, by amending the original declaration. The student's major departments or programs have access routinely to all information pertinent to that student's academic record (for example, course and grade information), and each is expected to provide advising and other assistance. To be awarded a bachelor's degree with multiple majors, the student must fulfill the following requirements:

1. Formally declare all majors through Axess to the Office of the University Registrar.
2. Satisfy the requirements of each major without applying any course towards the requirements of more than one major or any minor unless:
   a. overlapping courses constitute introductory skill requirements (for example, introductory math or a foreign language);
   b. overlapping courses enable the student to meet school requirements (for example, for two majors within the School of Engineering). Currently, only the School of Engineering has school requirements for its undergraduate majors.
3. Submit the Major-Minor and Multiple Major Course Approval Form (https://stanford.box.com/MajMin-MultMaj/) by the Final Study List deadline of the quarter of intended graduation. The form is required for graduation for students with multiple majors or a minor and should be submitted to the Student Services Center (https://studentservicescenter.stanford.edu/).

Students pursuing multiple majors must complete a multiple major program form indicating which courses they plan to apply toward each major and any minor(s). Departments must certify that the plan of study meets all requirements for the majors and any minor(s) without unallowable overlaps in course work; the School of Engineering Dean's office certifies this information in any case involving an Engineering major or minor. To facilitate advance planning, multiple major program forms are available at any time from the Registrar's forms web site (https://registrar.stanford.edu/resources-and-help/forms/).

If the pursuit of multiple majors (or joint majors or secondary majors, or minors) unduly delays an undergraduate's progress through Stanford, the University reserves the right to limit a student to a single major, and/or to confer a degree on a student who has completed all of the requirements for a degree even though the student has not applied to graduate; such an individual would then be subject to the University's usual rules and restrictions regarding future enrollment or registration.

When students cannot meet the requirements of multiple majors without overlaps, the secondary major (http://exploredegrees.stanford.edu/undergraduatedegreesandprograms/#themajortext), may be relevant.

Secondary Major

In some cases, students may complete course requirements for more than one major, but they may not meet the requirements outlined for the multiple major option. For example, the student may develop a course plan in which courses requisite for one major overlap with requirements for another. In these cases, the student may declare a secondary major which results in the transcript bearing an annotation that the course requirements for that major have also been met. Secondary majors are not listed on the diploma. Students declare secondary majors through the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program . (https://stanford.box.com/change-UG-program/)

Joint Major Program

A joint major differs from a multiple major in that 1-2 fewer optional courses are required for each major, while an integrative senior capstone experience is required for all students in the program. Fourteen joint major programs were approved for a six-year pilot beginning in Autumn Quarter, 2014-15. See the "Joint Major (p. 33)" section of this bulletin for details.

Foreign Language Proficiency

The notation "proficiency in (language)" appears on the official transcripts of those students whose levels of achievement are found by procedures established by the Language Center to be roughly equivalent to knowledge an excellent student can be expected to demonstrate late in the third quarter of the third year of study in that language.

The Joint Major Program (JMP)

The University has offered a joint major program (JMP) aimed at integrating the Humanities and Computer Science while providing students with unique educational experiences. This experimental program was approved by the Academic Senate for a six-year pilot, which began in Autumn Quarter 2014-15. Based upon continuing assessment, including feedback from students and faculty, the pilot was discontinued at the end of the academic year 2018-19.

All students with declared joint majors will be permitted to complete their degree; faculty and departments are committed to providing the necessary advising support. Students wishing to declare a joint major may do so until June 18, 2019. After that date, no new joint major declarations will be approved.

Joint major programs leads to conferral of a B.A.S. (Bachelor of Arts and Sciences), and are distinct from multiple degrees in which a student may formally declare more than one major within a single bachelor's degree (B.A., B.S., or B.A.S.) program.

The following 14 programs were approved (each major is linked to the department's bulletin site with specific information for that major):

- Computer Science (p. 714) and Art Practice (p.)
- Computer Science (p. 714) and Classics (p.)
- Computer Science (p. 714) and Comparative Literature (p. 1203)
- Computer Science (p. 714) and English (p.)
- Computer Science (p. 714) and French (p.)
- Computer Science (p. 714) and German Studies (p.)
- Computer Science (p. 714) and History (p. 1558)
- Computer Science (p. 714) and Iberian and Latin American Cultures (p. 1650)
- Computer Science (p. 714) and Italian (p.)
- Computer Science (p. 714) and Linguistics (p. 1773)
- Computer Science (p. 714) and Music (p. 1826)
- Computer Science (p. 714) and Philosophy (p. 1867)
- Computer Science (p. 714) and Slavic Languages and Literatures (p.)
- Computer Science (p. 714) and Spanish (p. 1650)

Only a limited number of joint majors were approved by the Academic Senate. Assessment of the joint major program continued throughout the duration of the six-year pilot; based upon that assessment, the decision was made to terminate the program at the end of 2018-19. As above, students in the program will be permitted to complete the program, and students may still declare the program through June 18, 2019. The School of Humanities and Sciences limited participation in the pilot to Humanities departments that wished to propose a joint major with Computer Science. Only approved joint majors as listed in this bulletin are available. Other combinations of majors may be taken as a multiple major, but are not part of the joint major program with its special rules and requirements.

Requirements for Joint Majors

Typically a student in a joint major program will have an adviser in each major.

Graduation with a joint major requires the completion of a minimum of 180 units, of which at least 135 must be completed at Stanford. The specific number of units required for each major is specific to that major. It is not possible to give a single absolute number of units that a student might require in order to graduate with a joint major.

A student who declares a joint major completes the degree requirements for each of the majors. However, each of the majors in a joint major program typically requires 1-2 fewer optional courses; see the "Joint Major" sections of the respective departments for details. This course reduction in the joint major program differs from a multiple major in which all courses in both majors must be completed.

Because the joint major programs are designed to allow a student to pursue a course of study leading to mastery in two fields by blending the intellectual traditions of two Stanford departments, students in a joint major program take a senior capstone experience such as a course or project that is integrative in nature. Although the integrative capstone experience may fulfill the requirement for a capstone experience for both majors, the units may only be counted toward the required total units in one of the majors.

It is possible, with approval of both departments, to use one course to fulfill a requirement for each major in a joint major program. University policy prohibits double counting of courses in multiple programs except in specific cases such as introductory skill requirements or overlapping courses that enable a student to meet University requirements such as GERs. Therefore, when a single course fulfills requirements in both majors, a student may apply the units associated with the course to the total units requirement of only one of the majors and then must work with the other major to identify another course that would benefit the academic plan and whose associated units may be applied to that major's total units requirement.

Dropping a Joint Major Program

To drop the joint major, students must submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program (https://stanford.box.com/change-UG-program/). Students may also consult the Student Services Center (http://studentservicescenter.stanford.edu/) with questions concerning dropping the joint major.

Transcript and Diploma

Students completing a joint major graduate with a B.A.S. degree. The two majors are identified on one diploma separated by a hyphen. There will be a notation indicating that the student has completed a "Joint Major." The two majors are identified on the transcript with a notation indicating that the student has completed a "Joint Major."

Undergraduate Minor

Students completing a bachelor's degree may elect to complete one or more minors in addition to the major. Minors must be officially declared by students no later than the deadline for their application(s) to graduate, according to declaration procedures developed and monitored by the Registrar. Earlier deadlines for declaration of the minor may be set by the offering school or department. Satisfactory completion of declared minors is noted on the student's transcript after degree conferral.

A minor is a coherent program of study defined by the department or degree program. It may be a limited version of a major concentration or a specialized subset of a field. A minor consists of no fewer than six courses of 3 or more units to a maximum of 36 units of letter-graded work, except where letter grades are not offered. Departments and degree programs establish the structure and requirements of each minor in accordance with the policy above and within specific guidelines developed by the deans of schools. Programs which do not offer undergraduate degrees may also make proposals to their cognizant deans to establish a minor. Requirements for each minor are described in the individual department or program listings in this bulletin.

Students may not overlap (double-count) courses for completing major and minor requirements, unless:

1. Overlapping courses constitute introductory skill requirements (for example, introductory math or a foreign language), such that the introductory course acts a prerequisite for further mastery in the subject, the introductory course is broadly accessible and does not require a prerequisite for enrollment; or
2. Overlapping courses enable the student to meet school requirements. However, courses used for the major and/or the minor depth/core must not be duplicated within any other of the student's degree programs (for example, for a major within the School of Engineering and a minor within or outside of the School of Engineering). Currently, only the School of Engineering has school requirements for its undergraduate majors.

Undergraduates use Axess to declare or drop a minor. The Major-Minor and Multiple Major Course Approval eForm (available in the eForms portal in the Student tab in Axess) is required for graduation for students with a minor. The form should be submitted electronically to the Student

Services Center (https://studentservicescenter.stanford.edu/) by the final study list deadline of the quarter of intended graduation.

Students with questions about declaring minors or double-counting courses towards combinations of majors and/or minors should consult with the departments or programs involved or the Student Services Center. For academic advising regarding minors, students should consult undergraduate Academic Advising (https://undergrad.stanford.edu/)).

Baccalaureate Honors

With Distinction

In recognition of high scholastic attainment, the University, upon recommendation of a major department or program, awards the Bachelor's Degree with Distinction. Distinction is awarded to 15% of the graduating class based on cumulative grade point averages. GPA for Distinction purposes is calculated through Winter Quarter for each graduating class. Distinction is awarded at the end of the Spring Quarter for graduates of the Spring Quarter and prior Summer, Autumn, Winter quarters. Students are notified of Distinction on their diploma. Students who are granted Distinction, and have already received their diploma in a prior quarter, will be mailed an updated diploma. The Distinction notation will show on official transcripts after Spring Commencement.

Students are also urged to consider the departmental honors programs that may give depth to their major study and to consider, as well, how the interdisciplinary honors programs might contribute to the quality of their undergraduate education.

Departmental Honors Programs

In recognition of successful completion of special advanced work, departments may recommend their students for honors in the major. Departmental honors programs demand independent creative work at an advanced level in addition to major requirements. If approved for departmental honors, the student should declare the Honors degree through Axess.

Interdisciplinary Honors Programs

In recognition of successful completion of honors program requirements, the following interdisciplinary programs can recommend students majoring in any field for honors in their program:

- Arts (https://arts.stanford.edu/for-students/academics/capstone-in-the-arts/)
- Comparative Studies in Race and Ethnicity (http://csre.stanford.edu/honors.php)
- Democracy, Development, and the Rule of Law (http://cddrl.stanford.edu/fellowships/cddrl_undergraduate_honors_program/) (CDDRL)
- Education (https://ed.stanford.edu/academics/undergraduate/honors/)
- Ethics in Society (https://ethicsinsociety.stanford.edu/undergraduate-ethics/undergraduate-honors-program/)
- Feminist, Gender, and Sexuality Studies (https://feminist.stanford.edu/undergraduates/honors-program/)
- International Security Studies (https://cisac.fsi.stanford.edu/education/honors-program/) (CISAC)
- Latin American Studies (http://las.stanford.edu/programs/undergraduate-honors/)
- Science, Technology, and Society (https://sts.stanford.edu/major-sts/honors-program/)

The interdisciplinary honors programs are designed to complement study in a department major. The requirements for these honors programs are described in the department sections of this bulletin. If approved for interdisciplinary honors, the student should then declare the Interdisciplinary Honors Program in Axess.

COVID-19 Policies

Ways Requirement

Ways courses completed during all four quarters of academic year 2020-21 with units earned for courses taken for a letter grade, CR/NC (CR grade), or S/NC (S grade) will satisfy the Ways requirement. For Ways transfer credit, the same grading policy exception will apply. Also, online courses and post-course evaluation requests will be allowed.

General Education Requirements

In order to graduate, undergraduates must complete the following General Education Requirements:

- Thinking Matters Requirement
- Ways of Thinking/Ways of Doing (Ways) Requirement
- Writing and Rhetoric Requirement
  - Program in Writing and Rhetoric (2 courses required, PWR 1 and PWR 2)
  - Writing in the Major
- Language Requirement

Purpose

The General Education Requirements are an integral part of undergraduate education at Stanford. Their purpose is to introduce students to the intellectual life of the University, to foreground important questions, and to illustrate how they may be approached from multiple perspectives. They are intended to develop a broad set of essential intellectual and social competencies of enduring value no matter what field a student eventually pursues. Students have flexibility to select topics that appeal to them while building critical skills, exploring interests, forming relationships with faculty and peers, and forging connections between educational experiences in many spheres. Together with the major, the requirements serve as the nucleus around which students build their four years at Stanford.

General Education Requirement courses must be taken for a letter grade and a minimum of 3 units of credit, with the exception of courses taken to fulfill the Language requirement, which may be taken for credit/no credit. Additionally, a course taken to satisfy the Creative Expression Way (Way-CE) may be taken for a minimum of 2 units and must be taken for a letter grade (unless a letter grade is not offered, and the course is only offered for a Satisfactory/No Credit grade).

Thinking Matters

Students are required to take one Thinking Matters (THINK) course during their freshman year. Most students take one stand-alone course selected from approximately eight courses offered each quarter.

- THINK courses

Alternatively, students may take one of two residence-based, year-long programs:

- Immersion in the Arts: Living in Culture (ITALIC (http://explorecourses.stanford.edu/search/?q=ITALIC&view=catalog&page=0&academicYear=20162017&collapse=&filter-coursestatus-Active=on&filter-departmentcode-ITALIC=on))
- Structured Liberal Education (SLE (http://explorecourses.stanford.edu/search/?filter-departmentcode-SLE=on&q=SLE&filter-coursestatus-Active=on&filter-catalognumber-SLE=on&academicYear=20162017))

- Each of these also satisfies at least part of the Writing and Rhetoric Requirement as well as several Ways requirements.

Another option, in Autumn Quarter only, allows students to enroll in Education as Self-Fashioning (ESF (http://explorecourses.stanford.edu/search/?q=ESF&filter-coursestatus-Active=on&filter-departmentcode-ESF=on&academicYear=20162017)) that satisfies the Thinking Matters requirement as well as PWR 1.

Ways of Thinking/Ways of Doing (Ways)

Students must fulfill the Ways general education requirement (http://exploredegrees.stanford.edu/undergraduatedegreesandprograms/ways.stanford.edu) which is a skills capacity-based approach to fostering breadth rather than a traditional discipline-based approach.

These courses provide students with educational breadth by giving instruction in essential skills and capacities in the areas of:

- Way-A-II: Aesthetic and Interpretive Inquiry (https://explorecourses.stanford.edu/search/?q=%25&view=catalog&page=0&catalog=&filter-ger-WAYAII=on&collapse=,5,&filter-coursestatus-Active=on) (2 courses)
- Way-AQR: Applied Quantitative Reasoning (https://explorecourses.stanford.edu/search/?q=%25&view=catalog&page=0&catalog=&filter-ger-WAYAQR=on&collapse=,5,&filter-coursestatus-Active=on)
- Way-CE: Creative Expression (https://explorecourses.stanford.edu/search/?q=%25&view=catalog&page=0&catalog=&filter-ger-WAYCE=on&collapse=,5,&filter-coursestatus-Active=on) (2 units)
- Way-ED: Engaging Diversity (https://explorecourses.stanford.edu/search/?q=%25&view=catalog&page=0&catalog=&filter-ger-WAYED=on&collapse=,5,&filter-coursestatus-Active=on)
- Way-ER: Ethical Reasoning (https://explorecourses.stanford.edu/search/?q=%25&view=catalog&page=0&catalog=&filter-ger-WAYER=on&collapse=,5,&filter-coursestatus-Active=on)
- Way-FR: Formal Reasoning (https://explorecourses.stanford.edu/search/?q=%25&view=catalog&page=0&catalog=&filter-ger-WAYFR=on&collapse=,5,&filter-coursestatus-Active=on)
- Way-SI: Social Inquiry (https://explorecourses.stanford.edu/search/?q=%25&view=catalog&page=0&catalog=&filter-ger-WAYSI=on&collapse=,5,&filter-coursestatus-Active=on) (2 courses)
- Way-SMA: Scientific Method and Analysis (https://explorecourses.stanford.edu/search/?q=%25&view=catalog&page=0&catalog=&filter-ger-WAYSMA=on&collapse=,5,&filter-coursestatus-Active=on) (2 courses)

Students are required to take eleven certified Ways courses, with two courses in Way-AII, Way-SI, and Way-SMA, and one course in each of the remaining five Ways. Transfer students fulfill the Ways requirement as outlined in the "Transfer Credit for Ways" section below.

Although courses may be certified to fulfill two Ways, a student may only count a course toward one Way in a program of study. Thinking Matters courses typically fulfill a Way. Courses may also count for both major and Ways requirements.

Courses taken prior to matriculation, independent study courses, graduate courses, and online transfer courses are not eligible for Ways credit. Courses must be a minimum of 3 units and taken for a letter grade except Way-CE which may be taken for fewer units.

Transfer Credit for Ways

Incoming transfer students who matriculate with the following number of transfer units must complete the defined number of Stanford Ways courses as part of their undergraduate education.

Number of Transfer Units	Ways Course Requirement
90	5 courses certified in 5 different Ways
75-89	6 courses certified in 6 different Ways
60-74	7 courses certified in 7 different Ways
45-59	8 courses certified in 8 different Ways
44 or fewer	10 courses certified in 8 different Ways

- Excludes Advanced Placement (AP) or other external test units, independent study, online courses, or additional transfer courses from other institutions.
- A minimum of 2 units is required to complete the Creative Expression (CE) Ways requirement. This may be fulfilled by taking one 2-unit minimum CE course, taking a 1-unit CE course twice, or taking two 1-unit CE courses in the same program such as Dance, Music, or TAPS.

Matriculated students may fulfill a maximum of five Ways courses out of the 11 course requirement from another accredited college or university; these courses may be certified in any of the eight Ways categories but no more than one course in any one Way (i.e., up to one course in Way-A-II, Way-SI, Way-SMA, which have a two-course requirement; one course in Way-AQR, Way-ED, Way-ER, Way-FR; and 2 units in Way-CE). No more than 45 units in total transfer credit may count toward the undergraduate degree. The five course transfer limit is cumulative over a student's undergraduate career at Stanford.

Pre-Approval of Courses for Transfer Credit for Ways

Courses taken at another accredited college or university must be pre-approved for Ways certification prior to enrollment in the course. Courses that have not been pre-approved prior to enrollment at another accredited college or university are not eligible for Ways credit. Matriculated students must submit their Ways pre-approval request(s) by the quarterly deadline as defined on the Ways web site (https://undergrad.stanford.edu/programs/ways/getting-credit/ways-credit-classes-taken-other-us-universities/). The student is subject to a three-course limit for Ways pre-approval evaluation requests per term.

To request a Ways requirement through transfer work, the pre-approved course must be taken for a minimum of 3 quarter units, except for Creative Expression which is a minimum of 2 units, and be taken for a letter grade.

Once Ways transfer credit has been posted to the student's record by the Office of the University Registrar, it is final and may not be changed.

Students seeking transfer credit should consult the Ways Transfer Credit (https://undergrad.stanford.edu/programs/ways/transfer-credit/) page and the Transfer Credit Procedures (https://registrar.stanford.edu/transfer-credit-procedures/) page on the Office of the Registrar web site.

Language Requirement

To fulfill the Language Requirement, undergraduates are required to complete one year of college-level study or the equivalent in a foreign language. Students may fulfill the requirement in any one of the following ways:

1. Complete three quarters of a first-year, 4-5 units language course at Stanford or the equivalent at another recognized post-secondary institution subject to current University transfer credit policies. Language courses at Stanford may be taken with the Credit/No Credit grading basis, if so offered, to fulfill the requirement.
2. Score 4 or 5 on the Language Advanced Placement (AP) test in one of the following languages: Chinese, French, German, Japanese, Latin, or

Spanish. Advanced Placement (AP) tests in foreign literature do not fulfill the requirement.

3. Achieve a satisfactory score on the SAT II Subject Tests in the following languages taken prior to college matriculation:

Test Subject	Score
Chinese	630
French	640
German	630
Latin	630
Spanish	630
Italian	630
Japanese	620
Korean	630
Hebrew	540

4. Take a diagnostic test in a particular language which either:
   a. Places them out of the requirement, or
   b. Diagnoses them as needing one, two, or three additional quarters of college-level study. In this case, the requirement can then be fulfilled either by passing the required number of quarters of college-level language study at Stanford or the equivalent elsewhere, or by retaking the diagnostic test at a later date and placing out of the requirement.

Written placements are offered online throughout the summer in Chinese, French, German, Italian, Japanese, Russian, Spanish, and Spanish for home background speakers.

For a full description of Language Center offerings, see the "Language Center (p. 1722)" section of this bulletin under the school of Humanities and Sciences.

Writing and Rhetoric Requirement

COVID-19-Related Grading Changes

PWR courses completed during academic year 2020-21, including Summer 2021, and taken for CR/NC grading with a Credit (CR) grade satisfy the WR-1 and WR-2 requirement. This grading policy exception, as well as online courses, will also be allowed for WR-1 and WR-2 transfer credit evaluations, provided those courses fulfill the other criteria for equivalency approval.

All instructors at Stanford University expect students to express themselves effectively in writing and speech. The Writing and Rhetoric requirement helps students meet those high expectations.

All candidates for the bachelor's degree, regardless of the date of matriculation, must satisfy the Writing and Rhetoric requirement. Transfer students are individually reviewed at the time of matriculation by the Office of the University Registrar's Degree Progress section and, if necessary, the Program in Writing and Rhetoric (PWR) as to their status with regard to the requirement.

The Writing and Rhetoric requirement includes courses at three levels. The first two levels are described in more detail below. Writing-intensive courses that fulfill the third level, the Writing in the Major (WIM) requirement, are designated under individual department listings.

All undergraduates must satisfy the first-level Writing and Rhetoric requirement (WR 1) in one of five ways:

1. PWR 1: a course emphasizing writing and research-based argument.
2. SLE: writing instruction in connection with the Structured Liberal Education program.
3. ESF: writing instruction in connection with the Education as Self-Fashioning Thinking Matters course.
4. ITALIC: writing instruction in connection with the ITALIC Integrated Learning Environment.
5. Transfer credit approved by the Office of the University Registrar for this purpose.

All undergraduates must satisfy the second-level Writing and Rhetoric Requirement (WR 2) in one of four ways:

1. PWR 2, a course emphasizing writing, research, and oral presentation of research.
2. SLE: writing and oral presentation instruction in connection with the Structured Liberal Education program.
3. A course offered through a department or program certified as meeting the WR 2 requirement by the Writing and Rhetoric Governance Board. These courses are designated as WRITE 2.
4. Transfer credit approved by the Office of the University Registrar for this purpose.

A complete listing of PWR 1 courses is available each quarter on the PWR (https://undergrad.stanford.edu/programs/pwr/) web site and in the PWR office in Sweet Hall, Third Floor. Complete listings of PWR 2 and WRITE 2 courses are available to students on the PWR (https://undergrad.stanford.edu/programs/pwr/) web site the quarter before they are scheduled to complete the WR 2 requirement.

For a full description of the Program in Writing and Rhetoric (PWR), see the "Writing and Rhetoric (p. 184)" section of this bulletin under the Vice Provost of Undergraduate Education.

Unit Credit

Activity Courses

For undergraduates, a maximum of 8 units of credit earned in activity courses, regardless of the offering department or if accepted as transfer units, count towards the 180 units (225 if dual degrees are being pursued) required for the bachelor's degree. All activity courses are offered on a satisfactory/no credit basis.

Courses Taken on Satisfactory/No Credit or Credit/No Credit Basis

A maximum of 36 units of credit (including activity courses) taken at Stanford or its overseas campuses for a "CR" or "S" grade may be applied towards the 180 units (225 if dual degrees are being pursued) required for the bachelor's degree. The maximum for transfer students is 27 units.

Departments may also limit the number of satisfactory or credit courses accepted towards the requirements for a major. Satisfactory/Credit courses applied towards a minor may be similarly limited. Courses not letter-graded are not accepted in fulfillment of the General Education Requirements, except for Ways-CE (see the "General Education Requirements/Ways (p. 35)" section of this bulletin for further information). Writing in the Major courses are usually offered letter grade only. In those instances where the course is offered for a letter grade or CR/NC, the course must be taken for a letter grade to fulfill Ways of Thinking/Ways of Doing requirement and Writing in the Major requirement.

Internship Credit Guidelines

Undergraduate internships should not by themselves carry any credit. However, an individual student may arrange with a faculty member for a research or other academic project to be based on the internship. Arrangements between students and faculty regarding credit are expected to be made well in advance of the internship. Credit should be arranged within departmental rules for directed reading or independent

study and should meet the usual department standards. No transfer credit is awarded for internships.

Concurrent Enrollment (Undergraduate)

Undergraduates may enroll concurrently at Stanford and at another college or university. The following policies apply to concurrent enrollment:

1. Students may not exceed 20 quarter units between both schools. This is the same unit maximum for undergraduates at Stanford. (One semester credit or hour generally equals 1.5 quarter units.)
2. Satisfactory academic progress is determined only by Stanford courses and units. Transfer work completed at other institutions is not considered in this calculation.
3. Students are expected to submit a Request for Transfer Credit Evaluation eForm (available in the eForms portal in the Student tab in Axess) for pre-approval of transfer credit prior to enrolling in the transfer institution.

Advanced Placement

Stanford University allows up to 45 units of external credit (90 units for transfer students) toward graduation including work completed in high school as part of the College Board Advanced Placement curriculum. The awarding of such credit is based on Advanced Placement test scores and is subject to University and department approval.

The faculty of a given department determine whether any credit toward the 180-unit requirement can be based on achievement in the College Board Advanced Placement Program in their discipline. Stanford departments electing to accept the Advanced Placement (AP) credit are bound by these University policies:

1. Credit is usually granted for an AP score of 4 or 5. Usually, 10 quarter units are awarded (but occasionally fewer than 10). No more than 10 quarter units may be given for performance in a single examination.
2. Whether credit is to be given for an AP score of 3 is a matter for departmental discretion; up to 10 units may be awarded.
3. No credit may be authorized for an AP score lower than 3.

Performance on an AP exam can indicate the appropriate placement for continuing course work in that subject at Stanford. If students enroll in courses at Stanford for which they received equivalent AP credit, the duplicating AP credit will be removed. The chart below shows the current AP credit and placement policies.

A maximum of 45 quarter units of Advanced Placement (AP), transfer credit, and/or other external credit (such as International Baccalaureate) may be applied toward the undergraduate degree. More than 45 units of AP, transfer, and other external credit may appear on the Stanford University transcript; however, only 45 units can be applied to the minimum units required for the undergraduate degree. Once credit has been posted it cannot be removed from the student record. However, if Stanford courses are taken below the level of the placement course, the duplicating AP units are removed. Students may not receive duplicate unit credit for AP and IB exams in the same discipline, and the duplicating unit credit may be removed from the student's record. Stanford University policies on AP and other external credit are subject to review and change on an annual basis. Subjects not listed on this chart are not eligible for AP credit at Stanford University. Students may only receive AP credit for the AP policies that were effective during their matriculation year at Stanford.

Further information is available from the Student Services Center (https://studentservicescenter.stanford.edu/) or on the Registrar's (https://registrar.stanford.edu/students/transfer-credit/advanced-placement/) website.

AP Scores and Placement

Test Subject	Score	Placement	Quarter Units
Calculus AB (or AB subscore) (See note 1)	5	Take placement diagnostic, see the Math Placement website: https://mathematics.stanford.edu/academics/undergraduate/math-placement (https://mathematics.stanford.edu/academics/undergraduate/math-placement/)/	8

Physics C - Electricity and Magnetism (See note 4)	5	Take placement diagnostic; see https://physics.stanford.edu/academics/undergraduate-students/placement-diagnostic (https://physics.stanford.edu/academics/undergraduate-students/placement-diagnostic/)	4
Physics C - Electricity and Magnetism (See note 4)	4	Take placement diagnostic; see https://physics.stanford.edu/academics/undergraduate-students/placement-diagnostic (https://physics.stanford.edu/academics/undergraduate-students/placement-diagnostic/)	4
Physics 1 & 2 - Both (See notes 4,5)	9, 10	Take placement diagnostic; see https://physics.stanford.edu/academics/undergraduate-students/placement-diagnostic (https://physics.stanford.edu/academics/undergraduate-students/placement-diagnostic/)	8
Physics 1 & 2 - Both (See notes 4,5)	8	Take placement diagnostic; see https://physics.stanford.edu/academics/undergraduate-students/placement-diagnostic (https://physics.stanford.edu/academics/undergraduate-students/placement-diagnostic/)	4
Spanish (Language) (See note 3)	5	Take placement exam if continuing in this language	10

1 Students are eligible for Calculus AB, BC, or subscore AB, however not a combination of the three. Students can only earn credit for one of the listed math exams.

2 Some students may prefer CHEM 31M Chemical Principles: From Molecules to Solids and will be awarded only 5 units.

3 A score of 4 or 5 on this test fulfills the Language Requirement. A score of 5 is required to receive 10 units of credit.

4 Students are eligible for Physics B, Physics C (both), or Physics 1 & 2, however not a combination of the three. For more information on these exams, see the Physics Department's Advanced Placement (https://physics.stanford.edu/undergraduate-program/advanced-placement/) website.

5 Students must have taken both Physics 1 & 2 to receive credit along with scoring a minimum of 4 on each exam. The standard rules apply such that students cannot receive credit for multiple exams taken within the same subject. The best score and or unit rate is applied to the transcript for Physics. If a student wants to have a certain Physics exam reflected on the transcript, the student should contact the Student Services Center (https://stanford.service-now.com/student_services/?id=sc_cat_item&sys_id=07d14315136a130019813598d144b095).

International Baccalaureate (IB) Transfer Credit

Stanford University awards advanced placement credit for certain International Baccalaureate (IB) and international advanced placement subject examinations. The international test subjects must match the content of the College Board Advanced Placement test subjects that receive advanced placement credit. See the Registrar's website for detailed information (https://registrar.stanford.edu/students/transfer-credit-and-advanced-placement/advanced-placement/ib-credit-chart/).

A maximum of 45 quarter units of transfer and test credit may be applied toward the undergraduate degree. Only higher level IB exams with scores of 5 or higher, in the subjects listed below, are eligible for credit. Subjects not listed on this chart are not eligible for IB credit. Scores of 5 or higher on language IB exams fulfill the language requirement. If Stanford courses are taken below the level of the placement course, the duplicating IB units will be removed. Students may not receive duplicate unit credit for AP and IB exams in the same discipline, and the duplicating unit credit may be removed from the student's record.

Test Subject	Score	Placement	Quarter Units
Chemistry	5	CHEM 121	10
Chinese A or B*	5	Take placement exam if continuing in this language	10
Computer Science	5	CS 106B or 106X	5
French A or B*	5	Take placement exam if continuing in this language	10
German A or B*	5	Take placement exam if continuing in this language	10
Japanese A or B*	5	Take placement exam if continuing in this language	10
Korean A or B*	5	Take placement exam if continuing in this language	10
Mathematics**	6 or higher	Take placement diagnostic, see the Math Placement website; https://mathematics.stanforc academics/undergraduate/math-placement (https://mathematics.stanforc academics/undergraduate/math-placement/)/	10
Physics	6 or higher	PHYSICS 25	8
Physics	5	PHYSICS 23, PHYSICS 25	4
Portuguese A or B*	5	Take placement exam if continuing in this language	10
Russian A or B*	5	Take placement exam if continuing in this language	10
Spanish A or B*	5	Take placement exam if continuing in this language	10

* A score of 5 on this test fulfills the Language Requirement. A score of 5 is required to receive 10 units of credit.

** Enrollment may require taking the Math Placement Diagnostic. See the Math Placement (http://mathematics.stanford.edu/academics/undergraduate/math-placement/) web site for more information and a link to take the diagnostic.

* A score of 5 on this test fulfills the Language Requirement. A score of 5 is required to receive 10 units of credit.

** Enrollment may require taking the Math Placement Diagnostic. See the Math Placement (http://mathematics.stanford.edu/academics/undergraduate/math-placement/) web site for more information and a link to take the diagnostic.

Chemistry Advanced Placement for Incoming Frosh

Chemistry Advanced Placement Scores	CHEM 31A	CHEM 31M	CHEM 33	CHEM 121 with CHEM 100
Chem AP 5	permission of instructor only	YES	YES	NO
Chem AP 4	permission of instructor only	YES	NO	NO
Chem AP 3 or lower	take placement exam to determine appropriate placement	take placement exam to determine appropriate placement	After passing grade in 31M or 31A/B	NO
No AP or IB background	YES	Okay with passing placement exam score	After passing grade in 31M or 31A/B	NO
IB, A-level, French Baccalaureate, German Arbitur	permission of instructor only	YES	YES	YES

Undergraduate Transfer Work

COVID-19 Policies on Undergraduate Transfer Work for Academic Year 2020-21

- The 15-quarter unit cap on online work has been eliminated, students may apply for transfer credit for work that was or will be completed via an online/hybrid/correspondence instruction mode.The coursework must still meet all other conditions for transfer credit.
- Students may reach out to their departments for review/approval of transfer credit without having to first secure a review/approval from the Registrar's Office. Please note: students will want to confirm with departments what their transfer credit process is, if seeking a review of transfer credit for application towards major/minor requirements.
- Credit earned in U.S. military training and service may be eligible for transfer to Stanford if the work was completed at an accredited U.S. college or University or if the work appears on an official Joint Services Transcript (JST) and meets all other conditions for transfer credit. Joint Services Transcripts can be requested via the JST website (https://jst.doded.mil/official.html).

Academic credit for work done elsewhere may be allowed toward a Stanford bachelor's degree under the following rules and conditions:

1. Credit may be granted for work completed at institutions in the U.S. only if the institutions are regionally accredited.
2. Study in institutions outside the U.S., when validated by examination results, tutorial reports, or other official evidence of satisfactory work, may be credited toward a Stanford bachelor's degree, subject to the approval of the credit evaluator and the appropriate departments.

See the Registrar's web site (https://registrar.stanford.edu/students/transfer-credit-and-advanced-placement/international-course-work/) for additional information regarding transfer credit requests for course work completed abroad.

3. Credit is officially allowed only after the student has been unconditionally admitted to Stanford.
4. Credit is allowed for work completed at institutions in the U.S. only on the basis of an official transcript received by the Registrar at Stanford directly from the institution where the credit was earned. In order for transfer credit to be awarded, students must submit an official transcript that clearly indicates all of the below information for each course:
   - Course codes/numbers
   - Course titles or descriptions
   - Final grades earned
   - Course credits earned
5. Credit from another institution may be transferred for courses which are substantially equivalent to those offered at Stanford University on the undergraduate level, subject to the approval of the credit evaluator. A maximum of 20 quarter units may represent courses which do not parallel specific undergraduate courses at Stanford, again, subject to the approval of the credit evaluator as to quality and suitability.
6. Course work cannot duplicate, overlap, or regress previous work.
7. Transfer course work cannot count towards secondary school diploma and/or graduation requirements.
8. For students interested in fulfilling a Ways of Thinking/Doing (Ways) breadth requirement through transfer work, a transfer course evaluation must be submitted to confirm if the course will meet the Ways criteria. Requests for fulfilling Ways requirements in transfer require pre-approval prior to course enrollment and the pre-approval requests must be submitted prior to the term in which students intend to enroll in the transfer course and as defined on the Ways (https://undergrad.stanford.edu/programs/ways/getting-credit/ways-credit-classes-taken-other-us-universities/) web site. Courses must be taken for a minimum of 3 quarter units (2 units in the case of Creative Expression only) and must be taken for a letter grade.
   For incoming transfer students, a proportion of their Ways requirement must be fulfilled at Stanford based on the number of qualified transfer units awarded at matriculation. Students must complete a number of Ways courses to fulfill the Ways requirement as outlined in the “Transfer Credit for Ways (p. 35)” section of this bulletin.
9. Transfer work can be used to satisfy a department major or minor requirement. The transfer work must first be officially accepted into the University through the Office of the University Registrar. After the transfer credit has been approved and posted by the Office of the University Registrar, the departments determine if the approved transfer work can be used to satisfy a department major or minor requirement. Students should consult with their departments about a program's transfer credit policies/procedures.
10. The credit allowed at Stanford for one quarter's work may not exceed the number of units that would have been permissible for one quarter if the work had been done at Stanford; for work done under a system other than the quarter system, the permissible maximum units are calculated at an appropriate ratio of equivalence (i.e. is converted into quarter units).
11. Credit is allowed at Stanford for work graded 'C-' (or better) or 'Pass' (where 'Pass' is equivalent to a letter grade of 'C-' or above), but not for work graded 'D' or below.
12. No more than 45 (90 for transfer students) quarter units of credit for work done elsewhere (including external test credit) may be counted toward a bachelor's degree at Stanford.
13. Credit earned in extension, correspondence, and online courses is transferable only if the university offering the courses allows that credit toward its own bachelor's degree. Such credit is limited to a maximum of 45 quarter units for extension courses, a maximum of 15 quarter units for correspondence and online study, and a maximum of 45 quarter units for the combination of extension, correspondence, and online courses. Online and independent study courses are not eligible for Ways credit.
14. Credit earned in military training and service is not transferable to Stanford, unless offered by an accredited college or university in the U.S. and evaluated as above by the credit evaluator.

See the Registrar's web site (https://registrar.stanford.edu/students/transfer-credit-and-advanced-placement/transfer-credit-policies/) for additional information regarding transfer credit policies and procedures.

Special Registration Statuses (Undergraduate)

COVID-19 Policies on Undergraduate Special Registration Statuses for Academic Year 2020-21

- *Permit to Attend for Services Only (PSO):* Students approved for the PSO status will be assessed a $150 fee instead of the standard PSO fee.
- *13th Quarter:* this status will be available in the Summer Quarter, as Summer will not necessarily be the standard optional quarter for the Academic Year 2020-21.

The following reduced-tuition categories can be requested by undergraduates in the final stages of their degree program:

Permit to Attend for Services Only (PSO)

Undergraduates in their terminal quarter who are completing honors theses, clearing incomplete grades, or have completed all requirements and are requiring a registration status to utilize university resources, may petition one time only for PSO status. PSO does not permit any course enrollment. Students must apply to graduate through Axess if applying for the PSO special registration status. The deadline for the completed PSO petition (https://stanford.box.com/PSO/) is the Preliminary Study List (https://registrar.stanford.edu/students/enrolling-courses/preliminary-study-list-deadline-courses-or-units/) deadline of the applicable quarter.

13th Quarter

Undergraduates who have completed at least twelve full-time quarters may petition to register for 13th Quarter registration status at a reduced tuition rate for their final quarter, but must register for at least eight units. Undergraduate dual degree students must complete at least fifteen full-time quarters before petitioning for reduced tuition in their final quarter. Students receiving financial aid should check with the Financial Aid Office for eligibility if they are seeking aid beyond 12 quarters of enrollment. Undergraduates must apply to graduate through Axess if applying for the 13th-quarter special registration status.

Last Units out of Residence

Students may petition to complete their final 15 units out of residence to complete their degree requirements. The final 15 units of transfer credit must meet the criteria in the undergraduate "Transfer Work (p. 40)" section of this bulletin. Students must submit the Request for Last Units Out of Residence Petition (https://stanford.box.com/last-units-out-of-residence/) to determine eligibility and to request pre-approval of the transfer work. A registration status is required to graduate. Students should select either the Graduation Quarter or the Permit for Services Only special registration status on the Last Units Out of Residence petition. Refer to the Special Registration Status section of the bulletin

for a description of theses statuses. An application to graduate should be submitted through Axess.

Graduation Quarter

Undergraduates may petition one time only for Graduation Quarter in their terminal quarter only if:

1. filing a Request for Last Units Out of Residence (https://stanford.box.com/last-units-out-of-residence/) in order to complete up to 15 final units at another institution; or
2. returning from a discontinued status and filing a Request to Return and Register in Undergraduate Study (https://undergrad.stanford.edu/planning/academic-policies/returning-students/) in order to confer their degree; or
3. if all degree requirements, including honors theses, have been completed and student requires a registration status to graduate, but will not be using University resources or housing.

Coterminal students are only eligible for the Graduation Quarter special registration status if they are applying to confer both the undergraduate and graduate degree in the same quarter. Undergraduates may be eligible for Graduation Quarter status in these three situations only if the student has completed all graduation requirements and will not be utilizing University resources, including housing. The deadline for the completed Graduation Quarter petition (https://stanford.box.com/grad-qtr-ug/) is the Preliminary Study List (https://registrar.stanford.edu/students/enrolling-courses/preliminary-study-list-deadline-courses-or-units/) deadline of the applicable quarter. Undergraduates must apply to graduate through Axess if applying for the Graduation Quarter special registration status.

Minimum Progress for Undergraduates

Undergraduates are expected to finish their degree requirements in a timely fashion. In addition to maintaining academic progress obligations, students are expected to take courses to progress towards a Bachelor of Arts or a Bachelor of Science degree. If after 12 quarters, an undergraduate is not on track to complete degree requirements and graduate within the next two quarters, the University may impose requirements with deadlines on a student's course of study. Further, if a student fails to meet those imposed requirements and/or has not after 18 quarters completed all degree requirements, the University may discontinue the student for failure to progress.

Leaves of Absence and Reinstatement (Undergraduate)

A Leave of Absence allows a student to take a break from enrollment either before or after a quarter begins. There may also be conditions associated with a Leave, which are outlined in greater detail below. Undergraduates are admitted to Stanford University with the expectation that they complete their degree programs in a reasonable amount of time, usually within four years.

Leaves of absence for undergraduates may not exceed a cumulative total of two years (eight quarters including Summer Quarters).

COVID-19 Policies on Undergraduate Leaves of Absence for Academic Year 2020-21

For academic year 2020-21, new leaves of absence taken during Autumn, Winter, Spring, or Summer quarters do not count towards the eight quarters maximum.

Undergraduates and coterms in the undergraduate tuition group are expected to enroll in three of four quarters during the 2020-21 academic year, with one quarter considered the student's Flex Term. If students are unable to or elect not to enroll in three quarters, they must apply for a leave of absence for those quarter(s). Leaves of absence information for International undergraduates can be found below in this bulletin section.

Undergraduates may take one quarter away from Stanford without having to file for a leave of absence (LOA), this term being considered the student's Flex Term. If a student takes more than one quarter away from Stanford, a Leave of Absence form is required. A student would be discontinued for no enrollment in any term in which they do not enroll after use of the Flex Term. See the Discontinuation and Reinstatement (p. 43) section below for further information.

Students on leave of absence are not registered at Stanford and, therefore, do not have the rights and privileges of registered students. They cannot fulfill any official department or University requirements during the leave period. Students on leave may complete course work for which an 'Incomplete' grade was awarded in a prior term (unless doing so places an undue burden on the part of an instructor, department, staff, or other university resource) and are expected to comply with the maximum one-year time limit for resolving incompletes; a leave of absence does not stop the clock on the time limit for resolving incompletes.

New freshmen and transfers are required to register in Autumn Quarter and may not take a leave of absence prior to their first quarter. However, new undergraduate students may request a deferment from the Office of Undergraduate Admission before the first day of Autumn Quarter. Under rare and exceptional circumstances, new freshmen and transfers may take a leave of absence during their first quarter with the permission of the Vice Provost for Undergraduate Education (or his or her designee). When circumstances arise which make it advisable or necessary for freshmen to take a leave of absence during any of their first three quarters, the student is required to wait until Autumn Quarter of the following academic year to return.

When a student is granted or placed on a leave of absence after the beginning of the term, courses in which the student was enrolled after the final study list deadline appear on the student's transcript and show the symbol 'W' (withdraw). For additional information regarding satisfactory academic progress, refer to the "Academic Progress (p. 94)" section of this bulletin. Information on tuition refunds is available in the "Refunds (p. 30)" section of this bulletin.

International Undergraduates

A Leave of Absence allows a student to take a break from enrollment either before or after a quarter begins. There may also be conditions associated with a Leave, which are outlined in greater detail below. Undergraduates are admitted to Stanford University with the expectation that they complete their degree programs in a reasonable amount of time, usually within four years.

Leaves of absence for undergraduates may not exceed a cumulative total of two years (eight quarters including Summer Quarters). For academic year 2020-21, leaves of absence taken during Autumn, Winter, Spring or Summer quarters will not count towards the eight quarters maximum.

COVID-19 Policy on Leaves of Absence for International Undergraduates

International undergraduates are expected to enroll in three consecutive quarters during the 2020-21 academic year. If undergraduates are unable to or elect to not enroll in three consecutive quarters, they must apply for a Leave of Absence for those quarter(s). International undergraduates are required to consult with a Bechtel International Center immigration advisor well before requesting a Leave of Absence. The Leave of

Absence may complicate an international student's legal status and ability to remain and work in the U.S.

Students on leave of absence are not registered at Stanford and, therefore, do not have the rights and privileges of registered students. They cannot fulfill any official department or University requirements during the leave period. Students on leave may complete course work for which an 'Incomplete' grade was awarded in a prior term (unless doing so places an undue burden on the part of an instructor, department, staff, or other university resource) and are expected to comply with the maximum one-year time limit for resolving incompletes; a leave of absence does not stop the clock on the time limit for resolving incompletes.

New freshmen and transfers are required to register in Autumn Quarter and may not take a leave of absence prior to their first quarter. However, new undergraduate students may request a deferment from the Office of Undergraduate Admission before the first day of Autumn Quarter. Under rare and exceptional circumstances, new freshmen and transfers may take a leave of absence during their first quarter with the permission of the Vice Provost for Undergraduate Education (or his or her designee). When circumstances arise which make it advisable or necessary for freshmen to take a leave of absence during any of their first three quarters, the student is required to wait until Autumn Quarter of the following academic year to return.

When a student is granted or placed on a leave of absence after the beginning of the term, courses in which the student was enrolled after the final study list deadline appear on the student's transcript and show the symbol 'W' (withdraw). For additional information regarding satisfactory academic progress, refer to the "Academic Progress (p. 94)" section of this bulletin. Information on tuition refunds is available in the "Refunds (p. 30)" section of this bulletin.

Voluntary Leave of Absence

Students have the option of taking a voluntary leave of absence for up to one year, or four quarters, upon filing a Leave of Absence form with the Office of the University Registrar and receiving approval. Students may revoke their request to take a voluntary leave of absence via Axess, within two business days of submitting a Leave of Absence eForm. Except where unexpected circumstances necessitate an immediate leave, students are expected to file for a voluntary leave of absence 30 days prior to the quarter in which the leave will begin. The leave may be extended for up to one additional year, or four quarters, provided the student files (before the end of the initial one-year leave) a Leave of Absence form (https://stanford.box.com/leaveofabsence/) for the leave extension with the Office of the University Registrar and receives approval. Leaves requested for a longer period than one year, or four quarters, are approved only in exceptional circumstances (for example, mandatory military service). Leaves of absence for undergraduate students may not exceed a cumulative total of two years (eight quarters including summer quarters).

Undergraduates who take an approved leave of absence while in good standing from a quarter for which they have registered in advance and do not wish to attend may enroll in the University for the subsequent quarter with the privileges of a continuing student. For undergraduates who wish to withdraw from the current quarter after the beginning of the term, courses in which the student was enrolled after the final study list deadline appear on the student's transcript and show the symbol 'W' (withdraw). For additional information regarding satisfactory academic progress, refer to the "Academic Progress" section of this bulletin. In either situation, the University may condition its approval of a petition for leave of absence on the student's meeting such requirements as the University deems appropriate in the individual case for the student to be eligible to return (such as, in the case of a leave for medical reasons, proof of treatment and/or an interview with a provider at Vaden Health Center (http://vaden.stanford.edu/) or Counseling and Psychological Services (https://vaden.stanford.edu/caps-and-wellness/counseling-and-psychological-services-caps/) or its designee). Undergraduates who wish to withdraw from the current quarter, or from a quarter for which they have registered in advance and do not wish to attend, must file a Leave of Absence form (https://stanford.box.com/leaveofabsence/) with and receive approval from the office of the Vice Provost for Undergraduate Education, via Academic Advising (https://advising.stanford.edu), Sweet Hall.

Information on tuition refunds is available in the "Refunds (p. 30)" section of this bulletin. For a full refund, petitions must be received by the Office of the University Registrar no later than the first day of classes for the quarter.

Discontinuation and Reinstatement

COVID-19 Policies on Discontinuation and Reinstatement for Academic Year 2020-21

In academic year 2020-21, a student's active status in their academic degree program may be discontinued if the student:

- fails to be enrolled by the study list deadline of their second term away from Stanford; or
- fails to be approved for a leave of absence by the start of the term of their second term away from Stanford; or
- fails to enroll by the study list deadline, or fails to file and be approved for a leave of absence in a subsequent quarter, after use of the Flex Term; or
- voluntarily terminates undergraduate studies; or
- is dismissed for academic reasons; or
- is expelled from the University.

Students who fail to be either enrolled by the final study list deadline of their second term away from Stanford, or who fail to submit a Leave of Absence petition by the published deadline in their second term away from Stanford, must apply for reinstatement through the Request to Return and Register in Undergraduate Study (https://undergrad.stanford.edu/planning/academic-policies/returning-students/).

This policy is applicable to the four quarters in academic year 2020-21 only; additional policy will be published prior to academic year 2021-22.

The University is not obliged to approve reinstatements of students. Applications for reinstatement are reviewed by the Vice Provost for Undergraduate Education and are subject to the approval of the Faculty Senate Committee on Undergraduate Standards and Policy or its designees. The Committee or its designees may determine whether the application for reinstatement will be approved or not, and/or the conditions a student must meet in order to be reinstated. Reinstatement decisions are in the discretion of the University and may be based on the applicant's status when last enrolled, activities while away from campus, the length of the absence, the perceived potential for successful completion of the program, as well as any other factors or considerations regarded as relevant to the Vice Provost for Undergraduate Education, the Committee, or their designees.

Applications for reinstatement through the Request to Return and Register in Undergraduate Study (https://undergrad.stanford.edu/planning/academic-policies/returning-students/), must be submitted eight weeks prior to the start of the term in which the student seeks to enroll in classes. Information and instructions may be obtained by contacting the office of the Vice Provost for Undergraduate Education, via Academic Advising (https://advising.stanford.edu), Sweet Hall.

Students who have been expelled from Stanford University are not permitted to apply for reinstatement.

Students who wish to terminate their study as undergraduates (e.g., for transfer to another institution) should submit a properly endorsed Request to Permanently Withdraw from Degree Program form (https://stanford.box.com/permanent-withdraw/) to the office of the Vice Provost for Undergraduate Education, via Academic Advising (https://advising.stanford.edu), Sweet Hall. In this instance, applications for reinstatement through the Request to Return and Register in Undergraduate Study are not appropriate. Any student wishing then to return to undergraduate study at Stanford is required to apply as a transfer student through the Office of Undergraduate Admission, and such re-admission is not guaranteed.

Leaves of absence and reinstatement of graduate students are addressed in the "Graduate Degrees (p. 65)" section of this bulletin.

Involuntary Leave of Absence and Return Policy

In effect as of January 4, 2020

Stanford University is committed to the safety, health and well-being of the campus community. The University recognizes that students may experience situations that significantly limit their ability to function successfully or safely in their role as students. In such circumstances, students should consider requesting a leave of absence. A leave of absence permits students to take a break from the University and their studies, so that they may address the issues that led to the need for the leave and later return to the University with an enhanced opportunity to achieve their educational goals. Students will be given the option to take a voluntary leave of absence before a decision is made with respect to an involuntary leave.

1. **Involuntary Leave of Absence**

   Requiring a student to take a leave of absence is rare and, subject to Section III, only happens when current medical knowledge and/or the best available objective evidence indicates to the Senior Associate Vice Provost and Dean of Students or their designee (hereinafter, Dean of Students) that there is a significant risk to the student's health or safety or the health or safety of others, or the student's behavior severely disrupts the University environment, and no reasonable accommodations can adequately reduce that risk or disruption.

   Consistent with Stanford's Nondiscrimination Policy (p. 123), Stanford prohibits unlawful discrimination on the basis of any type of disability or any other characteristic protected by applicable law in the administration of the University's programs and activities. Stanford offers a range of resources, support services and accommodations to address the physical and mental health needs of students. However, on rare occasion, a student's needs may require a level of care that exceeds the care the University can appropriately provide. Where current knowledge about the individual's medical condition and/or the best available objective evidence indicates that a student poses a significant risk to the health or safety of a member of the University community, where a student is unable or unwilling to carry out substantial self-care obligations and poses a significant risk to their own safety not based on mere speculation, stereotypes, or generalizations, or where a student's behavior severely disrupts the University environment and the student does not want to take a voluntary leave, the Dean of Students has the authority to place a student on an involuntary leave of absence. Before placing any student on an involuntary leave of absence, Stanford will conduct an individualized assessment, consulting with the Office of Accessible Education (OAE) to determine if there are reasonable accommodations that would permit the student to continue to participate in the University community without taking a leave of absence.

   The Dean of Students may be notified about a student who may meet the criteria of an involuntary leave of absence from a variety of sources including, but not limited to, the student, the student's academic advisor, Residential Education staff, Graduate Life Office staff, an academic department, or a member of the University's threat assessment team. If the Dean of Students deems it appropriate, these procedures will be initiated.

   a. **Procedures for Placing a Student on an Involuntary Leave of Absence**

      i. The Dean of Students will consult with the Office of Accessible Education (OAE) prior to making a decision to impose an involuntary leave of absence.

      ii. The Dean of Students will issue a notice to the student in writing that an involuntary leave of absence is under consideration. The written notice will include the reason(s) why the student is being considered for an involuntary leave, contact information for OAE, which can provide information about accommodations, and a copy of this policy. In addition, the notice will provide contact information for the Process Resource, an administrator outside of the decision-making process with knowledge of Stanford's involuntary leave of absence process who will serve as a neutral process resource to answer any student questions about the process from referral through return to Stanford. In the written notice, the student will be encouraged to respond before a decision regarding a leave of absence is made and will be given a specified time period within which to do so.

      iii. The Dean of Students will consider potential accommodations and/or modifications that could obviate the need for an involuntary leave of absence, such as the option to take a voluntary leave of absence, academic accommodations, housing and dining accommodations, and modifications to University policies, rules, and regulations. Examples of academic, administrative, and housing accommodations that may be facilitated through the Office of Accessible Education (OAE) can be found on the OAE (https://oae.stanford.edu/) website.

      iv. The student may be asked to execute an Exchange of Confidential Information Consent Form providing Stanford personnel temporary authority to get information from the student's healthcare provider(s) regarding issues relevant and appropriate to the consideration of an involuntary leave of absence when there is a need for the University to have access to that information as part of the interactive process and individualized assessment. If a student refuses to execute an Exchange of Confidential Information Consent Form or to respond within the timeframe set by the Dean of Students, the Dean may proceed with the assessment based on information in the Dean's possession at the time.

      v. The Dean of Students will also confer, as feasible and when appropriate in a particular matter, with individuals regarding the need for an involuntary leave of absence. Although each case will vary, conferring individuals could include:

         1. Residence Deans, or Graduate Life Office Deans;
         2. Faculty members;
         3. Academic advisors;

4. With appropriate authorization, representatives from Stanford's Vaden Health Center (Vaden);

5. With appropriate authorization, the student's treatment provider(s) or other health care professionals;

6. Member(s) of the University's threat assessment team; and/or

7. Such other individuals as may be appropriate in an individual matter.

   In each case, the Dean of Students will confer with a representative from the Office of Accessible Education (OAE) with expertise in mental health disabilities.

vi. Particular attention will be paid to the criteria for imposing an involuntary leave of absence, specifically:

   1. whether current knowledge about the individual's medical condition and/or the best available objective evidence indicates that a student poses a significant risk to the health or safety of a member of the University community;

   2. whether a student is unable or unwilling to carry out substantial self-care obligations and poses a significant risk to their own safety not based on mere speculation, stereotypes, or generalizations; and/or

   3. whether a student's behavior severely disrupts the University environment.

      The individualized assessment as to each factor, based on reasonable judgment that relies on current medical knowledge or on the best available objective evidence, should ascertain: the nature, duration, and severity of the risk or disruption; the probability that the risk or disruption will actually occur; and whether reasonable modifications of policies, practices, or procedures will adequately mitigate the risk or disruption so as to eliminate the need for an involuntary leave of absence.

vii. The Dean of Students will give significant weight to the opinion of the student's treatment provider(s), including those identified by the student, regarding the student's ability to function academically and safely at the University with or without reasonable accommodations. If the Dean of Students determines that the information provided by the treatment provider(s) is incomplete, requires further explanation or clarification, or is inconsistent with other information in the student's record, the Dean of Students, with proper authorization, will contact the treatment provider(s) to obtain additional information. In certain circumstances, the University may require the student to undergo an additional evaluation by an independent and objective professional designated by Stanford, if the Dean of Students believes it will facilitate a more informed decision.

viii. Following these consultations and based on a review of the relevant documentation and information available, the Dean of Students will make a decision as to whether the student should be placed on an involuntary leave of absence, and will provide written notice of this decision to the student. The written notice of decision will include information about the student's right to appeal and to reasonable accommodations during the appeal process. The review and notice of decision under this policy should be done in a reasonably timely manner. Where students have been asked to remain away from the University while the review is underway, every effort will be made by the Dean of Students to reach a decision within one week, provided the student responds in a timely manner to requests for information and, if appropriate, evaluation.

   1. If an involuntary leave of absence is imposed. The written notice of decision to the student will set forth the basis for the decision and a time-frame for when the student must leave the University and when they may be eligible to return to the University and the conditions and/or requirements the student will need to satisfy to be eligible for return. The written notice will also inform the student of their right to reasonable accommodations in the return process and will provide contact information for OAE and the Process Resource. The length of the leave will be determined on an individual basis.

   2. If an involuntary leave of absence is not imposed. The Dean of Students may impose conditions and/or requirements under which the student is allowed to remain at the University.

ix. Within one week of receiving the decision of the Dean of Students, the student may submit an appeal of the decision in writing to the Vice Provost for Student Affairs or the Vice Provost's designee, who may not be the Dean of Students. The written request for appeal must specify the particular substantive and/or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the decision of the Dean of Students. The review by the Vice Provost for Student Affairs or the Vice Provost's designee will be limited to the following considerations:

   1. Were the proper facts and criteria brought to bear on the decision?

   2. Is there any new information not previously available to the student that may change the outcome of the decision-making process?

   3. Were there any procedural irregularities that materially affected the outcome of the matter to the detriment of the appellant?

   4. Given the proper facts, criteria, and procedures, was the decision a reasonable one?

After reviewing the matter fully, the Vice Provost for Student Affairs or the Vice Provost's designee will issue a written decision affirming, modifying, or reversing the decision to place the student on an involuntary leave of absence. The Vice Provost's decision shall be final, and no other appeals or grievance procedures are available.

b. Implications of an Involuntary Leave of Absence

i. Student status. Students on a leave of absence generally retain their admitted student status; however, they are not registered and therefore do not have the rights and privileges of registered students.

ii. Housing. Consistent with Stanford's policies and procedures, students assigned to a University residence are subject to the terms of the University Residence Agreement. However, as set forth on the Registrar's Office Leave of Absence website, students with medical disabilities (including mental health disabilities) that require University medical services may petition to remain in campus housing for one term while on leave. Students who leave the University before the end of a term may be eligible to receive refunds of portions of their housing charges. Eligibility criteria for refunds are set

forth in the Residence Agreement which is found on the Residence Agreement website (https://rde.stanford.edu/studenthousing/apply/residence-agreement/). (https://rde.stanford.edu/studenthousing/apply/residence-agreement/)

iii. Effective date(s) of leave. A student must leave the University within the timeframe set forth by the Dean of Students. The leave will remain in effect until (1) it is determined after an individualized assessment that the student is able to return to the University with or without reasonable accommodations and (2) the student has complied with any University requirements applicable to all students returning from a leave and all of the conditions mandated by the Dean of Students and/or the Vice Provost.

iv. Notification. At any time during the leave process, the Dean of Students may notify a

student's parent, guardian, emergency contact, or other individual, consistent with the law, if notification is deemed appropriate.

v. Association with the University while on leave. Unless expressly permitted by the Dean of Students in writing, students on an involuntary leave of absence are not permitted to be present at the University and are not permitted to engage in any University-related activities, including on-campus employment.

vi. Coursework taken while on leave. Consistent with Stanford's policies and procedures, academic credit for work done elsewhere may be allowed towards a Stanford degree. Students should refer to the "Transfer Work (p. 82)" section of the Stanford Bulletin and consult with the Registrar's Office and their department prior to taking any coursework while on an involuntary leave of absence.

vii. SUnet ID privileges. Unless expressly prohibited by the Dean of Students in writing, students on leave generally may retain their SUnet ID privileges, including their Stanford email account.

viii. Transcript notation. Students on a leave of absence will have a notation on their transcript that reads "Leave of Absence."

ix. Tuition and fees. Consistent with Stanford's policies and procedures, students who leave the University before the end of a term may be eligible to receive refunds of portions of their tuition. See the (https://registrar.stanford.edu/students/tuition-and-fees/tuition-refund-schedule/) Registrar's Tuition Refunds (https://registrar.stanford.edu/students/tuition-and-fees/tuition-refund-schedule/) page for a schedule of refunds.

x. Meal Plan. Consistent with Stanford's policies and procedures, a meal plan refund is based on the date when a student moves out of University residence and is approved under conditions as specified in the Residence Agreement. Students with questions about residential meal plan refunds should contact the central office of Stanford Dining.

xi. Visa Status. International students (F-1 and J-1 Visa holders) placed on an involuntary leave of absence must speak with a Bechtel International Center advisor regarding their visa status.

2. Request for Return

a. For general requirements applicable to all students returning to Stanford after a leave of absence, undergraduate students should refer to the Returning to Stanford (https://undergrad.stanford.edu/planning/academic-policies/returning-students/) website. Graduate students should consult with their academic department and a Graduate Life Office Dean. In addition to the general requirements all students must meet when returning to Stanford after a leave of absence, as well as any conditions mandated by the Dean of Students and/or the Vice Provost for return from an involuntary leave of absence as outlined below in section II.C, students seeking to return from an involuntary leave of absence for reasons of personal or community health and safety may be required to submit additional documentation related to the factors set forth in section I.A.6 as part of an individualized assessment. OAE will work with the students to provide reasonable accommodations in the return process as necessary.

b. A student must make a written request to the Dean of Students to return to the University. Generally, a student will not be allowed to return until one full quarter has elapsed or until the leave period in the involuntary leave of absence notification has elapsed, and all conditions and/or requirements are met.

c. The Dean of Students may require the student to provide evidence that the student, with or without reasonable accommodations, has sufficiently addressed the issues that previously established the criteria for imposing an involuntary leave of absence as set forth in section I.A.6, above. The Dean of Students may also ask, confer with, or seek information from others to assist in making the determination. The information sought may include:

   i. At the student's discretion, documentation of efforts by the student to address the issues that led to the leave

   ii. With appropriate authorization, release of academic records to inform treating clinicians

   iii. With appropriate authorization, release of treatment information to the extent necessary to determine if the student has sufficiently reduced the risk or disruption that led to the need for the involuntary leave

   iv. With appropriate authorization, consultation with Vaden to the extent necessary to determine if the student has sufficiently reduced the risk or disruption that led to the need for the involuntary leave

   v. Consultation with OAE

d. All returning students must meet the essential eligibility requirements and any technical standards of the University and, if applicable, the relevant school or department, with or without reasonable accommodations. If the Dean of Students is not satisfied that the student is ready to return to the University, the student will be notified in writing of the decision, including the reason for the decision, within a reasonable time after the student has submitted a request for return and required documentation.

e. A student not permitted to return may appeal the decision to the Vice Provost for Student Affairs following the procedure in section I.A.9.

3. Scope of the Policy and Relationship to Other University Policies

A leave of absence is an administrative process; it is not a disciplinary process. This policy and these procedures are not intended to be punitive and do not take the place of disciplinary actions that are in response to violations of Stanford's Fundamental Standard or other policies or directives, nor do they preclude the

removal or dismissal of students from the University or University-related programs as a result of violations of other University policies or school or departmental protocols. This policy does not limit the University's ability to place enrollment holds on students for reasons beyond the scope of this policy and nothing in this policy relieves a student of any financial obligations to the University that were in place at the time the involuntary leave of absence was imposed.

Nothing in this policy limits the power of the University to take administrative action to ensure the safety of the Stanford community. In exceptional circumstances, where the health or well-being of any person may be seriously affected, or where physical safety is seriously threatened, or where the ability of the University to carry out its essential operations is seriously threatened or impaired, the President or the President's designee, may summarily suspend, dismiss, or bar any person from the University or University-related programs. In all such cases, actions taken will be reviewed promptly, typically within one week, by the appropriate University authority.

In situations involving an imminent or ongoing threat of harm to the student or any other member of the University community, the Dean of Students, in the exercise of his or her reasonable judgment, may require a student to be immediately prohibited from entering Stanford's campus or facilities utilized for University programs or activities while the individualized assessment and review described in section I.A. are taking place. Such students will receive the written notice described in section I.A.2 as quickly as possible.

4. Requests for Reasonable Accommodation

Stanford is committed to providing equal access to all participants in University processes, including students with disabilities. Students with disabilities should contact the Office of Accessible Education (OAE) to request accommodations. Information about the support services OAE provides, types of accommodations offered, and appropriate documentation for accommodations, can be found on the OAE website: https://oae.stanford.edu/.

5. Related Resources

As noted herein, students placed on an involuntary leave of absence may have additional conditions and/or requirements they must meet prior to returning to the University, in addition to any University requirements applicable to all students returning from a leave.

- Undergraduate Students should consult the Returning to Stanford (https://undergrad.stanford.edu/planning/academic-policies/returning-students/) web page for generally applicable deadlines, information and resources.
- Graduate Students should consult with a Graduate Life Office (https://glo.stanford.edu/) Dean and their department for generally applicable deadlines, information and resources.

Students who are placed on an involuntary leave of absence may want to consult with the following offices, where appropriate:

- Office of Accessible Education (https://oae.stanford.edu/) (OAE) (https://oae.stanford.edu/)
- Financial (http://web.stanford.edu/dept/finaid/) Aid (http://web.stanford.edu/dept/finaid/)
- Student Financial (http://web.stanford.edu/group/fms/fingate/students/) Services (http://web.stanford.edu/group/fms/fingate/students/)
- University Housing (http://web.stanford.edu/dept/rde/cgi-bin/drupal/housing/)
- Vaden Health Center (http://vaden.stanford.edu/) (Vaden)
- Academic Advising (https://undergrad.stanford.edu/academic-advising-stanford/)
- Graduate Life (https://glo.stanford.edu/) Office (https://glo.stanford.edu/)
- Bechtel International (https://bechtel.stanford.edu/immigration/visa-types/f-1j-1-student-visas/leave-absence/) Center (https://bechtel.stanford.edu/immigration/visa-types/f-1j-1-student-visas/leave-absence/)

The Process Resource will be available to assist all students who are placed on an involuntary leave of absence with their questions about the process to return and resume their studies and life at Stanford.

Conferral of Degrees

Upon recommendation to the Senate of the Academic Council by the faculty of the relevant departments or schools and the Committee on Undergraduate Standards and Policy, degrees are awarded four times each year, at the conclusion of Autumn, Winter, Spring, and Summer quarters. All diplomas, however, are prepared and distributed after degree conferral in accordance to the distribution dates listed on the Registrar's Office (https://registrar.stanford.edu/students/diplomas/) web site.

Students must apply for conferral of an undergraduate or graduate degree by filing an Application to Graduate through Axess by the deadline for each term. The deadlines are published in the Academic Calendar (https://registrar.stanford.edu/resources-and-help/stanford-academic-calendar/). A separate application must be filed for each degree program and for each conferral term.

Requests for conferral are reviewed by the Office of the University Registrar and the student's department, to verify completion of degree requirements. Registration is required in the conferral term. Students with unmet financial or other University obligations resulting in the placement of a hold on their registration cannot receive a transcript, statement of completion, degree certificate, or diploma until the hold is released. An academic record where no other degree objective is being pursued is permanently frozen after the final degree conferral, and all subsequent grade change requests or changes to the student record are not permitted.

Students are typically expected to apply to graduate when they have completed their degree requirements. The University, however, reserves the right to confer a degree on a student who has completed all of the requirements for a degree even though the student has not applied to graduate; such an individual would then be subject to the University's usual rules and restrictions regarding future enrollment or registration.

Students who wish to withdraw a request for conferral or make changes to their Application(s) to Graduate can do electronically in Axess by the late application to graduate deadline on the academic calendar. Students who withdraw their graduation applications or fail to meet degree requirements must reapply to graduate in a subsequent term.

Stanford University awards no honorary degrees.

UNDERGRADUATE MAJOR UNIT REQUIREMENTS AND WIMS

School of Earth, Energy and Environmental Sciences

Major Department	Units required outside the dept./ program	Units required within the dept./ program	Total # of units	Notes/ Special Requirements
Earth Systems	62-111	21	83-132	internship, senior capstone and project
Energy Resources Engineering	min. 76	min. 18	min. 112	Senior Project and Seminar (ENERGY 199)
Geological Sciences	6-8	52-66	58-74	Geoscience research, field training/ capstone experience
Engineering Geology & Hydrogeology	55-81	19-31	85-101	-
Geophysics	27-45	24-42	69	Senior Seminar (GEOPHYS 199)

School of Engineering

Major Department	Units required outside the dept./ program	Units required within the dept./ program	Total # of units	Notes/ Special Requirements
Aeronautics and Astronautics	50	65	112	
Architectural Design	40	58	97	-
Atmosphere/ Energy	48-50	49-51	97-101	-
Bioengineering	68	39	107	-
Biomechanical Engineering	48-50	40	90-94	
Biomedical Computation	51-65	47-56	109-114	Two quarters guided research

COTERMINAL DEGREES

The coterminal degree program allows undergraduates to study for a Master of Arts (M.A.) or Master of Science (M.S.) degree while completing their bachelor's degree(s) in the same or a different department. To qualify for both degrees, a student must complete requirements for both the bachelor's degree (p. 31) and the master's degree (p. 65) as described under their respective sections of this bulletin.

Application and Admission to a Coterminal Master's Program

Undergraduates with strong academic records may apply for admission to a Stanford Master of Arts (M.A.) or Master of Science (M.S.) program (p. 65) that offers coterminal admission via the process outlined below. Any master's degree granting program may elect not to offer coterminal admission.

Eligibility Requirements

An undergraduate is eligible to apply for admission to a coterminal program once all of the following conditions have been met:

- An admitted coterminal student must have a minimum of one quarter overlap between the undergraduate and graduate degree programs. If this is not possible, students should consider applying as an external candidate via the Graduate Admissions (http://exploredegrees.stanford.edu/admissionandfinancialaid/#graduatetext) process. Such applicants are not coterminal students and coterminal policies do not apply.
- Completion of 120 units towards graduation as shown on the undergraduate transcript, including credit earned from transfer credit, Advanced Placement exams, and other external test credit.
- Completion of six non-Summer quarters at Stanford; or two non-Summer quarters at Stanford for transfer students.
- Declaration of an undergraduate major.
- Students may apply to one coterm program per quarter, and may not apply to another coterm master's program until the admissions process for the initial application has been completed, including the student's response to the offer of admission (if admitted).

Undergraduates interested in applying to a coterm program should contact the coordinator of coterminal advising in Academic Advising (https://advising.stanford.edu). Note that departments may have additional eligibility requirements, so students are encouraged to check with the department prior to applying for the coterm program.

Application Deadlines

There are two application deadlines in the coterm process: the application deadline that students must submit their completed applications to their departments by, and the quarterly deadline that all admitted coterm applications must be sent to the Registrar's office for program activation. Coterm applicants are responsible for meeting all eligibility requirements and submitting their completed coterm application to the department by the department's coterm application deadline. Coterm applicants should contact their prospective coterm department for more information about the coterm application deadline. Departments are responsible for routing approved coterm applications to the Registrar's office for processing. Approved coterm applications are processed by the Registrar's office every quarter, and coterm department administrators are required to submit approved coterm applications to the Registrar's Office no later than the last day of classes of the quarter prior to the coterm matriculation quarter.

Application Fee

Students who accept an offer of admission and are matriculated into the graduate degree program are assessed a $125 coterm application fee.

Eligibility for a coterm graduate application fee waiver is based on the Financial Aid Office's evaluation of your need-based aid application. Those from families with income below $125,000 and typical assets for that income range will qualify. The waiver is automatically applied and no special request is necessary.

Application Process

To apply for admission to a coterm master's program, students must submit all of the following to the prospective graduate department:

- Coterm Application (https://www.applyweb.com/stanterm/) (online). Please visit the Coterm Application Information page (https://registrar.stanford.edu/students/coterminal-degree-programs/applying-coterm/coterm-application-information/) for links to department web sites for additional application requirements
- Statement of purpose
- Preliminary program proposal (https://stanford.app.box.com/v/progpropma/)
- Undergraduate Coterm Application Approval form (https://stanford.app.box.com/v/ug-coterm-application-approval/) (submitted with online coterm application)
- Two letters of recommendation from Stanford professors
- Current Stanford transcript

Note: Graduate Record Examination (GRE) scores and additional requirements may be specified by the prospective program, and may be found in the bulletin and on department websites (links to department websites found on the Registrar's web site (https://registrar.stanford.edu/students/coterminal-degree-programs/applying-coterm/coterm-application-information/)).

Admission Process

Each department is responsible for its admissions/acceptance decisions for coterm applicants. Once a coterm application is approved, the departments create the coterm application record in Axess (department staff should refer to the Coterm Resources for Staff (https://registrar.stanford.edu/staff/coterminal-resources-staff/) page). Additionally, the department must route the completed and approved coterm application to the Office of the Registrar by the quarterly deadline.

If the coterm program permits deferral, students may defer admission to the coterm program and the first graduate quarter to a later quarter as long as their graduate career has not yet been activated and if the later matriculation will still meet all University and departmental requirements for coterm admission. Deferring a coterm matriculation may require that students postpone the conferral of their undergraduate degree. If the graduate coterm career has been activated, then deferring to a later term is not an option. Deferral is coordinated with the master's degree program, prior to the program submitting the completed application to the Office of the University Registrar.

First Graduate Quarter

The first graduate quarter is the quarter in which the coterm student first matriculates into their master's degree program. The first graduate quarter does not necessarily correspond to the first quarter in which a student enrolls in a course in the graduate career, nor is it affected by course transfer (please see Coterm Course Transfer (https://

registrar.stanford.edu/students/procedures-coterminal-students/coterm-course-transfer/) for additional information).

Admitted students must have at least one quarter of overlap in the undergraduate and graduate career prior to conferring their undergraduate degree. For example, if the first graduate quarter for the coterm degree is Spring Quarter, then the earliest that the undergraduate degree can be conferred is the Spring Quarter. Once matriculated, students may enroll in graduate courses, however, enrollment in graduate courses is not required by the University in the overlap quarter. Students should work with their department to complete a Program Proposal (https://stanford.app.box.com/v/progpropma/) that outlines the graduation/program completion plan by the end of the first graduate quarter.

Adding or Changing Master's Degree Programs

Students wishing to add a second graduate program to their academic plans may only do so after the conferral of the undergraduate degree. Adding or changing a graduate program after the conferral of the undergraduate degree can be done via the Graduate Program Authorization petition. For additional information, see the "Changes of Degree Programs (http://exploredegrees.stanford.edu/graduatedegrees/#degreeprogresstext)" section of this bulletin, the Graduate Program Authorization section (https://gap.stanford.edu/handbooks/gap-handbook/chapter-5/subchapter-1/page-5-1-1/) of the Graduate Academic Policies and Procedures site, and the Graduate Program Authorization (https://registrar.stanford.edu/students/graduate-degree-progress/graduate-program-authorization-petition/) page on the Registrar's web site.

Coterm students who wish to change from one master's degree to another before conferral of the bachelor's degree must submit an approved request to withdraw from the original degree program using the Request to Permanently Withdraw from Degree Program (https://stanford.box.com/permanent-withdraw/) form, in addition to a completed and approved application for admission to the new program in the same quarter. In this case, all courses, including any prior course transfer from the undergraduate career, remain in the graduate career. The new degree program may choose not to approve all courses towards the new master's degree program requirements. The student may elect to transfer courses back to the undergraduate career if the bachelor's degree has not yet been conferred. Coterms interested in doing a coterm program switch should contact the coordinator of coterminal advising in Academic Advising (https://advising.stanford.edu). *Note*: The discontinued program is listed on the transcript in a 'Discontinued' status, though it is not considered an academic demerit.

Residency Requirement

Each type of degree offered at Stanford (for example, Bachelor of Arts, Master of Science) has a requirement, called residency for graduate degrees, based on the minimum number of academic units required for the degree. Requirements are described in the Bachelor of Arts (B.A.), Bachelor of Science (B.S.) (p. 31) and Residency Policy for Graduate Students (p. 72) sections of this bulletin. It is Stanford University's general policy that units are applicable toward only one degree, that is, units may not normally be duplicated or double-counted toward the residency requirement for more than one degree. Courses counted towards the undergraduate degree(s) and graduate degree(s) are separately recorded on the undergraduate and graduate transcripts, respectively.

Students pursuing coterminal bachelor's and master's degrees are expected to meet the minimum requirements for each of the degrees, as follows:

Undergraduate Degrees

- *Bachelor's degree:* 180 units for the bachelor's degree
- *Dual undergraduate degree:* 225 units for the bachelor's degree

Master's Degrees

- 45 units (or higher unit-requirement, as determined by the graduate program)
- All 45 units must be from course work completed at Stanford and must be courses at or above the 100-level. Additionally, at least 50 percent of those must be courses designated primarily for graduate students. Department specifications for the level of course work accepted for a particular master's degree program may be higher than the University's specifications. Students may not petition to change the career for a completed course from the undergraduate to the graduate level.

To a limited extent, coterminal students are permitted to move courses between the undergraduate and graduate careers as described in the "Coterminal Course Transfer (p. 58)" section in the Enrollment and Degree Progress tab of this section of the bulletin.

Tuition and Tuition Groups

Coterm students are assigned to either the undergraduate coterm tuition group or the graduate coterm tuition group. The tuition group dictates a student's tuition rates, enrollment policies, access to some University services and benefits, and degree progress standards. A coterm student is subject to graduate tuition assessment and adjustment policies once placed in the coterm graduate tuition group (see below for information about when coterm students are moved into the graduate coterm tuition group).

Coterm students are not eligible for undergraduate special registration statuses (with the exception of Graduation Quarter, if the student is applying to confer both their undergraduate and graduate degrees in the same quarter). Coterm students may only be eligible to apply for graduate special registration statuses once their undergraduate degrees have been conferred.

Tuition and fee information is available on the Office of the University Registrar tuition website (https://registrar.stanford.edu/students/tuition-and-fees/).

Undergraduate Coterm Tuition Group

Coterm students are normally placed in and remain in the undergraduate coterm tuition group until the completion of 12 undergraduate full-tuition quarters, or until conferral of the undergraduate degree(s), if that happens earlier. For students with transfer credit (not AP or other test credit), 15 transfer units equals one Stanford quarter. For students with Stanford Summer Quarter units, 15 units equals one Stanford quarter; units earned in multiple Summer Quarters are not added together in this calculation.

Students in the undergraduate coterm tuition group are assessed the undergraduate tuition rate, and may enroll in as few as 12 units and up to 20 units each quarter (regardless of which career courses are assigned to). Students enrolled in over 20 units across both careers are subject to an enrollment hold effective the following quarter.

Graduate Coterm Tuition Group

Coterminal students in the graduate tuition group are assessed either the regular graduate tuition rate or the graduate Engineering tuition rate. Students in the graduate coterm student group are assessed additional graduate or Engineering tuition on a per-unit basis beginning with the 19th unit. Tuition and fee information is available on the Office of the University Registrar tuition website (https://registrar.stanford.edu/students/tuition-and-fees/). Once a student is

placed in the graduate coterm tuition group, they may not move back to the undergraduate coterm tuition group.

Transitions to the graduate billing group

Coterminal students in the undergraduate tuition group are moved to the graduate tuition group if any one of the following occurs:

Conferral of Undergraduate Degree

Once coterm students have conferred their undergraduate degree(s), they are automatically moved to the graduate tuition group.
Once coterm students have been moved to the graduate tuition group, they may not move back to the undergraduate tuition group.

Student-initiated Request (if eligible)

Coterm students in the undergraduate tuition group who have fewer than 12 quarters at Stanford but who want to transition to the graduate tuition rate may request to be moved to the graduate tuition group if they meet all of the below eligibility requirements. If the student meets these conditions, then the student may request to be moved to the graduate billing group by submitting a SU Services and Support Request (https://stanford.service-now.com/student_services/?id=sc_cat_item&sys_id=5e24047c13df93c08a9175c36144b011) ticket by the deadline.

Eligibility for coterm billing switch request

- Student must have an active graduate career. Students with a pending coterm application can request to move to the graduate tuition group only after they receive email confirmation that their coterm program has matriculated.
- Student must have met minimum number of units to be eligible (see the chart below). All undergraduate units, including transfer and test credit, are used in calculating unit completion.
  - BA, BS, BAH, BSH (including double majors); BAS; BASH: 180 units
  - BA + BS or BAH + BSH (official dual degrees): 225 units
- Must submit a SU Services and Support Request (https://stanford.service-now.com/student_services/?id=sc_cat_item&sys_id=5e24047c13df93c08a9175c36144b011) ticket to initiate the switch from undergraduate to graduate billing.

When Students Reach their Permissible Limit in Undergraduate Billing

Students are automatically moved from the undergraduate billing group to the graduate billing group once they have completed a certain number of undergraduate quarters.

Undergraduate quarters are calculated in all three of the below ways:

- Any non-Summer Quarter (full- or part-time) in which a student is enrolled.
- 15 transfer units (excluding AP or other test credit) are equal to one Stanford quarter. Example: a coterm student has completed 10 non-Summer Quarters at Stanford, but also has 30 units of external transfer credit posted to their record; that would mean the student has (for the purpose of coterm billing) 12 quarters completed, and the student would thus be moved to the graduate billing group.
- 15 units of Stanford Summer Quarter enrollment (in a single quarter) are equal to one Stanford quarter.

Once a student has completed 12 quarters (or 15 quarters, if pursuing a dual/concurrent bachelor's degree; see below), they are automatically switched to graduate billing and notified via email. Once students have been moved to the graduate billing group, they may not be moved back to the undergraduate billing group. Students should be advised that external transfer credit and Summer Quarter units can impact how soon they are moved to the graduate billing group, and should plan accordingly.

- BA (including double majors, honors), BS (including double majors, honors), and BAS (including honors) may remain in the undergraduate billing group up to 12 quarters, and are automatically moved to the graduate billing group in their 13th quarter.
- BA + BS (dual/concurrent bachelor's degree) may remain in the undergraduate billing group up to 15 quarters, and are automatically moved to the graduate billing group in their 16th quarter.

Coterm students are traditionally not eligible for reduced graduate tuition rates below 8 units during Autumn, Winter, and Spring quarters prior to conferral of the undergraduate degree. However, coterm graduate students with disabilities covered under the Americans with Disabilities Act may enroll in an approved reduced course load as recommended by the Office of Accessible Education (OAE) (https://oae.stanford.edu/).

Coterm Students with Research or Teaching Assistantships

Coterm students who are eligible for a teaching (CA/TA) or research (RA) assistantship appointment must be in the graduate billing group in order to receive funding from their department. If a student is not already in the graduate billing group then the student must initiate the request to be moved to the graduate coterm tuition group (see the "Student-initiated Request" section above). Students holding a 20 hour (50%) teaching or research assistantship may not enroll in more than 10 total units. Additionally, once students have moved to the graduate coterm tuition group, they may not be moved back to the undergraduate coterm tuition group even if they no longer hold an assistantship appointment.

See Administrative Guide Memo 10.2.1 Graduate Student Assistantships (https://adminguide.stanford.edu/chapter-10/subchapter-2/policy-10-2-1/), and GAP 7.3 Assistantships (http://gap.stanford.edu/7-3.html), for detailed discussion of assistantship policy.

Enrollment and Degree Progress

Starting with the first graduate quarter, students have an active graduate career and an active undergraduate career. Students are responsible for enrolling in courses each quarter, and assigning them to the appropriate career. Courses assigned to the graduate career count towards the master's degree and courses assigned to the undergraduate career count towards the bachelor's degree. Students in the undergraduate coterm tuition group may not enroll in more than a total of 20 units for the quarter across both careers. Students in the graduate coterm tuition group may not enroll in more than a total of 24 units for the quarter across both careers. Students appointed to a 20-hour (50%) teaching and/or research assistantship may not enroll in more than 10 units.

Academic Progress

Prior to the conferral of the undergraduate degree(s), a coterm student's academic progress is monitored by the coordinator of coterminal advising in Academic Advising (https://undergrad.stanford.edu/advising/coterm/) (a unit of the office of the Vice Provost for Undergraduate Education) in conjunction with the student's advisers and the graduate program. After conferral of the undergraduate degree(s), the student's degree progress is monitored by the graduate adviser and graduate program.

All courses taken during a quarter, whether enrolled in the undergraduate or graduate career, are used to assess whether minimum academic progress standards, including number of units enrolled and number of units earned, have been met. Students in the undergraduate coterm tuition group are evaluated according to the undergraduate degree progress standards. These standards are described in the "Academic Progress (p. 94)" section of this bulletin. Students in the graduate coterm tuition group are evaluated according to the graduate degree progress standards. These standards are described in the "Minimum Progress Requirements for Graduate Students (p. 70)" section of this bulletin.

Student are expected to maintain an undergraduate grade point average (GPA) which meets the University's undergraduate standards, and a graduate GPA which meets University and program requirements for graduate progress. Courses which have been transferred from the undergraduate to the graduate career are calculated as part of the graduate GPA, and vice versa.

Coterm Course Transfer

After accepting admission to a master's degree program, coterm students may request transfer of Stanford courses from the undergraduate to the graduate career to satisfy requirements for the master's degree and/or from the graduate career to the undergraduate career to satisfy requirements for the bachelor's degree(s). Transfer of courses between the undergraduate and graduate careers requires review and approval by both the undergraduate and graduate departments.

Unless a master's degree program specifies otherwise in this bulletin, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. Neither Summer Quarter nor quarters spent on approved full term leave of absence are included in the quarter-back count. In exceptional circumstances, a student may petition the exceptions committee of the Committee on Graduate Studies to transfer courses taken more than three quarters back. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.Individual programs have the discretion to set their own policy regarding course transfer for their coterm master's students, provided that no student counts a course taken earlier than the first quarter of sophomore year. The program's policy is stated in the relevant department or program section of this bulletin. Students should visit the Coterm Course Transfer web page (https://registrar.stanford.edu/students/coterminal-degree-programs/coterm-course-transfer/) on the Registrar's Office website for information about how to request course transfers.

All course transfer requests must be submitted to the Student Services Center no later than the Late Application to Graduate deadline of the intended bachelor's degree conferral quarter. Course transfers between careers are not possible after the bachelor's degree has been conferred. Undergraduate credit from transfer courses or tests may not be transferred to the graduate career.

Advising, Program Proposal, and Time Limit

In the first graduate quarter, a coterm student must be assigned an adviser in the master's program for assistance in planning a program of study to meet the requirements for the master's degree. The plan is outlined on the Program Proposal for a Master's Degree (https://stanford.box.com/v/progpropma/), which is approved by the master's program by the end of the first graduate quarter. The preliminary program proposal from the coterm application may inform the Program Proposal, but does not satisfy this master's degree requirement. The course of study for each student's master's degree should be outlined on the student's Program Proposal form. The decision as to which courses a program approves in the student's master's program proposal, including changes from the typical curriculum, is within the purview of the department or program. The conversation between the student and the student's graduate adviser is important in this regard.

The master's program proposal must meet University minimum requirements for the master's degree, including at least 45 units taken at Stanford, all courses at 100-level or above, 50% of units designated primarily for graduate students (typically 200-level or above). All courses must be in the graduate career.

All requirements for a master's degree must be completed within three years after the first graduate quarter. An extension requires review of academic performance by the department or program, and is within the discretion of the program. See policies in the "Master's Degrees (p. 65)" section of this bulletin.

Leaves of Absence and Reinstatement

Coterm students who wish to take a leave of absence are subject to the Leave of Absence policies for undergraduate and graduate students, as described in the "Leaves of Absence and Reinstatement (Undergraduate) (p. 42)" and "Leaves of Absence (Graduate) (p. 74)" sections of this bulletin. Graduate students, including coterm students, must obtain permission from the master's degree program. A coterm student whose undergraduate degree has not been conferred must also obtain permission from Academic Advising (https://undergrad.stanford.edu/advising/coterm/), and may not take a leave of absence unless approved for both the graduate and undergraduate leave. Coterm students are permitted to request a leave of absence for their first graduate quarter. Leaves of absence are granted for a maximum of one calendar year, or four quarters. An extension of leave, for a maximum of one year or four quarters, is approved only in unusual circumstances. Leaves of absences may not exceed a cumulative total of two years (8 quarters including summer quarters), including both undergraduate and graduate programs.

Coterm students who are seeking to reinstate into both their undergraduate and graduate degree programs must follow both sets of policies as described in the "Leaves of Absence and Reinstatement (Undergraduate) (p. 42)" and "Leaves of Absence (Graduate) (p. 74)" sections of this bulletin.

Degree Conferral

Students must apply for conferral of each degree separately by filing an Application to Graduate in Axess by the deadline for the expected graduation term(s). The deadlines are available in the Academic Calendar (https://registrar.stanford.edu/academic-calendar/). The master's degree must be conferred simultaneously with, or after, the bachelor's degree. Coterm students may not confer the master's degree prior to the conferral of the undergraduate degree. Coterm students should refer to the Coterm Student Graduation Checklist web page (https://registrar.stanford.edu/students/graduation/coterm-student-graduation-checklist/) on the Registrar's Office website for important information about items needed for degree conferral.

Leaves of Absence and Reinstatement (Coterm)

A Leave of Absence allows a student to take a break from enrollment either before or after a quarter begins. There may also be conditions associated with a leave, which are outlined below. Undergraduates are admitted to Stanford University with the expectation that they complete their degree programs in a reasonable amount of time, usually within four years. Additionally, students pursuing a coterminal master's degree are expected to complete their master's degrees within three years after the first graduate quarter as outlined in the "Time Limit for the Completion of the Master's Degree (p. 65)" section of this bulletin.

Leaves of absences for coterms may not exceed a cumulative total (across both careers) of two years or eight quarters.

COVID-19 Policies for Coterm Leave of Absence in Academic Year 2020-21

Coterms in the undergraduate tuition group are considered undergraduates with respect to academic policies. Coterms in the graduate tuition group are considered graduate students for the purpose of academic policies. For more information about tuition groups, when tuition groups can switch from undergraduate to graduate, and instructions for how to check which tuition group a student is in, see the

Registrar's Coterm Tuition Assessment (https://registrar.stanford.edu/coterm-tuition-assessment/) website.

All coterm students wishing to file for a leave of absence must submit a Coterm Leave of Absence eForm (available in the eForms portal in the Student tab in Axess). Coterms should discuss any plans for a leave with an undergraduate or coterm advisor (https://undergrad.stanford.edu/advising/about-your-advisors/meet-specialized-advising-team-sweet-hall/) and also their coterm master's department. International coterms should also discuss leave of absence plans with the Bechtel International Center (https://bechtel.stanford.edu/immigration/visa-types/f-1j-1-student-visas/leave-absence/).

Coterm Students in the Undergraduate Tuition Group

- Any approved leave of absence taken during academic year 2020-21 is not counted against a student's maximum allowable eight quarters of leave.
- Coterms in the undergraduate tuition group are expected to enroll in three of four quarters during the 2020-21 academic year, with one quarter considered the student's Flex Term. If students are unable or elect not to enroll in three quarters, then they must apply for a leave of absence for those quarter(s). Leaves of absence information for International undergraduates can be found below.
- Coterms in the undergraduate tuition group may take one quarter away from Stanford with no enrollment without having to file for a leave of absence (LOA), this term being considered the student's Flex Term. If students take more than one quarter away from Stanford, then a Leave of Absence eForm (available in the eForms portal in the Student tab in Axess) is required, or the student would be discontinued for no enrollment in their second quarter with no enrollment. See the Discontinuation and Reinstatement section below for more information.

Coterm Students in the Graduate Tuition Group

- Coterm students in the graduate tuition group re expected to enroll based on the guidelines for graduate students for academic year 2020-21.
- Any leave of absence taken during academic year 2020-21 is counted against a student's allowable eight quarters of leave.
- Students should be aware that a leave of absence, other than for pregnancy or parental leave, does not automatically extend the candidacy period (please refer to the GAP (https://gap.stanford.edu/handbooks/gap-handbook/chapter-5/subchapter-3/page-5-3-1/)).

Students on leave of absence are not registered at Stanford and, therefore, do not have the rights and privileges of registered students. Students on leave may complete course work for which an 'Incomplete' grade was awarded in a prior term (unless doing so places an undue burden on the part of an instructor, department, staff, or other university resource) and are expected to comply with the maximum one-year time limit for resolving incompletes; a leave of absence does not stop the clock on the time limit for resolving incompletes.

When a student is granted or placed on a leave of absence after the beginning of the term, courses in which the student was enrolled after the final study list deadline appear on the student's transcript and show the symbol 'W' (withdraw). For additional information regarding satisfactory academic progress, refer to the "Academic Progress (https://exploredegrees.stanford.edu/academicpoliciesandstatements/#academicstandingtext)" section of this bulletin. Information on tuition refunds is available in the "Refunds (https://exploredegrees.stanford.edu/tuitionfeesandhousing/#refundstext)" section of this bulletin.

COVID-19 Policy on Leaves of Absence for International Undergraduates

International undergraduates are expected to enroll in three consecutive quarters during the 2020-21 academic year. If undergraduates are unable to or elect to not enroll in three consecutive quarters, they must apply for a Leave of Absence for those quarter(s). International undergraduates are required to consult with a Bechtel International Center immigration advisor well before requesting a Leave of Absence. The Leave of Absence may complicate an international student's legal status and ability to remain and work in the U.S.

Voluntary Leave of Absence

Students have the option of taking a voluntary leave of absence for up to one year, or four quarters, upon filing a Leave of Absence form with the Office of the University Registrar and receiving approval. Students taking a voluntary leave pursuant to the involuntary leave of absence and return policy (https://deanofstudents.stanford.edu/involuntary-leave-absence-and-return-policy-effective-jan-4-2020/) have a two business day revocation period after submitting an LOA eForm, and may revoke their request to take a voluntary leave by returning to their submitted eForm in Axess and clicking "Cancel." Additionally, students may have additional conditions imposed by the Dean of Students and/or the Vice Provost for Student Affairs.

Except where unexpected circumstances necessitate an immediate leave, students are expected to file for a voluntary leave of absence 30 days prior to the quarter in which the leave will begin. The leave may be extended for up to one additional year, or four quarters, provided the student files a Leave of Absence Extension eForm (available in the eForms portal in the Student tab in Axess) before the end of the initial one-year leave. Leaves requested for a longer period than one year, or four quarters, are approved only in exceptional circumstances (for example, mandatory military service). Leaves of absence for coterm students may not exceed a cumulative total of two years (eight quarters including Summer Quarters) across both the undergraduate and graduate academic careers.

Coterm students who take an approved leave of absence while in good standing from a quarter for which they have registered in advance and do not wish to attend may enroll in the University for the subsequent quarter with the privileges of a continuing student. For coterm students who wish to withdraw from the current quarter after the beginning of the term, courses in which the student was enrolled after the final study list deadline appear on the student's transcript and show the symbol 'W' (withdraw). For additional information regarding satisfactory academic progress, refer to the "Academic Progress (p. 94)" section of this bulletin. In either situation, the University may condition its approval of a petition for leave of absence on the student's meeting such requirements as the University deems appropriate in the individual case for the student to be eligible to return (such as, in the case of a leave for medical reasons, proof of treatment and/or an interview with a provider at Vaden Health Center (http://vaden.stanford.edu/) or Counseling and Psychological Services (https://vaden.stanford.edu/caps-and-wellness/counseling-and-psychological-services-caps/) or its designee). Coterms who wish to withdraw from the current quarter, or from a quarter for which they have registered in advance and do not wish to attend, must file a Leave of Absence e-form (in Axess).

Information on tuition refunds is available in the "Refunds (https://exploredegrees.stanford.edu/tuitionfeesandhousing/#loa-refunds)" section of this bulletin. For a full refund, petitions must be received by the Office of the University Registrar no later than the first day of classes for the quarter.

Discontinuation and Reinstatement

COVID-19 Policies for Coterm Discontinuiation in Academic Year 2020-21

In academic year 2020-21, a coterm in the undergraduate billing group may be discontinued from active status in their academic degree program if the student:

- fails to be enrolled by the study list deadline of their second term away from Stanford; or
- fails to be approved for a leave of absence by the start of the term of their second term away from Stanford; or
- voluntarily terminates undergraduate studies; or
- is dismissed for academic reasons; or
- is expelled from the University.

Students who fail to be either enrolled by the final study list deadline of their second term away from Stanford, or who fail to submit a Leave of Absence eForm by the published deadline in their second term away from Stanford, must apply for reinstatement; more information about the coterm reinstatement process can be found in the Coterm Reinstatement (https://registrar.stanford.edu/students/coterminal-degree-programs/coterm-reinstatement/) section of the Registrar's website.

This policy is applicable to the four quarters in academic year 2020-21 only; additional policy will be published prior to academic year 2021-22.

Reinstatement

The University is not obligated to approve reinstatement requests from students. Coterm applications for reinstatement are reviewed by both the Vice Provost for Undergraduate Education and the coterm master's department, and are further subject to the approval of the Faculty Senate Committee on Undergraduate Standards and Policy or its designees. The Committee or its designees may determine whether the application for reinstatement will be approved or not, and/or the conditions a student must meet in order to be reinstated. Reinstatement decisions are within the discretion of the University and may be based on the applicant's status when last enrolled, activities while away from campus, the length of the absence, the perceived potential for successful completion of the program, as well as any other factors or considerations regarded as relevant to the Vice Provost for Undergraduate Education, the Committee, or their designees.

Students who have been expelled from Stanford University are not permitted to apply for reinstatement.

Coterm students who wish to terminate study (e.g., for transfer to another institution) should submit a properly endorsed Request to Permanently Withdraw from Degree Program eForm (available in the eForms portal in the Student tab in Axess).

Coterm students with an active undergraduate program may request to withdraw from both of their active degrees (bachelor's and master's) or only from their graduate program. Coterm students with an active undergraduate program may not withdraw from only the undergraduate program and keep the graduate program active.

Involuntary Leave of Absence and Return Policy

In effect as of January 4, 2020

Stanford University is committed to the safety, health and well-being of the campus community. The University recognizes that students may experience situations that significantly limit their ability to function successfully or safely in their role as students. In such circumstances, students should consider requesting a leave of absence. A leave of absence permits students to take a break from the University and their studies, so that they may address the issues that led to the need for the leave and later return to the University with an enhanced opportunity to achieve their educational goals. Students will be given the option to take a voluntary leave of absence before a decision is made with respect to an involuntary leave.

1. ## Involuntary Leave of Absence

   Requiring a student to take a leave of absence is rare and, subject to Section III, only happens when current medical knowledge and/or the best available objective evidence indicates to the Senior Associate Vice Provost and Dean of Students or their designee (hereinafter, Dean of Students) that there is a significant risk to the student's health or safety or the health or safety of others, or the student's behavior severely disrupts the University environment, and no reasonable accommodations can adequately reduce that risk or disruption.

   Consistent with Stanford's Nondiscrimination Policy (p. 123), Stanford prohibits unlawful discrimination on the basis of any type of disability or any other characteristic protected by applicable law in the administration of the University's programs and activities. Stanford offers a range of resources, support services and accommodations to address the physical and mental health needs of students. However, on rare occasion, a student's needs may require a level of care that exceeds the care the University can appropriately provide. Where current knowledge about the individual's medical condition and/or the best available objective evidence indicates that a student poses a significant risk to the health or safety of a member of the University community, where a student is unable or unwilling to carry out substantial self-care obligations and poses a significant risk to their own safety not based on mere speculation, stereotypes, or generalizations, or where a student's behavior severely disrupts the University environment and the student does not want to take a voluntary leave, the Dean of Students has the authority to place a student on an involuntary leave of absence. Before placing any student on an involuntary leave of absence, Stanford will conduct an individualized assessment, consulting with the Office of Accessible Education (OAE) to determine if there are reasonable accommodations that would permit the student to continue to participate in the University community without taking a leave of absence.

   The Dean of Students may be notified about a student who may meet the criteria of an involuntary leave of absence from a variety of sources including, but not limited to, the student, the student's academic advisor, Residential Education staff, Graduate Life Office staff, an academic department, or a member of the University's threat assessment team. If the Dean of Students deems it appropriate, these procedures will be initiated.

   a. **Procedures for Placing a Student on an Involuntary Leave of Absence**

      i. The Dean of Students will consult with the Office of Accessible Education (OAE) prior to making a decision to impose an involuntary leave of absence.

      ii. The Dean of Students will issue a notice to the student in writing that an involuntary leave of absence is under consideration. The written notice will include the reason(s) why the student is being considered for an involuntary leave, contact information for OAE, which can provide information about accommodations, and a copy of this policy. In addition,

the notice will provide contact information for the Process Resource, an administrator outside of the decision-making process with knowledge of Stanford's involuntary leave of absence process who will serve as a neutral process resource to answer any student questions about the process from referral through return to Stanford. In the written notice, the student will be encouraged to respond before a decision regarding a leave of absence is made and will be given a specified time period within which to do so.

iii. The Dean of Students will consider potential accommodations and/or modifications that could obviate the need for an involuntary leave of absence, such as the option to take a voluntary leave of absence, academic accommodations, housing and dining accommodations, and modifications to University policies, rules, and regulations. Examples of academic, administrative, and housing accommodations that may be facilitated through the Office of Accessible Education (OAE) can be found on the OAE (https://oae.stanford.edu/) website.

iv. The student may be asked to execute an Exchange of Confidential Information Consent Form providing Stanford personnel temporary authority to get information from the student's healthcare provider(s) regarding issues relevant and appropriate to the consideration of an involuntary leave of absence when there is a need for the University to have access to that information as part of the interactive process and individualized assessment. If a student refuses to execute an Exchange of Confidential Information Consent Form or to respond within the timeframe set by the Dean of Students, the Dean may proceed with the assessment based on information in the Dean's possession at the time.

v. The Dean of Students will also confer, as feasible and when appropriate in a particular matter, with individuals regarding the need for an involuntary leave of absence. Although each case will vary, conferring individuals could include:

    1. Residence Deans, or Graduate Life Office Deans;
    2. Faculty members;
    3. Academic advisors;
    4. With appropriate authorization, representatives from Stanford's Vaden Health Center (Vaden);
    5. With appropriate authorization, the student's treatment provider(s) or other health care professionals;
    6. Member(s) of the University's threat assessment team; and/or
    7. Such other individuals as may be appropriate in an individual matter.

    In each case, the Dean of Students will confer with a representative from the Office of Accessible Education (OAE) with expertise in mental health disabilities.

vi. Particular attention will be paid to the criteria for imposing an involuntary leave of absence, specifically:

    1. whether current knowledge about the individual's medical condition and/or the best available objective evidence indicates that a student poses a significant risk to the health or safety of a member of the University community;
    2. whether a student is unable or unwilling to carry out substantial self-care obligations and poses a significant risk to their own safety not based on mere speculation, stereotypes, or generalizations; and/or
    3. whether a student's behavior severely disrupts the University environment.

    The individualized assessment as to each factor, based on reasonable judgment that relies on current medical knowledge or on the best available objective evidence, should ascertain: the nature, duration, and severity of the risk or disruption; the probability that the risk or disruption will actually occur; and whether reasonable modifications of policies, practices, or procedures will adequately mitigate the risk or disruption so as to eliminate the need for an involuntary leave of absence.

vii. The Dean of Students will give significant weight to the opinion of the student's treatment provider(s), including those identified by the student, regarding the student's ability to function academically and safely at the University with or without reasonable accommodations. If the Dean of Students determines that the information provided by the treatment provider(s) is incomplete, requires further explanation or clarification, or is inconsistent with other information in the student's record, the Dean of Students, with proper authorization, will contact the treatment provider(s) to obtain additional information. In certain circumstances, the University may require the student to undergo an additional evaluation by an independent and objective professional designated by Stanford, if the Dean of Students believes it will facilitate a more informed decision.

viii. Following these consultations and based on a review of the relevant documentation and information available, the Dean of Students will make a decision as to whether the student should be placed on an involuntary leave of absence, and will provide written notice of this decision to the student. The written notice of decision will include information about the student's right to appeal and to reasonable accommodations during the appeal process. The review and notice of decision under this policy should be done in a reasonably timely manner. Where students have been asked to remain away from the University while the review is underway, every effort will be made by the Dean of Students to reach a decision within one week, provided the student responds in a timely manner to requests for information and, if appropriate, evaluation.

    1. If an involuntary leave of absence is imposed. The written notice of decision to the student will set forth the basis for the decision and a time-frame for when the student must leave the University and when they may be eligible to return to the University and the conditions and/or requirements the student will need to satisfy to be eligible for return. The written notice will also inform the student of their right to reasonable accommodations in the return process and will provide contact information for OAE and the Process Resource. The length of the leave will be determined on an individual basis.
    2. If an involuntary leave of absence is not imposed. The Dean of Students may impose conditions and/or requirements under which the student is allowed to remain at the University.

ix. Within one week of receiving the decision of the Dean of Students, the student may submit an appeal of the decision

in writing to the Vice Provost for Student Affairs or the Vice Provost's designee, who may not be the Dean of Students. The written request for appeal must specify the particular substantive and/or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the decision of the Dean of Students. The review by the Vice Provost for Student Affairs or the Vice Provost's designee will be limited to the following considerations:

1. Were the proper facts and criteria brought to bear on the decision?
2. Is there any new information not previously available to the student that may change the outcome of the decision-making process?
3. Were there any procedural irregularities that materially affected the outcome of the matter to the detriment of the appellant?
4. Given the proper facts, criteria, and procedures, was the decision a reasonable one?

After reviewing the matter fully, the Vice Provost for Student Affairs or the Vice Provost's designee will issue a written decision affirming, modifying, or reversing the decision to place the student on an involuntary leave of absence. The Vice Provost's decision shall be final, and no other appeals or grievance procedures are available.

b. **Implications of an Involuntary Leave of Absence**

i. Student status. Students on a leave of absence generally retain their admitted student status; however, they are not registered and therefore do not have the rights and privileges of registered students.

ii. Housing. Consistent with Stanford's policies and procedures, students assigned to a University residence are subject to the terms of the University Residence Agreement. However, as set forth on the Registrar's Office Leave of Absence website, students with medical disabilities (including mental health disabilities) that require University medical services may petition to remain in campus housing for one term while on leave. Students who leave the University before the end of a term may be eligible to receive refunds of portions of their housing charges. Eligibility criteria for refunds are set forth in the Residence Agreement which is found on the Residence Agreement website (https://rde.stanford.edu/studenthousing/apply/residence-agreement/). (https://rde.stanford.edu/studenthousing/apply/residence-agreement/)

iii. Effective date(s) of leave. A student must leave the University within the timeframe set forth by the Dean of Students. The leave will remain in effect until (1) it is determined after an individualized assessment that the student is able to return to the University with or without reasonable accommodations and (2) the student has complied with any University requirements applicable to all students returning from a leave and all of the conditions mandated by the Dean of Students and/or the Vice Provost.

iv. Notification. At any time during the leave process, the Dean of Students may notify a

student's parent, guardian, emergency contact, or other individual, consistent with the law, if notification is deemed appropriate.

v. Association with the University while on leave. Unless expressly permitted by the Dean of Students in writing, students on an involuntary leave of absence are not permitted to be present at the University and are not permitted to engage in any University-related activities, including on-campus employment.

vi. Coursework taken while on leave. Consistent with Stanford's policies and procedures, academic credit for work done elsewhere may be allowed towards a Stanford degree. Students should refer to the "Transfer Work (p. 82)" section of the Stanford Bulletin and consult with the Registrar's Office and their department prior to taking any coursework while on an involuntary leave of absence.

vii. SUnet ID privileges. Unless expressly prohibited by the Dean of Students in writing, students on leave generally may retain their SUnet ID privileges, including their Stanford email account.

viii. Transcript notation. Students on a leave of absence will have a notation on their transcript that reads "Leave of Absence."

ix. Tuition and fees. Consistent with Stanford's policies and procedures, students who leave the University before the end of a term may be eligible to receive refunds of portions of their tuition. See the (https://registrar.stanford.edu/students/tuition-and-fees/tuition-refund-schedule/) Registrar's Tuition Refunds (https://registrar.stanford.edu/students/tuition-and-fees/tuition-refund-schedule/) page for a schedule of refunds.

x. Meal Plan. Consistent with Stanford's policies and procedures, a meal plan refund is based on the date when a student moves out of University residence and is approved under conditions as specified in the Residence Agreement. Students with questions about residential meal plan refunds should contact the central office of Stanford Dining.

xi. Visa Status. International students (F-1 and J-1 Visa holders) placed on an involuntary leave of absence must speak with a Bechtel International Center advisor regarding their visa status.

2. Request for Return

a. For general requirements applicable to all students returning to Stanford after a leave of absence, undergraduate students should refer to the Returning to Stanford (https://undergrad.stanford.edu/planning/academic-policies/returning-students/) website. Graduate students should consult with their academic department and a Graduate Life Office Dean. In addition to the general requirements all students must meet when returning to Stanford after a leave of absence, as well as any conditions mandated by the Dean of Students and/or the Vice Provost for return from an involuntary leave of absence as outlined below in section II.C, students seeking to return from an involuntary leave of absence for reasons of personal or community health and safety may be required to submit additional documentation related to the factors set forth in section I.A.6 as part of an individualized assessment. OAE will work with the students to provide reasonable accommodations in the return process as necessary.

b. A student must make a written request to the Dean of Students to return to the University. Generally, a student will not be allowed to return until one full quarter has elapsed or until the leave period in the involuntary leave of absence notification has elapsed, and all conditions and/or requirements are met.

c. The Dean of Students may require the student to provide evidence that the student, with or without reasonable accommodations, has sufficiently addressed the issues that previously established the criteria for imposing an involuntary leave of absence as set forth in section I.A.6, above. The Dean of Students may also ask, confer with, or seek information from others to assist in making the determination. The information sought may include:

   i. At the student's discretion, documentation of efforts by the student to address the issues that led to the leave

   ii. With appropriate authorization, release of academic records to inform treating clinicians

   iii. With appropriate authorization, release of treatment information to the extent necessary to determine if the student has sufficiently reduced the risk or disruption that led to the need for the involuntary leave

   iv. With appropriate authorization, consultation with Vaden to the extent necessary to determine if the student has sufficiently reduced the risk or disruption that led to the need for the involuntary leave

   v. Consultation with OAE

d. All returning students must meet the essential eligibility requirements and any technical standards of the University and, if applicable, the relevant school or department, with or without reasonable accommodations. If the Dean of Students is not satisfied that the student is ready to return to the University, the student will be notified in writing of the decision, including the reason for the decision, within a reasonable time after the student has submitted a request for return and required documentation.

e. A student not permitted to return may appeal the decision to the Vice Provost for Student Affairs following the procedure in section I.A.9.

3. Scope of the Policy and Relationship to Other University Policies

A leave of absence is an administrative process; it is not a disciplinary process. This policy and these procedures are not intended to be punitive and do not take the place of disciplinary actions that are in response to violations of Stanford's Fundamental Standard or other policies or directives, nor do they preclude the removal or dismissal of students from the University or University-related programs as a result of violations of other University policies or school or departmental protocols. This policy does not limit the University's ability to place enrollment holds on students for reasons beyond the scope of this policy and nothing in this policy relieves a student of any financial obligations to the University that were in place at the time the involuntary leave of absence was imposed.

Nothing in this policy limits the power of the University to take administrative action to ensure the safety of the Stanford community. In exceptional circumstances, where the health or well-being of any person may be seriously affected, or where physical safety is seriously threatened, or where the ability of the University to carry out its essential operations is seriously threatened or impaired, the President or the President's designee, may summarily suspend, dismiss, or bar any person from the University or University-related programs. In all such cases, actions taken will be reviewed promptly, typically within one week, by the appropriate University authority.

In situations involving an imminent or ongoing threat of harm to the student or any other member of the University community, the Dean of Students, in the exercise of his or her reasonable judgment, may require a student to be immediately prohibited from entering Stanford's campus or facilities utilized for University programs or activities while the individualized assessment and review described in section I.A. are taking place. Such students will receive the written notice described in section I.A.2 as quickly as possible.

4. Requests for Reasonable Accommodation

Stanford is committed to providing equal access to all participants in University processes, including students with disabilities. Students with disabilities should contact the Office of Accessible Education (OAE) to request accommodations. Information about the support services OAE provides, types of accommodations offered, and appropriate documentation for accommodations, can be found on the OAE website: https://oae.stanford.edu/.

5. Related Resources

As noted herein, students placed on an involuntary leave of absence may have additional conditions and/or requirements they must meet prior to returning to the University, in addition to any University requirements applicable to all students returning from a leave.

- Undergraduate Students should consult the Returning to Stanford (https://undergrad.stanford.edu/planning/academic-policies/returning-students/) web page for generally applicable deadlines, information and resources.
- Graduate Students should consult with a Graduate Life Office (https://glo.stanford.edu/) Dean and their department for generally applicable deadlines, information and resources.

Students who are placed on an involuntary leave of absence may want to consult with the following offices, where appropriate:

- Office of Accessible Education (https://oae.stanford.edu/) (OAE) (https://oae.stanford.edu/)
- Financial (http://web.stanford.edu/dept/finaid/) Aid (http://web.stanford.edu/dept/finaid/)
- Student Financial (http://web.stanford.edu/group/fms/fingate/students/) Services (http://web.stanford.edu/group/fms/fingate/students/)
- University Housing (http://web.stanford.edu/dept/rde/cgi-bin/drupal/housing/)
- Vaden Health Center (http://vaden.stanford.edu/) (Vaden)
- Academic Advising (https://undergrad.stanford.edu/academic-advising-stanford/)
- Graduate Life (https://glo.stanford.edu/) Office (https://glo.stanford.edu/)
- Bechtel International (https://bechtel.stanford.edu/immigration/visa-types/f-1j-1-student-visas/leave-absence/) Center (https://bechtel.stanford.edu/immigration/visa-types/f-1j-1-student-visas/leave-absence/)

The Process Resource will be available to assist all students who are placed on an involuntary leave of absence with their questions about the process to return and resume their studies and life at Stanford.

Coterminal students whose first graduate quarter occurred prior to Autumn 2015 are subject to coterminal policies as indicated in the previous version of this bulletin. See the Stanford Bulletin 2014-15 (http://exploredegrees.stanford.edu/archive/2014-15/cotermdegrees/).

GRADUATE DEGREES

General Requirements

For each Stanford advanced degree, there is an approved course of study that meets University and department requirements. The University's general requirements, applicable to all graduate degrees at Stanford, are described below. University requirements pertaining to only a subset of advanced degrees are described in the "Master's" tab and "Doctoral" tab in this section of this bulletin.

See the "Graduate Programs" section of each department's listing for specific department degree requirements. Additional information on professional school programs other than Ph.D. and master's degree programs is available in the bulletins of the Graduate School of Business, the School of Law, and the School of Medicine.

Enrollment Requirements

Graduate education at Stanford is a full-time commitment requiring full-time enrollment, typically at least 8 units during Autumn, Winter, and Spring quarters. For a complete definition of full-time enrollment, see the "Definition of Full-time Enrollment (p. 93)" section of this bulletin. Unless permission is granted by the department (for example for field work) enrolled graduate students must maintain a significant physical presence on campus throughout each quarter a student is enrolled.

Requests to enroll for fewer than 8 units during the academic year are approved only in specific circumstances. Students enrolled in the Honors Cooperative or the Master of Liberal Arts programs are permitted part-time enrollment on a regular basis. Graduate students who need only a few remaining units to complete degree requirements or to qualify for TGR status, may register for one quarter on a unit basis (3 to 7 units) to cover the deficiency (see the "Graduate Petition for Part-time Enrollment (p. 79)" section of this bulletin). Matriculated and enrolled pregnant graduate students may request up to two quarters of part-time enrollment for an approved Childbirth Academic Accommodation; see the "Childbirth Accommodation Policy (p. 70)" section of this bulletin and the GAP 5.9 Pregnancy, Childbirth, Adoption and Lactation (https://gap.stanford.edu/handbooks/gap-handbook/chapter-5/subchapter-9/). (https://gap.stanford.edu/handbooks/gap-handbook/chapter-5/subchapter-9/) Students with disabilities covered under the Americans with Disabilities Act may enroll in a reduced course load as recommended by the Office of Accessible Education (https://oae.stanford.edu/) (OAE) and must submit a "Graduate Petition for Part-Time Enrollment -OAE Accommodation" eForm.

Graduate students must enroll in courses for all terms of each academic year (Autumn, Winter, and Spring Quarters) from the admission term until conferral of the degree. The only exception to this requirement occurs when the student is granted an official leave of absence. Failure to enroll in courses for a term during the academic year without taking a leave of absence (p. 74) results in denial of further enrollment privileges unless and until reinstatement to the degree program is granted and the reinstatement fee paid.

Depending on the program, registration in Summer Quarter may or may not be required; Summer Quarter registration does not substitute for registration during the academic year. Students possessing an F-1 or J-1 student visa may be subject to additional course enrollment requirements in order to retain their student visas.

In addition to the above requirement for continuous registration during the academic year, graduate students are required by the University to be registered:

1. In each term during which any official department or University requirement is fulfilled, including qualifying exams or the University oral exam. The period between the last day of final exams of one term and the day prior to the first day of the following term is considered an extension of the earlier term, with the option of considering the two weeks preceding the start of Autumn Quarter as part of Autumn Quarter (rather than as part of Summer Quarter). See details below.
2. In any term in which a University dissertation/thesis is submitted or at the end of which a graduate degree is conferred.
3. Normally, in any term in which the student receives financial support from the University.
4. In any term for which the student needs to use University facilities.
5. For international students, in any term of the academic year (summer may be excluded) for which they have non-immigrant status (i.e., an F-I or J-1 visa).

Individual students may also find themselves subject to the registration requirements of other agencies (for example, external funding sources such as federal financial aid). Course work and research are expected to be done on campus unless the department gives prior approval.

Degree programs have the option to include the two weeks before the start of Autumn Quarter as part of Autumn Quarter for the purposes of completing milestones and departmental requirements. The following considerations apply to this exception:

1. The student must enroll in the subsequent Autumn Quarter in the applicable standard enrollment category prior to the completion of the milestone; a leave of absence is not permitted for that Autumn Quarter.
2. A student exercising this option will not be eligible for Graduation Quarter status until the following Winter Quarter at the earliest.
3. This exception is permitted only for milestones administered by the department, such as qualifying examinations or University oral examinations.
4. This exception does not apply to deadlines administered through Stanford University, such as filing the Application to Graduate, or Dissertation/Thesis submission.
5. Degree programs are not obligated to exercise this option solely because a student requests it.

Degree-Specific Requirements (Master's Degrees)

Master's Program Proposal

Students pursuing an M.A., M.F.A., M.S., or M.P.P. degree are required to submit an acceptable program proposal to their department during the first quarter of enrollment using the Program Proposal for a Master's Degree (https://stanford.app.box.com/v/progpropma/) form. Coterminal students must submit the proposal during the first quarter after admission to the coterminal program. The program proposal establishes a student's individual program of study to meet University and department degree requirements. Students must amend the proposal formally if their plans for meeting degree requirements change.

In reviewing the program proposal or any subsequent amendment to it, the department confirms that the course of study proposed by the student fulfills all department course requirements (for example, requirements specifying total number of units, course levels, particular courses, sequences, or substitutes). The department confirms that all other department requirements (for example, required projects, foreign language proficiency, or qualifying exams) are listed on the form and that all general University requirements (minimum units, residency, and so on) for the master's degree will be met through the proposed program of study. Students who fail to submit an acceptable proposal may be dismissed.

Time Limit for Completion of the Master's Degree

All requirements for a master's degree must be completed within three years after the student's first term of enrollment in the master's program (five years for Honors Cooperative students). Students pursuing a coterminal master's degree must complete their requirements within three years of the first graduate quarter.

The time limit is not automatically extended by a student's leave of absence. All requests for extension, whether prompted by a leave or some other circumstance, must be filed by the student before the conclusion of the program's time limit. Departments are not obliged to grant an extension. The maximum extension is one additional year. Extensions require review of academic progress and any other factors regarded as relevant by the department, and approval by the department; such approval is at the department's discretion.

Master of Arts and Master of Science

In addition to completing the general requirements for advanced degrees and the specified program requirements, candidates for the degree of Master of Arts (M.A.) or Master of Science (M.S.) must outline an acceptable program of study on the Master's Degree Program Proposal and complete their degrees within the time limit for completion of the master's degree.

Master of Public Policy

The degree of Master of Public Policy (M.P.P.) is a two-year program leading to a professional degree. Enrollment in the M.P.P. program is limited to candidates who have earlier been accepted to another Stanford graduate degree program and to recent (within three years) Stanford graduates. In addition to completing the general requirements for advanced degrees and the program requirements specified in the "Public Policy (p. 2007)" section of this bulletin, candidates for the degree of Master of Public Policy (M.P.P.) must outline an acceptable program of study on the Program Proposal for a Master's Degree (https://stanford.app.box.com/v/progpropma/) form and complete their degrees within the time limit for completion of the master's degree.

Master of Business Administration

The degree of Master of Business Administration (M.B.A.) is conferred on candidates who have satisfied the requirements established by the faculty of the Graduate School of Business and the general requirements for advanced degrees. Full particulars concerning the school requirements are found on the M.B.A. program web site of the Graduate School of Business (http://www.gsb.stanford.edu/programs/mba/). The M.B.A. must be completed within the time limit for completion of the master's degree.

Master of Fine Arts

In addition to completing the general requirements for advanced degrees and the program requirements specified in the "Art and Art History (p. 1004)" section of this bulletin, candidates for the degree of Master of Fine Arts (M.F.A.) must outline an acceptable program of study on the Master's Degree Program Proposal and complete their degrees within the time limit for completion of the master's degree.

Master of Liberal Arts

The Master of Liberal Arts (M.L.A.) program is a part-time interdisciplinary master's program in the liberal arts for returning adult students. In addition to completing the general requirements for advanced degrees, candidates for the degree of Master of Liberal Arts (https://mla.stanford.edu) (M.L.A.) must complete their degrees within five years, an exception to the rule specified above.

Engineer

In addition to completing the general requirements for advanced degrees and the requirements specified by their department, candidates for the degree of Engineer must be admitted to candidacy and must complete a thesis per the specifications below.

Candidacy

The Application for Candidacy for Degree of Engineer is an agreement between the student and the department on a specific program of study to fulfill degree requirements. Students must apply for candidacy by the end of the second quarter of the program. Honors Cooperative students must apply by the end of the fourth quarter of the program. Candidacy is valid for five calendar years.

Thesis

A University thesis is required for the Engineer degree. Students have the option of submitting the thesis electronically or via the paper process. Standards for professional presentation of the thesis have been established by the Committee on Graduate Studies. Directions for preparation of the thesis for electronic or paper submission are available at the Office of the University Registrar dissertation/thesis (https://registrar.stanford.edu/students/dissertation-and-thesis-submission/) web site.

The deadline for submission of theses for degree conferral in each term is specified by the University academic calendar (https://registrar.stanford.edu/academic-calendar/). If submitting via the paper process, three copies of the thesis, bearing the approval of the adviser under whose supervision it was prepared, must be submitted to the Office of the University Registrar before the quarterly deadline listed on the University academic calendar (https://registrar.stanford.edu/academic-calendar/). A fee is charged for binding copies of the paper thesis. If submitting via the electronic process the signed thesis signature page and title page must be submitted to the Student Services Center (https://studentservicescenter.stanford.edu/) and one final copy of the thesis must be uploaded, and approved by the Final Reader, on or before the quarterly deadline indicated in the University's academic calendar (https://registrar.stanford.edu/academic-calendar/). There is no fee charged for the electronic submission process.

Students must be registered or on Graduation Quarter in the term in which they submit the thesis; see "Graduation Quarter (p. 79)" section of this bulletin for additional information. At the time the thesis is submitted, an Application to Graduate must be on file, all department requirements must be complete, and candidacy must be valid through the term of degree conferral.

Master of Legal Studies

The Master of Legal Studies degree (M.L.S.), a nonprofessional degree, is conferred upon candidates who satisfactorily complete courses in law totaling the number of units required under the current Faculty Regulations of the Stanford Law School over no less than one academic year and who otherwise have satisfied the requirements of the University and the Stanford Law School. The Stanford Law School Advanced Degree Programs (https://law.stanford.edu/education/degrees/advanced-degree-programs/) provides detailed information on degree requirements.

Master of Laws

The degree of Master of Laws (L.L.M.) is conferred upon candidates who satisfactorily complete courses in law totaling the number of units required under the current Faculty Regulations of the Stanford Law School over no less than one academic year and who otherwise have satisfied the requirements of the University and the Stanford Law School.

The degree is designed for international graduate students trained in law and is available only to students with a primary law degree earned outside the United States. The L.L.M. program offers students a choice of three areas of specialization: Corporate Governance and Practice; Law, Science, and Technology; or International Economic Law, Business; and Policy. The Stanford Law School Advanced Degree

Programs (https://law.stanford.edu/education/degrees/advanced-degree-programs/) provides detailed information on degree requirements.

Master of the Science of Law

The degree of Master of the Science of Law (J.S.M.) is conferred upon candidates who satisfactorily complete courses in law totaling the number of units required under the current Faculty Regulations of the Stanford Law School over no less than one academic year and who otherwise have satisfied the requirements of the University and the Stanford Law School.

The degree is primarily designed for those qualified students who hold a J.D. or its equivalent and who are at the Stanford Law School for independent reasons (for example, as teaching fellows) and who wish to combine work toward the degree with their primary academic activities. Specially qualified lawyers, public officials, academics, and other professionals who have worked outside the United States may apply for the degree through the Stanford Program in International Legal Studies (SPILS). The Stanford Law School Advanced Degree Programs (https://law.stanford.edu/education/degrees/advanced-degree-programs/) provides detailed information on degree requirements.

Degree-Specific Requirements (Doctoral Degrees)

Doctor of Jurisprudence

The degree of Doctor of Jurisprudence (J.D.) is conferred on candidates who satisfactorily complete courses in law totaling the number of units required under the current Faculty Regulations of the Stanford Law School over no less than three academic years and who otherwise have satisfied the requirements of the University and the Stanford Law School. The Stanford Law School J.D. Program (https://law.stanford.edu/education/degrees/jd-program/) web site provides detailed information on degree requirements.

Doctor of the Science of Law

The degree of the Doctor of the Science of Law (J.S.D.) is conferred upon candidates who hold a J.D. or its equivalent, who complete one academic year in residence, and who, as a result of independent legal research, present a dissertation that is, in the opinion of the faculty of the Stanford Law School a contribution to knowledge. Such work and dissertation must conform to the rules of the Stanford Law School and the University for the dissertation and the University Oral Examination, as described below in the "Doctor of Philosophy" section of this bulletin.

Candidacy is limited to students of exceptional distinction and promise. The Stanford Law School Advanced Degree Programs (https://law.stanford.edu/education/degrees/advanced-degree-programs/) web site provides detailed information on degree requirements.

Doctor of Musical Arts

The degree of Doctor of Musical Arts (D.M.A.) is conferred on candidates who have satisfied the general requirements for advanced degrees, the program requirements specified in the "Music (p. 1831)" section of this bulletin, and the candidacy requirement as described below in the "Doctor of Philosophy" section.

Doctor of Medicine

Candidates for the degree of Doctor of Medicine (M.D.) must satisfactorily complete the required curriculum in medicine. The requirements for the M.D. degree are detailed on the School of Medicine's web site (http://med.stanford.edu/md/).

Doctor of Philosophy

The degree of Doctor of Philosophy (Ph.D.) is conferred on candidates who have demonstrated to the satisfaction of their department or school substantial scholarship, high attainment in a particular field of knowledge, and the ability to do independent investigation and present the results of such research. They must satisfy the general requirements for advanced degrees, the program requirements specified by their departments, and the doctoral requirements described below. The option for a Ph.D. minor is also described below, though it is not a Ph.D. requirement.

Candidacy

Admission to a doctoral degree program is preliminary to, and distinct from, admission to candidacy. Admission to candidacy for the doctoral degree is a judgment by the faculty in the department or school of the student's potential to successfully complete the requirements of the degree program. Students are expected to complete department qualifying procedures and apply for candidacy by the end of their second year in the Ph.D. program. Honors Cooperative students must apply by the end of their fourth year. A Pregnancy or Parental Leave of Absence automatically extends the pre-candidacy period by one year for a birth parent and three months (one quarter) for a non-birth parent (see GAP 5.9 Pregnancy, Childbirth, Adoption and Lactation (https://gap.stanford.edu/handbooks/gap-handbook/chapter-5/subchapter-9/)).

Admission to candidacy for the doctoral degree is granted by the major department following a student's successful completion of qualifying procedures as determined by the department. Departmental policy determines procedures for subsequent attempts to become advanced to candidacy in the event that the student does not successfully complete the procedures. Failure to advance to candidacy results in the dismissal of the student from the doctoral program; see "Guidelines for Dismissal of Graduate Students for Academic Reasons (p. 70)" section of this bulletin.

The Application for Candidacy for a Doctoral Degree (https://stanford.app.box.com/v/appcanddoct/) form specifies a departmentally approved program of study to fulfill degree requirements, including required course work, language requirements, teaching requirements, dissertation (final project and public lecture-demonstration for D.M.A.), and University oral examination (for Ph.D.). Prior to candidacy, at least 3 units of work must be taken with each of four Stanford faculty members. To reiterate, however, a student will only be admitted to candidacy if, in addition to the student's fulfilling departmental prerequisites, the faculty makes the judgment that the student has the potential to successfully complete the requirements of the degree program.

If the Ph.D. student is pursuing a minor, approval by the department awarding the minor is also required on the Application for Candidacy.

Time Limit for Completion of a Degree with Candidacy

Students are required to maintain active candidacy through conferral of the doctoral degree. All requirements for the degree must be completed before candidacy expires. Candidacy is valid for five years unless terminated by the department (for example, for unsatisfactory progress). The time limit is not automatically extended by a student's leave of absence. However, a Pregnancy or Parental Leave of Absence automatically extends the candidacy period by one year for a birth parent and three months (one quarter) for a non-birth parent (see GAP 5.9 Pregnancy, Childbirth, Adoption and Lactation (https://gap.stanford.edu/handbooks/gap-handbook/chapter-5/subchapter-9/)).

Failure to make minimum progress or complete University, department, and program requirements in a timely or satisfactory manner may lead to dismissal; see the guidelines for "Dismissal of Graduate Students for Academic Reasons (p. 70)" section of this bulletin and GAP 5.6 Dismissal for Academic and Professional Reasons (https://gap.stanford.edu/handbooks/gap-handbook/chapter-5/subchapter-6/page-5-6-1/).

All requests for extension, whether prompted by a leave or some other circumstance, must be filed by the student before the conclusion of the program's time limit. Departments are not obligated to grant an extension. Students may receive a maximum of one additional year of candidacy per extension. Extensions require review by the department of a dissertation progress report, a timetable for completion of the dissertation, any other factors regarded as relevant by the department, and approval by the department; such approval is at the department's discretion.

Teaching and Research Requirements

A number of departments require their students to teach (serving as a teaching assistant) or assist a faculty member in research (serving as a research assistant) for one or more quarters as part of their doctoral programs. Detailed information is included in the department sections of this bulletin.

Foreign Language Requirement

Some departments require a reading knowledge of one or more foreign languages as indicated in department sections of this bulletin. Fulfillment of language requirements must be endorsed by the chair of the major department.

University Oral Examination

Passing a University oral examination is a requirement of the Ph.D. and J.S.D. degrees. The purpose of the examination is to test the candidate's command of the field of study and to confirm fitness for scholarly pursuits. Departments determine when, after admission to candidacy, the oral examination is taken and whether the exam is a test of knowledge of the field, a review of a dissertation proposal, or a defense of the dissertation; see GAP 4.7 Doctoral Degrees: University Oral Examinations and Committees (https://gap.stanford.edu/handbooks/gap-handbook/chapter-4/subchapter-7/page-4-7-1/) for additional explanation.

Timing and Process

Students must be registered in the term in which the University oral examination is taken. The period between the last day of final exams of one term and the day prior to the first day of the following term is considered an extension of the earlier term. Candidacy must also be valid.

The University Oral Examination (https://stanford.app.box.com/v/doc-orals/) form must be submitted to the department graduate studies administrator at least two weeks prior to the proposed examination date. The examination is conducted according to the major department's adopted practice, but it should not exceed three hours in length, and it must include a period of private questioning by the examining committee.

Committee Membership

The University oral examination committee consists of at least five Stanford faculty members: four examiners and the committee chair from another department. All committee members are normally members of the Stanford University Academic Council, and the chair must be a member of the Stanford University Academic Council. Emeritus faculty are also eligible to serve as examiners or as chair of the committee. Emeritus Stanford faculty, though no longer current members of the Academic Council, count as Academic Council members on dissertation oral committees.

Out-of-Department Chair

The chair of a Stanford oral examination is appointed for this examination only, to represent the interests of the University for a fair and rigorous process. The chair of the examining committee may not have a full or joint appointment in the principal dissertation adviser's, co-advisers or student's department, but may have a courtesy appointment in the department. The chair can be from the same department as any other member(s) of the examination committee and can be from the student's minor department provided that the student's adviser does not have a full or joint appointment in the minor department.

The department of Electrical Engineering has been granted an exception to this policy, whereby "out-of-department" may include a faculty member from another division of the department. The Graduate School of Education has been granted an exception to this policy, whereby "out-of-department" may include a faculty member from another program area of the school.

For Interdisciplinary Degree Programs (IDPs), the chair of the examining committee may not have a full or joint appointment in the primary adviser's major department and must have independence from the student and adviser. The faculty director of the IDP is not allowed to chair an examining committee for students in that IDP.

Responsibility for monitoring appointment of the oral examination chair rests with the candidate's major department. The department cannot require the candidate to approach faculty members to serve as chair; many departments, however, invite students and their advisers to participate in the process of selecting and contacting potential chairs.

Exceptions

A Petition for Non-Academic Council Doctoral Commitment Members (https://stanford.app.box.com/v/doc-ctte-non-acad-council/) to appoint an examining committee member who is neither a current or emeritus member of the Academic Council may be approved by the chair of the department or faculty director of graduate studies, according to local policy, if that person contributes an area of expertise that is not readily available from the faculty and holds a Ph.D. or equivalent foreign degree.

Exceptions for individuals whose terminal degree is not the Ph.D. or equivalent foreign degree may be granted by the Office of the Vice Provost for Graduate Education, upon the request of the student's department chair or faculty director of graduate studies. The prospective committee member's curriculum vitae and a brief description of their contributions to the student's research should be submitted via email (https://vpge.stanford.edu/about-vpge/contact-us/) to the Office of the Vice Provost for Graduate Education.

The majority of the examiners must be current or emeritus Academic Council members; more specifically, one of four or five examiners or two of six or seven examiners who are not current or emeritus members of the Academic Council may be appointed to the oral examination committee by means of this petition and approval by the Office of the Vice Provost for Graduate Education, as required for members who do not have a PhD degree.

Reporting

The candidate passes the examination if the examining committee casts four favorable votes out of five or six, five favorable votes out of seven, or six favorable votes out of eight. Five members present and voting constitute a quorum. If the committee votes to fail a student, the committee chair sends within five days a written evaluation of the candidate's performance to the major department and the student. Within 30 days and after review of the examining committee's evaluation and recommendation, the chair of the student's major department must send the student a written statement indicating the final action of the department.

Dissertation

An approved doctoral dissertation is required for the Ph.D. and J.S.D. degrees. The doctoral dissertation must be an original contribution to scholarship or scientific knowledge and must exemplify the highest standards of the discipline. If it is judged to meet this standard, the dissertation is approved for the school or department by the

doctoral dissertation reading committee (see GAP 4.8 Doctoral Degrees: Dissertations and Dissertation Reading Committees (https://gap.stanford.edu/handbooks/gap-handbook/chapter-4/subchapter-8/page-4-8-1/) for more explanation).

Approval

Each member of the reading committee signs the signature page of the dissertation to certify that the work is of acceptable scope and quality. These signatures must be in ink; proxy or electronic signatures are not permitted. One reading committee member, who must be a current member of the Academic Council, reads the dissertation in its final form and certifies on the Certificate of Final Reading that department and University specifications have been met. The final certification is usually completed by the student's principal dissertation advisor. The final certification must be completed by a current member of the Academic Council.

Dissertations must be in English. Approval for writing the dissertation in another language is normally granted only in cases where the other language or literature in that language is also the subject of the discipline. Such approval is routinely granted for dissertations in the Division of Literatures, Cultures, and Languages, in accordance with the policy of the individual department. Approval is granted by the school dean upon a written request from the chair of the student's major department. Dissertations written in another language must include an extended summary in English.

Submission

Students have the option of submitting the dissertation electronically or via the paper process. Directions for preparation of the dissertation for electronic or paper submission are available at the Office of the University Registrar dissertation (https://registrar.stanford.edu/students/dissertation-and-thesis-submission/) web site. If submitting via the paper process, the signed dissertation copies and accompanying documents must be submitted to the Office of the University Registrar on or before the quarterly deadline indicated in the University's academic calendar (https://registrar.stanford.edu/academic-calendar/). A fee is charged for the microfilming and binding of the paper dissertation copies. If submitting via the electronic process the signed dissertation signature page and title page must be submitted to the Student Services Center (https://studentservicescenter.stanford.edu/) and one final copy of the dissertation must be uploaded, and approved by the Final Reader, on or before the quarterly deadline indicated in the University's academic calendar (https://registrar.stanford.edu/academic-calendar/). There is no fee charged for the electronic submission process.

Enrollment

Students must either be registered or on graduation quarter in the term they submit the dissertation; see "Graduation Quarter" in the "Graduate Degrees (http://exploredegrees.stanford.edu/graduatedegrees/#specialregistrationstatusestext)" section of this Bulletin for additional information. At the time the dissertation is submitted, an Application to Graduate must be on file, all department requirements must be complete, and candidacy must be valid through the term of degree conferral.

Doctoral Dissertation Reading Committee

The doctoral dissertation reading committee consists of the principal dissertation adviser and, typically, two other readers. The doctoral dissertation reading committee must have at least three members and may not have more than five members. All members of the reading committee approve the dissertation. At least one member must be from the student's major department. Normally, all committee members are members of the Stanford University Academic Council or are emeritus Academic Council members.

The student's department chair or faculty director of graduate studies, according to local policy, may, in some cases, approve the appointment of a reader who is not a current or emeritus member of the Academic Council, if that person is particularly well qualified to consult on the dissertation topic and holds a Ph.D. or equivalent foreign degree, via the Petition for Non-Academic Council Doctoral Committee Members (https://stanford.app.box.com/v/doc-ctte-non-acad-council/). Former Stanford Academic Council members and non-Academic Council members may thus, on occasion, serve on a reading committee. A non-Academic Council member (including former Academic Council members) may replace only one of three required members of dissertation reading committees. If the reading committee has four or five members, at least three members (comprising the majority) must be current or emeritus members of the Academic Council. Emeritus Stanford faculty, though no longer current members of the Academic Council, count as Academic Council members on dissertation reading committees.

Exceptions for individuals whose terminal degree is not the Ph.D. or equivalent foreign degree may be granted by the Office of the Vice Provost for Graduate Education, upon the request of the student's department chair or faculty director of graduate studies. The prospective committee member's curriculum vitae and a brief description of their contributions to the student's research should be submitted via email (https://vpge.stanford.edu/about-vpge/contact-us/) to the Office of the Vice Provost for Graduate Education.

Any member of the Academic Council may serve as the principal dissertation adviser. A former Academic Council member, emeritus Academic Council member or non-Academic Council member may serve as co-adviser with the appointment of a principal dissertation adviser who is currently on the Academic Council. This is to ensure representation for the student in the department by someone playing a major adviser role in completion of the dissertation. Professors who have recently become emeritus and have been recalled to active duty may serve as principal dissertation advisers, though they are no longer members of the Academic Council. Requests for further exceptions to the requirement that the principal dissertation adviser be a current member of the Academic Council, for example for recently retired emeritus professors who are still actively engaged on campus but not recalled to active duty, will be reviewed by the Office of the Vice Provost for Graduate Education.

The reading committee, as proposed by the student and agreed to by the prospective members, is endorsed by the chair of the major department on the Doctoral Dissertation Reading Committee (https://stanford.app.box.com/v/docdiss-reading-committee-form/) form. This form must be submitted before approval of Terminal Graduate Registration (TGR) status or before scheduling a University oral examination that is a defense of the dissertation. The reading committee may be appointed earlier, according to the department timetable for doctoral programs. All subsequent changes to the reading committee must be approved by the chair or faculty director of graduate studies of the major department. The reading committee must conform to University regulations at the time of degree conferral.

Ph.D. Minor

Students pursuing a Ph.D. may pursue a minor in another department or program to complement their Ph.D. program. This option is not available to students pursuing other graduate degrees. Ph.D. candidates cannot pursue a minor in their own major department or program. In rare cases, a Ph.D. student may complete the requirements for more than one minor. In that case, 20 unduplicated units must be completed for each minor.

Only departments that offer a Ph.D. may offer a minor, and those departments are not required to do so. Interdisciplinary Ph.D. minors, administered by a designated academic department, may be approved by the Faculty Senate. The minor should represent a program of graduate quality and depth, including core requirements and electives or examinations. The department offering the minor establishes the

core and examination requirements. Elective courses are planned by the students in conjunction with their minor and Ph.D. departments.

The minimum University requirement for a Ph.D. minor is 20 units of course work at the graduate level (typically courses numbered 200 and above). If a minor department chooses to require those pursuing the minor to pass the Ph.D. qualifying or field examinations, the 20-unit minimum can be reduced. All of the course work for a minor must be done at Stanford and must be completed prior to a student moving to TGR status.

Units taken for the minor can be counted as part of the overall requirement for the Ph.D. of 135 units of graduate course work done at Stanford. Courses used for a minor may not be used also to meet the requirements for a master's degree or for the completion of a different Ph.D. minor.

An Application for Ph.D. Minor outlining a program of study must be approved by the major and minor departments; to submit the application, go to Axess (https://axess.sahr.stanford.edu/) and select Student eForms from the student mega menu. This form is submitted at the time of admission to candidacy and specifies whether representation from the minor department on the University oral examination committee is required.

Joint Degree Programs

A joint degree program (JDP) is a specified combination of degree programs or degree types in which a student is enrolled in two graduate degree programs concurrently. JDPs are developed and proposed by the relevant academic units with agreement of the deans of the schools affected.

An approved JDP includes a set of agreements between the participating programs and schools about matters such as admissions, advising, curricula, and tuition. In a JDP, a specified number of units may be double-counted toward the minimum University residency requirements for both degrees, reducing the total number of residency units required to complete both degrees. Students pursuing a joint degree that includes a Ph.D. may not also count a Stanford master's degree or transfer units towards residency for the Ph.D. degree. Application deadlines for each program or degree apply. Students must be admitted to the JDP no later than the study list deadline of the term prior to the term of expected degree conferral. In a JDP, both degrees are conferred concurrently since the units required for each degree are linked to the completion of both degrees. The sole exception is the J.D. degree which may be awarded prior to the second degree.

The following joint degree programs, permitting students to complete requirements for two degrees with a reduced number of total residency units, are offered:

- Juris Doctor with a Master of Arts in Economics, Education, History, Public Policy, or the Division of International Comparative and Area Studies: African Studies, East Asian Studies, International Policy, Latin American Studies, and Russian, East European and Eurasian Studies (J.D./M.A.)
- Juris Doctor with a Master of Science in Bioengineering, Computer Science, Electrical Engineering, Environment and Resources, Health Research and Policy, or Management Science and Engineering (J.D./M.S.)
- Juris Doctor with a Master of Public Policy (J.D./M.P.P)
- Juris Doctor with a Doctor of Philosophy in Bioengineering, Communication, Computer Science, Economics, English, Environment and Resources, History, Management Science and Engineering, Neuroscience, Philosophy, Political Science, Psychology, or Sociology and with the Graduate School of Business Ph.D. program (J.D./Ph.D.)
- Juris Doctor with a Master of Business Administration (J.D./M.B.A.)
- Master of Business Administration with a Master of Arts in Education (M.B.A./M.A.)
- Master of Business Administration with a Master of Science in Computer Science, Electrical Engineering, and Environment and Resources (M.B.A./M.S.)
- Master of Business Administration with a Master of Public Policy (M.B.A./M.P.P.)
- Master of Arts in Education or International Policy with a Master of Public Policy (M.A./M.P.P.)
- Master of Science in Management Science and Engineering with a Master of Public Policy (M.S./M.P.P.)
- Doctor of Philosophy in Economics, Education, Psychology, Sociology, or Structural Biology with a Master of Public Policy (Ph.D./M.P.P.)
- Juris Doctor with a Doctor of Medicine (J.D./M.D.)
- Master of Public Policy with a Doctor of Medicine (M.P.P./M.D.)

Specific requirements for the joint degree programs are available from the participating departments and schools and at Registrar's (https://registrar.stanford.edu/students/graduate-degree-progress/joint-degree-program-information/) web site.

Creation of additional joint degree programs that are combinations of J.D./M.A., J.D./M.S., and Ph.D./M.P.P. degrees have been authorized by the Faculty Senate. New JDPs from among these combinations may double-count up to 45 units towards residency requirements. JDPs from these combinations are proposed by the coordinating programs and schools. Once approvals from the chairs of the programs and deans of the relevant schools are obtained, approval on behalf of the Committee on Graduate Studies is granted by the Office of the Vice Provost for Graduate Education, and final approval is granted by the Office of the University Registrar.

JDPs combining the J.D. and Ph.D. degrees that allow up to the 54-unit reduction of the residency requirement for both degrees separately, following the model of previously approved joint J.D./Ph.D.s listed above, can be approved by the Office of the Vice Provost for Graduate Education and final approval is granted by the Office of the University Registrar.

JDPs combining other degree types or programs may be proposed, but require review by the Faculty Senate Committee on Graduate Studies and must be approved by the Faculty Senate.

Minimum Progress Requirements for Graduate Students

The academic requirements for graduate students include completion of University, department, and program requirements, such as admission to candidacy, successful completion of qualifying exams, and so on in a timely and satisfactory manner. Graduate students must also meet the following standards of minimum progress as indicated by units and grades. (These standards apply to all advanced degree programs except the Graduate School of Business Ph.D., and the M.B.A., J.D., L.L.M., J.S.M., J.S.D., M.D., and M.L.A., which follow guidelines issued by the respective schools and are described in their respective school bulletins.)

Graduate students enrolled for 11 or more units must pass at least 8 units per term by the end of each term. Those registered for fewer than 11 units must pass at least 6 units per term by the end of each term, unless other requirements are specified in a particular case or for a particular program.

In addition, graduate students must maintain a 3.0 (B) grade point average overall in courses applicable to the degree.

Department requirements for minimum progress that set a higher standard for units to be completed, or a higher or lower standard

for grade point average to be maintained, take precedence over the University policy; any such different standards must be published in the Stanford Bulletin.

Students identified as not meeting the requirements for minimum progress and timely and satisfactory completion of requirements are reviewed by their departments to determine whether the problem lies with administrative matters such as reporting of grades or with academic performance. Students have the opportunity to explain any special circumstances. Approval for continuation in the degree program is contingent on agreement by the student and department to a suitable plan to maintain appropriate progress in subsequent quarters. Dismissal of graduate students is addressed in separate guidelines.

During the academic year, graduate students who have been granted Terminal Graduate Registration (TGR) status must enroll for zero units in the TGR course in their department in the section appropriate for the adviser (801 for master's and Engineer degree students or 802 for doctoral students). An 'N' grade signifies satisfactory progress, whereas an 'N-' grade indicates unsatisfactory academic progress. The first 'N-' grade constitutes a warning; additional 'N-' grades normally call for departmental review, which can result in a denial of enrollment or dismissal from the degree program.

Students receiving federal student aid funds, including student loans, must maintain satisfactory academic progress standards that may be stricter than departmental standards. See the Financial Aid Office (https://financialaid.stanford.edu/grad/policy/progress.html) web site for details.

Graduate Unit Requirements

The University's expectation is that the units counted towards all graduate degrees are primarily in graduate courses. The University has set specific requirements for units applied to the minimum requirement for the M.A., M.S., and M.F.A. degrees: All units must be in courses at or above the 100 level and at least 50 percent of those must be courses designated primarily for graduate students (typically at least the 200 level). Units earned in courses below the 100 level may not be counted towards the minimum unit requirement for the master's degree. Department specifications for the level of course work accepted for a particular master's degree program may be higher than the University's specifications.

Changes of Degree Programs

Graduate students are admitted to Stanford for a specific degree program. Students who have attended Stanford for at least one term and who are currently enrolled may submit a Graduate Program Authorization Petition in Axess to make one of the following changes:

1. change to a new degree program in the same department;
2. change to a new degree program in a different department;
3. add a new degree program in the same or a different department to be pursued with the existing program. Students cannot add or pursue the same degree program for which they are already enrolled. Coterminal students must have the bachelor's degree conferred before adding a second advanced degree program. Summer term enrollment is optional for students beginning a new degree program in the Autumn term provided that they have been enrolled the prior Spring term.

It is important that the attempt to add or change degree programs be made while enrolled. Otherwise, a new Application for Graduate Admission must be submitted and an application fee paid. The Graduate Program Authorization Petition is submitted electronically through Axess to the department in which admission is requested. If applying for a higher degree program, students may also be required to submit other application materials such as GRE General or Subject Test scores, a statement of purpose, or new letters of recommendation. Decisions on the petitions are made by the programs or departments to which they are directed, and are at the discretion of those programs or departments.

International students changing departments or degree programs must also obtain the approval of the International Student Adviser at the Bechtel International Center (https://bechtel.stanford.edu). If the requested change lengthens their stay, they also are required to submit verification of sufficient funding to complete the new degree program.

Students who wish to terminate study in a graduate program should submit a properly endorsed Request to Permanently Withdraw from Degree Program form (https://stanford.app.box.com/v/permanent-withdraw/). To return to graduate study thereafter, the student is required to apply for reinstatement (if returning to the same degree program) or admission (if applying to a different program). Both applications require payment of a fee. Reinstatement is contingent upon departmental approval.

Guidelines for Dismissal of Graduate Students for Academic or Professional Reasons

Admission to graduate programs at Stanford is highly selective. It is anticipated that every admitted student will be able to fulfill the requirements for the advanced degree. This document provides guidelines to be used in the unusual circumstance that a department must consider dismissal of a graduate student for academic reasons. These guidelines apply to all advanced degree programs except those in the schools of Law and Business, the STEP program in the Graduate School of Education, and the M.D. program in the School of Medicine, which follow guidelines issued by the respective schools.

The principal conditions for continued registration of a graduate student are the timely and satisfactory completion of the University, department, and program requirements for the degree, fulfillment of minimum progress requirements, and meeting standards of professional behavior. The guidelines that follow specify procedures for dismissal of graduate students who are not meeting these conditions. In such cases, a departmental committee (hereafter "the committee"), whether the department's committee of the faculty or other committee authorized to act on the department's behalf such as the departmental graduate studies committee, will:

1. Where possible and as early as possible, warn the student, in writing, of the situation and deficiency. A detailed explanation of the reason for the warning should be provided.
2. Consider extenuating circumstances communicated by the student.
3. Decide the question of dismissal by majority vote of the committee (with at least three faculty members participating in the committee's deliberation) and communicate the decision to the student in writing.
4. Place a summary of department discussions, votes, and decisions in the student's file.
5. Provide students the opportunity to examine their department files, if requested.
6. Provide students with information on their rights to appeal under the Student Academic Grievance Procedure. See the "Student Academic Grievance Procedure (p. 96)" section of this bulletin.

Careful records of department decisions safeguard the rights of both students and faculty.

Guidelines for Addressing Graduate Student Professional Conduct

The success of any academic institution depends on a shared willingness to discharge the ethical obligations that bind students, staff and

faculty together in a system of mutually supporting professional roles. Stanford University is no exception (see Administrative Guide, 1.1.1 Code of Conduct (https://adminguide.stanford.edu/chapter-1/subchapter-1/)). The relevant ethical obligations are clearly defined for faculty in the Faculty Handbook: "In order to maintain the integrity of its teaching and research and to preserve academic freedom, Stanford University demands high standards of professional conduct from its faculty" (see Faculty Handbook 4.3.A (https://facultyhandbook.stanford.edu/4-core-policy-statements/#43)). The purpose of this policy is to similarly define the professionalism expectations for graduate students as they prepare to be responsible members of professional communities.

Graduate students are expected to meet standards of professional behavior, including: being present on campus to meet the academic and research expectations of the school or department; communicating in a timely, respectful and professional manner; complying with institutional policies and procedures; and participating appropriately in the program's community. Graduate students are expected to familiarize themselves with applicable University policy and degree program requirements. Failure to meet these standards may be grounds for dismissal.

Information about degree program requirements, including department and program academic advising expectations, is available from departments and in the Explore Degrees section of this bulletin. Students are encouraged to consult with faculty and staff in those programs should they have questions about local requirements.

When the University has professionalism concerns about a graduate student, the University manages the concern utilizing the Guidelines for Dismissal of Graduate Students for Academic or Professional Reasons (above).

Additional Specifics for Degrees with Candidacy

Before the Review for Candidacy

The committee, before review for admission to candidacy, may vote to dismiss a student who is not making minimum progress or completing requirements in a timely and satisfactory way or meeting standards of professional behavior. Before considering dismissal, the committee should meet with the student to discuss their academic or professional performance and identify steps to correct deficiencies, where such deficiencies are deemed correctable. Following the meeting, the student should receive a written summary of the discussion. Should it not be possible to meet, a written communication detailing academic and professional performance and steps required to correct any deficiencies should be provided to the student.

At the Review for Candidacy

In a review for admission to candidacy, if the committee votes not to recommend the student for admission to candidacy, the vote results in the dismissal of the student from the program. The department chair, or Director of Graduate Studies, or the student's adviser shall communicate the department's decision to the student in writing and whenever possible, in person. The student may submit a written request for reconsideration. The committee shall respond in writing to the request for reconsideration; it may decline to reconsider its decision.

During Candidacy

When a student admitted to candidacy is not making minimum progress, or not meeting standards of professional performance, or not completing University, department, or program requirements in a timely and satisfactory manner, the student's adviser, the Director of Graduate Studies, or department chair, and other relevant faculty should meet with the student, whenever possible. A written summary of these discussions shall be sent to the student and the adviser and added to the student's department file. The summary should specify the student's academic or professional deficiencies, the steps necessary to correct them (if deemed correctable), and the period of time that is allowed for their correction (normally one academic quarter). At the end of the warning period, the committee should review the student's progress and notify the student of its proposed actions. If the student has corrected the deficiencies, he or she should be notified in writing that the warning has been lifted.

If the deficiencies are not deemed correctable by the committee (for example, the failure of a required course or examination, or a pattern of unsatisfactory behavior or performance) or if, at the end of the warning period, the student has not in the view of the committee corrected the deficiencies, the committee may initiate proceedings for dismissal. The student shall be notified in writing and whenever possible, in person, that the case of dismissal will be considered at an impending committee meeting. The student has the right to be invited to attend a portion of the scheduled meeting to present his or her own case; a student may also make this case to the committee in writing.

After full discussion at the committee meeting, the committee, without the student present, shall review the case and vote on the issue of dismissal. The student shall be notified of the decision in writing and, whenever possible, in person. The student should receive a written summary of the discussion, including the committee's decision and the reasons for it. The student may submit a written request for reconsideration. The committee's response to the request for reconsideration shall be made in writing; it may decline to reconsider its decision.

Pregnancy, Childbirth, Adoption and Lactation Policy

Stanford prohibits discrimination on the basis of any characteristic protected by law including discrimination on the basis of pregnancy. Stanford complies with requirements of California Education Code section 66281.7. Stanford's policy provides that pregnant graduate students be supported either by staying enrolled or taking a pregnancy leave of absence (see GAP 5.9 Pregnancy, Childbirth, Adoption and Lactation (https://gap.stanford.edu/handbooks/gap-handbook/chapter-5/subchapter-9/)). The policy also provides childbirth accommodations for graduate students giving birth as well as support for non-birth parents who have recently experienced the birth of a child. Questions about the policy can be directed to the Office of the Vice Provost for Graduate Education (https://vpge.stanford.edu/about-vpge/contact-us/).

Residency Policy for Graduate Students

Each type of graduate degree offered at Stanford (for example, Master of Science, Doctor of Philosophy) has a residency requirement based on the number of academic units required for the degree. These residency requirements and the maximum allowable transfer units for each degree type are listed below. Unless permission is granted by the department (for example, for field work) enrolled graduate students must maintain a significant physical presence on campus throughout each quarter a student is enrolled.

The unit requirements for degrees can represent solely course work required for the degree or a combination of course work, research, and a thesis or dissertation. Academic departments and schools offering degrees may establish unit requirements that are higher than the minimum University residency requirement, but they may not have a residency requirement that is lower than the University standard. In addition to the University's residency requirement based on a minimum number of units for each degree, the School of Medicine and the Graduate School of Business may establish residency requirements based on the number of quarters of full-time registration in which students are enrolled to earn a degree. However, in no case may a student earn fewer units than the University minimum for each degree. All residency requirements are published in the Stanford Bulletin. Students should consult the Stanford Bulletin or their academic department to

determine if their degree program has residency requirements that exceed the minimum.

Students eligible for Veterans Affairs educational benefits should refer to the "Veterans' Educational Benefits (p. 84)" section of this bulletin.

It is Stanford University's general policy that units are applicable toward only one degree. Units may not normally be duplicated or double-counted toward the residency requirement for more than one degree, with the exception that up to 45 units of a Stanford M.A. or M.S. degree may be applied to the residency requirement for the Ph.D., D.M.A., or Engineer degrees. Other exceptions to this general policy for specified combinations of degree types, known as Joint Degree Programs, may be approved by agreement of the Faculty Senate and the deans of the schools affected, with review by the Committee on Graduate Studies. Students pursuing a Joint Degree that includes a Ph.D. may not also count a Stanford master's degree or transfer units towards residency for the Ph.D. degree. See the "Joint Degree Programs (http://exploredegrees.stanford.edu/graduatedegrees/#jointdegreestext)" tab of this section of this bulletin for additional information.

Only completed course units are counted toward the residency requirement. Courses with missing, incomplete, in progress, or failing grades do not count toward the residency requirement. Courses from which a student has formally withdrawn do not count toward the residency requirement.

Terminal Graduate Registration (TGR) is available to graduate students who have met all of the conditions listed in the "TGR (p. 79)" section of this bulletin.

University Minimum Residency Requirements for Graduate Degrees [1]

Degree Type	Minimum # of Units	Maximum Allowable External Transfer Units
M.A., M.S., M.F.A., M.L.A.	45	0 (see note 4)
Engineer (see note 2)	90	45
M.B.A., M.P.P. (see note 3)	90	0 (see note 4)
Ph.D., D.M.A. (see note 5)	135	45
M.D.	235	90
M.S. in Physician Assistant Studies	186 (see note 6)	0 (see note 4)
J.D.	109	45
M.L.S., L.L.M., J.S.M.	35	0 (see note 4)
J.S.D.	44	0 (see note 4,7)

1 The University has authorized the granting of the M.A.T., Ed.S. and Ed.D. degrees, but they are not being offered.

2 Up to 45 units completed at Stanford toward a M.A. or M.S. degree or accepted as transfer credit, but not both, in an Engineering discipline may be used toward the 90 unit residency requirement for the Engineer degree. At least 45 units of work at Stanford are necessary to complete the 90 residency units for the Engineer degree.

3 Enrollment in the M.P.P. degree program is limited to candidates who have earlier been accepted to another Stanford graduate degree program and to recent (within three years) Stanford graduates.

4 Students eligible for Veterans Affairs educational benefits should refer to the Veterans Benefits section of "Admissions and Financial Aid (p. 22)" in this bulletin.

5 Up to 45 units completed at Stanford toward a M.A. or M.S. degree or accepted as transfer credit, but not both, may be used toward the 135 unit residency requirement for the Ph.D. or D.M.A. degree. At least 90 units of work at Stanford are necessary to complete the 135 residency units for the Ph.D. or D.M.A. degree.

6 6 units of the total are in an area of scholarly concentration.

7 Up to 35 units completed at Stanford toward a J.S.M degree may be used toward the 44-unit residency requirement for the J.S.D degree.

University Minimum Residency Requirements for Graduate Degree Combinations

Students with multiple degree programs must complete the residency requirements for all their degree types. Students enrolled in a joint degree program should see the "Joint Degree Program (p. 70)" section of this Bulletin.

A table of these residency requirements is also available on the Registrar's web site (https://registrar.stanford.edu/students/graduate-degree-progress/minimum-residency-requirements-graduate-degrees/).

Degree/Degree Combination	Minimum # of Stanford Units Required	Maximum Allowable External Transfer Units	Minimum # of Residency Units Required
MA/MS/MSM	45	0*	45
MA/MS/MSM + MA/MS	90	0*	90
Engineer	45	45	90
Engineer + MA/MS	90	0*	90
Ph.D.	90	45	135
Ph.D. + MA/MS	135	0*	135
Ph.D. + 2 MA/MS	180	0*	180
Ph.D. + Engineer	180	45	225
Ph.D. + Engineer + MA/MS	225**	0*	225**
Ph.D. + Ph.D.	180	90***	270

* Students eligible for Veterans Affairs educational benefits should refer to the "Veterans Benefits" (p. 84) section of this bulletin.

** Civil and Environmental Engineering (CEE) students should refer to the CEE program page (p. 663) in the Stanford Bulletin for additional information regarding residency.

*** Up to 45 quarter units of work completed outside of Stanford may be applied towards a PhD via the Graduate Residency Credit petition (https://registrar.stanford.edu/students/graduate-degree-progress/graduate-residency-credit/) process. Students may apply up to 45 unduplicated units towards each Ph.D. (i.e., students may not use the same external course work towards both Ph.Ds).

Graduate Residency Transfer Credit

COVID-19 Policies on Graduate Transfer Work for Academic Year 2020-21

Students may apply for graduate residency transfer credit from work completed via an online/hybrid/correspondence instruction mode. The coursework must still meet all other conditions for graduate residency transfer credit.

After at least one quarter of enrollment, students pursuing an Engineer, D.M.A., or Ph.D. may apply for transfer credit for graduate work done at another institution. Engineer candidates who also earned their master's at Stanford are not eligible for transfer residency credit, nor are any master's degree students. Ph.D. or D.M.A. students may only apply a total of 45 units of transfer credit and credit earned for a Stanford master's degree toward the PhD residency total. Ph.D. or D.M.A. students who are awarded graduate residency credit, who then add another graduate degree to their academic plan, may be required to earn a higher number of units in order to confer their degrees. Students should visit the Minimum Residency Requirements for Graduate Degrees page (https://registrar.stanford.edu/students/graduate-degree-progress/minimum-residency-requirements-graduate-degrees/) for more information. Students who are going to study elsewhere during their degree program at Stanford should obtain prior approval of any transfer credit sought before their departure.

The following criteria are used by the department in determining whether, in its discretion, it awards transfer credit for graduate-level work done at another institution:

1. Courses should have comparable Stanford counterparts that are approved by the student's department. A maximum of 12 units of courses with no Stanford counterparts and/or research units may be granted transfer credit.
2. The student must have been enrolled at the other institution in a student category which yields graduate credit. The maximum amount of credit given for extension and non-matriculated (non-degree) courses is 12 units. No transfer credit is given for online or correspondence work.
3. Courses must have been taken after the conferral of the bachelor's degree. The only exception is for work taken through programs structured like the Stanford coterminal bachelor's/master's program. Any work taken through such programs must be at the graduate level and applied toward the completion of a graduate degree.
4. Courses must have been completed with a grade point average (GPA) of 3.0 (B) or better. Pass grades are accepted only for courses for which letter grades were not an option and for which the standard of passing is 'B' quality work. The only exception to this is for thesis/research/dissertation coursework, for which Pass/Satisfactory/Credit grades can be accepted.
5. Courses must have been taken at a regionally accredited institution in the U.S. or at an officially recognized institution in a foreign country. Courses taken at foreign universities must be at the level of study comparable to a U.S. graduate program. Students should visit the Graduate Residency Transfer Credit page (https://registrar.stanford.edu/students/graduate-degree-progress/graduate-residency-credit/) on the Registrar's web page for more information about what information is needed for international transfer work.

The Application for Graduate Residency Credit is reviewed by the department and the Office of the University Registrar. For transfer credit done under a system other than the quarter system, the permissible maximum units are calculated at an appropriate ratio of equivalence (i.e. credit is converted into quarter units). One semester unit or hour usually equals 1.5 quarter units.

Leaves of Absence (Graduate)

Students on leave of absence are not registered at Stanford and, therefore, do not have the rights and privileges of registered students. They cannot fulfill any official department or University requirements during the leave period.

Leaves do not delay candidacy or master's program expiration dates, except for pregnancy or parental leaves of absence, which do extend these degree milestones.

Students on leave may complete course work for which an 'Incomplete' grade was awarded in a prior term and are expected to comply with the maximum one-year time limit for resolving incompletes; a leave of absence does not stop the clock on the time limit for resolving incompletes. Students with extenuating circumstances that may warrant an exception to academic policy should discuss the need for an extension to the time limit with their adviser and the course instructor. Students may request an extension of the deadline for resolving an incomplete by submitting the Petition to Change Course Enrollment (Graduate Students) (https://stanford.box.com/change-crse-enroll/).

When a student is granted (or placed on) a leave of absence after the beginning of the term, courses in which the student was enrolled after the drop deadline appear on the student's transcript and show the symbol 'W' (Withdraw).

Voluntary Leaves of Absence

Graduate students who do not meet the requirement for continuous registration during the academic year (Autumn, Winter, and Spring quarters) must obtain an approved leave of absence, in advance, for the term(s) they will not be registered. (For a complete definition of full-time enrollment, see the "Definition of Full-time Enrollment (p. 93)" section of this bulletin.) The leave of absence must be reviewed for approval by the chair or director of graduate studies of the student's major department and, if the student is in the United States on a foreign student visa, by the Bechtel International Center (http://icenter.stanford.edu/). Except in the case of pregnancy or parental leaves, the granting of a leave of absence is at the discretion of the department and subject to review by the Office of the University Registrar. The University may condition its approval of a petition for leave of absence on the student's meeting such requirements as the University deems appropriate in the individual case for the student to be eligible to return (such as, in the case of a leave for medical reasons, proof of treatment and/or an interview with a health care professional at Vaden Health Center (http://vaden.stanford.edu/) or Counseling and Psychological Services (https://vaden.stanford.edu/caps-and-wellness/) or its designee).

New graduate students may not take a leave of absence during their first quarter. However, new Stanford students may request a deferment from the department.

Coterminal students who wish to take a leave of absence are subject to the Leave of Absence policies for both undergraduate and graduate students, as described here and in the undergraduate Leaves of Absence and Reinstatement (p. 42) section of this Bulletin. A coterminal student whose undergraduate degree has not been conferred must obtain permission from the master's degree program and the office of Undergraduate Advising and Research, and may not take a leave of absence unless approved for both the graduate and undergraduate leave. Coterminal students are permitted to request a leave of absence for the first quarter of the graduate program.

Leaves of absence are granted for a maximum of one calendar year, or four quarters. Leaves requested for a longer period are approved only in exceptional circumstances (for example, mandatory military service). An extension of leave, for a maximum of one year or four quarters, is approved only in unusual circumstances. Extension requests must be made before the expiration of the original leave of absence. Leaves of absence for graduate students may not exceed a cumulative total of two years (eight quarters including summer quarters).

Any pregnant graduate student may request a Pregnancy Leave of Absence to suspend enrollment around the time of the birth. Alternatively, a pregnant student may choose to remain enrolled and to request a Childbirth Accommodation. Non-birth parents may request a Parental Leave of Absence. Non-birth parents include: parents anticipating or

recently experiencing the birth of a child; parents who adopt a child; and parents by means of surrogacy.

In the case of Pregnancy and Parental Leaves of Absence, all provisions of the policy for Voluntary Leaves of Absence, defined above, will apply, except:

- Any matriculated pregnant student requesting a Pregnancy Leave of Absence will automatically be approved for a leave period of four quarters (12 months).
- Non-birth parents who request a Parental Leave of Absence will automatically be approved for a leave period of one academic quarter.
- Any student on a Pregnancy Leave of Absence in a degree program requiring candidacy, who has not yet been admitted to candidacy, will have the period of time in which to achieve candidacy automatically extended by 12 months (four quarters). If the student has been admitted to candidacy, the candidacy period will be automatically extended by 12 months (four quarters). The 12-month extension of pre-candidacy or candidacy will be applicable whether the student takes a full year of leave or returns in less than one year.
- Any student on a Parental Leave of Absence in a degree program requiring candidacy, who has not yet been admitted to candidacy, will have the period of time in which to achieve candidacy automatically extended by three months (one quarter). If the student has been admitted to candidacy, the candidacy period will be automatically extended by three months (one quarter).
- In the case where a Pregnancy or Parental Leave of Absence would extend the student's cumulative total beyond 8 quarters, that extension will be permitted so that the student may return to their program. The student will then be considered to have reached their maximum cumulative leave.

Discontinuation and Reinstatement

A student's academic degree program may be discontinued if the student:

- fails to be enrolled by the study list deadline; or
- fails to be approved for a leave of absence by the start of the term; or
- voluntarily terminates graduate studies; or
- is dismissed from graduate studies for academic reasons; or
- is expelled from the University.

Students who fail to be either enrolled by the final study list deadline or approved for a leave of absence by the start of a term or after a voluntary withdrawal are required to apply for reinstatement (https://stanford.box.com/appgradreinstate/) through the Graduate Admissions office before they can return to the same degree program. Students whose master's program or doctoral candidacy has expired must petition to have extensions of their programs or candidacy approved by their departments before reinstatement may be approved.

The decision to approve or deny reinstatement is made by the student's department or program. Departments are not obliged to approve reinstatements of students. Reinstatement decisions are made at the discretion of the department or the program and may be based on the applicant's academic status when last enrolled, activities while away from campus, the length of the absence, the perceived potential for successful completion of the program, and the ability of the department to support the student both academically and financially, as well as any other factors or considerations regarded as relevant by the department or program.

If the student is eligible to be reinstated and is seeking reinstatement to a degree program that is no longer offered by Stanford University, the student should contact the department or program that offers the most similar degree to inquire about admission into the new degree program. The decision to grant admission into this new degree program rests with the department or program.

Reinstatement information is available from the Graduate Admissions office (https://gradadmissions.stanford.edu/). Successful applicants are billed. Department-approved reinstatement applications must be submitted prior to the first day of the term for which re-enrollment is requested if the student is registering for courses. International students must submit reinstatement applications early enough to allow time for I-20 or DS-2019 production, visa interview, etc.

In the rare circumstance where a student who had been dismissed for academic reasons wishes to return to the same degree program, and where reinstatement was not precluded at the time of the dismissal, the student should request reinstatement as described above. In this circumstance, the degree program may review such relevant information as course work completed elsewhere or any other factors deemed to be appropriate for consideration.

Conditions for reinstatement may be established at the discretion of the program. The decision to approve or deny reinstatement is made by the department or program to which the student is seeking reinstatement, and is in its discretion. In addition, the department or program retains the right to condition reinstatement on such academic or other conditions as it deems appropriate.

Students who have been expelled from Stanford University are not permitted to apply for reinstatement.

Involuntary Leave of Absence and Return Policy

In effect as of January 4, 2020

Stanford University is committed to the safety, health and well-being of the campus community. The University recognizes that students may experience situations that significantly limit their ability to function successfully or safely in their role as students. In such circumstances, students should consider requesting a leave of absence. A leave of absence permits students to take a break from the University and their studies, so that they may address the issues that led to the need for the leave and later return to the University with an enhanced opportunity to achieve their educational goals. Students will be given the option to take a voluntary leave of absence before a decision is made with respect to an involuntary leave.

1. Involuntary Leave of Absence

Requiring a student to take a leave of absence is rare and, subject to Section III, only happens when current medical knowledge and/or the best available objective evidence indicates to the Senior Associate Vice Provost and Dean of Students or their designee (hereinafter, Dean of Students) that there is a significant risk to the student's health or safety or the health or safety of others, or the student's behavior severely disrupts the University environment, and no reasonable accommodations can adequately reduce that risk or disruption.

Consistent with Stanford's Nondiscrimination Policy (p. 123), Stanford prohibits unlawful discrimination on the basis of any type of disability or any other characteristic protected by applicable law in the administration of the University's programs and activities. Stanford offers a range of resources, support services and accommodations to address the physical and mental health needs of students. However, on rare occasion, a student's needs may require a level of care that exceeds the care the University can appropriately provide. Where current knowledge about the individual's medical condition and/or the best available objective evidence indicates that a student poses a significant risk to the health or safety of a

member of the University community, where a student is unable or unwilling to carry out substantial self-care obligations and poses a significant risk to their own safety not based on mere speculation, stereotypes, or generalizations, or where a student's behavior severely disrupts the University environment and the student does not want to take a voluntary leave, the Dean of Students has the authority to place a student on an involuntary leave of absence. Before placing any student on an involuntary leave of absence, Stanford will conduct an individualized assessment, consulting with the Office of Accessible Education (OAE) to determine if there are reasonable accommodations that would permit the student to continue to participate in the University community without taking a leave of absence.

The Dean of Students may be notified about a student who may meet the criteria of an involuntary leave of absence from a variety of sources including, but not limited to, the student, the student's academic advisor, Residential Education staff, Graduate Life Office staff, an academic department, or a member of the University's threat assessment team. If the Dean of Students deems it appropriate, these procedures will be initiated.

a. **Procedures for Placing a Student on an Involuntary Leave of Absence**

i. The Dean of Students will consult with the Office of Accessible Education (OAE) prior to making a decision to impose an involuntary leave of absence.

ii. The Dean of Students will issue a notice to the student in writing that an involuntary leave of absence is under consideration. The written notice will include the reason(s) why the student is being considered for an involuntary leave, contact information for OAE, which can provide information about accommodations, and a copy of this policy. In addition, the notice will provide contact information for the Process Resource, an administrator outside of the decision-making process with knowledge of Stanford's involuntary leave of absence process who will serve as a neutral process resource to answer any student questions about the process from referral through return to Stanford. In the written notice, the student will be encouraged to respond before a decision regarding a leave of absence is made and will be given a specified time period within which to do so.

iii. The Dean of Students will consider potential accommodations and/or modifications that could obviate the need for an involuntary leave of absence, such as the option to take a voluntary leave of absence, academic accommodations, housing and dining accommodations, and modifications to University policies, rules, and regulations. Examples of academic, administrative, and housing accommodations that may be facilitated through the Office of Accessible Education (OAE) can be found on the OAE (https://oae.stanford.edu/) website.

iv. The student may be asked to execute an Exchange of Confidential Information Consent Form providing Stanford personnel temporary authority to get information from the student's healthcare provider(s) regarding issues relevant and appropriate to the consideration of an involuntary leave of absence when there is a need for the University to have access to that information as part of the interactive process and individualized assessment. If a student refuses to execute an Exchange of Confidential Information Consent Form or to respond within the timeframe set by the Dean of Students, the Dean may proceed with the assessment based on information in the Dean's possession at the time.

v. The Dean of Students will also confer, as feasible and when appropriate in a particular matter, with individuals regarding the need for an involuntary leave of absence. Although each case will vary, conferring individuals could include:

1. Residence Deans, or Graduate Life Office Deans;
2. Faculty members;
3. Academic advisors;
4. With appropriate authorization, representatives from Stanford's Vaden Health Center (Vaden);
5. With appropriate authorization, the student's treatment provider(s) or other health care professionals;
6. Member(s) of the University's threat assessment team; and/or
7. Such other individuals as may be appropriate in an individual matter.

In each case, the Dean of Students will confer with a representative from the Office of Accessible Education (OAE) with expertise in mental health disabilities.

vi. Particular attention will be paid to the criteria for imposing an involuntary leave of absence, specifically:

1. whether current knowledge about the individual's medical condition and/or the best available objective evidence indicates that a student poses a significant risk to the health or safety of a member of the University community;
2. whether a student is unable or unwilling to carry out substantial self-care obligations and poses a significant risk to their own safety not based on mere speculation, stereotypes, or generalizations; and/or
3. whether a student's behavior severely disrupts the University environment.

The individualized assessment as to each factor, based on reasonable judgment that relies on current medical knowledge or on the best available objective evidence, should ascertain: the nature, duration, and severity of the risk or disruption; the probability that the risk or disruption will actually occur; and whether reasonable modifications of policies, practices, or procedures will adequately mitigate the risk or disruption so as to eliminate the need for an involuntary leave of absence.

vii. The Dean of Students will give significant weight to the opinion of the student's treatment provider(s), including those identified by the student, regarding the student's ability to function academically and safely at the University with or without reasonable accommodations. If the Dean of Students determines that the information provided by the treatment provider(s) is incomplete, requires further explanation or clarification, or is inconsistent with other information in the student's record, the Dean of Students, with proper authorization, will contact the treatment provider(s) to obtain additional information. In certain circumstances, the University may require the student to undergo an additional evaluation by an independent and objective professional designated by Stanford, if the Dean of Students believes it will facilitate a more informed decision.

viii. Following these consultations and based on a review of the relevant documentation and information available, the Dean of Students will make a decision as to whether the student should be placed on an involuntary leave of absence, and will provide written notice of this decision to the student. The written notice of decision will include information about the student's right to appeal and to reasonable accommodations during the appeal process. The review and notice of decision under this policy should be done in a reasonably timely manner. Where students have been asked to remain away from the University while the review is underway, every effort will be made by the Dean of Students to reach a decision within one week, provided the student responds in a timely manner to requests for information and, if appropriate, evaluation.

1. If an involuntary leave of absence is imposed. The written notice of decision to the student will set forth the basis for the decision and a time-frame for when the student must leave the University and when they may be eligible to return to the University and the conditions and/or requirements the student will need to satisfy to be eligible for return. The written notice will also inform the student of their right to reasonable accommodations in the return process and will provide contact information for OAE and the Process Resource. The length of the leave will be determined on an individual basis.

2. If an involuntary leave of absence is not imposed. The Dean of Students may impose conditions and/or requirements under which the student is allowed to remain at the University.

ix. Within one week of receiving the decision of the Dean of Students, the student may submit an appeal of the decision in writing to the Vice Provost for Student Affairs or the Vice Provost's designee, who may not be the Dean of Students. The written request for appeal must specify the particular substantive and/or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the decision of the Dean of Students. The review by the Vice Provost for Student Affairs or the Vice Provost's designee will be limited to the following considerations:

1. Were the proper facts and criteria brought to bear on the decision?

2. Is there any new information not previously available to the student that may change the outcome of the decision-making process?

3. Were there any procedural irregularities that materially affected the outcome of the matter to the detriment of the appellant?

4. Given the proper facts, criteria, and procedures, was the decision a reasonable one?

After reviewing the matter fully, the Vice Provost for Student Affairs or the Vice Provost's designee will issue a written decision affirming, modifying, or reversing the decision to place the student on an involuntary leave of absence. The Vice Provost's decision shall be final, and no other appeals or grievance procedures are available.

b. **Implications of an Involuntary Leave of Absence**

i. Student status. Students on a leave of absence generally retain their admitted student status; however, they are not registered and therefore do not have the rights and privileges of registered students.

ii. Housing. Consistent with Stanford's policies and procedures, students assigned to a University residence are subject to the terms of the University Residence Agreement. However, as set forth on the Registrar's Office Leave of Absence website, students with medical disabilities (including mental health disabilities) that require University medical services may petition to remain in campus housing for one term while on leave. Students who leave the University before the end of a term may be eligible to receive refunds of portions of their housing charges. Eligibility criteria for refunds are set forth in the Residence Agreement which is found on the Residence Agreement website (https://rde.stanford.edu/studenthousing/apply/residence-agreement/). (https://rde.stanford.edu/studenthousing/apply/residence-agreement/)

iii. Effective date(s) of leave. A student must leave the University within the timeframe set forth by the Dean of Students. The leave will remain in effect until (1) it is determined after an individualized assessment that the student is able to return to the University with or without reasonable accommodations and (2) the student has complied with any University requirements applicable to all students returning from a leave and all of the conditions mandated by the Dean of Students and/or the Vice Provost.

iv. Notification. At any time during the leave process, the Dean of Students may notify a

student's parent, guardian, emergency contact, or other individual, consistent with the law, if notification is deemed appropriate.

v. Association with the University while on leave. Unless expressly permitted by the Dean of Students in writing, students on an involuntary leave of absence are not permitted to be present at the University and are not permitted to engage in any University-related activities, including on-campus employment.

vi. Coursework taken while on leave. Consistent with Stanford's policies and procedures, academic credit for work done elsewhere may be allowed towards a Stanford degree. Students should refer to the "Transfer Work (p. 82)" section of the Stanford Bulletin and consult with the Registrar's Office and their department prior to taking any coursework while on an involuntary leave of absence.

vii. SUnet ID privileges. Unless expressly prohibited by the Dean of Students in writing, students on leave generally may retain their SUnet ID privileges, including their Stanford email account.

viii. Transcript notation. Students on a leave of absence will have a notation on their transcript that reads "Leave of Absence."

ix. Tuition and fees. Consistent with Stanford's policies and procedures, students who leave the University before the end of a term may be eligible to receive refunds of portions of their tuition. See the (https://registrar.stanford.edu/students/tuition-and-fees/tuition-refund-schedule/) Registrar's Tuition Refunds (https://registrar.stanford.edu/students/tuition-and-fees/tuition-refund-schedule/) page for a schedule of refunds.

x. Meal Plan. Consistent with Stanford's policies and procedures, a meal plan refund is based on the date when a student moves out of University residence and is approved

under conditions as specified in the Residence Agreement. Students with questions about residential meal plan refunds should contact the central office of Stanford Dining.

xi. Visa Status. International students (F-1 and J-1 Visa holders) placed on an involuntary leave of absence must speak with a Bechtel International Center advisor regarding their visa status.

2. Request for Return

a. For general requirements applicable to all students returning to Stanford after a leave of absence, undergraduate students should refer to the Returning to Stanford (https://undergrad.stanford.edu/planning/academic-policies/returning-students/) website. Graduate students should consult with their academic department and a Graduate Life Office Dean. In addition to the general requirements all students must meet when returning to Stanford after a leave of absence, as well as any conditions mandated by the Dean of Students and/or the Vice Provost for return from an involuntary leave of absence as outlined below in section II.C, students seeking to return from an involuntary leave of absence for reasons of personal or community health and safety may be required to submit additional documentation related to the factors set forth in section I.A.6 as part of an individualized assessment. OAE will work with the students to provide reasonable accommodations in the return process as necessary.

b. A student must make a written request to the Dean of Students to return to the University. Generally, a student will not be allowed to return until one full quarter has elapsed or until the leave period in the involuntary leave of absence notification has elapsed, and all conditions and/or requirements are met.

c. The Dean of Students may require the student to provide evidence that the student, with or without reasonable accommodations, has sufficiently addressed the issues that previously established the criteria for imposing an involuntary leave of absence as set forth in section I.A.6, above. The Dean of Students may also ask, confer with, or seek information from others to assist in making the determination. The information sought may include:

   i. At the student's discretion, documentation of efforts by the student to address the issues that led to the leave

   ii. With appropriate authorization, release of academic records to inform treating clinicians

   iii. With appropriate authorization, release of treatment information to the extent necessary to determine if the student has sufficiently reduced the risk or disruption that led to the need for the involuntary leave

   iv. With appropriate authorization, consultation with Vaden to the extent necessary to determine if the student has sufficiently reduced the risk or disruption that led to the need for the involuntary leave

   v. Consultation with OAE

d. All returning students must meet the essential eligibility requirements and any technical standards of the University and, if applicable, the relevant school or department, with or without reasonable accommodations. If the Dean of Students is not satisfied that the student is ready to return to the University, the student will be notified in writing of the decision, including the reason for the decision, within a reasonable time after the student has submitted a request for return and required documentation.

e. A student not permitted to return may appeal the decision to the Vice Provost for Student Affairs following the procedure in section I.A.9.

3. Scope of the Policy and Relationship to Other University Policies

A leave of absence is an administrative process; it is not a disciplinary process. This policy and these procedures are not intended to be punitive and do not take the place of disciplinary actions that are in response to violations of Stanford's Fundamental Standard or other policies or directives, nor do they preclude the removal or dismissal of students from the University or University-related programs as a result of violations of other University policies or school or departmental protocols. This policy does not limit the University's ability to place enrollment holds on students for reasons beyond the scope of this policy and nothing in this policy relieves a student of any financial obligations to the University that were in place at the time the involuntary leave of absence was imposed.

Nothing in this policy limits the power of the University to take administrative action to ensure the safety of the Stanford community. In exceptional circumstances, where the health or well-being of any person may be seriously affected, or where physical safety is seriously threatened, or where the ability of the University to carry out its essential operations is seriously threatened or impaired, the President or the President's designee, may summarily suspend, dismiss, or bar any person from the University or University-related programs. In all such cases, actions taken will be reviewed promptly, typically within one week, by the appropriate University authority.

In situations involving an imminent or ongoing threat of harm to the student or any other member of the University community, the Dean of Students, in the exercise of his or her reasonable judgment, may require a student to be immediately prohibited from entering Stanford's campus or facilities utilized for University programs or activities while the individualized assessment and review described in section I.A. are taking place. Such students will receive the written notice described in section I.A.2 as quickly as possible.

4. Requests for Reasonable Accommodation

Stanford is committed to providing equal access to all participants in University processes, including students with disabilities. Students with disabilities should contact the Office of Accessible Education (OAE) to request accommodations. Information about the support services OAE provides, types of accommodations offered, and appropriate documentation for accommodations, can be found on the OAE website: https://oae.stanford.edu/.

5. Related Resources

As noted herein, students placed on an involuntary leave of absence may have additional conditions and/or requirements they must meet prior to returning to the University, in addition to any University requirements applicable to all students returning from a leave.

- Undergraduate Students should consult the Returning to Stanford (https://undergrad.stanford.edu/planning/academic-policies/returning-students/) web page for generally applicable deadlines, information and resources.
- Graduate Students should consult with a Graduate Life Office (https://glo.stanford.edu/) Dean and their department for generally applicable deadlines, information and resources.

Students who are placed on an involuntary leave of absence may want to consult with the following offices, where appropriate:

- Office of Accessible Education (https://oae.stanford.edu/) (OAE) (https://oae.stanford.edu/)
- Financial (http://web.stanford.edu/dept/finaid/) Aid (http://web.stanford.edu/dept/finaid/)
- Student Financial (http://web.stanford.edu/group/fms/fingate/students/) Services (http://web.stanford.edu/group/fms/fingate/students/)
- University Housing (http://web.stanford.edu/dept/rde/cgi-bin/drupal/housing/)
- Vaden Health Center (http://vaden.stanford.edu/) (Vaden)
- Academic Advising (https://undergrad.stanford.edu/academic-advising-stanford/)
- Graduate Life (https://glo.stanford.edu/) Office (https://glo.stanford.edu/)
- Bechtel International (https://bechtel.stanford.edu/immigration/visa-types/f-1j-1-student-visas/leave-absence/) Center (https://bechtel.stanford.edu/immigration/visa-types/f-1j-1-student-visas/leave-absence/)

The Process Resource will be available to assist all students who are placed on an involuntary leave of absence with their questions about the process to return and resume their studies and life at Stanford.

Terminal Graduate Registration (TGR)

Doctoral students who have been admitted to candidacy, completed all required courses and degree requirements other than the University oral exam and dissertation, completed 135 units or 10.5 quarters of residency (if under the old residency policy), and submitted a Doctoral Dissertation Reading Committee form, may request Terminal Graduate Registration status to complete their dissertations. Students pursuing Engineer degrees may apply for TGR status after admission to candidacy, completion of all required courses, and completion of 90 units or six quarters of residency (if under the old residency policy). Students enrolled in master's programs with a required project or thesis may apply for TGR status upon completion of all required courses and completion of 45 units. Students with more than one active graduate degree program must be TGR-eligible in all programs in order to apply for TGR status.

The TGR Final Registration status may also be granted for one quarter only to a graduate student who is working on 'Incomplete' grades in his or her final quarter or registering for one final term after all requirements are completed when Graduation Quarter is not applicable. TGR requirements above apply. Doctoral students under the term-based residency policy need nine quarters of residency to qualify for TGR Final Registration Status. Students on TGR Final Registration status may only enroll in their TGR course.

During the academic year TGR students must enroll for zero units in their department's TGR course in the appropriate section for their adviser (801 for master's and Engineer degree students or 802 for doctoral students). Students in TGR status are charged a special tuition rate and are certified as enrolled full time. TGR students may enroll in up to 3 units of course work per quarter at the TGR tuition rate without incurring additional tuition charges. TGR students may enroll in more than 3 units, in such cases tuition will be charged at the applicable unit rate. Courses completed while in TGR status cannot be applied towards requirements for any degree program. See the "Minimum Progress Requirements for Graduate Students (https://exploredegrees.stanford.edu/graduatedegrees/#degreeprogresstext)" of this bulletin for information about satisfactory progress requirements for TGR students.

While enrollment in Summer Quarter is typically optional, degree programs, advisors, or funding sources may require students in TGR status to enroll. The minimum enrollment requirement in Summer Quarter is one unit or the appropriate TGR rate.

Graduate Petition for Part-time Enrollment

(Formerly Graduate Tuition Adjustment)

Requests to enroll for fewer than 8 units during the academic year are approved only in specific circumstances. Graduate students who need fewer than 8 remaining units to complete degree requirements or to qualify for TGR status, may register for one quarter on a unit basis (3 to 7 units) to cover the deficiency. This status may be used only once during a degree program. Coterminal students are not eligible for this status when their undergraduate career remains open.

Matriculated and enrolled pregnant graduate students may request up to two quarters of part-time enrollment for an approved Childbirth Academic Accommodation; see the "Pregnancy, Childbirth, Adoption and Lactation (https://exploredegrees.stanford.edu/graduatedegrees/#degreeprogresstext) Policy (p. 70)" section of this bulletin and the GAP 5.9 Pregnancy, Childbirth, Adoption and Lactation. (https://gap.stanford.edu/handbooks/gap-handbook/chapter-5/subchapter-9/)

International students should consult with Bechtel International Center (https://bechtel.stanford.edu/) prior to requesting part-time enrollment to ensure compliance with visa regulations.

All students requesting part-time enrollment should submit the Graduate Petition for Part-time Enrollment (https://stanford.box.com/tuitadjreq/) eForm.

Graduate Petition for Part-time Enrollment - OAE Accommodation

Graduate students with disabilities covered under the Americans with Disabilities Act may enroll in an approved reduced course load as recommended by the Office of Accessible Education (OAE) (https://oae.stanford.edu/). Students who have been approved by OAE may request this status for multiple quarters. Coterminal students who are approved to go on this status by OAE will also be approved by the Office of the University Registrar.

International students should consult with Bechtel International Center (https://bechtel.stanford.edu/) prior to requesting part-time enrollment to ensure compliance with visa regulations.

All students requesting part-time enrollment on the basis of an OAE Accommodation should submit the Graduate Petition for Part-Time Enrollment -OAE Accommodation eForm to ensure proper routing and processing of their request.

Graduation Quarter Status

Registration is required for the term in which a student defends and/or submits a dissertation, or has a degree conferred. Students who meet all the following conditions are eligible to be assessed a special tuition rate for the quarter in which they are receiving a degree:

1. All course work, degree requirements, and residency requirements for all graduate degree programs, including joint degree programs, have been completed prior to the start of the requested Graduation Quarter.
2. The student has formally applied to graduate in Axess.
3. The student has only to defend and/or submit the dissertation, project, or master's thesis by the deadline for submission in the term designated as the graduation quarter.

4. The student has filed all necessary forms regarding graduation quarter before the first day of the term chosen as graduation quarter.

A student who is returning after reinstatement in which all degree requirements are complete, with the exception of the dissertation defense and/or submission, is eligible to reinstate into a Graduation Quarter status.

Students on graduation quarter are registered at Stanford and, therefore, have the rights and privileges of registered students. Graduation Quarter status may be used only once during a degree program. There is a tuition rate of $150 for the graduation quarter. Students in Graduation Quarter status and enrolled in a course numbered 801 or 802 are certified as enrolled full time. Students may not enroll in any additional units.

Conferral of Degrees

Upon recommendation to the Senate of the Academic Council by the faculty of the relevant departments or schools and the Committee on Graduate Studies, degrees are awarded four times each year, at the conclusion of Autumn, Winter, Spring, and Summer terms. All diplomas, however, are prepared and distributed after degree conferral in accordance to the distribution dates listed on the Registrar's Office (https://registrar.stanford.edu/students/diplomas/) web site.

Students must apply for conferral of a graduate degree by filing an Application to Graduate in Axess by the deadline for each term. The deadlines are available in the Academic Calendar (https://registrar.stanford.edu/academic-calendar/). A separate application must be filed for each degree program and for each conferral term.

Requests for conferral are reviewed by the Office of the University Registrar and the student's department to verify completion of degree requirements. Students must be registered in the term of degree conferral. Students with unmet financial obligations resulting in the placement of a hold on their registration cannot receive a transcript, statement of completion, degree certificate, or diploma until the hold is released by the Office of Student Financial Services. An academic record where no other degree objective is being pursued is permanently frozen after the final degree conferral.

Students are typically expected to apply to graduate when they have completed their degree requirements. The University, however, reserves the right to confer a degree on a student who has completed all of the requirements for a degree even though the student has not applied to graduate; such an individual would then be subject to the University's usual rules and restrictions regarding future enrollment or registration.

Students who wish to withdraw a request for conferral or make changes to the Application to Graduate can do so in Axess by the late application to graduate deadline. Students who withdraw their graduation applications or fail to meet degree requirements must reapply to graduate in a subsequent term.

Stanford University awards no honorary degrees.

Graduate Advising

Academic advising by Stanford faculty is a critical component of all graduate students' education. By the start of their first term, all graduate students should identify or be paired by the department with a faculty adviser who assists them in planning a program of study to meet degree requirements. The process by which students are matched with faculty advisers varies by department or program.

The University requires that within each department or program minimum advising expectations be set for both adviser and advisee. Such minimum expectations must differentiate between master's and doctoral programs, and between different types of advisers (academic/program vs. research). These department or program expectations must be distributed to faculty and graduate students on an annual basis at the start of each academic year and must be easily accessible on the web. Advising expectations are also listed under the "Graduate Advising" tab under the description of each graduate program in this bulletin. Faculty are expected to affirm that they have received the advising expectations. Each faculty member has the prerogative to augment the departmental advising expectations with their specific additional expectations, while remaining consistent with the departmental advising policies.

Faculty advisers are to:

- serve as intellectual and professional mentors to their graduate students
- provide knowledgeable support concerning the academic and non-academic policies that pertain to graduate students
- help to prepare students to be competitive for employment
- maintain a high level of professionalism in the relationship
- establish and collaboratively maintain expectations of the adviser/advisee relationship, consistent with departmental standards.

Students are obliged to follow university and department procedures for identifying advisers and committee members for their dissertation reading and university oral examinations. The principal dissertation adviser for doctoral students must be a member of the Academic Council. Students may identify a co-adviser in addition to the principal dissertation adviser; normally both principal adviser and co-adviser are members of the Academic Council. A former Stanford Academic Council member, emeritus professor, or non-Academic Council member may serve as co-adviser with the appointment of a principal dissertation adviser who is currently on the Academic Council.

Occasionally, a student's research may diverge from the area of competence of the adviser, or irreconcilable differences may occur between the student and the faculty adviser. In such cases, the student or the faculty adviser may request a change in assignment. If the department decides to grant the request, every reasonable effort must be made to pair the student with another suitable adviser. This may entail some modification of the student's research project.

In the rare case where a student's dissertation research on an approved project is in an advanced stage and the dissertation adviser is no longer available, every reasonable effort must be made to appoint a new adviser, usually from the student's reading committee. This may also require that a new member be added to the reading committee before the draft dissertation is evaluated, to keep the reconstituted committee in compliance with the University requirements for its composition.

Departments should make every effort to assist doctoral students who are not yet admitted to candidacy in finding an appropriate principal dissertation adviser. The department should also inform doctoral students in a timely fashion about procedures for selecting a dissertation adviser, reading committee members, and orals committee members.

In addition to this bulletin and the GAP 3.3. Academic Advising (https://gap.stanford.edu/handbooks/gap-handbook/chapter-3/subchapter-3/), several University policies apply to all faculty-student advising relationships. The University's Research Policy Handbook 1. Conduct of Research (https://doresearch.stanford.edu/policies/research-policy-handbook/conduct-research/) outlines policies and practices related to the conduct of research, including obligations to students, staff, and sponsors. The Administrative Guide 1.1.1. University Code of Conduct (https://adminguide.stanford.edu/chapter-1/subchapter-1/policy-1-1-1/) articulates the policy that all members of the Stanford community are responsible for sustaining the highest ethical standards and values of the university and of the broader community.

Additional information and resources about advising can be found on the Office of the Vice Provost for Graduate Education's Advising & Mentoring

web pages (https://vpge.stanford.edu/academic-guidance/advising-mentoring/).

Teaching Credentials

Stanford University is accredited by the California Commission on Teacher Credentialing and is authorized to recommend candidates for credentials. The University offers a complete training program for both Single (Secondary) and Multiple (Elementary) Subject teaching credentials. Upon completion of a Stanford approved program, the credentials allow teachers to serve in California public schools.

Current Stanford undergraduates wishing to complete the requirements for a teaching credential should apply to the coterminal program at the Graduate School of Education (https://ed.stanford.edu/admissions/coterminal/). All other applicants should apply directly to the Stanford Teacher Education Program (https://ed.stanford.edu/step/) (STEP) at the Graduate School of Education.

TRANSFER WORK

Stanford accepts a small number of undergraduate transfer students each year. Requirements for admission (http://www.stanford.edu/dept/uga/application/transfer/) are described as part of the undergraduate application process and are listed on the Undergraduate Admission (http://admission.stanford.edu/) web site. Stanford University has a designated adviser who coordinates support for transfer students.

In conjunction with appropriate review bodies, the Office of the University Registrar evaluates and records the amount of transfer credit and advanced placement test credit an undergraduate can apply toward graduation requirements. Stanford awards credit based on course work completed at U.S. colleges or universities accredited by a regional accrediting association; or course work completed at international colleges or universities of recognized standing. Credit may also be awarded for certain Advanced Placement programs, International Baccalaureate Program, GCE, French Baccalaureate, and the German Abitur examinations.

See the "Advanced Placement (p. 38)" section of this Bulletin for information concerning Stanford's policy on credit for Advanced Placement work. Details on how to request credit for advanced placement examinations are available at the Registrar's Advanced Placement site (http://studentaffairs.stanford.edu/registrar/students/ap/).

Undergraduate Transfer Work

COVID-19 Policies on Undergraduate Transfer Work for Academic Year 2020-21

- The 15-quarter unit cap on online work has been eliminated, students may apply for transfer credit for work that was or will be completed via an online/hybrid/correspondence instruction mode.The coursework must still meet all other conditions for transfer credit.
- Students may reach out to their departments for review/approval of transfer credit without having to first secure a review/approval from the Registrar's Office. Please note: students will want to confirm with departments what their transfer credit process is, if seeking a review of transfer credit for application towards major/minor requirements.
- Credit earned in U.S. military training and service may be eligible for transfer to Stanford if the work was completed at an accredited U.S. college or University or if the work appears on an official Joint Services Transcript (JST) and meets all other conditions for transfer credit. Joint Services Transcripts can be requested via the JST website (https://jst.doded.mil/official.html).

Academic credit for work done elsewhere may be allowed toward a Stanford bachelor's degree under the following rules and conditions:

1. Credit may be granted for work completed at institutions in the U.S. only if the institutions are regionally accredited.
2. Study in institutions outside the U.S., when validated by examination results, tutorial reports, or other official evidence of satisfactory work, may be credited toward a Stanford bachelor's degree, subject to the approval of the credit evaluator and the appropriate departments. See the Registrar's web site (https://registrar.stanford.edu/students/transfer-credit-and-advanced-placement/international-course-work/) for additional information regarding transfer credit requests for course work completed abroad.
3. Credit is officially allowed only after the student has been unconditionally admitted to Stanford.
4. Credit is allowed for work completed at institutions in the U.S. only on the basis of an official transcript received by the Registrar at Stanford directly from the institution where the credit was earned. In order for transfer credit to be awarded, students must submit an official transcript that clearly indicates all of the below information for each course:
   - Course codes/numbers
   - Course titles or descriptions
   - Final grades earned
   - Course credits earned
5. Credit from another institution may be transferred for courses which are substantially equivalent to those offered at Stanford University on the undergraduate level, subject to the approval of the credit evaluator. A maximum of 20 quarter units may represent courses which do not parallel specific undergraduate courses at Stanford, again, subject to the approval of the credit evaluator as to quality and suitability.
6. Course work cannot duplicate, overlap, or regress previous work.
7. Transfer course work cannot count towards secondary school diploma and/or graduation requirements.
8. For students interested in fulfilling a Ways of Thinking/Doing (Ways) breadth requirement through transfer work, a transfer course evaluation must be submitted to confirm if the course will meet the Ways criteria. Requests for fulfilling Ways requirements in transfer require pre-approval prior to course enrollment and the pre-approval requests must be submitted prior to the term in which students intend to enroll in the transfer course and as defined on the Ways (https://undergrad.stanford.edu/programs/ways/getting-credit/ways-credit-classes-taken-other-us-universities/) web site. Courses must be taken for a minimum of 3 quarter units (2 units in the case of Creative Expression only) and must be taken for a letter grade.
   For incoming transfer students, a proportion of their Ways requirement must be fulfilled at Stanford based on the number of qualified transfer units awarded at matriculation. Students must complete a number of Ways courses to fulfill the Ways requirement as outlined in the “Transfer Credit for Ways (p. 35)” section of this bulletin.
9. Transfer work can be used to satisfy a department major or minor requirement. The transfer work must first be officially accepted into the University through the Office of the University Registrar. After the transfer credit has been approved and posted by the Office of the University Registrar, the departments determine if the approved transfer work can be used to satisfy a department major or minor requirement. Students should consult with their departments about a program's transfer credit policies/procedures.
10. The credit allowed at Stanford for one quarter's work may not exceed the number of units that would have been permissible for one quarter if the work had been done at Stanford; for work done under a system other than the quarter system, the permissible maximum units are calculated at an appropriate ratio of equivalence (i.e. is converted into quarter units).
11. Credit is allowed at Stanford for work graded 'C-' (or better) or 'Pass' (where 'Pass' is equivalent to a letter grade of 'C-' or above), but not for work graded 'D' or below.
12. No more than 45 (90 for transfer students) quarter units of credit for work done elsewhere (including external test credit) may be counted toward a bachelor's degree at Stanford.
13. Credit earned in extension, correspondence, and online courses is transferable only if the university offering the courses allows that credit toward its own bachelor's degree. Such credit is limited to a maximum of 45 quarter units for extension courses, a maximum of 15 quarter units for correspondence and online study, and a maximum of 45 quarter units for the combination of extension, correspondence, and online courses. Online and independent study courses are not eligible for Ways credit.

14. Credit earned in military training and service is not transferable to Stanford, unless offered by an accredited college or university in the U.S. and evaluated as above by the credit evaluator.

See the Registrar's web site (https://registrar.stanford.edu/students/transfer-credit-and-advanced-placement/transfer-credit-policies/) for additional information regarding transfer credit policies and procedures.

Graduate Residency Transfer Credit

COVID-19 Policies on Graduate Transfer Work for Academic Year 2020-21

Students may apply for graduate residency transfer credit from work completed via an online/hybrid/correspondence instruction mode. The coursework must still meet all other conditions for graduate residency transfer credit.

After at least one quarter of enrollment, students pursuing an Engineer, D.M.A., or Ph.D. may apply for transfer credit for graduate work done at another institution. Engineer candidates who also earned their master's at Stanford are not eligible for transfer residency credit, nor are any master's degree students. Ph.D. or D.M.A. students may only apply a total of 45 units of transfer credit and credit earned for a Stanford master's degree toward the PhD residency total. Ph.D. or D.M.A. students who are awarded graduate residency credit, who then add another graduate degree to their academic plan, may be required to earn a higher number of units in order to confer their degrees. Students should visit the Minimum Residency Requirements for Graduate Degrees page (https://registrar.stanford.edu/students/graduate-degree-progress/minimum-residency-requirements-graduate-degrees/) for more information. Students who are going to study elsewhere during their degree program at Stanford should obtain prior approval of any transfer credit sought before their departure.

The following criteria are used by the department in determining whether, in its discretion, it awards transfer credit for graduate-level work done at another institution:

1. Courses should have comparable Stanford counterparts that are approved by the student's department. A maximum of 12 units of courses with no Stanford counterparts and/or research units may be granted transfer credit.
2. The student must have been enrolled at the other institution in a student category which yields graduate credit. The maximum amount of credit given for extension and non-matriculated (non-degree) courses is 12 units. No transfer credit is given for online or correspondence work.
3. Courses must have been taken after the conferral of the bachelor's degree. The only exception is for work taken through programs structured like the Stanford coterminal bachelor's/master's program. Any work taken through such programs must be at the graduate level and applied toward the completion of a graduate degree.
4. Courses must have been completed with a grade point average (GPA) of 3.0 (B) or better. Pass grades are accepted only for courses for which letter grades were not an option and for which the standard of passing is 'B' quality work. The only exception to this is for thesis/research/dissertation coursework, for which Pass/Satisfactory/Credit grades can be accepted.
5. Courses must have been taken at a regionally accredited institution in the U.S. or at an officially recognized institution in a foreign country. Courses taken at foreign universities must be at the level of study comparable to a U.S. graduate program. Students should visit the Graduate Residency Transfer Credit page (https://registrar.stanford.edu/students/graduate-degree-progress/graduate-residency-credit/) on the Registrar's web page for more information about what information is needed for international transfer work.

The Application for Graduate Residency Credit is reviewed by the department and the Office of the University Registrar. For transfer credit done under a system other than the quarter system, the permissible maximum units are calculated at an appropriate ratio of equivalence (i.e. credit is converted into quarter units). One semester unit or hour usually equals 1.5 quarter units.

VETERANS AND MILITARY BENEFITS

The Office of the University Registrar serves as the liaison between the University, its students, and the various federal, state, and local agencies concerned with Veterans Affairs (VA) education benefits and Department of Defense (DoD) tuition assistance.

Stanford University has made a good faith effort to comply with the Principles of Excellence established by Executive Order 13607. Stanford University participates in the Department of Defense Voluntary Education Partnership program so that eligible active duty service members are able to obtain Tuition Assistance from their military branch as administered by the Department of Defense. The VA Certifying Officer (https://go.oncehub.com/VACertifyingOfficialAppointment/) in the Student Services Center serves as the first point of contact for Veterans education benefits assistance and DoD tuition assistance.

Stanford certifies enrollment for Veterans education benefits for students in degree seeking programs, and students in one of 36 VA approved certificate programs offered through the Stanford Center for Professional Development and the Graduate School of Business. Other non-matriculated and certificate programs are not eligible. All students eligible to receive Veterans education benefits or DoD tuition assistance while attending the University are urged to complete arrangements with the appropriate agency in advance of enrollment.

Stanford University is required to certify only those courses that meet minimum graduation requirements. Courses not directly related to a student's degree program or courses beyond those required for a specific degree program are not certified. Undergraduates should meet with an adviser to develop a course enrollment plan. Graduate students should have their departments approve their study lists as meeting graduation requirements on a quarterly basis.

To comply with federal regulations concerning credit for previous training (38 CFR 21.4253), Stanford University is required to evaluate all previous education and training completed elsewhere to determine what credit, if any, should be granted to students eligible to receive Veterans education benefits or DoD tuition assistance. Stanford is required to complete an evaluation; credit is granted when appropriate. Credit is evaluated toward the degree program registered with Veterans Affairs or DoD as determined by the Office of the University Registrar in conjunction with the relevant academic department(s) or program(s). All relevant policies regarding transfer credit apply. In addition, this evaluation occurs each time a student's degree program is changed. Subject to current federal and University guidelines, students eligible for receipt of Veterans education benefits or DoD tuition assistance have their prior education and training evaluated up to the credit limits outlined in the "Residency Policy for Graduate Students (p. 65)" and "Undergraduate Degrees and Programs (p. 31)" sections of this bulletin. As an exception to that policy, students in master's programs in the schools of Earth Sciences, Education, Engineering, Humanities and Sciences, Law, Medicine, and Graduate Business are allowed a maximum of 6 transfer (quarter) units.

VA Status

In order to activate students' VA education benefits at Stanford the Office of the University Registrar requires that students submit the following forms:

- A copy of the Certificate of Eligibility distributed by the VA
- DD-214 (if applicable)
- Any official transcripts from other institutions

It is the students' responsibility to ensure that all forms are submitted to the Office of University Registrar in order to activate the student as a VA education benefits receiving student.

In order to comply with VA regulations, students are responsible for the following:

- Obtain official transcripts from all postsecondary institutions attended, whether VA education benefits were received or not.
- Report any changes in enrollment status to the Office of the University Registrar.
- Report any changes that are made to a degree plan. Undergraduates declaring or making changes to their major(s), minor(s), honor(s), or degree program(s) in Axess and Graduates adding or removing degree programs through the Graduate Program Authorization Petition in Axess should email the VA Certifying Officer at vabenefits@stanford.edu to report a degree plan change.
- General overpayments of VA education benefits are the responsibility of the student, even if the payment was submitted directly to the school on the student's behalf.
- Stanford University is required to certify only those courses that meet minimum graduation requirements. Courses not directly related to a student's degree program or courses beyond those required for a specific degree program are not certified. Undergraduates should meet with their adviser to develop a course enrollment plan. Graduate students should have their departments approve their study lists as meeting graduation requirements on a quarterly basis.
- If concurrently enrolled with another college/university, notify both Stanford and the host institution.
- *Undergraduates only:* VA regulations require undergraduates to declare their major by the end of their sophomore year. Stanford cannot certify enrollment to the VA beyond sophomore year unless a major has been declared. Note that a student can change their major at any time.

Certification

The Office of the University Registrar certifies enrollment to the Department of Veterans Affairs (VA) quarterly, using a two-step certification process. Up to 30 days prior to the start of the quarter, students enrolled full-time per their degree program will be certified for the Monthly Housing Allowance (MHA). See the Stanford Academic Calendar for exact dates in each quarter.

After the Final Study list deadline, the Office of the University Registrar confirms student enrollment and completes the certification for tuition and fees. Students are certified based on the terms indicated in the VA Education Benefits Enrollment Application (https://military.stanford.edu/students/activate-va-education-benefits-stanford/) that must be submitted annually. Should an adjustment need to be made, it is the student's responsibility to contact the VA Certifying Officer at vabenefits@stanford.edu as soon as possible to correct the terms of use.

General overpayments of VA education benefits are the responsibility of the student. If the enrollment change has resulted in tuition overpayment, the student is responsible for paying the tuition and fees back to the VA. If the student is a Ch. 33 recipient and the enrollment change has resulted in tuition overpayment, a debt letter will be sent to the University to return said overpayment. The student will also be issued a debt letter to return any Monthly Housing Allowance overpayments. It remains the student's responsibility to provide tuition and fees back to the VA. If the enrollment change has resulted in underpayment, the VA sends the difference in tuition and fees to the student, excluding Ch. 33 recipients. If you are a Ch. 33 recipient, tuition and fees will be paid directly to the institution in a separate payment.

Programs Subject to Restriction

Note that the following programs cannot be certified due to VA and federal regulations:

- *Certificate programs for non-matriculated students:* The VA defines "matriculated" as having been formally admitted to a college or university. Per the VA, educational benefits cannot be paid to "non-matriculated" college or university students. Hence, any certificate program that does not officially admit its students into Stanford University cannot be certified. All Stanford approved certificate programs are listed via the Web Enable Approval Management System (https://inquiry.vba.va.gov/weamspub/buildSearchInstitutionCriteria.do) (WEAMS).
- *Visiting Students Programs:* Stanford cannot certify visiting students unless they meet one of the following conditions:

1. The student has an approved parent letter from the home institution which guarantees that the courses can be transferred back to original program.
2. The student is pending admission to a Stanford degree program and is required to take a prerequisite course(s). In that case the student can be certified for two terms.

- *Medical Residencies/Fellowship programs that are not certified by the ACGME:* these residencies are not allowed to be certified as on the job training. This is according to VA guidelines and the Federal Code of Regulations. See the School of Medicine for a full list of the fellowship/residency programs.

All students eligible to receive Veterans education benefits while attending the University are urged to complete arrangements with the appropriate agency in advance of enrollment.

Financial Aid

The Post-9/11 GI Bill, also known as Chapter 33, is the most commonly used VA education benefits program at Stanford. This program provides funding for tuition, required fees, books and housing. The level of an individual student's Chapter 33 benefits is determined by the qualifying veteran's length of military service since 9/11/2001. Eligible students may also receive funds through the Yellow Ribbon Provision.

Most of the VA education benefit programs pay benefits directly to students on a monthly basis. However, under the Post-9/11 GI Bill (Chapter 33), the VA sends tuition and fees benefits to Stanford, where the Financial Aid Office is responsible for applying the funds to the student account (university bill). Chapter 33 books and housing benefits are sent directly to students monthly. Students may need to apply the housing benefits to the university bill to pay for on-campus room and board.

Yellow Ribbon Provision

Stanford elects on a yearly basis to participate in the Yellow Ribbon Program. Under this provision Stanford provides an annual contribution to supplement the Chapter 33 base tuition benefit. The VA matches Stanford's Yellow Ribbon contribution. For graduate and professional students, the amount of Stanford's Yellow Ribbon contribution varies by school and program; see the Yellow Ribbon information on the University Registrar's website. Also, see the U.S. Department of Veteran's Affairs Yellow Ribbon web site (https://www.benefits.va.gov/gibill/yellow_ribbon/yellow_ribbon_info_schools.asp) for additional information.

Undergraduates

Undergraduates may apply for need-based financial aid from Stanford to supplement VA education benefits. If the financial aid application demonstrates financial need beyond the amount of expected VA education benefits, the student will be awarded institutional aid to meet the additional need.

If the student will be receiving VA education benefits transferred from a parent, the student will be treated as a dependent student for financial aid purposes. The student's parents' income and asset information will be considered in determining eligibility for need-based aid from Stanford. If the student is a Veteran, the student will most likely be treated as an independent student and will not need to provide parent information. Receipt of VA education benefits does not impact your eligibility for federal student loan programs.

VA education benefits are treated like other outside awards in that they can reduce or replace the Student Responsibility portion of the aid package. VA education benefits do not reduce or replace the Parent Contribution in the determination of eligibility for need-based Stanford aid.

Graduate Students

Schools and departments are responsible for providing the Yellow Ribbon contribution for eligible graduate students. The Financial Aid Office will coordinate receipt of funds with responsible individuals in each school. Receipt of VA education benefits does not impact your eligibility for federal student loan programs.

Veterans Education Benefits

The Office of the University Registrar serves as the liaison between the University, its students, and the various federal, state, and local agencies concerned with Veterans education benefits. Stanford certifies enrollment for students in degree seeking programs and VA approved certificate programs offered through the Stanford Center for Professional Development and Graduate School of Business. Other non-matriculated and certificate programs are not eligible. All students eligible to receive Veterans education benefits while attending the University are urged to complete arrangements with the appropriate agency in advance of enrollment.

Stanford University is required to certify only those courses that meet minimum graduation requirements. Courses not directly related to a student's degree program or courses beyond those required for a specific degree program are not certified. Undergraduates should meet with an advisor to develop a course enrollment plan. Graduate students should have their departments approve their study lists as meeting graduation requirements on a quarterly basis.

To comply with federal regulations concerning credit for previous training (38 CFR 21.4253), Stanford University is required to evaluate all previous education and training completed elsewhere to determine what credit, if any, should be granted to students eligible to receive Veterans educational benefits. Stanford is required to complete an evaluation; credit is granted when appropriate. Credit is evaluated toward the degree program registered with Veterans Affairs as determined by the Office of the University Registrar in conjunction with the relevant academic department(s) or program(s). All relevant policies regarding transfer credit apply. In addition, this evaluation occurs each time a student's degree program is changed.

Subject to current federal and University guidelines, students eligible for receipt of VA educational benefits have their prior education and training evaluated up to the credit limits outlined in the "Residency Policy for Graduate Students (p. 72)" section of this bulletin. As an exception to that policy, students in master's programs in the schools of Earth Sciences, Education, Engineering, Humanities and Sciences, Law, Medicine, and Graduate Business are allowed a maximum of 6 transfer (quarter) units.

Students should consult with the VA Certifying Officer for consideration of optimal use of VA education benefits.

Stanford participates in the Yellow Ribbon provision of the Post 9/11 GI Bill (Ch. 33). If a matriculated student qualifies for Chapter 33 benefits at the 100% level, the student may be eligible to receive additional funding through the Yellow Ribbon Program. Under this program, Stanford provides an institutional award to supplement the Chapter 33 base tuition benefit. The VA also matches Stanford's Yellow Ribbon contribution. The amount of institutional contribution varies by school and program. See the U.S. Department of Veteran's Affairs Yellow Ribbon web site (https://www.benefits.va.gov/gibill/yellow_ribbon/yellow_ribbon_info_schools.asp) for additional information.

See the Office for Military Affiliated Communities (OMAC) website (https://military.stanford.edu/students/activate-va-education-benefits-stanford/) for additional information about Veterans education benefits.

Veterans Benefits and Transition Act of 2018 (Section 103)

Stanford University is a participant in the Veterans Benefits and Transition Act of 2018 signed into law on December 31, 2018, by the President of the United States. This provision was effective August 1, 2019 for any students who are considered "a covered individual" using "Chapter 33: Post 9/11 GI Bill" benefits or any participants in "Chapter 31: Vocational Rehabilitation and Employment Program" benefits at a public, private for-profit, or not-for-profit institution regarding unpaid tuition and fees.

The policy states that the University will not:

1. Assess late penalty fees/charges due to delayed disbursements from the Department of Veterans Affairs under Chapter 31 or Chapter 33.
2. Prevent students from enrolling in classes.
3. Require the student to secure alternative or additional funding to cover the applicable tuition and fee expenses.
4. Deny the student access to any school resources to include (access to classes, libraries, or other institutional facilities) that are available to other paid students.

The school will require that each student provide the following:

1. An official Department of Veterans Affairs Certificate of Eligibility" or "Statement of Benefits" from the VA website or (eBenefits, VAF 28-1905) on or before the first day of class for the quarter.
2. Complete a written certification request to be certified for benefits.
3. Provide additional information required to ensure proper certification of benefits.

If there is a difference in the amount of the student's financial obligation to the University and the amount that the student is eligible to receive from the Department of Veterans Affairs, the student may incur an additional fee or payment may be required to make an additional payment to make up the difference.

With all contingencies met, the Department of Veterans Affairs will provide the University with payment ending on the earlier of the dates following:

- the date on which the payment from the VA is made to the institution.
- 90 days after the date that the institution has certified tuition and fees following the receipt of the "Certificate of Eligibility".

Who is a "Covered Individual?"

Any individual who is entitled to receive educational assistance under either "Chapter 33: Post 9/11 GI Bill" or a participant under "Chapter 31: Vocational Rehabilitation and Employment Program".

UNIVERSITY POLICIES AND STATEMENTS

Compliance with University Policies/ Registration Holds

Registration as a student constitutes a commitment by the student to abide by and accept University policies, rules, requirements, and regulations, even when such policies, rules, requirements, and regulations appear to conflict with ASSU policies or procedures. The policies, rules, requirements, and regulations that students must abide by include (but are not limited to) those concerning registration, academic performance, student conduct, Title IX, health and safety, housing, use of the libraries and computing resources, intellectual property (including completing and signing the SU-18), operation of vehicles on campus, University facilities, and the payment of fees and assessments. Some of these are set forth in this bulletin while others are available in relevant University offices.

Students should take responsibility for informing themselves of applicable University policies, rules, requirements, and regulations. A collection is available on the Stanford University policy (https://www.stanford.edu/about/administration/policies/) web site. Many are also set forth in the Research Policy Handbook (http://doresearch.stanford.edu/) and the Graduate Academic Policies and Procedures Handbook (the GAP handbook) (http://gap.stanford.edu/).

The University reserves the right to withhold registration privileges or to cancel the registration of any student: who is not in compliance with its policies, rules, requirements, or regulations; or for reasons pertaining to academic performance, health and wellness, qualification to be a student, behavioral conduct, or the safety of the University community. In extraordinary circumstances, the President may temporarily or permanently discontinue students who present a threat to the health and safety of the University community.

University Communication with Students

Stanford University uses electronic means (such as email, texts, and the Internet) as a method of communication and of providing billing, payment, and enrollment services. For many University communications, email to a student's Stanford email account is the official form of notification to the student, and emails sent by University officials to such email addresses will be presumed to have been received and read by the student. Signatures or acknowledgements provided by a student electronically to the University via Stanford systems and/or @stanford.edu email are valid and legally binding.

Notification/Obligation to Read Email

For many University communications, email to a student's Stanford email account is the official form of notification to the student, and emails sent by University officials to such email addresses will be presumed to have been received and read by the student. Emails and forms delivered through a SUNet account by a student to the University may likewise constitute a formal communication, with the use of this password-protected account constituting the student's electronic signature.

The University offers a broad array of courses and forms of instruction including lectures, laboratories, seminars, practical exercises, directed research, clinics, and online instruction utilizing Canvas and other technology tools. The University reserves the right to determine the form of instruction offered and to modify the form at any time without notice.

Registration and Study Lists

The preliminary study list deadline is the first day of classes of each quarter during the academic year. As early as possible, but no later than this deadline, students (including those with TGR status) must submit to the Office of the University Registrar via Axess, a study list to enroll officially in classes for the quarter. Students are expected to be enrolled "at status" by the preliminary study list deadline; meaning that students must be enrolled in sufficient units to meet requirements for their status, whether full-time, or on approved special registration status. Students who enroll in more units than their anticipated tuition charge covers will be charged the additional tuition. They may not enroll in courses for zero units unless those courses, like TGR, are defined as zero-unit courses. Zero-unit courses, excluding TGR courses, require concurrent enrollment with unit-bearing courses in all quarters. Undergraduates are subject to academic load limits described in the "Amount of Work (p. 87)" section of this bulletin. Students will be charged a $200 late study list fee for submitting their study lists after the quarterly deadline.

The University reserves the right to withhold registration from, and to cancel the advance registration or registration of, any student having unmet obligations to the University.

Study List Changes

Students may add courses or units to their study lists through the end of the third week of classes. (Individual faculty may choose to close their classes to new enrollments at an earlier date.) Courses or units may be added only if the revised program remains within the normal load limits.

Courses or units may be dropped by students through the end of the third week of classes, without any record of the course remaining on the student's transcript. No drops are permitted after this point. The Final Study List deadline is the last day for tuition reassessment for dropped courses or units.

A student may withdraw from a course after the final study list deadline through the end of the eighth week of each quarter. In this case, a grade notation of 'W' (withdraw) is automatically recorded on the student's transcript for that course. There are no tuition reassessments for withdrawing from individual courses. Students who do not officially withdraw from a class by the end of the eighth week are assigned the appropriate grade or notation by the instructor to reflect the work completed.

Through the end of the eighth week of classes, students may choose the grading option of their choice in courses where an option is offered.

If the instructor allows a student to take an 'I' (incomplete) in the course, the student must make the appropriate arrangements for that with the instructor by the last day of classes.

The deadlines described above follow the same pattern each quarter but, due to the varying lengths of Stanford's quarters, they may not always fall in exactly the week specified. Students should consult the University's academic calendar (http://studentaffairs.stanford.edu/registrar/academic-calendar/) for the deadline dates each term. Other deadlines may apply in Law, Graduate School of Business, Medicine, and Summer Session.

Repeated Courses

Students may not enroll in courses for credit for which they received either Advanced Placement (AP) or transfer credit. If students enroll in courses at Stanford for which they received equivalent AP unit credit, the duplicating AP unit credit will be removed.

Some Stanford courses may be repeated for credit; they are specially noted in this bulletin. Most courses may not be repeated for credit. Under the general University grading system, when a course which may not be repeated for credit is retaken by a student, the following special rules apply:

1. A student may retake any course on his or her transcript, regardless of grade earned, and have the original grade, for completed courses

only, replaced by the notation 'RP' (repeated course). When retaking a course, the student must enroll in it for the same number of units originally taken. When the grade for the second enrollment in the course has been reported, the units and grade points for the second course count in the cumulative grade point average in place of the grade and units for the first enrollment in the course. Because the notation 'RP' can only replace grades for completed courses, the notation 'W' cannot be replaced by the notation 'RP' in any case.

2. A student may not retake the same course for a third time unless he or she received a 'NC' (no credit) or 'NP' (not passed) when it was taken and completed the second time. Undergraduate students must file a petition for approval to take the course for a third time with the office of the Vice Provost for Undergraduate Education, via the office of Academic Advising (https://advising.stanford.edu), Sweet Hall. When a student completes a course for the third time, grades and units for both the second and third completions count in the cumulative grade point average. The notation 'W' is not counted toward the three-retake maximum.

Amount of Work

The usual amount of work for undergraduate students is 15 units per quarter; 180 units (225 for dual degree students) are required for graduation. Registration for fewer than 12 units is rarely permitted and may cause the undergraduate to be ineligible for certification as a full-time student. The maximum is 20 units (21 if the program includes a 1-unit activity course). Requests for exception to the maximum may be considered for compelling reasons, the approval of which may include conditions or restrictions. A past superior academic performance is not considered to be sufficient justification for exceeding the maximum. Petitions for programs of fewer than 12 or more than 20 units must be submitted to the office of the Vice Provost for Undergraduate Education, via the office of Undergraduate Advising and Research, Sweet Hall, first floor. For additional information regarding satisfactory academic progress, refer to the "Academic Progress (p. 94)" section of this bulletin.

Matriculated graduate students are expected to enroll for at least eight units during the academic year; schools and departments may set a higher minimum. Petitions for programs of fewer than 8 must be signed by the student's department and submitted for consideration to the Office of the University Registrar. Graduate students are normally expected to enroll in no more than 24 units; registration for more than 24 units must be approved by the department. Under certain circumstances, graduate students may register on a part-time basis. See the "Tuition, Fees, and Housing (p. 24)" section of this bulletin.

Enrollment for coterminal students is determined by their tuition group. See Tuition (p. 57) in the "Coterminal Master's Degrees" section of this bulletin.

Undergraduates and graduate students with disabilities who may seek a reduced course load should contact the Office of Accessible Education (http://studentaffairs.stanford.edu/oae/).

Unit of Credit

Guidance for faculty and instructors on how to comply with this policy is available on the Registrar's web site.

Every unit for which credit is given is understood to represent approximately three hours of actual work per week for the average student. Thus, in lecture or discussion work, for 1 unit of credit, one hour per week may be allotted to the lecture or discussion and two hours for preparation or subsequent reading and study. Where the time is wholly occupied with studio, field, or laboratory work, or in the classroom work of conversation classes, three full hours per week through one quarter are expected of the student for each unit of credit; but, where such work is supplemented by systematic outside reading or experiment under the direction of the instructor, a reduction may be made in the actual studio, field, laboratory, or classroom time as seems just to the department.

Religious Holidays

Students planning not to attend class or take an exam because of a religious observance are expected to convey this information to instructors in advance. The Office for Religious Life makes available to faculty, staff, and students a list of significant religious observances at the beginning of each academic year. For further information, contact the Deans for Religious Life at (650) 723-1762 or see the Religious Life (https://religiouslife.stanford.edu/religious-observances/) web site.

Privacy of Students Records

Notification of Rights Under FERPA

The Family Educational Rights and Privacy Act of 1974 (FERPA) affords students certain rights with respect to their education records. They are:

1. The right to inspect and review the student's education records within 45 days of the date the University receives a request for access. Current and former students who wish to make a FERPA-related request to view records should submit an online request to the Office of the University Registrar that identifies the record(s) the student wishes to inspect. Under FERPA, a student is an individual who is or has been in attendance at an educational institution. Applicants do not have FERPA rights unless and until they are admitted and are in attendance at the University. Students are advised to provide complete information in order to assist the University in following up on the request. Federal law requires that the University provide access to requested extant records within 45 days. A Registrar's Office official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records requested are not under the control of the Registrar's Office, the Registrar's Office will make arrangements for the relevant office to provide the records within the time frame established under the law.
2. The right to request the amendment of the student's education records that the student believes are inaccurate, misleading, or otherwise in violation of the student's privacy rights under FERPA.
   a. A student may ask the University to amend the record that he or she believes is inaccurate or misleading. The student should write the University official responsible for the record (with a copy to the University Registrar), clearly identify the part of the records he or she wants changed, and specify why it should be changed.
   b. If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment.
   c. Additional information regarding the hearing procedures is provided to the student when notified of the right to a hearing.
3. The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent. FERPA contains various exceptions to the general rule that the University should not disclose education records without seeking the prior written consent of the student. The following circumstances are representative of those in which education records (and information drawn from education records) may be disclosed without the student's prior written consent:
   a. Upon request, the University may release Directory Information (see the "Directory Information" section of this bulletin below).
   b. School officials who have a legitimate educational interest in a student's education record may be permitted to review it. A school official is: a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has

contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student or volunteer serving on an official committee (or representing a recognized student group), such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her responsibility to Stanford or to the student.

c. The University discloses education records without consent to officials of another school, in which a student seeks or intends to enroll, upon request of officials at that other school.
d. The University may choose to disclose education records (and information drawn from education records) to either supporting parent(s) or guardian(s) where the student is claimed as a dependent under the Internal Revenue Code.
e. The University may inform persons including either parent(s) or guardian(s) when disclosure of the information is necessary to protect the health or safety of the student or other persons.
f. For students under the age of 21, the University may notify either parent(s) or guardian(s) of a violation of any law or policy relating to the use of alcohol or controlled substances.
g. The University must provide records in response to lawfully issued subpoenas, or as otherwise compelled by legal process.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA.

The name and address of the office that administers FERPA is: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202-4605.

Sharing Information with Parents

Students are encouraged to maintain an ongoing, open dialogue with parents throughout their careers at Stanford about academic progress and personal development. Most student difficulties are resolved at Stanford without involving parents. The University does recognize, however, that there are some exceptional situations where parental involvement may be appropriate to assist a student through a difficult circumstance. Under those circumstances, Stanford may (but is not required to) choose to disclose information to parents if permitted by law.

Under the Family Educational Rights and Privacy Act (FERPA), Stanford is permitted to disclose information drawn from education records to parents if one or more parent claims the student as a dependent for federal tax purposes. Some laws, especially those relating to medical and mental health care, prohibit the disclosure of information without the student's consent, even where the student is a tax dependent.

Directory Information

The University regards the following items of information as "directory information," that is, information that the University may make available to any person upon specific request (and without student consent):

- Name*
- Email addresses
- Specific quarters or semesters of registration at Stanford
- Stanford degree(s) awarded and date(s)
- Major(s), minor(s), and field(s)
- University degree honors
- Student theses and dissertations
- Participation in officially recognized sports or activities*
- Weight and height of members of athletic teams*
- Institution attended immediately prior to Stanford
- ID card photographs

For more information, see Stanford's FERPA (https://registrar.stanford.edu/students/student-record-privacy/) web page.

Students may prohibit the release of any of the items listed above (except those with an '*') by designating which items should not be released on the Privacy function of Axess. Students may prohibit the release of all directory information listed above after an appointment with the Office of the University Registrar to discuss the ramifications of this action. Student theses and dissertations can be restricted through the publishing options and embargo settings students select during submission.

Students, faculty, and others with questions regarding student records should contact the Office of the University Registrar.

Consent to Use of Photographic Images

Registration as a student and attendance at or participation in classes and other campus and University activities constitutes an agreement by the student to the University's use and distribution (both now and in the future) of the student's image or voice in photographs, video or audio capture, or electronic reproductions of such classes and other campus and University activities.

If any student in a class where such photographing or recording is to take place does not wish to have his or her image or voice so used, the student should raise the matter in advance with the instructor.

COVID-19 Policies

The Faculty Senate has decided that there will be no three-hour final examination for undergraduates or graduate students in academic year 2020-21.

Coursework Deadline, Academic Year 2020-21

The academic year 2020-21 calendar (https://registrar.stanford.edu/academic-calendar/) is based upon 10-week academic quarters that do not include a dedicated end of quarter period. There will also be no final exam week.

All coursework is due by the last day of the last week of instruction in each quarter. No coursework deadlines or assessments should be assigned or scheduled after the last day of a quarter. Traditional 3-hour final exams are not allowable; however final assessments may be scheduled during the last class period.

Per standard practice and allowable by policy, instructors may grant individual and class-wide extensions of time on assignments. When an extended deadline falls after the grading deadline for a quarter and a student has completed satisfactorily a substantial part of the coursework, the student should request an Incomplete and arrange an alternative submission deadline with the instructor.

For students: if an instructor is not following this guidance, first raise the concern with the instructor. If the concern is not resolved, it should be escalated to the department chair or program director. The student should go to the relevant Dean's Office only if they are unable to resolve the issue within the department or program offering the course.

Rationale: The AY 2020-21 academic calendar includes different lengths of time between quarters to accommodate on-campus students who must pack and move out of their residences before the start of the next quarter. Making coursework due by the last day of the classes in a quarter is equitable for all students.

Questions may be directed to academic-continuity@stanford.edu.

Examinations

Midterms

Classes that give midterm examinations outside of regular class hours must:

1. announce the date and time during the first week of the academic quarter, and
2. provide reasonable alternative times to those students who have another class or other University commitment at that time.

According to Honor Code interpretations and applications, different examinations may be given at these alternative times.

End-Quarter Policy Statement

The End-Quarter Period is a time of reduced social and extracurricular activity preceding final examinations. Its purpose is to permit students to concentrate on academic work and to prepare for final examinations.

In Autumn, Winter, and Spring quarters, End-Quarter starts seven full days (to begin at 12:01 a.m.) prior to the first day of final exams. In Spring Quarter, final examinations begin on Friday; no classes are held on Thursday, the day before. In Summer Quarter, this consists of the weekend and the four class days preceding the final examinations, which take place on Friday and Saturday of the eighth week. (See the Time Schedule for dates.)

During the End-Quarter Period, classes are regularly scheduled and assignments made; this regular class time is used by instructors in whatever way seems best suited to the completion and summation of course material. Instructors should neither make extraordinary assignments nor announce additional course meetings in order to "catch up" in course presentations that have fallen behind. They are free, however, and even encouraged to conduct optional review sessions and to suggest other activities that might seem appropriate for students preparing for final examinations.

No graded homework assignments, mandatory quizzes, or examinations should be given during the End-Quarter Period except:

1. In classes where graded homework assignments or quizzes are routine parts of the instruction process.
2. In classes with laboratories where the final examination will not test the laboratory component. In such a case, the laboratory session(s) during the End-Quarter Period may be used to examine students on that aspect of the course.

Major papers or projects about which the student has had reasonable notice may be called due in the End-Quarter Period.

Take-home final examinations, given in place of the officially scheduled in-class examination, may be distributed in the End-Quarter Period. Although the instructor may ask students to return take-home examinations early in the final examination period, the instructor may not call them due until the end of the regularly scheduled examination time for that course. Such a policy respects the principle that students' final examinations are to be scheduled over a period of several days.

End-quarter examinations may not be held during this period. This policy preserves the instruction time for courses and protects the students' opportunities for extensive review and synthesis of their courses.

During the End-Quarter Period, no musical, dramatic, or athletic events involving student participation may be scheduled, unless approved as exceptions by the Committee on Undergraduate Standards and Policy (C-USP), nor may routine committee meetings be scheduled (such as those of the ASSU, the Senate of the Academic Council, or the committees of the President of the University) when such meetings normally would involve student participation.

Note—Students who believe that there are faculty who are violating End-Quarter policy should contact the Office of the University Registrar (https://remedyweb.stanford.edu/helpsu/2.0/helpsu-form/?pcat=Registrar).

End-Quarter Examinations

Examinations are part of the process of education at the same time that they are a means to measure the student's performance in course work. Their structure, content, frequency, and length are to be determined in accordance with the nature of the course and the material presented in it, subject only to the limitations contained herein.

Great flexibility is available regarding the types of examinations that an instructor may choose to employ. Examinations, including final examinations, may be, for example, in-class essay examinations, take-home essay examinations, objective examinations, oral examinations, or appropriate substitutes such as papers or projects. Instructors may use any type of examination, paper, or project, or any combination thereof, guided only by the appropriateness of the types of examinations, papers, or projects for the material upon which the student is being examined.

When the final examination is an in-class examination, the following regulations apply:

1. A three-hour period is reserved during examination week for the final examination in each course of more than 2 units. This examination period must be available for students, but not necessarily in its entirety, if an in-class examination is given. In courses with extraordinary meeting times, such that ambiguity might exist as regards the period reserved for the final examination, the schedule should be clarified and students informed no later than the end of the second week of the quarter.
2. Examinations in 1- or 2-unit courses must be completed by the end of the last class meeting before the End-Quarter Period, except in Summer Quarter when examinations must be completed during the last regularly scheduled class session.

When the final examination or its appropriate substitute is not an in-class examination (for example, when an instructor chooses to employ a take-home examination, paper, or project in lieu of an in-class examination), the following regulations apply:

1. The schedule and format of the final examination or its appropriate substitute are made known not later than the end of the second week of the quarter and, if changed subsequently, may be only an option of the plan originally announced by the instructor.
2. Although the instructor may ask students to return take-home examinations early in the final examination period, the instructor may not call them due until the end of the regularly scheduled examination time for that course.

In submitting official Study Lists, students commit to all course requirements, including the examination procedures chosen and announced by the course instructor. In choosing courses, students should take cognizance of the official schedule of final examinations announced on the Registrar's (http://studentaffairs.stanford.edu/registrar/final-exams/) web site. Students anticipating conflicts in final examination schedules should seek to resolve these with the instructors involved before the Preliminary Study List deadline at the beginning of the quarter. If accommodation cannot be made at that time, the student should revise his or her Study List before the Final Study List deadline at the end of the third week of the quarter in order to be able to meet the required final examination.

If unforeseen circumstances prevent the student from sitting for the regularly scheduled examination, instructors should make alternative arrangements on an individual basis. Such unforeseen circumstances include illness, personal emergency, or the student's required participation in special events (for example, athletic championships) approved as exceptions by the Committee on Undergraduate Standards and Policy (C-USP). Inquiries regarding these circumstances may be directed to the office of the Vice Provost for Undergraduate Education, via the office of Academic Advising (https://advising.stanford.edu), Sweet Hall.

Statement Concerning Early Examinations

Students are reminded that taking final examinations earlier than the scheduled time is a privilege, not a right. They should request this privilege only in the event of extraordinary circumstances.

Since the final examination schedule for each quarter (http://studentaffairs.stanford.edu/registrar/final-exams/) is published annually on the Registrar's web site at the time of course selection and enrollment, students are expected to make their academic plans in light of known personal circumstances that may make certain examination times difficult for them.

In general, faculty members are discouraged from giving final examinations earlier than the published and announced times. If faculty nevertheless decide to administer early examinations, either the questions should be completely different from those on the regularly scheduled examination or the early examination should be administered in a highly controlled setting. An example of such a setting would be a campus seminar room where the examination questions would be collected along with students' work and students would be reminded of their Honor Code (http://www.stanford.edu/dept/registrar/bulletin/79155.htm) obligations not to share information about the examination contents. Giving students easy opportunities to abuse the integrity of an examination is unfair to honest students and inconsistent with the spirit of the Honor Code (http://www.stanford.edu/dept/registrar/bulletin/79155.htm).

Academic fields differ in the degree to which early examination requests present dilemmas for faculty. If, for example, an examination format consists of a small number of essay questions, where students would be greatly advantaged by knowing the question topics, faculty should be especially reluctant to allow early examinations unless they are willing to offer totally different examinations or a different kind of academic task, for example, a final paper in lieu of an examination.

Grading Systems

General University Grading Systems

The general University grading system is applicable to all of Stanford University except the Graduate School of Business, the School of Law, and M.D. students in the School of Medicine.

Effective Spring Quarter 2015-16, the GPA is computed under the general University grading system and published on the official undergraduate transcript. Transcripts for students with coterminal degree programs publish only the undergraduate career GPA based upon the courses assigned to the undergraduate degree program. For undergraduates who graduated before 1986, the GPA is not included on the transcript. For further information about how the internal General University GPA is determined, see How the General University GPA is Determined (https://registrar.stanford.edu/students/definition-grades/grade-point-average-gpa-and-class-rank-policy/how-general-university-gpa/).

The GPA does not appear on the official graduate transcript.

Stanford University does not calculate a rank in class.

Most courses are graded according to the general University grading system. However, courses offered through Law, Business, and Medicine are graded according to those schools' grading systems, even in cases where students in other programs are enrolled in their classes. Note also that, as to graduate students, there may be departmental requirements as to grades that must be maintained for purposes of minimum academic progress.

Definition and Explanation of Grading Systems

All grades/notations for courses taken in 1995-96 or later are to be visible on student transcripts. Effective Summer Quarter 2008-09, the notation * was changed to GNR (Grade Not Reported).

Grade	Description
A (+,-)	Excellent
B (+,-)	Good
C (+,-)	Satisfactory
D (+,-)	Minimal pass
NP	Not Passed
NC	No Credit (unsatisfactory performance, 'D+' or below equivalent, in a class taken on a satisfactory/no credit basis)
CR	Credit (student-elected satisfactory; A, B, or C equivalent)
S	No-option Satisfactory; A, B, or C equivalent
L	Pass, letter grade to be reported
W	Withdraw
N (-)	Continuing course
I	Incomplete
RP	Repeated Course
*	No grade reported (effective through Spring 2008-09).
GNR	Grade not reported (effective beginning Autumn Quarter 2009-10).

Explanation

Grade	Description
NC	The notation 'NC' represents unsatisfactory performance in courses taken on a satisfactory/no credit basis. Performance is equivalent to letter grade 'D+' or below.
NP	The notation 'NP' is used by instructors in courses taken for a letter grade that are not passed.
CR	In a course for which some students receive letter grades, the 'CR' represents performance that is satisfactory or better when the student has elected the 'CR' grading option.
S	For an activity course or a course in which the instructor elects to grade students only on a satisfactory/no credit basis, the 'S' represents performance that is satisfactory or better. For such a course, no letter grades may be assigned for satisfactorily completed work. It should be noted that the Registrar is unable to record course grades submitted when the instructor has not observed the required distinction between 'S' and 'CR.' The 'satisfactory' options are intended to relieve the pressure on students for achievement in grades. The 'satisfactory' options in no way imply fewer or different course work requirements than those required of students who elect evaluation with a letter grade. A department may limit the number of 'satisfactory' courses to count for a major program. No more than 36 units of Stanford course work (including activity courses) in which a 'CR' or 'S' was awarded can be applied toward the 180 (225 if dual degrees are being pursued) units required for a bachelor's degree. Transfer students are limited to 27 'CR' or 'S' units applied to the 180/225 minimum.

L	The 'L' is a temporary notation that represents creditable completion of a course for which the student will receive a permanent letter grade before the start of the next quarter. The 'L' is given when the instructor needs additional time to determine the specific grade to be recorded, but it is not appropriate if additional work is expected to be submitted by the student. A student receives unit credit for work graded 'L.'
N	The 'N' indicates satisfactory progress in a course that has not yet reached completion. Continuation courses need not continue at the same number of units, but the grade for all quarters of such a course must be the same.
N-	The 'N-' grade indicates unsatisfactory progress in a continuing course. The first 'N-' grade constitutes a warning. The adviser, department chair, and student should discuss the deficiencies and agree on the steps necessary to correct them. A second consecutive 'N-' will normally cause the department to deny the student further registration until a written plan for the completion of the degree requirements has been submitted by the student and accepted by the department. Subsequent 'N-' grades are grounds for dismissal from the program.
I	The 'I' is restricted to cases in which the student has satisfactorily completed a substantial part of the course work. No credit is given until the course is completed and a passing grade received. When a final grade is received, all reference to the initial 'I' is removed. 'I' grades must be changed to a permanent notation or grade within a maximum of one year. If an incomplete grade is not cleared at the end of one year, it is changed automatically by the Office of the University Registrar to an 'NP' (not passed) or 'NC' (no credit) as appropriate for the grading method of the course. Students must request an incomplete grade by the last class meeting. Faculty may determine whether to grant the request or not. Faculty are free to determine the conditions under which the incomplete is made up, including setting a deadline of less than one year (but not more than one year). A leave of absence does not stop the clock on the time limit for resolving incompletes. Graduate students with extenuating circumstances, that may warrant an exception to academic policy, should discuss the need for an extension to the time limit with their advisor and the course instructor. Students may request an extension of the deadline for resolving an incomplete by submitting the Petition to Change Course Enrollment (Graduate Students).
RP	The notation 'RP' (meaning Repeated Course) replaces the original grade recorded for a course when a student retakes a course. (See the "Repeated Courses" section of this bulletin.)
W	The notation 'W' (meaning Withdraw) is recorded when a student withdraws from a course.
*	The '*' symbol appears when no grade has been reported to the Registrar for courses taken prior to 2001-02. The '*' symbol remains on the transcript until a grade has been reported (effective through Spring 2008-09).
GNR	The notation 'GNR' appears when no grade has been reported to the Registrar. The 'GNR' notation remains on the transcript until a grade has been reported. (Effective beginning Autumn Quarter 2009-10.)

Reporting of Grades

All grades should be reported within 96 hours after the time and day reserved for the final examination, and in no case later than noon of the fourth day (including weekends) after the last day of the final examination period.

In the case of degree candidates in Spring Quarter, final grades should be reported by noon of the day following the end of the final examination period.

Revision of End-Quarter Grades

When duly filed with the Office of the University Registrar, end-quarter grades are final and not subject to change by reason of a revision of judgment on the instructor's part; nor are grades to be revised on the basis of a second trial (for example, a new examination or additional work undertaken or completed after the end of the quarter). Changes may be made at any time to correct an actual error in computation or transcription, or where some part of the student's work has been unintentionally overlooked; that is, if the new grade is the one that would have been entered on the original report had there been no mistake in computing and had all the pertinent data been before the instructor, the change is a proper one.

If a student questions an end-quarter grade based on the grading of part of a specific piece of work (for example, part of a test) on the basis of one of the allowable factors mentioned in the preceding paragraph (for example, an error in computation or transcription, or work unintentionally overlooked, but not matters of judgment as mentioned below), the instructor may review the entire piece of work in question (for example, the entire test) for the purpose of determining whether the end-quarter grade was a proper one. In general, changing an end-quarter grade is permitted on the basis of the allowable factors already mentioned whether an error is discovered by the student or the instructor; however, changing a grade is not permitted by reason of revision of judgment on the part of the instructor.

In the event that a student disputes an end-quarter grade, the established grievance procedure should be followed (see the "Student Academic Grievance Procedure (http://www.stanford.edu/dept/registrar/bulletin/4988.htm)" section of this bulletin).

Freezing of Grades Upon Graduation

All grades, with the exception of 'I' (Incomplete), 'GNR' (Grade Not Reported), 'L' (Pass, grade to follow), and 'N' (Continuation) grades, are frozen at the time of graduation. Grades of Incomplete become frozen 12 months after the quarter in which they were awarded, either as 'NP' (Not Passed) if the course work has not been successfully completed, or another grade if it has. Grades of 'GNR', 'L', or 'N' also have one year to be updated after which they are frozen as they stand. The Office of the University Registrar evaluates prior to graduation whether the GPA on a transcript bearing grades of Incomplete would meet University requirements for graduation even if all 'I' grades were replaced by 'NP'.

Graduate School of Business Grades

All courses offered by the Graduate School of Business are graded according to the following five-level scheme:

Grade	Description
H	Honors. Work that is of truly superior quality.
HP	High Pass. A passing performance, and one that falls approximately in the upper quarter of passing grades.
P	Pass. A passing performance that falls in the center of the distribution of all passing grades.
LP	Low Pass. A passing performance that falls approximately in the lower quarter of passing grades.
U	Unsatisfactory. A failing performance. Work that does not satisfy the basic requirements of the course and is deficient in significant ways.

GNR	The notation 'GNR' appears when no grade has been reported to the Registrar. The 'GNR' notation remains on the transcript until a grade has been reported (effective Autumn Quarter 2009-10).

GSB courses may receive grades of "+" (Pass) for courses taken on a Pass-Fail basis, with "U" denoting a failing grade, "I" for Incomplete, and "N" for a continuing grade. The grade of N is recorded in a course that spans more than a single quarter, where the grade in an earlier quarter will be determined only later, after the entire course sequence is complete..

Prior to 2009-10, an asterisk (*) notation was placed when no grade was reported.

For more information, see the GSB Grades web site (p. 91).

Stanford Law School Grades

Effective Autumn Quarter 2009-10, units earned in the Stanford Law School are quarter units. Units earned in the Stanford Law School prior to 2009-10 were semester units. The following grading system became effective in Autumn Semester 2008-09. J.D. students who graduated in 2009 remained on the prior grading system but all other students shifted to the new grading system. For more information, see the Stanford Law School Handbook (http://www.law.stanford.edu/experience/studentlife/SLS_Student_Handbook.pdf).

Grade	Description
H	Honors (exceptional work, significantly superior to the average performance at the school)
P	Pass (representing successful mastery of the course material)
R	Restricted credit (representing work that is unsatisfactory)
F	Fail (representing work that does not show minimally adequate mastery of the material)
MP	Mandatory pass (representing P or better work)
N	Continuing course
I	Incomplete
*	No grade reported
GNR	Grade not reported (effective Autumn Quarter 2009-10).

The grading systems employed at the Stanford Law School September 2001 through Spring 2009 were as follows. Under the numerical system (with letter equivalents), the range of satisfactory grades ran from 4.3 to 2.5 as outlined in the following distribution. Below the grade of 2.5 was one level of restricted credit (2.2) and one level of failure (2.1). The number grades with letter equivalents were as follows:

Numbering	Grade
4.3-4.2	A+
4.1-3.9	A
3.8-3.5	A-
3.4-3.2	B+
3.1-2.9	B
2.8-2.5	B-
2.2	Restricted Credit
2.1	Failure

On this old system, students could elect to take a limited number of courses on a credit/restricted credit/no credit system (K/RK/NK). 'K' was awarded for work that was comparable to numerical grades 4.3 to 2.5, 'RK' for Restricted Credit-level work (2.2), and 'NK' for Failure-level work (2.1). A limited number of courses were offered on a mandatory credit (KM)/no credit (NK) basis.

'N' is a temporary notation used in a continuing course; it is replaced with a final grade upon completion of the course series.

School of Medicine Grades

In general, the following grades are used in reporting on the performance of students in the M.D. program and in the M.S. in Physician Assistant Studies program:

Grade	Description
Pass (+)	Indicates that the student has demonstrated to the satisfaction of the department or teaching group responsible for the course that the student has mastered the material taught in the course.
Fail (-)	Indicates that the student has not demonstrated to the satisfaction of the department or teaching group responsible for the course that the student has mastered the material taught in the course.
Incomplete (I)	Indicates that extenuating medical or personal circumstances have prevented the student from completing the course requirements. This grade is given when requested by the student with the prior approval of an Advising Dean in the School of Medicine.
Continuing (N)	Indicates that the course has not concluded and the student is continuing the course.
Exempt (Ex)	Indicates a course that is exempted by examination. No units are awarded.
GNR	The notation 'GNR' appears when no grade has been reported to the Registrar. The 'GNR' notation remains on the transcript until a grade has been reported (effective Autumn Quarter 2009-10).

In general, a 'Fail' grade can be cleared by repeating and passing the particular course or by other arrangement prescribed by the department or teaching group. An 'Incomplete' grade can be made up in a manner specified by the department or teaching group within a reasonable time; if the deficiency is not made up within the specified time, the 'Incomplete' grade becomes a 'Fail' grade. The opportunity to clear a 'Fail' grade or an 'Incomplete' grade cannot be extended to individuals who are not registered or eligible to register as students in the M.D. program. For more specific information, see the Assessment of Student Academic Performance (http://med.stanford.edu/md/curriculum/assessment-grading.html) web site.

Records

As a general proposition, only information classified by the University as directory information (see the "Directory Information (p.)" section of this bulletin) can be confirmed to inquirers other than the student.

Transcripts

Transcripts of Stanford records are issued by the Office of the University Registrar upon the student's request when submitted in writing or via the online Axess system. There is no charge for official transcripts. The courses taken in one quarter do not appear on any student's transcript until after the final study list deadline. The University reserves the right to withhold transcripts or records of students with unmet obligations to the University.

Certification of Enrollment or Degrees

The Office of the University Registrar can provide written confirmation of registration, enrollment, or degree status upon request by the student. The printed certification can be used whenever enrollment or degree verification is required for car insurance, loan deferments, medical

coverage, scholarship purposes, and so on. Using Axess, students are able to print an official certification at no charge. Certification of full- or part-time enrollment cannot be provided until after the study list is filed for the quarter in question.

Degrees are conferred quarterly, but diplomas are issued in accordance to the distribution dates listed on the Registrar's Office (http://studentaffairs.stanford.edu/registrar/students/diplomas/) web site. After conferral, the degree awarded to a student can be verified by contacting the Office of the University Registrar for an official transcript, or official degree certification form. Requests for transcripts or degree certifications must be made by the student in writing or through Axess.

Stanford University has authorized the National Student Clearinghouse (NSC) to act as its agent for purposes of third party enrollment and degree verification. The NSC will be able to verify degrees and enrollment for only those students who have not placed a privacy block on their academic record. The student's name when enrolled, Social Security Number or Student ID, and date of birth will be required for identification purposes and enrollment or degree verification. All third parties should contact the National Student Clearinghouse by phone or visit their web site for current enrollment and degree verification information, instructions, and fees.

Definition of Full-time Enrollment

Undergraduate

As a general proposition, full-time enrollment for undergraduates is considered to be enrollment in a minimum of 12 units of course work per quarter at Stanford. Work necessary to complete units from previous quarters does not count toward the 12 units necessary for full-time status in the current quarter. Enrollment in 8 to 11 units is considered half-time enrollment. Enrollment in 1 to 7 units is considered less-than-half-time, or part-time enrollment.

For students with disabilities taking a reduced course load, contact the Office of Accessible Education (http://studentaffairs.stanford.edu/oae/) for additional information.

All undergraduates validly registered at Stanford are considered to be in good standing for the purposes of enrollment certification.

Graduate and Professional Students

Stanford uses the following definitions (in units) to certify the enrollment status of graduate and professional students each quarter.

Status	Graduate	Business (M.B.A./ Sloan)	Law	Medicine (M.D.)
Full time:	8 or more	11 or more	9 or more	9 or more
Half time:	6 or 7	6-10	6-8	6-8
Part time:	5 or fewer	5 or fewer	5 or fewer	5 or fewer

TGR students enrolled in a course numbered 801 or 802 are certified as full time. Graduate students on an approved Graduation Quarter status are certified as full time. During Summer Quarter, all graduate students who hold appointments as research or teaching assistants are considered to be enrolled on at least a half-time basis.

H-1B Degree Certification

As the H-1B application deadline is April 1 and Winter Quarter degree conferral does not occur until after this date (or just before), the Office of the University Registrar provides an H-1B Degree Certification Letter for eligible students graduating Winter Quarter who are applying for the H-1B visa and have completed all school/department and University degree requirements.

Students conferring degrees in all terms except Winter Quarter should request an official transcript in their student Axess account after the degree conferral date of their graduation term. The official transcript indicates the results of all work completed and degrees awarded. Students can also request an official degree certification via Axess, or by completing a Degree Certification Request form. See Certifications and Verifications (http://studentaffairs.stanford.edu/registrar/students/certifications/) for details on requesting degree verification.

An Enrollment Verification is included with the H-1B Degree Certification Letter. The Enrollment Certification states a student's enrollment history, current program of study, major, expected degree, and expected degree conferral date. This document bears the University seal and signature of the University Registrar. For more information see the Office of the University Registrar H-1B Certification Letter (http://exploredegrees.stanford.edu/academicpoliciesandstatements/x-webdoc://D3A5CCDC-66E3-45EE-8E78-2D47E9234AF2/studentaffairs.stanford.edu/registrar/students/h-1b/) web site.

Bechtel International Center organizes H-1B workshops which students are encouraged to attend if they have any questions regarding H-1B issues.

Posthumous Degrees

Stanford will consider granting a posthumous degree in instances in which a student was in good standing and had completed at least 90% of all graduation requirements at the time of death. Requests must be approved by the chair of the major department or the dean of a professional school and the University Registrar. Requests should be addressed to the University Registrar and generally should take place within 12 months of the student's death.

Academic Progress

Undergraduates must maintain a minimum 2.0 cumulative GPA and a quantitative unit requirement for satisfactory academic progress. In addition, a minimum 2.0 cumulative GPA is required for conferral of a baccalaureate degree.

Undergraduates normally are expected to plan their academic programs so that they can complete 180 units in four years (twelve quarters), including the requirements for a major and the General Education (p. 35) (Ways/GERs), Writing and Rhetoric (p.), and Language (p.) Requirements. Satisfactory academic progress is, on average, 45 units per academic year for four years leading to at least 180 units, a cumulative grade point average of at least 2.0, and a baccalaureate degree.

While undergraduates are expected to register for a minimum of 12 units, they are required to earn at least 9 units each quarter (by the end of the final exam period) and at least 36 units in their most recent three quarters of Stanford enrollment (by the end of the third final exam period). In addition, students are expected to maintain a cumulative grade point average of at least 2.0. Transfer work completed at other institutions is not considered in this calculation.

A student earning fewer than 9 units per quarter or fewer than 36 units in three quarters, or earning less than a 2.0 cumulative grade point average, is placed on academic probation. (For students with disabilities taking a reduced course load, contact the Office of Accessible Education (http://studentaffairs.stanford.edu/oae/) for additional information.) Additionally, a student may be placed directly on provisional registration or academic suspension (both further defined in this section) without first being placed on academic probation if the student had a prior probation status. Students on academic probation (p.) or provisional registration (p.) status are required to earn a minimum of 12 units of new course work per quarter (by the end of the final quarter examination period for each quarter) in each quarter for three quarters of consecutive enrollment (excluding Summer; see below for AY 2020-21 (p. 95)), and achieve and maintain a cumulative grade point average of at least 2.0 to attain a satisfactory academic progress status. The C-USP

Subcommittee on Academic Progress may stipulate otherwise by acting upon a request for fewer units (i.e. reduced course load).

COVID-19 Policy

Typically, a Stanford Summer Session Quarter is considered non-standard and therefore is excluded from standard academic review, but may count (upon request) toward the three quarter consecutive enrollment requirement if 11 or more units are earned. However, in accordance with the academic calendar and temporary policies adopted for AY 2020-21 (in response to COVID-19), which include the adoption of Summer Quarter as a fourth standard quarter, Summer Quarter 2020-21 is considered a standard quarter and, as such, holds all of the conditions and expectations for academic progress outlined in the preceding paragraphs and remainder of this section below, including a standard review of academic progress to be conducted upon the completion of that quarter for students who enroll. Additionally, so as to align with the standard policy for Summer Quarter, units earned during Flex Term (p. 5) shall not apply to academic review. Finally, in line with the standard policy related to academic review, students who receive an academic suspension are ineligible to enroll for four quarters, including Flex Term (p. 5).

Full-time enrollment is considered to be enrollment in a minimum of 12 units of course work per quarter at Stanford. Under extenuating circumstances, students may submit a request to the C-USP Subcommittee on Academic Progress to take fewer units. As a general proposition, work necessary to complete units from previous quarters does not count toward the 12 units necessary for full-time enrollment in the current quarter. All students registering for fewer than 12 units should consider the effects of that registration on their degree progress, visas, residency requirements, varsity athlete status, and their eligibility for financial aid and awards as well as eligibility for or deferment of student loans.

All undergraduates validly registered at Stanford are considered to be in good standing for the purposes of enrollment certification and athletic participation.

Units are granted for courses completed with grades 'A,' 'B,' 'C,' 'D,' 'Satisfactory' ('CR' or 'S'), and 'L.' Courses graded 'N' are counted provisionally as units earned, provided the student enrolls in the continuing segment of that course the following quarter. When the course is completed satisfactorily, the student receives the units for which he or she enrolled. No units are granted for a course in which the student receives an 'I' or a 'GNR' ('GNR' replaced the '*' effective Autumn Quarter 2009-10) until the course is completed satisfactorily and the final grade reported. No units are granted for a course in which the student receives a 'W'. (See the "Grading Systems (p. 91)" section of this bulletin).

Students who receive all 'W's as the result of a Leave of Absence (either voluntary or involuntary) are subject to Academic Progress policies.

The C-USP Subcommittee on Academic Progress, in its discretion, is empowered to place conditions on students with an academic progress status (e.g., academic probation, provisional registration, etc.) with regard to enrollment and participation in programs and activities. In addition, students on academic probation require approval in advance from Academic Advising (https://undergrad.stanford.edu/advising/make-appointment/), Residential Education (http://studentaffairs.stanford.edu/resed/), and the Overseas Studies Program (http://bosp.stanford.edu/) office or Stanford in Washington Program (http://siw.stanford.edu/) office or Stanford in New York (http://exploredegrees.stanford.edu/undergraduateeducation/stanford_in_new_york/) or Stanford at Sea (http://stanford.sea.edu/) in order to participate in Stanford's Overseas Studies Program or Stanford in Washington Program or Stanford in New York or Stanford at Sea; while students on other statuses (e.g., provisional registration, etc.) are ineligible to participate in these programs.

Degree Progress standards for coterminal students are described in the coterminal bachelor's and master's degrees section of the Bulletin.

Students receiving federal student aid funds must maintain satisfactory academic progress standards that may be more strict than those outlined here. See the Financial Aid Office web site (http://financialaid.stanford.edu) for details.

Academic Probation

A student who fails to earn at least 36 units of work (by the end of the third final exam period) in his or her most recent three quarters of enrollment at the University (excluding Summer), or who fails to earn by the end of the final examination period at least 9 quarter units of work in his or her most recent quarter of enrollment at the University (excluding Summer), or who has a cumulative grade point average of less than 2.0, may be placed on academic probation.

A student shall be removed from academic probation if, in each of three subsequent quarters of consecutive enrollment at the University (excluding Summer*, see above), he or she earns a minimum of 12 units of new course work by the end of the final examination period and achieves and maintains a cumulative grade point average of at least 2.0. A student may also be removed from academic probation at the discretion of the C-USP Subcommittee on Academic Progress or its designees as a result of a review of individual records.

Provisional Registration

A student who, while on academic probation, fails in any quarter of registration (excluding Summer*, see above) to earn a minimum of 12 units of new course work by the end of the final examination period or fails to achieve and maintain a cumulative grade point average of at least 2.0, may be placed on provisional registration status. In addition, and on occasion, a student may also be placed directly on provisional registration without first being placed on academic probation if the student has had a prior probation status.

A student shall be removed from provisional registration if, in each of three subsequent quarters of enrollment at the University (excluding Summer*, see above), he or she earns a minimum of 12 units of new course work by the end of the final examination period and achieves and maintains a cumulative grade point average of at least 2.0. A student may also be removed from provisional registration at the discretion of the C-USP Subcommittee on Academic Progress or its designees as a result of a review of individual records.

Academic Suspension

A student who, while on provisional registration, fails in any quarter of registration (excluding Summer*, see above) to earn a minimum of 12 units of new course work by the end of the final examination period or fails to achieve and maintain a cumulative grade point average of at least 2.0, may be placed on academic suspension. In addition, and on occasion, a student may also be placed on academic suspension directly from academic probation; or may be placed on academic suspension without first being placed on academic probation or provisional registration if the student has had a prior probation status.

While students placed on academic suspension for the first time are suspended for one year, students placed on academic suspension a subsequent time may be suspended for up to three years.

Students suspended for one year are not eligible to enroll for four quarters (including Summer Quarter) following the quarter in which the academic suspension was issued. Students suspended for up to three years are not eligible to enroll for up to twelve quarters (including

Summer Quarter) following the quarter in which the academic suspension was issued.

As well, until re-enrollment, students who are suspended are ineligible for the privileges associated with registration, privileges that include living in University housing, participating in voluntary student organizations, and involvement in any activity for which enrollment is a requirement.

The C-USP Subcommittee on Academic Progress or its designees, in its discretion, may impose conditions of the academic suspension, and/or to a return from the academic suspension.

Reconsideration of Academic Suspension

Students who receive an academic suspension and believe they have information that presents relevant and compelling material previously unknown to the subcommittee or its designees, such that reconsideration for immediate continuation of their studies without a break in enrollment is suitable, should meet with an adviser from the office of Academic Advising (https://advising.stanford.edu) in VPUE to discuss their circumstances. Students with such relevant circumstances may submit a Request for Reconsideration of Academic Suspension. Granting such requests is at the discretion of the subcommittee or its designees, and may be based on factors or considerations regarded as relevant including the demonstrated or perceived likelihood for immediate academic success. Requests for reconsideration submitted after the deadline are not accepted. A student may also grieve an academic suspension under the Student Academic Grievance Procedure (p. 96).

Students are expected to complete their academic suspension in full. An academic suspension may not be substituted, in part or in whole, by a Leave of Absence.

Returning from Suspension

Students are required to submit a properly endorsed application for reinstatement to request re-enrollment after the suspension period has been completed. Instructions, including deadlines for requesting to return, should be obtained from the Office of the Vice Provost for Undergraduate Education, via the office of Academic Advising (https://advising.stanford.edu), Sweet Hall. The C-USP Subcommittee on Academic Progress, or those designated by the subcommittee, acts upon all requests concerning academic progress and its statuses, including a Request to Return and Register after completion of the academic suspension. The subcommittee or its designees may determine whether the application for reinstatement to return will be approved or not, and/or the conditions a student must meet in order to return. Request to Return and Register decisions are at the discretion of the University and may be based on activities while away from campus, the perceived potential for successful completion of the program, as well as any other factors or considerations regarded as relevant to the Vice Provost for Undergraduate Education or the subcommittee or its designees.

Students who return from an academic suspension are given the academic progress status "provisional registration", and must adhere to and comply with the policies above and elsewhere related to that status upon their return. Questions concerning academic progress or requests to return should be directed to the office of Academic Advising (https://advising.stanford.edu), Sweet Hall.

Students returning from academic suspension should also contact appropriate campus offices, such as Housing and Financial Aid, regarding those offices' deadlines and procedures.

Notification (Academic Progress)

Written notification that a student is on academic probation, provisional registration, or academic suspension is sent to the student, to the student's academic adviser(s), and to other relevant university offices and individuals as soon as possible after the close of the quarter. Students also receive written notification of the outcome of their Request for Reconsideration of Academic Suspension, or their Request to Return and Register after completion of their academic suspension. Current student status, such as whether a student is enrolled or not, is considered Directory Information for the purposes of FERPA at Stanford, and Stanford may provide either parent(s) or guardian(s) written notification of a change in student status. Provided that a student consents, or the student is a dependent for income tax purposes, Stanford may also provide either parent(s) or guardian(s) written notification that the student is on academic probation, provisional registration, academic suspension, or Leave of Absence (either voluntary or involuntary). Other FERPA exceptions may also apply.

Student Academic Grievance Procedure

The following policy is subject to periodic review and modification.

1. Coverage
   a. Any Stanford undergraduate or graduate student who believes that he or she has been subjected to an improper decision on an academic matter is entitled to file a grievance to obtain an independent review of the allegedly improper decision, followed by corrective action if appropriate. A grievance is a complaint in writing made to an administrative officer of the University concerning an academic decision, made by a person or group of persons acting in an official University capacity, that directly and adversely affects the student as an individual in his or her academic capacity.
   b. This grievance procedure applies only in those cases involving a perceived academic impropriety arising from a decision taken by: (1) an individual instructor or researcher; (2) a school, department, or program; (3) a committee charged to administer academic policies of a particular school, department, or program; or (4) the University Registrar, the Vice Provost for Undergraduate Education, the C-USP Subcommittee on Academic Progress, or a Senate committee or subcommittee charged to administer academic policies of the Senate of the Academic Council. This procedure does not apply to: (1) complaints expressing dissatisfaction with a University policy of general application challenged on the grounds that the policy is unfair or inadvisable; (2) individual school, department, or program academic policies, as long as those policies are not inconsistent with general University policy; (3) matters proceeding or addressed through the Office of Community Standards; or (4) involuntary leave decisions.
   c. Individuals should be aware that the University Ombuds Office is available to all Stanford students, faculty, and staff to discuss and advise on any matter of University concern and frequently helps expedite resolution of such matters. Although it has no decision-making authority, the University Ombuds Office has wide powers of inquiry, including into student complaints against instructors.
2. Grievance and Appeal Procedures
   a. Informal Attempts at Resolution: the student first should discuss the matter, orally or in writing, with the individual(s) most directly responsible. If no resolution results, the student should then consult with the individual at the next administrative level, for example, the chair or director of the relevant department or program, or, for those cases in which there is none, with the school dean. At this stage, the department chair or program director, if any, may inform the dean that the consultation is taking place and may solicit his or her advice on how to ensure that adequate steps are taken to achieve a fair result. Efforts should be made to resolve the issues at an informal level without the complaint escalating to the status of a formal grievance.
   b. The Filing of the Grievance:
      i. If informal means of resolution prove unsatisfactory, the student should set forth in writing a statement of the decision that constitutes the subject matter of the dispute, the grounds on which it is being challenged, and the reasons

why the grievant believes that the decision was improperly taken. The statement should also include a description of the remedy sought and the informal efforts taken to date to resolve the matter. It is at this point that the complaint becomes a formal grievance. The written grievance should specifically address the matters set forth in the Standards for Review, as stated in Section 4 below. The grievance should include an allegation of any adverse effects on the grievant, known to the grievant at the time of filing.

ii. The grievance document should be submitted to the dean of the school in which the grievance arose; for a grievance concerning a decision of the University Registrar, the Vice Provost for Undergraduate Education, or of a Senate committee or subcommittee, the procedures set forth herein for grievances and appeals shall be modified as stated in Section 3 below. A grievance must be filed in a timely fashion, that is, no later than 30 days after the end of the academic quarter in which the adverse decision occurred or should reasonably have been discovered. Except in extraordinary circumstances, delay in filing a grievance will constitute grounds for rejection of the grievance.

c. The Response to the Grievance:

i. The relevant dean will consider the grievance. The dean may attempt to resolve the matter informally or make whatever disposition of the grievance that he or she deems appropriate. The dean may, in appropriate cases, remand the grievance to a lower administrative level (including to the level at which the grievance arose) for further consideration.

ii. The dean may also refer the grievance, or any issue therein, to any person (the "grievance officer") who will consider the matter and report to the dean as the latter directs. The dean will inform the grievant (and the party against whose decision the grievance has been filed) in writing of any referral of the matter and will specify the matters referred, the directions to the person or persons to whom the referral is made (including the time frame within which the person is to report back to the dean), and the name of that person.

iii. In undertaking the review, the dean or the grievance officer may request a response to the issues raised in the grievance from any individuals believed to have information considered relevant, including faculty, staff, and students.

iv. Should attempts to resolve the matter informally not be successful, the dean will decide the grievance, and will notify the grievant (and the party against whose decision the grievance has been filed) in writing of the disposition made of the grievance and the grounds for the disposition at the earliest practicable date after his or her receipt of the grievance.

v. Normally, no more than 60 days should elapse between the filing of a grievance and the disposition by the dean. If, because of absence of key persons from the campus or other circumstances or exigencies (including those due to breaks in the academic calendar), the dean decides that disposition on that schedule is not possible, he or she shall inform the grievant (and the party against whose decision the grievance has been filed) of that in writing, giving the grounds therefore and an estimate of when a disposition can be expected. During summers and the winter closure, this time frame will nearly always be extended.

d. The Filing of an Appeal:

i. If the grievant is dissatisfied with the disposition of the grievance at the decanal level, either on substantive or on procedural grounds, he or she may appeal in writing to the Provost.

ii. The appeal must specify the particular substantive or procedural bases of the appeal (that is, the appeal must be made on grounds other than general dissatisfaction with the disposition) and must be directed only to issues raised in the grievance as filed or to procedural errors in the grievance process itself, and not to new issues. The appeal must contain the following:

1. A copy of the original grievance and any other documents submitted by the grievant in connection therewith.
2. A copy of the determination made by the dean on that grievance.
3. A statement of why the reasons for the determination of the dean are not satisfactory to the grievant. This statement should specifically address the matters set forth in the Standards for Review in Section 4 below.

iii. The grievant will file his or her appeal at the earliest practicable date after the grievant's receipt of the determination by the dean. Normally, no more than 30 days should elapse between the transmittal of the dean's decision on the grievance and the filing of the appeal. Except in extraordinary circumstances, delay in filing an appeal will constitute grounds for rejection of the appeal.

e. The Response to the Appeal:

i. The Provost may attempt to resolve the matter informally, or refer the appeal, or any issue thereof, to any person (the "grievance appeal officer") who shall consider the matter and report to the Provost as the latter directs. The Provost may also, in appropriate cases, remand the matter to a lower administrative level (including to the level at which the grievance arose) for further consideration.

ii. The Provost will inform the grievant (and the party against whose decision the grievance has been filed) in writing of any referral of the matter and will specify the matters referred, the directions to the person to whom the referral is made (including the time frame within which the person is to report back to the Provost), and the name of that person.

iii. Should attempts be made to resolve the matter informally not be successful, the Provost will decide the appeal, and will notify the grievant (and the party against whose decision the grievance has been filed) in writing of the disposition made of the grievance and the grounds for the disposition at the earliest practicable date after his or her receipt of the appeal. The decision of the Provost is final.

iv. Normally no more than 45 days should elapse between the filing of the appeal and the disposition by the Provost. If, because of absence of key persons from the campus or other circumstances or exigencies (including those due to breaks in the academic calendar), the Provost judges that disposition on that schedule is not possible, he or she will inform the grievant (and the party against whose decision the grievance has been filed) of the fact in writing, giving the grounds therefore and an estimate of when a disposition can be expected. During summers and the winter closure, this time frame will nearly always be extended.

3. Grievances Concerning Decisions of the University Registrar, the Vice Provost for Undergraduate Education, or of a Senate Committee or Subcommittee

a. For a grievance concerning a decision of the University Registrar, the Vice Provost for Undergraduate Education, the C-USP Subcommittee on Academic Progress, or of a Senate committee or subcommittee, the grievant will file his or her grievance with the Provost, rather than with the dean, and the Provost will handle that grievance in accordance with the procedures set forth in Section 2c above.

b. There is no appeal of the Provost's disposition of that grievance.

4. Standards for Review and Procedural Matters

a. The review of grievances or appeals will usually be limited to the following considerations:

i. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?
ii. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?
iii. Given the proper facts, criteria, and procedures, was the decision one which a person in the position of the decision maker might reasonably have made?

b. The time frames set forth herein are guidelines. They may be extended by the relevant administrative officer in his or her discretion for good cause.
c. Questions concerning the filing and appeal of grievances should be directed to the Office of the Provost.

Stanford University ID Number

The Stanford University ID Number is assigned to each student's academic record for unique identification. It is printed on the Stanford University ID card and on documents distributed by the Office of the University Registrar and other administrative offices. It is a violation of University policy to use another's Stanford University ID Number to misrepresent yourself in any way; such use can result in loss of student privileges or other disciplinary action.

SUNet ID

The SUNet ID provides access to the Stanford University Network (SUNet) and its services, and identifies authorized users of these services. Each member of the Stanford electronic community creates a unique SUNet ID and SUNet ID password for him/herself. SUNet IDs provide:

- Axess services
- Email service
- Storage space within Stanford's distributed file system
- Usenet newsgroups
- World wide web services, including serving of personal web pages on the Leland system and access to Stanford Web Resources

The SUNet ID together with SUNet ID password may serve in place of a signature on electronic forms. The SUNet ID password must remain confidential; it is a violation of University policy to permit another person to use your SUNet ID or password. It is a violation of University policy to use another's SUNet ID or SUNet ID password to misrepresent yourself in any way; such use can result in loss of student privileges or other disciplinary action.

Identification Cards

The ID card serves as an identification card, an electronic key, and a debit card, allowing cardholders to use services for which they have privileges, to enter certain facilities, and to make purchases.

ID cards are available to registered students, faculty, academic staff, and regular staff. Students obtain their ID cards at the Student Services Center, Tresidder Union, 459 Lagunita Drive, 2nd Floor (650) 498-CARD). Faculty and staff obtain ID cards at George Forsythe Hall, 275 Panama Street, Room 190 (650-498-CARD).

Courtesy ID cards are available for spouses and domestic partners of the Stanford professoriate, academic staff, regular staff, and students. These cards may be obtained from the Stanford Card ID Office at Forsythe Hall. The spouse/partner courtesy ID card enables use of some campus services during terms for which the student is registered.

Visiting Scholars who are on campus for a minimum of one quarter and contribute to Stanford's mission by teaching or collaborating on Stanford research also receive ID cards and campus privileges during their stay on campus. These cards may be obtained from the Stanford Card ID Office at Forsythe Hall.

Library access and borrowing privileges are reserved for the Stanford professoriate, academic staff, regular staff, students, and others associated with the University with a need for such access.

ID cards bear a photograph of the cardholder. This photograph is maintained in an online database and, as stated in the "Directory Information (p.)" section of this bulletin, is available for classroom, student residence, and other use upon specific request and without student consent unless the student has designated that the photograph not be released. Photographs can be designated as private using the Privacy function of Axess.

Misuse of the ID card may result in discipline or administrative action.

For more information, see the Campus Card Service (http://campuscard.stanford.edu) web site. For the complete policy on Stanford Identification Cards, see the Administrative Guide, 28-4 (http://adminguide.stanford.edu/28_4.pdf) (pdf).

COVID-19 Policy

Due to current health guidelines, no auditors are permitted to attend in-person classes. Remote auditing is available only to Stanford affiliates, who must complete and submit an Audit form (https://registrar.stanford.edu/resources-and-help/student-forms-petitions-and-requests/auditor-and-nonmatriculated-forms/#auditor).

Auditing

No person shall attend any class unless he or she is a fully registered student enrolled in the course or meets the criteria for auditors. Auditors are not permitted in courses that involve direct participation such as language or laboratory science courses, field work, art courses with studio work, or other types of individualized instruction (i.e., labs, seminars, case study, language, and activity courses are not permitted). Auditors are expected to be observers rather than active participants in the courses they attend, unless the instructors request attendance on a different basis. Stanford does not confer credit for auditing, nor is a permanent record kept of courses audited. Students who have been suspended are not permitted to audit.

Auditors may not join classes for the first time after the University's final study list deadline. Auditors are not eligible for other University services or privileges including housing, health insurance (Cardinal Care), Vaden clinical services, and the University health plan. The University Registrar reviews for approval any other services or privileges that may be sought.

The Auditor status is available to Stanford faculty or staff members for no fee. Otherwise, the Permit to Attend fee is assessed. The Application for Auditor or Permit to Attend (PTA) Status is required. In all cases of auditing, the instructor, department administrator, and the Office of the University Registrar's prior approvals are required. Further information is available from the Student Services Center (http://studentservicescenter.stanford.edu/).

The University assumes no responsibility or liability for any delay or failure to provide some or all academic or other campus activities or for any modification to instruction or institutional offerings due to any force majeure. For these purposes, the term “force majeure” shall mean fire, earthquake, flood, act of God, strikes, work stoppages or other labor disturbances, riots or civil commotions, crimes, litigation, war or other act of any foreign nation, plague, epidemic, pandemic, power of government or governmental agency or authority, or any other cause like or unlike any cause mentioned above, which is beyond the control or authority of Stanford and either makes performance of the policies and protocols

set forth herein illegal, impractical, and/or in the reasonable judgment of Stanford, threatens the safety and wellness of its students, employees and/or community members.

NONACADEMIC REGULATIONS

The Bulletin publishes the following nonacademic policies which are applicable to all Stanford students. Each policy is published on its own page, viewable in the left-hand menu or linked in the list below. All the policies published in the Bulletin are also collected on this page and available for download (http://exploredegrees.stanford.edu/nonacademicregulations/nonacademicregulations.pdf) (pdf).

The University reserves the right to make changes at any time without prior notice. Nonacademic policies as published on this site are the currently applicable policies.

For other policy information applicable to members of the Stanford community, see Student Activities and Leadership (https://sal.stanford.edu/policies/) (student organizations, programs, and events), the "GAP (https://gap.stanford.edu/)" (Graduate Academic Policies and Procedures), the Office of Special Events and Protocols (https://web.stanford.edu/dept/Events/policies/) (University Event Policies), and the Administrative Guide (https://adminguide.stanford.edu/) ("guidelines for non-research University activities that govern workplace interactions, approaches, procedures, and processes").

Students with questions about nonacademic policies should submit a SU Services & Support Request (https://stanford.service-now.com/student_services/?id=sc_cat_item&sys_id=a623e6d4131b53c08a9175c36144b082).

Nondiscrimination Policy

Stanford University admits qualified students of any race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity, veteran status, or marital status to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, in the administration of the University's programs and activities, Stanford prohibits unlawful discrimination on the basis of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity or expression, veteran status, marital status or any other characteristic protected by applicable law; Stanford also prohibits unlawful harassment including sexual harassment and sexual violence.

This policy applies to Stanford programs and activities both on and off-campus, including overseas programs.

The following person has been designated to handle inquiries regarding this nondiscrimination policy: Stanford's Director of the Diversity and Access Office, Rosa Gonzalez, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email). Stanford's Title IX Coordinator, Catherine Glaze, has been designated to handle inquiries regarding sexual harassment and sexual violence: Kingscote Gardens (2nd floor), 419 Lagunita Drive, Stanford, CA 94305, (650) 497-4955 (voice), (650) 497-9257 (fax), titleix@stanford.edu (email).

Individuals may also file complaints directly with the Office for Civil Rights, within the United States Department of Education, by following the information on this website: https://www2.ed.gov/about/offices/list/ocr/complaintintro.html.

Age Discrimination Act of 1975

The following is the policy:

1. Policy

   It is the policy of Stanford University to comply with the Age Discrimination Act of 1975 and its regulations, which prohibit unlawful discrimination on the basis of age. The Age Discrimination Act Compliance Officer is the Director of the Diversity and Access Office ("the Director"), who has been appointed to coordinate the University's efforts to comply with the law. Anyone who believes that Stanford is not in compliance with the Age Discrimination Act and its regulations ("the Act") should contact the Director at the Diversity and Access Office, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (http://relative.pagelegend.com/mailto:equal.opportunity@stanford.edu) (email).

2. Grievance Procedure

   a. An individual who believes that Stanford is not acting in compliance with the Act and who wishes to file a grievance should set forth in writing the substance of his or her complaint, the grounds for it and the evidence on which it is based, and the efforts (if any) taken to date to resolve the matter. It is at this stage that the complaint becomes a formal grievance.

   b. The grievance document should be submitted to the Director. A grievance should be filed in a timely fashion, i.e., normally no later than thirty days after the end of the academic quarter in which the action that is the subject of the grievance occurred. Except in extraordinary circumstances, delay in filing a grievance will be grounds for rejection of that grievance.

   c. The Director will promptly initiate a review, which should normally be completed within sixty days. The Director may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance officer or other designee, who will look into and/or address the matter as the Director directs. The Director may also, in appropriate cases, remand the matter to the

appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.

d. In undertaking this review, either the Director, his or her designee, or the grievance officer may request a response to the issues raised in the grievance from any individuals believed to have information the reviewer considers relevant, including faculty, staff and students.

e. The Director (or his or her designee) will issue his or her decision in writing, and take steps to initiate such corrective action as is called for (if any).

3. Appeal

a. If the grievant is dissatisfied with the disposition by the Director (or his or her designee), he or she may appeal to the Provost (Office of the President and Provost, Building 10, Stanford, CA 94305-2061; phone 650-725-4075; fax 650-725-1347). The appeal should be filed in writing with the Provost within ten days of the issuance of the decision by the Director (or his or her designee); a delay in filing the appeal may be grounds for rejection of that appeal.

b. The Provost may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance appeal officer, who will review the matter at the Provost's direction. The Provost may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.

c. The Provost should normally complete his or her review of the appeal and issue his or her decision in writing within forty-five days. That decision is final.

4. General Provisions

a. Time Guidelines—The time frames set forth herein are guidelines. They may be extended by the Director or Provost, as applicable, in his or her discretion for good cause (including for reasons relating to breaks in the academic calendar), and will nearly always be extended during summers and the winter closure.

b. No Retaliation—Stanford University prohibits retaliation or reprisals against individuals based on their pursuit in good faith of a grievance under this procedure, or their participation in good faith in the grievance process.

c. Standards for Review—If the grievance involves a decision that is being challenged, the review by the Director, as well as the review by the Provost on appeal, usually will be limited to the following considerations:

i. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?

ii. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?

iii. Given the proper facts, criteria, and procedures, was the decision one which a person in the position of the decision maker might reasonably have made?

ADA (Americans with Disabilities Act)/ Section 504 Grievance Procedure (Student)

For information more generally concerning policies and procedures for students with disabilities, see the Diversity & Access Office (http://www.stanford.edu/dept/diversityaccess/) web site, or the ADA/Section 504 Compliance Officer, Diversity and Access Office, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (http://relative.pagelegend.com/mailto:equal.opportunity@stanford.edu) (email); see also the Office for Accessible Education (OAE) (http://studentaffairs.stanford.edu/oae/) web site.

Policy

The following is the policy:

I. Policy

Stanford University, in compliance with state and federal laws and regulations, including the Americans with Disabilities Act of 1990 (ADA; as amended 2008) and Section 504 of the Rehabilitation Act of 1973 (Section 504), does not discriminate on the basis of disability in administration of its education-related programs and activities, and has an institutional commitment to provide equal educational opportunities for disabled students who are otherwise qualified.

Students who believe they have been subjected to unlawful discrimination on the basis of disability, or have been denied access to services or accommodations required by law, have the right to use this grievance procedure.

II. Applicability

As a general proposition, the grievance procedure set forth below is applicable to undergraduate and graduate students of the University. In general, it is designed to address disputes concerning the following:

1. Disagreements regarding a requested service, accommodation, or modification of a University practice or requirement;
2. Inaccessibility of a program or activity;
3. Harassment or discrimination on the basis of disability;
4. Violation of privacy in the context of disability.

As a general proposition, this grievance procedure supplants the Student Academic Grievance Procedure (p. 96) and the Student Non-Academic Grievance Procedure (p.) (both of which are set forth in this bulletin) for disability-related grievances. Questions of applicability will be decided by the Director of the Diversity and Access Office.

III. Compliance Officers

Stanford University's Compliance Officers are responsible for administering this grievance procedure as well as ensuring compliance with applicable laws. The Director of the Diversity and Access Office is the designated ADA / Section 504 Compliance Officer. That office is located in Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (http://relative.pagelegend.com/mailto:equal.opportunity@stanford.edu) (email).

Additional Compliance Officers may be designated from time to time by the Provost from those faculty and staff members knowledgeable concerning disability issues and the legal mandates of state and federal disability statutes.

IV. Informal Resolution

Prior to initiating the formal complaint procedure set forth below, the student should, in general, first discuss the matter orally or in writing with the individual(s) most directly responsible. If no resolution results,

or if direct contact is inappropriate under the circumstances, the student should then consult with the Compliance Officer at the Diversity and Access Office who will attempt to facilitate a resolution. (The informal resolution process may involve consultation with the Associate Vice Provost for Student and Academic Services and University Registrar.)

If the Compliance Officer is not successful in quickly achieving a satisfactory resolution (that is, generally within seven calendar days), the Compliance Officer will inform the student of his or her efforts and the student's right to file a formal complaint.

V. Formal Complaint

If the procedure set forth above for informal resolution does not yield a successful resolution, then the student may file a formal complaint in the following manner:

1. When to File Complaint: Complaints must be filed as soon as possible, but in no event later than 10 days after the end of the quarter in which the concern arose.
2. What to File: A complaint must be in writing and include the following:
   a. The grievant's name, address, email address and phone number;
   b. A full description of the problem;
   c. A description of what efforts have been made to resolve the issue informally;
   d. A statement of the remedy requested.
3. Where to File Complaint: the complaint is to be filed with the Compliance Officer at the Diversity and Access Office, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (http://relative.pagelegend.com/mailto:equal.opportunity@stanford.edu) (email).
4. Notice of Receipt: upon receipt of the complaint, the Compliance Officer reviews the complaint for timeliness and appropriateness for this grievance procedure, and provides the grievant with written notice acknowledging its receipt.
5. Investigation: the Compliance Officer will promptly initiate an investigation and may refer the matter (or any part of it) to a grievance officer or other designee, who will look into and/or address the matter as the Compliance Officer directs. In undertaking the investigation, the Compliance Officer or grievance officer may interview, consult with, and/or request a written response to the issues raised in the grievance from any individual the grievance officer believes to have relevant information, including faculty, staff, and students.
6. Representation: the grievant and the party against whom the grievance is directed each have the right to have a representative. The party shall indicate whether he or she is to be assisted by a representative and, if so, the name of that representative. For purposes of this procedure, an attorney is not an appropriate representative.
7. Findings and Notification: upon completion of the investigation, the grievance officer will prepare and transmit to the student, and to the party against whom the grievance is directed, a final report containing a summary of the investigation, written findings, and a proposed disposition. This transmission will be expected within 60 calendar days of the filing of the formal complaint. The deadline may be extended by the Compliance Officer for good cause (including for reasons relating to breaks in the academic calendar), and will nearly always be extended during summers and the winter closure. The final report may also be provided, where appropriate, to any University officer whose authority will be needed to carry out the proposed disposition or to determine whether any personnel action is appropriate.
8. Final Disposition: the disposition proposed by the Compliance Officer will be put into effect promptly. The grievant or any party against whom the grievance or the proposed disposition is directed may appeal. The appeal to the Provost (as set forth below) will not suspend the implementation of the disposition proposed by the grievance officer, except in those circumstances where the Provost decides that good cause exists making the suspension of implementation appropriate.

VI. Urgent Matters

Whenever the application of any of the time deadlines or procedures set forth in this grievance procedure creates a problem due to the nature of the complaint, the urgency of the matter, or the proximity of the upcoming event, the Compliance Officer will, at the request of the grievant, determine whether an appropriate expedited procedure can be fashioned.

VII. Remedies

Possible remedies under this grievance procedure include corrective steps, actions to reverse the effects of discrimination or to end harassment, and measures to provide a reasonable accommodation or proper ongoing treatment. As stated above, a copy of the Compliance Officer's report may, where appropriate, be sent to University officer(s) to determine whether any personnel action should be pursued.

VIII. Appeal

Within ten calendar days of the issuance of the final report, the grievant or the party against whom the grievance is directed may appeal to the Provost the grievance officer's determination.

An appeal is taken by filing a written request for review with the Compliance Officer at the Diversity and Access Office, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (http://relative.pagelegend.com/mailto:equal.opportunity@stanford.edu) (email).

The written request for review must specify the particular substantive and/or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the proposed disposition. Furthermore, the appeal must be directed only to issues raised in the formal complaint as filed or to procedural errors in the conduct of the grievance procedure itself, and not to new issues.

The Compliance Officer will forward the appeal to the Provost, and also provide copies to the other party or parties. If the grievance involves a decision that is being challenged, the review by the Provost or his or her designee usually will be limited to the following considerations:

1. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?
2. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?
3. Given the proper facts, criteria, and procedures, was the decision a reasonable one?

A copy of the Provost's written decision will be expected within 30 calendar days of the filing of the appeal and will be sent to the parties, the Compliance Officer and, if appropriate, to the University officer whose authority will be needed to carry out the disposition. The deadline may be extended by the Provost for good cause (including for reasons relating to breaks in the academic calendar), and will nearly always be extended during summers and the winter closure. The decision of the Provost on the appeal is final.

Policy on Campus Disruptions

The Policy on Campus Disruptions was promulgated in 1967, and states that:

Policy

Because the rights of free speech and peaceable assembly are fundamental to the democratic process, Stanford firmly supports the rights of all members of the University community to express their views or to protest against actions and opinions with which they disagree.

All members of the University also share a concurrent obligation to maintain on the campus an atmosphere conducive to scholarly pursuits, to preserve the dignity and seriousness of University ceremonies and public exercises, and to respect the rights of all individuals.

The following regulations are intended to reconcile these objectives.

It is a violation of University policy for a member of the faculty, staff, or student body to:

1. Prevent or disrupt the effective carrying out of a University function or approved activity, such as lectures, meetings, interviews, ceremonies, the conduct of University business in a University office, and public events.
2. Obstruct the legitimate movement of any person about the campus or in any University building or facility.

Members of the faculty, staff, and student body have an obligation to leave a University building or facility when asked to do so in the furtherance of the above regulations by a member of the University community acting in an official role and identifying himself or herself as such; members of the faculty, staff, and student body also have an obligation to identify themselves when requested to do so by such a member of the University community who has reasonable grounds to believe that the person(s) has violated section (1) or (2) of this policy and who has so informed the person(s).

The policy has been applied to the following actions: refusal to leave a building which has been declared closed; obstructing the passage into or out of buildings by sitting in front of doorways; preventing University employees from entering their workplace; preventing members of a class from hearing a lecture or taking an examination, or preventing the instructor from giving a lecture, by means of shouts, interruptions, or chants; refusing to leave a closed meeting when unauthorized to attend; and intruding upon or refusing to leave a private interview.

It should be understood that while the above are examples of extraordinarily disruptive behavior, the application of the Policy also takes situational factors into consideration. Thus, for example, conduct appropriate at a political rally might constitute a violation of the Policy on Campus Disruptions if it occurred within a classroom.

There is no "ordinary" penalty which attaches to violations of the Policy on Campus Disruptions. In the past, infractions have led to penalties ranging from censure to expulsion. In each case, the gravity of the offense and prior conduct of the student are considered; however, the more serious the offense, the less it matters that a student has otherwise not done wrong.

Campus Safety and Criminal Statistics

Stanford University complies with the Jeanne Clery Disclosure of Campus Security Policy and Crime Statistics Act. A copy of Stanford's policies and statistics under this act are posted on the Department of Public Safety (https://police.stanford.edu/security-report.html) web site. A paper copy can be obtained by calling the Stanford Department of Public Safety at (650) 723-9633.

Computer and Network Usage

For a complete text of the currently applicable version of this policy, see Administrative Guide Memo 6.2.1 Computer and Network Usage Policy (https://adminguide.stanford.edu/chapter-6/subchapter-2/policy-6-2-1/).

Policy

The following is quoted from the policy:

Users of Stanford network and computer resources have a responsibility not to abuse the network and resources. This policy provides guidelines for the appropriate and inappropriate use of information technologies.

Summary

The following summarizes the policy on Computer and Network Usage:

In particular, the policy provides that users of University information resources must respect software copyrights and licenses, respect the integrity of computer-based information resources, refrain from seeking to gain or permitting others to gain unauthorized access, including by sharing passwords, and respect the rights of other computer users.

This policy covers appropriate use of computers, networks, and information contained therein. As to political, personal and commercial use, the University is a non-profit, tax-exempt organization and, as such, is subject to specific federal, state, and local laws regarding sources of income, political activities, use of property, and similar matters. It also is a contractor with government and other entities, and thus must assure proper use of property under its control and allocation of overhead and similar costs. For these reasons, University information resources must not be used for partisan political activities where prohibited by federal, state, or other applicable laws, and may be used for other political activities only when in compliance with federal, state, and other laws, and in compliance with applicable University policies. Similarly, University information resources should not be used for personal activities not related to appropriate University functions, except in a purely incidental manner. In addition, University information resources should not be used for commercial purposes, except in a purely incidental manner or except as permitted under other written policies of the University or with the written approval of a University officer having the authority to give such approval. Any such commercial use should be properly related to University activities, take into account proper cost allocations for government and other overhead determinations, and provide for appropriate reimbursement to the University for taxes and other costs the University may incur by reason of the commercial use. Users also are reminded that the .edu domain on the Internet has rules restricting or prohibiting commercial use, and thus activities not appropriately within the .edu domain and which otherwise are permissible within the University computing resources should use one or more other domains, as appropriate.

The University's Information Security Officer is authorized in appropriate circumstances to inspect or monitor private data (including email), such as when there is a reasonable cause to suspect improper use of computer or network resources.

For further information on the topic of peer-to-peer file sharing, see the section above on Copyright.

Copyright

Copyright laws protect original works of authorship and give the owners of copyrights the exclusive right to do and to authorize others to do certain things in regard to a copyrighted work, including: make copies, distribute the work, display or perform the work publicly, and create derivative works. Copyright laws apply to nearly all forms of captured content, including traditional works like books, photographs, music, drama and sculpture. The laws also adapt to changes in technologies, and include in their scope modern forms of works like motion pictures,

web sites, electronic media, software, multimedia works and some databases. Registration is not required to obtain a copyright, so if in doubt, assume a copyright applies.

Unless an exception to the copyright owner's exclusive rights applies, you must obtain permission from the copyright owner to copy, distribute, display or perform a copyrighted work in any medium for any purpose. Be especially mindful of copyright principles when using the Internet. Just because a work is posted on the Internet does not mean that the owner of the copyright has given you permission to use it. In general, do not post material onto the Internet without copyright clearance.

Stanford University Libraries have licenses with many publishers, which permit copying of materials in accordance with the educational, research or administrative functions of the University. In addition, there are four major exceptions to the copyright owner's exclusive rights, which (if applicable) permit limited use without permission. These are: the fair use exception, the library exception, the face-to-face teaching exception, and the distance-learning exception. For a more detailed explanation of these exceptions, the copyright laws and Stanford's copyright policies, please review the University's Copyright Reminder (http://www-sul.stanford.edu/libraries_collections/copyright_reminders/) web site. It is each person's responsibility to be aware of and abide by copyright law; violation may result in civil or criminal liability, and constitutes grounds for University discipline, up to and including discharge, dismissal and expulsion.

Prohibition of the Possession of Dangerous Weapons on Campus

The University's policy prohibiting weapons on campus (https://police.stanford.edu/pdf/stanford_university_prohibited_weapons_policy.pdf) (pdf) is available on the Resources tab of the Department of Public Safety (https://police.stanford.edu/#resources) web site.

Policy

Stanford University prohibits the possession of any of the following weapons on the Stanford campus: firearm, dirk, dagger, ice pick, knife having a blade longer than 2 1/2 inches (except for lawful use in food preparation or consumption), folding knife with a blade that locks into place, razor with an unguarded blade, taser, stun gun, instrument that expels a metallic projectile (such as a BB or a pellet), spot marker gun, or any other weapons prohibited by California Penal Code Sections 626.10 and 626.9.

For purposes of this policy, the term “Stanford campus” shall include all the lands, buildings, and facilities of Leland Stanford Junior University, whether owned, leased, and controlled, and whether located in the United States or abroad (excluding the privately owned, managed, or leased residences of faculty or staff that are located on the main Stanford campus in unincorporated Santa Clara County). In addition to the prohibited weapons, ammunition is not allowed to be stored or possessed in university owned, leased, and controlled buildings (excluding the privately owned, managed, or leased residences of faculty or staff that are located on the main Stanford campus in unincorporated Santa Clara County). In the event a federal or state law or a county ordinance is more restrictive than this policy, federal or state law or the county ordinance shall apply.

Requests for an exemption from this policy for academic purposes may be requested in writing to the Director of the Stanford University Department of Public Safety. Each request will be considered on a case-by-case basis and be evaluated by the Office of Risk Management and the Department of Public Safety. A written letter will be provided by the Director of the Department of Public Safety in the event an exemption is granted.

The Stanford University Department of Public Safety does not provide facilities for the storage of firearms.

Grievances

A Stanford undergraduate or graduate student who believes that he or she has been subject to an improper decision on an academic matter may file a grievance pursuant to the Student Academic Grievance Procedure (p. 96). For other types of grievances, students should review the section that follows on the Student Non-Academic Grievance Procedure (p.), and consult concerning applicable procedures with the Director of the Diversity and Access Office, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (http://relative.pagelegend.com/mailto:equal.opportunity@stanford.edu) (email).

An individual whose matter has been substantially addressed through one of Stanford’s grievance procedures (including but not limited to the Student Academic Grievance Procedure, the Student ADA/Section 504 Grievance Procedure, the Grievance Resolution Procedure for Postdoctoral Scholars, the Student-Athlete Grievance Procedure, or the Student Non-Academic Grievance Procedure) may not raise and seek redress of the same matter under a different Stanford grievance procedure. The University retains discretion to determine when a matter has been substantially addressed.

California Dept of Consumer Affairs Complaint Procedure

An individual may contact the Bureau for Private Postsecondary Education for review of a complaint. The bureau may be contacted online (http://www.bppe.ca.gov) or at 2535 Capitol Oaks Drive, Suite 400, Sacramento, CA 95833; phone: (916) 431-6959; fax: (916) 263-1897.

Hazing Policy

Hazing is not permitted at Stanford University. No individual, recognized student organization, club, team, or any other Stanford-affiliated student group is permitted to plan, engage in, or condone hazing, on or off the Stanford campus.

Definition of Hazing at Stanford University

Hazing includes any activity done in connection with a student organization, regardless of whether the organization is officially recognized at Stanford, that causes or is reasonably likely to cause another student to suffer bodily danger, physical harm, or significant personal degradation or humiliation, even if no bodily danger, physical harm, or significant degradation or humiliation in fact results. Hazing might occur during initiation or pre-initiation into a student organization, but is not limited to these time frames. Any individual who plans or intentionally assists in hazing activity has engaged in hazing, regardless of whether that individual is present when the hazing activity occurs.

Consequences of a Violation

Stanford University expects its students to conduct themselves in socially responsible and respectful ways. Thus, participation in hazing, either as an individual or as part of any student group, may result in serious individual and organizational consequences including, but not limited to: disciplinary action up to and including expulsion; permanent loss of organizational recognition; and loss of eligibility to remain a member of any club, team, or other Stanford-affiliated student group. Consent, implied or expressed, is not a defense to any complaint or charge alleging a hazing violation.

A number of University offices may take institutional action, including: the Organizational Conduct Board; Office of Community Standards; or other University offices, such as the Vice Provost for Student Affairs or the Department of Athletics.

Applications

Stanford's hazing policy is distinct from and broader than California Penal Code section 245.6, which prohibits: "any method of initiation or pre-initiation into a student organization or student body, whether or not the organization or body is officially recognized by an educational institution, which is likely to cause serious bodily injury to any former, current, or prospective student of any school, community college, college, university or other educational institution in this state." A violation of Penal Code Section 245.6 that does not result in serious bodily injury is punishable as a misdemeanor, while a violation that results in death or injury is punishable as a felony or a misdemeanor.

Nothing in this hazing policy prevents Stanford from taking institutional action against hazing activity that falls outside the narrower definition of Penal Code section 245.6.

Stanford's hazing policy is not intended to prohibit student recruitment or new or continuing member activities that are positive and educational in nature, designed to instill a group ethos or unity. Its intent is to deter those behaviors that cause or are likely to cause danger, harm or humiliation to another student.

Stanford's hazing policy is not intended to apply to customary athletic events or other similar institutionally-approved contests or competitions.

Questions regarding hazing policies related to fraternities and sororities should be directed to the Office of Fraternity and Sorority Life at (650) 723-0778. For all other student groups, contact Student Activities and Leadership at(650) 723-2445.

Involuntary Leave of Absence and Return Policy

In effect as of January 4, 2020

Stanford University is committed to the safety, health and well-being of the campus community. The University recognizes that students may experience situations that significantly limit their ability to function successfully or safely in their role as students. In such circumstances, students should consider requesting a leave of absence. A leave of absence permits students to take a break from the University and their studies, so that they may address the issues that led to the need for the leave and later return to the University with an enhanced opportunity to achieve their educational goals. Students will be given the option to take a voluntary leave of absence before a decision is made with respect to an involuntary leave.

1. ## Involuntary Leave of Absence

   Requiring a student to take a leave of absence is rare and, subject to Section III, only happens when current medical knowledge and/or the best available objective evidence indicates to the Senior Associate Vice Provost and Dean of Students or their designee (hereinafter, Dean of Students) that there is a significant risk to the student's health or safety or the health or safety of others, or the student's behavior severely disrupts the University environment, and no reasonable accommodations can adequately reduce that risk or disruption.

   Consistent with Stanford's Nondiscrimination Policy (p. 123), Stanford prohibits unlawful discrimination on the basis of any type of disability or any other characteristic protected by applicable law in the administration of the University's programs and activities. Stanford offers a range of resources, support services and accommodations to address the physical and mental health needs of students. However, on rare occasion, a student's needs may require a level of care that exceeds the care the University can appropriately provide. Where current knowledge about the individual's medical condition and/or the best available objective evidence indicates that a student poses a significant risk to the health or safety of a member of the University community, where a student is unable or unwilling to carry out substantial self-care obligations and poses a significant risk to their own safety not based on mere speculation, stereotypes, or generalizations, or where a student's behavior severely disrupts the University environment and the student does not want to take a voluntary leave, the Dean of Students has the authority to place a student on an involuntary leave of absence. Before placing any student on an involuntary leave of absence, Stanford will conduct an individualized assessment, consulting with the Office of Accessible Education (OAE) to determine if there are reasonable accommodations that would permit the student to continue to participate in the University community without taking a leave of absence.

   The Dean of Students may be notified about a student who may meet the criteria of an involuntary leave of absence from a variety of sources including, but not limited to, the student, the student's academic advisor, Residential Education staff, Graduate Life Office staff, an academic department, or a member of the University's threat assessment team. If the Dean of Students deems it appropriate, these procedures will be initiated.

   a. **Procedures for Placing a Student on an Involuntary Leave of Absence**

      i. The Dean of Students will consult with the Office of Accessible Education (OAE) prior to making a decision to impose an involuntary leave of absence.

      ii. The Dean of Students will issue a notice to the student in writing that an involuntary leave of absence is under consideration. The written notice will include the reason(s) why the student is being considered for an involuntary leave, contact information for OAE, which can provide information about accommodations, and a copy of this policy. In addition, the notice will provide contact information for the Process Resource, an administrator outside of the decision-making process with knowledge of Stanford's involuntary leave of absence process who will serve as a neutral process resource to answer any student questions about the process from referral through return to Stanford. In the written notice, the student will be encouraged to respond before a decision regarding a leave of absence is made and will be given a specified time period within which to do so.

      iii. The Dean of Students will consider potential accommodations and/or modifications that could obviate the need for an involuntary leave of absence, such as the option to take a voluntary leave of absence, academic accommodations, housing and dining accommodations, and modifications to University policies, rules, and regulations. Examples of academic, administrative, and housing accommodations that may be facilitated through the Office of Accessible Education (OAE) can be found on the OAE (https://oae.stanford.edu/) website.

      iv. The student may be asked to execute an Exchange of Confidential Information Consent Form providing Stanford personnel temporary authority to get information from the student's healthcare provider(s) regarding issues relevant and appropriate to the consideration of an involuntary leave of absence when there is a need for the University to have access to that information as part of the interactive process and individualized assessment. If a student refuses to execute an Exchange of Confidential Information Consent Form or to respond within the timeframe set by the Dean of Students, the Dean may proceed with the assessment based on information in the Dean's possession at the time.

v. The Dean of Students will also confer, as feasible and when appropriate in a particular matter, with individuals regarding the need for an involuntary leave of absence. Although each case will vary, conferring individuals could include:

1. Residence Deans, or Graduate Life Office Deans;
2. Faculty members;
3. Academic advisors;
4. With appropriate authorization, representatives from Stanford's Vaden Health Center (Vaden);
5. With appropriate authorization, the student's treatment provider(s) or other health care professionals;
6. Member(s) of the University's threat assessment team; and/or
7. Such other individuals as may be appropriate in an individual matter.

In each case, the Dean of Students will confer with a representative from the Office of Accessible Education (OAE) with expertise in mental health disabilities.

vi. Particular attention will be paid to the criteria for imposing an involuntary leave of absence, specifically:

1. whether current knowledge about the individual's medical condition and/or the best available objective evidence indicates that a student poses a significant risk to the health or safety of a member of the University community;
2. whether a student is unable or unwilling to carry out substantial self-care obligations and poses a significant risk to their own safety not based on mere speculation, stereotypes, or generalizations; and/or
3. whether a student's behavior severely disrupts the University environment.

The individualized assessment as to each factor, based on reasonable judgment that relies on current medical knowledge or on the best available objective evidence, should ascertain: the nature, duration, and severity of the risk or disruption; the probability that the risk or disruption will actually occur; and whether reasonable modifications of policies, practices, or procedures will adequately mitigate the risk or disruption so as to eliminate the need for an involuntary leave of absence.

vii. The Dean of Students will give significant weight to the opinion of the student's treatment provider(s), including those identified by the student, regarding the student's ability to function academically and safely at the University with or without reasonable accommodations. If the Dean of Students determines that the information provided by the treatment provider(s) is incomplete, requires further explanation or clarification, or is inconsistent with other information in the student's record, the Dean of Students, with proper authorization, will contact the treatment provider(s) to obtain additional information. In certain circumstances, the University may require the student to undergo an additional evaluation by an independent and objective professional designated by Stanford, if the Dean of Students believes it will facilitate a more informed decision.

viii. Following these consultations and based on a review of the relevant documentation and information available, the Dean of Students will make a decision as to whether the student should be placed on an involuntary leave of absence, and will provide written notice of this decision to the student. The written notice of decision will include information about the student's right to appeal and to reasonable accommodations during the appeal process. The review and notice of decision under this policy should be done in a reasonably timely manner. Where students have been asked to remain away from the University while the review is underway, every effort will be made by the Dean of Students to reach a decision within one week, provided the student responds in a timely manner to requests for information and, if appropriate, evaluation.

1. If an involuntary leave of absence is imposed. The written notice of decision to the student will set forth the basis for the decision and a time-frame for when the student must leave the University and when they may be eligible to return to the University and the conditions and/or requirements the student will need to satisfy to be eligible for return. The written notice will also inform the student of their right to reasonable accommodations in the return process and will provide contact information for OAE and the Process Resource. The length of the leave will be determined on an individual basis.
2. If an involuntary leave of absence is not imposed. The Dean of Students may impose conditions and/or requirements under which the student is allowed to remain at the University.

ix. Within one week of receiving the decision of the Dean of Students, the student may submit an appeal of the decision in writing to the Vice Provost for Student Affairs or the Vice Provost's designee, who may not be the Dean of Students. The written request for appeal must specify the particular substantive and/or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the decision of the Dean of Students. The review by the Vice Provost for Student Affairs or the Vice Provost's designee will be limited to the following considerations:

1. Were the proper facts and criteria brought to bear on the decision?
2. Is there any new information not previously available to the student that may change the outcome of the decision-making process?
3. Were there any procedural irregularities that materially affected the outcome of the matter to the detriment of the appellant?
4. Given the proper facts, criteria, and procedures, was the decision a reasonable one?

After reviewing the matter fully, the Vice Provost for Student Affairs or the Vice Provost's designee will issue a written decision affirming, modifying, or reversing the decision to place the student on an involuntary leave of absence. The Vice Provost's decision shall be final, and no other appeals or grievance procedures are available.

b. **Implications of an Involuntary Leave of Absence**

i. Student status. Students on a leave of absence generally retain their admitted student status; however, they are not

registered and therefore do not have the rights and privileges of registered students.

ii. Housing. Consistent with Stanford's policies and procedures, students assigned to a University residence are subject to the terms of the University Residence Agreement. However, as set forth on the Registrar's Office Leave of Absence website, students with medical disabilities (including mental health disabilities) that require University medical services may petition to remain in campus housing for one term while on leave. Students who leave the University before the end of a term may be eligible to receive refunds of portions of their housing charges. Eligibility criteria for refunds are set forth in the Residence Agreement which is found on the Residence Agreement website (https://rde.stanford.edu/studenthousing/apply/residence-agreement/). (https://rde.stanford.edu/studenthousing/apply/residence-agreement/)

iii. Effective date(s) of leave. A student must leave the University within the timeframe set forth by the Dean of Students. The leave will remain in effect until (1) it is determined after an individualized assessment that the student is able to return to the University with or without reasonable accommodations and (2) the student has complied with any University requirements applicable to all students returning from a leave and all of the conditions mandated by the Dean of Students and/or the Vice Provost.

iv. Notification. At any time during the leave process, the Dean of Students may notify a

student's parent, guardian, emergency contact, or other individual, consistent with the law, if notification is deemed appropriate.

v. Association with the University while on leave. Unless expressly permitted by the Dean of Students in writing, students on an involuntary leave of absence are not permitted to be present at the University and are not permitted to engage in any University-related activities, including on-campus employment.

vi. Coursework taken while on leave. Consistent with Stanford's policies and procedures, academic credit for work done elsewhere may be allowed towards a Stanford degree. Students should refer to the "Transfer Work (p. 82)" section of the Stanford Bulletin and consult with the Registrar's Office and their department prior to taking any coursework while on an involuntary leave of absence.

vii. SUnet ID privileges. Unless expressly prohibited by the Dean of Students in writing, students on leave generally may retain their SUnet ID privileges, including their Stanford email account.

viii. Transcript notation. Students on a leave of absence will have a notation on their transcript that reads "Leave of Absence."

ix. Tuition and fees. Consistent with Stanford's policies and procedures, students who leave the University before the end of a term may be eligible to receive refunds of portions of their tuition. See the (https://registrar.stanford.edu/students/tuition-and-fees/tuition-refund-schedule/) Registrar's Tuition Refunds (https://registrar.stanford.edu/students/tuition-and-fees/tuition-refund-schedule/) page for a schedule of refunds.

x. Meal Plan. Consistent with Stanford's policies and procedures, a meal plan refund is based on the date when a student moves out of University residence and is approved under conditions as specified in the Residence Agreement. Students with questions about residential meal plan refunds should contact the central office of Stanford Dining.

xi. Visa Status. International students (F-1 and J-1 Visa holders) placed on an involuntary leave of absence must speak with a Bechtel International Center advisor regarding their visa status.

2. **Request for Return**

a. For general requirements applicable to all students returning to Stanford after a leave of absence, undergraduate students should refer to the Returning to Stanford (https://undergrad.stanford.edu/planning/academic-policies/returning-students/) website. Graduate students should consult with their academic department and a Graduate Life Office Dean. In addition to the general requirements all students must meet when returning to Stanford after a leave of absence, as well as any conditions mandated by the Dean of Students and/or the Vice Provost for return from an involuntary leave of absence as outlined below in section II.C, students seeking to return from an involuntary leave of absence for reasons of personal or community health and safety may be required to submit additional documentation related to the factors set forth in section I.A.6 as part of an individualized assessment. OAE will work with the students to provide reasonable accommodations in the return process as necessary.

b. A student must make a written request to the Dean of Students to return to the University. Generally, a student will not be allowed to return until one full quarter has elapsed or until the leave period in the involuntary leave of absence notification has elapsed, and all conditions and/or requirements are met.

c. The Dean of Students may require the student to provide evidence that the student, with or without reasonable accommodations, has sufficiently addressed the issues that previously established the criteria for imposing an involuntary leave of absence as set forth in section I.A.6, above. The Dean of Students may also ask, confer with, or seek information from others to assist in making the determination. The information sought may include:

i. At the student's discretion, documentation of efforts by the student to address the issues that led to the leave

ii. With appropriate authorization, release of academic records to inform treating clinicians

iii. With appropriate authorization, release of treatment information to the extent necessary to determine if the student has sufficiently reduced the risk or disruption that led to the need for the involuntary leave

iv. With appropriate authorization, consultation with Vaden to the extent necessary to determine if the student has sufficiently reduced the risk or disruption that led to the need for the involuntary leave

v. Consultation with OAE

d. All returning students must meet the essential eligibility requirements and any technical standards of the University and, if applicable, the relevant school or department, with or without reasonable accommodations. If the Dean of Students is not satisfied that the student is ready to return to the University, the student will be notified in writing of the decision, including the

reason for the decision, within a reasonable time after the student has submitted a request for return and required documentation.

e. A student not permitted to return may appeal the decision to the Vice Provost for Student Affairs following the procedure in section I.A.9.

3. Scope of the Policy and Relationship to Other University Policies

A leave of absence is an administrative process; it is not a disciplinary process. This policy and these procedures are not intended to be punitive and do not take the place of disciplinary actions that are in response to violations of Stanford's Fundamental Standard or other policies or directives, nor do they preclude the removal or dismissal of students from the University or University-related programs as a result of violations of other University policies or school or departmental protocols. This policy does not limit the University's ability to place enrollment holds on students for reasons beyond the scope of this policy and nothing in this policy relieves a student of any financial obligations to the University that were in place at the time the involuntary leave of absence was imposed.

Nothing in this policy limits the power of the University to take administrative action to ensure the safety of the Stanford community. In exceptional circumstances, where the health or well-being of any person may be seriously affected, or where physical safety is seriously threatened, or where the ability of the University to carry out its essential operations is seriously threatened or impaired, the President or the President's designee, may summarily suspend, dismiss, or bar any person from the University or University-related programs. In all such cases, actions taken will be reviewed promptly, typically within one week, by the appropriate University authority.

In situations involving an imminent or ongoing threat of harm to the student or any other member of the University community, the Dean of Students, in the exercise of his or her reasonable judgment, may require a student to be immediately prohibited from entering Stanford's campus or facilities utilized for University programs or activities while the individualized assessment and review described in section I.A. are taking place. Such students will receive the written notice described in section I.A.2 as quickly as possible.

4. Requests for Reasonable Accommodation

Stanford is committed to providing equal access to all participants in University processes, including students with disabilities. Students with disabilities should contact the Office of Accessible Education (OAE) to request accommodations. Information about the support services OAE provides, types of accommodations offered, and appropriate documentation for accommodations, can be found on the OAE website: https://oae.stanford.edu/.

5. Related Resources

As noted herein, students placed on an involuntary leave of absence may have additional conditions and/or requirements they must meet prior to returning to the University, in addition to any University requirements applicable to all students returning from a leave.

- Undergraduate Students should consult the Returning to Stanford (https://undergrad.stanford.edu/planning/academic-policies/returning-students/) web page for generally applicable deadlines, information and resources.
- Graduate Students should consult with a Graduate Life Office (https://glo.stanford.edu/) Dean and their department for generally applicable deadlines, information and resources.

Students who are placed on an involuntary leave of absence may want to consult with the following offices, where appropriate:

- Office of Accessible Education (https://oae.stanford.edu/) (OAE) (https://oae.stanford.edu/)
- Financial (http://web.stanford.edu/dept/finaid/) Aid (http://web.stanford.edu/dept/finaid/)
- Student Financial (http://web.stanford.edu/group/fms/fingate/students/) Services (http://web.stanford.edu/group/fms/fingate/students/)
- University Housing (http://web.stanford.edu/dept/rde/cgi-bin/drupal/housing/)
- Vaden Health Center (http://vaden.stanford.edu/) (Vaden)
- Academic Advising (https://undergrad.stanford.edu/academic-advising-stanford/)
- Graduate Life (https://glo.stanford.edu/) Office (https://glo.stanford.edu/)
- Bechtel International (https://bechtel.stanford.edu/immigration/visa-types/f-1j-1-student-visas/leave-absence/) Center (https://bechtel.stanford.edu/immigration/visa-types/f-1j-1-student-visas/leave-absence/)

The Process Resource will be available to assist all students who are placed on an involuntary leave of absence with their questions about the process to return and resume their studies and life at Stanford.

Use of the Main Quadrangle and Memorial Court

Policy

The following is quoted from the policy:

The Main Quadrangle and Memorial Court are part of Stanford University's academic preserve due to their locations at the heart of the campus. To protect and enhance their historic status, University policy limits activities primarily to established or traditional ceremonies and events.

To schedule an event, approval must be obtained in advance from the Office of Stanford Events (see below). Unscheduled events, protests, or activities are prohibited.

Requests for waivers to this policy must be submitted in advance and in writing to the Office of Stanford Events. Exceptions may be granted only in extraordinary cases.

Resources

The following is a summary of resources available:

For instructions on use of the Main Quadrangle/Memorial Court, contact the Office of Special Events and Protocol (OSEP) at (650) 724-1387, or at the OSEP (https://osep.stanford.edu/) web site.

Note: White Plaza is made available to Stanford students, faculty, and staff for events other than scheduled "established or traditional ceremonies and events" including those that may involve amplified sound. For further information on the use of such other venues, students should contact Student Activities and Leadership (SAL) at (650) 723-2733, or at the SAL (http://studentaffairs.stanford.edu/sal/) web site. Faculty and staff should contact the Office of Special Events and Protocol (OSEP) (https://osep.stanford.edu/).

Use of the Oval Policy

The Oval is considered to be the initial and official visual entrance to the Stanford University campus. Given this historic and aesthetic status, it is in the best interests of the University community and visiting members

of the public to maintain its open and pristine space, to help preserve its natural beauty and environmental integrity. The Oval also presents the formal academic image of the University, leading directly to departments, classrooms and other academic space, and faculty and graduate student offices, and thus is subject to the University's Noise Policy.

The University prohibits formal or informal events of any kind to take place in the Oval. Gatherings of Stanford students, faculty, and staff such as demonstrations, rallies, or dances may take place in White Plaza, which can be reserved through the Office of Student Activities. Weddings also are not allowed in the Oval but are in certain circumstances allowed in Memorial Church (refer to Memorial Church wedding ceremony guidelines (http://www.stanford.edu/group/religiouslife/servicesWeddings.html)).

The Oval is considered a pedestrian zone and appropriate use of its space includes walking, running, reading, relaxing, and other limited recreational use of the lawn area (such as quiet, very small picnics and Frisbee), unless or until such use damages or otherwise harms the property.

Cooking food or use of any grill/barbecue or open flame is strictly prohibited. Fireworks or the use of other incendiary devices represent a safety hazard to the area and are therefore prohibited. Amplified sound from items such as boom boxes, musical instruments, or the use of bullhorns or amplified speakers is also prohibited. Only authorized Stanford service vehicles are permitted inside the Oval areas.

As the official entrance to the University, the Oval offers public access to general parking spaces in the marked areas surrounding the outer perimeter of the Oval; drivers are expected to obey all traffic signs and limitations. Buses are subject to additional restrictions.

For further information regarding this policy, contact the Executive Director of Special Events and Protocol, (650) 724-1387 or see the Office of Special Events & Protocol (http://osep.stanford.edu/policies/oval.html) web site.

Use of White Memorial Plaza

White Plaza is a Stanford University space available for programs, speeches, rallies, information tables, banners and posters. It is considered a “free speech area” on campus. Students should follow the policy outlined on the Student Activities and Leadership (https://sal.stanford.edu/plan-event/venues/outdoor-spaces/white-memorial-plaza/) web site to engage in student programmatic activity. Due to Stanford's non-profit status, for-profit commercial activity or corporate promotion of any kind is strictly regulated.

White Plaza is in the center of campus, so event planners should take particular care to avoid disruptive impact on classes, business, or events in the surrounding buildings. Events in White Plaza must be organized by University entities (student groups, departments, and programs) and require prior approval from Student Activities and Leadership (SAL) (https://sal.stanford.edu/).

No Camping

Camping (that is, staying outside overnight on University property) is not permitted without University permission. Permission is granted through the Office of the Provost or the Provost’s designee.

Noise and Amplified Sound

Policy

The following is quoted from the policy:

Stanford is not only an academic institution but a residential community as well. It is the responsibility of all faculty, students, and staff to moderate noise especially during an event or activity held on campus. Supporting the mission of the University and respecting those who are studying, researching, or otherwise carrying out academic-related activities is a Stanford priority. The campus must require a conducive atmosphere to ensure these endeavors are accomplished and supported. Disturbing noise in or around a residence or other campus buildings which infringe on the rights of other residents or members of the University community is considered a violation of this policy. As part of the event planning process, the event sponsor must obtain all appropriate approvals regarding the use of amplified sound during an event or activity.

In addition to University policy on noise and amplified sound, the County of Santa Clara also has a county ordinance on sound and all members of the Stanford community and visitors to campus are subject to and must comply with this order. For more information, see the Santa Clara Ordinance Code, Control of Noise and Vibration (https://www.municode.com/library/ca/santa_clara_county/codes/code_of_ordinances/?nodeId=TITBRE_DIVB11ENHE_CHVIIICONOVI) web site.

Resources

Information regarding whether and how the use of amplified sound is permitted is available from the following sources, which must be consulted for prior approval:

1. The Office of Student Activities: phone: 723-2733, or see http://studentaffairs.stanford.edu/sal/policies/noise (http://studentaffairs.stanford.edu/sal/policies/noise/)
2. Registrar's Scheduling Office: email reg-events@stanford.edu, or see http://studentaffairs.stanford.edu/registrar/faculty/events (http://studentaffairs.stanford.edu/registrar/faculty/events/).
3. Office of Special Events and Protocol (OSEP) at (650) 724-1387, or see http://stanfordevents.stanford.edu (http://stanfordevents.stanford.edu/).

Stanford University Online Accessibility Policy

Policy

Stanford University will make Stanford Websites and web-based applications accessible to its students, faculty, staff and participants in the University’s programs and activities who have disabilities. All personnel who are involved in the procurement, preparation and maintenance of University Websites and web-based applications should adopt this goal, with the assistance of campus resources dedicated to supporting web accessibility. Stanford Websites and web-based applications must either conform to WCAG 2.0 Level AA (http://www.w3.org/TR/WCAG20/) or their content and functionality be made available to Users on request (such as by a student request to the Office of Accessible Education) in an equally effective and accessible alternative manner.

Applicability

Stanford's online accessibility policy applies to all Stanford academic and administrative units that create and maintain web sites and web-based applications used in the programs and activities of the University. See the Stanford University Online Accessibility Policy (http://ucomm.stanford.edu/policies/accessibility-policy/) web site for the full policy.

Definitions

Stanford Website

Any website or web-based application within the Stanford University (stanford.edu) domain used in the programs or activities of the University.

Users
Stanford Website users are defined as current Stanford students and applicants for admission, Stanford staff and faculty, and participants in the University's programs and activities.

Accessible
Refers to the concept that people with disabilities are able to independently and timely access and use a product or system, including with the benefit of assistive technologies. Assistive technologies include adaptive hardware and/or software and other devices that are used to increase, maintain, or improve the functional capabilities of individuals with disabilities.

Stanford Online Accessibility Program ("SOAP") Office
The SOAP Office (http://soap.stanford.edu) provides resources and services for Stanford web designers, developers and content creators to assist them in producing accessible materials. Services include Website accessibility testing and guidance regarding universal design and web standards compliance. The SOAP Office is also the campus resource designated to facilitate online accessibility for Users. To report and seek assistance on web accessibility issues, Users may contact the SOAP Office by email at web-accessibility@stanford.edu or submit a HelpSU ticket through the SOAP Office website.

Office of Accessible Education ("OAE")
The Office of Accessible Education (http://oae.stanford.edu) is the campus office designated to work with Stanford students with disabilities. OAE provides support services, accommodations, and programs to remove barriers to full participation of students with disabilities in the programs or activities of the University.

Diversity and Access Office ("D&A")
The Diversity and Access Office (http://diversityandaccess.stanford.edu) oversees compliance with state and federal anti-discrimination laws including the Americans with Disabilities Act and Section 504 of the Rehabilitation Act. D&A provides disability-related access information, and assists faculty, staff and other non-student participants in University programs and activities with disabilities who may need accommodations and/or auxiliary aids to obtain equal access to Stanford facilities, programs and activities. D&A also oversees the ADA/Section 504 Grievance Procedure for students who believe they have been subjected to unlawful discrimination based on a disability or denied access to services or accommodations which the ADA and/or Section 504 require Stanford to provide. Read more about the ADA/Section 504 Grievance Procedure (http://exploredegrees.stanford.edu/nonacademicregulations/nonacademicregulations/ada/).

Accessibility Standard
Stanford University has adopted the Worldwide Web Consortium Web Content Accessibility Guidelines (http://www.w3.org/TR/WCAG20/) version 2.0, Level AA Conformance (WCAG 2.0 Level AA) as its goal for accessible Stanford Websites. The guidelines and success criteria of WCAG 2.0 Level AA are organized around the following four principles which lay the foundation for users with disabilities to access and use web content. For a Stanford Website to be accessible under these principles, its content must be:

1. Perceivable – Information and user interface components must be presentable to users in ways they can perceive.
2. Operable – User interface components and navigation must be operable.
3. Understandable – Information and the operation of user interface must be understandable.
4. Robust – Content must be robust enough that it can be interpreted reliably by a wide variety of user agents, including assistive technologies.

Implementation Guidelines
1. All personnel responsible for existing Stanford Websites must use good faith efforts, subject to the requirements and exceptions of the applicable laws, to bring those Websites into conformance with WCAG 2.0 Level AA.
2. New Stanford Website development and purchases, including development and purchases for major revisions and updates of existing Stanford Websites, should conform to WCAG 2.0 Level AA.
3. Vendors seeking to develop or provide Websites or web-based applications for Stanford are to demonstrate that their products satisfy WCAG 2.0 Level AA Success Criteria, unless undue burden or fundamental alteration can be demonstrated (see below). Preferred standards for demonstrating satisfaction of WCAG 2.0 Level AA Success Criteria, and accessibility language for Stanford Website vendor contracts, as well as for other types of Electronic Information Technology vendor contracts, may be obtained from University Procurement (Purchasing and Payment Services) (http://web.stanford.edu/group/fms/fingate/contact/#procure) or from the SOAP Office (https://soap.stanford.edu).
4. Each Stanford Website should contain "Accessibility" contact information for the site's webmaster and/or the SOAP Office. The contact information may take a variety of forms, such as an email address, a link to a HelpSU page, or a contact form on the site. The recommended location for this information is the Website's "Contact" or "About Us" page.
5. The SOAP Office will continue to test Stanford Websites for accessibility and report accessibility issues to the webmaster for that website.
6. OAE will continue to seek input from Stanford students regarding accessibility issues.
7. Conformance to WCAG 2.0 Level AA guidelines may be an undue burden due to the nature of the content, the purpose of the resource, the lack of accessible solutions, or an unreasonably high administrative or financial cost necessary to make the resource meet that goal. However, these difficulties do not relieve University programs or activities from meeting applicable legal obligations to provide reasonable accommodations to Users in regard to access to the content and services provided on Stanford Websites. Managers of University programs and activities must be prepared to provide content and/or services in a suitable alternative format (e.g., electronic text file or audio description) or manner upon request (such as by a student to the OAE).

Implementation Assistance
Guidelines and best practices are available from the SOAP Office (http://soap.stanford.edu). In addition, on-campus assistance is available for designing and implementing websites that meet accessibility guidelines and for evaluating the accessibility of existing sites and those under development. If such assistance is needed, visit the SOAP web site (http://soap.stanford.edu) or email the SOAP Office at web-accessibility@stanford.edu.

Responding to Accessibility Issues
Recognizing the ongoing evolution of current web content and technologies, the designated webmaster for a particular site, upon being made aware of an accessibility issue on that site, should proceed as follows:

- Acknowledge receipt of the issue in writing (via email) to the User raising the issue, with a copy to the SOAP Office.
- Open an accessibility case for recording the issue and resulting action taken.
- Verify that the issue is an authentic accessibility issue.
- Treat all issues as important. Address any time-sensitive need of the User promptly (generally within a period of no greater than two

business days), unless technology or work involved requires more effort, in which case the User will be promptly notified in writing of expected delivery.

Upon receiving a report of an accessibility issue, the SOAP Office shall notify the site's webmaster, as well as OAE (for reports from students) or D&A (for reports from non-students.) If the SOAP Office, in consultation with the site's webmaster, determines that the information or service provided on the Stanford Website cannot be made accessible, or that doing so would constitute an undue burden or fundamental alteration, OAE or D&A will engage in an interactive process with the User about alternative methods for providing the information or service and will provide an equally effective alternative format or service. In the event that an alternative format or service cannot be provided or the user is not satisfied with the results, he or she may contact the ADA/Section 504 Compliance Officer at D&A by telephone at (650) 723-0755 or by email at equalopportunity@stanford.edu for assistance in resolving the issue.

For questions about the policy, please contact the SOAP Office (https://soap.stanford.edu/about/contact/).

Peer-to-Peer File Sharing

The use of file-sharing networks and software to download and share copyrighted works like software, music, movies, television programs, and books can violate copyright laws. Both the person who makes an illegal copy of a copyrighted work available and the person who receives or downloads an illegal copy have violated the law and Stanford policies. Many file-sharing programs have default settings that share copyrighted files, such as music and movies, through the Internet. Before enabling any of these programs students, faculty, or staff must read the fine print, make sure to understand the program itself, and only use such programs lawfully. Under the Digital Millennium Copyright Act (DMCA), copyright owners are entitled to notify Internet service providers, such as Stanford, that IP addresses linked to the Stanford network are sharing copies of music, movies, or other content without authorization. The law requires the University to respond to such complaints by eliminating access to the infringing materials. Stanford will disconnect students who fail to respond to a DMCA complaint promptly. Furthermore, the University also will suspend or terminate computer access to the Stanford network, including termination of the SUNet ID, to members of the community who continue to violate copyright laws. Finally, the University will take action through the student, employee, or faculty disciplinary processes if necessary. Beyond University consequences, copyright holders may file civil lawsuits against copyright infringers seeking extensive monetary damages. If compelled by a lawful subpoena, Stanford may be required to identify students, faculty, staff, or others who have violated copyright law. For more information about file-sharing, refer to Residential Computing's online resource, File-Sharing and Copyright Law (http://rescomp.stanford.edu/info/dmca/) web site.

Political, Campaign, and Lobbying Activities

For the complete text of the currently applicable version of this policy, see Administrative Guide Memo 1.5.1 Political, Campaign, and Lobbying Activities (https://adminguide.stanford.edu/chapter-1/subchapter-5/policy-1-5-1/).

Summary

The following summarizes the policy on Political, Campaign, and Lobbying Activities:

Stanford University, as a charitable entity, is subject to federal, state, and local laws and regulations regarding political activities: campaign activities, lobbying, and the giving of gifts to public officials.

While all members of the University community are naturally free to express their political opinions and engage in political activities to whatever extent they wish, it is very important that they do so only in their individual capacities and avoid even the appearance that they are speaking or acting for the University in political matters.

In the limited circumstances where individuals must speak or act on behalf of the University in the political arena, they must do so in accordance with the provisions of Administrative Guide Memo 1.5.1 (https://adminguide.stanford.edu/chapter-1/subchapter-5/policy-1-5-1/).

Policy

The following is quoted from the policy:

1. Summary of Legal Requirements and Restrictions

    a. Campaign Activities: Contributions of money, goods, or services to candidates for political office and in support of or opposition to ballot measure campaigns are subject to a wide variety of political laws. Depending on the jurisdiction and the campaign, political contributions may be prohibited or limited and, in nearly all cases, are subject to a complicated series of disclosure rules. Because of the University's tax-exempt status, the University is legally prohibited from endorsing or opposing candidates for political office or making any contribution of money, goods, or services to candidates. It is important, therefore, that no person inadvertently cause the University to make such a contribution.

    b. Lobbying: Lobbying can generally be described as any attempt to influence the action of any legislative body (e.g., Congress, state legislatures, county boards, city councils and their staffs) or any federal, state, or local government agency. Laws regulating lobbying exist at the federal, state, and local levels and can differ widely in scope, depending on the jurisdiction. Some laws, for example, only regulate lobbying of the legislative branch. Others, however, also cover lobbying of administrative agencies and officers in the executive branch (e.g., lobbying for federally-funded grants). To one degree or another, however, most lobbying laws require registration and reporting by individuals engaged in attempts to influence governmental action.

        Tax-exempt organizations are permitted to lobby, and the University engages in lobbying on a limited number of issues, mostly those affecting education, research, and related activities. There is usually some threshold of time or money spent on lobbying that triggers registration and reporting requirements. Regardless of thresholds, however, no University employee —other than the following individuals, on matters under their jurisdiction—may lobby on behalf of the University without specific authorization:

        - President
        - Provost
        - Deans of the Seven Schools
        - Vice Provost and Dean of Research
        - Vice Provost for Graduate Education
        - Vice President for Business Affairs and Chief Financial Officer
        - Vice President of Human Resources
        - Vice President for Land, Buildings and Real Estate
        - Director of the SLAC National Accelerator Laboratory
        - Director of the Hoover Institution
        - General Counsel
        - Vice President for Public Affairs
        - The Vice Provost and Dean of Research may grant permission to faculty members to lobby on behalf of the University for specific purposes. The Vice President for Public Affairs may

grant permission to staff members to lobby on behalf of the University for specific purposes. All lobbying on behalf of the University should be coordinated with the Vice President for Public Affairs. Please see the Federal Lobbying Guidelines for Stanford Faculty and Staff (http://doresearch.stanford.edu/research-scholarship/federal-lobbying-guidelines-stanford-faculty-and-staff/) in the Research Policy Handbook.

c. Giving of Gifts to Public Officials and Staff: Almost all jurisdictions have strict rules on the extent to which gifts and honoraria may be given to public officials (both elected and non-elected officials and, often, staff). In some cases gifts and honoraria are prohibited; in others they are limited; and in most cases they are subject to detailed disclosure. In addition, in some jurisdictions, such as California, gifts to both state and local public officials can result in a public official's disqualification from participation in any governmental action affecting the interests of the donor. Meals, travel, and entertainment are the most common types of gifts, but gift rules can also apply in cases where public officials attend a reception or receive tickets to sporting or other events.

   As a non-profit organization, the University generally does not give gifts to public officials and, in those limited cases where it does give such gifts, it must do so in accordance with all applicable laws and regulations. Therefore, any University employee who, on behalf of the University, wishes to make a gift to a public official must receive prior approval from the Vice President for Public Affairs before making such a gift.

d. Reporting of Political Activities: The University must report most of its political activities above certain thresholds. Therefore, any University employee engaging in such activities on behalf of the University should carefully review the remainder of this Guide Memo and should discuss the relevant activities in advance with the Vice President for Public Affairs.

2. Prohibited and Restricted Political Activities

   a. In General:

      i. No person may, on behalf of the University, engage in any political activity in support of or opposition to any candidate for elective public office (including giving or receiving funds or endorsements), nor shall any University resources be used for such purpose.

      ii. No person may, on behalf of the University, lobby (or use University resources to lobby) any federal, state, or local legislative or administrative official or staff member unless specifically authorized to do so. Any lobbying activity, even when authorized, must be conducted in compliance with this Guide Memo, other applicable University policies, and applicable law.

      iii. No person may, on behalf of the University, give a gift (or use any University resources to give a gift) to any federal, state, or local official or staff member, except in compliance with this Guide Memo, other applicable University policies, and applicable law.

      iv. No person supporting candidates for public office or engaging in other political activities may use University space or facilities or receive University support, except in the limited ways described in section 3.a.

      v. No person may use for lobbying activities federally-funded contract or grant money received by the University..

      Even the foregoing activities that are only restricted, rather than prohibited, may be subject to limitations imposed by law. Therefore, any person engaging in the activity, or contemplating doing so, should consult with the Vice President for Public Affairs.

   b. Guidelines for Avoiding Prohibited Partisan Political Activities: The following guidelines should assist in preventing the involvement or apparent involvement of the University in political activities in support of or opposition to any candidate for elective public office, including both partisan and non-partisan elections. Except in the limited circumstances set forth in section 3.b., below:

      i. Use of Name and Seal: Neither the name nor seal of the University or of any of its schools, departments, or institutions should be used on letters or other materials intended to influence such political elections.

      ii. Use of Address and Telephones: No University office should be used as a return mailing address for such political mailings, and telephone service that is paid by the University, likewise, should not be used for such political purposes. (Obviously, a student's dormitory room and telephone service that are personal to the student may be used for these purposes.)

      iii. Use of Title: The University title of a faculty or staff member or other person should be used only for identification and should be accompanied by a statement that the person is speaking as an individual and not as a representative of the University.

      iv. Use of Services and Equipment: University services, such as Interdepartmental Mail; equipment, such as copy machines, computers, and telephones; and supplies should not be used for such political purposes.

      v. Use of Personnel: No University employee may, as part of his or her job, be asked to perform tasks in any way related to prohibited political purposes.

3. Permissible Political Activities

   a. In General: As noted above, the federal, state, and local laws which limit the partisan political activities that can take place in University facilities and with University support in no way inhibit the expression of personal political views by any individual in the University community. Nor do they forbid faculty, students, or staff from joining with others in support of candidates for office or in furtherance of political causes. There is no restriction on discussion of political issues or teaching of political techniques. Academic endeavors which address public policy issues are in no way prohibited or constrained.

      Because the University encourages freedom of expression, political activities which do not reasonably imply University involvement or identification may be undertaken so long as regular University procedures are followed for use of facilities. Examples of permissible activities are:

      i. Use of areas, such as White Plaza, for tables, speeches, and similar activities.

      ii. Use of auditoriums for speeches by political candidates, but subject to rules of the Internal Revenue Service, the Federal Election Commission, and the California Fair Political Practices Commission, and other applicable laws. Arrangements must be made with University Events & Services. (See also Guide Memo 8.2.1 (https://

adminguide.stanford.edu/8-2-1/): University Events, for more information.)

To reiterate, because tax and political compliance laws impose restrictions, and even prohibitions, on certain political activities and on the use of buildings and equipment at a non-profit institution such as the University, any such activities must be in compliance with these legal requirements.

Individuals taking political positions for themselves or groups with which they are associated, but not as representatives of the University, should clearly indicate, by words and actions, that their positions are not those of the University and are not being taken in an official capacity on behalf of the University.

b. Limited University Political Activities: Limited activities relating to specific federal, state, or local legislation or ballot initiatives are permissible where (1) the subject matter is directly related to core interests of the University's activities; (2) the President has determined that the University should take a position; and (3) the individuals who speak or write on the University's behalf are specifically authorized to do so.

4. Research Involving Political Campaigns: Any Stanford researcher considering doing research involving political campaigns should consult with the General Counsel's Office for any legal restrictions, and should submit the research proposal in advance to Stanford's Institutional Review Board as appropriate under its policies and procedures.

5. Responsibility for Interpretation: The Vice President for Public Affairs, in consultation with the General Counsel, is the administrative officer responsible for interpretation and application of the above guidelines. Questions on whether planned student activities are consistent with the University's obligations should be directed to the Dean of Student Life, who will consult with the Vice President for Public Affairs and/or the General Counsel. All other questions on whether planned activities are consistent with the University's obligations should be addressed directly to the Vice President for Public Affairs or the General Counsel.

Recording Lectures

Except with permission from the Office of Accessible Education (http://studentaffairs.stanford.edu/oae/) or the instructor in question, students may not audio- or video-record lectures. Even with permission, students may only use such recordings for personal use; no posting or further distribution or use is permitted.

Sexual Harassment and Consensual Sexual or Romantic Relationships

For the complete text of the currently applicable version of this policy, see Administrative Guide Memo 2.2.4 Sexual Harassment and Consensual Sexual or Romantic Relationships (https://adminguide.stanford.edu/chapter-2/subchapter-2/policy-2-2-4/). It is also available from the Sexual Harassment Policy Office (http://harass.stanford.edu) homepage.

Summary

Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation. Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.

Policy

The following is quoted from the policy:

1. In General

   a. Applicability and Sanctions for Policy Violations—This policy applies to all students, faculty and staff of Stanford University, as well as to others who participate in Stanford programs and activities. Its application includes Stanford programs and activities both on and off-campus, including overseas programs. Individuals who violate this policy are subject to discipline up to and including discharge, expulsion, and/or other appropriate sanction or action.

   b. Respect for Each Other—Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation. It is expected that students, faculty, staff and other individuals covered by this policy will treat one another with respect.

   c. Prompt Attention—Reports of sexual harassment are taken seriously and will be dealt with promptly. The specific action taken in any particular case depends on the nature and gravity of the conduct reported, and may include intervention, mediation, investigation and the initiation of grievance and disciplinary processes as discussed more fully below. Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.

   d. Confidentiality—The University recognizes that confidentiality is important. Sexual harassment advisers and others responsible to implement this policy will respect the confidentiality and privacy of individuals reporting or accused of sexual harassment to the extent reasonably possible. Examples of situations where confidentiality cannot be maintained include circumstances when the University is required by law to disclose information (such as in response to legal process) and when disclosure is required by the University's outweighing interest in protecting the rights of others.

   e. Protection Against Retaliation—Retaliation and/or reprisals against an individual who in good faith reports or provides information in an investigation about behavior that may violate this policy are against the law and will not be tolerated. Intentionally making a false report or providing false information, however, is grounds for discipline.

   f. Relationship to Freedom of Expression—Stanford is committed to the principles of free inquiry and free expression. Vigorous discussion and debate are fundamental to the University, and this policy is not intended to stifle teaching methods or freedom of expression generally, nor will it be permitted to do so. Sexual harassment, however, is neither legally protected expression nor the proper exercise of academic freedom; it compromises the integrity of the University, its tradition of intellectual freedom and the trust placed in its members.

2. What Is Sexual Harassment?

   Unwelcome sexual advances, requests for sexual favors, and other visual, verbal or physical conduct of a sexual nature constitute sexual harassment when:

   a. It is implicitly or explicitly suggested that submission to or rejection of the conduct will be a factor in academic or employment decisions or evaluations, or permission to participate in a University activity; or

b. The conduct has the purpose or effect of unreasonably interfering with an individual's academic or work performance or creating an intimidating or hostile academic, work or student living environment.

   Determining what constitutes sexual harassment depends upon the specific facts and the context in which the conduct occurs. Sexual harassment may take many forms—subtle and indirect, or blatant and overt. For example,

   i. It may be conduct toward an individual of the opposite sex or the same sex.

   ii. It may occur between peers or between individuals in a hierarchical relationship.

   iii. It may be aimed at coercing an individual to participate in an unwanted sexual relationship or it may have the effect of causing an individual to change behavior or work performance.

   iv. It may consist of repeated actions or may even arise from a single incident if sufficiently egregious.

c. The University's Policy on Sexual Assault (see Guide Memo 23.3, Sexual Assault (http://adminguide.stanford.edu/23_3.pdf)) may also apply when sexual harassment involves physical contact.

3. What To Do About Sexual Harassment

Individuals seeking further information are directed to the following resources:

- The Sexual Harassment Policy Office (Mariposa House, 585 Capistrano Way, Room 208-209, Stanford University, Stanford, CA, 94305-8230; (650) 723-1583; email: harass@stanford.edu for information, consultation, advice, or to lodge a complaint. Note that anonymous inquiries can be made to the SHPO by phone during business hours.
- The Sexual Harassment Policy Office web page at http://harass.stanford.edu (http://harass.stanford.edu/).
- Any designated Sexual Harassment Adviser or resource person listed in 3.a or 5.a.

The following are the primary methods for dealing with sexual harassment at Stanford. They are not required to be followed in any specific order. However, early informal methods are often effective in correcting questionable behavior.

a. Consultation—Consultation about sexual harassment is available from the Sexual Harassment Policy Office, Sexual Harassment Advisers (including residence deans), human resources officers, employee relations specialists, counselors at Counseling and Psychological Services (CAPS) or the Help Center, chaplains at Memorial Church, ombudspersons and others. A current list of Sexual Harassment Advisers is available from the Sexual Harassment Policy Office and at http://harass.stanford.edu/SHadvisers.html. Consultation is available for anyone who wants to discuss issues related to sexual harassment, whether or not "harassment" actually has occurred, and whether the person seeking information is a complainant, a person who believes his or her own actions may be the subject of criticism (even if unwarranted), or a third party.

   Often there is a desire that a consultation be confidential or "off the record." This can usually be achieved when individuals discuss concerns about sexual harassment without identifying the other persons involved, and sometimes even without identifying themselves. Confidential consultations about sexual harassment also may be available from persons who, by law, have special professional status, such as:

   i. Counselors at Counseling and Psychological Services (CAPS), http://caps.stanford.edu (http://caps.stanford.edu/)

   ii. Counselors at the Help Center, http://www.stanford.edu/dept/helpcenter (http://www.stanford.edu/dept/helpcenter/)

   iii. Chaplains at Memorial Church

   iv. The University Ombudsperson, https://ombuds.stanford.edu/

   In these latter cases, the level of confidentiality depends on what legal protections are held by the specific persons receiving the information and should be addressed with them before specific facts are disclosed. For more information see http://harass.stanford.edu/confidential.html.

   For further information on confidentiality, see Section 1(d) above.

b. Direct Communication—An individual may act on concerns about sexual harassment directly, by addressing the other party in person or writing a letter describing the unwelcome behavior and its effect and stating that the behavior must stop. A Sexual Harassment Adviser can help the individual plan what to say or write, and likewise can counsel persons who receive such communications. Reprisals against an individual who in good faith initiates such a communication violate this policy.

c. Third Party Intervention—Depending on the circumstances, third party intervention in the workplace, student residence or academic setting may be attempted. Third party intervenors may be the Sexual Harassment Advisers, human resources professionals, the ombudspersons, other faculty or staff, or sometimes mediators unrelated to the University.

   When third party intervention is used, typically the third party (or third parties) will meet privately with each of the persons involved, try to clarify their perceptions and attempt to develop a mutually acceptable understanding that can insure that the parties are comfortable with their future interactions. Other processes, such as a mediated discussion among the parties or with a supervisor, may also be explored in appropriate cases.

   Possible outcomes of third party intervention include explicit agreements about future conduct, changes in workplace assignments, substitution of one class for another, or other relief, where appropriate.

d. Formal Grievance, Appeal, and Disciplinary Processes—Grievance, appeal, or disciplinary processes may be pursued as applicable.

   i. Grievances and Appeals—The applicable procedure depends on the circumstances and the status of the person bringing the charge and the person against whom the charge is brought. Generally, the process consists of the individual's submission of a written statement, a process of fact-finding or investigation by a University representative, followed by a decision and, in some cases, the possibility of one or more appeals, usually to Stanford administrative officers at higher levels. The relevant procedure (see below) should be read carefully, since the procedures vary considerably.

   If the identified University fact-finder or grievance officer has a conflict of interest, an alternate will be arranged, and the Director of the Sexual Harassment Policy Office or the

Director of Employee and Labor Relations can help assure that this occurs.

In most cases, grievances and appeals must be brought within a specified time after the action complained of. While informal resolution efforts will not automatically extend the time limits for filing a grievance or appeal, in appropriate circumstances the complainant and the other relevant parties may mutually agree in writing to extend the time for filing a grievance or appeal.

A list of the established grievance and appeal procedures is located at http://hrweb.stanford.edu/elr/policies/list_grievance_procedures.html. Copies may also be obtained from the Sexual Harassment Policy Office, http://www.stanford.edu/group/SexHarass (http://studentaffairs.stanford.edu/sara/).

Copies of the following may be obtained from Employee and Labor Relations, 505 Broadway, Redwood City, CA 94063-8443 (Cardinal Hall, 5th floor):

1. "Solving Workplace Problems at Stanford: Understanding the Staff Dispute Resolution Policy".
2. "Solving Workplace Problems at Stanford: Information for Academic Staff – Librarians and Academic Staff – Research Associates".
3. "The Dispute Resolution Process (A User's Guide)".

ii. Disciplinary Procedures—In appropriate cases, disciplinary procedures may be initiated. The applicable disciplinary procedure depends on the status of the individual whose conduct is in question. For example, faculty are subject to the Statement on Faculty Discipline (http://www.stanford.edu/dept/provost/faculty/policies/handbook/ch4.html#statementonfacultydiscipline), and students to the Fundamental Standard. For additional information related to student disciplinary procedures, see the Office of Community Standards (http://studentaffairs.stanford.edu/communitystandards/).

The individuals referenced in this section are available to discuss these options and differing methods for dealing with sexual harassment.

4. Procedural Matters

a. Investigations—If significant facts are contested, an investigation may be undertaken. The investigation will be conducted in a way that respects, to the extent possible, the privacy of all of the persons involved. In appropriate cases, professional investigators may be asked to assist in the investigation. The results of the investigation may be used in the third party intervention process or in a grievance or disciplinary action.

b. Recordkeeping—The Sexual Harassment Policy Office will track reports of sexual harassment for statistical purposes and report at least annually to the University President concerning their number, nature and disposition.

The Sexual Harassment Policy Office may keep confidential records of reports of sexual harassment and the actions taken in response to those reports, and use them for purposes such as to identify individuals or departments likely to benefit from training so that training priorities can be established. No identifying information will be retained in cases where the individual accused was not informed that there was a complaint.

c. Indemnification and Costs—The question sometimes arises as to whether the University will defend and indemnify a Stanford employee accused of sexual harassment. California law provides, in part, "An employer shall indemnify [its] employee for all that the employee necessarily expends or loses in direct consequence of the discharge of his [or her] duties as such." The issue of indemnification depends on the facts and circumstances of each situation. Individuals who violate this policy, however, should be aware that they and/or their schools, institutes, or other units may be required to pay or contribute to any judgments, costs and expenses incurred as a result of behavior that is wrongful and/or contrary to the discharge of the employee's duties. In general, see Administrative Guide Memo 2.4.6 Indemnification (https://adminguide.stanford.edu/chapter-2/subchapter-4/policy-2-4-6/).

5. Resources for Dealing with Sexual Harassment

a. Advice—Persons who have concerns about sexual harassment should contact the Sexual Harassment Policy Office, any Sexual Harassment Adviser at http://harass.stanford.edu/SHadvisers.html or one of the other individuals listed below. Reports should be made as soon as possible: the earlier the report, the easier it is to investigate and take appropriate remedial action. When reports are long delayed, the University will try to act to the extent it is reasonable to do so, but it may be impossible to achieve a satisfactory result after much time has passed.

Likewise, anyone who receives a report or a grievance involving sexual harassment should promptly consult with the Sexual Harassment Policy Office or with a Sexual Harassment Adviser.

There are a number of individuals specially trained and charged with specific responsibilities in the area of sexual harassment. In brief, they are:

i. Sexual Harassment Advisers (http://harass.stanford.edu/SHadvisers.html) serve as resources to individuals who wish to discuss issues of sexual harassment, either because they have been harassed or because they want information about the University's policy and procedures. There is usually at least one Adviser assigned to each of the schools at the University and to each large work unit; most of the residence deans also have been appointed as Sexual Harassment Advisers. Advisers are also authorized to receive complaints.

ii. The Director of the Sexual Harassment Policy Office is responsible for the implementation of this policy. The Director's Office also provides advice and consultation to individuals when requested; receives complaints and coordinates their handling; supervises the other Advisers; encourages and assists prevention education for students, faculty and staff; keeps records showing the disposition of complaints; and generally coordinates matters arising under this policy. Because education and awareness are the best ways to prevent sexual harassment; developing awareness, education and training programs and publishing informational material are among the most important functions of the Sexual Harassment Policy Office (http://harass.stanford.edu (http://harass.stanford.edu/)).

iii. As stated above, individuals with concerns about sexual harassment may also discuss their concerns informally with psychological counselors (for example through CAPS or the HELP Center), chaplains (through the Memorial Chapel), or the University ombudsperson. For more information, see http://harass.stanford.edu/resources.html.

b. External Reporting—Sexual harassment is prohibited by state and federal law. In addition to the internal resources described above,

individuals may pursue complaints directly with the government agencies that deal with unlawful harassment and discrimination claims, e.g., the U.S. Equal Employment Opportunity Commission (EEOC), the Office for Civil Rights (OCR) of the U.S. Department of Education, and the State of California Department of Fair Employment and Housing (DFEH). These agencies are listed in the Government section of the telephone book. A violation of this policy may exist even where the conduct in question does not violate the law.

6. Consensual Sexual or Romantic Relationships

   a. In General—There are special risks in any sexual or romantic relationship between individuals in inherently unequal positions, and parties in such a relationship assume those risks. In the University context, such positions include (but are not limited to) teacher and student, supervisor and employee, senior faculty and junior faculty, mentor and trainee, adviser and advisee, teaching assistant and student, coach and athlete, and the individuals who supervise the day-to-day student living environment and student residents. Because of the potential for conflict of interest, exploitation, favoritism, and bias, such relationships may undermine the real or perceived integrity of the supervision and evaluation provided, and the trust inherent particularly in the teacher-student context. They may, moreover, be less consensual than the individual whose position confers power or authority believes. The relationship is likely to be perceived in different ways by each of the parties to it, especially in retrospect.

      Moreover, such relationships may harm or injure others in the academic or work environment. Relationships in which one party is in a position to review the work or influence the career of the other may provide grounds for complaint by third parties when that relationship gives undue access or advantage, restricts opportunities, or creates a perception of these problems. Furthermore, circumstances may change, and conduct that was previously welcome may become unwelcome. Even when both parties have consented at the outset to a romantic involvement, this past consent does not remove grounds for a charge based upon subsequent unwelcome conduct.

      Where such a relationship exists, the person in the position of greater authority or power will bear the primary burden of accountability, and must ensure that he or she—and this is particularly important for teachers—does not exercise any supervisory or evaluative function over the other person in the relationship. Where such recusal is required, the recusing party must also notify his or her supervisor, department chair or dean, so that such chair, dean or supervisor can exercise his or her responsibility to evaluate the adequacy of the alternative supervisory or evaluative arrangements to be put in place. Staff members may notify their local human resources officers. To reiterate, the responsibility for recusal and notification rests with the person in the position of greater authority or power. Failure to comply with these recusal and notification requirements is a violation of this policy, and therefore grounds for discipline. The University has the option to take any action necessary to insure compliance with the spirit of this recusal policy, including transferring either or both employees in order to minimize disruption of the work group. In those extraordinarily rare situations where it is programmatically infeasible to provide alternative supervision or evaluation, the cognizant Dean or Director must approve all evaluative and compensation actions.

   b. With Students—At a university, the role of the teacher is multi-faceted, including serving as intellectual guide, counselor, mentor and adviser; the teacher's influence and authority extend far beyond the classroom. Consequently and as a general proposition, the University believes that a sexual or romantic relationship between a teacher and a student, even where consensual and whether or not the student would otherwise be subject to supervision or evaluation by the teacher, is inconsistent with the proper role of the teacher, and should be avoided. The University therefore very strongly discourages such relationships.

7. Policy Review and Evaluation—This policy went into effect on October 6, 1993, and was amended on November 30, 1995, and on May 30, 2002. It is subject to periodic review, and any comments or suggestions should be forwarded to the Director of the Sexual Harassment Policy Office.

Resources

The following is a summary of resources concerning sexual harassment available to members of the Stanford Community:

A brochure containing the policy, a list of current sexual harassment advisers, confidential resources, and other helpful information is available online at the Sexual Harassment Policy Office (http://harass.stanford.edu) web site, and in printed form from the Sexual Harassment Policy Office at Mariposa House, 585 Capistrano Way, Room 208-209, Stanford University, Stanford, CA, 94305-8230; (650) 723-1583; email: harass@stanford.edu. Copies of the University policy on sexual assault, which complements this sexual harassment policy, as well as all other documents mentioned in this section, are also available at the Sexual Harassment Policy Office.

All faculty, staff, and students who have questions regarding this policy and its enforcement can consult with a Sexual Harassment Adviser or can be directed to the local Personnel Officer or Regional Human Resources Manager. Faculty members should contact their dean or department chair, and students should contact the Director of the Sexual Harassment Policy Office or the Dean of Student Affairs.

Sexual Harassment Policy Office—telephone: (650) 723-1583; email: harass@stanford.edu.

Director: Laraine Zappert (Clinical Professor, Psychiatry and Behavioral Sciences)

Sexual Misconduct and Sexual Assault

The University's Policy on Sexual Misconduct and Sexual Assault is published in complete form in the Administrative Guide Memo 2.2.4 Sexual Harassment and Consensual Sexual or Romantic Relationships (https://adminguide.stanford.edu/chapter-2/subchapter-2/policy-2-2-4/).

Summary

The following summarizes the policy on Sexual Assault and provides information on resources available to members of the Stanford community.

Policy

Under Title IX, sexual violence (sexual misconduct and sexual assault) is a severe form of sexual harassment. Sexual misconduct and sexual assault are unacceptable and is not tolerated at Stanford University. All University employees (including student residence staff employees) have a duty to report claims of sexual misconduct or sexual assault to Cathy Glaze., Title IX Coordinator at (650) 497-4955 (voice), titleix@stanford.edu (http://relative.pagelegend.com/mailto:titleix@stanford.edu), https://titleix.stanford.edu/. For students, report claims to the Title IX Coordinator or the Office of Sexual Assault and Relationship Abuse (SARA) at (650) 725-1056 or saraoffice@stanford.edu.

The University urges an individual who has been subjected to sexual misconduct or sexual assault to make an official report. A report of the

matter will be dealt with promptly. Confidentiality will be maintained to the extent possible.

The University is committed to providing information regarding on- and off-campus services and resources to all parties involved.

Students, faculty and staff found to be in violation of this policy will be subject to discipline up to and including termination, expulsion or other appropriate institutional sanctions; affiliates and program participants may be removed from University programs and/or prevented from returning to campus.

A comprehensive web site dedicated to sexual violence awareness, prevention and support can be found at Office of Sexual Assault & Relationship Abuse Education & Response (SARA) (http://studentaffairs.stanford.edu/sara/). The site contains a list of resources and describes reporting options.

Definitions

What is Sexual Misconduct?

Sexual misconduct is the commission of an unwanted sexual act, whether by an acquaintance or by a stranger, that occurs without indication of consent.

What is Sexual Assault?

Sexual assault is the actual, attempted or threatened unwanted sexual act, whether by an acquaintance or by a stranger, accomplished (1) against a person's will by means of force (express or implied), violence, duress, menace, fear or fraud, or (2) when a person is incapacitated or unaware of the nature of the act, due to unconsciousness, sleep and/or intoxicating substances.

What is Consent?

Consent is informed, freely given, and mutually understood. Consent requires an affirmative act or statement by each participant. If coercion, intimidation, threats and/or physical force are used, there is no consent. If a person is mentally or physically incapacitated or impaired so that the person cannot understand the fact, nature or extent of the sexual situation, there is no consent; this includes conditions due to alcohol or drug consumption or being asleep or unconscious. Whether one has taken advantage of a position of influence over another may be a factor in determining consent.

Notification

With the consent of the victim, allegations of sexual assault received by University offices or personnel shall be communicated promptly to the Department of Public Safety, 711 Serra Street, telephone 9-911 for emergency response or (650) 723-9633 during normal business hours.

Emergency Services Available to Victims

Victims of sexual assault are urged to seek immediate attention from emergency police, medical, and counseling services. On the Stanford campus and in the immediate vicinity, the following provide 24-hour response and will arrange for police assistance, medical assistance, emotional support services, and advocacy and support:

- "911" Emergency Network: dial 9-911 from University phones or 911 from outside phones
- Santa Clara Valley Medical Center, 751 South Bascom Avenue, San Jose, telephone (408) 885-5000
- YWCA Stanford Hotline, for students, telephone (650) 725-9955
- Stanford Hospital and Clinics, 300 Pasteur Drive, Stanford, telephone (650) 723-5111
- Residence and Graduate Life Deans, page through 723-8222, extension 25085

Non-Emergency Resources

Office of Sexual Assault & Relationship Abuse Education & Response (SARA) (725-1056) provides comprehensive and consistent response to incidents of sexual and relationship violence to the campus community. SARA provides case consultation to students and staff, case management for reported assaults and information and referrals to services on and off campus. The office also assists with educational outreach and training to increase awareness, sensitivity, and community accountability in the prevention of these acts. Online information is available at the Sexual Assault & Relationship Abuse Education & Response (SARA) (http://studentaffairs.stanford.edu/sara.html) web site.

Additional resources for students are available at Vaden Health Service at (650) 723-3785, including short-term counseling, referral to long-term therapy, follow-up pregnancy testing, and testing and treatment for sexually transmitted diseases. Additional services for faculty and staff are available at the University's HELP Center, Galvez House (723-4577), including general counseling, information, support, and referral. The University ombuds (723-3682) is available to all in the Stanford community for general counseling, advice, and advocacy. Cathy Glaze, Title IX Coordinator, Kingscote Gardens (2nd floor), 419 Lagunita Drive, Stanford, CA 94305, (650) 497-4955 (voice), (650) 497-9257 (fax), titleix@stanford.edu (http://relative.pagelegend.com/mailto:titleix@stanford.edu), https://titleix.stanford.edu/, is available to assist students to address the effects of sexual harassment and sexual violence

Confidentiality of Information

The University will make reasonable and appropriate efforts to preserve an individual's privacy and protect the confidentiality of information. However, because of laws relating to reporting and other state and federal laws, the University cannot guarantee confidentiality to those who report incidents of sexual violence except where those reports are privileged communications with those in legally protected roles (set forth below). The professional being consulted should, if possible, make these limits clear before any disclosure of facts.

An individual can speak confidentially with certain individuals in legally protected roles. They include sexual assault counselors such as those at the YWCA Sexual Assault Center at Stanford, the Help Center, Counseling and Psychological Services (CAPS) and clergy. Exceptions to maintaining confidentiality are set by law; for example, physicians and nurses who treat any physical injury sustained during a sexual assault are required to report it to law enforcement. In addition, physicians, nurses, psychologists, psychiatrists, teachers and social workers must report a sexual assault committed against a person under age 18.

Information shared with other individuals is not legally protected from being disclosed. Considerations with respect to a complainant's request for confidentiality include factors such as the University's ability to respond effectively, to prevent further harassment or to ensure the safety of the University community. For example, an advisor, the Dean of Student Life, a Residence Dean or a Resident Assistant may need to inform other individuals to protect their safety or rights, in fairness to the persons involved, or in response to legal requirements. As required by law, all disclosures to any University employee of an on-campus sexual assault must be reported for statistical purposes only (without personal identifiers) to the Stanford University Department of Public Safety, which has the responsibility for tabulating and annually publishing sexual assault and other crime statistics. Such reports are for statistical purposes and do not include individual identities.

State law permits law enforcement authorities to keep confidential the identity of a person officially reporting a sexual assault. The Stanford University Department of Public Safety policy is to maintain such

confidentiality. However, if the District Attorney files a criminal charge, confidentiality might not be maintained.

If a complaint is filed with the Office of Judicial Affairs then the accused student must be provided with the name of the alleged victim and witnesses, if applicable. However, accommodations can be made to protect the victim's privacy, as described on the website for the Office of Judicial Affairs.

Information about Options

The University offices responding to allegations of sexual misconduct or sexual assault will inform affected individuals, at a minimum, of the options of: criminal prosecution, civil prosecution, the disciplinary process, the appropriate Title IX grievance procedure, alternative housing assignments, and academic assistance alternatives.

Smoke-Free Environment

The University's policy on a smoke-free environment is published in its complete form in the Administrative Guide Memo 2.2.6 Smoke-Free Environment (https://adminguide.stanford.edu/chapter-2/subchapter-2/policy-2-2-6/).

Applicability

Applies to all academic and administrative units of Stanford University, including SLAC and all campus student housing. This policy does not supersede more restrictive policies that may be in force to comply with federal, state, or local laws or ordinances. The President must approve more restrictive policies not required by law.

1. Policy

It is the policy of Stanford University that all smoking, including but not limited to tobacco products and the use of electronic smoking devices, is prohibited in enclosed buildings and facilities and during indoor or outdoor events on the campus.

2. Definition

"Smoke-free" refers to an environment that is free of smoke from, among other things, tobacco products and/or vapors from electronic smoking devices.

3. Guidelines

a. Smoking-Prohibited Areas

Specifically, smoking is prohibited in classrooms and offices, all enclosed buildings and facilities, in covered walkways, in University vehicles, during indoor or outdoor athletic events, during other University sponsored or designated indoor or outdoor events and in outdoor areas designated by signage as "smoking prohibited" areas.

- Ashtrays will not be provided in any enclosed University building or facility.
- "Smoking Prohibited" signs will be posted.

b. Outdoor Smoking Areas

Except where otherwise posted as a "smoking prohibited area," smoking is generally permitted in outdoor areas, except during organized events. Outdoor smoking in non-prohibited areas must be at least 30 feet away from doorways, open windows, covered walkways, and ventilation systems to prevent smoke from entering enclosed buildings and facilities. To accommodate faculty, staff, and students who smoke, Vice Presidents, Vice Provosts, and Deans may designate certain areas of existing courtyards and patios as smoking areas, and must provide ashtrays. The specific academic or administrative unit(s) will be responsible for absorbing all costs associated with providing designated smoking areas and ashtrays.

4. Enforcement

This policy relies on the consideration and cooperation of smokers and non-smokers. It is the responsibility of all members of the University community to observe and follow this policy and its guidelines.

a. Smoking Cessation Information

Smoking cessation programs are available for faculty and staff through the Center for Research in Disease Prevention, Health Improvement Program (HIP). Students may contact the Health Promotion Program (HPP) through the Student Health Center for smoking cessation information or programs.

b. Repeated Violations

Faculty, staff and, students repeatedly violating this policy may be subject to appropriate action to correct any violation(s) and prevent future occurrences.

5. Implementation and Distribution

This policy will be disseminated to all faculty, staff and students and to all new members of the University Community.

Ownership and Use of Stanford Name and Trademarks

Stanford registered marks, as well as other names, seals, logos, and other symbols and marks that are representative of Stanford, may be used solely with permission of Stanford. Merchandise bearing Stanford's names and marks, such as t-shirts, glassware, and notebooks, must be licensed. For complete text of the currently applicable policy, including the University officers authorized to grant permission to use the Stanford name and marks, see Administrative Guide Memo 1.5.4 Ownership and Use of Stanford Name and Trademarks (https://adminguide.stanford.edu/chapter-1/subchapter-5/policy-1-5-4/).

Student Alcohol Policy

This document clarifies the University's expectations and approach related to the use of alcohol by students. The University's Controlled Substances and Alcohol Policy is also applicable. The full text is contained in the Controlled Substance and Alcohol (http://adminguide.stanford.edu/23_6.pdf) policy.

Preamble

The Fundamental Standard (https://communitystandards.stanford.edu/student-conduct-process/honor-code-and-fundamental-standard/#fundamental-standard) has set the standard of conduct for students at Stanford since 1896. It states: "Students at Stanford are expected to show both within and without the University such respect for order, morality, personal honor and the rights of others as is demanded of good citizens." Implicit in the Standard is the understanding that students are responsible for making their own decisions and accepting the consequences of those decisions.

The University is committed to the health, safety and well-being of each member of the Stanford community. In order to further student learning, development and success and to promote the University's academic mission, Stanford fosters an environment of personal and collective responsibility and respectful citizenship. This means that all members of the university community—students, faculty and staff—have a role in safeguarding a healthy learning environment free of the consequences of alcohol misuse. The University also strives to create a culture that supports students who do not use alcohol and students who use alcohol in a safe, legal and responsible fashion.

Legal Background

Members of the Stanford community are expected to abide by all federal, state and local laws, including those governing alcohol consumption and distribution. Under California law, it is illegal for anyone under the age of 21 to purchase alcohol or to possess alcohol in a public space. It is also illegal for anyone to furnish alcohol to an individual under the age of 21. Other state laws governing the use of alcohol are listed below.

While it is not the responsibility of most Stanford officials to enforce state law, it is the responsibility of the University's Department of Public Safety (http://police.stanford.edu/), and accordingly they enforce all state alcohol laws when they encounter violations. All community members should understand the law and, as individuals, ensure that they themselves do not violate it.

In addition, it is the responsibility of all community members to ensure that the University does not, through their actions, violate the law. Accordingly, official University functions, including events held by registered student groups, are not allowed to provide alcohol to those under 21, and no University funds may be used to purchase alcohol for that purpose. Violations of this requirement can result in both criminal prosecution and University administrative action, including dismissal from the University.

Responsible Alcohol Use

Stanford students are expected to behave responsibly, both in the classroom and outside, both on campus and off. In particular, the University does not tolerate reckless drinking—lawful or unlawful—and its consequent harmful behaviors. The University is especially concerned about the misuse of distilled alcohol products ("hard alcohol"), and the dangers that arise from that misuse.

All students should understand the physical and behavioral effects of alcohol misuse, and should avoid such misuse themselves. In addition, they are expected to do their part to ensure the safety of fellow students whom they perceive to be engaged in reckless drinking behavior or to be suffering from its consequences.

The University provides educational resources to assure that students understand the effects of alcohol misuse and know how to respond when they perceive others to be engaged in dangerous behavior.

Reckless drinking and encouraging reckless drinking are violations of University policy, and may be subject to disciplinary action. Extreme or repeated violations may result in dismissal from the University.

More generally, students are expected to make healthy, responsible choices concerning their personal use of alcohol and the University supports them in this endeavor through education and other resources. The University sponsors activities and programs focused on students who choose not to drink or to drink lightly, as well as resources and services to assist students who need help for themselves or others related to alcohol use.

Authority, Application, and Enforcement

Responsibility for application of the Student Alcohol Policy resides with the Vice Provost for Student Affairs (https://studentaffairs.stanford.edu/). The Office of Alcohol Policy and Education reports to the Vice Provost for Student Affairs and is expected to coordinate and implement alcohol programs.(The University's Controlled Substances and Alcohol Policy is also applicable. The full text is contained at the Controlled Substances and Alcohol web site (https://adminguide.stanford.edu/chapter-2/subchapter-2/policy-2-2-8/).

The Stanford University Department of Public Safety enforces federal, state and local laws among students, other community members, guests, and visitors.

Alcohol Policy Violations

The Office of Alcohol Policy and Education will work with the following offices to address violations of the University's alcohol policy as determined by the specifics of each situation.

- The Office of Residential Education (http://studentaffairs.stanford.edu/resed/) for undergraduate students, residential groups, fraternities and sororities
- Graduate Life Office (GLO) (http://glo.stanford.edu/) for graduate students
- Student Activities and Leadership (SAL) (http://studentaffairs.stanford.edu/sal/) for voluntary student organizations
- Department of Athletics, Physical Education and Recreation (DAPER) (http://www.gostanford.com/school-bio/stan-administration.html) for student athletes and athletic groups
- Such other offices as are appropriate under particular circumstances

Violations may be referred to the Office of Community Standards (https://communitystandards.stanford.edu/) (for individual students) and the Organization Conduct Board (https://studentaffairs.stanford.edu/policies/organization-conduct-board-ocb/) (for student groups). The Dean of Students (https://studentaffairs.stanford.edu/who-we-are/dean-students/) may take action as well in certain circumstances.

Getting Help: Resources Available to Students

Students have access to a variety of University resources (http://alcohol.stanford.edu/resources.html).

Additional University Regulations

- Students living in University residences sign a residence agreement (https://rde.stanford.edu/studenthousing/apply/residence-agreement/)that outlines housing policies and expectations for conduct. Violations of the residence agreement can lead to loss of housing (https://resed.stanford.edu/residence-deans/residence-dean-resources/interim-policy-housing-hold-review-process/).
- *Hard alcohol and parties*—All parties must be registered with the University, and availability of alcohol is regulated by party planning guidelines (https://alcohol.stanford.edu/party-planning/party-planning/) coordinated by the Office of Alcohol Policy and Education. Distilled liquor/spirits/hard alcohol (alcohol by volume 20 percent and above; 40 proof) is prohibited at all categories of undergraduate student parties. Beer, wine and packaged pre-mixed alcoholic beverages (e.g. wine coolers, pre-mixed cocktail drinks under 20% alcohol by volume, etc.) are the only alcoholic beverages that can be present at all on-campus undergraduate student parties. Any group or residence that includes undergraduate members is subject to this policy restriction. Groups and residences that are 100 percent graduate student in membership are exempt and may have hard alcohol in the form of mixed drinks at registered "Members" parties. Shots of hard alcohol are prohibited at all parties.
- *Distilled/hard alcohol container policy*—The following restriction goes beyond state law requirements and for the avoidance of doubt this policy applies to all coterminal and undergraduate students living in undergraduate housing: Distilled liquor/spirits/hard alcohol (alcohol by volume 20 percent and above; 40 proof) bottles, containers, etc. 750 mL and above are prohibited in undergraduate student residences (rooms, common spaces, etc.) and in the possession of undergraduate students in university public spaces. Failure to comply will result in referral to a Residence Dean and the Office of Alcohol Policy & Education for administrative actions. Continued or concerning behavior may result in removal from university housing or referral to the Office of Community Standards. Distilled liquor/spirits/hard alcohol in bottles, containers, etc. smaller than 750 mL that are

allowed under this policy for people 21 years of age or older, must be contained and stored in the original bottle, container, etc. in which it was purchased from a licensed establishment.

- *Frosh Housing*—Alcoholic beverages are prohibited at all-frosh house events in common area spaces.
- *University Funds and the Purchase of Alcohol*—No University funds or funds collected by the University may be used in a way that violates the alcohol policy. In undergraduate residences, house funds (funds collected by Student Financial Services or other University offices) may not be used to buy alcohol. Any decision to use student-collected funds to buy alcohol must be made lawfully, thoughtfully, fairly and in a way that respects the views of all students. Students must not be required to contribute to the purchase of alcohol.
- *Dining Halls*—Students may not possess or consume alcoholic beverages in Stanford Dining Halls during meal times and food service. University Dining staff can deny admission, access or meal service to anyone who is believed to be intoxicated by the Dining Management staff.
- White Plaza *(*https://sal.stanford.edu/plan-event/venues/outdoor-spaces/white-memorial-plaza/*)*—Alcoholic beverages in White Plaza are prohibited.
- *End of Quarter Period and Finals Week* - No registered parties (with or without alcohol) can occur during the End of the Quarter Period (dead week) or Finals Week.
- *Athletic Facilities* —No alcohol is permitted inside Stanford athletic facilities public spaces during athletic events.
- Stanford Conferences and University Facilities *(*https://rde.stanford.edu/studenthousing/common-space-use-policies/*)*—The University requires that event sponsors and student groups wishing to offer alcoholic beverages at their programs and events operate within state and local laws as provided by the Department of Alcohol and Beverage Control (ABC). Alcohol service is not allowed in classrooms.
- *Admit Weekend*—Stanford students are prohibited from providing, serving or in anyway making alcohol available to any prospective frosh (ProFro). All student groups/organizations and residences may host only alcohol-free parties or events during Admit Weekend. This specifically means that no alcohol is to be present, served or consumed at any student group/organization and/or dorm function during Admit Weekend.
- *New Student Orientation (NSO) Period*—At no time should any Stanford student provide, serve, or in any way make alcohol available to any new, incoming undergraduate student (frosh or transfer). All undergraduate student groups/organizations and residences may host only alcohol-free parties or events during Orientation. This specifically means that no alcohol is to be present, served, or consumed at any student group/organization and/or dorm function for the duration of NSO programming.

California State Laws

Students should be familiar with California laws governing the consumption of alcohol. The following summarizes those laws most relevant to individuals.

- It is illegal for persons under the age of 21 to possess an alcoholic beverage in any public place or any place open to the public (CA Business and Professions Code 25662).
- Any person who furnishes gives or sells any alcoholic beverage to someone under the age of 21 is guilty of a misdemeanor (CA Business and Professions Code 25658(a)).
- Any person under the age of 21 who attempts to purchase an alcoholic beverage is guilty of an infraction (CA Business and Professions Code 25658.5).
- Any person under the influence of alcohol in a public place and unable to exercise care for one's own safety or that of others is guilty of a misdemeanor (CA Penal Code 647(f)).
- It is illegal for persons to operate a motor vehicle while under the influence of alcohol or other intoxicants or with a blood alcohol level of .08% or higher (CA Vehicle Code Section 23152). Note: A golf cart is a motor vehicle.
- It is unlawful for a person under the age of 21 years who has 0.05 percent or more, by weight, of alcohol in his or her blood to drive a vehicle (CA Vehicle Code Section 23140(a)).
- It is illegal for a person under the age of 21 to drive a vehicle when he or she has a blood alcohol concentration (BAC) of .01% or higher (CA Vehicle Code Section 23136).
- It is a misdemeanor to ride a bicycle under the influence of alcohol, drugs, or both (CA Vehicle Code Section 21200.5).
- It is an infraction to possess an open container of an alcoholic beverage while in a motor vehicle (CA Vehicle Code Section 23223).
- It is an infraction for an owner or driver of a motor vehicle to allow an open container of alcohol in the passenger area (CA Vehicle Code Section 23225).

Student Non-Academic Grievance Procedure

Policy

The following is the policy:

1. Applicability

   a. It is perhaps inevitable in any university that some students may at times feel improperly treated, and that concerns about unfairness (including potential discrimination and harassment) may also at times arise.

      In this regard (and although this grievance procedure is not limited to concerns of discrimination), Stanford University's Nondiscrimination Policy provides in part: "Stanford University admits qualified students of any race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity, veteran status, or marital status to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, in the administration of the University's programs and activities, Stanford prohibits unlawful discrimination on the basis of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity or expression, veteran status, marital status or any other characteristic protected by applicable law; Stanford also prohibits unlawful harassment including sexual harassment and sexual violence."

   b. At Stanford, there are a number of grievance procedures through which students can raise and seek redress for what they believe to be unfair, improper or discriminatory decisions, actions, or treatment. For example:

      i. If the matter involves an academic decision, the Student Academic Grievance Procedure may be the applicable procedure.
      ii. If the matter involves a disability-related concern, the Student ADA/Section 504 Grievance Procedure may be applicable.
      iii. If the matter involves a student-athlete and his or her sport, the Student-Athlete Grievance Procedure may be applicable.

   c. The purpose of the Student Non-Academic Grievance Procedure is to provide a process for students to seek resolution of disputes and grievances that may not fall within the scope of one of the

other grievance processes, including those which may arise in a student's capacity as a student-employee.

d. As a general proposition, this procedure is available to undergraduates and graduate students at Stanford University. It is designed to address individual decisions or individual actions that affect the grievant personally in his or her capacity as a student, but it does not apply to matters proceeding or addressed through the Office of Community Standards or through the Dean's leave policy. This is likewise not a grievance procedure to address the concerns of student groups. Similarly and as a general proposition, dissatisfaction with a departmental, school, or University policy or practice of broad or general application is not grounds for a grievance under this procedure; the Director of the Diversity and Access Office (hereafter "the Director") may, in his or her discretion, entertain such a grievance in exceptional circumstances, such as where (for example) the policy or practice is alleged to be contrary to law. In the same way, the Director may entertain a grievance under this procedure brought by an individual who is not an undergraduate or graduate student, in an appropriate case or as required by law.

e. The Director is responsible for administering this Student Non-Academic Grievance Procedure.

   i. The Director may be contacted at: Director of the Diversity and Access Office, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (http://relative.pagelegend.com/mailto:equal.opportunity@stanford.edu) (email), http://www.stanford.edu/dept/ocr (http://www.stanford.edu/dept/ocr/).

   ii. The Director in his or her sole discretion can decide whether to refer a grievance brought under this procedure to another grievance process. In cases involving allegations of sexual harassment in particular, the Director may wish to consult with the Director of the Sexual Harassment Policy Office as to the most appropriate way to proceed; see Section 5.d below. In cases involving student employment, the Director may wish to consult with the University's Department of Human Resources.

2. Informal Resolution

   a. As a general proposition (and although particular circumstances may warrant an exception), the student should first discuss the problem and seek a solution with the individual(s) most directly involved.

   b. If no resolution results (or if circumstances make discussion inappropriate with the person most directly involved), the student should then consult with the individual at the next (higher) administrative level in the department, school, residence or University administrative unit. Serious efforts should be made to resolve the issue locally at an informal level without resort to a formal grievance; such efforts may continue even after the formal process is underway.

3. Formal Grievance

   a. If informal means of resolution prove inadequate, the student should set forth in writing the substance of the complaint, the grounds for it and the evidence on which it is based, and the efforts taken to date to resolve the matter. It is at this stage that the complaint becomes a formal grievance.

   b. The grievance document should be submitted to the Director. A grievance should be filed in a timely fashion, i.e., normally no later than thirty days after of the end of the academic quarter in which the action that is the subject of the grievance occurred. Except in extraordinary circumstances, delay in filing a grievance will be grounds for rejection of that grievance.

   c. The Director will promptly initiate a review, which should normally be completed within sixty days. The Director may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance officer or other designee, who will look into and/or address the matter as the Director directs. The Director may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.

   d. In undertaking this review, either the Director, his or her designee, or the grievance officer may request a response to the issues raised in the grievance from any individuals believed to have information the reviewer considers relevant, including faculty, staff and students.

   e. The Director (or his or her designee) will issue his or her decision in writing, and take steps to initiate such corrective action as is called for (if any). Conduct meriting discipline will be brought to the attention of the appropriate disciplinary process.

4. Appeal

   a. If the student is dissatisfied with the disposition by the Director (or his or her designee), he or she may appeal to the Provost (Office of the President and Provost, Building 10, Stanford, CA 94305-2061; phone 650-725-4075; fax 650-725-1347). The appeal should be filed in writing with the Provost within ten days of the issuance of the decision by the Director (or his or her designee); a delay in filing the appeal may be grounds for rejection of that appeal.

   b. The Provost may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance appeal officer, who will review the matter at the Provost's direction. The Provost may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.

   c. The Provost should normally complete his or her review of the appeal and issue his or her decision in writing within forty-five days. That decision is final.

5. General Provisions

   a. Time Guidelines—The time frames set forth herein are guidelines. They may be extended by the Director or Provost, as applicable, in his or her discretion for good cause (including for reasons relating to breaks in the academic calendar), and will nearly always be extended during summers and the winter closure.

   b. Advisers—A student initiating or participating in a grievance under this procedure may be accompanied by an adviser in any discussion with the Director, the Provost or their designees, or a grievance or grievance appeal officer under this procedure; any adviser must be a current Stanford faculty, staff member or student.

   c. Ombuds—Students should be aware that the University Ombuds (http://www.stanford.edu/dept/ocr/ombuds (http://www.stanford.edu/dept/ocr/ombuds/)) is available to discuss and advise on any matters of University concern and frequently help expedite resolution of such matters. Although it has no decision making authority, the Ombuds' Office has wide powers of inquiry.

d. Sexual Harassment and Sexual Misconduct and Sexual Assault—For information and resources concerning sexual harassment, students should refer to the web page of the Sexual Harassment Policy Office at http://harass.stanford.edu (http://harass.stanford.edu/). For information and resources concerning sexual assault and relationship abuse, students should refer to the web page of the Sexual Violence Advisory Board at http://www.stanford.edu/group/svab/help.shtml (http://www.stanford.edu/group/svab/help.shtml/).

e. No retaliation—Stanford University prohibits retaliation or reprisals against individuals based on their pursuit in good faith of a grievance under this procedure, or their participation in good faith in the grievance process.

f. Standards for Review—If the grievance involves a decision that is being challenged, the review by the Director, as well as the review by the Provost on appeal, usually will be limited to the following considerations:

   i. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?
   ii. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?
   iii. Given the proper facts, criteria, and procedures, was the decision one which a person in the position of the decision maker might reasonably have made?

Title VI of the Civil Rights Act of 1964

It is the policy of Stanford University to comply with Title VI of the Civil Rights Act of 1964 and its regulations, which prohibit unlawful discrimination on the basis of race, color, and national origin. The Title VI Compliance Officer is the Director of the Diversity and Access Office, who has been appointed to coordinate the University's efforts to comply with the law. Anyone who believes that Stanford is not in compliance with Title VI and its regulations should contact the Director of the Diversity and Access Office, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (http://relative.pagelegend.com/mailto:equal.opportunity@stanford.edu) (email). Grievance procedures to address complaints of discrimination on the basis of race, color, and national origin are set forth in the "Student Non-Academic Grievance Procedure (p.)." See also Administrative Guide Memo 2.2.1 General Personnel Policies (https://adminguide.stanford.edu/chapter-2/subchapter-2/policy-2-2-1/).

Title IX of the Education Amendments of 1972

It is the policy of Stanford University to comply with Title IX of the Education Amendment of 1972 and its regulations, which prohibit unlawful discrimination on the basis of sex. The Title IX Compliance Officer is Catherine Glaze, who has been appointed to coordinate the University's efforts to comply with the law. Anyone who believes that Stanford is not in compliance with Title IX and its regulations should contact the Title IX Coordinator, Kingscote Gardens (2nd floor), 419 Lagunita Drive, Stanford, CA 94305, (650) 497-4955 (voice), (650) 497-9257 (fax), titleix@stanford.edu (email). (See also the following section for addressing Title IX Concerns relating to sexual harassment.)

Title IX Concerns Relating to Sexual Harassment and the Violence Against Women Reauthorization Act of 2013

Catherine Glaze has been appointed Stanford's Title IX Coordinator to respond to matters of sexual assault, relationship (dating) violence and stalking (prohibited conduct). The Title IX Coordinator serves as a resource to review allegations of prohibited conduct and may provide interim accommodations relating to housing, academics, or no-contact letters while a matter is being reviewed. When prohibited conduct has been confirmed by a preponderance of the evidence, the Title IX Coordinator will provide long term accommodations and services to students to address the effects of sexual harassment and sexual violence. The Title IX Student Policy (https://titleix.stanford.edu/sites/default/files/title_ix_student_policy_ay_2013-14_faculty_staff_may_2014_final_0.pdf) provides the grievance procedure and appeal mechanism to review the University's actions relating to a Title IX concern involving Prohibited Conduct; see the Title IX web site (https://titleix.stanford.edu/) for additional information. Additional resources are available the Sexual Assault Support and Resources (https://notalone.stanford.edu/) web site. Ms. Glaze's contact information is titleix@stanford.edu; (650) 497-4955. An individual may contact the U.S. Department of Education, Office for Civil Rights (OCR). See also Administrative Guide Memos 2.1.2 Recruiting and Hiring of Regular Staff (https://adminguide.stanford.edu/chapter-2/subchapter-1/policy-2-1-2/), 1.7.1 Sexual Harassment (https://adminguide.stanford.edu/chapter-1/subchapter-7/policy-1-7-1/), 1.7.2, Consensual Sexual or Romantic Relationships (https://adminguide.stanford.edu/chapter-1/subchapter-7/policy-1-7-2/), and 1.7.3, Sexual Misconduct and Sexual Assault (https://adminguide.stanford.edu/chapter-1/subchapter-7/policy-1-7-3/).

Visitor Policy/University Statement on Privacy

Stanford University has an interest in ensuring that the privacy of its students, faculty, and staff is respected, and that no activities interfere with education, research, or residential life.

The University is private property; however, some areas of the campus typically are open to visitors. These areas include White Plaza, public eating areas (such as those at Tresidder Union), outdoor touring areas, and locations to which the public has been invited by advertised notice (such as for public educational, cultural, or athletic events). Even in these locations, visitors must not interfere with the privacy of students, faculty, and staff, or with educational, research, and residential activities. The University may revoke at any time permission to be present in these, or any other areas. Visitors should not be in academic or residential areas unless they have been invited for appropriate business or social purposes by the responsible faculty member, student, or staff member.

No commercial activity, including taking photos or similar audio or visual recordings that are sold to others or otherwise used for commercial purposes, may occur on the campus or in University programs without the University's permission. Requests for permission should be submitted to the Director of University Communications or, as appropriate, the Dean of Students, the Department of Athletics, or the Office of Public Events. Recognized student groups and official units of the University will be granted such permission so long as they do not violate privacy or property interests of others; so long as any sale of their products is predominantly on campus to students, faculty, and staff; and so long as they comply with applicable University policies and procedures.

Violators of this policy may be subject to criminal and/or civil liability, as well as University disciplinary action.

NONDISCIMINATION POLICY

Nondiscrimination Policy

Stanford University admits qualified students of any race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity, veteran status, or marital status to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, in the administration of the University's programs and activities, Stanford prohibits unlawful discrimination on the basis of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity or expression, veteran status, marital status or any other characteristic protected by applicable law; Stanford also prohibits unlawful harassment including sexual harassment and sexual violence.

This policy applies to Stanford programs and activities both on and off-campus, including overseas programs.

The following person has been designated to handle inquiries regarding this nondiscrimination policy: Stanford's Director of the Diversity and Access Office, Rosa Gonzalez, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email). Stanford's Title IX Coordinator, Catherine Glaze, has been designated to handle inquiries regarding sexual harassment and sexual violence: Kingscote Gardens (2nd floor), 419 Lagunita Drive, Stanford, CA 94305, (650) 497-4955 (voice), (650) 497-9257 (fax), titleix@stanford.edu (email).

Individuals may also file complaints directly with the Office for Civil Rights, within the United States Department of Education, by following the information on this website: https://www2.ed.gov/about/offices/list/ocr/complaintintro.html.

ALCOHOL POLICY

Student Alcohol Policy

This document clarifies the University's expectations and approach related to the use of alcohol by students. The University's Controlled Substances and Alcohol Policy is also applicable. The full text is contained in the Controlled Substance and Alcohol (http://adminguide.stanford.edu/23_6.pdf) policy.

Preamble

The Fundamental Standard (https://communitystandards.stanford.edu/student-conduct-process/honor-code-and-fundamental-standard/#fundamental-standard) has set the standard of conduct for students at Stanford since 1896. It states: "Students at Stanford are expected to show both within and without the University such respect for order, morality, personal honor and the rights of others as is demanded of good citizens." Implicit in the Standard is the understanding that students are responsible for making their own decisions and accepting the consequences of those decisions.

The University is committed to the health, safety and well-being of each member of the Stanford community. In order to further student learning, development and success and to promote the University's academic mission, Stanford fosters an environment of personal and collective responsibility and respectful citizenship. This means that all members of the university community—students, faculty and staff—have a role in safeguarding a healthy learning environment free of the consequences of alcohol misuse. The University also strives to create a culture that supports students who do not use alcohol and students who use alcohol in a safe, legal and responsible fashion.

Legal Background

Members of the Stanford community are expected to abide by all federal, state and local laws, including those governing alcohol consumption and distribution. Under California law, it is illegal for anyone under the age of 21 to purchase alcohol or to possess alcohol in a public space. It is also illegal for anyone to furnish alcohol to an individual under the age of 21. Other state laws governing the use of alcohol are listed below.

While it is not the responsibility of most Stanford officials to enforce state law, it is the responsibility of the University's Department of Public Safety (http://police.stanford.edu/), and accordingly they enforce all state alcohol laws when they encounter violations. All community members should understand the law and, as individuals, ensure that they themselves do not violate it.

In addition, it is the responsibility of all community members to ensure that the University does not, through their actions, violate the law. Accordingly, official University functions, including events held by registered student groups, are not allowed to provide alcohol to those under 21, and no University funds may be used to purchase alcohol for that purpose. Violations of this requirement can result in both criminal prosecution and University administrative action, including dismissal from the University.

Responsible Alcohol Use

Stanford students are expected to behave responsibly, both in the classroom and outside, both on campus and off. In particular, the University does not tolerate reckless drinking—lawful or unlawful—and its consequent harmful behaviors. The University is especially concerned about the misuse of distilled alcohol products ("hard alcohol"), and the dangers that arise from that misuse.

All students should understand the physical and behavioral effects of alcohol misuse, and should avoid such misuse themselves. In addition, they are expected to do their part to ensure the safety of fellow students whom they perceive to be engaged in reckless drinking behavior or to be suffering from its consequences.

The University provides educational resources to assure that students understand the effects of alcohol misuse and know how to respond when they perceive others to be engaged in dangerous behavior.

Reckless drinking and encouraging reckless drinking are violations of University policy, and may be subject to disciplinary action. Extreme or repeated violations may result in dismissal from the University.

More generally, students are expected to make healthy, responsible choices concerning their personal use of alcohol and the University supports them in this endeavor through education and other resources. The University sponsors activities and programs focused on students who choose not to drink or to drink lightly, as well as resources and services to assist students who need help for themselves or others related to alcohol use.

Authority, Application, and Enforcement

Responsibility for application of the Student Alcohol Policy resides with the Vice Provost for Student Affairs (https://studentaffairs.stanford.edu/). The Office of Alcohol Policy and Education reports to the Vice Provost for Student Affairs and is expected to coordinate and implement alcohol programs.(The University's Controlled Substances and Alcohol Policy is also applicable. The full text is contained at the Controlled Substances and Alcohol web site (https://adminguide.stanford.edu/chapter-2/subchapter-2/policy-2-2-8/).

The Stanford University Department of Public Safety enforces federal, state and local laws among students, other community members, guests, and visitors.

Alcohol Policy Violations

The Office of Alcohol Policy and Education will work with the following offices to address violations of the University's alcohol policy as determined by the specifics of each situation.

- The Office of Residential Education (http://studentaffairs.stanford.edu/resed/) for undergraduate students, residential groups, fraternities and sororities
- Graduate Life Office (GLO) (http://glo.stanford.edu/) for graduate students
- Student Activities and Leadership (SAL) (http://studentaffairs.stanford.edu/sal/) for voluntary student organizations
- Department of Athletics, Physical Education and Recreation (DAPER) (http://www.gostanford.com/school-bio/stan-administration.html) for student athletes and athletic groups
- Such other offices as are appropriate under particular circumstances

Violations may be referred to the Office of Community Standards (https://communitystandards.stanford.edu/) (for individual students) and the Organization Conduct Board (https://studentaffairs.stanford.edu/policies/organization-conduct-board-ocb/) (for student groups). The Dean of Students (https://studentaffairs.stanford.edu/who-we-are/dean-students/) may take action as well in certain circumstances.

Getting Help: Resources Available to Students

Students have access to a variety of University resources (http://alcohol.stanford.edu/resources.html).

Additional University Regulations

- Students living in University residences sign a residence agreement (https://rde.stanford.edu/studenthousing/apply/residence-

agreement/)that outlines housing policies and expectations for conduct. Violations of the residence agreement can lead to loss of housing (https://resed.stanford.edu/residence-deans/residence-dean-resources/interim-policy-housing-hold-review-process/).

- *Hard alcohol and parties*—All parties must be registered with the University, and availability of alcohol is regulated by party planning guidelines (https://alcohol.stanford.edu/party-planning/party-planning/) coordinated by the Office of Alcohol Policy and Education. Distilled liquor/spirits/hard alcohol (alcohol by volume 20 percent and above; 40 proof) is prohibited at all categories of undergraduate student parties. Beer, wine and packaged pre-mixed alcoholic beverages (e.g. wine coolers, pre-mixed cocktail drinks under 20% alcohol by volume, etc.) are the only alcoholic beverages that can be present at all on-campus undergraduate student parties. Any group or residence that includes undergraduate members is subject to this policy restriction. Groups and residences that are 100 percent graduate student in membership are exempt and may have hard alcohol in the form of mixed drinks at registered "Members" parties. Shots of hard alcohol are prohibited at all parties.
- *Distilled/hard alcohol container policy*—The following restriction goes beyond state law requirements and for the avoidance of doubt this policy applies to all coterminal and undergraduate students living in undergraduate housing: Distilled liquor/spirits/hard alcohol (alcohol by volume 20 percent and above; 40 proof) bottles, containers, etc. 750 mL and above are prohibited in undergraduate student residences (rooms, common spaces, etc.) and in the possession of undergraduate students in university public spaces. Failure to comply will result in referral to a Residence Dean and the Office of Alcohol Policy & Education for administrative actions. Continued or concerning behavior may result in removal from university housing or referral to the Office of Community Standards. Distilled liquor/spirits/hard alcohol in bottles, containers, etc. smaller than 750 mL that are allowed under this policy for people 21 years of age or older, must be contained and stored in the original bottle, container, etc. in which it was purchased from a licensed establishment.
- *Frosh Housing*—Alcoholic beverages are prohibited at all-frosh house events in common area spaces.
- *University Funds and the Purchase of Alcohol*—No University funds or funds collected by the University may be used in a way that violates the alcohol policy. In undergraduate residences, house funds (funds collected by Student Financial Services or other University offices) may not be used to buy alcohol. Any decision to use student-collected funds to buy alcohol must be made lawfully, thoughtfully, fairly and in a way that respects the views of all students. Students must not be required to contribute to the purchase of alcohol.
- *Dining Halls*—Students may not possess or consume alcoholic beverages in Stanford Dining Halls during meal times and food service. University Dining staff can deny admission, access or meal service to anyone who is believed to be intoxicated by the Dining Management staff.
- White Plaza *(*https://sal.stanford.edu/plan-event/venues/outdoor-spaces/white-memorial-plaza/*)*—Alcoholic beverages in White Plaza are prohibited.
- *End of Quarter Period and Finals Week* - No registered parties (with or without alcohol) can occur during the End of the Quarter Period (dead week) or Finals Week.
- *Athletic Facilities* —No alcohol is permitted inside Stanford athletic facilities public spaces during athletic events.
- Stanford Conferences and University Facilities *(*https://rde.stanford.edu/studenthousing/common-space-use-policies/*)*—The University requires that event sponsors and student groups wishing to offer alcoholic beverages at their programs and events operate within state and local laws as provided by the Department of Alcohol and Beverage Control (ABC). Alcohol service is not allowed in classrooms.
- *Admit Weekend*—Stanford students are prohibited from providing, serving or in anyway making alcohol available to any prospective frosh (ProFro). All student groups/organizations and residences may host only alcohol-free parties or events during Admit Weekend. This specifically means that no alcohol is to be present, served or consumed at any student group/organization and/or dorm function during Admit Weekend.
- *New Student Orientation (NSO) Period*—At no time should any Stanford student provide, serve, or in any way make alcohol available to any new, incoming undergraduate student (frosh or transfer). All undergraduate student groups/organizations and residences may host only alcohol-free parties or events during Orientation. This specifically means that no alcohol is to be present, served, or consumed at any student group/organization and/or dorm function for the duration of NSO programming.

California State Laws

Students should be familiar with California laws governing the consumption of alcohol. The following summarizes those laws most relevant to individuals.

- It is illegal for persons under the age of 21 to possess an alcoholic beverage in any public place or any place open to the public (CA Business and Professions Code 25662).
- Any person who furnishes gives or sells any alcoholic beverage to someone under the age of 21 is guilty of a misdemeanor (CA Business and Professions Code 25658(a)).
- Any person under the age of 21 who attempts to purchase an alcoholic beverage is guilty of an infraction (CA Business and Professions Code 25658.5).
- Any person under the influence of alcohol in a public place and unable to exercise care for one's own safety or that of others is guilty of a misdemeanor (CA Penal Code 647(f)).
- It is illegal for persons to operate a motor vehicle while under the influence of alcohol or other intoxicants or with a blood alcohol level of .08% or higher (CA Vehicle Code Section 23152). Note: A golf cart is a motor vehicle.
- It is unlawful for a person under the age of 21 years who has 0.05 percent or more, by weight, of alcohol in his or her blood to drive a vehicle (CA Vehicle Code Section 23140(a)).
- It is illegal for a person under the age of 21 to drive a vehicle when he or she has a blood alcohol concentration (BAC) of .01% or higher (CA Vehicle Code Section 23136).
- It is a misdemeanor to ride a bicycle under the influence of alcohol, drugs, or both (CA Vehicle Code Section 21200.5).
- It is an infraction to possess an open container of an alcoholic beverage while in a motor vehicle (CA Vehicle Code Section 23223).
- It is an infraction for an owner or driver of a motor vehicle to allow an open container of alcohol in the passenger area (CA Vehicle Code Section 23225).

AGE DISCRIMINATION ACT OF 1975

Age Discrimination Act of 1975

The following is the policy:

1. Policy

   It is the policy of Stanford University to comply with the Age Discrimination Act of 1975 and its regulations, which prohibit unlawful discrimination on the basis of age. The Age Discrimination Act Compliance Officer is the Director of the Diversity and Access Office ("the Director"), who has been appointed to coordinate the University's efforts to comply with the law. Anyone who believes that Stanford is not in compliance with the Age Discrimination Act and its regulations ("the Act") should contact the Director at the Diversity and Access Office, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (http://relative.pagelegend.com/mailto:equal.opportunity@stanford.edu) (email).

2. Grievance Procedure

   a. An individual who believes that Stanford is not acting in compliance with the Act and who wishes to file a grievance should set forth in writing the substance of his or her complaint, the grounds for it and the evidence on which it is based, and the efforts (if any) taken to date to resolve the matter. It is at this stage that the complaint becomes a formal grievance.

   b. The grievance document should be submitted to the Director. A grievance should be filed in a timely fashion, i.e., normally no later than thirty days after the end of the academic quarter in which the action that is the subject of the grievance occurred. Except in extraordinary circumstances, delay in filing a grievance will be grounds for rejection of that grievance.

   c. The Director will promptly initiate a review, which should normally be completed within sixty days. The Director may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance officer or other designee, who will look into and/or address the matter as the Director directs. The Director may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.

   d. In undertaking this review, either the Director, his or her designee, or the grievance officer may request a response to the issues raised in the grievance from any individuals believed to have information the reviewer considers relevant, including faculty, staff and students.

   e. The Director (or his or her designee) will issue his or her decision in writing, and take steps to initiate such corrective action as is called for (if any).

3. Appeal

   a. If the grievant is dissatisfied with the disposition by the Director (or his or her designee), he or she may appeal to the Provost (Office of the President and Provost, Building 10, Stanford, CA 94305-2061; phone 650-725-4075; fax 650-725-1347). The appeal should be filed in writing with the Provost within ten days of the issuance of the decision by the Director (or his or her designee); a delay in filing the appeal may be grounds for rejection of that appeal.

   b. The Provost may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance appeal officer, who will review the matter at the Provost's direction. The Provost may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.

   c. The Provost should normally complete his or her review of the appeal and issue his or her decision in writing within forty-five days. That decision is final.

4. General Provisions

   a. Time Guidelines—The time frames set forth herein are guidelines. They may be extended by the Director or Provost, as applicable, in his or her discretion for good cause (including for reasons relating to breaks in the academic calendar), and will nearly always be extended during summers and the winter closure.

   b. No Retaliation—Stanford University prohibits retaliation or reprisals against individuals based on their pursuit in good faith of a grievance under this procedure, or their participation in good faith in the grievance process.

   c. Standards for Review—If the grievance involves a decision that is being challenged, the review by the Director, as well as the review by the Provost on appeal, usually will be limited to the following considerations:

      i. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?

      ii. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?

      iii. Given the proper facts, criteria, and procedures, was the decision one which a person in the position of the decision maker might reasonably have made?

AMERICANS WITH DISABILITIES ACT (ADA)

ADA (Americans with Disabilities Act)/ Section 504 Grievance Procedure (Student)

For information more generally concerning policies and procedures for students with disabilities, see the Diversity & Access Office (http://www.stanford.edu/dept/diversityaccess/) web site, or the ADA/Section 504 Compliance Officer, Diversity and Access Office, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (http://relative.pagelegend.com/mailto:equal.opportunity@stanford.edu) (email); see also the Office for Accessible Education (OAE) (http://studentaffairs.stanford.edu/oae/) web site.

Policy

The following is the policy:

I. Policy

Stanford University, in compliance with state and federal laws and regulations, including the Americans with Disabilities Act of 1990 (ADA; as amended 2008) and Section 504 of the Rehabilitation Act of 1973 (Section 504), does not discriminate on the basis of disability in administration of its education-related programs and activities, and has an institutional commitment to provide equal educational opportunities for disabled students who are otherwise qualified.

Students who believe they have been subjected to unlawful discrimination on the basis of disability, or have been denied access to services or accommodations required by law, have the right to use this grievance procedure.

II. Applicability

As a general proposition, the grievance procedure set forth below is applicable to undergraduate and graduate students of the University. In general, it is designed to address disputes concerning the following:

1. Disagreements regarding a requested service, accommodation, or modification of a University practice or requirement;
2. Inaccessibility of a program or activity;
3. Harassment or discrimination on the basis of disability;
4. Violation of privacy in the context of disability.

As a general proposition, this grievance procedure supplants the Student Academic Grievance Procedure (p. 96) and the Student Non-Academic Grievance Procedure (p.) (both of which are set forth in this bulletin) for disability-related grievances. Questions of applicability will be decided by the Director of the Diversity and Access Office.

III. Compliance Officers

Stanford University's Compliance Officers are responsible for administering this grievance procedure as well as ensuring compliance with applicable laws. The Director of the Diversity and Access Office is the designated ADA / Section 504 Compliance Officer. That office is located in Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (http://relative.pagelegend.com/mailto:equal.opportunity@stanford.edu) (email).

Additional Compliance Officers may be designated from time to time by the Provost from those faculty and staff members knowledgeable concerning disability issues and the legal mandates of state and federal disability statutes.

IV. Informal Resolution

Prior to initiating the formal complaint procedure set forth below, the student should, in general, first discuss the matter orally or in writing with the individual(s) most directly responsible. If no resolution results, or if direct contact is inappropriate under the circumstances, the student should then consult with the Compliance Officer at the Diversity and Access Office who will attempt to facilitate a resolution. (The informal resolution process may involve consultation with the Associate Vice Provost for Student and Academic Services and University Registrar.)

If the Compliance Officer is not successful in quickly achieving a satisfactory resolution (that is, generally within seven calendar days), the Compliance Officer will inform the student of his or her efforts and the student's right to file a formal complaint.

V. Formal Complaint

If the procedure set forth above for informal resolution does not yield a successful resolution, then the student may file a formal complaint in the following manner:

1. When to File Complaint: Complaints must be filed as soon as possible, but in no event later than 10 days after the end of the quarter in which the concern arose.
2. What to File: A complaint must be in writing and include the following:
   a. The grievant's name, address, email address and phone number;
   b. A full description of the problem;
   c. A description of what efforts have been made to resolve the issue informally;
   d. A statement of the remedy requested.
3. Where to File Complaint: the complaint is to be filed with the Compliance Officer at the Diversity and Access Office, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (http://relative.pagelegend.com/mailto:equal.opportunity@stanford.edu) (email).
4. Notice of Receipt: upon receipt of the complaint, the Compliance Officer reviews the complaint for timeliness and appropriateness for this grievance procedure, and provides the grievant with written notice acknowledging its receipt.
5. Investigation: the Compliance Officer will promptly initiate an investigation and may refer the matter (or any part of it) to a grievance officer or other designee, who will look into and/or address the matter as the Compliance Officer directs. In undertaking the investigation, the Compliance Officer or grievance officer may interview, consult with, and/or request a written response to the issues raised in the grievance from any individual the grievance officer believes to have relevant information, including faculty, staff, and students.
6. Representation: the grievant and the party against whom the grievance is directed each have the right to have a representative. The party shall indicate whether he or she is to be assisted by a representative and, if so, the name of that representative. For purposes of this procedure, an attorney is not an appropriate representative.
7. Findings and Notification: upon completion of the investigation, the grievance officer will prepare and transmit to the student, and to the party against whom the grievance is directed, a final report containing a summary of the investigation, written findings, and a proposed disposition. This transmission will be expected within 60 calendar days of the filing of the formal complaint. The deadline may be extended by the Compliance Officer for good cause (including for reasons relating to breaks in the academic calendar), and will nearly always be extended during summers and the winter closure. The final report may also be provided, where appropriate, to any

University officer whose authority will be needed to carry out the proposed disposition or to determine whether any personnel action is appropriate.

8. Final Disposition: the disposition proposed by the Compliance Officer will be put into effect promptly. The grievant or any party against whom the grievance or the proposed disposition is directed may appeal. The appeal to the Provost (as set forth below) will not suspend the implementation of the disposition proposed by the grievance officer, except in those circumstances where the Provost decides that good cause exists making the suspension of implementation appropriate.

VI. Urgent Matters

Whenever the application of any of the time deadlines or procedures set forth in this grievance procedure creates a problem due to the nature of the complaint, the urgency of the matter, or the proximity of the upcoming event, the Compliance Officer will, at the request of the grievant, determine whether an appropriate expedited procedure can be fashioned.

VII. Remedies

Possible remedies under this grievance procedure include corrective steps, actions to reverse the effects of discrimination or to end harassment, and measures to provide a reasonable accommodation or proper ongoing treatment. As stated above, a copy of the Compliance Officer's report may, where appropriate, be sent to University officer(s) to determine whether any personnel action should be pursued.

VIII. Appeal

Within ten calendar days of the issuance of the final report, the grievant or the party against whom the grievance is directed may appeal to the Provost the grievance officer's determination.

An appeal is taken by filing a written request for review with the Compliance Officer at the Diversity and Access Office, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (http://relative.pagelegend.com/mailto:equal.opportunity@stanford.edu) (email).

The written request for review must specify the particular substantive and/or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the proposed disposition. Furthermore, the appeal must be directed only to issues raised in the formal complaint as filed or to procedural errors in the conduct of the grievance procedure itself, and not to new issues.

The Compliance Officer will forward the appeal to the Provost, and also provide copies to the other party or parties. If the grievance involves a decision that is being challenged, the review by the Provost or his or her designee usually will be limited to the following considerations:

1. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?
2. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?
3. Given the proper facts, criteria, and procedures, was the decision a reasonable one?

A copy of the Provost's written decision will be expected within 30 calendar days of the filing of the appeal and will be sent to the parties, the Compliance Officer and, if appropriate, to the University officer whose authority will be needed to carry out the disposition. The deadline may be extended by the Provost for good cause (including for reasons relating to breaks in the academic calendar), and will nearly always be extended during summers and the winter closure. The decision of the Provost on the appeal is final.

CAMPUS DISRUPTIONS

Policy on Campus Disruptions

The Policy on Campus Disruptions was promulgated in 1967, and states that:

Policy

Because the rights of free speech and peaceable assembly are fundamental to the democratic process, Stanford firmly supports the rights of all members of the University community to express their views or to protest against actions and opinions with which they disagree.

All members of the University also share a concurrent obligation to maintain on the campus an atmosphere conducive to scholarly pursuits, to preserve the dignity and seriousness of University ceremonies and public exercises, and to respect the rights of all individuals.

The following regulations are intended to reconcile these objectives.

It is a violation of University policy for a member of the faculty, staff, or student body to:

1. Prevent or disrupt the effective carrying out of a University function or approved activity, such as lectures, meetings, interviews, ceremonies, the conduct of University business in a University office, and public events.

2. Obstruct the legitimate movement of any person about the campus or in any University building or facility.

Members of the faculty, staff, and student body have an obligation to leave a University building or facility when asked to do so in the furtherance of the above regulations by a member of the University community acting in an official role and identifying himself or herself as such; members of the faculty, staff, and student body also have an obligation to identify themselves when requested to do so by such a member of the University community who has reasonable grounds to believe that the person(s) has violated section (1) or (2) of this policy and who has so informed the person(s).

The policy has been applied to the following actions: refusal to leave a building which has been declared closed; obstructing the passage into or out of buildings by sitting in front of doorways; preventing University employees from entering their workplace; preventing members of a class from hearing a lecture or taking an examination, or preventing the instructor from giving a lecture, by means of shouts, interruptions, or chants; refusing to leave a closed meeting when unauthorized to attend; and intruding upon or refusing to leave a private interview.

It should be understood that while the above are examples of extraordinarily disruptive behavior, the application of the Policy also takes situational factors into consideration. Thus, for example, conduct appropriate at a political rally might constitute a violation of the Policy on Campus Disruptions if it occurred within a classroom.

There is no "ordinary" penalty which attaches to violations of the Policy on Campus Disruptions. In the past, infractions have led to penalties ranging from censure to expulsion. In each case, the gravity of the offense and prior conduct of the student are considered; however, the more serious the offense, the less it matters that a student has otherwise not done wrong.

CAMPUS SAFETY AND CRIMINAL STATISTICS

Campus Safety and Criminal Statistics

Stanford University complies with the Jeanne Clery Disclosure of Campus Security Policy and Crime Statistics Act. A copy of Stanford's policies and statistics under this act are posted on the Department of Public Safety (https://police.stanford.edu/security-report.html) web site. A paper copy can be obtained by calling the Stanford Department of Public Safety at (650) 723-9633.

COMPUTER AND NETWORK POLICY

Computer and Network Usage

For a complete text of the currently applicable version of this policy, see Administrative Guide Memo 6.2.1 Computer and Network Usage Policy (https://adminguide.stanford.edu/chapter-6/subchapter-2/policy-6-2-1/).

Policy

The following is quoted from the policy:

Users of Stanford network and computer resources have a responsibility not to abuse the network and resources. This policy provides guidelines for the appropriate and inappropriate use of information technologies.

Summary

The following summarizes the policy on Computer and Network Usage:

In particular, the policy provides that users of University information resources must respect software copyrights and licenses, respect the integrity of computer-based information resources, refrain from seeking to gain or permitting others to gain unauthorized access, including by sharing passwords, and respect the rights of other computer users.

This policy covers appropriate use of computers, networks, and information contained therein. As to political, personal and commercial use, the University is a non-profit, tax-exempt organization and, as such, is subject to specific federal, state, and local laws regarding sources of income, political activities, use of property, and similar matters. It also is a contractor with government and other entities, and thus must assure proper use of property under its control and allocation of overhead and similar costs. For these reasons, University information resources must not be used for partisan political activities where prohibited by federal, state, or other applicable laws, and may be used for other political activities only when in compliance with federal, state, and other laws, and in compliance with applicable University policies. Similarly, University information resources should not be used for personal activities not related to appropriate University functions, except in a purely incidental manner. In addition, University information resources should not be used for commercial purposes, except in a purely incidental manner or except as permitted under other written policies of the University or with the written approval of a University officer having the authority to give such approval. Any such commercial use should be properly related to University activities, take into account proper cost allocations for government and other overhead determinations, and provide for appropriate reimbursement to the University for taxes and other costs the University may incur by reason of the commercial use. Users also are reminded that the .edu domain on the Internet has rules restricting or prohibiting commercial use, and thus activities not appropriately within the .edu domain and which otherwise are permissible within the University computing resources should use one or more other domains, as appropriate.

The University's Information Security Officer is authorized in appropriate circumstances to inspect or monitor private data (including email), such as when there is a reasonable cause to suspect improper use of computer or network resources.

For further information on the topic of peer-to-peer file sharing, see the section above on Copyright.

COPYRIGHT

Copyright

Copyright laws protect original works of authorship and give the owners of copyrights the exclusive right to do and to authorize others to do certain things in regard to a copyrighted work, including: make copies, distribute the work, display or perform the work publicly, and create derivative works. Copyright laws apply to nearly all forms of captured content, including traditional works like books, photographs, music, drama and sculpture. The laws also adapt to changes in technologies, and include in their scope modern forms of works like motion pictures, web sites, electronic media, software, multimedia works and some databases. Registration is not required to obtain a copyright, so if in doubt, assume a copyright applies.

Unless an exception to the copyright owner's exclusive rights applies, you must obtain permission from the copyright owner to copy, distribute, display or perform a copyrighted work in any medium for any purpose. Be especially mindful of copyright principles when using the Internet. Just because a work is posted on the Internet does not mean that the owner of the copyright has given you permission to use it. In general, do not post material onto the Internet without copyright clearance.

Stanford University Libraries have licenses with many publishers, which permit copying of materials in accordance with the educational, research or administrative functions of the University. In addition, there are four major exceptions to the copyright owner's exclusive rights, which (if applicable) permit limited use without permission. These are: the fair use exception, the library exception, the face-to-face teaching exception, and the distance-learning exception. For a more detailed explanation of these exceptions, the copyright laws and Stanford's copyright policies, please review the University's Copyright Reminder (http://www-sul.stanford.edu/libraries_collections/copyright_reminders/) web site. It is each person's responsibility to be aware of and abide by copyright law; violation may result in civil or criminal liability, and constitutes grounds for University discipline, up to and including discharge, dismissal and expulsion.

DANGEROUS WEAPONS ON CAMPUS

Prohibition of the Possession of Dangerous Weapons on Campus

The University's policy prohibiting weapons on campus (https://police.stanford.edu/pdf/stanford_university_prohibited_weapons_policy.pdf) (pdf) is available on the Resources tab of the Department of Public Safety (https://police.stanford.edu/#resources) web site.

Policy

Stanford University prohibits the possession of any of the following weapons on the Stanford campus: firearm, dirk, dagger, ice pick, knife having a blade longer than 2 1/2 inches (except for lawful use in food preparation or consumption), folding knife with a blade that locks into place, razor with an unguarded blade, taser, stun gun, instrument that expels a metallic projectile (such as a BB or a pellet), spot marker gun, or any other weapons prohibited by California Penal Code Sections 626.10 and 626.9.

For purposes of this policy, the term “Stanford campus” shall include all the lands, buildings, and facilities of Leland Stanford Junior University, whether owned, leased, and controlled, and whether located in the United States or abroad (excluding the privately owned, managed, or leased residences of faculty or staff that are located on the main Stanford campus in unincorporated Santa Clara County). In addition to the prohibited weapons, ammunition is not allowed to be stored or possessed in university owned, leased, and controlled buildings (excluding the privately owned, managed, or leased residences of faculty or staff that are located on the main Stanford campus in unincorporated Santa Clara County). In the event a federal or state law or a county ordinance is more restrictive than this policy, federal or state law or the county ordinance shall apply.

Requests for an exemption from this policy for academic purposes may be requested in writing to the Director of the Stanford University Department of Public Safety. Each request will be considered on a case-by-case basis and be evaluated by the Office of Risk Management and the Department of Public Safety. A written letter will be provided by the Director of the Department of Public Safety in the event an exemption is granted.

The Stanford University Department of Public Safety does not provide facilities for the storage of firearms.

GRIEVANCES

Grievances

A Stanford undergraduate or graduate student who believes that he or she has been subject to an improper decision on an academic matter may file a grievance pursuant to the Student Academic Grievance Procedure (p. 96). For other types of grievances, students should review the section that follows on the Student Non-Academic Grievance Procedure (p.), and consult concerning applicable procedures with the Director of the Diversity and Access Office, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (http://relative.pagelegend.com/mailto:equal.opportunity@stanford.edu) (email).

An individual whose matter has been substantially addressed through one of Stanford's grievance procedures (including but not limited to the Student Academic Grievance Procedure, the Student ADA/Section 504 Grievance Procedure, the Grievance Resolution Procedure for Postdoctoral Scholars, the Student-Athlete Grievance Procedure, or the Student Non-Academic Grievance Procedure) may not raise and seek redress of the same matter under a different Stanford grievance procedure. The University retains discretion to determine when a matter has been substantially addressed.

California Dept of Consumer Affairs Complaint Procedure

An individual may contact the Bureau for Private Postsecondary Education for review of a complaint. The bureau may be contacted online (http://www.bppe.ca.gov) or at 2535 Capitol Oaks Drive, Suite 400, Sacramento, CA 95833; phone: (916) 431-6959; fax: (916) 263-1897.

HAZING POLICY

Hazing Policy

Hazing is not permitted at Stanford University. No individual, recognized student organization, club, team, or any other Stanford-affiliated student group is permitted to plan, engage in, or condone hazing, on or off the Stanford campus.

Definition of Hazing at Stanford University

Hazing includes any activity done in connection with a student organization, regardless of whether the organization is officially recognized at Stanford, that causes or is reasonably likely to cause another student to suffer bodily danger, physical harm, or significant personal degradation or humiliation, even if no bodily danger, physical harm, or significant degradation or humiliation in fact results. Hazing might occur during initiation or pre-initiation into a student organization, but is not limited to these time frames. Any individual who plans or intentionally assists in hazing activity has engaged in hazing, regardless of whether that individual is present when the hazing activity occurs.

Consequences of a Violation

Stanford University expects its students to conduct themselves in socially responsible and respectful ways. Thus, participation in hazing, either as an individual or as part of any student group, may result in serious individual and organizational consequences including, but not limited to: disciplinary action up to and including expulsion; permanent loss of organizational recognition; and loss of eligibility to remain a member of any club, team, or other Stanford-affiliated student group. Consent, implied or expressed, is not a defense to any complaint or charge alleging a hazing violation.

A number of University offices may take institutional action, including: the Organizational Conduct Board; Office of Community Standards; or other University offices, such as the Vice Provost for Student Affairs or the Department of Athletics.

Applications

Stanford's hazing policy is distinct from and broader than California Penal Code section 245.6, which prohibits: "any method of initiation or pre-initiation into a student organization or student body, whether or not the organization or body is officially recognized by an educational institution, which is likely to cause serious bodily injury to any former, current, or prospective student of any school, community college, college, university or other educational institution in this state." A violation of Penal Code Section 245.6 that does not result in serious bodily injury is punishable as a misdemeanor, while a violation that results in death or injury is punishable as a felony or a misdemeanor.

Nothing in this hazing policy prevents Stanford from taking institutional action against hazing activity that falls outside the narrower definition of Penal Code section 245.6.

Stanford's hazing policy is not intended to prohibit student recruitment or new or continuing member activities that are positive and educational in nature, designed to instill a group ethos or unity. Its intent is to deter those behaviors that cause or are likely to cause danger, harm or humiliation to another student.

Stanford's hazing policy is not intended to apply to customary athletic events or other similar institutionally-approved contests or competitions.

Questions regarding hazing policies related to fraternities and sororities should be directed to the Office of Fraternity and Sorority Life at (650) 723-0778. For all other student groups, contact Student Activities and Leadership at(650) 723-2445.

INVOLUNTARY LEAVE OF ABSENCE AND RETURN POLICY

Involuntary Leave of Absence and Return Policy

In effect as of January 4, 2020

Stanford University is committed to the safety, health and well-being of the campus community. The University recognizes that students may experience situations that significantly limit their ability to function successfully or safely in their role as students. In such circumstances, students should consider requesting a leave of absence. A leave of absence permits students to take a break from the University and their studies, so that they may address the issues that led to the need for the leave and later return to the University with an enhanced opportunity to achieve their educational goals. Students will be given the option to take a voluntary leave of absence before a decision is made with respect to an involuntary leave.

1. Involuntary Leave of Absence

Requiring a student to take a leave of absence is rare and, subject to Section III, only happens when current medical knowledge and/or the best available objective evidence indicates to the Senior Associate Vice Provost and Dean of Students or their designee (hereinafter, Dean of Students) that there is a significant risk to the student's health or safety or the health or safety of others, or the student's behavior severely disrupts the University environment, and no reasonable accommodations can adequately reduce that risk or disruption.

Consistent with Stanford's Nondiscrimination Policy (p. 123), Stanford prohibits unlawful discrimination on the basis of any type of disability or any other characteristic protected by applicable law in the administration of the University's programs and activities. Stanford offers a range of resources, support services and accommodations to address the physical and mental health needs of students. However, on rare occasion, a student's needs may require a level of care that exceeds the care the University can appropriately provide. Where current knowledge about the individual's medical condition and/or the best available objective evidence indicates that a student poses a significant risk to the health or safety of a member of the University community, where a student is unable or unwilling to carry out substantial self-care obligations and poses a significant risk to their own safety not based on mere speculation, stereotypes, or generalizations, or where a student's behavior severely disrupts the University environment and the student does not want to take a voluntary leave, the Dean of Students has the authority to place a student on an involuntary leave of absence. Before placing any student on an involuntary leave of absence, Stanford will conduct an individualized assessment, consulting with the Office of Accessible Education (OAE) to determine if there are reasonable accommodations that would permit the student to continue to participate in the University community without taking a leave of absence.

The Dean of Students may be notified about a student who may meet the criteria of an involuntary leave of absence from a variety of sources including, but not limited to, the student, the student's academic advisor, Residential Education staff, Graduate Life Office staff, an academic department, or a member of the University's threat assessment team. If the Dean of Students deems it appropriate, these procedures will be initiated.

a. **Procedures for Placing a Student on an Involuntary Leave of Absence**

   i. The Dean of Students will consult with the Office of Accessible Education (OAE) prior to making a decision to impose an involuntary leave of absence.

   ii. The Dean of Students will issue a notice to the student in writing that an involuntary leave of absence is under consideration. The written notice will include the reason(s) why the student is being considered for an involuntary leave, contact information for OAE, which can provide information about accommodations, and a copy of this policy. In addition, the notice will provide contact information for the Process Resource, an administrator outside of the decision-making process with knowledge of Stanford's involuntary leave of absence process who will serve as a neutral process resource to answer any student questions about the process from referral through return to Stanford. In the written notice, the student will be encouraged to respond before a decision regarding a leave of absence is made and will be given a specified time period within which to do so.

   iii. The Dean of Students will consider potential accommodations and/or modifications that could obviate the need for an involuntary leave of absence, such as the option to take a voluntary leave of absence, academic accommodations, housing and dining accommodations, and modifications to University policies, rules, and regulations. Examples of academic, administrative, and housing accommodations that may be facilitated through the Office of Accessible Education (OAE) can be found on the OAE (https://oae.stanford.edu/) website.

   iv. The student may be asked to execute an Exchange of Confidential Information Consent Form providing Stanford personnel temporary authority to get information from the student's healthcare provider(s) regarding issues relevant and appropriate to the consideration of an involuntary leave of absence when there is a need for the University to have access to that information as part of the interactive process and individualized assessment. If a student refuses to execute an Exchange of Confidential Information Consent Form or to respond within the timeframe set by the Dean of Students, the Dean may proceed with the assessment based on information in the Dean's possession at the time.

   v. The Dean of Students will also confer, as feasible and when appropriate in a particular matter, with individuals regarding the need for an involuntary leave of absence. Although each case will vary, conferring individuals could include:

      1. Residence Deans, or Graduate Life Office Deans;
      2. Faculty members;
      3. Academic advisors;
      4. With appropriate authorization, representatives from Stanford's Vaden Health Center (Vaden);
      5. With appropriate authorization, the student's treatment provider(s) or other health care professionals;
      6. Member(s) of the University's threat assessment team; and/or

7. Such other individuals as may be appropriate in an individual matter.

   In each case, the Dean of Students will confer with a representative from the Office of Accessible Education (OAE) with expertise in mental health disabilities.

vi. Particular attention will be paid to the criteria for imposing an involuntary leave of absence, specifically:

   1. whether current knowledge about the individual's medical condition and/or the best available objective evidence indicates that a student poses a significant risk to the health or safety of a member of the University community;

   2. whether a student is unable or unwilling to carry out substantial self-care obligations and poses a significant risk to their own safety not based on mere speculation, stereotypes, or generalizations; and/or

   3. whether a student's behavior severely disrupts the University environment.

      The individualized assessment as to each factor, based on reasonable judgment that relies on current medical knowledge or on the best available objective evidence, should ascertain: the nature, duration, and severity of the risk or disruption; the probability that the risk or disruption will actually occur; and whether reasonable modifications of policies, practices, or procedures will adequately mitigate the risk or disruption so as to eliminate the need for an involuntary leave of absence.

vii. The Dean of Students will give significant weight to the opinion of the student's treatment provider(s), including those identified by the student, regarding the student's ability to function academically and safely at the University with or without reasonable accommodations. If the Dean of Students determines that the information provided by the treatment provider(s) is incomplete, requires further explanation or clarification, or is inconsistent with other information in the student's record, the Dean of Students, with proper authorization, will contact the treatment provider(s) to obtain additional information. In certain circumstances, the University may require the student to undergo an additional evaluation by an independent and objective professional designated by Stanford, if the Dean of Students believes it will facilitate a more informed decision.

viii. Following these consultations and based on a review of the relevant documentation and information available, the Dean of Students will make a decision as to whether the student should be placed on an involuntary leave of absence, and will provide written notice of this decision to the student. The written notice of decision will include information about the student's right to appeal and to reasonable accommodations during the appeal process. The review and notice of decision under this policy should be done in a reasonably timely manner. Where students have been asked to remain away from the University while the review is underway, every effort will be made by the Dean of Students to reach a decision within one week, provided the student responds in a timely manner to requests for information and, if appropriate, evaluation.

   1. If an involuntary leave of absence is imposed. The written notice of decision to the student will set forth the basis for the decision and a time-frame for when the student must leave the University and when they may be eligible to return to the University and the conditions and/or requirements the student will need to satisfy to be eligible for return. The written notice will also inform the student of their right to reasonable accommodations in the return process and will provide contact information for OAE and the Process Resource. The length of the leave will be determined on an individual basis.

   2. If an involuntary leave of absence is not imposed. The Dean of Students may impose conditions and/or requirements under which the student is allowed to remain at the University.

ix. Within one week of receiving the decision of the Dean of Students, the student may submit an appeal of the decision in writing to the Vice Provost for Student Affairs or the Vice Provost's designee, who may not be the Dean of Students. The written request for appeal must specify the particular substantive and/or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the decision of the Dean of Students. The review by the Vice Provost for Student Affairs or the Vice Provost's designee will be limited to the following considerations:

   1. Were the proper facts and criteria brought to bear on the decision?

   2. Is there any new information not previously available to the student that may change the outcome of the decision-making process?

   3. Were there any procedural irregularities that materially affected the outcome of the matter to the detriment of the appellant?

   4. Given the proper facts, criteria, and procedures, was the decision a reasonable one?

After reviewing the matter fully, the Vice Provost for Student Affairs or the Vice Provost's designee will issue a written decision affirming, modifying, or reversing the decision to place the student on an involuntary leave of absence. The Vice Provost's decision shall be final, and no other appeals or grievance procedures are available.

b. **Implications of an Involuntary Leave of Absence**

i. Student status. Students on a leave of absence generally retain their admitted student status; however, they are not registered and therefore do not have the rights and privileges of registered students.

ii. Housing. Consistent with Stanford's policies and procedures, students assigned to a University residence are subject to the terms of the University Residence Agreement. However, as set forth on the Registrar's Office Leave of Absence website, students with medical disabilities (including mental health disabilities) that require University medical services may petition to remain in campus housing for one term while on leave. Students who leave the University before the end of a term may be eligible to receive refunds of portions of their housing charges. Eligibility criteria for refunds are set forth in the Residence Agreement which is found on the Residence Agreement website (https://rde.stanford.edu/studenthousing/apply/residence-agreement/). (https://rde.stanford.edu/studenthousing/apply/residence-agreement/)

iii. Effective date(s) of leave. A student must leave the University within the timeframe set forth by the Dean of Students. The

leave will remain in effect until (1) it is determined after an individualized assessment that the student is able to return to the University with or without reasonable accommodations and (2) the student has complied with any University requirements applicable to all students returning from a leave and all of the conditions mandated by the Dean of Students and/or the Vice Provost.

iv. Notification. At any time during the leave process, the Dean of Students may notify a

student's parent, guardian, emergency contact, or other individual, consistent with the law, if notification is deemed appropriate.

v. Association with the University while on leave. Unless expressly permitted by the Dean of Students in writing, students on an involuntary leave of absence are not permitted to be present at the University and are not permitted to engage in any University-related activities, including on-campus employment.

vi. Coursework taken while on leave. Consistent with Stanford's policies and procedures, academic credit for work done elsewhere may be allowed towards a Stanford degree. Students should refer to the "Transfer Work (p. 82)" section of the Stanford Bulletin and consult with the Registrar's Office and their department prior to taking any coursework while on an involuntary leave of absence.

vii. SUnet ID privileges. Unless expressly prohibited by the Dean of Students in writing, students on leave generally may retain their SUnet ID privileges, including their Stanford email account.

viii. Transcript notation. Students on a leave of absence will have a notation on their transcript that reads "Leave of Absence."

ix. Tuition and fees. Consistent with Stanford's policies and procedures, students who leave the University before the end of a term may be eligible to receive refunds of portions of their tuition. See the (https://registrar.stanford.edu/students/tuition-and-fees/tuition-refund-schedule/) Registrar's Tuition Refunds (https://registrar.stanford.edu/students/tuition-and-fees/tuition-refund-schedule/) page for a schedule of refunds.

x. Meal Plan. Consistent with Stanford's policies and procedures, a meal plan refund is based on the date when a student moves out of University residence and is approved under conditions as specified in the Residence Agreement. Students with questions about residential meal plan refunds should contact the central office of Stanford Dining.

xi. Visa Status. International students (F-1 and J-1 Visa holders) placed on an involuntary leave of absence must speak with a Bechtel International Center advisor regarding their visa status.

2. Request for Return

a. For general requirements applicable to all students returning to Stanford after a leave of absence, undergraduate students should refer to the Returning to Stanford (https://undergrad.stanford.edu/planning/academic-policies/returning-students/) website. Graduate students should consult with their academic department and a Graduate Life Office Dean. In addition to the general requirements all students must meet when returning to Stanford after a leave of absence, as well as any conditions mandated by the Dean of Students and/or the Vice Provost for return from an involuntary leave of absence as outlined below in section II.C, students seeking to return from an involuntary leave of absence for reasons of personal or community health and safety may be required to submit additional documentation related to the factors set forth in section I.A.6 as part of an individualized assessment. OAE will work with the students to provide reasonable accommodations in the return process as necessary.

b. A student must make a written request to the Dean of Students to return to the University. Generally, a student will not be allowed to return until one full quarter has elapsed or until the leave period in the involuntary leave of absence notification has elapsed, and all conditions and/or requirements are met.

c. The Dean of Students may require the student to provide evidence that the student, with or without reasonable accommodations, has sufficiently addressed the issues that previously established the criteria for imposing an involuntary leave of absence as set forth in section I.A.6, above. The Dean of Students may also ask, confer with, or seek information from others to assist in making the determination. The information sought may include:

i. At the student's discretion, documentation of efforts by the student to address the issues that led to the leave

ii. With appropriate authorization, release of academic records to inform treating clinicians

iii. With appropriate authorization, release of treatment information to the extent necessary to determine if the student has sufficiently reduced the risk or disruption that led to the need for the involuntary leave

iv. With appropriate authorization, consultation with Vaden to the extent necessary to determine if the student has sufficiently reduced the risk or disruption that led to the need for the involuntary leave

v. Consultation with OAE

d. All returning students must meet the essential eligibility requirements and any technical standards of the University and, if applicable, the relevant school or department, with or without reasonable accommodations. If the Dean of Students is not satisfied that the student is ready to return to the University, the student will be notified in writing of the decision, including the reason for the decision, within a reasonable time after the student has submitted a request for return and required documentation.

e. A student not permitted to return may appeal the decision to the Vice Provost for Student Affairs following the procedure in section I.A.9.

3. Scope of the Policy and Relationship to Other University Policies

A leave of absence is an administrative process; it is not a disciplinary process. This policy and these procedures are not intended to be punitive and do not take the place of disciplinary actions that are in response to violations of Stanford's Fundamental Standard or other policies or directives, nor do they preclude the removal or dismissal of students from the University or University-related programs as a result of violations of other University policies or school or departmental protocols. This policy does not limit the University's ability to place enrollment holds on students for reasons beyond the scope of this policy and nothing in this policy relieves a student of any financial obligations to the University that were in place at the time the involuntary leave of absence was imposed.

Nothing in this policy limits the power of the University to take administrative action to ensure the safety of the Stanford community. In exceptional circumstances, where the health or well-being of any person may be seriously affected, or where physical safety is seriously threatened, or where the ability of the University to carry out its essential operations is seriously threatened or impaired, the President or the President's designee, may summarily suspend, dismiss, or bar any person from the University or University-related programs. In all such cases, actions taken will be reviewed promptly, typically within one week, by the appropriate University authority.

In situations involving an imminent or ongoing threat of harm to the student or any other member of the University community, the Dean of Students, in the exercise of his or her reasonable judgment, may require a student to be immediately prohibited from entering Stanford's campus or facilities utilized for University programs or activities while the individualized assessment and review described in section I.A. are taking place. Such students will receive the written notice described in section I.A.2 as quickly as possible.

4. Requests for Reasonable Accommodation

Stanford is committed to providing equal access to all participants in University processes, including students with disabilities. Students with disabilities should contact the Office of Accessible Education (OAE) to request accommodations. Information about the support services OAE provides, types of accommodations offered, and appropriate documentation for accommodations, can be found on the OAE website: https://oae.stanford.edu/.

5. Related Resources

As noted herein, students placed on an involuntary leave of absence may have additional conditions and/or requirements they must meet prior to returning to the University, in addition to any University requirements applicable to all students returning from a leave.

- Undergraduate Students should consult the Returning to Stanford (https://undergrad.stanford.edu/planning/academic-policies/returning-students/) web page for generally applicable deadlines, information and resources.
- Graduate Students should consult with a Graduate Life Office (https://glo.stanford.edu/) Dean and their department for generally applicable deadlines, information and resources.

Students who are placed on an involuntary leave of absence may want to consult with the following offices, where appropriate:

- Office of Accessible Education (https://oae.stanford.edu/) (OAE) (https://oae.stanford.edu/)
- Financial (http://web.stanford.edu/dept/finaid/) Aid (http://web.stanford.edu/dept/finaid/)
- Student Financial (http://web.stanford.edu/group/fms/fingate/students/) Services (http://web.stanford.edu/group/fms/fingate/students/)
- University Housing (http://web.stanford.edu/dept/rde/cgi-bin/drupal/housing/)
- Vaden Health Center (http://vaden.stanford.edu/) (Vaden)
- Academic Advising (https://undergrad.stanford.edu/academic-advising-stanford/)
- Graduate Life (https://glo.stanford.edu/) Office (https://glo.stanford.edu/)
- Bechtel International (https://bechtel.stanford.edu/immigration/visa-types/f-1j-1-student-visas/leave-absence/) Center (https://bechtel.stanford.edu/immigration/visa-types/f-1j-1-student-visas/leave-absence/)

The Process Resource will be available to assist all students who are placed on an involuntary leave of absence with their questions about the process to return and resume their studies and life at Stanford.

MAIN QUADRANGLE • MEMORIAL COURT • OVAL • WHITE PLAZA

Use of the Main Quadrangle and Memorial Court

Policy

The following is quoted from the policy:

The Main Quadrangle and Memorial Court are part of Stanford University's academic preserve due to their locations at the heart of the campus. To protect and enhance their historic status, University policy limits activities primarily to established or traditional ceremonies and events.

To schedule an event, approval must be obtained in advance from the Office of Stanford Events (see below). Unscheduled events, protests, or activities are prohibited.

Requests for waivers to this policy must be submitted in advance and in writing to the Office of Stanford Events. Exceptions may be granted only in extraordinary cases.

Resources

The following is a summary of resources available:

For instructions on use of the Main Quadrangle/Memorial Court, contact the Office of Special Events and Protocol (OSEP) at (650) 724-1387, or at the OSEP (https://osep.stanford.edu/) web site.

Note: White Plaza is made available to Stanford students, faculty, and staff for events other than scheduled "established or traditional ceremonies and events" including those that may involve amplified sound. For further information on the use of such other venues, students should contact Student Activities and Leadership (SAL) at (650) 723-2733, or at the SAL (http://studentaffairs.stanford.edu/sal/) web site. Faculty and staff should contact the Office of Special Events and Protocol (OSEP) (https://osep.stanford.edu/).

Use of the Oval Policy

The Oval is considered to be the initial and official visual entrance to the Stanford University campus. Given this historic and aesthetic status, it is in the best interests of the University community and visiting members of the public to maintain its open and pristine space, to help preserve its natural beauty and environmental integrity. The Oval also presents the formal academic image of the University, leading directly to departments, classrooms and other academic space, and faculty and graduate student offices, and thus is subject to the University's Noise Policy.

The University prohibits formal or informal events of any kind to take place in the Oval. Gatherings of Stanford students, faculty, and staff such as demonstrations, rallies, or dances may take place in White Plaza, which can be reserved through the Office of Student Activities. Weddings also are not allowed in the Oval but are in certain circumstances allowed in Memorial Church (refer to Memorial Church wedding ceremony guidelines (http://www.stanford.edu/group/religiouslife/servicesWeddings.html)).

The Oval is considered a pedestrian zone and appropriate use of its space includes walking, running, reading, relaxing, and other limited recreational use of the lawn area (such as quiet, very small picnics and Frisbee), unless or until such use damages or otherwise harms the property.

Cooking food or use of any grill/barbecue or open flame is strictly prohibited. Fireworks or the use of other incendiary devices represent a safety hazard to the area and are therefore prohibited. Amplified sound from items such as boom boxes, musical instruments, or the use of bullhorns or amplified speakers is also prohibited. Only authorized Stanford service vehicles are permitted inside the Oval areas.

As the official entrance to the University, the Oval offers public access to general parking spaces in the marked areas surrounding the outer perimeter of the Oval; drivers are expected to obey all traffic signs and limitations. Buses are subject to additional restrictions.

For further information regarding this policy, contact the Executive Director of Special Events and Protocol, (650) 724-1387 or see the Office of Special Events & Protocol (http://osep.stanford.edu/policies/oval.html) web site.

Use of White Memorial Plaza

White Plaza is a Stanford University space available for programs, speeches, rallies, information tables, banners and posters. It is considered a “free speech area” on campus. Students should follow the policy outlined on the Student Activities and Leadership (https://sal.stanford.edu/plan-event/venues/outdoor-spaces/white-memorial-plaza/) web site to engage in student programmatic activity. Due to Stanford's non-profit status, for-profit commercial activity or corporate promotion of any kind is strictly regulated.

White Plaza is in the center of campus, so event planners should take particular care to avoid disruptive impact on classes, business, or events in the surrounding buildings. Events in White Plaza must be organized by University entities (student groups, departments, and programs) and require prior approval from Student Activities and Leadership (SAL) (https://sal.stanford.edu/).

NO CAMPING

No Camping

Camping (that is, staying outside overnight on University property) is not permitted without University permission. Permission is granted through the Office of the Provost or the Provost's designee.

NOISE AND AMPLIFIED SOUND

Noise and Amplified Sound

Policy

The following is quoted from the policy:

Stanford is not only an academic institution but a residential community as well. It is the responsibility of all faculty, students, and staff to moderate noise especially during an event or activity held on campus. Supporting the mission of the University and respecting those who are studying, researching, or otherwise carrying out academic-related activities is a Stanford priority. The campus must require a conducive atmosphere to ensure these endeavors are accomplished and supported. Disturbing noise in or around a residence or other campus buildings which infringe on the rights of other residents or members of the University community is considered a violation of this policy. As part of the event planning process, the event sponsor must obtain all appropriate approvals regarding the use of amplified sound during an event or activity.

In addition to University policy on noise and amplified sound, the County of Santa Clara also has a county ordinance on sound and all members of the Stanford community and visitors to campus are subject to and must comply with this order. For more information, see the Santa Clara Ordinance Code, Control of Noise and Vibration (https://www.municode.com/library/ca/santa_clara_county/codes/code_of_ordinances/?nodeId=TITBRE_DIVB11ENHE_CHVIIICONOVI) web site.

Resources

Information regarding whether and how the use of amplified sound is permitted is available from the following sources, which must be consulted for prior approval:

1. The Office of Student Activities: phone: 723-2733, or see http://studentaffairs.stanford.edu/sal/policies/noise (http://studentaffairs.stanford.edu/sal/policies/noise/)
2. Registrar's Scheduling Office: email reg-events@stanford.edu, or see http://studentaffairs.stanford.edu/registrar/faculty/events (http://studentaffairs.stanford.edu/registrar/faculty/events/).
3. Office of Special Events and Protocol (OSEP) at (650) 724-1387, or see http://stanfordevents.stanford.edu (http://stanfordevents.stanford.edu/).

ONLINE ACCESSIBILITY POLICY

Stanford University Online Accessibility Policy

Policy

Stanford University will make Stanford Websites and web-based applications accessible to its students, faculty, staff and participants in the University's programs and activities who have disabilities. All personnel who are involved in the procurement, preparation and maintenance of University Websites and web-based applications should adopt this goal, with the assistance of campus resources dedicated to supporting web accessibility. Stanford Websites and web-based applications must either conform to WCAG 2.0 Level AA (http://www.w3.org/TR/WCAG20/) or their content and functionality be made available to Users on request (such as by a student request to the Office of Accessible Education) in an equally effective and accessible alternative manner.

Applicability

Stanford's online accessibility policy applies to all Stanford academic and administrative units that create and maintain web sites and web-based applications used in the programs and activities of the University. See the Stanford University Online Accessibility Policy (http://ucomm.stanford.edu/policies/accessibility-policy/) web site for the full policy.

Definitions

Stanford Website

Any website or web-based application within the Stanford University (stanford.edu) domain used in the programs or activities of the University.

Users

Stanford Website users are defined as current Stanford students and applicants for admission, Stanford staff and faculty, and participants in the University's programs and activities.

Accessible

Refers to the concept that people with disabilities are able to independently and timely access and use a product or system, including with the benefit of assistive technologies. Assistive technologies include adaptive hardware and/or software and other devices that are used to increase, maintain, or improve the functional capabilities of individuals with disabilities.

Stanford Online Accessibility Program ("SOAP") Office

The SOAP Office (http://soap.stanford.edu) provides resources and services for Stanford web designers, developers and content creators to assist them in producing accessible materials. Services include Website accessibility testing and guidance regarding universal design and web standards compliance. The SOAP Office is also the campus resource designated to facilitate online accessibility for Users. To report and seek assistance on web accessibility issues, Users may contact the SOAP Office by email at web-accessibility@stanford.edu or submit a HelpSU ticket through the SOAP Office website.

Office of Accessible Education ("OAE")

The Office of Accessible Education (http://oae.stanford.edu) is the campus office designated to work with Stanford students with disabilities. OAE provides support services, accommodations, and programs to remove barriers to full participation of students with disabilities in the programs or activities of the University.

Diversity and Access Office ("D&A")

The Diversity and Access Office (http://diversityandaccess.stanford.edu) oversees compliance with state and federal anti-discrimination laws including the Americans with Disabilities Act and Section 504 of the Rehabilitation Act. D&A provides disability-related access information, and assists faculty, staff and other non-student participants in University programs and activities with disabilities who may need accommodations and/or auxiliary aids to obtain equal access to Stanford facilities, programs and activities. D&A also oversees the ADA/Section 504 Grievance Procedure for students who believe they have been subjected to unlawful discrimination based on a disability or denied access to services or accommodations which the ADA and/or Section 504 require Stanford to provide. Read more about the ADA/Section 504 Grievance Procedure (http://exploredegrees.stanford.edu/nonacademicregulations/online-accessibility-policy/nonacademicregulations/ada/).

Accessibility Standard

Stanford University has adopted the Worldwide Web Consortium Web Content Accessibility Guidelines (http://www.w3.org/TR/WCAG20/) version 2.0, Level AA Conformance (WCAG 2.0 Level AA) as its goal for accessible Stanford Websites. The guidelines and success criteria of WCAG 2.0 Level AA are organized around the following four principles which lay the foundation for users with disabilities to access and use web content. For a Stanford Website to be accessible under these principles, its content must be:

1. Perceivable – Information and user interface components must be presentable to users in ways they can perceive.
2. Operable – User interface components and navigation must be operable.
3. Understandable – Information and the operation of user interface must be understandable.
4. Robust – Content must be robust enough that it can be interpreted reliably by a wide variety of user agents, including assistive technologies.

Implementation Guidelines

1. All personnel responsible for existing Stanford Websites must use good faith efforts, subject to the requirements and exceptions of the applicable laws, to bring those Websites into conformance with WCAG 2.0 Level AA.
2. New Stanford Website development and purchases, including development and purchases for major revisions and updates of existing Stanford Websites, should conform to WCAG 2.0 Level AA.
3. Vendors seeking to develop or provide Websites or web-based applications for Stanford are to demonstrate that their products satisfy WCAG 2.0 Level AA Success Criteria, unless undue burden or fundamental alteration can be demonstrated (see below). Preferred standards for demonstrating satisfaction of WCAG 2.0 Level AA Success Criteria, and accessibility language for Stanford Website vendor contracts, as well as for other types of Electronic Information Technology vendor contracts, may be obtained from University Procurement (Purchasing and Payment Services) (http://web.stanford.edu/group/fms/fingate/contact/#procure) or from the SOAP Office (https://soap.stanford.edu).
4. Each Stanford Website should contain "Accessibility" contact information for the site's webmaster and/or the SOAP Office. The contact information may take a variety of forms, such as an email address, a link to a HelpSU page, or a contact form on the site. The recommended location for this information is the Website's "Contact" or "About Us" page.
5. The SOAP Office will continue to test Stanford Websites for accessibility and report accessibility issues to the webmaster for that website.
6. OAE will continue to seek input from Stanford students regarding accessibility issues.

7. Conformance to WCAG 2.0 Level AA guidelines may be an undue burden due to the nature of the content, the purpose of the resource, the lack of accessible solutions, or an unreasonably high administrative or financial cost necessary to make the resource meet that goal. However, these difficulties do not relieve University programs or activities from meeting applicable legal obligations to provide reasonable accommodations to Users in regard to access to the content and services provided on Stanford Websites. Managers of University programs and activities must be prepared to provide content and/or services in a suitable alternative format (e.g., electronic text file or audio description) or manner upon request (such as by a student to the OAE).

Implementation Assistance

Guidelines and best practices are available from the SOAP Office (http://soap.stanford.edu). In addition, on-campus assistance is available for designing and implementing websites that meet accessibility guidelines and for evaluating the accessibility of existing sites and those under development. If such assistance is needed, visit the SOAP web site (http://soap.stanford.edu) or email the SOAP Office at web-accessibility@stanford.edu.

Responding to Accessibility Issues

Recognizing the ongoing evolution of current web content and technologies, the designated webmaster for a particular site, upon being made aware of an accessibility issue on that site, should proceed as follows:

- Acknowledge receipt of the issue in writing (via email) to the User raising the issue, with a copy to the SOAP Office.
- Open an accessibility case for recording the issue and resulting action taken.
- Verify that the issue is an authentic accessibility issue.
- Treat all issues as important. Address any time-sensitive need of the User promptly (generally within a period of no greater than two business days), unless technology or work involved requires more effort, in which case the User will be promptly notified in writing of expected delivery.

Upon receiving a report of an accessibility issue, the SOAP Office shall notify the site's webmaster, as well as OAE (for reports from students) or D&A (for reports from non-students.) If the SOAP Office, in consultation with the site's webmaster, determines that the information or service provided on the Stanford Website cannot be made accessible, or that doing so would constitute an undue burden or fundamental alteration, OAE or D&A will engage in an interactive process with the User about alternative methods for providing the information or service and will provide an equally effective alternative format or service. In the event that an alternative format or service cannot be provided or the user is not satisfied with the results, he or she may contact the ADA/Section 504 Compliance Officer at D&A by telephone at (650) 723-0755 or by email at equalopportunity@stanford.edu for assistance in resolving the issue.

For questions about the policy, please contact the SOAP Office (https://soap.stanford.edu/about/contact/).

PEER-TO-PEER FILE SHARING

Peer-to-Peer File Sharing

The use of file-sharing networks and software to download and share copyrighted works like software, music, movies, television programs, and books can violate copyright laws. Both the person who makes an illegal copy of a copyrighted work available and the person who receives or downloads an illegal copy have violated the law and Stanford policies. Many file-sharing programs have default settings that share copyrighted files, such as music and movies, through the Internet. Before enabling any of these programs students, faculty, or staff must read the fine print, make sure to understand the program itself, and only use such programs lawfully. Under the Digital Millennium Copyright Act (DMCA), copyright owners are entitled to notify Internet service providers, such as Stanford, that IP addresses linked to the Stanford network are sharing copies of music, movies, or other content without authorization. The law requires the University to respond to such complaints by eliminating access to the infringing materials. Stanford will disconnect students who fail to respond to a DMCA complaint promptly. Furthermore, the University also will suspend or terminate computer access to the Stanford network, including termination of the SUNet ID, to members of the community who continue to violate copyright laws. Finally, the University will take action through the student, employee, or faculty disciplinary processes if necessary. Beyond University consequences, copyright holders may file civil lawsuits against copyright infringers seeking extensive monetary damages. If compelled by a lawful subpoena, Stanford may be required to identify students, faculty, staff, or others who have violated copyright law. For more information about file-sharing, refer to Residential Computing's online resource, File-Sharing and Copyright Law (http://rescomp.stanford.edu/info/dmca/) web site.

PROTECTION OF SENSITIVE DATA

Protection of Sensitive Data

Stanford University maintains sensitive non-public data protected by laws and agreements, including Social Security numbers, financial information, health information, and student records. It is incumbent on every member of the Stanford community with access to such data to be familiar with and abide by Stanford's data classifications requirements provided at the Data Classification, Access, Transmittal and Storage (http://www.stanford.edu/group/security/securecomputing/dataclass_chart.html) web site. Members of the Stanford community should also familiarize themselves with applicable laws and University policies on privacy as provided by the University, including Administrative Guide Memos 6.3.1 Information Security (https://adminguide.stanford.edu/chapter-6/subchapter-3/policy-6-3-1/), 6.4.1 Identification and Authentication Systems (https://adminguide.stanford.edu/chapter-6/subchapter-4/policy-6-4-1/), 6.6.1 Information Security Incident Response (https://adminguide.stanford.edu/chapter-6/subchapter-6/policy-6-6-1/), and 3.4.2 Card and Payment Account Acceptance and Processing (https://adminguide.stanford.edu/chapter-3/subchapter-4/policy-3-4-2/). For information on best practices for securing mobile computing devices, see the Guidelines for Securing Mobile Computing Devices (http://www.stanford.edu/group/security/securecomputing/mobile_devices.html) web site.

POLITICAL ACTIVITIES

Political, Campaign, and Lobbying Activities

For the complete text of the currently applicable version of this policy, see Administrative Guide Memo 1.5.1 Political, Campaign, and Lobbying Activities (https://adminguide.stanford.edu/chapter-1/subchapter-5/policy-1-5-1/).

Summary

The following summarizes the policy on Political, Campaign, and Lobbying Activities:

Stanford University, as a charitable entity, is subject to federal, state, and local laws and regulations regarding political activities: campaign activities, lobbying, and the giving of gifts to public officials.

While all members of the University community are naturally free to express their political opinions and engage in political activities to whatever extent they wish, it is very important that they do so only in their individual capacities and avoid even the appearance that they are speaking or acting for the University in political matters.

In the limited circumstances where individuals must speak or act on behalf of the University in the political arena, they must do so in accordance with the provisions of Administrative Guide Memo 1.5.1 (https://adminguide.stanford.edu/chapter-1/subchapter-5/policy-1-5-1/).

Policy

The following is quoted from the policy:

1. Summary of Legal Requirements and Restrictions

    a. Campaign Activities: Contributions of money, goods, or services to candidates for political office and in support of or opposition to ballot measure campaigns are subject to a wide variety of political laws. Depending on the jurisdiction and the campaign, political contributions may be prohibited or limited and, in nearly all cases, are subject to a complicated series of disclosure rules. Because of the University's tax-exempt status, the University is legally prohibited from endorsing or opposing candidates for political office or making any contribution of money, goods, or services to candidates. It is important, therefore, that no person inadvertently cause the University to make such a contribution.

    b. Lobbying: Lobbying can generally be described as any attempt to influence the action of any legislative body (e.g., Congress, state legislatures, county boards, city councils and their staffs) or any federal, state, or local government agency. Laws regulating lobbying exist at the federal, state, and local levels and can differ widely in scope, depending on the jurisdiction. Some laws, for example, only regulate lobbying of the legislative branch. Others, however, also cover lobbying of administrative agencies and officers in the executive branch (e.g., lobbying for federally-funded grants). To one degree or another, however, most lobbying laws require registration and reporting by individuals engaged in attempts to influence governmental action.

        Tax-exempt organizations are permitted to lobby, and the University engages in lobbying on a limited number of issues, mostly those affecting education, research, and related activities. There is usually some threshold of time or money spent on lobbying that triggers registration and reporting requirements. Regardless of thresholds, however, no University employee —other than the following individuals, on matters under their jurisdiction—may lobby on behalf of the University without specific authorization:

        - President
        - Provost
        - Deans of the Seven Schools
        - Vice Provost and Dean of Research
        - Vice Provost for Graduate Education
        - Vice President for Business Affairs and Chief Financial Officer
        - Vice President of Human Resources
        - Vice President for Land, Buildings and Real Estate
        - Director of the SLAC National Accelerator Laboratory
        - Director of the Hoover Institution
        - General Counsel
        - Vice President for Public Affairs
        - The Vice Provost and Dean of Research may grant permission to faculty members to lobby on behalf of the University for specific purposes. The Vice President for Public Affairs may grant permission to staff members to lobby on behalf of the University for specific purposes. All lobbying on behalf of the University should be coordinated with the Vice President for Public Affairs. Please see the Federal Lobbying Guidelines for Stanford Faculty and Staff (http://doresearch.stanford.edu/research-scholarship/federal-lobbying-guidelines-stanford-faculty-and-staff/) in the Research Policy Handbook.

    c. Giving of Gifts to Public Officials and Staff: Almost all jurisdictions have strict rules on the extent to which gifts and honoraria may be given to public officials (both elected and non-elected officials and, often, staff). In some cases gifts and honoraria are prohibited; in others they are limited; and in most cases they are subject to detailed disclosure. In addition, in some jurisdictions, such as California, gifts to both state and local public officials can result in a public official's disqualification from participation in any governmental action affecting the interests of the donor. Meals, travel, and entertainment are the most common types of gifts, but gift rules can also apply in cases where public officials attend a reception or receive tickets to sporting or other events.

        As a non-profit organization, the University generally does not give gifts to public officials and, in those limited cases where it does give such gifts, it must do so in accordance with all applicable laws and regulations. Therefore, any University employee who, on behalf of the University, wishes to make a gift to a public official must receive prior approval from the Vice President for Public Affairs before making such a gift.

    d. Reporting of Political Activities: The University must report most of its political activities above certain thresholds. Therefore, any University employee engaging in such activities on behalf of the University should carefully review the remainder of this Guide Memo and should discuss the relevant activities in advance with the Vice President for Public Affairs.

2. Prohibited and Restricted Political Activities

    a. In General:

        i. No person may, on behalf of the University, engage in any political activity in support of or opposition to any candidate for elective public office (including giving or receiving funds or endorsements), nor shall any University resources be used for such purpose.

        ii. No person may, on behalf of the University, lobby (or use University resources to lobby) any federal, state, or local

legislative or administrative official or staff member unless specifically authorized to do so. Any lobbying activity, even when authorized, must be conducted in compliance with this Guide Memo, other applicable University policies, and applicable law.

iii. No person may, on behalf of the University, give a gift (or use any University resources to give a gift) to any federal, state, or local official or staff member, except in compliance with this Guide Memo, other applicable University policies, and applicable law.

iv. No person supporting candidates for public office or engaging in other political activities may use University space or facilities or receive University support, except in the limited ways described in section 3.a.

v. No person may use for lobbying activities federally-funded contract or grant money received by the University..

Even the foregoing activities that are only restricted, rather than prohibited, may be subject to limitations imposed by law. Therefore, any person engaging in the activity, or contemplating doing so, should consult with the Vice President for Public Affairs.

b. Guidelines for Avoiding Prohibited Partisan Political Activities: The following guidelines should assist in preventing the involvement or apparent involvement of the University in political activities in support of or opposition to any candidate for elective public office, including both partisan and non-partisan elections. Except in the limited circumstances set forth in section 3.b., below:

i. Use of Name and Seal: Neither the name nor seal of the University or of any of its schools, departments, or institutions should be used on letters or other materials intended to influence such political elections.

ii. Use of Address and Telephones: No University office should be used as a return mailing address for such political mailings, and telephone service that is paid by the University, likewise, should not be used for such political purposes. (Obviously, a student's dormitory room and telephone service that are personal to the student may be used for these purposes.)

iii. Use of Title: The University title of a faculty or staff member or other person should be used only for identification and should be accompanied by a statement that the person is speaking as an individual and not as a representative of the University.

iv. Use of Services and Equipment: University services, such as Interdepartmental Mail; equipment, such as copy machines, computers, and telephones; and supplies should not be used for such political purposes.

v. Use of Personnel: No University employee may, as part of his or her job, be asked to perform tasks in any way related to prohibited political purposes.

3. Permissible Political Activities

a. In General: As noted above, the federal, state, and local laws which limit the partisan political activities that can take place in University facilities and with University support in no way inhibit the expression of personal political views by any individual in the University community. Nor do they forbid faculty, students, or staff from joining with others in support of candidates for office or in furtherance of political causes. There is no restriction on discussion of political issues or teaching of political techniques. Academic endeavors which address public policy issues are in no way prohibited or constrained.

Because the University encourages freedom of expression, political activities which do not reasonably imply University involvement or identification may be undertaken so long as regular University procedures are followed for use of facilities. Examples of permissible activities are:

i. Use of areas, such as White Plaza, for tables, speeches, and similar activities.

ii. Use of auditoriums for speeches by political candidates, but subject to rules of the Internal Revenue Service, the Federal Election Commission, and the California Fair Political Practices Commission, and other applicable laws. Arrangements must be made with University Events & Services. (See also Guide Memo 8.2.1 (https://adminguide.stanford.edu/8-2-1/): University Events, for more information.)

To reiterate, because tax and political compliance laws impose restrictions, and even prohibitions, on certain political activities and on the use of buildings and equipment at a non-profit institution such as the University, any such activities must be in compliance with these legal requirements.

Individuals taking political positions for themselves or groups with which they are associated, but not as representatives of the University, should clearly indicate, by words and actions, that their positions are not those of the University and are not being taken in an official capacity on behalf of the University.

b. Limited University Political Activities: Limited activities relating to specific federal, state, or local legislation or ballot initiatives are permissible where (1) the subject matter is directly related to core interests of the University's activities; (2) the President has determined that the University should take a position; and (3) the individuals who speak or write on the University's behalf are specifically authorized to do so.

4. Research Involving Political Campaigns: Any Stanford researcher considering doing research involving political campaigns should consult with the General Counsel's Office for any legal restrictions, and should submit the research proposal in advance to Stanford's Institutional Review Board as appropriate under its policies and procedures.

5. Responsibility for Interpretation: The Vice President for Public Affairs, in consultation with the General Counsel, is the administrative officer responsible for interpretation and application of the above guidelines. Questions on whether planned student activities are consistent with the University's obligations should be directed to the Dean of Student Life, who will consult with the Vice President for Public Affairs and/or the General Counsel. All other questions on whether planned activities are consistent with the University's obligations should be addressed directly to the Vice President for Public Affairs or the General Counsel.

RECORDING LECTURES

Recording Lectures

Except with permission from the Office of Accessible Education (http://studentaffairs.stanford.edu/oae/) or the instructor in question, students may not audio- or video-record lectures. Even with permission, students may only use such recordings for personal use; no posting or further distribution or use is permitted.

SEXUAL HARASSMENT AND CONSENSUAL SEXUAL OR ROMANTIC RELATIONSHIPS

Sexual Harassment and Consensual Sexual or Romantic Relationships

For the complete text of the currently applicable version of this policy, see Administrative Guide Memo 2.2.4 Sexual Harassment and Consensual Sexual or Romantic Relationships (https://adminguide.stanford.edu/chapter-2/subchapter-2/policy-2-2-4/). It is also available from the Sexual Harassment Policy Office (http://harass.stanford.edu) homepage.

Summary

Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation. Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.

Policy

The following is quoted from the policy:

1. In General

    a. Applicability and Sanctions for Policy Violations—This policy applies to all students, faculty and staff of Stanford University, as well as to others who participate in Stanford programs and activities. Its application includes Stanford programs and activities both on and off-campus, including overseas programs. Individuals who violate this policy are subject to discipline up to and including discharge, expulsion, and/or other appropriate sanction or action.

    b. Respect for Each Other—Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation. It is expected that students, faculty, staff and other individuals covered by this policy will treat one another with respect.

    c. Prompt Attention—Reports of sexual harassment are taken seriously and will be dealt with promptly. The specific action taken in any particular case depends on the nature and gravity of the conduct reported, and may include intervention, mediation, investigation and the initiation of grievance and disciplinary processes as discussed more fully below. Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.

    d. Confidentiality—The University recognizes that confidentiality is important. Sexual harassment advisers and others responsible to implement this policy will respect the confidentiality and privacy of individuals reporting or accused of sexual harassment to the extent reasonably possible. Examples of situations where confidentiality cannot be maintained include circumstances when the University is required by law to disclose information (such as in response to legal process) and when disclosure is required by the University's outweighing interest in protecting the rights of others.

    e. Protection Against Retaliation—Retaliation and/or reprisals against an individual who in good faith reports or provides information in an investigation about behavior that may violate this policy are against the law and will not be tolerated. Intentionally making a false report or providing false information, however, is grounds for discipline.

    f. Relationship to Freedom of Expression—Stanford is committed to the principles of free inquiry and free expression. Vigorous discussion and debate are fundamental to the University, and this policy is not intended to stifle teaching methods or freedom of expression generally, nor will it be permitted to do so. Sexual harassment, however, is neither legally protected expression nor the proper exercise of academic freedom; it compromises the integrity of the University, its tradition of intellectual freedom and the trust placed in its members.

2. What Is Sexual Harassment?

    Unwelcome sexual advances, requests for sexual favors, and other visual, verbal or physical conduct of a sexual nature constitute sexual harassment when:

    a. It is implicitly or explicitly suggested that submission to or rejection of the conduct will be a factor in academic or employment decisions or evaluations, or permission to participate in a University activity; or

    b. The conduct has the purpose or effect of unreasonably interfering with an individual's academic or work performance or creating an intimidating or hostile academic, work or student living environment.

        Determining what constitutes sexual harassment depends upon the specific facts and the context in which the conduct occurs. Sexual harassment may take many forms—subtle and indirect, or blatant and overt. For example,

        i. It may be conduct toward an individual of the opposite sex or the same sex.

        ii. It may occur between peers or between individuals in a hierarchical relationship.

        iii. It may be aimed at coercing an individual to participate in an unwanted sexual relationship or it may have the effect of causing an individual to change behavior or work performance.

        iv. It may consist of repeated actions or may even arise from a single incident if sufficiently egregious.

    c. The University's Policy on Sexual Assault (see Guide Memo 23.3, Sexual Assault (http://adminguide.stanford.edu/23_3.pdf)) may also apply when sexual harassment involves physical contact.

3. What To Do About Sexual Harassment

    Individuals seeking further information are directed to the following resources:

    - The Sexual Harassment Policy Office (Mariposa House, 585 Capistrano Way, Room 208-209, Stanford University, Stanford, CA, 94305-8230; (650) 723-1583; email: harass@stanford.edu for information, consultation, advice, or to lodge a complaint. Note that anonymous inquiries can be made to the SHPO by phone during business hours.
    - The Sexual Harassment Policy Office web page at http://harass.stanford.edu (http://harass.stanford.edu/).
    - Any designated Sexual Harassment Adviser or resource person listed in 3.a or 5.a.

The following are the primary methods for dealing with sexual harassment at Stanford. They are not required to be followed in any specific order. However, early informal methods are often effective in correcting questionable behavior.

a. Consultation—Consultation about sexual harassment is available from the Sexual Harassment Policy Office, Sexual Harassment Advisers (including residence deans), human resources officers, employee relations specialists, counselors at Counseling and Psychological Services (CAPS) or the Help Center, chaplains at Memorial Church, ombudspersons and others. A current list of Sexual Harassment Advisers is available from the Sexual Harassment Policy Office and at http://harass.stanford.edu/SHadvisers.html. Consultation is available for anyone who wants to discuss issues related to sexual harassment, whether or not "harassment" actually has occurred, and whether the person seeking information is a complainant, a person who believes his or her own actions may be the subject of criticism (even if unwarranted), or a third party.

   Often there is a desire that a consultation be confidential or "off the record." This can usually be achieved when individuals discuss concerns about sexual harassment without identifying the other persons involved, and sometimes even without identifying themselves. Confidential consultations about sexual harassment also may be available from persons who, by law, have special professional status, such as:

   i. Counselors at Counseling and Psychological Services (CAPS), http://caps.stanford.edu (http://caps.stanford.edu/)

   ii. Counselors at the Help Center, http://www.stanford.edu/dept/helpcenter (http://www.stanford.edu/dept/helpcenter/)

   iii. Chaplains at Memorial Church

   iv. The University Ombudsperson, https://ombuds.stanford.edu/

   In these latter cases, the level of confidentiality depends on what legal protections are held by the specific persons receiving the information and should be addressed with them before specific facts are disclosed. For more information see http://harass.stanford.edu/confidential.html.

   For further information on confidentiality, see Section 1(d) above.

b. Direct Communication—An individual may act on concerns about sexual harassment directly, by addressing the other party in person or writing a letter describing the unwelcome behavior and its effect and stating that the behavior must stop. A Sexual Harassment Adviser can help the individual plan what to say or write, and likewise can counsel persons who receive such communications. Reprisals against an individual who in good faith initiates such a communication violate this policy.

c. Third Party Intervention—Depending on the circumstances, third party intervention in the workplace, student residence or academic setting may be attempted. Third party intervenors may be the Sexual Harassment Advisers, human resources professionals, the ombudspersons, other faculty or staff, or sometimes mediators unrelated to the University.

   When third party intervention is used, typically the third party (or third parties) will meet privately with each of the persons involved, try to clarify their perceptions and attempt to develop a mutually acceptable understanding that can insure that the parties are comfortable with their future interactions. Other processes, such as a mediated discussion among the parties or with a supervisor, may also be explored in appropriate cases.

   Possible outcomes of third party intervention include explicit agreements about future conduct, changes in workplace assignments, substitution of one class for another, or other relief, where appropriate.

d. Formal Grievance, Appeal, and Disciplinary Processes—Grievance, appeal, or disciplinary processes may be pursued as applicable.

   i. Grievances and Appeals—The applicable procedure depends on the circumstances and the status of the person bringing the charge and the person against whom the charge is brought. Generally, the process consists of the individual's submission of a written statement, a process of fact-finding or investigation by a University representative, followed by a decision and, in some cases, the possibility of one or more appeals, usually to Stanford administrative officers at higher levels. The relevant procedure (see below) should be read carefully, since the procedures vary considerably.

   If the identified University fact-finder or grievance officer has a conflict of interest, an alternate will be arranged, and the Director of the Sexual Harassment Policy Office or the Director of Employee and Labor Relations can help assure that this occurs.

   In most cases, grievances and appeals must be brought within a specified time after the action complained of. While informal resolution efforts will not automatically extend the time limits for filing a grievance or appeal, in appropriate circumstances the complainant and the other relevant parties may mutually agree in writing to extend the time for filing a grievance or appeal.

   A list of the established grievance and appeal procedures is located at http://hrweb.stanford.edu/elr/policies/list_grievance_procedures.html. Copies may also be obtained from the Sexual Harassment Policy Office, http://www.stanford.edu/group/SexHarass (http://studentaffairs.stanford.edu/sara/).

   Copies of the following may be obtained from Employee and Labor Relations, 505 Broadway, Redwood City, CA 94063-8443 (Cardinal Hall, 5th floor):

   1. "Solving Workplace Problems at Stanford: Understanding the Staff Dispute Resolution Policy".

   2. "Solving Workplace Problems at Stanford: Information for Academic Staff – Librarians and Academic Staff – Research Associates".

   3. "The Dispute Resolution Process (A User's Guide)".

   ii. Disciplinary Procedures—In appropriate cases, disciplinary procedures may be initiated. The applicable disciplinary procedure depends on the status of the individual whose conduct is in question. For example, faculty are subject to the Statement on Faculty Discipline (http://www.stanford.edu/dept/provost/faculty/policies/handbook/ch4.html#statementonfacultydiscipline), and students to the Fundamental Standard. For additional information related to student disciplinary procedures, see the Office of Community Standards (http://studentaffairs.stanford.edu/communitystandards/).

The individuals referenced in this section are available to discuss these options and differing methods for dealing with sexual harassment.

4. Procedural Matters

   a. Investigations—If significant facts are contested, an investigation may be undertaken. The investigation will be conducted in a way that respects, to the extent possible, the privacy of all of the persons involved. In appropriate cases, professional investigators may be asked to assist in the investigation. The results of the investigation may be used in the third party intervention process or in a grievance or disciplinary action.

   b. Recordkeeping—The Sexual Harassment Policy Office will track reports of sexual harassment for statistical purposes and report at least annually to the University President concerning their number, nature and disposition.

      The Sexual Harassment Policy Office may keep confidential records of reports of sexual harassment and the actions taken in response to those reports, and use them for purposes such as to identify individuals or departments likely to benefit from training so that training priorities can be established. No identifying information will be retained in cases where the individual accused was not informed that there was a complaint.

   c. Indemnification and Costs—The question sometimes arises as to whether the University will defend and indemnify a Stanford employee accused of sexual harassment. California law provides, in part, "An employer shall indemnify [its] employee for all that the employee necessarily expends or loses in direct consequence of the discharge of his [or her] duties as such." The issue of indemnification depends on the facts and circumstances of each situation. Individuals who violate this policy, however, should be aware that they and/or their schools, institutes, or other units may be required to pay or contribute to any judgments, costs and expenses incurred as a result of behavior that is wrongful and/or contrary to the discharge of the employee's duties. In general, see Administrative Guide Memo 2.4.6 Indemnification (https://adminguide.stanford.edu/chapter-2/subchapter-4/policy-2-4-6/).

5. Resources for Dealing with Sexual Harassment

   a. Advice—Persons who have concerns about sexual harassment should contact the Sexual Harassment Policy Office, any Sexual Harassment Adviser at http://harass.stanford.edu/SHadvisers.html or one of the other individuals listed below. Reports should be made as soon as possible: the earlier the report, the easier it is to investigate and take appropriate remedial action. When reports are long delayed, the University will try to act to the extent it is reasonable to do so, but it may be impossible to achieve a satisfactory result after much time has passed.

      Likewise, anyone who receives a report or a grievance involving sexual harassment should promptly consult with the Sexual Harassment Policy Office or with a Sexual Harassment Adviser.

      There are a number of individuals specially trained and charged with specific responsibilities in the area of sexual harassment. In brief, they are:

      i. Sexual Harassment Advisers (http://harass.stanford.edu/SHadvisers.html) serve as resources to individuals who wish to discuss issues of sexual harassment, either because they have been harassed or because they want information about the University's policy and procedures. There is usually at least one Adviser assigned to each of the schools at the University and to each large work unit; most of the residence deans also have been appointed as Sexual Harassment Advisers. Advisers are also authorized to receive complaints.

      ii. The Director of the Sexual Harassment Policy Office is responsible for the implementation of this policy. The Director's Office also provides advice and consultation to individuals when requested; receives complaints and coordinates their handling; supervises the other Advisers; encourages and assists prevention education for students, faculty and staff; keeps records showing the disposition of complaints; and generally coordinates matters arising under this policy. Because education and awareness are the best ways to prevent sexual harassment; developing awareness, education and training programs and publishing informational material are among the most important functions of the Sexual Harassment Policy Office (http://harass.stanford.edu (http://harass.stanford.edu/)).

      iii. As stated above, individuals with concerns about sexual harassment may also discuss their concerns informally with psychological counselors (for example through CAPS or the HELP Center), chaplains (through the Memorial Chapel), or the University ombudsperson. For more information, see http://harass.stanford.edu/resources.html.

   b. External Reporting—Sexual harassment is prohibited by state and federal law. In addition to the internal resources described above, individuals may pursue complaints directly with the government agencies that deal with unlawful harassment and discrimination claims, e.g., the U.S. Equal Employment Opportunity Commission (EEOC), the Office for Civil Rights (OCR) of the U.S. Department of Education, and the State of California Department of Fair Employment and Housing (DFEH). These agencies are listed in the Government section of the telephone book. A violation of this policy may exist even where the conduct in question does not violate the law.

6. Consensual Sexual or Romantic Relationships

   a. In General—There are special risks in any sexual or romantic relationship between individuals in inherently unequal positions, and parties in such a relationship assume those risks. In the University context, such positions include (but are not limited to) teacher and student, supervisor and employee, senior faculty and junior faculty, mentor and trainee, adviser and advisee, teaching assistant and student, coach and athlete, and the individuals who supervise the day-to-day student living environment and student residents. Because of the potential for conflict of interest, exploitation, favoritism, and bias, such relationships may undermine the real or perceived integrity of the supervision and evaluation provided, and the trust inherent particularly in the teacher-student context. They may, moreover, be less consensual than the individual whose position confers power or authority believes. The relationship is likely to be perceived in different ways by each of the parties to it, especially in retrospect.

      Moreover, such relationships may harm or injure others in the academic or work environment. Relationships in which one party is in a position to review the work or influence the career of the other may provide grounds for complaint by third parties when that relationship gives undue access or advantage, restricts opportunities, or creates a perception of these problems. Furthermore, circumstances may change, and conduct that was previously welcome may become unwelcome. Even when both parties have consented at the outset to a romantic involvement, this past consent does not remove grounds for a charge based upon subsequent unwelcome conduct.

Where such a relationship exists, the person in the position of greater authority or power will bear the primary burden of accountability, and must ensure that he or she—and this is particularly important for teachers—does not exercise any supervisory or evaluative function over the other person in the relationship. Where such recusal is required, the recusing party must also notify his or her supervisor, department chair or dean, so that such chair, dean or supervisor can exercise his or her responsibility to evaluate the adequacy of the alternative supervisory or evaluative arrangements to be put in place. Staff members may notify their local human resources officers. To reiterate, the responsibility for recusal and notification rests with the person in the position of greater authority or power. Failure to comply with these recusal and notification requirements is a violation of this policy, and therefore grounds for discipline. The University has the option to take any action necessary to insure compliance with the spirit of this recusal policy, including transferring either or both employees in order to minimize disruption of the work group. In those extraordinarily rare situations where it is programmatically infeasible to provide alternative supervision or evaluation, the cognizant Dean or Director must approve all evaluative and compensation actions.

b. With Students—At a university, the role of the teacher is multi-faceted, including serving as intellectual guide, counselor, mentor and adviser; the teacher's influence and authority extend far beyond the classroom. Consequently and as a general proposition, the University believes that a sexual or romantic relationship between a teacher and a student, even where consensual and whether or not the student would otherwise be subject to supervision or evaluation by the teacher, is inconsistent with the proper role of the teacher, and should be avoided. The University therefore very strongly discourages such relationships.

7. Policy Review and Evaluation—This policy went into effect on October 6, 1993, and was amended on November 30, 1995, and on May 30, 2002. It is subject to periodic review, and any comments or suggestions should be forwarded to the Director of the Sexual Harassment Policy Office.

Resources

The following is a summary of resources concerning sexual harassment available to members of the Stanford Community:

A brochure containing the policy, a list of current sexual harassment advisers, confidential resources, and other helpful information is available online at the Sexual Harassment Policy Office (http://harass.stanford.edu) web site, and in printed form from the Sexual Harassment Policy Office at Mariposa House, 585 Capistrano Way, Room 208-209, Stanford University, Stanford, CA, 94305-8230; (650) 723-1583; email: harass@stanford.edu. Copies of the University policy on sexual assault, which complements this sexual harassment policy, as well as all other documents mentioned in this section, are also available at the Sexual Harassment Policy Office.

All faculty, staff, and students who have questions regarding this policy and its enforcement can consult with a Sexual Harassment Adviser or can be directed to the local Personnel Officer or Regional Human Resources Manager. Faculty members should contact their dean or department chair, and students should contact the Director of the Sexual Harassment Policy Office or the Dean of Student Affairs.

Sexual Harassment Policy Office—telephone: (650) 723-1583; email: harass@stanford.edu.

Director: Laraine Zappert (Clinical Professor, Psychiatry and Behavioral Sciences)

SEXUAL MISCONDUCT AND SEXUAL ASSAULT

Sexual Misconduct and Sexual Assault

The University's Policy on Sexual Misconduct and Sexual Assault is published in complete form in the Administrative Guide Memo 2.2.4 Sexual Harassment and Consensual Sexual or Romantic Relationships (https://adminguide.stanford.edu/chapter-2/subchapter-2/policy-2-2-4/).

Summary

The following summarizes the policy on Sexual Assault and provides information on resources available to members of the Stanford community.

Policy

Under Title IX, sexual violence (sexual misconduct and sexual assault) is a severe form of sexual harassment. Sexual misconduct and sexual assault are unacceptable and is not tolerated at Stanford University. All University employees (including student residence staff employees) have a duty to report claims of sexual misconduct or sexual assault to Cathy Glaze., Title IX Coordinator at (650) 497-4955 (voice), titleix@stanford.edu (http://relative.pagelegend.com/mailto:titleix@stanford.edu), https://titleix.stanford.edu/. For students, report claims to the Title IX Coordinator or the Office of Sexual Assault and Relationship Abuse (SARA) at (650) 725-1056 or saraoffice@stanford.edu.

The University urges an individual who has been subjected to sexual misconduct or sexual assault to make an official report. A report of the matter will be dealt with promptly. Confidentiality will be maintained to the extent possible.

The University is committed to providing information regarding on- and off-campus services and resources to all parties involved.

Students, faculty and staff found to be in violation of this policy will be subject to discipline up to and including termination, expulsion or other appropriate institutional sanctions; affiliates and program participants may be removed from University programs and/or prevented from returning to campus.

A comprehensive web site dedicated to sexual violence awareness, prevention and support can be found at Office of Sexual Assault & Relationship Abuse Education & Response (SARA) (http://studentaffairs.stanford.edu/sara/). The site contains a list of resources and describes reporting options.

Definitions

What is Sexual Misconduct?

Sexual misconduct is the commission of an unwanted sexual act, whether by an acquaintance or by a stranger, that occurs without indication of consent.

What is Sexual Assault?

Sexual assault is the actual, attempted or threatened unwanted sexual act, whether by an acquaintance or by a stranger, accomplished (1) against a person's will by means of force (express or implied), violence, duress, menace, fear or fraud, or (2) when a person is incapacitated or unaware of the nature of the act, due to unconsciousness, sleep and/or intoxicating substances.

What is Consent?

Consent is informed, freely given, and mutually understood. Consent requires an affirmative act or statement by each participant. If coercion, intimidation, threats and/or physical force are used, there is no consent. If a person is mentally or physically incapacitated or impaired so that the person cannot understand the fact, nature or extent of the sexual situation, there is no consent; this includes conditions due to alcohol or drug consumption or being asleep or unconscious. Whether one has taken advantage of a position of influence over another may be a factor in determining consent.

Notification

With the consent of the victim, allegations of sexual assault received by University offices or personnel shall be communicated promptly to the Department of Public Safety, 711 Serra Street, telephone 9-911 for emergency response or (650) 723-9633 during normal business hours.

Emergency Services Available to Victims

Victims of sexual assault are urged to seek immediate attention from emergency police, medical, and counseling services. On the Stanford campus and in the immediate vicinity, the following provide 24-hour response and will arrange for police assistance, medical assistance, emotional support services, and advocacy and support:

- "911" Emergency Network: dial 9-911 from University phones or 911 from outside phones
- Santa Clara Valley Medical Center, 751 South Bascom Avenue, San Jose, telephone (408) 885-5000
- YWCA Stanford Hotline, for students, telephone (650) 725-9955
- Stanford Hospital and Clinics, 300 Pasteur Drive, Stanford, telephone (650) 723-5111
- Residence and Graduate Life Deans, page through 723-8222, extension 25085

Non-Emergency Resources

Office of Sexual Assault & Relationship Abuse Education & Response (SARA) (725-1056) provides comprehensive and consistent response to incidents of sexual and relationship violence to the campus community. SARA provides case consultation to students and staff, case management for reported assaults and information and referrals to services on and off campus. The office also assists with educational outreach and training to increase awareness, sensitivity, and community accountability in the prevention of these acts. Online information is available at the Sexual Assault & Relationship Abuse Education & Response (SARA) (http://studentaffairs.stanford.edu/sara.html) web site.

Additional resources for students are available at Vaden Health Service at (650) 723-3785, including short-term counseling, referral to long-term therapy, follow-up pregnancy testing, and testing and treatment for sexually transmitted diseases. Additional services for faculty and staff are available at the University's HELP Center, Galvez House (723-4577), including general counseling, information, support, and referral. The University ombuds (723-3682) is available to all in the Stanford community for general counseling, advice, and advocacy. Cathy Glaze, Title IX Coordinator, Kingscote Gardens (2nd floor), 419 Lagunita Drive, Stanford, CA 94305, (650) 497-4955 (voice), (650) 497-9257 (fax), titleix@stanford.edu (http://relative.pagelegend.com/mailto:titleix@stanford.edu), https://titleix.stanford.edu/, is available to assist students to address the effects of sexual harassment and sexual violence

Confidentiality of Information

The University will make reasonable and appropriate efforts to preserve an individual's privacy and protect the confidentiality of information. However, because of laws relating to reporting and other state and federal laws, the University cannot guarantee confidentiality to those who report incidents of sexual violence except where those reports are privileged communications with those in legally protected roles (set forth below).

The professional being consulted should, if possible, make these limits clear before any disclosure of facts.

An individual can speak confidentially with certain individuals in legally protected roles. They include sexual assault counselors such as those at the YWCA Sexual Assault Center at Stanford, the Help Center, Counseling and Psychological Services (CAPS) and clergy. Exceptions to maintaining confidentiality are set by law; for example, physicians and nurses who treat any physical injury sustained during a sexual assault are required to report it to law enforcement. In addition, physicians, nurses, psychologists, psychiatrists, teachers and social workers must report a sexual assault committed against a person under age 18.

Information shared with other individuals is not legally protected from being disclosed. Considerations with respect to a complainant's request for confidentiality include factors such as the University's ability to respond effectively, to prevent further harassment or to ensure the safety of the University community. For example, an advisor, the Dean of Student Life, a Residence Dean or a Resident Assistant may need to inform other individuals to protect their safety or rights, in fairness to the persons involved, or in response to legal requirements. As required by law, all disclosures to any University employee of an on-campus sexual assault must be reported for statistical purposes only (without personal identifiers) to the Stanford University Department of Public Safety, which has the responsibility for tabulating and annually publishing sexual assault and other crime statistics. Such reports are for statistical purposes and do not include individual identities.

State law permits law enforcement authorities to keep confidential the identity of a person officially reporting a sexual assault. The Stanford University Department of Public Safety policy is to maintain such confidentiality. However, if the District Attorney files a criminal charge, confidentiality might not be maintained.

If a complaint is filed with the Office of Judicial Affairs then the accused student must be provided with the name of the alleged victim and witnesses, if applicable. However, accommodations can be made to protect the victim's privacy, as described on the website for the Office of Judicial Affairs.

Information about Options

The University offices responding to allegations of sexual misconduct or sexual assault will inform affected individuals, at a minimum, of the options of: criminal prosecution, civil prosecution, the disciplinary process, the appropriate Title IX grievance procedure, alternative housing assignments, and academic assistance alternatives.

SMOKE-FREE ENVIRONMENT

Smoke-Free Environment

The University's policy on a smoke-free environment is published in its complete form in the Administrative Guide Memo 2.2.6 Smoke-Free Environment (https://adminguide.stanford.edu/chapter-2/subchapter-2/policy-2-2-6/).

Applicability

Applies to all academic and administrative units of Stanford University, including SLAC and all campus student housing. This policy does not supersede more restrictive policies that may be in force to comply with federal, state, or local laws or ordinances. The President must approve more restrictive policies not required by law.

1. Policy

It is the policy of Stanford University that all smoking, including but not limited to tobacco products and the use of electronic smoking devices, is prohibited in enclosed buildings and facilities and during indoor or outdoor events on the campus.

2. Definition

“Smoke-free” refers to an environment that is free of smoke from, among other things, tobacco products and/or vapors from electronic smoking devices.

3. Guidelines

a. Smoking-Prohibited Areas

Specifically, smoking is prohibited in classrooms and offices, all enclosed buildings and facilities, in covered walkways, in University vehicles, during indoor or outdoor athletic events, during other University sponsored or designated indoor or outdoor events and in outdoor areas designated by signage as "smoking prohibited" areas.

- Ashtrays will not be provided in any enclosed University building or facility.
- "Smoking Prohibited" signs will be posted.

b. Outdoor Smoking Areas

Except where otherwise posted as a "smoking prohibited area," smoking is generally permitted in outdoor areas, except during organized events. Outdoor smoking in non-prohibited areas must be at least 30 feet away from doorways, open windows, covered walkways, and ventilation systems to prevent smoke from entering enclosed buildings and facilities. To accommodate faculty, staff, and students who smoke, Vice Presidents, Vice Provosts, and Deans may designate certain areas of existing courtyards and patios as smoking areas, and must provide ashtrays. The specific academic or administrative unit(s) will be responsible for absorbing all costs associated with providing designated smoking areas and ashtrays.

4. Enforcement

This policy relies on the consideration and cooperation of smokers and non-smokers. It is the responsibility of all members of the University community to observe and follow this policy and its guidelines.

a. Smoking Cessation Information

Smoking cessation programs are available for faculty and staff through the Center for Research in Disease Prevention, Health Improvement Program (HIP). Students may contact the Health Promotion Program (HPP) through the Student Health Center for smoking cessation information or programs.

b. Repeated Violations

Faculty, staff and, students repeatedly violating this policy may be subject to appropriate action to correct any violation(s) and prevent future occurrences.

5. Implementation and Distribution

This policy will be disseminated to all faculty, staff and students and to all new members of the University Community.

STANFORD NAME AND TRADEMARKS

Ownership and Use of Stanford Name and Trademarks

Stanford registered marks, as well as other names, seals, logos, and other symbols and marks that are representative of Stanford, may be used solely with permission of Stanford. Merchandise bearing Stanford's names and marks, such as t-shirts, glassware, and notebooks, must be licensed. For complete text of the currently applicable policy, including the University officers authorized to grant permission to use the Stanford name and marks, see Administrative Guide Memo 1.5.4 Ownership and Use of Stanford Name and Trademarks (https://adminguide.stanford.edu/chapter-1/subchapter-5/policy-1-5-4/).

STUDENT NON-ACADEMIC GRIEVANCE PROCEDURE

Student Non-Academic Grievance Procedure

Policy

The following is the policy:

1. Applicability

   a. It is perhaps inevitable in any university that some students may at times feel improperly treated, and that concerns about unfairness (including potential discrimination and harassment) may also at times arise.

      In this regard (and although this grievance procedure is not limited to concerns of discrimination), Stanford University's Nondiscrimination Policy provides in part: "Stanford University admits qualified students of any race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity, veteran status, or marital status to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, in the administration of the University's programs and activities, Stanford prohibits unlawful discrimination on the basis of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity or expression, veteran status, marital status or any other characteristic protected by applicable law; Stanford also prohibits unlawful harassment including sexual harassment and sexual violence."

   b. At Stanford, there are a number of grievance procedures through which students can raise and seek redress for what they believe to be unfair, improper or discriminatory decisions, actions, or treatment. For example:

      i. If the matter involves an academic decision, the Student Academic Grievance Procedure may be the applicable procedure.
      ii. If the matter involves a disability-related concern, the Student ADA/Section 504 Grievance Procedure may be applicable.
      iii. If the matter involves a student-athlete and his or her sport, the Student-Athlete Grievance Procedure may be applicable.

   c. The purpose of the Student Non-Academic Grievance Procedure is to provide a process for students to seek resolution of disputes and grievances that may not fall within the scope of one of the other grievance processes, including those which may arise in a student's capacity as a student-employee.

   d. As a general proposition, this procedure is available to undergraduates and graduate students at Stanford University. It is designed to address individual decisions or individual actions that affect the grievant personally in his or her capacity as a student, but it does not apply to matters proceeding or addressed through the Office of Community Standards or through the Dean's leave policy. This is likewise not a grievance procedure to address the concerns of student groups. Similarly and as a general proposition, dissatisfaction with a departmental, school, or University policy or practice of broad or general application is not grounds for a grievance under this procedure; the Director of the Diversity and Access Office (hereafter "the Director") may, in his or her discretion, entertain such a grievance in exceptional circumstances, such as where (for example) the policy or practice is alleged to be contrary to law. In the same way, the Director may entertain a grievance under this procedure brought by an individual who is not an undergraduate or graduate student, in an appropriate case or as required by law.

   e. The Director is responsible for administering this Student Non-Academic Grievance Procedure.

      i. The Director may be contacted at: Director of the Diversity and Access Office, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (http://relative.pagelegend.com/mailto:equal.opportunity@stanford.edu) (email), http://www.stanford.edu/dept/ocr (http://www.stanford.edu/dept/ocr/).
      ii. The Director in his or her sole discretion can decide whether to refer a grievance brought under this procedure to another grievance process. In cases involving allegations of sexual harassment in particular, the Director may wish to consult with the Director of the Sexual Harassment Policy Office as to the most appropriate way to proceed; see Section 5.d below. In cases involving student employment, the Director may wish to consult with the University's Department of Human Resources.

2. Informal Resolution

   a. As a general proposition (and although particular circumstances may warrant an exception), the student should first discuss the problem and seek a solution with the individual(s) most directly involved.

   b. If no resolution results (or if circumstances make discussion inappropriate with the person most directly involved), the student should then consult with the individual at the next (higher) administrative level in the department, school, residence or University administrative unit. Serious efforts should be made to resolve the issue locally at an informal level without resort to a formal grievance; such efforts may continue even after the formal process is underway.

3. Formal Grievance

   a. If informal means of resolution prove inadequate, the student should set forth in writing the substance of the complaint, the grounds for it and the evidence on which it is based, and the efforts taken to date to resolve the matter. It is at this stage that the complaint becomes a formal grievance.

   b. The grievance document should be submitted to the Director. A grievance should be filed in a timely fashion, i.e., normally no later than thirty days after of the end of the academic quarter in which the action that is the subject of the grievance occurred. Except in extraordinary circumstances, delay in filing a grievance will be grounds for rejection of that grievance.

   c. The Director will promptly initiate a review, which should normally be completed within sixty days. The Director may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance officer or other designee, who will look into and/or address the matter as the Director directs. The Director may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.

   d. In undertaking this review, either the Director, his or her designee, or the grievance officer may request a response to the issues raised in the grievance from any individuals believed to have

information the reviewer considers relevant, including faculty, staff and students.

e. The Director (or his or her designee) will issue his or her decision in writing, and take steps to initiate such corrective action as is called for (if any). Conduct meriting discipline will be brought to the attention of the appropriate disciplinary process.

4. Appeal

a. If the student is dissatisfied with the disposition by the Director (or his or her designee), he or she may appeal to the Provost (Office of the President and Provost, Building 10, Stanford, CA 94305-2061; phone 650-725-4075; fax 650-725-1347). The appeal should be filed in writing with the Provost within ten days of the issuance of the decision by the Director (or his or her designee); a delay in filing the appeal may be grounds for rejection of that appeal.

b. The Provost may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance appeal officer, who will review the matter at the Provost's direction. The Provost may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.

c. The Provost should normally complete his or her review of the appeal and issue his or her decision in writing within forty-five days. That decision is final.

5. General Provisions

a. Time Guidelines—The time frames set forth herein are guidelines. They may be extended by the Director or Provost, as applicable, in his or her discretion for good cause (including for reasons relating to breaks in the academic calendar), and will nearly always be extended during summers and the winter closure.

b. Advisers—A student initiating or participating in a grievance under this procedure may be accompanied by an adviser in any discussion with the Director, the Provost or their designees, or a grievance or grievance appeal officer under this procedure; any adviser must be a current Stanford faculty, staff member or student.

c. Ombuds—Students should be aware that the University Ombuds (http://www.stanford.edu/dept/ocr/ombuds (http://www.stanford.edu/dept/ocr/ombuds/)) is available to discuss and advise on any matters of University concern and frequently help expedite resolution of such matters. Although it has no decision making authority, the Ombuds' Office has wide powers of inquiry.

d. Sexual Harassment and Sexual Misconduct and Sexual Assault—For information and resources concerning sexual harassment, students should refer to the web page of the Sexual Harassment Policy Office at http://harass.stanford.edu (http://harass.stanford.edu/). For information and resources concerning sexual assault and relationship abuse, students should refer to the web page of the Sexual Violence Advisory Board at http://www.stanford.edu/group/svab/help.shtml (http://www.stanford.edu/group/svab/help.shtml/).

e. No retaliation—Stanford University prohibits retaliation or reprisals against individuals based on their pursuit in good faith of a grievance under this procedure, or their participation in good faith in the grievance process.

f. Standards for Review—If the grievance involves a decision that is being challenged, the review by the Director, as well as the review by the Provost on appeal, usually will be limited to the following considerations:

i. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?

ii. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?

iii. Given the proper facts, criteria, and procedures, was the decision one which a person in the position of the decision maker might reasonably have made?

TITLE VI OF THE CIVIL RIGHTS ACT OF 1964

Title VI of the Civil Rights Act of 1964

It is the policy of Stanford University to comply with Title VI of the Civil Rights Act of 1964 and its regulations, which prohibit unlawful discrimination on the basis of race, color, and national origin. The Title VI Compliance Officer is the Director of the Diversity and Access Office, who has been appointed to coordinate the University's efforts to comply with the law. Anyone who believes that Stanford is not in compliance with Title VI and its regulations should contact the Director of the Diversity and Access Office, Kingscote Gardens, 419 Lagunita Drive, Suite 130, Stanford, CA 94305-8550; (650) 723-0755 (voice), (650) 723-1791 (fax), equal.opportunity@stanford.edu (http://relative.pagelegend.com/mailto:equal.opportunity@stanford.edu) (email). Grievance procedures to address complaints of discrimination on the basis of race, color, and national origin are set forth in the "Student Non-Academic Grievance Procedure (p.)." See also Administrative Guide Memo 2.2.1 General Personnel Policies (https://adminguide.stanford.edu/chapter-2/subchapter-2/policy-2-2-1/).

TITLE IX OF THE EDUCATION AMENDMENTS OF 1972

Title IX of the Education Amendments of 1972

It is the policy of Stanford University to comply with Title IX of the Education Amendment of 1972 and its regulations, which prohibit unlawful discrimination on the basis of sex. The Title IX Compliance Officer is Catherine Glaze, who has been appointed to coordinate the University's efforts to comply with the law. Anyone who believes that Stanford is not in compliance with Title IX and its regulations should contact the Title IX Coordinator, Kingscote Gardens (2nd floor), 419 Lagunita Drive, Stanford, CA 94305, (650) 497-4955 (voice), (650) 497-9257 (fax), titleix@stanford.edu (email). (See also the following section for addressing Title IX Concerns relating to sexual harassment.)

Title IX Concerns Relating to Sexual Harassment and the Violence Against Women Reauthorization Act of 2013

Catherine Glaze has been appointed Stanford's Title IX Coordinator to respond to matters of sexual assault, relationship (dating) violence and stalking (prohibited conduct). The Title IX Coordinator serves as a resource to review allegations of prohibited conduct and may provide interim accommodations relating to housing, academics, or no-contact letters while a matter is being reviewed. When prohibited conduct has been confirmed by a preponderance of the evidence, the Title IX Coordinator will provide long term accommodations and services to students to address the effects of sexual harassment and sexual violence. The Title IX Student Policy (https://titleix.stanford.edu/sites/default/files/title_ix_student_policy_ay_2013-14_faculty_staff_may_2014_final_0.pdf) provides the grievance procedure and appeal mechanism to review the University's actions relating to a Title IX concern involving Prohibited Conduct; see the Title IX web site (https://titleix.stanford.edu/) for additional information. Additional resources are available the Sexual Assault Support and Resources (https://notalone.stanford.edu/) web site. Ms. Glaze's contact information is titleix@stanford.edu; (650) 497-4955. An individual may contact the U.S. Department of Education, Office for Civil Rights (OCR). See also Administrative Guide Memos 2.1.2 Recruiting and Hiring of Regular Staff (https://adminguide.stanford.edu/chapter-2/subchapter-1/policy-2-1-2/), 1.7.1 Sexual Harassment (https://adminguide.stanford.edu/chapter-1/subchapter-7/policy-1-7-1/), 1.7.2, Consensual Sexual or Romantic Relationships (https://adminguide.stanford.edu/chapter-1/subchapter-7/policy-1-7-2/), and 1.7.3, Sexual Misconduct and Sexual Assault (https://adminguide.stanford.edu/chapter-1/subchapter-7/policy-1-7-3/).

VISITOR POLICY • UNIVERSITY STATEMENT ON PRIVACY

Visitor Policy/University Statement on Privacy

Stanford University has an interest in ensuring that the privacy of its students, faculty, and staff is respected, and that no activities interfere with education, research, or residential life.

The University is private property; however, some areas of the campus typically are open to visitors. These areas include White Plaza, public eating areas (such as those at Tresidder Union), outdoor touring areas, and locations to which the public has been invited by advertised notice (such as for public educational, cultural, or athletic events). Even in these locations, visitors must not interfere with the privacy of students, faculty, and staff, or with educational, research, and residential activities. The University may revoke at any time permission to be present in these, or any other areas. Visitors should not be in academic or residential areas unless they have been invited for appropriate business or social purposes by the responsible faculty member, student, or staff member.

No commercial activity, including taking photos or similar audio or visual recordings that are sold to others or otherwise used for commercial purposes, may occur on the campus or in University programs without the University's permission. Requests for permission should be submitted to the Director of University Communications or, as appropriate, the Dean of Students, the Department of Athletics, or the Office of Public Events. Recognized student groups and official units of the University will be granted such permission so long as they do not violate privacy or property interests of others; so long as any sale of their products is predominantly on campus to students, faculty, and staff; and so long as they comply with applicable University policies and procedures.

Violators of this policy may be subject to criminal and/or civil liability, as well as University disciplinary action.

UNDERGRADUATE EDUCATION (VPUE)

Established in 1995, the Office of the Vice Provost for Undergraduate Education (VPUE) comprises the Bing Overseas Studies Program, Program in Writing & Rhetoric, Stanford Introductory Studies, and Academic Advising. VPUE fosters innovation, integration, and pedagogical advancement of the Stanford undergraduate journey. Working with our partners, we prepare Stanford students to be engaged citizens with the creative confidence to tackle the world's most complex challenges.

VPUE programs for first- and second-year students include New Student Orientation/Approaching Stanford, the Leland Scholars Program, Frosh 101, Thinking Matters, Program in Writing and Rhetoric, Integrated Learning Environments, Education as Self Fashioning, Introductory Seminars, and Sophomore College. Programs for more advanced students include the Bing Overseas Studies Program, Stanford in New York, Writing in the Major, Undergraduate Research, Arts Intensive, and Bing Honors College. Academic Advising and the Hume Center for Writing and Speaking serve undergraduates throughout their time at Stanford. The office of the VPUE works closely with the office of the Vice Provost for Student Affairs and the Admissions Office, as well as with all seven Schools. The Vice Provost for Undergraduate Education reports to the Provost.

Policies governing undergraduate education are formulated by Faculty Senate committees and voted into legislation by the Faculty Senate. The Committee on Undergraduate Standards and Policy (C-USP) addresses such topics as general education requirements, grading, awards, advising, and teaching evaluation. The Committee on Review of Undergraduate Majors (C-RUM) oversees the initiation and review of undergraduate degree programs. Committee members include the Vice Provost for Undergraduate Education or his delegated staff (ex-officio) and representatives from the faculty at large, administration (such as the Office of the University Registrar), and students. The Associated Students of Stanford University (ASSU) nominations committee selects student members. The VPUE also maintains, by rule of the Faculty Senate, the Thinking Matters Governance Board, the Writing and Rhetoric Governance Board, and the Breadth Governance Board to oversee these university degree requirements, as well as the Committee on Residential Learning to oversee residential learning programs. Finally, the Undergraduate Advisory Council (UGAC) was established by the provost in 1996 to serve as the main faculty advisory body for the Vice Provost for Undergraduate Education.

Vice Provost for Undergraduate Education: Sarah Church

Senior Associate Vice Provost for Undergraduate Education: Gordon Chang, Professor of History

Senior Associate Vice Provost for Undergraduate Education: Sharon Palmer

Senior Associate Vice Provost for Finance and Administration: Jeanne Berent

ACADEMIC ADVISING

Academic Advising

Central Office: Sweet Hall, First Floor
Phone: (650) 723-2426
Website: http://advising.stanford.edu
Email: advising@stanford.edu
Appointments: Visit http://advising.stanford.edu or call (650) 723-2426

Academic Advising upholds the mission, standards, and requirements of the University, introduces students to the full intellectual richness of undergraduate study at Stanford, supports students in their academic and intellectual pursuits, and instills within them a sense of identity within and belonging to our community of scholars at Stanford. Academic Advising is responsible for facilitating new students' transition to Stanford, academic advising, and academic policy and progress.

Transitioning New Students

Academic Advising is responsible for the Approaching Stanford program, which guides new students through the process of coming to Stanford, from their admission to the University until the first day of class. This process culminates with New Student Orientation, which is required for all new first-year and transfer students. See the Approaching Stanford (https://approaching.stanford.edu/) website for additional information.

First-Year and Transfer Student Policies

Stanford values the transition process as the foundation for thriving both academically and personally in our community. The following policies support this principle and apply to first-year and new transfer students:

- All first-year and new transfer students are required to attend New Student Orientation (NSO) and must be checked in by the first day of NSO in early September.
- First-year and new transfer students are required to live on campus in University housing for three consecutive quarters in their first year. Should behavior warrant a first-year student's removal from the residences, that student cannot enroll in classes until they have returned to the residential community. This requirement will be waived in Academic Year 2020-2021 due to COVID-19 and remote learning.
- When circumstances arise which make it advisable for a first-year to take a leave absence at any time during the first year, they are required to wait until Autumn Quarter of the following year to return to Stanford.
- First-year and new transfer students cannot enroll in the Summer Quarter prior to their first year unless they are participating in a VPUE-sponsored program. Exceptions are very rarely granted.

Advising

Academic Advising pairs each first-year student with a professional academic advisor - usually an Academic Advising Director. Academic Advising Directors advise students broadly on their courses of study and long-term goals and can answer questions about academic policy. The Academic Advising staff also includes professional advisors in Sweet Hall who are both general and specialized academic advisors in the areas of pre-professional advising, returning student and transfer student advising, or coterminal advising, as well as advisors in the Athletic Academic Resource Center (https://aarc.stanford.edu) (AARC) who are general and specialized academic advisors assigned to all varsity student-athletes based on their sport.

Together with advisors at the Overseas Resource Center and the Haas Center for Public Service (http://haas.stanford.edu/), academic advisors help prepare students to compete for nationally competitive fellowships.

Academic Advising also administers the campus nomination process for several U.S.-based fellowships. See the Fellowships (https://undergrad.stanford.edu/opportunities-research/fellowships/) website for more information on fellowship opportunities.

Academic Advising also offers workshops and individual consultations on planning for graduate or professional studies (e.g., business, education, law, and medicine) and on general application procedures, including how to write personal statements, how to solicit letters of recommendation, and how to prepare for interviews. See the Planning for Graduate and Professional School (https://undergrad.stanford.edu/advising/graduate-and-professional-school-general-considerations/) website for more information.

See the Academic Advising website (http://advising.stanford.edu) for more information about academic advising, programming, and support for undergraduates.

Academic Policy

Academic Advising oversees the implementation of University academic policies pertaining to undergraduates, including requests for exceptions to academic policy and monitoring academic progress. All academic advisors support students with an academic status (e.g., academic probation, provisional registration, or academic suspension). For more information about academic policies that academic advisors help students navigate, see the Academic Policies (https://undergrad.stanford.edu/planning/academic-policies/) section of the Academic Advising website.

Leland Scholars Program

Offices: Sweet Hall, Garden Level
Mail code: 94305-3092
Email: thelspteam@stanford.edu (lelandscholars@stanford.edu)
Website: http://lelandscholars.stanford.edu (http://lelandscholars.stanford.edu/)

In recognizing the need to prepare first-year students for the academic, intellectual, social, and personal challenges they will face at Stanford, the Leland Scholars Program (LSP) facilitates the transition to college for incoming frosh who may be the first in their family to attend college or attended under-resourced schools or communities. Scholars participate in a four-week residential program in the summer prior to arrival on campus. This fully-funded program has a carefully crafted schedule of activities, coursework, discussions, and trips designed to support the transition to Stanford. During the academic year, Leland Scholars have access to additional advising and frosh seminars that sustain the community and reinforce the skills and strategies acquired during the program.

Frosh 101

Offices: Sweet Hall, Garden Level
Mail code: 94305-3092
Email: frosh101program@stanford.edu
Website: http://frosh101.stanford.edu

Frosh 101 and Transfer 101 (UAR 201) are discussion style courses designed to support first-year students transition to Stanford's dynamic campus. In Frosh 101 and Transfer 101, two upper-class students build community with first-year students as they lead weekly activities and conversations designed to help students:

- Establish meaningful friendships
- Gain advice from mentors
- Develop stress management tools
- Learn skills that enhance inclusion and belonging
- Grow empathy and perspective taking skills

- Make space for reflection and value setting
- Share your story and learn more about your peers through spotlights
- Co-create healthy, inclusive, communities of belonging and support with other Stanford students

Courses

UAR 20. Third Book Seminar. 1 Unit.
The third of the frosh Three Books program is Between the World and Me, by Ta-Nehisi Coates. This weekly discussion seminar will read and discuss Coates in depth, connecting it to other short writings on topics including the history of race in the United States, the Black Lives Matter protests, how race shapes education, reparations, the role of HBCUs, raising children in the midst of racial tensions. Open enrollment but preference to frosh.

UAR 41. OXC: Residential Exploration, Advocacy, Leadership. 1 Unit.
Explore concepts in leadership. Examine academic and personal issues affecting students and develop skills and approaches necessary to tackle the political, educational, and socioeconomic issues towards future change. An OpenXChange program.
Same as: REAL

UAR 42A. LSP First Year Seminar. 1 Unit.
For freshmen who participated in the Leland Scholars Program and other students who identify as First Generation and/or Low Income (FLI). This seminar supports students in the first year in the areas of institutional engagement, academic empowerment, their sense of belonging to Stanford, and builds their cohort identity.

UAR 42B. LSP First Year Seminar B. 1 Unit.
For freshmen who participated in the Leland Scholars Program and other students who identify as First Generation and/or Low Income (FLI). This seminar supports students in the first year in the areas of institutional engagement, academic empowerment, their sense of belonging to Stanford, and builds their cohort identity.

UAR 43. Leland Scholars Program. 1 Unit.
This course is offered in August prior to start of fall quarter for participants of the Leland Scholars Program. This course focuses on supporting participants transition to Stanford by providing workshops and opportunities to help students enhance academic skills, develop insight into self, connect to Stanford's resources, and build relationship with their peers.

UAR 44. Preparation for Success in University-Level Mathematics. 1 Unit.
In this course, we will explore fundamental mathematical concepts necessary for success in Calculus and higher level mathematics courses at Stanford University, with a focus on how such concepts are used in particular problem-solving contexts in Calculus and beyond. We will engage deeply with the mathematical concepts that form the foundation for problem-solving tools and techniques, so that students fully understand the how and why behind the methods, and are empowered to solve a broad range of problems in mathematics. Note: course offered in August prior to start of fall quarter, and only Leland Scholar Program participants will register.

UAR 56. Building a Successful Academic Career. 1-2 Unit.
For frosh in expanded advising programs. Techniques for honing academic skills for college, and applying those skills to better define intellectual identity in academic pursuits. May be repeated for credit.

UAR 71. Returning from Study Abroad. 1 Unit.
In this course, students will find the space to define their study abroad experience as well as articulate the ways in which their worldview perspectives may have shifted. Therefore, students will engage in deep mutual exchanges and personal introspection about their experiences abroad. Throughout the course, we will define their experience abroad while continually making-meaning as their new perspectives are supported and challenge amongst members of the Stanford community. Students will end the course by crafting action steps for moving forward with the ability to tell their study abroad story in compelling ways that can be applied to personal, social, academic, and professional realms of their lives.

UAR 81. OXC: Casa Zapata Pre-Assignee Seminar. 1 Unit.
This residence-based seminar is focused on skills building, practical workshops, and theme presentations promoting the breadth of diversity of our Zapata community. Through the seminar, the pre-assignee group will connect to the Zapata community, develop as resources for the community, and engage in topics that are meaningful to them and their community. This is an OpenXChange offering.

UAR 91. OXC: Ujamaa House Pre-Assignee Seminar. 1 Unit.
This one-unit seminar will expose students to various topics about the AfricannDiaspora. Upperclassmen Pre-Assignees will work closely with Ethnic ThemenAssociates/Resident Fellow to add breadth and depth to their presentations. To receive credit you must attend 7 Theme Programs (not including your own) and fill out Pre-Assignee Evaluations provided by Ethnic Theme Associates. Through the seminar, the pre-assignee group will connect to the Zapata community, develop as resources for the community, and engage in topics that are meaningful to them and their community. This is an OpenXChange offering.

UAR 101A. Frosh 101: In-Person. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer. Please enroll in the time slot that works best for your schedule - students will be grouped in sections with others based on the time they sign up for.

UAR 101B. Frosh 101: Remote. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer. Please enroll in the time slot that works best for your schedule - students will be grouped in sections with others based on the time they sign up for.

UAR 101C. Frosh 101 in Florence Moore. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer. Students who are assigned to the Florence Moore neighborhood complex should enroll in this course.

UAR 101D. Frosh 101 in Lagunita. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer. Students who are assigned to the Lagunita neighborhood complex should enroll in this course.

UAR 101E. Frosh 101 in Roble. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer. Students who are assigned to the Roble neighborhood complex should enroll in this course.

UAR 101F. Frosh 101 in Stern. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer. Students who are assigned to the Stern neighborhood complex should enroll in this course.

UAR 101G. Frosh 101 in Toyon. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer. Students who are assigned to the Toyon neighborhood complex should enroll in this course.

UAR 101H. Frosh 101 in Wilbur. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer. Students who are assigned to the Wilbur neighborhood complex should enroll in this course.

UAR 101I. Frosh 101 in Ethnic Theme Dorms. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer. Students who are assigned to the one of the Ethnic Theme Dorms (Casa Zapata, Muwekma-tah-ruk, Okada, Ujamaa) should enroll in this course.
Same as: ETD

UAR 101J. Frosh 101 in Branner. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer. Students who are assigned to the Branner neighborhood complex should enroll in this course.

UAR 101K. Frosh 101 in Gerhard Caspar Quad. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer. Students who are assigned to the Gerhard Caspar Quad neighborhood complex should enroll in this course.

UAR 101L. Frosh 101 in Governor's Corner. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer. Students who are assigned to the Governor's Corner neighborhood complex should enroll in this course.

UAR 101M. Frosh 101 in Okada. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer.

UAR 101N. Frosh 101 in Otero. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer.

UAR 101O. Frosh 101 in Potter. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer.

UAR 101P. Frosh 101 in Rinconada. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer.

UAR 101Q. Frosh 101 in Robinson. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer.

UAR 101R. Frosh 101 in Roble. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer.

UAR 101S. Frosh 101 in Toyon. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer.

UAR 101T. Frosh 101 in Ujamaa. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer.

UAR 101U. Frosh 101 in West FloMo. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer.
Same as: Gavilan

UAR 101V. Frosh 101 in West Lag. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. UAR 101W. Frosh 101 in Lantana. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer.

UAR 101X. Frosh 101. 2 Units.
Frosh 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Frosh 101, approximately 10 frosh will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer. This course is intended for first year students who will not be physically on-campus in the Fall, but still wish to enroll in virtual sections. Same as: Misc

UAR 194A. Frosh 101: Leader Training. 2 Units.
This course will prepare students to lead Frosh 101, a discussion style course designed to help first-year students with their transition to Stanford's dynamic campus. This course will expose students to inclusive teaching practices and research on the impact mental health, diversity and inclusion and sense of belonging have on the experiences of undergraduates. This course is the first of two courses that Frosh 101 leaders will take. Prerequisite: only students who have applied and accepted to be Frosh 101 section leaders can enroll.

UAR 194B. Frosh 101: Curriculum Leader Training. 2 Units.
This course will provide Frosh 101 leaders with the content and facilitator training needed to lead a discussion style course designed to support first-year students in their transition to Stanford's dynamic campus. Prerequisite: EDUC 194A.

UAR 201. Transfer 101. 2 Units.
Transfer 101 is a discussion style course designed to help first-year students transition to Stanford's dynamic campus. In Transfer 101, transfer students will come together each week to learn more about your peers, yourself, and who you will be in this new environment. Upperclass students will lead you through activities and discussions that will serve to build the foundation for a strong community that is inclusive of diversity and promotes emotional and social wellbeing. This course will also create space for you to reflect on your values and goals as you make important decisions about how you will navigate all that Stanford has to offer.

UAR 301. Reflecting on Your Education: Making Sense of Your Time at Stanford. 2 Units.
In this seminar, designed for seniors graduating in the spring, you will reflect on your Stanford education. By delving deeply into Stanford's academic mission, the liberal arts model, and your own transcript, we will address a variety of questions through a personal and intellectual lens. Every transcript tells a story, both by what's there and what isn't - what story does yours tell? How do you take control of that narrative and articulate to others what your education has done for you? What are you getting from completing your Ways and 180+ units, and how did those academic experiences shape who you have become today? What do you share with other Stanford graduates and alumni? We'll tackle these questions, and together, we'll take a look at the bigger picture - what does it mean to get 'A Stanford Education'?.

STANFORD INTRODUCTORY STUDIES

Stanford Introductory Studies

Stanford Introductory Studies (SIS) is a unit in the office of the Vice Provost for Undergraduate Education that manages required and elective academic programs for first- and second-year students:

- Thinking Matters
- Introductory Seminars
- Education as Self-Fashioning (ESF)
- Immersion in the Arts: Living in Culture (ITALIC)
- Structured Liberal Education (SLE)
- Sophomore College
- Arts Intensive

More than 300 tenure-track faculty from all seven schools of the University teach in one or more of these SIS programs, sharing their enthusiasm for learning while encouraging students to discover their intellectual interests. SIS classes promote active learning in an inclusive and supportive classroom environment where individual students receive individual attention and support for their exploration of the full range of expansive and diverse academic opportunities offered at Stanford.

SIS Programs

The Thinking Matters (p. 169) program oversees a curriculum of team-taught required courses and provides entering students with a gateway to liberal education and a guided transition to the intellectual life of the University.

The Introductory Seminars (p. 169) program connects frosh and sophomores with the research faculty of the University through more than 200 small, departmentally based classes drawn from the full range of scholarship and discovery at Stanford.

Education as Self-Fashioning (p. 171) classes focus on the meaning and purpose of a liberal education in seminars that integrate writing instruction with discussion.

SLE (p. 170) and ITALIC (p. 170) offer a comprehensive approach to liberal education throughout the entire year, by integrating academic and residential experiences.

The Sophomore College (p. 171) and Arts Intensive (p. 171) programs immerse students in an academically focused, living/learning residential community during the month of September.

Thinking Matters

Faculty Director: Dan Edelstein, French and (by courtesy) History

Deputy Faculty Director: Lisa Surwillo, Iberian and Latin American Cultures

Associate Vice Provost for Undergraduate Education and Program Director, Stanford Introductory Studies: Parna Sengupta

Senior Associate Director: Dayo Mitchell

Affiliated Faculty: Lanier Anderson (Philosophy), Julie Baker (Genetics), Chris Bobonich (Philosophy), Emilee Chapman (Political Science), Cari Costanzo (Anthropology), Brian Coyne (Political Science), Adrian Daub (Comparative Literature and German Studies), Gordon Chang (History), Gilbert Chu (Medicine), Larry Diamond (FSI and Hoover), Dan Edelstein (French and History), Paul Edwards (FSI), James Fishkin (Communications), Kathryn Gin Lum (Religion) Heather Hadlock (Music), Stephen Hinton (Music), Adam Johnson (English), Pam Karlan (School of Law), Ari Kelman (School of Education), Joseph Lipsick (School of Medicine), S. Lochlann Jain (Anthropology), Stephen Luby (Medicine), David Magnus (School of Medicine), Ian Morris (Classics), Scott Sagan (Political Science), Gabriella Safran (Slavic), Wendy Salkin (Philosophy), Debra Satz (Philosophy), Lisa Surwillo (Iberian and Latin American Cultures), Blakey Vermeule (English), Ban Wang (East Asian Languages and Cultures), Ge Wang (Music and Computer Science), Allen Weiner (School of Law), Kritika Yegenashankaran (CTL and Philosophy).

Lecturers: Artemis Brod, Jonathan Chu, Collin Closek, Chloe Edmondson, Cynthia Flores, Jennifer Greenburg, Alison Laurence, Ameer Loggins, Nicole Martin, Sara Mrsny, Lexi Neame, Kirsten Paige, Adwait Parker, Emily Rials, Evan Sandlin, Tim Sorg, Justin Tackett, Jonathan Tang, Racheli Wercberger, Shizuka Yamada.

Offices: Sweet Hall, Second Floor
Mail code: 94305-3068
Phone: (650) 723-0944
Email: thinkingmatters@stanford.edu
Web Site: https://undergrad.stanford.edu/programs/thinking-matters (https://undergrad.stanford.edu/programs/thinking-matters/)

Thinking Matters courses are listed under the subject code THINK (https://explorecourses.stanford.edu/search/?view=catalog&filter-coursestatus-Active=on&page=0&catalog=&academicYear=20172018&q=THINK&collapse=) on the Stanford Bulletin's ExploreCourses web site.

Thinking Matters offers courses that satisfy the one quarter first-year requirement. Taught by faculty from a wide range of disciplines and fields, the Thinking Matters (THINK) requirement helps students develop the ability to ask rigorous and genuine questions that can lead to scientific experimentation or literary interpretation or social policy analysis. Through the study of these questions and problems, students develop critical skills in interpretation, reasoning, and analysis as well as enhance capacities for writing and discussion.

Thinking Matters Courses Offered in 2020-21

Introductory Seminars

Faculty Director: Lisa Surwillo, Iberian and Latin American Cultures

Associate Vice Provost for Undergraduate Education and Program Director, Stanford Introductory Studies: Parna Sengupta

Associate Director of Introductory Seminars and Faculty Development: Lauri Dietz

Faculty: More than 200 faculty from the Schools of Humanities & Sciences; Engineering; Law; Medicine; Earth, Energy & Environmental Sciences; and, the Graduate Schools of Business and Education

Offices: Sweet Hall, Second Floor
Mail Code: 94305-3068
Phone: (650) 724-2405
Email: introsems@stanford.edu
Web Site: http://introsems.stanford.edu

The Introductory Seminars program offers more than 200 small classes for first- and second-year students taught by faculty from across the seven Schools of the University. Professors teach subjects drawn from their research and scholarship and engage students in deep investigation of important questions and issues. Seminars require little or no formal background, and welcome first-year students and sophomores to Stanford's intellectual community. A complete listing of the IntroSems can be found at ExploreIntroSems.stanford.edu (https://exploreintrosems.stanford.edu/).

Many seminars satisfy the Ways Breadth Requirements, and several meet the second-level Writing and Rhetoric Requirement (Writing 2). There is no limit on the total number of seminars a student may take. Most seminars are filled through an online selection and pre-enrollment process. Seminars that have space available are open for self-enrollment in Axess, with preference to first- and second-year students. For information about online sign-up and enrollment, see ExploreIntroSems.stanford.edu (https://exploreintrosems.stanford.edu/).

Sign-up deadlines for each quarter are on Fridays by 8 a.m. (Pacific Time) on:

- Autumn Quarter: August 28, 2020
- Winter Quarter: November 13, 2020
- Spring Quarter: February 12, 2021
- Summer Quarter: May 7, 2021

Structured Liberal Education

Director: Marisa Galvez, French and Comparative Literature

Associate Director: Jeremy Sabol

Lecturers: Mary Garcia, Nura Hossainzadeh, Miles Osgood, Greg Watkins

Offices: Sweet Hall, Second Floor, and Florence Moore Hall
Mail Code: 94305-8581
Phone: (650) 725-4790
Email: sle-program@stanford.edu
Web Site: http://sle.stanford.edu (http://sle.stanford.edu/)

The Program in Structured Liberal Education (SLE) is a year-long residence-based great works course that satisfies several requirements at once: Thinking Matters, Writing and Rhetoric (both PWR1 and PWR2), and four of the Ways requirements. The curriculum includes works of philosophy, literature, art, and music from the ancient world to the present. The program is interdisciplinary in approach; it emphasizes intellectual rigor and individualized contact between faculty and students.

SLE has two fundamental purposes: to develop a student's ability to ask effective questions of texts, teachers, the culture, and themselves; and to develop intellectual skills in critical reading, expository writing, logical reasoning, and group discussion. SLE encourages students to live a life of ideas in an atmosphere that stresses critical thinking and a tolerance for ambiguity. Neither the instructors nor the curriculum provides ready-made answers to the questions being dealt with; rather, SLE encourages a sense of intellectual challenge, student initiative, and originality.

The residence hall is the setting for lectures and small group discussions. SLE enhances the classroom experience with other educational activities, including a weekly film series, writing tutorials, occasional special events and field trips, and a student-produced play each quarter.

First-year students interested in enrolling in SLE should indicate this preference for their Thinking Matters assignment. SLE is designed as a three quarter sequence, and students are expected to make a commitment for the entire year (8 units each quarter).

SLE Courses Offered in 2020-21

		Units
SLE 91	Structured Liberal Education	8
SLE 92	Structured Liberal Education	8
SLE 93	Structured Liberal Education	8
SLE 299	Structured Liberal Education Capstone Seminar	1
SLE 81	Public Service Program	1
SLE 99	Directed Reading	1
SLE 199	Teaching SLE	1

Immersion in the Arts: Living in Culture

Faculty Director: Karla Oeler, Art and Art History

Associate Director: Kim Beil

Faculty: Samer Al-Saber, Theater and Performance Studies

Program in Writing and Rhetoric Lecturer: Alexander Greenhough

Offices: Sweet Hall, Second Floor, and Stern Hall
Mail Code: 94305-7000
Phone: (650) 724-3163
Email: italic_ile@stanford.edu
Web Site: https://undergrad.stanford.edu/programs/residential-programs/italic/overview (https://undergrad.stanford.edu/programs/residential-programs/italic/overview/)

ITALIC is an arts-minded, residence-based academic program for first-year students. Using art as the frame for discussing big ideas, frosh who participate in this yearlong academic program are part of a tight-knit community, living together, attending classes, and making art in Stern Hall's Burbank House residence.

ITALIC is built around a series of big questions about the historical, critical, and practical purposes of art. The yearlong experience also fosters close exchanges between students and faculty, guest artists and scholars outside of class over meals, in hands-on arts-making workshops, and on excursions to arts events.

In ITALIC, students look closely at the integration of arts across the University and in the world outside, examining how art can illuminate or challenge existing categories of knowledge, including history, politics, and culture, particularly since the 19th century. Immersed in the arts, they

analyze major works of the visual, performing, and filmic arts, sharpen perceptual skills, and tap into their own channels of creative expression. Turning an aesthetic lens on life's ordinary and exceptional features, ITALIC asks: How do the arts provide new ways of thinking about our world and ourselves?

ITALIC Courses Offered in 2020-21

		Units
ITALIC 91	Immersion in the Arts: Living in Culture, Creating	4
ITALIC 92	Immersion in the Arts: Living in Culture, Art Worlds: Conversations between Artists and Scholars	2
ITALIC 93	Immersion in the Arts: Living in Culture, Challenging	3
ITALIC 95W	Immersion in the Arts: Living in Culture, Writing Section	4
ITALIC 99	Immersion in the Arts	1

Education as Self-Fashioning

Director: Paula Findlen (History)

Faculty: Russell Berman (Comparative Literature), Margot Gerritsen (Energy Resources Engineering), Paula Findlen (History), Andrea Nightingale (Classics), Sarah Prodan (French and Italian), Rush Rehm (Classics), Kathryn Starkey (German Studies), J'Nese Williams (History).

Writing Instructor: Shay Brawn, Artemis Brod, Megan Formato, Shannon Hervey, Valerie Kinsey, Sangeeta Mediratta, Sarah Pittock, Rebecca Richardson, Ruth Starkman, Jennifer Stonaker.

Offices: Sweet Hall, Second Floor
Mail Code: 94305-3068
Phone: (650) 723-0944
Email: thinkingmatters@stanford.edu
Web Site: https://undergrad.stanford.edu/programs/education-self-fashioning-esf

Education as Self-Fashioning (ESF) is a unique opportunity offered only in the autumn quarter, since its aim is to introduce entering students to a liberal education. ESF courses provide you with an opportunity to work closely with a faculty member in a seminar-style setting while simultaneously completing your first-year writing requirement. In ESF, we consider writings about education by intellectuals working in various fields, with the aim of articulating different ways that education can be used to structure one's thinking, one's self, and ultimately one's life as a whole. You will grapple with this issue in dialogue with fellow students and faculty from across a wide range of disciplines — from the humanities and social sciences through the natural sciences and mathematics.

ESF satisfies the Thinking Matters, the WR1 requirement, and one Way. ESF is a set of linked seminars related to the general theme expressed in the course title. The seminars, each with a different focus, meet separately as discussion classes led by the faculty; all ESF students also come together for a plenum session or large lecture each week. Each seminar coordinates writing instruction with the course theme in specially designated writing sections.

The three components of ESF are described below. ESF counts as a 7-unit course.

1. A seminar with a faculty member that meets once per week for at least 75 minutes.
2. A section with a writing instructor that meets for sessions of 110 minutes twice per week.
3. A lecture series that will meet once-a-week. These are required for students enrolled in ESF.

ESF Courses Offered in Autumn 2020-21

- ESF Courses Offered in 2020-21 (https://explorecourses.stanford.edu/search/?q=ESF&view=catalog&page=0&academicYear=20202021&filter-term-Autumn=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-ESF=on)

Sophomore College

Faculty Director: Dan Edelstein, French and (by courtesy) History

Deputy Faculty Director: Lisa Surwillo, Iberian and Latin American Cultures

Associate Vice Provost for Undergraduate Education and Program Director, Stanford Introductory Studies: Parna Sengupta

Associate Director of Sophomore College: Dayo Mitchell

Offices: Sweet Hall, Second Floor
Mail code: 94305-3068
Phone: (650) 724-4667
Email: sophcollege@stanford.edu
Web Site: http://soco.stanford.edu (http://soco.stanford.edu/)

Sophomore College (SoCo) offers rising sophomores who share a passion for an area of study an opportunity to meet daily in seminar-size classes with Stanford faculty for lecture and discussion; students may also work in labs, participate in community-based learning, go on field trips, and engage in a range of other activities that facilitate in-depth mentoring relationships. Held before the start of students' sophomore year, this residential program encourages academic and social connections and transforms classes into intellectual communities, helping participants establish rich relationships with peers and faculty that extend beyond graduation. Seminars are for 2 units; the Sophomore College all-inclusive program fee covers tuition, room, board, books, and class-required travel arranged by the program. Financial assistance is available. The online catalog and additional information about SoCo is available at the Sophomore College (https://undergrad.stanford.edu/programs/sophomore-college/) web site.

Arts Intensive

Faculty Director: Dan Edelstein, French and (by courtesy) History

Deputy Faculty Director: Lisa Surwillo, Iberian and Latin American Cultures

Associate Vice Provost for Undergraduate Education and Program Director, Stanford Introductory Studies: Parna Sengupta

Director of the Arts in Undergraduate Education: Gina Hernandez-Clarke

Offices: Sweet Hall, Second Floor
Mail code: 94305-3068
Phone: (650) 724-4667
Email: artsintensive@stanford.edu
Web Site: http://artsintensive.stanford.edu (http://artsintensive.stanford.edu/)

The Arts Intensive (AI) Program offers rising sophomores, juniors, and seniors the opportunity to study intensively with Stanford arts faculty and small groups of other Stanford students. The Arts Intensive program takes place over three weeks in September before the start of Autumn Quarter.

Arts Intensive courses engage students in the theory and practice of a particular artistic discipline. Courses often include field trips, workshops, film screenings, studio sessions, or other arts events in the afternoons,

evenings, and on weekends. Courses are taught by Stanford arts faculty and often include contributions from professional visiting artists. Arts Intensive students live together in a Stanford residence during the program, making for a rich immersion into a creative community. This unique opportunity allows students to focus on their art practice without the constraints of other coursework. Enrollment is by application and takes place in Spring Quarter for the upcoming September program. Each Arts Intensive course enrolls 10 to 20 students and offers 2 units of academic credit. For more information or to apply, see the Arts Intensive (http://artsintensive.stanford.edu) web site.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a "credit" or "no credit" grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a "credit" or "satisfactory" grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

In addition to courses taken for a letter grade, ESF/ITALIC/SLE/THINK courses completed during academic year 2020-21 taken for CR/NC (CR grade) or S/NC (S grade) will satisfy the Thinking Matters requirement.

Faculty Director: Dan Edelstein, French and (by courtesy) History

Deputy Faculty Director: Lisa Surwillo, Iberian and Latin American Cultures

Associate Vice Provost for Undergraduate Education and Program Director, Stanford Introductory Studies: Parna Sengupta

Education as Self-Fashioning Courses

ESF 1. Education as Self-Fashioning: The Active, Inquiring, Beautiful Life. 7 Units.
Moving through history from the Rome of the Emperor Hadrian, to the city-states of Renaissance Italy, to the 18th century republic of the United States, we will examine how self-made men fashioned themselves and their surroundings by educating themselves broadly. We will ask how a liberal education made their active careers richer and more transformational. We will also take up the great debate on whether a liberal education or vocational training is the surest path to advancement. We will engage this debate through the works of W.E.B. Du Bois and Booker T. Washington but consider today's struggle over the same issues, a struggle that engrosses both highly industrialized and developing societies.

ESF 1A. Education as Self-Fashioning: The Active, Inquiring, Beautiful Life. 7 Units.
Moving through history from the Rome of the Emperor Hadrian, to the city-states of Renaissance Italy, to the 18th century republic of the United States, we will examine how self-made men fashioned themselves and their surroundings by educating themselves broadly. We will ask how a liberal education made their active careers richer and more transformational. We will also take up the great debate on whether a liberal education or vocational training is the surest path to advancement. We will engage this debate through the works of W.E.B. Du Bois and Booker T. Washington but consider today's struggle over the same issues, a struggle that engrosses both highly industrialized and developing societies.

ESF 2. Education as Self-Fashioning: How to Become a Global Citizen?. 7 Units.
The concept of a liberal arts education was first developed in eighteenth-century Prussia by Wilhelm von Humboldt (1767-1835) and soon adopted by other countries, including the United States. Humboldt considered a liberal arts education to be both a foundational and transformative process in the development of the self, and he was convinced that it was essential in creating moral and ethical citizens in an increasingly global world. From his point of view, the cultivation of oneself leads to the freedom of thought, freedom to act, freedom to assert oneself as an individual, freedom to access knowledge, and freedom to determine one¿s own role in society. In this course we will explore Humboldt¿s concept of education and examine the ways in which it is reflected and refracted in debates about university education still today. This course satisfies the Aesthetic and Interpretive Inquiry WAY (AII).

ESF 2A. Education as Self-Fashioning: How to Become a Global Citizen or the German Tradition of Bildung.. 7 Units.
This course considers education not as training in external knowledge or skills but as a lifelong process of development and growth in which an individual cultivates her or his spiritual, cultural and social sensibilities. This concept of education - education as a formative and transformative process in the development of the self - is called Bildung in German and has a long tradition reaching back to the Middle Ages. The term first appears in the writings of the mystic Meister Eckhart who defines it as self-composure which he regards as a crucial stage in our spiritual development. The concept of Bildung takes on a secular meaning in the Reformation, when Ulrich von Hutten first coined the phrase that has become Stanford's motto: "Die Luft der Freiheit weht". (The wind of freedom is blowing). What he meant is that the cultivation of oneself leads to the freedom of thought, freedom to act, freedom to assert oneself as an individual, freedom to access knowledge, and freedom to determine one's own role in society. This idea of education as an internal and transformative process is central to debates in the nineteenth century (both in Germany and the United States) in which self-reflection is seen as key to the cultivation of an individual's identity and to her or his role as a member of society. In this course we will read reflections on education as self-fashioning by some of the greatest German thinkers spanning from the Middle Ages to the present. We will also enjoy some contemporary parodies of such reflections. These readings and our discussions will help us to understand Stanford undergraduate education as a transformative process of self-realization in our global society.

ESF 3. Education as Self-Fashioning: How to be a Public Intellectual. 7 Units.
Can education impart more than bookish learning? This is the question that critics have posed since the European Renaissance. Through their reflections, these critics posited an alternative ideal of education that prepared the student for life outside the academy. Over the centuries, this ideal would evolve into what we would today call an ¿intellectual¿ ¿ but this modern concept only captures a part of what earlier writers thought learning could achieve. In this course, we will focus on how education can prepare students to engage in public debates and the role that the university can play in public learning.

ESF 3A. Education as Self-Fashioning: How to be a Public Intellectual. 7 Units.
Can education impart more than bookish learning? This is the question that critics have posed since the European Renaissance. Through their reflections, these critics posited an alternative ideal of education that prepared the student for life outside the academy. Over the centuries, this ideal would evolve into what we would today call an ¿intellectual¿ ¿ but this modern concept only captures a part of what earlier writers thought learning could achieve. In this course, we will focus on how education can prepare students to engage in public debates and the role that the university can play in public learning.

ESF 4. Education as Self-Fashioning: Learning to Change. 7 Units.
Does education entail changing the self? How much? Why should I change my life? How do I discover that I need to change? Who can rightly tell me how to change? What difference does it make? These and related questions have been around for a long time, yet that makes them no easier to answer today than 2500 years ago. In the 5th century BCE, Socrates found that his answers--based on his own will to change--proved troublesome, and ultimately fatal. His follower, the philosopher Plato, transformed the Socratic exploration into idiosyncratic utopian visions that sought to change the conditions of life--and so make Socrates' fate unrepeatable. Plato's own followers, from Aristotle onward, found new ways to explain, enact, or evade change. Not until the end of antiquity, however, do we find, in Augustine of Hippo (354-430 CE), someone as explicitly and passionately committed to personal change as the early Greek thinker. Bookended by the major figures of the Athenian seeker and the North African, this course will lead students to analyze and compare their own tentative answers with the ideas on self-fashioning that can be found in a range of ancient texts. Students will demonstrate their grasp of the material through a variety of exercises, including a research paper, discourse analyses, and responses in persona.

ESF 4A. Education as Self-Fashioning: Learning to Change. 7 Units.
Does education entail changing the self? How much? Why should I change my life? How do I discover that I need to change? Who can rightly tell me how to change? What difference does it make? These and related questions have been around for a long time, yet that makes them no easier to answer today than 2500 years ago. Students will demonstrate their grasp of the material through a variety of exercises, including a research paper, discourse analyses, and responses in persona.

ESF 5. Education as Self-Fashioning: Thinking Like a Philosopher. 7 Units.
The Ancient Greek aphorism ¿Know thyself¿ is a centerpiece of wisdom. But knowing one¿s own mind is not easy, in part because it is not a matter of simply looking inward to find one¿s proclivities and beliefs; it seems one must look outward to the issues and questions the world presents, and know what one thinks about them. Knowing oneself is in part a matter of knowing one¿s way around as a thinker, where that is a matter of knowing how to think about issues, when to trust one¿s judgment and when to withhold it. Fashioning or making oneself into a better (more acute, more sensitive, more judicious) reasoner is something philosophy as a discipline holds out as a promise. In this course, we will take up the first task of becoming better reasoners about a select handful of persistent problems; we will at the same time reflect on what it is that philosophical thinking is, and how it might shape us as thinkers.

ESF 5A. Education as Self-Fashioning: Thinking Like a Philosopher. 7 Units.
The Ancient Greek aphorism "Know thyself" is a centerpiece of wisdom. But knowing one's own mind is not easy, in part because it is not a matter of simply looking inward to find one's proclivities and beliefs; it seems one must look outward to the issues and questions the world presents, and know what one thinks about them. In this course, we will take up the first task of becoming better reasoners about a select handful of persistent problems; we will at the same time reflect on what it is that philosophical thinking is, and how it might shape us as thinkers.

ESF 6. Education as Self-Fashioning: The Wind of Freedom. 7 Units.
Stanford's unofficial motto, "the wind of freedom blows," engraved in German on the university seal, invites us the ponder freedom in the context of education. What is the relation between freedom and the "liberal" arts? Does studying free your mind? Does free will even exist? If so, how does education help you develop its potential? This course will look at various authors -- from antiquity through the 20th century -- who have thought about the blessings, burdens, and obligations of human freedom. Beginning with Eve in the Garden of Eden, we will explore how exercising freedom in your personal choices and conduct not only determines your fate as an individual but carries with it a measure of responsibility for the world. We will place special emphasis on the implications of such responsibility in our own time.nFriday lectures will be held 9:30am-10:50am in Bishop Auditorium.

ESF 6A. Education as Self-Fashioning: The Wind of Freedom. 7 Units.
Stanford's unofficial motto, "the wind of freedom blows," engraved in German on the university seal, invites us the ponder freedom in the context of education. What is the relation between freedom and the "liberal" arts? Does studying free your mind? Does free will even exist? If so, how does education help you develop its potential? This course will look at various authors -- from antiquity through the 20th century -- who have thought about the blessings, burdens, and obligations of human freedom. We will place special emphasis on the implications of such responsibility in our own time.

ESF 7. Education as Self-Fashioning: The Transformation of the Self. 7 Units.
Socrates famously claimed that the unexamined life is not worth living. Socrates and other ancient thinkers examined themselves and found that they did not match up to their own ideals. They thus set out to transform themselves to achieve a good and happy life. What is the good life? How do we change ourselves to live a good and happy life? How do literature and philosophy help us to understand ourselves and to achieve our social, ethical, and personal ideals? In this class, we examine Socrates and Augustine's lives and ideas. Each struggled to live a good and happy life. In each case, they urge us to transform ourselves into better human beings. The first half of the course focuses on the Athenian Socrates, who was put to death because he rejected traditional Greek ideals and and proclaimed a new kind of ethical goodness. The second half focuses on the North African Augustine, an unhappy soul who became a new man by converting to Christianity. These thinkers addressed questions and problems that we still confront today: What do we consider to be a happy life? Do we need to be good and ethical people to live happily? Is there one correct set of values? How do we accommodate other people's beliefs? Is it possible to experience a transformation of the self? How exactly do we change ourselves to achieve our higher ideals?nFriday lectures will be held 9:30am-10:50am in Bishop Auditorium.

ESF 7A. Education as Self-Fashioning: The Transformation of the Self. 7 Units.
Socrates famously claimed that the unexamined life is not worth living. Socrates and other ancient thinkers examined themselves and found that they did not match up to their own ideals. They thus set out to transform themselves to achieve a good and happy life. What is the good life? How do we change ourselves to live a good and happy life? How do literature and philosophy help us to understand ourselves and to achieve our social, ethical, and personal ideals? In this class, we examine Socrates and Augustine's lives and ideas. Is there one correct set of values? How do we accommodate other people's beliefs? Is it possible to experience a transformation of the self? How exactly do we change ourselves to achieve our higher ideals?.

ESF 8. Education as Self-Fashioning: Recognizing the Self and Its Possibilities. 7 Units.
Some philosophers have argued that we have privileged and direct access to our inner selves. If this were true, it would make self-knowledge perhaps the easiest sort of knowledge to obtain. But there are many considerations that mitigate against this view of self-knowledge. Consider, for example, the slave who is so oppressed that he fully accepts his slavery and cannot even imagine the possibility of freedom for himself. Such a slave fails to recognize his own capacity for freedom and autonomous self-governance. Though the slave is perhaps the extreme case, many people, it seems, fail to recognize the full range of possibilities open to them. In this course, we shall examine both some of the ways in which one¿s capacity for self-recognition may be distorted and undermined and the role of education in enabling a person to fully recognize the self and its possibilities. What constrains the range of possibilities we see as really open to us? Contrary to the Cartesian, we shall argue that full self-recognition is an often a hard-won achievement. And we shall ask how education might function to give us a less constricted and more liberating sense of the self and its possibilities. We will consider such questions through the lens of philosophy, literature and psychology.nFriday lectures will be held 9:30am-10:50am in Bishop Auditorium.

And we shall ask how education might function to give us a less constricted and more liberating sense of the self and its possibilities. We will consider such questions through the lens of philosophy, literature and psychology.

ESF 9. Education as Self-Fashioning: Chinese Traditions of the Self. 7 Units.
In this class we explore thinking about the self and its cultivation that took root and flourished in China. Chinese civilization was centrally concerned with issues of the self, but it developed methods and ideals of cultivation that have no obvious parallel in the European tradition. We will be concerned primarily with two clusters of Chinese thought and expression. First, we will look at major philosophical traditions (Confucianism, Daoism, Buddhism) to see how they structured thinking about education and self-cultivation. The three ¿schools¿ of thought staked out different ideals for the self that provided China with range and flexibility in concepts of personhood. Second, we will examine Chinese aesthetic traditions, especially those of qin music, calligraphy and painting, to understand how the arts were used as a platform for self-cultivation and to communicate the artist¿s essential nature to others. The course also gives attention to the gendering of concepts of the self and to the tradition of martial arts as self-discipline and self-strengthening. Students should emerge from the course with an understanding of how a major civilization located outside Western traditions developed its own answers to these questions of universal human concern.

ESF 10. Education as Self-Fashioning: Unintended Consequences. 7 Units.
Unintended consequences are outcomes that are not the ones foreseen and/or intended by a new product, action or decision. Some unintended outcomes are very surprising, and would have been hard to predict. Others seem completely logical in hindsight and leaves people wondering why they were not anticipated. For instance, when the first biofuel mandates were imposed in the EU, little did policy makers realize it would lead to a strong rise in palm oil production, which in turn led to tropical deforestation, undoing any of the possible positive impacts of increased biofuels use. In hindsight it is easy to see this potential negative impact, yet at the time the decision was made the EU leadership was blind to it. Not all unintended consequences are negative. Aspirin, for example, was developed to relieve pain, but was found to also be an anticoagulant that can lower the risk of heart attacks. As another example, the setting up of large hunting reserves for nobility in the medieval period preserved green areas, which later could be converted to large parks.

ESF 11. Education as Self-Fashioning: The Democratic Citizen. 7 Units.
A democracy seeks to aggregate the diverse and conflicting views of individuals into collective policy. How does this work, in theory and in practice? How have individuals thought about this process and their own roles within it, and how has that reflection shaped their lives as democratic citizens? In this course, we will study the history of democracy and democratic thought, from Ancient Greece and Rome to the modern world. We will consider how thinkers ancient and modern sought to fashion themselves into democratic citizens, and we will compare these ideals to the realities of democratic government in practice. Through a variety of philosophical and empirical readings, we will explore the fundamental challenges of democracy and discuss how we see them playing out today.

ESF 11A. Education as Self-Fashioning: The Democratic Citizen. 7 Units.

ESF 12. Education as Self-Fashioning: The Greeks on Suffering, Beauty, and Wisdom. 7 Units.
In Greek tragedies, a horrific catastrophe falls upon a person and brings on extreme suffering. For the Greeks, tragic plays offered the truth about life's calamities and horrors. The Greeks enjoyed these plays because the dramatic artistry made beauty out of horror and suffering. The Greeks did not believe that they controlled their fates. The Greeks had a "tragic wisdom" that enabled them to confront the hardships of life and the inevitability of death. This helped them to develop courage and resilience. Plato attacked this view and introduced a new kind of hero, the philosopher Socrates. As Plato claimed, we can control our fates by practicing philosophy: this enables us to become wise and ethically good. The philosopher strives for this goodness, which is beautiful in the highest possible way--it is our soul's true desire. Our inner goodness is under our control, so the good and wise person will stay happy even when calamities strike. Plato's optimistic philosophy flew in the face of Greek tragic wisdom. Plato offered a new way of living, one based on higher education, the development of knowledge, and the pursuit of true beauty and goodness. Do we believe that liberal education improves us ethically? Do we feel optimistic or pessimistic about life? To what extent can we control our lives and fates? How do tragic plays, movies, or TV shows represent the horrors that happen in the real world? Does the art that makes them beautiful and pleasurable help us to confront these horrors? Who are our heroes? What actions or qualities make them heroic? We read six tragedies by Sophocles and Euripides, and three Platonic dialogues (Apology, Symposium, Republic). We also read Nietzsche's Birth of Tragedy, which sets forth the opposition between Greek "tragic wisdom" and Plato's "philosophic knowledge.".

ESF 13. Education as Self-Fashioning: Rebellious Minds. 7 Units.
The struggle to know began long before you entered the university. The university as an institution has its origins in the late Middle Ages; it has been reinvented repeatedly as our ideas about education have changed. People have been rebelling against how institutions define learning (and for whom) ever since. This course introduces you to some of the most thoughtful and interesting reflections on the nature and purpose of an education, on knowledge and ignorance, at the birth of the modern world. Understanding the quest to discover the mind and to embrace learning as a lifelong endeavor is a starting point to reflect on the goals of your own education, as an engaged intellectual citizen of the world.nFriday lectures will be held 9:30am-10:50am in Bishop Auditorium.

ESF 14. Education as Self-Fashioning: The Challenge of Choice. 7 Units.
The Challenge of Choice addresses these questions by engaging key texts from the liberal arts tradition that explore decisions and their consequences, exposing the multi-faceted nature of choice. By representing characters with whom we sympathize, as well as those whose experience seems worlds away from our own, artists (novelists, playwrights, filmmakers) ask us to consider the web of circumstance that influences a character to choose one course over another. Distance from our own subjectivity the stories are not ours, but they could be allows these works to shed light on the dilemmas that face us as we go about `choosing the life we think we would like to live. Confronting these works, we find that the kinds of choices we make grow in depth, magnitude, and significance.nFriday lectures will be held 9:30am-10:50am in Bishop Auditorium.

ESF 15. Education as Self-Fashioning: College and the Good Life. 7 Units.
Academic study was once concerned with one overriding question: what is the best way to live our lives? What are the ultimate goals and values we should privilege over others? Today we often assume that value choices are personal. But many teachers in Antiquity (and beyond) thought that these choices needed to be debated, and that education demanded that we debate and think them through. In this class, we ask questions about the good life, but we also consider whether college is still designed to raise such questions. We will read thought-provoking, influential texts from Antiquity and modern times, by such writers as Plato, Marcus Aurelius, Montaigne, Voltaire, DuBois, and Martha Nussbaum.nFriday lectures will be held 9:30am-10:50am in Bishop Auditorium.

ESF 15A. Education as Self-Fashioning: College and The Good Life. 7 Units.

We will read thought-provoking, influential texts from Antiquity and modern times, by such writers as Plato, Marcus Aurelius, Montaigne, Voltaire, DuBois, and Martha Nussbaum.

ESF 16. Education as Self-Fashioning: Curiosity. 7 Units.
Curiosity is a personal interest about something that often has no specific application in the real world or is not part of an overarching goal. Curiosity is often dismissed as irrelevant, useless, and even unethical, but it is just as often touted as the foundation to an intellectually rich life. Albert Einstein once remarked, "I have no special talents. I am only passionately curious," and he insisted that only curiosity makes life worth living. Thomas Fuller, by contrast, warned: "Curiosity is a kernel of the forbidden fruit, which still sticks in the throat of a natural man, sometimes to the danger of his choking." Is it possible to reconcile these opposing views on curiosity? What role does curiosity play in a liberal education? What is the role of curiosity in technology and "progress?" What is the relationship between curiosity and individualism? How does curiosity help us develop as critical thinkers? How does curiosity coexist with (or enable) intellectualism? In this course we¿ll examine cabinets of curiosities, and read a wide variety of texts spanning from Antiquity to today, including the legend of Faust, and texts by Goethe, Kafka, Hoffmann, Aristotle, Plato, and Augustine, that explore the nature of curiosity, its pitfalls and possibilities, as well as its importance for living a fulfilled and interesting life.

ESF 17. What Can You Do for Your Country?. 7 Units.
What does it mean to serve your country? All ethical systems train the individual to relinquish self-interest in favor of a larger communal good. When you applied to Stanford, you answered many application questions designed to elicit evidence of your ability to serve others, which is considered a sign of good character, leadership, and ability to thrive beyond the confines of your family and private world. Knowing you¿ve wrestled with this question at length, showing sacrifice, endurance, empathy, and understanding of higher goods, this course asks you to examine the nation¿s view. How can the nation present itself as worthy of your personal sacrifice? Do you need to believe in the greatness of your nation to serve? What kind of cause demands your devotion? Nations have differently articulated such a commitment. Some make modest demands and promise you your own sovereignty. Others request only that you dream of national greatness as your own and that you lend a hand. But all nations require at some point, everything from you. What and when are you prepared to give?nnThis course begins with the shortest and most powerful demand for the last full measure your devotion. President Abraham Lincoln¿s ¿Gettysburg Address,¿ which presents the ideals of the American nation as worthy of returning to war. Following this question of devotion to your nation, the course moves to President JF Kennedy¿s ¿What can you do for your nation¿ speech, and then to diverse periods and perspectives around the globe.

ESF 18. Between Gods and Beasts: The Struggle for Humanity. 7 Units.
Centuries ago, Plotinus famously wrote that humanity was "poised midway between gods and beasts" (Enneads 3.2.8). Some individuals 'grow like to the divine", he asserted, and "others to the brute". Since antiquity, many different societies, east and west, have understood education as a fundamental factor in determining whether individuals became fully realized as human beings, or something less. Considered a civilizing force for individuals and societies, education aimed not only at the acquisition of knowledge and skills, but also at the cultivation of goodness, the attainment of wisdom, and the achievement of happiness. In short, the goal of learning was to live well. nnWhat does it mean to live well? How does one cultivate one's nature or become one's best possible self? What kind of personal and intellectual development does this presuppose? Are there limits to the human capacity for self-development and change? In this course we will ponder such questions as we reflect critically on human nature and on historical and contemporary ideas regarding education, self-development, and living well.

ESF 18A. Between Gods and Beasts: The Struggle for Humanity. 7 Units.

ESF 19. Education as Self-Fashioning: Memoirs from the Margins. 7 Units.
This course is an exploration of a genre of writing crafted by exceptional figures from marginalized communities in modern India to articulate their pain, protest, anger and analyses: the memoir or the autobiography. nInstead of reading conventional historical accounts, in this course we will chart an alternative narrative of modern India, one that emerges in the memoirs of those victimized by the oppressive structures of caste, capitalism and heteronormative patriarchy. We will read life-histories of Dalit women and men negotiating caste atrocities in India¿s cities and villages. We will read the very first autobiographical accounts of a domestic worker, a transgender woman, and a sex worker to emerge from India. And through these life stories, we will bring alive a distinct picture of modern India, one that will reveal the structure of its social contradictions, one that will document the struggles of the marginalized against the violence of both tradition and modernity.nMore broadly, this course aims at developing our sensitivity towards differences in life trajectories ¿ not only in another part of the world, but also in the lives that constitute our community at the university. It is, then, not only a critical exploration of the past, but also an invitation for a critical interrogation of our present.

ESF 19A. Education as Self-Fashioning: Memoirs from the Margins. 7 Units.

ESF 50. Education as Self-Fashioning: Lecture Series. 1 Unit.
One-unit lecture series featuring prominent intellectuals lecturing on the nature and meaning of liberal education (associated with Education as Self-Fashioning.) NOTE: students enrolled in the 7-unit ESF course should NOT add this course to their study list; this 1-unit course is only for non-ESF students who wish to enroll in the lecture series only. Lectures will constitute an ongoing, campus-wide conversation about the aims of liberal education that extends the "First Lecture" featured in New Student Orientation.

Immersion in the Arts Courses

ITALIC 91. Immersion in the Arts: Living in Culture, Creating. 4 Units.
Creating is the first part of a year-long course that explores the ways people make and encounter a wide range of artworks, including examples from music and performance, the visual arts, literature, film and other media. In ITALIC 91 we ask: How do artists innovate? What roles can earlier artworks play in new creations? How do audiences create? How do medium and material shape the creation of an artwork? What are the aims of art? What does art aim to create in the world?.

ITALIC 92. Immersion in the Arts: Living in Culture, Art Worlds: Conversations between Artists and Scholars. 2 Units.
ITALIC 92, Art Worlds: Conversations between Artists and Scholars. This course is built around a series of conversations between nine scholar/critic and artist pairs. We will be entering the conversation in media res, as it were, since all of these pairs have histories together; they've had studio visits, late-night phone calls, email and text conversations. Usually the scholar has written about the artist and maybe the artist has suggested reading and viewing lists to the scholar. They've helped each other feel seen, and often be seen in a more literal way.The conversations will concentrate on these questions: How do artists and scholars work across the divide between practice and theory? How should you build your art world and who will be in it? The pairs will discuss their respective practices (art-making, writing, researching, community-building) and engage in conversation about the artist's work. In advance of each conversation, students will read about something written by the scholar/critic about the artist. Each artist will also design a short art-making prompt for enrolled students to complete and share through the course website. Students will share their artworks weekly in small critique groups.

ITALIC 93. Immersion in the Arts: Living in Culture, Challenging. 3 Units.
ITALIC 93, Challenging. This quarter focuses on art that challenges audiences' expectations and values. We consider what is at stake in the encounter with difficult art. How does difficult art contest cultural, political, and social assumptions and values or challenge expectations about the form and content of art? How can art challenge existing power structures in society? How does art challenge its viewers, by troubling disciplinary boundaries or the rules of genre? What are the ethical responsibilities of artists? Over the course of the quarter, students will meet with a master artist 6 times during section, honing work in their chosen medium and developing a project that will be presented in an end-quarter exhibition and published in an online magazine.

ITALIC 95W. Immersion in the Arts: Living in Culture, Writing Section. 4 Units.
As a PWR 1 course, ITALIC's art-focused writing section develops your writing and research abilities by engaging with the theory and practice of rhetoric. The theme for ITALIC 91 was "creating," and in this writing course you'll be creating arguments through research, rhetoric, and writing. You can explore a topic of your choice for your research-based writing assignments, learning more about the critical, intellectual, and academic discourses around a specific artist, artwork, medium, genre, or art movement.

ITALIC 99. Immersion in the Arts. 1 Unit.
Student-led courses in the arts. Topics change quarterly. Open to ALL students but current ITALIC students and alumni will be given priority.

ITALIC 100. ITALIC Seminar: Notes to a Young Artist. 4 Units.
Working with the Haas Center, students in this seminar will create a mini-magazine/online course about art to share with students at a Bay Area high school. You will assemble a list of suggested readings and brief essays on key artistic texts and concepts, as well as images and links to the artistic examples you find most inspiring. You will create a variety of media about these ideas and artists, from illustrated slideshows to video essays or podcasts to short explanatory texts and longer personal essays. The guiding question of the course is: What does a young artist need to know?.

Structured Liberal Education Courses

SLE 60. Reading Aristotle's Ethics: Happiness and the Virtues of Character. 1 Unit.
How should I live? What should I do to live a happy life? And what does happiness have to do with ethics? What might the best human life look like? What kind of friendships contribute to happiness--and to justice? In the Nicomachean Ethics Aristotle offers us a vision of human flourishing that has nurtured thinkers, secular and religious, for thousands of years and continues to shape political and ethical thinking. In this study group we read and reflect upon the first few books of the Ethics, on happiness and the virtues of character, slowly and carefully. Each week you will be expected to read a short, but dense, section of the Ethics, and to share responsibility for asking questions.
Same as: CLASSICS 60

SLE 61. Reading Aristotle's Ethics, Part 2. 1 Unit.
In this course we continue our reading of Aristotle's Nicomachean Ethics, moving from the individual moral virtues to his formative discussion of justice and equity. We then move on to Aristotle's development of the intellectual virtues and their relation to ethics. Much of our attention will be focused on friendship, without which, as Aristotle says, no one would wish to live, and which is central to virtue and happiness. At the same time we strive to develop our capacity for friendship in ourselves, using Aristotle's discussion to help us reflect on our own lives.
Same as: CLASSICS 61

SLE 81. Public Service Program. 1 Unit.
This one-unit course is for participation in quarter-long service programs set up by the SLE program and conducted in consultation with the Haas Public Service Center. Available programs will vary by quarter. May be repeat for credit.

SLE 91. Structured Liberal Education. 8 Units.
Focusing on great works of philosophy, religion, literature, painting, and film drawn largely from the Western tradition, the SLE curriculum places particular emphasis on artists and intellectuals who brought new ways of thinking and new ways of creating into the world, often overthrowing prior traditions in the process. These are the works that redefined beauty, challenged the authority of conventional wisdom, raised questions of continuing importance to us today, and¿for good or ill¿created the world we still live in. Texts may include: Homer, Sappho, Greek tragedy, Plato, Aristotle, Zhuangzi, Confucius, the Heart Sutra, Hebrew Bible, New Testament, and the Aeneid.

SLE 92. Structured Liberal Education. 8 Units.
Focusing on great works of philosophy, religion, literature, painting, and film drawn largely from the Western tradition, the SLE curriculum places particular emphasis on artists and intellectuals who brought new ways of thinking and new ways of creating into the world, often overthrowing prior traditions in the process. These are the works that redefined beauty, challenged the authority of conventional wisdom, raised questions of continuing importance to us today, and¿for good or ill¿created the world we still live in. Texts may include: Augustine, the Qur'an, Dante, Rumi, Machiavelli, Montaigne, Shakespeare, Cervantes, Las Casas, Descartes, Locke, Mill, Schleiermacher, and Flaubert.

SLE 93. Structured Liberal Education. 8 Units.
Focusing on great works of philosophy, religion, literature, painting, and film drawn largely from the Western tradition, the SLE curriculum places particular emphasis on artists and intellectuals who brought new ways of thinking and new ways of creating into the world, often overthrowing prior traditions in the process. These are the works that redefined beauty, challenged the authority of conventional wisdom, raised questions of continuing importance to us today, and¿for good or ill¿created the world we still live in. Texts may include: Marx, Nietzsche, Freud, Du Bois, Eliot, Woolf, Kafka, Brecht, Vertov, Beauvoir, Sartre, Fanon, Gandhi, and Morrison.

SLE 98. Directed Reading. 1 Unit.
Directed reading for undergraduate students. Consult faculty in area of interest for appropriate topics involving one of the research groups or other special projects. May be repeated for credit. Prerequisite: consent of instructor.

SLE 99. Directed Reading. 1 Unit.
Directed reading for undergraduate students. Consult faculty in area of interest for appropriate topics involving one of the research groups or other special projects. May be repeated for credit. Prerequisite: consent of instructor.".

SLE 199. Teaching SLE. 1 Unit.
.

SLE 299. Structured Liberal Education Capstone Seminar. 1 Unit.
Senior capstone project for students who were enrolled in SLE their freshman year.

Thinking Matters Courses

THINK 11. Bioethical Challenges of New Technology. 4 Units.
How might we apply ideas from ethical theory to contemporary issues and debates in biotechnology? This course will provide critical encounters with some of the central topics in the field of bioethics, with an emphasis on new technologies. Controversies over genetic engineering, stem cell research, reproductive technologies, and genetic testing will provide an opportunity for you to critically assess arguments and evidence. We will begin with an overview of the field and the theoretical approaches to bioethics that have been derived from philosophy. You will then have the opportunity to engage in debate and learn how to identify underlying values and how to apply ideas from ethical theory to contemporary problems.

THINK 12. Century of Violence. 4 Units.
What is modern about modern mass violence? This course explores the evolution, varieties, and logic of mass violence from the early 20th century to the present day. You will engage with and analyze primary accounts of such violence by victims, observers, perpetrators, and courts. We will then consider the effectiveness of various efforts to confront genocides and crimes against humanity in international courts and institutions, past and present. We start with the emergence of genocide as a modern, international issue; proceed with colonial massacres in early 20th century Africa; move to the Armenian genocide in the Ottoman Empire and WWI; Nazi and Nazi-inspired racial murder; communist-induced mass violence in the Soviet Union and Asia; ethnic cleansing in former Yugoslavia; and end with an examination of the recent genocides in Rwanda, Sudan, and the Middle East.

THINK 15. How Does Your Brain Work?. 4 Units.
How do the biology and chemistry of the brain create the mind that lets us talk, walk, laugh, love, learn, remember, and forget? What can neuroscience say about what makes us human? How can we ask questions about the brain that are observable, testable, and answerable? The human brain is the most complex organ we know. To understand the biology of brain function, this course will use highly interactive lectures and discussions to examine the validity of common beliefs about the brain, discuss how the brain and the nervous system are organized, how individual elements of the brain function, and how together these units produce action. The brain, like all other biological structures, has evolved over time in response to natural selection by adapting to diverse behavioral and environmental constraints. We use evolutionary comparisons to illuminate important questions about brain function, including what the origins and consequences of brain damage are, how and where drugs act, and how you collect, interpret, and understand information about the world. You will learn both how the science of the brain has emerged through understanding important experiments and observations and how you can formulate and test your own experimental questions about the brain.

THINK 19. Rules of War. 4 Units.
When, if ever, is war justified? How are ethical norms translated into rules that govern armed conflict? Are these rules still relevant in light of the changing nature of warfare? We will examine seminal readings on just war theory, investigate the legal rules that govern the resort to and conduct of war, and study whether these rules affect the conduct of states and individuals. We will examine alternative ethical frameworks, competing disciplinary approaches to war, and tensions between the outcomes suggested by ethical norms, on the one hand, and legal rules, on the other. Students will engage actively with these questions by participating in an interactive role-playing simulation, in which they will be assigned roles as government officials, advisors, or other actors. The class will confront various ethical, legal, and strategic problems as they make decisions about military intervention and policies regarding the threat and use of force in an international crisis.

THINK 23. The Cancer Problem: Causes, Treatments, and Prevention. 4 Units.
How has our approach to cancer been affected by clinical observations, scientific discoveries, social norms, politics, and economic interests? Approximately one in three Americans will develop invasive cancer during their lifetime; one in five Americans will die as a result of this disease. This course will expose you to multiple ways of approaching the cancer problem, including laboratory research, clinical trials, population studies, public health interventions, and health care economics. We will start with the 18th century discovery of the relationship between coal tar and cancer, and trace the role of scientific research in revealing the genetic basis of cancer. We will then discuss the development of new treatments for cancer as well as measures to screen for and prevent cancer, including the ongoing debate over tobacco control. Using cancer as a case study, you will learn important aspects of the scientific method including experimental design, data analysis, and the difference between correlation and causation. You will learn how science can be used and misused with regard to the public good. You will also learn about ways in which social, political, and economic forces shape our knowledge about and response to disease.

THINK 24. Evil. 4 Units.
What is evil? Are we naturally good or evil? How should we respond to evil? There are many books and courses that focus on the good life or the virtues. Yet despite their obvious apparent presence in our life and world, evil and the vices are rarely taken as explicit topics. We will read philosophical and literary texts that deal with the question of evil at a theoretical level, but will also focus on some practical implications of these issues. By exploring evil, we will confront larger questions about the nature of human beings, the appropriate aims of the good society, the function of punishment, and the place of morality in art.

THINK 31. Race in American Memory. 4 Units.
How have Americans remembered the Civil War - what it meant, what it accomplished, and what it failed to accomplish? How did Americans reimagine the United States as a nation after the war? Who belonged in the national community and who would be excluded? In 1865, the peace treaty was signed at Appomattox and the Thirteenth Amendment outlawed slavery, but the battle over memory and national identity had just begun. The questions that the Civil War addressed - and failed to address - continue to affect our lives today. We will focus on how Americans negotiated issues of cultural memory and national identity through a close analysis of historical texts, novels, poems, films, paintings, cartoons, photographs, and music. Our interpretations will foreground the particular themes of race and nationhood, freedom and citizenship, and changing notions of individual and collective identity. Our assumption in this course is that history is not available to us as a set of events - fixed, past, and unchanging. Rather, history is known through each generation's interpretations of those events, and these interpretations are shaped by each generation's lived experience. What stories get told? Whose stories? And in what ways? The stories we choose to tell about the past can shape not only our understanding of the present, but also the kind of future we imagine and strive to realize.

THINK 42. Thinking Through Africa: Perspectives on Health, Wealth, and Well-Being. 4 Units.
What is human well-being? How do we define it? How do we measure it? What do we mean when we talk about certain parts of the world as "developed" and others as "underdeveloped" or "developing"? How do improvements in human well-being come about? What happens when some people become much better off and others do not? In this course, we will use African experiences, past and present, to think critically and reflectively about concepts whose meaning we all too often take for granted: not only well-being and development, but also wealth and health, equality and inequality. Using the tools and techniques of four different disciplines -- history, anthropology, public health, and engineering -- we will tackle essential questions about the meaning of well-being and the indices by which we measure it, the role of politics in the development process, the importance of historical and cultural contexts, and the sometimes unanticipated challenges that individuals, institutions, and societies face when they seek to promote development and improve human well-being.

THINK 43. What is Love?. 4 Units.
Is love a spiritual or a bodily phenomenon? Is the concept of love timeless or ever changing? How does thinking about love lead us to ask other important philosophical and social questions? In this course we will examine the classical roots, medieval developments, and contemporary permutations of Western ideas of romantic love. With an eye to thinking about representations of love in our own culture, we consider some of the foundational love books of the Western tradition. From Plato's Symposium to Chester Brown's graphic novel Paying For It, we ask the fundamental question of whether and how we might distinguish between spiritual and physical desire. We consider how medieval and contemporary writers dealt with the relation of love to sex, power, money, marriage, and gender. We discuss these works of the past, for example the illicit love in the courtly romance Tristan, in tandem with representations of clandestine love from the present day, such as the portrayal of same-sex love in Brokeback Mountain.

THINK 44. Belief. 4 Units.
Why do people believe in God? What does it mean for people to experience the supernatural? How do we understand belief in God? How do people convey experiences that are by definition extra-ordinary to others? In this course we ask the big (and unanswerable) question why people believe in God. Some scholars argue that belief results from direct experience, such as visions or moments of transcendence, that testify to God's existence. Others suggest that belief in the supernatural is better explained by the way the human mind has evolved or people's experience of the social world. In this class, we will pair medieval literature on Christian mysticism and magic with readings from modern psychology and anthropology. We will look at the dominant answers provided by each discipline. For example, belief might result from our sensory experience of the world, or it might have developed as part of our cognitive apparatus in response to fear. Our aim is to show how different disciplines can work together to cast light on a basic question of human existence.

THINK 45. Thinking About the Universe: What do we know? How do we know it?. 4 Units.
What is the origin and ultimate fate of the universe? Can we know what came before the universe? Are there ultimate limits to human knowledge about the universe and are we reaching them? Cosmology (the study of the universe) raises profound questions about us, our place in the universe, and about the limits of our knowledge. It was only in the 20th century that cosmology developed from metaphysical and theological speculation to become an observational science and a recognized part of physics. In this course, students will explore questions about the Universe, its beginnings, its structure, its extent, its fate, from several perspectives - philosophical, experimental, and theoretical. We will discuss current research and the ongoing debates about the laws of nature on subatomic scales and the perplexing questions they raise regarding the universe and the limits of scientific inquiry.

THINK 46. Why So Few? Gender Diversity and Leadership. 4 Units.
Why there are so few women leaders and what is the cost to society for women's underrepresentation in positions of power? How can organizations and individuals increase women's leadership and be more inclusive of the diverse people that make up our society? Women make up half the population and have earned more than half of all the undergraduate degrees in the U.S. since the early 1980s; yet women comprise only 17% of US Congress, 4% of Fortune 500 CEOs, 16% of the board of directors of major corporations, 22% of tenured faculty at Stanford, and less than a fifth of law firm partners. For women of color, these numbers are considerably lower. Yet, research shows that gender diversity increases the creativity and innovation of groups. In this course, we will directly address the questions of why there are so few women leaders and what can be done, at an organizational and individual level, to increase their representation. Using the lens of sociology, we will think critically about leadership, influence, power, status, gender stereotypes, mentorship, and negotiation. Once we understand the mechanisms underpinning the lack of women leaders, we will discuss and critique potential interventions. A unique aspect of this course will be to apply some of the scholarly research on gender and leadership to our lives outside the classroom. We will be using modules based on those used in businesses schools and corporate executive training. Students will develop practical, real-world skills to increase their own leadership capacities by working on projects and taking part in interactive sessions on negotiation and team dynamics.

THINK 47. Inventing Government: Ancient and Modern. 4 Units.
How might the study of the successes and failures of democratic and republican government in ancient Greece and Rome help us to fix what is broken in our own political systems? Democracy and republic are ancient names for revolutionary approaches to government of, by, and for citizens. Today, almost every state proclaims itself to be a democracy, a republic -- or both. Democratic and republican revolutions transformed ancient Greece and Rome - and later transformed the modern world. We explore how political thinkers, from Machiavelli to Madison and Mill, used the lessons of ancient politics to design bold new systems of government. Ancient politics may still hold lessons for us. We analyze what is broken in modern government (corruption, polarization, gridlock), how it broke, and how the tool kit of ancient political history might help us to analyze and repair the damage.

THINK 48. Reading the Body: How Medicine and Culture Define the Self. 4 Units.
How have our perceptions of what is considered normal/abnormal; beautiful/ugly; infected/uninfected changed over time? How do these changing medical and cultural representations of the body reflect larger societal shifts? How does illness change our perceptions of our bodies and our identities? Viewed through the lens of medicine, the body is a text that offers clues to health and illness, yet clinical readings are never entirely objective. Culture informs and distorts how we discern, accept, reject, and analyze our bodies. Looking at literary, medical, ethical, and anthropological texts, we ask how representations of the body affects the way we experience illness, embody gender and racial identities, and understand our rights (or lack of rights) to control our own bodies. We will critically examine our perceptions about the body and debate some of the most complex and sensitive issues surrounding the body, from the ethics of medical research trials to end of life decisions.

THINK 49. Stories Everywhere. 4 Units.
Do we perceive the world through stories? Are we made of stories? Can we make sense of the world without narrative? The telling of stories is not just a form of entertainment but an essential human activity that moves and persuades us, compelling us to action and reflection. In this course, we will probe how moral, cognitive and historical forces give stories their power. You will be introduced to the basic theory and art of storytelling, enabling you to understand and master the fundamentals of narrative structure, plot, and character. This will allow you to practice producing your own stories through both interpretative and creative writing assignments. The class will also give students the chance to participate in various story-making activities and work with the Stanford Storytelling Project, San Francisco StoryCorps, School of the Arts and the Stanford Innocence Project to create assignments that would be useful to both private and nonprofit organizations.

THINK 50. Empathy. 4 Units.
This course will introduce freshmen to a range of ways of thinking about empathy. How do we know and understand the other? How does knowledge of another's experience and circumstances enable us to make moral decisions and take moral actions? It will take students on an intellectual investigation of the topic of empathy from the Buddhist emphasis on compassion in the fifth century BCE to Jesus' teaching of parables in the first century CE to Enlightenment philosophy to Silicon Valley¿s adoption of empathy in the twenty-first century. The main focus will be on the modern period (from the 18th to 20th century) and students will be asked to approach different genres of text through the lens of empathy. The course will culminate with a one-week creative workshop on the question of empathy.

THINK 51. The Spirit of Democracy. 4 Units.
This course provides an overview of the challenges and aspirations facing ideals of democracy. It deals both with competing visions of what democracy might be, and their actual realization not only in the US but around the world. It will begin with the debate over the American founding and move eventually to the "third wave" of democratization around the world in the late 20th century as well as its more recent retrenchment. The problems of democratic reform are continuing and recurrent around the world. Democratic institutions are subject to a living dialogue and we intend to engage the students in these debates, at the level of democratic theory and at the level of specific institutional designs.

THINK 53. Food Talks: The Language of Food. 4 Units.
In this course, we examine how the ways we talk about food offers us a window into history, psychology, culture and economics. We ask students to think critically about language and taste as well as explore the hidden meanings and influence of the language that surrounds us. Students will analyze the language of food through menus, recipes, Yelp reviews, TV food shows, as well as the history and etymology of food words. Some of our examples will be drawn from East Asian food and culture in addition to, and as a point of contrast with, foods and cultures that may be more familiar to students.

THINK 54. 100,000 Years of War. 4 Units.
If you had been born 10,000 years ago, the chance that someone would kill you was more than 1 in 10, but if you were born in the twentieth century AD it was more like 1 in 100, despite that century¿s world wars, genocides, and nuclear weapons. In the 2010s, it is just 1 in 150. This course tries to explain this astonishing shift away from violence. We will look at the history of war from the Stone Age to the robot age, including the conflicts of the 2010s; and we will draw on everything from anthropology and archaeology to biology and psychology, as we try to answer one of the biggest questions of all: will there ever be a world without war? Students learn how to approach a big, complex, and often very politicized question in an analytical manner.

THINK 55. Understanding China through Film. 4 Units.
How did China move from an imperial and colonized country to an independent modern nation? How did the Chinese people transform its tradition, create new ways of life and values, and move toward modernity? What can the films tell us about the most significant events in modern Chinese culture and history?nWe will learn about major social and cultural transformations in modern Chinese through film. We will analyze films as a window on the ongoing narrative of a people making history and responding to a changing circumstances of revolution, reform, political movements, and modernization. Students will study film images as an art that is intertwined with ordinary people, their lived experiences, cultural habit, moral values, and political consciousness. The course will highlight four major periods: the May Fourth New Culture (1919-1930), the socialist era, the Cultural Revolution, and the reform era of globalization since the 1980s. We will learn to be sensitive to film as a visual and dramatic medium that brings to life Chinese history and culture.

THINK 56. Health Care, Ethics, and Justice. 4 Units.
Is there a right to a basic level of health care? Are there limits to how much should be spent on health care? How should resources, like human organs, be allocated?nWhat obligations does the U.S. have regarding health care in resource-poor environments, such as underdeveloped nations?nWe live in a world of constrained resources. Nowhere are these constraints more controversial and significant than in health care where lives literally hang in the balance of the decisions we make. This course will provide students with the tools to address these questions through the theoretical framework of justice and ethics. We will address the question of allocation at the level of health policy and health economics before applying the concepts to the institutional and bedside level. Using real world examples, you will be asked to actively engage in debating controversial topics such as organ transplants and how to assign scarce ICU beds. Using both empirical data and the framework of ethics, you will be asked to consider how a health care committee, or a hospital, or an individual doctor might make decisions.

THINK 57. Progress: Pro and Contra. 4 Units.
Where and when did we start believing in human progress? Does progress imply that history has a particular direction or end-goal?nMuch of our everyday thinking about politics, society, and history depends on some implicit or explicit concept of progress. Have we reached a point where we need to replace the idea of progress with that of sustainability? These are some of the questions this course will raise as it looks at how ideas of progress inform western thinking about science, history, evolution, and politics. It will engage with thinkers who argued in favor of the idea of progress as well as thinkers who attacked its presumptions. Reading and critically evaluating philosophical, scientific, and literary texts, we will investigate the different consequences of our residual belief in progress, as well as the consequences of our possible abandonment of that belief.

THINK 59. Worlds of Sound: Learning to Listen. 4 Units.
We live in a world of sound. Even deafening silence has a profound sonic quality. In ways that we do not always recognize, our social practices lead us to understand certain sounds as desired signals and filter out others as unwanted noise. How are we hearing the world right now? How have the Coronavirus pandemic, the Black Lives Matter movement, and the other developments of 2020 changed the world of sound in which we live? How have they changed the ways we listen? This class challenges freshmen to become aware of their own listening practices and how those practices affect their perception of the world. We think about how our bodies, our technology, the state, and the market affect what and how we hear. We explore what makes us remember some sounds more than others. Students in this class will write about their own experiences of listening as they develop their own archive of the sounds of Fall 2020; they will produce autoethnographic writing that they can use later to remember this unique historical moment.

THINK 60. American Enemies. 4 Units.
It would seem that an enemy should be easy to identify, but this course proposes that this involves deliberation, choice, and an assessment of consequences. We will explore modern American experiences in defining enemies, here defined as mortal threats to the state and the national collective. We will focus on ideas, thinking and assumptions rather than historical chronology. Who are enemies? How are they defined and by whom? How are enemies characterized and perceived? The narrative content of the course would be a historical study of the American engagement with enemies from 1942 to 1990. We will begin with the war or terror, return to consider the experience of the Japanese enemy of World War II, and then come up through the years of the Cold War and beyond.

THINK 61. Living with Viruses. 4 Units.
By examining this interplay of viruses and culture, this course challenges students to think beyond conventional disciplinary distinctions through questions about the impact of biology on human behavior as well as the potential of humans to shape biology through genetic engineering. The specific goals of this course are to engage students to examine the microbial world and how they interact with it. We will examine three overreaching questions: How do viruses effect our lives? How have they shaped our culture? How will they shape our future? Topics covered will include the question of whether a virus is alive, the importance of immunity, and the role of viruses in not only human culture but what makes us distinctly human.

THINK 62. The Cause is Uncertain. 4 Units.
While virtually every death certificate lists a cause of death, what actually caused that death to occur is an unexpectedly more complex question. This course will focus specifically on causality claims about health and interrogate the methods used to support such claims. At the same time, by focusing on causality claims about health issues, from cholera to breast cancer and AIDS--the course asks how we might come to useful causal knowledge in the absence of being able to perform those manipulations that have been the hallmark of experimental science.

THINK 63. Justice and the University. 4 Units.
How do the fundamental purpose of the university, the pursuit of knowledge, and the pursuit of justice coincide? Or do they conflict and pull us in different directions? Our goal in this class will be to focus on the intersection of justice and knowledge by examining how issues of liberty, equality, and security arise on college campuses. University campuses have a long history as sites of activism across a wide variety of domains and this course will cover a number of them including trigger warnings and safe spaces; free speech; ethics in research; Dreamer Act and college access for undocumented persons. Our goal in this course is to get students to think critically about tradeoffs among society's most treasured goals. When these goals come into tension, how should decisions be made about which goal must give way? We aim to teach students how to identify and think about these conflicts and how to craft arguments, both written and oral, in support of their positions, using a variety of source materials.

THINK 64. Healing, Illness, Stories. 4 Units.
This course focuses on multiple genres of narratives about illness and recovery: memoirs, graphic novels, poetry, fiction, essay, and documentary film. It asks what the power, if any, of narrative is in healing. Drawing upon the fields of literature and the practice of medicine, students will begin to grapple with the power of stories in illuminating the experience of illness and disability and in offering the possibilities for (self) transformation.

THINK 65. Preventing Human Extinction. 4 Units.
Is human extinction inevitable? Is it necessarily bad for the planet? What might we do to avert human extinction? n99.9% of all species that have inhabited the planet are extinct, suggesting our extinction is also a distinct probability. Yet, the subject of human extinction is one that poses deeply disturbing implications for the thinkers themselves, namely us humans. This course will explore a series of plausible scenarios that could produce human extinction within the next 100 years and simultaneously consider the psychological, social, and epistemological barriers that keep us from seriously considering (and potentially averting) these risks. Students will . . .

THINK 66. Design that Understands Us. 4 Units.
We find ourselves in an age of rapidly evolving technology, where the world we inhabit, increasingly, is the world we make. At Stanford, you will find many courses that ask you to make things¿everything from algorithms, products, policies, to artworks. What is rarer is to be given the space to stop and really think about why¿for what and for whom¿we design these things, and whether we should continue to design in ways demanded by commercial and political actors. This critical thinking course examines the nature, purpose, and meaning of design in human life, and asks the fundamental questions of ¿what is design?¿, ¿why do we do it?¿, and ¿how do design, technology, and society shape one another?¿. We will explore design as a series of choices and the ways in which we make these choices. This course will consider different models of design in our world today: from need-based design (as we are often taught) to the fashioning of tools that help us flourish as human beings. You will learn about various aesthetic and ethical frameworks and a fundamental language of design, so that you can begin to critically analyze everyday examples of media, tools, toys, and games¿and apply such lenses to designing conscientiously. You will learn to think about the design of social networks, artificial intelligence, musical instruments, games, virtual reality, and other examples¿in terms of needs and values, ethics and aesthetics. In short, through this course, you will learn to more clearly and critically view our technology-drenched human world¿and to exercise your ethical and artful imagination to reimagine better worlds.

THINK 67. What Makes Music Classical?. 4 Units.
This course asks a question that can elicit a variety of responses. Classical music means different things to different people. For some it connotes Western art music of a particular historical era. According to this understanding, classical music follows baroque music and is superseded by romantic music; it develops a style, the classical style, as perfected by Haydn and Mozart. For others classical music has broader significance, referring to a cultural practice that predates the eighteenth century, going as far back as Gregorian chant and extending through the present. There are a variety of factors that define that practice, some more enduring than others: transmission through musical notation, theories of tonal systems, techniques of composition. Formal analysis, though often considered a sub-discipline of music theory and hence purely descriptive and objective, is hardly value free. Aesthetic interests and prejudices come into play, whether implicitly or explicitly.

THINK 68. Our Genome. 4 Units.
Genomes reveal a wealth of information with implications far beyond the linear sequence of the DNA. We will consider two questions related to the genome, coupled with examples from real-life consequences. Firstly, what does the genome say about our past: where we came from and how we might fit into the tapestry of the human race? We will look at examples from history and anonymized patients to highlight the consequences of these question for people. Next we will consider what the genome tells us about the future: how might it foretell our individual future and how might this be translated into patient treatment? We will examine the promises, pitfalls, and implications for the advances in medicine and healthcare promised by genomic research.

THINK 69. Emotion. 4 Units.
In this course, we address basic issues about emotions and their place in human life from the perspectives of philosophy and psychology. We ask four fundamental questions: What is emotion? What is the appropriate place for emotions in our lives? How should we manage our emotions? Do emotions threaten the integrity of the agent? For instance, in asking how we manage our emotions, students will consider the Stoic view that emotions must be extirpated alongside psychological perspectives on the theoretical and empirical frameworks on emotion regulation.

THINK 70. Why College? Your Education and the Good Life. 4 Units.
You¿re about to embark on an amazing journey: a college education. But what is the purpose of this journey? Why go to college? nSome argue that the purpose of college is to train you for a career. Others claim that college is no longer necessary ¿ that you can launch the next big startup and change the world without a degree. Peter Thiel offers students like you $100,000 to ¿skip or stop out of college¿ because ¿knowledge that is acquired under compulsion obtains no hold on the mind.¿* Why read Plato if you¿re a STEM major, after all? Why think about primate health if you¿re in the arts? nIn the face of such critiques, this class makes a case for an expansive education that trains your mind to engage with a variety of subjects and skills. The philosophy behind this model has traditionally been called ¿liberal education¿ (from the Latin word for freedom, libertas). Together we will explore the history, practice, and rationales for a liberal education by putting canonical texts in conversation with more recent works. We will consider the relevance of liberal education to all areas of study, from STEM to the arts, and its relations to future careers. And we will examine the central place that the idea of ¿the good life¿ has historically enjoyed in theories of liberal education. You will be prompted to examine your own life, to question how and why you make decisions, and to argue for your views while respecting those of others. Maybe you will conclude that a liberal education is no longer relevant in the twenty-first century, but we hope that you will do so armed with a thorough understanding of what it has been and what it can be.nIn the end, college is less about what you will do in life, than about what kind of person you will be. So: what kind of person do you want to be? What kind of life will you live? Join us as we explore what others have said about these questions and prepare to answer them for yourself.

THINK 71. Citizenship in the 21st Century. 4 Units.
Citizenship is not just what passport you hold or where you were born. Citizenship also means equal membership in a self-governing political community. We will explore some of the many debates about this ideal: Who is (or ought to be) included in citizenship? Who gets to decide? What responsibilities come with citizenship? Is citizenship analogous to being a friend, a family member, a business partner? How have people excluded from citizenship fought for, and sometimes won, inclusion? These debates have a long history, featuring in some of the earliest recorded philosophy and literature but also animating current political debates in the United States and elsewhere.

THINK 72. Capitals. How Cities Shape Cultures, States, and People. 4 Units.
To what extent does the culture of a city define its citizens and their place in the world? By what process do some cities become capitals of various sorts at different historical moments? And how are they dependent upon those who they exclude? nnOur class will make a grand tour of Beijing, Florence, Madrid, Tenochtitlán/Mexico City, Paris, St Petersburg, Vienna, Berlin, Dakar, Buenos Aires, and Atlantis. While exploring these twelve cities in particular historical moments, we will also consider the relations between culture, power, and social life. How does the cultural life of a country intersect with the political activity of a capital? What is the tension between the local and the global? How do large cities shape our everyday experience, our aesthetic preferences, and our sense of history?nnAs we study specific cities as sites of culture, paying special attention to the literature, history, and arts, we will also investigate the many meanings of the word ¿capital.¿ Culture often functions as a type of capital that can be exchanged for economic capital or social capital, with capital cities as the site of this marketplace. Along the way, we'll ask you to reflect on your own location in the world and ultimately to consider how university study, including this course, garners social capital and when, where, and how you might transform it into another type of capital in the future.

PROGRAM IN WRITING AND RHETORIC

Program in Writing and Rhetoric (PWR)

Courses offered by the Program in Writing and Rhetoric are listed under the subject code PWR on the Stanford Bulletin's ExploreCourses web site (https://explorecourses.stanford.edu/search/?q=PWR&view=catalog&page=0&academicYear=&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&collapse=&filter-catalognumber-PWR=on&filter-coursestatus-Active=on&filter-departmentcode-PWR=on&filter-catalognumber-PWR=on). Courses offered by the Oral Communication Program within PWR are listed under the subject code ORALCOMM (https://explorecourses.stanford.edu/search/?q=ORALCOMM&view=catalog&page=0&academicYear=&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&collapse=&filter-departmentcode-ORALCOMM=on&filter-coursestatus-Active=on&filter-catalognumber-ORALCOMM=on&filter-catalognumber-ORALCOMM=on). See the Oral Communication Program (p. 185) tab for for more information about the program.

The Program in Writing and Rhetoric (PWR) designs and teaches courses that meet the Writing and Rhetoric requirement for undergraduates at Stanford as well as intermediate and advanced writing and rhetoric classes. For more information on the requirement, see the "Writing and Rhetoric Requirement (https://undergrad.stanford.edu/programs/pwr/courses/understanding-writing-and-rhetoric-requirements/)" page on the PWR website.

PWR courses engage students in rhetorical analysis of texts and research-based argument. Students in PWR courses learn and practice time-tested rhetorical principles to gain increasing control over the intellectual and stylistic elements of their writing; they learn to analyze the persuasive strategies of others and to apply those insights to their own writing.

Toward these ends, PWR 1 focuses on elements of academic argument: understanding a writer's stance; developing an argumentative thesis; discovering, developing, and deploying cogent proofs; making appropriate organizational and stylistic choices; and understanding the expectations of varied audiences. The course emphasizes research-based writing, including the effective use of primary and secondary sources and data based on fieldwork. Students enrolled in PWR 1 carry out significant research and use it as the basis for a persuasive research-based argument.

PWR 2 further develops students' skills in writing and the oral presentation of research, emphasizing the ongoing development of content, organization, and style. The course addresses the dynamic interdependence of writing and speaking, as well as the importance of visual and multimedia elements in the effective presentation of research. Students enrolled in PWR 2 have opportunities to draft and revise written assignments and oral presentations as well as opportunities to present the results of scholarly inquiry, with an emphasis on how to work purposefully and well with a variety of presentation media.

As a general rule, students complete a minimum of three major assignments in both PWR 1 and 2. Written assignments vary from 5 to 15 pages in length, and students work intensively on revising each piece of writing. Oral presentation assignments vary from 3 to 10 minutes in duration, and students have an opportunity to rehearse and revise major presentations. All assignments involve analyzing a range of texts as well as identifying, evaluating, and using multiple sources in support of research-based arguments. In-class work focuses on how to read with an increasingly critical eye, how to utilize a range of generative writing and revision activities, and how to identify, evaluate, integrate, and cite sources effectively.

Writing and Rhetoric classes enroll no more than 15 students; consistent participation is crucial. In-class activities include close reading and analysis of texts, drafting and revising parts of assignments, and responding to the writing of peers; in-class workshops are augmented by a minimum of three individual or small group conferences with the PWR instructor during the quarter.

For Academic Year 2020-2021 all PWR 1 and PWR 2 courses will meet virtually. (Online.)

Courses

The Writing and Rhetoric requirement includes courses at three levels.

1. The first-level course, taken in the first year, can be completed in PWR or Integrated Learning Environments, including Structural Liberal Education (SLE) and Immersion in the Arts: Living in Culture (ITALIC), or by completion of the Education as Self-Fashioning (ESF) course; the curriculum emphasizes analysis and research-based argument.
2. The second-level course, to be completed by the end of the sophomore year, is a writing and oral/multimedia presentation course taught by the Program in Writing and Rhetoric. Completion of Structured Liberal Education also fulfills this requirement. Introductory Seminars certified by the Writing and Rhetoric Governance Board satisfy the second-level Writing and Rhetoric Requirement (WRITE 2). Courses offered as Introductory Seminars require an additional application form; see the Introductory Seminars web site (https://undergrad.stanford.edu/programs/introsems/).
3. The third-level course is a Writing in the Major (WIM) course taught in each major, providing students with systematic opportunities to develop skills for writing in their chosen fields. A list of certified WIM courses may be found in the table of "Undergraduate Major Unit Requirements (p. 48)" of this bulletin. WIM course descriptions may be found under individual department and program sections.

The sequence of required courses provides a coordinated approach responsive to how students mature as writers, researchers, and presenters during their undergraduate years. At each level, students develop greater sophistication in conducting inquiry and producing scholarly work in progressively more specific disciplinary contexts.

Before the term in which students enroll in the first two levels of the requirement, they review course descriptions on the PWR Courses (https://undergrad.stanford.edu/programs/pwr/courses/) webpage. After reviewing the offerings, students submit a list of top choices, and the PWR office assigns students to courses based on these preferences.

Students wishing to pursue advanced work in Writing and Rhetoric may enroll in electives offered by PWR. Topics vary; further information may be found in the PWR section of the Stanford Bulletin's ExploreCourses web site (https://explorecourses.stanford.edu/search/?q=PWR+*&filter-ger-Writing2=on&view=catalog&filter-term-Winter=on&filter-term-Autumn=on&filter-ger-Writing1=on&filter-term-Spring=on&page=0&filter-coursestatus-Active=on&collapse=%2c5%2c&academicYear=20162017) or on the PWR advanced courses web page (https://undergrad.stanford.edu/programs/pwr/courses/advanced-pwr-courses/). PWR also offers courses culminating in a Notation in Science Communication and a Notation in Cultural Rhetorics. For more information, visit the webpage (https://undergrad.stanford.edu/programs/pwr/initiatives/notation-science-communication/).

PWR Courses Offered in 2020-21

- PWR 1 Courses (https://explorecourses.stanford.edu/search/?q=pwr*&view=catalog&filter-term-Winter=on&filter-component-SEM=on&filter-term-Autumn=on&filter-ger-Writing1=on&filter-

Advanced PWR Courses

Prerequisites: PWR 1 and PWR 2.

		Units
Courses in the Cultural Rhetorics track		
PWR 194NCR	Topics in Writing & Rhetoric: Introduction to Cultural Rhetorics	4
PWR 194AV	Topics in Writing & Rhetoric: Drawn from Life: The Power of True Stories in Autobio Comics	3-4
PWR 99A	Portfolio Preparation I	1
PWR 99B	Portfolio Preparation II	2
Courses in the Science Communication track		
PWR 91NSC	Intermediate Writing: Introduction to Science Communication	4
PWR 99A	Portfolio Preparation I	1
PWR 99B	Portfolio Preparation II	2
PWR 194EP	Topics in Writing & Rhetoric: Introduction to Environmental Justice: Race, Class, Gender and Place	4
PWR 91CW	Intermediate Writing: Seeing is Believing: The Power of Persuasive Data Stories	4
PWR 91KSA	Intermediate Writing: Storytelling and Science	4
Courses in the Digital Media and Visual Communications track		
PWR 91OID	Creating Your Digital Presence: The What, How, and Why of Building an Online Presence	3

Hume Center for Writing and Speaking

Location: Building 250
Mail Code: 2085
Phone: (650) 723-0045
Email: humecenter@stanford.edu
Web Site: http://hume.stanford.edu

The Hume Center for Writing and Speaking (Hume Center) works with all Stanford writers to help them develop rich and varied abilities in every aspect of writing and oral communication. In one-to-one sessions, Hume writing consultants help students get started on assignments; address and overcome writer's block or performance anxiety; learn strategies for revising and editing; and understand academic conventions in their fields. Hume emphasizes support for students' writing, oral presentations, and multimedia compositions for PWR, Thinking Matters, and Introductory Seminars while also serving all Stanford undergraduates through individual and group tutorials, workshops, and seminars. The Hume Center also works with students in Writing in the Major (WIM) courses and students writing Honors theses. Other events hosted by the Center include performances for Parents Weekend and Admit Weekend. For further details, see the Hume Center for Writing and Speaking (https://undergrad.stanford.edu/tutoring-support/hume-center/) web site.

Oral Communication Program

Email: speakinghelp@stanford.edu
Web Site: http://speakinghelp.stanford.edu (http://speakinghelp.stanford.edu/)

The Oral Communication Program provides opportunities for undergraduates and graduate students to develop or improve their oral communication skills. Courses and workshops offer a comprehensive approach to speech communication, including training in the fundamental principles of public speaking and the effective delivery of oral presentations. The goal is to enhance students' general facility and confidence in oral expression. The program also provides innovative discipline-based instruction to help students refine their personal speaking styles in small groups and classroom settings.

Student Writing and Oral Communication Tutors

Students with a passion for writing and/or public speaking are encouraged to apply to become writing or oral communication tutors (OCTs); the application process takes place each January, and for those students chosen to serve as writing tutors or OCTs, we offer a required training practicum in Spring Quarter.

Oral Communication Courses Offered in 2020-21

- Oral Communication Courses (https://explorecourses.stanford.edu/search/?q=oralcomm&view=catalog&filter-term-Winter=on&filter-term-Autumn=on&filter-term-Spring=on&page=0&filter-coursestatus-Active=on&collapse=%2c5%2c6%2c&academicYear=20202021)
  - Autumn Quarter (https://explorecourses.stanford.edu/search/?q=oralcomm&view=catalog&filter-term-Autumn=on&page=0&filter-coursestatus-Active=on&collapse=%2c5%2c6%2c&academicYear=20202021)
  - Winter Quarter (https://explorecourses.stanford.edu/search/?q=oralcomm&view=catalog&filter-term-Winter=on&page=0&filter-coursestatus-Active=on&collapse=%2c5%2c6%2c&academicYear=20202021)
  - Spring Quarter (https://explorecourses.stanford.edu/search/?q=oralcomm&view=catalog&filter-term-Spring=on&page=0&filter-coursestatus-Active=on&collapse=%2c5%2c6%2c&academicYear=20202021)
  - Summer Quarter (https://explorecourses.stanford.edu/search/?q=oralcomm&view=catalog&filter-term-Summer=on&page=0&filter-coursestatus-Active=on&collapse=&academicYear=20202021)

Office: Sweet Hall, Third Floor
Web Site: https://storytelling.stanford.edu/

The Stanford Storytelling Project helps students explore how to use and craft stories to engage the stories that surround us. The project's courses, grants, live events, and weekly workshops give students opportunities to study how they can use stories to grow, communicate, and create social change. The project's award-winning podcasts also give students an unprecedented opportunity to create professional-level audio stories and share their research and personal stories with a large audience. Find out more about the programs (*Writer's Studio, StoryLab, Braden Grants*) and podcasts (*State of the Human, Off the Page*) on the project's website (https://storytelling.stanford.edu/). The project is housed within the Program in Writing and Rhetoric in VPUE.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a "credit" or "no credit" grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a "credit" or "satisfactory" grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate University Requirements

Grading

PWR courses completed during academic year 2020-21, including Summer 2021, and taken for CR/NC grading with a Credit (CR) grade satisfy the WR-1 and WR-2 requirement. This grading policy exception, as well as online courses, will also be allowed for WR-1 and WR-2 transfer credit evaluations, provided those courses fulfill the other criteria for equivalency approval.

Faculty Director: Adam Banks

Director: Marvin Diogenes

Associate Director: Christine Alfano

Director, Hume Center for Writing & Speaking: Zandra Jordan

Associate Director, Hume Center for Writing & Speaking: Norah Fahim

Director, Oral Communication Program: Doree Allen

Director, Stanford Storytelling Project: Jonah Willihnganz

Lecturers: Christine Alfano, Paul Bator, Angela Becerra Vidergar, Shay Brawn, Tessa Brown, Russ Carpenter, Kevin DiPirro, Erik Ellis, Norah Fahim, Lindsey Felt, Thomas Freeland (Oral Comm), Mark Gardiner, Alex Greenhough (ITALIC), Megan Formato, Wendy Goldberg, Arturo Heredia, Shannon Hervey, Sarah Hillenbrand, Donna Hunter, Jennifer Johnson, Chris Kamrath, Valerie Kinsey, Clara Lewis, Helen Lie (Oral Comm), Gabrielle Moyer, Ashley Newby, Sarah Perkins, John Peterson, Sarah Pittock, Emily Polk, Becky Richardson, Kim Savelson, Tesla Schaeffer, Selby Schwartz, Ruth Starkman, Jenne Stonaker, Lisa Swan, Kathleen Tarr, Jake Warga (Storytelling), Ann Watters, Cassie Wright

Fellows: Samah Elbelazi, Isla Flores-Bayer, Amanda Frye Leinhos, Andy Hammann, Hayden Kantor, Lily Lamboy, Raechel Lee, Gigi Otalvaro, Eldon Pei, Irena Yamboliev, Renren Yang, Yanshuo Zhang.

Courses

PWR 1A. Introduction to Writing at Stanford: Rhetorics of Consumer Culture. 3 Units.
What does consumer culture say about the larger culture? PWR 1A uses questions about consumer culture -- music, movies, sports-- for writing and researching. How do video games teach engineering and physics? How do detective and courtroom dramas lead to discussions about DNA analysis? We look at consumer culture as cultural critics, using ideas about technology, society, and economics to analyze human behavior. We'll study theories about media to research how everyday artifacts are signs of our culture. We¿ll write an analytical essay about cultural commentary or a commercial space, learn about library research to explore topics of your choice, and share our research. We¿ll work together as a group to practice collaboration and project-based learning. Enrollment exclusive to incoming Stanford freshman student athletes. PWR1A classes are small, workshop-style meetings that encourage extensive interaction between students and instructors. PWR1A does not meet the Stanford first-year writing requirement.

PWR 1AB. Writing & Rhetoric 1: Podcasts to Broadcasts: The Rhetoric of Radio. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1ABA. Writing & Rhetoric 1: Beyond! The Rhetoric of Space Exploration. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1AH. Writing & Rhetoric 1: The Rhetoric of American Multicultural Experience. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Exploration of multicultural experience and cultural assimilation, focusing on the theme of social acceptance. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1AK. Writing & Rhetoric 1: The Rhetoric of Humor. 4 Units.
In this class we will explore the how and why of humor through readings, classroom discussion, rhetorical analysis, and, most importantly, through writing, and examine the ways that humor, as a rhetorical tool, is deployed in written and oral texts. As we consider theories of humor, we will begin to understand how humor works and why it is so powerful. For full course descriptions, see https://vcapwr-catalog.stanford.edu. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. Enrollment is handled by the PWR office.

PWR 1AL. Writing & Rhetoric 1: Schooling in the American Mind: Rhetorics of Teaching and Learning. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1AM. Writing & Rhetoric 1: King Tut's Tomb, Penicillin, and Lilliputians: The Rhetoric of Discovery. 4 Units.
In this course, as we investigate the power of the archetype of discovery, we also critically consider what these stories hide or gloss over. How revolutionary are most discoveries after all? What perspectives are left out? What is a truthful way to portray new insights? How do we capture popular attention but include the broader context of experiment and expeditions? You will gain a complex understanding of how writing and rhetoric both structure and hide knowledge from the audience, and how you can use this in your writing in both persuasive and responsible ways. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1AN. Writing & Rhetoric 1: The Rhetoric of Identity Cultivated Through a Hip-Hop World. 4 Units.
This course seeks to explore the ways that we read and write ourselves into a world that is engrossed in Hip-Hop culture by asking: What does it mean to live in a world where Hip-Hop permeates every aspect of society? How can Hip-Hop culture be used to understand the rhetoric that is used in broader society in reference to both this moment in history and the culture itself? By engaging both Hip-Hop artists such as Kendrick Lamar and Nicki Manij, and artists that operate in a Hip-Hop world like Beyoncé, this course investigates the ways that we write ourselves into a world engrossed in Hip-Hop culture that denies the humanity and value of its members. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1BH. Writing & Rhetoric 1: A Seat at the Table-Rhetorics of Belonging. 4 Units.
PWR 1 courses focus on developing writing and revision strategies for rhetorical analysis and research-based arguments that draw on multiple sources. This class takes as its theme the symbolism of pulling up a chair to a table to represent a sense of belonging and inclusion. What happens when you get ¿a seat¿ that you've pursued for a long time? This course asks you to engage with feelings of inclusion/exclusion by drawing from your own experiences of negotiating and fighting for your seat. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1BK. Writing & Rhetoric 1: Writing What You Eat: The Rhetoric of Food. 4 Units.
In this course, we will focus on the rhetoric of food in order to explore how our relationship to what we eat is reflected in writing about ourselves, our society, and our world. Essays, recipes, blog posts, and newspaper articles are some of the genres we will examine in order to explore how issues of identity, community, ethics, and wellness can be expressed in food writing. How does what we choose to eat reflect on how we see ourselves and the world around us? What responsibilities do we have, if any, as consumers of food in one of the world's richest nations? For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1BRA. Writing & Rhetoric 1: Growing Up Millennial: The Rhetoric of Coming of Age. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1BRB. Writing & Rhetoric 1: In Another's Shoes: The Rhetoric of Empathy. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1BW. Writing & Rhetoric 1: The Loyal Opposition: The Rhetoric of Dissent. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1CA. Writing & Rhetoric 1: The Rhetoric of Gaming. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For videos and full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1CK. Writing & Rhetoric 1: Investigating the News: Journalism, Technology & the Future. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1CL. Writing & Rhetoric 1: The Politics of Difference, Identity, and Harm: The Rhetoric of Hate Crimes. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1CLA. Writing & Rhetoric 1: Hate Crime: Writing on Law and Politics. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1CLB. Writing & Rhetoric 1: Writing on Campus Life. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1CW. Writing & Rhetoric 1: Sporting Rhetoric: Power, Performance, Profit and Politics. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1CWA. Writing & Rhetoric 1: Rhetoric of Body/Bodily Rhetorics. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1D. Writing Academic Arguments: The Art of the Essay. 3 Units.
Offered only to participants in the Summer College for High School Students. How can you write college-level essays that hook readers and sustain their interest over the course of a well-researched argument? In this course you'll learn how to craft good research questions, conduct ethical scholarly research, engage counterarguments, and write and revise academic essays. You¿ll write a rhetorical analysis of a work that interests you¿an essay, film, song, painting, etc. and develop a persuasive, research-based essay exploring a topic you feel passionate about. Does not meet the Stanford first-year writing requirement.

PWR 1DH. Writing & Rhetoric 1: The Virtue of Vice and the Vice of Virtue: The Rhetoric of Criminality. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Students investigate language and images that construct criminals, analyzing how these representations shape personal and cultural beliefs. Analysis of the costs and benefits of retributive, restorative, and transformative justice systems. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1ECA. Writing & Rhetoric 1: Where I'm From: The Rhetorics of Mapping and Human Geography. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1EE. Writing & Rhetoric 1: Prowling Toward Certainty: Exploration as Argument. 4 Units.
In a culture that rewards people who write and speak with conviction, ambivalence often seems like a personal shortcoming that must be remedied with certainty. but what if, instead of sweeping your ambivalence under the rug, you tried to embrace it in your research and foreground it in your writing? What advantages can be found in the deep, risky waters of uncertainty? Can ambivalent texts move and persuade us? In this course, we'll explore such questions in an attempt to understand the relationship between ambivalence and persuasion. We'll analyze and discuss the ways that writers such as Annie Dillard, Stephen Jay Gould, and Michael Pollan not only engage their ambivalence but weave it into their prose. Most importantly, we'll explore how you can develop rhetorical strategies and habits of mind to achieve results in your own analytical and persuasive writing. We'll study how to craft compelling arguments that do fuller justice to complex emotions and ideas.For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1EI. Writing & Rhetoric 1: Another Scene: Writing About Why Movies Matter. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1EP. Writing & Rhetoric 1: The Rhetoric of Global Development and Social Change. 4 Units.
PWR 1 courses focus on developing writing and revision strategies for rhetorical analysis and research-based arguments that draw on multiple sources. This class takes as its theme international development projects which have marked every sector of global society. We will unpack and interrogate the numerous discourses around international "development" as a strategy for achieving social change and look at how culture, history, politics, and economics have informed development's connections to capitalism, modernity, and most recently, globalization. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1EV. Writing & Rhetoric 1: The Rhetoric of Globalization. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1FL. Writing & Rhetoric 1: Rhetoric of F Lee. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1GBJ. Writing & Rhetoric 1: The Rhetoric of Cultural Memories of Violence. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GBR. Writing & Rhetoric 1: Spill: The Rhetoric of Confessions and Self-Revelations. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GBW. Writing & Rhetoric 1: Deathbeds: Art and the Rhetoric of Disease. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GCA. Writing & Rhetoric 1: AH! Real Monsters: The Rhetoric of Monstrosity in Popular Culture. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GCD. Writing & Rhetoric 1: Doomsdays: The Rhetoric of Apocalypse. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1GCJ. Writing & Rhetoric 1: El Otro Lado / The Other Side: The rhetoric of real and imagined borders. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. The physical border between the United States and Mexico is the focus of the examination of the artistic, scholarly, and political rhetoric of real and imagined borders. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GCL. Writing & Rhetoric 1: Rhetoric of Ledbetter. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GCO. Writing & Rhetoric 1: To Boldly Go: The Rhetoric of Travel. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GCX. Writing & Rhetoric 1: "I Do": The Rhetoric of Consent. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Examination of the idea of consent and the underlying principles of free will and autonomy in the fields of law, intellectual property, marriage contracts, political philosophy, medical ethics, and sex. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GCZ. Writing & Rhetoric 1: "It Never Got Weird Enough For Me": The Rhetoric of Intoxication. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GDA. Writing & Rhetoric 1: Rhetoric of Murray. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Critical analysis of the ways in which online life intersects with real life around issues including privacy, authorship, and morality. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GDM. Writing & Rhetoric 1: Revolution and Revolt: Political Writing for Political Action. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GDS. Writing & Rhetoric 1: From Trash Talk to Toxic Discourse: Rhetorics of Waste. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1GEM. Writing & Rhetoric 1: The Rhetoric of Foodie Culture. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1GER. Writing & Rhetoric 1: The Rhetoric of Social Media. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Exploration of the multifaceted and hypertextual rhetoric of social media, the intersection between rhetoric and social media, and how new types of online media have heightened participation, openness, and a sense of community. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GEV. Writing & Rhetoric 1: All the World's a Stage: The Rhetoric of Theater. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Students investigate the role theater plays in the rhetorical strategies of various literary and non-literary texts as well as visual materials such as films and cartoons. See http://ual.stanford.edu/AP/univ_req/PWR/Req.html.

PWR 1GFL. Writing & Rhetoric 1: From Con Artists to Catfish: The Rhetoric of Trickery. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1GGH. Writing & Rhetoric 1: Understanding American Political Speeches of the 20th and 21st Centuries. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Rhetorical analyses of speeches by a range of 20th-century American political figures and the political rhetoric of the present day. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GGK. Writing & Rhetoric 1: Ladies, Tramps, and Other Furry Friends: The Rhetoric of Pets. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1GGZ. Writing & Rhetoric 1: The Rhetoric of Race in American Cinema. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1GIF. Writing & Rhetoric 1: Dark Humor: A Rhetoric of Social Taboos. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Study of dark humor as it deals with the most delicate subject matter, topics we designate as sacred and beyond criticism: violence and bodily damage, illness, aging and death, race and ethnicity, and gender and sexuality. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GIY. Writing & Rhetoric 1: Jekylls and Hydes: The Rhetoric of the Scientist. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1GJE. Writing & Rhetoric 1: Gay Ghettoes, Queer Hoods: The Rhetoric of Race and Urban Sexual Subcultures. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Study of the rhetoric of urban sexual subcultures, and how the rhetoric in medical science, journalism, and popular entertainment defines queers of color in intellectual thought and pop culture. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GJH. Writing & Rhetoric 1: Invention and Imagination in the Nineteenth Century. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GJM. Writing & Rhetoric 1: The Rhetoric of California. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. ¿ See http://ual.stanford.edu/AP/univ_req/PWR/Courses.html.

PWR 1GJN. Writing & Rhetoric 1: Speaking of Dreams. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GJS. Writing & Rhetoric 1: Our Warded World: The Rhetoric of Conservation. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GJU. Writing & Rhetoric 1: 'Surface of Past Time': The Rhetoric of Nostalgia. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GJW. Writing & Rhetoric 1: I Know It When I Hear It: The Rhetoric of the Unspeakable. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GKL. Writing & Rhetoric 1: The Use and Abuse of Civil Debate: The Rhetoric of Collective Thinking. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GLA. Writing & Rhetoric 1: Code Orange: Post-9/11 America and the Rhetoric of Alarm. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GLB. Writing & Rhetoric 1: In Poor Taste: The Rhetoric of Catastrophe Comedy. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1GLD. Writing & Rhetoric 1: The Cyborg Body: The Rhetoric of Disability. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Analysis of ¿disability,¿ using the analogy of the cyborg, in an era when the human body has become plastic, digitized and surgically manipulated. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GLL. Writing & Rhetoric 1: Wow, that's so postcard: The Rhetoric of Tourism. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Analysis of tourism as a way of seeing and representing the rest of the world and oneself, touching on some of the most pressing political, economic, and cultural questions facing an increasingly globalized world. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GLR. Writing & Rhetoric 1: Are you Fuzzy and Techie?: The Rhetoric of Art and Science. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GM. Writing & Rhetoric 1: Writing for the Wild and the Tame. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Exploration of the tension between reverence and science, language and feeling, natural and unnatural in the interrelationship of rhetoric and nature. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GMC. Writing & Rhetoric 1: Dancing about Architecture: Or Finding Words for the Wordless. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1GMD. Writing & Rhetoric 1: Violent Innocents: Writing Our Way Out of American History. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1GMG. Writing & Rhetoric 1: Love to Hate: The Rhetoric of Misanthropy. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GMH. Writing & Rhetoric 1: Transformative Turns: The Rhetoric of Revolution. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1GMK. Writing & Rhetoric 1: Pure and Unadulterated: The Rhetoric of Contamination. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GML. Writing & Rhetoric 1: The Rhetoric of Migrant Protest. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1GMR. Writing & Rhetoric 1: Fearful Symmetry: The Rhetoric of the Double. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Exploration of the fictions of the double and the philosophies of personal identity, and how both anticipate and condition contemporary responses to the twin issues of human cloning and intellectual property. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GMT. Writing & Rhetoric 1: The Shape of Things: The Rhetoric of Design. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GMV. Writing & Rhetoric 1: Don't Take it Personally!: The Rhetoric of The Insult. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Analysis of how insults function rhetorically in specific situations and how they have catalyzed prolonged confrontations around race, education, politics, sexual orientation, and national standing. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GMX. Writing & Rhetoric 1: 'Too Much Information?': The Rhetoric of Social Networking & Online Privacy. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Critical analysis of the ways in which online life intersects with real life around issues including privacy, authorship, and morality. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GMZ. Writing & Rhetoric 1: The Rhetoric of Institutional Power. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GNA. Writing & Rhetoric 1: Talking Baseball. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GNL. Writing & Rhetoric 1: Punk Rock and Rhetoric of Protest Music. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GNV. Writing & Rhetoric 1: Rhetoric of Bioethics and Biopolitics. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1GO. Writing & Rhetoric 1: Art, Writing, and Performance: The Rhetoric of Visual Analysis. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1GPS. Writing & Rhetoric 1: The Rhetoric of English. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GRA. Writing & Rhetoric 1: Millions Like Us: The Rhetoric of Crowds. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include symbolic meaning of rock, sports, and political events; virtual crowds online; and use of crowds to shape ideology. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GRH. Writing & Rhetoric 1: 2012 & the Rhetoric of Apocalypse. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Analysis of the rhetoric of apocalypse as a cultural phenomenon. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GRK. Writing & Rhetoric 1: Plugged In: The Rhetoric of Networks. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1GRL. Writing & Rhetoric 1: Queer Rhetoric: The Language of Sex, Gender, and Identity. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1GRN. Writing & Rhetoric 1: Lasting Only One Day: The Rhetoric of Ephemera and Other Discarded Things. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Exploration of ephemera and how they argue for their meaning as they collect and preserve the past while reflecting humantransience. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GRY. Writing & Rhetoric 1: Fashionable Fables: The Rhetoric of Modern Mythology. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GRZ. Writing & Rhetoric 1: Decisions, Rhetoric, and the Art of Choosing. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GSD. Writing & Rhetoric 1: Masters of Style - The Rhetoric of Sophistication. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Examination of how style is mastered and deployed in a range of genres. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GSG. Writing & Rhetoric 1: From Cowboys to Computers: Rhetoric of the American West. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1GSO. Writing & Rhetoric 1: The Varieties of Conservative Experience. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GTA. Writing & Rhetoric 1: What Lies Beneath: The Rhetoric of the Underworld. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GTJ. Writing & Rhetoric 1: Rhetoric of the Unruly: Iconoclasts and Their Controversies. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GTL. Writing & Rhetoric 1: Love at First Sight and Forever: The Rhetoric of Romance. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1GTM. Writing & Rhetoric 1: The Rhetoric of Taste. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Examination of the rhetoric of taste as the luxurious product of a sophisticated society and as tedious, stultifying, snobby, or outright offensive. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GTX. Writing & Rhetoric 1: 'Making My Way Downtown': The Rhetoric of the City. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Through historic, literary, journalistic, and film portrayals of city life, we will analyze the idea of 'the city' as constructed through media and in the imaginations of its residents, and the way life in cities is really lived. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GVC. Writing & Rhetoric 1: The Rhetoric of Circus. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GVG. Writing & Rhetoric 1: The Way of the Dodo: Rhetoric of Extinction. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1GVN. Writing & Rhetoric 1: Noise Machines: The Rhetoric of Sound and Technology. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Critical analysis of the ways in which online life intersects with real life around issues including privacy, authorship, and morality. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GWI. Writing & Rhetoric 1: Rhetoric of Winkler. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GWS. Writing & Rhetoric 1: Body Politics: The Rhetoric of Transhumanism. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1GWT. Writing & Rhetoric 1: Money for 'Nothing' : The Rhetoric of Silicon Valley. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1HF. Writing & Rhetoric 1: From Ghost Bikes to the Googleplex: Digital Rhetoric and Social Action. 4 Units.
PWR 1 courses focus on developing writing and revision strategies for rhetorical analysis and research-based arguments that draw on multiple sources. This class takes as its theme what makes social change 'work' in networked environments (that is, pretty much everywhere). For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1HJ. Writing & Rhetoric 1: Not Just Art: The Rhetoric of Museums. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1HJA. Writing & Rhetoric 1: What None Can Avoid: The Rhetoric of Death. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1HK. Writing & Rhetoric 1: Food Values: The Rhetoric of What and How We Eat. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1HT. Writing & Rhetoric 1: What Are You, Anyway? The Rhetorics of Ethnic and Racial Identity. 4 Units.
PWR 1 courses focus on developing writing and revision strategies for rhetorical analysis and research-based arguments that draw on multiple sources. This class takes as its theme ideas about identity and how that centers to a great degree on ethnicity and race. These concepts, often considered equal, are tied to social narratives that influence all our lives. Now more than ever, they serve as cultural arenas in which struggles over equality and equity take place. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1HZ. Introduction to College Writing. 3 Units.
What are the strategies and practices that can help you become a successful writer, no matter what your area of study? In this class, students will develop critical reading, writing, and research skills, with a special attention to college application practices, strong argumentation, rhetorical awareness, and introductory research skills. The sections are small, encouraging extensive interaction between students and instructors. Class activities will primarily be in the form of discussions, peer work, and small group activities; in addition, students will have periodic one-to-one meetings with instructors for individualized learning. This class does not meet the Stanford first-year writing requirement.

PWR 1IF. Writing & Rhetoric 1: The Rhetoric of Language and Social Identity in America. 4 Units.
Language and social identity are closely intertwined. Have you ever noticed that you change the way you speak to present a particular social identity? For example, have you ever switched between dialects or languages to show alignment with certain social groups or mark your 'in-group' status? Because language is flexible (and somewhat controllable), it can be used as a resource to create and index identity. However, given its flexible nature, criticizing someone's language often becomes a more socially acceptable way of attacking someone than something that seems like bald-faced racism/sexism/homophobia, etc. In this course we'll explore this complex link between identity and language.nnThis course explores the way language and social identity are defined, discussed, and debated in America, and the assumptions this rhetoric presents about race, class, education and other social identities more broadly. Together, we¿ll consider: What's it like to grow up monolingual versus bilingual or multilingual? What role do our ethnicity and/or race play in how our language skills are perceived? What role do language attitudes and stereotypes play in influencing our daily lives? What role does the media play? How is language discussed in politics? Students will be able to work on a research project related to social identity and language on a topic of their choice.

PWR 1IY. Writing & Rhetoric 1: Rhetorics of Travel and Tourism. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1IYA. Writing & Rhetoric 1: The Art and Science of Gender and its Bending. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1JA. Writing & Rhetoric 1: The Rhetoric of Number One. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1JC. Writing & Rhetoric 1: Modern Family: The Rhetoric of Sex and Reproduction. 4 Units.
The issue of reproduction provides a powerful rhetorical lens for looking critically and incisively into our own assumptions about race, gender, class, sexuality, power, rights, justice, "nature," technology, and modernity. With an intention to challenge assumptions, we will explore issues through a variety of perspectives. For example, we will explore theoretical debates over the "family" and its viability as a vehicle for securing recognition and rights, place liberal feminist ideas like "bodily autonomy" in conversation with complicatedly contradictory concepts like natal endangerment or father's rights in abortion and family planning, investigate legal and medical histories of eugenics, sterilization abuse, and practices of coercive and disciplinary contraception, and analyze rhetoric associated with different forms of commodified reproduction, from black women's forced "manufacture" of slave labor to practices of transnational gestational surrogacy. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1JD. Writing & Rhetoric 1: Frog Princes and Ugly Ducklings: The Rhetoric of Self-Transformation. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1JJ. Writing & Rhetoric 1: The Rhetoric of Language and Thought. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1JJA. Writing & Rhetoric 1: Languages We Speak: Discourses of Linguistic Diversity and Language Change. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1JO. Writing & Rhetoric 1: Join the #LoveArmy: The Rhetoric of Radical Compassion. 4 Units.
In this writing class, we will examine the power and possibility of radical compassion. We will briefly explore love's myriad forms before turning almost exclusively to *love of humanity* a deep social concern for all people and the willingness to act on that concern as an important foundation for justice. Our inquiry will take us through the fields of neuroscience, evolutionary biology, psychology, sociology, history, philosophy as well as cultural, feminist and religious studies. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1JP. Writing & Rhetoric 1: The Rhetoric of Consumer Culture. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Students explore what consumerism says about the larger culture and the segmented groups within it, analyzing popular and scholarly texts as well as current trends in pop culture, to research how the activities of consumerism shape culture. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1JPA. Writing & Rhetoric 1: The Rhetoric of Liberal Arts Education. 4 Units.
Is higher education primarily a pathway to a career, or is it designed for students to learn about themselves and the human experience? Is it possible for higher education to achieve both of these goals? In this course we will consider the concept of liberal arts education and address how college should prepare its students for adult life. By working with education theorists as wide-ranging as Diane Ravitch, Ken Robinson, William Deresiewicz, and Stanley Fish, we will frame the debate and set the stage for your own investigation. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1JS. Writing & Rhetoric 1: Beyond DNA: The Omics Revolution. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1JSA. Writing & Rhetoric 1: The Rhetoric of Plants. 4 Units.
PWR 1 courses focus on developing writing and revision strategies for rhetorical analysis and research-based arguments that draw on multiple sources. In this class we will refocus our attention on plants, using them as a lens to explore, research, and write about different aspects of our world. For example, we will study how new scientific ideas are communicated and accepted by studying the work of maize geneticist and Nobel laureate Barbara McClintock. We will explore Lysenkoism, the politicization of agricultural science in the Soviet Union, drawing parallels to modern day climate change science, and we will dive into the research on urban tree coverage to see how plants can be a marker for social inequality For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1JSB. Writing & Rhetoric 1: Ignorance. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1JT. PWR 1: RHETORIC HEALTH CARE. 4 Units.
.

PWR 1KA. Writing & Rhetoric 1: The Rhetoric of Innovation: Transformations and Missed Opportunities. 4 Units.
PWR 1 courses focus on developing writing and revision strategies for rhetorical analysis and research-based arguments that draw on multiple sources. This class takes as its theme the rhetoric and writing that contributed to invention transformations and missed opportunities through the lens of social, financial, and political pressures. Who has the capability to bring a new idea to the public? Who has been silenced? For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1KD. Writing & Rhetoric 1: The Feature Article: Writing and Change. 4 Units.
PWR 1 courses focus on developing writing and revision strategies for rhetorical analysis and research-based arguments that draw on multiple sources. This class takes as its theme how various feature article writers argue the issues of soaring energy and food prices, serious market volatility, climate change, an ongoing war in the Middle East, and how terms like ¿crisis¿ or ¿change¿ impact the discussion. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1KG. Writing & Rhetoric 1: Rhetoric of McDonough. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1KJ. Writing & Rhetoric 1: The Rhetoric of Film. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1KMB. Writing & Rhetoric 1: Cradle to Cradle: the Rhetoric of Sustainability. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1KMC. Writing & Rhetoric 1: Staying Cool on a Hot Planet: Environmental Rhetoric for a Changing World. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1KR. Writing & Rhetoric 1: Trust, Rhetoric, and Writing. 4 Units.
PWR 1 courses focus on developing writing and revision strategies for rhetorical analysis and research-based arguments that draw on multiple sources. This class takes as its theme trust as an ancient and persistent rhetorical problem, which impacts how we experience, interpret, and compose information. In our own age of instantaneous global communication and an internet that never forgets, these concerns proliferate. Trust becomes an essential consideration for writers and researchers working to build knowledge at the university and beyond, not to mention a valuable commodity. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1KS. Writing & Rhetoric 1: Imagining Others: 21st Century Cosmopolitanism. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Exploration of cosmopolitanism, questions related to globalization, nationalism, citizenship, cultural values, aesthetics, and identity. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1KSA. Writing & Rhetoric 1: Constructing Childhood. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1KSB. Writing & Rhetoric 1: Health Matters: Health Innovation and Communication. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1KT. Writing & Rhetoric 1: The Emperor's New Clothes: The Rhetoric of Modern Mythology. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1KTA. Writing & Rhetoric 1: "That's Entertainment!" The Rhetoric of Hollywood's Inequities. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1LC. Writing & Rhetoric 1: Truth, Lies, and Contestation: Rhetorics of Sexual Victimization and Survival. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1LF. Writing & Rhetoric 1: #NoBodyIsDisposable: The Rhetoric of Disability. 4 Units.
In this class we will move beyond definitions of disability as "abnormality" or "deviance" to explore how advances in science, technology, medicine, and culture have transformed our understanding of what constitutes a "normal' human body. We will ask how arguments about disability incorporate concepts such as neurodiversity, chronic illness, and other invisible conditions. At the same time, we will study how contemporary perspectives on disability interact with issues such as technology, metaphors of the prosthesis, cultural constructions of the body, and even what it means to be human. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1LFA. Writing & Rhetoric 1: Back to the Future: The Rhetoric of Futurity. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1LL. Writing & Rhetoric 1: The Rhetoric of Meritocracy. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1LM. Writing & Rhetoric 1: Two Truths and a Lie: The Rhetoric of Authenticity. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1LMA. Writing & Rhetoric 1: From Page to Stage: The Rhetoric of American Drama. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1LO. Writing & Rhetoric 1: What Are We Trying to Sustain? Rhetoric of Nature's Values and Services. 4 Units.
With increasing rates of environmental impacts from human activity, communities across the planet face challenges for sustainability. Given the many benefits we derive from nature - from cultural and spiritual benefits, to basic goods like food and water, to economic benefits from the use of natural resources - defining what we value and what we wish to sustain is a top priority. This class will examine diverse perspectives on the value and services we derive from nature and consider challenges for balancing multiple uses of nature in the context of sustainable resource management and conservation. For full course descriptions, see https://vcapwr-catalog.stanford.edu. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. Enrollment is handled by the PWR office.

PWR 1LP. Writing & Rhetoric 1: Crafting Credibility: Rhetoric and Authority. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1LPG. Writing & Rhetoric 1: Power Lines and Water Pipes: Writing The Global City Through Infrastructure. 4 Units.
What can power lines, water pipes, and fibre optic cables tell us about how different groups of people navigate life in global cities? While such infrastructures are often considered to be the mere "background" of socio-cultural life in cities, this course will center on them and their rhetorical contexts in order to explore how opportunity and inequality are imagined and discussed in urban spaces. We will contemplate how knowledge, relations of power, and practices of governance work within the framework of deep rhetorical analysis of urban infrastructures. For full course descriptions, see https://vcapwr-catalog.stanford.edu. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. Enrollment is handled by the PWR office.

PWR 1LS. Writing & Rhetoric 1: Beyond the Achievement Gap: Writing about Education. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1MA. Writing & Rhetoric 1: The Power of Words: Rhetoric of Social and Technological Changes. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1MC. Writing & Rhetoric 1: Oppositional Rhetoric: Resistance and Public Protest. 4 Units.
In 2010, the University of Michigan hosted an international conference entitled "Against Health," which questioned how health has become a moralizing system dictating how people should behave and make decisions. In 2014, the Whitney Biennial selected Jackie Wang's anti-racist essay "Against Innocence" to be sold as part of their elite art exhibition. But how can one be "against health" or "against innocence"? These titles pose riddles for their readers. They use a strategy of oppositional rhetoric to challenge foundational assumptions in provocative ways. How can we as writers contend with the challenges at the heart of such rhetoric? For a full course description, see https://vcapwr-catalog.stanford.edu. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. Enrollment is handled by the PWR office.

PWR 1MG. Writing & Rhetoric 1: The Rhetoric of the American West. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1MGD. Writing & Rhetoric 1: Who Speaks for Nature? Rhetorics of Environmentalism and Justice. 4 Units.
The last hundred years have seen organized environmentalism become a major force on the world stage. But the environment is still essentially contested. Who is at risk from environmental problems? What environmental problems should be prioritized? And who should be able to speak out as authentic protectors of the earth? In this course, we examine the ways that environmental and conservation writers from classic environmental writers to contemporary activists talk about nature to see how close readings of their work highlight fundamental disagreements about justice and politics in societies across the globe. For full course descriptions, see https://vcapwr-catalog.stanford.edu. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. Enrollment is handled by the PWR office.

PWR 1MGE. Writing & Rhetoric 1: Numbers, Metrics, and Counting: The Rhetoric of Quantitative Thinking. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1MO. Writing & Rhetoric 1: Imagining Technology: The Rhetoric of Humans and Machines. 4 Units.
This course explores the ways that technology has been imagined on the page and on the screen. We look at how a diverse group of sources from Cold War comics to Elon Musk's twitter account contribute to an ever-changing definition of 'technology.' And we consider how our hopes and anxieties about technology are represented in creative genres and media. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1MR. Writing & Rhetoric 1: "Did You Hear That?": The Rhetoric of Ghost Story. 4 Units.
This class will explore varied aspects of the rhetoric of haunting, considering the supernatural, the psychoanalytical, the traumatic, and the simply hard to believe. nWe will examine how ghosts represent cultural values and fears, investigating the rhetorical elements of the ghost story: How are supernatural accounts constructed? How are they debunked? What strategies do writers use to prove the impossible, to convince the world that ghosts can exist? We will use our explorations of the supernatural to shape our ability to make nuanced arguments, to draw effectively from research materials, and to think critically about what we see and hear. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1MS. Writing & Rhetoric 1: Seeing Nature: The Power of Environmental Visual Rhetoric. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1NA. Writing & Rhetoric 1: The Rhetoric of Childhood. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1NC. Writing & Rhetoric 1: The Passport, The Profile, The Portrait: Rhetorics of Identification. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1NF. Writing & Rhetoric 1: Language 2.0: Investigating the Rhetoric of Digital Language. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1PB. Writing & Rhetoric 1: Supreme Court Rhetoric. 4 Units.
Applying a rhetorical framework, we will discuss and analyze historical cases such as Barron v Baltimore (1833), in which the Court found that federal Bill of Rights guarantees were not binding upon states, as well as contemporary Supreme Court issues such as the debate surrounding the status of Roe v. Wade under the recently re-configured Roberts Court. We'll also discuss and examine the rhetoric of "amicus curiae" briefs, editorials about Court opinions, and pertinent lower court decisions. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1PF. Writing & Rhetoric 1: Body Rhetoric East and West: Gender, Sport, Art, and Medicine. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1PHA. Writing & Rhetoric 1: Sisterhood, Brotherhood, Solidarity: The Rhetoric of Greek Life. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1RHA. Writing & Rhetoric 1: The Rhetoric of Writing. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1RHB. Writing & Rhetoric 1: The Rhetoric of Research. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1RHC. Writing & Rhetoric 1: The Rhetoric of Composition. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1RHD. Writing & Rhetoric 1: The Rhetoric of Communication. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1RL. Writing & Rhetoric 1: The Rhetoric of Happiness. 4 Units.
In this course, we will examine the notion of happiness — and some of its adjacent or "opposing" feelings, such as contentment, or depression and anger — and the rhetoric around it by studying an array of examples from various sources, such as books, websites, or films. Students will explore the contexts, motives, and ramifications of the representational strategies, while developing critical skills to analyze and articulate their research findings and arguments regarding topics of their choice. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1RLA. Writing & Rhetoric 1: Stuff of Nightmares: The Rhetoric of Fear. 4 Units.
PWR 1 courses focus on developing writing and revision strategies for rhetorical analysis and research-based arguments that draw on multiple sources. This class takes as its theme fear. While fear is undeniably physiological and psychological, it is also shaped through discourse. We will make legible some of those discursive dynamics and analyze how different fears manifest. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1RP. Writing & Rhetoric 1: The Rhetoric of Archaeology. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1RW. Writing & Rhetoric 1: Writing for Liberation: The Rhetoric of Antiracism. 4 Units.
PWR 1 courses focus on developing writing and revision strategies for rhetorical analysis and research-based arguments that draw on multiple sources. In this class we will explore the enduring power of writing to change the world, paying particular attention to the role of narrative in movements for racial justice throughout U.S. history. We will consider how national discussions about racism are rhetorically constructed, exploring how language can be leveraged to support or challenge oppressive racial frameworks. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1RY. Writing & Rhetoric 1: From Hero to Celebrity: The Rhetoric of Fame. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1SB. Writing & Rhetoric 1: The Rhetoric of Technology. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1SBB. Writing & Rhetoric 1: The Rhetoric of Robots, Cyborgs, Mutants and Other Posthumans. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1SC. Writing & Rhetoric 1: Radical Acts of Art in Public: Rhetoric and Artivism. 4 Units.
PWR 1 courses focus on developing writing and revision strategies for rhetorical analysis and research-based arguments that draw on multiple sources. This class takes up the theme of public art as political action. Exploring the work of contemporary artist-activists from zines to monuments, hip-hop, photo-portraits, and street art, we will investigate what solidarity looks like. How does public art challenge us to reconsider public space, 'the public good' and who 'the public' might be? For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Cardinal Course certified¿by the Haas Center.

PWR 1SHA. Writing & Rhetoric 1: Bench to Byline: The Life of Scientific Facts. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1SI. Writing & Rhetoric 1: Super-Storms, Polar Bears, and Droughts: The Rhetoric of Climate Change. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1SK. Writing & Rhetoric 1: The Rhetoric of California. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1SM. Writing & Rhetoric 1: The Elephant, the Tiger, and the Cellphone: Rhetoric of India and Indian Film. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Study of the rhetoric of the India of the new millennium, including issues of gender, caste, class, religion, sexuality, nationalism, diaspora, outsourcing, and globalization. Service Learning Course (certified by Haas Center). See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1SMA. Writing & Rhetoric 1: Humans and Things: The Rhetoric of Commodities and Commodification. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1SMB. Writing & Rhetoric 1: The Jewel in the Crown: The Rhetoric of (Post)Colonialism. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1SMC. Writing & Rhetoric 1: Beyond the Boundary: The Rhetoric of Maps, Borders, and Networks. 4 Units.
PWR 1 courses focus on developing writing and revision strategies for rhetorical analysis and research-based arguments that draw on multiple sources. This class takes as its theme the rhetorical frameworks of geographical frontiers and the maps that represent them, but also more figurative borders (gender, sexuality, race, class,and so on). For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1SN. Writing & Rhetoric 1: The Rhetoric of Containment: Cold War Ideology Post 9/11. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1SNA. Writing & Rhetoric 1: The Rhetoric of Call Out Culture: Public Shaming in Digital Spaces. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1SP. Writing & Rhetoric 1: Growing Up Global: The Rhetoric of Children's Culture Today. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1SR. Writing & Rhetoric 1: The Rhetoric of California. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1ST. Writing & Rhetoric 1: The Rhetoric of Biomedical Ethics. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 1TB. Writing & Rhetoric 1: Hashtag Activism. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1TBA. Writing & Rhetoric 1: Appropriation or Plagiarism? Intersectional Feminist Citation Practices. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1TD. Writing & Rhetoric 1: Anatomy of a Discipline: Rhetorics of Health, Illness, and Medicine. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1TS. Writing & Rhetoric 1: White Mice and White Coats: The Rhetoric of Biomedical Science. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1TSA. Writing & Rhetoric 1: 10,000 Ways That Didn't Work: The Rhetoric of Innovation. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-1.

PWR 1TSC. Writing & Rhetoric 1: Academia Unleashed: Contemporary Rhetorics of Higher Education. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1TSD. Writing & Rhetoric 1: Seismic Shifts: The Rhetoric of Disruption. 4 Units.
PWR 1 courses focus on developing writing and revision strategies for rhetorical analysis and research-based arguments that draw on multiple sources. This class will explore what it means to witness deep social, cultural, political and environmental upheaval: how do we orient ourselves in relation to such radical change? For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1VK. Writing & Rhetoric 1: Rhetorics of Trauma. 4 Units.
Spurred, in part, by the events of September 11th and the plight of American service members returning from combat experiences in the Middle East, the public's gaze has been drawn toward the concept of trauma. This course considers the rhetorics of trauma, that is, how survivors of traumatic incidents, witnesses, psychologists, doctors, civil and military leaders, politicians, and the general public interpret trauma. These different understandings of trauma compete for social awareness and limited resources. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1VL. Writing & Rhetoric 1: It's All Relative: The Rhetoric of the Modern American Family. 4 Units.
The September 2017 issue of Interview Magazine features Kim Kardashian West dressed as Jackie Kennedy on the cover, along with her daughter, North. In the article, the magazine calls Kardashian West's popular reality show, a rooted-in-real life mirror to what the American family looks like today, bringing up topics such as race, gender, and more recently, trans identity. As early as 50 years ago, it would have been nearly impossible for a magazine to feature a white woman, especially one as notorious as Kim Kardashian, on its cover with her biracial, black daughter. So how did the mirror of the American Family change from the Mad Men ideal of a white, wealthy, suburban, nuclear family to a sprawling mega-family who document every moment of their lives for television screens? And is it even accurate to call the Kardashians the mirror? Who is left out of this reflection? nnIn this class, we will explore how representations of American families reflect shifting trends on the national level, including increasingly nuanced understandings of race, gender, sexuality, and citizenship. Through engagements with various texts (television, films, articles, advertisements) we will practice making nuanced written arguments about the rhetoric of families as we work toward the final assignment, a research-based argument. We will analyze several topics in class to develop and improve analytic and argumentative writing skills, from debates over LGBTQ+ parenting to mixed race families and generational conflicts while asking, what makes a family? Which aspects of families are represented as ideal? And what do those ideals say about issues beyond the family?.

PWR 1WG. Writing & Rhetoric 1: Reading Minds: The Rhetoric of Consciousness. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1WGA. Writing & Rhetoric 1: Rhetoric of Wendy G. 4 Units.
Rhetorical analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1WI. Writing & Rhetoric 1: By Any Means Necessary: The Rhetoric of Black Radical Movements. 4 Units.
In this class, students in this course will explore the many ways communities of color have effectively used writing and rhetoric to persuade, to educate, to inspire, to awaken, to motivate. Some potential examples of materials include persuasive pieces written by formerly enslaved Black people to abolish slavery; letters written from Japanese internment camps, trial statements from Native American political prisoners; videos of Black Panthers' speeches; and comedy sketches by undocumented queer youth organizers. For more information about PWR 1, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-1. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 1WS. PWR 1 Studio. 1 Unit.
The PWR 1 Studio is designed for multilingual and/or international student writers and is taken concurrently with PWR 1. The Writing Studio provides students an opportunity to work with other multilingual students and an instructor with a background in second language writing to develop writing habits and strategies to support their work in PWR 1 and other communication contexts. Please see https://undergrad.stanford.edu/programs/pwr/courses/pwr-studio for more information. Prerequisite: Application. Co-requisite: PWR 1.

PWR 1WW. PWR 1 Workshop. 1 Unit.
The PWR 1 Workshop is taken concurrently with PWR 1. The Workshop provides students an opportunity to work with other students and an instructor to further develop effective writing practices and strategies to support their work in PWR 1 and other communication contexts. Please see https://undergrad.stanford.edu/programs/pwr/courses/pwr-studio for more information. Prerequisite: Application. Co-requisite: PWR 1.

PWR 2AB. Writing & Rhetoric 2: Makers, Crafters, Hackers: The Rhetoric of DIY. 4 Units.
In this course we will delve into the fascinating world of DIY (do it yourself) movements. You will examine the values, politics and ethics of DIY, such as what making has to do with empowerment and resistance, or whether our ideas of making and makers are gendered or attached to assumptions about class, ethnicity and ideology. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prerequisite: PWR 1.

PWR 2AG. Writing & Rhetoric 2: The Rhetoric of Film Criticism. 4 Units.
In this course we¿ll analyze, write, and speak about specific films; we¿ll touch on a range of important frameworks, including genre studies, feminist film theory, and documentary ethics. Through an in-depth analysis of one film for your research-based argument, you¿ll develop your skills in writing, research, and oral presentation. In addition, you will adapt your research-based argument essay into a short videographic essay, that¿ll include material from the film you¿re analyzing. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prerequisite: PWR 1.

PWR 2AH. Writing & Rhetoric 2: Ethnic Narratives and the Rhetoric of American Identity. 4 Units.
Prerequisite: PWR 1. In this class we will explore how race and ethnicity in America have become subjects of personal negotiations and public perception. The readings will address various topics such as biracial and bicultural identity, acculturation, stereotyping and self-image. In addition, we will approach each of the writings in this class as an opportunity to practice in-class rhetorical analysis and oral presentation skills and to practice discovering specific research questions. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2AK. Writing & Rhetoric 2: The Rhetoric of Kortenhoven. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2AM. Writing & Rhetoric 2: From Fossils to Fables: The PWR of Prehistory. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2AN. Writing & Rhetoric 2: Hear Me Out: The Rhetoric of Hip-Hop in Social Uprisings. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2ANA. Writing & Rhetoric 2: The Message in the Music. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2AO. Writing & Rhetoric 2: Rhetoric and Global Leadership. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Analysis of styles of leadership across the globe and communication strategies used to bring about change. Exploration of how global leaders learn cross-cultural rhetoric skills to adapt to dynamic and unfamiliar situations. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2AW. Writing & Rhetoric 2: Psychology and Persuasion. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2BK. Writing & Rhetoric 2: To Thine Own Self Be True: The Rhetoric of Authenticity. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2BR. Writing & Rhetoric 2: "I Feel Your Pain": The Rhetoric of Sympathy. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2BRB. Writing & Rhetoric 2: Eurekas and Epiphanies: The Rhetoric of Inspiration. 4 Units.
Prerequisite: PWR 1. In this course, we will inquire into how, exactly, inspiration works. Where do good ideas come from? What fosters creativity? And how do we inspire ourselves and others to follow through on those ideas? We¿ll address these questions from many disciplinary angles, including the history of theories of genius and creativity, the uses of spiritual and literary ¿epiphany,¿ and recent psychology research into growth mindsets. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2BRC. Writing & Rhetoric 2: Re-Make It Anew: The Rhetoric of Adapting, Rebooting, and Remaking. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2CA. Writing & Rhetoric 2: Networked Rhetoric: Communities, Collaboration, and Communication. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2CAB. Writing & Rhetoric 2: The Rhetoric of Gender and Technology. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-2.

PWR 2CK. Writing & Rhetoric 2: Speaking Out: Claiming Citizenship, Demanding Rights. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2CKA. Writing & Rhetoric 2: Rhetoric of Distraction. 4 Units.
Prerequisite: PWR 1. In this class we will explore how race and ethnicity in America have become subjects of personal negotiations and public perception. The readings will address various topics such as biracial and bicultural identity, acculturation, stereotyping and self-image. In addition, we will approach each of the writings in this class as an opportunity to practice in-class rhetorical analysis and oral presentation skills and to practice discovering specific research questions. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2CL. Writing & Rhetoric 2: Crime, Media & Law: Critical Approaches to Violence. 4 Units.
Prerequisite: PWR 1. Despite our fascination with extreme acts of violence, those who study the nature of illegality know the opposite to be true: Far from a problem of murder, crime is instead predominantly composed of everyday acts of offense that never garner police attention, such as tax evasion, the violation of environmental regulations, computer hacking, and recreational drug use. Critical criminologists term this kind of unprosecuted crime "crime's dark figure" because it flies below the radar of public awareness and judicial action. This course will take the divergence between cultural representations of crime and crime's "dark figure" as a point of departure. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2CR. Writing & Rhetoric 2: Communicating Science to the Public. 4 Units.
As scientific knowledge and technology grow increasingly complex, the ability to explain science clearly and articulate science-based arguments to public audiences becomes more crucial, and more in demand. In this class, we will explore what makes written, spoken, and visual communication of science effective, compare the conventions of scholarly writing in the sciences to rhetorical strategies employed by popular science writers, and analyze problems with coverage of scientifically based issues in popular media and the promise and pitfalls of data visualization in conveying scientific information. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2CRA. Writing & Rhetoric 2: The State of California: Rhetoric of a Dream. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Service Learning Course (certified by Haas Center). See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2CW. Writing & Rhetoric 2: Rhetorical Games: Sport (for) Development Policy in the 21st Century. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-2.

PWR 2CWA. Writing & Rhetoric 2: Global Games: Rhetoric of Sport for Development. 4 Units.
Prerequisite: PWR 1. Sport has become "the" international relations and development concept of the new millennium. As a result, sport development is a source of much praise and criticism as scholars, activists, philanthropists, and journalists struggle to understand the rhetorical games at play in the global sport development policy landscape. As students deepen their awareness of rhetorical praxis and explore new modes as writers and communicators, they will survey seminal scholarship, case studies, and grassroots activist campaigns surrounding sport development in preparation for a sustained research project that addresses the sociopolitical implications of tying sport to development in the 21st century. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2CWB. Writing & Rhetoric 2: Hear/Say: The Art of Rhetorical Listening. 4 Units.
Why do we listen? How do we listen to learn, to understand? And to whom do we listen? And how does listening impact how we orient ourselves in the world? Rhetorical listening has been central to feminist rhetorical praxis, which has traditionally focused on the rescue, recovery, and (re)inscription of non-majority cultures and communities into the rhetorical tradition. In short, rhetorical listening asks us to reconsider the role listening plays, and the values which we ascribe to listening, in processes of knowledge construction inside and outside the academy. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prerequisite: PWR 1.

PWR 2CWC. Writing & Rhetoric 2: The Rhetoric of Photography. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2DH. Writing & Rhetoric 2: I ____ Therefore I Am? The Rhetoric of 21st Century Identity. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2DHA. Writing & Rhetoric 2: Action Research: Making Time for Social Justice. 4 Units.
In this course, we'll be focusing on different ways of seeking social justice, and explore whether it is possible or even desirable for students, lecturers and professors to focus their work on "fixing" the social ills of the world. We'll investigate ways your education and research can help effect social justice. The research, writing and presenting you do in this course can lay the groundwork for/contribute to social justice¿on campus and/or off. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prerequisite: PWR 1.

PWR 2DHB. Writing & Rhetoric 2: Feel Me? The Rhetoric of Empathy, Its Limitations and Alternatives. 4 Units.
Prerequisite: PWR 1. In this course, we'll be examining what empathy is—both affective and cognitive—and what role it might, or might not, play in our everyday lives and in promoting ethical action. To do so, we'll study the psychological, biological, and neurological bases of empathy, its significance in philosophy, contemplative/religious practices and ethics, and its possibilities as a rhetorical strategy and a political tool. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2EC. Writing & Rhetoric 2: 'Like' this Class: The Rhetoric of Public Relations. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2EE. Writing & Rhetoric 2: Once Upon a Cause: Producing Picture Books for Local Children. 4 Units.
Prerequisite: PWR 1. Whether our favorite picture books as kids were timeless classics or new arrivals, whether they scared us or amused us, consoled us or challenged us, they moved and shaped us in profound ways. How could a few dozen pages and a few hundred words affect us so powerfully? Why did we want to hear and see and read our favorite picture books again and again? What was the secret to their magic? In this course you'll not only analyze that "magic" but will also collaborate closely with a group of classmates to create an original, compelling, and educationally appropriate picture book for second-graders. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2EI. Writing & Rhetoric 2: Copying, Memeing, Modding, and Pirating: Rhetorics of (Un)Originality. 4 Units.
What¿s wrong with plagiarism and counterfeiting? Our regimes of private property and ideologies of individualism inculcate us with such a regard for ¿originality¿ that we rarely stop to ask whose privileges they safeguard, whose capabilities they favor, and whose creative labor they discount and render unseen. In this course you will write and present on traditions, practices, and artifacts that call the premises of originality into question and that playfully unsettle the state and corporate narratives of cultural ownership that sustain them. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prerequisite: PWR 1.

PWR 2EL. Writing & Rhetoric 2: Rhetoric of Silence. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-2.

PWR 2ELA. Writing & Rhetoric 2: The Remix, the Original, and the Voice. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2EP. Writing & Rhetoric 2: Global Protest and Civil Unrest: The Rhetoric of Resistance. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-2.

PWR 2EPA. Writing & Rhetoric 2: Slacktivism to Hacktivism: The Rhetoric of Technology and Social Change. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-2.

PWR 2EPB. Writing & Rhetoric 2: Communicating Climate Justice in the Current Era. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2EPC. Writing & Rhetoric 2: Building Resilience: Writing Science, Policy and Community For a Better World. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2EV. Writing & Rhetoric 2: The Global Politics of Protest and Change. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2GAW. Writing & Rhetoric 2: 'Don't Stand so Close to Me' : Cross-cultural Communication. 4 Units.
Prerequisite: PWR 1. Despite universal attributes such as facial expressions and emotions, humans also have culturally based assumptions, values, and beliefs - from the shared assumptions and collectivist views of high-context cultures to the explicit and highly articulated rhetoric of more individualistic and low-context groups. Our course will explore rhetorical challenges in verbal and nonverbal communication across cultures. We'll consider not only language and argument but also proxemics - determined spatial distance between people - as well as eye contact and gestures. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2GM. Writing & Rhetoric 2: Unpredictable Dialogue: Art of the Interview, Art of the Essay. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Study of the rhetorical craft of the interview, exploring structure, language, timing, and development in a range of forums, including documentaries, radio, transcription, campus conversations, and television. Research of a Stanford professor¿s work, including interview. Presentation of findings from research and interview to the class. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2GMA. Writing & Rhetoric 2: Breaking News, Making News 1.0. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2GMC. Writing & Rhetoric 2: A Thousand Words: When Art is Not Enough. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2GMD. Writing & Rhetoric 2: Archi-texts: Building Rhetorically. 4 Units.
Prerequisite: PWR 1. Architecture is always the solution to a problem: Where am I going to sleep? What am I going to do with my dead? Where can I speak to my gods? In this sense, the structure, siting, materials and lighting that inhere in a work of architecture are direct responses to a lived problem. In this way, our class will draw on the rhetoric of architecture to illuminate the rhetoric of communication; we will do this under the premise that understanding the one can lead to a better understanding and practice of the other. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2GME. Writing & Rhetoric 2: Our America: Conviction, Passion, Paranoia. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2GMF. Writing & Rhetoric 2: Immigration Nation: Rhetoric Up Against the Wall. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2GMG. Writing & Rhetoric 2: If Words Were Enough: Poetics and Rhetoric. 4 Units.
What does it mean to be rhetorically ¿right¿? How do we know if we¿ve found the ¿right¿ words, images, examples? In this course, we will study the writings and reflections of poets as they wrestle with this question of craft and what we can achieve through dedication, inspiration, imitation. Our goal will be to become more skilled rhetoricians ourselves by asking: What is possible with language, image, sound¿what can poetics teach us about rhetoric? How much can communication achieve, whether greatness or agreement, social change or political justice. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prerequisite: PWR 1.

PWR 2GO. Writing & Rhetoric 2: The Rhetoric of Performance, Intersectionality, and Identity. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2HF. Writing & Rhetoric 2: Whose Home? Rhetorics of Belonging and Place. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. This course takes as its theme place, space and belonging. Why places operate the way they do and for whom. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2HK. Writing & Rhetoric 2: Think Global: The Rhetoric of Global Citizenship. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2HL. Writing & Rhetoric 2: Developing and Communicating Your Expertise: The Rhetoric of Excellence. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2HLA. Writing & Rhetoric 2: Communicating Your Research: Meaningful Academic Writing and Speaking. 4 Units.
Prerequisite: PWR 1. How do you present complex research or specialized knowledge in a way that makes sense and moves audiences to see the value of your work? In this class, we will examine the ways effective communicators engage audiences and illuminate their ideas in a variety of contexts, including academic journals, popular publications, and multimedia presentations. We'll pay attention to the texts' argumentative structure, and the use of narrative, metaphor, and visualization to explain the unfamiliar. We will also identify the ways in which the speaker's voice and body are sources of persuasion and meaning. As you pursue a research project on meaningful communication, you will develop your own toolkit for presenting your expertise in engaging ways.

PWR 2HT. Writing & Rhetoric 2: Speaking Ironic Truth to Power: The Rhetoric of Satirical Protest. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. This course takes as its theme satire and how and when people seek social justice by "talking back." For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2IY. Writing & Rhetoric 2: Many Faces of Sherlock: Race, Gender, Power, and the Rhetoric of the Detective. 4 Units.
In this class we'll look at the ways detective fiction has expanded—with empowering results—to genders, ethnicities, and social backgrounds that mainstream representations of Holmes haven't traditionally represented. We'll consider, for example, the Botswanan women sleuths of *The No. 1 Ladies' Detective Agency*, the hoodie-wearing, super strong *Luke Cage*, and Japanese manga's Detective Conan. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prequisite: PWR 1.

PWR 2JA. Writing & Rhetoric 2: Rhetoric of Archer. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Exploration of how rhetoric functions in various cultures, considering body language, symbols, visual media, and the Internet. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2JC. Writing & Rhetoric 2: Walk(s) of Shame: The Rhetoric of Respectability. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2JD. Writing & Rhetoric 2: Straight A's and Sports Cars: The Rhetoric of Success. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2JDC. Writing & Rhetoric 2: And the Crowd Goes Wild: The Rhetoric of Fans, Stans, and Enthusiasts. 4 Units.
In this class, we will research the importance of fandoms and fan communities in contemporary society. We will consider what motivates people to put their time, energy, and selves into the stories or people that they care about, and consider the implications of this devotion. We will look at the risks and rewards of participating in a fandom, from its ability to empower individuals to the danger and risk of exclusion therein. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prerequisite: PWR 1.

PWR 2JJ. Writing & Rhetoric 2: The Rhetoric of Language, Identity and Power. 4 Units.
In this writing and speaking course, you'll consider the construction and negotiation of power and difference through language as it intersects with gender, sexuality, race, ability, and class. We'll explore how this happens across spheres such as politics, education, science, sports and the media, intertwined with forces like globalization, immigration, and technology. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For video and full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.Prerequisite: PWR 1.

PWR 2JJA. Writing & Rhetoric 2: The Rhetoric of J. Johnson. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2JO. Writing & Rhetoric 2: Rhetoric of J. O.. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2JP. Writing & Rhetoric 2: The Rhetoric of Art and Commerce. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Examination of unspoken rules regarding the separation of creativity and commerce and arguments about how consumer culture influences the work of the artist. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2JPA. Writing & Rhetoric 2: How We Got Schooled: The Rhetoric of Literacy and Education. 4 Units.
Prerequisite: PWR 1. In this course, we will look closely these learning processes. Students will invent individual research projects and craft oral presentations to critically analyze conventional forms of learning and explore ways of learning that are not always obvious. We will research together the work of cultural critic Henry Giroux on global media as a force of education, poet and scholar bell hooks on classrooms as potential sites of both oppression and liberation, and education scholar Ken Robinson on creativity and schools. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2JPB. Writing & Rhetoric 2: Curated Reality: How Media Shape What We Know. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2JS. Writing & Rhetoric 2: In Science We Trust. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2JW. Writing and Rhetoric 2: What We Talk About When We Talk About Love. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2KC. Writing & Rhetoric 2: Technology and the Rhetoric of Embodiment. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-2.

PWR 2KD. Writing & Rhetoric 2: Un-Performing Ourselves: The Design and Craft of Presentations. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Exploration of how the application of performance techniques makes academic or professional presentations more compelling. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2KDA. Writing & Rhetoric 2: Remix Culture. 4 Units.
Prerequisite: PWR 1. What does a musical about founding fathers (*Hamilton*) have to say about current political upheaval? What do plastic surgery resorts have to say about identify politics? What does Steph Curry's game have to say about Hamlet - and about Prince - with alternative forms of masculinity? In this course we will examine contemporary mashups and remixers and you will build a research project to ground our work across the quarter creating interesting, meaningful, and dynamic presentations and papers. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2KDB. Writing & Rhetoric 2: This is America: Virals, Videos and Values. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2KDC. Writing & Rhetoric 2: Myth and the Contemporary: Talking Across Two Worlds. 4 Units.
What do ancient myths have to tell us about our current world? What do stories say about AI, Genetic Engineering, Climate Change, and Social Justice? How does the difference of old perspectives offer us fresh takes on the new? In this course, we will consider world myths that have been retold by such writers as Clarissa Pinkola Estes, Neil Gaiman, JK Rowling, and Margaret Atwood, and in such dramas as Game of Thrones, Us, Her, Embrace of the Serpent, and The Revenant. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prerequisite: PWR 1.

PWR 2KM. Writing & Rhetoric 2: A Planet on the Edge: The Rhetoric of Sustainable Energy. 4 Units.
Prerequisite: PWR 1. Sea-level rise, the halting of major ocean circulatory currents, outbreaks of superstorms leading to floods and droughts - can an energy revolution still save a planet on the edge? This class explores the intricacies of sustainable energy, focusing on the myths, slogans, and rhetorical narratives that surround these debates. For example, is environmentalism inherently at odds with economic prosperity? Does living an environmentally conscious lifestyle require personal sacrifice and suffering? How does rhetorical framing affect the research, implementation, and public perception of new technologies in the field of sustainable energy? For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2KMA. Writing & Rhetoric 2: Natural Enemies: The Rhetoric of Invasion Biology. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Study of the use of metaphors and argument in the context of invasion biology and species conservation, especially the effects those metaphors and claims have on practice and policy outcomes. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2KR. Writing & Rhetoric 2: Propaganda and Rhetoric. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. This course takes as it theme the tool of propaganda and its relationship to truth. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2KS. Writing & Rhetoric 2: Happy Now? The Anatomy of Happiness. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. How the emerging field of happiness studies involves psychologists, economists and policy-makers in defining what happiness is and determining how society might create the conditions in which it can flourish. Exploration of how happiness studies can uncover happiness at the heart of arguments about democracy, religion, and personal lifestyles, exploring what makes people happy across cultural, social, and national contexts. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2KSA. Writing & Rhetoric 2: The Rhetoric of Childhood and Children's Culture. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2KSB. Writing & Rhetoric 2: Design Thinking: Bringing d.thinking to Research, Writing & Presentation. 4 Units.
There is no area of contemporary life where design is not a significant factor in shaping human experience. In this class, you will have the opportunity to learn more about design thinking and design studies. We will read works about play and creativity, the process of design thinking, and the ethics of design. You will choose a project idea and pursue research that will ultimately culminate in a print-based argument as well as a live oral presentation. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prerequisite: PWR 1.

PWR 2KT. Writing & Rhetoric 2: The Great and Powerful Oz: The Rhetoric of Spokespersons. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2KTA. Writing & Rhetoric 2: A Rebel With A Cause: The Rhetoric of Giving a Damn. 4 Units.
Prerequisite: PWR 1. In this course, we will explore a variety of movements from marriage equality and civil rights to climate change. We will also examine individuals and the manner in which they advance the causes that matter to them most, including astrophysicist Neil deGrasse Tyson, anti-racism activist Tim Wise, and equal education activist Malala Yousafzai. Ultimately, students will use knowledge gained to assist delivery of research, both in written and oral form, in cultural contexts and from the disciplinary perspective of students' choosing. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2LF. Writing & Rhetoric 2: The Rhetoric of Hacking. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2LFA. Writing & Rhetoric 2: Unruly Bodies: Gesturing Toward a New Rhetorics of Body Language. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2LL. Writing & Rhetoric 2: Rhetoric of L Lamboy. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2LM. Writing & Rhetoric 2: The Rhetoric and Aesthetic of War. 4 Units.
Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See https://undergrad.stanford.edu/programs/pwr/courses/pwr-2.

PWR 2LO. Writing & Rhetoric 2: Facing the Future: Climate Change Science, Impacts, and Solutions. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2LS. Writing & Rhetoric 2: The Rhetoric of Comics. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2MA. Writing & Rhetoric 2: What's Your Major? The Rhetoric of Interdisciplinarity. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. This course takes as it theme the collaboration and exchange of ideas among people from very different disciplines. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2MBR. Writing & Rhetoric 2: Buying a Better You: The Rhetoric of Self Improvement and the American Ideal. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2MC. Writing & Rhetoric 2: Cultural Icons: The Rhetoric of Branding and Celebrity. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2MFC. Writing & Rhetoric 2: March for Science? Social Justice and the Rhetoric of Science. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2MGD. Writing & Rhetoric 2: Silicon Valley and the Future of Work: Rhetoric of Labor Utopias and Dystopias. 4 Units.
We live in the heart of Silicon Valley, an engine that promises¿or threatens¿to disrupt the way that national and global economies are organized. In this writing and speaking course, you¿ll explore how a range of critics and analysts imagine the future of work. Does all this point to a coming utopia? To a dystopia? Works from technologists, sociologists, economists, anthropologists, historians, activists and more will help answer these questions. We¿ll read those who embrace these changes and those who don¿t; we will analyze the predictions of various bright-eyed techno-optimists and steely-eyed doomsayers, from Silicon Valley insiders like Elon Musk and Bill Gates to radical academics and activists. We¿ll pick through what¿s really new about Silicon Valley¿s effects on the future of labor¿and discuss in what ways we¿re seeing the continuation of longstanding trends. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prerequisite: PWR 1.

PWR 2MGE. Writing & Rhetoric 2: Rationality and Culture: Rhetorics of Reason, Madness, and Science. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2MO. Writing & Rhetoric 2: Rhetoric of Scientific Controversies. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2MS. Writing & Rhetoric 2: Seriously Funny: The Rhetoric of Humor. 4 Units.
Prerequisite: PWR 1. As a rhetorical technique, humor holds unique persuasive power on a variety of political and cultural stages, evident in popular parody, satire, roasts, alternative news sources, public relations campaigns, and advertisements. Given this importance, we might ask, "what makes humor persuasive?" In this course, we will study humor through a variety of critical lenses, including those that examine humor as a unique appeal to pathos and those that argue it is entirely reliant upon logic. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2NF. Writing & Rhetoric 2: Language Gone Viral: Investigating the Rhet. of Social Media and Digital Comm.. 4 Units.
Prerequisite: PWR 1. In this course, we will reinforce our understanding of the research writing process and develop oral communication skills to investigate changes in digital language use. This course also examines the extent to which our daily lives have become deeply dependent on our usage of personal electronic devices for online communication. Is our attachment to technology truly limiting the quality of our conversations? Or could such interactions provide a means for introverts to better interact with others? For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2NFA. Writing & Rhetoric 2: The Rhetoric of Norah Fahim. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2PB. Writing & Rhetoric 2: The Power of Political Photography. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Topics include the role of photographers and photo-journalists in helping viewers see the world differently and the political implications of fashion photography, environmental photography, music photography, and fashion photography. Traditional readings as well as archival and field research. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2PBA. Writing & Rhetoric 2: Calling All Astronauts: Researching, Writing, and Talking about Tomorrow. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2PBB. Writing & Rhetoric 2: Mindful Rhetoric. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2PBC. Writing & Rhetoric 2: Why Do Geniuses Come in all Sizes, Shapes, and Colors?. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2RC. Writing & Rhetoric 2: Red Pill or Blue Pill? : The Rhetoric of Drugs. 4 Units.
Prerequisite: PWR 1. The theme of this course is the relationship between humans and drugs, particularly how the human brain interacts with and is altered by ingested substances. Simultaneously we will explore how drug use is promoted, regulated, sensationalized, and commercialized. We will examine a wide range of perspectives: indigenous discovery, cultural and medical applications, biological mechanisms, sociological implications, artistic and poetic interpretation, and constitutional law. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2RHA. Writing & Rhetoric 2: The Rhetoric of Composition. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2RHB. Writing & Rhetoric 2: The Rhetoric of Presentation. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2RHC. Writing & Rhetoric 1: The Rhetoric of Speaking. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2RHD. Writing & Rhetoric 2: The Rhetoric of Argument. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2RL. Writing & Rhetoric 2: The Rhetoric of the Natural and Beyond. 4 Units.
This class will consider, through a rhetorical lens, how "natural" is understood and/or modified: how it interfaces with social norms and other notions like safety and authenticity, and how the varying rhetorical strategies and situations at hand animate different negotiations of power. Topics may range from literary (e.g. magic realism and the fantastic) to social (our growing proximity and intimacy with tech devices) to medical (homeopathy or bionic implants and prosthesis). For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prerequisite: PWR 1.

PWR 2RP. Writing & Rhetoric 2: The Power of Sports: Rhetoric and Athletics in Contemporary Society. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2RY. Writing and Rhetoric 2: Rhetoric of Yang. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2SB. Writing & Rhetoric 2: Writing 'Science': Fact, Fiction, and Everything Between. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Analysis of science fiction and popular writing about science and technology as arguments about where we are headed, where we are, who we are, and what we value. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2SBA. Writing & Rhetoric 2: The Rhetoric of Human Enhancement. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Analysis of science fiction and popular writing about science and technology as arguments about where we are headed, where we are, who we are, and what we value. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2SBB. Writing & Rhetoric 2: The Rhetoric of Robots, Cyborgs, Mutants and Other Posthumans. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2SBC. Writing & Rhetoric 2: Science and Advocacy. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2SC. Writing & Rhetoric 2: Are We There Yet?: The Rhetoric of Mobility. 4 Units.
What is the difference between "refugee" and "migrant" or, for that matter, between "traveler," "immigrant," "tourist," and "alien"? When we begin to think about the politics of these categories, we start to see how rhetorical situations shape our understandings of our places in the world, and what constrains or enables us as we move around in it. In this class, we will explore questions about mobility through writing, research, and oral presentation. We will practice strategies for persuasive, engaging writing and speaking and watch speeches by activists and artists, read up on the history of ¿mobs,¿ and discuss whether a sit-in is actually a form of movement. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prerequisite: PWR 1.

PWR 2SCB. Writing & Rhetoric 2: Bodies in the 21st Century: Gender and Rhetoric. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2SI. Writing & Rhetoric 2: The Rhetoric of Privilege. 4 Units.
Prerequisite: PWR 1. Drawing from academic articles, newspaper and magazine stories, social media, television, and film, we will examine rhetoric in moments like the Rio Olympics to bring to the forefront the privilege that lies beneath. We will analyze various forms of privilege and their intersections, from race and gender to socioeconomic class, sexual orientation, citizenship, physical ability, and so on. We will also scrutinize our own privilege as part of the Stanford community. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2SM. Writing & Rhetoric 2: Dirty Pretty Things: The Rhetoric of Objects and Objectification. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2SMA. Writing & Rhetoric 2: Love and Longing in Bombay: Romance and Rebellion in Indian Film. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2SN. Writing & Rhetoric 2: Rhetoric of Activism. 4 Units.
This course examines the role of rhetoric in discussions surrounding political inactivity as well as the burgeoning activism of today. Students will be given the opportunity to research a topic pertaining to rhetoric and activism. Some possible research topics include: an investigation into why a particular movement (like Occupy Wall Street) fades away without substantive impact, how/why activist efforts are sometimes cyclical across time (civil rights or Women¿s rights), differing theoretical approaches to activism or perhaps the relationship between activism, policy, and the implementation of new laws. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prerequisite: PWR 1.

PWR 2SP. Writing & Rhetoric 2: Literacy: Reading, Writing, Power. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2SPA. Writing & Rhetoric 2: Other Selves: The Art & Science of Friendship. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2SPB. Writing & Rhetoric 2: Hope, Health, and Healing: The Rhetoric of Medicine. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2SR. Writing & Rhetoric 2: The Rhetoric of Voice. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2SS. Writing & Rhetoric 2: Mass Audiences and Modern Communication. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Exploration of how the ability to reproduce a work for increasingly large audiences has fundamentally changed the nature of art and its effect on culture. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2SSA. Writing & Rhetoric 2: Rhetoric of Reality Culture. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2SSB. Writing & Rhetoric 2: Superfans and Scholars: Writing Fan Culture. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2ST. Writing & Rhetoric 2: Science, Democracy and Social Media. 4 Units.
Prerequisite: PWR 1. Social media have greatly enlivened and democratized science communication so that it now moves between scientists and various audiences. Scientific content is no longer static, nor is it merely for advanced researchers. Scientists using social media are learning to assess content collaboratively to help provide better science in public communication. One of the particular obligations of university science students is to join the conversation, help review and revise content in the public sphere. Students in this course will actively engage in the evolving world of science communication and practice their scientific writing, research and oral presentation skills. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2STA. Writing & Rhetoric 2: Ethics and AI. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2STB. The Rhetorics of Science, Culture, and Research. 4 Units.
PWR 2 courses focus on developing strategies for presenting research-based arguments in both written and oral/multimedia genres. Focusing on themes of science and culture, you'll take an interdisciplinary approach to examine an issue that matters to you. You will have the opportunity to consider a wide range of genres and translate your argument and findings into a live presentation. We'll focus on presenting, organization, body language, and slide design. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prerequisite: PWR 1.

PWR 2TB. Writing & Rhetoric 2: Hip Hop, Orality, and Language Diversity. 4 Units.
In this course, students will use hiphop language and culture as an entry point into learning about the diversity of the ways that languages are used and transformed in speech, writing, and multimedia, particularly in the U.S. context. . Looking at hiphop texts and beyond, we¿ll consider what songs, spoken word performances, literary, and scholarly texts have to teach us about the wide variety of language practices and the strategies those in power use to standardize and limit these variegated expressive forms. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prerequisite: PWR 1.

PWR 2TBA. Writing and Rhetoric 2: Rhetoric of Brown A. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2TD. Writing and Rhetoric 2: The Rhetoric of Diener. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2TN. Writing & Rhetoric 2: Sound and Vision: The Rhetoric of Music Documentaries. 4 Units.
PWR 2 courses focus on developing strategies for presenting research-based arguments in both written and oral/multimedia genres. This class takes as its theme the rhetoric, history, and aesthetics of music documentaries. Students will examine how elements such as, cinematography, editing, scripting, archival research, and sound work together to create meaning, argue for greatness, or historical importance. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prerequisite: PWR 1.

PWR 2TS. Writing & Rhetoric 2: The Rhetoric of the Experiment. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html.

PWR 2TSC. Writing & Rhetoric 2: All the Feels: The Rhetoric of Emotion. 4 Units.
How can emotions be motivating, and what can invoke them? How do the systems and structures that we navigate daily create conditions for anxiety or panic, and how do such systems respond to it? How do we understand anger in relation to ideals and social action? How is suffering and pain understood and treated? What is happiness, and should it be the ultimate goal? To what extent can emotions be understood as social or inherently human phenomena? We will approach these questions from a variety of disciplinary perspectives, from cognitive science and social psychology to philosophy, communication and sociology. For course videos and full descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office. Prerequisite: PWR 1.

PWR 2VK. Writing & Rhetoric 2: Framing Reality: The Rhetoric of Documentaries. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2VKA. Writing & Rhetoric 2: Rhetoric of Public Monuments and Memorials. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2WG. Writing & Rhetoric 2: All That Jazz: The Rhetoric of American Musical Theater. 4 Units.
Prerequisite: PWR 1. Building on a series of written assignments and oral presentations that culminate in a major research project, we'll explore the conventions and strategies that define the genre of American musical theater, analyzing how contemporary musicals mirror, revise, and even subvert these traditional rules. Watching musicals on film, reading reviews by theater critics, and attending a local production, we'll examine a range of cultural arguments made by American musicals. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2WI. Writing & Rhetoric 2: The Rhetoric of Imarisha. 4 Units.
Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. For more information about PWR 2, see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2. For full course descriptions, see https://vcapwr-catalog.stanford.edu. Enrollment is handled by the PWR office.

PWR 2WS. PWR 2 Studio. 1 Unit.
The PWR 2 Studio is designed for multilingual and/or international student writers and is taken concurrently with PWR 2. The Studio provides students an opportunity to work with other multilingual students and an instructor with a background in second language writing and speaking to develop writing habits and oral presentation strategies to support their work in PWR 1 and other communication contexts. Please see https://undergrad.stanford.edu/programs/pwr/courses/pwr-2/pwr-writing-studio for more information. Prerequisite: Application. Co-requisite: PWR 2.

PWR 4. Directed Writing. 3-4 Units.
Further work on developing writing. Analysis and research-based argument, writing for a range of audiences and in varied disciplinary contexts. Workshops and individual conferences. May be repeated for credit. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.

PWR 5. Independent Writing. 1-5 Unit.
Individual writing project under the guidance of a PWR instructor. May be repeated for credit. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.

PWR 6. Writing Workshop. 1-3 Unit.
Writing workshop for collaborative, group, and individual projects guided by a specific theme or genre.

PWR 6ASB. ASB 2016-17: Redefining Stem. 1 Unit.
Redefining STEM is an Alternative Spring Breaks course and trip organized through the Haas Center. This class aims to examine STEM as a social issue through four main intersections: culture/history of STEM, STEM education, science communication, and corporate science & service. See http://asb.stanford.edu for more information.

PWR 6LSP. PWR 6 Leland Scholars Program: Exploring Research, Writing and Argument at Stanford. 1 Unit.
Our work together in this online course is focused on providing an introduction to critical reading, rhetorical thinking, academic writing, college-level research, crafting well-reasoned arguments and designing an ePortfolio. Through class discussions, readings, writing assignments, a collaborative research project, we will consider: What does it mean to write effectively? How can we best persuade others in the different situations that we encounter each day? How can we argue convincingly about ideas that truly matter to us, whether in the classroom, with friends, or in broader social contexts?.

PWR 6VT. Writing in the University: Debates about the Politics and Technologies of Journalism. 4 Units.
Lately, journalism has been in the news: every day we see or hear a new story about problems with journalism and the news media¿from charges of biased coverage to fake news circulating on Facebook. Yet, push alerts from news apps and social media also shape our daily conversations. In this class, we will investigate the news industry, examining the challenges faced by journalists today and emerging new forms of digital journalism. We will focus on the political, economic and technological forces that have shaped the writing and rhetoric of journalists. Students might explore debates such as fake news, bias and objectivity; partisanship and polarization; or polling and political coverage. We start by writing an analytical essay about multimedia reporting, move into writing about research regarding a topic of your choice, and close by sharing research in oral presentations. At each step, we work together as a group, doing workshops, engaging in discussion, and collaborating in peer review. Our research projects will provide the opportunity to engage with recent scholarship and stake out your own positions on the future of journalism.

PWR 91. Intermediate Writing. 3 Units.
For students who have completed the first two levels of the writing requirement and want further work in developing writing abilities, especially within discipline-specific contexts and nonfiction genres. Individual conferences with instructor and peer workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For topics, see http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_pwr/advanced_pwr.

PWR 91B. Intermediate Writing: Digital Rhetoric, New Media, and Transformations in Writing. 3 Units.
Writing operates in multiple modes (word, image, sound) in the new media environment. Examples of texts - invention, drafting, revision, and communication - governed by the evolving conditions of a new, digital rhetoric.nnnFor students who have completed the first two levels of the writing requirement and want further work in developing writing abilities, especially within discipline-specific contexts and nonfiction genres. Individual conferences with instructor and peer workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For more information, see http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_pwr/advanced_pwr.

PWR 91C. Intermediate Writing: The Stanford Daily Show. 3 Units.
Class will study fake news programs such as the Daily Show, the Colbert Report and the Onion,and will produce The Stanford Daily Show, our own version of a fake news program.nnnFor students who have completed the first two levels of the writing requirement and want further work in developing writing abilities, especially within discipline-specific contexts and nonfiction genres. Individual conferences with instructor and peer workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For more information, see http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_pwr/advanced_pwr.

PWR 91CG. Intermediate Writing: Science and Technology Writing for Popular Audiences. 3 Units.
Whether you're a fuzzy or a techie, chances are you've had to explain the content of the classes you've taken to outside audiences. You've had to explain to your parents how your/their tuition dollars are at work, or you've advocated for your well-rounded background during a job interview. Your access to Stanford has granted you a certain expert label, even if it doesn't always feel that way. This course leverages your growing expertise by introducing you to writing styles and genres that will allow you to communicate your technical interests to a non-expert, or popular, audience. We'll talk about stylistic points including story ledes and anecdotes, metaphor, and organizing familiar and non-familiar language in our writing. We'll also experiment with different genres that accomplish these translation goals by experimenting with writing abstracts, journalism pieces, provocative podcasts, first-person narratives, visual essays, and creative non-fiction essays. Our ultimate goal will be to not only better understand these styles and genres in order to communicate more effectively with a wide variety of audiences, but to also seek publication in local newspapers, blogs, and sources such as *Salon, Slate, The Huffington Post, The Atlantic,* and even *Wired* or *Radiolab*.

PWR 91CL. Self & Science. 3 Units.
"Self & Science" mines the intersection of memoir and science writing. In this advanced experimental writing course, students will read a selection of essays by writers including Lewis Thomas, Oliver Sacks, Annie Dillard, and Mark Doty, which illustrate the shared intellectual foundation in observation of scientific and poetic inquiry. Building on these readings, students will be challenged to produce an experimental essay that transgresses genre boundaries in the service of considering how personal reflection can narrate researched discoveries. Over the course of the quarter, students are invited to bolster their overall communication acumen, enhance their ability to share valuable discoveries beyond the confines of their major discipline, and practice the difficult bliss of engaging a discerning public audience. Click here for course video and full description: https://undergrad.stanford.edu/programs/pwr/courses/advanced-courses/self-science.
Same as: LIFE 91CL

PWR 91CW. Intermediate Writing: Seeing is Believing: The Power of Persuasive Data Stories. 4 Units.
In this course, students will study and practice techniques and rhetorics of data visualization based on principles of rhetorical history, visual rhetorics and graphic design as well as cognitive science, design thinking, and other disciplines that inform critical conversations around information display and data visualization. For more information visit https://undergrad.stanford.edu/programs/pwr/courses/additional-elective-courses/seeing-isand-believing-rhetoric-big-data-visualization.

PWR 91D. Intermediate Writing: Your American Life. 3 Units.
In this course, you¿ll read and listen to some of the most moving and insightful pieces of the last decade, explore the important differences between print and oral storytelling, and then script and record your own full-length audio piece. Along the way, we will explore many craft elements that apply equally to print and audio pieces. You will learn, for example, how to organize your material, choose an effective structure, blend dramatization and reflection, ground insights in concrete scenes, create a strong narrative arc, and manage elements such as characterization, description, and dialogue. We will also, of course, explore craft elements unique to the audio form and you will learn how to use your voice and other sonic elements to craft the kind of piece you might hear on This American Life.nnThrough a special arrangement with the Stanford Storytelling Project, in the spring of 2012 this course will feature special sessions with prominent contributors to This American Life. n Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For more information, see http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_pwr/advanced_pwr.

PWR 91E. Intermediate Writing: The Oral Tradition: Myth, Folklore, and Fairy Tale. 3 Units.
Contemporary storytelling covers a variety of media - from movies to novels, theatre and beyond. What this course offers is an in depth study of the roots of that practice - the oral tradition.nnnOver the course we will explore many different motifs and structures that arise in the oral tradition, myth, folklore and fairy tale. What universal themes do we detect, and what separates the progression of a pacific north west Trickster story from an Arthurian romance? Why is it that in the early twenty first century many of our most acclaimed art forms carry narrative forms that are thousands of years old? Star Wars, Lord of the Rings and the recent broadway show Jerusalem, all follow scenic progressions informed by myth.nnnThe first encounter with the story will be an oral narrative - the myth told unscripted in the classroom. The stories, which range from the Arthurian romance Parzival to Trickster folk tales, will be told in several sections - with a running exegesis and student response alongside. Many of these stories are now transcripts and have become works of literature. We will explore both the complementary aspects of this development, and areas of tension.nnnDuring the course each student will embark on a project that demonstrates a thorough understanding of the topics covered, and utilizes those elements in their wider practice of writing and rhetoric. nnnThe project will be to research a story handed down within the family - an adventure of some distant relative, or a family migration from one country to another. Factoring in elements from the taught class, the student will mythologize the story: by writing an in depth commentary on its implications - factoring in contemporary, psychological and metaphorical associations. The second element will be to tell the story to the class. In these way we experience myth as a living principle, not something just from `a long time ago.¿.

PWR 91EC. Intermediate Writing: Farmers, Scientists, & Activists: Public Discourse of Food Economies. 4 Units.
What are the possibilities in rethinking our food, the way we talk about it, the way we grow it, and the way we eat it? In this course, you will be paired with local organizations concerned with food economies, such as food activists, food banks, farmers, and farm collectives, to collaboratively draft and produce writing specific to the client. You will analyze and respond to a variety of professional writing situations, and practice project management, focusing on benchmarking and deliverables. The end result will be a multimodal, collaboratively-produced document or set of documents you can add to your public-facing portfolios. Students taking this courses as part of the Notation in Science Communication can include their final project in their NSC e-portfolio. This course fulfills the advanced PWR requirement for the Notation in Science Communication (NSC). Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For video course description, see https://undergrad.stanford.edu/programs/pwr/courses/advanced-courses/farmers-scientists-activists-public-discourse-food-economies. (Cardinal Course certified by the Haas Center).

PWR 91EE. Intermediate Writing: Saving Lives with Picture Books. 4 Units.
Want to help improve the health of mothers and young children in Bangladesh by creating picture books? This is your chance. (No artistic skills required.) You and your classmates will collaboratively create at least one original picture book designed to communicate information about child stimulation, nutrition, water sanitation, hygiene, the dangers of lead, and healthy ways of thinking. You¿ll study the genre of the picture book, explore the culture of Bangladesh, and consult with a team of Stanford-led researchers to create at least one picture book. You¿ll pitch story ideas, create storyboards and dummies, and revise and edit in light of feedback from the team in Bangladesh, as well as some of the mothers participating in the study.

PWR 91EP. Intermediate Writing: Communicating Climate Change: Navigating the Stories from the Frontlines. 4 Units.
In the next two decades floods, droughts and famine caused by climate change will displace more than 250 million people around the world. In this course students will develop an increased understanding of how different stakeholders including scientists, aid organizations, locals, policy makers, activists, and media professionals communicate the climate change crisis. They will select a site experiencing the devastating effects and research the voices telling the stories of those sites and the audiences who are (or are not) listening. Students might want to investigate drought-ridden areas such as the Central Valley of California or Darfur, Sudan; Alpine glaciers melting in the Alps or in Alaska; the increasingly flooded Pacific islands; the hurricane ravaged Gulf Coast, among many others. Data from various stakeholders will be analyzed and synthesized for a magazine length article designed to bring attention to a region and/or issue that has previously been neglected. Students will write and submit their article for publication.nnFor students who have completed the first two levels of the writing requirement and want further work in developing writing abilities, especially within discipline-specific contexts and nonfiction genres. Individual conferences with instructor and peer workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For more information, see https://undergrad.stanford.edu/programs/pwr/explore/notation-science-writing.
Same as: EARTHSYS 154

PWR 91F. Finding Your Story. 3 Units.
Life challenges us to become aware of the stories that shape us--family stories, cultural mythologies, even popular movies, television shows, and songs--and then create and live our own story. We face this challenge throughout our lives but perhaps most acutely as we move into adulthood; this is the period when we most need to become conscious of stories and their power, to gather wisdom, practices, and resources for finding our own story. This class, designed with seniors in mind, will illuminate and explore these resources and give you the opportunity to reflect deeply, in discussion and writing, on what truly calls to you in this life. We will engage with some of the world's great stories--myths, parables, teaching tales, modern fiction, even aphorisms, koans, and riddles. In them we can find both elements that resonate with our own story and provocations that help us unearth and cultivate our native gifts--the genius in each of us. We will look at short excerpts from masterworks and myths from around the world, all voices in the largest conversation we have as humans, the one that asks: who am I? why am I here? what truly matters? how can I be happy? Together we will investigate how these stories, and stories like them, can be used to help us find our own story. Students in this course will have a special opportunity to meet personally with poet Billy Collins and singer Aimee Mann when they visit campus in April. Does not fulfill NSC requirement. For students who have completed the first level of the writing requirement and want further work in developing writing abilities, especially within discipline-specific contexts and nonfiction genres. Individual conferences with instructor and peer workshops. Prerequisite: first level of the writing requirement or equivalent transfer credit. For more information, see http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_pwr/advanced_pwr.

PWR 91JS. Stanford Science Podcast. 3 Units.
In this course, students will explore how podcasts can be used as a tool for effective science communication. Through a series of workshops and guest speakers, students in this course will learn the necessary journalistic and technical skills to produce high quality podcast episodes, from interviewing and storytelling to audio editing and digital publishing. Podcast episodes will highlight the cutting edge research being done at Stanford, and students will choose specific stories based on their own interests, from earth sciences to public health to big data. Final podcast episodes will be published on iTunes.
Same as: EARTHSYS 157

PWR 91KD. Intermediate Writing: Scripting Entertainments. 4 Units.
In its short time on the planet, youtube videos have created their very own viral (and lucrative) culture. But what if the power of internet distribution could be paired with the power of good substantial storytelling? What if the content could be more socially stirring and powerful than "this is me doing crazy adventures" or "this is me pranking someone"¿or "this is me eating $14 avocado toast in PA"? In this seminar, we first break down the various codes and generic features of currently popular vlogs, then apprentice to current scripting techniques being used by playwrights (Anna Deavere Smith, Suzan-Lori Parks) and scriptwriters on shows from Hulu (East Los High), and Prime (Frankenstein Chronicles), then finally turn our hand to the scripting, rehearsing, shooting, and production of our very own 1-3 minute videos. Our goal is to develop the critical, creative, and digital tools to make effective and engaging scripted short videos for the telling of our current stories, for the destabilization of dominant cultural stories, and for the re-stabilization of the two in potent remix.
Same as: for a Better YouTube

PWR 91KS. Intermediate Writing: Design Thinking and Science Communication. 4 Units.
Effective communication of expert knowledge in the sciences to non-specialist audiences. Project-based work on a range and variety of communication challenges, contexts, and media. For students who have completed the first two levels of the writing requirement and want further work in developing writing abilities, especially within discipline-specific contexts and nonfiction genres. Individual conferences with instructor and peer workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For more information, see https://undergrad.stanford.edu/programs/pwr/explore/notation-science-writing.

PWR 91KSA. Intermediate Writing: Storytelling and Science. 4 Units.
What is story? What is storytelling? And why would storytelling be crucial for science communication? In this class we will develop your Story IQ: we will learn how humans evolved to be the storytelling animal, how stories shape our lives, and why and how science communication needs storytelling in order to be relevant to public audiences. We'll move from looking at story architecture, to critiquing story structures (and stories) in science communications, and then to creating compelling stories of our own that communicate and/or correct science research or discovery. For course video and full description, visit https://undergrad.stanford.edu/programs/pwr/courses/additional-elective-courses/science-and-storytelling.

PWR 91KT. Intermediate Writing: Game Set Match: Shaping Publics to Shape Movements. 4 Units.
The success of a movement is never the work of one individual. In this course, students will investigate the specific case of Los Alamos scientist Wen Ho Lee and the media advocacy that aided in his release from solitary confinement after being accused of spying for China. Students will then analyze the role the public and news media frequently must play in the success of a cause, ultimately developing a website that publishes resources and interventions including students own digital media that moves a civil rights issue of their choice. For course video and full description, visit https://undergrad.stanford.edu/courses/additional-elective-courses/game-set-match-shaping-publics-shape-movements.

PWR 91MC. Intermediate Writing : Activist Rhetoric. 4 Units.
How do activists effectively strategize for social change? In this hands-on approach to studying activism and social justice issues, students will encounter new methods for mass communication, collaboration, and self-inquiry. First, we will consider how activists address practical problems in a variety of contexts, from protest movements to direct action, political lobbying to philanthrocapitalism, from Black Lives Matter to immigration activists. We will visit Stanford Special Collections to find inspiration in the Huey P. Newton Collection--the archive of the Black Panther Party. To inform these experiences, we will read and analyze texts by the Combahee River Collective, Angela Davis, Judith Butler, Fred Moten, and Jackie Wang, as well as inviting several activists to visit our classroom. Through collaborative and creative coursework, students will gain experience in intersectional thinking, community organizing, and collective action by conducting teach-ins, writing their own social justice manifesto, and planning a final campus-wide action.nnThis course is part of the PWR advanced elective track in Social and Racial Justice (SRJ). Prerequisite: first two levels of the writing requirement or equivalent transfer credit. See https://undergrad.stanford.edu/programs/pwr/courses/advanced-courses/activist-rhetoric for full course description.

PWR 91NSC. Intermediate Writing: Introduction to Science Communication. 4 Units.
With the growing impact of science and technology on our society, the need for communicating that science well has never been greater. But what is effective science communication? Is it ever ok to use jargon? Is it ok to say "I" in my research report? How do I communicate complex topics in simple, but accurate, ways? In this course, we will explore the variety of formats that science communication can take--from technical research papers on particle physics to children's books about genetics. We will explore how different audiences shape the way science is communicated, and we will develop a set of best practices for effective science communication. Students will then apply these strategies in their own science communication projects. Prerequisite: PWR 2 or its equivalent. For more information, see https://undergrad.stanford.edu/programs/pwr/explore/nsc. Required of students admitted into the Notation for Science Communication after January 2015.

PWR 91OID. Creating Your Digital Presence: The What, How, and Why of Building an Online Presence. 3 Units.
Have you ever Googled yourself? If so, what information about you rises to the top? A picture of you in your band uniform from your high school? A poem you wrote and published on your Tumblr? Maybe your scores from a 5K you ran last year? nnIt might seem like you do not have much control over what you see about yourself in a Google search, but the fact is, you do. The more of your own content you create, the more that your self-created information will rise to the top. In this class, you will select content most significant to you, which could include research posters, photo essays, short stories, interviews, prototypes, and beyond. To curate and polish these pieces, we will ask ¿how can you craft an online identity that shares not only your accomplishments, but also your motivations?¿, ¿what makes your best work meaningful?¿, and ¿what platform will best allow you to showcase your identity?¿ Through learning the theories, tools, and techniques behind digital content management, this class will help you get better connected with the individuals and/or organizations that interest you. nnWe will practice several pragmatic techniques for building our own personal ePortfolio (i.e. a website). Through participating in hands-on activities, storytelling exercises, and in-class discussions, you will have the opportunity to enact what we¿re learning and to experiment with different forms of expressing yourself online.

PWR 91RS. Intermediate Writing: Communicating Bioinformation. 3 Units.
Effective communication of expert knowledge in the sciences to non-specialist audiences. Project-based work on a range and variety of communication challenges, contexts, and media. For students who have completed the first two levels of the writing requirement and want further work in developing writing abilities, especially within discipline-specific contexts and nonfiction genres. Individual conferences with instructor and peer workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For more information, see https://undergrad.stanford.edu/programs/pwr/explore/notation-science-writing.

PWR 91S. Intermediate Writing: Communicating Science. 3 Units.
Effective communication of expert knowledge in the sciences to non-specialist audiences. Project-based work on a range and variety of communication challenges, contexts, and media. For students who have completed the first two levels of the writing requirement and want further work in developing writing abilities, especially within discipline-specific contexts and nonfiction genres. Individual conferences with instructor and peer workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For more information, see http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_pwr/advanced_pwr.

PWR 91SP. Intermediate Writing: Doctors' Stories: The Rhetoric of Illness and Healing. 4 Units.
While medicine is a science that relies on meticulous research and professional protocols, it is also full of characters, conflicts, scenes, dialogues, and resolutions; in other words, stories. This course explores why we must value communication in medicine and how narratives mediate that communication. During the quarter, you will pursue independent research on a topic of your choice in the health sciences and practice interviewing experts as well as writing accurate and engaging science journalism in a number of genres: the story pitch, the news story, and the profile. Your final project will be a research-based digital magazine story coached by the Stanford Storytelling Project.

PWR 91TB. Intermediate Writing: Being ____ at Stanford. 4 Units.
In this course, we will use two central methods autoethnography, which studies ourselves as participants in cultures; and institutional research, into the archives of Stanford to theorize ourselves as part of Stanford's past, present, and future. Paying special attention to our reading and writing practices, we will use autoethnographic writing prompts to better understand our own identities and experiences, and archival and ethnographic research to investigate specific institutions, events, or practices at Stanford. Ultimately, students will produce a major final project (20-25 pages, 6-10 audiovisual minutes, an installation) that integrates their autoethnographic findings (about you) with their institutional findings (about Stanford). This course is an opportunity to better understand yourself, your university, and the politics of language.

PWR 99A. Portfolio Preparation I. 1 Unit.
A 1-unit course introducing ePortfolios and folio thinking for students in the Notation in Science Communication (NSC). The course will assist students in designing a rhetorical ePortfolio and in selecting and reflecting on writing samples that represent student learning in science communication. This is the first of a two-part ePortfolio requirement for the NSC. For more information, see https://undergrad.stanford.edu/programs/pwr/explore/notation-science-writing.

PWR 99B. Portfolio Preparation II. 2 Units.
A 2-unit culminating course on ePortfolios for students in the Notation in Science Communication (NSC). In this course, students will continue building, revising, and editing a portfolio of documents, slides, and videos that will demonstrate development as a science communicator. This is the second of a two-part ePortfolio requirement for the NSC. For more information, see https://undergrad.stanford.edu/programs/pwr/explore/notation-science-writing.Pre-requisite: PWR 91NCS.

PWR 191. Advanced Writing. 3 Units.
Open to undergraduates and graduate students. Crafting nonfiction prose in a range of genres. Focus is on the relationship of genre and form; attention to developing stylistic versatility. Individual conferences with instructor. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.

PWR 192. Projects in Research, Writing, and Rhetoric. 1-5 Unit.
Advanced work on research projects, early drafts of theses, proposals. Shared work, discussions, and examination of methods, rhetorics, and styles in all disciplines. May be repeated for credit. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.

PWR 193. Writing the Honors Thesis. 1-5 Unit.
For students from all majors in the process of writing an honors thesis. Review of key elements of thesis process, including literature reviews, structure, argumentation, style, and documentation. Group and individual workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.

PWR 194. Topics in Writing and Rhetoric. 4 Units.
Understanding rhetoric as readers and interpreters of texts and to develop skills as writers and speakers. Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For topics, see http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_pwr/advanced_pwr.

PWR 194AB. Topics in Writing & Rhetoric: Freedom's Mixtape: DJing Contemporary African American Rhetorics. 4 Units.
Black music in all its genres, styles and eras has always been about freedom and transformation. About both Black people and the whole society. About the US Black experience, the African continent and the diaspora. These musical forms and the social movements they reflect and help shape are therefore central to the study of African American rhetoric. From overtly translating the ideas of social movements for mass audiences, to capturing the mood of a moment or move, to reflecting and influencing the aesthetics and styles that attend public discourse, to simply being a space where debates get worked out in community, music in Black traditions are as important a space of engagement as political speeches, sermons, websites, or even #BlackTwitter. This course will use Black music and its relationship to both social movements and everyday dialogue and debate to introduce study in African American Rhetoric as a field of study.
Same as: AFRICAAM 194A

PWR 194ABA. Topics in Writing & Rhetoric: Contemporary Black Rhetorics: Prince. 2-3 Units.
This course will examine Prince's music, life and impact and their relationship to both social movements and everyday dialogue and debate to introduce African American Rhetoric as a field of study. Students in the course will trace specific themes in Prince's music throughout his career, write an album review, and create a blog on some aspect of Prince.

PWR 194AJ. Topics in Writing & Rhetoric: Contemporary Black Rhetorics: Black Twitter and Black Digital Cultures. 4 Units.
Does not fulfill NSC requirement. This course will examine Black engagements with digital culture as sites for community building, social action and individual and collective identity formation. By studying phenomena like #BlackTwitter, memes, Vine, selfie culture, blogging, "social watching," and more, we will explore how Black technology use addresses questions like identity performance and expression, hyper visibility and invisibility of Black lives, Black feminisms, misogynoir and Black women/femme leadership in social movements, the roles and influence of Black Queer cultures online, and social activism and movements in online spaces. nnFrom #YouOKSis, #BlackLivesMatter and #AfroLatinidad to the Clapback, roasts and "reads," we will work from the serious to the silly, from individuals to collectives, from activism to everyday life, and from distinct Black cultures to diasporic connections and exchange. Participants in the course will create a social media autobiography, a "read/ing" of a Black cultural practice or phenomenon online, host an online discussion, and prepare a pitch for a longer research project they might pursue as a thesis or an ongoing study. Bring your GIFs, memes, and emoji, and a willingness to be in community both online and off for this new course! Prerequisite: first level of the writing requirement or equivalent transfer credit. For topics, see https://undergrad.stanford.edu/programs/pwr/courses/advanced-pwr-courses.
Same as: AFRICAAM 194

PWR 194AV. Topics in Writing & Rhetoric: Drawn from Life: The Power of True Stories in Autobio Comics. 3-4 Units.
The most impactful, fantastical stories often come not from fiction but from our own richly diverse lives. In this course you will explore autobiographical comics as a form of personal narrative ideally suited for communicating purposeful messages about culture, identity, and experience. We will embark on an immersive journey through comics in which authors tell their own true stories with rhetorical purpose, such as revealing the nuances of cultural identity, illuminating the experiences of marginalized communities or perspectives, and/or promoting advocacy or change. You will engage in deep analysis of how these comics reveal and help create the rhetorical practices of particular cultural communities. No drawing experience or expertise is required. For more information see https://undergrad.stanford.edu/programs/pwr/courses/additional-elective-courses-writing-and-rhetoric.

PWR 194B. Advanced Writing. 4 Units.
Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For details, see http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_pwr/advanced_pwr.

PWR 194BR. Topics in Writing & Rhetoric: The Rhetoric of Health and Medicine. 4 Units.
This course will aim to give students a foundation in the rhetoric of health and medicine across major stakeholders researchers, government, institutions, doctors, patients, journalists, and a general public obsessed with health and wellness. For example, we will analyze key theories about the relation of institutions, doctors, and patients, from Foucault's Birth of the Clinic to Rita Charon's Narrative Medicine: Honoring the Stories of Illness. We will also investigate how patients make sense of their illnesses through art and memoirs, how doctors are trained in an empathetic bedside manner, and the rhetoric of medical breakthroughs. From this foundation, students will choose an issue to tackle in their own research projects, from the politicization of Planned Parenthood and women's healthcare, to the experience of trans patients seeking care, to the rhetoric of access vs. coverage in current debates about health insurance. Prerequisite: completion of WR-1 & WR-2 req or permission of instructor. For full description, see https://undergrad.stanford.edu/programs/pwr/courses/additional-elective-courses/rhetoric-health-and-medicine.

PWR 194C. Make Them Laugh: Comedy as Persuasion and Argument. 4 Units.
Exploration of major theories of comedy and application of these theories to historical and contemporary comedic practice, with particular attention to comedy as a form of argument in a range of contexts. For more information, see http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_pwr/advanced_pwr. Prerequisite: first two levels of the undergraduate writing requirement or equivalent transfer credit. Not repeatable for credit.

PWR 194CW. Brave New Worlds: An Introduction to (De)colonial Rhetorics. 4 Units.
Since the time of Columbus, colonial agendas and policies have engendered their own rhetorics of justification and explanation. After all, European modernism began with the encounter of the New World, and Europe¿s own identity was forged in the process of ¿Latinization¿ of the Western Hemisphere. In response, decoloniality arose as a rich intellectual critique in the late 1990s in South America and the Caribbean. Decolonial rhetorical traditions stand in a unique position vis-à-vis the development of modernity, colonialism, racialized identities, the crisis of European reason, and the dawn of globalization. In an era of Trumpism, in which European modernity once again justifies restricting the mobility and freedom of Latinx immigrants, among other ethnic groups, perhaps no other form of intellectual critique seems quite so urgent. This course introduces students to primary decolonial rhetorical texts and asks students to apply these insights to pressing contemporary challenges by practicing deep reading of primary and secondary texts, preparing group presentations, and exploring creative acts of composition with an eye toward imagining brave new worlds and the decolonial rhetorical practices valued therein.

PWR 194DH. Topics in Writing and Rhetoric: Empathy, Ethics, and Compassion Meditation. 4 Units.
Does not fulfill NSC requirement. In this course, we'll extend this discussion by expanding our thinking about rhetoric as a means of persuasion to consider its relation to empathy-as a mode of listening to and understanding audiences and communities we identify with as well as those whose beliefs and actions can be lethal. We'll also practice compassion medication and empathetic rhetoric to see how these ethical stances affect us individually and investigate the ways they may and may not be scaled to address social justice more broadly. Finally, with the course readings and discussions in mind, you will explore a social justice issue and create an essay, a workshop, campaign or movement strategy, podcast, vlog, infographic, Facebook group, syllabus, etc. to help move us closer to positive change. Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For topics, see https://undergrad.stanford.edu/programs/pwr/courses/advanced-pwr-courses.
Same as: CSRE 94

PWR 194EP. Topics in Writing & Rhetoric: Introduction to Environmental Justice: Race, Class, Gender and Place. 4 Units.
This course examines the rhetoric, history and key case studies of environmental justice while encouraging critical and collaborative thinking, reading and researching about diversity in environmental movements within the global community and at Stanford, including the ways race, class and gender have shaped environmental battles still being fought today. We center diverse voices by bringing leaders, particularly from marginalized communities on the frontlines to our classroom to communicate experiences, insights and best practices. Together we will develop and present original research projects which may serve a particular organizational or community need, such as racialized dispossession, toxic pollution and human health, or indigenous land and water rights, among many others. Prerequisite: PWR 2.
Same as: EARTHSYS 194, ENVRES 223

PWR 194KD. Topics in Writing and Rhetoric: Technology and Human Values. 4 Units.
Pining for a job in Google X but a little afraid of what disrupting the next social system will do to humans when all is said and done? Unsure where the real conversation is happening at Stanford about how to think more carefully and thoughtfully about the tech we are being trained to make? Curious to know what underlying common ground might link fuzzies with techies, humanists with engineers, scientists with philosophers? These are some of the issues we¿ll address in this seminar. You will be able to choose your own current topic¿drones, tech and medicine, Big Data, Cloud applications, AI and consciousness, cybersecurity, tech and the law¿for which you will choose readings and write a seminar paper and then co-lead discussion. The class goals are to know better the ethical value of one¿s tech work and research and to be able to express to scientists and non-scientists alike the ways in which this work contributes to the greater human good (beyond strict convenience or short-term profit). Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For topics, see https://undergrad.stanford.edu/programs/pwr/courses/advanced-pwr-courses.

PWR 194KT. Topics in Writing & Rhetoric: The Last Hopi On Earth: The Rhetoric of Entertainment Inequity. 4 Units.
While #OscarsSoWhite brought attention to the Academy's overwhelmingly White, male membership, the underbelly of the entertainment industry itself is rife with inequitable hiring of not only on-camera and on-stage performers but also directors, writers, and others behind the scenes. While there are several organizations from Racebending.com to the Geena Davis Institute on Gender in Media that seek to usher in more equitable representation, push back against the Industry's disparate employment practices has been documented for more than fifty years with what many argue is not proportionally positive movement. White males still garner almost half of all theatrical and television roles and represent more than 80% of episodic directors while entertainment hubs Los Angeles and New York City are more than 50% people of color and female. What will it take to attain equity in the entertainment industry? Why does it matter? nnIn this course, students will examine rhetorical issues in promoting, defending, and opposing entertainment industry practices - writing and speaking across genres in persuasive response - and ultimately develop a collaborative 5-year strategic plan to usher in equity.n nThis course is part of the PWR advanced elective track in Social and Racial Justice (SRJ). Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For video course description, see https://undergrad.stanford.edu/programs/pwr/courses/advanced-courses/last-hopi-earth-rhetoric-entertainment-inequity.
Same as: CSRE 194KT

PWR 194MF. Topics in Writing & Rhetoric: In the Margins: Race, Gender and the Rhetoric of Science. 4 Units.
Every day a new headline alerts us to the lack of race and gender diversity in the tech sector in Silicon Valley. At the same time, science and technology are often lauded as objective systems capable of producing color- and gender-blind truths and social good for all of us. This course pushes beyond the headlines and the hashtags to think about the complex relationship between gender, race and science. Together we will research chronically understudied voices and contributions in the history of science and technology and have the opportunity to read and participate in some of the efforts to highlight their stories through a Wikipedia edit-a-thon and final research project. We will also rigorously think through why the historical and current under-representation of women and people of color matters for the questions that are asked, methodologies that are used, and science and technology that is eventually produced. This course fulfills the advanced PWR requirement for the Notation in Science Communication (NSC). Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For topics, see https://undergrad.stanford.edu/programs/pwr/courses/advanced-pwr-courses.

PWR 194NCR. Topics in Writing & Rhetoric: Introduction to Cultural Rhetorics. 4 Units.
All cultures have their own ways of communicating and making meaning through a range of situated rhetorical practices. In this gateway course to the Notation in Cultural Rhetorics, you'll explore the diverse contexts in which these practices are made and continue to be made;learn methodologies for examining their rhetorical production across media and modality; and study situated cultural practices and their historical and current developments.
Same as: CSRE 194NCR

PWR 194SB. Topics in Writing and Rhetoric: Rhetoric of Science. 4 Units.
Understanding rhetoric as readers and interpreters of texts and to develop skills as writers and speakers. Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For topics, see https://undergrad.stanford.edu/programs/pwr/courses/advanced-pwr-courses.

PWR 194SS. Topics in Writing & Rhetoric: Making Rhetoric Matter: Human Rights at Home. 4 Units.
'Human rights' often sounds like it needs defending in far-off places: in distant public squares where soldiers menace gatherings of citizens, in dark jails where prisoners are tortured for their politics, in unknown streets where gender inequality has brutal consequences. But Bryan Stevenson, a lawyer fighting for social and racial justice in the jails of Alabama, proposes that we try 'proximity': that we get close to the injustices that are already close to us. This class thus takes human rights as a local issue, focusing on how terms like 'human' and 'rights' are interpreted on our campus and in our neighborhoods, cities, and region. Instead of a traditional human rights policy framework, we'll use the lens of intersectional ethics to explore specific rhetorical issues in gender politics, citizenship, higher education, police brutality, and mass incarceration. We will write, speak, and move across genres, responding to the work of incarcerated artists, creating embodied workshops, 'translating' ideas into new media (does someone you know need an animated video about gender pronouns? Or maybe it's time for a podcast about #PrisonRenaissance?), doing collaborative research, and 'writing back' to our audiences. For course video and full description see: https://undergrad.stanford.edu/programs/pwr/courses/advanced-courses/making-rhetoric-matter-human-rights-home.nnThis course is part of the PWR advanced elective track in Social and Racial Justice (SRJ). Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For topics, see https://undergrad.stanford.edu/programs/pwr/courses/advanced-pwr-courses.
Same as: CSRE 194SS

PWR 195. Writing Center Peer Tutor Seminar. 2-3 Units.
For students selected to serve as peer writing tutors in the Hume Center for Writing and Speaking and/or at other campus sites. Readings on and reflection about writing processes, the dynamics of writing and tutoring situations, tutoring techniques, learning styles, diversity, and ethics. Observation of tutoring sessions, written responses to readings, and other written work. Instructor permission required. WR 1 pre-/co-requisite.

OVERSEAS STUDIES

Bing Overseas Studies Program

Located on the ground floor of Sweet Hall, BOSP has full-time staff members and student ambassadors to assist in advising and planning for study away. Course and program information, while accurate at the time of publication, is subject to change. Consult the BOSP (http://bosp.stanford.edu/) website for updated information.

The Bing Overseas Studies Program (BOSP) provides opportunities for Stanford students to broaden their undergraduate education through study away and exposure to other cultures. Regular quarter-length programs in Australia, Berlin, Cape Town, Florence, Hong Kong, Istanbul, Kyoto, Madrid, New York, Oxford, Paris, and Santiago offer courses in social and natural sciences, humanities, engineering, and earth sciences with full Stanford credit. Many courses also count toward major requirements and/or fulfill University breadth requirements.

Students may enroll for one or more quarters at most locations. Academic or paid internships are available at certain program locations. Research opportunities are available in various formats at different centers. Minimum academic and language prerequisites are specific to each program.

See the BOSP (http://bosp.stanford.edu/) website for information on these prerequisites. As of September 1, 2019, the Stanford in New York program became part of BOSP.

Overseas Studies also offers three-week faculty-led, short-term programs in various locations during Summer Quarter, including Oaxaca, Mexico focused on community health and biocultural diversity, and occasionally other programs in various locations. In addition to the programs offered through BOSP for enrolled Stanford students, the University is a member of the Kyoto Consortium for Japanese Studies (KCJS), where students may enroll while remaining registered at Stanford.

While studying away through BOSP, students remain enrolled at Stanford and pay regular tuition along with an overseas fee, which is based on Stanford on-campus room and board rates. Regular financial aid applies and may be adjusted to cover additional costs. At many centers, students live in a homestay or a dormitory setting with local and other students.

Locations

Courses offered by the Overseas Studies Program are listed on the Stanford Bulletin's (http://explorecourses.stanford.edu/) ExploreCourses (http://explorecourses.stanford.edu/) web site under subject codes beginning with OSP or SINY. Each BOSP location has its own subject code. Those subject codes, by location, are:

Due to COVID-19, all BOSP programs have been suspended for Autumn Quarter 2020-21. All courses and quarters of operation are subject to change.

Program Director

Program Director: Aron Rodrigue

Stanford Program in Australia

Program suspended for Autumn 2020-21 academic year.

Stanford Program in Berlin

Program suspended for Autumn 2020-21 academic year.

Director: Karen Kramer

Faculty-in-Residence: Arunava Majumdar, Ed Carryer, Sherri Shepard

Program Faculty: : Diana Böbe, Ulrich Brückner, Timur Flissikowski, Wolf-Fabian Hungerland, Martin Jander, Wolf-Dietrich Junghanns, Sylvia Klötzer, Friederike Knüpling, Ralf Müller, Leah Muir, Matthias Pabsch, Matthew Stephen, Jochen Wohlfeil, Tomasz Wozniakowski

Stanford Program in Cape Town

Director: Adelene Africa

Faculty-in-Residence: Rush Rehm, Marie-Louise Catsalis, Grant Parker

Program Faculty: Mohamed Adhikari, June Bam, Nomusa Makhubu, John Parkington, Ulrike Rivett, Helen Scanlon, Laura Wenz

Stanford Program in Florence

Program suspended for Autumn 2020-21 academic year.

Director: Ermelinda Campani

Faculty-in-Residence: David Sklansky, Tiziana Vanorio

Program Faculty: Francesca Banchi, Elena Baracani, Paola Bonizzoni, Laura Calvelli, Giulia Calvi, Veronica De Romanis, Gustavo Gozzi, John Hooper, Sebastiano Maffettone, Fiorenza Quercioli, Matteo Renzi, Maria Stella Rognoni,Filippo Rossi, Alberto Tonini, Timothy Verdon

Stanford Program in Hong Kong

Program suspended for Autumn 2020-21 academic year.

Stanford Program in Istanbul

Program suspended for 2020-21 academic year.

Stanford Program in Kyoto

Program suspended for Autumn 2020-21 academic year.

Director: Mike Hugh

Faculty-in-Residence: Tadashi Fukami

Program Faculty: Yuka Kanno, Yuko Kawahara, Sachiko Kubuki, Catherine Ludvik, Daiko Matsuyama, Yasue Numaguchi, Naoyuki Ogino, Naoko Shiotani, Kiyoko Tanaka, Rie Tsujino

Kyoto Consortium for Japanese Studies

Director: Matthew Stavros

Stanford Program in Madrid

Program suspended for Autumn 2020-21 academic year.

Director: Pedro Perez-Leal

Faculty-in-Residence: C. Kevin Boyce, Paola Moya, Ramón Saldívar

Program Faculty: María Almudena Ariza Armada, Alberto Bosco, Aída Esther Bueno Sarduy, Miguel Buñuel, María Teresa Camblor Portilla, Pablo Campos Calvo Sotelo, Jean Castejón Gilabert, Raúl de la Fuente Marcos, Julia Doménech López, Sylvia Hilton, Sheila Klaiber, Miguel Larrañaga Zulueta, Laura Luceño Casals, Irene Martín Cortés, Antonio Muñoz Carrión, Laura Murcia Cánovas, Alicia Pérez Blanco, Beatriz Pérez Galán, Roshan Samtani, Oscar Sánchez Fuster

Stanford in New York

Program suspended for Autumn 2020-21 academic year

Program Director: Rosina Miller

Faculty-in-Residence: Jeffrey Hancock, Patricia Allessandrini

*Program Faculty:*Ben Allanson, Mohammed Badi, Jonathan Bronson, Arthur Cohen, Richard Gowan, Danielle Jackson, Chiseche Mibenge, Mark Oldman, Julie Orringer,

Stanford Program in Oxford

Program suspended for Autumn 2020-21 academic year.

Director: Stephanie Solywoda

Faculty-in-Residence: Mykel Kochenderfer, Alex Woloch

Program Faculty: Olivia Reilly, Sebastian Petzolt, Alison Kahn, Scot Peterson, Emma Plaskitt, Jack Nasher, Matthew Landrus, Samuel Ritholtz, Alberto Baena-Lopez

Stanford Program in Paris

Program suspended for Autumn 2020-21 academic year.

Director: Estelle Halévi

Faculty-in-Residence: Eric Lambin

Program Faculty: Jean-Francois Allemand, Nicolas Baudouin, Nicolas Desprat, Benedicte Gady, Louise Lartigot-Hervier, Eloi Laurent, Florence Leca, Elizabeth Molkou, Gregoire Quenault, Pauline Reychman, Marie-Christine Ricci, Klaus-Peter Sick, Fabrice Vir

Stanford Program in Santiago

Program suspended for Autumn 2020-21 academic year.

Director: Iván Jaksic

Faculty-in-Residence: Xueguang Zhou

Program Faculty: Mabel Abad, César Albornoz, Germán Correa, Claudia Dides, Rolf Lüders, Sergio Missana, Hernan Pons, Sharon Reid

Overseas Studies General Courses

OSPGEN 25. The Khmer Rouge Legacy and Transitional Justice in Cambodia. 2 Units.
The ongoing trials at the Extraordinary Chambers in the Courts of Cambodia (ECCC) began a transitional justice process that ushered in an era in which Cambodians began to examine their experience of the Khmer Rouge regime (1975-1979). This seminar will focus on Cambodia's experience of civil war, trials, reparations, reconciliation, and coming to terms with the past. We will engage with ECCC, UN, and human rights NGO representatives, as well as young Cambodian artists, human rights lawyers, and academics. In Phnom Penh, we will visit the ECCC, the Tuol Sleng Genocide Museum, the Choeng Ek Killing Fields, human rights NGOs, etc. We will go on to visit Siem Reap and the temple complex of Angkor Wat.

OSPGEN 26. Interdisciplinary Introduction to African Urban Studies. 2 Units.
The main idea for this course will beto use Accra as a way to illuminate cities of the students'own choice.This meansthat the course will be inherently comparative andfeatures of Accra will be usedto ignite students¿understanding of details of the urbanin general.Features of other African cities such as Cairo,Lagos, Kinshasa, and Johannesburg will beintroduced primarily through literary, anthropological,and other humanistic texts. And spatial concepts such asspatial morphology, spatial traversal and the means of locomotion, space-time anamorphism (for science fiction), topoanalysis (from phenomenology), and chronotopes(from Bakhtin)will be progressively introduced and applied to different urban features. The course will be a combination of classroom discussions and various fieldwork walking and bus tours of Accra. These will help to further ground the spatial concepts they will have been introduced to in class.There willalsobetrips to the Elmina and Cape Coast Castles, old seats of the European trading presence on the Gold Coast/ Ghanaand sites of the slave trade.

OSPGEN 27. Creative City: Culture and Resistance in Global Bangalore. 2 Units.
Formerly described as "pensioner's paradise," and "garden city," Bangalore is a city in southern India that once evoked images of rest and retreat. From an earlier somnolent rhythm of life, Bangalore has transformed into the high technology capital of the Global South and grows at a pace so rapid that it eludes our conceptual grasp of it. This course explores a central question: How did the southern Indian city, Bangalore, transform from ¿pensioner's paradise¿ to India's high tech capital? We will study the urban transformations of Bangalore through three vectors of analysis: the city'sn2vibrant arts scene, civic and legal activism, and environmental and social justice movements.

OSPGEN 28. Can a Start-Up Culture and Technology Heal the World?. 2 Units.
Israel's health system is one of the most admired in the world. Despite its small size, Israel is home to a disproportionate number of start-ups.Through this immersive seminar, students will gain an understanding of how socio-cultural conditions, including political, regulatory, military, and academic institutions; geographical, historical, and environmental conditions; and human cultures and activities have shaped the health innovation ecosystem in Israel into one of the world's most productive centers; and an appreciation of the advantages and disadvantages faced by entrepreneurs in Israel, how they have evolved, and how they compare to the experience of entrepreneurs elsewhere.

OSPGEN 29. A cultural, ethical, medical and legal exploration of Japanese and American Societies. 2 Units.
How can someone be dead in America but alive in Japan? Why does Japan have amongthe lowest rates of life-saving organ transplantation in the world despite being a highly developed society? While death is broadly considered an absolute biological event, the space between life and death may be blurry and influenced by often-competing forces. This course will explore historical, anthropological, ethical, and medical constructs around death and dying, brain death and organ transplantation. Through in-classroom and experiential learning, we will compare the US and Japanese perspectivesand will includeunique cultural, ethical, and medical experiences in Osaka and Kyoto, Japan.

OSPGEN 58. Stoking an ancient flame: Ceramics intensive in Tamba. 2 Units.
The Tamba region near Kyoto, Japan, has been a center of pottery production for over eight centuries. In many ways, medieval stoneware pottery of Tamba and Japan¿s other ¿six ancient kilns¿ can be seen as forebears of what we now know as the wabi-sabi aesthetic of Japanese tea culture. Today, surviving heirloom pieces such as jars (tsubo) and flower vessels (hanaire) serve as inspirational archetypes for surging international interest in the revival of styles and methods of traditional Japanese wood-fired ceramics (yakishime). In this Bing Overseas Seminar, Stanford students will travel to Tamba to undertake an intensive introduction to forming and firing clay. Lectures, discussions and studio demos will build a broad view of traditional aesthetic elements of yakishime, but at the same time, students will be encouraged to explore a modern individualistic approach to creative process to help them develop their own expressive forms. The seminar culminates in a traditional wood firing reaching kiln temperatures in excess of 2300F, which is a process that one must experience first-hand to viscerally comprehend. A final critique of student work will probe the complex interplay of natural materials, creative vision, manual skills and serendipity in this most ancient yet vital paragon of the arts of fire.

OSPGEN 60. Earth's 3rd Pole: Coupled Human-Natural Systems in the Khumbu Valley, Nepal. 2 Units.
Through place-based exploration of the Khumbu Valley, Nepal, this field seminar focuses on the complex relationships between mountain and glacial geomorphology, culture and religion, land use in extreme environments, climate change, and sustainable resource development and management. An analysis of the coupled human-natural systems of the Khumbu Valley provides a unique lens for students to interpret broader resource management and conservation issues. The curriculum balances field explorations, classroom lectures, and meetings with government officials, NGO staff, national park managers, Sherpa leaders, and several Buddhist Lamas.

OSPGEN 61. SETS: Sustainable Water and Sanitation in Southeast Asia. 2 Units.
This course investigates sustainable water and sanitation management through connections with water, energy, and food scarcity in Southeast Asia. Upon completion of the course, students will demonstrate improved understanding of: (1)The linkages between food, energy, water, and sanitation provision(2)Key challenges and opportunities facing each sector, and cross-cutting solutions(3)Ways in which industries, governments, and research institutions envision resource efficiency in the 21st century.

OSPGEN 74. St. Petersburg: Imagining a City, Building a City. 2 Units.
St. Petersburg, the world's most beautiful city, was designed to display an 18th-century autocrat's power and to foster ties between Russia and the West on the tsar's terms. It went through devastating floods and a deadly siege; it birthed the Petersburg myth, poems and prose that explore the force of the state and the individual's ability to resist. This class addresses the struggle between the authorities and the inhabitants; the treacherous natural environment; the city as a node in national and international networks of communication; the development of urban transportation networks; and the supply of goods.

OSPGEN 79. Preserving Biodiversity: Conservation Photography in South Africa. 2 Units.
Conservation photographers photograph the natural world, animals and plants, and people that threaten, protect or study wildlife and ecosystems, with the goal of advocating for specific conservation outcomes. We will actively practice conservation photography to address biodiversity and environmental issues in national, regional and private reserves in South Africa. Explore the fundamentals of creative cooperation in small teams, with the goal of producing effective photoessays. Workshops and guest speakers will address issues of biodiversity, wildlife management, poaching, ecotourism, and community engagement with conservation. Daily field trips culminate in group and individual projects. Location: Kruger National Park and surrounds, South Africa.

OSPGEN 259. Community Health in Oaxaca. 2 Units.
Close observation of clinicians at work in community health settings in Oaxaca and service with local community health organizations. Combination of classroom study and discussion with cultural immersion, language training, clinical shadowing, and community service. Topics include: Mexican healthcare system; cultural, socioeconomic and educational factors impacting health of Mexicans and Mexican immigrants to U.S.; Mexican cultural and health beliefs; Mexican migration as a multi-ethnic process.

Overseas Studies in Australia Courses

OSPAUSTL 10. Coral Reef Ecosystems. 3 Units.
Key organisms and processes, and the complexity of coral reef ecosystems. Students explore the Great Barrier Reef from the southern end which demonstrates the physical factors that limit coral reefs, to the northern reef systems which demonstrate key aspects of these high biodiversity ecosystems. Human-related changes. Emphasis is on research experiences and development of analytical skills. Two units only counted for the Biology major.

OSPAUSTL 28. Terrestrial Ecology and Conservation. 3 Units.
Examination of the rain forest and sclerophyll ecosystems in far north Queensland. Methodology for classification of key terrestrial ecosystems in lectures and then use of multiple field-based techniques to put theory to the test in the field. Ecosystem health is assessed using bioindicators under differing fire regimes and disturbance levels. Globally, terrestrial ecosystems and their associated fauna are affected by many of the same anthropogenic impacts and these are explored using Australian case studies and hands-on field activities. How both the plants and animals of Australian ecosystems came to be so utterly unique, in the context of the long evolution of 'the island continent' from the prehistoric rain forests that once covered the ancient super-continent of Gondwana.

OSPAUSTL 32. Coastal Ecosystems. 3 Units.
Field course that takes place on North Stradbroke Island, located in Moreton Bay. Physical and biological factors that influence ecosystems of the coastal zone. Lectures, field activities and discussions to increase knowledge of coastal ecosystems, their structure, including knowledge of the communities of flora and fauna, their importance to human communities, their management and the threats that negatively affect them. Coastal ecosystems of Moreton Bay used as an example, considering how both natural and human factors influence coastal ecosystems. Multiple field activities on the island observing various marine animals and plant communities, and exploring the range of coastal ecosystems of North Stradbroke Island.

OSPAUSTL 40. Australian Studies: History, Society and Culture Down Under. 3 Units.
Introduction to Australian society, history, culture, politics, and identity. Social and cultural framework and working understanding of Australia in relationship to the focus on coastal environment in other program courses. Field trips.

OSPAUSTL 50. Individual Research Project. 4 Units.
Prior to arriving in Australia, students establish a link with University of Queensland faculty to develop project ideas that combine personal interests and career goals with opportunities presented by the Australian Coastal Studies program, such as how mangrove roots find sediment rich zones of the shore, or the dynamics of ecotourism in southern and northern coastal Queensland. Project report and presentation in Australia.

Overseas Studies in Barcelona (CASB) Courses

Overseas Studies in Beijing Courses

Overseas Studies in Berlin Courses

OSPBER 1Z. Accelerated German: First and Second Quarters. 8 Units.
A jump start to the German language, enabling students with no prior German to study at the Berlin Center. Covers GERLANG 1 and 2 in one quarter.

OSPBER 2Z. Accelerated German, Second and Third Quarters. 8 Units.
Covers GERLANG 2 and 3 in one quarter. Qualifies students for participation in an internship following the study quarter. Emphasis is on communicative patterns in everyday life and in the German work environment, including preparation for interviews.

OSPBER 3B. German Language and Culture. 7 Units.
Completion and refinement of First-Year grammar, vocabulary building, reading literature and news, writing skills, esp. journal. Extensive use of current materials, such as local Berlin and national news, and emphasis on building speaking skills for everyday situations and discussions.

OSPBER 17. Split Images: A Century of Cinema. 3-4 Units.
20th-century German culture through film. The silent era, Weimar, and the instrumentalization of film in the Third Reich. The postwar era: ideological and aesthetic codes of DEFA, new German cinema, and post-Wende filmmaking including *Run Lola Run* and *Goodbye Lenin.* Aesthetic aspects of the films including image composition, camera and editing techniques, and relation between sound and image.

OSPBER 19. Expressing Ideas: Academic German for 2nd year learners. 2 Units.
This class is designed for students enrolled in a 3-5 unit theme course taught in German in Berlin who have not previously taken German 21. The class focuses on vocabulary enrichment and how to articulate observations and formulate arguments, including learning figures of speech.

OSPBER 21B. Intermediate German. 4 Units.
German language skills for Intermediate students. Refinement of German grammar; vocabulary building, writing practice via journal and essays; German culture, including current news and issues, literature and films. Special emphasis on comprehension and speaking skills for discussions, everyday situations, and in-class presentations. Prerequisite: completion of first-year German.

OSPBER 24B. Advanced German Grammar. 2 Units.
Syntax and organizational patters (connectors, structuring and cohesive devices) for various types of texts and arguments, contrastive vocabulary practice, and reading strategies. Skills for writing well-structured critical essays, giving effective presentations, and reading extensively as well as intensively.

OSPBER 28. German Opera. 4 Units.
This course is designed to provide an introduction to opera in general and German opera in particular. The syllabus is linked specifically to productions of German operas currently being presented at Berlin's opera houses. During class we will prepare ourselves for the various performances by discussing each work in detail, looking at the libretto, analyzing the relationship between music and text, listening to recordings, and reading secondary literature. We will also share our post-performance impressions. The principal aim of the course is informed appreciation of the genre of opera.

OSPBER 29. Topics in German Music and Culture. 3-5 Units.
Weimar Culture The recommended textbook for this independent study is Weimar Republic Sourcebook, ed. Anton Kaes (Berkeley: U of California P, 1994), an excellent collection of contemporaneous texts that is still in print and available as a reasonably priced paperback. Topics for particular study could include "expressionism," "phenomenology," "Neue Sachlichkeit," the Bauhaus, "epic theater," proletarian art, and early German cinema, more or less following the organization of the Sourcebook. The syllabus will be tailored to any relevant cultural events in Berlin and neighboring cities planned for the quarter in question. Students will be encouraged to base their written projects on these events and on research at local archives, such as the Deutsche Kinemathek and the Bauhaus-Museum. Trips to institutions in other cities (Dessau, Weimar, etc.) could also be considered. Primarily in English, but some topics might require German. n nThe Symphony Material covered in this independent study could be adjusted to the student's interest and knowledge, depending on his/her level of musical literacy. He/she could focus on cultural history or on more technical, analytical issues. The aim will be to trace the history of the genre from its roots in the early 18th century to the present day using mainly works from the established repertory as examples. Visits to live performances in Berlin may also be included. n nBeethoven in German Culture Following last year's elections in Germany, the draft coalition contract included the following statement: "The 250th birthday of Ludwig van Beethoven in 2020 offers excellent opportunities for profiling German culture at home and abroad. Preparing for this important anniversary is thus of national concern." How and why did Beethoven become so crucially important in German culture? In trying to answer this question, the course will begin with a survey of Beethoven's life and works, and then focus on his legacy via key moments in reception history. Primarily in English, but some topics might require German.

OSPBER 30. Berlin vor Ort: A Field Trip Module. 1 Unit.
The cultures of Berlin as preserved in museums, monuments, and architecture. Berlin's cityscape as a narrative of its history from baroque palaces to vestiges of E. German communism, from 19th-century industrialism to grim edifices of the Sachsenhausen concentration camp.

OSPBER 31. Ways of Hearing: Exploring Berlin Through its Music. 1 Unit.
Introduction to the diverse Berlin music scene and its interwoven roots, exploring the intimate connections between music and German identity. Why music of all kinds is of such profound importance in Germany and how the German musical tradition has influenced the entire world and has, in turn, integrated impulses from many different cultures. Enrollment limited.

OSPBER 40M. An Intro to Making: What is EE. 5 Units.
Is a hands-on class where students learn to make stuff. Through the process of building, you are introduced to the basic areas of EE. Students build a "useless box" and learn about circuits, feedback, and programming hardware, a light display for your desk and bike and learn about coding, transforms, and LEDs, a solar charger and an EKG machine and learn about power, noise, feedback, more circuits, and safety. And you get to keep the toys you build. Prerequisite: CS 106A.

OSPBER 50M. Introductory Science of Materials. 4 Units.
Topics include: the relationship between atomic structure and macroscopic properties of man-made and natural materials; mechanical and thermodynamic behavior of surgical implants including alloys, ceramics, and polymers; and materials selection for biotechnology applications such as contact lenses, artificial joints, and cardiovascular stents. No prerequisite.

OSPBER 60. Cityscape as History: Architecture and Urban Design in Berlin. 5 Units.
Diversity of Berlin's architecture and urban design resulting from its historical background. Architect Ludwig Mies van der Rohe and his artistic ancestors. Role of the cultural exchange between Germany and the U.S. Changing nature of the city from the 19th century to the present.

OSPBER 64. Film and Writing. 3 Units.
German culture through film. Sensitivity for film structure through creative writing tutorials and screening workshops. Composition and narrative structure (storyline, suspense, character development). Screen-writing exercises.

OSPBER 66. Theory from the Bleachers: Reading German Sports and Culture. 3 Units.
German culture past and present through the lens of sports. Intellectual, societal, and historical-political contexts. Comparisons to Britain, France, and the U.S. The concepts of *Körperkultur, Leistung, Show, Verein,* and *Haltung*. Fair play, the relation of team and individual, production and deconstruction of sports heroes and heroines, and sports nationalism. Sources include sports narrations and images, attendance at sports events, and English and German texts. Will be taught in German if there are enough students with sufficient knowledge of German.

OSPBER 70. The Long Way to the West: German History from the 18th Century to the Present. 4-5 Units.
Battles still current within Germany's collective memory. Sources include the narrative resources of museums, and experts on the German history in Berlin and Potsdam. Field trips.

OSPBER 71. EU in Crisis. 4-5 Units.
Challenges confronting Europe as a whole and the EU in particular: impact of the sovereign debt crisis of the Eurozone, mass migration, external and internal security challenges, as well as political and social needs for reform. How the EU and its members respond and if the opportunities of these crises are constructively used for reform - or wasted (Crisis = Danger + Opportunity). Analyse institutions, interests and competing narratives to explain the current situation in Europe. Excursion to other European capital to get a non-German perspective on the crises.

OSPBER 74. Politics and Organization of Sport in Germany and the US. 4 Units.
Sport as an entry point for thinking about social dynamics and about broad debates about morality and ethics that are raised by ongoing social change. Issues related to sport as a national-level pursuit. How do nations use sport to promote their agendas, both among their own citizens and elsewhere? How do nations intervene to promote the performance of individual athletes? How else do they seek to exert their influence on sport outcomes? With Berlin as our backdrop, pursue these questions by considering three cases in detail: the 1936 Berlin Olympics, East German sport in the 1970s and 1980s, and German soccer today.

OSPBER 77. "Ich bin ein Berliner" Lessons of Berlin for International Politics. 4-5 Units.
History and theoretical concepts of International Relations, taking advantage of Berlin's unique history. Topics include: balance of power system, the era of total war, the East-West conflict, and the age of globalization, connecting these international political phenomena to sites and features of historical and contemporary Berlin. Core issues and theories of International Relations positioned in relation to the social and political history of Berlin, offering both a knowledge of Berlin as a global city of the twentieth century, and an understanding of International Relations through concrete examples.

OSPBER 79. Political Economy of Germany in Europe: an Historical-Comparative Perspective. 4-5 Units.
Political economy of Germany with special emphasis on contemporary issues. German political economy in the broader context of European integration, with some comparison with the U.S. model of economic and monetary integration. Assess, in comparative perspective, the specifics of the German economy embedded in Europe. How did Germany manage to become third export economy in the world? What is the role of government in its economic success?.

OSPBER 82. Globalization and Germany. 4-5 Units.
Main channels of globalization¿movement of capital, goods, people and ideas¿and their history. Arguments in favor and against economic integration and relationship between globalization and domestic political processes. Key industries of the German export economy; how globalization relates to current debates on migration and social policy. Germany's position in the European Union, as well as the world economy; Germany and its role in future globalization.

OSPBER 83. Refugees and Germany. 3-4 Units.
History and lived experience of refugees, both those who have fled from and to Germany, in the twentieth and twenty-first century. Visits to relevant sites in Berlin, meetings with refugees and experts on this topic, and readings to provide context. Participants write a journal; option for creative writing, either fiction or creative non-fiction.

OSPBER 84. Berlin and the Sociological Imagination: Special Topics. 1-2 Unit.
Independent study on social science and history topics giving students the opportunity to pursue a specific, sustained inquiry during their time in Berlin. This can include topics related to Berlin today, during the Cold War, in Nazi Germany, during the Weimar Republic, or other times, and can look specifically at aspects of German science, business, culture, or politics.

OSPBER 85. Topics in Social Psychology. 1-2 Unit.
Students may choose from the following topics: social psychology of stigma, diversity, and intergroup relationships. Regular meetings to review progress.

OSPBER 86. The Integration of Refugees in Europe: German Education Settings. 3 Units.
Experiences of refugees as they enter German secondary and post-secondary education settings. Using a social-psychological lens, learn how refugees understand their experiences in German schools and interactions with native students and teachers; how they are seen and treated; barriers to better relationships and outcomes; and how these can be overcome. Learn from popular commentary reports; scholarly writings from social-psychology and related fields on diversity, bias, belonging, and psychologically "wise" interventions. Experiential learning opportunities, including conversations with refugee students and educators working with refugees.

OSPBER 88. RELIGION & THE THIRD REICH. 4 Units.
This course investigates the role of established religion and new religious ideologies in Nazi Germany. Students learn about religious ideologies employed by the Nazis in service of fascism (paganism, occultism, and "Positive Christianity") and the policies they implemented to promote their nationalistic vision and absolutist politics, ranging from Gleichschaltung, to the Reich Concordat Treaty with the Vatican, to the Final Solution. Students also study the impact of these policies on German Protestants, Catholics, Jews, and other religious minorities, and about the range of responses that Nazi religious propaganda and programs evoked, from accommodation to cooperation to resistance. The course facilitates this investigation in three ways: (1) discussion of common readings and video content in a weekly seminar setting; (2) regular local site visits for experience learning; (3) frequent, short written reflection in the form of responses to readings, video content, and site visits (Academic Journal).

OSPBER 93. Empowering Women in STEM Fields. 1-3 Unit.
Empowering Women in STEM Fields, Origins of Modern Science, or Impact of Migrants and Refugees on German Society.

OSPBER 99. German Language Specials. 1-10 Unit.
May be repeat for credit.

OSPBER 101A. Contemporary Theater. 5 Units.
Texts of plays supplemented by theoretical texts or reviews. Weekly theater visits and discussions with actors, directors, or other theater professionals. In German. Prerequisite: completion of GERLANG 3 or equivalent.

OSPBER 104. Berlin University Lecture Series 1. 1 Unit.
May be repeat for credit.

OSPBER 105. Berlin University Lecture Series 2. 1 Unit.
.

OSPBER 126X. A People's Union? Money, Markets, and Identity in the EU. 4-5 Units.
The institutional architecture of the EU and its current agenda. Weaknesses, strengths, and relations with partners and neighbors. Discussions with European students. Field trips; guest speakers.

OSPBER 174. Sports, Culture, and Gender in Comparative Perspective. 3-5 Units.
Theory and history of mass spectator sports and their role in modern societies. Comparisons with U.S., Britain, and France; the peculiarities of sports in German culture. Body and competition cultures, with emphasis on the entry of women into sports, the modification of body ideals, and the formation and negotiation of gender identities in and through sports. The relationship between sports and politics, including the 1936 Berlin Olympic Games. In German. Prerequisite: completion of GERLANG 3 or equivalent.

OSPBER 198D. Humboldt Universitat: Humanities 2. 2-3 Units.
Course may be repeated for credit.

OSPBER 198F. Humboldt Universitat: Social Sciences 2. 2-3 Units.
.

OSPBER 198H. Freie Universitat: Humanities 3. 2-3 Units.
Course may be repeated for credit.

OSPBER 199A. Directed Reading A. 2-4 Units.
Course may be repeated for credit.

OSPBER 199B. Directed Reading B. 2-3 Units.
Course may be repeated for credit.

OSPBER 199C. Directed Reading C. 1-3 Unit.
.

OSPBER 199D. Humboldt Universitat: Humanities. 2-3 Units.
Course may be repeated for credit.

OSPBER 199F. Humboldt Universitat: Social Sciences. 2-3 Units.
Course may be repeated for credit.

OSPBER 199G. Freie Universitat: Social Sciences 1. 2-3 Units.
Course may be repeated for credit.

OSPBER 199H. Freie Universitat: Humanities 1. 2-3 Units.
Course may be repeated for credit.

OSPBER 199J. Freie Universitat: Natural Sciences 1. 2-3 Units.
Course may be repeated for credit.

OSPBER 199K. Freie Universitat: Social Sciences 2. 2-3 Units.
Course may be repeated for credit.

OSPBER 199L. Freie Universitat: Humanities 2. 2-3 Units.
Course may be repeated for credit.

OSPBER 199M. Freie Universitat: Natural Sciences 2. 2-3 Units.
Course may be repeated for credit.

Overseas Studies in Cape Town Courses

OSPCPTWN 10. Climate Change and Political Violence. 4 Units.
Policymakers and scholars are increasingly interested in whether climate change could increase the risk of political instability, including violent conflicts within and between countries. In this seminar, we explore such questions as: How could the expected effects of climate change make civil or international conflicts more likely? What evidence is there that environmental factors contribute to political violence, both historically and today? What regions or countries are most at risk from these challenges, and why? In addition to addressing the human and social impacts of climate change, topics include what causes political violence within and between countries and how we can assess the contribution of different risk factors. In addition, methods and data that scholars use to explore the link between climate and conflict.

OSPCPTWN 11. Public Health Service in Diverse Communities. 2-4 Units.
Guidance in becoming an effective health educator while making a contribution to a local community through teaching. Work in a community on a weekly basis to learn about the community, develop culturally appropriate educational material and then help deliver health education on a topic of choice in one of the following areas of focus: Culturally sensitive motivational interviewing for health behavior change; Sexually transmitted diseases and prevention; Teaching nutrition appropriate to various patient populations; Cardiovascular disease and risk reduction.

OSPCPTWN 14. Academic Internship. 4 Units.
Opportunity for students to pursue their specialization in an institutional setting such as a school, research institute, university, NGO, ICT4D organizations, or museums/art galleries. Engage with selection of readings relevant to the context of internship, meet weekly with the Engaged Learning Coordinator in small groups, attend group seminars, and complete assignments set by the instructors. Program culminates with a symposium, where students present their internship projects. Units determined by the number of hours per week at the internship. Prerequisite: consultation with BOSP Cape Town Engaged Learning Coordinator to develop internship that links field of study to practical experience and reflection.

OSPCPTWN 19. Understanding Liberation Struggles: The US Civil Rights & South African Anti-Apartheid Movements. 4 Units.
Two of the most consequential social movements of the 20thcentury are the African-American Freedom Struggle in the U.S. and the Anti-Apartheid Movement in South Africa. There are extensive literatures on both movements, but rarely have these two movements been studied comparatively. What are the similarities and differences between thetwo struggles? And how well do current theories of social movement origins account for the two movements? In this course, we will review the history of the two movements and then compare their emergence, subsequent development, and ultimate impact through the lens of social movement theory. We will then bring the course to a close with a sobering look at the legacies of both movements as well as the state of contemporary racial politics in the U.S. and South Africa.

OSPCPTWN 26. Topics in Organizations and Management. 1-3 Unit.
Students my choose from the following topics: Culture and Cultural Differences; Global Work; Navigating Diverse Teams; Organizations and Management; The Future of Work. Weekly meetings to review progress.

OSPCPTWN 30. Introduction to Contemporary Issues in South Africa. 2 Units.
This compulsory course provides a brief introduction to social issues in contemporary South Africa. It explores the impact of historical legacies in a post-Apartheid context. Drawing from a range of disciplines, this course provides insights into the form and content of South Africa's socio-political-historic and economic landscapes.

OSPCPTWN 35. In and Out of the Margins: The Plays of Athol Fugard. 4 Units.
This seminarfocuseson the plays of Athol Fugard, the most well-known, influential, and accomplished of South African playwrights. His innovative dramatic style (drawing orignally on improvisation, Brecht, and Greek tragedy,before shifting into realistic situations and dialogue);his apartheid-challenging collaborations with black South African theater artists (especially Zekes Mokei, John Kani, and Winston N'Tshona);and his extraordinarily long career (over the past sevendecades) makehis work of particular interest to students of history, theater, and politics. Through Fugard's plays, students confront signifcant issues in apartheid and post-apartheid South Africa. Set in the confines of the theater, these confrontations paradoxically generate a fuller engagement with the issues than we often get from accounts in the disciplines of history orpolitcal science. As Picasso once said, "Art is the lie that tells the truth," and Fugard's theater tries to do that. In studying his plays, students will learn a different kind of truth about social and historical realities that have faced South Africans over the past six decades.

OSPCPTWN 36. The Archaeology of Southern African Hunter Gatherers. 4 Units.
Archaeology, history and ethnography of the aboriginal hunter gatherers of southern Africa, the San people. Formative development of early modern humans and prehistory of hunters in southern Africa before the advent of herding societies; rock paintings and engravings of the subcontinent as situated in this history. Spread of pastoralism throughout Africa. Problems facing the descendants of recent hunter gatherers and herders in southern Africa, the Khoisan people.

OSPCPTWN 38. Genocide: African Experiences in Comparative Perspective. 3-5 Units.
Genocide as a major social and historical phenomenon, contextualized within African history. Time frame ranging from the extermination of indigenous Canary Islanders in the fourteenth and fifteenth centuries to more recent mass killings in Rwanda and Darfur. Emphasis on southern African case studies such Cape San communities and the Herero people in Namibia. Themes include: roles of racism, colonialism and nationalism in the making of African genocides. Relevance of other social phenomena such as modernity, Social Darwinism, ethnicity, warfare and revolution. Comparative perspective to elucidate global dimensions.

OSPCPTWN 42. White South-African Writers. 1-3 Unit.
I would be thrilled to work with students on an independent study that addressed the work of white South-African writers whose fiction (and in some cases their political activism) challenged the South African apartheid government. I would imagine a directed reading of white South-African novelists ¿Alan Paton, Nadinne Gordimer, and J.M. Coetzee¿whose work (and in some cases whose lives) constituted resistance to apartheid. The many possibilities include Alan Paton's Cry, The Beloved Country(a new film adaptation, starring Mark Rylance and Johnny Depp, is set to be released this year) and Ah, but Your Land is Beautiful; Nadinee Gordimer's The Conservationist, Occasion for Loving, The Burgher's Daughter, Get a Life, and The Pickup(2001); J.M. Coetzee Waiting for the Barbarians,Disgrace, The Life & Times of Michael K, and essays from White Writing. Interested students could undertake reading and discussing works by a single author, or a combination of the titles listed above by different writers.

OSPCPTWN 45. Transitional Justice and Transformation Debates in South Africa. 4 Units.
Exploration of transitional justice through critical discussion of contemporary South Africa. Conflicting perspectives of the South African transition through an exploration of the creation of the "rainbow nation" as well as discussions over whether a denial of justice for apartheid-era crimes prevails. Decisions made post-apartheid over how best to confront the large-scale human rights abuses of the past, including South Africa's recent past through the lens of the "pillars" of transitional justice: truth seeking, criminal justice, reparations and institutional reform. Issues of structural violence and the legacies of apartheid in order to question to what extent we can consider South Africa to have realised the promises of its transition.

OSPCPTWN 55. Arts of Change. 3 Units.
How might we understand the creative arts in South Africa in terms of their variety and impact? What social issues do they reflect? What impact might they yet have? Students will have the opportunity for a related practicum. Course must be taken for a minimum of 3 units to satisfy a Ways requirement.

OSPCPTWN 65. Preparation for Senior Capstone Project. 4 Units.
The course allows any student to design an independent research or synthesis project that will serve as the basis for some form of senior capstone project. These have included honors theses, senior projects, senior synthesis projects and honors in the arts. This goal will be accomplished through a cumulative, series of assignments. Each student will choose a research topic, narrow it to a specific research question, review the existing literature related to their question, develop a research plan to answer their question, and write a detailed proposal suitable for submission to either the UAR Major or Small Grants competitions.

OSPCPTWN 67. ICT4D: An Introduction to the Use of ICTs for Development. 3 Units.
Overview of selected ICT4D initiatives in Africa and South Africa. Engage critically with the optimism that follows technology invention to evaluate context and the digital knowledge gap. Themes such as the notion of technological colonization, co-design, SDG ICT agenda, policy and frameworks and other fundamentals in the field. Three-day block course with 4 mini-seminars and discussion groups each day.

OSPCPTWN 78. Postcolonial Modernist Art Movements in Africa. 3 Units.
Introduction to the complexities and contradictions of 'modernity' and 'modernism(s)' in postcolonial Africa. With a focus on ideology-driven interdisciplinary artistic movements in Senegal, Nigeria, Sudan, Congo, Egypt, Ethiopia and South Africa, examine various schools of thought that were part of modern consciousness that characterised the independence decades. Role that art centres, workshops, collectives and mission schools played in histories of European expansion and colonialism. Debates regarding notions of 'appropriation,' 'natural synthesis' and 'assimilation' interpreted in the context of postcolonial theory. Different modes of production and methodological approaches.

OSPCPTWN 83. From Cape to California: Settler Colonialism and the Genocide of Indigenous Peopes. 3-5 Units.
Two major social and historical phenomena: genocide and settler colonialism, contextualized within the broad contours of world history as well as the making of European colonialism and Western global domination from the start of European colonial expansion in the fifteenth century to the twentieth century. Emphasis on developing global comparative perspectives focusing on southern African, North and Latin American, as well as Australian case studies. Histories of the place from which students come, California, as well as the place they currently find themselves, the Cape, and the links both have to settler colonialism and the genocidal destruction of indigenous peoples.

OSPCPTWN 85. Diversity, Inclusion and Social Justice in Cape Town. 4 Units.
Implicit bias and the value of diversity and inclusion in our society; understanding of bias (explicit vs implicit) and the power that bias has in our every-day lives given implicit bias has such a profound effect on our attitudes, behaviors, and decision making. Students learn of some of their own biases, how they can mitigate them, and through study and visiting local communities and historical sites, appreciate the value of social justice. Power that diversity has in the composition of teams and in society and the importance for all of us to restore and maintain social justice so there can be peace both within and among nations.

Overseas Studies in Florence Courses

OSPFLOR 1A. Accelerated First-Year Italian, Part 1. 5 Units.
Accelerated sequence that completes first-year Italian in two rather than three quarters. For students with previous knowledge of Italian or with a strong background in another Romance language. Prerequisite: advanced-level proficiency in another Romance language Prerequisite: Placement .

OSPFLOR 1F. First-Year Italian, First Quarter. 5 Units.
All-in-Italian communicative and interactive approach. Emphasis is on the development of appropriate discourse in contemporary cultural contexts. Interpretation of authentic materials, written and oral presentations, and plenty of conversational practice. Language lab, multimedia, and online activities.

OSPFLOR 2A. Accelerated First-Year Italian, Part 2. 5 Units.
Continuation of ITALLANG 1A. Accelerated sequence that completes first-year Italian in two rather than three quarters. For students with previous knowledge of Italian or with a strong background in another Romance language. Prerequisite: Placement Test, ITALLANG 1A or consent of instructor. Fulfills the University language requirement.

OSPFLOR 2F. First-Year Italian, Second Quarter. 5 Units.
Continuation of ITALLANG 1. All-in-Italian communicative and interactive approach. Emphasis is on the development of appropriate discourse in contemporary cultural contexts. Interpretation of authentic materials, written and oral presentations, and plenty of conversational practice. Language lab, multimedia, and online activities. Prerequisite: Placement Test, ITALLANG 2.

OSPFLOR 3F. First-Year Italian, Third Quarter. 5 Units.
Continuation of ITALLANG 2. All-in-Italian communicative and interactive approach. Emphasis is on the development of appropriate discourse in contemporary cultural contexts. Interpretation of authentic materials, written and oral presentations, and plenty of conversational practice. Language lab, multimedia, and online activities. Prerequisite: Placement Test, ITALLANG 2 or consent of instructor. Fulfills the University language requirement.

OSPFLOR 11. Film, Food and the Italian Identity. 4 Units.
Food in Italian cinema staged as an allegory of Italy¿s social, political and cultural milieu. Intersections between food, history and culture as they are reflected in and shaped by Italian cinema from the early 1900s until today. Topics include: farmer's tradition during Fascism; lack of food during WWII and its aftermath; the Economic Miracle; food and the Americanization of Italy; La Dolce Vita; the Italian family; ethnicity, globalization and the re-discovery of regional culinary identity in contemporary Italy. Impact of cinema in both reflecting and defining the relationship between food and culture.

OSPFLOR 13. Galileo, Leonardo da Vinci, and the Scientific Revolution in Italy. 3 Units.
Italy was central to the Scientific Revolution during the Renaissance. The work of Galileo Galilei, Leonardo da Vinci, and others in Italy and across Europe, catalyzed the emergence of modern science, with profound changes in our worldview. The work of these Italians contributed to the rise of the scientific method, the development of modern sciences (especially astronomy, biology, physics, and mathematics), and the study of human anatomy and medicine. Technologic innovations, such as the telescope, microscope, accurate timepieces, and the printing press, were also pivotal for the Scientific Revolution. In this course we will explore the emergence of science and technology during the Renaissance and their connections to modern day scientific practice and principles, with a focus on key Italian pioneers. We will take advantage of Florence's location to visit museums and sites, and better appreciate their contributions to scientific methods and thinking.

OSPFLOR 15. The Italy Around You: Society, Politics, the Arts and the Economy. 3 Units.
Today's Italy through a series of thematic lectures covering a wide range of subjects, from politics to contemporary art and from sexual mores to the Mafia. Nature of contemporary Italian society, insights into the economic challenges facing Italy, as well as keys to deciphering Italian politics, and the elements required to make sense of what can be read, seen and heard in the Italian media. Assesing modern Italian culture in terms of the society that has produced it.

OSPFLOR 15M. Accademia del Maggio Musicale Fiorentino. 3 Units.
Individual instrumental or voice lessons with a private instructor at the Accademia del Maggio Musicale Fiorentino. Repeatable for credit.

OSPFLOR 16. Silicon Valley: The Modern Day Rebirth of Renaissance Florence. 3 Units.
Over the last few decades, Silicon Valley has originated a remarkable period of innovation, wealth creation, and impact on the world. Many describe this golden age of technology as the modern day rebirth of Renaissance Florence. But how could lightning strike twice, not to mention 6000 miles away and 700 years apart? What combination of elements enabled two relatively small valleys to rise up and change the world?.

OSPFLOR 19. Florence for Foodies: Discovering the Italian Culinary Tradition. 1 Unit.
A look at modern Florentine and Italian cuisine in light of historical heritage and foreign influences. Hands-on participation in three cooking classes with professional chefs. Understanding of the past and present of Italian food culture and its most important governing principles: the Mediterranean Diet, fresh and local ingredients, the market culture, and the Slow Food philosophy.

OSPFLOR 21F. Accelerated Second-Year Italian, Part A. 5 Units.
Review of grammatical structures; grammar in its communicative context. Listening, speaking, reading, and writing skills practiced and developed through authentic material such as songs, newspaper articles, video clips, and literature. Insight into the Italian culture and crosscultural understanding. Prerequisite: one year of college Italian if completed within two quarters of arriving in Florence, or ITALLANG 21.

OSPFLOR 22F. Accelerated Second-Year Italian Part B. 5 Units.
Grammatical structures, listening, reading, writing, speaking skills, and insight into the Italian culture through authentic materials. Intermediate to advanced grammar. Content-based course, using songs, video, and literature, to provide cultural background for academic courses. Prerequisite: ITALLANG 21 within two quarters of arriving in Florence or ITALLANG 21A or OSPFLOR 21F.

OSPFLOR 25. Photographic Interventions in Contemporary Fine Art Practice. 4 Units.
This course offers a fluid approach to image making, understanding photography as an art form that encompasses multiple approaches including performative, sculptural, pictorial and cinematographic practices. While introducing students to a series of printing techniques and photographic processes along with studio lighting and digital postproduction methods, this course will encourage visual experimentation, theoretical contextualisation, and active research processes. Students will be guided through the processes of developing a critical framework for their practice through tutorials and through theory seminars mapping some of the major developments and theoretical concerns within contemporary practice. They will also be shown researching methods to reach relevant audiences: from physical installations, exhibitions and publications, to new media and the web.

OSPFLOR 26. Economics of the EU. 5 Units.
Discussion and analysis of the European Crisis, which started in Greece in 2009 and continues. Critical comprehension of the inner functioning of the European Union's economics, politics and institutions, understanding of the reasons for the crisis and the solutions undertaken. Comparative analysis with the United States to show the complexity entailed in having one monetary policy and nineteen distinct national budgets. Discussion of key challenges in Europe and next steps in the progress of European integration.

OSPFLOR 29. The People Amid the Monuments. 3 Units.
From both chronological and thematic approaches, examine the efforts of English-speaking writers (and, latterly, film-makers) to get to grips with Italy and the Italians. Beginning in the England of Queen Elizabeth and ending at the present day, cover a variety of themes such as Italy's historical role as a haven for the LGBT community and the modern interest in neglected southern Italy. Illustrative multimedia content with visits to sites of relevance in Florence.

OSPFLOR 31F. Advanced Oral Communication: Italian. 3 Units.
Refine language skills and develop insight into Italian culture using authentic materials. Group work and individual meetings with instructor. Minimum enrollment required. Prerequisite: ITALLANG 22A, 23 or placement.

OSPFLOR 34. The Virgin Mother, Goddess of Beauty, Grand Duchess, and the Lady: Women in Florentine Art. 4 Units.
Influence and position of women in the history of Florence as revealed in its art. Sculptural, pictorial, and architectural sources from a social, historical, and art historical point of view. Themes: the virgin mother (middle ages); the goddess of beauty (Botticelli to mannerism); the grand duchess (late Renaissance, Baroque); the lady, the woman (19th-20th centuries).

OSPFLOR 41. The Florentine Sketchbook: A Visual Arts Practicum. 4 Units.
The ever-changing and multifaceted scene of contemporary art through visual and sensorial stimulation. How art is thought of and produced in Italy today. Hands-on experience. Sketching and exercises on-site at museums and exhibits, plus workshops on techniques. Limited enrollment.

OSPFLOR 42. Academic Internship. 1-5 Unit.
Mentored internships in fashion, education, engineering, the fine arts, health, media, not-for-profit organizations, and publishing (among others). May be repeated for credit.

OSPFLOR 45. Europe: The State of the Union. 2 Units.
Learn about, debate, and analyze the most pressing and critical issues that Italy and the EU are facing today. As former Prime Minister, and in current capacity as head of the Democratic Party, the instructor has been dealing with these issues firsthand for a number of years. On questions such as the current migrant/refugee crises, issues of citizenship and national identity, the Euro, and Brexit (just to name a few), the approach will be informed by political and economic theories and will be presented in an objective academic context; the instructor will also share not only his take on these questions but also his experiences in addressing them as an insider.

OSPFLOR 46. Images of Evil in Criminal Justice. 5 Units.
Iconographic component of criminal law; reasons and functions of the visual representation of criminal wrongdoing. Historical roots of "evil typecasting;" consideration of its variations with respect to common law and civil law systems. Fundamental features of the two legal systems. Sources, actors, enforcement mechanisms of the criminal law compared; study of cases in the area of murder, sex offences, organized crime and terrorism. Different techniques of image typecasting highlighted and discussed. International criminal law, which takes the burden to describe, typecast and punish forms of "enormous, disproportionate evil," such as genocide and other mass atrocities.

OSPFLOR 47. Faith, Science, and the Classical Tradition in Renaissance Florence. 4 Units.
The Renaissance was a pivotal period in the history of European thought when the Christian religious worldview was challenged by the recovery of classical secular philosophy. In particular, Stephen Greenblatt's Pulitzer-prize-winning The Swerve argues that the rediscovery of Lucretius' On the Nature of Things reoriented European intellectual history toward modern scientific materialism.Readings from Renaissance philosophers and site visits to see the magnificent works of Florentine art will suggest a more complex interaction between religious experiences and secular thought. This course will aim to develop students' capacity for historical criticism, to enhance students' knowledge and appreciation of the philosophy and art of Renaissance Florence, and to illustrate how contemporary social science can be used to deepen our understanding of historical change.

OSPFLOR 48. Sharing Beauty in Florence: Collectors, Collections and the Shaping of the Western Museum Tradition. 4 Units.
The city's art and theories of how art should be presented. The history and typology of world-class collections. Social, economic, political, and aesthetic issues in museum planning and management. Collections include the Medici, English and American collectors of the Victorian era, and modern corporate and public patrons.

OSPFLOR 49. On-Screen Battles: Filmic Portrayals of Fascism and World War II. 5 Units.
Structural and ideological attributes of narrative cinema, and theories of visual and cinematic representation. How film directors have translated history into stories, and war journals into visual images. Topics: the role of fascism in the development of Italian cinema and its phenomenology in film texts; cinema as a way of producing and reproducing constructions of history; film narratives as fictive metaphors of Italian cultural identity; film image, ideology, and politics of style.

OSPFLOR 50M. Introductory Science of Materials. 4 Units.
Topics include: the relationship between atomic structure and macroscopic properties of man-made and natural materials; mechanical and thermodynamic behavior of surgical implants including alloys, ceramics, and polymers; and materials selection for biotechnology applications such as contact lenses, artificial joints, and cardiovascular stents. No prerequisite.

OSPFLOR 51. Globalization and Social Divisions. 5 Units.
The course examines how social diversity and inequality are produced, understood, and enacted in the context of growing global integration. It will explore how existing social arrangements create and maintain social differences among people ¿ social class; race and ethnicity; age, gender and sexuality; citizenship and nationality ¿ and are influenced by cultural, economic and political processes that are increasingly spanning across borders. Analyzing the implications of global forces, relations, and institutions ¿ e.g. the media and cultural industry, tourism, religion, social movements and the human rights regime ¿ will help students understand why the social construction of diversity and inequality today should overcome the "methodological nationalism" that often characterizes the study of social divisions. nnInstructor: Paola Bonizzoni.

OSPFLOR 52B. Topics in Roman History. 1-3 Unit.
This independent study can focus on any facet of the social, cultural, economic, or political history of Rome. One suggestion, related to our autumn trip, would be Romans on the Bay of Naples including Pompeii and Herculaneum.

OSPFLOR 54. High Renaissance and Mannerism: the Great Italian Masters of the 15th and 16th Centuries. 4 Units.
The development of 15th- and early 16th-century art in Florence and Rome. Epochal changes in the art of Michelangelo and Raphael in the service of Pope Julius II. The impact of Roman High Renaissance art on masters such as Fra' Bartolomeo and Andrea del Sarto. The tragic circumstances surrounding the early *maniera:* Pontormo and Rosso Fiorentino and the transformation of early Mannerism into the elegant style of the Medicean court. Contemporary developments in Venice.

OSPFLOR 55. Academy of Fine Arts: Studio Art. 1-5 Unit.
Courses through the *Academia delle Belle Arti.* Details upon arrival. Minimum Autumn and Winter Quarter enrollment required; 1-3 units in Autumn. May be repeated for credit.

OSPFLOR 56. University of Florence Courses. 1-5 Unit.
May be repeated for credit.

OSPFLOR 58. Space as History: Social Vision and Urban Change. 4 Units.
A thousand years of intentional change in Florence. Phases include programmatic enlargement of ecclesiastical structures begun in the 11th century; aggressive expansion of religious and civic space in the 13th and 14th centuries; aggrandizement of private and public buildings in the 15th century; transformation of Florence into a princely capital from the 16th through the 18th centuries; traumatic remaking of the city¿s historic core in the 19th century; and development of new residential areas on the outskirts and in neighboring towns in the 20th and 21st centuries.

OSPFLOR 64. Colonial Heritage, Euro-Mediterranean Relations, Migrations, Multiculturalism. 5 Units.
Analysis of colonialism during the 19th century, with particular reference to French colonialism, followed by discussion of the influence of the colonial heritage on current African and Euro-Mediterranean relations. Consideration from the perspective of colonial law. In addition, discussion of three aspects of Euro-Mediterranean relations: 1) the period from the establishment of the European Economic Community (EEC) up until the beginning of the "Arab Spring"; 2) the new EU policies after the uprisings of the "Arab Spring", and 3) the new EU perspectives after the failure of the "Arab Spring" with the exception of Tunisia. Review of the European Neighbourhood Policy (ENP) in 2011 and in 2015 after the end of the "Arab Spring" revolts.

OSPFLOR 65. Exclusion/Inclusion Processes of Migrants in Italian Society. 5 Units.
Analysis of the processes of exclusion/inclusion of migrants into Italian society, in a country which has recently become a place of immigration from abroad. It is divided into five parts: 1. Migration theories. 2. Migration policies. 3. Labour market and social mobility. 4. Social representations of migrants. 5. Migration and criminality. Field trips to NGO's.

OSPFLOR 67. The Celluloid Gaze: Gender, Identity and Sexuality in Cinema. 4 Units.
Film in the social construction of gender through the representation of the feminine, the female, and women. Female subjects, gaze, and identity through a historical, technical, and narrative frame. Emphasis is on gender, identity, and sexuality with references to feminist film theory from the early 70s to current methodologies based on semiotics, psychoanalysis, and cultural studies. Advantages and limitations of methods for textual analysis and the theories which inform them.

OSPFLOR 69. Abstract Art: Creativity, Self-Expression and Depicting the Unimaginable. 4 Units.
Overview of the birth and evolution of abstract art with visual background necessary to produce works of art free of a realistic representation. Movements and trends in abstract art; experimentation with different media and techniques. Enrollment limited.

OSPFLOR 70. The Value of Life: Philosophical Foundations. 4 Units.
Analysis of the value of life from a philosophical point of view, presenting lay foundations of bioethics. Three main steps. 1) The notion of life, which can be seen from different angles and with diverse intentions; comparative analysis of plural interpretations of the notion of life, economic, scientific, religious, and the limits of the notion itself. 2) Ethics as a theory of value, the metaphysical background of life, and the structure of bioethics; a vision of life as a "critical choice", which implies respect for life and individual responsibility; some non-Western ideas on the value of life. 3) Practical issues such as the meaning of death, abortion and euthanasia.

OSPFLOR 71. A Studio with a View: Drawing, Painting and Informing your Aesthetic in Florence. 4 Units.
Recent trends in art, current Italian artistic production, differences and the dialogue among visual arts. Events, schools, and movements of the 20th century. Theoretical background and practical training in various media. Work at the Stanford Center and on site at museums, exhibits, and out in the city armed with a sketchbook and camera. Emphasis is on drawing as the key to the visual arts. Workshops to master the techniques introduced. Limited enrollment.

OSPFLOR 76. Sociology of Migrations. 5 Units.
Conceptual tools to understand the social phenomena of international migrations; discussion of the most relevant theoretical approaches in the field, e.g. assimilation, transnationalism, and migration regimes, among others.Crucial topics: discussion of the causes of migration and the distinction between different types of migrants, analysis of current migration policies and the related issues of borders, asylum, irregular migration and possible paths toward legalization. Also, reaction of receiving societies towards migration, with the related increasing problems of racism, discrimination and the rise of far-right parties. Analysis of North-American, North-Western European and Southern European cases with particular attention to the Italian case.

OSPFLOR 78. The Impossible Experiment: Politics and Policies of the New European Union. 5 Units.
Institutional design of EU, forthcoming changes, and comparison of the old and new designs. Interactions between the EU, member states, organized interests, and public opinion. Major policies of the EU that affect economics such as competition or cohesion policies, market deregulation, and single currency. Consequences of the expansion eastwards. The role of institutions as a set of constraints and opportunities for the economic actors; relationships between political developments and economic change in the context of regional integration; lessons for other parts of the world.

OSPFLOR 81. Communism. 5 Units.
History of communism since 1917 as a factor in the making of the global world. Focus of the course will be on the intersections of communism with the colonial and post-colonial world, by analysing strategies, influences, and connections between the Soviet Union, Europe, and the Third World.
Same as: s

OSPFLOR 84. Entrepreneurship and the Renaissance. 4 Units.
This course is intended for sophomores, juniors, and seniors of all majors. With an emphasis on the wisdom of ethical behavior,it is a rigorousintroduction toboth the entrepreneurial process andthe role of the individual and teams within high-growthventures. Case studies, lectures, workshops and projects cover ventures involving science and technology, withspeacial attentionon both the historical significance of the Renaissance and today's opportunity in Italy. No prerequisites are necessary. This course is based upon Engineering 145(http://e145.stanford.edu), which was first offered in 1999 and now given multipletimes each year at Stanford.

OSPFLOR 96. Leonardo!. 3 Units.
In this 500th anniversary year of the death of Leonardo this class will be an immersive and interactive experience with this most remarkable and complex artist and thinker. Focus on Leonardo's insights into human perception, tapping the very sounds and sights of the city that drove his fascination and inspired his work. Leonardo's conviction that the soul was the point of convergence of all the senses, prompted him to ponder how sensory information is received and processed. His writings foreshadow gestalt psychology and psychoacoustics centuries before these were studied by scientists. Leonardo's fascination with perception and emotion are manifest in his art and in his inventions. Together we will explore the city that inspired da Vinci's work, and delve into the deep implications of some of his insights and inventions as they effect contemporary art, science and life.

OSPFLOR 99. Independent Study in Medicine and Health. 1-2 Unit.
Students will develop an independent project, meeting weekly with the instructor. Potential topics could include: a) health care systems in Italy and the United States; b) topics in the history of science or medicine; c) aspects of the epidemiology, prevention, or treatment of heart disease; d) nutrition and health; and e) evaluation of medical technology.

OSPFLOR 111Y. From Giotto to Michelangelo: The Birth and Flowering of Renaissance Art in Florence. 4 Units.
Lectures, site visits, and readings reconstruct the circumstances that favored the flowering of architecture, sculpture, and painting in Florence and Italy, late 13th to early 16th century. Emphasis is on the classical roots; the particular relationship with nature; the commitment to human expressiveness; and rootedness in the real-world experience, translated in sculpture and painting as powerful plasticity, perspective space, and interest in movement and emotion.

OSPFLOR 115Y. Building the Cathedral and the Town Hall: Constructing and Deconstructing Symbols of a Civilization. 4 Units.
The history, history of art, and symbolism of the two principal monuments of Florence: the cathedral and the town hall. Common meaning and ideological differences between the religious and civic symbols of Florence's history from the time of Giotto and the first Guelf republic to Bronzino and Giovanni da Bologna and the Grand Duchy.

OSPFLOR 199A. Directed Reading A. 1-4 Unit.
Course may be repeated for credit.

OSPFLOR 199B. Directed Reading B. 1-4 Unit.
Course may be repeated for credit.

OSPFLOR 199C. Directed Reading C. 1-5 Unit.
.

Overseas Studies in Hong Kong Courses

OSPHONGK 21. China's Business Environment in Historical Perspective. 4 Units.
China's transition from a centrally planned company to a more market-oriented system has been a remarkable process of reform and opening up. Business in China has been accordingly transformed. This course discusses the evolution of business sector development in contemporary China during the recent decades. Using economic reforms as the overall framework, it combines institutional analyses with business histories and company-level case studies.

OSPHONGK 22. China's Financial Reforms - Problems and Perspectives. 4 Units.
This course examines the key aspects of China's institutional reform and political-economic development since the 1970s. It reviews the major policy controversies on China's system transition, based on leading research contributions from the academia, policy think tanks and international institutions. Students will gain a deeper understanding of why and how China has reformed; and to what extent China's experience may be generalized as a model for other developing countries.

OSPHONGK 23. China Under Mao. 4 Units.
Exploration of the history of Mao Zedong¿s years in power in the founding period of the People¿s Republic of China. Historical processes contributing to this era of turbulent elite politics, chaotic and often horrifically violent revolutionary political campaigns, and unprecedentedly vast state-directed restructuring of the economy, culture, and nearly all aspects of society and culture has been joined by an interest in the related human and natural costs, the lived experiences, and the diverse forms in which local societies at the grassroots so distant from party leaders adapted their own variations of life under Chinese socialism.

OSPHONGK 24. Urban China. 4 Units.
Socioeconomic, political, and cultural facets of urbanization with a regional focus on China. Critical observation and analysis of the process of urbanization and its lived experiences in the Chinese context. Comparative lessons from other regions for comparative understanding of the complex processes of urbanization across the globe. Critical investigation of urban issues ranging from land politics, urban planning, urban governance, to citizen rights, urban space, and urban culture. Overview of China's quest for modernity and its urban transformation since the late imperial era, followed by an interdisciplinary approach to examine China's unprecedented urban development in the post-reform era. Hands-on field trip in Hong Kong to take full advantage of Hong Kong as a global city.

OSPHONGK 25. Cultural History of China. 4 Units.
Multi-disciplinary approach to the study of Chinese cultural history conceived of as a succession of modes of rationality (philosophical, bureaucratic, and economic processes of rationalization). Focus on the moments of paradigm shift from one mode of rationality to another. For moment, examine cultural facts and artifacts¿thought, literature, ritual¿in relationship to changing social, political, and economic systems. This semester, focus on the emergence of modern China in the Song-Yuan (960-1368) and of today's China 1850 to the present. How the modern attack on religion, redefined as "superstition", led not only to religious reform movements but also to a society in which science and the nation became the primary value systems promoted by the state.

OSPHONGK 26. East Asian Film Genres in a Globalizing World. 4 Units.
Connections between different cinemas within East Asia and between East Asia and the rest of the world explored from a genre perspective. Hong Kong and Korean gangster movies, Chinese swordplay and Japanese samurai films, and horror films from Japan and Thailand as examples of the transnational circulation of genres, involving processes of both localization and globalization. Focus on three interrelated genres: the martial arts film, the Eastern Western and the film noir/crime film. Explore Hollywood-centered genre theory, trace complex webs of creative influences, and appreciate the sameness and difference that characterizes both genre films and our globalizing world. Make a short "genre film" for screening at the end of the term.

OSPHONGK 27. China and Regional Order. 4 Units.
This course looks at China's changing political, economic and security relationships in Asia through frameworks in the International Relations literature. It contextualizes China's external relationships across Asia-Pacific in the ongoing evolution and negotiation of Asian regional order and institutions in the aftermath of the Cold War, and argues that this context helps account for the objectives of and some apparent ambiguities and contradictions in Chinese foreign and security policy. Three parts: context and background; empirical view of developments involving China's international relationships in Asia; theoretical frameworks to evaluate China's relations with regional order.

OSPHONGK 28. An Introduction to the Development of Science and Technology in China. 4 Units.
Science and technology in China from antiquity to the present is surveyed through the study of selected topics in some depth. Particular emphasis is given to science and technology as a window to appreciate certain aspects of Chinese culture and history. Two important questions are explored through contrasting China with the West: the conditions for the development of modern science and the central role of science and technology in modernization.

OSPHONGK 29. The Rise of China in the Global Context I: Diplomacy, Trade, and Soft Power. 4 Units.
The "Rise of China" from the perspective of Global Governance, shedding light on its diplomatic, trade and cultural relations with others in the Global Community. Critical analysis of the transformation of Chinese foreign policies since the establishment of the People's Republic of China and the momentum behind this change of practices. Topics include: history and evolution of Chinese foreign policies; analytical framework of policy-making process in China, particularly in handling foreign and security affairs; foreign relations with both the developed and developing nations; booming economy and integration with the global economy; assessment of the rhetoric of "Peaceful Rise" and "Charm Offensive" with reference to the Confucius Institute.

OSPHONGK 30. Investigating Hong Kong Through Multidisciplinary Lens. 2 Units.
ntroduction to Hong Kong society with a particular focus on the social and cultural dynamics of contemporary Hong Kong. Some of the central questions include: What is so unique about Hong Kong? How do a Hong Kong in the past and some of the special features of the Hong Kong society contribute to a transforming China? Topics may include: (1) historical trajectory of Hong Kong; (2) identity formation: from migrants to local Hong Kong; (3) the making of Hong Kong: urban development as a case; (4) the paradise of capitalism and the Hong Kong miracle; (5) governance and politics; (6) foodways and heritage; (7) religion and folk beliefs; (8) the great transformation: Guangdong-Hong Kong-Macao Greater Bay Area initiatives.

OSPHONGK 32. Fintech and Entrepreneurship in China. 4 Units.
Introduction to the concepts essential to the entrepreneurial process and a look at the role of the individual and teams within high-impact ventures, intended for sophomores, juniors, and seniors of all majors. Case studies, lectures, workshops and mentor-guided team projects cover high-growth ventures involving technology, with special emphasis on the significance of entrepreneurship, blockchain/AI/ML related to financial innovation and opportunities in Hong Kong and China more broadly. Explore both financial innovation for high net worth as well as "bottom of the pyramid" individuals and ethical issues in startups. No prerequisites.

OSPHONGK 33. Comparative Analysis of Entrepreneurship and Innovation: Fintech in Hong Kong and Silicon Valley. 1-2 Unit.
Independent research and analysis of the historical, current, and future potential for high-growth entrepreneurship in Hong Kong, China and its surrounding region. How entrepreneurship in China compares to Silicon Valley and other similar innovation clusters today around the globe. Special emphasis on financial innovations such as bitcoin, blockchain, AI/ML applications in finance and insurance. Role of context with respect to entrepreneurship and innovation through direct contact with entrepreneurs, interviewing potential customers, professional investors, innovation education centers, policy makers, government officials, and any NGOs involved with entrepreneurship.

OSPHONGK 41. Introduction to Creative and New Media. 4 Units.
Introduction to the creative aspects of the mass media, media art, new media and popular culture. Enhance students' creative, aesthetic as well as intellectual ability to evaluate different media art forms and expression. Topics include art theory, aesthetics, theories on creativity, technical and commercial aspects of various forms of production and popular culture.

OSPHONGK 42. Gender and Sexuality in Contemporary Society. 4 Units.
Examination of gender and sexuality from a contemporary and regional perspective. Based on a cross-cultural perspective, read and analyze different meanings of gender and sexuality, and how these meanings are constructed. How gender relations and sexual politics are related with historical backgrounds, cultural heritage, market expansion, ideological shifts, and capitalist dynamics in a context of modernization campaigns and globalization processes. The topics of gender and sexuality interwoven with that of migration, work, family, popular culture, mass media, and consumerism.

OSPHONGK 43. Mainstream Chinese Philosophical Thought. 4 Units.
Introduction to the philosophical thought of Confucianism, Taoism, and Buddhism, to provide a deeper understanding of the roots of Chinese values and culture. As a cornerstone of Chinese culture, Confucianism contributes to the establishment of the human moral way by articulating a conception of humans as moral subjects. Taoism stresses the pursuit of an ideal life by understanding the changes of the universe, while Buddhism applies the concept of karma to show how the ultimate cause of human suffering lies in ignorance. Other Chinese philosophical thought such as Mohism, Legalism, and the School of Yin and Yang may be covered.

OSPHONGK 44. Medical Sociology. 4 Units.
From a sociological perspective, dissect issues such as conflicts between patients and doctors; safety of medical treatments and reliability of medical knowledge; inequality in health and longevity; and ever-increasing health care spending. Questions such as: What counts as illness? How do people understand illness? How does illness affect people's life? Who gets ill and why? What is the role of medical technology in fostering health? Why do doctors and patients have trouble communicating? How should health care systems be organized? Also examine some of these issues in the contexts of Chinese societies, such as China and Hong Kong with comparative perspectives.

OSPHONGK 45. Chinese Culture and Society. 4 Units.
An anthropological approach to China. Discussions concentrate on major cultural and social institutions of China, both traditional and contemporary, such as family, marriage, kinship, lineage and clan, economic system, religion and value orientation.

OSPHONGK 51. Beginner Putonghua/Mandarin Level 1. 8 Units.
Use of basic vocabulary and grammar; vocabulary introduced based on everyday conversations and daily usage. Focus on appropriateness in application and on fluency in communication through various kinds of speaking practice. Real life settings introduced such as shopping, introducing family members, asking directions, etc. Not equivalent to home campus courses. Also enroll in CUHK course # CLCP100G. Enrollment limited.

OSPHONGK 52. Beginning Putonghua/Mandarin Level 1 Upper. 8 Units.
Basic vocabulary and grammar through language tasks/activities and contextualized exercises. Real life settings such as shopping, introducing family members, asking directions, etc. In addition, build up abilities in presenting basic ideas in real life communication settings. Tasks like picture description, speaking topics and simple presentation adopted for training in presentation with various everyday settings. Not equivalent to home campus courses. Also enroll in CUHK course # CLCP101G. Enrollment limited.

OSPHONGK 53. Immediate Putonghua/Mandarin Level 2. 8 Units.
Intermediate course designed to familiarize students with the use of more vocabulary and grammar points. Vocabulary introduced based on everyday conversations and daily usage. Focus on appropriateness in application. Newly acquired vocabulary and grammar points developed through language tasks/activities and contextualized exercises in real life settings. Not equivalent to home campus courses. Also enroll in CUHK course # CLCP200G. Enrollment limited.

OSPHONGK 54A. Intermediate Putonghua/Mandarin Level 2 Upper: Communication in Context II. 4 Units.
An intermediate course designed to familiarize students with newly acquired vocabulary and grammar points through language tasks/activities and contextualized exercises in real life settings. Not equivalent to home campus courses. Also enroll in CUHK course# CLCP2233.

OSPHONGK 54B. Intermediate Putonghua/Mandarin Level 2 Upper: Basic Presentation Skills & Daily Situations II. 4 Units.
An intermediate course designed to help students improve their proficiency to communicate in authentic situations by integrating the newly acquired vocabulary items and grammar structures. Not equivalent to home campus courses. Also enroll in CUHK course# CLCP2253.

OSPHONGK 55A. Intermediate Putonghua/Mandarin Level 3: Application of Vocabulary and Grammar III. 4 Units.
An upper intermediate course designed to familiarize students with the use of newly acquired vocabulary and grammar points. Focus will be on appropriateness in application. Topics include various aspects on Chinese language and culture. Not equivalent to home campus courses. Also enroll in CUHK course# CLCP3313.

OSPHONGK 55B. Intermediate Putonghua/Mandarin Level 3: Oral Skills Practice III. 4 Units.
An upper intermediate course focused on students' fluency in speaking practice with newly acquired vocabulary and grammar points. Topics include various aspects on Chinese language and culture. Not equivalent to home campus courses. Also enroll in CUHK course# CLCP3323.

OSPHONGK 55C. Intermediate Putonghua/Mandarin Level 3: Communication in Context III. 4 Units.
An upper intermediate course designed to familiarize students with the use of newly acquired vocabulary and grammar points. Focus will be on appropriateness in application. Topics include various aspects on Chinese language and culture. Not equivalent to home campus courses. Also enroll in CUHK course # CLCP3333.

OSPHONGK 55D. Intermediate Putonghua/Mandarin Level 3: Basic Presentation Skills & Daily Situations III. 4 Units.
A higher intermediate course designed to help students further improve their proficiency to communicate in a variety of authentic situations by integrating the newly acquired vocabulary items and grammar structures. Not equivalent to home campus courses. Also enroll in CUHK course# CLCP3353.

Overseas Studies in Istanbul Courses

Overseas Studies in Kyoto (KCJS) Courses

OSPKYOCT 103A. Third-Year Japanese I. 12 Units.
Preparation for function beyond basic level in a Japanese-speaking environment by developing and enhancing communicative competence through: review of basic grammar; new grammar; reading short essays and articles with help of dictionary; short writing and speaking assignments using formal style to describe, explain, and discuss sociocultural topics; enhancing listening comprehension.

OSPKYOCT 103B. Third-Year Japanese II. 12 Units.
Preparation for function beyond basic level in a Japanese-speaking environment by developing and enhancing communicative competence through: review of basic grammar; new grammar; reading short essays and articles with help of dictionary; short writing and speaking assignments using formal style to describe, explain, and discuss sociocultural topics; enhancing listening comprehension.

OSPKYOCT 104A. Fourth-Year Japanese I. 12 Units.
Emphasis on applications of correct grammar and strengthening academic communication skills through: reading longer essays, articles, and novels with some dictionary work; reading and writing assignments in paragraph format using formal style to describe, explain and discuss sociocultural topics; developing listening comprehension.

OSPKYOCT 104B. Fourth-Year Japanese II. 12 Units.
Emphasis on applications of correct grammar and strengthening academic communication skills through: reading longer essays, articles, and novels with some dictionary work; reading and writing assignments in paragraph format using formal style to describe, explain and discuss sociocultural topics; developing listening comprehension.

OSPKYOCT 105A. Fifth-Year Japanese I. 12 Units.
For students with advanced proficiency. Goals include advanced command of grammar, composition, and stylistics. Emphasis is on academic Japanese preparing students to audit classes at a Japanese university.

OSPKYOCT 105B. Fifth-Year Japanese II. 12 Units.
For students with advanced proficiency. Goals include advanced command of grammar, composition, and stylistics. Emphasis is on academic Japanese preparing students to audit classes at a Japanese university.

OSPKYOCT 112. Ritual practices and daily rituals: an introduction to the anthropology of Japan. 6 Units.
The role of ritual practices in a country that has more than one festival on any given day ofnthe year cannot be denied. It is a highly significant one that has pervaded the everyday life,nwhere many gestures have acquired a ritual meaning, be it social or sacred. The presentncourse aims to offer an overview of contemporary Japanese society with a focus onnsacred rituals (related to religious practices) and profane rituals, those daily practices thatnhave gained ritual characteristics: cyclic repetition in a pre-determined space, with predetermined participants, roles, and activities.

OSPKYOCT 114. The Eight Million Divinities of Kyoto: Introduction to Japanese Religions. 6 Units.
Are there really "eight million divinities of Kyoto?" What is the difference between antemple and a shrine? What is a matsuri? Do Japanese people really believe in kaminand Buddhas? How many religions are there in Japan? How much money is there innJapanese religions? What do members of Japanese new religions believe? DonJapanese religions share features in common with other traditions you may know?nIf you take this class, we will explore the answers to these questions together in thenmost fun way possible¿by stepping out into one of the most beautiful cities onnearth to find the answers.

OSPKYOCT 127K. Gender in Japanese Culture. 6 Units.
his course introduces students to the workings of gender roles and images in Japanese culture and society from ancient times to the present day. We will begin with a general introduction to key terms: the notions of gender and the body, gender relations, power, performance, cultural re/presentation, sexuality and eroticism. Then we will address various gender issues in Japan from a historical and cultural perspective, focusing on the complexity of gender images and functions in Japanese history, exploring in particular the role of women in the cultural processes. We will also make references to similar gender topics in Western and other Asian societies.

OSPKYOCT 142. Japan in East Asia. 6 Units.
Japan in East Asia.

OSPKYOCT 156. Kyoto and the Meiji Restoration. 6 Units.
Kyoto¿s seminal role between 1850 and 1868 in triggering the Restoration, and the Restoration¿s seminal role in reinventing Kyoto as both a modern city and the cradle of Japan¿s traditional culture. The city¿s transformation from staging ground for the Restoration, to early victim of the new government¿s drive to modernize (which included relocating the imperial court from Kyoto to Tokyo), to its eventual rejuvenation as Japan¿s iconic bridge between past and present, traditional and modern. How the ¿legacy of Meiji¿ has been commemorated, debated and represented over the past 150 years.

OSPKYOCT 179. Kyoto Artisans and their Worlds. 6 Units.
Focus on materials¿bamboo, wood, clay, cloth, metal and paper¿and the processes by which they turn into objects of beauty¿splitting, smoothing, shaping, dyeing, casting, carving and printing. Study blinds and archery bows, architectural and interior accents, tea bowls and vases, kimono and obi, screens, scrolls, even artisanal foodstuffs. Classes are focused around weekly fieldtrips backed by brief lectures and readings providing historical, cultural, and technical background for each topic.

OSPKYOCT 199. The Public Space Potential of Kyoto's Urban Cemeteries. 6 Units.
With a decreasing birth rate and an aging population, increasingly dense urban areas in Japan are searching for new burial methods and spaces. Potential alternatives include vertical cemeteries, scattering ashes, decomposition, and more. If these solutions are implemented, cemeteries could be reconstructed into better public spaces.

Overseas Studies in Kyoto Courses

OSPKYOTO 2K. First-Year Japanese Language, Culture, and Communication, Second Quarter. 5 Units.
Continuation of JAPANLNG 1. First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. Prerequisite: JAPANLNG 1 if taken 2012-13 of later (JAPANLNG 7 if taken 2011-12 or earlier).

OSPKYOTO 3K. First-Year Japanese Language, Culture, and Communication, Third Quarter. 5 Units.
(Formerly OSPKYOTO 9K). Continuation of 2K. First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. Fulfills University Foreign Language Requirement. Prerequisite: JAPANLNG 2 or OSPKYOTO 2K if taken 2012-13 or later (JAPANLNG 8 if taken 2011-13 or earlier).

OSPKYOTO 5B. News Shaping Japan Today. 1 Unit.
Examine a wide range of topical themes affecting Japan and its society through selected stories from news media as these stories emerge. As such, this course is entirely reactive to national events as they unfold. Students have a significant amount of choice of topics they address, as they are able to select stories that interest them from a list of news articles, which changes each week.

OSPKYOTO 13. Contemporary Religion in Japan's Ancient Capital: Sustaining and Recasting Tradition. 3-4 Units.
Japanese attitudes to religion and popular forms of religiosity. Syncretic nature of beliefs and practices drawn on a variety of interwoven concepts, beliefs, customs and religious activities of native Japanese, Korean, Chinese, and Indian origins as background. Topics include: pursuit of worldly benefits, religion and healing, fortune-telling, ascetic practices, pilgrimage, festivals (matsuri), new religions and their image, impact of the internet, response of religion in times of crisis.

OSPKYOTO 19. Zazen: A Practicum in Zen Meditation. 1 Unit.
Zen teaching through practice and experience. Condensed practicum course where students receive zazen training and experience monastic life in Myoshinji, the largest Zen complex in Japan, under the guidance of Rev. Daiko Matsuyama, Deputy Head Priest of Taizo-in temple. Over one week, regular early morning zazen training sessions on site in Taizo-in temple plus visit to World Cultural Heritage site Ryoanji with a private viewing and workshop. Other aspects of monastic life such as temple cleaning, and learning how to rake and care for the dry gardens at Taizo-in. Course culminates in an overnight zazen training session in Myoshinji's magnificent Hatto Dharma Hall. Enrollment limited.

OSPKYOTO 21K. Second-Year Japanese Language, Culture, and Communication, First Quarter. 5 Units.
(Formerly OSPKYOTO 17K.) Goal is to further develop and enhance spoken and written Japanese in order to handle advanced concepts such as comparison and contrast of the two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include authentic materials such as newspaper articles, and essays. Prerequisite: JAPANLNG 3 if taken 2012-13 or later (JAPANLNG 7 if taken 2011-12 or earlier).

OSPKYOTO 23K. Second-Year Japanese Language, Culture, and Communication, Third Quarter. 5 Units.
Formerly OSPKYOTO 19K). Goal is to further develop and enhance spoken and written Japanese in order to handle advanced concepts such as comparison and contrast of the two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include authentic materials such as newspaper articles, and essays. Prerequisite: JAPANLNG 22 or OSPKYOTO 22K if taken 2012-13 or later (JAPANLNG 18 if taken 2011-12 or earlier).

OSPKYOTO 33. Ecology of Japanese Satoyama. 3-4 Units.
Satoyama refers to the traditional rural landscapes of Japan, and it is a term that has become widely known internationally in the ecological sustainability literature, highlighting the value of traditional land use for the sustainable management of natural resources. I would introduce to the students, and have them discuss, the scientific basis of biodiversity and ecosystem services, the cultural influence on agriculturall and use,and how the scientific and cultural factors interact to affect the way natural resources are managed.The course would emphasize student-led discussion based on reading of primary and popular literature on the history, current status, societal perception of the value of satoyama for biodiversity and human well-beingin Japan. Student discussion will also compare the satoyama concept to similar ones developed in othercountriesin Asia, Europe, and North America.

OSPKYOTO 39. Capturing Concepts: A Photographic Exploration of the Origins of Kanji. 2 Units.
Under guidance of official photographer for KYOTOGRAPHIE International Photography Festival, photograph scenes from everyday life in Kyoto to portray contemporary versions of the ancient forms and original meanings of ten different kanji. Develop observational, interpretive and creative abilities as well as improve technical skills (including picture composition and image editing). Enrollment limited.

OSPKYOTO 41. Queer Culture and Life in Japan. 4 Units.
Exploration of queer lives and cultural practices in Japan through diverse materials from film, literature, theater, art, as well as newspapers and personal testimonies. What it means to be queer in Japan and how it might signify differently from a US context. Looking at each text, examine how gender norms and sexual politics intersect and operate in Japanese society.

OSPKYOTO 42. Gardens of Kyoto: Spaces of Aesthetic and Spiritual Contemplation. 3 Units.
Chronological stroll through Japanese gardens of different types and functions, spanning from the Heian period (794¿1185), when the ancient capital of Kyoto was established, through to contemporary times. Weekly field trips to a selection of Kyoto gardens and garden-related activities, in order to gain an understanding of the historical development and functions of Japanese gardens, including their design principles, techniques, and elements.

OSPKYOTO 53. Topics in Race, Ethnicity, and Diversity. 1-3 Unit.
Through group discussions, films, field trips and independent study, students will explore the experiences of Japanese minorities: from the indigenous Ainu and Okinawans, and the outcaste Burakumin, to the seemingly "forever foreign" Zainichi Koreans and returning Japanese-Brazilians, whose conditional welcome on both sides of the Pacific raises important questions about distinctions between race and culture. Japanese ideologies about racial/ethnic difference can be compared and contrasted with historical and contemporary examples from Europe and other parts of Asia, as well as to debates about assimilation and the melting pot in the U.S. Semi-weekly meetings. Requirements vary by number of units.

OSPKYOTO 55. Exploring Japan's Media Landscape. 3-4 Units.
This course will examine Japanese media through the lenses of economics, politics, and media studies. A key goal: understand the forces that shape the creation of content across different demands that individuals in Japan have for information as consumers, producers, entertainment seekers, and voters. Broad themes include the ways that markets transform information into news, the operation of the marketplace of ideas, the economics of digital entertainment markets, and the operation of social networks. Distinctive features of Japanese media include anime, manga, national newspapers, and the NHK public broadcasting system. Media coverage of preparations for the 2020 Olympics in Tokyo will be a key focal point for discussion. (Note: no previous study of economics, politics, or media studies required).

OSPKYOTO 56. Independent Study Topics on Japanese Media. 1-3 Unit.
Independent research on topics relating to economic, political, and cultural forces driving the creation of Japanese media content. Students will conduct research on media topics and meet weekly with the instructor.

OSPKYOTO 58. A Journey into the Buddhist Visual Arts of Japan. 4 Units.
Impact of Buddhism on the arts and culture of Japan as seen in the ancient capital of Kyoto. Image production, iconography, representational strategies, as well as the ritual and visual functions of Buddhist sculpture and painting with a focus on selected historical temples and their icons. Also examination of architectural and landscape elements of temple layouts, within which iconographic programs are framed, images are enlivened, and practices centered on these devotional and ritual art.

OSPKYOTO 65. From the Cradle to the Grave: Wrestling with Demographic Destiny in Japan. 4 Units.
In this course, students will not only learn to see Japan in demographic perspective during their stay, they also will be able translate their skills and understanding of demographic data, concepts and processes back to their lives in the United States -- where similar changes (e.g., toward an aging society) and debates (e.g., about immigration restriction) are occurring.

OSPKYOTO 69. Feeling in Japan: Culture, Emotion, and Brain. 3 Units.
How does culture shape our feelings? This course will examine emotions from a cross cultural perspective and has three course objectives: (1) to increase students' awareness of how cultural ideas and practices shape their emotions by comparing their experiences in Kyoto with those in the U.S., (2) to teach students to apply a scientific understanding of culture and emotion to their experiences in Kyoto, and (3) to teach students how to formulate and test hypotheses about emotions in Japan vs. U.S. The proposed course will be comprised of three sections. The first section will focus on dominant theories of culture and emotions and the ways in which they are scientifically measured using a variety of self-report, behavioral, and physiological/neural measures. The second section will cover three patterns that emerge from the scientific literature regarding U.S.-East Asian differences in the focus of emotion, views of emotional expression, and values regarding emotional experience. Because much of the literature on culture and emotion focuses on U.S. and Japanese comparisons, the empirical findings will be directly applicable to the students studying at Kyoto. The third section will focus on the role of culture and emotion in applied settings (work, educational, and clinical) in the US and Japan. Students' structured and unstructured experiences and observations living in Kyoto will be the basis of our class discussions and will be linked to course material. For instance, students may be asked to analyze the themes and narratives of popular Japanese anime, art, and architecture based on methods introduced in class. As a comparison, students will identify products and practices in the U.S. that illustrate similarities and differences between the two cultures. Students will write short papers each week linking their experiences to the assigned material. At the end of the quarter, students will make short presentations about another aspect of emotion they hypothesize varies in the U.S. and Japan, based on their own experiences in Kyoto, and discuss how they might design a study to test their hypotheses. Readings will include sections from popular books and accessible academic chapters and empirical articles.

OSPKYOTO 101K. Third-Year Japanese Language, Culture, and Communication, First Quarter. 5 Units.
Goal is to express thoughts and opinions in paragraph length in spoken and written forms. Materials include current Japanese media and literature for native speakers of Japanese. Cultural and social topics related to Japan and its people. Prerequisite: Placement Tests, JAPANLNG 23. See http://japanese.stanford.edu/?page_id=39.

OSPKYOTO 103K. Third-Year Japanese Language, Culture, and Communication, Third Quarter. 5 Units.
(Formerly OSPKYOTO 119K). Continuation of 118K. Goal is to express thoughts and opinions in paragraph length in spoken and written forms. Materials include current Japanese media and literature for native speakers of Japanese. Cultural and social topics related to Japan and its people. Prerequisite: JAPANLNG 102 or OSPKYOTO 102K if taken 2012-13 or later (JAPANLNG 118 if taken 2011-12 or earlier).

OSPKYOTO 199. Directed Reading. 1-4 Unit.
Course may be repeated for credit.

OSPKYOTO 210K. Advanced Japanese. 5 Units.
.

OSPKYOTO 221K. Artificial Intelligence: Principles and Techniques. 3-4 Units.
Artificial intelligence (AI) has had a huge impact in many areas, including medical diagnosis, speech recognition, robotics, web search, advertising, and scheduling. This course focuses on the foundational concepts that drive these applications. In short, AI is the mathematics of making good decisions given incomplete information (hence the need for probability) and limited computation (hence the need for algorithms). Specific topics include search, constraint satisfaction, game playing, Markov decision processes, graphical models, machine learning, and logic. Same as CS 221. Prerequisites: CS 103 or CS 103B/X, CS 106B or CS 106X, CS 107, and CS 109 (algorithms, probability, and programming experience).

Overseas Studies in Madrid Courses

OSPMADRD 8A. Cities and Creativity: Cultural and Architectural Interpretations of Madrid. 4 Units.
Architecture and the city, with a focus on recent currents in the progress of both, such as sustainability, environmentalism and the relationship with nature. Topics underpinned by discussion of theory, and illustrated by a study of the city of Madrid: an example of a hybrid architectural/planning experiential environment that looks to the future with an ambition for modernization.

OSPMADRD 8B. Debating Design: Spanish and International Fashion. 2 Units.
Culture and society in Spain as viewed through the lens of the fashion industry. Social changes, trends, and the evolution of life styles. Industrial, commercial and media involvement in the internationalization of the industry.

OSPMADRD 8C. Appreciating Spanish Music. 2 Units.
Unique aspects of Spanish art music. Participation in concert outings and field trips for live performances of studied repertoire. No previous knowledge of music required.

OSPMADRD 11. Directed Reading on Spanish Language. 1-5 Unit.
Expand knowledge of Spanish language by doing research on a specific linguistic topic from any perspective (e.g. grammar, phonology, history, sociolinguistics, dialectology, etc.). A Directed Reading Proposal must be submitted to the Overseas Studies Office and to the Program Director at least two months prior to the quarter of intended study. A directed reading may be taken only in addition to twelve units of regular coursework offered directly by the Center. May be repeated for credit. Prerequisite: SPANLANG 102 or equivalent placement. Approval of instructor.

OSPMADRD 12M. Accelerated Second-Year Spanish I. 5 Units.
Intensive sequence integrating language, culture, and geo/sociopolitics of Spain. Emphasis is on achieving advanced proficiency in oral and written discourse, including formal and informal situations, presentational language, and appropriate forms in academic and professional contexts. Prerequisite: one year of college Spanish or 11 or 21B more than two quarters (six months) prior to arriving in Madrid, or equivalent placement.

OSPMADRD 13M. Accelerated Second-Year Spanish II. 5 Units.
Intensive sequence integrating language, culture, and geo/sociopolitics of Spain. Emphasis is on achieving advanced proficiency in oral and written discourse, including formal and informal situations, presentational language, and appropriate forms in academic and professional contexts. Prerequisite: 11 or 21B within two quarters (six months) of arriving in Madrid or 12 or 22B, or equivalent placement.

OSPMADRD 14. Introduction to Spanish Culture. 2 Units.
Required for all Madrid students. Lectures and activities covering a wide selection of culturally and academically significant topics to understand Spain, as well as its international context. Requirements include orientation, study trip, and language pledge compliance.

OSPMADRD 15. Flamenco Dance. 1 Unit.
Practical instruction. The rhythms and styles of flamenco and the expression of feelings proper to this art form which synthesizes song, music, and dance. *Zapateado* (footwork), *braceo* (arm positions and movement technique), and choreographies, including Rumba flamenca and Sevillanas. Enrollment limited. May be repeated for credit.

OSPMADRD 17. Directed Reading on Catalan, Galizian, or Basque Languages. 1-5 Unit.
For students interested in studying one of the languages spoken in Spain other than Spanish. A Directed Reading Proposal must be submitted to the Overseas Studies Office and to the Program Director at least two months prior to the quarter of intended study. This directed reading may be taken only in addition to twelve units of regular coursework offered directly by the Center.

OSPMADRD 18. Exploring Music and Society: Understanding Flamenco. 3 Units.
Origins and history of flamenco and its place in Spanish culture, including both theory and actual dance instruction.

OSPMADRD 19. Language and Thought. 3 Units.
Languages describe the world in different ways. In some languages, you have to say when an event happened (past, present, future, etc.), while in others it is obligatory to say how you know about the event (you saw it, you heard about it), or the gender of its participants. In some languages there is one word that covers blue-and-green, while in others there are many. Do these differences in the language you speak influence the way that you perceive, understand, and think? We will survey recent work on how languages affect thought, with a special emphasis on contrasts between Spanish and English. Assignments include reading original sources, essays synthesizing science with personal reflections, and (attempts at) replication of key experiments with friends and acquaintances.

OSPMADRD 20. Independent Study in Machine Translation. 2-4 Units.
Students will explore modern deep-learning methods for machine translation. They will read, and re-implement, methods such as seq2seq, attention-windows, and weakly-supervised translation. The goal will be to build an English-Spanish translator from scratch, inspired by his or her own experience of key translation difficulties. (Programing background equivalent to a CS sophomore is required.).

OSPMADRD 24. CONNECT BETTER ACROSS CULTURES. 3 Units.
At one level, modern society is more connected than ever. At another, it places new barriers¿such as anonymity, otherness, and competition¿in the way of human connection. In this class, we will focus especially on when, how, and why people from different nations and backgrounds find it difficult to empathize with, understand, or care for each other¿and tour cutting edge research on breaking down these intercultural barriers. We will also challenge ourselves, through experiential exercises, to break down cultural barriers in our own lives.

OSPMADRD 27. Canarian Night Skies. 4 Units.
Exploration of night skies in Spain's Canary Islands as well as those seen from California. Science for non-majors. Constellations, Solar System, Galactic and Extragalactic objects. Unique characteristics of the Canary Islands as astronomical reserve studied prior to field trip to the Canary Islands. Comparison of naked-eye Canarian and Californian night skies. Study and exploration of relevant astronomical instrumentation as well as representative celestial objects. Astrophotography-related activities. Enrollment limited.

OSPMADRD 39. New Political Dynamics in Contemporary Spain. 4 Units.
Current Spanish politics, historical background followed by focus on contemporary political events, actors and institutions. Special attention to the most dynamic aspects such as the appearance of new parties and the adjustments of the old ones; the demands of social movements, with a special emphasis on feminism; current debates about how to deal with the past (historical memory policies); or the evolution of the territorial conflict, with a special focus on Catalonia. Experiential approach with opportunities to engage in dialogue on the different issues, both with Spanish citizens and with political actors.

OSPMADRD 43. The Jacobean Star Way and Europe: Society, Politics and Culture. 5 Units.
The Saint James' Way as a tool to understand historic dynamics from a global perspective. Its effect on the structures that form a political and institutional system, and its society, economy, and ideology. Enrollment limited; instructor approval required.

OSPMADRD 45. Women in Art: Case Study in the Madrid Museums. 4 Units.
Viewing the collections at the Prado Museum through study and analysis of the representations of women. Contemporary literary texts and images that situate paintings in the historical, social, and political conditions that produced the works.

OSPMADRD 46. Drawing with Four Spanish Masters: Goya, Velazquez, Picasso and Dali. 4 Units.
Approaches, techniques, and processes in drawing. Visits to Madrid museums to study paintings and drawings by Goya, Velázquez, Picasso, and Dalí and to explore the experience of drawing. Subject matter: the figure, still life, interiors, landscape, and non-representational drawing. No previous experience required. Enrollment limited.

OSPMADRD 47. Cultural Relations between Spain and the United States:Historical Perceptions and Influences, 1776-2. 4 Units.
Critical historical thinking about international cultural relations, using Spain and U.S. as case studies examples, with references to Atlantic world contexts, from 1776 to the present. Insights into the continuing social and political relevance of their contested legacies. interpretive perspectives grounded in different ideologies, interests and collective identities within both societies. Introduction to pertinent social scientific theory regarding identity formation, self-image, and perceptions of and interactions with ethnic and cultural otherness. Differences between history, historiography and memory through consideration of diverse forms of expression and vehicles of transmission of collective memory.

OSPMADRD 48. Migration and Multiculturality in Spain. 4 Units.
Dimensions of recent migratory phenomena in Spain. Changes in past decades from a country of emigration to one of immigration, and vice versa. North Africa, Latin America, and Eastern Europe on the one side and the rest of Europe on the other. Social concern and public debate resulting from these changes.

OSPMADRD 54. Contemporary Spanish Economy and the European Union. 4 Units.
Concepts and methods for analysis of a country's economy with focus on Spain and the EU. Spain's growth and structural change; evolution of Spain's production sectors, agriculture, industry, and services; institutional factors such as the labor market and public sector; Spain's economic international relations, in particular, development of the EU, institutional framework, economic and monetary union, policies related to the European economic integration process, and U.S.-EU relationship.

OSPMADRD 55. Latin Americans in Spain: Cultural Identities, Social Practices, and Migratory Experience. 4 Units.
Shift in recent decades from Spain being a country of emigration to one attractive for immigration, especially for people coming from Latin America. Transnational processes of interculturality, integration and assimilation as illustrated by the different ways that immigrant Spaniards relate to Spanish society in Spain.

OSPMADRD 57. Health Care: A Contrastive Analysis between Spain and the U.S.. 4 Units.
History of health care and evolution of the concept of universal health care based on need not wealth. Contrast with system in U.S. Is there a right to health care and if so, what does it encompass? The Spanish health care system; its major successes and shortcomings. Issues and challenges from an interdisciplinary perspective combining scientific facts with moral, political, and legal philosophy.

OSPMADRD 60. Integration into Spanish Society: Service Learning and Professional Opportunities. 4 Units.
Engagement with the real world of Madrid through public service work with NGOs and public service professions such as teaching. Depending on availability, topics relevant to present-day Spain may include: the national health plan, educational system, immigration, prostitution, refugees, youth, and fair trade. Fieldwork, lectures, and research paper. Limited enrollment. May be repeated for credit. Prerequisite: completion of SPANLANG 11 or 21B or placement.

OSPMADRD 61. Society and Cultural Change: The Case of Spain. 4 Units.
Complexity of socio-cultural change in Spain during the last three decades. Topics include: cultural diversity in Iberian world; social structure; family in Mediterranean cultures; ages and generations; political parties and ideologies; communication and consumption; religion; and leisure activities.

OSPMADRD 63. environment, health, public finance,. 2-4 Units.
environment, health, public finance,.

OSPMADRD 72. Issues in Bioethics Across Cultures. 4 Units.
Ethical dilemmas concerning the autonomy and dignity of human beings and other living creatures; principles of justice that rule different realms of private and public life. Interdisciplinary approach to assessing these challenges, combining scientific facts, health care issues, and moral philosophy. Sources include landmark bioethics papers. Prerequisite: completion of SPANLANG 11, 21B or placement, or instructor approval.

OSPMADRD 74. Islam in Spain and Europe: 1300 Years of Contact. 4 Units.
Primary problems and conflicts in the contemporary Islamic world and it relations with the West, as well as the relationship between Spain and Islam throughout history. Special attention to the history of al-Andalus, an Islamic state in the Iberian Peninsula during the Middle Ages, evaluating the importance of its legacy in Europe and in contemporary Spain. Spain¿s leading role in relations between Europe and the Mediterranean Islamic states from the Modern Era to the present day.

OSPMADRD 75. Sefarad: The Jewish Community in Spain. 4 Units.
The legacy of Sefarad, the Jewish community in Spain. Historical evolution of the Sephardic community, under both Muslim and Christian rule, including the culmination of Anti-Semitism in 1492 with the expulsion of the Jews. Cultural contribution of the Hebrew communities in their condition as a social minority, both in al-Andalus, the peninsular Islamic State, and in the peninsular Christian kingdoms.

OSPMADRD 80. Word, Image and Power. 4 Units.
Relationships and uses of oral discourse, art, and iconography in politics in different countries through history. Case studies from ancient Egypt, the Greek Paideia, Cesar Augustus, medieval Europe, Spanish modern empire, French revolutionary discourse, and proletarian national identity in Russia and China.

OSPMADRD 84. Madrid Through My Eyes: A Theoreticl/Practical Documentary Film Workshop. 4 Units.
Theoretical and practical view of Spanish language documentary cinema; potential of this type of film making as a form of personal expression. Tools for understanding and analyzing this type of cinema. Creative and analytical reflection on student 's Madrid experience; develop individual visual discourse to portray life in the city by filming a short documentary.

OSPMADRD 89. Environmental Policy. 4 Units.
This course examines policies in the U.S. and Spain, focusing on climate, energy, air and water pollution, toxics, fertility, and other policies. I would expect a sizeable portion of the class to detail Spain's renewable energy efforts, as well as its role in Europe's cap and trade system. It would be conducted in a seminar format, with guest lectures and field trips to appropriate government offices.

OSPMADRD 102M. Composition and Writing Workshop for Students in Madrid. 3-5 Units.
Advanced. Writing as craft and process, emphasizing brainstorming, planning, outlining, drafting, revising, style, diction, and editing. Students choose topics related to their studies. Prerequisite: 13, 23B, or equivalent placement.

OSPMADRD 190. Madrid University: Humanities and Arts. 2-6 Units.
Humanities or Arts course at a local Spanish university. Students enrolled in the Madrid Program will receive an email from Madrid Program Director with information about these course opportunities at local partner institutions, including the action to take for applying. Prerequisite: completion of SPANLANG 13 or 23B or equivalent placement.

OSPMADRD 191. Madrid University: Social Sciences. 2-6 Units.
Social Sciences course at a local Spanish university. Students enrolled in the Madrid Program will receive an email from Madrid Program Director with information about these course opportunities at local partner institutions, including the action to take for applying. Prerequisite: completion of SPANLANG 13 or 23B or equivalent placement.

OSPMADRD 192. Madrid University: Engineering. 2-6 Units.
Engineering course at a local Spanish university. Students enrolled in the Madrid Program will receive an email from Madrid Program Director with information about these course opportunities at local partner institutions, including the action to take for applying. Prerequisite: completion of SPANLANG 13 or 23B or equivalent placement.

OSPMADRD 193. Madrid University: Natural Sciences. 2-6 Units.
Natural Sciences course at a local Spanish university. Students enrolled in the Madrid Program will receive an email from Madrid Program Director with information about these course opportunities at local partner institutions, including the action to take for applying. Prerequisite: completion of SPANLANG 13 or 23B or equivalent placement.

OSPMADRD 194. Madrid University: Earth Energy & Environmental Science. 2-6 Units.
Earth, Energy & Environmental Science course at a local Spanish university. Students enrolled in the Madrid Program will receive an email from Madrid Program Director with information about these course opportunities at local partner institutions, including the action to take for applying. Prerequisite: completion of SPANLANG 13 or 23B or equivalent placement.

OSPMADRD 195. Madrid University: Interdisciplinary. 2-6 Units.
Interdisciplinary course at a local Spanish university. Students enrolled in the Madrid Program will receive an email from Madrid Program Director with information about these course opportunities at local partner institutions, including the action to take for applying. Prerequisite: completion of SPANLANG 13 or 23B or equivalent placement.

OSPMADRD 199A. Directed Reading. 1-5 Unit.
.

Overseas Studies in Oxford Courses

OSPOXFRD 16. Creative Writing and Human Rights. 5 Units.
Human rights concepts through their emergence in literary form(s), using creative writing, including nonfiction, fiction and poetry, to explore empathy and the most effective ways of inducing it in readers.

OSPOXFRD 28. Oxford and Abroad: Travel Narratives and Historiography of an Academic City. 4-5 Units.
Rich history of Oxford, the place in which students are studying; skills to become aware of the profound influences the experience of living and studying abroad can have on self-conceptions. Appreciation of study in a town with such a marvelous tradition of scholarship through understanding of the history of learning in Oxford. How Oxford came to be the university town it is today.

OSPOXFRD 30. Archaeology, Espionage and the End of Empire: From Lawrence of Arabia to ISIS. 5 Units.
The role of archaeological sites, expeditions and archaeologists in the intrigues of war from Britain's occupation of the Middle East, two world wars, through the Suez Crisis to the current conflicts involving ISIS and its destruction of heritage sites. Focus specifically on the historic Oxford connection using university archives and collections, as well as exploring current initiatives by Oxford scholars to document and preserve heritage during recent conflict in the Middle East. How have the British empire and British interests been served by archaeology, in the past and present, and how has that mission been entangled with struggles over religion, sovereignty, territory, oil, and antiquities.

OSPOXFRD 31. Independent Study. 1-3 Unit.
Independent study topics: 1. Origins of the English Parliament, from Magna Carta and the Provisions of Oxford to the Glorious Revolution. 2. Origins of statutory law. When and how did laws change from royal decrees to parliamentary statutes? When and how did English judges become independent? 3. When and how did non-elite men and women gain the right to vote in English elections?.

OSPOXFRD 32. Philosophy of Language. 4-5 Units.
Introduction to contemporary analytic philosophy of language, examining some of its central concepts, including reference, meaning, and context. Students explore these concepts, by studying some of the major questions in the field, including: How do expressions esp. names secure their referents? What are the connections and differences between literal meaning and speaker meaning? What is the role of context in language? How philosophy of language impacts other areas in philosophy, by covering such topics as Meaning Externalism (metaphysics), Contextualism about 'know' (epistemology), and Propositional Attitudes (philosophy of mind).

OSPOXFRD 36. Creating English Democracy. 4-5 Units.
How English democracy developed historically. How did the "Mother of Parliaments" first get going? How did it survive repeated attempts by the monarch to make it subservient, ultimately turning the latter into a figurehead? How did laws, which were once royal decrees enforced by judges who served "at royal pleasure," become parliamentary statutes enforced by judges who held their offices "during good behavior." How did elections transform from affairs in which less than 10% of adult men could vote into mass elections with universal suffrage?.

OSPOXFRD 41. Western Thought: Origins of Twentieth Century Semiotics. 4-5 Units.
Story of semiotic exploration, its contributions to literary critical theory, Marxist critique and feminist critique, in development of twentieth century thought. Close look at principle authors and circumstances that engendered their writings. Questions about the relationship between thought and environment, and between ideology and action raised by looking at the way twentieth century events influenced thinkers to consider the purposes of language in society, in identity , and in authority.

OSPOXFRD 52. Shakespeare and Performance. 4-5 Units.
Examination of various aspects of the role of performance in Shakespeare. Alongside considering the aesthetics of the Elizabethan stage and how to read Shakespeare's texts for performance, the module will also look at how different types of performances and performance mediums generate different meanings for audiences. Theoretical ideas of the performance of gender and identity will also be discussed.

OSPOXFRD 62. Digital Technology in the UK. 4-5 Units.
Includes all of the sessions and requirements of the seminar Digital Technology in the UK, with an additional hour per week of meeting time focused on more technical readings from British computing pioneers. Please note that students can take this seminar or OSPOXFRD 63, but not both.
Same as: Technical Version

OSPOXFRD 63. Digital Technology in the UK. 3-4 Units.
A seminar focused on the British experience with computer and informational network technologies, and their social context and impacts. The course covers the development of computing from Charles Babbage and Ada Lovelace, to Alan Turing, to the present. The emphasis will be on broader social lessons and applications beyond the UK, including the role of gender and cultural norms in shaping the experience of technology's contributors, and uses of digital technology in democratic institutions. Please note that students can take this seminar or OSPOXFRD 62, but not both.

OSPOXFRD 69. Topics in Social Informatics. 1-3 Unit.
Directed study and independent project work in the social science of information technology, with weekly meetings to review the student's progress. Possible topics include: ¿ Online public deliberation and e-participation in the UK ¿ Voting systems in comparative perspective: theory and evidence ¿ Social informatics and the use of digital media in the US and UK elections of 2016 ¿ Social movements and digital media: General assemblies, democracy villages, and hashtags.

OSPOXFRD 72. Oxford Fantasists. 4-5 Units.
The lives and selected fantasy literature of famous Oxford alumni William Morris (Exeter College), Lewis Carroll (Christ Church), Oscar Wilde (Magdalen), C.S. Lewis (University and Magdalen), and J.R.R. Tolkien (Exeter, Pembroke, and Merton), looking at each writer's unique take on the fantasy genre. To place readings in context, this course will also explore and compare selected source materials used by these writers, including examples of classic "high" and "low" fairy tales, selections from Norse and Welsh mythology, and Arthurian romance.

OSPOXFRD 76. Access, Distinction and Material Culture through Coffee. 4-5 Units.
Each object we come in contact with over the course of any given day brings with it its own accumulation of significances and histories, and helps us to shape our identities. The study of things and their constituent materials is a means to examine exchange, power, identity, and the practices through which things become meaningful. Through the close inspection of a single good we can see the complex accumulation and contestation of themes, meanings, and global connections. Issues of access, inequality, and social capital as explored through the world of goods, beginning with a globally-traded commodity with a rich local history: coffee.

OSPOXFRD 77. Reading and Influencing People. 4-5 Units.
Understanding and managing human behavior dynamics in the negotiation process. Topics include understanding and influencing leverage, communicating effectively, differentiating interests from positions, using effective table tactics, and optimally closing the deal. Pedagogical goal: systematic understanding of the dynamics individuals typically use in negotiations. Lectures, followed by simulations to combine theory with practice. Intellectual and experiential learning integrated through combination of readings, presentations, and simulations.

OSPOXFRD 81. Displacement and Identity in 20th Century Europe. 4-5 Units.
In Europe, Twentieth Century population movements brought about by war and destruction, and enabled by unifications and peace. Using the methods of cultural history, examine the memoirs and biographies of European academics and intellectuals, with a special focus on those who relocated to Oxford University, as they reflect on the meaning of these relocations for their sense of self.

OSPOXFRD 86. From the hills to the sea. 4-5 Units.
This course would focus on the Thames River, at least since Roman times arguably the most important waterway in Britain. The basis of the class would be an exploration of the Thames from different angles both scientific and historical. The science side of the course would consider the following topics: the geology/geographic setting that gave rise to the Thames; its hydrology including a history of its floods and droughts as well as climate change trends; aspects of the hydrodynamics of tides and the estuarine environment of the Thames; the effects on the Thames of human modification such as loss of wetlands associated with building of the Docklands in the 18th and 19th centuries; sea level rise and the Thames including the design basis of the Thames Tidal Barrier. The history side of the course would consider how the Thames has played a role in the history of Britain, e.g., as an inland transportation corridor, as a barrier between states, as the site of the signing of the Magna Carta, as the heart of the global trade enterprise that built the British Empire, as a challenge to important engineering feats in Victorian London, as a subject for landscape painters like Turner, and as a spur of public policies of environmental protection and restoration.

OSPOXFRD 93. Collecting the World. 4-5 Units.
The art, science, and culture of the creation, transmission and collection of valuable, useful and informative objects and texts before the twentieth century, and the associated theories, purposes, and methods for collecting `worldly' goods and other valuables. Means by which local academic practices engaged with global developments in the arts and sciences through examination of primarily early modern material and intellectual culture in and around Oxfordshire. Assessments of quality, meaning, usage, cultural significance and the reception of material ¿treasures¿ in the storage rooms, vaults, and on display in museums, galleries, and libraries.

OSPOXFRD 97. Museum Anthropology and Digital Technologies. 4-5 Units.
Engage with material cultural theory debates of the late 20th century and examine the impact of the digital revolution on the way we exhibit culture two decades into the third millennium. Reflect upon the transformation of the politics and poetics of museum display analysing readings and exhibitions from the 1990s to the present day. Digital interfaces in our daily lives have altered the way we seek information and the way we communicate with each other. What have we learned about representing cultures in museum spaces and what have we put into practice? Examine contemporary issues and contentions relating to cultural display in relation to exhibits in Western art and anthropology museums.

OSPOXFRD 117W. Gender and Social Change in Modern Britain. 4-5 Units.
Changes in the social institutions, attitudes, and values in Britain over the past 20 years with specific reference to shifts in gender relations. Demographic, economic and social factors; review of theoretical ideas. Men's and women's shifting roles in a fast-moving society.

OSPOXFRD 195A. Tutorial in Anthropology. 6-7 Units.
.

OSPOXFRD 195B. Tutorial in Biology. 6-7 Units.

OSPOXFRD 199D. Directed Reading in Russian. 2-4 Units.
Course may be repeated for credit.

Overseas Studies in Paris Courses

OSPPARIS 1A. Accelerated First-Year French, Part 1. 5 Units.
Completes first-year language sequence in two rather than three quarters. All-in-French communicative and interactive approach. Emphasis on the development of French in a contemporary cultural context. Interpretation of diversified materials, written and oral presentations.

OSPPARIS 2A. Accelerated First-Year French, Part 2. 5 Units.
Continuation of FRENLANG 1A. Completes first-year language sequence in two rather than three quarters. All-in-French communicative and interactive approach. Emphasis is on the development of French in a contemporary cultural context. Interpretation of diversified materials, written and oral presentations. Prerequisite: French 1A.

OSPPARIS 10A. Engineering Research Internship. 5 Units.
For Paris Program students with academic experience in electronics, telecommunications or signal and image processing. Under direct guidance of researchers at Institut Supérieur d'Electronique de Paris (ISEP), and where applicable, in collaboration with other French and international graduate students, contribute to the ISEP's ongoing research projects. In French or English.

OSPPARIS 10B. Biology and Bio-Engineering Research Internship. 5 Units.
Biology research opportunity at the Brain & Spinal Cord Institute (ICM) located within the Hospital Pitié-Salpetrière. Team focuses on understanding the disease mechanism of Amyotrophic Lateral Sclerosis (ALS or Lou Gehrig's disease). Direct access to patient samples. Cutting-edge experimental methods. Prior research experience in biology lab work required. Students will be expected to work actively two full days a week in the lab, and provide a research report to the instructor at the end of the quarter. Language of instruction: French or English according to student's proficiency.

OSPPARIS 11. Special Internship. 1-6 Unit.
Often initiated by special contacts between students and professionals in France. Involvement may be based more on field work, and activity, rather than on fulfilling traditional academic requirements. Prerequisites: Written permission from the program director.

OSPPARIS 12. Paris Photography Workshop. 3 Units.
Exploration of Paris through camera and lab techniques. Both theoretical and practical aspects of creative photography. Extensive field work. Students must bring camera or phone with camera. Enrollment limited. Taught in English.

OSPPARIS 14. Media Internship. 3 Units.
Case studies and independent research as groundwork for comparative analysis of media on both sides of the Atlantic. Nature of media in the U.S and in France. Media as a means for understanding culture.

OSPPARIS 15. Hospital Mentoring. 3 Units.
Observation of medical services in Paris hospitals. How hospital teams work in France; how medical decisions are made; how patients are treated by nurses and doctors.

OSPPARIS 16A. French Schooling Internship. 2-3 Units.
Working with French schoolchildren in one of three settings: a neighborhood support association in the outskirts of Paris; or two after-school support association in the city. Commitment for a minimum of three hours a week on site plus meetings with internship instructor and a final paper. Number of placements depends on the needs of the sponsoring institutions. Previous work with children advised. Prerequisite: placement into French 22 or higher upon arrival in Paris.

OSPPARIS 17. Green Urban Planning Internship. 4 Units.
Intern in a local public company that oversees the city of Issy-les-Moulineaux's communication and innovation services in the immediate vicinity of Paris. Projects related to the Smart City Project (smart grid, smart mobility, smart government, etc.). Possible projects include: contributing to the city's editorial initiatives, taking active part in organizing events or conferences, doing documentary research on innovation, helping with European Union's co-funded projects. Speaking French a plus, but not a requirement.

OSPPARIS 18. Health Policy and Health Care System Design. 3 Units.
This course examines the structures of health care systems, from the perspective of the choices that those designing health care systems face. Topics include the overall goals of health care systems, health insurance programs and government programs financing care, the structure and organization of health care providers like doctor practices and hospitals, provider payment, patient cost sharing, coverage of new and emerging treatments and technology, and quality improvement. We particularly emphasize examples from the US and France.

OSPPARIS 19. Arranged Internship 1. 3-6 Units.
Two-quarter stay required unless student places into French 23P or above upon arrival. Internships can be arranged in a number of areas including the arts, architecture, politics, engineering, marketing and PR, media and journalism, health and psychological services, IT, NGO's, research, and hospitality administration.

OSPPARIS 20. A Journey Through Medieval Paris. 1 Unit.
From economic expansion in 11th century Paris and flourishing of Gothic religious architecture in the 12th century, to the establishment of Europe's principal university in Paris, making it the academic center of the region in the 13th century. Through onsite sessions, discover how Paris became a true capital in all meanings of the term, and explore the historical reasons for this phenomenal growth and expansion.

OSPPARIS 22P. Intermediate French I. 4 Units.
Prerequisite: one year of college French if completed within two quarters of arriving in Paris, or FRENLANG 21C.

OSPPARIS 23P. Intermediate French II. 4 Units.
Prerequisite: FRENLANG 21C within two quarters of arriving in Paris, or FRENLANG 22C or OSPPARIS 22P.

OSPPARIS 24. Introduction to French Society. 2 Units.
Required for Paris program participants. Exploration of meaningful aspects of French society and culture through lectures on history of France, participation in on-site cultural projects with French students, and a series of special encounters, venues and activities through the quarter. May be repeated for credit.

OSPPARIS 25. Bon Appétit, Marie Curie! The Science behind French Cooking. 3 Units.
Science and biology behind the cooking techniques and the taste buds. Each class includes a lecture, a food demonstration/experiment with student participation, and food preparation or tasting components explored together. Topics include: the five main tastes, aromatics, texture/mouthfeel, psychology, and genetics (why some people can't stand cilantro, for example); why we cook food; what heat does to meat and vegetables; the central role microbes play in cooking and eating; sauces and foams; molecular gastronomy; and of course, the science of dessert! This course meets the STEM track requirement for the Paris Program during Winter Quarter 2019-2020.

OSPPARIS 30. The Avant Garde in France through Literature, Art, and Theater. 4 Units.
Multiple artistic trends and esthetic theories from Baudelaire to the Nouveau Roman, from the Surrealists to Oulipo, from the theater of cruelty to the theater of the absurd, from the Impressionists to Yves Klein. Interdisciplinary approach to reflect on the meaning of avant garde and modernity in general, and on the question of why revolutionary artists in France remained in search of institutional recognition, nonetheless.

OSPPARIS 32. French History and Politics: Understanding the Present through the Past. 5 Units.
Key aspects of French politics including the constitutional framework, institutions, political parties and ideology, elections, political cultures, religion and politics, political elites and public policy-making, grass-root citizen participation, decentralization and local politics, and the major issues that structure and inform public debate, including attitudes and policies vis-à-vis the US.

OSPPARIS 36. French Writing Workshop. 3 Units.
Offered upon request for students who have completed an Advanced French course. Focus on French writing style, enabling students to understand and master the subtleties of French writing.

OSPPARIS 40M. An Intro to Making: What is EE. 5 Units.
Is a hands-on class where students learn to make stuff. Through the process of building, you are introduced to the basic areas of EE. Students build a "useless box" and learn about circuits, feedback, and programming hardware, a light display for your desk and bike and learn about coding, transforms, and LEDs, a solar charger and an EKG machine and learn about power, noise, feedback, more circuits, and safety. And you get to keep the toys you build. Prerequisite: CS 106A.

OSPPARIS 41. EAP: Perspective, Volume, and Design. 2 Units.
Mastering the techniques of spatial representation and developing a good visualization of volume. Offered by a major studio arts school in Paris, the "Ecole d'Arts Plastiques" (EAP). Preference for Art Practice, Art History, Product Design, Architecture or STS majors or minors with good language skills. In French. May be repeated for credit.

OSPPARIS 41E. EAP: Sculpture. 2 Units.
Control of volume through use of materials such as clay or plaster in order to master three dimensioned representations. Offered by a major studio arts school in Paris, the ¿Ecole d¿Arts Plastiques¿ (EAP).Preference for Art Practice, Art History, Product Design, Architecture or STS majors or minors with good language skills. In French. May be repeated for credit.

OSPPARIS 42. EAP: Drawing with Live Models. 2 Units.
Solid foundation in drawing; concepts of proportions, composition and analysis through observation. Perception of space, movement and forms. Techniques include: graphite, charcoal, chalk, pastel, watercolor, monotype, markers. Offered by a major studio arts school in Paris, the "Ecole d'Arts Plastiques" (EAP). Preference for Art Practice, Art History, Product Design, Architecture or STS majors or minors with good language skills. In French. May be repeated for credit.

OSPPARIS 43. EAP: Painting and Use of Color. 2 Units.
Different painting techniques for pictorial representation through various themes supporting the development of creativity. Offered by a major studio arts school in Paris, the "Ecole d'Arts Plastiques" (EAP). Preference for Art Practice, Art History, Product Design, Architecture or STS majors or minors with good language skills. In French. May be repeated for credit.

OSPPARIS 44. EAP: Analytical Drawing and Graphic Art. 2 Units.
Focus on observation of a model to be copied. Analysis of one aspect of a general structure while using various materials and techniques in a limited amount of time. Offered by a major studio arts school in Paris, the "Ecole d'Arts Plastiques" (EAP). Preference for Art Practice, Art History, Product Design, Architecture or STS majors or minors with good language skills. In French. May be repeated for credit.

OSPPARIS 44E. EAP. Computer Art. 2 Units.
Learn and develop efficient technique of modern graphic design. Offered by a major studio arts school in Paris, the "Ecole d'Arts Plastiques" (EAP).Preference for Art Practice, Art History, Product Design, Architecture or STS majors or minors with good language skills. In French. May be repeated for credit.

OSPPARIS 50M. Introductory Science of Materials. 4 Units.
Topics include: the relationship between atomic structure and macroscopic properties of man-made and natural materials; mechanical and thermodynamic behavior of surgical implants including alloys, ceramics, and polymers; and materials selection for biotechnology applications such as contact lenses, artificial joints, and cardiovascular stents. No prerequisite.

OSPPARIS 53. Electricity, Magnetism and Optics with Laboratory. 5 Units.
How are electric and magnetic fields generated by static and moving charges, and what are their applications? How is light related to electromagnetic waves? Represent and analyze electric and magnetic fields to understand electric circuits, motors, and generators. Wave nature of light to explain interference, diffraction, and polarization phenomena; geometric optics to understand how lenses and mirrors form images. Workings and limitations of optical systems such as the eye, corrective vision, cameras, telescopes, and microscopes. Discussions based on the language of algebra and trigonometry. An integrated version of Physics 23 and 24, targeted to premedical students who are studying abroad with integrated labs. Prerequisite: PHYSICS 21 or 21S. This course meets the STEM track requirement for the Paris Program during Winter Quarter 2019-2020.

OSPPARIS 54. The Artist's World: The Workshop, Patronage and Public in 19th and 20th Century France. 4 Units.
Synergy between artists, their workshops, patrons, models and the public in 19th and 20th century France. Weekly sessions in museums, artists' studios, and special venues within and around Paris, attempting to understand the world of the artist, and how, in many cases, this world became not only a place of refuge, but a metaphor of the artistic creation itself.

OSPPARIS 56. Exploring the City of Paris Through its Gastronomy: Past, Present and Future. 4 Units.
History and current dynamism of Paris through the prism of its gastronomic culture and topicality. Parisian districts currently witnessing rapid development due in part to the establishment of a growing number of quality-oriented and groundbreaking food businesses. This subtle gastronomic journey through the city of Paris will allow us both to understand the history of Paris, and how France's capital has sought to preserve its heritage and identity while becoming increasingly receptive to creativity, modernity and global influence.

OSPPARIS 63. Living Through War in France and its Empire: From 19th Century to the Present Time. 4 Units.
How have wars shaped the French Society? How have French men and women gone through these traumatic times, since the French Revolution until today? Beyond addressing a history of Wars per se, explore what French society represents within this context. What was the relationship between the "Citoyen-soldat" and "The Other": Women, the Colonized, the Enemy? Through this three-centuries panorama of French conflicts, gain a knowledge of both French society and the various methods and approaches to better understand the phenomenon of war, in all its universal complexity. In French.

OSPPARIS 66. FOOD CONSUMPTION & PRODUCTION. 4 Units.
How does Paris obtain its fresh food for the 8 millions meals that are served every day in the city? Where is this food produced and how is it brought to the city? What recent initiatives promote a more sustainable food system in France? These questions offer an opportunity to explore broader issues related to food systems in the urban era, rural-urban linkages, and sustainable food consumption, using Paris as a case study. The objective of this course is to better understand the food system of a large citysuch as Paris, with a focus on the underlying human-environment interactions. Part I of the course will focus on food production in the peri-urban areas of Paris and other regions in France. 70% of the food consumed in Paris comes from France. We will start with von Thunen's model of the central state.We will also discuss the rise of urban agriculture, with a field visit of an urban agriculture site under the municipality's "Parisculteurs"program. Part II will focus on food distribution and consumption in the city. We will discuss concepts such as agglomeration economies and supply chains. We will conduct interviews atan open-air market in Paris where «maraîchers» bring in their own production to sell. Part III will focus on recent trends to increase the sustainability of food production in France. We will discuss emerging social norms related to sustainable food and how they interact with agricultural and environmental policies in France and the European Union. This will include the rise of organic agriculture, geographical indications, various public and private eco-labeling initiatives, and attitudes toward genetically-modified crops in France.

OSPPARIS 67. INDP STDY: LAND USE IN FRANCEn. 2 Units.
The following topics areproposed for an independent study: (1)Land use history in France:After centuries of deforestation, French landscapes have been reforesting for more than a century. What are the causes, and environmental and social implications of this "forest transition"?(2) Organic agriculture in France:In 2018, the cultivated area under organic agriculture in France was 20% larger than in 2015, representing nearly 6% of the total cultivated area. What explains this trend? How is the organic agriculture standard defined in Europe? What are the health and environmental benefits of organic agriculture?(3) Outsourcing ecological footprints to other continents:The environmental impacts of France's consumption within its borders are decreasing. But does it reflect a decoupling between economic activity and environmental degradation, or is it just the result of a displacement of the most polluting activities to other countries? (4) Sustainability sourcing commitments by corporate actors: A growing number of multinational corporations are making sustainability sourcing commitments. Does the country (or continent) where these companies are based or sell their products have an influence on the likelihood of making such commitments?(5) Geographical Indications (GIs) in Europe: GIs identify a good as originating from a region where a given quality, reputation or other characteristic of the good is attributable to its geographical origin. More than 6,000 of the 10,300 products that benefit from GIs in the world are produced in the European Union. What are the benefits of GIs for producers and consumers?.
Same as: Lambin

OSPPARIS 72. The Ceilings of Paris. 4 Units.
Seventeenth century transformation of the ceilings of Paris, private and public. Itinerary of this transformation from artists' initial drawings to their finished work. Under the guidance of the curator of 17th century French Drawings in the Louvre Museum, study the original drawings as well as the venues in and around Paris. Sites vary from the most illustrious (Versailles) to the lesser known (Hotel Lauzun). Reflection on the changing social and political aspirations as represented in these new artistic forms. Language of instruction: French.

OSPPARIS 76. From Art to Medicine: The Human Body and Tissue Regeneration. 3 Units.
Review of arts on human anatomy followed by review of modern medical knowledge on human body, disease prevention, and tissue regeneration. How interdisciplinary research (biology, engineering and medicine) is critical in advancing modern medicine. Lectures alternate with case studies and paper discussions on selected papers targeting treatment of various diseases. Develop an NIH style research proposal to solve a real-life disease problem. Introduction into the field of tissue regeneration using interdisciplinary approaches, sharpening critical paper reading and scientific writing skills, and integrating with the unique local art and research resources that Paris has to offer. In English. Students applying to the STEM/Pre-med track are expected to have taken some prior STEM courses at Stanford to demonstrate their interest and preparation for applying to this track. This course meets the STEM track requirement for the Paris Program during Winter Quarter 2019-2020.

OSPPARIS 77. Literature and Philosophy of Place. 4-5 Units.
Themes of place and displacement in literature and philosophy of the larger French-speaking world, focusing on diasporic writers. Paris as a magnet for artists and thinkers seeking freedom from restrictive environments. Contrast the experiences of characters who are at "home" and those who are "away," the anxieties of exile and of colonialism, how one person's claim on home can be another's experience of being invaded,. Philosophers' analyses of the interdependence of place and identity, place and belonging, the sometimes contradictory nature of 'home,' as they pertain to the literary (fiction, essay, poetry) texts we will read.

OSPPARIS 78. Independent Studies in Human Diseases and Tissue Regeneration. 1-2 Unit.
Students who are interested to explore in on independent studies will meet with the instructor on a regular basis to develop customized studies on various potential topics on the history of biomedical research in Paris, or the role of biochemical research on driving progress in human diseases prevention, tissue repair, as well as potential impacts on future medicine.

OSPPARIS 78A. Independent Study Topics in Philosophy. 2-4 Units.
French feminist philosophy: Reading and understanding the contributions to feminist thought of Beauvoir, Wittig, Irigaray, and others.

OSPPARIS 78B. Independent Study Topics in Literary (Creative) Writing. 1-2 Unit.
Spirit of Place in Short Fiction/ Spirit of Place in Memoir. Students are invited to work with the professor developing such skills as characterization, plot, dialogue, figurative language, structure and pacing. All narratives will, of course, explore place (Paris and other parts of France) in new and interesting ways.

OSPPARIS 80. The Body, Race, and Difference in Contemporary France. 5 Units.
Using anthropological frames, students will learn to think about the body and its role in everyday life, paying particular attention to the ways that ethnicity, citizenship, race and belonging are lived and experienced in contemporary France. We will work with materials ranging from the colonial collection of human remains that were used to represent French Universalism in museum projects, to cultural artifacts acquired during the colonization of Africa (their circulation and the current debates around them), to interactive ethnographic work with current social organizations centered around the body, rights and health. Broad questions pivot on two fundamental queries: Is the differentiated body a natural fact? When and how have ethnic and multicultural discourses come into play in the cultural context of France where the political categorization of race is legally forbidden?.

OSPPARIS 82. Independent Studies Special Topics. 1-3 Unit.
All independent study topics should be arranged with the instructor and have an expectation of one meeting per week. A final 10-page paper should be the result of all independent studies. Topics include: African Health in the French Context; Culture, Medicine and the Body; Race and Universal Humanism.

OSPPARIS 91. The Future of Globalization: Economics, Politics and the Environment. 5 Units.
Economic and political impact of globalization on France and the EU and influence of France and the EU on the process of globalization. Issues of sovereignty and national identity for France; protection from versus integration into the network of globalization.

OSPPARIS 92. Building Paris: Its History, Architecture, and Urban Design. 4 Units.
The development of Parisian building and architecture from the 17th century to the present. Interaction of tradition and innovation in its transformation and its historical, political, and cultural underpinnings. Visits and case studies throughout Paris illustrate the formation of the city landscape and its culture.

OSPPARIS 103A. French Lecture Series 1. 1 Unit.
May be repeated for credit.

OSPPARIS 104A. French Lecture Series 2. 1 Unit.
May be repeated for credit.

OSPPARIS 105A. Sorbonne Lecture Series. 1 Unit.
May be repeated for credit.

OSPPARIS 122X. Europe and its Challenges Today. 4 Units.
European integration is now an economic, social, and political reality. This integration has a history of mutation and a transformation of its very foundation. Topics: the evolution of welfare states, elites, political parties, and systems in Europe; lobbies, trade unions, voluntary associations, social movements, popular protest, citizenship, democracy.

OSPPARIS 180. Paris Special Topics. 1-6 Unit.
May be repeated for credit.

OSPPARIS 186F. Contemporary African Literature in French. 4 Units.
Focus is on African writers and those of the diaspora, bound together by a common history of slave trade, bondage, colonization, and racism. Their works belong to the past, seeking to save an oral heritage of proverbs, story tales, and epics, but they are also contemporary.

OSPPARIS 195A. Paris University 1. 1-6 Unit.
May be repeated for credit.

OSPPARIS 195B. Paris University 2. 1-6 Unit.
May be repeated for credit.

OSPPARIS 195C. Paris University 3. 1-6 Unit.
May be repeated for credit.

OSPPARIS 198A. International Design and Construction Project. 4 Units.
Working as part of a French team of designers and engineers, invent a new product and present it to a jury of professors from French Institutes. While engineers insure the product functions and designers insure ease of use, Stanford students additionally help assess whether product will be used locally or globally. Language of instruction: French.

OSPPARIS 199A. Directed Reading A. 1-6 Unit.
.

OSPPARIS 199B. Directed Reading B. 1-6 Unit.
.

OSPPARIS 199C. Directed Reading: C. 1-6 Unit.

Overseas Studies in Santiago Courses

OSPSANTG 12S. Accelerated Second-Year Spanish, Part I: Chilean Emphasis. 5 Units.
Intensive sequence integrating language, culture, and sociopolitics of Chile. Emphasis is on achieving advanced proficiency in oral and written discourse including formal and informal situations, presentational language, and appropriate forms in academic and professional contexts. Prerequisite: one year of college Spanish, or 11 or 21B if taken more than two quarters prior to arriving in Santiago.

OSPSANTG 13S. Accelerated Second-Year Spanish, Part II: Chilean Emphasis. 5 Units.
Intensive sequence integrating language, culture, and sociopolitics of Chile. Emphasis is on achieving advanced proficiency in oral and written discourse including formal and informal situations, presentational language, and appropriate forms in academic and professional contexts. Prerequisite: 11 or 21B within two quarters of arriving in Santiago, or 12 or 22B.

OSPSANTG 14. Women Writers of Latin America in the 20th Century. 4-5 Units.
Key figures in poetry, narrative fiction, theater, and testimonio, such as Mistral, Garro, Lispector, Poniatowska, Valenzuela, Eltit and Menchú. Close reading technique. Issues raised in literary texts that reflect the evolution of the condition of women in Latin America during the period. Topics include gender differences and relationships, tradition versus transgression, relationship between changes in the status of women and other egalitarian transformations, and women writers and the configuration of literary canons.

OSPSANTG 20. Comparative Law & Society: Conflicts in the Structuring of Democratic Polities across Latin America. 4-5 Units.
This course examines how different democratic polities with their own distinct, historically rooted traditions have used the law to promote shared goals of liberty and equality. Chile is widely seen as an exemplar in the successful deployment of law to enable the transition from an authoritarian to a democratic society. Topics include: how history has shaped inherited legal institutions and concepts across Latin America, Europe, and the United States; constitutional review; administrative regulation; criminal justice; debates over free speech, as well as ongoing struggles to promote racial, ethnic, and gender equality. Visits to a number of key sights: the Museo de la Memoria y los Derechos Humanos; the Universidad de Chile; and the Tribunal Constitucional de Chile.

OSPSANTG 23. Topics in Literature of the Americas. 1-2 Unit.
Students may choose from the following topics: Roberto Bolaño and the Legacies of 1968, Amuleto (1999) Junot Díaz's Global Dystopias. Students meet with faculty member to select a set of readings. Regular meetings to review progress. Both topic courses on Roberto Bolaño and Junot Díaz as prisms of globalization and world literature, as sources of the heteronomy of literature, and as literary archives.

OSPSANTG 29. Sustainable Cities: Comparative Transportation Systems in Latin America. 5 Units.
Energy and environmental challenges resulting from the growing size and complexity in Latin American cities. Key issues: way in which public authorities deal with the dynamics of urban growth and complexity; related environmental and energy issues, particularly related to different public transportation models. Systemic approach as seen in Curtiba, Bogota, Santiago, and Medellin. Analysis centering on different approaches used to tackle these related issues; different institutional strategies.

OSPSANTG 30. Short Latin American Fiction of the 20th Century. 4-5 Units.
Introduction to short narrative fiction produced in Latin America during the 20th Century. Key features of the short story genre, as defined by Chekhov in the 19th Century and redefined by Kafka and Borges in the 20th Century. Main literary movements of the period in Latin America, including Regionalism, Social Realism, the Avant-Garde, the Boom of the 1960s and Magical Realism, the Post-Boom, etc. Close reading course with strong emphasis on analysis and discussion of the required texts. Readings placed in the context of the main developments in Latin American history and culture in the period.

OSPSANTG 33. Spanish Language Tutorial. 2 Units.
Prerequisite: two years of college Spanish or equivalent placement.May be repeated for credit.

OSPSANTG 40. Academic Internship. 2 Units.
May be repeated for credit.

OSPSANTG 44. Introduction to Borderlands Literature of the Americas. 3-5 Units.
Comparative dialogue regarding a variety of perspectives from Chicano/a and LatinAmerican literary studies. Examine autobiographies, fiction, and cultural productions from writers such as Roberto Bolaño (2666), Yuri Herrera (Señales que precederán al fin del mundo), Gloria Anzaldúa (Borderlands/La Frontera), Sara Uribe (Antígona González), Américo Paredes (The Hammon and the Beans), Sandra Cisneros (La casa en Mango), and Helena Viramontes ("The Cariboo Café"). Also focus on the Chilean dictatorship novel Nocturna de Chile by Roberto Bolaño and the Dominican dictatorship novel The Brief Wondrous Life of Oscar Wao by Junot Díaz.

OSPSANTG 46. FORMAL ORGANIZATIONS. 3-5 Units.
Formal organizations are ubiquitous in contemporary societies, such as firms, schools, hospitals, and government agencies. They educate us, manage our financial accounts and structure our daily routines, and they distribute resources, status, and opportunities among social groups. This course introduces dimensions and aspects of formal organizations and basic concepts and theoretical logics for analyzing them. A multidisciplinary approach is adopted to understand organizational phenomena, with special attention to complementary perspectives drawn from economics, psychology, and sociology. Organization research literature and specific cases, especially those in a comparative perspective, are used to illustrate the applications of the analytic models and concepts in the real world of organizations.

OSPSANTG 56. Cultural Literacy: Chile. 2 Units.
This mandatory course (2 units) provides students with essential elements to understand the history, politics, and culture of modern Chile. In addition to readings, there will be discussions of films and literature. Field trips will include visits to the General Cemetery, the Museum of Memory, Pablo Neruda's house in Isla Negra, and street art from Barrio Yungay. Field trips to Cerro San Cristobal to explore conservation issues will also be included.

OSPSANTG 57. Sexual and Reproductive Health Rights and Public Policy in Chile. 5 Units.
This course aims to provide an overview of the relationship between public policies, sexual and reproductive health, gender and social determinants of health within the framework of people's rights in Chile, a country has only recently taken on the issues. Projects include group projects, reading controls and a final paper.nInstructor: Claudia Dides.

OSPSANTG 58. Global Change in Chile. 5 Units.
Physical, ecological, and human geography of Chile. Perceptions of the Chilean territory and technologies of study. Flora, fauna, and human adaptations to regional environments. Guest lectures; field trips; workshops.

OSPSANTG 62. Topics in Chilean History. 4-5 Units.
Independent study topics concerning any aspect of Chilean history such as independence and nation building, social and economic development, ideas and culture, dictatorship and democracy. Research paper based on primary and secondary sources.

OSPSANTG 67. Patagonia in Literature and Film. 5 Units.
The course will explore the cultures and histories of Patagonia through literature and film, including historical documents, travel literature, poetry, historical and contemporary short stories and novels, narrative and documentary films to help students become acquainted with the unique geography, heritage and contemporary life of the region. The familiarization with ¿and open discussions around¿ these materials will complement instruction in situ during an extensive visit to Patagonia.

OSPSANTG 68. The Emergence of Nations in Latin America. 4-5 Units.
Major themes of 19th-century Latin American history, including independence from Spain, the emergence of nation states, and the development of a new social, political, and economic order.

OSPSANTG 71. Santiago: Urban Planning, Public Policy, and the Built Environment. 5 Units.
Santiago's growth and development over time and in comparison to other mega cities in the world; impact of urban highways on the built environment; shopping malls and the development of new urban sub-centers. Topics: brief history of the city, from 1541 to1940; urban development since 1940; the 1960 Inter-communal Urban Plan; planning and the configuration of modern Santiago; housing policy as an instrument to combat poverty; social housing policy and Santiago's built environment.

OSPSANTG 79. Topics in European Legal History. 1-2 Unit.
This is an independent study/reading course that explores such core topics in European legal history as (1) the Roman-canon law tradition; (2) the history of constitutionalism (16th-century to present); (3) the rise of modern natural law and codification; (4) absolutism and the rise of the centralized, administrative state; and (5) Enlightenment and revolution.We will meet once per week to discuss readings. Students who wish to take the course for 2 units have the option of also writing four response papers to the readings (as detailed above).

OSPSANTG 85. Marine Ecology of Chile and the South Pacific. 5 Units.
Relationships among physical processes in the ocean, biological productivity, and the exploitation of resources by high-thropic-level predators including human beings. Characterization of ecological patterns; identification of processes operating on marine systems. Open ocean ecosystems, intertidal and benthic regions of the world's oceans, and ecological research developed along coastal regions, focusing on Chile's 4,000 km coastline.

OSPSANTG 102S. Composition and Writing Workshop for Students in Santiago. 3-5 Units.
Advanced. Writing as craft and process: brainstorming, planning, outlining, drafting, revising, style, diction, and editing. Non-Spanish majors or minors may choose topics related to their studies. Prerequisite: SPANLANG 13C, 13R, 13S, 23B, or equivalent.

OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century. 5 Units.
Chile's strides towards becoming a developed country have engendered high levels of alienation and disaffection among significant sectors of the population. The roots of this apparent paradox of modernization, focusing on newly emerging actors in the Chilean political scene: Mapuche organizations, women's groups, the environmental movement, and new features of the established ones like trade unions and human rights activists.

OSPSANTG 118X. Artistic Expression in Latin America. 5 Units.
Elite, mass-media, and popular cultural changes in Chile under conditions of economic and political liberalization. The reception of cultural meanings from the center of the world social system (U.S., EU, and Japan), reformulation to respond to local conditions, and export in the shape of cultural artifacts. Innovative elements rooted in the regional and local culture.

OSPSANTG 119X. The Chilean Economy: History, International Relations, and Development Strategies. 5 Units.
The Chilean economy in five stages, taking into account: the international economic position of Chile; internal economic structures closely related to the inherited historical conditions and to the changing international economic position of the country; and the economic strategies prevalent during the period and the concrete development policies conducted by government authorities.

UNDERGRADUATE RESEARCH

Stanford encourages undergraduates to work with faculty on independent projects in research, the arts, and senior synthesis. Undergraduate Research facilitates these close relationships by providing advising and funding to undergraduates across all disciplines and at all stages of developing an idea into a research project. See the Research and Independent Projects (https://undergradresearch.stanford.edu/) web site for more information. For current deadlines, grant types, and program details, see the Student Grants (https://studentgrants.stanford.edu/) page. Faculty or departments interested in applying for funding to support undergraduates in their working groups can learn more on the For Faculty (https://undergrad.stanford.edu/opportunities/research/faculty/) page.

CENTER FOR TEACHING AND LEARNING

The Center for Teaching and Learning supports evidence-based and inclusive learning and teaching practices, educational programs and training, community building, and strong collaborations and partnerships with schools, departments, and other offices.

Resources for Students and TAs

Essential resources and learning support services to Stanford students and TAs include:

- Academic Skills Coaching
- Peer subject tutoring and foreign language conversation partners
- Workshops and courses
- Learning consultant program
- Completion Coaching
- Graduate Study Hall
- Graduate student teaching consultant program
- TA Orientation

Support for Faculty and Instructors

Support for faculty and instructors includes integrated services and programs to help advance pedagogy, engage students in active learning, and promote inclusive learning such as:

- Course Design Institute
- Teaching with technology
- Teaching assessment
- Teaching grants
- Programs and workshops

Courses

CTL 53. Working Smarter. 2 Units.
Once you get into the school of your dreams, how will you be sure you can succeed there? The level of organization and study skills necessary for college success are often very different than in high school. In Working Smarter, you will learn evidence-based, college-level strategies for time management, note taking, studying, reading, writing, discussion, and oral presentations. This class is a great fit for high school students who want to prepare for college and for college students who want to expand their set of strategies for successful learning in STEM, social science, and humanities courses.

CTL 120. Peer Tutor Training. 1 Unit.
Goal is to help students become effective peer tutors for course material already mastered by articulating aims; developing practical tutoring skills including strategies for drop-in sessions; observing experienced tutors; discussing reading assignments; role playing; and reflecting on experiences as a peer tutor intern. Prerequisite: consent of instructor.

CTL 312. Science and Engineering Course Design. 2-3 Units.
For students interested in an academic career and who anticipate designing science or engineering courses at the undergraduate or graduate level. Goal is to apply research on science and engineering learning to the design of effective course materials. Topics include syllabus design, course content and format decisions, assessment planning and grading, and strategies for teaching improvement.
Same as: ENGR 312

ROTC

Reserve Officers' Training Corps (ROTC)

Cross-Enrollment Agreements for ROTC

Stanford has cross-enrollment agreements for the Reserve Officers' Training Corps (ROTC) with the Navy and Marine Corps ROTC program at the University of California at Berkeley, the Army ROTC program at Santa Clara University, and the Air Force ROTC program at San Jose State University. These agreements allow Stanford students to engage in military training while working on their degrees from Stanford. Courses taken in ROTC programs are offered by and through UC Berkeley, Santa Clara, and San Jose State. Most courses count for academic or activity credit and count toward the 12-unit requirement for full-time registration status and satisfactory academic progress requirements for Stanford undergraduates.

Normally, students who participate in ROTC training complete a four-year course of instruction at the respective institution that consists of two years of basic courses during the freshmen and sophomore years, and an advanced course of instruction during the junior and senior years. Students who accept ROTC scholarships are generally subject to a service obligation, depending on the regulations of the particular service.

Stanford students who are enrolled in ROTC programs under the cross-enrollment agreements are eligible to compete for various scholarships that provide up to full tuition and a monthly stipend. Students normally compete for national scholarships as high school seniors, although current Stanford students may be eligible to enroll in ROTC on a non-scholarship basis. Non-scholarship ROTC students are eligible to compete for scholarships, and individual services may offer additional scholarship programs to current qualifying undergraduate and graduate students. Interested students should contact the appropriate military branch at the host institution to obtain information on these programs and to initiate application procedures.

Students who satisfactorily complete an ROTC program and are awarded a Stanford degree qualify for a commission as a Second Lieutenant in the U.S. Army, an Ensign in the U.S. Navy, a Second Lieutenant in the U.S. Marines, or a Second Lieutenant in the U.S. Air Force.

For additional questions concerning the ROTC programs, Stanford students should consult with one of the host units.

Academic Credit

All three service programs have a mandatory lab course each quarter which carries 1 unit of activity credit for satisfactory completion of work. Although there is no limitation on the number of activity classes in which a student may enroll, no more than 8 units of these activity classes (and/or other university activity classes) may be applied toward undergraduate graduation requirements (see the Undergraduate Degrees (p. 37) section of this bulletin).

Upper level ROTC academic courses carry two units of credit for satisfactory completion of work and are graded on a credit/no credit basis. No more than 36 units without a letter grade may be applied toward undergraduate graduation requirements (see the Undergraduate Degrees (p. 37) section of this bulletin).

In addition to enrolling in ROTC courses at their host institution, all ROTC students are to enroll in the corresponding ROTC course at Stanford through Axess.

Air Force ROTC

Commanding Officer: Lieutenant Colonel Walter H. Priebe

Air Force ROTC courses are offered at San Jose State University. See also the SJSU website (http://www.sjsu.edu/afrotc/).

Courses in the freshman year focus on the foundation of the United States Air Force and introduce students to the Air Force and AFROTC. Topics include the characteristics, missions, and organization of the Air Force, the qualities of an officer and professionalism, career opportunities, military customs and courtesies, and communication skills.

Courses in the sophomore year focus on the evolution of the United States air and space power. Students study air and space power through historical analysis and examine the capabilities, function, and doctrinal employment of aerospace forces. The course emphasizes oral and written communication skills.

Courses in the junior year focus on Air Force leadership studies. Topics include leadership, management fundamentals, professional knowledge, Air Force personnel system, ethics, and communications. Students apply knowledge and skills required of junior Air Force officers through case studies, practical exercises, and seminar discussion.

Senior year courses cover two subjects, national security affairs and preparation for active duty. Students learn about national security process, international and regional relations, advanced leadership ethics, Air Force doctrine with focus on the military as a profession, military justice, civilian control of the military, and current issues affecting the military. Preparation for active duty focuses on the role of the Air Force officer in contemporary society emphasizing skills to facilitate a smooth transition from civilian to military life.

The leadership laboratory is required for all students every quarter. Students participate in hands-on exercises to learn drill and ceremony; Air Force customs and courtesies; leadership and followership skills; and they hear from guest speakers on a variety of Air Force topics.

Army ROTC

Commanding Officer: Lieutenant Colonel Melan P. Salas

Some Army ROTC courses are offered at Santa Clara University and some are offered on Stanford's campus. See also the Army ROTC web site (http://www.scu.edu/rotc/).

Freshman year courses introduce students to leadership and personal development and provide foundations for leadership.Course topics include personal challenges and competencies for effective leadership, goal setting, time management, physical fitness, and stress management related to leadership and officership. Students develop a personal fitness program under the guidance of an Army master fitness trainer. In addition, they learn leadership fundamentals such as setting direction, problem solving, listening, presenting briefs, providing feedback, and effective writing skills in the context of practical and interactive exercises.

Army courses taught in the sophomore year look at leadership through a variety of lenses using case study and interactive exercises. Topics include creative and innovative leadership strategies and styles, challenges of leading in contemporary operational environments along with crosscultural challenges, and team leading procedures.

In the junior year, students learn adaptive team leadership and situational leadership.They develop skills including decision making, persuading, and motivating team members when under fire in small-unit tactical operations scenarios.

Courses for seniors provide capstone leadership instruction and experiences in a practical and current event driven context. Students plan, execute, and assess complex operations, function as a member of staff, and provide leadership performance feedback to subordinates.

They use case studies, scenarios, and exercises to prepare for their first unit assignment and the transition to commissioned officer in a modern world.

All students are also required to take a military history course focused on leadership. This course may be taken any year. The leadership laboratory is required for all students every quarter. In addition, students complete a four-day weekend field training exercise away from the University in the Autumn and Spring quarters, and a formal military dinner during an evening in the Winter Quarter.

Naval ROTC

Commanding Officer: Major Adam Craig

Naval ROTC courses are offered at the University of California at Berkeley. See also the Naval ROTC web site.

Courses in the freshman year introduce students to the Navy and Marine Corps and to the NROTC program. They also study sea power from a historical and United States centered perspective.

In the sophomore year, students take their first leadership class with a focus on management and their first navigation class with a focus on the fundamentals of nautical navigation. Courses include case studies, student presentations, and practical exercises.

Juniors study introductory naval engineering with a focus on ship systems and modern weapons systems. Example topics include gas turbine propulsion systems, nuclear reactors, and radar and sonar theory.

During their senior year, students study advanced leadership topics within an ethics framework and advanced navigation and naval operations.

Students pursuing a commission in the Marine Corps do not take the two engineering courses or the two navigation courses. Marine option students take two Marine Corps specific courses that examine the history of littoral warfare and the evolution of warfare.

All students are required to take the weekly professional development laboratory course (drill) at UC Berkeley every quarter.

ROTC - Air Force Courses

ROTCAF 1. Air Force ROTC Lab. 1 Unit.
Practical leadership exercises including physical fitness training. May be repeated for credit.

ROTCAF 11. The Foundation of the United States Air Force. 1 Unit.
Introduces students to the Air Force and AFROTC with an overview of basic characteristics, missions, and organization of the Air Force; additional topics include officership and professionalism, career opportunities, military customs and courtesies, and an introduction to communications skills. May be repeat for credit.

ROTCAF 21. The Evolution of USAF Air and Space Power. 2 Units.
Examines general aspects of air and space power through historical study and analysis and provides the student with a knowledge level understanding of the capabilities, function and doctrinal employment of aerospace forces; emphasizes development of oral and written communication skills. May be repeat for credit.

ROTCAF 131. Air Force Leadership Studies. 2 Units.
Study of leadership, management fundamentals, professional knowledge, Air Force personnel system, ethics, and communication skills; develops application level knowledge of skills required of junior Air Force officer through case studies, practical exercises, and seminar discussion. May be repeat for credit.

ROTCAF 141. National Security Affairs. 2 Units.
Examines the national security process, international and regional relations, advanced leadership ethics, and Air Force doctrine with focus on the military as a profession, officership, military justice, civilian control of the military and current issues affecting military professionalism.

ROTCAF 142. PREPARATION FOR ACTIVE DUTY. 2 Units.
An examination of the role of the Air Force officer in contemporary society with emphasis on knowledge, comprehension, and application of skills needed to facilitate a smooth transition from civilian to military life. May be repeated for credit.

ROTC - Army Courses

ROTCARMY 1. ARMY ROTC LAB. 1 Unit.
Leadership laboratories, held weekly for three hours, are required of all students. Performance during lab periods is reflected in the student's course grade. Labs include activities such as rappelling, terrain navigation, marksmanship, drill and ceremonies, and tactical field training exercises.

ROTCARMY 11. Leadership and Personal Development. 1 Unit.
Introduces students to the personal challenges and competencies that are critical for effective leadership. Students learn how the personal development of life skills such as goal setting, time management, physical fitness, and stress management relate to leadership and officership. Students develop their own personal fitness program under the guidance of an Army master fitness trainer.

ROTCARMY 12. Foundations in Leadership I. 1 Unit.
An overview of leadership fundamentals such as setting direction, problem solving, listening, presenting briefs, providing feedback and using effective writing skills. Students begin to explore leadership dimensions and values.

ROTCARMY 13. Foundations in Leadership II. 1 Unit.
An overview of the leadership framework with practical applications in fundamentals such as problem solving, listening, presenting briefs, and using effective writing skills. Students explore dimensions of leadership, values, attributes, skills, and actions in the context of practical, hands-on, and interactive exercises.

ROTCARMY 21. Innovative Leadership. 2 Units.
Explores the dimensions of creative leadership strategies and styles by studying historical cases and engaging in interactive exercises. Students practice aspects of personal motivation and team building within the context of planning, executing and assessing team exercises. Focus will be on the continued development of the knowledge of leadership values and attributes through an understanding of organizational customs and courtesies. Leadership case studies provide tangible context for learning Individual Creeds and Organizational Ethos.

ROTCARMY 22. Leadership in Changing Environments I. 2 Units.
Examines the challenges of leadership in complex contemporary operational environments. Dimensions of the cross-cultural challenges of leadership in a constantly changing world and their application to leadership tasks and situations. Case studies stressing importance of teamwork and tactics in real-world settings.

ROTCARMY 23. Leadership in Changing Environments II. 2 Units.
Examines the decision-making process and plans/orders that enable small units to complete assigned tasks. Planning techniques used to develop orders and briefing plans and decisions.

ROTCARMY 131. Adaptive Team Leadership. 2 Units.
Challenges students to study, practice, and evaluate adaptive leadership skills as they are presented with the demands of the ROTC Leader Development Assessment Course. Challenging scenarios related to small unit tactical operations are used to develop self-awareness and critical thinking skills. Students receive systematic and specific feedback on their leadership abilities.

ROTCARMY 132. Situational Leadership I. 2 Units.
Study of intense situational leadership challenges to build student awareness and skills in leading small units. Skills in decision-making, persuading, and motivating team members when "under fire" are explored, evaluated, and developed.

ROTCARMY 133. Situational Leadership II. 2 Units.
Practical applications of intense situational leadership challenges that will provide awareness and specific feedback on leadership abilities. Student skills are evaluated using practical applications in decision making, persuading, and motivating team members when under fire. Aspects of military operations are reviewed as a means of preparing for the ROTC Leader Development Assessment Course (LDAC).

ROTCARMY 141. Developing Adaptive Leaders. 2 Units.
Students develop proficiency in planning, executing, and assessing complex operations; in functioning as a member of a staff; and in providing leadership performance feedback to subordinates. Students are given situational opportunities to assess risk, make ethical decisions, and provide coaching to fellow ROTC students. Students are challenged to instruct younger students. Students identify responsibilities of key staff roles and use situational opportunities to develop subordinates.

ROTCARMY 142. Leadership in a Complex World I. 2 Units.
Explores the dynamics of leadership in the complexity of current military operations. Students examine customs and courtesies, military law, principles of war and rules of engagement in the face of international terrorism. Aspects of interacting with nongovernmental organizations, civilians on the battlefield, and host nation support are examined and evaluated.

ROTCARMY 143. Leadership in a Complex World II. 2 Units.
Significant emphasis is placed on preparing students for their first unit of assignment and transition to lieutenant. Case studies, scenarios, and exercises are used to prepare students to face the complex ethical and practical demands of leading as commissioned officers in the U.S. Army.

ROTCARMY 176. Military History. 2 Units.
A survey of the military and diplomatic aspects of American involvement in conflicts from the Anglo-Indian Wars to the present.

ROTC - Navy Courses

ROTCNAVY 1. Naval ROTC Lab. 1 Unit.
Emphasis is placed on professional training not of an academic nature. The laboratory is intended for topics such as drill and ceremonies, physical fitness and swimming testing, cruise preparation, cruise evaluation, sail training, safety awareness, preparation for commissioning, personal finances, insurance, and applied exercises in naval ship systems, navigation, naval operations, naval administration, and military justice. Other topics and special briefings will be conducted as determined by the Chief of Naval Education and Training or the Professor of Naval Science.

ROTCNAVY 11. Introduction to Naval Science. 1 Unit.
This curriculum provides guidelines for introducing students to the organization of the Department of Defense and the naval service, the long-held customs and traditions of the service, basic leadership, ethics and character development, the duties of a junior officer, and basic information concerning shipboard procedures and safety. It is the intent of this course to stimulate the students' interest for study and investigation in future courses. Three hours of lecture per week. Course is offered in the Autumn Quarter.

ROTCNAVY 12. Sea Power. 2 Units.
Traces the U.S. historical evolution of sea power, its concepts, theories and applications. Emphasizes the impact of world situation, U.S. national interest, changing technology, and naval leadership on the evolving concept of sea power. Relates historical developments to current trends. Examines briefly the U.S. Merchant Marine's and the former Soviet Navy's impact on sea power policy formulation. Two hours of lecture per week. Course is offered in the Winter/Spring Quarter.

ROTCNAVY 20. Evolution of Warfare. 2 Units.
Progressive analysis of the evolution of warfare from the ancient world to the present. Emphasis placed on causes of continuity and/or change of methods, as well as the influence of economic, moral, political, and technological factors on strategic thought. Three hours of lecture per week. Course is offered in the Winter/Spring Quarter.

ROTCNAVY 21. Leadership and Management. 2 Units.
This course will cover basic management, decision making, and moral leadership. The student will learn to establish meaningful goals, prioritize among competing demands, and plan and forecast in a task-centered organization. The course includes exposure to measures of organizational effectiveness, methods to overcome resistance to change, effective communications, and techniques to aid in counseling, team building, and resolution of disciplinary and personnel matters. Three hours of lecture/discussion/seminar per week. Course is offered in the Autumn quarter.

ROTCNAVY 22. Naval Ship Systems - Engineering. 2 Units.
Principles of design and operation of ships. Emphasis on description and analysis of major types of propulsion plants, both conventional and nuclear. Principles of thermodynamic cycles, electrical theory, power generation and distribution, auxiliary machinery systems. Ship construction, strength and stability in intact and damaged conditions. Factors and design criteria for seaworthiness, structural integrity, and operational employment. Three hours of lecture per week. Prerequisites: MATH 41. Course is offered in the Winter/Spring Quarter.

ROTCNAVY 131. Navigation. 2 Units.
Theory, principles, and procedures of terrestrial and celestial navigation and piloting techniques. A study of coordinating systems, including the celestial coordinate system, nautical charts and publications, position fixing, dead reckoning, nautical astronomy, the theory and methods of celestial navigation, and the theory and prediction of tides and current. Three hours of lecture and one hour of laboratory per week. Course is offered in the Spring Quarter.

ROTCNAVY 132. Naval Operations & Seamanship. 2 Units.
Introduction to the various aspects of ship operations at sea. Principles of terrestrial navigation including the rules of the road for prevention of collisions at sea, vector analysis of relative motion, ship behavior and characteristics in maneuvering, precise ship positioning, use of aids to navigation, meteorology, and electronic navigation. Three hours of lecture and one hour of laboratory per week. Prerequisites: ROTCNAVY 131 or consent of instructor. Course is offered in the Winter/Spring Quarter.

ROTCNAVY 141. Naval Ship Systems - Weapons. 2 Units.
An introduction to the physical theory of acoustic and electromagnetic wave generation and propagation; the design and use of electronic, electromechanical, and pneumatic systems; and the combination of these systems to perform detection and analysis of objects sharing and traversing common environments. Three hours of lecture per week. Course is offered in the Autumn Quarter.

ROTCNAVY 142. Leadership and Ethics. 2 Units.
This course is the capstone leadership course. It is intended to provide the ethical foundation and tools required for success as a leader of a diverse work force, often under circumstances of substantial stress. The course is divided between the art of leadership and the technical aspects of integrating personnel development with the management of resources, although the emphasis is on leadership. It is designed to be given as a seminar or lecture/discussion in which principles, concepts, and concrete subjects are presented, discussed, and debated. Three hours of lecture/discussion/seminar per week. Prerequisites: Consent of instructor. Course is offered in the Winter/Spring Quarter.

ROTCNAVY 154. Littoral Warfare. 2 Units.
An analysis of the theory, origins, historical evolution, and impact of man's attempts to project sea power ashore. A case study approach is used to study major developments in amphibious warfare. Three hours of lecture per week. Course is offered in the Winter/Spring Quarter.

GRADUATE EDUCATION (VPGE)

The Office of the Vice Provost for Graduate Education (VPGE) works collaboratively to ensure that every graduate student has the best possible education. VPGE's initiatives and resources enrich students' academic experiences at Stanford, advancing diversity, preparing engaged global citizens and leaders, and positioning Stanford at the forefront of innovation in graduate education.VPGE serves Stanford's doctoral, master's, and professional degree students from all seven Stanford schools. VPGE plays a leadership role in providing University-wide graduate policy interpretation and implementation, as well as developing initiatives that enhance and complement the offerings of the departments and programs that have primary responsibility for organizing and delivering graduate education.

The VPGE office has five primary areas of program activity: administering University-wide graduate fellowship programs; advancing graduate student diversity, inclusion, equity, and belonging; providing professional development programs and learning opportunities; promoting interdisciplinary and cross-school learning and collaborations; and encouraging academic innovation in graduate programs. The Vice Provost for Graduate Education and Postdoctoral Affairs reports to the Provost.

Academic Policies

The Faculty Senate Committee on Graduate Studies (https://registrar.stanford.edu/faculty/academic-senate-committees/committee-graduate-studies-c-gs/) (C-GS) formulates university policy governing the substance and process of graduate education, including advising expectations, candidacy requirements, dissertation committees, and joint degree programs. C-GS is also charged to review graduate interdisciplinary programs (IDPs) in order to recommend renewals or discontinuation of the IDPs and to receive proposals for new IDPs, or other new graduate degree programs. Committee members include the Vice Provost for Graduate Education and Postdoctoral Affairs or delegated staff (ex officio) and representatives from the faculty at large appointed by the Faculty Senate, administration such as the Office of the University Registrar (ex officio), and graduate students. The Graduate Student Council and the Nominations Committee of the Associated Students of Stanford University (ASSU) choose student members.

VPGE recommends, promulgates, and interprets University policies related to graduate education. The Graduate Academic Policies and Procedures (http://gap.stanford.edu) (GAP) handbook is the primary source for policies affecting all Stanford graduate students, including policies recommended by C-GS and approved by the Faculty Senate. Several policies referenced frequently include:

General Requirements, Progress and Milestones

Policies related to registration, enrollment, residency, academic milestones and advising; see GAP 3. General Requirements, Progress and Milestones (https://gap.stanford.edu/handbooks/gap-handbook/chapter-3/).

Degree-Specific Requirements, Progress and Milestones

Policies specifically related to master's, coterminal, professional, doctoral, and joint degrees including doctoral dissertation policies; see GAP 4. Degree-Specific Requirements, Progress and Milestones (https://gap.stanford.edu/handbooks/gap-handbook/chapter-4/).

The ExploreDegrees section of this bulletin outlines University-level policies guiding admissions, financial aid, enrollment, degree progress, and graduation. The graduate programs tabs of each department's section outlines specific department degree requirements. Additional information on professional school programs is available from the Graduate School of Business, the School of Law, and the School of Medicine.

Changes of Enrollment Status

Policies related to degree or enrollment changes, degree conferral, leaves of absence or discontinuations, exchange programs, and pregnancy, childbirth and adoption; see GAP 5. Changes of Enrollment Status (https://gap.stanford.edu/handbooks/gap-handbook/chapter-5/).

Graduate Student Funding

Policies related to graduate student funding including fellowships and research and teaching assistantships; see GAP 7. Graduate Student Funding (https://gap.stanford.edu/handbooks/gap-handbook/chapter-7/) and Administrative Guide 10.2. Graduate Student Employment on Campus (https://adminguide.stanford.edu/chapter-10/subchapter-2/).

Honor Code and Fundamental Standard

Graduate students must also follow the University's Honor Code (https://communitystandards.stanford.edu/policies-and-guidance/honor-code/) and Fundamental Standard (https://communitystandards.stanford.edu/policies-and-guidance/fundamental-standard/), which establish the conditions for academic work and set the standard of conduct for students at Stanford, respectively. The interpretations and applications of the Honor Code, the Student Judicial Charter of 1997, the Student Conduct Penalty Code, statistics, and other documents are available through the Office of Community Standards (https://communitystandards.stanford.edu/).

Academic Advising

Effective academic advising is critical to graduate education. At Stanford, all matriculated graduate students are to be advised by a member of the faculty.

The University policies on advising and the conduct of research listed below apply to all faculty and the graduate students they advise. In addition, departments and programs are required to establish specific expectations and requirements for academic advising and should inform graduate students and faculty of these policies. Additional information and resources about advising can be found on the VPGE's Advising & Mentoring web pages (https://vpge.stanford.edu/academic-guidance/advising-mentoring/).

- Policy specifying that all matriculated graduate students must be advised by a faculty member, to be designated within students' first quarter of enrollment, and that all graduate degree programs must explicitly state their minimum advising expectations, distributed annually to faculty and students; see GAP 3.3. Academic Advising (https://gap.stanford.edu/handbooks/gap-handbook/chapter-3/subchapter-3/).
- Stanford's policies and practices related to the conduct of research, including obligations to students, staff, and sponsors; see Research Policy Handbook 1. Conduct of Research (https://doresearch.stanford.edu/policies/research-policy-handbook/conduct-research/).
- Policy articulating that all members of the Stanford community are responsible for sustaining the University's highest ethical standards and values; see Administrative Guide 1.1.1. University Code of Conduct (https://adminguide.stanford.edu/chapter-1/subchapter-1/policy-1-1-1/).
- Elaboration of the GAP Academic Advising policy, including change of adviser procedures; see the "Graduate Advising and Credentials (p. 80)" section of this bulletin.

As of September 2019, every graduate-level, degree-granting department or program at Stanford (other than the professional degree programs of JD, MBA, and MD) must have a designated faculty member who

oversees graduate studies, commonly known as "Director of Graduate Studies" (DGS); see GAP 3.4. Faculty Directors of Graduate Studies (https://gap.stanford.edu/handbooks/gap-handbook/chapter-3/subchapter-4/page-3-4-1/). DGSs serve as primary liaisons between graduate students, faculty in their programs, the Chair or Director, the School, and the University.

Research Policies

Graduate education and research are interrelated enterprises. Many Stanford graduate students conduct research under the guidance and sponsorship of Stanford faculty members. The Research Policy Handbook (https://doresearch.stanford.edu/policies/) (RPH), overseen by the Office of the Vice Provost and Dean of Research, articulates policies governing research. Several policies that are most relevant to graduate education include:

Academic Authorship

Guidelines related to academic authorship, such as the allocation of responsibility and credit for scholarly publications; see Research Policy Handbook memo 1.5, On Academic Authorship (http://doresearch.stanford.edu/policies/research-policy-handbook/conduct-research/academic-authorship/).

Intellectual Property

Policies on copyrights and patents resulting from University work. Graduate students and postdoctoral scholars, as well as all faculty, staff, and visitors engaged in research, must sign the Stanford University Patent and Copyright Agreement (SU-18). For complete text of the currently applicable versions of these policies, see Research Policy Handbook chapter 9, Intellectual Property (http://doresearch.stanford.edu/policies/research-policy-handbook/intellectual-property/).

Openness in Research

Policy on openness in research, such as the principle of freedom of access by all interested persons to the underlying data, processes, and final results of research. Stanford University does not accept funding for research projects that require secrecy. For complete text of the currently applicable version of this policy, see Research Policy Handbook memo 1.4, Openness in Research (http://doresearch.stanford.edu/policies/research-policy-handbook/conduct-research/openness-research/).

Relationships between Students and Outside Organizations

Summary of policies on the establishment of relationships between students and outside entities, such as private companies or nonprofit organizations, as part of or outside the student's academic program at Stanford. This covers open versus proprietary nature of the work, ownership of intellectual property, and possible conflicts of commitment and interest. For complete text of the currently applicable versions of these policies, see Research Policy Handbook memo 10.6, Relationships Between Students (Including Postdoctoral Scholars) and Outside Entities (http://doresearch.stanford.edu/policies/research-policy-handbook/non-faculty-research-appointments/relationships-between-students/).

Research Compliance

Several administrative panels review and approve research projects to safeguard the rights and welfare of all human research subjects, ensure the humane care and use of laboratory animals, and protect the safety of personnel and the general public in the areas of biosafety and radiological safety. For more information, contact the Research Compliance Office (http://researchcompliance.stanford.edu).

Research Misconduct

Policy on allegations, investigations, and reporting of research misconduct. Each member of the University community has a responsibility to foster an environment which promotes intellectual honesty and integrity, and which does not tolerate misconduct in any aspect of research or scholarly endeavor. For complete text of the currently applicable version of this policy, see Research Policy Handbook memo 1.7, Research Misconduct: Policy on Allegations, Investigations and Reporting (http://doresearch.stanford.edu/policies/research-policy-handbook/conduct-research/research-misconduct-policy-allegations/).

Graduate Fellowships

Several University-wide graduate fellowship programs are administered by VPGE.

The Stanford Graduate Fellowship in Science and Engineering (http://sgf.stanford.edu) (SGF) program awards approximately 100 two- and three-year fellowships providing tuition support and stipend to exceptional incoming and continuing doctoral students in the natural and social sciences, education, engineering, and the basic sciences in the School of Medicine.

The Stanford Interdisciplinary Graduate Fellowship (http://sigf.stanford.edu) (SIGF) program awards fellowships on a competitive basis to doctoral students engaged in interdisciplinary research that crosses traditional disciplinary boundaries. Doctoral students in the first three years of graduate study are eligible to apply.

The EDGE (Enhancing Diversity in Graduate Education) Doctoral Fellowship (https://vpge.stanford.edu/fellowships-funding/enhancing-diversity-graduate/) program supports the recruitment and academic success of outstanding doctoral students who have the potential to enhance the diversity, broadly defined, of their academic disciplines and fields.

The DARE (Diversifying Academia, Recruiting Excellence) Doctoral Fellowship Program (https://vpge.stanford.edu/fellowships-funding/dare/) awards two-year fellowships to advanced doctoral students who want to investigate and prepare for academic careers and whose presence will help diversify the professoriate.

VPGE also administers several smaller University-wide fellowships (https://vpge.stanford.edu/fellowships-funding/all/) for new and continuing doctoral students, either by application or by nomination by faculty or deans.

Graduate Diversity

In its long-range vision (https://ourvision.stanford.edu/microsites/ideal-homepage/), Stanford strives "to ensure that a diversity of cultures, races and ethnicities, genders, political and religious beliefs, physical and learning differences, sexual orientations and identities is thriving on our campus. Such diversity will inspire new angles of inquiry, new modes of analysis, new discoveries and new solutions."

The Presidential IDEAL (Inclusion, Diversity, Equity and Access in a Learning community) Initiative (http://ourvision.stanford.edu/design-teams/microsites/ideal-homepage/) is about the future of Stanford. IDEAL's objective is to move the institution culturally to the future. The charge of the IDEAL Initiative is to create positive change in these factors in the Stanford campus community. The success of our teaching and research missions depend on doing this well. If we can create positive change in these areas, then we will make Stanford better for everyone.

The VPGE office was founded on a commitment to diversity and inclusion, and it continues its mission now as part of the IDEAL leadership team. VPGE works collaboratively within the University to broaden the participation and promote the academic success of graduate students from a variety of backgrounds, including those underrepresented within research universities. As a result, the Stanford community reaps the educational benefits of diversity, while preparing future generations of leaders for a global society.

Specifically, VPGE works to enhance the diversity (broadly defined) of the graduate student population (https://vpge.stanford.edu/diversity-

initiatives/overview/) by supporting a variety of recruitment and retention programs in collaboration with faculty and staff in each of the schools to foster inclusion and belonging within the university community. VPGE funds recruitment activities to expand the pool of qualified applicants.

The EDGE (Enhancing Diversity in Graduate Education) Doctoral Fellowship (https://vpge.stanford.edu/fellowships-funding/enhancing-diversity-graduate/) program supports the recruitment and academic success of outstanding doctoral students who have the potential to enhance the diversity, broadly defined, of their academic disciplines and fields.

VPGE also works collaboratively to develop programs that improve retention in graduate school and cultivate interest in academic careers and diversify the pipeline for future faculty.

The DARE (Diversifying Academia, Recruiting Excellence) Doctoral Fellowship Program (https://vpge.stanford.edu/fellowships-funding/dare/) awards two-year fellowships to advanced doctoral students who want to investigate and prepare for academic careers and whose presence will help diversify the professoriate.

VPGE Programs

Professional Development

Leadership, pedagogy, communication, working in teams, career development, and entrepreneurship are topics of interest to graduate students across the University. VPGE collaborates with many campus partners to raise the visibility and expand the breadth of offerings to support graduate students' professional development and academic success (https://vpge.stanford.edu/professional-development/overview/). VPGE developed the interactive Graduate Professional Development Framework (https://vpge.stanford.edu/professional-development/framework/) to help graduate students navigate graduate school and locate resources and learning opportunities for acquiring the skills and experiences they need to succeed at Stanford and in their future careers. VPGE also provides resources and information to help students prepare for faculty careers (https://vpge.stanford.edu/professional-development/career-planning/preparing/) and to guide students who are interested in careers in higher education administration pathways (https://vpge.stanford.edu/professional-development/career-planning/phd/).

Interdisciplinary Learning

VPGE fosters interdisciplinary and cross-school learning opportunities (https://vpge.stanford.edu/interdisciplinary-learning/overview/) and networking for graduate students. The Stanford Graduate Summer Institute (http://sgsi.stanford.edu) (SGSI) offers noncredit interdisciplinary immersive courses exclusively for Stanford graduate students and postdoctoral scholars. VPGE also seeks to facilitate enrollment in courses outside of students' home departments and schools by identifying courses relevant and open to students from diverse disciplines (https://vpge.stanford.edu/professional-development/courses/).

Innovation in Graduate Programs

Academic departments and programs are foundational to graduate education at Stanford. VPGE supports faculty- and student-initiated innovations within and across degree-granting programs.

SCORE (Strengthening the Core) Academic Innovation Funds (https://vpge.stanford.edu/fellowships-funding/score/) support one-year, faculty-led projects that explore and experiment with new approaches to graduate education, including course redesigns, interdisciplinary research symposia, and mentoring programs.

Student Projects for Intellectual Community Enhancement (https://vpge.stanford.edu/fellowships-funding/student-projects-intellectual/) (SPICE) funds allow graduate students to develop projects and activities that promote intellectual community in their departments and beyond.

The Diversity and Inclusion Innovation Fund (https://vpge.stanford.edu/fellowships-funding/diversity-innovation-funds/) (DIF) supports Stanford graduate students and postdoctoral scholars in the development of projects that advance diversity (broadly defined) within those populations at Stanford and in the community beyond campus.

Staff

Vice Provost for Graduate Education and Postdoctoral Affairs: Stacey F. Bent

Associate Vice Provost for Graduate Education and Postdoctoral Affairs: John Boothroyd

Associate Vice Provost for Graduate Education and Director, EDGE Doctoral Fellowship Program: Chris Gonzalez Clarke

Associate Vice Provost for Graduate Education: Helen J. Doyle

Director of Finance, Fellowships, and Operations: Rebecca Jantzen

Assistant Vice Provost and Director, DARE Doctoral Fellowship Program: Anika Green

GRADUATE SCHOOL OF BUSINESS

The mission of the Stanford Graduate School of Business is to create ideas that deepen and advance the understanding of management, and with these ideas, develop innovative, principled, and insightful leaders who change the world.

The two-year Master of Business Administration (M.B.A.) degree program prepares change agents to make a meaningful impact in the world through leadership of business, government, and social-sector organizations. The general management curriculum rests on a foundation of social science principles and management functions, tailored to each student's background and aspirations. Interdisciplinary themes of critical analytical thinking, creativity and innovation, and personal leadership development differentiate the Stanford M.B.A. experience. Each M.B.A. student undertakes a global experience to provide direct exposure to the world's opportunities. A Joint Degree Program (p. 70) allows Stanford students to combine the M.B.A. with degrees in the Graduate School of Education (M.A.), the School of Engineering (M.S. in C.S., M.S. in E.E.), the Stanford Law School (J.D.) as well as interdisciplinary degrees in Public Policy (M.P.P.) and in Environment and Resources (M.S.). Dual Degree programs are offered with the School of Medicine (M.D./M.B.A) and the program in International Policy Studies (M.A. in IPS/M.B.A).

The primary criteria for admission are intellectual vitality, demonstrated leadership potential, and personal qualities and contributions. No specific undergraduate major or courses are required for admission, but experience with analytic and quantitative concepts is important. Almost all students obtain one or more years of work experience before entering, but a few students enroll directly following undergraduate study.

The Stanford Master of Science in Management for Experienced Leaders Program (MSx) is an intensive, one-year course of study for middle-management executives leading to the degree of Master of Science in management. Participants generally have eight or more years of work experience, with at least five years of management experience. Some students are sponsored by their company, but most are self-sponsored.

The Doctor of Philosophy (Ph.D) degree program is designed to develop outstanding scholars for careers in research and teaching in various fields of study associated with business education. Students focus on one of seven discrete areas of study including accounting, economic analysis and policy, finance, marketing, operations information and technology, organizational behavior, and political economy.

For detailed information on programs, curricula, and faculty, see the School's (http://gsb.stanford.edu) web site.

Emeriti: (Professors) David P. Baron, Mary E. Barth*, William H. Beaver, Charles P. Bonini, David W. Brady, Paul Brest**, Alain C. Enthoven, Robert J. Flanagan, Michael T. Hannan, J. Michael Harrison, Chip Heath, Charles A. Holloway, Robert L. Joss*, David M. Kreps*, David F. Larcker, Joanne Martin, James R. Miller III, David B. Montgomery, Margaret Ann Neale*, George G. C. Parker*, James Patell, Jerry I. Porras, Evan L. Porteus, Michael L. Ray, Stefan Reichelstein*, D. John Roberts, Myron S. Scholes, William F. Sharpe, George P. Shultz, Kenneth J. Singleton, A. Michael Spence, Venkataraman Srinivasan, James C. VanHorne, Seungjin Whang, Robert B. Wilson*

Dean: Jonathan D. Levin

Senior Associate Deans: Brian Lowery, Maureen McNichols, Paul Oyer, Sarah A. Soule, Lawrence M. Wein

Senior Associate Dean for Finance and Administration: Rajkumar Chellaraj

Associate Deans: Derrick Bolton, Margaret Hayes, Page Hetzel, David Weinstein

Assistant Deans: Dianne Le, Grace Lyo, Kirsten Moss, Jamie Shein, Charlotte Toksvig, Julie Williamsen

Professors: Jennifer L. Aaker, Anat R. Admati, Susan Athey, William P. Barnett, Jonathan Bendor, Lanier Benkard, Jonathan B. Berk, Jeremy I. Bulow, Robert A. Burgelman, Steven Callander, Glenn R. Carroll, Peter M. DeMarzo, J. Darrell Duffie, Yossi Feinberg, Francis J. Flynn, George Foster, Steven R. Grenadier, Deborah H. Gruenfeld, Wesley Hartmann, Guido Imbens, Charles I. Jones, Ron Kasznik, Daniel P. Kessler, Roderick M. Kramer, Keith Krehbiel, Arvind Krishnamurthy, James M. Lattin, Edward P. Lazear, Charles M.C. Lee, Hau L. Lee, Jonathan Levav, Jonathan D. Levin, Brian S. Lowery, Hanno Lustig, Neil Malhotra, Maureen F. McNichols, Haim Mendelson, Dale T. Miller, Benoit Monin, Harikesh S. Nair, Charles A. O'Reilly III, Michael Ostrovsky, Paul Oyer, Jeffrey Pfeffer, Paul C. Pfleiderer, Joseph D. Piotroski, Erica L. Plambeck, Hayagreeva Rao, Joshua Rauh, Peter C. Reiss, Condoleezza Rice, Garth Saloner, Yuliy Sannikov, Amit Seru, Kathryn L. Shaw, Baba Shiv, Kenneth W. Shotts, Itamar Simonson, Andrzej Skrzypacz, Jesper Sørensen, Sarah A. Soule, Ilya Strebulaev, Zakary Tormala, Lawrence M. Wein, S. Christian Wheeler, Stefanos Zenios, Jeffrey H. Zwiebel

Associate Professors: Mohammad Akbarpour, Mohsen Bayati, Anne Beyer, Konstantinos Bimpikis, Katherine Casey, Sebastian Di Tella, Rebecca Diamond, Brandon Gipper, Amir Goldberg, Yonatan Gur, Nir Halevy, Szu-chi Huang, Dan Iancu, Saumitra Jha, Michal Kosinski, Peter Koudijs, Rebecca Lester, Matteo Maggiori, Ivan Marinovic, Sridhar Narayanan, Aruna Ranganathan, Navdeep Sahni, Paulo Somaini, Adina Sterling, Takuo Sugaya, Christopher Tonetti, Gabriel Weintraub, Kuang Xu, Ali Yurukoglu

Assistant Professors: Jonathan Atwell, Juliane Begenau, Justin Berg, Laura Blattner, Greg Buchak, Jung Ho Choi, Julien Clement, Octavia D. Foarta, Benjamin Hebert, John Kepler, Jinhwan Kim, Yewon Kim, Ashley Martin, Gregory Martin, Suzie Noh, Claudia Robles-Garcia, Daniela Saban, Kevin Smith, Jann Spiess, Stephanie Tully, Susana (Shosh) Vasserman, Stefan Wager, Chenzi Xu, Weijei Zhong

Courtesy Professors: Avidit Acharya, Eric P. Bettinger, Nicholas Bloom, John H. Cochrane, Geoffrey L. Cohen, Shelley J. Correll, Robert M. Daines, Jens Hainmueller, Carolyn M. Hoxby, Fei-Fei Li, Daniel McFarland, Paul R. Milgrom, Monika Piazzesi, Walter W. Powell, Balaji Prabhakar, Martin Schneider, Kevin Schulman, Ilya Segal, Sara Singer, Robert Sutton, Robb Willer

Lecturers: Douglas Abbey, Matthew Abrahams, Richard Abramson, Burton Alper, Coley Andrews, Federico Antoni, Adi Aron-Gilat, Laura K. Arrillaga-Andreessen, Naomi Bagdonas, Ed Batista, Sven Beiker, Kirk D. Bowman, David L. Bradford, Scott Brady, Melissa Briggs, Dikla Carmel-Hurwitz, Robert B. Chess, Leslie Chin, George Cogan, Susan Colby, Stephen Comello, Andrea Corney, Stuart Coulson, John Cronkite, Stephen Davis, David Demarest, Gary Dexter, Connor Diemand-Yauman, Collin Dobbs, David M. Dodson, Jennifer Dulski, R. James Ellis, Charles Ewald, Peter Francis, Richard P. Francisco, Ricki Frankel, Matthew Glickman, William Guttentag, Kristin Hansen, Mike Harmon, Laura Hattendorf, Keith Hennessey, Samuel Hinkie, Charles Hudson, Sarah Hunter, John Hurley, Jeff Immelt, Brian Jacobs, Sujay Jaswa, Stephen Johnson, Kim Jonker, Efrat Kasznik, David Kaval, Hugh Keelan, Peter B. Kelly, Colin Kessinger, Allison Kluger, Glenn Kramon, Scott Kupor, Gloria Lee, Mark Leslie, Peter Levine, John Lilly, Leo E. Linbeck III, Robert J. Lisbonne, Christopher Mahowald, Kevin Mak, Fern Mandelbaum, Paraag Marathe, Ana Marshall, Kelly McGonigal, William L. McLennan, Hebert McMaster, William F. Meehan III, Thomas Mertens, James Milligan, Lisa Monzon, Patricia Nakache, Raymond Nasr, Heidi Patel, Robert Pearl, Anne Raimondi, Alyssa Rapp, Barry Rhein, Gerald Risk, Dennis M. Watson, Graham Weaver, Donna

Carol Wells, Peter C. Wendell, Maxwell Wessel, Steven Westly, Amy Wilkinson, Donald Wood

Adjunct Professors: H. Irving Grousbeck, Joel C. Peterson

Adjunct Lecturers: Matthew Bannick, Stephen J. Ciesinski, Jaclyn Foroughi, Kathryn Kostopoulos Amarotico, Henry Most, Robert Urstein, Mark Voorsanger

Dean's Fellow: George Osborne

* Recalled to active duty. ** Emeritus Professor from another SU department recalled to active duty.

Accounting Courses

ACCT 152. Introduction to Financial Accounting. 3 Units.
Financial accounting is the measurement of economic activity for decision-making. The objective of this course is not to train you to become an accountant but rather to help you develop into an informed user of financial statement information. Through cases, homework assignments, and classroom discussion, we will focus on understanding the mapping between underlying economic events and financial statements, and on understanding how this mapping affects inferences about future profitability and liquidity. The learning objectives are 1) Understanding accounting rules and terminology and how these are applied to construct financial statements, and 2) building an awareness of the judgment involved and the discretion allowed in choosing accounting methods, making estimates, and disclosing information in financial statements.

ACCT 210. Financial Accounting. 3 Units.
Financial accounting is the measurement of economic activity for decision-making. Financial statements are a key product of this measurement process and an important component of firms' financial reporting activities. The objective of this course is not to train you to become an accountant but rather to help you develop into an informed user of financial statement information. While financial statement users face a wide variety of decisions, they are often interested in understanding the implications of financial statement information for the future cash flows and earnings potential of a firm. We will focus on understanding the mapping between underlying economic events and financial statements, and on understanding how this mapping affects inferences about future profitability and liquidity. The following learning objectives will be emphasized: (1) familiarity with the transactions businesses engage in, (2) fluency in accounting terminology, (3) understanding the structure that maps transactions into accounting numbers, (4) understanding the rationale for various accounting methods, and (5) awareness of the judgment involved and the discretion allowed in choosing accounting methods, making estimates, and disclosing information in financial statements.

ACCT 212. Managerial Accounting: Strategic Performance Management. 2 Units.
This course provides an introduction to the concepts and tools of managerial accounting. The first part of the course covers alternative costing methods and illustrates how the resulting cost information can be used to analyze the profitability of individual products and customers. The second part of the course will examine the role of internal accounting systems in evaluating the performance of individual business segments and divisions of the firm. Included in this part are topics related to the choice of internal pricing methods for transferring goods and services across divisions of the firm and the use of financial metrics for assessing the profitability of these divisions.

ACCT 213. Financial Accounting - Accelerated. 3 Units.
This course develops students' ability to read, understand and critically evaluate corporate financial statements. The course is oriented toward the user of financial accounting data (rather than the preparer) and it emphasizes the reconstruction and interpretation of economic events from published accounting reports. The course is geared toward students who already have had some exposure to basic financial accounting concepts, allowing for more depth and breadth of topic coverage and discussion in class.

ACCT 219. MSx: Accounting. 3 Units.
A characteristic of business is the extensive use of accounting data. The financial accounting course has the general objective of developing students' understanding of the nature, scope, and limitations of accounting information. To achieve this objective the course attempts to: (1) develop students' understanding of the conceptual accounting framework, including the objectives of financial reporting, and (2) develop students' ability to understand and critically evaluate the financial disclosures made by corporations. An issue of particular interest will be the managerial incentive aspects of accounting information and disclosures.

ACCT 311. Global Financial Reporting. 3 Units.
This course is designed to enhance students' understanding of current financial reporting issues through a detailed analysis and comparison of U.S. GAAP and International Financial Reporting Standards. The course will cover the development of accounting standards, implementation of these standards, and how to interpret output from these standards. The course highlights intermediate and advanced financial reporting topics including fair value accounting, asset securitization, consolidation including special purpose entities, foreign currency translation, derivatives and hedging, leases, revenue recognition, pensions, and equity compensation. The course also focuses on evaluating emerging financial reporting issues such as proposed financial reporting standards put forth by U.S. or international standard setting bodies. This course should help students better understand the environment governing global financial reporting and how firms develop financial statement information within this environment.

ACCT 313. Accounting-Based Valuation. 3 Units.
This course is designed to develop students' ability to interpret and use financial accounting information, primarily in a valuation context. The perspective taken is that of an outsider relying on publicly available financial information for investment purposes. The course relies heavily upon financial statement analysis tools and the economic profit-based valuation framework. Through lectures, in-depth case studies, and real-time exercises, the first half of the course covers traditional financial statement analysis-based tools for critically analyzing and assessing a firm's current financial performance and economic condition, including ratio analysis, accounting quality analysis and financial distress / bankruptcy prediction models. The second half of the course introduces the accounting-based valuation framework and develops the link between financial statement analysis, forecasting and firm value. The capstone to the course is the completion of a comprehensive, real-time valuation of a publicly traded firm (or registered IPO candidate). The course is structured for students to gain a deeper understanding of the economic pressures behind the valuation creation and valuation process. The course will be useful to those students who anticipate making investment or credit decisions at least partially based on historical and prospective financial statement information, and those who want to have a better understanding of how to use financial information to assess whether and how any organization is creating value through its operations and strategic actions.

ACCT 317. Managerial Accounting: Performance Measurement, Compensation, and Governance. 3 Units.
The course will examine the academic and professional controversies surrounding corporate governance and executive compensation. A basic framework will be developed to integrate the many important dimensions of corporate governance in the U.S. and international be able to (i) understand the debates about appropriate choices for corporate governance and executive compensation, (ii) critically evaluate the implications of academic and professional research studies on these controversial issues, and (iii) make practical decisions about corporate governance in a business setting.

ACCT 332. Mergers and Acquisitions. 3 Units.
This course provides a comprehensive overview of strategic, economic, and financial issues related to mergers and acquisitions. Specifically, we review the market for corporate control, discuss strategic issues related to firms' decision to acquire or be acquired, and examine the M&A regulatory environment. We analyze various valuation and deal structure considerations, identify strategies that underlay a successful negotiation, and review the financial reporting and income tax implications of M&A transactions. In covering these and other related issues, we will discuss both the theory and practice of mergers and acquisitions. To provide some specific context we will analyze several M&A deals (e.g., Google/Motorola, Disney/Fox, UpJohn/Pharmacia, Oracle/PeopleSoft, and many more). In discussing these cases, we will examine the situation faced by the company, the issues surrounding the transaction, including the financial implications, and focus on the managerial incentives and the judgment applied. We will also review some of the related literature in accounting, economic, and finance, to gain broader perspectives and insights into the financial issues associated with M&A transactions. Class time comprises mini lectures that introduce some of the more technical concepts, case discussions, and guest speakers who will offer additional perspectives on the subject matters. The course is co-taught by Ron Kasznik (GSB) and Safra Catz (Oracle Corporation). Ms. Catz is the CEO of Oracle Corporation and a member of its Board of Directors. She has led Oracle through more than 100 acquisitions in recent years (including PeopleSoft, Siebel, BEA, Sun Microsystems, and more). Prior to joining Oracle in 1999, Ms. Catz was Managing Director at Donaldson, Lufkin & Jenrette, a global investment bank (now part of CSFB). Ms. Catz currently also serves on the board of directors for Walt Disney.

ACCT 333. Taxes and Business Strategy. 3 Units.
Traditional business courses analyze an array of factors affecting business decisions but provide little systematic consideration of the role of taxes. By contrast, tax accounting courses traditionally concentrate on technical legal and administrative issues while ignoring the environment in which taxes enter an individual's or firm's decision. This case-based course intends to bridge this gap by providing a framework for recognizing how taxes affect strategic personal and business decisions and gaining experience analyzing a wide range of tax-related issues. The key themes of the framework - all parties, all taxes and all costs - are applied to decision contexts such as investments, retirement planning, cash and equity compensation, organizational form, tax planning for multiple jurisdictions, and M&A. The goal of this course is to provide an approach to thinking about taxes that will be valuable across jurisdictions even as laws change.

ACCT 340. Alphanomics: Informational Arbitrage in Equity Markets. 4 Units.
This is an advanced elective course on the economics of active investing in public equity markets. We will cover a set of foundational skills needed to select, and manage, a portfolio of public stocks. Specifically, the course material is designed to improve student skills in: (1) assessing the relative attractiveness of individual companies, (2) building stock screens to filter and rank firms based on user-specified parameters, (3) buying and shorting individual equity positions, and (4) monitoring and managing portfolio risk. This is a hands-on course with an emphasis on experiential learning. Students will make extensive use of the analytical tools. Some of the classes will be held in the "Real-time Analytics and Investment Lab" (R.A.I.L.) facility in the Bass Center. There is no final exam. However, there will be a number of individual cases and a final group project. 25% of the grade will be based on class participation, and 75% will be based on cases and projects. Because it is an advanced elective, students taking this class are expected to be well versed in core economic, accounting, and finance skills. Material covered in a second Financial Modeling course, as well as in Accounting 312 (Evaluating Financial Statement Information) and Accounting 313 (Accounting-based Valuation) will come in handy. However, none of these courses are required.

ACCT 354. Analysis and Valuation for Event-Driven Investing. 3 Units.
This Bass seminar is designed to develop students' ability to interpret and use financial accounting information in credit and equity valuation contexts. The course will focus on valuing the securities of companies undergoing significant changes as a result of litigation, restructuring, regulatory changes, mergers, spin-offs or significant industry shifts. Throughout the course, students will (1) enrich their understanding of how alternative economic, legal, political and regulatory outcomes affect the value of various components of a company's capital structure and (2) develop their ability to apply financial statement analysis to assess the likelihood and valuation implications of the events of interest. nnnEvent-driven investing follows the life cycle of companies as they revamp their corporate structures in response to economic and regulatory environments. For example, in rising economic periods companies may undertake acquisitions or spin off divisions to enhance shareholder value. During adverse environments, bankruptcy and reorganizations often reshape the capital structure by offering opportunities to create value through the restructuring process. During economic transitions, debt and equity investors may make significantly different assessments of the quality of a company's earnings, its assets, and its likelihood to meet its debt obligations. To assess the probability of corporate events, investors must make judgments about the quality of a company's earnings and assets and understand how accounting policies may influence management's representations. Investors must also interpret how accounting policies function at various points in a firm's life cycle, influencing the quality of earnings for firms differently in different economic environments. nnnIn the first half of the course, we will develop the course framework, and apply it to illustrative cases. Companies featured in past years include Tyco, AIG, CIT, Fannie Mae, Tesla, Pharmasset and Gilead and Commerzbank. Students will interpret information from companies' public financial disclosures to assess the likelihood of different events or outcomes. The course will also feature readings on current accounting standards, articles from the popular press, publicly available financial statement information, and guest speakers with in-depth knowledge of investing strategies vis a vis the case companies. nnnThe latter part of the course will be devoted to project work, with students working in teams to develop an event-driven investing strategy. The aim is to allow students to conduct independent research on a company, industry, economic context, or financial reporting environment of particular interest. Students will develop their investment idea, articulate their sense of the possible outcomes for the components of the firm's capital structure, and explain how they have assessed the likelihood and valuation consequences of those outcomes. At the conclusion of the course, students will present their strategies to the class and a panel of expert judges.

ACCT 516. Analysis and Valuation of Emerging Market Firms. 2 Units.
This course examines the unique institutional, governance and transparency issues affecting corporate valuations in emerging markets. Through lectures, case discussions and the students' real-time analysis of an emerging market firm, this condensed course is structured for students to gain a deeper understanding of the economic pressures behind the value creation, value destruction, and valuation process in emerging economies. The course focuses on critically interpreting financial and non-financial information for purposes of assessing firm fundamentals and corporate governance risk in the presence of weak legal systems, strong political forces, limited investor protections, limited market development, strong macro-economic forces, opacity and resultant business arrangements. The course is beneficial for investors, consultants, managers, and entrepreneurs operating in or considering expansion to developing markets.

ACCT 523. Board Governance. 2 Units.
This course is focused on helping students understand the role boards and board members play in corporate governance and the lives of businesses large and small. This case-driven course is designed to help students who plan to serve on boards as private-equity or venture investors, entrepreneurs who will need to assemble and manage boards, and executives who realize they will need to interact with and answer to boards.The course is designed to help students understand the issues boards face ¿ both routine and non-routine ¿ through the eyes of the board member. By understanding the roles and responsibilities of board members and the mechanisms though which they exercise these duties, students will come away with an understanding of how boards function effectively (and in too many cases fail to function effectively). The course will include examining boards in a variety of contexts with a focus on three types of situations: public for-profit companies, early-stage private companies, and not-for-profit companies of different sizes.

ACCT 524. Individual Taxes and Financial Planning. 2 Units.
The goal of this course is to provide a fundamental understanding of the principles of taxation and tax planning as they relate to personal income taxes and considering an individuals financial position. Traditional business courses analyze an array of factors affecting business decisions but provide little systematic consideration of the role of taxes in individual financial planning decisions. By contrast, tax accounting courses traditionally concentrate on technical legal and administrative issues while ignoring the environment in which taxes enter an individual's decision-making. This case-based course intends to bridge this gap by discussing how taxes affect a variety of personal financial planning decisions.

ACCT 542. Corporate Taxes and Business Strategy. 2 Units.
The goal of this course is to provide a fundamental understanding of the principles of business taxation and tax planning, which will be relevant and valuable even as tax laws change - over time, across borders, and by taxpayer type. The role that taxes may play in business decisions are presented within an "all taxes, all parties, all costs" framework, from the tax issues at start-up (e.g., the choice of organizational form for a new venture), multistate and multinational operations, financial accounting implications, and mergers and acquisitions. We will use cases to gain hands' on experience analyzing business tax strategies and refer to financial statement disclosures as appropriate so that you can learn how taxes affect the financial reporting for transactions. A recurring theme will be linking the tax strategies that we learn with concepts from corporate finance, financial accounting, business law, and economics.

ACCT 609. Financial Reporting and Management Control. 3 Units.
This course is aimed at doctoral students in accounting and neighboring fields including economics, finance, political economics and operations management. The course seeks to provide an introduction to the role of accounting information in (i) measuring firm performance, (ii) projecting profitability and firm value for external constituents, (iii) and motivating and controlling the firm's management. The main topics covered in this course include: 1. Profitability Measurement and Accrual Accounting. 2. Performance Evaluation and Managerial Incentives. 3. Accounting-based Equity Valuation. 4. The Informational Role of Accounting Numbers 5. Earnings Quality Constructs and Measures. The primary objective of the course is to introduce students to current research paradigms on these topics and to identify promising avenues for future research. The course readings include recent theoretical and empirical papers.

ACCT 610. Seminar in Empirical Accounting Research. 3 Units.
Empirical Research on Financial Reporting: This doctoral-level course covers research on the role of accounting information in capital markets. The focus is on introducing students to key themes in empirical accounting and capital markets research, and to key research designs applied to examine information-related questions. Course topics include the informational role of financial reports, accounting measurement attributes, earnings management, earnings quality, and the role of key actors in the financial reporting environment, including management, investors, auditors, analysts and regulators. n nThe course is interdisciplinary in nature. The readings focus on research design, and key theories, themes and approaches from the accounting, finance, economics and psychology literature. Our overall goal is develop your understanding of existing research and its strengths and limitations, and to identify new research opportunities.

ACCT 611. Disclosure and Financial Markets. 3 Units.
This course provides a broad overview of the economic theories of corporate disclosure, with a focus on the effects that these disclosures have on financial markets. The range of topics we will study include: voluntary disclosure, earnings management, disclosure and trade, disclosure and investor welfare, disclosure and asset prices, and cheap talk and reputation games.

ACCT 612. Financial Reporting Seminar. 3 Units.
The purpose of this PhD seminar is to facilitate your conception and execution of substantive individual research in financial reporting. It provides a vehicle for supplementing and integrating your knowledge of basic research tools and methods, as well as an exposure to the dimensions of contemporary research in the field of financial reporting. The focus of the research we will discuss in this seminar is on global financial reporting. Such research encompasses studies dealing with contemporary financial reporting issues as well as research addressing issues relating to the globalization of financial reporting. Because these issues are also of concern to financial reporting standard setters, we will discuss whether and how the research we study informs standard setting debates. Prerequisite: Consent of the instructor.

ACCT 615. Selected Topics in Empirical Accounting Research. 3 Units.
This course examines selected topics in accounting research. The course features three faculty who will each give a focused look at a given area, introduce students to important questions in that area, key papers in the related literature, and critical aspects of the research designs applied in the area. The aim is to increase student's familiarity with empirical accounting research, their ability to critically evaluate research and research designs, and to prepare students to conduct independent research.

ACCT 617. Applications of Contract Theory in Accounting Research. 3 Units.
This course develops tools from information economics to study the strategic interactions between different agents inside a firm. Common to these studies is that agents acquire private information that is valuable to other parties. The range of applications includes: centralization vs delegation, static and dynamic contracting under moral hazard, Bayesian persuasion, and the optimal design of monitoring/auditing mechanisms.

ACCT 618. Market Efficiency and Informational Arbitrage. 3 Units.
The informational efficiency of stock markets has been a central theme in financial economic research in the past 50 years. Over this period, the focus of academic research has gradually shifted from the general to the more specific. While earlier studies tend to view the matter as a yes/no debate, most recent studies acknowledge the impossibility of fully efficient markets, and focus instead on analyses of factors that materially affect the timely incorporation of information into prices. At the same time, increasing attention is being paid to regulatory and market design issues that either impede or enhance market pricing efficiency.nIn this course, we will cover recent research on the role of informational arbitrage in asset pricing. Our starting point is the observation that, with costly information, equilibrium prices will invariably reflect some mispricing. The existence of mispricing introduces a role for informational arbitrage, whereby some traders will invest resources to become informed about the mispricing, with hopes of profiting from it. We review recent academic evidence on this process, and reflect on its implications for future market-related research. We will also discuss how academic research might help lower information/arbitrage costs.nThis is a doctoral level course. Our goal is not only to review existing research, but also to stimulate new work in the area. As such, I expect it will be of primary interest to Ph.D. students majoring in accounting, finance, and economics. Given our focus on returns prediction and the role of information in arbitrage strategies, this course should be of particular interest to those interested exploring the relation between information flows and market pricing dynamics. nThe course content is interdisciplinary in nature, spanning finance, economics, and accounting. Most of the readings in the earlier readings derive from finance and economics (market efficiency, limits to arbitrage, and behavioral finance); most of the later readings derive from financial accounting (equity valuation, fundamental analysis, earnings management, and analyst behavior).

ACCT 691. PhD Directed Reading. 1-15 Unit.
This course is offered for students requiring specialized training in an area not covered by existing courses. To register, a student must obtain permission from the faculty member who is willing to supervise the reading.
Same as: FINANCE 691, GSBGEN 691, HRMGT 691, MGTECON 691, MKTG 691, OB 691, OIT 691, POLECON 691, STRAMGT 691

ACCT 692. PhD Dissertation Research. 1-15 Unit.
This course is elected as soon as a student is ready to begin research for the dissertation, usually shortly after admission to candidacy. To register, a student must obtain permission from the faculty member who is willing to supervise the research.
Same as: FINANCE 692, GSBGEN 692, HRMGT 692, MGTECON 692, MKTG 692, OB 692, OIT 692, POLECON 692, STRAMGT 692

ACCT 698. Doctoral Practicum in Teaching. 1 Unit.
Doctoral Practicum in Teaching.

ACCT 699. Doctoral Practicum in Research. 1 Unit.
Doctoral Practicum in Research.

ACCT 802. TGR Dissertation. 0 Units.
.
Same as: FINANCE 802, GSBGEN 802, HRMGT 802, MGTECON 802, MKTG 802, OB 802, OIT 802, POLECON 802, STRAMGT 802

Economic Analysis and Policy Courses

MGTECON 200. Managerial Economics. 3 Units.
MGTECON 200 is a base-level course in microeconomics. It covers microeconomic concepts relevant to management, including the economics of relationships, pricing decisions, perfect competition and the "invisible hand," risk aversion and risk sharing, and moral hazard and adverse selection. This year we are piloting a "flipped classroom" where students will be expected to work through the online modules before each class and the time in class will be devoted to solving problems and discussing cases.

MGTECON 203. Managerial Economics - Accelerated. 3 Units.
MGTECON 203 is the more quantitative version of MGTECON 200. It uses basic math such as derivatives and algebra, as opposed to excel simulations and plots. Previous knowledge of economics is not necessary. The business world has become more quantitative and economics-oriented in the last 30 years, but many of the key ideas in economics, relating to topics such as pricing, monopoly, imperfect competition, game theory, moral hazard and adverse selection, public choice, externalities, risk aversion, capital market pricing and equilibrium, and auction theory can all be usefully approached with a relatively small amount of math. The goal is to develop a small number of intellectual tools that enables one to analyze a wide variety of economic problems.

MGTECON 209. MSx: Microeconomics. 3 Units.
This course is an introduction to Microeconomics, focusing on concepts and topics relevant to managerial decision making. Topics include the economics of relationships (reciprocity, reputation, credibility, and transaction-cost economics), maximization via marginal analysis, price discrimination, double-marginalization and distribution channels, perfect competition and the case (such as it is) for competitive markets, externalities, choice under uncertainty, risk sharing and spreading, adverse selection and signaling, and moral hazard and incentives. No prior Economics background is required but students who have not had courses in this area (or not had one in a very long time) may want to "review" at the level of a high-school advanced placement course. Required math background includes ability to solve linear and quadratic equations in one unknown, to solve two simultaneous linear equations, basic differential calculus, ability to work with Excel spreadsheets. It is desirable that students are familiar with the Solver add-on to Excel.

MGTECON 300. Growth and Stabilization in the Global Economy. 3 Units.
This course gives students the background they need to understand the broad movements in the global economy. Key topics include long-run economic growth, technological change, wage inequality, international trade, interest rates, inflation, exchange rates, and monetary policy. By the end of the course, students should be able to read and understand the discussions of economic issues in The Economist, the Wall Street Journal, the New York Times, or the Congressional Budget Office.

MGTECON 327. U.S. Inequality: What Can Business and Policy Do?. 3 Units.
This class will analyze the growth in inequality in the US over the last several decades and how that trend is likely to continue or change in the future. We will ask if and how public policy can affect inequality. We will also focus on business's role -- what are the responsibilities of private sector companies, how does inequality affect them, and how should the growth in inequality affect their strategies? We will look at inequality in income, some of its potential sources, and its effects in other areas. Specifically, we will look at education, housing, the social safety net, migration, and the job market. The class will be very interactive and will be based on readings drawn from academic research, case studies, news, and opinion readings. We will also have guest speakers from industry, government, and non-profits. The class will be co-taught by a GSB labor economist and an advisor to policy makers with decades of business experience.LOGISTICAL NOTE: During the week of May 13, the class will not meet during the regular time slots. Instead, there will be a mandatory, all-day class field trip to explore inequality issues in depth and in person on Wednesday, May 15. If you have an academic-related reason you cannot make the trip, we will assign alternative work. However, the trip is required unless you have a conflicting class or academic obligation.

MGTECON 328. Economics of the Media, Entertainment, and Communications Sector. 3 Units.
This course analyzes business decisions in current and historical cases from the media, entertainment, and communications sector. Topics include (1) pricing, bundling and tiering of media products, (2) horizontal and vertical integration of content, distribution, and hardware, (3) selling and buying advertising, (4) choosing between subscription-funded, advertising-funded, or mixed revenue models, (5) negotiations between content and distribution, (6) exclusive deals, (7) the effect of technology on the news media business, (8) the labor market for entertainment stars, (9) competition and regulation in communications infrastructure, (10) strategy in spectrum auctions, and more. There is an emphasis on combining concepts from economics and statistics with institutional knowledge about the sector. The course format is case discussion, guest speakers from the industry, and discussion of concepts from economics and statistics. Evaluation is based on class participation, completion of reading and written assignments, and a final paper.

MGTECON 331. Health Law: Finance and Insurance. 3 Units.
This course provides the legal, institutional, and economic background necessary to understand the financing and production of health services in the US. Potential topics include: health reform, health insurance (Medicare and Medicaid, employer-sponsored insurance, the uninsured), medical malpractice and quality regulation, pharmaceuticals, the corporate practice of medicine, regulation of fraud and abuse, and international comparisons.

MGTECON 343. The Evolution of Finance. 3 Units.
This course provides a framework to understand how uncertainty and technology affect the evolution of finance (and businesses generally), with heavy emphasis on recent developments and future trends. In recent years Myron Scholes has given about half the lectures with the other half given by prominent guests. The guest list changes year to year but 2017's list included David Booth, Katie Hall, Howard Marks, James Manyika, George Osborne, Kevin Warsh, Tom Kempner, and Larry Summers. Jeremy Bulow may replace Myron for a small number of lectures.

MGTECON 349. Smart Pricing and Market Design. 3 Units.
This course is an Advanced Applications option in the Economics menu. The focus of the course is on pricing mechanisms and the design of marketplaces. The pricing component of the course will handle both traditional topics, such as price differentiation, and more modern ones, such as bundling and dynamic pricing. In the market design component of the course, we will consider such topics as auctions (e.g., designing auctions for selling online advertising slots) and matching (e.g., designing mechanisms for matching students to schools).

MGTECON 381. Contemporary Economic Policy. 3 Units.
Economic issues permeate all that happens in government. This topics-based course will exam a variety of historic and current issues on the political agenda where economics is central to decision making. It is taught by faculty who served at the White House in either the Clinton or George W. Bush Administration.

MGTECON 383. Measuring Impact in Business and Social Enterprise. 3 Units.
This class provides students with practical skills for measuring impact in business and social enterprise. How large is the impact of raising prices on sales? Is an advertising campaign working? Does a non-profit actually improve people's lives? Students will finish the course with the ability to design, analyze, and skeptically evaluate experiments that can rigorously answer questions like these. Students will learn: how to evaluate claims of causality; how to conduct and analyze experiments and quasi-experiments; the advantages and disadvantages of experiments; how to quantify uncertainty; and what can go wrong in experiments. Students will acquire a conceptual understanding of basic experimental statistics to inform these skills. Students will also be exposed to how leading companies, researchers, and social innovators strategically deploy experiments. Finally, students will conduct their own experiments on a topic of their choosing in small groups. The class will not assume any prior experience or training with statistics, math or R. However, completing short problem sets and participation in weekly lab sessions will entail acquiring basic knowledge of R.

MGTECON 513. Platform Competition in Digital Markets. 2 Units.
This class will analyze the economics of digital platform markets. The class format will consist of lectures and guest speakers. Concepts will be presented in the context of leading examples of internet and technology platforms such as online advertising, computing technology platforms (e.g. mobile), marketplaces, social networks, cloud computing, and financial technology platforms. The course will begin with economic definitions of platform markets, and it will review the most important insights from recent research in economic theory and strategy. It will then consider the role of scale economies and network effects in determining the dynamics of platform competition and long-run industry structure. Next, the class will consider key strategic decisions for firms, including entry strategies, vertical integration and exclusive deals.

MGTECON 515. Cryptocurrency. 2 Units.
This class will provide an overview of the rapidly evolving area of distributed ledger and blockchain technologies, with a focus on economic and strategic issues. We will cover key components of the architecture that affect the products derived from cryptocurrency. We then consider tokens as a store of value and exchange, analyzing models of cryptocurrency pricing and as a vehicle for raising of capital. Next, we consider use cases including payments, micropayments, asset registries, and smart contracts. We then analyze barriers to entry in cryptocurrencies, as well as how the new products they enable affect industry structure in both the financial sector and the economy and society as a whole. For example, how might decentralized systems like the blockchain impact the sharing economy? The government? We consider the governance of these decentralized systems and how decentralization affects the potential for the management and success of platforms. We discuss the potential for national digital currencies and the end of cash. Finally, we consider consumer protection, privacy, security, regulation, and the power of governments and regulators over borderless, decentralized systems. Students will benefit from guest lectures by industry and thought leaders.

MGTECON 526. Inclusive Economic Growth and Poverty Reduction in Developing Countries. 2 Units.
Poverty rates have fallen markedly in countries around the world, as more households have joined the lower middle-class. Indeed, though U.S. income inequality has increased, inequality has fallen around the world. However, by developed country standards, poverty remains pervasive. What has caused the decline in rates of poverty and can we expect further decreases or can we act to accelerate the improvements? One answer is that countries that have experienced "inclusive growth", in which the growth of the economy (i.e., GDP) has elevated the incomes of the poor, have done better at creating jobs for the poor, especially in the private sector. Therefore, the class will consider the evidence on the factors that have contributed to inclusive economic growth in developing countries. A second answer as to why poverty has fallen, but remains at high levels, is that governments and aid agencies and foundations have targeted programs to the poor. This course discusses macroeconomic policy, targeted government policies, aid, and entrepreneurship in developing countries. Examples will be given from Latin America, South Asia, and Africa. The course is co-taught by a Stanford economist and a World Bank consultant and will build on examples from recent experiences. The class is aimed at GSB students who are either intellectually curious about the topic or anticipate doing business in developing countries.

MGTECON 527. Business and Public Policy Perspectives on U.S. Inequality. 2 Units.
This class will analyze the growth in inequality in the US over the last several decades and how that trend is likely to continue or change in the future. We will ask if and how public policy can affect inequality. We will also focus on business's role -- what are the responsibilities of private sector companies, how does inequality affect them, and how should the growth in inequality affect their strategies? We will look at inequality in income, some of its potential sources, and its effects in other areas. Specifically, we will look at education, housing, the social safety net, migration, and the job market. The class will be very interactive and will be based on readings drawn from academic research, case studies, news, and opinion readings. We will also have guest speakers from industry, government, and non-profits. The class will be co-taught by a GSB labor economist and an advisor to policy makers with decades of business experience (see http://www.ppic.org/main/bio2.asp?i=431).

MGTECON 533. Economics of Strategy and Organization. 2 Units.
The goal of this class is to combine economic theory and business practice to develop insights for business strategy and organization design. We will discuss strategies and organizations of companies, identify potential problems and explore potential solutions. Some of the topics to be covered will be why many established companies find it hard to innovate (and what strategies can mitigate those problems), business-model innovation, and what economic and practical problems arise when companies need to stop projects. The course will be based on a mixture of formal and informal cases.

MGTECON 535. Statistical Experimentation in Businesses. 2 Units.
Most statistical questions involving data ultimately are about causal effects. What is the effect of changing prices on demand? What is the effect of an advertising campaign on demand. In this course we discuss statistical methods for analyzing causal effects. We look at the analysis and design of randomized experiments. We also look at various methods that have been used to establish causal effects in observational studies. Students will develop the skills to assess causal claims and learn to ask the right questions and evaluate statistical analyses. You will carry out research projects and work with statistical software.

MGTECON 536. Data Driven Decision Making. 2 Units.
This is a short course on data driven decision making. The purpose of the course is to help students become intelligent consumers and producers of data analytics in the business context. Each class meeting will consider a different case/caselet involving data and statistical analyses. We will spend a lot of time on understanding the difference between correlation and causation, and measurement issues such as small sample problems and selection bias. By the end of the course students will have sharpened analytical skills, and will be more critical of data and statistical analyses. This is *not* a data/statistical methods course, but is rather an analysis course. The course requires only the tools learned in D&D.

MGTECON 541. Topics in International Macroeconomics and Finance. 2 Units.
This course gives students a background to understand fundamental issues in international macroeconomics and finance. Key topics include international asset pricing, hedging exchange rate risk, the relation between interest rates and exchange rates, business cycle fluctuations in emerging markets as well as in developed countries, banking and currency crises. By the end of the course, students should be able to read and understand the discussions of these topics in a publication such as The Economist. Each week we will have one lecture on fundamental concepts and one that applies these to recent events.

MGTECON 583. Measuring Impact in Business and Social Enterprise. 2 Units.
Businesses are increasingly expected to have a positive social impact, as evidenced by the rapid growth of impact investing. Yet, even as the impact investing market has taken off, impact measurement has lagged, undermining the credibility of the sector. Impact measurement is also critical to individual firms, not-for-profits and governments, as they face increased pressure to generate quantifiable results.How can we measure impact? What are some of the most effective frameworks, tools and approaches for impact measurement? How does one choose the most appropriate measurement tool based on factors such as the size, maturity and sector of an organization? Can impact be distilled down to a single monetary measure, such as a dollar? These and other questions will be explored in considerable depth, primarily through analysis and discussion of case studies.This course is a good match for students interested in impact measurement, impact investing, profit-with-purpose businesses or the role of business in society. The course will be taught by Matt Bannick, who led the impact investing firm, Omidyar Network, and served as the President of PayPal and of eBay International.

MGTECON 591. Global Management Research. 2 Units.
This course will overview a rapidly growing body of research into management practices. A large management practice project involving Accenture, Cambridge, Harvard, MIT, the London School of Economics, McKinsey, Stanford and the World Bank has been collecting data on management across firms and countries since the early 2000s (see www.worldmanagementsurvey.com). This project evaluated about 20,000 organizations in manufacturing, retail, healthcare and education across North and South America, Europe, Asia, Africa and Australasia, providing global insight into the basic management practices around monitoring, targets and talent management that firms adopt around the world. We will examine the link between management and performance, and the reasons for differences in management across firms, industries and countries. This will be supplemented with the results from more recent research with national statistical offices (see www.managementresearch.com) plus work with Accenture and the World Bank in India on change management interventions in a developing country context. The course will focus on making students familiar with: (A) modern management research and (B) a management evaluation scoring too for the rapid evaluation of large groups of firms. This would be well suited for students potentially interested in doing further research after the MBA, those that want a more academic course, and people interested in tools for evaluating management practices in large samples of companies.

MGTECON 600. Microeconomic Analysis I. 3 Units.
This course provides an introduction to the foundations of modern microeconomic theory. Topics include choice theory, with and without uncertainty, consumer and producer theory, dynamic choice and dynamic programming, social choice and efficiency, and fundamentals of general equilibrium.

MGTECON 601. Microeconomic Analysis II. 3 Units.
This course studies the roles of information, incentives and strategic behavior in markets. The rudiments of game theory are developed and applied to selected topics regarding auctions, bargaining, and firms' competitive strategies; information economics; and contracting and market design.

MGTECON 602. Auctions, Bargaining, and Pricing. 4 Units.
This course covers mostly auction theory, bargaining theory and related parts of the literature on pricing. Key classic papers covered in the course are Myerson and Satterthwaite on dynamic bargaining, Myerson on optimal auctions, and Milgrom and Weber's classic work, the Coase Conjecture results. We also cover a few more recent developments related to these topics, including dynamic signaling and screening. In some years we also cover topics in matching theory.

MGTECON 603. Econometric Methods I. 4 Units.
This is the first course in the sequence in graduate econometrics. The course covers some of the probabilistic and statistical underpinnings of econometrics, and explores the large-sample properties of maximum likelihood estimators. You are assumed to have introductory probability and statistics and matrix theory, and to have exposure to basic real analysis. Topics covered in the course include random variables, distribution functions, functions of random variables, expectations, conditional probabilities and Bayes' law, convergence and limit laws, hypothesis testing, confidence intervals, maximum likelihood estimation, and decision theory.

MGTECON 604. Econometric Methods II. 4 Units.
This course presents a comprehensive treatment of econometric methods used in economics, finance, marketing, and other management disciplines. Among the topics covered are: the classical linear regression analysis, linear simultaneous equations systems and instrumental variables techniques, panel data models, generalized method of moments, selection models, and limited dependent variable models. This course uses Matlab or similar computational software, but previous experience with such software is not a prerequisite. This course assumes working knowledge of undergraduate econometrics, basic linear algebra, basic probability theory, and statistics that are covered in MGTECON 603. Those who did not take MGTECON 603 or similar should see the instructor.

MGTECON 605. Econometric Methods III. 3 Units.
This course completes the first-year sequence in econometrics. It develops nonparametric, semiparametric and nonlinear parametric models in detail, as well as optimization methods used to estimate nonlinear models. The instructor will discuss identification issues, the statistical properties of these estimators, and how they are used in practice. Depending on student and instructor interest, we will consider advanced topics and applications, including: machine learning, simulation methods and Bayesian estimators.

MGTECON 608. Multiperson Decision Theory. 3 Units.
Students and faculty review and present recent research papers on basic theories and economic applications of decision theory, game theory and mechanism design. Applications include market design and analyses of incentives and strategic behavior in markets, and selected topics such as auctions, bargaining, contracting, signaling, and computation.

MGTECON 610. Macroeconomics. 3 Units.
This course covers various topics in macroeconomics and is designed to expose students to macroeconomic methods, classic papers in the field, and the latest research at the frontier. The current focus is on economic growth. Using theoretical and empirical tools, we consider questions like: How do we understand long-run growth in per capita income? Why are some countries so much richer than others? Other topics include misallocation as a source of TFP differences, the direction of technical change, growth and the environment, the rise in health spending, patenting, and international trade.This course satisfies the GSB PhD macro requirement.

MGTECON 612. Advanced Macroeconomics II. 4 Units.
This is an advanced class on monetary economics. We cover empirical evidence, neoclassical models, recent advances in New Keynesian models, monetary policy with heterogeneous agents and financial frictions, alternative models of price setting and other topics. Students enrolled in MGTECON612 take the class for 4 units. Students develop a research proposal and present it to the instructors as the final exam. Prerequisite: Satisfaction of the economics department's core macro requirement or consent of the instructors.

MGTECON 613. Foundations of Game Theory. 3 Units.
This course studies topics in non-cooperative game theory with an emphasis on foundations of game theory. Sample topics include: Modeling incomplete information (e.g. Mertens & Zamir and type spaces), Learning (e.g. Blackwell's approachability and separation theorems), Reasoning and solutions (e.g. Aumann, Aumann and Brandenburger epistemic conditions for solution concepts) and more. Prerequisite: An elementary course in game theory or a course with extensive economic applications of game theory.

MGTECON 615. Theory and Practice of Auction Market Design. 4 Units.
This class will focus on several topics in auction market design and related areas. It is an advanced course, intended as a sequel to the more basic market/mechanism/auction design courses offered at the Economics department and the GSB. Students are expected to be familiar with the material in those courses. We will briefly review some basics of auction theory, but the main goal of the class is to bring students closer to doing independent research and introduce them to recent contributions and currently active research areas. Specific topics may include: multi-item and combinatorial auctions; robust auction design; applied auction design with practical applications; Internet advertising; radio spectrum auctions; securities markets; commodities; complex procurements.

MGTECON 616. Topics in Microeconomic Theory. 3 Units.
This course covers foundational topics in microeconomic theory and is suitable for students who have completed the first year of their PhD studies and have taken a game theory or an advanced applied theory course. Sample topics include the notions of interactive knowledge and beliefs of economic agents, epistemics of solution concepts, strategies in continuous time and (adversarial) prediction testing. The course combines lectures with workshop sessions where students confront related research-type problems. Students are asked to present their original solutions to the class and are expected to participate in class discussions.

MGTECON 617. Financial Economics II. 3-5 Units.
This Ph.D. course will cover research topics at the boundary between macroeconomics and finance. Topics will include the study of macroeconomic models with financial frictions, the term structure of interest rates, conventional and unconventional monetary policy, sovereign debt crises, search frictions and segmentation in housing markets, (over)leveraging by households, heterogeneous expectations, excess volatility, financial bubbles and crises. Student presentations and course paper requirement. Designed for second year PhD students in economics or finance.
Same as: ECON 237

MGTECON 618. Social Insurance and Urban Economics. 3 Units.
The course covers various topics relating to social insurance and urban economics. The first half of the course covers the rationale for government interventions into private insurance markets, adverse selection, social insurance design and the intersection between social insurance and intra-family insurance. The second half of the course covers topics in urban economics, such as spatial equilibrium, placed-based policies, and housing policy.

MGTECON 624. Dynamic Political Economy Theory. 4 Units.
This course is intended to be an introduction to dynamic political economy theory. We will cover research at the frontier of this field and some useful tools. Tools will be primarily dynamic game theory - including Markov models and models of reputation. Topics covered will include dynamic legislative bargaining, dynamic coalition formation, endogenous institutions, endogenous policy formation, and policy experimentation.

MGTECON 626. Continuous-time Methods in Economics and Finance. 3 Units.
Continuous-time methods can, in many cases, lead to more powerful models to understand economic phenomena. The Black-Scholes option-pricing formula is significantly more tractable than discrete-time methods of option pricing based on binomial trees. There is an established tradition in continuous-time asset pricing, and there is increasing use of these methods in other fields, such as game theory, contract theory, market microstructure and macroeconomics.The goal of this class is to explore some of the old classic research as well as new economic models, and to discover areas of economics where continuous-time methods can help. The intention is to give graduate students a tool, which they can use to gain comparative advantage in their research, when they see appropriate.With this goal in mind, 25% of the class will focus on mathematics, but with economically relevant examples to illustrate the mathematical results. Up to one half of the class will cover established models, and the rest will focus on new papers. If students have their own work that uses continuous time, we can take a look at that as well.Coursework will include biweekly problem sets and a take-home final exam. There will also be room for short student presentations (related to homework assignments, economic papers, or definitions and results related to specific math concepts).

MGTECON 627. Empirical Applications of Dynamic Oligopoly Models in I.O.. 2 Units.
This course will provide an overview of recent advances in, and applications of, dynamic oligopoly models in I.O. We will start by introducing a simple framework for dynamic oligopoly in the context of a dynamic investment model. We will move on to other applications and extensions of the framework, including dynamic entry models and dynamic mergers, with a discussion of antitrust issues. We will cover an empirical model of dynamic network adoption and participation. We will learn alternative econometric approaches to the identification and estimation of dynamic oligopoly models, including a discussion of serially correlated unobserved shocks. Finally, we will discuss methods for computing counterfactuals and welfare, and then speculate about some unresolved issues and the potential for future work in this area.

MGTECON 628. Reading Group in Industrial Organization. 1 Unit.
This course meets weekly on Tuesdays at Noon. The primary purpose of the course is to read and discuss current working papers in Industrial Organization and related fields (e.g., Econometrics, Marketing, and Labor). Students are required to present papers a couple of times per quarter and both students and faculty may also present their own working papers.

MGTECON 629. Faculty Research Workshop. 3 Units.
Each week, a different economics faculty member will discuss his or her important and /or current research. The course is an important introduction to PhD level research topics and techniques. Attendance is mandatory.

MGTECON 630. Industrial Organization. 4 Units.
This is an introductory course in Industrial Organization. The goal is to provide broad general training in the field, introducing you to the central questions around imperfect competition, market structure, innovation and regulation, as well as the models and empirical methods commonly used to tackle these questions.

MGTECON 632. Topics in Continuous Time Dynamics. 3 Units.
This seminar-style course studies a selection of micro-economic models in dynamic settings, and explores the use of continuous-time methods to solve them. Topics to be covered include experimentation games, social learning, principal-agent problems, career concerns/market-agent models, security design and strategic trading. For every topic discussed, the class introduces gradually the set of relevant mathematical tools: dynamic programming and Hamilton-Jacobi-Bellman equations, Pontryagin's maximum principle, Euler-Lagrange equations, Brownian and Poisson processes, Bayesian inference and linear filtering, change of measure, martingale representation, Malliavin derivatives, stochastic maximum principle, expansions of filtrations. The course emphasizes high-level intuition rather than mathematical rigor. It is targeted at those who seek to become familiar with the literature on continuous-time dynamics and want to understand the functioning of these models, either by general interest or to apply these techniques.

MGTECON 634. Machine Learning and Causal Inference. 3 Units.
This course will cover statistical methods based on the machine learning literature that can be used for causal inference. In economics and the social sciences more broadly, empirical analyses typically estimate the effects of counterfactual policies, such as the effect of implementing a government policy, changing a price, showing advertisements, or introducing new products. This course will review when and how machine learning methods can be used for causal inference, and it will also review recent modifications and extensions to standard methods to adapt them to causal inference and provide statistical theory for hypothesis testing. We consider causal inference methods based on randomized experiments as well as observational studies, including methods such as instrumental variables and those based on longitudinal data. We consider the estimation of average treatment effects as well as personalized policies. Lectures will focus on theoretical developments, while classwork will consist primarily of empirical applications of the methods. Prerequisites: Prior coursework in empirical methods for causal inference in observational studies, including instrumental variables, fixed effects modeling, regression discontinuity designs, etc. Students should be comfortable reading and engaging with empirical research in economics or related fields.

MGTECON 640. Quantitative Methods for Empirical Research. 3 Units.
This is an advanced course on quantitative methods for empirical research. Students are expected to have taken a course in linear models before. In this course I will discuss modern econometric methods for nonlinear models, including maximum likelihood and generalized method of moments. The emphasis will be on how these methods are used in sophisticated empirical work in social sciences. Special topics include discrete choice models and methods for estimating treatment effects.

MGTECON 652. Personnel Economics. 3 Units.
This seminar will examine applications of labor economics to business issues and firms' practices. Material will include both theoretical and empirical work, and the syllabus will range from classics in Personnel Economics to current (unpublished) research. Some of the topics to be covered include, but are not limited to, compensation practices, assignment of decision rights, organizational structure, attracting, retaining, and displacing employees, and workplace practices (such as team-based organization, profit sharing, etc.).

MGTECON 691. PhD Directed Reading. 1-15 Unit.
This course is offered for students requiring specialized training in an area not covered by existing courses. To register, a student must obtain permission from the faculty member who is willing to supervise the reading.
Same as: ACCT 691, FINANCE 691, GSBGEN 691, HRMGT 691, MKTG 691, OB 691, OIT 691, POLECON 691, STRAMGT 691

MGTECON 692. PhD Dissertation Research. 1-15 Unit.
This course is elected as soon as a student is ready to begin research for the dissertation, usually shortly after admission to candidacy. To register, a student must obtain permission from the faculty member who is willing to supervise the research.
Same as: ACCT 692, FINANCE 692, GSBGEN 692, HRMGT 692, MKTG 692, OB 692, OIT 692, POLECON 692, STRAMGT 692

MGTECON 698. Doctoral Practicum in Teaching. 1 Unit.
Doctoral Practicum in Teaching.

MGTECON 699. Doctoral Practicum in Research. 1 Unit.
Doctoral Practicum in Research.

MGTECON 802. TGR Dissertation. 0 Units.
.
Same as: ACCT 802, FINANCE 802, GSBGEN 802, HRMGT 802, MKTG 802, OB 802, OIT 802, POLECON 802, STRAMGT 802

Finance Courses

FINANCE 121. Undergraduate Finance Research and Discussion Seminar. 1 Unit.
This seminar is designed to provide some experience with research methods and topics in finance, and to assist undergraduates with career interests in financial research, whether academic or not, with preparation for those careers. The seminar meetings are weekly and discussion based, covering a range of issues and methods in financial economics. Students are expected to prepare a 30-minute research presentation once during the quarter. To be considered for enrollment in this course, students need to complete an application, found here: https://forms.gle/aLB279vF3DJUJSgAA.

FINANCE 201. Finance. 3 Units.
This course covers the foundations of finance with an emphasis on applications that are vital for corporate managers. We will discuss many of the major financial decisions made by corporate managers, both within the firm and in their interactions with investors. Essential in most of these decisions is the process of valuation, which will be an important emphasis of the course. Topics include criteria for making investment decisions, valuation of financial assets and liabilities, relationships between risk and return, capital structure choice, payout policy, the use and valuation of derivative securities, and risk management. This course is targeted to those students who are new to finance and for those with little quantitative background.

FINANCE 204. Finance - Accelerated. 3 Units.
This course covers the foundations of finance with an emphasis on applications that are vital for corporate managers. We will discuss many of the major financial decisions made by corporate managers, both within the firm and in their interactions with investors. Essential in most of these decisions is the process of valuation, which will be an important emphasis of the course. Topics include criteria for making investment decisions, valuation of financial assets and liabilities, relationships between risk and return, capital structure choice, the use and valuation of derivative securities (e.g., options and convertible securities), and risk management.No previous background in finance is required or expected, but in comparison with Finance 201, less time will be spent in class on the steps involved in solving basic problems. Therefore, students choosing this course should be relatively comfortable with basic mathematical operations (e.g., expressions involving multiplication of multiple terms, summation of multiple terms, etc.), though familiarity with the underlying finance concepts is not expected. A good diagnostic is to skim Section 4.2 "Rules for Time Travel" (pp. 98-104) in the course textbook, Corporate Finance by Berk and DeMarzo. If you are comfortable with the level of basic mathematics involved (even if the concepts are new), 204 is a good choice. If not, you should consider Finance 201.

FINANCE 205. Accelerated Managerial Finance. 3 Units.
This course covers the foundations of finance with an emphasis on applications that are vital for corporate managers. We will discuss many of the major financial decisions made by corporate managers, both within the firm and in their interactions with investors. Essential in most of these decisions is the process of valuation, which will be an important emphasis of the course. Topics include criteria for making investment decisions, valuation of financial assets and liabilities, relationships between risk and return, capital structure choice, payout policy, the use and valuation of derivative securities, and risk management. This course is targeted to those students who are new to finance and for those with little quantitative background.No previous background in finance is required or expected for this course. Content will be comparable to F201, but the majority of course lecture material will be delivered online, with in-class sessions devoted to applications of key concepts. This "flipped classroom" version of the course is intended for self-motivated students with an interest in applications. Prerequisite material for the course will be posted online in the fall.

FINANCE 207. Corporations, Finance, and Governance in the Global Economy. 3 Units.
As entrepreneurs, global leaders, and change agents tasked with developing transformative solutions of tomorrow, you will need certain skills and tools to interact with and navigate the complex and ever-changing financial landscape. This course focuses on the development of these skills and tools through the analysis of concise real-world financial situations around the globe. Topics include valuation of cash flows and control; the capital structure, payout policy and governance of both mature and entrepreneurial firms; restructuring and managing financial distress; the use of public markets to obtain liquidity and multiple share classes to retain control; financing and governance in venture capital and private equity; the rise of activism; and social responsibility and debates about the objectives of the firms of the present and future. This course is taught jointly by Professors Rauh and Seru.

FINANCE 211. Corporate Finance: Applications, Techniques, and Models. 3 Units.
This course will develop and apply the basic tools and models of corporate finance to real-world corporate decisions. This course is designed to be the second course in the standard finance sequence; that is, it is designed to be the natural follow-up to the Winter Managerial Finance course. This course will develop and extend standard tools and techniques of financial analysis, valuation, and model-building, and apply these methods to a wide range of cases. Case topics will include mergers and acquisitions, private equity, corporate governance, capital structure, agency conflicts, and corporate restructuring. For all of these applications, this course will emphasize the central importance of financial analysis, valuation, and modeling to guiding optimal decision making.

FINANCE 214. Accelerated Corporate Finance: Applications, Techniques, and Models. 3 Units.
This course will develop and apply the basic tools and models of corporate finance to real-world corporate decisions. This course is designed to be the second course in the standard finance sequence; that is, it is designed to be the natural follow-up to the Winter Managerial Finance course. This course will develop and extend standard tools and techniques of financial analysis, valuation, and model-building, and apply these methods to a wide range of cases. Case topics will include mergers and acquisitions, private equity, corporate governance, capital structure, agency conflicts, and corporate restructuring. For all of these applications, this course will emphasize the central importance of financial analysis, valuation, and modeling to guiding optimal decision making.

FINANCE 229. MSx: Finance. 3 Units.
This course covers the foundations of finance with an emphasis on applications that are vital for corporate managers. We will consider many important financial decisions made by corporate managers, both within the firm and in their interactions with investors. Essential to most of these decisions are financial valuations, which will be an important emphasis of the course. Topics include criteria for making investment decisions, valuation of financial assets and liabilities, relationships between risk and return, and capital structure choice.

FINANCE 305. Capital Markets and Institutional Investing. 3 Units.
This course teaches recent advances in asset allocation and management. We emphasize the practical implementation of asset allocation and management tools in allocating assets, selecting asset managers and managing risk. The course focuses on alternative asset classes. Students apply these tools to real-time data in the computer lab. Topics covered include Asset Allocation; Delegated Asset Management and Manager Selection applied to Mutual Funds, Hedge Funds and Private Equity Funds; Multi-factor models and Factor Investing. The class will be co-taught by Ana Marshall, the CIO of the Hewlett Foundation, and Hanno Lustig, who is on the Allocation Advisory Board of the NBIM.

FINANCE 306. International Finance and Macroeconomics. 3 Units.
An introduction to the global economy. We will cover a number of important topics for firms, banks, and policy makers: global capital flows, international financial markets, the role of the U.S. and US dollar in the international monetary system, reserve currencies history and future (stable coins?), exchange rates (floating, fixed, and monetary unions), financial crises, international financial policy (capital controls, bank regulation, FX intervention), currency wars, tax havens and global wealth dynamics, global trade, and trade wars. Emphasis will be on data driven approaches, no prior knowledge is assumed. An MBA class designed for those looking to understand today's global economic issues.

FINANCE 315. Innovating for Financial Inclusion. 3 Units.
This MBA elective explores innovative ways that start-ups are expanding the financial capacities of households and small businesses. What are the financial frictions that household/business facing impactful FinTech startups are addressing? What economic and behavioral forces are governing the successes of these startups? How is the choice of funding/business model impacting growth/scaling strategies? How is the competitive landscape evolving for traditional banks, established tech platforms, and FinTech startups? While the center of attention will be on disruption of financial services within the US legal and regulatory environments, we will frequently highlight recent innovations in Asia, Europe, and Latin America.

FINANCE 319. Private Equity Investing Seminar. 3 Units.
The Investments courses comprise an intensive overview of active fundamental investing in both the public and private equity markets. They are relevant for students who intend to pursue careers in private or public equity investing, as well as those who want to better understand investing from the perspective of an entrepreneur or individual. The vast majority of sessions will feature an outstanding investor guest lecturer. Previous guests included Andreas Halvorsen (Viking Global), Jim Coulter (TPG), Hadley Mullen (TSG Consumer Partners), Ryan Cotton (Bain Capital), Bill Oberndorf (SPO Partners) and Tim Bliss (Investment Group of Santa Barbara), and this year's lineup will be substantially similar. Established and taught for 50 years by the legendary Professor Jack McDonald, the Investments courses will be taught by John Hurley, founder of Cavalry Asset Management and Professor Steve Grenadier in Autumn 2019. Students are required to take F319 and F321 concurrently for 5 total units during the Autumn Quarter. F321 is a 2-unit compressed course that meets MWF from 2:30-5:30pm during Weeks 1 and 8 of the quarter. It addresses real-world applications of business analysis and valuation tools and teaches the skills necessary to evaluate investment opportunities. F319 is a 3-unit course that meets Tu/Th 12:40-2:00 PM throughout the quarter. Students delve into specific topics in private equity, venture capital, hedge funds, mutual funds and principal investing. Students can elect to take F319 graded or pass/fail. The Investments courses will make use of original case studies and teaching notes authored by the late Professor Jack McDonald and a team of course alumni from prior MBA classes. Case discussions and lecture discussions will be led by the teaching team and investors/principals who were involved. The Investments courses enable MBA students to learn a broad investing skillset and study the careers of outstanding investors.

FINANCE 320. Debt Markets. 3 Units.
This course is intended for those who plan careers that may involve debt financing for their businesses or other investments, or involve trading or investing in debt instruments and their derivatives, including money-market instruments, government bonds, repurchase agreements, interest-rate swaps, corporate bonds, structured credit products, and credit derivatives. We will emphasize the institutional features of the markets, including trading, pricing, and hedging. The course includes a focus on distressed debt and restructuring. Most lectures will start with a cold-called student presentation of an un-graded short homework calculation. There will also be a series of graded homework, a take-home mid-term, and about seven graded 'pop quizzes' of 10 minutes or less.

FINANCE 321. Investment Management and Entrepreneurial Finance. 2 Units.
The Investments courses comprise an intensive overview of active fundamental investing in both the public and private equity markets. They are relevant for students who intend to pursue careers in private or public equity investing, as well as those who want to better understand investing from the perspective of an entrepreneur or individual. The vast majority of sessions will feature an outstanding investor guest lecturer. Previous guests included Andreas Halvorsen (Viking Global), Jim Coulter (TPG), Hadley Mullen (TSG Consumer Partners), Ryan Cotton (Bain Capital), Bill Oberndorf (SPO Partners) and Tim Bliss (Investment Group of Santa Barbara), and this year's lineup will be substantially similar. Established and taught for 50 years by the legendary Professor Jack McDonald, the Investments courses will be taught by John Hurley, founder of Cavalry Asset Management and Professor Steve Grenadier in Autumn 2019. Students are required to take F319 and F321 concurrently for 5 total units during the Autumn Quarter. F321 is a 2-unit compressed course that meets MWF from 2:30-5:30pm during Weeks 1 and 8 of the quarter. It addresses real-world applications of business analysis and valuation tools and teaches the skills necessary to evaluate investment opportunities. F319 is a 3-unit course that meets Tu/Th 12:40-2:00 PM throughout the quarter. Students delve into specific topics in private equity, venture capital, hedge funds, mutual funds and principal investing. Students can elect to take F319 graded or pass/fail. The Investments courses will make use of original case studies and teaching notes authored by the late Professor Jack McDonald and a team of course alumni from prior MBA classes. Case discussions and lecture discussions will be led by the teaching team and investors/principals who were involved. The Investments courses enable MBA students to learn a broad investing skillset and study the careers of outstanding investors.

FINANCE 326. Derivative Securities. 4 Units.
This course is an introduction to options, futures and other derivative securities. The goal is to learn a core set of principles that underlie the pricing and use of derivatives. In particular, we will cover the valuation and use, both for risk management and for speculation, of forwards, futures, swaps, and options; the Black-Scholes option-pricing formula; delta-hedging; credit derivatives; financial risk management; and the role of derivatives in the recent financial crisis.

FINANCE 327. Financial Markets. 4 Units.
The aim of this course is to develop a thorough understanding of financial markets. We explore how investors make decisions about risk and return, how financial markets price risky assets in equilibrium, and how financial markets can sometimes malfunction. The course puts particular emphasis on the role of real-world imperfections that are absent from the standard textbook view of financial markets. For example, we explore the role of illiquidity: Why are there liquid markets for some types of assets but not for others? Why does liquidity often disappear in times of market turmoil? We will also study recent insights from behavioral finance about investor psychology and market inefficiencies. Moreover, we will look at financial innovations such as credit-default swaps, securitization, and hedge funds that play important roles in financial markets these days. We use cases to develop these topics in the context of practical decision-problems in the areas of asset allocation, risk management, and financing.

FINANCE 329. Investment Seminar. 3 Units.
See FINANCE 321 course description.

FINANCE 331. Practical Corporate Finance. 4 Units.
(Note: this course was formerly known as FIN 230) The main aim of this course is to enable students to apply the fundamental ideas of finance to problems in the area of corporate finance with all the complexities the real world entails. The course is a follow-up to the Fall Managerial Finance course where students learnt basics of valuation tecyhniques and various finance applications. We will explore both how to make all this knowledge practical as well as how to deepen our knowledge of fundamental finance ideas. nnnThe main focus of this course is on the corporate financial manager and how he/she reaches decisions as to investments, dividends and financing of all sorts. Topics include leveraged buyouts, hostile takeovers, private equity financing and venture capital, financial distress and bankruptcy, mergers and acquisitions, managing working capital. The cases will be used to motivate our discussion of how to bridge the gap between rigorous finance theory and its application to practical problems in corporate finance.nnnThe course is case-based and more advanced than FINANCE 324. "Advanced" means that we will discuss a lot of subtle qualitative issues as well as explore deeper fundamental applications of core finance ideas. The course is intensive and will require students to prepare carefully all cases, read and understand a lot of materials, and actively participate in the class discussion. The main teaching method is cold calling.
Same as: Accelerated

FINANCE 332. Finance and Society. 3 Units.
This interdisciplinary course explores the economic, political, and behavioral forces that shape the financial system and, through this system, have a major impact on the economy and society. You will gain an in-depth understanding of how the complex interactions between individuals, corporations, governments, and the media can help markets work or, in turn, generate governance failures and inefficiencies. Visitors with varied experiences will enrich our discussions of key questions about the workings of capitalism in liberal democracies.

FINANCE 333. Financial Restructuring. 3 Units.
This course provides an intensive overview of financial restructuring transactions and processes from the perspective of distressed firms and their key stakeholders. It is intended for those who plan careers in general management, private equity, credit and special situations investing, banking, turnaround management, or financial advisory services. The course examines how companies may use in-court or out-of-court tools and processes to renegotiate their key contracts with creditors and other stakeholders when they encounter challenging business situations. Students will explore the financial, strategic, and legal implications of workouts, bankruptcies, asset/363 sales, and exchange offers, as applied in the context of financially distressed companies. Topics include valuation, absolute priority, creditor committees, intercreditor conflicts, debtor-in-possession (DIP) financings, 'blocking' strategies, avoidance powers, contingent claims, tax considerations, international insolvency, and distressed investment strategy. In exploring these topics, the course focuses on the key legal and contractual rights that creditors and other counterparties possess, and how they may use these rights to optimize their negotiated outcomes in a restructuring. Students will gain the tools to identify distress before it occurs, analyze distressed companies, and design restructuring plans which create enterprise value while navigating various considerations. They will also gain an understand of how to structure financial obligations upon origination in a way to lower the probability of financial distress. Finally, the course will examine the purpose of bankruptcy design and future policy implications. The course is lecture-focused in the beginning, but will become more interactive and case-focused later in the course as students acquire the skills they need to tackle key issues. Grading will be based upon class participation (50%), and a paper due at the end of the quarter (50%). For the paper, each student will select a distressed company currently in the market and design a restructuring plan for it.

FINANCE 335. Corporate Valuation, Governance and Behavior. 4 Units.
This course will develop a detailed knowledge of corporate valuation techniques, together with an understanding of the role such valuations play in a wide range of corporate financing decisions. First, the course will carefully consider different valuation techniques, the assumptions that underlie each of these methods, how they are applied in practice, how they are related to one another, and how to decide which method of valuation is appropriate for a given application. After developing these tools, they will then be applied to a wide range of corporate finance settings. Among the applications to be considered are mergers and acquisitions, international valuation, corporate governance, financial distress, agency conflicts, asymmetric information, and overvaluation. For all of these applications, this course will emphasize the central importance of valuation to understanding observed phenomena and to guiding optimal decision making, as well as the unique challenges to valuation posed by the particular application.

FINANCE 336. The Finance of Retirement and Pensions. 4 Units.
The financial economics of how retirement is financed, particularly in the US. Topics: basic finance concepts necessary for understanding individual retirement savings. Properties of financial instruments such as bonds and stocks. Optimization of individual retirement account or 401(k) portfolios. Defined benefit pensions. Measuring defined benefit pension liabilities. Impact of defined benefit pension liabilities on corporate, state, and local budgeting. The economics of national retirement policy including Social Security and government treatment of private retirement savings.

FINANCE 341. Modeling for Investment Management. 3 Units.
This course will combine practical and up-to-date investment theory with modeling applications. Understanding beautiful theory, without the ability to apply it, is essentially useless. Conversely, creating state-of-the-art spreadsheets that apply incorrect theory is a waste of time. Here, we try to explicitly combine theory and application. The course will be divided into 6 modules, or topics. The first day of each module will be a lecture on an investment topic. Also provided is a team modeling project on the topic. The second day of each module will be a lab. The lab day will begin with modeling concepts (tips) designed to help you use Excel to implement the module's investment topic. After the tips are provided, the remainder of the lab day is devoted to teams working on their modeling project and allowing for Q&A. On the third day of each module will be presentations and wrap-up.

FINANCE 345. History of Financial Crises. 3 Units.
Financial crises are as old as financial markets themselves. There are many similarities between historical events. The crisis of 2008, for example, is far from unique. More often than not financial crises are the result of bubbles in certain asset classes or can be linked to a specific form of financial innovation. This course gives an overview of the history of financial crises, asset price bubbles, banking collapses and debt crises. We start with the Tulip mania in 1636 and end with the recent Euro crisis. The purpose of the course is to understand the causes of past crises and to develop a conceptual framework that ties common elements together. We will discuss the lessons that we can draw for financial markets today.

FINANCE 346. Institutional Money Management. 3 Units.
The object of this course is to study the money management industry from the perspective of the user --- an investor who wants to invest money. This course will study the main components of the money management industry: mutual funds, hedge funds, private equity funds and venture capital funds. It will also examine important users of the industry such as non profits, endowments and defined benefit pension funds. The emphasis of the course will not be on how fund managers make money, but rather on how the industry is organized, how managerial skill is assessed, how compensation is determined, and how economic rents are divided between managers and investors. The course will explore how competitive market forces interact with managerial skill and other market frictions to give rise to the observed organization of the industry.

FINANCE 347. Money and Banking. 3 Units.
This course is designed to help students understand the connections between money (the Federal Reserve), financial markets, and the macroeconomy. How are interest rates determined, and how does the Federal Reserve conduct monetary policy? How do Federal Reserve actions impact the US as well as other economies? What economic factors drive the yield curves in different bond markets? We will pay particular attention to the banking system, with an eye toward understanding the function, valuation, and regulation of banks. We touch on a number of topics including the role of the Federal Reserve as a lender of last resort during financial crises, unconventional monetary policy tools such as quantitative easing and forward guidance, cryptocurrency, and emerging market financial crises. We will often begin class with a discussion of current macro-financial market events in the context of our course coverage.

FINANCE 350. Corporate Financial Modeling. 4 Units.
This course will expose students to the fundamentals, best practices, and advanced techniques of corporate financial modeling. We begin with basic operating and integrated financial statement models, and ultimately develop financial models to analyze major corporate transactions, including venture capital funding, mergers and acquisitions, and leverage buyouts. We will integrate theories presented throughout the MBA core, particularly those from accounting and finance, and take a hands-on approach to understand how the theory is implemented in practice.The focus of the course will be on developing critical financial modeling skills, understanding best practices, and recognizing common pitfalls. Students will work on a series of cases and build models that can be used for earnings and pro-forma financial statement forecasts, valuation, the assessment of financing needs, merger analysis, and LBO evaluation.Students will also gain experience presenting financial models and critically assessing them. By the conclusion of the course, students will develop the skills to construct complex financial models and the logical frameworks to utilize them for various organizational applications.

FINANCE 351. Advanced Corporate Financial Modeling. 4 Units.
Students will engage in the development of corporate financial modeling cases and solutions. Students will also develop materials to aid others in building financial models, and serve as case leaders during lab workshops. Extensive background in financial modeling and experience with Excel is required.

FINANCE 361. Behavioral Finance. 4 Units.
This course provides an introduction to behavioral finance, a discipline which integrates insights from psychology into the study of financial decisions and markets. There will be a focus on understanding the psychological underpinnings of financial decision-making as well as the institutional frictions that may allow these psychological mechanisms to influence economic outcomes. Applications include the pricing of assets relative to fundamental value, trading strategies, managerial behavior, and household savings and investment decisions. Conceptual issues will be emphasized through a mix of case discussions and lectures, and quantitative exercises will serve to develop analytical tools for making financial choices.

FINANCE 362. Financial Trading Strategies. 3 Units.
The purpose of this course is to familiarize students with the different types of trading strategies employed by various money management institutions. These financial trading strategies are used to manage the risk and return profiles of specific portfolios. Throughout the sessions, students will be challenged to understand and explore the application and implementation of these different strategies. Trading simulations employed on the Rotman Interactive Trader and Rotman Portfolio Manager (using real market data and computer generated data) will be used extensively in this course as a way to learn and test different strategies. All classes will be held in the new Real-time Analytics and Investment Lab (RAIL), located on the third floor of the Bass Building (B312). Students are expected to attend all sessions. Grades are based on in-class simulation results, class participation, and two written assignments.

FINANCE 373. Entrepreneurial Finance. 3 Units.
This is a course about the financial decision-making process largely from the point of view of the CEO of an entrepreneurial venture, ranging from very early to very late stages. The course takes a two-pronged approach: First, we develop tools and concepts of corporate finance related to modeling, valuation, control, and investment decisions within an entrepreneurial context. Second, we use cases with firms at different stages of their life cycles from initial angel or venture capital investments through exit decisions, in order to see the issues that arise when these principles are applied in practice. In some cases we show the viewpoint of the entrepreneur and in others the perspective of the investor. After all, as an entrepreneur, one cannot negotiate effectively without understanding an investor's motivations. Conversely, an investor cannot evaluate a potential investment opportunity without appreciating the entrepreneur's perspective and incentives. Finally, we explore new developments in entrepreneurial finance such as crowdfunding and early liquidity provisions.

FINANCE 377. China's Financial System. 3 Units.
This course is a survey of China's financial system, including its banking industry, monetary policy structure, and financial markets (bonds, derivatives, equities, foreign exchange, alternative asset management, and related markets). The goal is an integrated view of how capital, risk, and liquidity are intermediated within China and cross-border. Current trends (including liberalization of markets and financial stability) will be emphasized. Coverage will be through lectures, reading of research, including primary source documents and secondary (journalistic and analyst) commentary. There will be a range of subject-matter-expert speakers. Using our special video-technology enabled classrooms at Stanford and at the Stanford Center at PKU, this course is able to draw live speakers in Beijing and to meet jointly with students at Beijing University. Students will participate actively in class discussion, make a 5-minute (per student in each group) research presentation, and submit a 10-page term paper.

FINANCE 381. Private Equity in Frontier Markets: Creating a New Investible Asset Class. 4 Units.
In 2001, Jim O'Neil of Goldman Sachs wrote a research note which underscored the importance of so-called Emerging Markets to a well-balanced investment portfolio. Still today, most investors have little or no investment exposure beyond North America, Europe, Japan and more recently India, China and Brazil. All of this is just beginning to change. The not yet fully formed investment category called frontier market private equity is emerging and within the next decade is likely to be an asset class of its own. Private equity investments are being made in southeast Asia, in MENA(Middle East/ North Africa), in sub-Saharan countries beyond South Africa and in Latin America. Even fund of funds are appearing across these markets. At the same time, investors face a world of diminished returns expectations in developed economies just as aging demographics and the need for continued growth, innovation and infrastructure renewal places increasing demands for payout. Suffice it to say, investors will be looking beyond traditional asset classes and geographies for sources of return. This new course is designed to expose you to the still emerging, not yet fully formed world of frontier market private equity. To set the context we will start by reviewing the fundamentals of economic growth and development globally. In addition we will discuss the fundamental concepts involved in constructing and evaluating the performance of a large scale investment portfolio. We will then review cases on the elements of the private equity cycle/process and specifically address the special demands of frontier markets in general. We will also focus on issues that are specific to various markets (e.g. Nigeria, Vietnam, etc.). Students taking the course will be given the opportunity to make important contributions to the knowledge base of this still very young field by working in small teams to research topics of personal and general interest, the results of which will be reported to the rest of the class. This course will not be offered next academic year, 2017-2018.

FINANCE 385. Angel and Venture Capital Financing for Entrepreneurs and Investors. 3 Units.
This course covers all the stages of funding for early stage high-growth companies, from seed funding to venture capital rounds to a successful exit. We will concentrate on how entrepreneurs and investors make and should make important decisions. Examples of issues that we will cover are: How can entrepreneurs raise funding successfully? What are typical mistakes entrepreneurs make in raising capital and negotiating with investors? How to choose your investor? How to pitch to an investor? How do angels and VCs generate and process their deal flow and select companies? How are VCs involved in business decisions such as recruiting talent and replacing CEOs? What are the important provisions of financial contracts between VCs and founders? How to value early-stage companies? The course is very applied and mostly case-based. We will discuss a lot of nitty-gritty details that is a must for founders and investors. Case protagonists, founders, angels, and VCs will be among guest speakers. No prior knowledge of the VC industry is needed.

FINANCE 548. The Political Economy of Banking Regulation in US and Europe. 1 Unit.
The 2007-09 financial crisis exposed the extreme fragility of the financial system and the harm financial crises can cause. Have regulatory reforms in the US and Europe been effective and, if not, how and why? Does it matter if some institutions are "too big to fail," and, if so, how and why? This course will discuss the economic and political forces that are shaping the financial system in US and Europe and evaluate recent and current events that will have important implications for the economy for many years. We will see how politics trumps economics in Washington, London and Brussels in different but broadly predictable ways.

FINANCE 555. Private Wealth Management and Personal Investing. 2 Units.
The Private Wealth Management and Personal Investing course will address issues that relate to the management of personal assets as opposed to institutional investing. Many investment courses at the GSB emphasize large institutional portfolios but this course is about portfolio decisions for individuals. It will cover the origins and growth of private wealth management as an industry, investment planning, risk management, inter-generational transfers of wealth, choice of wealth advisors and philanthropy. Special emphasis is on understanding how wealth managers may be evaluated, including potential conflicts of interest, and performance measurement. Classes will focus on case studies and various readings. Each class will include visits from professionals in the wealth management and personal investing business. Active class participation and a group project are required.

FINANCE 559. The World of Investing. 1 Unit.
This course is a speaker series, exposing students to the world of first-class investors and their philosophies. Each week will have a different visitor describing their investment strategy and experience. Attendance at all sessions is a requirement to pass the course.

FINANCE 562. Financial Trading Strategies. 2 Units.
The purpose of this course is to familiarize students with the different types of trading strategies employed by various money management institutions. These financial trading strategies are used to manage the risk and return profiles of specific portfolios. Throughout the sessions, students will be challenged to understand and explore the application and implementation of these different strategies. Trading simulations employed on the Rotman Interactive Trader and Rotman Portfolio Manager (using real market data and computer generated data) will be used extensively in this course as a way to learn and test different strategies. All classes will be held in the new Real-time Analytics and Investment Lab (RAIL), located on the third floor of the Bass Building (B312). Students are expected to attend all sessions. Graded are based on in-class simulation results, class participation, and two written assignments. This course is designed to have a fast learning curve and is a pre-requisite for FIN563, the advanced extension of this course.

FINANCE 563. Financial Trading Strategies 2. 2 Units.
This course is an extension of FIN562, Financial Trading Strategies. Students will expand on introductory topics from the Financial Trading Strategies Course and be required to build extensive live-market models and risk management models. Class discussions will closely link current market events and pricing anomalies to theoretical and simulated markets and we will closely study the deviations between them.

FINANCE 587. Private Equity - An Overview of the Industry. 2 Units.
This 2-unit elective at the GSB is an "Overview" of the private equity industry including its reason for being, its growth and the various strategies for success that private equity firms employ. The course looks at all aspects of private equity partnerships and private equity investing. The course may be of particular interest to five groups of students: (i) students who aspire to be employed in private equity as a career; (ii) students who plan to be employed by companies that are owned by private equity firms; (iii) students who may invest in private equity partnerships as a limited partner; (iv) students who find private equity to be an interesting part of the financial services industry, and (v) students who expect to participate in corporate business development or mergers and acquisitions. The course will meet for nine classes. Each class will have at least one senior partner from a private equity firm to comment on the activities of his firm. In years past, some of the true leaders of the industry have participated. One class will be a mock investment review committee presentation as a final project.

FINANCE 620. Financial Markets I. 3 Units.
This course is an introductory PhD level course in financial economics. We begin with individual choice under uncertainty, then move on to equilibrium models, the stochastic discount factor methodology, and no-arbitrage pricing. We will also address some empirical puzzles relating to asset markets, and explore the models that have been developed to try to explain them.

FINANCE 621. Financial Markets II. 3 Units.
This course continues F620 and covers a number of main concepts in market microstructure. Among the topics that are covered are (i) Rational Expectations models and their foundations (ii) strategic trading models (iii) models of market and funding liquidity. In addition to the discussion of theoretic models time will be allotted to empirical applications.

FINANCE 622. Dynamic Asset Pricing Theory. 4 Units.
This course is an introduction to multiperiod models in finance, mainly pertaining to optimal portfolio choice and asset pricing. The course begins with discrete-time models for portfolio choice and security prices, and then moves to a continuous-time setting. The topics then covered include advanced derivative pricing models, models of the term structure of interest rates, the valuation of corporate securities, portfolio choice in continuous-time settings, and finally finally market design. Students should have had some previous doctoral-level exposure to general equilibrium theory and some basic courses in investments. Strong backgrounds in calculus, linear algebra, and probability theory are recommended. Problem assignments are frequent and, for most students, demanding. Prerequisite: F620 and MGTECON600 (or equivalent), or permission of instructor.

FINANCE 624. Corporate Finance Theory. 4 Units.
This course considers a wide range of topics in theoretical corporate finance (broadly interpreted). Topics include capital structure decisions, agency conflicts in the firm, dividend policy, security design, optimal financial contracting, the theory of the firm, the market for corporate control, and banking and financial intermediation, among others. The primary focus is on how asymmetric information, agency conflicts, strategic interactions, and incomplete contracting affect corporate financial decision-making. The course aims both to familiarize students with influential papers and current research, and to promote new research ideas in the area.

FINANCE 625. Empirical Asset Pricing. 3 Units.
This course is an introduction to empirical research in asset pricing. The focus of the course is on the interplay between financial economic theory, econometric method, and that analysis of financial market data. Topics include tests of asset pricing models, return predictability in time-series and cross-section, empirical studies of asset market imperfections, and studies of individual and professional investor behavior. Class discussions will draw on textbooks/monographs and original articles and working papers.

FINANCE 626. Advanced Corporate Finance. 3 Units.
This is a course on contemporary theoretical and empirical issues in corporate finance. Building upon the first-year courses in corporate finance theory and empirical methods in finance, we will examine issues in asset pricing applications to corporate finance, dynamic capital structure (dynamic financing decisions), financial distress, financing and investment interactions, and behavioral corporate finance. Both conceptual economic frameworks and econometric methods will be developed as needed. A requirement for this course is that students complete two written projects, one theoretical and one empirical, and at least one of these projects will be presented to the class.

FINANCE 627. Venture Capital and Finance of Innovation. 3 Units.
In this course we will study the theory and empirics of venture capital (VC) and, more broadly, finance of innovation. We will start by reviewing the way the VC and related markets function and then will dive into such topics as VC contracting, valuation, and impact on innovation. We will review most important research studies published in the field over the past 20+ years and pay particular attention to recent research.

FINANCE 628. Finance Pre-Seminar Reading Course. 1 Unit.
Finance Pre-Seminar Reading.

FINANCE 630. Empirical Corporate Finance. 3 Units.
This course provides an introduction to empirical research in corporate finance, with an emphasis on the application of cross-sectional and panel data econometric techniques for causal inference. Topics include investment policy, entrepreneurship and innovation, financing decisions, firm ownership, corporate governance, managerial incentives, financial contracting, and the structure and internal organization of firms. The course assumes knowledge of econometrics at the level of MGTECON 603.

FINANCE 632. Empirical International Finance. 3 Units.
This is an advanced graduate-level course in international finance and macroeconomics. The course focuses on empirical methods, stylized facts, new advances in large-scale empirical work, and applied theory. This course is targeted to advanced second year PhD students. The course assumes familiarity with the basics of graduate-level macroeconomics and finance. Students without the necessary familiarity with these techniques are welcome to take the course, but should expect to have to fill the gaps on their own (and with the help of their classmates!). Given the target audience above, the course has three main objectives. 1) To introduce and investigate both classic and new economic issues at the frontier of current research in international finance and macroeconomics. The purely pedagogical part of the course aims to make students familiar with the questions, the current state of research, and the empirical tools currently being used. 2) To create a mental framework and intuitive understanding of important and active questions. What makes a question interesting? What makes a paper a good paper? How to develop a reasoned view of new (and perhaps yet un-studied) issues in international finance and macroeconomics? This objective is less direct and less formal, but aims to transition the students into full-time researchers. 3) To kick-start students on independent research. For those interested in applied work the course makes you familiar and tries to connect you with existing data at the frontier of the field, both public and proprietary. For those interested in theoretical work the course staff acts as a sounding board for early research ideas.

FINANCE 633. Advanced Empirical Corporate, Banking and Household Finance. 3 Units.
This course discusses empirical aspects of major topics in corporate finance, household and consumer finance, housing, banking, financial regulation as well as political economy. The course is designed for students doing their PhD in finance, economics and accounting. The class is very interactive.

FINANCE 635. Advanced Topics in Empirical Asset Pricing. 3 Units.
This course will survey current research topics in empirical asset pricing. The emphasis will be on giving students exposure to active research areas and open questions rather than well-established areas and empirical techniques. Topics may include liquidity, capital market frictions, money management, volatility, investment-based asset pricing, return predictability, bubbles, and consumption-macro asset pricing models.

FINANCE 637. Macroeconomics and Financial Markets. 3 Units.
This PhD course will cover research topics at the boundary between macroeconomics and finance. Topics will include the study of macroeconomic models with financial frictions, the term structure of interest rates, conventional and unconventional monetary policy, sovereign debt crises, search frictions and segmentation in housing markets, (over)leveraging by households, heterogeneous expectations, excess volatility, financial bubbles and crises. Student presentations and course paper requirement. Designed for second year PhD students in economics or finance.

FINANCE 691. PhD Directed Reading. 1-15 Unit.
This course is offered for students requiring specialized training in an area not covered by existing courses. To register, a student must obtain permission from the faculty member who is willing to supervise the reading.
Same as: ACCT 691, GSBGEN 691, HRMGT 691, MGTECON 691, MKTG 691, OB 691, OIT 691, POLECON 691, STRAMGT 691

FINANCE 692. PhD Dissertation Research. 1-15 Unit.
This course is elected as soon as a student is ready to begin research for the dissertation, usually shortly after admission to candidacy. To register, a student must obtain permission from the faculty member who is willing to supervise the research.
Same as: ACCT 692, GSBGEN 692, HRMGT 692, MGTECON 692, MKTG 692, OB 692, OIT 692, POLECON 692, STRAMGT 692

FINANCE 698. Doctoral Practicum in Teaching. 1 Unit.
Doctoral Practicum in Teaching.

FINANCE 699. Doctoral Practicum in Research. 1 Unit.
Doctoral Practicum in Research.

FINANCE 802. TGR Dissertation. 0 Units.
.
Same as: ACCT 802, GSBGEN 802, HRMGT 802, MGTECON 802, MKTG 802, OB 802, OIT 802, POLECON 802, STRAMGT 802

GSB Gen & Interdisciplinary Courses

GSBGEN 112Q. Leading Out Loud: an Exploration of Leadership Communication through an LGBT Lens. 3 Units.
Students of all sexual orientations are invited to apply for this unique new seminar looking at the distinct challenge LGBT leaders have faced in communicating effectively. Through the years, many individuals have led the struggle for gay rights and inclusion through a variety of different communication strategies and tactics; some were successful while others were not. This seminar course will explore some of the key leaders in the LGBT community and how they chose to communicate. Together we will search through a variety of film clips, transcripts, news reports, and other historical elements to see how the message, media, and moments work together. A number of guest speakers will also share their perspective on what it means to "Lead Out Loud." Heterosexual identified students as well as LGBT students are encouraged to apply; in fact, we seek to have a true diversity of opinions in the room as we explore this topic. All students will benefit from this exploration of how to communicate about controversial, sensitive, and personal subjects with greater strength and purpose.

GSBGEN 114Q. Changing Hearts and Minds. 3 Units.
Whether you are launching a start-up, leading an organization, or inspiring social action the need to communicate effectively is crucial to your success. This seminar, grounded in the work of Nancy Duarte's book Illuminate, will look at how leaders can effectively use speeches, ceremonies, stories, and symbols to lead change.n nYou will be able to apply course concepts to a change initiative within which they are already engaged and receive feedback from professor and peers to improve. Plans include field visits to Duarte's offices and other venues where change efforts are underway. You will also benefit from seeing the evolution of MBA students' presentations in the highly successful LOWkeynotes program.

GSBGEN 208. Ethics in Management. 2 Units.
With leadership comes responsibility. This course explores the numerous ethical issues faced by managers and organizations, and provides analytical frameworks as well as the latest findings on human behavior to inform ethical decisions and strategies. Readings involve controversial case studies, insights from experimental psychology and economics, and a brief introduction to some relevant philosophy. Through class exercises, rigorous discussion, and personal reflection, you will clarify your own ethical stance, think through ethical dilemmas, practice articulating recommendations compellingly, discover the diversity of ethical viewpoints, and find out how to avoid the social and cognitive pitfalls that come in the way of ethical leadership.

GSBGEN 259. MSx: Ethics. 1 Unit.
With leadership comes responsibility. This course explores the numerous ethical issues faced by managers and organizations and provides analytical frameworks as well as the latest findings on human behavior to inform ethical decisions and strategies. Readings involve controversial case studies, insights from experimental psychology and economics, and a brief introduction to some relevant philosophy. Through class exercises, rigorous discussion, and personal reflection, you will clarify your own ethical stance, think through ethical dilemmas, practice articulating recommendations compellingly, discover the diversity of ethical viewpoints, and find out how to avoid the social and cognitive pitfalls that come in the way of ethical leadership.

GSBGEN 305. Investing for Good. 3 Units.
Investing for Good will introduce students to the entire spectrum of purposeful, values-driven, and impact investing. We examine the field from the perspective of an institutional investor (i.e. fund manager, investment advisor, endowment manager, head of a family office, etc). Our goal is to have students emerge with a practical and analytical framework for: 1. evaluating impact and mission-aligned investments across multiple asset classes and sectors; 2. constructing a portfolio using impact as a lens; 3. designing an impact investment company; and 4. understanding the many practical and theoretical challenges confronting this exciting emerging field.We start by exploring some fundamental questions: what is a purposeful or impact investment; can impact investments be defined along a spectrum between conventional investing and philanthropy; whose money is it; what are the constraints and opportunities; how do we (re)define return and/or performance. We briefly analyze impact investing in the context of modern portfolio theory. We then develop a framework for portfolio construction and evaluation across four criteria: risk, return, liquidity, and impact. Through a combination of class dialogues, role plays, and case discussions, we will explore a wide variety of asset classes, impact themes, and investment challenges. A series of team-based investment committee simulations will comprise a significant portion of the course and will provide a significant experiential learning experience.Previous experience in finance, investing, social enterprise, entrepreneurship, or philanthropy is not required, but both helpful and welcomed. While first year students are encouraged to enroll, students who have limited familiarity with the basics of investing and corporate finance are strongly encouraged to purchase David Swensen's "Pioneering Portfolio Management" and cover the recommended chapters in advance of the course. It's is also important to note that this class will require financial modeling and detailed investment analysis.Many of the issues we'll be tackling have no unambiguous answers. Lively discussion and debate will be necessary and expected.

GSBGEN 306. Real Estate Investment. 4 Units.
The major objective of this course is to provide the student with an understanding of the fundamentals of real estate investment. The course covers land economics, market analysis, finance, taxation, investment analysis, investment vehicles, real estate risk, development and urban design. Major land uses are discussed including apartments, retail, office, and industrial. The course is designed for students with limited or no background in real estate.

GSBGEN 307. Policy Time. 4 Units.
Policy Time is about the policy choices faced by senior elected officials, especially in times of crisis. Our main perspective is American and executive: decisions faced by the U.S. President, Governors, and their advisors, but the lessons can extend to certain international settings as well. We have three main goals (1) building your personal policy approach, in which you will figure out how your own values translate into real-world policy choices; (2) learning what it's like to be a senior policymaker through Q&A sessions with them; and (3) learning about crisis management and leadership in government and policy.One session per week will be either a lecture and discussion of a particular policy issue, or a conversation and Q&A with a past or current senior policymaker. The second session each week will be a small group meeting (6-8 students per group) to discuss policy choices and the lessons presented by the guests in the first session. We will use policy "worksheets" as a tool to focus your thought process, frame the small-group discussions, and drive you to make hard choices. You will write 5-10 weekly short memos to explain your choices.Each week will cover a different policy topic. Likely topics include immigration reform, climate change, debt reduction, and the role of the corporation in a capitalist economy. Our exact topic schedule is flexible based on current events and guest speaker availability.

GSBGEN 309. Politics, Regulation, and Technology in Real Estate Finance. 3 Units.
Political gamesmanship, financial crises, and financial innovation come hand-in-hand with real estate finance, which has played a central role in the rise and fall of economies, financial institutions, and the lives of ordinary Americans. This course explores these issues in depth. We examine the past, present, and future of the complex political economy surrounding real estate finance, its impact on markets, and the business challenges and opportunities arising from it, both domestically and abroad, before and after the financial crisis. We then tackle recent trends like the rise of shadow banks, fintech, and proptech. Through a mix of speakers, case studies, and hands-on exercises, we examine the problems these industries are solving and creating.Greg Buchak is an Assistant Professor in the Finance group at Stanford. He received his PhD in financial economics and JD in law from the University of Chicago. His research focuses on the industrial organization of financial intermediation and it¿s consequences in the real estate industry.Chris Mahowald is actively involved in the real estate investment business as the managing partner of RSF Partners, a series of real estate private equity funds totaling over $1 billion in equity. The firm invests across product types throughout the U.S. During his career, he has focused on value investing with deep experience in distressed mortgage debt. He also teaches real estate investment at the GSB (GSBGEN 306: Real Estate Investment).

GSBGEN 310. The Impact of AI on Productivity and Personal Performance. 3 Units.
This is a seminar of up to 35 students, with a mixture of GSB and non-GSB students. Much has been written about how jobs in firms are likely to change as a result of AI. The first objective of this course is to invite guest speakers from many sectors to address how they think their own jobs or similar jobs are likely to change as AI enters the products they produce (like Netflix products) and the jobs they do. For example, the speakers could be: an engineer in a software firm; a partner in a law firm; a headquarters employee in a big retail firm; or the founder of a new business. The second objective is to bring data to bear on the topic. We ask first, is AI a new technological revolution - like the past revolutions that introduced the steam engine or electrification - that will produce a sustained increase in GDP and productivity? We ask next, when AI or robotics have been introduced in the past twenty years, have these innovations been translated into improvements in individuals - productivity and then higher wages? Are the AI innovations in the future likely to have a similar impact? Finally, for you as a student, the goals of this course are to give you a foundation for thinking about the broad consequences of the increasing use of AI, but also to think about how your work life is likely to be different from those who are working today.

GSBGEN 312. I'm Just a Bill. 3 Units.
This is a class on how public policy gets made at the highest levels of the federal government. In the first part of the quarter, lectures and discussions lead in to classroom simulations, in which students role-play as advisors to a U.S. president. You will learn how to analyze policy problems and design solutions, taking into account the multi-dimensional aspects of making federal policy and the many constraints upon those decisions. The second part of the class is a multi-week role-playing legislative simulation. Students will role-play as Members of the House of Representatives and Senate, or as senior advisors to a president. You will participate in legislative debate, voting, offering amendments, and extensive policy and legislative negotiation, with the goal of enacting a new law. As this course requires extensive in-person interaction, students will be required to physically attend every class session that meets in-person. Zoom participation will be all-or-nothing for all students in the class, as determined by the instructor. There is no option to participate virtually when the rest of the class is meeting in person.

GSBGEN 315. Strategic Communication. 4 Units.
Business leaders have marketing strategies, expansion strategies, finance strategies, even exit strategies. Successful leaders, however, also have communication strategies. This course will explore how individuals and organizations can develop and execute effective communication strategies for a variety of business settings. This course introduces the essentials of communication strategy and persuasion: audience analysis, communicator credibility, message construction and delivery. Deliverables will include written documents and oral presentations and you will present both individually and in a team. You will receive feedback to improve your communication effectiveness. This practical course helps students develop confidence in their speaking and writing through weekly presentations and assignments, lectures and discussions, guest speakers, simulated activities, and videotaped feedback. An important feature of this course is that there are two faculty members working in concert to ensure that students get rigorous and individualized coaching and feedback. In this course you will learn to: - Create communication strategies at an individual and organizational level - Develop clearly organized and effective presentations and documents - Diagnose and expand your personal writing and oral delivery style - Adapt your delivery style to different material and audiences - Enhance oral delivery through effective visual aids Students at all levels of comfort and expertise with public speaking and business writing will benefit from this course.

GSBGEN 316. Civic Workshop. 4 Units.
Small teams of students will propose and implement projects to provide immediate volunteer civic assistance to a group or community dealing with the effects of coronavirus. We assume most or all of this assistance will be online or otherwise virtual. The first goal of this course is to channel your skills, abilities, and civic impulses to provide immediate practical assistance to communities struggling with new, unsettling, and painful coronavirus realities. The second goal is to allow you to practice leadership, management, problem-solving, and interactive skills in a small team through a project they build from scratch and implement immediately. The third goal is to build and strengthen your interest in participating in leadership roles in the civic layer of society after graduation. Students will form teams of four, either before or shortly after the course begins. A team will propose a target group to assist: a place, a group of people, or a non-governmental civic organization. Your team will interact directly with leaders of that target group to discover what value you can provide immediately and virtually. Weekly class sessions will include some guest speakers and work sessions in which the various teams will share their ongoing efforts, to cross-fertilize ideas and assist each other. Teams will also meet extensively outside of class hours to build and implement their project. This course is an active learning experience. Teams will be evaluated in part based on their ability to deliver rapid results of value to a target community. Doing so will require significant commitment and effort from the team, and a willingness to adapt to difficult, changing conditions. All projects must be targeted entirely at addressing new needs created by the coronavirus crisis, not at solving problems that existed before then. They should be easy to begin initial execution in the first 2-3 weeks of the quarter, to provide rapid assistance to the target group. Projects must be nongovernmental and apolitical: no politics, no government work or government services, no interest groups whose primary purpose is to influence public officials. Teams should instead aim to provide direct benefits to a community in the civic layer between individuals and government including businesses, volunteer groups, community organizations, non-profits, clubs, charities, religious and fraternal organizations. Many of these efforts are arising spontaneously each day; our goal is to foster and amplify this trend. Since projects must be feasible with the team dispersed and in self-isolation, most efforts will be online or virtual, and teams are encouraged to think of creative uses of tools like Zoom, Google Apps, social media, and simple database setups. Interdisciplinary teams from across Stanford graduate programs are encouraged, as long as three of the four team members are from the GSB. International students are strongly encouraged to participate, both in joining teams with an American focus and in forming teams to target communities for assistance outside the U.S. Teams are encouraged to look at opportunities to form bridging capital, aiding groups and communities that might not overlap much with the Stanford student population. We hope several teams will be geographically-focused, targeting the people who live in a specific place for assistance. In addition to the project itself, each student will be expected to keep a project journal and to write an end-of-project memo to those considering similar civic efforts in the future.

GSBGEN 317. Reputation Management: Strategies for Successful Communicators. 3 Units.
Successful leaders have to conceive, author, rebuild, pivot, differentiate, and finally maintain a personal reputation to make a lasting, recognizable and powerful identity. Reputation Management will explore how you can effectively communicate to create, adapt and maintain your personal reputation. Your reputation remains fluid as you navigate your career decisions and interact with different professionals along your journey. The course is designed along three interlocking elements: reputation management literature, relevant case studies, and curated guest speakers. Students will learn the fundamentals of strategic corporate communication and the risk of not managing reputation effectively. These frameworks will be extended with specific case studies to illustrate where individuals, groups, and firms have faced the challenge of managing reputation effectively. We will focus on both traditional and virtual components of communication including the relevancy of online reputation management. Finally we will invite well-known leaders from a range of industries who have built and sustained their reputations, through effective communication. Each leader has had to manage their reputations in the public eye, and alongside their peers, supervisors, and employees. Guests will be invited to discuss their conscious and unplanned strategies of how to successfully communicate the kind of person, leader, innovator, or public figure they strive to be. Students will benefit from a rich blend of frameworks, cases, and speakers enabling them to successfully enter the work force and create their own, personal reputations. Students will create a case study drawn from their own experience (or personal network), of a reputation dilemma. A final assignment requires students to research their own reputation history by projecting what they think their reputation is, creating their own survey for friends, colleagues and employers to take, conduct three interviews about their personal reputation with three individuals who have worked closely with them, and then synthesize all this feedback into a cohesive paper and short video that reflects their authentic work and personal reputation. Throughout the course students will post at least one blog drawn from class concepts and respond to posts by peers in the class.

GSBGEN 319. Strategic Philanthropy and Impact Investing. 3 Units.
The course will be structured around the perspective of a foundation or a high net worth individual who has decided to devote substantial resources to philanthropy and wishes to decide which philanthropic goals to pursue and how best to achieve them. Although there are no formal prerequisites for the course, we will assume that students have experience working at a foundation, nonprofit organization, impact investing fund, or similar organization, or have taken an introductory course in strategic philanthropy such as GSBGEN 381. (With the exception of several classes on strategy and evaluation, there is no substantial overlap with Paul Brest's course, Problem Solving for Social Change (GSBGEN 367), which has a different focus from this one.).

GSBGEN 323. Media Entrepreneurship. 3 Units.
The disruptive nature of the Internet has set in motion the destruction of business models that have supported traditional media organizations. This course will examine the current state and broader economic challenges facing the media industry. These include: the impact of technology, changing consumer behavior, the rise of mobile, social networks, big data, real-time metrics, innovations in digital advertising and distribution channels, and new business models. Students will analyze new digital media ventures and hear from industry experts facing innovation challenges at the intersection of content, technology and business. The course also will identify paths for entrepreneurs interested in building a media business. And experiment with prototyping new digital media ventures.

GSBGEN 324. Leading with Mindfulness and Compassion. 3 Units.
The course explores the role of mindfulness and compassion in the workplace, and the contribution of these qualities to leadership. Topics addressed will include: How can mindfulness enhance clarity in purpose and productivity? What is the connection between mindfulness and compassion? Is compassion in the business world a strength or a weakness? Are compassion and profit motives fundamentally incompatible, or can they support each other? What does compassionate leadership look like? Can mindfulness and compassion be trained at the individual level, and built into company policy? How does self-compassion support effective leadership and recovery from setbacks? Guests from the corporate or non-profit sectors will discuss the challenges of integrating mindfulness and compassion into business strategy and the work environment. Guests from the scientific field will discuss research on mindfulness and compassion as they relate to real-world challenges. Participants in the course will engage with exercises from evidence-based programs targeting the development of mindfulness and the various facets of compassion.

GSBGEN 332. Sustainable Energy: Business Opportunities and Public Policy. 3 Units.
This course examines trends and opportunities in the sustainable energy sector with a particular focus on low carbon energy. We examine these trends in the context of technological change, emerging business opportunities and the parameters set by public policy. nSpecific topics to be examined include: (i) the impact of regulatory policies and tax subsidies on the energy mix (ii) the growing competitiveness of renewable energy, in particular solar PV and wind, (iii) sustainable transportation (iv) adaptation by fossil fuel energy sources, (v) innovative financing mechanisms for energy projects, (vi) the venture capital perspective (vii) the changing role of utilities in the energy landscape.

GSBGEN 333. Technology Licensing. 3 Units.
Licensing of technology and its corresponding intellectual property is big business, and integral to the business plans and competitive strategies of start-ups and Fortune 500 companies alike. Although the annual dollar magnitude of licenses of patents and other technology-related IP is difficult to estimate due to the proprietary nature of much of the data, academic studies peg the U.S. IP licensing market at ~$66B, and the global market at ~$180B. The development and evolution of technology standards and interoperability requirements, regulatory overlays that require technologies outside a company's core competencies, the proliferation and widespread enforcement of patents, the rapid expansion of IP-based business models, and the staggering expense and uncertain benefits of internal R&D, among other things, have combined to weigh heavily on the buy side of the make/buy scale, and to amplify the importance of inbound and outbound licensing arrangements for both start-up and Fortune 500 companies. Because licenses are complex legal agreements with important legal consequences, it is tempting for business executives to delegate to lawyers the negotiation of the non-economic terms of their companies' technology license agreements. The problem with such an approach, however, is that so-called "non-economic" terms can have significant and occasionally mortal economic and business consequences. While no business person should grapple with such issues in the context of a large or complex license agreement without legal counsel, it is critical that the business person understand the consequences, negotiating levers and trade-offs themselves, for at their core, the decisions to be made on these issues are business decisions, not legal ones. This course is organized around two hypothetical companies seeking to negotiate a technology license agreement. Both parties operate under a common set of "public" facts, and each responds as well to "private" facts relevant to various business priorities and issues. Students are divided into three-person teams, each representing one or the other of the hypothetical companies, and collaborate over multiple sessions to develop a strategic business approach and then to negotiate a licensing agreement. Lectures are focused on the business, and to a lesser extent, legal issues arising in complex licensing arrangements, and are designed to give students the context and perspective they need to participate effectively in licensing strategy development and negotiation. By immersing teams of business students in a multi-session licensing negotiation, it is the objective of this course to enable them to better understand and think critically about the principal issues that arise in the conceptualization and negotiation of technology license agreements.

GSBGEN 334. Family Business. 3 Units.
Believe it or not, the "Silicon Valley model" has little or nothing to do with most businesses. Most businesses are not started by MBAs; most startups are not funded by VCs; most employees don't work for tech firms; and most businesses don't sell out to other businesses or go public. Rather, the vast majority of businesses world-wide are started, funded, and owned by families, and these firms create most of the employment in the global economy. Despite the prominence of family firms, teaching and research have traditionally focused on analyzing the widely-held or Silicon Valley model of the firm. This course explores the challenges and opportunities faced by family businesses. It is taught by Leo Linbeck III, Lecturer since 2005 at the GSB and President and CEO of Aquinas Companies, LLC. This course is an outlier in a world obsessed with tech startups and venture capital; it is a "Minority Report" from the heart of Silicon Valley. The course is intended for four main audiences: (1) Students whose family owns a business. (2) Students who are considering working for a family firm. (3) Students who are interested in acquiring or consulting with a private firm either directly (search funds, management consultants, etc) or indirectly (private equity, etc). (4) Students who are sick of only learning about cool, sexy startups and the geniuses who get rich from them. The course uses a combination of case studies, guest speakers, lectures, movies, and student presentations to explore the central ideas of the course, which are likely to appear irrelevant to everyone (save the instructor).

GSBGEN 335. Clean Energy Project Development and Finance. 3 Units.
This case study-oriented course will focus on the critical skills needed to evaluate, develop, finance (on a non-recourse basis), and complete standalone energy and infrastructure projects. The primary course materials will be documents from several representative projects - e.g. solar, wind, storage, carbon capture - covering key areas including market and feasibility studies, environmental permitting and regulatory decisions, financial disclosure from bank and bond transactions, and construction, input, and offtake contracts. Documents and economic models tend to be highly customized. By taking a forensic approach, looking at several different projects, we can learn how project developers, financiers, and lawyers work to get deals over the finish line that meet the demands of the market, the requirements of the law, and (sometimes) broader societal goals, in particular climate change, economic competitiveness, and energy security.

GSBGEN 336. Energy Markets and Policy. 3 Units.
This is a course on how energy and environmental markets work, and the regulatorymechanisms that have been and can be used to achieve desired policy goals. The courseuses a electricity market game as a central teaching tool. In the game, students play the roleof electricity generators and retailers in order to gain an understanding of how market rules(including environmental regulations and renewable energy mandates) affect the businessstrategy of market participants¿and in turn economic and environmental outcomes.The goal of the course is to provide students with both theoretical and hands-onunderstanding of important energy and environmental market concepts that are critical tomarket functioning but not always widely appreciated. Concepts covered include: 1)regulated price-setting versus price-setting through market mechanisms, 2) BTU arbitragein input energy choices, 3) uniform price vs. pay-as-bid auctions, 4) the ability andincentive to exercise unilateral market power, 5) unilateral versus cooordinated exercise ofmarket power, 6) transmission congestion, 7) forward contracts and their effect on marketfunctioning, 8) dynamic pricing of electricity and active involvement of final demand, 9)the nature of energy reserves, 10) carbon pricing mechanisms including taxes and cap-andtradesystems, 11) renewable portfolio standards and other renewable energy incentives,12) determination of levelized cost of energy (LCOE) and its impact on new capacityinvestment decisions, and 13) interactions between environmental mechanisms andregulations. We will also discuss the key features of the markets for major sources ofenergy such as oil, natural gas, coal, nuclear, solar, wind, and biomass.The course is useful background for private sector roles in energy production,research, management, trading, investment, and government and regulatory affairs;government positions in policymaking and regulation; research and policy functions inacademia, think tanks, or consultancies; and non-profit advocacy roles related to energy and the environment.

GSBGEN 337. Business Decision Making. 3 Units.
This experiential course will focus on how to make a business decision correctly. The theory will focus on common behavior biases and mistakes. Students will practice making business decisions by analyzing a business case each week.

GSBGEN 339. Negotiation Dynamics in Sports, Entertainment and Media. 3 Units.
Negotiation is a central part of business in the worlds of sports and entertainment. This course will examine negotiation dynamics and key takeaways for general management from multiple different settings where negotiations had an important role--these will include preparing for a negotiation, the negotiation process itself, contractual outcomes of negotiation and their execution and in some cases litigation. The settings will include negotiations over player and actor contracts, negotiations between leagues and players associations, negotiations between investors and movie companies, and negotiations between content providers (both in sports and entertainment) and distribution partners (such as cable stations, international media companies, and online companies such as Netflix). Each of the six sessions is planned to include at least one and in some cases two guests that have had extensive experience in negotiations.

GSBGEN 343. The Power of Stories in Business. 3 Units.
To grow and innovate, you not only need a big idea, you also need stake-holder buy in and action. However, many companies fail in this regard because stakeholders are not aligned, the real problem that the innovation seeks to solve has not been identified, and the story has not been defined. Story can fuel stakeholder buy-in by painting a clear picture of what is and what could be for everyone - from employees, to investors, to customers. In other words, an excellent story means that you can delegate tactical aspects effectively because it clarifies how to execute specific functions against the story (e.g., digital marketing, advertising, design). Further, when the stakeholder becomes part of the story, they are more likely to act, which generates momentum and create a culture of optimism.nnStory is equally important for leaders of companies, who often need to act as editors - shaping the stories told by employees and customers - to align with a shared vision. A secondary goal of the class is to demonstrate how personal stories can be used by leaders to build high performing teams and companies. By creating powerful stories, you'll see how your company can gain momentum and how you can help your employees and customers become more connected. nnBy the end of the class, you will have gained insight into:n- How to use stories as an asset in businessn- What makes for a good and bad storyn- Pitching stories.

GSBGEN 345. Disruptions in Education. 3 Units.
Never before has higher education been as severely disrupted as it has in the past year, surfacing novel needs, while at the same putting decades long trends in sharper focus. This course explores the contemporary higher education industry, focusing especially on the places where disruptions of all kinds present significant opportunities and challenges for entrepreneurs, investors, and the businesses that serve this huge global market, as well as for faculty, students, and higher education institutions and leaders. Using a variety of readings and case studies to better understand recent disruptions and the unbundling occurring across the postsecondary landscape, from outside and inside the academy, both for-profit and non-profit, the course will examine technology in teaching and learning; the future of the degree and alternatives to the traditional credential; accreditation; competency based education; affordability, student debt, and education financing models; investing in the education space; workforce, skills development, and lifelong learning; and tertiary products and platforms that serve the student services market. Guests will include higher education leaders and practitioners, as well as investors, entrepreneurs, and social entrepreneurs.

GSBGEN 346. Freedom, Democracy, and Capitalism. 4 Units.
This is an American civics course for future business leaders, intended to briefly (re-)introduce students to a few of the ideas that form the foundation of the American implementation of "the Western model" of freedom, liberal democracy, capitalism, and a rules-based international order. As time permits, we will learn to apply and combine these concepts to examine current policy topics in the news.

GSBGEN 347. Education Policy in the United States. 3 Units.
The course will provide students from different disciplines with an understanding of the broad educational policy context. The course will cover topics including a) school finance systems; b) an overview of policies defining and shaping the sectors and institutional forms of schooling, c) an overview of school governance, d) educational human-resource policy, e) school accountability policies at the federal and state levels; and f) school assignment policies and law, including intra- and inter-district choice policies, desegregation law and policy.

GSBGEN 348. The Economics of Higher Education. 4 Units.
(Same as EDUC 347) Topics: the worth of college and graduate degrees, and the utilization of highly educated graduates; faculty labor markets, careers, and workload; costs and pricing; discounting, merit aid, and access to higher education; sponsored research; academic medical centers; and technology and productivity. Emphasis is on theoretical frameworks, policy matters, and the concept of higher education as a public good. Stratification by gender, race, and social class.

GSBGEN 349. Introduction to the Politics of Education. 4 Units.
The relationships between political and economic analysis and policy formulation in education; focus is on alternative models of the political process, the nature of interest groups, political strategies, policy efficiency, the external environment of organizations, and the implementations of policy. Applications to policy analysis, implementation, and politics of reform. (APA).

GSBGEN 350. International Internship. 1-2 Unit.
.

GSBGEN 352. Winning Writing. 3 Units.
This once-a-week full-quarter workshop will offer techniques and practical in-class exercises for writing better -- better memos, emails, cold-call letters, speeches, feedback for colleagues, news releases, responses to questions from the media and from interviewers, and opinion pieces. Glenn Kramon, an editor who has helped New York Times reporters win 10 Pulitzer Prizes, will teach the course along with accomplished journalists with expertise in powerful, persuasive writing for business. They will provide not only helpful tips but constructive feedback on students' work. They will also share thoughts on how best to work with the news media.

GSBGEN 356. Dynamics of the Global Wine Industry. 3 Units.
This course will examine the world of wine with a fresh and contemporary lens. It will explore the market dynamics of this fascinating global industry. The goal of the course is to provide insight into the branding, marketing, and distribution dynamics that shape what consumers can buy and consume with a focus on the strategies of some of the world's leading wine brands. Attention will also be paid to the legal, regulatory, and market dynamics that define the U.S. wine industry as well as to issues of contested authenticity in the world of wine.

GSBGEN 360. Sports Business Management. 4 Units.
This course will examine the diverse management challenges facing the sports industry. The course will cover issues at the league level, the team level, the athlete/agent level, and the college level. The diverse constituencies with interests in sports issues (athletes, fans, media companies, advertisers, and legislators to name a few) will be discussed. Sports issues at a global level (the IOC) and both U.S. and outside U.S. will be covered. There will be coverage of evolving business ventures related to the sports industry (such as venture backed sports companies and sports networks). A key focus is on how the sports industry is similar to and different from other industries. Key concepts underlying the course are: value creation/value sharing; revenue ecosystem; virtuous circles and vicious circles; disruptive technologies; growth facilitators and growth inhibitors; leveragable assets/inherited liabilities; and entrepreneurship/new product innovations. Over 80% of the sessions typically will include a guest co-lecturer from the sporting industry.

GSBGEN 363. American Economic Policy. 4 Units.
One of every five dollars in the American economy will be spent by the federal government this year. This course will examine how federal spending, taxes, deficits and debt affect the U.S. economy and global financial markets, and how the economy affects the federal budget. We will look inside the federal budget to understand entitlement spending, what causes it to grow so fast, how it could be reformed, and why that's so hard to do. We'll understand where the money goes -- how much goes to infrastructure, education, housing, health care, energy and the environment, parks, scientific research, national defense, and other needs. We'll look at the stimulus vs. austerity debate, both within the U.S. and between the U.S. and Europe. We'll look beyond partisan battle lines and explore various fiscal philosophies that sometimes split the political parties. We'll cover the federal budget process from developing the President's budget to enacting individual spending and tax bills, and discuss process reforms including spending and deficit reduction targets, a balanced budget amendment, and line item veto. We'll cover the major players in the budget debate and understand where the big and small budget decisions are made. We'll look at federal taxation, where the money comes from, how it affects the economy, and how it might be restructured. We'll examine the recommendations of the President's budget commission and see if we can predict what will become of its recommendations. And we'll see if we, as a class, can solve our nation's fiscal problems as Washington has so far been unable to do.

GSBGEN 367. Problem Solving for Social Change. 3 Units.
Stanford graduates will play important roles in solving many of today's and tomorrow's major societal problems'in areas such as education, health, energy, and domestic and global poverty"that call for actions by nonprofit, business, and hybrid organizations as well as governments. This course teaches skills and bodies of knowledge relevant to these roles, covering topics such as designing, implementing, scaling, and evaluating social strategies; systems thinking; decision making under risk; psychological biases that adversely affect people's decisions; methods for influencing behavior; and pay-for-success programs. The large majority of the course will be devoted to students' working in teams to apply these concepts and tools to an actual problem, with teams choosing whatever problem interests them.

GSBGEN 368. Managing Difficult Conversations. 3 Units.
This elective 3- unit course is offered to JD law students and other selected graduate students, and to MBA students who aspire to improve their ability to deal effectively with difficult interpersonal situations. The course will be taught by William F. Meehan III, the Lafayette Partners Lecturer in Strategic Management, Stanford Graduate School of Business and Charles G. Prober, M.D., Professor of Pediatrics, Microbiology & Immunology and Senior Associate Vice Provost for Health Education, Stanford School of Medicine. The course, which will be case-based, will involve frequent student-to-student and student-to-instructor role-playing in authentic medical interactions and difficult interpersonal situations. Topic-specific experts often will be present to participate as class guests. Relevant principles of professionalism, leadership, and psychology underlie the course pedagogy. There will be ten classes held on Wednesdays beginning January 8th and concluding on March 11th. Each class will begin promptly at 12:30 and end shortly before 3 pm. Students will be expected to attend all classes unless excused in advance. Class preparation will include reading of assigned cases; analysis of the cases and recommendations as to how to confront specific difficult conversations (consistent with assigned study questions); and reading of assigned background material. It is important that all students participate actively in classroom discussions. For GSB students, 50% of the final grade will depend on classroom performance; the remainder will be based on a final written assignment of 3-5 pages. GSB students will be graded on a Pass/Fail basis. The course will be ungraded for medical students, residents and fellows. All students will be expected to complete the written assignment. Class size will be limited to 40 students per the following: (1) a maximum of 20 MBA students and (2) a maximum of 20 non-GHB graduate students.

GSBGEN 370. Power of You: Women in Leadership. 3 Units.
All leaders face a host of challenges, but women leaders encounter an additional set of obstacles and considerations¿institutional, economic, cultural¿that their men counterparts most likely never will. These issues are often exacerbated for women from underrepresented groups. GG370 Power of You: Women and Leadership will prepare students to successfully identify and respond to these challenges, and, ideally, transform them into opportunities for growth and advancement. Students will come away from this course with a vast portfolio of strategies, tools and tactics to not only meet these workplace challenges head-on, but also create more inclusive processes, policies and cultures for the future. The course is based on the instructor's "legacy leadership" model that inspires and equips students to lead with intentional inclusivity, creating social value and empowering others, particularly those who traditionally have not had access to opportunities, networks and/or mentorship. In class, readings and in written reflections, students will deeply explore issues including, but not limited to: the likeability paradox; sexism in the workplace; diversity, inclusivity, and belonging; intersectional identities; managing voice, narrative and reputation; negotiation through a gendered lens; leadership styles and adaptivity; mentorship and sponsorship; and creating social value. Students will create a legacy leadership action plan that will define/refine professional purpose, intentions and dreams/objectives; actions and tactics necessary to achieve student¿s aspirations; risks or barriers that may impede student success; specific indicators of progress towards student's goals; and the social change students will work to create. Students will engage directly with industry leaders including Sheryl Sandberg (Facebook), Meg Whitman (Quibi), Dr. Priscilla Chan (Chan Zuckerberg Initiative), Mary Barra (General Motors), Judy Smith (Smith & Company), Sam Altman (OpenAI), Kat Manalac (Y-Combinator) and Indra Nooyi (Pepsi Co.), among others.

GSBGEN 377. Diverse Leadership as an Imperative for Impact. 3 Units.
Our society implicitly prizes a particular approach to leadership - but today's cross-sectoral, impact-oriented leader cannot afford to be restricted to a single approach. If we aspire to address challenges across social, economic, and political arenas, with highly charged moral implications and multiple stakeholders, we have an imperative to use all available tools by discovering, celebrating, and advancing diversity in leadership.In this course, we will: (1) study a range of effective leadership approaches; (2) develop broad, transportable skills and frameworks required to lead in any complex setting - business, public sector, nonprofit sector; (3) delve into leadership tradeoffs and tensions; (4) explore and understand our own values and tacit and explicit decision-making criteria; and (5) recognize barriers to diversity and tactics to address them. Guiding questions will include: How does the context shape the solution set? What does inspired and inspiring leadership look like? How do race/gender/other identities enter into the equation? How do I develop my own brand of leadership? We will examine contemporary leaders and controversies in education and elsewhere, draw upon timeless historical thinkers, enjoy the wisdom of guest speakers, and work intensively in small groups to highlight challenges, opportunities, and tradeoffs. By exploring a range of approaches and situations, we will strive for deeper understanding of ourselves and of the context to become a more capable, empathetic and effective leaders.

GSBGEN 381. Individual Philanthropy: Giving Models, Purpose & Practicum. 3 Units.
A philanthropist is anyone who gives anything- time, expertise, networks, credibility, dollars, experience- in any amount to create a better world. Philanthropy is resource, background, age, profession, and industry agnostic, and "Individual Philanthropy: Giving Models, Purpose & Practicum" will amplify your ability to make your giving, volunteering, service and leadership matter more. You have extraordinary potential to create social change, and this course will empower you with the perspective, experience and inspiration to actualize that potential both immediately and over your lifetime. You will be exposed to a diverse array of giving models and approaches, and be given structured space to weigh and appraise your individual philanthropic point of view and approach. Through deep introspection, you will define and/or refine your social change purpose and create a theory of change that maps how you will transform your values, beliefs and resources (including intellectual, human, network, experiential and financial capital) into measurable social value. Class activities will include debates and simulations such as discussing the benefits and challenges of diverse giving models, creating personal giving strategies, giving fundraising pitches and assessing actual foundation grant proposals. Each student will select and complete due diligence on a local nonprofit and create a formal grant proposal. Students will peer-review grant proposals, participate in a multi-stage grantmaking process and allocate $20,000 of grants funded by the Learning by Giving Foundation and Andreessen Philanthropies. Students will also have the unique opportunity to directly connect and engage with globally renowned philanthropic leaders, including Darren Walker (Ford Foundation), Laura Muñoz Arnold (Arnold Ventures), Justin Steele (Google.org), Crystal Hayling (Libra Foundation) and Holden Karnofsky (Open Philanthropy Project), among others.

GSBGEN 382. Social Innovation Practicum: Designing an Impact Model. 3 Units.
Social Innovation Practicum is an experiential learning course. Through the format of an interactive workshop, students will learn about the social sector by researching a problem or unmet need in society and then developing, testing, and refining a new idea or innovative approach that aims to address that problem. We will explore in-depth the elements of successful interventions in the social sector that can achieve outsized impact. This will be achieved through lectures by the instructor on the topics at hand; discussion of illustrative case studies of many of today¿s award-winning impact models, and class-time in which students will be able to develop their ideas and benefit from guidance and feedback from the instructor, their classmates, and class guests. Students will work in teams as appropriate. Those students that have a pre-conceived idea for a new intervention will be encouraged to recruit others (from the GSB and/or from other disciplines across Stanford) to join their team. Any student who does not yet have an idea should contact the instructor to be paired with a team working on an area of interest to that student. Our point of view will be that of the students as the designer of a new intervention and - presuming the intervention proves to be compelling and merits advancement - future founder(s) of a new social venture (nonprofit, for-profit or hybrid) or champion of a new intervention adopted by an existing social sector organization.

GSBGEN 383. Practical Policy and Politics. 4 Units.
This is a skills / toolbox class, designed for beginners. It is a practical course about policy-making in the U.S. federal government. It will cover three broad subject areas: (1) an assortment of current policy topics; (2) governing processes ¿ how policy gets made in an environment constrained by politics and elections; and (3) practical skills business leaders may need in interacting with government and with policymakers. This class is for beginners and assumes you have no prior experience or knowledge of policy or politics.

GSBGEN 390. Individual Research. 1-4 Unit.
Need approval from sponsoring faculty member and GSB Registrar.

GSBGEN 490. Leadership for Society: Reflections on History in the Making. 2 Units.
Reflections on History in the Making (GSBGEN 490) provides students the opportunity to reflect on, and create an account of their experience of the historic transformations societies around the world are undergoing in the wake of the COVID pandemic, related economic recession, and growing civil unrest. The world hit pause and gave us a unique opportunity to think deeply about how we, as a society, might resume life. This course provides the space for students to process their personal experience, to reflect on their place and role in society, and to envision what the world could look like when we emerge from these crises. The class will share the unique perspective of the Stanford GSB community through the creation of a class blog.

GSBGEN 495. Leadership for Society: Race and Power. 1 Unit.
This course aims to deepen our collective awareness of profound racial disparities in the United States and around the world. Through a series of conversations with a diverse array of prominent leaders, we will explore the role of race in society, how race interacts with structures of power, and how systemic racism manifests itself in day-to-day business and policy decisions. Candid and honest conversations with class guests will expose students to concrete examples of how their future decisions might lead to different outcomes for different people, based on race. Our hope is that this course supports your personal growth and helps prepare you to become the kind of leader our society needs.

GSBGEN 498. Faculty Lecture & Discussion Series. 1 Unit.
This class features GSB instructors discussing their research and its applications to the business world. Each session will present one speaker. To earn the 1 unit credit, students must commit to attend at least 6 out of the 8 talks. This is done on the honor system. If you enroll, you enter your attendance in Canvas. You can "attend" by watching the video of the lecture within two days. Attending synchronously is preferred and allows you to submit questions. The class will be graded pass/fail.

GSBGEN 499. The Last Lecture Series. 1 Unit.
This class is an opportunity to hear a Last Lecture from esteemed GSB instructors. Each session will present one speaker. To earn the 1 unit credit, students must commit to attend at least 7 out of the 9 talks. This is done on the honor system. If you enroll, you enter your attendance in Canvas. You can "attend" by watching the video of the lecture within two days. Attending synchronously is preferred and allows you to submit questions. The class will be graded PASS/FAIL.

GSBGEN 501. Principles of Effective Decision Making for Sustainability. 2 Units.
The overall goal of this short course is to develop students ability to (i) decide which issues around sustainability and the environment are worth spending time and energy on in their careers and personal lives, and (ii) effectively promote such change. Particular emphasis will be placed on issues around food choices, and on decisions within corporate organizations. Class size limited to 40.

GSBGEN 503. The Business of Healthcare. 2 Units.
Healthcare spending is now nearly 18% of the entire GDP of the U.S. economy. The S&P healthcare sector has been one of the best producing segments of the market for the last five years, and growth of healthcare expenditures continue to escalate at a rapid pace. This has triggered an abundance of opportunities for those interested in a career in healthcare management, investing, or entrepreneurialism. The Business of Healthcare-2017-18 will present the current market framework from the eyes of a clinician and with the perspective of the consumer-patient, but with the experience of a successful business builder and investor. Course will begin with the discussion of the channels of distribution of healthcare delivery, from providers, to practitioners, to consumer-facing ¿healthcare lite¿ sectors of the market. Impact of the regulatory environment, with specific focus on the Affordable Care Act and the impending plans to Repeal/Replace, will be evaluated. High-level exploration of international health care markets and how they compare to the American market will be included. Overview of venture and private equity investing will be deeply probed, with many specific market examples of how investors develop an investment thesis, identify specific targets, diligence companies, and close an investment. Discussion around building financial modeling for target acquisitions will be presented, and the course will delve into the burgeoning area of healthcare analytics and outcomes management, including Artificial Intelligence, and its future impact on positioning, reimbursement and clinical outcomes. Sectors that will be discussed include: Healthcare services, Healthcare IT, Life Sciences, Pharma and Biotechnology, and Managed Care. The topic of the emerging importance of consumerism will be probed and consumer-directed healthcare related products and services will be explored, e.g. nutraceuticals, wellness, fitness, etc. Course will include preparatory readings, presentations from successful and powerful industry leaders, and robust in-class discussion and case studies requiring student engagement. Final grade will consist of class participation, one minor in-class presentation, and a final paper developing either a new healthcare business start-up proposition or presenting an identified investment target in the healthcare industry. Course will be especially valuable for those interested in a career in starting a healthcare company, healthcare investing, healthcare administration, or other healthcare-related management and goal of class will be provide an in-depth overview of how to get started or advance a professional interest in the industry.

GSBGEN 508. Strategic Pivoting for your Next Chapter. 2 Units.
Many students come to the GSB with the intent to pivot upon leaving the institution. Some students feel they have outgrown their position or business, or they feel drawn to a new area that better suits their values and interests, where they can make a greater contribution. Some students have no idea what they want to do after graduating, they just know they want to make a purposeful change. And finally, some students want to strategically change their direction for reputation reasons. The average U.S. employee tenure is only 4-5 years and job roles often change dramatically within that timeframe. Pivoting is an intentional, methodical process for nimbly navigating career changes. A recent Gallup study revealed that almost 90% of workers are either ¿not engaged¿ or ¿actively disengaged¿ from their jobs. A pivot is a change made of your own volition when you have reached a point in your career when you are ready for increased challenge and impact.Strategic Pivoting is a course specifically developed for any student who already plans to pivot in their career and wants to figure out how to successfully build and create their next chapter. In this course we will discuss four stages for how to best pivot: 1) Planting, how to assess and set a strong foundation of values, strengths and interests. 2) Scanning, researching new and related skills, talking to others, and mapping potential opportunities. 3) Piloting, students conduct small, low-risk experiments to test their new direction, as well as gather real-time data and feedback. And 4) Launching, pulling the trigger, fully committed, to your carefully plotted pivot.The ultimate pay-off to Strategic Pivoting is acknowledging and adapting to a rapidly changing society when it comes to career paths. Because our careers are so fundamentally tied to our livelihood and sense of confidence, purpose and meaning, changes can be traumatic without a road map for traversing them. "Navigating this accelerated pace of change and this transitional career state, and learning to embrace it instead of resisting it, can become an edge and advantage." Alex Rodriguez, Major League Baseball icon, ABC/Fox Sports/ESPN commentator, entrepreneur, and CEO of A-Rod Corp will be a featured Guest Speaker in this course. Alex has also had a history of successfully pivoting his career and defying expectations. He is presently getting ready to host his own ESPN interview show called, "Pivot.".

GSBGEN 511. Making Social Ventures Happen by Attracting Financial and Human Capital. 2 Units.
Social ventures require leadership, funding, expertise, skills and networks to get off the ground, grow and scale. This course will focus on the key strategies for building and leveraging a network of champions to capitalize a social venture at early-stage, and for sustaining and growing that network as the venture grows. This class is applicable to intrapreneurs, changemakers within major institutions, (private or public), board members, impact investors, those who aspire to be senior leaders within social ventures and social entrepreneurs (founders). Co-led by a practicing venture philanthropist and a social entrepreneur, this interactive, pragmatic course will: - Discuss the critical financial and human capital needs of organizations and companies at different life stages. - Explore the concept of champions and the different types of champions including board chairs, co-founders, mentors, faculty advisors, donors, investors, community evangelists, and fellow entrepreneurs. - Learn about effective networks and how to build them, including the role of communications, relationship-building, and crisis management. - Explore the concept of a powerful vulnerability and the art of "influence without authority" in attracting financial and human capital to the mission and making social ventures happen. Special emphasis will be given to developing co-founders and founding teams, boards and funders/investors as champions. - Develop a roadmap for the ways you will support social ventures throughout your career. - Meet social entrepreneurs and their champions who promote them within various power structures (major corporations, government, the institutional funding community) to learn about the successes and failures of their partnerships. Guest speakers will be posted prior to start of class. - Invite you to join instructors, guest speakers and fellow students for casual dinner on both Wednesdays after class.- Get to know your fellow classmates who share a passion for addressing the world's intractable problems and for creating systemic change.

GSBGEN 513. Using Technology and Market Interventions to Solve Social Problems. 2 Units.
This course will focus on finding solutions to social problems enabled by technology, where market failures prevent the solutions from being provided by the private market, and where market-based interventions can be used to create the appropriate incentives for the solutions to be created and implemented. We will provide a conceptual framework that identifies strong candidates for market shaping interventions, and review a number of problem areas and categories of solutions. Students will research and evaluate potential technological solutions to social problems.

GSBGEN 514. Creating and Scaling High Potential Ventures in Developing Economies. 2 Units.
GSBGEN 514 - Creating High Potential Ventures in Developing Economies (2 Units) This course addresses the distinctive challenges and opportunities of launching high-potential new ventures in developing economies. Developing economies are attractive targets for entrepreneurs because many are just starting to move up the growth curve, and they offer low-cost operating environments that can be great development labs for potentially disruptive innovations. They increase in attractiveness when their political institutions stabilize and they become more market-friendly. At the same time, developing economies pose serious challenges. Pioneering entrepreneurs take on significant risks to gain early mover advantages. Specifically, entrepreneurs will not be able to count on the same kind of supportive operating environments that we take for granted in the developed world. They often face cumbersome permit and licensing processes, poorly developed financial and labor markets, problematic import and export procedures, unreliable local supply chains, weak infrastructure, corruption, currency risks, limited investment capital, lack of financial exits and more. This course is designed to help would-be entrepreneurs - both founders and members of entrepreneurial teams - better understand and prepare for these issues as they pursue the opportunities and address the challenges to start, grow, and harvest their ventures in these environments. GSBGEN 514 is a seminar/discussion format in which students will read about and discuss the key challenges described above and potential solutions. Guests will describe their own startup and investing experiences in developing economies and answer questions. A framework based on the World Economic Forum (WEF) report on "Entrepreneurial Ecosystems Around the Globe and Company Growth Dynamics" will be used to structure the course. Each student will prepare a short write-up as a final assignment on a case chosen from a selection provided by the instructors. Note: Groups of students who want to work as a team to investigate a specific new venture idea in addition to participating in the seminar/discussion sessions should also consider enrolling in GSB534, offered in Spring term.
Same as: Cases

GSBGEN 515. Essentials of Strategic Communication. 2 Units.
Successful leaders understand the power of authentic, memorable communication.This course uses the lens of oral communication and presentations, to introduce the essential elements of the strategic communication strategies that make authentic, memorable communication work.Focusing on oral communication and presentation, we introduce the essentials of communication strategy and persuasion: audience analysis, message construction, communicator credibility, and delivery.Deliverables include written documents, focusing on individual and team presentations, with students receiving continuous feedback to improve their communication effectiveness, and to sharpen their authentic leadership voice. This highly interactive, practical course, is focused on feedback to help students at all levels of communication mastery develop confidence in their speaking and writing. Course includes presentations, assignments, lectures, discussions, simulated activities, in-class feedback, and filmed feedback. In this course you will learn to:-Recognize strategically effective communication-Implement the principles of strategic communication across different platforms-Develop clearly organized and effective presentations and documents-Diagnose and expand, your personal authentic communication style. As you make your super round selection, keep in mind that wait lists have been long for this course.

GSBGEN 518. Dynamics of the Global Wine Industry. 2 Units.
This course is a compressed version of GSBGEN 356. We will examine the world of wine with a fresh and contemporary lens. It will explore the market dynamics of this fascinating global industry. The goal of the course is to provide insight into the branding, marketing, and distribution dynamics that shape what consumers can buy and consume with a focus on the strategies of some of the world's leading wine brands. Attention will also be paid to the legal, regulatory, and market dynamics that define the U.S. wine industry as well as to issues of contested authenticity in the world of wine.

GSBGEN 520. Designing Solutions by Leveraging the Frinky Science of the Human Mind. 2 Units.
The thrust of this course is about designing effective and innovative solutions by leveraging deep insights into the workings of the human brain, specifically the emotional brain. Designing solutions for markets so as to identify promising business ideas; for existing organizations, fostering a competitive advantage, loyalty, customer life-time-value, etc. Designing solutions for customer engagement and behavior change. Designing solutions for leaders, who need to be effective at making decisions and influencing others' decisions. Designing solutions for organizations- for example, "How do we design effective solutions that will foster innovation and risk-taking in large organizations?" The course will explore these topics by unraveling the workings of the human brain, leveraging frameworks that essentially capture the way emotional brain systems shape our decisions, experiences and behaviors. Filled with mini-case studies and in-class exercises to illustrate the various topics, the course features one individual and one group assignment (the group assignment is geared toward applying the learnings in this course to identifying a promising business idea).

GSBGEN 523. Media Entrepreneurship. 2 Units.
The disruptive nature of the Internet has set in motion the destruction of business models that have supported traditional media organizations. This course will examine the current state and broader economic challenges facing the media industry. These include: the impact of technology, changing consumer behavior, the rise of mobile, social networks, big data, real-time metrics, innovations in digital advertising and distribution channels, and new business models. Students will analyze new digital media ventures and hear from industry experts facing innovation challenges at the intersection of content, technology and business. The course also will identify paths for entrepreneurs interested in building a media business.

GSBGEN 524. Leading with Mindfulness and Compassion. 2 Units.
The course explores the role of mindfulness, self-compassion and compassion in the workplace, and the contribution of these qualities to leadership. Topics addressed will include: How can mindfulness enhance clarity in purpose and productivity? What is the connection between mindfulness and compassion? Is compassion in the business world a strength or a weakness? Are compassion and profit motives fundamentally incompatible, or can they support each other? What does compassionate leadership look like? Can mindfulness and compassion be trained at the individual level, and built into company policy? How does self-compassion support effective leadership and recovery from setbacks? Participants in the course will engage with exercises from evidence-based programs targeting the development of mindfulness and the practical application of the skills of self-awareness, self-compassion, and perspective taking in the context of work and relationships.

GSBGEN 527. Global eCommerce. 2 Units.
Global eCommerce represents a vast market, driven by advances in internet and smartphone penetration, improving supply chains, lower online prices and variety and a growing, aspirational middle class with increasing demand for branded goods. This class will deep dive into the eCommerce industry to understand its competitive dynamics, success factors, business models and strategic dimensions. The class will have a global perspective, focusing on various aspects of eCommerce in the US as well as Asia, including China and India in particular. More broadly, the class will use the industry as a microcosm for how to build and succeed in modern data and technology driven markets. This is important because success in eCommerce requires bringing together in a meaningful way several disparate aspects including efficient supply chains, well functioning product marketplaces, frictionless payment systems, meaningful content, hardware and devices, as well as facilitating advanced search, advertising and marketing technology. Additional factors such as managing vendor and supplier relationships, fraud, user reviews and private labels make the industry complex and provide learnings for several other verticals. For instruction, we will use a mix of cases and lectures, and leverage significant participation from several eCommerce industry leaders.

GSBGEN 528. Communicating for Credibility: An Introduction to Thought Leadership. 2 Units.
Many students are prepared to be leaders, but few are prepared to be thought leaders. Yet, that's precisely what many of our students will become. This communications course focuses on the risks and the rewards of stepping into a thought leadership role as a subject matter expert or change agent in a domain of the student's choice. From the very first class students will tackle different communication elements (blogs, op-ed pieces, keynote talks, video blogs, conference panels, etc.) and receive feedback from professors and peers. By the end of this course students will: -Understand the risks and rewards of thought leadership -Identify and clearly articulate their own niche and "What-If?" future -Know the communication channels available to exercise thought leadership -Codify best practices and lessons learned into a forward-thinking document or framework that they can share widely -Craft a distinct message with an authentic voice across multiple channels -Build their ripples of influence by engaging their first followers and building a tribe -Begin to activate well-respected advocates who will champion their ideas -Define how to measure the success of their efforts (ex: reach, resonance) -Create a resource list of vendors, tools, technology and communities to support their thought leadership efforts -Overcome what may hold them back from stepping into the spotlight and assuming the role of thought leader in their niche. A prequalification assignment is required for this course. See https://goo.gl/forms/mAPC5izvC5gABJ2K2 for details and submit the survey by September 18.

GSBGEN 531. Global Trip Leadership Skills A. 1 Unit.
This course is open only to leaders of the Global Study Trips. This course is experiential and designed to support the leadership learning and development of students leading Global Study Trips. Lectures, role plays, cases, and exercises will be used to demonstrate and practice the skills needed to successfully lead a group of peers as they develop into a learning community to explore an academic topic in locations around the world. Topics covered in the class include high performing teams, setting expectations, feedback and the influence process, culture, managing crises on the ground, and more. In addition to the weekly course meeting, students will be required to meet with their teammates and coaches for at least an additional 3.5 hours.

GSBGEN 532. Clean Energy Opportunities. 2 Units.
This course examines business models and opportunities related to clean energy, specifically to low-carbon energy. We examine emerging trends for this sector in the context of technological change, business opportunities and the parameters set by public policy.

GSBGEN 533. Technology Licensing. 2 Units.
Licensing of technology and its corresponding intellectual property is big business, and integral to the business plans and competitive strategies of start-ups and Fortune 500 companies alike. Although the annual dollar magnitude of licenses of patents and other technology-related IP is difficult to estimate due to the proprietary nature of much of the data, academic studies peg the U.S. IP licensing market at ~$66B, and the global market at ~$180B. The development and evolution of technology standards and interoperability requirements, regulatory overlays that require technologies outside a company¿s core competencies, the proliferation and widespread enforcement of patents, the rapid expansion of IP-based business models, and the staggering expense and uncertain benefits of internal R&D, among other things, have combined to weigh heavily on the buy side of the make/buy scale, and to amplify the importance of inbound and outbound licensing arrangements for both start-up and Fortune 500 companies.Because licenses are complex legal agreements with important legal consequences, it is tempting for business executives to delegate to lawyers the negotiation of the non-economic terms of their companies¿ technology license agreements. The problem with such an approach, however, is that so-called ¿non-economic¿ terms can have significant and occasionally mortal economic and business consequences. While no business person should grapple with such issues in the context of a large or complex license agreement without legal counsel, it is critical that the business person understand the consequences and negotiating levers and trade-offs themselves, for at their core, the decisions to be made on these issues are business decisions, not legal ones.This course is organized around two hypothetical companies seeking to negotiate a technology license agreement. Both parties operate under a common set of ¿public¿ facts, and each responds as well to ¿private¿ facts relevant to various business priorities and issues. Students are divided into three-person teams, each representing one or the other of the hypothetical companies, and collaborate over multiple sessions to develop a strategic business approach and then to negotiate a licensing agreement. Lectures are focused on the business, and to a lesser extent, legal issues arising in complex licensing arrangements, and are designed to give students the context and perspective they need to participate effectively in licensing strategy development and negotiation. By immersing teams of business students in a multi-session licensing negotiation, it is the objective of this course to enable them to better understand and think critically about the principal issues that arise in the conceptualization and negotiation of technology license agreements.

GSBGEN 534. Creating and Scaling High Potential Ventures in Developing Economies. 2 Units.
This course addresses the distinctive challenges and opportunities of launching high-potential new ventures in developing economies. Developing economies are attractive targets for entrepreneurs because many are just starting to move up the growth curve, and they offer low-cost operating environments that can be great development labs for potentially disruptive innovations. They increase in attractiveness when their political institutions stabilize and they become more market-friendly. At the same time, developing economies pose serious challenges. Pioneering entrepreneurs take on significant risks to gain early mover advantages. Specifically, entrepreneurs will not be able to count on the same kind of supportive operating environments that we take for granted in the developed world. They often face cumbersome permit and licensing processes, poorly developed financial and labor markets, problematic import and export procedures, unreliable local supply chains, weak infrastructure, corruption, currency risks, limited investment capital, lack of financial exits and more. This course is designed to help would-be entrepreneurs - both founders and members of entrepreneurial teams - better understand and prepare for these issues as they pursue the opportunities and address the challenges to start, grow, and harvest their ventures in these environments. GSB534 will utilize a framework based on the World Economic Forum (WEF) report on "Entrepreneurial Ecosystems Around the Globe and Company Growth Dynamics" with an updated Note written by the lecturers. The weekly sessions are team-based exercises for students who either have a specific idea or want to join a team of classmates to pursue more deeply an understanding of the team's country of focus and an initial investigation of the idea's viability. Students must come in willing to be team players and do the work necessary to complete this exercise over the full quarter. Each team member's contributions will be assessed by fellow teammates. Teams of AT LEAST 3 STUDENTS EACH will be formed before the start of class or on the first day of class at the latest so students can decide if they want to enroll. The team will describe, in a final presentation, the challenges and opportunities in their country using the WEF framework. The final presentation will also include the team's thoughts on the viability of their proposed venture and how it capitalizes on their country's assets and addresses its challenges. A detailed business plan is not required; however, specific recommendations and plans for next steps that would be carried out during a 3 to 6 month field and market research study in the country will be part of the final presentation. Note: Students are encouraged to enroll GSB514 to gain more detailed information through case studies, guest lecturers and further discussion.
Same as: Cases and Team Project

GSBGEN 535. Global Trip Leadership Skills. 1 Unit.
This course is open only to leaders of Global Study Trips. It is designed to support GST leaders as they design and deliver a new version of GSTs that accommodate current pandemic limitations on travel. The course will support leaders in emergent design as well as leadership team considerations over Autumn and Winter quarters. A seminar format will enable cross-fertilization of approaches among trips. Some combination of lectures, role plays, cases, and exercises will be used to demonstrate and practice skills needed.
Same as: B

GSBGEN 538. Power in Finance. 2 Units.
There is a growing sense that both capitalism and democracy are in crisis. How do power structures in the private and public sectors determine economic and political outcomes? Is the focus on financial metrics and markets to blame for the eroding trust in corporations and governments? This interdisciplinary course explores these issues by developing in-depth understanding of the interactions between individuals, corporations, and governments that shape economic and political systems and their evolution. Topics will include the power of media, culture and corporate governance, corporate and investor power, the role of watchdogs, the special power of central banks, whistle-blowers and the justice system. Visitors with extensive relevant experiences and discussions of current events will enrich each class.

GSBGEN 539. Negotiation Dynamics: Lessons from the Sports and Entertainment Industries. 2 Units.
Negotiation is a central part of business in the worlds of sports and entertainment. This course will examine negotiation dynamics and key takeaways for general management from multiple different settings where negotiations had an important role--these will include preparing for a negotiation, the negotiation process itself, contractual outcomes of negotiation and their execution and in some cases litigation. The settings will include negotiations over player and actor contracts, negotiations between leagues and players associations, negotiations between investors and movie companies, and negotiations between content providers (both in sports and entertainment) and distribution partners (such as cable stations, international media companies, and online companies such as Netflix). Each of the six sessions is planned to include at least one and in some cases two guests that have had extensive experience in negotiations.

GSBGEN 541. Innovation and Problem Solving. 2 Units.
This project-based seminar is a rare opportunity for students to focus on a significant, currently ongoing problem from their work/lives: with the help of classmates, participants spend 5 weeks exploring how various problem-solving methods and frameworks can apply to their chosen projects. Problems that students have brought to the course in the past range from business challenges (e.g., designing part of a complex project, evaluating a business opportunity, creating a marketing plan), to problems of a more personal nature (e.g., determining one's career path). Each seminar session is divided into two parts: whole-group discussion and practice of a particular problem-solving tool, followed by a practicum, where students work pairwise in partnerships and receive feedback and assistance on their progress. The course is designed to achieve two goals. First, it will give you tools that should increase the probability that you'll make (hopefully substantial) progress on your problem. Second, it will introduce you to research that explains why it's sensible to try those tools on hard problems, i.e., the point of those tools.[1] Please note that the first goal is stated rather cautiously. There are good reasons for this. I expect that most students will be working on hard problems. (Everyone in the class will be getting help from classmates on their particular problem; why bother your peers with an easy problem that you could solve yourself?) An important idea in cognitive science, Newell¿s Law, says that magic doesn't exist: if a problem-solving method is powerful (very likely to solve a certain type of problem), then it only works on a narrow class of problems. So this course will not give you tools that are both powerful and general. It can't: such tools don't exist. Happily, improving your problem-solving skills, at least in certain domains, is possible, and that's what the course aims to do. Progress on hard problems usually requires help from friends and colleagues. Virtually all researchers of creativity agree that most innovations that are both bold and useful involve multiple problem solvers. This course will implement this important pattern by requiring every student help a classmate with their problem. Another important empirical regularity in the field of innovation is that when problems are hard many (perhaps most) candidate-solutions don't work out. It's easy to accept that about other people's ideas; about my own, not so much. So a vital component of effective problem-solving is tough-minded evaluation. This implies rejecting bad ideas or bad parts of a would-be solution. Hence, at the end of the course you will be required to evaluate the progress that a classmate has made on his/her problem and to explain your assessment. (For obvious reasons you will not evaluate the same person you're helping.) In sum, every student will do three things in this course: generate new ways to make some progress on a problem of their own choosing; help somebody else work on their project; evaluate somebody¿s progress. Implementing this design effectively requires that everybody sign on to a social contract: everybody agrees to take all three roles seriously. [1] Some students taking GSBGEN 541 might expect a d.school style course. There are similarities: e.g.,GSBGEN 541 is project-based, as are many d.school courses. But there are also important differences. In particular, this course explains why some problem-solving techniques work better than others by introducing students to key research on cognition and organizational decision making.

GSBGEN 544. How Software Ate Finance. 2 Units.
Software is eating the world, with radical consequences for financial services. This course will give you a foundation for understanding the future of financial services, and guide you in creating fintech businesses in the 2020s and beyond. The course has three objectives. First, we study the transformation of financial services through software, surveying payments, deposits and credit cards, securities and derivatives, capital markets, digital assets (including cryptocurrencies and blockchain mechanisms), financing and lending, wealth and asset management, and regulation and compliance. Second, we invite leading innovators to address how software has shaped their experiences; identify fundamental drivers; and forecast trends, challenges, and opportunities. Third, we present a roadmap for the evolution of the financial system, where traditional dichotomies -- trader / engineer, buy side / sell side, regulated / non-regulated, infrastructure provider / infrastructure user, data provider / data consumer -- give way to an ecosystem organized around producers and consumers of Application Programming Interfaces (APIs), the rise of platforms and financial cloud providers, and the transformation of Wall Street economics into software economics. The lecturer is a computer scientist, entrepreneur, executive, investor, and risk manager. As a Stanford doctoral student, he worked on machine learning and probabilistic inference in the late 80s. Over the past 19 years, he has held multiple roles as a partner and senior leader of Goldman Sachs, including Chief Information Officer, Chief Financial Officer, and global co-head of the Firm's largest and most complex business, the Securities Division. He also founded and led Kiodex, an early software-as-a-service company for risk analytics. Kiodex became a part of SunGard (now FIS) in 2004.

GSBGEN 546. Freedom, Democracy, and Capitalism. 2 Units.
This is an American civics course for future business leaders, intended to briefly (re-)introduce students to a few of the ideas that form the foundation of the American implementation of "the Western model" of freedom, liberal democracy, capitalism, and a rules-based international order. As time permits, we will learn to apply and combine these concepts to examine current policy topics in the news.

GSBGEN 550. Leadership Demystified. 2 Units.
This seminar will explore the nature and role of leadership in organizations. We will examine such questions as (1) What is leadership? (2) Why is it important? (3) What is it that leaders actually do? (4) How do they do it? (5) How are leaders developed? (6) Why do leaders succeed or fail? (7) What about your potential for leadership and your strategy for developing it?Our primary objective in this seminar is to achieve a deeper understanding of the nature and role of leadership in organizations. Our approach will be to examine a small sample of the literature, together with the amazing story of Ernest Shackleton and his Endurance crew, and then to probe several key questions through lively class discussion. The discussion, informed by the readings and also by our collective experiences, will seek to develop some general principles and observations about leadership - particularly about how you might better develop yourself as a leader.

GSBGEN 551. Innovation and Management in Health Care. 2 Units.
The health care system accounts for 18% of US GDP and is one of the fastest growing segments of the economy. This two unit class focuses on the interplay and tension between the main players in the health care field - providers of health care services (individual doctors, group practices, integrated health care systems), payors (insurances companies, employers, consumers, and government), patients, and innovator companies (biopharma, medical device, diagnostics, and health care IT). The course is designed for students with a broad diversity of backgrounds and interests who want to better understand the health care business and system. No prior experience in the health care or medical field is assumed or needed. The focus of the class will be primarily on the US health care system, but there will be limited discussion of non-US systems as well. The course is divided into four modules: An overview of the US Health Care System and the interplay between payers, providers, innovators, and patients, Provider delivery models, health care information technology, and incentive structures - The relationship between quality, cost, and access - Integrated systems, value-based, and fee for service models - New IT technologies, including electronic data records - The role of information and incentives - Innovator business models and issues - Financing and managing new product development - Clinical trial management and gaining regulatory approval - Marketing, reimbursement, and sales strategies - Business models to drive innovation - Health care system reform The class will be taught primarily from the perspective of a business person operating a company rather than that of a policy maker, academic, or investor. While there will be a few lectures to provide background and frameworks for course topics, most classes will involve a case discussion and prominent guest speakers from the health care industry. Speakers will include CEOs and senior executives from Genomic Health, Blue Shield of California, Tenet Health, Venrock, Burd Health, Verily (Google Health), Myovant, and Stanford Medicine.

GSBGEN 552. Winning Writing. 2 Units.
This two-week, six-session workshop will offer techniques and practical in-class exercises for writing better -- better memos, emails, feedback for colleagues, news releases, responses to questions from the media and from interviewers, and opinion pieces. Glenn Kramon, an editor who has helped New York Times reporters win 10 Pulitzer Prizes, will teach the course along with accomplished journalists with expertise in powerful, persuasive writing for business. They will provide not only helpful tips but constructive feedback on students' work. They will also share thoughts on how best to work with the news media.

GSBGEN 559. The Politics, Policy, and Finance for Solving Global Warming. 2 Units.
There is increasing scientific consensus that global warming threatens our world. This course explores how the next generation of leaders can use a combination of forward-looking public policy, political power, and financing new technologies to solve this vexing challenge. The course will integrate public policy and politics with finance and real life cases on companies from Nest to Tesla. The instructor will bring regulatory leaders, elected officials and venture capitalists to class to explain how each of these leaders drive change and discuss what obstacles they must overcome in the process. There will be a heavy emphasis on class participation and students will be asked to apply what they've learned in every aspect of their GSB education, from finance and accounting to marketing and organizational behavior. Students will be asked to make their own case on which new technology, piece of legislation, or regulatory mandate will have the greatest impact on solving global warming and what role they see themselves playing in making change.

GSBGEN 561. Sports Investment Analysis. 2 Units.
Course examines investment and financing issues that face a diverse set of participants in the sports industry (defined very broadly). A key theme is using general financial concepts to better structure decision making in the sports industry. Specific topics illustrate the broad set of perspectives considered: Player Payroll Financial Dynamics; Asset Appreciation Opportunities; Assessing the Value of Players (& General Managers); Investment Syndicates in Sports; Investing in Startup Leagues; Financial Valuation of Sporting Clubs; Financial/Strategy Analysis for a Mixed Martial Arts (MMA) Venture; and On-Line Sports Venture Evaluation. One hand in requires feedback to the CEO's of several new sporting ventures about ways to expand their opportunity set; the CEO's come to a class and present their venture. The second hand in is a case study of a sports investment where there was sizable value creation or value destruction. Each session typically is co-taught with an industry visitor.

GSBGEN 562. Sports Marketing. 2 Units.
This Sports Marketing course combines (a) a focus on key marketing themes (such as branding, customer attraction/retention, and celebrity power) and (b) an analysis of marketing in diverse areas of the sporting industry: the league level, the team level, the player level, the network level, the advertiser level, the sponsor level, the fan level, and the media level. The nine sessions cover the following: Corporate Sponsorship; Online Marketing; Events as Brand Building Investments; Marketing to Youth; Sports/Entertainment Nexus; Club Marketing Strategies; Brand Revitalization & Strengthening; Motor Sports Marketing; Marketing in a Web 2.0/Social Networking World. Each session is typically taught with an industry visitor.

GSBGEN 564. The Entertainment Industry - An Intersection of Art and Commerce. 2 Units.
In this seminar we will explore the intersection of art and commerce in the entertainment industry. We will look at creating films and television programing that are artistically meaningful and/or have the potential for commercial success. The class will also look in depth at the rapidly changing business of entertainment. Films are increasingly used as a tool for social change, and we will examine this power. The entertainment industry is one of enormous importance - both from a business and cultural standpoint, and has influence on virtually every sphere of our society. Sometimes the industry can seem baffling, mercurial, and characterized more by madness than method. But despite its uncertainties, Hollywood does have its own rules, rhythms, methods and strategies ¿ and examining and evaluating them will be a key part of this seminar. This is a time when many existing formulas are being reconsidered, retooled, or jettisoned, and new technologies and expanding markets are having a profound impact on the industry - and tracking and analyzing this will be a key part of the course.I will also bring some of my professional experiences into the classroom (including directing, writing, and producing for film and television, etc.), and discuss these experiences through the intersection of the business and creative sides of the industry. We will discuss the entertainment industry's future, and address varied and effective paths for creating entertainment product with artistic and/or commercial merit. Students taking the course will be asked to be part of an in-class group exercise, and also complete a final group project where they will present their work in class.

GSBGEN 565. Political Communication: How Leaders Become Leaders. 2 Units.
This year -- 2020 -- will be a fascinating backdrop for the upcoming Presidential and Congressional races. Implications of the pandemic, its dramatic economic impacts, and four years of a non-traditional president are a contextual backdrop not seen in decades. Politics, perhaps like no other arena, provides a rich and dramatic laboratory for studying the art and science of influential communication. Whether it is a local school bond election or a Congressional race, a Presidential debate or a State of the Union Address, the demanding communications of politics provide insights into our own strengths and gaps as a communicator and leader. Political campaigns, by their very nature, are highly visible, oriented toward very specific objectives, and increasingly leverage a variety of new media platforms. They are often emotionally charged, and rife with conflict and drama. The principles of political communications transcend politics, and are useful guides for leaders in business, the non-profit community, as well as government. How candidates, elected officials, and leaders in all kinds of organizations communicate vision, values, and experience, as well as how they perform in very fluid environments, not the least of which may be during a crisis, has a great deal to do with their career success. In its 12th year, this highly interactive course allows students to explore both theory and practice behind effective positioning and presentation. Students will analyze and evaluate both successful and unsuccessful communications strategies of political campaigns and candidates. They will explore historic examples of US Presidential debates, from Nixon/Kennedy to the present. Further they will experience political events as they happen -- with each class drawing lessons from political developments around the nation and the world. Students will also hone their own strategic communications skills in activities requiring both written and spoken communication. This is not a course in political science, American government, or in public speaking. However, the engaged student will gain insights into those areas as well.The course is taught by David Demarest, former Vice President of Public Affairs for Stanford University. Demarest has broad communications experience across the public and private sector in financial services, education, and government. After serving as Assistant U.S. Trade Representative, and Assistant Secretary of Labor in the Reagan Administration, in 1988 he served as Communications Director for Vice President George H. W. Bush's successful presidential campaign. He then became a member of the White House senior staff as White House Communications Director. After leaving government in 1993, he spent the next decade leading communications for two Fortune 50 companies, before coming to Stanford in 2005.

GSBGEN 566. Dilemmas and Decisions. 2 Units.
GSBGEN 566 is an elective course offered to 2nd-year MBA and MSx students. The goal of this course is to improve students' judgment in confronting challenging, real business situations encountered in the normal progression of corporate activities. The course aims to sharpen moral reasoning and build judgment without favoring a particular position. The course will be taught by Mark Leslie and Peter Levine, Lecturers.The course is taught using ¿vignettes¿. At the beginning of each class students will be given a one-page reading that describes a business situation which requires a decision to be made. After in-depth discussion, a second page will be handed out, describing how the situation actually unfolded and challenges the class with new information. This new information typically changes the dynamics of the case and requires a new decision to be made. Often there is a third and fourth page that continues the dialogue. Frequent student-to-student and student-to-instructor role-playing will be employed in the development of the session. Note that for most classes there is little or no advanced preparation required, which is often the case when making real-world business decisions.Cases are drawn from a wide selection of ACTUAL BUSINESS SITUATIONS with protagonists joining the class as guests whenever available. Vignettes are based on topics such as raising venture capital, managing major industrial customers, product distribution agreements, board of director and fiduciary conflicts, developing financial instruments, palace revolt / mutiny, work/life balance, rape accusation of an executive, etc.The class is extremely engaging - it is quite usual to find continuing discussion of the day's case outside the classroom among small groups of students.This class is for two GSB credits and will be graded on a pass/fail basis. Sixty percent of the final grade will be derived from classroom performance; the remainder will be based on a final written assignment describing a personal ethical situation that the student has faced in their careers.

GSBGEN 568. Managing Difficult Conversations. 2 Units.
This elective 2-unit course is offered to all medical students, residents, and fellows, and to GSB students who aspire to improve their ability to deal effectively with difficult interpersonal situations. The course will be taught by William F. Meehan III, the Lafayette Partners Lecturer in Strategic Management, Stanford Graduate School of Business and Charles G. Prober, M.D., Professor of Pediatrics, Microbiology & Immunology and Senior Associate Vice Provost for Health Education, Stanford School of Medicine. The course, which will be case-based, will involve frequent student-to-student and student-to-instructor role-playing in authentic medical interactions and difficult interpersonal situations. Topic-specific experts often will be present to participate as class guests. Relevant principles of professionalism, leadership, and psychology underlie the course pedagogy. There will be seven classes held on Wednesdays beginning April 10th and concluding on May 22nd. Students will be expected to attend all classes unless excused in advance. Class preparation will include reading of assigned cases; analysis of the cases and recommendations as to how to confront specific difficult conversations (consistent with assigned study questions); and reading of assigned background material. It is important that all students participate actively in classroom discussions. For GSB students, 50% of the final grade will depend on classroom performance; the remainder will be based on a final written assignment of 3-5 pages. GSB students will be graded on a Pass/Fail basis. The course will be ungraded for medical students, residents and fellows. All students will be expected to complete the written assignment. Class size will be limited to 40 students per the following: (1) a maximum of 20 GSB students and (2) a maximum of 20 medical students, residents, and fellows.

GSBGEN 569. The Open Road: Innovation in Cars, Driving, and Mobility. 2 Units.
This course will look at ongoing and upcoming innovation in cars, driving, and mobility from three perspectives: (1) technology, (2) economics & business models, and (3) policy. We'll survey changes in powering vehicles (e.g. electrification and biofuels), in-vehicle connectivity and communications, and most especially changes in autonomy and self-driving vehicles. We'll examine at changes in the economics of cars, vehicles, and driving¿new business models, shared ownership, mobility as a service, as well as who some of the major players are in this nascent field and what they are doing/developing. And we'll explore the interactions of technology and economics with policy and broader societal changes¿direct effects like safety, legal liability, and who can drive; indirect effects on traffic, insurance, infrastructure needs, fuel taxes, and the environment; as well as longer-term and even bigger changes in daily life and where and how we live, work, and drive.The class is structured a bit like a large seminar. At the beginning of the quarter each student will, with the instructor, choose a topic to research. The student will interview experts on that topic and then write a memo. Most of our class sessions will be dedicated to discussing the memos written by you and your peers.

GSBGEN 574. Effective Virtual Communication: Presenting via the web, video, and teleconference. 2 Units.
Ever wonder if your online audience is paying attention to your web presentation or meeting? Have you wanted more engagement from your participants? Communicating virtually - using conference or video calls, web tools, and mobile devices is very challenging. Yet more and more communication is happening with presenter and audience connecting electronically.nInformed by scholarly research and industry best practices, this workshop will provide a hands-on, practical introduction to immediately applicable techniques that will help you prepare and deliver engaging, participative, and impactful virtual presentations.nnSpecifically, you will learn techniques for confidently delivering virtual presentations, how to create content that invites engagement, and how to facilitate speaker-audience interactions that invite collaboration without losing control. We will also cover best practices for responding to audience input and questions that will amplify your message and for handling challenging interactions and questions. With these virtual-presenting skills, you will feel more confident presenting and your audience will be more connected and engaged.

GSBGEN 576. Work and Family. 2 Units.
This course examines the strategies that highly educated women and men use to combine work and family and the strategies that managers and policy makers can use to help others strike a balance. Topics include the tradeoffs in becoming a stay-at-home parent, the economic value of unpaid labor, the consequences of balancing two high-powered careers and children, the economics of marriage, fertility, child care, and elder care, the gendered division of labor in the home, time-management , workplace innovations, and policy initiatives. Guest speakers add their own perspectives on these issues and describe the roles their organizations play.

GSBGEN 578. Is the Internet Broken?. 2 Units.
This interdisciplinary course examines the promise, peril, and possible future of the Internet and the impact of the World Wide Web on our lives. We will explore the most pressing contemporary issues facing the Internet, including debates on privacy, antitrust, freedom of speech, access, neutrality, and regulation. We will also unpack the claim that "decentralization," as it has grown with new technologies such as blockchain and crypto assets, captures the original vision of the Internet. A key question we will address is: What should be the roles of markets, governments, and different stakeholders in shaping the Internet? Students will have the opportunity to reflect on their own motivations and roles as digital consumers, potential innovators, and future leaders in this process. Guests from the tech sector and elsewhere will enrich our discussion. Co-Instructor: Jonathan Dotan.

GSBGEN 581. Philanthropy, Inclusivity and Leadership. 2 Units.
A philanthropist is anyone who gives anything-time, expertise, networks, credibility, influence, dollars, experience-in any amount to create a better world. Regardless of one's age, background or profession, everyone has the potential to lead in a way that both tackles the complex social problems our interconnected world faces and creates greater inclusivity, access and impact. This demanding two-week, compressed course will provide passionate students with a brave space to develop and refine a plan for their own social change journey and amplify their potential to give, live and lead in a way that matters more. Using design thinking, students will challenge their preconceptions and wrestle with their social change approach, their privileged position as future Stanford graduates and philanthropy's role in society. Lectures and class discussions will inspire and prepare students to create social value with greater intentionality and humility. For the first class, students will submit a proposed social impact plan for their professional, philanthropic and civic lives. Over the course¿s six sessions, students will refine their plan, creating a formal theory of change that strategically utilizes their unique leadership platform and asset portfolio to advance opportunity and justice for a target population. Potential guest speakers include Darren Walker, President of the Ford Foundation; Justin Steele, Principal at Google.org; Crystal Hayling, Executive Director of the Libra Foundation; Rob Reich of Stanford PACS and Laura Muñoz Arnold, Co-Chair of the Laura and John Arnold Foundation.

GSBGEN 585. Project You: Building and Extending your Personal Brand. 2 Units.
GSB Graduates will be entering and re-entering the workforce needing to know and understand how to build, broadcast, maintain and protect their personal brand. Project You will help each student realize: What is a personal brand and how can it be unleashed as a valuable, competitive advantage? Why do you need a personal brand? How do you differentiate yourself and create a brand identity and strategy? How do you use social and traditional media to enhance your brand effectively as well as measure the metrics of social media responses? And how do you know when to pivot and evolve your brand for sustainability? GSB Lecturer, Allison Kluger, a former Television Executive and Co-Lecturer, Tyra Banks, Supermodel/Entrepreneur/Television Executive/Business CEO, will lead this class. They will help students create their own specific image to support their brand, teach them how to navigate on-air exposure, and help them create a long-term strategy for how to promote their personal brand across several media platforms. Within a highly interactive learning environment, image transformations, live broadcasting of presentations at a television station, live streaming of portions of the class on Facebook Live, and YouTube recordings of presentations will all be part of the assignments and requirements. The class culminates with the students sharing their honed personal brand to the public via three viable platforms (Facebook Live, local television, YouTube) to jump-start their personal brand extension. A 1:30 video stating "Who you are, what your personal brand is, and what you want it to be" will be a mandatory requirement before Class #1.

GSBGEN 595. High-Stakes Decision Making. 1 Unit.
Effective decision making is a critical skill for political and business leaders. Decisions must be made under pressure and often with incomplete information. George Osborne was Chancellor of the Exchequer of the United Kingdom in the aftermath of the global economic crisis, and this class will study three of the biggest challenges global economic policy makers faced during this time. Students will gain a framework for how senior leaders approach decision making, and will be given the chance to put this into practice. Each class will include a simulation where students are put in the role of a senior policy maker facing a key decision.

GSBGEN 596. Designing AI to Cultivate Human Well-Being. 2 Units.
Artificial Intelligence (AI) has the potential to drive us towards a better future for all of humanity, but it also comes with significant risks and challenges. At its best, AI can help humans mitigate climate change, diagnose and treat diseases more effectively, enhance learning, and improve access to capital throughout the world. But it also has the potential to exacerbate human biases, destroy trust in information flow, displace entire industries, and amplify inequality throughout the world. We have arrived at a pivotal moment in the development of the technology in which we must establish a foundation for how we will design AI to capture the positive potential and mitigate the negative risks. To do this, we must be intentional about human-centered design because, ¿Only once we have thought hard about what sort of future we want, will we be able to begin steering a course toward a desirable future. If we don¿t know what we want, we¿re unlikely to get it.¿ Thus, building AI must be an inclusive, interactive, and introspective process guided by an affirmative vision of a beneficial AI-future. The goal of this interdisciplinary class is to bridge the gap between technological and societal objectives: How do we design AI to promote human well-being? The ultimate aim is to provide tools and frameworks to build a more harmonious human society based on cooperation toward a shared vision. Thus, students are trained in basic science to understand what brings about the conditions for human flourishing and will create meaningful AI technologies that aligns with the PACE framework:·has a clear and meaningful purpose ·augments human dignity and autonomy ·creates a feeling of inclusivity and collaboration·creates shared prosperity and a sense of forward movement (excellence)Toward this end, students work in interdisciplinary teams on a final project and propose a solution that tackles a significant societal challenge by leveraging technology and frameworks on human thriving.

GSBGEN 598. Stanford-Tsinghua Exchange Program. 1 Unit.
This course is open only to students participating in the Stanford-Tsinghua Exchange Program and is required of those students. Requirements include researching and reporting on companies to be visited, planning the business meetings during the Beijing and Stanford weeks, and attending lectures and discussions at Stanford and Tsinghua. Offered Pass/No Pass only. 1 unit. Autumn quarter.
Same as: A

GSBGEN 599. Stanford-Tsinghua Exchange Program. 1 Unit.
This course is open only to students participating in the Stanford-Tsinghua Exchange Program and is required of those students. Requirements include researching and reporting on companies to be visited, planning the business meetings during the Beijing and Stanford weeks, attending lectures and discussions at Stanford and Tsinghua, and completing the peer evaluations and reflection videos. Offered Pass/No Pass only. 1 units. Winter quarter.
Same as: B

GSBGEN 622. Presentation and Communication Skills for Academics. 2 Units.
Academics must effectively communicate the importance of their research to a wide range of audiences, including colleagues, students, stakeholders, and the general public, as well as in a variety of contexts, from academic conferences and job talks to one-on-one conversations, news interviews, and social media. This highly interactive course is designed to equip PhD students with the skills to confidently present their research and connect with varied audiences. Students will craft an elevator pitch for academic settings, create a 3-min TED-like talk aimed at the general public, learn how to document and tell the "story" of their research, and practice responding to Q&A and research critiques. This class combines best practices from public speaking with elements from related fields, including the art of improv and the science of communication.

GSBGEN 641. Advanced Empirical Methods. 3 Units.
This course covers various advanced quantitative methods with applications in marketing and economics. Topics include simulation-based estimation, dynamic decision processes, and other topics relating to empirical models of demand and supply. The course stresses the conceptual understanding and application of each technique. Students will learn to apply these techniques using Matlab or an equivalent language.

GSBGEN 646. Behavioral Economics and the Psychology of Decision Making. 3 Units.
This seminar examines research on the psychology of judgment and choice. Although the normative issue of how decisions should be made is relevant, the descriptive issue of how decisions are made is the main focus of the course. Topics of discussion include choice, judgment heuristics and biases, decision framing, prospect theory, mental accounting, context effects, task effects, regret, and other topics. The goal of the seminar is twofold: to foster a critical appreciation of existing knowledge in behavioral decision theory, to develop the students' skills in identifying and testing interesting research ideas, and to explore research opportunities for adding to that knowledge.

GSBGEN 675. Microeconomic Theory. 3 Units.
This course provides an introduction to microeconomic theory designed to meet the needs of students in the GSB non-Economics PhD programs. The course will cover the standard economic models of individual decision-making, models of consumer behavior and producer behavior under perfect competition, the Arrow-Debreu general equilibrium model, and some basic issues in welfare measurement. This class assumes a basic knowledge of undergraduate intermediate microeconomics, comfort with multivariable calculus and linear algebra and some exposure to real analysis.

GSBGEN 691. PhD Directed Reading. 1-15 Unit.
This course is offered for students requiring specialized training in an area not covered by existing courses. To register, a student must obtain permission from the faculty member who is willing to supervise the reading.
Same as: ACCT 691, FINANCE 691, HRMGT 691, MGTECON 691, MKTG 691, OB 691, OIT 691, POLECON 691, STRAMGT 691

GSBGEN 692. PhD Dissertation Research. 1-15 Unit.
This course is elected as soon as a student is ready to begin research for the dissertation, usually shortly after admission to candidacy. To register, a student must obtain permission from the faculty member who is willing to supervise the research.
Same as: ACCT 692, FINANCE 692, HRMGT 692, MGTECON 692, MKTG 692, OB 692, OIT 692, POLECON 692, STRAMGT 692

GSBGEN 697. Research Fellows Practicum. 1-6 Unit.
.

GSBGEN 802. TGR Dissertation. 0 Units.
.
Same as: ACCT 802, FINANCE 802, HRMGT 802, MGTECON 802, MKTG 802, OB 802, OIT 802, POLECON 802, STRAMGT 802

Human Resource Management Courses

HRMGT 203. People Analytics. 2 Units.
How can we use big data, machine learning and artificial intelligence to inform design, hiring, promotion and human resource management processes in organizations? We will discuss the theoretical and practical challenges that these issues present, and the ways by which data can help resolve them. In doing so, we will explore various data analytic methods and different data types, as well as the pitfalls and ethical issues their use introduces.

HRMGT 210. Org 2.0: The Analytics of Organization Design. 2 Units.
This elective will bring you to the cutting edge of how organizations are (re)-designed using analytics. You will learn about a variety of tools which enable Perception (i.e. understanding what is happening in the organization right now), Prediction (i.e. forecasting what is likely to happen in the future, based on sophisticated extrapolation of past data) and Prototyping (i.e. determining which decisions are likely to be successful based on pilot tests) in organizations. This is a hands-on class: we will rely extensively on group exercises, in which you will be able to learn enough about analytical tools and programming to be able to collaborate with analysts and evaluate their work. You will also have the chance to interact with industry speakers who have been applying these techniques in practice. The suite of new ideas that characterize ¿Org2.0¿ represents a major departure from the mainstream approach to organization design, which relies extensively on copying ¿best practices¿ from other companies, represents organizations as ¿boxes and arrows¿ organization charts, and is typically obsessed with incentive compensation and reporting as the key organizational/HR decisions. In Org2.0, you will learn how to use analytics to find out what works specifically for your company (rather than what worked in others), develop detailed models of interactions among employees (rather than among boxes) to help them collaborate successfully, and think of organization design as a combination of factors which can all be better understood through analytics. This approach has been made possible both by recent theoretical developments in organization design and by access to vast computational power and data arising from digitalization. Some of the skills you will learn include: -Thinking about complex organizations by breaking them down into a few basic building blocks or ¿micro-structures¿ -Using graph theory to map networks of interaction within organizations -Using machine learning to answer the fundamental ¿people¿ questions in organizations: whom to hire, develop and retain? - Prototyping organizational changes in silico using agent-based computational models -Using A/B testing (a.k.a. Randomized Controlled Trials) to know rather than guess which organizational designs will be effective Who should take this course? If you are likely to be involved in strategy execution, post-merger integration, re-organizations, or HR in either a direct or advisory role (regardless of how big or small your company is), this course will put you at the cutting edge of thinking and methodology in these areas. Some of the exercises will involve programming (in the Python language, specifically). However, you DO NOT need to know statistics (beyond that covered in core courses) or computer programming to take and benefit from this course. We will provide technical support and will design exercises in a way that you can focus your energies on mastering the concepts and thinking of solving business problems. The course won't turn you into data analysts, but it will help you manage them.

HRMGT 282. People Operations: From Startup to Scaleup. 4 Units.
This course focuses attention on human resource strategies for startups. It discusses recruitment, incentives, design of jobs, development of talent, leadership and empowerment challenges in startups. We will deal with questions ranging from equity splits to founding team dynamics, hiring talent to the sequencing of hires. We will use a mix of "live cases" from the field, and lectures.

HRMGT 284. People Management Strategy in Startups and Growing Firms. 2 Units.
The average CEO, C-suite manager, or funder, will say that a firm¿s success hinges on hiring and motivating the right people. Therefore, this class aims to examine the people management strategies you might choose from as you build a young firm, or as you grow a larger firm. There are three facets to this course. The first is to acknowledge that the People Management Strategy that you choose must be selected with the overall external strategy of the firm in mind. Technology-based firms will have different strategies than brick-n-mortar retail firms. The second facet is to discuss the evolution of people management strategies as the firm grows over time: a very small firm will have few formal processes; a large firm typically can¿t live without them and may need to change them over time. The third facet covered is an analysis of the detailed issues you should consider as you set up your HR practices surrounding hiring, compensation, and promotion. Classes will have guest speakers, and cases will draw from LinkedIn, Box, Royal Bank of Canada, Tesla, the Gap, and various startups.

HRMGT 286. Managing People in the Global Context. 2 Units.
The world of work has changed fundamentally - firms are now integrally linked to the global economy and many of you will manage teams of people located in different countries. What are the typical "people" challenges that arise when working across borders? We will answer this question by looking at topics such as hiring, job design, teamwork, training, pay and promotions. We will use exercises, cases from both developed and developing economies and guest lectures.

HRMGT 302. Incentives and Productivity. 4 Units.
This course is designed to teach the student how to use economics to solve practical personnel problems that affect worker productivity. Topics include: selecting the best workers to hire, training workers, turnover, setting compensation strategically, structuring salespersons' commissions, downsizing, using promotions as an incentive mechanism, and other topics. Examples and cases will be presented to demonstrate the importance of using economic techniques to structure human resources programs. The course will appeal most to the student who expects to be a general manager or who hopes to run his or her own business. Although the human resources specialist may benefit from this course, the emphasis will be on decisions that affect personnel, but are made primarily by general managers. The class format is somewhat unusual. Most classes consist of lecture with questions, but two are class workshops. The lecture will present a theoretical development of a topic. The questions discussed during the last part of the lecture period will involve practical business application of the theory presented in lecture. This course is more technical than other human resources courses, but should be accessible to anyone who has successfully completed the economics and statistics courses in the MBA core. Every student is expected to know calculus and basic probability and statistics. Although I will not emphasize the technical aspects on the final exam, the problem sets will require some knowledge of mathematics. To ease your fears, many "poets" have taken variants of this course in the past and have done well.There will be graded team problem sets and a final exam.

HRMGT 382. People Operations: From Startup to Scaleup. 4 Units.
This course focuses attention on human resource strategies for startups. It discusses recruitment, incentives, design of jobs, development of talent, leadership and empowerment challenges in startups. We will deal with questions ranging from equity splits to founding team dynamics, hiring talent to the sequencing of hires. We will use a mix of "live cases" from the field, and lectures.

HRMGT 384. Understanding the Trends Transforming the World of Work: Lab for HR Startups. 4 Units.
The purpose of the course is to review the key trends transforming the world of work in a post-covid environment, and then get students to define and sharpen their definition of entrepreneurial opportunities to improve the world of work. It will be offered as a 'lab' - in that in each session will focus on the transition from a transformative trend to an entrepreneurial opportunity.

HRMGT 503. People Analytics. 2 Units.
How can we use big data, machine learning and artificial intelligence to inform design, hiring, promotion and human resource management processes in organizations? We will discuss the theoretical and practical challenges that these issues present, and the ways by which data can help resolve them. In doing so, we will explore various data analytic methods and different data types, as well as the pitfalls and ethical issues their use introduces.

HRMGT 691. PhD Directed Reading. 1-15 Unit.
This course is offered for students requiring specialized training in an area not covered by existing courses. To register, a student must obtain permission from the faculty member who is willing to supervise the reading.
Same as: ACCT 691, FINANCE 691, GSBGEN 691, MGTECON 691, MKTG 691, OB 691, OIT 691, POLECON 691, STRAMGT 691

HRMGT 692. PhD Dissertation Research. 1-15 Unit.
This course is elected as soon as a student is ready to begin research for the dissertation, usually shortly after admission to candidacy. To register, a student must obtain permission from the faculty member who is willing to supervise the research.
Same as: ACCT 692, FINANCE 692, GSBGEN 692, MGTECON 692, MKTG 692, OB 692, OIT 692, POLECON 692, STRAMGT 692

HRMGT 802. TGR Dissertation. 0 Units.
.
Same as: ACCT 802, FINANCE 802, GSBGEN 802, MGTECON 802, MKTG 802, OB 802, OIT 802, POLECON 802, STRAMGT 802

Marketing Courses

MKTG 240. Marketing Management. 3 Units.
The objectives of this course are to introduce students to the substantive and procedural aspects of marketing management and to sharpen skills for critical analytical thinking and effective communication. Specifically, the goals are to introduce students to marketing strategy and to the elements of marketing analysis: customer analysis, competitor analysis, and company analysis; to familiarize students with the elements of the marketing mix (product strategy, pricing, advertising and promotion, and distribution), and to enhance problem solving and decision-making abilities in these operational areas of marketing; and to provide students with a forum (both written and verbal) for presenting and defending their own recommendations, and for critically examining and discussing the recommendations of others.

MKTG 243. Marketing Management, Accelerated. 3 Units.
The objective of this course is to introduce you to modern marketing practice at an accelerated level. Marketing is key to the success of an organization and requires an ability to design and execute a coherent strategy across a number of different dimensions. Specifically, we study in depth each of the tactical P's "price, promotion, product, and place (distribution)" and do so through the structural lens of the three C's "customer, competition, and company, with a particular focus on the customer." Going beyond the fundamentals, the course emphasizes two specific areas of specialization and learning throughout. First, it focuses on data-driven techniques for assessing markets and teaches you which of these techniques apply to different marketing decision problems. Second, the course takes seriously the idea that consumers often want different things. It therefore focuses on how you can generate company value by understanding and serving heterogeneous consumer wants and needs.

MKTG 249. MSx: Marketing. 3 Units.
Every business has two kinds of problems: 1) Not having customers and 2) everything else. Marketing addresses the first problem. With increased access to information and fast-changing technology the role of marketing has broadened significantly. To attract and retain profitable customers, managers must identify and measure consumers' needs and wants, assess the competitive environment, select the most appropriate customer targets, and then develop multi-faceted marketing programs that satisfy consumers' needs better than the competition. The objective of this class is to provide you with perspectives on classical and modern day marketing, and to teach you how to take both a strategic and analytical approach towards contemporary marketing challenges.

MKTG 326. Customer Acquisition for New Ventures. 3 Units.
The focus of this course is on the strategies and methods used by early-stage companies to acquire customers (through outbound or inbound marketing) and to activate and retain them (i.e., to encourage repeat behavior and/or increase the frequency of interaction). Throughout the course, we will examine topics such as search engine marketing (SEM), content marketing, affiliate marketing, social media campaigns, mobile applications, freemium strategies, and the use of web analytics for tracking customer acquisition and conversion. The focus will be mainly on digital marketing channels, and the emphasis will be more B2C than B2B. Instruction will consist of case discussion, exercises and simulations, and guest lectures, with students working in groups to apply their learning to improve the process of customer acquisition.

MKTG 335. Product Launch. 3 Units.
Our focus is on the question, "When launching a product, what are the framing issues that will help determine success?" In particular, we will provide you with tools to analyze market situations and determine whether it makes sense to launch a product or engage in a marketing-related investment. The course is not designed to cover issues such as execution of a strategy (although we will touch on this a bit), but on whether to enter a market to begin with. Thus, the course is decision oriented; we want you to think about market entry decisions and how you would make them. The tools that you will be provided won't consist of equations; instead, we'll arm you with a set of questions to ask, whose answers will help you make better decisions.nnnThis course is an advanced applications marketing course. Unlike the base core course that is designed to cover every basic topic in marketing, here we focus on a number of basic questions and explore them in depth. Although we will have some lectures for background, the bulk of this endeavor will be accomplished through case discussions. In other words, we can't and won't cover everything, as this course is not designed to be comprehensive. We are going to rely on your academic background in marketing to cover the basics; here and there, it is possible that some material will be a review of what you've done before (there's nothing wrong with a little de ja vu). Unfortunately, due to the tight schedule we will not be able to cover any of the basics that are not already included in the course material.nnThe course includes, cases, lectures, and guest lectures.

MKTG 337. Applied Behavioral Economics. 3 Units.
The field of behavioral economics couples scientific research on the psychology of decision making with economic theory to better understand what motivates economic agents, including consumers, managers, public policymakers, investors, and employees. In this course, we will examine topics such as the ¿¿"irrational"¿? patterns of how people think about products, money and investments, designing strategies and offerings to change behavior, and the drivers of happiness and the role of emotions in decision-making. This highly interdisciplinary course will be particularly relevant to students with interests in general management, entrepreneurship, Marketing, Strategy, Behavioral Finance, public policy, and nonprofit. Topics covered will include: Rationality and choice, choice complexity, intertemporal choice, emotional influences on choice, the role of behavioral economics in marketing, spending and savings behavior, social welfare, choice architecture, and defaults. The goals of this course are threefold: a) to study the basic principles of behavioral economics, b) To learn the application of the principles to various aspects of business and policy, and c) to think about a framework for developing products, programs, and tactics that are behaviorally informed. The course is composed of a mixture of lectures, exercises, academic paper reviews, and in-class case discussions. The purpose of the lectures is to present and discuss theories, concepts, analytical techniques and empirical findings. In-class exercise will be used to apply the concepts and techniques covered in the class. We will discuss a few business cases. In addition, students working in teams will prepare an analysis and recommended behavioral strategy for a company/startup of their choice.

MKTG 344. Marketing Research. 3 Units.
How large is the market for a product, what is important for the target segment? How does change in the product design affect profitability? This course aims to help students ask such business questions and find data-driven answers to them. The main objectives are to equip students with: 1) an understanding of the value of data - what intelligence it can and cannot provide, 2) exposure to state-of-the-art quantitative tools including conjoint analysis, and unsupervised machine learning techniques such as cluster analysis to analyze the data, and 3) sufficient hands-on experience with these tools for answering students' own marketing research questions from the perspective of an entrepreneur, marketer or a consultant. The course is designed to address substantive marketing problems such as: market segmentation, targeting, forecasting demand, pricing, and developing new products. We will use a mix of lectures, exercises, cases and a project to learn the material.

MKTG 346. Humor: Serious Business. 3 Units.
YOU, oh fearless leader of the future (and maybe present). Are very important.You will make critical and far-reaching economic, political, and social decisions in your quest beyond Stanford to change lives, change organizations, and change the world. That¿s serious stuff.So, why humor? The late journalist Eric Sevareid said ¿Next to power without honor, the most dangerous thing in the world is power without humor. ¿ Our goal is to pin you down and not let you leave Stanford without a healthy dose of humanity, humility, and intellectual perspective that only humor can bring.This class is about the power (and importance) of humor to make and scale positive change in the world, and also ¿ surprise! ¿ to achieve business objectives, build more effective and innovative organizations, cultivate stronger bonds, and capture more lasting memories. We will explore various aspects of levity and humor, reveal insight into what makes people laugh, and provide tools to harness humor safely and effectively in business. By the end of class, you should: Discover. (Re)discover humor in your stories and life; understand your unique style and the styles of others.Play: Apply techniques from comedians and play with incorporating humor into otherwise unfunny moments.Lead: Embed humor into your leadership style; understand the nuance of how to do this as your status shifts across roles and contexts. Activate: Amplify humor, using it to create cultures of levity in teams, organizations, and in the world.Welcome to your (re)introduction to humor.

MKTG 353. Social Brands. 4 Units.
As savvy consumers are increasingly participating in brands rather than merely receiving their messages, how do leading organizations stoke conversations, co-create experiences and stories, and build engaging relationships with consumers? Moreover, how do they harness social media to build a brand, and empower employees and consumers to share these brand stories with others?n nSocial Brands is a hands-on, project-based course that will draw brain power from the GSB, School of Engineering, and other Stanford graduate programs to collaboratively and creatively explore these questions. While we examine various inspiring examples of social brands, we will find that the rules are yet to be written. This emerging genre of social commerce and marketing is the "Wild West" and students working in mixed teams will be challenged to design and launch their own social experiments to form their own hypotheses. n nAssignments will push student teams to audit a brand, focus on a strategic goal, and design a social interaction that invites people on campus to participate in an extraordinary personal experience with that brand. Teams will then capture this experience in short videos and compile them into a story -- one that highlights the brand experience they orchestrated, its impact, and their key learnings. This course will integrate approaches from the d.school and marketing curriculum - including brand strategy, storytelling fundamentals, human-centered methods, rapid prototyping, and a bias toward action. This is a class for those that want to learn by doing and creating.nnMKTG 353 - Social Brands class website: http://www.stanford.edu/class/mktg353/.

MKTG 365. Marketing Analytics. 3 Units.
Firms operate in an increasingly challenging business environment, with greater competition, more informed customers and rapidly changing market trends. Simultaneously, they also have access to more information about their customers, the marketplace and their competitors than ever before. In this environment, knowing how to use this information to make optimal business decisions is a crucial competitive advantage. Firms often have access to data that they do not know how to use. The objectives of this course are to introduce students to state-of-the-art marketing analytics and to teach them how to practically apply these analytics to real-world business decisions.nnnThe following are examples of the types of questions that the course will address: How should a firm determine the prices for its products and services? What is the effect of television advertising on a brand's sales and how should advertising be optimized? What can a firm learn about its customers from online browsing behavior and how can this knowledge be used for targeted advertising and promotions? How should a firm allocate its sales force? How should a firm manage the allocation of its promotional budget in order to maximize its returns? How should the mailing of catalogs or direct mail be targeted to increase response rates? nnnThe course will use a mix of lectures, cases, homework assignments and a course project to learn the material. Students do not need to have an advanced statistical background to take this course. Familiarity with the material in an introductory marketing course and an introductory statistics course will be assumed, but necessary material will be reviewed during the course of the quarter as necessary.

MKTG 366. Marketing Analytics. 3 Units.
This course is focused on advanced methods and approaches to marketing analytics. Firms often operate in an increasingly challenging environment, with greater competition, more informed customers and rapidly changing market trends. They also operate in a data-rich environment, with information often at the individual customer level. Knowing how to use this information to optimize business decisions is a competitive advantage.nnnThe course will take a hands-on approach to learning advanced techniques and methods in marketing analytics. The course will set a broad set of topics including pricing, advertising, channel management and customer relationship management amongst others. Students will use a mix of approaches including statistical methods, experimental and quasi-experimental approaches. This course will use a hybrid model, with a mix of case studies, exercises and flipped classrooms, where students will read/view material in advance of the class, with the class sessions focusing on discussing the topics at a deeper level. A major component of the course will be a project that students will work on in partnership with a firm on solving a business problem using the methods and approaches learned in this course.nnnThe course will be a good fit for students who have a background in advanced statistical methods and programming, or are willing to acquire these skills on their own in advance.

MKTG 368. Consumer Search and Marketing: Business Models in the Information Economy. 3 Units.
This class will explore the role of consumer search and firms' information provision with a focus on online markets and companies. Because the amount of information available to consumers has increased dramatically, it has become paramount for companies to facilitate consumers search process. We will cover both the relevance for companies to reach consumers through their presence on third-party search platforms such as Google as well as how companies help consumers navigate through their own assortment by means of recommendation algorithms (e.g. Netflix, Spotify). Furthermore, we will discuss business models of companies that facilitate search by aggregating and presenting results from other vendors such as Kayak or eBay. Finally, we discuss new sources of information such as online reviews and consumer word-of-mouth on social media and how firms can effectively influence and manage those sources of information.

MKTG 373. Monetization. 3 Units.
This course examines the fundamental issues of creating a strategy for monetization and revenue growth within an organization. Students learn about setting an organization's business model design, aligning various functional areas within the company to implement a monetization strategy, and the tradeoffs that occur when choosing amongst profitable monetization policies for the firm. They master concepts, frameworks, and tools to assess an industry and a firm's pricing strategy and business models, and to craft alternatives. They also study the interplay between marketing and sales, advertising and data and analytics in shaping a winning monetization policy. Topics we will cover include monetizing online content and strategies in ad-driven industries, understanding freemium models and installed-base competition, monetization of consumer data, SaaS models and enterprise business, business models from the perspective of investors and venture capitalists, regulatory considerations, and linking monetization to the ability to measure and capture value. We will use a mix of cases and lectures along with extensive participation from industry leaders to bring to light the various issues in class. There is a bias towards technology-driven markets.

MKTG 375. Consumer Behavior. 4 Units.
Contemporary approaches to marketing emphasize the importance of adopting a consumer focus, from determining consumers' wants and needs to shaping their attitudes and ensuring their loyalty. This course provides insight into consumer psychology and the means by which consumer behavior can be influenced or altered. The course has both theoretical and practical objectives in that it will: (1) explore theory and research that is relevant to understanding consumer psychology and behavior, and (2) apply these theories and findings to generate ideas for developing effective marketing techniques and tactics. By shedding light on the psychological underpinnings of consumers' thoughts, attitudes, preferences, needs, and decision-making styles, this course will help students make more insightful and effective marketing decisions. Moreover, because this course takes a broad psychological perspective, it highlights novel ideas for grabbing attention, shaping behavior, and changing people's minds both within and outside of traditional marketing contexts.

MKTG 526. Customer Acquisition for New Ventures. 2 Units.
The focus of this course is on the strategies and methods used by early-stage companies to acquire customers (through outbound or inbound marketing) and to activate them (i.e., to encourage repeat behavior and/or increase the frequency of interaction). Throughout the course, we will examine topics such as search engine marketing (SEM), content marketing, affiliate marketing, social media campaigns, mobile applications, freemium strategies, and the use of web analytics for tracking customer acquisition and conversion. The focus will be mainly on digital marketing channels, and the emphasis will be more B2C than B2B. Instruction will consist of case discussion and guest lectures, with students working in groups to apply their learning to improve the process of customer acquisition.

MKTG 532. Persuasion: Principles and Practice. 2 Units.
The aim of this course is to provide insight into the psychology of persuasion. We will take an evidence-based approach and explore research and theory in this domain to identify powerful techniques for changing people's attitudes and behaviors. We will apply our insights broadly to examine the features that make for an effective persuasive appeal in a wide range of settings (e.g., an ad, a pitch to investors, etc.), and students will practice designing and implementing persuasive messages. In each session, I will share classic and cutting edge research on persuasion emanating from the fields of social and consumer psychology. These insights will be organized around a few basic principles. We will then work together to brainstorm and practice the application of the insights to real world persuasion settings.

MKTG 534. The Travel and Airline Industry. 2 Units.
This class provides an overview of the travel and airline industry focusing on strategy, business models, operations and trends. Topics we will cover include competition, service delivery, distribution, pricing, planning and the use of analytics within verticals such as airlines, hotels, online travel agencies and cruises. We will also discuss trends such as the sharing economy and the role of user generated content in facilitating travel. We will hear from several C-level executives who have started or led businesses in the Travel Industry.

MKTG 535. Product Launch. 2 Units.
Our focus is on the question, "When launching a product, what are the framing issues that will help determine success?" In particular, we will provide you with tools to analyze market situations and determine whether it makes sense to launch a product or engage in a marketing-related investment. The course is not designed to cover issues such as execution of a strategy (although we will touch on this a bit), but on whether to enter a market to begin with. Thus, the course is decision oriented; we want you to think about market entry decisions and how you would make them. The tools that you will be provided won't consist of equations; instead, we'll arm you with a set of questions to ask, whose answers will help you make better decisions.This course is an advanced applications marketing course. Unlike the base core course that is designed to cover every basic topic in marketing, here we focus on a number of basic questions and explore them in depth. Although we will have some lectures for background, the bulk of this endeavor will be accomplished through case discussions. In other words, we can't and won't cover everything, as this course is not designed to be comprehensive. We are going to rely on your academic background in marketing to cover the basics; here and there, it is possible that some material will be a review of what you've done before (there's nothing wrong with a little de ja vu). Unfortunately, due to the tight schedule we will not be able to cover any of the basics that are not already included in the course material.The course includes, cases, lectures, and guest lectures.

MKTG 539. Algorithmic and Digital Marketing. 2 Units.
Leveraging digital technologies to drive customer acquisition, engagement, and long-term value is an important factor for success of firms operating in the current environment. The ability to collect consumer-level behavioral data, rapid evolution of public cloud infrastructure, and programmatic access to platforms and marketplaces such as Google, Facebook, Twitter, Snap etc., have provided marketers the ability to take a customer-centric view and personalize marketing activities at very large scale. The uber-personalized nature of decision-making necessitates that firms take an algorithmic and data-analytic approach to marketing. nnIn this course, we will explore algorithmic and analytic tools that firms can use to making marketing decisions. Some topics the course will focus on include marketing intelligence, pricing at scale, targeted advertising, search, recommendation systems and personalization of product experience. It will adopt a mix of lectures, case studies, exercises, guest lectures, and a course project to explore these topics.

MKTG 541. Social Brands. 2 Units.
A hands-on two-week survey of Marketing's cutting edge, where bold brands are becoming ever more open, participatory, experiential & experimental. nnnInspired by a smattering of provocative real-world examples and mind-blowing guests, diverse student teams will employ design methods to conceive of and visualize their own creative proposals for how the Stanford GSB itself might engage with the world in radical new ways. Teams will ultimately pitch their final concepts to the GSB's Chief Marketing Officer for consideration, feedback and potential real-world implementation. nnn.

MKTG 547. Strategic Marketing Communication - Compressed. 2 Units.
The course is designed to sharpen students' grasp of the strategic and tactical aspects of Marketing Communications that lead to competitive advantages in the marketplace. The course will begin a focus on strategy and introduce students to frameworks that address two broad goals of any firm: (1) Establish a competitive advantage by offering a superior customer value proposition and (2) Generate sustainable organic growth. The course will then segue into marketing communication tactics that will enable the firm effectively accomplish its strategic objectives. Here, the concepts and frameworks will only be applicable to traditional approaches (such as the use of television, print, and point-of-purchase promotions) but also to emergent approaches (such as the use of the internet, mobile media, etc.). Designed from the perspective of executives who are often involved in making strategic as well as tactical marketing decisions to solve contemporary business problems, this course is intended for students whose career plans include consulting and entrepreneurial ventures, apart from those thinking of careers in marketing.

MKTG 552. Building Innovative Brands. 2 Units.
Building Innovative Brands is a hands-on two-week dive into how leading brands may leverage a Design Thinking approach to become ever more participatory, experiential and experimental. Together, we will explore how leading organizations stoke conversations, co-create experiences, spark stories and build engaging relationships with consumers. Inspired by provocative real-world examples and industry guests, diverse student teams will employ human-centered design methods to conceive of and visualize their own creative proposals for how a brand could engage in innovative, brand-enhancing new ways. Teams will ultimately pitch their experience design concepts to the program leadership for feedback, consideration and potential real-world implementation.

MKTG 554. Branding in the Digital Era. 2 Units.
A strong brand is the most valuable and irreplaceable asset for a firm. Apple, Google, Coca Cola, Nike, VISA, McDonalds, and Disney, are a few prominent examples of legendary brands. Many companies recognize that the investment they make in the creation and communication of their brand will become a strategic differentiator in the future.n nThis course is designed to provide students with theoretical as well as applied appreciation and understanding of what it takes to build and sustain strong bands. To achieve these goals, the class will be co-taught by two academic and industry experts who will not only provide basic insights into branding basics but will also discuss cutting-edge research and technological developments in the area.n nProf. Khan will lead the first half of the course. This week will focus on conceptual and strategic frameworks for understanding basic branding concepts and answering core challenges such as, how to define and establish brand meaning and personality; how to measure and leverage brand equity; how to manage brand architecture; and how to establish brand leadership.n nIn the second week, the focus will switch to digital aspects of branding. This week will be led by Mr. Gopi Kallayil, Chief Evangelist, Brand Marketing, at Google. Mr. Kallayil will explore contemporary issues in brand marketing such as, how to construct and maintain brand meaning in the high customer involvement digital space; how to seize the opportunity of your super fans actively expressing brand love on digital; and how to leverage new customer experiences created with digital in branding strategy.n nStudents are required to attend and come prepared to all classes.

MKTG 555. Designing Happiness. 2 Units.
We assume happiness is stable, an endpoint to achieve or a goal to "chase." It's not. Recent research suggests that the meaning of happiness changes every 3-4 years. Understanding happiness is crucial to building successful products, organizations and relationships. In this MBA seminar, we explore the data-driven research on happiness, revealing insights about (a) anticipating, (b) understanding, (c) visualizing, (d) spreading, (e) remembering, and (f) creating happiness. Students will work together to use an iterative design-thinking approach to understand our own current definition of happiness, uncover what really makes us happy (vs. what we think makes us happy), prototype solutions/products to increase our present happiness, and develop tools to continually understand and foster happiness as our lives change. The seminar will be data-driven, drawing on multiple methodologies including blogs (http://www.wefeelfine.org/), experiments and surveys.

MKTG 559. Designing for VR/AR. 2 Units.
Put on a headset or glasses, and you will be transported to an entirely different world. You could be moving through a business room in China, following a girl through a Syrian refugee camp, or saving the world as a superhero. As a medium, Virtual Reality (VR) has the potential to be the ultimate empathy machine, connecting humans to other humans and nature in a profound way never before seen in any other form of media. In this class, we will draw on behavioral science and immersive experiences to shed light on the potential of Virtual Reality (VR) and Augmented Reality (AR). Students will be given a foray into the applications of VR/AR in different industries, understand how the virtual world affects perceptions of self and others, and then reflect on these insights to incorporate these learnings into the real world. Students will walk away with an understanding of the potential of VR/AR, insights into designing experiences in those worlds, and reflections that will hopefully enable students to reframe their own lives and make more meaningful choices. nnNote, the focus of this compressed class is not technical. Also, although we will briefly cover AR, VR will be more of the focus.

MKTG 568. Recommendations, Ratings and Reviews: How Platforms Provide Information to Consumers. 2 Units.
This class will explore the role of consumer search and firms information provision with a specific focus on online markets and companies. Because the amount of information available to consumers has increased dramatically, it has become paramount for companies to facilitate consumers search process. We will cover both the relevance for companies to reach consumers through their presence on third-party search platforms such as Google as well as how companies help consumers navigate through their own assortment by means of recommendation algorithms (e.g. Netflix, Spotify). Furthermore, we will discuss business models of companies that facilitate search by aggregating and presenting results from other vendors such as Kayak or eBay. Finally, we discuss new sources of information such as online reviews and consumer word-of-mouth on social media and how firms can effectively influence and manage those sources of information.

MKTG 574. Rethinking Purpose. 2 Units.
We assume happiness is stable, an endpoint to achieve our goal to chase. It's not. Recent behavioral research suggests that the meaning of happiness changes every 5-10 years, raising the question: how might we build organizations and lives that cultivate happiness? Research suggests it is better to aim for meaning. In Rethinking Purpose, we explore how to rethink purpose in work and life. Students will hear from guests and take a field trip to see how Google has reconsidered purpose. Building on the principles for Solve for X (www.solveforx.com), a platform encouraging moonshot thinking to solve huge problems in the world, we'll harness design thinking principles to create personal moonshots and a path to continue to find those moonshots over the life course. Lastly, we'll map out how to use time in ways that would help build innovative teams, products, and ultimately lives that have positive, meaningful, lasting impact in the world.

MKTG 575. Consumer Behavior. 2 Units.
Contemporary approaches to marketing emphasize the importance of adopting a consumer focus, from determining consumers' wants and needs, understanding their motivation, to shaping their attitudes and ensuring their loyalty. This course provides insight into consumer psychology and the means by which consumer behavior can be influenced or altered. The course has both theoretical and practical objectives in that we will: (1) explore theory and research that is relevant to understanding consumer psychology, and (2) apply these theories and findings to generate novel ideas for effective marketing techniques. By shedding light on the psychological underpinnings of consumers' motivation, attitudes, preferences, and decision-making styles, this course will help students make more insightful and effective marketing decisions, as well as developing novel ideas for grabbing attention, shaping behavior, and changing people's minds.

MKTG 576. Digital Marketing. 2 Units.
There has been a rapid evolution of digital means of communicating with consumers and advertising to them, driven by changes in technologies and consumer behavior. Readership of traditional print media has gone down dramatically, and television is consumed very differently now than even a few years ago, with the advent of digital video recording and streaming video platforms. This has led to a dramatic growth of marketing using digital platforms. Furthermore, a variety of avenues for digital marketing has emerged, including display advertising, search advertising, advertising on online video platforms, advertising and other forms of engagement on social networks etc. A recent trend has been the rapid growth of mobile platforms, which include these different avenues also available. An integrated view of using these different media to market to consumers is important to effective digital marketing. With the rapid acceptance of numerous "Big Data" technologies by large enterprises, online marketing is also evolving to incorporate a customer-centric view rather than a campaign centric view. This course will explore these issues.

MKTG 577. Creativity in the Business Ecosystem. 2 Units.
This course explores where creativity occurs in the value chain or business ecosystem more broadly. The concepts of both creativity and the business ecosystem are independently developed, but the primary insights derive from how the ecosystem can promote creativity. Focus is placed on the make or buy decision with an exploration of examples on both sides. Value capture vs. value creation perspectives are applied to understand strategic decisions involving product development, branding, advertising and even process innovation. Applications include video distributors producing movies and shows; brands bringing creative agency work in-house; and the acquisition of new brands and products such as craft beers.

MKTG 622. Behavioral Research in Marketing III: Consumer Behavior Classics. 3 Units.
The purpose of this seminar is to provide PhD level coverage of the major research work carried out in consumer behavior. For each topic considered, a selection of articles with a specific focus on "early classics" will be distributed and discussed. For each topic, our goals will be to determine the main ideas and research questions driving work in each topic area, how these authors positioned their work and tested their ideas, what made these papers "classics," where the gaps are, and what ideas for new research those gaps imply.

MKTG 641. Behavioral Research in Marketing I. 3 Units.
This course prepares the student to do empirical behavioral research. It will cover all aspects of the research process, from hypothesis generation to experimental design to data analysis to writing up your results and submitting them for publication.

MKTG 642. Behavioral Research in Marketing II: Consumer Behavior. 3 Units.
This PhD seminar provides coverage of the major research carried out in consumer research both in marketing and psychology. A vast set of topic will be covered including conscious and non-conscious consumer goals, motivations, emotions, attention and perception and consumer decision processes. The course will help students hone their ability to conceptualize, operationalize, and develop research idea and will provide a grasp of what it takes to be a successful academic in the field of consumer behavior.

MKTG 644. Quantitative Research in Marketing. 3 Units.
The goal of this seminar is to familiarize students with the quantitative marketing literature and develop the process of generating research ideas and topics. Sessions will involve a mix of: i) a discussion of papers in a particular area in quantitative marketing; and/or ii) a discussion of students' research ideas with respect to topics.The format will mix student presentations of papers with lectures by the instructor(s). When discussing papers in the literature, the focus will be on the topic and research question and not the methodological approach. When discussing research ideas, students should be able to articulate why their question is interesting, where it fits in the literature and how they would address their question.

MKTG 645. Empirical Analysis of Dynamic Decision Contexts. 3 Units.
This course will focus on empirical tools for analyzing dynamic decision contexts, wherein current actions of firms or consumers have effects on future payoffs, profits and/or competitive conduct. The course will build the relevant material generally, but our applications will be mostly focused on empirical marketing, operations and industrial organization problems. We will have an applied focus overall, emphasizing the practical aspects of implementation, especially programming. The overall aim of the class is to help students obtain the skills to implement these methods in their research. By the end of the class, students are expected to be able to formulate a dynamic decision problem, program it in a language such as Matlab or C, and to estimate the model from data. The course starts with discrete choice markovian decision problems, and continuous markovian decision problems, and focus on building the computational toolkit for the numerical analysis of these problems. We then move on to specific applications, and discuss multi-agent dynamic equilibrium models. Finally, we discuss recently proposed advanced methods for alleviating computational burden in dynamic models.

MKTG 646. Bayesian Inference: Methods and Applications. 3 Units.
The course aims to develop a thorough understanding of Bayesian inference, with a special focus on empirical applications in marketing. The course will start with a brief theoretical foundation to Bayesian inference and will subsequently focus on empirical methods. Initial topics would include Bayesian linear regression, multivariate regression, importance sampling and its applications. Subsequently, the course will focus on Markov Chain Monte Carlo (MCMC) methods including the Gibbs Sampler and the Metropolis-Hastings algorithm and their applications. The overall focus of the course will be on applying these methods for empirical research using a programming language such as R.

MKTG 661. Attitudes and Persuasion. 3 Units.
The goal of this course - geared toward graduate students in behavioral marketing, psychology, and related disciplines - is to explore the issues and questions that currently engage researchers in the domain of attitudes and persuasion. We will cover classic topics in this domain, but in each case we will emphasize new findings or recent directions. Students who take this course will become familiar with research methods and major issues in attitudes research and will have a better understanding of how individuals form, use, change, and maintain their attitudes. Throughout the course, students will be encouraged to critique existing research and formulate new research ideas.

MKTG 691. PhD Directed Reading. 1-15 Unit.
This course is offered for students requiring specialized training in an area not covered by existing courses. To register, a student must obtain permission from the faculty member who is willing to supervise the reading.
Same as: ACCT 691, FINANCE 691, GSBGEN 691, HRMGT 691, MGTECON 691, OB 691, OIT 691, POLECON 691, STRAMGT 691

MKTG 692. PhD Dissertation Research. 1-15 Unit.
This course is elected as soon as a student is ready to begin research for the dissertation, usually shortly after admission to candidacy. To register, a student must obtain permission from the faculty member who is willing to supervise the research.
Same as: ACCT 692, FINANCE 692, GSBGEN 692, HRMGT 692, MGTECON 692, OB 692, OIT 692, POLECON 692, STRAMGT 692

MKTG 698. Doctoral Practicum in Teaching. 1 Unit.
Doctoral Practicum in Teaching.

MKTG 699. Doctoral Practicum in Research. 1 Unit.
Doctoral Practicum in Research.

MKTG 802. TGR Dissertation. 0 Units.
.
Same as: ACCT 802, FINANCE 802, GSBGEN 802, HRMGT 802, MGTECON 802, OB 802, OIT 802, POLECON 802, STRAMGT 802

Operations Info & Technology Courses

OIT 245. Optimization and Simulation Modeling. 3 Units.
This course provides basic skills in quantitative modeling. The objective is to familiarize students with the main steps in an analytical approach to business decision making: constructing an abstract model for a relevant business problem, formulating it in a spreadsheet environment such as Microsoft Excel, and using the tools of optimization, Monte Carlo simulation and sensitivity analysis to generate and interpret recommendations. The class will be taught in a lab style, with short in-class exercises done in small teams, focusing on a variety of applications drawn from online advertising, healthcare, finance, supply chain management, revenue and yield optimization.

OIT 247. Optimization and Simulation Modeling - Accelerated. 3 Units.
The course is aimed at students who already have a background or demonstrated aptitude for quantitative analysis, and thus are comfortable with a more rapid coverage of the topics, in more depth and breadth, than in OIT 245.

OIT 248. Optimization And Simulation Modeling - Advanced. 3 Units.
This course constitutes an advanced option in the menu of classes satisfying the Management Perspectives requirement in Optimization and Simulation Modeling (OSM). The course is a superset of OIT 245 and OIT 247, starting with a very fast paced overview of basic concepts, and quickly diving into more advanced topics and software tools. By the end of the course, students should (1) leave with a good understanding of different types of optimization and simulation models and when they are useful; (2) be able to solve real-world models using up-to-date software; (3) when faced with a business problem, be able to identify what type of optimization model is appropriate, and how to set it up most efficiently; (4) be able to understand and discuss model outputs in a critical fashion. The class is taught in an interactive style, focusing on a variety of applications drawn from advertising, healthcare, finance, supply chain management, revenue management and pricing, scheduling, and risk management. We will be using Python as the basic software, complemented with suitable packages for formulating and solving optimization models (e.g., the Gurobi software) and for conducting Monte Carlo simulation. Students should be comfortable using these software packages by the end of the class, but no specific prior experience with these packages is necessary. Some prior coding experience is helpful, but is not a strict requirement for the course.

OIT 249. MSx: Data and Decisions. 2 Units.
Data and Decisions teaches you how to use data and quantitative reasoning to make sound decisions in complex and uncertain environments. The course draws on probability, statistics, and decision theory. Probabilities provide a foundation for understanding uncertainties, such as the risks faced by investors, insurers, and capacity planners. We will discuss the mechanics of probability (manipulating some probabilities to get others) and how to use probabilities to make decisions about uncertain events. Statistics allows managers to use small amounts of information to answer big questions. For example, statistics can help predict whether a new product will succeed or what revenue will be next quarter. The third topic, decision analysis, uses probability and statistics to plan actions, such as whether to test a new drug, buy an option, or explore for oil. In addition to improving your quantitative reasoning skills, this class seeks to prepare you for later classes that draw on this material, including finance, economics, marketing, and operations. At the end we will discuss how this material relates to machine learning and artificial intelligence.

OIT 262. Operations. 3 Units.
This course focuses on basic managerial issues arising in the operations of both manufacturing and service industries. The objectives of the course are to familiarize students with the problems and issues confronting operations managers and to introduce language, conceptual models, and analytical techniques that are broadly applicable in confronting such problems. The spectrum of different process types used to provide goods and services is developed and then examined through methods of process analysis and design.

OIT 265. Data and Decisions. 3 Units.
This is the base version of D&D. This course introduces the fundamental concepts and techniques for analyzing risk and formulating sound decisions in uncertain environments. Approximately half of the course focuses on probability and its application. The remainder of the course examines statistical methods for interpreting and analyzing data including sampling concepts, regression analysis, and hypothesis testing. Applications include inventory management, demand analysis, portfolio analysis, surveys and opinion polls, A/B testing, environmental contamination, online advertising and the role of analytics in business settings more generally. The course emphasizes analytical techniques and concepts that are broadly applicable to business problems.

OIT 267. Data and Decisions - Accelerated. 3 Units.
Data and Decisions - Accelerated is a first-year MBA course in probability and statistics for students with strong quantitative backgrounds. Probability provides the foundation for modeling uncertainties. Statistics provides techniques for interpreting data, permitting managers to use small amounts of information to answer larger questions. In statistics, we focus on the linear regression model. Regression analysis provides a method for determining the relationship between a dependent variable and predictor variables. We introduce topics from non-linear models and machine learning model selection. Students taking this course need to be comfortable with mathematical notation, algebra, some calculus, and be open to learning to write short programs in statistical software (eg R or Stata). If you are not confident with your quantitative abilities, then you should enroll in OIT 265. Accelerated D&D will cover material covered in OIT 265 plus some additional topics such as discrete dependent variable models. While OIT 267 focuses on real world applicability, we will explore the mathematical underpinnings of these topics in more depth than OIT 265 as an avenue for deeper understanding. The group regression project is a key component of the course.

OIT 269. MSx: Operations and Strategies. 3 Units.
Operations refer to the processes through which businesses produce and deliver products or services. Managing operations well is necessary in order for these processes to be completed in a timely manner, consume minimal resources and costs, and achieve their goal effectively. This course focuses on managerial issues arising in the operations of manufacturing and service industries. The objectives of the course are to introduce operational problems and challenges faced by managers, as well as language, conceptual models, analytical techniques and strategies that are broadly applicable in confronting such problems.

OIT 271. Operations - Accelerated. 3 Units.
This course, which is an accelerated version of OIT 262 (Operations), focuses on basic managerial issues arising in the operations of both manufacturing and service industries, and on strategic issues arising in global supply chains. The objectives of the course are to familiarize students with the problems and issues confronting operations managers and to introduce language, conceptual models, and analytical techniques that are broadly applicable in confronting such problems.

OIT 272. Online Marketplaces. 2 Units.
How does Uber match drivers to passengers? How does Airbnb select the set of listings to show to a guest in a search? How does eBay manage trust and reputation between buyers and sellers? How does Google optimize auctions for billions of dollars' worth of online advertising? This course focuses on the basic analytic and data science tools used to address these and other challenges encountered in the most exciting online marketplaces in the world. With hands-on exercises we will open and understand the "black-box" of online marketplaces' operations. We will cover application areas such as transportation, rentals, sharing, e-commerce, labor markets, and advertising, leveraging tools from D&D, OSM, and Micro (all base). In particular, the course will use tools from R covered in D&D. Overall, the course will provide basic business knowledge for future investors, product managers, sales and marketing managers, operation managers, and anyone interested on online marketplaces.

OIT 273. Value Chain Innovations in Developing Economies. 2 Units.
This course is about how to use entrepreneurship and innovations in the value chains to create values in developing economies. The course will cover important principles and ways in which the value chains can be re-engineered or new business models can be designed to create values. In addition to materials covering a diversity of industries and geographical regions, the course will also enable students to be exposed to some of the interventions that the Stanford Institute of Innovation in Developing Economies (SEED) is working on in West Africa. Work and exam requirements: Students are expected to develop a project report on either portfolio companies related to SEED or other enterprises to show how value chain innovations can be advanced.

OIT 274. Data and Decisions - Base. 3 Units.
Base Data and Decisions is a first-year MBA course in statistics and regression analysis. The course is taught using a flipped classroom model that combines extensive online materials with a lab-based classroom approach. Traditional lecture content will be learned through online videos, simulations, and exercises, while time spent in the classroom will be discussions, problem solving, or computer lab sessions. Content covered includes basic probability, sampling techniques, hypothesis testing, t-tests, linear regression, and prediction models. The group regression project is a key component of the course, and all students will learn the statistical software package R.
Same as: Flipped Classroom

OIT 275. Online Marketplaces, Accelerated. 2 Units.
How does Uber match drivers to passengers? How does Airbnb select the set of listings to show to a guest in a search? How does eBay manage trust and reputation between buyers and sellers? How does Google optimize auctions for billions of dollars' worth of online advertising? This course focuses on analytics and data science tools used to address these and other challenges encountered in the most exciting online marketplaces in the world. With hands-on exercises we will open and understand the "black-box" of online marketplaces' operations. We will cover application areas such as transportation, rentals, sharing, e-commerce, labor markets, and advertising, leveraging tools from D&D, OSM, and Micro. In particular, the course will use tools from R covered in D&D. Overall, the course will provide business knowledge for future investors, product managers, sales and marketing managers, operation managers, and anyone interested on online marketplaces. [This is the accelerated version of OIT 272 and knowledge from D&D and OSM is expected at the accelerated (or advanced) level.].

OIT 276. Data and Decisions - Accelerated. 3 Units.
Accelerated Data and Decisions is a first-year MBA course in statistics and regression analysis. The course is taught using a flipped classroom model that combines extensive online materials with a more lab-based classroom approach. Traditional lecture content will be learned through online videos, simulations, and exercises, while time spent in the classroom will be discussions, problem solving, or computer lab sessions. Content covered includes sampling techniques, hypothesis testing, t-tests, linear regression, and prediction models. The group regression project is a key component of the course, and all students will learn the statistical software package R. The accelerated course is designed for students with strong quantitative backgrounds. Students taking this course need to be comfortable with mathematical notation, algebra, and basic probability. Students without quantitative backgrounds should consider enrolling in the base version of the course.
Same as: Flipped Classroom

OIT 333. Design for Extreme Affordability. 4 Units.
Design for Extreme Affordability is a two-quarter project-based course hosted by Stanford's d.school and jointly offered by the Graduate School of Business and the School of Mechanical Engineering. We focus on the development of products and services to improve the lives of the our poorest citizens. This multidisciplinary project-based experience creates an enabling environment in which students learn to design products and services that will change lives. Topics include user empathy, product and service design, rapid prototype engineering and testing, social entrepreneurship, business modeling, ethics, equity, partnerships, team dynamics and project management. Since the course was first offered, we have executed 168 projects with 72 partners. Many of the projects have been implemented and are achieving significant social impact. This year we will launch for the first time, Extreme Local, where we will team up with local Bay Area partners to address some of their challenges, We will continue to publish latest information for prospective students here: https://extreme.stanford.edu/prospective-students.

OIT 334. Design for Extreme Affordability. 4 Units.
Design for Extreme Affordability is a two-quarter project-based course hosted by Stanford's d.school and jointly offered by the Graduate School of Business and the School of Mechanical Engineering. We focus on the development of products and services to improve the lives of the our poorest citizens. This multidisciplinary project-based experience creates an enabling environment in which students learn to design products and services that will change lives. Topics include user empathy, product and service design, rapid prototype engineering and testing, social entrepreneurship, business modeling, ethics, equity, partnerships, team dynamics and project management. Since the course was first offered, we have executed 168 projects with 72 partners. Many of the projects have been implemented and are achieving significant social impact. This year we will launch for the first time, Extreme Local, where we will team up with local Bay Area partners to address some of their challenges, We will continue to publish latest information for prospective students here: https://extreme.stanford.edu/prospective-students.

OIT 344. Design for Service Innovation. 4 Units.
Design for service innovation is an experiential course in which students work in multidisciplinary teams to design new services (including but not limited to web services) that will address the needs of an underserved population of users. Through a small number of lectures and guided exercises, but mostly in the context of specific team projects, students will learn to identify the key needs of the target population and to design services that address these needs. Our projects this year will focus on services for young adult survivors of severe childhood diseases. For the first time ever, children who have cystic fibrosis, rheumatoid arthritis, major cardiac repairs, organ transplants, genetic metabolic disorders, and several forms of cancer are surviving. The first wave of these survivors is reaching young adulthood (ages 18-25). Many aspects of the young adult world are not yet user-friendly for them: applying to and then entering college, adherence to required medication and diet, prospects for marriage and parenthood, participation in high school or college sports, driving, drinking, drugs, and more. Our aspiration is to develop services to improve these young adults? options for a fulfilling and satisfying life. The course is open to graduate students from all schools and departments: business (MBA1, MBA2, PhD, Sloan), Medicine (medical students, residents, fellows and postdocs), engineering (MS and PhD), humanities, sociology, psychology, education, and law. Students can find out more about this course at: http://DesignForService.stanford.edu; GSB Winter Elective BBL Jan 10th, 12 noon - 1 pm; D-School Course Exposition Feb 3rd, time TBA. Admission into the course by application only. Applications will be available at http://DesignForService.stanford.edu on Jan 13th. Applications must be submitted by Feb 4th midnight. Students will be notified about acceptance to the course by Feb 7th . Accepted students will need to reserve their slot in the course by completing an online privacy training course. Details about online training will be provide to accepted students. The training is related to the protection of our partners' privacy. Application Deadline: Noon, Feb 4th.

OIT 356. Electronic Business. 3 Units.
The course focuses on the analysis and design of business models that are enabled by Information Technology (IT). It considers the impact of IT on multiple industries and ways to take advantage of new opportunities that are enabled by new technologies. Preparation includes case studies involving both qualitative and quantitative analyses; homework assignments involving quantitative and some qualitative analyses; pre-class online quizzes and a group project involving the design of a new business model that takes advantage of modern IT. A typical class will cover an aspect of a business model which is enabled by IT in an industry which is transformed by technology. Sample topics include the transformation of retail, media, electronic commerce logistics, transportation and healthcare. Some classes will focus on the interaction of strategy and IT, building on what you learned earlier in the program. Students opting to go into technology would probably benefit the most from the course, but this will require a significant time commitment. For students rooted in technology, some of the classes will reinforce and structure things they have experienced already, and others would introduce them to new applications. MSx students are invited to petition to take the course.

OIT 364. Global Operations. 3 Units.
Globalization of businesses has resulted in companies having to manage global networks of suppliers, integrators, contract manufacturers, logistics service providers, distributors, and service support operators in geographically dispersed locations. The customer network is also globally distributed. This course will focus on (1) how global and international companies can overcome the geographical, cultural, and organizational barriers, and leverage the strengths of the network to create values, (2) how these companies should best structure their network, like in-sourcing or outsourcing, and off-shoring or on-shoring, to give the best competitive advantage, and (3) how operations can support the overall business strategies.. The course will be based on cases on innovative strategies and tactics used by global and international companies, including how they can do so in emerging economies.

OIT 367. Business Intelligence from Big Data. 3 Units.
The objective of this course is to analyze real-world situations where significant competitive advantage can be obtained through large-scale data analysis, with special attention to what can be done with the data and where the potential pitfalls lie. Students will be challenged to develop business-relevant questions and then solve for them by manipulating large data sets. Problems from advertising, eCommerce, finance, healthcare, marketing, and revenue management are presented. Students learn to apply software (such as Python and SQL) to data sets to create knowledge that will inform decisions. The course covers fundamentals of statistical modeling, machine learning, and data-driven decision making. Students are expected to layer these topics over an existing facility with mathematical notation, algebra, calculus, probability, and basic statistics.

OIT 368. Design for Disruption. 3 Units.
"Disruption" is a widely used and frequently misunderstood term. Understanding it better can help you think about your organization or team¿s strategy whether you're trying to disrupt, avoid being disrupted, or simply scanning the horizon for new trends in your industry.This course takes a unique view on disruption by combining disruption theory research, innovation strategy, and the ways that business practitioners and Silicon Valley entrepreneurs have redefined disruption over the last decade. We'll bring these perspectives together in a framework for gauging the disruptive potential of an innovation - that is, how likely the innovation is to fundamentally change the structure of an industry. You'll learn the critical roles that customers, value chains, and technologies play in driving such changes.While the popular press tends to focus on disruption in the technology sector, you'll see that it happens in every industry and sector, it can be done by mature, established companies, and it's not just for technology startups. We'll study disruption in a wide variety of industries, like nonprofits, pharmaceutical companies, food processing companies, airline manufacturers (Boeing) and chemical manufacturers. And of course, we'll talk about Uber, Airbnb, Microsoft, and Amazon too.In some cases we'll take a very futuristic view of disruption in which you will see how a very recent discovery can lead to fascinating possibilities for disruption that may be 10-20 years down the line. Distinguishing between developments that will last and drive changes vs. developments that are temporary fads is something the frameworks in this course will help you unpack.You'll also have the opportunity to investigate how established firms (we call them incumbents) can avoid the perils of being disrupted and left behind. You will identify the qualities of incumbents that have faced disruption successfully, and the missteps of those that have not.Finally, you will work on a capstone mini project in which you will apply the course frameworks to develop a disruption hypothesis for the industry of your choosing. This could be the industry you worked in the past or an industry you plan to work in the future, an industry that you may want to disrupt, or simply an industry that's compelling to you. Topics covered include:The Disruption Framework and the Three Pillars of DisruptionDisruption via new entrantsIncumbent self-disruption, and when incumbents miss the disruptionNonprofit vs. for-profit disruptionThe Five Forces FrameworkDeveloping and testing a new disruption hypothesis using design thinking and lean startupCases and examples we¿ll examine include:Impossible FoodsHIV treatment pharmaceuticalsWarby ParkerStarbucksAmazon Web ServicesFundboxBoeingDow CorningMicrosoftCalifornia Health Care FoundationKodakFastbrick RoboticsPelotonPokémon GoKodakUberAirbnb.

OIT 384. Biodesign Innovation: Needs Finding and Concept Creation. 4 Units.
In this two-quarter course series (OIT 384/5), multidisciplinary student teams from medicine, business, and engineering work together to identify real-world unmet healthcare needs, invent new health technologies to address them, and plan for their development and implementation into patient care. During the first quarter (winter 2021), students select and characterize an important unmet healthcare problem, validate it through primary interviews and secondary research, and then brainstorm and screen initial technology-based solutions. In the second quarter (spring 2021), teams screen their ideas, select a lead solution, and move it toward the market through prototyping, technical re-risking, strategies to address healthcare-specific requirements (regulation, reimbursement), and business planning. Final presentations in winter and spring are made to a panel of prominent health technology industry experts and investors. Class sessions include faculty-led instruction and case studies, coaching sessions by industry specialists, expert guest lecturers, and interactive team meetings. Enrollment is by application only, and students are expected to participate in both quarters of the course. Visit http://biodesign.stanford.edu/programs/stanford-courses/biodesign-innovation.html to access the application, examples of past projects, and student testimonials. More information about Stanford Biodesign, which has led to the creation of more than 50 venture-backed healthcare companies and has helped hundreds of students launch health technology careers, can be found at http://biodesign.stanford.edu/.

OIT 385. Biodesign Innovation: Concept Development and Implementation. 4 Units.
In this two-quarter course series (OIT 384/5), multidisciplinary student teams from medicine, business, and engineering work together to identify real-world unmet healthcare needs, invent new health technologies to address them, and plan for their development and implementation into patient care. During the first quarter (winter 2021), students select and characterize an important unmet healthcare problem, validate it through primary interviews and secondary research, and then brainstorm and screen initial technology-based solutions. In the second quarter (spring 2021), teams screen their ideas, select a lead solution, and move it toward the market through prototyping, technical re-risking, strategies to address healthcare-specific requirements (regulation, reimbursement), and business planning. Final presentations in winter and spring are made to a panel of prominent health technology industry experts and investors. Class sessions include faculty-led instruction and case studies, coaching sessions by industry specialists, expert guest lecturers, and interactive team meetings. Enrollment is by application only, and students are expected to participate in both quarters of the course. OIT 521. Data Science for Platforms. 2 Units.
This is an MBA compressed course that covers analytic and data science tools that are currently being used to operate some of the most exciting online platforms and marketplaces in the world. This course will consist of guest lectures from industry leaders involved in these efforts, emphasizing practical challenges associated with implementing analytics and data science projects. Guest lecturers will be heads of data science, heads of product, founders, or investors, among others. We will cover online platforms and marketplaces in diverse application areas such as transportation, rentals, sharing, e-commerce, labor markets, media, and advertising.

OIT 536. Data for Action: From Insights to Applications. 2 Units.
Data for Action is an MBA short course dedicated to identifying value in and creating value from data. It deals with the technical, legal, regulatory and business strategic decisions that must be considered when delivering solutions to customers.

OIT 554. Seminar on IT for Business. 2 Units.
This course offers an overview of information technologies for enterprises and supply chain management. The course has two key components - a series of guest speakers and a set of readings. Students are expected to have read the assigned note on related technologies before class, and prepare to discuss technologies with the guest speaker in class. We will not discuss the technology per se in class, so students who enroll are expected to have some exposure to technologies in order to digest the materials on their own. The main topics of technologies are: DBMS (Database Management System), ERP (Enterprise Resource Planning), EAI (Enterprise Application Interface), data mining, Big Data, platform-based business model, cloud computing, RFID/NFC, mobile technologies, and mobile payment. In particular, students are encouraged to think hard about potential new businesses around the technology and discuss them in class.

OIT 587. Global Biodesign. 3 Units.
Seminar examines the development and commercialization of medical technologies in the global setting focusing primarily on Europe, India and China. Faculty and guest speakers from industry and government discuss the status of the industry, as well as opportunities in and challenges to medical technology innovation unique to each geography. Topics related to development of technologies for bottom of the pyramid markets will also be addressed.

OIT 601. Fundamentals of OIT. 3 Units.
The goal of this course is to provide first-year Ph.D. students in OIT with sufficient fundamentals to subsequently take advanced research seminars. The course covers the very basics of six topics: queueing theory, inventory theory, multi-echelon inventory theory, game theory, stochastic dynamic programming and econometrics. Lectures will be given by advanced Ph.D. students in OIT.

OIT 602. Dynamic Pricing and Revenue Management I. 2 Units.
In tandem with OIT 603, this course explores the application of stochastic modeling and optimization to two closely related problem areas: (a) dynamic price selection, and (b) dynamic allocation of limited capacity to competing demands. As background, students are assumed to know stochastic process theory at the level of Statistics 217-218, microeconomics at the level of Economics 202N, and optimization theory at the level of MS&E 211, and to have some familiarity with the basic ideas of dynamic programming. Additional dynamic programming theory will be developed as needed for the applications covered. Emphasis will be on current research topics, especially in the realm of airline revenue management.

OIT 603. Dynamic Pricing and Revenue Management II. 2 Units.
In tandem with OIT 602, this course explores the application of stochastic modeling and optimization to two closely related problem areas: (a) dynamic price selection, and (b) dynamic allocation of limited capacity to competing demands. As background, students are assumed to know stochastic process theory at the level of Statistics 217-218, microeconomics at the level of Economics 202N, and optimization theory at the level of MS&E 211, and to have some familiarity with the basic ideas of dynamic programming. Additional dynamic programming theory will be developed as needed for the applications covered. Emphasis will be on current research topics, especially involving customized pricing of financial services. OIT 602 is not a prerequisite for OIT 603 but is highly recommended.

OIT 604. Data, Learning, and Decision-Making. 3 Units.
This aim of this course is to cover modern tools for data-driven decision making. Most decision making tasks involve uncertainty that is directly impacted by the amount and complexity of data at hand. Classical decision models rely on strong distributional assumptions about the uncertain events. But in recent years, and due to growing availability of rich data, there has been a rapid adoption of models from machine learning and statistics that provide more accurate and personalized picture of uncertainty which in turn lead to better decisions. The interplay between the multiple objectives of modeling the data, personalization, and decision optimization has created a number mathematical models that the course aims to cover. Examples of topics include contextual multi-armed bandits and non-parametric decision learning.

OIT 605. Behavioral Operations Management. 2 Units.
Behavioral Operations incorporates insights from cognitive psychology, social psychology and behavioral economics to study how individuals make decisions in an operational context. Two major goals of Behavioral Operations are to provide a better understanding of (and make better predictions about) behavioral regularities in operational settings, and to provide guidance to firms on how to design mechanisms that will lead to better decisions and improved performance. This course has several aims: (1) To survey foundational research from economics and psychology on important behavioral factors such as bounded rationality and decision heuristics, folk intuitions about random processes, preference regularities such as loss aversion and reference dependent preferences, and interpersonal factors such as trust and fairness. (2) To apply behavioral insights to core operational settings such as inventory decision making, queueing systems, supply chain relationships, contracting, etc. (3) To discuss how to conduct behaviorally-inspired research using a range of methodologies including analytical modeling, laboratory and field experiments, and observational empirics. There will be a particular emphasis on laboratory experimental design, and in in many cases we will examine series of experiments to see how experiments can build on each other ¿ especially when researchers with different theoretical predispositions look at the same issue. Our goal is to help students identify behavioral issues to incorporate into their research interests, as well as opportunities to engage in experimental research as an extension of their current research agenda. This course meets the behavioral requirement for OIT PhD students.

OIT 611. The Drift Method: from Stochastic Networks to Machine Learning. 3 Units.
Overview: This course is an introduction to the drift method in sequential decision-making and stochastic systems, a family of simple, yet surprisingly powerful, meta-algorithms that in each step the greedily and incrementally minimizes some potential function. Manifested in various forms, the drift method powers some of the most popular algorithmic paradigms in stochastic networks (MaxWeight, BackPressure), oneline learning, optimization and machine learning (SGD, Langevin dynamics, TD-learning). Using the Drift Method as a unifying theme, we will survey major developments in these areas and answer questions such as: What may explain the method¿s effectiveness? How can we rigorously evaluate its performance? We will develop rigorous probabilistic and optimization methodologies for answering these questions, such as Lyapunov functions and stability theory, state-space collapse, weak convergence and Stein¿s method. In terms of application topics, the course is roughly evenly divided between stochastic queueing networks versus optimization + machine learning. Objective: For students to acquire fundamental methodologies that can be applied to tackling problems in dynamic decision-making, stochastic modeling and machine learning. Target Audience: Graduate students / advanced undergraduates with a solid grasp of probability and stochastic processes (Stat 310A / MS&E 321, or equivalent). Strong background and interests in queueing networks is highly recommend.

OIT 624. Models and Applications of Inventory Management. 3 Units.
The first part of the course reviews fundamental models in inventory management. Topics include deterministic models (EOQ, power-of-two policies, ELS, serial and assembly networks), Newsvendor, multi-period stochastic models under backlogging and lost-sales, multi-echelon and supply chain models, and infinite-horizon formulations. In the process, the course also reviews several fundamental mathematical concepts in inventory theory, including convexity, duality, finite / infinite state Markov decision processes, and comparative statics.nThe second part discusses advanced modeling concepts, and several new application areas. Topics include distribution-free and robust models, supply uncertainty and disruptions, flexibility and supply chain design, joint pricing and inventory, and problems at the interface of supply chains and finance.

OIT 643. Special Topics in Supply Chain Management. 3 Units.
To compete successfully in today's market place, companies need to manage effectively the efficiency of activities to design, manufacture, distribute, service and recycle their products or services to their customers. Supply chain management deals with the management of materials, information and financial flows in a network consisting of suppliers, manufacturers, distributors, and customers. The coordination and integration of these flows within and across companies are critical in effective supply chain management. nnnIn parallel to the development of new practices and concepts in industry, there have been emerging research that are based on (1) structuring new processes and supply chain networks with the new technologies; (2) exploring ways to do planning and make decisions consequently; (3) quantifying the benefits as a result; and (4) aligning the incentives of multiple players in a supply chain when the costs and benefits to these players are different. nnnThis course will examine evolutionary research that focuses on the above themes. We will explore how such problems can be formulated, models can be structured, and analysis can be performed to address information-based supply chain management issues. You are all challenged to think, discuss, share, and debate on the issues brought up. The end result of this course is, hopefully, that we can start defining new, interesting and exciting research paths, and maybe even beginning to pursue some of the research ideas generated.

OIT 644. Research in Operations, Information and Technology. 1 Unit.
This year-long course takes a hands-on approach to learning about conducting research in Operations, Information and Technology. It will cover a broad spectrum of cutting-edge research in OIT from conceiving an idea to formulating a research problem, deriving results, and publication. The topical content will be customized to the specific interests of the enrolled students, but generally will be concerned with questions of operational interest.

OIT 647. Empirical Methods in Operations Management / Management Science. 2 Units.
This course focuses on studying a broad set of econometric methods to conduct empirical research in Operations Management and related fields in Management Science. The course complements formal econometrics and statistics classes by focusing on the application of different econometric methods and identification strategies to research problems that are relevant in different areas within Operations Management, including Supply Chain Management, Service Operations, Healthcare and Retail. Although statistics/econometrics classes provide a rigorous revision of the methods, they put less emphasis on how to apply these methods in different settings. This course aims to fill that gap by providing a problem-oriented approach, where the focus is on identifying empirical questions relevant to Operations Management and choosing an appropriate empirical strategy to address them. The course has a seminar format combining paper presentations by students, computer assignments and a short research proposal.

OIT 648. Empirics of Online Markets. 2 Units.
In this course we cover current research on the empirics of platforms and online marketplaces. We will study diverse topics relevant to the design of these markets such as search and matching, review and reputation systems, demand estimation, and pricing. We will do so in the context of different application domains such as rentals, sharing, e-commerce, labor markets, and advertising. The course will be eclectic in terms of approaches, using reduced-form and structural econometrics, machine learning, and experimentation. The course will mostly consist of recent papers presented by the instructor, guests, and students. Some background knowledge required to understand current work will be provided as needed.

OIT 652. OIT Modeling. 3 Units.
This course is designed for OIT students of all cohorts. It will focus on alternative approaches to modeling the types of problems that arise in OIT research, based on the analysis of papers in the area.

OIT 655. Foundations of Supply Chain Management. 3 Units.
This course provides an overview of research in supply chain management (SCM). It has three parts. The first part reviews basic tools of SCM research through selected readings in economics, IT and operations research. The second part reviews the literature in SCM, covering topics such as inventory models, information sharing, information distortion, contract design, value of integration, performance measurement, risk management, and the use of markets for procurement. The last part is devoted to recent advances in SCM research.

OIT 660. Applied OIT. 4 Units.
Description is currently unavailable because of ongoing review of the OIT PhD program by OIT faculty. Description will become available when the review is completed at the end of the Summer.

OIT 661. Causal Inference. 3 Units.
This course covers mathematical and statistical underpinnings of causal inference, with a focus on scientific experimentation and data-driven decision making. Topics include randomization, potential outcomes, observational studies, double robustness, semiparametric efficiency, treatment heterogeneity, policy learning, bandit algorithms, instrumental variables, regression discontinuities and graphical models. We will also discuss the relevance of optimization and machine learning tools to causal inference.

OIT 663. Methods of Operations/Information Systems. 4 Units.
This course covers basic analytical tools and methods that can be used in research in operations and information systems. The emphasis is on foundations of stochastic inventory theory. Basic topics include convexity, duality, induced preference theory, and structured probability distributions. Much of the course is devoted to Markov decision processes, covering finite and infinite horizon models, proving the optimality of simple policies, bounds and computations, and myopic policies.

OIT 664. Asymptotics in Operations Management. 3 Units.
This course provides an overview of asymptotic models and methods used in various areas of operations management. It includes traditional heavy traffic asymptotics for queueing networks, the Halfin-Whitt regime, the supermarket model, inventory theory, revenue management, applications of measure-valued processes in queues, and applications of mean field equilibrium models in matching markets and auctions for ad exchanges. The lectures will focus on modeling and performance analysis, and not on convergence proofs. Prerequisites: Statistics 217 and 218, or consent of instructor; some prior exposure to stochastic models in general, and queueing theory in particular, is useful but not essential.

OIT 665. Seminar on Information-Based Supply Chain Management. 3 Units.
This seminar will highlight the research evolution and advances on the smart use of information in supply chain management. Advances in technologies like real-time information systems, decision support methodologies, the internet and mobile technologies such as RFID (radio-frequency identification) have also enabled visibility and structural changes that result in significant supply chain performance enhancements. In parallel to the development of new practices and concepts in industry, we will examine emerging research that are based on (1) structuring new processes and supply chain networks with the new technologies; (2) exploring ways to do planning and make decisions consequently; (3) quantifying the benefits as a result; and (4) aligning the incentives of multiple players in a supply chain when the costs and benefits to these players are different.

OIT 666. Engineering Online Markets. 3 Units.
This class will explore topics the intersection of operations, engineering, and economics relevant to modern internet marketplaces, including those for dating, labor, accommodation, services, and rides. The objective of the class is to introduce and revisit technical tools traditionally used in the operations literature that may help advance the research frontier, as well as to expose students to recent developments and state-of-the-art research in online markets. The class will not cover the important and heavily studied topics of stable marriage and auctions. List of topics (preliminary): Intro to two-sided platforms and search frictions in matching markets; Design of the "search environment" and information disclosure policies on platforms; Balancing supply and demand in a spatio-temporal environment; Pricing issues in platforms; Service platforms; Reputation systems.

OIT 668. Networks and Markets. 3 Units.
In recent years network models have been used in different application domains, ranging from social networks to supply chains and from financial networks to transportation networks. Examples of existing work in networks include exploring how to leverage available social network information to (i) develop targeted pricing/advertising strategies, and (ii) combat misinformation. Further illustrating the ubiquity of network interactions, there is a growing literature aiming to study the propagation of shocks in supply chains and financial networks, which also sheds light on different approaches for mitigating the market-wide adverse effects of such shocks. Although much progress has been made, our understanding of how network interactions affect market-wide outcomes is still very much nascent. For instance, there is a lot of promise for impactful research that may change the way we think about the design of supply chain networks or the interactions between different modes of transportation in the context of urban planning. The main objective of this course is to provide a comprehensive overview of the recent research developments in the area of networked markets. We will cover foundational work, classical models, and also various applications. In addition, we will discuss exciting directions for future research, and try to prepare you to conduct research in the area. As such, the course involves a (team) research project as well as presentations (by instructors and/or students) of select papers from the recent literature followed by a critical review of their modeling assumptions and results.

OIT 671. Operational, Economic, and Statistical Modeling in the COVID-19 Crisis. 3 Units.
The COVID-19 crisis revealed many fundamental structural, cultural, and operational challenges in the world. Many of these challenges, for example managing patient care in a limited resource environment, were well-known before COVID-19 and the crisis simply highlighted the importance of developing effective strategies to handle them. Others, such as the design and adherence to non-pharmaceutical mitigation strategies like lock-downs, quickly appeared as countries took differing approaches to handling the pandemic. This course will discuss how operational, economic, and statistical modeling can be used to better understand different COVID-19 responses and strategies. This is a PhD seminar that will cover prior research that can shed light onto the COVID-19 crisis, current/ongoing research that directly addresses COVID-19 pressing issues, and will also explore new research directions in this space.The course will consist of a combination of lectures by the instructors, guest lectures by researchers from all over the world, and of students¿ presentations of their research projects. The course will be eclectic in terms of approaches, including tools from operations research, machine learning, statistics, econometrics, and microeconomics. The course will be co-taught via live virtual sessions by Prof. Carri Chan and Prof. Gabriel Weintraub and will be available to Business, Economics, Statistics, and Engineering PhD students from Columbia and Stanford University.

OIT 672. Stochastic Control in Operations and Economics. 3 Units.
The first half of this course will cover (i) the basic theory of Brownian motion, (ii) Ito stochastic calculus, and (iii) the rudiments of continuous-time stochastic control, all undertaken at a brisk pace, aimed at students who already know the basics or else have a strong enough math background to learn them quickly. The text for this part of the course will be Brownian Models of Performance and Control, by J. Michael Harrison, Cambridge University Press, 2013, which can be ordered from Amazon: http://www.amazon.com/Brownian-Performance-Control-Michael-Harrison/dp/1107018390/ref=sr_1_1?ie=UTF8&qid=1395420072&sr=8-1&keywords=Brownian+Models+of+Performance+and+ControlnnnThe second half of the course will explore in depth some models arising in operations research, finance and economic theory, such as the McDonald-Siegel investment model (an optimal stopping problem, treated in Chapter 5 of the textbook), Brownian versions of the classic cash balance problem (a family of stochastic control problems, treated in Chapter 7 of the textbook), and Yuliy Sannikovâs continuous-time principal-agent model (Review of Economic Studies, 2008). The course will be rather informally organized, more of a collaboration between students and instructor than a top-down lecture format, with at least half of the class time devoted to presentation of problems by students and auditors.

OIT 673. Data-driven Decision Making and Applications in Healthcare. 4 Units.
This course aims to introduce students to research topics in data-driven decision making with specific attention to healthcare applications. However, most concepts are applicable in areas beyond healthcare as well. Examples of topics are: prediction and risk adjustment, computational and statistical challenges associated with large-scale data, and dynamic decision making under uncertainty.

OIT 674. Decision-making and Learning under Model Uncertainty: Theory and Applications. 3 Units.
In most real-world problems, decision-makers often face uncertainty with respect to the underlying models that drive the rewards/costs associated with potential strategies. The uncertainty in the problem can be modeled in a number of ways (e.g., a probability distribution over some parameters or an uncertainty set for some variables) and a selection of an appropriate framework depends on various considerations ranging from the availability of historical data (or lack thereof) to the robustness of resulting strategies or the tractability of the formulation. In addition, once a framework is selected, further challenges often arise when considering dynamic settings, in which the level of uncertainty may be updated from one period to another. The high-level objectives of this course are: (1) to introduce various frameworks for decision-making under model uncertainty (2) to introduce tools to solve such problems, including ones to develop optimal or near-optimal learning strategies (3) to discuss the various trade-offs that arise such as tractability vs. performance, exploration vs. exploitation, and remembering vs. forgetting (4) to explore research papers that demonstrate applications of discussed methods and models to various problems areas such as dynamic pricing, revenue management, product recommendations, and assortment selection.

OIT 691. PhD Directed Reading. 1-15 Unit.
This course is offered for students requiring specialized training in an area not covered by existing courses. To register, a student must obtain permission from the faculty member who is willing to supervise the reading.
Same as: ACCT 691, FINANCE 691, GSBGEN 691, HRMGT 691, MGTECON 691, MKTG 691, OB 691, POLECON 691, STRAMGT 691

OIT 692. PhD Dissertation Research. 1-15 Unit.
This course is elected as soon as a student is ready to begin research for the dissertation, usually shortly after admission to candidacy. To register, a student must obtain permission from the faculty member who is willing to supervise the research.
Same as: ACCT 692, FINANCE 692, GSBGEN 692, HRMGT 692, MGTECON 692, MKTG 692, OB 692, POLECON 692, STRAMGT 692

OIT 698. Doctoral Practicum in Teaching. 1 Unit.
Doctoral Practicum in Teaching.

OIT 699. Doctoral Practicum in Research. 1 Unit.
Doctoral Practicum in Research.

OIT 802. TGR Dissertation. 0 Units.
.
Same as: ACCT 802, FINANCE 802, GSBGEN 802, HRMGT 802, MGTECON 802, MKTG 802, OB 802, POLECON 802, STRAMGT 802

Organizational Behavior Courses

OB 110N. Savvy: Learning How to Communicate with Purpose. 3 Units.
Our seminar is designed for students interested in improving their communication skills. Right now, you probably don't spend much time thinking about the way you communicate, nor are you likely, in the academic setting, to get much feedback on the messages you send. Yet the quality of your communication will have a large impact on your overall effectiveness in building relationships and getting things done, both in the university setting and later in your career. Each of the sessions in our seminar will help you appreciate the nature and complexity of communication and provide guidelines for both improving your communication style and recognizing the unique styles of others.In each class session, we'll consider a number of well-studied forms of interpersonal communication. And, we'll rely heavily on experiential learning to bring the concepts to life. For example, to better understand the dynamics of unstructured, spontaneous communication, we will participate in an improvisational theatre workshop, taught by one of the artists-in-residence at the Groundlings Theater in Los Angeles. To better understand persuasive communication tactics, we'll participate in role-play exercises, competitive games, and negotiation simulations. For each tactic, we'll talk about why it works, when it works best, and what its limitations might be. We'll discuss how you can put these approaches to work in order to support your goals.After taking this course, you will be better able to: (1) identify strategies for crafting effective communication in the form of everyday conversation, written work, and public presentations, (2) develop techniques for building strong, long-term relationships with your peers, and (3) become more persuasive in advancing an agenda, acquiring resources, or gaining support from others. These skills will be invaluable to you as you grow and develop here at Stanford and beyond.

OB 115N. Games, Decisions and Negotiations. 3 Units.
Human thinking is geared toward understanding and mastering social interactions. OB 115N explores cognitive, affective, behavioral, social and organizational processes that shape how we manage strategic interactions. The course builds on concepts and research findings from decision theory, behavioral game theory, negotiation research, and other relevant streams of investigation in the social sciences. By the end of this course, participants should have a better understanding of the structural and psychological factors that underlie competition and cooperation, bargaining, contracting, social influence, dispute resolution, and other types of social and organizational interactions. In addition to understanding how to analyze human thinking, feeling, and action in interactive contexts, participants will have opportunities to develop their behavioral skills through in-class exercises and simulations. Participants will play assigned roles in simulated interactions that will allow them to try out tactics that might feel uncomfortable trying in actual situations, get constructive feedback from other participants, and learn how they come across. The course readings, which are aimed to complement the in-class exercises, debriefs, and discussions, are aimed to further stimulate participants' interest in human cognition, emotion, and behavior in interactive contexts.To understand how decisions happen, we will use a combination of experiential exercises in class and in-depth discussions of theory and new and exciting research findings on cognitive and emotional aspects of decision making (e.g., what does "bounded-rationality" mean? how does power shape our negotiation behavior? how do our emotions influence our decisions?). We will play interactive games in our meetings to understand how various conditions, such as time pressure, power and uncertainty, influence our decisions. So, if you enjoy in-class exercises, you will enjoy our simulations. At the same time, if you enjoy analyzing human behavior and social interactions, you will like the readings and our discussions. After taking this course, you will be better able to identify and avoid common traps in strategic decision making and have a deeper understanding of other people's thinking and decision making processes.

OB 205. Managing Groups and Teams. 1 Unit.
This virtual course introduces you to the science of teams. Particularly, the learning in the course focuses on structures and processes that affect team performance and highlights some of the common pitfalls associated with working in teams. Topics include team composition, team process and member coordination, team decision making, intra-team conflict and creativity, and influence and team leadership. You will participate in a number of exercises to illustrate principles of teamwork and to give you practice not only diagnosing team problems but also taking action to improve total team performance.

OB 206. Organizational Behavior. 2 Units.
Building on the discipline of social psychology, this course helps you cultivate mindsets and build skills to understand the ways in which organizations and their members affect one another. You will learn frameworks for diagnosing and resolving problems in organizational settings. The course relates theory and research to organizational problems by reviewing basic concepts such as individual motivation and behavior; decision making; interpersonal communication and influence; small group behavior; and dyadic, individual, and inter-group conflict and cooperation.

OB 209. Leadership Laboratory. 2 Units.
In the Leadership Labs class we ask you to consider the question, "Why would someone follow YOU?" This is a course in which you consider what kind of leader you want to be, what kind of leader you are, and how to align your leadership behavior with your leadership goals. In this class you will have an opportunity to share in the leadership of your squad and, in doing so, to discover your strengths and challenges as a leader. You will receive feedback about your approach to leadership and have the opportunity to try out new skills and tools. Students will be placed into 5-6 person "squads" with the majority of class time spent in these squads. Your squad will complete a project and work on basic leadership challenges (e.g. individual and group dynamics and differences, assessing a team's progress). Working on the project and on weekly Labs assignments will provide you the opportunity to solicit a great deal of feedback so you can achieve a deeper understanding of the impact of your behavior on others. The squads will deliver a project, engage in role-play cases and group exercises designed to help you think more deeply about the dynamics in your workgroup and to allow you to practice and experiment with new ways of leading. In each Lab session, one or two squad members will be the Meeting Lead for the session. MBA1 squad members will rotate through the Meeting Lead position. Your squad will have a dedicated MBA2 Leadership Fellow who will also be present for these meetings in order to provide coaching to the meeting lead and to the squad as whole. A number of activities in the weekly Lab will focus on assessing and reflecting on how you and your squad are working together in the Labs. Finally, the quarter culminates with the Executive Challenge, an opportunity for you to further refine your leadership skills by engaging with alumni judges in role plays that test your ability to lead effectively. The alumni will provide you feedback and evaluate your performance.

OB 219. MSx: Organizational Design. 2 Units.
This course examines fundamental issues of general management and leadership within an organization. You will learn about setting an organization's strategic direction, aligning structure to implement strategy, and leading individuals within the firm. You will study the interplay among formal structure, routines, informal networks, and culture in shaping organizational performance and how to make changes to these facets to adapt and change to the environment in order to build more innovative companies.

OB 278. MSx: Organizational Behavior. 2 Units.
Building on the discipline of social psychology, this course helps you cultivate mindsets and build skills to understand the ways in which organizations and their members affect one another. You will learn frameworks for diagnosing and resolving problems in organizational settings. The course relates theory and research to organizational problems by reviewing basic concepts such as individual motivation and behavior; decision making; interpersonal communication and influence; small group behavior; and dyadic, individual, and inter-group conflict and cooperation.

OB 289. MSx: Negotiations. 2 Units.
Effective managers and leaders should be familiar with the strategy and psychology of conflict and negotiate effectively with other persons, departments, organizations, and stakeholders. Hence, a first aim of the course is to develop your ability to analyze conflicts. Concepts from the course will enable us to look beneath the surface rhetoric of a conflict, to isolate the important underlying interests at stake, and to determine what sort of negotiated settlement (if any) is feasible in a given conflict. In addition to understanding how to analyze a conflict, to manage conflict effectively, you must have a broad repertoire of behavioral skills that can be applied to the various conflict situations you are likely to encounter. Therefore, a second aim of the course is to allow you to experience various bargaining situations by playing a role in simulated conflict. Our exercises will allow you to try out tactics that might feel uncomfortable trying in an actual conflict, get constructive feedback from your counterparts and classmates, and learn how you come across. This course is an intense, compact version longer negotiation courses (electives OB381 and OB581); thus, students should not take either of these courses as there is considerable overlap among the three. Attendance and participation in the negotiation exercises are mandatory.

OB 317. Leading Creativity and Innovation. 3 Units.
This course helps students become more effective leaders of creativity and innovation in organizations. Successful innovations begin as creative ideas, but creative ideas can be difficult to generate and accurately evaluate. Based on the latest research, this course teaches students a set of data-driven tools for generating creative ideas, forecasting which ideas are most likely to succeed, and implementing new ideas successfully. Through experiential exercises, students learn about their own personal strengths in developing and evaluating new ideas, and how to leverage the strengths of individuals, teams, and crowds to foster creativity and innovation in their organizations.

OB 324. The Psychology of Startup Teams. 3 Units.
9 out of 10 start-up teams fail. The majority of these failures lie not in the product or in the market, but rather in the people dynamics within the start-up team. This course focuses on how start-ups can manage these problems and challenges that arise in the people-side of start-up life. We explore the psychological dynamics specific to startup teams and identify ways to effectively lead startup teams to their optimal performance. We will discuss topics such as creating the 'dream team', leadership in start-ups, the art of vision in startups, managing a startup's culture and climate, navigating virtual interactions, and solving common interpersonal problems in startup teams. To address these topics, the course will use a mix of experiential exercises, cases, and exciting guest speakers (including well-known CEOs and venture capitalists).

OB 330. Leadership Fellows I. 4 Units.
The Arbuckle Leadership Fellows Program plays an integral role in the GSB leadership curriculum by bringing together a group of talented second years to support the leadership development of the first-year class. OB330, an 8 unit two-quarter MBA2 elective course (in combination with OB331), is the academic component of this program and runs the entirety of both Autumn and Winter Quarters. Both quarters must be completed to receive any units of credit. The course is open only to those students who have applied and been accepted into the Leadership Fellows Program. Interested students apply at the start of Winter Quarter of their first year and undergo a competitive application process, after which successful applicants are invited to take part in the program. Informational meetings are held late in Autumn Quarter and during the first week of Winter Quarter and Fellows are selected from the first year class in mid- Winter Quarter. Knowing how to develop others is a crucial leadership competency. In this class, Fellows develop the advanced leadership skills of leading leaders and developing others through coaching and mentoring. Among the competencies developed in this class are: 1) Team Coaching Skills (e.g. facilitating a group, diagnosing group dynamics, debriefing, coaching without undermining the leader), 2) Individual Coaching Skills (e.g. effective inquiry, asking powerful questions, balancing support and challenge, providing effective feedback, holding others accountable, utilizing, valuing and connecting across differences and power differentials, using oneself in service of another's development) and 3) Personal Development Skills (e.g. self-reflection and self-awareness, leveraging strengths, stretching outside one's comfort zone.) In the Autumn Quarter Fellows are assigned to a squad of six MBA1s in Leadership Labs. Fellows guide their MBA1 squad through the learning process in the Labs and provide both individual and team coaching to their MBA1 squad members. In addition to the work with their MBA 1 squad, Fellows provide in-depth 1:1 coaching to three additional MBA1 students who are not members of their squad. This 1:1 coaching begins after Autumn midterms and continues through the end of Winter Quarter. Fellows classes meet twice a week for 105 minutes. There will be a reading list of conceptual material which will be supplemented during class with lectures discussions and activities. Students will apply concepts through role-playing and experiential exercises during class time as well as in their coaching and mentoring of their MBA1 coachees. Additionally, Fellows will attend weekly Leadership Labs with the first year squad to which they have been assigned and meet 1:1 with MBA1 coachees. Fellows meet regularly with five of their peers in "clinics," standing groups led by Leadership Labs Instructors who are also GSB Leadership Coaches. Fellows meet with their Leadership Coach and clinic approximately every other week during regular class time to discuss specific strategies for working with their first year students. Fellows also periodically meet with their Leadership Coach one-on-one to hone their skills and explore their areas for specific improvement. Note: OB374, Interpersonal Dynamics, is a PRE-REQUISITE for this course; students who want to be Fellows are advised to assess whether that is a class they want to take in the spring quarter of their first year. Additionally, signing up for 1:1 coaching by a Fellow as an admit strengthens a MBA1 student's application to the Arbuckle Leadership Fellows program.

OB 331. Leadership Fellows II. 4 Units.
This course is the continuation of Leadership Fellows I, an 8-unit course that begins in Autumn Quarter. During this quarter Fellows will continue to deepen their coaching and mentoring skills, and will focus exclusively on in-depth 1:1 coaching with three MBA1 coachees (who were not members of their MBA1 squad.) Classes and clinics continue as in Autumn Quarter.

OB 333. Acting with Power. 3 Units.
The ability to function effectively within a hierarchy is a crucial determinant of managerial success, yet many people struggle with "authority issues" that make certain hierarchical roles and positions difficult for them. This course draws on the craft of acting and the science of psychology to help students learn to use themselves to develop the characters that can play these roles effectively. This class is designed specifically for students who have trouble "playing" authoritative roles: those who find it difficult to act with power, status, and authority. It will also be useful for students who find it difficult to share power and authority, which involves accepting and deferring to the power and authority of others. Participants will be asked to read, think deeply about, and share some of their own feelings about power and authority, and the origins of those feelings. They will also be asked to prepare for and present a series of in-class performances that involve playing characters with and without power, in scenes that highlight the interactions and relationships between high and low power characters. These performances will take up much of our time during class. Out-of-class assignments will include reading important works on psychology, and on the theory and practice of acting, as well as writing short essays analyzing their own and others' performances.

OB 336. Insight to Outcome. 3 Units.
Getting from "strategic insight" to "desired outcome" (achieving the right result) continues to be a core challenge for many organizations and leaders. In this course, we develop a framework and approach for the "insight to outcome" sequence, study some of the key levers available to managers, and learn from some common pitfalls. The bulk of the course will be devoted to the practical application of the approach to a number of important business processes, such as merger integration, corporate and business unit transformation, and strategy development. Some class sessions will involve class visits by topical experts in these applications. nnThe course is designed for second-year MBAs. It will appeal to students interested in an exploratory course - more of a "how to think about it" course than a "toolkit" course. Grades will be based on class participation and a group project.

OB 345. Leadership Coaching. 3 Units.
The ability to coach others is an often over-looked core competency for leaders. This course will give students an opportunity to learn the fundamental skills of coaching, so they can become coaching leaders. This course is designed to be very experiential. While conceptual frameworks will be introduced through readings, lectures, demonstrations and discussions, the only real way to learn coaching skills is to both practice coaching, and to be coached. Every class session will provide opportunities to do both: coach and be coached. Because the in-class coaching practice will not be role plays but will actually be real coaching sessions between students, this course will demand a high level of engagement and participation from each student.

OB 346. Inside Life and Leadership. 3 Units.
We created this class around the premises that 1) you have great potential, 2) you have had, and will continue to have, numerous opportunities to affect the world, and 3) to maximize your potential you need a reliable framework to gain self-insight and develop yourself and those around you.nnIn this class we seek to aid you in customizing a framework for yourself, based on a model to increase your self-knowledge and guide your ongoing development. In particular, this class is designed to help you swiftly identify and resolve gaps between your current and desired state, and to help you inspire others to do the same. We will accomplish this by facilitating your active engagement and full participation in interactive exercises and assignments, case studies, and self-reflection.

OB 348. Leading and Managing Health Care Organizations: Innovation and Collaboration in High Stakes Settings. 3 Units.
Leading and managing in complex, high stakes settings, like health care, where lives and livelihoods are on the line, presents distinctive challenges and constraints. This course challenges you to apply seminal and contemporary theories in organizational behavior to evaluate managerial decisions and develop evidence-based strategies for leading and managing health care teams and organizations. Topics include leading systems that promote learning; implementing change; and interdisciplinary problem-solving, decision-making, and collaboration. Group work and exercises will simulate high pressure and risk-taking under uncertainty. While the focus of this course will be on health care situations, lessons are relevant to other settings including consulting, banking, and high tech, and prior experience in the health sector is not required.

OB 353. Cultural Imperative: The Ideal of Organizational Design. 3 Units.
Business doesn't just happen, significant amounts of time are spent creating business plans, executing them, and ultimately trying to figure out what went wrong in order to correct them. This class argues, that similarly, organizational culture shouldn't be allowed to just happen; organizational culture should be designed. In this class we suggest that there is an ideal, a cultural imperative, which organizations should strive for. nnWe believe that individuals have near infinite problem-solving ability, and, that all else equal, organizations that tap into this potential will outperform those that only see people in terms of labor hours and dollars. Thus, the class focuses on learning to see the role of organizational culture in creating an environment that engages, stimulates, and drives growth of the people in the organization, and aligns this engagement with the organization's mission.n nWe will accomplish this through class discussion, case analyses, and a group project designed to provide hands-on experience.

OB 363. Leadership Perspectives. 4 Units.
What does it mean to be a principled leader? What role do values play in an organization, and how do successful leaders apply their values in their daily business lives? This course examines the concept of principled leadership and the various ways that leaders try to institutionalize particular values within the organizations they lead. Equally important, it explores the difficult challenges that leaders sometimes face when trying to apply their principles in a tough, fast-paced business environment, where others may not share the same expectations. Through assigned readings, interactive lectures with visiting executives, and weekly small group discussions, students will learn how practicing leaders implement their principles, while reflecting the realities of different cultural expectations and meeting business demands. The course will provide a forum for students to learn directly from practicing leaders and to think introspectively about their own personal values, leadership styles, and long-term aspirations.

OB 368. How to Make Ideas Stick. 4 Units.
Having a good idea is not enough, we must also be able to convey our ideas in a way that people can understand and act on them. But often our messages don't persuade or persist. This course assumes that we can craft more effective messages by understanding the principles that make certain ideas stick in the natural social environment: Urban legends survive in the social marketplace without advertising dollars to support them or PR professionals to spin them. How could we make true or useful information survive as well as bogus rumors? We will use research in sociology, folklore, and psychology to analyze what kinds of ideas survive the selection process in the marketplace of ideas and to develop a set of strategic tools to craft ideas that are more likely to survive. Topics covered include crafting messages for complex information that don't exceed the capacity of human attention and memory, using emotional appeals that inspire people and motivate action, acquiring attention in a crowded environment, and gaining legitimacy for new ideas, approaches, and technologies.

OB 372. High-Performance Leadership. 4 Units.
This course asks the question: "What does it take to build high-performance?" The focus is on middle and upper-middle management in contemporary organizations that have complex tasks, exist in a rapidly changing environment, and have highly skilled subordinates. The premise of the course is that traditional methods of management may produce adequate levels of performance but prevent excellence from developing. New approaches to leadership will be presented that are more likely to lead to a truly high-performing system. Time will be spent discussing the components of effective leadership, what a manager can do to build a compelling vision, strong teams, and mutual influence sideways and upwards as well as with direct reports. Also, what members can do to support the leader who wants to initiate such changes. In addition to class, students will meet for 2 1/2 hours each week in a Skill Development Group to apply the course material to their own personal development. (While there is minimal overlap in content between OB 372 and OB 374 and these two classes are highly complementary, both require Journals and an evening group. We recommend against taking both classes in the same quarter for workload reasons.) Students will have a choice as to when their SDG will meet. The expectation is full attendance at all SDG meetings. Only one excused class absence. Attendance is required in EIS Simulation and the Consulting Project classes.

OB 374. Interpersonal Dynamics. 5 Units.
PRE-QUALIFICATION REQUIRED (see link at bottom of course description). NOTE FOR AY 2020-21: Given current expectations about the need for social distancing, our current plans for Autumn quarter (and potentially Winter and Spring quarters as well) include the following modifications to the course: Lectures will take place virtually on Zoom. T-group meetings during daytime class time will also be virtual. Evening T-group meetings will be in person (with social distancing and masks). Groups will be 7-8 students instead of the usual 12 in order to allow for productive discussions in the context of social distancing. Students who cannot attend evening t-group in person may participate virtually. Beyond these modifications the course remains focused on increasing one's competencies in building more effective relationships. Learning is primarily through interactions with other group members and reflection on those interactions. This course is very involving, and, at times, can be quite emotional. However, this course is not a substitute for therapy. If you are in therapy, please talk this over with your therapist and get their advice before enrolling in this course. Students are divided into t-groups of 7 or 8 students. T-groups meet during part of class-time as well as in the evening. The class has a weekend retreat toward the end of the quarter which will take place on campus. It is very important to note that when you decide to take this course, you make an explicit contract to be actively involved. ATTENDANCE: Because of the highly interactive nature of this course, it is very important that all students attend all sessions. Missing class, class T-group, evening T-group, or any portion of the weekend for an unexcused absence will negatively influence your grade and may result in your grade being dropped one grade level (for each absence). Attendance at the first class is required for all sections and failure to attend the first class will result in an automatic drop. WAITLIST: Waitlisted students must attend the first class to maintain their place on the waitlist and should check with individual instructors on whether attendance at another section can meet this requirement. It is the student's responsibility to notify respective OB 374 faculty of your attendance and wish to fulfill your waitlist requirement. SECTION SPECIFIC INFORMATION: See section schedules for details on class days, T-group evening, and weekend retreat dates; it is your responsibility to make sure you can fulfill all attendance requirements before enrolling. PRE-QUALIFICATION: Students must pre-qualify before taking the class through an assignment on Canvas (due approximately five weeks prior to the quarter). Go to https://canvas.stanford.edu/enroll/H8WJ8X, then select "Enroll in Course".

OB 377. The Paths to Power. 3 Units.
Power and influence processes are ubiquitous and important in organizations, so leaders need to be able both to understand power and to act on that knowledge. This course has three objectives: 1) increasing students' ability to diagnose and analyze power and politics in organizational situations; 2) increase students' skills in exercising power effectively; and 3) helping students come to terms with the inherent dilemmas and choices, and their own ambivalence, involved in developing and exercising influence. Topics covered include: the sources of power, including individual attributes and structural position; dealing with resistance and conflict; obtaining allies and supporters; maintaining power; how and why power is lost; living in the limelight--the price of having power; preparing oneself to obtain power; and the use of language and body language in exercising power.The class involves a reasonably large number of written, self-reflective assignments as well as two individual projects (doing a power diagnosis on an external organization that is important to the person) and a doing-power project (using the class material during the quarter to gain power in some group or organization). The class emphasis is on both learning the conceptual material and also incorporating it into one's own strategies and behaviors.

OB 381. Conflict Management and Negotiation. 3 Units.
Conflict is unavoidable in every organization. The key question is how it will be handled: will it escalate to dysfunctional levels or will it be effectively managed? Hence, a first aim of the course is to develop your ability to analyze conflicts, to look beneath the surface rhetoric of a conflict, to isolate the important underlying interests, and to determine what sort of agreement (if any) is feasible. We'll analyze which negotiation strategies are effective in different conflicts. We'll also examine psychological and structural factors that create conflict and often pose a barrier to its resolution. But understanding how to analyze a conflict is not enough. To manage conflict effectively, you need a broad repertoire of behavioral skills. Developing these is the second aim of the course. To achieve this, negotiation exercises are used in every session. When playing a role in a simulated conflict, you will be free to try out tactics that might feel uncomfortable in a real one. You will get feedback from your classmates about how you come across. In sum, you can use this course to expand your repertoire of skills, to hone your skills, and to become more adept in choosing when to apply each skill.

OB 383. Lives of Consequence: How Individuals Create Happy, Meaningful and Successful Lives. 3 Units.
This Bass Seminar and Experiential Workshop will examine what it means to live a life of consequence. Using theories and evidence from the latest and best research on happiness, meaning and success, we will collectively develop a conceptual framework for thinking about how you personally can design a happier and more meaningful life for yourself. In addition to building a solid conceptual foundation on which to think about your life, you will have substantial opportunities to work individually and in small groups on a variety of reflective and experiential exercises designed to stimulate your imagination regarding how to create greater happiness and meaning in your own life. These engaging and enjoyable exercises include personal writing and public speaking exercises, as well as out-of-class experiential exercises. The seminar will be very discussion oriented and student participation quite lively. The goal of this seminar and workshop is to change how you think about yourself and your life! THIS WORKSHOP IS AVAILABLE ONLY TO FIRST- AND SECOND- YEAR MBA STUDENTS at the GSB. NO EXCEPTIONS WILL BE PERMITTED AND AUDITING IS NOT PERMITTED.

OB 387. Redesigning Work for 21st Century Men and Women. 4 Units.
Research on the Millennial Generation (i.e., those born between 1980-2000) shows that millennials, as compared to earlier generations, have quite different values and priorities when it comes to work. For instance, millennials report that they place a high value on autonomy and creativity at work, and prefer to self-manage their personal productivity. They also report that they value being a good parent and having a good marriage over having a high-paying career. Despite this research, our organizations have been slow to respond to a new generation of workers. This has led to high levels of disengagement, and lower levels of productivity in many organizations. This class will explore the gap between how our organizations are designed, and what a new generation of workers desire in terms of work. Students will work in teams to design a new workplace that is reflective of what workers want in terms of their work. The first part of the course will focus on what the issues and problems are in how organizations are designed for an earlier generation of workers, while the second part of the course will be set aside for team-based project work and presentations.

OB 388. Leadership in the Entertainment Industry. 3 Units.
The entertainment industry is one of the largest and most important industries in the world - both from a business and cultural standpoint. It is characterized by tremendous opportunities and great uncertainties. The industry is undergoing great change as new technologies and expanding markets transform the way entertainment is produced and disseminated throughout the world. For these reasons, this dynamic industry creates opportunities for entrepreneurial students interested in leaving an artistic or creative imprint on the world. This course is designed to help prepare students for careers in the media industries, and to explore leadership within them. The industry is truly an intersection of art and commerce, and the major portion of the course will involve bringing to the class leaders who represent key areas of the entertainment industry, on both the business and creative sides. As with any business, the entertainment industry is driven by the vision of its leaders. These leaders make financial and artistic decisions daily, and manage staff and productions with the goal of producing entertainment product meant to be seen as widely as possible, and meant to make a profit. It is hoped that through interaction with these speakers, students will see the potential of strong leadership and how it works to advance entertainment companies and the films and TV programming they produce. Topics to be examined include project development, production, and marketing; emerging technologies and their impact on the industry; the roles of studio, network and gaming executives, directors, film and television producers, writers, actors, agents, and others play in the making and distribution of film and television productions; and the intersection of Silicon Valley and Hollywood. The theory behind this course is that by listening to, and questioning the class speakers, coupled with class research papers, students will emerge with a deeper understanding of the entertainment industry. The class is also intended to give students a view of first-rate leadership in general, and to present what it takes to be a successful, inspiring, and forward-thinking leader in entertainment.

OB 393. Leadership in Diverse Organizations. 4 Units.
How improve capacity to exercise leadership and work effectively with others within the context of culturally diverse groups and organizations. Premise is that diversity presents challenges and opportunities that pushestudents to develop leadership skills relevant across a variety of situations. What social and psychological obstacles limit people's ability to work effectively across identity-based differences? What can people do to build the relational and organizational capacity to enable these differences to be a resource for learning and effectiveness within teams and organizations? Focus is on dynamics of race and gender; attention to other dimensions of identity and difference in organizations, including sexual orientation, nationality, class, and religion.

OB 512. Creating, Building, and Sustaining Breakthrough Ventures. 2 Units.
This course is designed to provide students with a summary of entrepreneurial processes that have successfully created, developed, and sustained breakthrough ventures. By "breakthrough" we mean ventures that have a lasting and positive impact, touching millions of lives. Examples are based on the experiences of Norman Winarsky, formerly President of SRI Ventures, Charles O¿Reilly, and invited speakers who are leading investors and entrepreneurs. They include companies like Siri, Nuance, Intuitive Surgical, Sandisk, Facebook, and others. Think of this course as a ¿master class¿. You will work with the professors and invited speakers to create and build your venture concept. We focus on all elements of building a breakthrough company, starting with the source of breakthrough venture ideas, advancing to building a great value proposition and business plan, recruiting a team, finding investors and board members, scaling the company, deciding whether to sell or go IPO, and ending with what it takes to build a company that can sustain itself through continuous innovation. At each step, we follow examples of companies we've helped build, and provide lessons of success as well as failure. The course will be highly interactive, and engage students in elements of building their own venture concepts.

OB 513. Beyond Disruption: Entrepreneurial Leadership Within Existing Organizations. 2 Units.
Why do large, successful companies often have such difficulty in disrupting themselves (e.g., Kodak, Blockbuster, Borders)? How do you maintain an entrepreneurial edge within an existing enterprise? How do you sustain core businesses while simultaneously adapting to disruptive threats? In this course, students will build the skills to spot threats and opportunities earlier and capture them faster. The course will take a look at some of the most successful "creators within corporations" and discern why some strategies succeed when others do not. We will explore the framework that some companies have developed to simultaneously compete in their core business while exploring new ones. To do this we will interact with guests from firms like Walmart, Amazon, General Motors, Flex and IBM as well as venture capitalists and entrepreneurs. Our objective is to help students understand in some detail what it takes to help organizations stay ahead of disruptive threats and to avoid problems that often lead companies into decline.

OB 518. Leading Through Culture. 2 Units.
This course examines organization culture, how and why managers can use culture to maximize results within an organization, and how culture can undermine results. The course begins by situating cultural leadership and management within a culture-shaping framework and the opportunities, obligations and methods for leaders to impact culture. It also focuses on what is different in cultural management and why so many contemporary firms attempt to use it. We analyze the relationship between culture and strategy, seeking alignment between the two. The course also explores different kinds of cultures seen in high performing and low performing organizations, and seeks to understand how cultural content affects behavior and business results. Students will be asked to describe and define the culture of an organization needed for a given business and strategy, and to define the role of executives in shaping culture. The class identifies and analyzes the tools or levers that leaders can use to build an effective culture. We will spend a session on each of the following: culture and strategy alignment, architecture for shaping culture, selecting people for cultural alignment, aligning organizational practices, culture and society, cultural inflection points from start-up to scale, cultural aspects of high performance and cultural diagnostics. The course will end with a session on culture issues in merger and acquisition.

OB 522. Managing Social Networks in Organizations. 2 Units.
This course is designed to improve your effectiveness a manager by introducing you to both the concepts and tools that are part of the "new science of social networks" as they apply to organizations. In this course, you will develop the skills to understand social networks and recognize social capital, both offline and online, as well as be able to identify key elements of your own and others? social networks that enhance competitive capabilities. Topics to be covered include how social networks affect power and influence, leadership, innovation and the generation of novel ideas, careers, organizational change and competitive advantage. Additional topics to be covered include the increasing importance of online social networks in organizational life and the importance of social cognition and how it can be used to enhance social capital. At the conclusion of this course you will have the skills to map out social networks, diagnose features of the networks that either help or hinder the performance of individuals, groups and companies, and be able to manage important features of social networks in organizations.

OB 527. The Art of Self-Coaching. 2 Units.
In 2009 a student who was about to graduate said to me, "Being coached at the GSB helped me grow over the last two years, but after I leave school and no longer have access to these resources, how will I continue to coach myself?"This course is an attempt to help you answer that question. I define self-coaching as the process of guiding our own growth and development, particularly through periods of transition, in both the professional and personal realms. In this course you'll explore a range of practices and disciplines intended to help you build on what you've learned about yourself at the GSB and continue that process after graduation. Classes will consist of a mix of short lectures, exercises, small group discussions, and conversations in pairs.While this is a self-directed process, it's also highly social and interactive. You'll work with in pairs and small groups in every class session, so be prepared to discuss meaningful personal issues with your fellow students.Because every class session involves extensive interaction with other students, missing a class would negatively affect other students¿ learning. As a result, your are obligated to attend every class session. One unexcused absence will lower your grade a full level, and more than one unexcused absence will result in a U. For students taking the class Pass/Fail, an unexcused absence may result in a failing grade.

OB 536. Insight to Outcome. 2 Units.
Getting from "strategic insight" to "desired outcome" (achieving the right result) continues to be a core challenge for many organizations and leaders. In this course, we develop a framework and approach for the "insight to outcome" sequence, study some of the key levers available to managers, and learn from some common pitfalls. The bulk of the course will be devoted to the practical application of the approach to a number of important business processes, such as merger integration, corporate and business unit transformation, and strategy development. Some class sessions will involve class visits by topical experts in these applications. This course will appeal to students interested in an exploratory course - more of a "how to think about it" course than a "toolkit" course. Grades will be based on class participation and a group project. Class size is limited to 40.

OB 547. Hacking Entrepreneurship. 2 Units.
How do some people turn ideas into enterprises that endure? Why do some people succeed why so many others fail? Based on more than 200 interviews with leading entrepreneurs conducted over the past five years by Amy Wilkinson, this course will focus on the six skills of successful entrepreneurs. The class will include brief lectures, experiential cases, personalized skills assessment through a diagnostic tool, and class discussions with a set of the successful entrepreneurs featured in a recent book authored by the instructor, "The Creator's Code." The class is designed to help students integrate these skills into their own future ventures.

OB 555. Mastering Life's Moments: The Challenge of Optimizing your Experience. 2 Units.
Our personal and professional lives are made up of a series of moments. Some of these moments present great opportunity, with the prospect of personal change and even transformative growth. Other moments contain the seeds of setback and even derailment of our most coveted plans. Some of life's moments are planned, while others catch us completely by surprise. Whatever moments we are afforded, we must make the most of them. This new seminar will explore what we know about the psychology of "optimal experience." We will examine how and why some individuals harvest so much joy, zest and sense of attainment from their moments, while others squander their moments or dig themselves into deeper holes when trying to respond to them. We will also examine how and why some people respond brilliantly to adversity, mastering even the most tragic moments that life presents, while others flounder and fold. To inform our thinking on this vital topic, the seminar will include a series of rich and provocative readings from psychology, behavioral economics, organizational theory and philosophy. Additionally, the seminar will include a series of compelling video cases illustrating both optimal and suboptimal responses to experience. To make the seminar more personally involving and useful to you, you will also engage in a series of reflective writing and experiential exercises. Whenever I offer a new course, I make a promise to the students who take it. For this course I promise you an intellectually deep and personally meaningful exploration of what it means to "use up" your life well. Put another way, I promise you some great educational moments in your GSB life! THIS COURSE IS OPEN TO GSB MBA STUDENTS ONLY. NO EXCEPTIONS CAN BE MADE TO THIS POLICY.

OB 568. How to Make Ideas Stick. 2 Units.
This class will explore the properties shared by ideas that stick with people and change the way they think and act. The course is based on the framework in the book Made to Stick and focuses on hands-on exercises that will teach you how to transform your messages to make them stick: How do you get attention for your idea in a crowded marketplace of ideas? How can you convey complex information quickly? How do you make a broad, abstract idea concrete and tangible enough for people to understand? How do you provide credibility for your idea without resorting to dry statistics? Although the exercises in this course are fun and generally short, students in the past have said that they do require a lot of thinking time outside of class in order to apply the course principles to a specific message. This is particularly true of the final project which involves improving the message of a specific live client (e.g., a friend with a start-up business, the recruiting materials of a former employer). This course will be especially useful for entrepreneurs who must pitch their ideas to customers, investors, and potential employees and for students in the nonprofit sector where resources for spreading ideas are often thin.

OB 581. Negotiations. 2 Units.
This course is designed to improve students' skills in all phases of a negotiation: understanding prescriptive and descriptive negotiation theory as it applies to dyadic and multiparty negotiations, to buyer-seller transactions and the resolution of disputes, to the development of negotiation strategy and to the management of integrative and distributive aspects of the negotiation process. The course is based on a series of simulated negotiations in a variety of contexts including one-on-one, multi-party, and team negotiations. When playing a role in a simulated conflict, you will be free to try out tactics that might feel uncomfortable in a real one. You will get feedback from your classmates about how you come across. You will have an opportunity to reflect on your experience in your negotiation paper. In sum, you can use this course to expand your repertoire of conflict management and negotiation skills, to hone your skills, and to become more adept in choosing when to apply each skill. This course represents a shorter, more intense version of OB 381-Conflict Management and Negotiations. Students should not take both courses, as there is considerable overlap in course content. Attendance and participation in the negotiation exercises is mandatory.

OB 601. Organizational Ecology. 3 Units.
This seminar examines theoretical and methodological issues in the study of the ecology of organizations. Particular attention is given to the dynamics that characterize the interface between organizational populations and their audiences.
Same as: SOC 366A

OB 602. Diversity, Equity, and Inclusion in Academe: Confronting Bias. 2 Units.
This seminar will explore the ways in which conscious and unconscious bias impacts the careers of underrepresented minority, LGBTQ, and women academics. We will study topics such as unconscious bias, stereotype threat, ambient belonging, microaggressions, and everyday racism with a lens toward understanding how these impact academics. We will also consider ways to confront bias so that we can design a more equitable and diverse academe for the future.

OB 612. Careers and Organizations. 3 Units.
The careers of individuals are shaped by their movement within and between organizations, whether those be established employers or entrepreneurial ventures. Conversely, organizations of all sizes are shaped by the flows of individuals through them as individuals construct careers by pursuing different opportunities. This course will examine sociological and economic theory and research on this mutually constitutive relationship. Possible topics include inequality and attainment processes, internal labor markets, mobility dynamics, individual and organizational learning, ecological influences, gender and racial segregation, discrimination, and entrepreneurship as a career process.

OB 622. Topics in Social Network Analysis: Structure and Dynamics. 3 Units.
This course provides coverage of both introductory and intermediate topics in social network analysis with a primary focus on recent developments in theory, methods and substantive applications. We will begin the course with a brief overview of introductory themes and concepts from various disciplines that have contributed to social network theory, including sociology, anthropology, social psychology, and organizations. Introductory topics to be included: centrality, cliques, structural and regular equivalence and cognitive social structures. The primary topics to be covered in this course include the application of network theory to the study of careers, competition, innovation, inequality/stratification, and recent research on IT mediated networks, as well as an examination of network formation and dynamics. The course will also provide hands-on experience applying social network methods in empirical research. Students will have an opportunity to learn some modern network analysis methods and apply them to network data using the R programming language. No prior experience with social network analysis or software is required.

OB 625. Economic Development and Economic Sociology. 4 Units.
As a field, economic sociology has had little to say about economic development. Much of this quietude stems from the latter's identification with "backward," "poor" or "developing" economies, and the former's interest in many of the advanced features of the richer economies. This state of affairs not only sets up a false dichotomy but also makes it difficult by construction to theorize or research the issue of economic decline, seemingly a necessary piece of any coherent theory of development.nnnThe (admittedly ambitious) goal of this seminar is to move toward a better theory of economic development. We will review several of the more common strands of thought on development in related literatures and then consider some alternative perspectives that might bridge this research and contemporary sociology. No guarantees are made that we will have a full-fledged theory by the end of the quarter, but with luck we will have breathed some new life into an often marginalized but critically important strain of social thought and research.nnnThe class will be a seminar based around the readings. Grading will be a combination of class participation, a take-home midterm and a final paper.

OB 626. Strategy and Organizations. 3 Units.
Why are some organizations more competitive than others? This is the defining questions of the interdisciplinary research field known as "strategic management." In this PhD seminar, we will survey the field of strategic management as seen from the perspective of "macro" organizational behavior. The course takes a broad view of the field of strategic management, reflecting the diversity of perspectives that is seen in this field worldwide. Across this diversity, however, it is possible to identify four distinct theoretical approaches by noting the mechanisms that researchers think are generating outcomes. The course is structured around these four theoretical approaches, and one of the main objectives of the course is to help you identify, critique, and improve these theoretical approaches. Most work in strategic management pays less attention to particular theoretical perspectives, and is organized more by the topic - the phenomenon being studied - such as market exit, growth, performance, mergers and acquisitions, innovation, and the like. I have catalogued the research in strategic management both according to theoretical perspective and topic, and the skeleton of that structure can be seen in this syllabus. I encourage you to use a similar structure as you try to make sense out of the strategy field.

OB 630. Social Norms. 3 Units.
This course covers research and theory on the origins and function of social norms. Topics include the estimation of public opinion, the function of norms as ideals and standards of judgment, and the impact of norms on collective and individual behavior. In addition to acquainting students with the various forms and functions of social norms the course will provide students with experience in identifying and formulating tractable research questions.

OB 632. Social Movements. 3 Units.
Social movement activists frequently target organizations (e.g., corporations, universities) in order to bring about political and social change. Because most organizations are not democracies, movements must find ways to penetrate their closed boundaries if they are to have an influence inside organizations. At the same time, social movements create organizational structures that help them carry out their goals, reproduce their missions and tactics, and effectively generate collective action. The purpose of this course is to examine the complex relationship between social movements and organizations. In order to understand the empirical link between movements and organizations, we will rely on social movement and organizational theory. Like the phenomena they seek to explain, these theories are strongly intertwined. In this course, we will cover topics related to how movements use organizations to propel change, and topics related to how movements help generate social change by targeting organizations. We will also evaluate the theoretical developments at the nexus of these two literatures, identifying the major innovations as well as looking for new research opportunities.

OB 636. Economic Sociology of Markets and Organizations. 3 Units.
This PhD course provides an overview of economic sociology as it pertains to the behavior of individuals as atomistic agents and collective actors, in the context of markets and organizations. Students will study foundational texts as well as recent research in order to gain an understanding of how to further advance the field. Topics include networks, categories, labor markets, product markets, inequality, and others. Throughout the course students will be expected to generate "mental maps" to demonstrate they have gained a comprehensive understanding of the field, weekly memos, and to complete a final project.

OB 637. Modeling Culture. 3 Units.
What is culture, and how can we model it? This course will survey theoretical frameworks for studying culture from a multidisciplinary perspective, ranging from evolutionary biology through sociology to economics. We will explore various methods for measuring culture and modeling cultural processes, including ethnography and survey data. Our focus, however, will be on measurement and modeling strategies that are made possible by the internet revolution and big data, including agent-based modeling, natural language processing and machine learning. Our class discussions will transition between theoretical abstraction and hands-on data analysis.

OB 652. Statistical Methods for Behavioral and Social Sciences. 3 Units.
For students who seek experience and advanced training in empirical research methods. Analysis of experimental data with methods ranging from simple chi-square to multiple regression models, including an introduction to mixed models. Uses the free statistical computing package R. Prerequisite: An intro stats class (Same as PSYCH 252 -- Co-taught with Ewart Thomas).

OB 654. Organizational Behavior Pro Seminar. 1 Unit.
This pro-seminar is primarily for OB-macro PhD students who are developing dissertation ideas. The focus is on the theoretical argument underpinning the dissertation research. Students will regularly present and comment upon one another's ideas. Students can and are encouraged to take the pro-seminar multiple times.

OB 660. Topics in Organizational Behavior: Individual Processes. 3 Units.
This course will focus on psychological processes that occur within individuals that cannot be seen but whose existence can be inferred on the basis of people's behavior. Such processes, referred to as individual processes, include personality, emotions, perception, and learning. This course aims to introduce Ph.D. students to both theoretical and applied background on individual processes, with a special emphasis on person vs situation and nature vs nurture debates, evolutionary perspective, and free will. Additionally, we will discuss psychological assessment and its principles, and review both traditional (e.g., tests and questionnaires) and modern (e.g., digital behavioral footprints) approaches to collecting data and measuring psychological constructs. .

OB 661. Topics in Organizational Behavior: Intragroup processes. 3 Units.
This course will be run as a seminar. Each week a different form of intragroup behavior will be discussed. The type of group will vary, as will the context in which it operates (e.g., school vs. corporation). The weekly topics will include whistleblowing, bullying, charitable giving, paying it forward, workplace sabotage, emergent leadership, internal group threat, external group threat, single sex education and corporate mergers. Each week students will be required to post on the course website a short (no more than one page) reaction paper to one or more of the readings. These papers should be posted by 6pm on the Tuesday night preceding the class. Each student will serve as discussion leader for two of the 10 weeks. Discussion leaders are responsible for beginning the discussion of the papers by summarizing the comments of the other class members and offering their own thoughts and analysis of the papers as well as the issues they raise. Students are also required to write a 10-page double-spaced paper on a topic relevant to intragroup behavior.

OB 662. Topics in Organizational Behavior: Intergroup Processes. 3 Units.
The primary objective of this course is to provide an overview and organizing framework of the micro-organizational behavior literature. This entails reading many foundational pieces that will cover the classic areas of research in the field. We will also read more cutting-edge papers that reanalyze and reframe many of the classic variables of micro-OB, trying to alter the dominant perspective, bring in new theory, and integrate conflicting approaches.

OB 670. Designing Social Research. 3 Units.
This is a course in the design of social research, with a particular emphasis on research field (i.e., non-laboratory) settings. As such, the course is a forum for discussing and developing an understanding of the different strategies social theorists employ to explain social processes, develop theories, and make these theories as believable as possible. In general, these issues will be discussed in the context of sociological research on organizations, but this will not be the exclusive focus of the course. A range of topics will be covered, for example: formulating and motivating research questions; varieties of explanation; experimental and quasi-experimental methods, including natural experiments; counterfactual models; conceptualization and measurement; sampling and case selection; qualitative and quantitative approaches. This course is particularly oriented toward developing an appreciation of the tradeoffs of different approaches. It is well suited to Ph.D. students working on qualifying papers and dissertation proposals.

OB 671. Social Psychology of Organizations. 3 Units.
This seminar focuses on social psychological theories and research relevant to organizational behavior. It reviews topics in micro-organizational behavior, linking these to foundations in cognitive and social psychology and sociology. Topics include models of attribution, decision making, emotion, coordination, influence and persuasion, and culture. Prerequisites: Enrollment in a PhD program. Also listed as Sociology 361.

OB 672. Organization and Environment. 3 Units.
This seminar considers the leading sociological approaches to analyzing relations of organizations and environments, with a special emphasis on dynamics. Attention is given to theoretical formulations, research designs, and results of empirical studies. Prerequisite: Enrollment in a PhD program. Also listed as Sociology 362.

OB 673. Perspectives on the Social Psychology of Organizations. 3 Units.
This seminar focuses on topics relevant to organizational behavior, drawing primarily on social psychological and some sociological research. Topics vary from year to year. In Fall 2014 the seminar will focus on group and team dynamics. Topics will include diversity, power and status dynamics in teams, expertise and knowledge utilization, information processing, trust and respect in teams, team leadership, and multi-level perspectives on team and group dynamics, among others. Prerequisites: Enrollment in a PhD Program. Cannot be audited or taken pass/fail.

OB 674. Perspectives on Organization and Environment: Social Movement Organizations and Environments. 3 Units.
This course examines the interaction between organizations and their environments. It is given every year by a different faculty member. What follows is the description of the course for the academic year 2012-13:nnnThis research seminar explores recent theory and research on social movement organizations and their environments. We'll consider the way in which organizational theories help us to explain social movement phenomena, and the way in which social movement theories help us to explain organizational phenomena.

OB 675. Micro Research Methods. 3 Units.
This course helps students gain foundational knowledge on several different methods used in micro-OB research, including surveys, experiments (field and lab), longitudinal studies, content analysis, qualitative interviews, ethnography, cases, and archival datasets. The course will cover the benefits and limitations of each method, and how to creatively mix and match methods to address ambitious research questions.

OB 676. Social and Political Processes in Organizations. 4 Units.
Social psychological and sociological research at the meso, or intermediate between micro and macro, level of analysis. Topics vary from year to year, but usually include organizational routines and learning; mobility and attainment processes; gender and race inequality and discrimination; social networks; cultural perspectives on organizations, and related topics. Prerequisite: Ph.D. student.

OB 678. The Design and Process of Experimental Research. 1 Unit.
This year-long course takes a hands-on approach to learning about experimental research. It will cover the entire process of experimental research from idea and hypothesis generation to study design, analysis, and publication. The topical content will be customized to the specific interests of the enrolled students, but generally will be concerned with questions about behavioral phenomena in organizational contexts.

OB 680. Introduction to the Behavioral Theory of the Firm and its Contemporary Applications. 3 Units.
The course will focus on the Behavioral Theory of the Firm and the contemporary research areas it influences, especially research on organization design. The course will introduce students to an active research area whose scholars have largely been inspired by the late Jim March. We will study the basic elements of behavioral approaches to organizations and consider how new contributions can be made in this area. The course will also give students opportunities to familiarize themselves with agent-based modelling, which has been one of the preferred methods of behavioral theorists. Students will be able to discuss papers based on such models, but also develop simple models to formalize theoretical arguments.

OB 681. Creativity Research. 3 Units.
This course covers theories and methods used in research on individual and group creativity. Several different approaches to studying creativity will be discussed, ranging from small-scale experiments to large-scale datasets. The goal is for students to come away with an understanding of the scholarly literature on creativity, as well as actionable tools for conducting their own research on creativity and related concepts.

OB 684. Full-Cycle Research Design. 3 Units.
In this class, you will learn how to effectively combine qualitative research methods, including ethnographic observation and interviews, with experimental methods, including lab, natural and field experiments, to investigate questions of interest in the study of work, organizations and markets.

OB 691. PhD Directed Reading. 1-15 Unit.
This course is offered for students requiring specialized training in an area not covered by existing courses. To register, a student must obtain permission from the faculty member who is willing to supervise the reading.
Same as: ACCT 691, FINANCE 691, GSBGEN 691, HRMGT 691, MGTECON 691, MKTG 691, OIT 691, POLECON 691, STRAMGT 691

OB 692. PhD Dissertation Research. 1-15 Unit.
This course is elected as soon as a student is ready to begin research for the dissertation, usually shortly after admission to candidacy. To register, a student must obtain permission from the faculty member who is willing to supervise the research.
Same as: ACCT 692, FINANCE 692, GSBGEN 692, HRMGT 692, MGTECON 692, MKTG 692, OIT 692, POLECON 692, STRAMGT 692

OB 698. Doctoral Practicum in Teaching. 1 Unit.
Doctoral Practicum in Teaching.

OB 699. Doctoral Practicum in Research. 1 Unit.
Doctoral Practicum in Research.

OB 802. TGR Dissertation. 0 Units.
.
Same as: ACCT 802, FINANCE 802, GSBGEN 802, HRMGT 802, MGTECON 802, MKTG 802, OIT 802, POLECON 802, STRAMGT 802

Political Economics Courses

POLECON 230. Strategy Beyond Markets. 2 Units.
Politicians, regulators, and voters place limits on - and present opportunities for - nearly every business. Firms like Uber, Airbnb, and Google do not only remain cognizant of existing laws, they also look for opportunities to change the law in ways that help their business. In this class, we will learn how businesses can influence political decision-making and develop frameworks for political strategy. We will examine firms' interactions with competitive firms, market incumbents, customers, and institutions, including interest groups, legislatures, regulatory agencies, courts, international organizations, and the public. Case studies include intellectual property, health care reform, carried interest in private equity, ride-sharing, and peer-to-peer lending. Students will complete the course with a better appreciation of how politics works, of the opportunities and perils associated with alternative political goals, and of tactics likely to achieve those goals. Special emphasis is given to beyond market strategy for start-ups and how to integrate market and beyond-market strategies.

POLECON 231. Strategy Beyond Markets: Challenges and Opportunities in Developing Economies. 3 Units.
This course shares significant material with POLECON 230 and the goal of developing integrated strategies for optimal firm performance that combine elements within and beyond markets. POLECON 231 diverges from the base course to delve deeper into issues that are particularly salient for entrepreneurs in emerging and frontier markets. Using a combination of cases from developed and developing countries, we will expand the list of topics considered to include managing political risk and protecting the firm in the face of uncertain and discretionary regulatory environments. The objective is to provide a solid grounding in the techniques explored in 230, while refining skill sets and whetting appetites for investment in higher risk environments.

POLECON 239. MSx: Strategy Beyond Markets. 3 Units.
This course addresses managerial issues in the social, political and legal environments of business. Cases and readings emphasize strategies to improve the performance of companies in light of their multiple constituencies, both within the US and internationally. Most core courses focus on firms' interactions with customers, suppliers, and alliance partners in the form of mutually beneficial voluntary exchange transacted in markets. In contrast, this course considers the strategic interactions of firms with comparably important constituents, organizations, and institutions beyond markets. Issues considered include those involving activist and interest groups, the media, legislatures, regulatory and antitrust agencies, and other forms of political risk. In many of the class sessions, we will draw on theoretical and empirical research in political economy, a field that is particularly relevant for understanding relationships between firms and governments, because (unlike most of economics) political economy focuses on interactions that are neither voluntary nor transacted via money.

POLECON 342. Finding Spiritual Meaning at Work: Business Exemplars. 3 Units.
This course explores the experience of respected business leaders who have been able to integrate their spiritual and business lives successfully. It also provides an explicit opportunity for students to discuss their own intentions to find deep meaning in and through their business careers. Difficulties, struggles and barriers will be examined as well. Readings will include both biographies of specific business people and background materials on the major religious and philosophical traditions represented. A number of the exemplars whose biographical information will be examined, like Jeff Weiner of LinkedIn, will be invited to class -- initially to listen to the class discussion, and then to provide feedback to students, expand on their own biographies and the background resources read in preparation for each class, and respond to questions and answers. This course will help students elucidate how their business careers fit into what ultimately matters most to them and how to build moral courage and long-term commitment to their ideals.

POLECON 349. The Business World: Moral and Spiritual Inquiry through Literature. 3 Units.
This course uses novels and plays as a basis for examining the moral and spiritual aspects of business leadership and of the environment in which business is done. On the one hand literature is used as the basis for examining the character of business people, while on the other hand literature provides illumination of the cultural contexts of values and beliefs within which commercial activities take place in a global economy. The course is organized around the interplay of religious traditions and national identities. Classes are taught in a Socratic, discussion-based style, creating as much of a seminar atmosphere as possible. A two-text method is used, encouraging students to examine their own personal stories with as much care as the stories presented in the literature. This course will be graded on the basis of class participation, weekly reflection papers (1 page), and a final paper. There will be no exam.

POLECON 351. Global Business, Religion, and National Culture. 3 Units.
What does one need to know about Islam to do business effectively in an Arab country? How can understanding the Protestant ethic help Mexican managers deal with U.S. partners? How does Confucianism influence Chinese business ethics? What are the business advantages of knowing how different countries rate on the spectrum of individualist versus communitarian values? These are the kinds of issues discussed in this course, which seeks to help students who will be engaged in international business during their careers. It aims to examine the deeper levels of attitudes and beliefs, often unconscious, which lie beneath the way business is done in various countries. Information will be provided on major religious and philosophical traditions like Confucianism, Shinto, Buddhism, Hinduism, Islam, Judaism, and Christianity. Some cross-cultural frameworks will also be considered. Case studies and background readings are set in nations like China, Japan, India, the United Arab Emirates, Israel, Mexico and the United States. The class will be discussion-based, drawing on students¿ own life experiences as well as the cases and readings. The hope is to provide a competitive advantage, both theoretically and practically, to students through understanding certain unspoken rules of the game in global business.

POLECON 515. Energy: Innovation, Policy & Business Strategy. 2 Units.
The future of the energy industry is deeply intertwined with politics and the formation of policy. In this class we'll take a deeper dive into the market and beyond-market (policy) strategies in the energy industry. Our focus will be on new clean energy technologies as they attempt to break into the industry. Each session will address a business problem and analyze the interaction of market structure and the beyond-market environment. The business problem will either come from a written case or a guest speaker. Topics covered: 1) Mapping the regulated energy landscape: the politics and innovation of the renewable energy industry. 2) Working with State Regulators and Using the beyond-market to dislodge entrenched incumbents. 3) Beyond State Politics: The US & Australian Federal Government. 4) The Utilities from inside and outside. 5) Investing in a highly regulated industry. This course is led by Steve Callander, GSB professor of public and private management & political economy and Josh Richman, VP of global business development and policy at Bloom Energy.

POLECON 531. The Future of Cities: Entrepreneurship, Policy & Business Strategy. 2 Units.
Cities are where billions of people live and they are the engine for innovation and economic growth. They are also going through enormous change and battling with fundamental problems, like housing, transportation, urban planning, the environment, safety, transparency and more. Innovation offers the promise of exciting solutions. But for that change to happen, it must serve the interests of the people who live in a city and overcome the challenges of politics and policymaking. The class will focus on this intersection. We will analyze cities as a distinct phenomenon, look at what is possible technologically, and explore how change can be made to happen. The class will consist of a combination of case studies, guest speakers, and class discussion. It will be led by Steve Callander, GSB Professor of Political Economy, and Sarah Hunter, the director of Global Public Policy at X, the google Moonshot Factory.

POLECON 538. Disruptive Innovation. 2 Units.
Disruptive innovation is challenging to bring to market because of the power of entrenched incumbents and their political advocates. This course will discuss market and non-market strategies for effectively deploying and scaling up disruptive technologies. We will focus on developed products and initial business/company building. Pedagogical techniques include case studies, historical analysis, strategic frameworks, and interactive group presentations. The course will feature guest speakers as well as the co-instructor's experience as the first business leader (and now CFO) of Dropbox as it grew from an early stage company to a multi-billion dollar enterprise.

POLECON 584. Managing Global Political Risk. 1 Unit.
In a globalized world, managers and investors are increasingly realizing that politics matter as much as economic fundamentals. Micro-level decisions made by local politicians in Brazil or India, national-level strategies of countries like China and Russia, and multi-national regimes, policies, and norms are all affecting global businesses in significant and often surprising ways. This course examines the full array of political risks confronting businesses today, from creeping expropriations to sudden shocks like national debt defaults and coups to emerging threats like cyber exploitation. Students will learn about impediments to assessing political risk and how to tackle them; develop strategies for managing political risk in a systematic way; and craft tools for mitigating the downside effects of political risk to business. Each session will include customized case studies and mini-simulations for students to walk in the shoes of senior managers confronting these challenges.

POLECON 660. Behavioral Political Economy. 3 Units.
This course studies the cognitive scientific foundations of political economy. It builds on the explosion of research in cognitive psychology, evolutionary anthropology, and allied fields over the last few decades to provide perspectives on political beliefs and behavior that are not tweaks on theories of complete rationality; they are distinct ideas with their own premises of how humans think, plan, and decide. These premises do not posit that we are irrational. Such claims are wildly off the mark; they cannot explain how we have become the dominant species on this planet. Instead, they describe a clever but computationally constrained primate whose evolution, cultural as well as biological, has produced a characteristic configuration of mental software and external symbol systems (writing, numbers). The representational and computational capacities of this software and these symbol systems, combined with our unusual ability to cooperate with unrelated strangers, has in a remarkably short time produced massive knowledge-intensive political institutions that can deploy nuclear-powered aircraft carriers and can use epidemiology and molecular genetics to combat epidemics. Such achievements warrant explanations. In short, we are boundedly rational, but that's only half the story; we're also really really clever problem-solvers. This course explores theories that explain both halves in a unified way.

POLECON 680. Foundations of Political Economy. 4 Units.
This course provides an introduction to political economy with an emphasis on formal models of collective choice, public institutions, and political competition. Topics considered include voting theory, social choice, institutional equilibria, agenda setting, interest group politics, bureaucratic behavior, and electoral competition. Also listed as Political Science 351A.

POLECON 681. Economic Analysis of Politics. 4 Units.
This course extends the foundations developed in P680 by applying techniques of microeconomic analysis and game theory to the study of political behavior and institutions. The techniques include information economics, games of incomplete information, sequential bargaining theory, repeated games, and rational expectations. The applications considered include agenda formation in legislatures, government formation in parliamentary systems, the implications of legislative structure, elections and information aggregation, lobbying, electoral competition and interest groups, the control of bureaucracies, interest group competition, and collective choice rules.

POLECON 682. Workshop on Institutional Theories and Empirical Tests in Political Economy. 3 Units.
This course critically surveys empirical applications of formal models of collective-choice institutions. It is explicitly grounded in philosophy of science (e.g., Popperian positivism and Kuhn's notions of paradigms and normal science). Initial sessions address the meanings and roles of the concept of institutions in social-science research. Historically important works of political science and/or economics are then considered within a framework called Components of Institutional Analysis (or CIA), which provides a fully general way of evaluating research that is jointly empirical and formal theoretical. The course concludes with contemporary instances of such bridge-building. The over-arching objectives are to elevate the explicitness and salience of desirable properties of research and to illustrate the inescapable tradeoffs among the stipulated criteria.n nAlthough this is a core course in the GSB Political Economy PhD curriculum, its substantive foci may differ across years depending on the instructor. For Professor Krehbiel¿s sessions, the emphasis is on legislative behavior, organization, and lawmaking, and on inter-institutional strategic interaction (e,g, between executive, legislative, and judicial branches in various combinations).n nStudents should have taken POLECON 680. POLECON 682 is also listed as POLISCI 351C.

POLECON 683. Political Development Economics. 3 Units.
This course surveys emerging research in political economics as it applies to developing societies, emphasizing both theoretical and empirical approaches. Topics will include: corruption and "forensic" political economics, institutional reform and democratization, ethnicity, conflict and public goods provision, and the role of trade and financial innovations in political development. The aim of the course is to bring students to the frontier of the field and develop their own research. Graduate level proficiency in microeconomics and empirical methods will be required.

POLECON 691. PhD Directed Reading. 1-15 Unit.
This course is offered for students requiring specialized training in an area not covered by existing courses. To register, a student must obtain permission from the faculty member who is willing to supervise the reading.
Same as: ACCT 691, FINANCE 691, GSBGEN 691, HRMGT 691, MGTECON 691, MKTG 691, OB 691, OIT 691, STRAMGT 691

POLECON 692. PhD Dissertation Research. 1-15 Unit.
This course is elected as soon as a student is ready to begin research for the dissertation, usually shortly after admission to candidacy. To register, a student must obtain permission from the faculty member who is willing to supervise the research.
Same as: ACCT 692, FINANCE 692, GSBGEN 692, HRMGT 692, MGTECON 692, MKTG 692, OB 692, OIT 692, STRAMGT 692

POLECON 698. Doctoral Practicum in Teaching. 1 Unit.
Doctoral Practicum in Teaching.

POLECON 699. Doctoral Practicum in Research. 1 Unit.
Doctoral Practicum in Research.

POLECON 802. TGR Dissertation. 0 Units.

.

Same as: ACCT 802, FINANCE 802, GSBGEN 802, HRMGT 802, MGTECON 802, MKTG 802, OB 802, OIT 802, STRAMGT 802

Strategic Management Courses

STRAMGT 110Q. Making Sense of Strategy. 3 Units.
Get the strategy right, and the chance for success is great. Nowhere is this more evident than in today's world of major challenges. Strategy is at the heart of problem solving and achieving objectives, yet few people can define strategy, much less understand how to conceptualize, design, and execute effective strategies that yield the best outcomes.This course focuses on interesting and engaging case studies, each of which illustrates a key ingredient of strategy. Some are well-known historical events, while others are less obvious, but all have a strategic lesson to share. They are quite diverse, from the planning of a high-risk rescue in the Colorado Rockies, to a product crisis in a Fortune 50 company, to a little-known failed military mission of WWII, to a commercial airline disaster. The ability to think through challenging and varied scenarios is both instructive and mind-stretching. There will be some pre-reading on each case study and there may be a field trip for students to put their lessons into practice. The course is designed to be highly interactive; all to enable students to unravel the mystery and power of strategic thinking. Students will also have the opportunity to select and analyze a case reflecting interests of their own. This course can help students not only prepare for a career in a range of fields, but also as they meet the challenges of their current coursework. Problem-solving skills are central in every walk of life; this seminar can help students build a stronger foundation for sound decision-making.

STRAMGT 202. Strategic Leadership: Crafting and Leading Strategy. 2 Units.
This course is about the process of crafting, assessing and implementing strategies to win in the market. It is designed to help you understand, shape, and lead your organization's strategy by providing you with a framework for thinking about the issues that shape your organization's economic prosperity. In addition to an analytical framework, the course will provide you with insight into the process of formulating and assessing strategy for roles with cross-functional responsibility at all levels. The emphasis will be on how to articulate what the organization's strategy is, how to create alignment between the strategy, organizational design, and market environment, and the process of growing, managing and transforming organizations. The course is particularly well suited for students who have limited exposure to strategic analysis and/or who anticipate pursuing roles with primary responsibility for the success of products and services in both new and established organizations.

STRAMGT 205. Strategic Leadership: Creating and Sustaining Growth. 2 Units.
Many organizations are fundamentally committed to growth. This course examines how leaders and their organizations can create and sustain growth. Initially, entrepreneurial companies grow by discovering product-market fit, and then capitalize on that discovery by aligning their strategy and organization to their environment. As they mature, established companies grow by innovating anew, exploring possibilities and changing their organizations into new alignments with new opportunities. This course covers how leaders shape the process of discovery, change, and growth, and how strategy and organization combine to scale success. The course is geared toward students who seek to become entrepreneurs, students who want to join a growing firm in a strategic role, and for students who want to innovate to create new growth opportunities in an established firm.

STRAMGT 207. Strategic Leadership. 3 Units.
This course examines fundamental issues of general management and leadership within an organization. You will learn about setting an organization's strategic direction, aligning structure to implement strategy, and leading individuals within the firm. You will master concepts, frameworks, and tools to assess an industry and a firm's competitive environment, and to craft alternatives. You will study the interplay among formal structure, informal networks, and culture in shaping organizational performance. By integrating leadership theory, the lessons of practical application, and your own experience, you will develop skills and capabilities essential to leading others. And you'll gain a better understanding of your own leadership preferences, strengths, and weaknesses.

STRAMGT 210. Managerial Skills. 1 Unit.
In the Managerial Skills Labs we examine several common managerial challenges faced by executives. Together with Faculty, students explore these topics using five case examples, each asking students to evaluate a series of situations, develop alternatives for their resolution, and ultimately recommend and implement a course of action from the point of view of the company's owner/manager. We have selected small to midsized businesses as the context for these discussions in order to highlight the impact that key decisions and their implementation can have on the broader organization. Class preparation should include not only analysis and conclusions, but also specific recommendations on implementation. Students should come to class prepared to role play important conversations between management and other key individuals.

STRAMGT 258. MSx: Strategic Management. 3 Units.
This course deals with the overall general management of the business enterprise. Extensive case studies of a variety of companies of differing size, industry, and current conditions provide the basis for the comprehensive analysis and establishment of a strategic management approach for the organization. Frameworks are presented for strategy identification and evaluation; assessing industry attractiveness; evaluating the firm's capabilities, resources, and position; determining the optimal horizontal and vertical scope of the firm; entering into strategic alliances and joint ventures; and formulating and implementing strategy in multi-business organizations.

STRAMGT 259. MSx: Generative Leadership. 2 Units.
There are three major sections to this course - Design Thinking, The Improvisational Mindset, and High Performance Communication. || Design Thinking || Outcome: Participants learn to employ User Centered Design as promoted by the Stanford d.school. They become adept at Empathizing with the end user, practicing focused Need Finding, Defining the Problem, Ideating, Rapidly Prototyping and Adapting to Feedback. || Experiences: Participants learn the Design Thinking process through a hands-on, collaborative design challenge, like redesigning the Briefcase for a specific user. || The Improvisational Mindset || Outcome: The participants increase their ability to respond flexibly to novel situations and to generate innovative solutions on a collaborative, creative team. The mindset is cultivated by practicing 5 key principles. Say "Yes, and". Treat Mistakes as Gifts. Inspire your Partner. Dare to be Obvious. Notice the World. || Experiences: The key principles are taught through a series of immersive theater exercises derived from Johnstone, Spolin, and Ryan. Valuable readings include IMPROV WISDOM, by Patricia Madson and journal articles on improv and brainstorming. || High Performance Communication || Outcome: The final segment of the class is a chance to apply the principles of User Centered Design and the Improvisational Mindset to design and deliver messages that go beyond just transmitting information - they get results. Participants successfully use a version of the Design Thinking process to rapidly develop content that is tuned to the audience's needs, and that they can deliver in a way that is agile and responsive to real time feedback. || Experiences: Generative Leadership culminates in a group presentation designed to influence key stakeholders. To be successful, participants will have to draw on all sections of the course. AS WE SPEAK is our text.

STRAMGT 305. Game Theory and Competitive Strategy. 3 Units.
This course is an advanced applications economics course. The course has two main components, game theory and competitive strategy. Game theory is the field of study of interactive strategic decision making. In recent years it has become a prominent approach in both research and in practice. We will apply game theoretical models to a variety of industry, market and other relational settings. Beyond the use of game theory in competitive strategy in general, we will spend a significant part of the course studying competitive advantages in depth. In particular, we will cover the various types of competitive advantages and barriers to entry, attributes of an advantage, the creation and dynamics of advantages and more.

STRAMGT 306. Food, Health & Nutrition Entrepreneurship. 3 Units.
Americans spend nearly 7% of their income on food items and another 5% on food services annually (US Census). Food spend is at the intersection of two of the most important industries in the US: health care and agriculture. Food production today supports the food consumption causing our extraordinary burden of disease; 75 cents of every dollar of the $4.8 billion spent annually on health care is for diet-related disease. The health care system accounts for over 17% of U.S. gross domestic product (GDP). Agriculture and agriculture-related industries contributed 4.8% to the U.S. gross domestic product (GDP) in 2012. This course focuses on the shifting landscapes across these industries and subsequent market opportunities in food, health, and nutrition. The course is designed for students with a broad interest in the food or health systems and/or who are interested in careers in related fields. We will examine the food system from three points of view: the consumer, nutritional science, and policy. The class will focus on solving for consumer needs from the perspective of a health-promoting entrepreneur. The class will involve lecture, discussion, and prominent guest speakers who are entrepreneurs themselves or industry leaders.

STRAMGT 307. Innovation in Healthcare Venture Capital Investing. 3 Units.
The purpose of this course is to provide students with insights into the newest innovations in healthcare service delivery, information technology, biotech and medical devices and how venture and private equity investors evaluate and determine where to invest their money among these areas to maximize return, minimize risk, and capitalize on a highly fluid marketplace that represents nearly 20% of the U.S. GDP. Through presentations by leading entrepreneurs in the field, students will be challenged to reach conclusions regarding which healthcare sectors are the most promising for venture investing and which individual companies presented reflect the best opportunities, particularly in light of the seismic shifts currently underway within the healthcare industry driven by both public and private considerations. This is not primarily a finance class, but more substantively about the nuances of emerging healthcare businesses and venture finance as applied to this very unique sector.

STRAMGT 308. Entrepreneurship from Diverse Perspectives. 3 Units.
This seminar showcases the diversity of entrepreneurs and the range of entrepreneurial paths they pursue. Thirty-five entrepreneurs and venture capitalists, primarily woman and under-represented minorities, will share their personal and professional journeys, and how each embodies the entrepreneurial mindset. Case studies, readings and videos, will complement in-class discussions with the speakers in exploring the entire entrepreneurial process from finding an idea and forming and building a team, to being an inclusive leader, raising money, assembling a board, and overcoming setbacks and challenges. The class teaches the entrepreneurial mindset, and how everyone can be entrepreneurial in their lives. Teams will work on creating an idea for a company during the quarter.

STRAMGT 309. Strategies of Effective Product Management. 3 Units.
This is a course about exploring the methods and processes for product management, largely in technology companies, and a look at what can lead to the most effective ways to coordinate customer needs, ensure accurate product development, and how to develop and use the appropriate tools needed to successfully sell products and services to customers from the perspective of the Product Manager. The course covers ways to think about product management depending on the type of product being delivered (new product introduction vs. reinvigorating an existing product) and also the skills and tools used by product managers for effective product management.This course is an extended version of STRAMGT 509.

STRAMGT 315. From Launch to Liquidity. 3 Units.
This course considers the challenges faced by start-ups in achieving liquidity. We take the perspectives of organizational behavior, marketing, and finance, and examine forks in the road faced by firms that have already launched products. Marketing topics include how to market firms for sale and calculating the addressable market. Organizational topics include hiring and firing, and the role of founders after sales. Finance topics include how the choice between sale and IPO affects value realized, and private equity exits.

STRAMGT 316. Fundamentals of Effective Selling. 3 Units.
The primary objective of this course is to introduce students to the fundamentals of how to sell and to what selling is truly about. The course is appropriate for anyone who wants to understand and show proficiency with the skills required by different selling situations (e.g., direct sales of products and services, selling oneself in an interview, raising money for a new venture, running a company as CEO, etc.). The course looks at the entire selling process of lead generation, prospecting, qualification, discovery, understanding value, customizing presentations, objection handling, negotiation and closing. This is not a typical GSB case-study-based course. Students who have taken the class describe it as a hands-on, practical, skills-based class. Students will work by themselves and together in groups to complete individual and team-based exercises designed to introduce them to and give them practice with selling fundamentals in each stage of the selling process. Students will be practicing and utilizing newly learned skills in real life each week; the focus will be on doing stuff (e.g., using curiosity in a situation outside the classroom) rather than thinking about and talking about stuff. Students will then come together in class with the instructors to share and process the learning from these exercises.nn.

STRAMGT 319. Equity By Design: Building Diverse and Inclusive Organizations. 3 Units.
This course equips you to create and build equitable organizations. We will discuss the power of inclusion as it relates to the employee and customer experience. We will study effective strategies for building diverse and inclusive companies, and will address the barriers that can often exist. We'll look at approaches to organizational design that limit unconscious bias and produce more objective decisions across the employee experience - from engaging and hiring candidates to retaining employees and helping them thrive. Finally, we'll dive into how to create inclusive cultures and a sense of belonging. Experts in diversity and inclusion, and executives at companies that have successfully incorporated inclusion programs, will join us for the class discussions.

STRAMGT 321. Create a New Venture: From Idea to Launch I. 3 Units. S321/S322 is an integrated lab course in Entrepreneurship designed to teach students the process of creating a new viable venture - from Idea to Launch. It is a dynamic and interactive course organized around projects undertaken by teams of 3 to 4 registered students from the MSx and MBA programs, together with other graduate students from within Stanford who bring expertise of particular relevance to the idea being pursued, e.g. engineering, CS or medicine. This course is designed not only for students with immediate entrepreneurial aspirations but also for any student considering starting an entrepreneurial venture at some point in his or her career. The course is a two-quarter class, with admission to the class by team and idea. In the winter quarter, teams will research, craft, test and morph their idea into a viable business concept. In the spring quarter, they will further test, refine their concept and develop a strategy and plan to attract financial, human and other resources. At the end of the spring quarter, teams will present their plan to a panel of experts and potential investors to simulate the funding process. The course builds on important research, successes, and findings as they relate to the process of new venture creation. The teaching method is through a structured process of relevant mini-lectures, exercises and active in-depth team learning by doing (LBD). Extensive field research and prototype product development are integral to the course. Learning is further enhanced through meetings with the instructor, coaching by their assigned experienced mentors, experts, and review by peers. Informal student meetings/mixers will be held in the autumn quarter to further facilitate the formation of teams and assist in idea generation. The application process for S321/322,-Create A New Venture: from Idea to Launch- is described on the course website.

STRAMGT 322. Create a New Venture: From Idea to Launch II. 3 Units. S321/S322 is an integrated lab course in Entrepreneurship designed to teach students the process of creating a new viable venture - from Idea to Launch. It is a dynamic and interactive course organized around projects undertaken by teams of 3 to 4 registered students from the MSx and MBA programs, together with other graduate students from within Stanford who bring expertise of particular relevance to the idea being pursued, e.g. engineering, CS or medicine. This course is designed not only for students with immediate entrepreneurial aspirations but also for any student considering starting an entrepreneurial venture at some point in his or her career. The course is a two-quarter class, with admission to the class by team and idea. In the winter quarter, teams will research, craft, test and morph their idea into a viable business concept. In the spring quarter, they will further test, refine their concept and develop a strategy and plan to attract financial, human and other resources. At the end of the spring quarter, teams will present their plan to a panel of experts and potential investors to simulate the funding process. The course builds on important research, successes, and findings as they relate to the process of new venture creation. The teaching method is through a structured process of relevant mini-lectures, exercises and active in-depth team learning by doing (LBD). Extensive field research and prototype product development are integral to the course. Learning is further enhanced through meetings with the instructor, coaching by their assigned experienced mentors, experts, and review by peers. Informal student meetings/mixers will be held in the autumn quarter to further facilitate the formation of teams and assist in idea generation. The application process for S321/322,¿Create A New Venture: from Idea to Launch¿ is described on the course website.

STRAMGT 323. Organizational Psychology of Design Thinking. 3 Units. We'd like to introduce you to Samantha Palmer, a recent Stanford graduate who took several classes at the d.school. Each class further confirmed the importance of the design thinking process, methodology, and community. By the end of her Stanford career she truly believed that design thinking had the potential to change her life.n nAs graduation approached, Samantha found a position at a large tech company in Silicon Valley and was excited to bring the design thinking methodologies with her. A few weeks into her new job, she asked her team if they wanted to talk to some users before launching into their next big project. She was met with a room of blank stares and apprehensive questions. n nHow might we give Samantha the skills she needs to change the mindset of her colleagues, spark design thinking at her company, and get her first design-driven project off the ground? n nWhen you take a class at the d.school, you walk away confident in your creative skills and fluent in the design process. However, when recent graduates (re)enter the workforce, they quickly become discouraged by the stagnancy of company cultures. They see the need to trigger and sustain change, but don¿t have the understanding of organizational psychology to do so. Organizational Psychology of Design Thinking asks you to take on Samantha¿s challenges. n nOver the course of the semester, students will engage in 2 large-scale projects:n- Project 1 (Empathy - Synthesis) - Working with partner companies, students will apply organizational psychology and design frameworks to better understand company culture.n- Project 2 (Ideation - Testing) - Using their work from Project 1, students will prototype and test organizational changes in real company settings.nn**Please note** Our class will take an experimental approach Organizational Psychology of Design Thinking. The majority of classes will be conducted in the field allowing students to take a hands-on approach to design thinking. Please be aware and build travel time into your class schedule.

STRAMGT 325. Formation of Impact Ventures. 3 Units. This class is for students who want to start, invest in, or take a senior position in a social impact venture. For the purposes of this class, a social impact venture is an organization (both for profits and non-profits) whose primary mission is to provide a sustainable solution to a social problem. The class covers venture creation and development, resource acquisition, and managing growth in the context of impact ventures. The class deals with situations from the perspectives of both the entrepreneur and investor. Students will have a chance to assess opportunity and action in the context of current impact ventures. The course is integrative and will allow students to apply many facets of their business school education. We will have a mix of case discussions, lectures, student-led in-class exercises, and guest speakers. The final project involves engagement with an emerging impact venture and its management. The instructors, Laura Hattendorf and Russell Siegelman, are active, early stage impact investors.

STRAMGT 328. Social Ventures Practicum. 3 Units.
The Social Ventures Practicum is an experiential learning course for student teams actively working to launch a social venture (nonprofit or for-profit or tbd). SVP is often a useful follow-on for social venture start-up teams after product/service ideation courses such as STRAMGT 356: Startup Garage, the Design for Extreme Affordability sequence, or other startup/design thinking. In all cases, this course will focus on the additional elements of business planning needed to launch your venture successfully. Students who are beginning with a less-developed product/service idea for a social venture but are interested in taking this course are encouraged to reach out to the instructors, who will try to match them with existing teams. Other students who wish to take SVP to learn about social ventures but do not have a product/service idea similarly should reach out to instructors to see if they can be matched.In weekly sessions throughout the quarter, teams will work through topics unique to social ventures (e.g. mission, theory of change, impact measurement) as well as topics common to any venture, (e.g. product/service market fit, business/economic model, financial planning, early-stage financing, logistics, sales/distribution, and board/talent development). Each team will receive significant one-on-one coaching from the instructors, as well as opportunities to share their work with peers and learn from/present to guest speakers.

STRAMGT 330. Entrepreneurship and Venture Capital: Partnership for Growth. 3 Units.
This 3 unit course is designed for students interested in early-stage investing, venture capital, and/or entrepreneurship. The course content and projects are designed to be complementary to the dozens of great GSB courses about entrepreneurship such as Start-up Garage, Entrepreneurial Finance, Formation of New Ventures and Lean Launchpad. Our course, S330 -- Entrepreneurship & Venture Capital; Partnership for Growth, is one of a handful of GSB courses that delivers the investor's and entrepreneurs' viewpoint in a very candid format. The course takes the student on a journey divided into 3 different segments (investor strategies, current issues that affect your start-up, and best practices as you build your company). We have carefully selected 5 relevant topics for each segment. In the first segment of the course, we invite 5 different investors to illustrate the range of investor strategies as well as their differences in how they select their next big investment opportunity. These investors represent Funds who are leaders in each of their specialties, such as Floodgate, Founder's Fund and the venture debt firm, WTI. The second segment of the course highlights 5 current issues that affect entrepreneurs as they launch their idea in this rapidly changing investor environment. These topics range from how to build an effective board to why there are not more women in VC to the consequences of 'too much money' in the VC ecosystem. The third segment of the course covers 5 tactical steps that are important to entrepreneurs as they build their company. We begin with how co-founders split their founder equity and then hear Mike Maples reflect on best practices for idea formation and scaling. We conclude with trade-offs in negotiating that first term sheet. Please see the syllabus for more specifics about course content and the business idea project. nThe majority of the classes are case-based, where the guest speakers (who are often the case protagonists) discuss how the issues in each case are relevant to today's start-up. We encourage challenging and meaningful class discussion to take the guests 'off-script' and focus on sharing the 'street smarts' of the entrepreneur and investor community. The course attracts students from many different backgrounds - those who are experienced entrepreneurs to those students who are experimenting with the idea of entrepreneurship for the first time. We also see students with significant investment experience share their start-up experience as they add to the class dynamic.

STRAMGT 335. Entrepreneurial Approaches to Education Reform. 3 Units.
In this course, students will investigate opportunities and challenges of entrepreneurial ventures trying to make a positive impact in public education. The course requires a basic level of understanding of the U.S. K-12 public school system. The first session will analyze the structure of the public education as an industry, with a special emphasis on understanding the achievement gap. Subsequent sessions will explore challenges in increasing efficacy, ensuring financial sustainability, and scaling for entrepreneurs who have sought to change student outcomes, solve pain points, and innovate. The course will feature a variety of ventures (including schools, education technology, training, and supplemental services) and organizational models (for-profit, not-for-profit, and benefit corporation). This course is suitable for students aspiring to be entrepreneurs, leaders in entrepreneurial organizations, leaders in educational organizations, Board members, donors or investors. (Note: this is not a "how-to" course on starting an entrepreneurial venture.).

STRAMGT 340. POWer: Building the Entrepreneurial Mindset from the Perspective of Women. 3 Units.
This seminar will showcase women entrepreneurs and venture capitalists. We will explore the challenges and opportunities they encountered in starting and growing their ventures, and the personal and professional choices they have made. The sessions will include cases, readings, videos, panel discussions, role plays and breakout groups with the entrepreneurs and venture capitalists. The class will help you understand and build your entrepreneurial and growth mindset. You will leave the class with an individual roadmap and tools to help you be entrepreneurial throughout your career. Men are encouraged to enroll.

STRAMGT 345. Taking Social Innovation to Scale. 3 Units.
How do you get the best new social innovations to reach the hundreds of millions of people who need it the most? And how do ensure that they are developed, deployed and scaled in a way that is relevant, appropriate and sustainable?Innovators tackling the world's most difficult problems often ignore, misunderstand, and under-invest in the critical business challenges involved in crossing 'the middle of the value chain.' This is innovation's valley of death: product and system adaption and evaluation; evidence generation and design validation; business and partnership planning; formal or informal regulatory approval and registration. How do you design, introduce, and optimize the intervention's uptake before it can be taken to scale by markets, governments or other systems? The class is taught be Steve Davis, President & CEO of PATH (www.path.org), a leader in global health innovation, and former global Director of Social Innovation at McKinsey & Company.We take an inter-disciplinary approach to look at the factors that pull innovation forward, push it from behind, and (often to the world's detriment) block its successful implementation and scaling. First grounding the discussion in research on innovation and social change, we then apply business principles, real world experiences and several important case studies in global health to examine the way good ideas get stuck, and how good ideas can turn into innovation that matters. We focus on root causes for failure, success factors, and business practices and tools to enable millions of lives to be impacted by social innovation. The seminar combines lectures, case studies, visiting practitioners and team projects focused on the business case for scaling specific social innovations. The goal is to help the next generation of social innovation leaders think more about some of the mistakes of the past, lessons for the future, and new ways of approaching old problems, all from a practitioner's point of view.

STRAMGT 350. Global Value Chain Strategies. 3 Units.
This course addresses how the increasingly large number of firms that use or provide outsourcing and "offshoring" can create a sustainable competitive advantage. Students who complete the course will have a framework and a set of concepts that can be used to position a firm for strategic advantage in these supply networks. Positioning in and strategic analysis of product markets is covered in a variety of courses and books. A distinguishing feature of this course is that it addresses positioning and strategic analysis for firms operating as part of a network of providers, sellers and buyers... the factor markets. The course takes a general management perspective and provides examples through cases and discussions with visitors. The major theme of the course is that these firms must carefully consider how they position themselves in both the product and factor markets.

STRAMGT 351. Building and Managing Professional Sales Organizations. 4 Units.
The focus of this class is on the challenges and key issues associated with the creation and management of a professional sales organization. Our emphasis is developing and managing the selling effort of business-to-business and business-to-consumer capital goods and services. There will be relatively little emphasis on sales technique (i.e., students should not expect a course on "How to be a Better Salesperson"). The course is organized to follow the development of the sales function from strategic inception through to execution and implementation: choosing a go-to-market model (e.g., direct sales, no/low touch, VARs, OEMs, hybrid models); building and structuring the sales organization (e.g., sales learning curve, organizational structure, allocating territories and quotas); and managing the sales force (e.g., hiring/firing, compensation, forecasting, culture). We will address these topics in the context of both early stage ventures and later stage enterprises.

STRAMGT 353. Entrepreneurship: Formation of New Ventures. 4 Units.
This course is offered for students who at some time may want to undertake an entrepreneurial career by pursuing opportunities leading to partial or full ownership and control of a business. The course deals with case situations from the point of view of the entrepreneur/manager rather than the passive investor. Many cases involve visitors, since the premise is that opportunity and action have large idiosyncratic components. Students must assess opportunity and action in light of the perceived capabilities of the individuals and the nature of the environments they face. The course is integrative and will allow students to apply many facets of their business school education. Each section will have a specific focus, please select the instructor(s) with your interests: Ellis, Saloner - Diverse types of ventures; Foster, Brady - Diverse types of ventures; Reiss, Chess - Very early stage ventures.

STRAMGT 354. Entrepreneurship and Venture Capital. 4 Units.
Many of America's most successful entrepreneurial companies have been substantially influenced by professionally managed venture capital. This relationship is examined from both the entrepreneur's and the venture capitalist's perspective. From the point of view of the entrepreneur, the course considers how significant business opportunities are identified, planned, and built into real companies; how resources are matched with opportunity; and how, within this framework, entrepreneurs seek capital and other assistance from venture capitalists or other sources. From the point of view of the venture capitalist, the course considers how potential entrepreneurial investments are evaluated, valued, structured, and enhanced; how different venture capital strategies are deployed; and how venture capitalists raise and manage their own funds. The course includes a term-long project where students work in teams (4-5 students per team) to write a business plan (or a business model canvas) for a venture of the team's choosing.

STRAMGT 355. Managing Growing Enterprises. 3 Units.
This course is offered for students who, in the near term, aspire to the management and full or partial ownership of a new or newly-acquired business. The seminar, which is limited to 45 students, has a strong implementation focus, and deals in some depth with certain selected, generic entrepreneurial issues, viewed from the perspective of the owner/manager. Broad utilization is made of case materials, background readings, visiting experts, and role playing. Throughout the course, emphasis is placed on the application of analytical tools to administrative practice.

STRAMGT 356. The Startup Garage: Design. 4 Units.
Startup Garage is an intensive hands-on, project-based course, in which students will apply the concepts of design thinking, engineering, finance, business and organizational skills to design and test new business concepts that address real world needs . Our aspiration is to help teams identify an unmet customer need, design new products or services that meet that need, and develop business models to support the creation and launch of startup products or services. Even those teams that do not successfully launch a venture, or individuals who decide not to move forward, will learn critical, cutting-edge techniques about starting and launching a venture. Collaborative, multi-disciplinary teams will identify and work with users, domain experts, and industry participants to identify and deeply understand customer needs, then proceed to design products or services and a business model to address those needs. Each team will conceive, design, build, and field-test critical aspects of both the product or service and the business model. This course is offered by the Graduate School of Business. It integrates methods from human-centered design, lean startup, and business model planning. The course focuses on developing entrepreneurial skills (using short lectures and in-class exercises) and then applying these skills to specific problems faced by those users identified by the teams. Teams will get out of the building and interact directly with users and advisers to develop a deep understanding of the challenges they face and to field test their proposed services, products, and business models.

STRAMGT 359. Aligning Start-ups with their Market. 4 Units.
Most everyone associated with technology start-ups would agree that the most important initial characteristic of a successful endeavor is a compelling vision. The journey from vision to escape velocity is highly dependent on management's ability to translate that vision into a product or service that closely and economically addresses a customer's significant point of pain. Without a tight product market fit, the start-up's offering will not be able to break through the market's gravitational forces which strongly favor existing solutions, resulting in likely failure. With tight product/market fit, it is far more likely the company will achieve repeatable and growing sales success. Conventional wisdom dictates that a start-up launching a new product should focus its energy understanding what the market wants (problem) and then translating that knowledge into an optimal set of product features (solution). This is the ideal strategy if one is attacking a market that already exists. However if the start-up pursues an entirely new market or re-segments an existing market, customers are unlikely to be able to articulate the benefits and features they will need. The approaches required to pursue new or re-segmented markets are radically different from those applied to existing markets. As a result it is not relentless execution and exploitation of a well understood market that will lead to success, but discovery of a new market or segment that is in need of the product as envisioned. If done well, this process of finding the optimal product/market fit has a disproportionate impact on success. Our course explores the many issues associated with optimizing product/market fit. A take-home midterm, a group paper, and an in-class exercise comprise 50% of a student's grade with class participation representing the remainder. STRAMGT 353 is recommended prior to taking this course.

STRAMGT 360. Strategic Educational Research and Organizational Reform Practicum A. 4 Units.
This is a two-quarter clinical course offered in the Winter and Spring Quarters that brings together upper-level graduate students in business, law, and education from Stanford to collaborate with their peers at other universities (Columbia University, Harvard University, University of Pennsylvania, University of Michigan) and provide strategic research and consulting to public education organizations. Participants engage in a rigorous and rewarding learning experience, including:nn(i) An intensive seminar in the design, leadership and management, and transformation of public school systems, charter management organizations, start-ups, and other K-12 public- and social-sector institutions;nn(ii) Comprehensive skills training in team-based problem solving, strategic policy research, managing multidimensional (operational, policy, legal) projects to specified outcomes in complex environments, client counseling, and effective communication; andnn(iii) A high-priority consulting project for a public education sector client (e.g., school district, state education agency, charter management organization, non-profit) designing and implementing solutions to a complex problem at the core of the organization's mission to improve the educational outcomes and life chances of children. The participant's team work will allow public agencies throughout the nation to receive relevant, timely, and high-quality research and advice on institutional reforms that otherwise may not receive the attention they deserve.

STRAMGT 361. Strategic Educational Research and Organizational Reform Practicum B. 4 Units.
This is a two-quarter clinical course offered in the Winter and Spring Quarters that brings together upper-level graduate students in business, law, and education from Stanford to collaborate with their peers at other universities (Columbia University, Harvard University, University of Pennsylvania, University of Michigan) and provide strategic research and consulting to public education organizations. Participants engage in a rigorous and rewarding learning experience, including:nn(i) An intensive seminar in the design, leadership and management, and transformation of public school systems, charter management organizations, start-ups, and other K-12 public- and social-sector institutions;nn(ii) Comprehensive skills training in team-based problem solving, strategic policy research, managing multidimensional (operational, policy, legal) projects to specified outcomes in complex environments, client counseling, and effective communication; andnn(iii) A high-priority consulting project for a public education sector client (e.g., school district, state education agency, charter management organization, non-profit) designing and implementing solutions to a complex problem at the core of the organization's mission to improve the educational outcomes and life chances of children. The participant's team work will allow public agencies throughout the nation to receive relevant, timely, and high-quality research and advice on institutional reforms that otherwise may not receive the attention they deserve.

STRAMGT 364. Health Information Technology and Strategy. 4 Units.
Health Information technology was intended to help reduce cost and improve the quality of health care services. To date, this is little evidence that this goal has been achieved. This course is designed to explore economic frameworks that can help us to understand how health IT can achieve it's intended goals. These frameworks build from general business and economic models used successfully in other industries. The course will utilize both business cases and lecture to prepare students to propose potential novel applications of health information technology solutions. Each student will have a team-based final project.

STRAMGT 366. The Startup Garage: Testing and Launch. 4 Units.
Teams that concluded at the end of the fall quarter that their preliminary product or service and business model suggest a path to viability, continue with the winter quarter course. In this course, the teams develop more elaborate versions of their product/service and business model , perform a series of experiments to test the key hypotheses about their product and business model, and prepare and present an investor pitch for a seed round of financing to a panel of seasoned investors and entrepreneurs. The key premise for the course is that a robust venture creation process involves development and validation of a series of hypotheses about a new product or service, its value proposition, and how the business will acquire customers, make money, scale up to achieve profitability, and raise funds to achieve the key milestones to profitability. In Startup Garage: Testing and Launch, teams will learn how to precisely formulate these hypotheses and early stage milestones, and how to test them using one or more of the following low-cost approaches: a) online experiments with minimally viable products; b) interviews with partners, advisors, investors, and business experts; c) analogies from existing businesses that were successful in proving hypotheses that are analogous to what the new startup wants to prove. The course focuses on further developing entrepreneurial skills using the same pedagogical approach used in S356: short lectures, extensive in-class exercises focused on each team's specific projects, and 'get out of the building' assignments. Teams will have the opportunity to:- Get out of the building and interact with users, advisors, investors and partners to develop a deep understanding of the challenges they face, to field test their proposed services, products, and business models, and to gather data.- Interpret the data and make important startup decisions in the context of their own project: pivot, persevere, or perish- Develop creative go-to-market strategies and test their effectiveness- Develop and deliver in front of real investors an investor pitch, elevator pitch and executive summary- Negotiate term sheets with venture investors- Develop a hiring plan for their first year of operation and consider equity and other compensation plan.

STRAMGT 368. Strategic Leadership of Nonprofit Organizations and Social Ventures. 3 Units.
This course seeks to provide a survey of the strategic, governance, and management issues facing a wide range of nonprofit organizations and their executive and board leaders, in the era of venture philanthropy and social entrepreneurship. The students will also be introduced to core managerial issues uniquely defined by this sector such as development/fundraising, investment management, performance management and nonprofit finance. The course also provides an overview of the sector, including its history and economics. Cases involve a range of nonprofits, from smaller, social entrepreneurial to larger, more traditional organizations, including education, social service, environment, health care, religion, NGO's and performing arts. In exploring these issues, this course reinforces the frameworks and concepts of strategic management introduced in the core first year courses. In addition to case discussions, the course employs role plays, study group exercises and many outsider speakers.

STRAMGT 371. Strategic Management of Technology and Innovation. 3 Units.
This course focuses on the strategic management of technology-based innovation in the firm. The purpose is to provide students with concepts, frameworks, and experiences that are useful for taking part in the management of innovation processes in both startups and large technology-focused organizations. The course examines how leaders can manage fast-changing technological innovations effectively. Specific topics include: assessing the innovative capabilities of the firm, managing the technical function in a company, navigating the interfaces between functional groups in the development function in the firm, understanding and managing technical entrepreneurs, building technology-based distinctive competencies and competitive advantages, technological leadership versus followership in competitive strategy, institutionalizing innovation, attracting and keeping entrepreneurs.

STRAMGT 381. Leading Strategic Change in the Health Care Industry. 3 Units.
In this seminar we will study the structure and dynamics of the U.S. health care industry, especially in the face of ongoing regulatory change, and ways it intersects with the global health care industry. The seminar's aim is to develop participants' ability to create strategically informed action plans that are imaginative, inspiring and workable in this highly dynamic environment. The seminar's pedagogy involves informed debate to evaluate and hone well-researched views by the participants and instructors, as well as the writing and presentation of position papers by small groups of seminar participants on the key dynamics of the industry.In the course of the seminar discussions, we aim to deepen our understanding of strategic dynamics and transformational change at the societal, industry and organizational levels of analysis. After developing a complete picture of the structure of the health care industry and the strategic relationships among the key players ("the strategic landscape"), the seminar will focus on how health care reform and other external forces will affect the strategic opportunities and challenges of four types of players in the strategic landscape: (1) incumbents; (2) entrepreneurial startups; (3) cross-boundary disruptors; and (4) international health care providers. World-class leaders in health care will be brought in to supplement our understanding of each one of these players. Student teams will be formed to focus on one of the four types of players. Each team will prepare a research paper focused on determining how their type of player can take advantage of the regulatory, technological, social, cultural and demographic changes, and who will be the likely winners and why.

STRAMGT 502. Systems Leadership for the Digital Industrial Transformation. 2 Units.
This course explores the details of how leaders at the world's biggest companies are driving frame-breaking transformational change inside of organizations that have grown up with an industrial foundation, or who are moving into the industrial sector as a new entrant. The course will delve into the need for systems thinking at multiple levels - of products, organizations, cultures and individuals. We will draw upon both academic theories of transformational organizational change and also the real-world implementation challenges that confront leaders who are moving simultaneously with both unprecedented scale and speed. The sessions will examine a variety of firms and industries being affected by the blend of digital and physical in order to lay out the unique operational and organizational challenges in a global context. How specifically should operating rhythms be changed and adjusted during this radical transformation? How does management both train a workforce with new skillsets and also hire new employees with different talents? What are the unique internal challenges for industrial firms as they add digital products and services? What are the likely forces of resistance to these changes, and how should leaders effectively move companies whose histories have spanned over 100+ years? How should management ensure that existing revenue streams do not atrophy prematurely and how should these challenges be communicated to public markets? In addition, from the perspective of new entrants, we will study how companies can quickly grow and scale when leadership has the benefit of being unencumbered by legacy systems, but also face unexpected challenges when they do not have the deep industry and domain knowledge or institutional culture that can provide insights into the demands of customers, channels and governments.

STRAMGT 503. Spontaneous Management. 2 Units.
In this class, you will learn techniques for improving your spontaneity, creativity, presence, and collaboration skills, all of which contribute to your becoming a more effective and inspirational leader. This class combines research on social psychology and techniques from improvisational theater to help you develop your leadership skills. The interactive exercises are based on the techniques that improv actors use on stage when they make up scenes, songs, or even entire plays on the spot. Improv teaches you to do many things at once: be completely present, think on your feet, quickly get in sync with others, read the room, and be agile at using what the situation presents you. As a leader in business, you will benefit from this same skill set. Whether you are presenting to your board, brainstorming & designing with colleagues, or mentoring new talent - learning some building blocks of improv will give you valuable new tools for interacting effectively with others. The course will cover topics such as spontaneity, risk taking, authenticity, nonverbal behavior, storytelling, effective brainstorming, understanding and using status, and creative collaboration.

STRAMGT 504. Innovation and Non-founder CEOs. 2 Units.
This course examines how companies innovate after the success of their first product, and why non-founder led companies are often less successful at this than founder led companies. We focus on how non-founder CEOs can drive more innovation while managing risk and potential failure. Our emphasis will be primarily on lessons that can be applied to technology companies, although many are relevant to other industries. Our goal is to help develop successful non-founder CEOs.

STRAMGT 509. Strategies of Effective Product Management. 2 Units.
This is a course about exploring the methods and processes for product management, largely in technology companies, and a look at what can lead to the most effective ways to coordinate customer needs, ensure accurate product development, and how to develop and use the appropriate tools needed to successfully sell products and services to customers from the perspective of the Product Manager. The course covers ways to think about product management depending on the type of product being delivered (new product introduction vs. reinvigorating an existing product) and also the skills and tools used by product managers for effective product management.

STRAMGT 510. Conversations in Management. 2 Units.
This case-based course is offered for students who want to refine their ability to manage challenging professional conversations. The class, which is limited to 32 students, will focus on the preparation for and execution of role-played dialogue as well as on postmortem analysis. Most of the respondent roles will be external to one¿s company, and some will be front line or mid-level people with limited educational credentials. Broad utilization will be made of background readings plus visiting case protagonists and experts. There will be nine class sessions, each of one hour and forty-five minutes.

STRAMGT 511. Protecting Ideas. 2 Units.
Today, the assets of many businesses are largely intangible, such as brands, data, software and trade secrets. More and more we live in an economy based on intangibles and much of business involves creating, exploiting and managing those intangible assets. Intellectual property rights (patents, trade secrets, copyright, trademarks design rights and so on) and data rights are a set of legal rights and assets that establish ownership of and protect tangible and intangible assets from copying and other acts¿for example copying of software or counterfeiting of designer handbags. Equally, intellectual property in the hands of third parties may pose a risk to a business developing a new product or brand. Most businesses start with an idea. It is critical to understand when and under what circumstances ideas, creative works and technology can be protected from third party use by intellectual property, and what limits apply to that protection. It is equally critical to recognize what must be done to secure ownership. In this course you will learn about IP rights-what they are, what they do, their limitations and how they are useful from a strategic perspective-well beyond the typical idea of a patent being nothing more than an invitation to a messy and expensive lawsuit. We will also discuss the all-too-common mistakes that can frustrate these objectives. To put these issues into a business setting, we will be joined by experienced business executives and investors in markets ranging from biosciences to software to sound engineering. This course is designed for business students, not law students. It is the objective of this course to help business students to think critically about when and how to invest in intellectual property protection, to recognize its limits, and to avoid the common mistakes that can frustrate such investments and undermine the value of the company. Although we will have to introduce you to legal concepts, the focus of the course is on putting these concepts into a business setting and explaining how IP may be used strategically¿enabling you to be part of the conversation with legal and intellectual property experts and to consider how IP can support management of the assets and strategy of a business or other enterprise. No prior knowledge or experience with intellectual property is needed.The format of this course is under review for best adaption to the possibility of distance learning but will include reading before each class, live or recorded presentations by the guest speakers, and Q&A and discussion. Guest speakers will share their experiences in the areas of IP investment, management, deployment, strategy and risk.

STRAMGT 512. The Yin and Yang of Family Business Transitions. 2 Units.
This seminar provides students with practical solutions to some of the challenges faced in family business transitions.Family businesses are by far the dominant form of commerce world-wide, albeit the majority are small "mom and pop shops." Some research shows that large businesses, whatever the form of ownership, have an average lifespan of around forty years, while small businesses (at least in Japan and Europe) average around twelve years. So, if businesses in general do not survive, then it is a wonder that any family business can survive from one generation to another, let alone two, three, four or more.There are three essential requirements to succeed in a family business transition. First, it may seem obvious that the business must succeed, but it is less obvious what advantages a family business has over its non-family-owned counterparts. Second, the ownership structure must effectively maintain family cohesion and support the business. Finally, family members need to organize in thoughtful ways to work effectively with one another.The beauty of a family business is that it can be more profitable than companies with non-family ownership. Two fundamentals, at least, provide this advantage - a strong value system and a long-term economic perspective. The operative word above, however, is "can"; it is by no means a foregone conclusion that a family business will be more successful. Families must thoughtfully develop their advantages, while at the same time avoiding the pitfalls that are inherent in any family business.Accordingly, this course is offered for students whose families own a family business or who are interested in the special challenges faced by family businesses. International students are encouraged to register as different cultural perspectives to family business will enrich the experience for everyone. Particular focus will be given to the transitions from one generation to another and the lessons learned that can be applied during the entire life of the business.

STRAMGT 514. Product/Market Fit. 2 Units.
The premise of this course is the success of a startup (and even a large company launching a new product) is most dependent on finding a market that is desperate for its product. Focusing on product/market fit conflicts with the conventional view that a startup¿s limited resources should be applied to perfecting the execution of day to day activities. Interestingly almost every successful product driven technology company followed a similar path to find its product/market fit, but it was usually by accident. In this course we attempt to define the consistent process each successful company pursued, which in most cases is highly counterintuitive, and how to apply it to different situations. Our class highlights the potential conflict between pursuing a conventional approach and optimizing product/market fit. In order to really bring out this conflict, we employ a seminar format with only 25 students so every issue can be evaluated in detail. Our lessons are limited to information technology-based companies, but we have been told they may be more broadly applicable. That being said, this course has been designed for someone who is truly interested in technology-based entrepreneurship. Students who choose to take this course must be committed to read all the assigned articles and books to have the proper foundation to address the frequent counterintuitive learnings. In some cases that might require an entire (although relatively short) book be read for an individual class. A written assignment addressing at least one of the learnings from each reading will be required to be submitted at least four hours prior to each class. Failure to submit even one of the written assignments will result in a U. In addition to the daily written assignments, there will be a large individual project required at the end of the course. In other words, this course requires far more commitment than a typical GSB course, especially for one that offers only two credits. However I promise this course will be invaluable should you choose an operating or investment career in the technology business.

STRAMGT 516. Fundamentals of Effective Selling. 2 Units.
