Are you an artist seeking a greater purpose for you art? Would you like to gain a sense of history and best practices for engaging your community in creative work? nnHuman Rights policy experts and activists, artists and scholars will participate in this (online via Zoom.us) student & community course on contemporary immigration policy and human rights issues.The course is structured around the ideas of art, activism and scholarship as they intersect with the subject of migration. Often considered distinct fields, we will explore the ways they merge together, and engage in dialogue with an array of guests from a multitude of backgrounds.nn In addition to learning about the Hostile Terrain94 project through tagging the identities of lives of those lost along the Sonoran desert and considering the U.S. policy of prevention through deterrence to crossing the U.S. Mexican Border, this class will explore art making with paper as the primary media. Paper with its material qualities can provide diverse and accessible entryways into the processes of inclusion, recordation, and mass participation. Through the interconnecting of the practical task of filling information onto toe tags to create the exhibition at the Anderson Collection, which documents the human remains of migrants identified for the exhibition (Fall 2020) with creating new objects in paper, the projects in this course will discover and recover identity through articulations of identity in paper.
Same as: CSRE 201B

CHILATST 212. Biology, Culture and Social Justice in Latin America: Perspectives from Forensic Anthropology. 5 Units.
This course will only take place in the first 5 weeks of the quarter.nnAs forensic anthropologists, we are routinely asked to make identifications of unknown human remains and provide courtroom testimony. Latin America has become a nexus for social justice work, as we respond to the humanitarian crisis along the U.S.-México Border. To improve identification methods of the undocumented dead, we must understand the diversity in Latinx people and adopt best scientific practices.
This course provides a cross-disciplinary, bio-cultural approach to Latin American variation and training in applied methods of forensic anthropology. Explore how tools of biological and cultural anthropology are used jointly in human rights investigation and social justice advancement. Discover the breadth of Latinx diversity and how historical, geographic, and socio-cultural factors shape this variation. Gain hands-on experience in case analysis, using skeletal, genetic, and recovery context information to estimate key parameters of identity. Use case studies to contextualize this work through an intersectional lens that attends to the living families and the applicable historical, geo-political and socio-cultural conditions.
Same as: ANTHRO 212B, CSRE 212

CHILATST 274. The History of Mexicans and Mexican Americans. 4-5 Units.
This course will explore the history of Mexican migrants and Mexican Americans from 1848 to the present.
Same as: HISTORY 274C, HISTORY 374C

Compar Stud in Race & Ethnic Courses

CSRE 1A. My Journey: Conversations on Race and Ethnicity. 1 Unit.
This course meets once a week for one hour, over lunch (provided). Students will meet with CSRE faculty who will share their work, their life stories, their reasons for believing that race and ethnicity are of central concern to all members of our society. Diverse fields will be represented: sociology, history, literature, psychology and others.

CSRE 1T. The Public Life of Science and Technology. 4 Units.
The course focuses on key social, cultural, and values issues raised by contemporary scientific and technological developments. The STS interdisciplinary lens helps students develop and apply skills in three areas: (a) Historical analysis of contemporary global affairs (e.g., spread of technologies; responses to climate change); (b) Bioethical reasoning around health issues (e.g., disease management; privacy rights); and (c) The sociological study of knowledge (e.g., intellectual property, science publishing). A discussion section is required. Discussion sections meet once per week immediately after lecture. International time zone students are encouraged to fill out the following Google Form: https://tinyurl.com/STS1-Timezone.
Same as: STS 1

CSRE 1V. A History of Race. 1-3 Unit.
This course will survey the idea of race and its history. We will focus our attention on the construction of the idea of race, and we will trace the ways in which this concept has changed over time. The course will start with a panel discussion on definitions of race in history, and as presented in different academic disciplines today. This discussion will be followed by two lectures tracing histories of race from Antiquity until the twentieth century. The last session will be a roundtable on the continuing role of race in the United States today. Covered topics will include explicit and implicit bias, institutionalized racism, race and criminal justice, equal justice initiatives and protests, racial stratification. The roles of politics, economics, science, religion, and nationalism, as well as the relationships between race, gender, and class will also be discussed. Course must be taken for 3 units to count toward WAYS requirement. This course will meet 5 times, starting MONDAY January 14th, and ending the last day of class Monday, February 25th.

CSRE 3E. Michelle Obama in American Culture. 1 Unit.
Never before has the United States had a First Lady like Michelle Obama. During her eight years in the White House, Michelle Obama transformed traditional meanings of womanhood, marriage, motherhood, and style and created new possibilities for what it means to be strong and what it means to be beautiful. No First Lady has ever been so scrutinized but also so beloved: from her J. Crew dresses to her Let's Move campaign, from her vegetable gardens to her chiseled arms, and from her powerful speeches to her casual and always authentic personality. This class examines the impact on American culture of the most popular First Lady in American history.
Same as: AFRICAAM 3E, AMSTUD 3E, FEMGEN 3E, HISTORY 3E

CSRE 3P. America: Unequal. 4 Units.
It was never imagined "when the U.S. was founded" that the rich would be so rich and the poor so poor. It was never imagined "when the U.S. was founded" that opportunities to get ahead would depend so profoundly on one's family circumstances and other starting conditions. How could this have happened in the "land of opportunity?" What are the effects of such profound inequality? And what, if anything, should be done about it?.
Same as: PUBLPOL 113, SOC 3

CSRE 4. The Sociology of Music. 3-5 Units.
This course examines music¿its production, its consumption, and it contested role in society¿from a distinctly sociological lens. Why do we prefer certain songs, artists, and musical genres over others? How do we ¿use¿ music to signal group membership and create social categories like class, race, ethnicity, and gender? How does music perpetuate, but also challenge, broader inequalities? Why do some songs become hits? What effects are technology and digital media having on the ways we experience and think about music? Course readings and lectures will explore the various answers to these questions by introducing students to key sociological concepts and ideas. Class time will be spent moving between core theories, listening sessions, discussion of current musical events, and an interrogation of students¿ own musical experiences. Students will undertake a number of short research and writing assignments that call on them to make sociological sense of music in their own lives, in the lives of others, and in society at large.
Same as: AFRICAAM 4, SOC 4

CSRE 5C. Human Trafficking: Historical, Legal, and Medical Perspectives. 3 Units.
(Same as History 105C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution, labor exploitation, and organ trade, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning. Required weekly 50-min. discussion section, time TBD. Students interested in service learning should consult with the instructor and will enroll in an additional course.
Same as: FEMGEN 5C, HISTORY 5C, INTNLREL 5C

CSRE 5I. Hamilton: An American Musical. 1 Unit.
"Hamilton" is one the most popular and most celebrated musicals in American history. It has received 11 Tony Awards, including best musical, and 16 Tony nominations, the most nominations in Broadway history. It won the Pulitzer Prize and a Grammy Award. The musical draws on the language and rhythms of hip-hop and R & B, genres that are underrepresented in the musical theater tradition. "Hamilton" has redefined the American musical, particularly in terms of sound, casting, and storytelling. What explains the deep cultural impact and acclaim for this play?n nThis interdisciplinary course examines Alexander Hamilton and his world as well as Hamilton: An American Musical through a series of lectures from faculty in History, Theater and Performance Studies, English, Music, and Writing and Rhetoric.
Same as: AFRICAAM 5I, AMSTUD 5I, HISTORY 3G

CSRE 10A. Introduction to Identity, Diversity, and Aesthetics: Arts, Culture, and Pedagogy. 1 Unit.
This weekly lecture series introduces students to the study of identity, diversity, and aesthetics through the work of leading artists and scholars affiliated with the Institute for Diversity in the Arts (IDA). This year's course highlights the educational impact of arts and culture. How can arts and culture help to advance pedagogies of liberation? Among other things, we will examine hip-hop education and how it illuminates ideas around culturally relevant and culturally sustaining pedagogies, indigenous knowledges, embodied knowledges, hip-hop feminisms, and community engaged research. We will look at case studies from East Palo Alto, CA and Cape Town, South Africa.
Same as: AFRICAAM 10A

CSRE 10AY. Pacific Standard Time LA/LA creative projects in a Celebration Beyond Borders. 1-2 Unit.
Students will have the opportunity to develop written and creative responses to the exploration of the region wide collaboration Pacific Standard Time LA/LA.

CSRE 11SI. Leadership at Stanford. 1 Unit.
This class will explore the role of student government, decision-making and advocacy in a major research university setting such as Stanford. Designed to prepare new student leaders for their legislative responsibilities, the class will incorporate presentations from university stakeholders along with experiential learning exercises and individual class projects. Topics of study include understanding the role and responsibilities of student government in a university setting, institutional change, decision-making, advocacy and conflict resolution. Students will also study ASSU governing documents, effective funding and event planning processes and roles. They will gain awareness of how to understand and engage with a complex and decentralized organization such as Stanford while honing their leadership skills. They will develop a project they wish to pursue as an elected leader and receive mentorship from university administrators.

CSRE 11W. Service-Learning Workshop on Issues of Education Equity. 1 Unit.
Introduces students to a variety of issues at stake in the public education of at-risk high school youth in California. Participants will hear from some of the leading faculty in the School of Education as well as the Departments of Psychology, Sociology, and others, who will share perspectives on the problems and challenges of educating a diverse student body in the state's public school system. The service-learning component of the workshop is a mentoring project (Stanford Students for Educational Equity) with junior class history students from East Palo Alto Academy High School, a Stanford charter school.
Same as: HISTORY 11W

CSRE 12. Community Organizing: People, Power, and Change. 4 Units.
Mobilizing communities for positive social change requires educated leaders equipped with the skills to organize people and power. Organizing can make a difference in addressing major public challenges that demand full engagement of the citizenry, especially those whose voices are not heard unless they organize. Leadership is accepting responsibility to enable others to achieve shared purpose in the face of uncertainty. Organizing is a way to lead by identifying, recruiting and developing more leadership; building community around that leadership; and building power from the resources of that community.

CSRE 13. Digital Humanities and African American History Black History in the Age of the Digital Database. 1 Unit.
The focus of this workshop is on the social and cultural histories and present conditions relating to social movements and the role of leaders and heroes in urban settings. The workshop seeks to foster historical consciousness of past struggles for justice through collective action as well as to introduce students to a diverse range of leaders of contemporary social justice movements. Additionally, as an underpinning concept, the course explores the changing meaning and importance of social and cultural heroes through history, literature, and music. Workshop activities will divided between sessions with guest speakers and classes held to discuss background concepts and material.
Same as: URBANST 103

CSRE 14N. Growing Up Bilingual. 3 Units.
This course is a Freshman Introductory Seminar that has as its purpose introducing students to the sociolinguistic study of bilingualism by focusing on bilingual communities in this country and on bilingual individuals who use two languages in their everyday lives. Much attention is given to the history, significance, and consequences of language contact in the United States. The course focuses on the experiences of long-term US minority populations as well as that of recent immigrants.
Same as: CHILATST 14N, EDUC 114N

CSRE 16A. Dynamic Australia: immigrant and indigenous experiences. 1 Unit.
How did modern Australian society take shape? Within this larger framework, several more focused questions will guide us: What have been the experiences of immigrants, of Aborigines and Torres Strait Islanders, and how have their relations evolved over time? To what degree has Australia been formed by successive waves of immigration? What has been the fate of the Aboriginal peoples? How have intergroup relations evolved since the start of colonialism in the late 18th century? What have been the elements of racial formation, and how have they changed over time? What does it mean to be Australian in the 21st century? How might the creative arts (e.g. music, literature, drama, painting, dance) help us understand Australian identities and intergroup dynamics? As a course project, students will informally interview someone whose life history has involved large-scale displacement, voluntary or otherwise. This is intended as a means of sharpening awareness of migration in history - as articulated at the level of individuals and communities. This course is primarily intended for students enrolled in or waitlisted for the BOSP Summer Seminar in Sydney (June-July 2019), and as such focuses on historical and social milieux. However, all participants will find it a wide-ranging introduction to Australian society and a case study in intergroup dynamics.

CSRE 18. Antiracism and Health Equity: A project-based community service course. 1 Unit.
This class will examine the structural racialized bias in medicine, biomedical research and health care delivery by using short form media to address the dismantling of systemic racist practices. In understanding that inequity is a feature and not a flaw of health status and health care delivery in the United States, students will design and deliver creative, serviceable solutions for community partner-generated problems/issues. This course is designed for human biology students but, all majors are welcome.

CSRE 19N. Everyone Eats: Food, Religion and Culture. 3 Units.
Food is one of the most essential aspects of the human experience. The decisions and choices we make about food define who we have been, who we are now, and who we want to become. In this seminar we will study how food habits have shaped religious traditions, and vice versa, how religious traditions have shaped food ways. Some traditions are centered around food regiments such as the dietary laws, derived from biblical law that shapes Jewish and Christian tradition very differently. Indeed, many religious and ethical thinkers, as well as anthropologists, have interpreted the meanings of the dietary laws very differently. Further, in many religious traditions the killing of animals and consumption of meat is deeply fraught. We will explore the history of food practices and their contemporary impact; the connections between food, religion, and identity; the meanings that religious thinkers and anthropologists have attributed to food habits; as well as the creative translations of religious traditions into contemporary food ethics by various social movements and groups, predominantly in the U.S.
Same as: JEWISHST 19N, RELIGST 19N

CSRE 20N. What counts as "race," and why?. 4 Units.
Preference to freshmen. Seminar discussion of how various institutions in U.S. society employ racial categories, and how race is studied and conceptualized across disciplines. Course introduces perspectives from demography, history, law, genetics, sociology, psychology, and medicine. Students will read original social science research, learn to collect and analyze data from in-depth interviews, and use library resources to conduct legal/archival case studies.
Same as: SOC 20N

CSRE 21. African American Vernacular English. 3-5 Units.
Vocabulary, pronunciation and grammatical features of the systematic and vibrant vernacular English [AAVE] spoken by African Americans in the US, its historical relation to British dialects, and to English creoles spoken on the S. Carolina Sea Islands (Gullah), in the Caribbean, and in W. Africa. The course will also explore the role of AAVE in the Living Arts of African Americans, as exemplified by writers, preachers, comedians and actors, singers, toasters and rappers, and its connections with challenges that AAVE speakers face in the classroom and courtroom. Service Learning Course (certified by Haas Center). UNITS: 3-5 units. Most students should register for 4 units. Students willing and able to tutor an AAVE speaking child in East Palo Alto and write an additional paper about the experience may register for 5 units, but should consult the instructor first. Students who, for exceptional reasons, need a reduced course load, may request a reduction to 3 units, but more of their course grade will come from exams, and they will be excluded from group participation in the popular AAVE Happenin at the end of the course.
Same as: AFRICAAM 21, LINGUIST 65, LINGUIST 265

CSRE 21N. How to Make a Racist. 3 Units.
How does a child, born without beliefs or expectations about race, grow up to be racist? To address this complicated question, this seminar will introduce you to some of the psychological theories on the development of racial stereotyping, prejudice, and discrimination. Together, these theories highlight how cognitive, social, and motivational factors contribute to racist thinking. We will engage thoughtfully and critically with each topic through reflection and discussion. Occasionally, I will supplement the discussion and class activities with a brief lecture, in order to highlight the central issues, concepts, and relevant findings. We will share our own experiences, perspectives, and insights, and together, we will explore how racist thinking takes root. Come to class with an open mind, a willingness to be vulnerable, and a desire to learn from and with your peers. Students with diverse opinions and perspectives are encouraged to enroll.
Same as: AFRICAAM 121N, PSYCH 21N

CSRE 22. Lockdown America: Race and Incarceration in the Land of the Free. 3-5 Units.
This course is about prisons, jails, and the place they hold in American life, drawing heavily from the instructor's experiences of fieldwork in prisons and jails in the San Francisco Bay Area. Prisons and Jails are commonly imagined as isolated places, behind high walls, wire fences, and metal doors. The story ends as the 'bad guy' is sent to prison, after all. The reality is far from this; what happens in and around prison and jails impacts American society, culture, economics, geography, and daily life in myriad ways. This course undertakes to undo many of the myths and misconceptions about incarceration and place the prison back in the American landscape. Using a wide variety of sources of data (news articles, blog posts, essays, academic articles and book chapters, podcasts and documentaries) and prioritizing the voices of incarcerated and formerly incarcerated people, this course encourages students to critically interrogate the terms used to describe and justify mass incarceration. Particular attention will be payed to the role of racial inequality in the perpetuation of incarceration, and the role of incarceration in the perpetuation of racial inequality. As such, there will be no week 'on race' but race will be a constant and consistent element of every week of this course. This course is also designed to improve participants' writing and will involve multiple opportunities for directed feedback to develop participants' prose style and argumentation.

CSRE 22SI. SENSA Labs Social Enterprise Seminar. 1-2 Unit.
As a social entrepreneur, how do you know you¿re solving the right problem? What values, approaches, and strategies differentiate a social enterprise from other startups? What does it take to build a venture that is both socially-minded and profitable? Through engaging with influential speakers, course-long mentors, case studies, and hands-on workshops, students will gain the skills needed to build, pitch, and manage a social venture. Expert Silicon Valley speakers and mentors encourage networking as well as peer to peer learning. The course culminates in Demo Day, an event in which teams pitch their ideas directly to experienced investors. At the end of the course, students will be able to understand the field of social entrepreneurship through the tenets of Sustainability, Impact and Performance, Innovation, and Leadership; apply the theories from the Lean Startup and Social Business Models to an identified need; and measure the impact of a social enterprise and synthesize social entrepreneurship concepts through investor pitching. Limited enrollment. Application required: https://forms.gle/k9NFcETszUqqryjD6.

CSRE 23. Race and the War on Drugs: Long Roots and Other Futures. 3-5 Units.
Current discussions of the war on drugs reference Richard Nixon's 1971 declaration as a starting point. This class will encourage students instead to see the war on drugs beyond seemingly self-evident margins and imaginaries. In this course, we will explore the racialized and gendered history of coca and cocaine in the Americas, and follow the war on drugs as it targets different aspects of drug production and consumption within and beyond the borders of the United States. In examining how drugs and drug policies have been used as tools of discrimination and exploitation from colonialism through to present systems of mass incarceration, we will analyze racialization as it is constructed and experienced through time and imposed onto nations and bodies. Readings and discussion will emphasize Black and Latinx feminist theories, critical race theory, and decoloniality, drawing on anthropological and interdisciplinary scholarship while incorporating other forms of writing (prose, fiction, poetry) and media (graphic novels, visual art, film clips, documentaries). Students will learn to interrogate the longstanding racialized and gendered roots of the drug war and explore critical calls towards other futures.
Same as: ANTHRO 23B

CSRE 24. Race and Environment. 3 Units.
From the moment colonizers began arriving in the space now referred to as the Americas until the moments these words were written and read, coloniality and one its central mechanisms¿race¿have shaped the ways that people think about the spaces in which they live. Western culture¿s belief in the division between nature and culture, between the human and non-human, is rooted in racialized beliefs that guided the settler project¿s goal of converting Indigenous and Black spaces and bodies into reflections of colonial aspirations. We will analyze the processes through which race and space are mutually-constructed, including the racialization of space labelled the ¿environment;¿ and how organizing, research, and activism in relation to the environment can undermine the racial hierarchies that still manifest via the environment.

CSRE 24SI. The Continuity of Abu Nuwas's Homoeroticism in Arab Queer Literary Modernity. 2 Units.
This course will hold space for discussions surrounding the precolonial poetic foundations of Arab Queerness, the continuity of such foundations in its modern literary representations, and he potential Arab Queer futurities that such modern representations move toward. How are representations of homoeroticism in Abu Nuwas's poetry definitive of a pre-colonial Arab Queer identity that is separate from Western definitions of Queerness rooted in the Gay Liberation movement of the 1970s? Do modern literary representations of queerness in Arab literature, even after US sociopolitical imperialism, carry a central understanding of Arab Queerness? How is the earlier explored Pre-Colonial Arab Queerness carried forward in these modern Arab Queer literary representations? Are there differences? How do these literary understandings and analyses inform the greater theoretical discussion of queer past, present, and future? Readings will include poetry by classical Arab-Persian poet Abu Nuwas, and novels by Saleem Haddad, Abdellah Taïa, and Mohammed Abdel Nabi. These works will be discussed within a theoretical framework informed by the works of Joseph Massad, Sara Ahmed, Jose Esteban Muñoz, Eve Sedgwick, and Jaspir Puar.

CSRE 27SI. Revolution and the Pilipinx Diaspora: Exploring Global Activism in Local Communities. 1-2 Unit.
This course aims to provide students with an opportunity to not only learn about current issues in the local Filipino American community, but also develop their own plans to take action on social justice issues. Through mediums of art and reflection, we will explore themes of diaspora and liberation by focusing on the Filipino experience and the local and vocal histories of activism in the Bay Area. We will be connecting local histories to the current global narrative while also connecting our past to our own identity formation as activists and community leaders. In doing so, we hope to explore the implications of local activism within the greater context of global organizing. The course will expose students to local community leaders and ways in which they can support and plug in to local initiatives.
Same as: ASNAMST 27SI

CSRE 28SI. What is Whiteness? Historical and Contemporary Definitions of White Racial Identity in the U.S.. 1-2 Unit.
This course will explore one central question: What does it means to be White, and how has that changed over time and place? From Abigail Fisher to Kreayshawn to the Tsarnaev brothers, we will use narratives and experiences of Whiteness to illuminate historical and contemporary understandings of what it means to be White in 2013. Through this class, students will share their own encounters with Whiteness, and will develop tools and strategies for navigating privileged identities and engaging within Stanford¿s diverse student community.

CSRE 29SI. Migration is Beautiful: Histories, Realities, and Policies of Immigrant Justice. 1 Unit.
In the current political landscape, many political stakeholders have endorsed anti-immigrant policies using inflammatory rhetoric that has disturbed American attitudes toward immigration. This course challenges the underlying assumptions of this discourse. We will begin by analyzing the history of immigration policy and politics in the United States. We will discuss specific issues related to border control, detention, and law enforcement and then delve into the intersections of immigration, criminal justice, health, and education policies. Throughout, we will emphasize the importance of using empirical data and personal narratives when analyzing and participating in the contemporary discourse on immigration-related issues.

CSRE 30N. The Science of Diverse Communities. 3 Units.
This course is an exploration. Most generally, its aim is to identify distinguishing features of good diverse communities and articulate them well enough to offer principles or guidelines for how to design and manage such communities - all with a particular focus on educational communities like schools, universities, academic disciplines, etc., but with the hope that such principles might generalize to other kinds of organizations and the broader society. The readings range from those on the origins of human communities and social identities to those on intergroup trust building. They also aim to embed our discussions in the major diversity issues of the day, or example, what's in the news about campus life. nnnThus the course has a practical purpose: to develop testable ideas for improving the comfort level, fairness and goodness-for-all of identity diverse communities--especially in educational settings. nnnThe course also has a basic science purpose: to explore the psychological significance of community. Is there a psychological need for community? Is there something about a need for community that can't be reduced to other needs, for example, for a gender, racial or sexual-orientation identity? How strong is the need for community against other needs? What kinds of human groupings can satisfy it? In meeting this need, can membership in one community substitute for membership in others? What do people need from communities in order to thrive in them? Do strong diverse communities dampen intergroup biases? Can strong community loyalty mitigate identity tensions within communities? nnnSuch questions, the hope is, will help us develop a more systematic understanding of the challenges and opportunities inherent in diverse human communities.
Same as: EDUC 30N, PSYCH 30N, SOC 179N

CSRE 30Q. The Big Shift. 4 Units.
Is the middle class shrinking? How do people who live at the extremes of American society- the super rich, the working poor and those who live on the margins, imagine and experience "the good life"? How do we understand phenomena such as gang cultures, addiction and the realignment of white consciousness? This class uses the methods and modes of ethnographic study in an examination of American culture. Ethnographic materials range from an examination of the new American wealth boom of the last 20 years (Richistan by Robert Frank) to the extreme and deadlynworld of the invisible underclass of homeless addicts on the streets of San Francisco (Righteous Dopefiend by Phillipe Bourgois and Jeff Schonberg). The experiences of Hispanic immigrants and the struggle to escape gang life in Los Angeles are highlighted in the story of Homeboy Industries a job creation program initiated by a priest working in LA's most deadly neighborhoods (G-Dog and the Homeboys by Celeste Fremon). Finally in Searching for Whitopia: an improbable journeyninto the heart of White America, Rich Benjamin explores the creation on ethnic enclaves (whitopias) as fear over immigration and the shrinking white majority redefine race consciousnessnin the 21st century. Each of these narratives provides a window into the various ways in which Americans approach the subjects of wealth and the good life, poverty and the underclass, and thenconstruction of class, race, and gender in American society. Students will not be required to have any previous knowledge, just curiosity and an open mind.
Same as: ANTHRO 31Q

CSRE 30SI. Housing Justice and Stratification in the Bay Area. 1 Unit.
This is a survey course on relevant topics to local housing justice concerns, including current debates in housing policy and the role of various sectors in shaping the local housing market. This course will prepare participants to both personally engage in service learning and critically engage with actors in housing policy over spring break. n nTo begin, we will explore paradigms of critical community engagement and develop a decolonized framework about the history of the local land. With these underlying philosophies in mind, we will dive into the politics behind ongoing gentrification, the rise of the city and the decline of suburbs in the Bay Area. From there, we will analyze housing policies which have strongly influenced the local housing situation, including national policies such as the Fair Housing Act and East Palo Alto affordability measures.nnTo close, the course will focus on the role of different actors and sectors in affecting change. We will examine possible obligations local technology companies and real estate developers might have in shaping the region¿s housing market. Finally, we will study the notion of housing as a human right and ask whether achieving housing justice would require a formally declared right to affordable and fair housing.

CSRE 31SI. Food + Race. 1 Unit.
If we are what we eat, Food + Race is a class that explores what we eat and how we talk about it. In this student-initiated course, we will look at popular culture and discourse as a gateway to issues like just labour practices and equitable access, cultural authenticity, family histories of im/migration, appropriation and consumerism, and global colonial domination. From The Great British Bake Off to Korean tacos in L.A., we¿ll ask ¿What does food really mean?¿ and ¿What does food really mean to us?¿.

CSRE 32. Theories in Race and Ethnicity: A Comparative Perspective. 5 Units.
This undergraduate course employs an anthropological and historical perspective to introduce students to ideas and concepts of race and ethnicity that emerged primarily in Europe and the United States in the eighteenth and nineteenth centuries and that continue to shape contemporary racial attitudes, interactions, and inequalities. Ideas about race and ethnicity forged outside the U.S. and case studies from other nations are presented to broaden students' understanding and to overcome the limitations of an exclusive focus on the U.S. This course is geared to sophomores and juniors who have already taken at least one course on race and ethnicity, anthropology, African American Studies, Asian American Studies, Chicana/o Studies, Jewish Studies or Native American Studies.
Same as: ANTHRO 32

CSRE 32A. The 5th Element: Hip Hop Knowledge, Pedagogy, and Social Justice. 1-5 Unit.
This course-series brings together leading scholars with critically-acclaimed artists, local teachers, youth, and community organizations to consider the complex relationships between culture, knowledge, pedagogy and social justice. Participants will examine the cultural meaning of knowledge as "the 5th element" of Hip Hop Culture (in addition to MCing, DJing, graffiti, and dance) and how educators and cultural workers have leveraged this knowledge for social justice. Overall, participants will gain a strong theoretical knowledge of culturally relevant and culturally sustaining pedagogies and learn to apply this knowledge by engaging with guest artists, teachers, youth, and community youth arts organizations.
Same as: AFRICAAM 32, AMSTUD 32, EDUC 32, EDUC 432, TAPS 32

CSRE 32SI. Whiteness. 1-2 Unit.
This course provides an introduction to the concept of Whiteness. We will investigate the historical origin of "Whiteness" and "White people," examine some of the institutional and interpersonal privileges associated with Whiteness, and explore contemporary debates about White entitlement, White culture, and White charity. As we are articulating the problem of Whiteness, we will also be exploring strategies and models of "White allyship," and asking the surprisingly difficult questions of: How can White people work for racial justice, and how can people of all races work to disrupt Whiteness and White Supremacy? This class is intended for students of all majors and backgrounds interested in learning about Whiteness.

CSRE 33SI. Examining Access for FLI Students in Higher Education. 1 Unit.
Stanford's past two presidents have steadfastly declared Stanford as a vehicle of upwards mobility and to correct inequalities. Essentially, this means providing sufficient access to students who often are most in need: first-generation and/or low-income (FLI) students. However, what exactly is access? How can we understand different kinds of access in order to improve the holistic quality of education students receive? nnTo answer these questions, we will define access and the forces which shape it, such as economic systems, intersectionality, and the educational pipeline. Next, to better prepare ourselves as advocates for educational improvement, we will examine the historical trend of access at colleges as case studies (Stanford, Berkeley, Foothills, and Brown). Finally, we will ask how accessibility influences how students fare after leaving the educational system.nnUltimately, we will gain analytical and heuristic techniques to pinpoint and advocate for improvements to educational access for FLI students.

CSRE 34SI. The Chicago Gap: Bridging Latinx Youth Education. 1 Unit.
By the year 2050, Latinos will make up a quarter of the United States population, doubling in its current size. Without a doubt, this increase in population is sure to affect American economy and policy. Unfortunately, Latinos seem to be on the slow path to social mobility in the United States, and face many setbacks as a community. More specifically, the Latinx pupil dropout rate is the highest amongst all ethnic groups. While Latinos are enrolling in college at higher rates than ever before they are not graduating with four-year degrees as often as other students. Our course will cover the dynamic linguistic, cultural, and economic themes involved in this discourse. We will reimagine citizenship as it pertains to accessing higher education and discuss tracks and pipelines that have lead Latinx students to different outlets. More specifically, we will cover the impact that location and environment have on a pupil's perception of themselves and their capabilities, while also reflecting on Chicago's history of education and racial segregation.

CSRE 35SI. An Introduction to Labor Organizing on Campus. 1-2 Unit.
Campus Workers are critical to maintaining our university, so how can you support them as a student? What is campus labor organizing and how does it work on a practical level? How can students make a difference in the lives of workers on campus? This class offers an opportunity to gain knowledge of and firsthand experience in campus labor and campus labor organizing. Classes will consist of seeking to understand how race, class, and gender affect laborers experiences at Stanford, as well as how to build an intersectional labor movement.

CSRE 36. REPRESENT! Covering Race, Culture, and Identity In The Arts through Writing, Media, and Transmedia.. 5 Units.
Probably since the first audience formed for the first chalk scrawls in a cave, there have been storytellers to narrate that caveperson's art and life, and critics to troll that caveperson's choice and usage of color. And so it goes. This course is an exploration into how to cover race, culture, and identity in the arts in journalism, such as print, web, video, radio, and podcasting. It is also an arts journalism practicum. During the quarter, we will be working toward creating work that is publishable in various venues and outlets. In this course, we will be discussing exemplary arts writers and their works and interrogating critical questions around race, identity, representation, and ethics. Experienced journalists, editors, and experts from different platforms and backgrounds will also be imparting important skills and training that will help you to navigate today's working media and transmedia environments. Those who enroll in the class will be expected to produce quality content (e.g. articles, blog posts, video reports, podcasts) for media outlets. Some travel outside of class may be required for additional reporting and training. This seminar class will be By Instructor Approval Only. Please submit an application by February 22 at 11:59pm. Starred items are required. The app is available at: http://bit.ly/RepresentClass36 Those selected for this class will be informed by March 2nd so that they may enroll in the course. Please do not apply for the course if you are unsure about completing it. If you have any questions, you may email the instructor at: jeffc410@stanford.edu.
Same as: AFRICAAM 36

CSRE 39. Long Live Our 4Bil. Year Old Mother: Black Feminist Praxis, Indigenous Resistance, Queer Possibility. 1-4 Unit.
How can art facilitate a culture that values women, mothers, transfolks, caregivers, girls? How can black, indigenous, and people of color frameworks help us reckon with oppressive systems that threaten safety and survival for marginalized people and the lands that sustain us? How can these questions reveal the brilliant and inventive forms of survival that precede and transcend harmful systems toward a world of possibility? Each week, this course will call on artists, scholars, and organizers of color who clarify the urgency and interconnection of issues from patriarchal violence to environmental degradation; criminalization to legacies of settler colonialism. These same thinkers will also speak to the imaginative, everyday knowledge and creative healing practices that our forebears have used for millennia to give vision and rise to true transformation.
Same as: AFRICAAM 39, FEMGEN 39, NATIVEAM 39

CSRE 41A. Genes and Identity. 4 Units.
In recent decades genes have increasingly become endowed with the cultural power to explain many aspects of human life: physical traits, diseases, behaviors, ancestral histories, and identity. In this course we will explore a deepening societal intrigue with genetic accounts of personal identity and political meaning. Students will engage with varied interdisciplinary sources that range from legal cases to scientific articles, medical ethics guidelines, films, and anthropological works (ethnographies). We will explore several case studies where the use of DNA markers (as proof of heritage, disease risk, or legal standing) has spawned cultural movements that are biosocial in nature. Throughout we will look at how new social movements are organized around gene-based definitions of personhood, health, and legal truth. Several examples include political analyses of citizenship and belonging. On this count we will discuss issues of African ancestry testing as evidence in slavery reparations cases, revisit debates on whether Black Freedman should be allowed into the Cherokee and Seminole Nations, and hear arguments on whether people with genetic links to Jewish groups should have a right of return to Israel. We will also examine the ways genetic knowledge may shape different health politics at the individual and societal level. On this count we will do close readings of how personal genomics testing companies operate, we will investigate how health disparities funding as well as orphan disease research take on new valences when re-framed in genetic terms, and we will see how new articulations of global health priorities are emerging through genetic research in places like Africa. Finally we will explore social implications of forensic uses of DNA. Here we will examine civil liberties concerns about genetic familial searching in forensic databases that disproportionately target specific minority groups as criminal suspects, and inquire into the use of DNA to generate digital mugshots of suspects that re-introduce genetic concepts of race.
Same as: AFRICAAM 41, ANTHRO 41

CSRE 41Q. Black & White Race Relations in American Fiction & Film. 3-5 Units.
Movies and the fiction that inspires them; power dynamics behind production including historical events, artistic vision, politics, and racial stereotypes. What images of black and white does Hollywood produce to forge a national identity? How do films promote equality between the races? What is lost or gained in film adaptations of books? NOTE: Students must attend the first day; admission to the class will be determined based on an in class essay.
Same as: AFRICAAM 101Q, AMSTUD 42Q

CSRE 44. Living Free: Embodying Healing and Creativity in The Era of Racial Justice Movements. 1-4 Unit.
What does it mean to live free? It is often said that the one demand for the Movement for Black Lives is to "stop killing us." This demand has led Black artists, thinkers, organizers, and healers to envision work and embody practices that resist the subjugation and erasure of their bodies. This surge of creativity has impacted and intersected with work happening in queer and trans communities and in many other communities of color, including indigenous movements for safe and clean water, student protests against campus racism, the undocumented movement, prison abolition among others. This justice based work urges us to interrupt systems of violence with systems of healing that recover traditions, invent new modalities, and connect to survival practices developed by many generations of people in community.nnIn this course we will bring together leading artists, thinkers, organizers, and healers to envision work and embody practices that resist the subjugation and erasure of their bodies, land, and natural resources. In this course we ask: what does it mean to embody health? How can we shift frameworks of pathology into frameworks of wholeness? What practices can we develop, recover, and share that help us create systems that support and value equity, healing and creativity for communities most at risk? And finally, how can we all live free?.
Same as: AFRICAAM 144

CSRE 45Q. Understanding Race and Ethnicity in American Society. 4 Units.
Preference to sophomores. Historical overview of race in America, race and violence, race and socioeconomic well-being, and the future of race relations in America. Enrollment limited to 16.
Same as: SOC 45Q

CSRE 47Q. Heartfulness: Mindfulness, Compassion, and Responsibility. 3 Units.
We practice mindfulness as a way of enhancing well-being, interacting compassionately with others, and engaging in socially responsible actions as global citizens. Contemplation is integrated with social justice through embodied practice, experiential learning, and creative expression. Class activities and assignments include journaling, mindfulness practices, and expressive arts. We build a sense of community through appreciative intelligence, connected knowing, deep listening and storytelling.

CSRE 50Q. Life and Death of Words. 4 Units.
In this course, we explore the world of words: their creation, evolution, borrowing, change, and death. Words are the key to understanding the culture and ideas of a people, and by tracing the biographies of words we are able to discern how the world was, is, and might be perceived and described. We trace how words are formed, and how they change in pronunciation, spelling, meaning, and usage over time. How does a word get into the dictionary? What do words reveal about status, class, region, and race? How is the language of men and women critiqued differently within our society? How does slang evolve? How do languages become endangered or die, and what is lost when they do? We will visit the Facebook Content Strategy Team and learn more about the role words play in shaping our online experiences. Together, the class will collect Stanford language and redesign the digital dictionary of the future. Trigger Warning: Some of the subject matter of this course is sensitive and may cause offense. Please consider this prior to enrolling in the course.
Same as: ENGLISH 50Q, FEMGEN 50Q, NATIVEAM 50Q

CSRE 50S. Nineteenth Century America. 3 Units.
(Same as HISTORY 150B. History majors and others taking 5 units, register in 150B.) Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture.
Same as: AFRICAAM 50B, HISTORY 50B

CSRE 51A. Race in Science. 1 Unit.
What are the roles of race and racism in science, technology, and medicine? 3-course sequence; each quarter can be taken independently. Fall quarter focuses on science. What is the science of race and racism? How does race affect scientific work? Weekly guest speakers will address such issues as the psychology and anthropology of race and racism; how race, language, and culture affect education; race in environmental science and environmental justice; the science of reducing police violence; and the role of race in genomic research. Talks will take a variety of forms, from panel discussions to interviews and lectures. Weekly assignments: read a related article and participate in an online discussion.
Same as: AFRICAAM 51A, CEE 151A, COMM 51A, HUMBIO 71A, STS 51A

CSRE 51B. Race in Technology. 1 Unit.
What are the roles of race and racism in science, technology, and medicine? 3-course sequence; each quarter can be taken independently. Winter quarter focuses on technology. How do race and racism affect the design and social impact of technology, broadly defined? Can new or different technology help to reduce racial bias? Invited speakers will address the role of race in such issues as energy infrastructure, nuclear arms control, algorithmic accountability, machine learning, artificial intelligence, and synthetic biology. Talks will take a variety of forms, ranging from panel discussions to interviews and lectures. Weekly assignments: read a related article and participate in an online discussion.
Same as: AFRICAAM 51B, BIOE 91B, CEE 151B, COMM 51B, HUMBIO 71B, STS 51B

CSRE 51C. Race in Medicine. 1 Unit.
What are the roles of race and racism in science, technology, and medicine? 3-course sequence; each quarter can be taken independently. Spring quarter focuses on medicine. How do race and racism affect medical research and medical care? What accounts for health disparities among racial groups? What are the history, ethics, legal, and social issues surrounding racialized medical experiments and treatments? Invited speakers will address these and other issues. Talks will take a variety of forms: conversations, interviews, panels, and others. Weekly assignments: read a related article and participate in an online discussion.
Same as: AFRICAAM 51C, BIOE 91C, CEE 151C, HUMBIO 71C, STS 51C

CSRE 51Q. Comparative Fictions of Ethnicity. 4 Units.
We may "know" "who" we "are," but we are, after all, social creatures. How does our sense of self interact with those around us? How does literature provide a particular medium for not only self expression, but also for meditations on what goes into the construction of "the Self"? After all, don't we tell stories in response to the question, "who are you"? Besides a list of nouns and names and attributes, we give our lives flesh and blood in telling how we process the world. Our course focuses in particular on this question--Does this universal issue ("who am I") become skewed differently when we add a qualifier before it, like "ethnic"? Note: To be eligible for WAYS credit, you must take course for a Letter Grade.
Same as: AMSTUD 51Q, COMPLIT 51Q

CSRE 52D. Asian American Human Development: Cultural Perspectives on Psychology, Education and Critical Issues. 3 Units.
In this course, we will examine the critical issues in Asian American growth and development with particular attention given to current theoretical and research perspectives within a diverse society. We will consider topics related to their cultural identity, cognitive, and socio-emotional development, engaging in the ethnic discourse on Confucian history and culture, Eastern and Western thought and learning, tiger parenting, gender roles, the model minority stereotype, acculturation and bicultural identity, and mental health. This course uniquely integrates the fields of history, education, psychology, human biology, and ethnic studies as we seek to understand the underlying processes of the Asian American person as an individual and as an effective member of the larger society.
Same as: ASNAMST 52D

CSRE 52H. I, Scientist: Diversity Improves the Scientific Practice. 1 Unit.
Disciplinary priorities, research agendas, and innovations are determined by the diversity of participants and problem-solving is more successful with a broad range of approaches. Using case studies in scientific research, we propose to use these insights to help our students learn why a diverse scientific community leads to better discovery and improves the relevance of science to society. Our premise is that a diverse set of perspectives will impact not only how we learn science, but how we do science.
Same as: BIO 52

CSRE 55M. MMUF Seminar. 1 Unit.
This seminar is designed to help MMUF honor students in the following ways: (1) developing and refining research paper topics, (2) learning about the various approaches to research and writing, and (3) connecting to Stanford University resources such as the library and faculty. May be repeat for credit.

CSRE 55N. Black Panther, Hamilton, Díaz, and Other Wondrous Lives. 3-5 Units.
This seminar concerns the design and analysis of imaginary (or constructed) worlds for narratives and media such as films, comics, and literary texts. The seminar's primary goal is to help participants understand the creation of better imaginary worlds - ultimately all our efforts should serve that higher purpose. Some of the things we will consider when taking on the analysis of a new world include: What are its primary features - spatial, cultural, biological, fantastic, cosmological? What is the world's ethos (the guiding beliefs or ideals that characterize the world)? What are the precise strategies that are used by the artist to convey the world to us and us to the world? How are our characters connected to the world? And how are we - the viewer or reader or player - connected to the world? Note: This course must be taken for a letter grade to be eligible for WAYS credit. In AY 2020-21, a `CR' grade will satisfy the WAYS requirement.
Same as: COMPLIT 55N

CSRE 61. Introduction to Dance Studies: Dancing Across Stages, Clubs, Screens, and Borders. 3-4 Units.
This introduction to dance studies course explores dance practice and performance as means for producing cultural meaning. Through theoretical and historical texts and viewing live and recorded dance, we will develop tools for analyzing dance and understanding its place in social, cultural, and political structures. This uses dance and choreography as a lens to more deeply understand a wide range of identity and cultural formations, such as gender, race, sexuality, (dis)ability, (trans)nationality, and empire. We will analyze dancing bodies that move across stages, dance clubs, film screens, and border zones. We will examine dance from diverse locales and time periods including ballet, modern and contemporary dance, contact improvisation, folkloric dance, burlesque, street dance, queer club dance, drag performance, music videos, TV dance competitions, and intermedia/new media performance. In addition to providing theoretical and methodological grounding in dance studies, this course develops performance analysis skills and hones the ability to write critically and skillfully about dance. No previous experience in dance is necessary to successfully complete the course.
Same as: DANCE 161D, FEMGEN 161D, TAPS 161D

CSRE 63N. The Feminist Critique: The History and Politics of Gender Equality. 3-4 Units.
This course explores the long history of ideas about gender and equality. Each week we read, dissect, compare, and critique a set of primary historical documents (political and literary) from around the world, moving from the 15th century to the present. We tease out changing arguments about education, the body, sexuality, violence, labor, politics, and the very meaning of gender, and we place feminist critics within national and global political contexts.
Same as: AMSTUD 63N, FEMGEN 63N, HISTORY 63N

CSRE 66. Spectacular Trials: Sex, Race and Violence in Modern American Culture. 5 Units.
This course will use the phenomenon of the spectacular trial as a framework for exploring the intersections of sex, race, and violence in the formation of modern American culture. Beginning in the late nineteenth century and continuing through the 1990s, we will focus our inquiry on a number of notorious cases, some associated with familiar names¿the ¿Scottsboro Boys,¿ Emmett Till, O.J. Simpson¿others involving once-infamous actors¿like Joan Little and Inez Garcia¿whose ordeals have receded into historical memory, considering a range of questions arising from this thematic nexus. For instance, in what ways are sexual transgressions racialized and gendered? What are the practical and theoretical ramifications of the seemingly inextricable conjunction of sex and violence in legal and popular discourse? And what insights might such spectacles afford when broached as an arena in which sexual meanings, identities, and practices are refracted and ultimately constructed? We will also examine the role of the pertinent professions in the evolution of these events, in particular how the interplay of law, medicine, psychiatry, and forensic science helped define the shifting boundaries of legality, and how print, radio, and television journalism operated not only in sensationalizing, but also in reflecting, modeling, and shaping prevailing attitudes and behaviors. Our study of this vital facet of our ¿society of the spectacle¿ will draw on a series of compelling secondary readings complemented by a diverse array of primary sources¿from contemporaneous pamphlets and newspaper accounts to photographs, letters, trial testimony, and psychological commentary¿that will enable class members to evaluate the strengths and weaknesses of different textual genres, experiment with alternative methods of fashioning historical interpretations, and contemplate the ways history might be employed to illuminate the persistent problems of racial bias, reflexive sexualization, and the packaging of trials as mass entertainment in the present day.
Same as: AMSTUD 106

CSRE 68. American Prophet: The Inner Life and Global Vision of Martin Luther King, Jr.. 3-5 Units.
Martin Luther King, Jr., was the 20th-century's best-known African-American leader, but the religious roots of his charismatic leadership are far less widely known. The documents assembled and published by Stanford's King Research and Education Institute provide the source materials for this exploration of King's swift rise to international prominence as an articulate advocate of global peace and justice.
Same as: AFRICAAM 68D, AMSTUD 168D, HISTORY 68D, HISTORY 168D

CSRE 74. History of South Africa. 3 Units.
(Same as HISTORY 147. History majors and others taking 5 units, register for 147.) Introduction, focusing particularly on the modern era. Topics include: precolonial African societies; European colonization; the impact of the mineral revolution; the evolution of African and Afrikaner nationalism; the rise and fall of the apartheid state; the politics of post-apartheid transformation; and the AIDS crisis.
Same as: AFRICAAM 47, HISTORY 47

CSRE 78. Art + Community: Division, Resilience & Reconciliation. 1-5 Unit.
Violence and trauma isolates and segregates us. Part of the healing process must be about coming back into community. Freedom is meaningful only insofar as it lifts all, especially those who have been done the most harm. In times of violence and polarization, art can heal and brings people together. In this course, we will explore how we make and sustain community, especially in the face of threats from within and without. We will do this especially through examining how artists and culture workers of color develop and advance practices that build mutuality, criticality, renewal, trust, and joy in the face of ongoing racial injustice and cultural inequity.
Same as: AFRICAAM 78

CSRE 81. Race and the Law: Historical and Contemporary Perspectives. 5 Units.
When Obama began his presidential tenure in 2009, many commentators declared the U.S. a truly colorblind society, a place where race (read: non-whiteness) no longer served as an impediment to individual and group aspirations, indeed had become so insignificant as to be practically invisible. In late fall 2014,in the aftermath of the police-involved killings of Eric Garner, Michael Brown, and Tamir Rice, society is confronted with a radically different social and political landscape. Yet events like these, while doubtless underscoring the fallaciousness of the equalitarian narrative, are regrettably commonplace. What, if anything, occurred during the intervening years that might explain the apparent displacement of hope by despair? With the advent of the Black Lives Matte movement, the persistence of bias and discrimination against people of color, particularly at the interface of African American males and law enforcement authorities, has attained a place of prominence on the public agenda, presenting a significant opportunity for citizen-activists, legislators, and policymakers to combine forces to effectuate meaningful change. To take advantage of this moment, it is imperative to understand the origins and development of the entrenched structural inequalities manifest in contemporary America. What role have law and legal institutions played in hindering and facilitating the promise of equality for all citizens? How far are we from realizing that vaunted democratic aspiration? This course offers participants an opportunity to systematically engage with recent events in Baltimore, Ferguson, and elsewhere in an historically informed manner that foregrounds questions of race, citizenship, and law. Against the backdrop of the achievements of the Civil Rights Movement, it considers such topics as the rise of urban ghettos and the use of segregationist practices like redlining and steering in helping to sustain them; resegregation in the late 20th-early 21st century; differential arrest and sentencing patterns; and, crucially, the extraordinary growth of the American carceral state.
Same as: AMSTUD 108

CSRE 82G. Making Palestine Visible. 3-5 Units.
Israel-Palestine is one of the most difficult subjects to talk about, in large part because we in the United States do not have much exposure to Palestinian history, culture, and politics in their own terms. This course aims to humanize Palestinians and asks why Palestinian claims to rights are illegible for much of the American public. We begin to answer this question by examining a broad sampling of history, structures of power and law, culture, and contemporary political issues.
Same as: HISTORY 82G, HISTORY 182G

CSRE 85B. Jews in the Contemporary World: The American Jewish Present & Past in Popular Culture, Film, & TV. 3 Units.
(HISTORY 85B is 3 units; HISTORY 185B is 5 units.) Who are American Jews as depicted in popular media-- film, television, etc.-- since the Second World War? How are their religion, politics, mores, and practices represented and what ways, if at all, do such portraits reflect historical trends among Jews and society in general? What can be learned from film or tv about Jewish identity, notions of Jewish power and powerlessness, communal cohesiveness and assimilation, sexuality and the wages of intermarriage or race?.
Same as: HISTORY 85B, JEWISHST 85B, REES 85B

CSRE 88. Who We Be: Art, Images & Race in Post-Civil Rights America. 2-4 Units.
Over the past half-century, the U.S. has seen profound demographic and cultural change. But racial progress still seems distant. After the faith of the civil rights movement, the fervor of multiculturalism, and even the brief euphoria of a post-racial moment, we remain a nation divided. Resegregation is the norm. The culture wars flare as hot as ever.nnThis course takes a close examination of visual culture¿particularly images, works, and ideas in the contemporary arts, justice movements, and popular culture¿to discuss North American demographic and cultural change and cultural politics over the past half-century. From the Watts uprising to the #BlackLivesMatter movement, from multiculturalism through hip-hop to post-identity art, we will deeply explore the questions: How do Americans see race now? Do we see each other any more clearly than before?.
Same as: AFRICAAM 188, ARTHIST 154B

CSRE 89. Race, Ethnicity, and Electoral Politics. 4 Units.
This course explores the role that racial and ethnic politics play in American political campaigns and elections. This will include readings that explore the power of ethnoracial voting blocs (e.g. the Black vote and the Latino vote), as well as the challenges and advantages of candidates that are people of color. We will discuss how changing demographics are changing the political landscape, and how candidates and political parties are responding to those changes. This will include, of course, significant attention to ongoing battles at the national (e.g. Trump v. Clinton), state (e.g. Kamala Harris v. Loretta Sanchez), and local levels, most often in California but in other geographic areas as well. We will also explore historic candidacies and elections (e.g. Jesse Jackson) and political parties (e.g. La Raza Unida party) that help put the 2016 races into perspective.
Same as: AMSTUD 89

CSRE 91. Exploring American Religious History. 4 Units.
This course will trace how contemporary beliefs and practices connect to historical trends in the American religious landscape.
Same as: AMSTUD 91, HISTORY 260K, RELIGST 91

CSRE 91D. Asian American Autobiography/W. 3-5 Units.
This is a dual purpose class: a writing workshop in which you will generate autobiographical vignettes/essays as well as a reading seminar featuring prose from a wide range of contemporary Asian-American writers. Some of the many questions we will consider are: What exactly is Asian-American memoir? Are there salient subjects and tropes that define the literature? And in what ways do our writerly interactions both resistant and assimilative with a predominantly non-Asian context in turn recreate that context? We'll be working/experimenting with various modes of telling, including personal essay, the epistolary form, verse, and even fictional scenarios. First priority to undergrads. Students must attend the first class meeting to retain their roster spot.
Same as: AMSTUD 91A, ASNAMST 91A, ENGLISH 91A

CSRE 92D. Arab and Arab-American Poetry. 5 Units.
In this introductory course, students will write and read widely, exploring various aspects of poetic craft, including imagery, metaphor, line, stanza, music, rhythm, diction, and tone. The course will focus primarily on the rich and varied tradition of Arab and Arab-American poets, with a special emphasis on contemporary poets exploring the intersections of cultural identity, nationhood, race, gender, and sexuality. The first half of the course will consist of close reading a selection of poems, while the second half of the course will consist of workshopping student writing. Through peer critique, students respond closely to the work of fellow writers in a supportive workshop. Writers at all levels of experience and comfort with poetry are welcome.nNOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.
Same as: ENGLISH 92AP

CSRE 94. Topics in Writing and Rhetoric: Empathy, Ethics, and Compassion Meditation. 4 Units.
Does not fulfill NSC requirement. In this course, we'll extend this discussion by expanding our thinking about rhetoric as a means of persuasion to consider its relation to empathy-as a mode of listening to and understanding audiences and communities we identify with as well as those whose beliefs and actions can be lethal. We'll also practice compassion medication and empathetic rhetoric to see how these ethical stances affect us individually and investigate the ways they may and may not be scaled to address social justice more broadly. Finally, with the course readings and discussions in mind, you will explore a social justice issue and create an essay, a workshop, campaign or movement strategy, podcast, vlog, infographic, Facebook group, syllabus, etc. to help move us closer to positive change. Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For topics, see https://undergrad.stanford.edu/programs/pwr/courses/advanced-pwr-courses.
Same as: PWR 194DH

CSRE 95. Liberation Through Land: Organic Gardening and Racial Justice. 2 Units.
Through field trips, practical work and readings, this course provides students with the tools to begin cultivating a relationship to land that focuses on direct engagement with sustainable gardening, from seed to harvest. The course will take place on the O'Donohue Family Stanford Educational Farm, where students will be given the opportunity to learn how to sow seeds, prepare garden beds, amend soils, build compost, and take care of plants. The history of forced farm labor in the U.S., from slavery to low-wage migrant labor, means that many people of color encounter agricultural spaces as sites of trauma and oppression. In this course we will explore the potential for revisiting a narrative of peaceful relation to land and crop that existed long before the trauma occurred, acknowledging the beautiful history of POC coexistence with land. Since this is a practical course, there will be a strong emphasis on participation. Application available at https://goo.gl/forms/cbYX3gSGdrHgHBJH3; deadline to apply is September 18, 2018, at midnight. The course is co-sponsored by the Institute for Diversity in the Arts (IDA) and the Earth Systems Program.
Same as: AFRICAAM 95, EARTHSYS 95

CSRE 95I. Space, Public Discourse and Revolutionary Practices. 3-4 Units.
This course examines the mediums of public art that have been voices of social change, protestnand expressions of community desire. It will offer a unique glimpse into Iran¿sncontemporary art and visual culture through the investigation of public art practices such asngraffiti and street art, as well as older traditions of Naghali and Iranian Coffeehouse Painting.nnBeginning Iranian case studies will be expanded in comparison with global examples that spannprojects that include Insite (San Diego/Tijuana), Project Row Houses (Houston, TX) the DMZnProject (Korea), Munster Skulpture Projects (Germany), among others. Students will alsonexamine the infrastructural conditions of public art, such as civic, public, and private funding,nrelationships with local communities, and the life of these projects as they move in and out ofnthe artworld. This encompassing view anchors a legacy of Iranian cultural contributions in largerntrajectories of art history, contemporary art, and community arts practice. Guest artists,ncurators, and researchers with site visits included. Students will propose either new public artnproposals, exhibitions, or research to provoke their own ideas while engaging the ever changingnstate of public discourse in these case studies.
Same as: ARTHIST 118A, GLOBAL 145

CSRE 100. Grassroots Community Organizing: Building Power for Collective Liberation. 3-5 Units.
Taught by long-time community organizer, Beatriz Herrera. This course explores the theory, practice and history of grassroots community organizing as a method for developing community power to promoting social justice. We will develop skills for 1-on-1 relational meetings, media messaging, fundraising strategies, power structure analysis, and strategies organizing across racial/ethnic difference. And we will contextualize these through the theories and practices developed in the racial, gender, queer, environmental, immigrant, housing and economic justice movements to better understand how organizing has been used to engage communities in the process of social change. Through this class, students will gain the hard skills and analytical tools needed to successfully organize campaigns and movements that work to address complex systems of power, privilege, and oppression. As a Community-Engaged Learning course, students will work directly with community organizations on campaigns to address community needs, deepen their knowledge of theory and history through hands-on practice, and develop a critical analysis of inequality at the structural and interpersonal levels. Placements with community organizations are limited. Enrollment will be determined on the first day through a simple application process. Students will have the option to continue the course for a second quarter in the Winter, where they will execute a campaign either on campus or in collaboration with their community partner.
Same as: AFRICAAM 100, FEMGEN 100X, URBANST 108

CSRE 100B. Grassroots Community Organizing Field Work. 1-5 Unit.
Continuation of projects and community engagement from CSRE 100. Prerequisite: completion of CSRE 100.

CSRE 100P. Student and Community Organizing for Social Change. 3 Units.
CSRE 100P is a series of community organizing trainings focused on how to use grassroots techniques as a means of political participation. The course is run in partnership with Stanford in Government (SIG), Associated Students of Stanford University (ASSU), and different campus groups. Students will have the opportunity to hear from top experts in grassroots and community organizing. They will also have the chance to engage directly with the speakers on how their experiences have shaped their approach to and understanding political organizing in the current political environment. This course will meet over six sessions, two Friday sessions and four Saturday sessions. Dates of Saturday Trainings are April 13, May 4, May 11and June 1. Friday sessions are April 5th and June 7th (12:00pm-2:00pm).

CSRE 101P. Student and Community Organizing for Social Change. 3 Units.
This course explores student and community organizing history, theories of practice, as well as models of social change through a mix of guest speakers from social justice groups, theoretical readings and practicum-based work. The major component of this course is participating in an intensive three-day skills-based training that will teach students how to be more strategic in their fight for justice on campus and in the community. The training consists of a series of presentations, exercises, and discussions that teach sets of skills and concepts related to student and community organizing. The course is designed for students with interests in student and community organizing, as well as those considering careers and leadership opportunities in a variety of nonprofit and social justice fields. This is designated as a one-unit course, with a community engaged learning option for two additional units. The dates for the intensive skills-based training will be May 4th-6th. The training is required.

CSRE 102A. Art and Social Criticism. 5 Units.
Visual artists have long been in the forefront of social criticism in America. Since the 1960s, various visual strategies have helped emergent progressive political movements articulate and represent complex social issues. Which artists and particular art works/projects have become key anchors for discourses on racism, sexism, economic and social inequality, immigrant rights and climate change? We will learn about a spectrum of political art designed to raise social awareness, spark social change and rouse protest. The Art Workers Coalition's agit-prop opposing the Vietnam War and ACT-UP's emblematic signs and symbols during the AIDS/HIV crisis of the 1980s galvanized a generation into action. Works such as Judy Chicago's The Dinner Party (1979), Fred Wilson's Mining the Museum (1992), and Glenn Ligon's paintings appropriating fragments from African-American literature all raised awareness by excavating historical evidence of the long legacy resisting marginalization. For three decades feminist artists Adrian Piper, Barbara Kruger and the Guerilla Girls have combined institutional critique and direct address into a provocative form of criticality. Recent art for social justice is reaching ever broadening publics by redrawing the role of artist and audience exemplified by the democratization of poster making and internet campaigns of Occupy and the Movement for Black Lives. We will also consider the collective aesthetic activisms in the Post-Occupy era including Global Ultra Luxury Faction, Climate Justice art projects, and the visual culture of Trump era mass protests. Why are each of these examples successful as influential and enduring markers of social criticism? What have these socially responsive practices contributed to our understanding of American history?.

CSRE 103. Intergroup Communication. 3 Units.
In an increasingly globalized world, our ability to connect and engage with new audiences is directly correlated with our competence and success in any field How do our intergroup perceptions and reactions influence our skills as communicators? This course uses experiential activities and discussion sections to explore the role of social identity in effective communication. The objective of the course is to examine and challenge our explicit and implicit assumptions about various groups to enhance our ability to successfully communicate across the complex web of identity. NOTE: Please check the Notes section under each quarter to view the current enrollment survey.
Same as: PSYCH 103

CSRE 103B. Race, Ethnicity, and Linguistic Diversity in Classrooms: Sociocultural Theory and Practices. 3-5 Units.
Focus is on classrooms with students from diverse racial, ethnic and linguistic backgrounds. Studies, writing, and media representation of urban and diverse school settings; implications for transforming teaching and learning. Issues related to developing teachers with attitudes, dispositions, and skills necessary to teach diverse students.
Same as: AFRICAAM 106, EDUC 103B, EDUC 337

CSRE 103F. Intergroup Communication Facilitation. 2 Units.
Are you interested in strengthening your skills as a facilitator or section leader? Interested in opening up dialogue around identity within your community or among friends? This course will provide you with facilitation tools and practice, but an equal part of the heart of this class will come from your own reflection on the particular strengths and challenges you may bring to facilitation and how to craft a personal style that works best for you. This reflection process is ongoing, for the instructors as well as the students.
Same as: PSYCH 103F

CSRE 103S. Gender in Native American Societies. 5 Units.
Seminar examines the impact of colonialism on gender roles & gender relations in American Indian communities beginning with the 17th century to the present. Topics include demographic changes; social, political & economic transformations associated with biological & spiritual assaults; the dynamism & diversity of native societies. Sources include history, ethnography, biography, autobiography, the novel & film.
Same as: FEMGEN 103S, NATIVEAM 103S

CSRE 105. Religion and War in America. 4 Units.
Scholars have devoted much attention to wars in American history, but have not agreed as to whether religion was a major cause or simply a cover for political, economic, and other motives. We will compare interpretations that leave religion out, with those that take it into account. We will also look at the impact of war on the religious lives of ordinary Americans. We will examine both secondary as well as primary sources, beginning with King Philip's War in the 17th century, and ending with the "War on Terror" in the present day.
Same as: AMSTUD 105R, HISTORY 254D, HISTORY 354D, RELIGST 105

CSRE 105C. Human Trafficking: Historical, Legal, and Medical Perspectives. 5 Units.
(Same as HISTORY 5C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution, labor exploitation, and organ trade, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning. Required weekly 50-min. discussion section, time TBD. Students interested in service learning should consult with the instructor and will enroll in an additional course.
Same as: FEMGEN 105C, HISTORY 105C, HUMRTS 112, INTNLREL 105C

CSRE 106A. A.I.-Activism-Art. 3-5 Units.
Lecture/studio course exploring arts and humanities scholarship and practice engaging with, and generated by, emerging emerging and exponential technologies. Our course will explore intersections of art and artificial intelligence with an emphasis on social impact and racial justice. Open to all undergraduates.
Same as: ARTHIST 168A, ENGLISH 106A

CSRE 107. The Black Mediterranean: Greece, Rome and Antiquity. 4-5 Units.
Explore problems of race and ethnicity as viable criteria in studying ancient societies and consider the question, What is the Mediterranean?, in relation to premodern evidence. Investigate the role of blackness as a marker of ethnicity; the demography of slavery and its roles in forming social identities; and environmental determinism as a factor in ethnic and racial thinking. Consider Greek and Roman perspectives and behavior, and their impact on later theories of race and ethnicity as well as the Mediterranean as a whole.
Same as: AFRICAAM 107C

CSRE 108. Introduction to Feminist, Gender, and Sexuality Studies. 4-5 Units.
Introduction to interdisciplinary approaches to gender, sexuality, queer, trans and feminist studies. Topics include the emergence of sexuality studies in the academy, social justice and new subjects, science and technology, art and activism, history, film and memory, the documentation and performance of difference, and relevant socio-economic and political formations such as work and the family. Students learn to think critically about race, gender, and sexuality from local and global perspectives.
Same as: AMSTUD 107, FEMGEN 101, TAPS 108

CSRE 108S. American Indian Religious Freedom. 3 Units.
The persistence of tribal spiritual beliefs and practices in light of legal challenges (sacred geography and the 1st Amendment), treatment of the dead and sacred objects (repatriation), consumerism (New Age commodification), and cultural intellectual property protection (trademark, copyright, patent law). Focus is on contemporary issues and cases, analyzed through interdisciplinary scholarship and practical strategies to protect the fundamental liberty of American Indian religious freedom.
Same as: NATIVEAM 108S

CSRE 108X. The Changing Face of America. 4-5 Units.
This upper-division seminar will explore some of the most significant issues related to educational access and equity facing American society in the 21st century. Designed for students with significant leadership potential who have already studied these topics in lecture format, this seminar will focus on in-depth analysis of the impact of race on educational access and a variety of educational reform initiatives. Please submit a brief statement with "EDUC 108" in the subject line that details your reasons for applying and what leadership skills, experience, and perspectives you would contribute to the course to: Ginny Smith (gsmith@law.stanford.edu) and Wilson Tong (wtong@commonsense.org). The deadline is rolling.
Same as: EDUC 108, POLISCI 226A

CSRE 109A. Federal Indian Law. 3 Units.
Cases, legislation, comparative justice models, and historical and cultural material. The interlocking relationships of tribal, federal, and state governments. Emphasis is on economic development, religious freedom, and environmental justice issues in Indian country.
Same as: NATIVEAM 109A

CSRE 109B. Native Nation Building. 3 Units.
The history of competing tribal and Western economic models, and the legal, political, social, and cultural implications for tribal economic development. Case studies include mineral resource extraction, gaming, and cultural tourism. 21st-century strategies for sustainable economic development and protection of political and cultural sovereignty.
Same as: NATIVEAM 109B

CSRE 110P. Mindful Leadership. 1-2 Unit.
An exploration of one's inner life, ways of being in the world, and their expression in how one leads. Addresses the paradoxical task of merely paying attention to enhance our awareness of the socially constructed nature of reality and to feel comfortable to act with simplicity, empathy, and conviction. Through self-reflection, embodied practice, and creative expression through crossing borders students examine us and them. Mindful inquiry in expressed storytelling, collective knowing, appreciative intelligence, and is both scholarly and experiential.
Same as: LEAD 110

CSRE 112X. Urban Education. 3-5 Units.
(Graduate students register for EDUC 212 or SOC 229X). Combination of social science and historical perspectives trace the major developments, contexts, tensions, challenges, and policy issues of urban education.
Same as: AFRICAAM 112, EDUC 112, EDUC 212, SOC 129X, SOC 229X

CSRE 113V. Freedom in Chains: Black Slavery in the Atlantic, 1400s-1800s. 3-5 Units.
This course will focus on the history of slavery in the British, French, Spanish, Portuguese and Dutch Atlantic world(s), from the late 1400s to the 1800s. Its main focus will be on the experiences of enslaved Africans and their descendants. Between the sixteenth and nineteenth centuries, the Europeans forcibly embarked over 10 million Africans to the Americas. Drawing on methodologies used by historians, archaeologists and anthropologists, the course will reconstruct the daily lives and the socio-economic, cultural and political histories of these captives. We will seek to hear their voices by investigating a variety of historical testimonies and recent scholarship. The course will examine slavery in the context of broader trends in Atlantic World studies, a field that has grown considerably in recent years, providing new ways of understanding historical developments across national boundaries. We will seek to identify commonalities and differences across time periods and regions and the reasons for those differences. Covered topics will include slave ship voyages, labor, agency, the creation of new identities (creolization), religion, race, gender, resistance, legacies, and memory.
Same as: AFRICAAM 113V, AFRICAST 113V, HISTORY 205D

CSRE 114C. America Never was America to me: Race and Equity in US Public Schools. 1 Unit.
This cross-disciplinary course will use the 10-part docu-series "America to Me" to discuss the complexities of race and equity in US schools. The series follows a year in the life of a racially diverse, well-resourced high school outside Chicago, providing an in-depth look at the effects of race, equity, culture and privilege on educational opportunities, and offers insights into the teenage search for personal identity in today's climate. Two of the people featured in the series will be a part of the class, and after screening each episode, a Stanford professor will give a short talk inspired by the content of that episode. The talks will span several disciplines and theoretical perspectives, including Critical Race Theory, History, Psychology, Youth Development, Film Studies, Linguistics, and Teacher Education. Following each talk, students will engage in critical discussion around race and equity in education. Episode 10 will air during Final Exam week, but there will be no final exam.
Same as: AFRICAAM 114C, EDUC 114C, EDUC 314C

CSRE 116. Decolonizing the Indigenous Classroom. 3-5 Units.
Using Indigenous and decolonizing perspectives on education, this interdisciplinary course will examine interaction and language in cross-cultural educational situations, including language, literacy and interethnic communication as they relate to Indigenous American classrooms. Special attention will be paid to implications of social, cultural and linguistic diversity for educational practice, along with various strategies for bridging intercultural differences between schools and Native communities.
Same as: CSRE 302, EDUC 186, EDUC 286, NATIVEAM 116

CSRE 117. Expanding Engineering Limits: Culture, Diversity, and Equity. 3 Units.
This course investigates how culture and diversity shape who becomes an engineer, what problems get solved, and the quality of designs, technology, and products. As a course community, we consider how cultural beliefs about race, ethnicity, gender, sexuality, abilities, socioeconomic status, and other intersectional aspects of identity interact with beliefs about engineering, influence diversity in the field, and affect equity in engineering education and practice. We also explore how engineering cultures and environments respond to and change with individual and institutional agency. The course involves weekly presentations by scholars and engineers, readings, short writing assignments, small-group discussion, and hands-on, student-driven projects. Students can enroll in the course for 1 unit (lectures only), or 3 units (lectures+discussion+project). For 1 unit, students should sign up for Section 1 and Credit/No Credit grading, and for 3 units students should sign up for Section 2 and either the C/NC or Grade option.
Same as: CSRE 217, ENGR 117, ENGR 217, FEMGEN 117, FEMGEN 217

CSRE 117D. Race, Gender, and Sexuality in Contemporary American Film. 4-5 Units.
This course introduces students to the theoretical and analytical frameworks necessary to critically understand constructions of race, gender, and sexuality in contemporary American film. Through a sustained engagement with a range of independent and Hollywood films produced since 2000, students analyze the ways that cinematic representations have both reflected and constructed dominant notions of race, gender, and sexuality in the United States. Utilizing an intersectional framework that sees race, gender, and sexuality as always defined by one another, the course examines the ways that dominant notions of difference have been maintained and contested through film in the United States. Readings include work by Michael Omi & Howard Winant, Patricia Hill Collins, Jodi Melamed, Stuart Hall, Lisa Duggan and bell hooks. Films to be discussed include Moonlight, Mosquita y Mari, Kumu Hina, Hustlers, and Crazy Rich Asians. To enroll in the course, please fill out the following form: https://forms.gle/RKqURW6niyB1LRyEA.
Same as: AFRICAAM 117J, AMSTUD 117, ASNAMST 117D, FEMGEN 117F

CSRE 117Q. Queer Arts: Remembering and Imagining Social Change. 4-5 Units.
This interdisciplinary fine arts course is designed to examine the nature of artistic imagination, sources of creativity and the way this work helps shape social change. We will consider the relationship among muses, mentors and models for queer artists engaged in such fields as visual art, music, theatre, film, creative writing and dance. Exploring various cultures, lands and times, we will study the relationship between memory and vision in serious art. We will ask questions about the role of the artist in the academy and the broader social responsibility of the artist. We will locate some of the similarities and differences among artists, engage with different disciplines, and discover what we can learn from one another. This seminar requires the strong voices of all participants. To encourage students to take their ideas and questions beyond the classroom, we will be attending art events (performances, exhibits, readings) individually and in groups.nnThe learning goals include a serious exploration of individual students¿ creativity, a more nuanced appreciation of diverse arts and a stronger understanding of the multifaceted nature of gender, race and class. Students will develop their abilities to write well-argued papers. They will stretch their imaginations in the written and oral assignments. And they will grow more confident as public speakers and seminar participants.
Same as: FEMGEN 117Q

CSRE 117S. History of Native Americans in California. 3-5 Units.
This course examines the political histories and cultural themes of Native Americans in California, 1700s1950s. Throughout the semester we will focus on: demographics, diversity of tribal cultures; regional environmental backgrounds; the Spanish Era and missionization; the Mexican Era and secularization; relations with the United States Government and the State of California, including the gold rush period, statehood, unratified treaties, origin of reservations/rancherias, and other federal policies, e.g., Allotment Act, Indian Reorganization Act and termination.
Same as: HISTORY 250A, NATIVEAM 117S

CSRE 118D. Musics and Appropriation Throughout the World. 3 Units.
This course critically examines musical practices and appropriation through the amplification of intersectionality. We consider musics globally through recourse to ethnomusicological literature and critical race theories. Our approach begins from an understanding that the social and political contexts where musics are created, disseminated, and consumed inform disparate interpretations and meanings of music, as well as its sounds. Our goal is to shape our ears to hear the effects of slavery, colonialism, capitalism, nationalism, class, gender difference, militarism, and activism. We interrogate the process of appropriating musics throughout the world by making the power structures that shape privileges and exclusions audible.
Same as: AFRICAAM 218, MUSIC 118

CSRE 118E. Heritage, Environment, and Sovereignty in Hawaii. 4 Units.
This course explores the cultural, political economic, and environmental status of contemporary Hawaiians. What sorts of sustainable economic and environmental systems did Hawaiians use in prehistory? How was colonization of the Hawaiian Islands informed and shaped by American economic interests and the nascent imperialism of the early 20th centrury? How was sovereignty and Native Hawaiian identity been shaped by these forces? How has tourism and the leisure industry affected the natural environment? This course uses archaeological methods, ethnohistorical sources, and historical analysis in an exploration of contemporary Hawaiian social economic and political life.
Same as: EARTHSYS 118, NATIVEAM 118

CSRE 118S. Critical Family History: Narratives of Identity and Difference. 4 Units.
This course examines family history as a site for understanding identity, power, and social difference in American society. Focusing in particular on the intersections of race, gender, and sexuality, we approach the family as an archive through which we might write alternative histories to the ones that dominate the national historical consciousness. To do this, we examine memoirs, oral histories, and first-person documentaries as historical texts that can be used to foreground marginalized historical voices. Students will then be asked to apply course readings and theories to their own family histories as a means of better understanding issues of identity and difference.
Same as: AFRICAAM 118X, AMSTUD 118, ASNAMST 118S

CSRE 119. Novel Perspectives on South Africa. 2-3 Units.
21st-century South Africa continues its literary effervescence. In this class we'll sample some recent novels and related writings to tease out the issues shaping the country (and to some degree the continent) at present. Is `South African literature' a meaningful category today? What are the most significant features we can identify in new writings and how do they relate to contemporary social dynamics? The course will appeal to anyone interested in present-day Cape Town or Johannesburg, including students who have spent a term in BOSP-Cape Town or plan to do so in future. Both undergraduate and graduate students are welcome. 2-3 units. Course may be repeated for credit.nn nnAll students will write short analyses from the prescribed texts. Students taking the course for three units will write an extended essay on a topic agreed with the instructor.
Same as: AFRICAAM 119, AFRICAAM 219, AFRICAST 119, AFRICAST 219

CSRE 120P. Poverty and Inequality in Israel and the US: A Comparative Approach. 3 Units.
Poverty rates in Israel are high and have been relatively stable in recent decades, with about one fifth of all households (and a third of all children) living below the poverty line. In this class we will learn about poverty and inequality in Israel and we will compare with the US and other countries.nnIn the first few weeks of this class we will review basic theories of poverty and inequality and we will discuss how theories regarding poverty have changed over the years, from the "culture of poverty" to theories of welfare state regimes. We will also learn about various ways of measuring poverty, material hardship, and inequality, and we will review the methods and data used.nnIn the remaining weeks of the class we will turn to substantive topics such as gender, immigration, ethnicity/nationality, welfare policy, age, and health. Within each topic we will survey the debates within contemporary scholarship and we will compare Israel and the US. Examination of these issues will introduce students to some of the challenges that Israeli society faces today.
Same as: JEWISHST 131VP, SOC 120VP

CSRE 121. Discourse of the Colonized: Native American and Indigenous Voices. 5 Units.
Using the assigned texts covering the protest movements in the 20th century to the texts written from the perspective of the colonized at the end of the 20th century, students will engage in discussions on decolonization. Students will be encouraged to critically explore issues of interest through two short papers and a 15-20 minute presentation on the topic of interest relating to decolonization for Native Americans in one longer paper. Approaching research from an Indigenous perspective will be encouraged throughout.
Same as: NATIVEAM 121

CSRE 121L. Racial-Ethnic Politics in US. 5 Units.
Why is contemporary American politics so sharply divided along racial and party lines? Are undocumented immigrants really more likely to commit crimes than U.S. citizens? What makes a political ad "racist?" The U.S. population will be majority-minority by 2050; what does this mean for future electoral outcomes? We will tackle such questions in this course, which examines various issues surrounding the development of political solidarity within racial groups; the politics of immigration, acculturation, and identification; and the influence of race on public opinion, political behavior, the media, and in the criminal justice system. Prior coursework in Economics or Statistics strongly recommended.
Same as: POLISCI 121L, PUBLPOL 121L

CSRE 122B. Reality Television and All Things Basic. 3-5 Units.
In ¿Visual Pleasure and Narrative Cinema¿ (1975), feminist film theorist Laura Mulvey argues that ¿the cinema poses questions of the ways the unconscious (formed by the dominant order) structures ways of seeing and pleasure in looking,¿ (804-805), conceptualizing what has become ubiquitously known as ¿the male gaze.¿ Mulvey's theory of the male gaze in film centers on two processes, the pleasures produced through objectification and those produced through identification. Feminists of color who study the politics of popular media have critiqued as well as expanded on Mulvey's notion of the male gaze, including bell hook's articulation of an oppositional gaze¿a critical gaze¿a possible site of resistance for colonized black people.nnWithin the last two decades, reality television has become a staple of popular culture in the U.S., a key component of the representational politics of audiovisual media. Thinking the processes of objectification and identification more expansively and privileging bell hook¿s formulation of critical spectatorship, what types of pleasures are produced through the addition of the category ¿reality? ¿ How does this relate to our understandings of racialized gender in the U.S.? Is reality television ¿this generation¿s¿ soap opera, a feminized genre of (melo)drama? And does this form of reality simply reproduce the heteronormative order, or can this form of media ever subvert normative prescriptions regarding gender, age, race, class, and sex(uality)?.
Same as: FEMGEN 122

CSRE 122E. Art in the Streets: Identity in Murals, Site-specific works, and Interventions in Public Spaces. 4 Units.
This class will introduce students to both historical and contemporary public art practices and the expression of race and identity through murals, graffiti, site-specific works and performative interventions in public spaces. Involving lectures, guest speakers, field trips, and hands-on art practice, students will be expected to produce both an individual and group piece as a final project.
Same as: AFRICAAM 122E

CSRE 122F. Histories of Race in Science and Medicine at Home and Abroad. 4 Units.
This course has as its primary objective, the historical study of the intersection of race, science and medicine in the US and abroad with an emphasis on Africa and its Diasporas in the US. By drawing on literature from history, science and technology studies, sociology and other related disciplines, the course will consider the sociological and cultural concept of race and its usefulness as an analytical category. The course will explore how the study of race became its own ¿science¿ in the late-Enlightenment era, the history of eugenics--a science of race aimed at the ostensible betterment of the overall population through the systematic killing or "letting die" of humanity¿s "undesirable" parts, discuss how the ideology of pseudo-scientific racism underpinned the health policies of the French and British Empires in Africa, explore the fraught relationship between race and medicine in the US, discuss how biological notions of race have quietly slipped back into scientific projects in the 21st century and explore how various social justice advocates and scholars have resisted the scientific racisms of the present and future and/or proposed new paths towards a more equitable and accessible science.
Same as: AFRICAAM 122F, AFRICAST 122F, HISTORY 248D

CSRE 122S. Social Class, Race, Ethnicity, and Health. 4 Units.
Examines health disparities in the U.S., looking at the patterns of those disparities and their root causes. Explores the intersection of lower social class and ethnic minority status in affecting health status and access to health care. Compares social and biological conceptualizations of race and ethnicity. Upper division course with preference given to upperclassmen. Prerequisite: Human Biology Core or Biology Foundations.
Same as: AFRICAAM 132, HUMBIO 122S

CSRE 123A. American Indians and the Cinema. 5 Units.
Hollywood and the film industry have had a major influence on American society for nearly a century. Initially designed to provide entertainment, the cinema broadened its impact by creating images perceived as real and essentialist. Hollywood's Indians have been the main source of information about who American Indians are and Hollywood has helped shape inaccurate and stereotypical perceptions that continue to exist today. This course looks chronologically at cinematic interpretations and critically examines accurate portrayals of American Indians and of American history.
Same as: NATIVEAM 123A

CSRE 123C. "Third World Problems?" Environmental Anthropology and the Intersectionality of Justice. 3-4 Units.
As the Flint, Michigan water situation began to attract attention and condemnation, Michigan State Representative, Sheldon Neeley, describing the troops on the ground and the Red Cross distributing water bottles, said that the Governor had "turned an American city into a Third World country [...] it's terrible what he's done [...] no fresh water. Then, at a Congressional hearing, the Chairman of the House Oversight & Government Reform Committee said, "This is the United States of America - this isn't supposed to happen here. We are not some Third World country."nWhat is a "third world problem?" This introductory environmental anthropology course examines how such imaginaries materialize in development programmes and literature, and bespeak charged geopolitical and racial histories; and invites reflection on what futures for working in common they enable/constrain. We will examine how crises are imagined and constructed, and the governance regimes they give rise to. How does water - as natural resource, public good, human right, need, or commodity - determine the contours of such regimes? We will also study chronic, quieter environmental problems and the responses they (do not) generate. Working through a variety of writing genres - ethnographies, policy literature, and legal and corporate publicity material - will enable students to appreciate what anthropology can contribute to the conversation on environmental justice, and state and corporate bureaucracies and their mandates. The course draws on examples from a wide range of settings. The course is offered as an introduction to environmental anthropology and takes students through key themes - infrastructure, race, class, privatization, justice, violence - by focusing on water. It requires no background in anthropology.
Same as: ANTHRO 123C

CSRE 123F. Navigating a Multicultural World: Practical recommendations for individuals, groups, & institutions. 4 Units.
The world is becoming increasing multicultural, as groups of different races, ethnicities, ages, genders, and socioeconomic classes are coming into closer and more frequent contact than ever before. With increased cultural contact comes the need to create spaces that are inclusive and culturally sensitive. In addition, individuals must learn to live, work, and communicate in a multicultural world. How can we leverage research from cultural psychology to promote the best possible individual, interpersonal, and institutional outcomes for all groups?nThis course will serve as an introduction on how to create multicultural worlds and individuals.nDrawing heavily on research, this course begins with a review of what culture is and how itninfluences individual thoughts, emotions, and behaviors. We then discuss multiculturalism (e.g.,nwhat is it, what are some costs and benefits) before addressing how to promote optimalnfunctioning in multicultural settings.
Same as: PSYCH 123F

CSRE 124F. The Mothership Connection: Black Science Fiction Across Media. 4 Units.
As science fiction becomes the lingua franca of American popular culture and race takes center stage in our contemporary social and political discourses, the works of black SF creators offer a number of powerful conceptual tools for thinking about race, and particularly for exploring the experience and effects of the African diaspora. This course will consider how black authors, artists, musicians, and filmmakers have responded to or engaged the transmedia genre of SF, as well as the role that race plays in the history of science fiction. What is Afrofuturism, and is it distinct from black science fiction? How does black SF relate to other speculative genres and aesthetics (horror, fantasy, new age, psychedelia, etc.)? Is there something inherently science fictional about the Afro-diasporic experience? How do typical SF tropes - robots, spaceships, technology, the apocalypse, the posthuman - change when considered in the aftermath of the Miiddle Passage and chattel slavery?.
Same as: AFRICAAM 124F

CSRE 125E. Shades of Green: Redesigning and Rethinking the Environmental Justice Movements. 3-5 Units.
Historically, discussions of race, ethnicity, culture, and equity in the environment have been relegated to the environmental justice movement, which often focuses on urban environmental degradation and remains separated from other environmental movements. This course will seek to break out of this limiting discussion. We will explore access to outdoor spaces, definitions of wilderness, who is and isn't included in environmental organizations, gender and the outdoors, how colonialism has influenced ways of knowing, and the future of climate change. The course will also have a design thinking community partnership project. Students will work with partner organizations to problem-solve around issues of access and diversity. We value a diversity of experiences and epistemological beliefs, and therefore undergraduates and graduate students from all disciplines are welcome.
Same as: EARTHSYS 125, EARTHSYS 225, URBANST 125

CSRE 126C. Ethics and Leadership in Public Service. 3-4 Units.
This course explores ethical questions that arise in public service work, as well as leadership theory and skills relevant to public service work. Through readings, discussions, in-class activities, assignments, and guest lectures, students will develop a foundation and vision for a future of ethical and effective service leadership. This course serves as a gateway for interested students to participate in the Haas Center's Public Service Leadership Program.
Same as: EDUC 126A, ETHICSOC 79, URBANST 126A

CSRE 127A. Can't Stop Won't Stop: A History Of The Hip-Hop Arts. 2-4 Units.
This course explores the history and development of the hip-hop arts movement, from its precursor movements in music, dance, visual arts, literature, and folk and street cultures to its rise as a neighborhood subculture in the Bronx in the early 1970s through its local, regional and global expansion and development. Hip-hop aesthetics, structures, and politics will be explored within the context of the movement's rise as a post-multicultural form in an era of neoliberal globalization. (This course must be taken for a letter grade and a minimum of 3 units to satisfy a Ways requirement.).
Same as: AFRICAAM 127A

CSRE 127C. Human in a Time of War. 3-5 Units.
It has often been said that the post-9/11 era has been one of never-ending war for the United States. Privatization and the increasing proliferation of ever more removed technologies of killing have raised questions regarding the disposability of racialized populations targeted for submission or containment. The global, ubiquitous nature of the U.S. military industrial complex has made war synonymous with impunity.nnHowever, racialized populations have arguably been under siege and positioned as disposable since the colonization of the Americas. This course draws upon Alexander Weheliye¿s (2014) challenge to move beyond the particular, querying how racialized, gendered experiences condition more expansive notions of the human. Following Jodi Kim¿s notion of the protracted afterlife of the Cold War as epistemological structure, this course traces the continuities and transformations in constructions of populations as more or less human, from settler colonial conquest to the post-9/11 era. How has racial and gendered violence functioned to determine not only which bodies matter but which lives are legible and which subjects granted the full range of human complexity? Recognizing the ¿layered interconnectedness of political violence, racialization, and the human,¿ this course also engages ¿the existence of alternative modes of life alongside the violence, subjection, exploitation, and racialization that define the modern human¿ (Weheliye, 1-2).

CSRE 128. What We Want is We: Identity in Visual Arts, Social Engagement, and Civic Propositions. 4 Units.
This studio practicum examines contemporary culture through case studies on visual art, race theory, urban studies, and resistance legacies. This class looks at strategies of socially engaged art practices, community building endeavors, and the complications peculiar to these projects. From these case studies, students will make public art/text/performative experiments and learn research and grant writing approaches for designing long-term political projects. Students will translate their research into grant proposals that will be judged by a professional panel during the final week. Course guests include granting agencies/arts foundations and international artists, curators, city planners, and activists (live/video conferences).

CSRE 129. Camus. 4-5 Units.
"The admirable conjunction of a man, of an action, and of a work" for Sartre, "the ideal husband of contemporary letters" for Susan Sontag, reading "Camus's fiction as an element in France's methodically constructed political geography of Algeria" for Edward Said, Camus embodies the very French figure of the "intellectuel engagé," or public intellectual. From his birth in 1913 into a poor European family in Algeria to the Nobel Prize in Literature in 1957, from the Mediterranean world to Paris, Camus engaged in the great ethical and political battles of his time, often embracing controversial positions. Through readings and films, we will explore his multiple legacies. Readings from Albert Camus, Jean-Paul Sartre, Assia Djebar, Kamel Daoud, Mouloud Feraoun, Alice Kaplan, Edward Said, Edwidge Danticat. Students will work on their production of written French, in addition to speaking French and reading comprehension. Taught in French. Students are highly encouraged to complete FRENLANG 124 or to successfully test above this level through the Language Center. This course fulfills the Writing in the Major (WIM) requirement.
Same as: COMPLIT 229B, FRENCH 129, HISTORY 235F

CSRE 130. Community-based Research As Tool for Social Change:Discourses of Equity in Communities & Classrooms. 3-5 Units.
Issues and strategies for studying oral and written discourse as a means for understanding classrooms, students, and teachers, and teaching and learning in educational contexts. The forms and functions of oral and written language in the classroom, emphasizing teacher-student and peer interaction, and student-produced texts. Individual projects utilize discourse analytic techniques.
Same as: AFRICAAM 130, EDUC 123, EDUC 322

CSRE 132A. Social Inequality in Israel. 3 Units.
Like the US, Israel is a nation of immigrants. Israel additionally shares with the US vast economic, ethnic/racial and gender gaps, which are shaped and are being shaped by the demographic diversity characterizing its society. The course will provide a comparative framework for analyzing social inequality in Israel. We will start by reviewing essential concepts and theories in the study of social stratification. We will then review the main cleavages characterizing Israeli society, while comparing them to gaps in other advances societies and particularly the US. We will focus on class, gender and ethnicity as the main distinctions and will examine their implications for differences in life chances in several domains across the life course. We will conclude with a discussion of possible scenarios for change, which are relevant to both Israel and the US. Throughout the course, we will study critical thinking techniques and will use them for analyzing issues that are central for the analysis of social inequality in Israel and elsewhere.
Same as: JEWISHST 132A, SOC 102A

CSRE 132C. Technology and Inequality. 4-5 Units.
In this advanced interdisciplinary seminar we will examine the ways that technologies aimed to make human lives better (healthier, freer, more connected, and informed) often also harbor the potential to exacerbate social inequalities. Drawing from readings in the social sciences on power and ethics, we will pay special attention to issues of wealth, race, ethnicity, sex, gender, globalization and humanitarianism.
Same as: ANTHRO 132C

CSRE 132J. Sociology of Jewishness. 3-5 Units.
Examines the place of the Jewish people in society throughout various locales and historical periods to understand how interactions among Jews and with other groups have shaped Jewish identities. Topics include modernism, the Holocaust, Israel/nationhood, race/ethnicity, intermarriage, and assimilation. Uses theoretical, empirical, and historical material from multiple social scientific fields of study and explores the study of Judaism from several major sociological lenses.
Same as: JEWISHST 132D, SOC 132J

CSRE 133E. Literature and Society in Africa and the Caribbean. 4 Units.
This course explores texts and films from Francophone Africa and the Caribbean in the 20th and 21st centuries. The course will explore the connections between Sub-Saharan Africa, the Maghreb and the Caribbean through both foundational and contemporary works while considering their engagement with the historical and political contexts in which they were produced. This course will also serve to improve students' speaking and writing skills in French while sharpening their knowledge of the linguistic and conceptual tools needed to conduct literary analysis. The diverse topics discussed in the course will include national and cultural identity, race and class, gender and sexuality, orality and textuality, transnationalism and migration, colonialism and decolonization, history and memory, and the politics of language. Readings include the works of writers and filmmakers such as Djibril Tamsir Niane, Léopold Senghor, Aimé Césaire, Albert Memmi, Patrick Chamoiseau, Leonora Miano, Leila Slimani, Dani Laferrière and Ousmane Sembène. Taught in French. Students are highly encouraged to complete FRENLANG 124 or to successfully test above this level through the Language Center. This course fulfills the Writing in the Major (WIM) requirement.
Same as: AFRICAAM 133, AFRICAST 132, COMPLIT 133A, COMPLIT 233A, FRENCH 133, JEWISHST 143

CSRE 133J. WELFARE, WORK AND POVERTY.. 3 Units.
Early theorists of the welfare state described it as a reaction to the emergence of needs and interests of specific social groups during processes of economic development and change. Later theorists countered that the welfare state does not merely react to social cleavages during times of economic change but rather works to actively shape them, in line with worldviews or the interests of dominant group members. Adopting the latter approach, the goal of this course is to provide the tools and knowledge necessary for a critical evaluation of the social services provided to Israeli citizens and their impact on social and economic inequalities. The course will survey various approaches to the understanding of the goals of the welfare state. A comparative and historical account of the development of the welfare state will be presented, while highlighting recent developments, such as the increase in poverty rates and the aging of the population. During the course, we will examine the diverse needs that are served by the welfare state, as well as major dilemmas associated with the provision of services. Throughout the course, we will study critical thinking techniques and will use them for analyzing issues that are central for the development of social policies in Israel and the US.
Same as: JEWISHST 133A, SOC 103A

CSRE 133P. Ethics and Politics in Public Service. 4 Units.
This course examines ethical and political questions that arise in doing public service work, whether volunteering, service learning, humanitarian endeavors overseas, or public service professions such as medicine and teaching. What motives do people have to engage in public service work? Are self-interested motives troublesome? What is the connection between service work and justice? Should the government or schools require citizens or students to perform service work? Is mandatory service an oxymoron?.
Same as: POLISCI 133Z, PUBLPOL 103Z, URBANST 122Z

CSRE 135P. The Psychology of Diverse Community. 3 Units.
This course is an exploration. Its aim is to identify distinguishing features of good diverse communities and articulate them well enough to offer principles or guidelines for how to design and mange such communities e.g. schools, universities, academic disciplines, etc.
Same as: PSYCH 135

CSRE 136. White Identity Politics. 3-5 Units.
Pundits proclaim that the 2016 Presidential election marks the rise of white identity politics in the United States. Drawing from the field of whiteness studies and from contemporary writings that push whiteness studies in new directions, this upper-level seminar asks, does white identity politics exist? How is a concept like white identity to be understood in relation to white nationalism, white supremacy, white privilege, and whiteness? We will survey the field of whiteness studies, scholarship on the intersection of race, class, and geography, and writings on whiteness in the United States by contemporary public thinkers, to critically interrogate the terms used to describe whiteness and white identities. Students will consider the perils and possibilities of different political practices, including abolishing whiteness or coming to terms with white identity. What is the future of whiteness? n*Enrolled students will be contacted regarding the location of the course.
Same as: AFRICAAM 136B, ANTHRO 136B

CSRE 136A. Interfaith Dialogue on Campus: Religion, Diversity, and Higher Education. 2-5 Units.
How are we to talk across religious and spiritual differences? What is the purpose of such dialogues? What do we hope to gain from them? How do such dialogues take shape on college campuses, and what do they indicate about how students cultivate spiritual, political, and civic commitments? This course will explore these questions and others through seminar discussions, fieldwork, and writing that will examine the concepts, assumptions, and principles that shape how we think about interfaith dialogue.
Same as: AMSTUD 236, EDUC 436, RELIGST 336X

CSRE 136U. The Psychology of Scarcity: Its Implications for Psychological Functioning and Education. 3 Units.
This course brings together several literatures on the psychological, neurological, behavioral and learning impact of scarcities, especially those of money (poverty) time and food. It will identify the known psychological hallmarks of these scarcities and explore their implications for psychological functioning, well-being and education--as well as, how they can be dealt with by individuals and in education.
Same as: PSYCH 136, PSYCH 236A

CSRE 138. Medical Ethics in a Global World: Examining Race, Difference and Power in the Research Enterprise. 5 Units.
This course will explore historical as well as current market transformations of medical ethics in different global contexts. We will examine various aspects of the research enterprise, its knowledge-generating and life-saving goals, as well as the societal, cultural, and political influences that make medical research a site of brokering in need of oversight and emergent ethics.nThis seminar will provide students with tools to explore and critically assess the various technical, social, and ethical positions of researchers, as well as the role of the state, the media, and certain publics in shaping scientific research agendas. We will also examine how structural violence, poverty, global standing, and issues of citizenship also influence issues of consent and just science and medicine.
Same as: ANTHRO 138, ANTHRO 238

CSRE 140C. Stand Up Comedy and the "Great American Joke" Since 1945. 5 Units.
Development of American Stand Up Comedy in the context of social and cultural eruptions after 1945, including the Borscht Belt, the Chitlin¿ Circuit, the Cold War, censorship battles, Civil Rights and other social movements of the 60s and beyond. The artistry of stories, monologues, jokes, impersonations, persona, social satire, scatology, obscenity, riffs, rants, shtick, and more by such artists as Lenny Bruce, Dick Gregory, Richard Pryor, George Carlin, Margaret Cho, Sarah Silverman, Jon Stewart, Stephen Colbert, as well as precursors such as Mark Twain, minstrelsy and vaudeville and related films, TV shows, poems and other manifestations of similar sensibilities and techniques.
Same as: AMSTUD 140

CSRE 140S. Casablanca - Algiers - Tunis : Cities on the Edge. 3-5 Units.
Casablanca, Algiers and Tunis embody three territories, real and imaginary, which never cease to challenge the preconceptions of travelers setting sight on their shores. In this class, we will explore the myriad ways in which these cities of North Africa, on the edge of Europe and of Africa, have been narrated in literature, cinema, and popular culture. Home to Muslims, Christians, and Jews, they are an ebullient laboratory of social, political, religious, and cultural issues, global and local, between the nineteenth and twenty-first centuries. We will look at mass images of these cities, from films to maps, novels to photographs, sketching a new vision of these magnets as places where power, social rituals, legacies of the Ottoman and French colonial pasts, and the influence of the global economy collude and collide. Special focus on class, gender, and race.
Same as: AFRICAAM 236B, COMPLIT 236A, FRENCH 236, FRENCH 336, HISTORY 245C, URBANST 140F

CSRE 141. Gentrification. 5 Units.
Neighborhoods in the Bay Area and around the world are undergoing a transformation known as gentrification. Middle- and upper-income people are moving into what were once low-income areas, and housing costs are on the rise. Tensions between newcomers and old timers, who are often separated by race, ethnicity, or sexual orientation, can erupt; high rents may force long-time residents to leave. In this class we will move beyond simplistic media depictions to explore the complex history, nature, causes and consequences of this process. Students will learn through readings, films, class discussions, and engagement with a local community organization. (Cardinal Course certified by the Haas Center).
Same as: AFRICAAM 241A, URBANST 141

CSRE 141E. Counterstory in Literature and Education. 3 Units.
Counterstory is a method developed in critical legal studies that emerges out of the broad "narrative turn" in the humanities and social science. This course explores the value of this turn, especially for marginalized communities, and the use of counterstory as analysis, critique, and self-expression. Using an interdisciplinary approach, we examine counterstory as it has developed in critical theory, critical pedagogy, and critical race theory literatures, and explore it as a framework for liberation, cultural work, and spiritual exploration.
Same as: EDUC 141, EDUC 341, LIFE 124

CSRE 141S. Immigration and Multiculturalism. 5 Units.
What are the economic effects of immigration? Do immigrants assimilate into local culture? What drives native attitudes towards immigrants? Is diversity bad for local economies and societies and which policies work for managing diversity and multiculturalism? We will address these and similar questions by synthesizing the conclusions of a number of empirical studies on immigration and multiculturalism. The emphasis of the course is on the use of research design and statistical techniques that allow us to move beyond correlations and towards causal assessments of the effects of immigration and immigration policy.
Same as: POLISCI 141A

CSRE 141X. Activism and Intersectionality. 3-4 Units.
How are contemporary U.S. social movements shaped by the intersections of race, class, gender, and sexuality? This course explores the emergence, dynamics, tactics, and targets of social movements. Readings include empirical and theoretical social movement texts, including deep dives into Black, White, and Chicana feminisms; the KKK; and queer/LGBT movements. We will explore how social movement emergence and persistence is related to participants¿ identities and experiences with inequality; how the dynamics, targets, and tactics of mobilized participants are shaped by race, class, gender, and/or sexuality; and how social movement scholars have addressed the intersectional nature of inequality, identity, and community.
Same as: AFRICAAM 141X, FEMGEN 141, SOC 153

CSRE 142. The Literature of the Americas. 5 Units.
A wide-ranging overview of the literatures of the Americas inncomparative perspective, emphasizing continuities and crises that are common to North American, Central American, and South American literatures as well as the distinctive national and cultural elements of a diverse array of primary works. Topics include the definitions of such concepts as empire and colonialism, the encounters between worldviews of European and indigenous peoples, the emergence of creole and racially mixed populations, slavery, the New World voice, myths of America as paradise or utopia, the coming of modernism, twentieth-century avant-gardes, and distinctive modern episodes--the Harlem Renaissance, the Beats, magic realism, Noigandres--in unaccustomed conversation with each other.
Same as: AMSTUD 142, COMPLIT 142, ENGLISH 172E

CSRE 142C. Challenging the Status Quo: Social Entrepreneurs Advancing Democracy, Development and Justice. 3-5 Units.
This seminar is part of a broader program on Social Entrepreneurship at CDDRL in partnership with the Haas Center for Public Service. It will use practice to better inform theory. Working with three visiting social entrepreneurs from developing and developed country contexts students will use case studies of successful and failed social change strategies to explore relationships between social entrepreneurship, gender, democracy, development and justice. It interrogates current definitions of democracy and development and explores how they can become more inclusive of marginalized populations. This is a service learning class in which students will learn by working on projects that support the social entrepreneurs' efforts to promote social change. Students should register for either 3 OR 5 units only. Students enrolled in the full 5 units will have a service-learning component along with the course. Students enrolled for 3 units will not complete the service-learning component. Limited enrollment. Attendance at the first class is mandatory in order to participate in service learning.
Same as: AFRICAST 142, AFRICAST 242, INTNLREL 142

CSRE 144. Transforming Self and Systems: Crossing Borders of Race, Nation, Gender, Sexuality, and Class. 5 Units.
Exploration of crossing borders within ourselves, and between us and them, based on a belief that understanding the self leads to understanding others. How personal identity struggles have meaning beyond the individual, how self healing can lead to community healing, how the personal is political, and how artistic self expression based in self understanding can address social issues. The tensions of victimization and agency, contemplation and action, humanities and science, embracing knowledge that comes from the heart as well as the mind. Studies are founded in synergistic consciousness as movement toward meaning, balance, connectedness, and wholeness. Engaging these questions through group process, journaling, reading, drama, creative writing, and storytelling. Study is academic and self-reflective, with an emphasis on developing and presenting creative works in various media that express identity development across borders.
Same as: ASNAMST 144, FEMGEN 144X

CSRE 145. Race and Ethnic Relations in the USA. 4 Units.
(Graduate students register for 245.) Race and ethnic relations in the U.S. and elsewhere. The processes that render ethnic and racial boundary markers, such as skin color, language, and culture, salient in interaction situations. Why only some groups become targets of ethnic attacks. The social dynamics of ethnic hostility and ethnic/racial protest movements.
Same as: SOC 145, SOC 245

CSRE 145H. Trauma, healing, and empowerment. 3 Units.
This course will look at the ways in which humans are affected by the legacy of war, occupation and colonialism through themes of home, displacement, community, roots, identity, and inter-generational trauma. The approach is integrative, including scholarly investigation, embodied practice, and creative approach. This self-reflective process uses narrative, oral and written, as a means of becoming whole and healing personal, historical, and collective wounds.
Same as: LIFE 145

CSRE 146A. Designing Research for Social Justice: Writing a Community-Based Research Proposal. 3-5 Units.
This course will support students in designing and writing a community-engaged research proposal. In contrast to "traditional" forms of research, community-engaged research uses a social justice lens in seeking to apply research to benefit communities most impacted. Community-engaged researchers also aim to challenge the power relationship between "researchers" and "researched" by working side by side with community partners in the design, conceptualization, and actualization of the research process. In this course, students will learn how to write a community-engaged research proposal. This involves forming a successful community partnership, generating meaningful research questions, and selecting means of collecting and analyzing data that best answer your research questions and support community partners. The course will also support students in developing a grounding in the theory and practice of community-engaged research, and to consider the ethical questions and challenges involved. By the end of the course, students should have a complete research proposal that can be used to apply for a number of summer funding opportunities including the Chappell Lougee Scholarship, the Community-Based Research Fellowship, Cardinal Quarter fellowships, and Major Grants. Please note that completion of the course does not guarantee funding-- rather, the course supports you in learning how to write a strong community-engaged research proposal that you can use to apply to any number of fellowships). This course is also useful for students in any academic year who are interested in pursuing community-engaged theses or capstone projects.
Same as: URBANST 123

CSRE 146B. Approaching Research in the Community: Design and Methods. 3 Units.
This course focuses on issues of research design and how to select specific methodological strategies to assure ethical and effective partnership-based research. In this course, students will plan for their own participation in a CBRF project. Topical themes will include best practice strategies for (a) defining and selecting community problems or issues to be addressed, (b) generating relevant and useful research questions, (c) choosing specific means and methods for data collection [e.g., surveys, interviews, focus groups, etc.], (d) storing, organizing and analyzing data, (e) reflecting on and critiquing research findings, and (f) carrying out dissemination in ways that can be expected to enhance community power and advance community development. Students will be provided with opportunities to workshop their respective projects-in-development, (e.g., developing and sharing research questions, data collection instruments, strategies for engaging community constituents as co-researchers, etc.). This is a required course for students participating in the Haas Center for Public Service Community-based Research Fellows Program, but enrollment is open to all Stanford students.
Same as: URBANST 123B

CSRE 146D. New Keywords in African Sound. 3-4 Units.
This course identifies and considers new keywords for the study of contemporary African music and sound. Each week we will foster discussion around a keyword and a constellation of case studies. The sonic practices we will encounter range from South African house music to Ghanaian honk horns; from Congolese rumba bands to Tunisian trance singers; from listening to the radio in a Tanzanian homestead to making hip hop music videos on the Kenyan coast. By exploring the unexpected interconnections between contemporary African musical communities, we will discuss new keywords arising in current scholarship, including technologies like the amplifier and the hard drive, spaces like the studio and the city, and analytics like pleasure and hotness. We will also engage with established concepts for the study of postcolonial African cultures, including nationalism, cosmopolitanism, globalization, diaspora, and Pan-Africanism. This is a seminar-based course open to graduate students, upper level undergraduate students, and other students with consent of the instructor. Proficiency in music is not required. WIM at 4 units only.
Same as: AFRICAAM 146D, AFRICAST 146M, MUSIC 146M, MUSIC 246M

CSRE 147A. Race and Ethnicity Around the World. 4 Units.
(Graduate students register for 247.) How have the definitions, categories, and consequences of race and ethnicity differed across time and place? This course offers a historical and sociological survey of racialized divisions around the globe. Case studies include: affirmative action policies, policies of segregation and ghettoization, countries with genocidal pasts, invisible minorities, and countries that refuse to count their citizens by race at all.
Same as: SOC 147, SOC 247

CSRE 147D. Studies in Music, Media, and Popular Culture: Music and Urban Film. 3-4 Units.
How music and sound work in urban cinema. What happens when music's capacity to transform everyday reality combines with the realism of urban films? Provides an introduction to traditional theories of film music and film sound; considers how new technologies and practices have changed the roles of music in film. Readings discuss film music, realistic cinema, urban musical practices and urban culture. Viewing includes action/adventure, Hindi film, documentary, film noir, hip hop film, the musical, and borderline cases by Jean-Luc Godard, Spike Lee, Wong Kar-Wai and Tsai Ming-Liang. Pre- or corequisite (for music majors): MUSIC 22. (WIM at 4 unit level only.).
Same as: MUSIC 147K, MUSIC 247K

CSRE 147J. Studies in Music, Media, and Popular Culture: The Soul Tradition in African American Music. 3-4 Units.
1960s and 70s Black music, including rhythm and blues, Motown, Southern soul, funk, Philadelphia soul, and disco. Its origins in blues, gospel, and jazz to its influence on today's r&b, hip hop, and dance music. Soul's cultural influence and global reach; its interaction with politics, racism, gender, place, technology, and the economy. Synchronous and asynchronous remote learning, with class discussions, small-group activities, guest presenters, and opportunities for activism. Pre-/co-requisite (for music majors): MUSIC 22. (WIM at 4 units only.).
Same as: AFRICAAM 19, AMSTUD 147J, MUSIC 147J, MUSIC 247J

CSRE 148D. Inglés Personal: Coaching Everyday Community English. 1-5 Unit.
This course is a 1 to 5 unit service learning course that prepares students to provide direct one-on-one service to adult English language learners in East Palo Alto and other surrounding communities. Students meet with and "coach" an adult learner on a weekly basis. Can be repeated for credit.
Same as: CHILATST 148, EDUC 148

CSRE 148P. The Psychology of Bias: Stereotyping, Prejudice, and Discrimination. 3 Units.
From Black Lives Matter to mansplaining, issues of stereotyping, prejudice, and discrimination grab our attention and draw our concern. This course brings together research from social, cognitive, affective, developmental, cultural, and neural perspectives to examine the processes that reflect and perpetuate group biases. Along with these various research perspectives, we will consider perspectives of both privileged and disadvantaged group members. Where do stereotypes come from? Why is race so hard to talk about? Can we be biased without knowing it? How can we reduce prejudice and conflict? We will address these and other questions through lectures, class discussion, and group presentations.
Same as: PSYCH 148S

CSRE 148R. Los Angeles: A Cultural History. 4 Units.
This course traces a cultural history of Los Angeles from the early twentieth century to the present. Approaching popular representations of Los Angeles as our primary source, we discuss the ways that diverse groups of Angelenos have represented their city on the big and small screens, in the press, in the theater, in music, and in popular fiction. We focus in particular on the ways that conceptions of race and gender have informed representations of the city. Possible topics include: fashion and racial violence in the Zoot Suit Riots of the Second World War, Disneyland as a suburban fantasy, cinematic representations of Native American life in Bunker Hill in the 1961 film The Exiles, the independent black cinema of the Los Angeles Rebellion, the Anna Deaver Smith play Twilight Los Angeles about the civil unrest that gripped the city in 1992, and the 2019 film Once Upon a Time¿in Hollywood.
Same as: AMSTUD 148

CSRE 149. The Laboring of Diaspora & Border Literary Cultures. 3-5 Units.
Focus is given to emergent theories of culture and on comparative literary and cultural studies. How do we treat culture as a social force? How do we go about reading the presence of social contexts within cultural texts? How do ethno-racial writers re-imagine the nation as a site with many "cognitive maps" in which the nation-state is not congruent with cultural identity? How do diaspora and border narratives/texts strive for comparative theoretical scope while remaining rooted in specific local histories. Note: This course must be taken for a letter grade to be eligible for WAYS credit. In AY 2020-21, a "CR" grade will satisfy the WAYS requirement.
Same as: COMPLIT 149, ILAC 149

CSRE 149A. The Urban Underclass. 4 Units.
(Graduate students register for 249.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor.
Same as: SOC 149, SOC 249, URBANST 112

CSRE 150. Race and Political Sociology. 3 Units.
How race informs the theories and research within political sociology. The state's role in creation and maintenance of racial categories, the ways in which racial identity motivates political actors, how race is used to legitimate policy decisions, comparisons across racial groups. Emphasis on understanding the ways race operates in the political arena.
Same as: SOC 150, SOC 250

CSRE 150A. Race and Crime. 3 Units.
The goal of this course is to examine social psychological perspectives on race, crime, and punishment in the United States. Readings will be drawn not only from psychology, but also from sociology, criminology, economics, and legal studies. We will consider the manner in which social psychological variables may operate at various points in the crimina; justice system- from policing, to sentencing, to imprisonment, to re-entry. Conducted as a seminar. Students interested in participating should attend the first session and complete online application for permission at https://goo.gl/forms/CAut7RKX6MewBIuG3.
Same as: PSYCH 150, PSYCH 259

CSRE 150B. Race and Crime Practicum. 2-4 Units.
This practicum is designed to build on the lessons learned in PSYCH 150 Race & Crime. In this community service learning course, students participate in community partnerships relevant to race and crime, as well as reflection to connect these experiences to research and course content. Interested students should complete an application for permission at: https://goo.gl/forms/CAut7RKX6MewBIuG3. Prerequisite: PSYCH 150 (taken concurrently or previously).
Same as: PSYCH 150B

CSRE 150G. Performing Race, Gender, and Sexuality. 4 Units.
In this theory and practice-based course, students will examine performances by and scholarly texts about artists who critically and mindfully engage race, gender, and sexuality. Students will cultivate their skills as artist-scholars through written assignments and the creation of performances in response to the assigned material. Attendance and written reflection about a live performance event on campus are required. Students will also learn various meditation practices as tools for making and critiquing performance, in both our seminar discussions and performance workshops. We will approach mindfulness as method and theory in our own practice, as well as in relation to the works studied. We will also consider the ethics and current debates concerning the mindfulness industry. Examples of artists studied include James Luna, Nao Bustamante, Renee Cox, William Pope.L, Cassils, boychild, Curious, Adrian Piper, Xandra Ibarra, Valérie Reding, Guillermo Gomez-Peña, and Ana Mendieta.
Same as: ARTSINST 150G, CSRE 350G, FEMGEN 150G, LIFE 150G, TAPS 150G

CSRE 150S. Nineteenth Century America. 5 Units.
(Same as HISTORY 50B. History majors and others taking 5 units, register for 150B.) Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture.
Same as: AFRICAAM 150B, AMSTUD 150B, HISTORY 150B

CSRE 151D. Migration and Diaspora in American Art, 1800-Present. 4 Units.
This lecture course explores American art through the lens of immigration, exile, and diaspora. We will examine a wide range of work by immigrant artists and craftsmen, paying special attention to issues of race and ethnicity, assimilation, displacement, and political turmoil. Artists considered include Emmanuel Leutze, Thomas Cole, Joseph Stella, Chiura Obata, Willem de Kooning, Mona Hatoum, and Julie Mehretu, among many others. How do works of art reflect and help shape cultural and individual imaginaries of home and belonging?.
Same as: AMSTUD 151, ARTHIST 151, ARTHIST 351, ASNAMST 151D

CSRE 151P. Transpacific Performance. 4 Units.
Building on exciting new work in transpacific studies, this course explores how performance reveals the many ways in which cultures and communities intersect across the diverse and dynamic Pacific Ocean world, covering works from the Americas and Asia, Pacific Islands, and Australia. In an era when the Pacific has emerged as the center of global cultural and financial power, what critical and ethical role does performance play in treating the region's entangled histories, its urgent contemporary issues, and possible futures?.
Same as: TAPS 151P, TAPS 351P

CSRE 152B. Black Music Revealed: Black composers, performers, and themes from the 18th century to the present. 3 Units.
Online seminar on the achievements of Black composers and performers in ragtime, jazz, and classical music, from Chevalier de Saint-Georges, whose music influenced Mozart, and George Bridgetower, for whom Beethoven composed his "Kreutzer" Sonata, to Anthony Davis's opera "The Central Park Five". Students will examine issues of cultural borrowing in operas by Mozart and Verdi, and shows like Showboat and Porgy and Bess. Guest speakers will include composers and performers. Students will work together in groups to produce materials on course topics in coordination with the African American Museum & Library at Oakland. (Cardinal Course certified by the Haas Center).
Same as: MUSIC 152B

CSRE 153C. Asylum: Knowledge, Politics, and Population. 3-5 Units.
This course draws from ethnography, social theory, media and literature to examines the place of the asylum in the constitution of knowledge, politics, and populations. An ancient juridical concept, asylum has been used to describe a fundamental political right, medical and penal institutions, as well as emergent spaces of care and safety. As such, thus course invites students to think of critical issues associated with asylum, including: illness, trauma, violence, immigration, displacement, human rights, sanctuary, and testimony.
Same as: ANTHRO 153

CSRE 153D. Creative Research for Artists. 1-2 Unit.
This generative lab is dedicated to juniors and seniors in Comparative Studies in Race and Ethnicity, African and African American Studies, or related fields in the arts who are pursuing an advanced creative honors thesis or capstone project around questions of identity, diversity and aesthetics. Students sharpen methodologies, get feedback on works in progress, and make formidable connections between their academic and artistic pursuits.
Same as: DANCE 153D

CSRE 153P. Black Artistry: Performance in the Black Diaspora. 4 Units.
Charting a course from colonial America to contemporary London, this course explores the long history of Black performance throughout an Atlantic diaspora. Defining performance as "forms of cultural staging," from Thomas DeFrantz and Anita Gonzalez's Black Performance Theory, this course takes up scripted plays, live theatre, devised works, performance art, and cinematic performance in its survey of the field. We will engage with theorists, performer, artists, and revolutionaries such as Ignatius Sancho, Maria Stewart, William Wells Brown, Zora Neale Hurston, Derek Walcott, Danai Gurira, and Yvonne Orji. We will address questions around Black identity, history, time, and futurity, as well as other essential strategies Black performers have engaged in their performance making. The course includes essential methodological readings for Black Studies as well as formational writings in Black performance theory and theatre studies. Students will establish a foothold in both AAAS (theory & methodology) and in performance history (plays and performances). As a WIM course, students will gain expertise in devising, drafting, and revising written essays.
Same as: AFRICAAM 153P, TAPS 153P, TAPS 353P

CSRE 153Q. Reading and Writing the Gendered Story. 4-5 Units.
Exploration of novels, stories, memoirs and micro-narratives in which gender plays a major role. The texts are by writers of varied genders and sexual orientations as well as varied class, racial and national backgrounds. Written assignments present a mixture of academic and creative options.
Same as: FEMGEN 153Q

CSRE 153R. Before the Model Minority: South Asians in the US. 5 Units.
The model minority myth has been used to create a wedge between Asian and Black people in the United States, and masks the histories and lives of itinerant South Asian traders, laborers, and farmers. Beginning in the 1860s, South Asians (mostly male, and often undocumented) traveled to major ports in the US, such as New York City, New Orleans, and the California coast, where they found working-class jobs and married Puerto Rican, African American, Creole, and Mexican women. Some South Asians were double migrants, first brought to British colonies in the Caribbean and South America through indentured servitude, and later migrated to the United States. Their life stories expand to the racial history of the United States by looking beyond a Black/white binary. nnBy juxtaposing immigrant stories with exclusionary US immigration laws, the course touches upon major themes of migration, capitalism, surveillance, race and racism, multiracial couples and communities, resistance, intersectional activism, borderlands and cities in the US, and the formation of national identity. During the quarter, we will seek to connect experiences in the past with contemporary issues of political culture in the United States to engage with the continuing challenge of locating and attaining self-definition, justice, and social progress in a fraught and divided world.
Same as: HISTORY 253P

CSRE 154. Anthropology of Drugs: Experience, Capitalism, Modernity. 5 Units.
This course examines the significant role ¿drugs¿ play in shaping expressions of the self and social life; in the management populations, and in the production of markets and inequality. It engages these themes through cultural representations of drugs and drug use, analyses of scientific discourse, and social theory. Topics include: the social construction of the licit and illicit; the shifting boundaries of deviance, disease and pleasure; and the relationship between local markets and global wars.
Same as: ANTHRO 154, ANTHRO 254B

CSRE 154C. Shall We Dance? Social Dancing as Political Practice. 3-4 Units.
This seminar investigates social dancing as a political practice, and the dance floor as a place where race, ethnicity, class status, and sexuality are formed and contested. While many students may be familiar with salsa, and can imagine how it produces particular kinds of Latin/a feminities, this course asks students to expand the notion of social dancing beyond partner-dancing spheres. Course materials will focus on dance practices from the late-nineteenth century to present-day, ranging from rural Louisiana dancehalls to NYC nightclubs to Iranian backyards. We will examine how dances become racially coded (e.g., what makes a dance black or Latin@?), and understand how categories such as gender, class, and regionality intersect with such racializations. Students will engage in a range of activities, including reading, viewing films, and participating in occasional movement workshops (no previous dance experience required). Each student¿s final project will require independent, sustained, ethnographic research in a social dance setting of choice (e.g., student dance club, yoga studio, aerobics class, or YouTube).

CSRE 154D. Black Magic: Ethnicity, Race, and Identity in Performance Cultures. 3-4 Units.
In 2013, CaShawn Thompson devised a Twitter hashtag, #blackgirlmagic, to celebrate the beauty and intelligence of black women. Twitter users quickly adopted the slogan, using the hashtag to celebrate everyday moments of beauty, accomplishment, and magic. The slogan offered a contemporary iteration of an historical alignment: namely, the concept of "magic" with both Black people as well as "blackness." This course explores the legacy of Black magic--and black magic--through performance texts including plays, poetry, films, and novels. We will investigate the creation of magical worlds, the discursive alignment of magic with blackness, and the contemporary manifestation of a historical phenomenon. We will cover, through lecture and discussion, the history of black magic representation as well as the relationship between magic and religion. Our goal will be to understand the impact and history of discursive alignments: what relationship does "black magic" have to and for "black bodies"? How do we understand a history of performance practice as being caught up in complicated legacies of suspicion, celebration, self-definition? The course will give participants a grounding in black performance texts, plays, and theoretical writings. *This course will also satisfy the TAPS department WIM requirement.*.
Same as: AFRICAAM 154G, FEMGEN 154G, TAPS 154G

CSRE 154T. The Politics of Algorithms. 4-5 Units.
Algorithms have become central actors in today's digital world. In areas as diverse as social media, journalism, education, healthcare, and policing, computing technologies increasingly mediate communication processes. This course will provide an introduction to the social and cultural forces shaping the construction, institutionalization, and uses of algorithms. In so doing, we will explore how algorithms relate to political issues of modernization, power, and inequality. Readings will range from social scientific analyses to media coverage of ongoing controversies relating to Big Data. Students will leave the course with a better appreciation of the broader challenges associated with researching, building, and using algorithms.
Same as: COMM 154, COMM 254, SOC 154, SOC 254C

CSRE 156. The Changing American City. 4 Units.
After decades of decline, U.S. cities today are undergoing major transformations. Young professionals are flocking to cities instead of fleeing to the suburbs. Massive increases in immigration have transformed the racial and ethnic diversity of cities and their neighborhoods. Public housing projects that once defined the inner city are disappearing, and crime rates have fallen dramatically. Do these changes signal the end of residential segregation and urban inequality? Who do these changes benefit? This course will explore these issues and strategies to address them through readings and discussion, analyzing a changing neighborhood in a major city in the Bay Area in groups (which will include at least one site visit), and studying a changing neighborhood or city of their choice for their final project. The course does not have pre-requisites.
Same as: SOC 156A, SOC 256A, URBANST 156A

CSRE 156T. Performing History: Race, Politics, and Staging the Plays of August Wilson. 4 Units.
This course purposefully and explicitly mixes theory and practice. Students will read and discuss the plays of August Wilson, the most celebrated and most produced contemporary American playwright, that comprise his 20th Century History Cycle. Class stages scenes from each of these plays, culminating in a final showcase of longer scenes from his work as a final project.
Same as: AFRICAAM 156, TAPS 156, TAPS 356

CSRE 156X. Theater of Dissent: Social Movements, Migration, and Revolution in the Americas. 4 Units.
TAPS 156X is an introductory level course that considers how theatre and performance provide a vital platform to examine political dissonance, the mobilities and (im)mobilities that shape transnational migration, and the formation of Latinx/Chicanx identity in the Americas. We will further examine the differences between key terminology in performance, including the notion of Latinidad, by looking at different aesthetic and socio-cultural performance practices and methodologies, re-occuring performance themes, and site-specific performance in the Americas. This course will primarily concentrate on works written in/about the Western Pacific US Southwest, Mexico, Argentina, Peru, Cuba, and Colombia through a variety of theatrical play texts, recorded performances, workshops, and creative projects.

CSRE 157A. Performing Arabs and Others in Theory and Practice. 4 Units.
How deeply must the artist engage to be satisfied with a representation? Is there such a thing as `good representation¿? When must artists persist and when should they resist? In this class, we will dare to make mistakes, challenge formulaic popular critiques and struggle to formulate our personal manifestos on casting. We¿ll let a diverse cast of Arab characters help us in a quarter-long rehearsal of the artist and scholar we wish to be. All course materials are in English, but proficient speakers of Arabic may be given Arabic language texts, if they ask. The majority of the works in our reading list will fit four categories: Orientalist representation, works by Arabs for Arabs, works by non-Arabs for non-Arabs, and works by Arab-Americans. In this class, we learn the theory, practice it, and intelligently attempt to compromise in a deeply flawed and gratifying artform.
Same as: TAPS 157P, TAPS 257P

CSRE 157B. Election 2020. 1 Unit.
(Also LAW 7101). We are living in extraordinary times. The historic convergence of social, economic, and public health challenges has profoundly impacted the lives of millions of Americans. In the midst of great uncertainty, the 2020 US presidential election will be perhaps the most important in our lifetimes. Will Donald J. Trump win reelection amid high unemployment, deep political polarization, and the COVID-19 pandemic that has upended life as we know it? Or will Joe Biden and a team of Democrats prevail? We will assemble a wide range of expert speakers-including preeminent political, business, foreign policy, and academic leaders-to explore these questions (and more) as we seek to cultivate a broad and informed view of this pivotal election.
Same as: EDUC 157

CSRE 157P. Solidarity and Racial Justice. 4-5 Units.
Is multiracial solidarity necessary to overcome oppression that disproportionately affects certain communities of color? What is frontline leadership and what role should people play if they are not part of frontline communities? In this course we will critically examine practices of solidarity and allyship in movements for collective liberation. Through analysis of historical and contemporary movements, as well as participation in movement work, we will see how movements have built multiracial solidarity to address issues that are important to the liberation of all. We will also see how racial justice intersects with other identities and issues. This course is for students that want to learn how to practice solidarity, whether to be better allies or to work more effectively with allies. There will be a community engaged learning option for this course. Students who choose to participate in this option will either work with Stanford's DGen Office or a community organization that is explicitly devoted to multiracial movement-building.
Same as: AFRICAAM 157P, AMSTUD 157P, FEMGEN 157P

CSRE 160J. Conjure Art 101: Performances of Ritual, Spirituality and Decolonial Black Feminist Magic. 2 Units.
Conjure Art is a movement and embodied practice course looking at the work and techniques of artists of color who utilize spirituality and ritual practices in their art making and performance work to evoke social change. In this course we will discuss the work of artists who bring spiritual ritual in their art making while addressing issues of spiritual accountability and cultural appropriation. Throughout the quarter we will welcome guest artists who make work along these lines, while exploring movement, writing, singing and visual art making. This class will culminate in a performance ritual co-created by students and instructor.
Same as: AFRICAAM 160J, DANCE 160J

CSRE 160M. Introduction to Representations of the Middle East in Dance, Performance, & Popular Culture. 3-4 Units.
This course will introduce students to the ways in which the Middle East has been represented and performed by/in the 'West' through dance, performance, and popular culture in both historical and contemporary contexts. A brief look through today's media sources exposes a wide range of racialized and gendered representations of the Middle East that shape the way the world imagines the Middle East to be. As postcolonial theorist Edward Said explains, the framework we call Orientalism establishes the ontological character of the Orient and the Oriental as inherently `Other'. Starting with 19th century colonialism and continuing into the post-9/11 era, this course will trace the Western production, circulation, and consumption of representations of the Middle East as 'Other' in relation to global geopolitics. We will further examine dance forms produced in mid-twentieth century Iran and Egypt, with particular attention to nation-state building and constructions of gender. Finally, we will examine artistic productions and practices from the Middle East and Middle Eastern diasporic communities that respond to colonialism, war, displacement, secularism, and Euro-American Empire. Using dance studies, postcolonial feminist, and critical race theoretical frameworks, we will consider the gender, racial, political, and cultural implications of selected performance works and practices in order to analyze how bodies produce meaning in dance, performance art, theater, film, photography, and new media. Students will engage in multiple modes of learning; the course will include lectures, engaged group discussions, viewing of live and recorded performance, embodied participation in dance practice, student oral presentations, and a variety of writing exercises. Course assignments will culminate in a final research project related to class themes and methods.
Same as: DANCE 160M, FEMGEN 160M, TAPS 160M

CSRE 161P. Entrepreneurship for Social and Racial Equity. 3 Units.
This course is designed to provide students with an introduction to business ownership with a focus on owning and operating businesses within diverse communities with an aim to create social impact for future generations as well as profitability and sustainability models. The course will introduce the beginning elements of creating a business (formation, product, business plan) as well as the additional overlay of social impact and cultural considerations. Types of financing as well as effective pitching will also be covered. Course materials will include instructor presentations, case studies, homework assignments, outside hours at campus ¿labs¿, creation of students¿ own business concept plan and guest lectures from successful entrepreneurs working within Silicon Valley and diverse communities. Resources (financing sources, accelerators and incubators), case studies, role models and guest lecturers will be an integral part of this course which can lead to internship opportunities (the latter via application).
Same as: NATIVEAM 161

CSRE 162. The Politics of Sex: Work, Family, and Citizenship in Modern American Women's History. 3-5 Units.
This course explores the transition from Victorian to modern American womanhood by asking how Native, European, African, Mexican, and Asian American women navigated the changing sexual, economic, and political landscapes of the twentieth century. Through secondary readings, primary sources, films, music, and literature we explore the opportunities and boundaries on groups of women in the context of historical events that included immigration, urbanization, wartime, depression, the Cold War, as well as recurrent feminist and conservative political movements.

CSRE 162A. Spirituality and Nonviolent Urban and Social Transformation. 3 Units.
A life of engagement in social transformation is often built on a foundation of spiritual and religious commitments. Case studies of nonviolent social change agents including Rosa Parks in the civil rights movement, César Chávez in the labor movement, and WIlliam Sloane Coffin in the peace movement; the religious and spiritual underpinnings of their commitments. Theory and principles of nonviolence. Films and readings. Service learning component includes placements in organizations engaged in social transformation. Service Learning Course (certified by Haas Center).
Same as: RELIGST 162X, URBANST 126

CSRE 162D. Latin/x America in Motion: An Introduction to Dance Studies. 3-4 Units.
This course introduces students to the field of Dance Studies by examining the histories of Latin American and Caribbean dances and their relationship to developing notions of race and nation in the Americas. We will study the historical emergence and transformation of ¿indigeneity,¿ ¿blackness,¿ ¿whiteness,¿ and ¿Latin/@/x¿ and consider how dance practices interacted with these identifications. No prior experience with Dance or Latin America and the Caribbean necessary.
Same as: CHILATST 162, DANCE 162L, TAPS 162L, TAPS 262L

CSRE 162V. Advanced Research in Black Performing Arts. 1 Unit.
What is the history of Committee for Black Performing Arts (CBPA)? How did it come into being and how do we carry/re-member the legacy forward and into the future? In this course students will engage in the research and archiving process as we dig into the history of CBPA on the eve of its 50th anniversary. Activities will include, digitizing and cataloguing film,video and documents,conducting interviews with former students and professors of CBPA, and guest lecturers with professional archivists.
Same as: DANCE 162V

CSRE 164. Immigration and the Changing United States. 4 Units.
The role of race and ethnicity in immigrant group integration in the U.S. Topics include: theories of integration; racial and ethnic identity formation; racial and ethnic change; immigration policy; intermarriage; hybrid racial and ethnic identities; comparisons between contemporary and historical waves of immigration.
Same as: CHILATST 164, SOC 164, SOC 264

CSRE 164A. Race and Performance. 3-5 Units.
How does race function in performance and dare we say ¿live and in living color?¿ How does one deconstruct discrimination at its roots?n nFrom a perspective of global solidarity and recognition of shared plight among BIPOC communities, we will read and perform plays that represent material and psychological conditions under a common supremacist regime. Where and when possible, we will host a member of the creative team of some plays in our class for a live discussion. Assigned materials include works by Lin-Manuel Miranda, Amiri Baraka, Young Jean Lee, Ayad Akhtar, Susan Lori Parks, David Henry Hwang, Betty Shamieh, Jeremy O. Harris, and Christopher Demos Brown.n nThis class offers undergraduate students a discussion that does not center whiteness, but takes power, history, culture, philosophy, and hierarchy as core points of debate. In the first two weeks, we will establish the common terms of the discussion about stereotypes, representation, and historical claims, but then we will quickly move toward an advanced conversation about effective discourse and activism through art, performance, and cultural production. In this class, we assume that colonialism, slavery, white supremacy, and oppressive contemporary state apparatuses are real, undeniable, and manifest. Since our starting point is clear, our central question is not about recognizing or delineating the issues, but rather, it is a debate about how to identify the target of our criticism in order to counter oppression effectively and dismantle long-standing structures.n nNot all BIPOC communities are represented in this syllabus, as such claim of inclusion in a single quarter would be tokenistic and disingenuous. Instead, we will aspire to understand and negotiate some of the complexities related to race in several communities locally in the U.S. and beyond.
Same as: AFRICAAM 164A, CSRE 364A, TAPS 164

CSRE 165. Identity and Academic Achievement. 3 Units.
How do social identities affect how people experience academic interactions? How can learning environments be better structured to support the success of all students? In this class, we will explore how a variety of identities such as race, gender, social class, and athletic participation can affect academic achievement, with the goal of identifying concrete strategies to make learning environments at Stanford and similar universities more inclusive. Readings will draw from psychology, sociology, education, and popular press. This class is a seminar format.
Same as: AFRICAAM 165, PSYCH 165

CSRE 166B. Immigration Debates in America, Past and Present. 3-5 Units.
Examines the ways in which the immigration of people from around the world and migration within the United States shaped American nation-building and ideas about national identity in the twentieth century. Focuses on how conflicting ideas about race, gender, ethnicity, and citizenship with respect to particular groups led to policies both of exclusion and integration. Part One begins with the ways in which the American views of race and citizenship in the colonial period through the post-Reconstruction Era led to the passage of the Chinese Exclusion Act in 1882 and subsequently to broader exclusions of immigrants from other parts of Asia, Southern and Eastern Europe, and Mexico. Explores how World War II and the Cold War challenged racial ideologies and led to policies of increasing liberalization culminating in the passage of the 1965 Immigration Act, which eliminated quotas based on national origins and opened the door for new waves of immigrants, especially from Asia and Latin America. Part Two considers new immigration patterns after 1965, including those of refugees, and investigates the contemporary debate over immigration and immigration policy in the post 9/11 era as well as inequalities within the system and the impact of foreign policy on exclusions and inclusions.
Same as: HISTORY 166B, HISTORY 366B

CSRE 167C. Wandering in Strange Lands: Science Fiction of the Black Atlantic. 3-5 Units.
African-American culture critic Greg Tate once remarked that ¿Black people live the estrangement that science fiction authors imagine. In light of his observation, this course proposes to look at the black science fiction (SF) tradition from a variety of angles. Some examples: How do black authors use familiar speculative tropes, such as encounters with aliens, to comment on matters of race? What happens when tropes from African-American realist fiction, such as the passing narrative, become science fictionalized? How does the intersection of race and gender affect speculative works by black women? And perhaps the most central question: What do we gain by looking at matters of race through the lens of SF?.

CSRE 170. Introduction to American Indian Literature. 5 Units.
This course provides a general introduction to American Indian literatures, beginning with early translations, including oral literatures and autobiographies, and continuing with contemporary poetry and fiction written by American Indian writers. We will want to pay particular attention to the American Indian writers¿ connections to a specific locale or place. In what ways are the stories and poems evocative of a long-standing relationship to a "home landscape"? What is the nature of the relationship? How is that relationship to place similar to or different from our own? At the same time, we will want to pay attention to the nature and scope of the various representations of American Indians in the texts we examine, and ask how the representations reinforce and/or dispel popular and often stereotypical images of American Indian people. Finally, we will want to be aware of and understand our position as readers, particularly as readers who come from and are constituted by historical, social, political, cultural, and ethnic worlds different from or similar to the worlds we find in the books that we are reading.
Same as: NATIVEAM 170

CSRE 170A. Undoing Racism: The People's Institute for Survival and Beyond. 1-4 Unit.
The fabric of racism is inextricably woven and constructed into the founding principles of the United States. Racism was done and it can be undone through effective anti-racist organizing with, and in accountability to the communities most impacted by racism. The People's Institute believes that effective community and institutional change happens when those who serve as agents of transformation understand the foundations of race and racism and how they continually function as a barrier to community self-determination and self-sufficiency.nnThis course focuses on understanding what racism is, where it comes from, how it functions, why it persists and how it can be undone. The classes, led by organizers of the People's Institute, guest artists and scholars, utilize a systematic approach that emphasizes learning from history, developing leadership, maintaining accountability to communities, creating networks, undoing internalized racial oppression and understanding the role of organizational gate keeping as a mechanism for perpetuating racism.
Same as: AFRICAAM 170A

CSRE 171H. Mexicans in the United States. 5 Units.
This course explores the lives and experiences of Mexicans living in the United States, from 1848 to the present. Themes and topics include: the legacies of colonialism, the Mexican-American War, transnational migration, the effects of economic stratification, race and racialization, and the impact of sexual and gender ideologies on the lives of Mexicans residing north of the border.
Same as: AMSTUD 271, CHILATST 171, HISTORY 271

CSRE 174. History of South Africa. 5 Units.
(Same as HISTORY 47. History majors and others taking 5 units, register for 147.) Introduction, focusing particularly on the modern era. Topics include: precolonial African societies; European colonization; the impact of the mineral revolution; the evolution of African and Afrikaner nationalism; the rise and fall of the apartheid state; the politics of post-apartheid transformation; and the AIDS crisis.
Same as: AFRICAAM 147, HISTORY 147

CSRE 174S. When Half is Whole: Developing Synergistic Identities and Mestiza Consciousness. 5 Units.
This is an exploration of the ways in which individuals construct whole selves in societies that fragment, label, and bind us in categories and boxes. We examine identities that overcome the destructive dichotomies of ¿us¿ and ¿them, ¿ crossing borders of race, ethnicity, culture, nation, sex, and gender. Our focus is on the development of hybrid and synergistic forms of identity and mestiza consciousness in which the whole is greater than the sum of its parts.
Same as: ASNAMST 174S

CSRE 175W. Philosophy of Law: Protest, Punishment, and Racial Justice. 4 Units.
In this course, we will examine some of the central questions in philosophy of law, including: What is law? What gives law its authority? Must we obey the law? If so, when and why? How should we understand and respond to unjust laws? When is civil disobedience morally permissible? Is civil disobedience ever morally required?nWhat is punishment for? What are prisons for? What is the case for reparations?.
Same as: ETHICSOC 175W, PHIL 175W, PHIL 275W

CSRE 176B. The Social Life of Neighborhoods. 3-5 Units.
How do neighborhoods come to be? How and why do they change? What is the role of power, money, race, immigration, segregation, culture, government, and other forces? In this course, students will interrogate these questions using literatures from sociology, geography, and political science, along with archival, observational, interview, and cartographic (GIS) methods. Students will work in small groups to create content (e.g., images, audio, and video) for a self-guided ¿neighborhood tour,¿ which will be added to a mobile app and/or website.
Same as: AFRICAAM 76B, SOC 176, SOC 276, URBANST 179

CSRE 176S. Finding Meaning in Life's Struggles: Narrative Ways of Healing. 5 Units.
We can find meaning in life's struggles through narrative ways of healing. The self-reflective, dynamic process of finding, telling, and living our stories connects us with our whole selves as well as with others. We find our stories through vulnerability and courage; tell them with humility and honesty; and live them authentically and responsibly. Our shared stories will focus on gratitude, acceptance, reconciliation, forgiveness and compassion, empowering us to overcome personal, community, and historical traumas and wounds. In a respectful, caring community we will discover our hidden wholeness by improvising with various experiential and embodied means of finding our stories; telling our stories in diverse ways, including writing, storytelling, music, and art; and living our stories by putting values into action.

This demographic transformation is occurring first in children and youth, and understanding how social institutions are responding to the needs of immigrant children and youth to support their well-being is the goal of this course.
Same as: CHILATST 177C, EDUC 177C

CSRE 177I. Workshop with Young Jean Lee. 2-4 Units.
Instructor Young Jean Lee is a playwright and director who will have two plays premiering on Broadway in 2018-2019. In this workshop, students will help to collaboratively perform, direct, and rewrite the script of one of these plays, which is about the intersection of class and race. The class will involve acting for students who want to act, directing for students who want to direct, and writing for students who want to write. The current character breakdown is as follows: 2 black women, 1 Asian-American woman, 1 Colombian woman, 1 Mexican-American man, 2 black men, 2 white women, 2 white men.
Same as: TAPS 177W, TAPS 277W

CSRE 178. Ethics and Politics of Public Service. 3-5 Units.
Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford.
Same as: ETHICSOC 133, PHIL 175A, PHIL 275A, POLISCI 133, PUBLPOL 103D, URBANST 122

CSRE 178B. Intensive Playwriting. 4 Units.
Intermediate level study of fundamentals of playwriting through an intensive play development process. Course emphasizes visual scripting for the stage and play revision. Script analysis of works by contemporary playwrights may include: Suzan-Lori Parks, Tony Kushner, Adrienne Kennedy, Edward Albee, Maria Irene Fornes and others. Table readings of full length work required by quarter¿s end.
Same as: TAPS 278

CSRE 178P. The Science and Practice of Effective Advocacy. 3-5 Units.
How can purposeful collective action change government policy, business practices and cultural norms? This course will teach students about the components of successful change campaigns and help develop the practical skills to carry out such efforts. The concepts taught will be relevant to both issue advocacy and electoral campaigns, and be evidence-based, drawing on lessons from social psychology, political science, communications, community organizing and social movements. The course will meet twice-a-week for 90 minutes, and class time will combine engaged learning exercises, discussions and lectures. There will be a midterm and final. Students will be able to take the course for 3 or 5 units. Students who take the course for 5 units will participate in an advocacy project with an outside organization during the quarter, attend a related section meeting and write reflections. For 5 unit students, the section meeting is on Tuesdays, from 3:00 to 4:00 p.m.
Same as: PUBLPOL 178, URBANST 178

CSRE 179A. Crime and Punishment in America. 4-5 Units.
This course provides a comprehensive introduction to the way crime has been defined and punished in the United States. Recent social movements such as the Movement for Black Lives have drawn attention to the problem of mass incarceration and officer-involved shootings of people of color. These movements have underscored the centrality of the criminal justice system in defining citizenship, race, and democracy in America. How did our country get here? This course provides a social scientific perspective on America¿s past and present approach to crime and punishment. Readings and discussions focus on racism in policing, court processing, and incarceration; the social construction of crime and violence; punishment among the privileged; the collateral consequences of punishment in poor communities of color; and normative debates about social justice, racial justice, and reforming the criminal justice system. Students will learn to gather their own knowledge and contribute to normative debates through a field report assignment and an op-ed writing assignment.
Same as: AFRICAAM 179A, SOC 179A, SOC 279A

CSRE 179W. Du Bois and Democracy. 4 Units.
In this course, we will work together to develop a detailed and comprehensive understanding of the political philosophy of W. E. B. Du Bois, giving special attention to the development of his democratic theory. We will do so by reading a number of key texts by Du Bois as well as contemporary scholarship from philosophy and cognate fields.
Same as: ETHICSOC 179W, PHIL 179W, PHIL 279W

CSRE 180A. Foundations of Social Research. 4 Units.
Formulating a research question, developing hypotheses, probability and non-probability sampling, developing valid and reliable measures, qualitative and quantitative data, choosing research design and data collection methods, challenges of making causal inference, and criteria for evaluating the quality of social research. Emphasis is on how social research is done, rather than application of different methods. Limited enrollment; preference to Sociology and Urban Studies majors, and Sociology coterms.
Same as: SOC 180A, SOC 280A

CSRE 180B. Introduction to Data Analysis. 4 Units.
Preference to Sociology majors and minors. Enrollment for non-sociologists will open two weeks after winter enrollment begins. Methods for analyzing and evaluating quantitative data in sociological research. Students will be taught how to run and interpret multivariate regressions, how to test hypotheses, and how to read and critique published data analyses.
Same as: SOC 180B, SOC 280B

CSRE 180E. Introduction to Chicanx/Latinx Studies. 5 Units.
This course draws on intersectional and interdisciplinary approaches to introduce students to the range of issues, experiences, and methodologies that form the foundation of Latina/o/x studies. By considering the relationship between the creation of "Latinx" and "American" identities, students will critically reconsider the borders that constitute the U.S. as a political and cultural formation. The course balances depth and breadth in its study of the variety of perspectives and experiences that come to be associated with U.S. Latinxs. Thus, we will analyze the histories of predominant U.S. Latinx sub-groups, such as Mexicans/Chicanxs and Puerto Ricans, while also incorporating considerations of the ways in which broader populations with ties to Central America, South America, and the Caribbean play crucial roles in constituting U.S. Latinx identities. Topics include the U.S./Mexico border and the borderlands; (im)migration and diaspora; literary and cultural traditions; music and expressive practices; labor and structural inequality; social movements; Latinx urbanism; gender and sexuality; political and economic shifts; and inter- and intra-group relations. Sources include a range of social science and humanities scholarship. This course will meet at Sequoia High School. Transportation will be provided.
Same as: CHILATST 180E, EDUC 179E

CSRE 180S. The Black Music 1980s: Turntables, Beat Machines and DJ Scholarship. 3 Units.
This course focuses on the regional rhythms and aesthetic trends of Black popular music of the Americas in the 1980s, a period of Black cultural production largely ignored by the academy. Students will investigate how technology, economic shifts, AIDS, and the War on Drugs impacted communities who produced, created, and danced to music in the face of hostile political terrain. Students will develop and employ careful listening practices that encompass the study of sampling, digging through crates of vinyl, analyzing album cover art, and closely reading liner notes. The musical forms we will cover range from New Jack Swing to Quiet Storm Music to Synthesizer Soul. Figures we will study include nontraditional scholars and practitioners, artists, activists, music journalists, and cultural critics. Finally, students will map the digital movement of music, people, and ideas through post-human platforms such as computer-based home recording studios, portable sound systems, beat-making equipment, keytars, turntables, and sampling machines.
Same as: AFRICAAM 180S

CSRE 181. Multicultural Issues in Higher Education. 4 Units.
The primary social, educational, and political issues that have surfaced in American higher education due to the rapid demographic changes occurring since the early 80s. Research efforts and the policy debates include multicultural communities, the campus racial climate, and student development; affirmative action in college admissions; multiculturalism and the curriculum; and multiculturalism and scholarship.
Same as: EDUC 181, EDUC 381

CSRE 183. Re- Imagining American Borders. 5 Units.
In this third volatile and violent year of the Trump presidency, American borders of all kinds seem to be dangerously tight. This is seen in the literal horror of immigrant detention centers filled with hungry, sick children taken from parents, ongoing mass incarceration and police attacks on young black and brown men and gendered violence targeting trans Americans and pro-choice movements. Additionally urban and rural antagonisms and constant social media anger with a kind of newly brutal linguistic framing are all underscoring a vision of an America of intractable difference. The hopeful transformation from the 2018 elections, which is having enormous reverberations in the present 2020 presidential campaigns, is interestingly also based in a discourse of difference. This course investigates sources of these borderlines and most crucially how novelists, filmmakers, poets, visual artists and essayists perceive racial, ethnic, gender, religious, sexual orientation and class borders in this country as they may re-imagine difference possibly via Vijay Prashad's polyculturalism or Gloria Anzaldùa's borderlands. Texts include those of Ta-Nehisi Coates, Boots Riley, Dee Rees, Ryan Coogler, Nelly Rosario, Janice Lobo Sapigao, Layli Long Soldier, Naomi Shihab Nye, Edwidge Danticat, Sherman Alexie, Shailja Patel, Kara Walker, and the podcast Ear Hustle, narratives created and produced from inside San Quentin, along with Shane Bauer's undercover expose of an American prison. Course guests will include actors and writers from the acclaimed web series, The North Pole, showing parts of the new second season of biting, humorous stories of gentrification, racism and immigration issues in West Oakland. And the Bay Area founder of the only women-run, inclusive mosque in the US, Rabi¿a Keeble, will speak with us about an American Islam with a Muslim community that embraces difference. Course work includes active discussion, journal entries, one comparative analytical essay and a creative final project/with analytical paper examining personal or community identities.
Same as: AMSTUD 183, FEMGEN 183

CSRE 185B. Jews in the Contemporary World: The American Jewish Present & Past in Popular Culture, Film, & TV. 4-5 Units.
(HISTORY 185B is 5 units; HISTORY 85B IS 3 units.) Who are American Jews as depicted in popular media -- film, television, etc. -- since the Second World War? How are their religion, politics, mores, and practices represented and what ways, if at all, do such portraits reflect historical trends among Jews and society in general? What can be learned from film or tv about Jewish identity, notions of Jewish power and powerlessness, communal cohesiveness and assimilation, sexuality and the wages of intermarriage or race?.
Same as: HISTORY 185B, HISTORY 385C, JEWISHST 185B, REES 185B, SLAVIC 183

CSRE 185C. Racial Inequality across the Lifespan. 3 Units.
Imagine two children, one Black and one White, born on the same day and in the same country. By adulthood, these two will likely have had two remarkably different social experiences (e.g., the Black child will have received less education, income, health, and years to live). Why? Students in this course will tackle this complicated question from a psychological perspective. Together, we will examine how thinking, feeling, and behaving in ways that perpetuate stereotypes, prejudice, and discrimination contribute to racial inequality across the lifespan. The course will be conducted as a seminar, such that much of what you learn will be through group discussions, activities, and readings. A critical component of this class will be to practice writing about psychological research and social issues for the general audience. That is, students will write weekly opinion pieces that address and explain a particular area of inequality to a non-scientific audience.
Same as: AFRICAAM 185, PSYCH 185

CSRE 186. The Psychology of Racial Inequality. 3 Units.
Our topic is the psychology of racial inequality - thinking, feeling, and behaving in ways that contribute to racial stereotyping, prejudice, and discrimination, and how these processes in turn maintain and perpetuate inequality between racial groups. We will examine how these processes unfold at both the individual and the institutional levels. Throughout this course, you will familiarize yourself with the psychological perspectives, methods, and findings that help explain racial inequality, and we will explore ways to promote racial equality. The course will be conducted as a seminar, but most of what you learn will be through the readings and discussions. That is, this course is minimally didactic; the goal is to have you engage thoughtfully with the issues and readings spurred in part by sharing perspectives, confusions, and insights through writing and discussion. Each student will facilitate at least one class session by providing an introductory framework for the readings (~10-minute presentation with handouts that overviews the concepts, issues, and controversies). Together, we will broaden our knowledge base on the subject and explain, from a psychological perspective, the pervasiveness of racial inequality. Prerequisites: PSYCH 1 and PSYCH 10.
Same as: AFRICAAM 286, PSYCH 186, PSYCH 286

CSRE 188Q. Imagining Women: Writers in Print and in Person. 4-5 Units.
Gender roles, gender relations and sexual identity explored in contemporary literature and conversation with guest authors. Weekly meetings designated for book discussion and meeting with authors. Interest in writing and a curiosity about diverse women's lives would be helpful to students. Students will use such tools as close reading, research, analysis and imagination. Seminar requires strong voice of all participants. Oral presentations, discussion papers, final projects.
Same as: FEMGEN 188Q

CSRE 189. Race and Immigration. 4-5 Units.
In the contemporary United States, supposedly race-neutral immigration laws have racially-unequal consequences. Immigrants from Mexico, Central America, and the Middle East are central to ongoing debates about who's includable, and who's excludable, from American society. These present-day dynamics mirror the historical forms of exclusion imposed on immigrants from places as diverse as China, Eastern Europe, Ireland, Italy, Japan, and much of Africa. These groups' varied experiences of exclusion underscore the long-time encoding of race into U.S. immigration policy and practice. Readings and discussions center on how immigration law has become racialized in its construction and in its enforcement over the last 150 years.
Same as: AFRICAAM 190, SOC 189, SOC 289

CSRE 191. African American Art. 5 Units.
This course explores major art and political movements, such as the Harlem Renaissance, the Black Arts Movement, and #BlackLivesMatter, that have informed and were inspired by African American artists. Students will read pivotal texts written by Black artists, historians, philosophers and activists; consider how artists have contended with issues of identity, race, gender, and sexuality; and learn about galleries, collections, and organizations founded to support the field. Attendance on the first day of class is a requirement for enrollment.
Same as: AFRICAAM 191B, ARTHIST 191

CSRE 192E. History of Sexual Violence in America. 4-5 Units.
This undergraduate/graduate colloquium explores the history of sexual violence in America, with particular attention to the intersections of gender and race in the construction of rape. We discuss the changing definitions of sexual violence in law and in cultural representations from early settlement through the late-twentieth century, including slavery, wartime and prison rape, the history of lynching and anti-lynching movements, and feminist responses to sexual violence. In addition to introducing students to the literature on sexual violence, the course attempts to teach critical skills in the analysis of secondary and primary historical texts. Students write short weekly reading responses and a final paper; no final exam; fifth unit research or CEL options.nnLimited enrollment, permission of instructor required. Submit application form and indicate interest in CEL option. Priority admission to History, FGSS, CSRE, AFRICAAM, and AMSTUD declared majors and minors. (Cardinal Course certified by the Haas Center).
Same as: AFRICAAM 192, AMSTUD 258, FEMGEN 258, FEMGEN 358, HISTORY 258, HISTORY 358

CSRE 193. Jacob Lawrence's Twentieth Century: African American Art and Culture. 5 Units.
This course explores African American art and culture through the lens of the Cantor Arts Center's rich holdings of work by Jacob Lawrence (1917-2000). Our approach will combine close looking with attention to Lawrence's cultural, political, and social contexts. Using Lawrence as starting point, we also will consider the work of African American artists such as Charles Alston, Norman Lewis, Aaron Douglas, Betye Saar, and Kara Walker in relation to historical events including the Harlem Renaissance, the Great Depression, World War II, and the Civil Rights Movement. Key themes include the interactions of art, music, and film; the history of radical black thought; as well as issues of curatorial display and conservation.
Same as: ARTHIST 193

CSRE 194KT. Topics in Writing & Rhetoric: The Last Hopi On Earth: The Rhetoric of Entertainment Inequity. 4 Units.
While #OscarsSoWhite brought attention to the Academy's overwhelmingly White, male membership, the underbelly of the entertainment industry itself is rife with inequitable hiring of not only on-camera and on-stage performers but also directors, writers, and others behind the scenes. While there are several organizations from Racebending.com to the Geena Davis Institute on Gender in Media that seek to usher in more equitable representation, push back against the Industry's disparate employment practices has been documented for more than fifty years with what many argue is not proportionally positive movement. White males still garner almost half of all theatrical and television roles and represent more than 80% of episodic directors while entertainment hubs Los Angeles and New York City are more than 50% people of color and female. What will it take to attain equity in the entertainment industry? Why does it matter? nnIn this course, students will examine rhetorical issues in promoting, defending, and opposing entertainment industry practices - writing and speaking across genres in persuasive response - and ultimately develop a collaborative 5-year strategic plan to usher in equity.n nThis course is part of the PWR advanced elective track in Social and Racial Justice (SRJ). Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For video course description, see https://undergrad.stanford.edu/programs/pwr/courses/advanced-courses/last-hopi-earth-rhetoric-entertainment-inequity.
Same as: PWR 194KT

CSRE 194NCR. Topics in Writing & Rhetoric: Introduction to Cultural Rhetorics. 4 Units.
All cultures have their own ways of communicating and making meaning through a range of situated rhetorical practices. In this gateway course to the Notation in Cultural Rhetorics, you'll explore the diverse contexts in which these practices are made and continue to be made;learn methodologies for examining their rhetorical production across media and modality; and study situated cultural practices and their historical and current developments.
Same as: PWR 194NCR

CSRE 194SS. Topics in Writing & Rhetoric: Making Rhetoric Matter: Human Rights at Home. 4 Units.
'Human rights' often sounds like it needs defending in far-off places: in distant public squares where soldiers menace gatherings of citizens, in dark jails where prisoners are tortured for their politics, in unknown streets where gender inequality has brutal consequences. But Bryan Stevenson, a lawyer fighting for social and racial justice in the jails of Alabama, proposes that we try 'proximity': that we get close to the injustices that are already close to us. This class thus takes human rights as a local issue, focusing on how terms like 'human' and 'rights' are interpreted on our campus and in our neighborhoods, cities, and region. Instead of a traditional human rights policy framework, we'll use the lens of intersectional ethics to explore specific rhetorical issues in gender politics, citizenship, higher education, police brutality, and mass incarceration. We will write, speak, and move across genres, responding to the work of incarcerated artists, creating embodied workshops, 'translating' ideas into new media (does someone you know need an animated video about gender pronouns? Or maybe it's time for a podcast about #PrisonRenaissance?), doing collaborative research, and 'writing back' to our audiences. For course video and full description see: https://undergrad.stanford.edu/programs/pwr/courses/advanced-courses/making-rhetoric-matter-human-rights-home.nnThis course is part of the PWR advanced elective track in Social and Racial Justice (SRJ). Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For topics, see https://undergrad.stanford.edu/programs/pwr/courses/advanced-pwr-courses.
Same as: PWR 194SS

CSRE 195. U.S. Latinx Art. 5 Units.
This course surveys art made by Latinas/os/xs who have lived and worked in the United States since the 1700s, including Chicanos, Nuyoricans, and other Black, Brown, and Indigenous artists. While exploring the diversity of Latinx art, students will consider artists' relationships to identity, race, ethnicity, gender, and sexuality. Students will also study how artists have responded to and challenged discrimination, institutional exclusion, and national debates through their work. Attendance on the first day of class is a requirement for enrollment.
Same as: ARTHIST 194, CHILATST 195

CSRE 196C. Introduction to Comparative Studies in Race and Ethnicity. 5 Units.
How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. Includes an optional Haas Center for Public Service certified Community Engaged Learning section. In accordance with Stanford virtual learning policies implemented for the Spring Quarter, all community engagement activities for this section will be conducted virtually. Please sign up for section 2 #33285 with Kendra, A. if you are interested in participating in virtual community engagement.
Same as: ENGLISH 172D, PSYCH 155, SOC 146, TAPS 165

CSRE 196D. Introduction to Comparative Studies in Race & Ethnicity: Continuing Community Engagement. 1-5 Unit.
In this continuation of CSRE 196C, students will continue to develop an interactive map that explores race and community in the Bay Area, through the work of local musicians. In collaboration with the SF-based non-profit, PeaceTones, you will interview musicians and contribute to an online map. The working map can be found at bayareamusicmap.weebly.com. Students will complete readings to explore diversity in the arts, specifically focusing on policy and advocacy implications as we develop the map as a tool for this work. Students will also meet as a group every other week for 50 minutes to reflect and discuss the work (we will set a time that works for everyone) and submit bi-weekly reflections of 500 words.

CSRE 198. Internship for Public Service. 1-5 Unit.
Students should consult with CCSRE Director of Community Engaged Learning (ddmurray@stanford.edu) to develop or gain approval for an internship that addresses race/ethnicity, public service, and social justice. Students will read a selection of short readings relevant to their placement, write bi-weekly reflections, and meet bi-weekly with the Director of Community Engaged Learning. Units are determined by the number of hours per week at the internship (2 hours/week = 1 unit; 5 hours/week = 2 units; 8 hours/week = 3 units; etc.) Group meetings may be required. May be repeated for credit.
Same as: CHILATST 198

CSRE 199. Preparation for Senior Thesis. 2-3 Units.
This course is designed for juniors (majors, minors, and those seeking Interdisciplinary Honors in CSRE or FGSS) who intend to write a senior thesis in one of the CSRE Family of Programs or FGSS Interdisciplinary Honors. The course offers resources and strategies for putting together a significant and original senior thesis. Topics to be covered include: getting funding; finding an advisor; navigating the institutional review board; formulating an appropriate question; and finding the right data/medium/texts.
Same as: AFRICAAM 199X, ANTHRO 189X, FEMGEN 199X

CSRE 200R. Directed Research. 1-5 Unit.
.

CSRE 200W. Directed Reading. 1-5 Unit.
.

CSRE 200X. CSRE Senior Seminar. 5 Units.
Required for CSRE-related students, including those who opt to write honors theses in other departments and programs. Research and the writing of the senior honors thesis or senior paper under the supervision of a faculty project adviser. The process of research including conceptualization, development of prospectus, development of theses, research, analysis, and writing.

CSRE 200Y. CSRE Senior Honors Research. 1-10 Unit.
.

CSRE 200Z. CSRE Senior Honors Research. 1-5 Unit.
.

CSRE 201B. The Undocumented Migration Project Exhibition at Stanford. 3 Units.
Are you an artist seeking a greater purpose for you art? Would you like to gain a sense of history and best practices for engaging your community in creative work? nnHuman Rights policy experts and activists, artists and scholars will participate in this (online via Zoom.us) student & community course on contemporary immigration policy and human rights issues.The course is structured around the ideas of art, activism and scholarship as they intersect with the subject of migration. Often considered distinct fields, we will explore the ways they merge together, and engage in dialogue with an array of guests from a multitude of backgrounds.nn In addition to learning about the Hostile Terrain94 project through tagging the identities of lives of those lost along the Sonoran desert and considering the U.S. policy of prevention through deterrence to crossing the U.S. Mexican Border, this class will explore art making with paper as the primary media. Paper with its material qualities can provide diverse and accessible entryways into the processes of inclusion, recordation, and mass participation. Through the interconnecting of the practical task of filling information onto toe tags to create the exhibition at the Anderson Collection, which documents the human remains of migrants identified for the exhibition (Fall 2020) with creating new objects in paper, the projects in this course will discover and recover identity through articulations of identity in paper.
Same as: CHILATST 201B

CSRE 201D. Public Art Interventions in Social & Cultural Spaces. 4-5 Units.
This team-taught course brings long-time artists, organizers, and researchers to present a range of strategies for creating public art and cultural productions in various social and cultural spaces. Our exploration of public art engages ideas about social space and public discourse. An approach that finds parallels in the art history lexicon of community-based; social sculpture, and place-making to name a few of the movements identified as other than the fine arts, ours is centered on work made collectively and in social and lived spaces through dialogue and conversation with others.

CSRE 201L. Doing Public History. 5 Units.
Examines history outside the classroom; its role in political/cultural debates in U.S. and abroad. Considers functions, practices, and reception of history in public arena, including museums, memorials, naming of buildings, courtrooms, websites, op-eds. Analyzes controversies arising when historians' work outside the academy challenges the status quo; role funders, interest groups, and the public play in promoting, shaping, or suppressing historical interpretation. Who gets to tell a group's story? What changes can public history enable? Students will engage in public history projects.
Same as: HISTORY 200L

CSRE 201X. Senior Seminar: For students with a second CSRE Family major. 5 Units.
Required for students working to fulfill WIM requirements for a second CSRE Family of Programs major; including those who opt to write honors theses in other departments and programs. Research and the writing of the senior honors thesis or senior paper under the supervision of a faculty project adviser. The process of research including conceptualization, development of prospectus, development of theses, research, analysis, and writing.

CSRE 212. Biology, Culture and Social Justice in Latin America: Perspectives from Forensic Anthropology. 5 Units.
This course will only take place in the first 5 weeks of the quarter.nnAs forensic anthropologists, we are routinely asked to make identifications of unknown human remains and provide courtroom testimony. Latin America has become a nexus for social justice work, as we respond to the humanitarian crisis along the U.S.-México Border. To improve identification methods of the undocumented dead, we must understand the diversity in Latinx people and adopt best scientific practices.
This course provides a cross-disciplinary, bio-cultural approach to Latin American variation and training in applied methods of forensic anthropology. Explore how tools of biological and cultural anthropology are used jointly in human rights investigation and social justice advancement. Discover the breadth of Latinx diversity and how historical, geographic, and socio-cultural factors shape this variation. Gain hands-on experience in case analysis, using skeletal, genetic, and recovery context information to estimate key parameters of identity. Use case studies to contextualize this work through an intersectional lens that attends to the living families and the applicable historical, geo-political and socio-cultural conditions.
Same as: ANTHRO 212B, CHILATST 212

CSRE 216X. Education, Race, and Inequality in African American History, 1880-1990. 3-5 Units.
Seminar. The relationship among race, power, inequality, and education from the 1880s to the 1990s. How schools have constructed race, the politics of school desegregation, and ties between education and the late 20th-century urban crisis.
Same as: AFRICAAM 116, AMSTUD 216, EDUC 216, HISTORY 255E

CSRE 217. Expanding Engineering Limits: Culture, Diversity, and Equity. 3 Units.
This course investigates how culture and diversity shape who becomes an engineer, what problems get solved, and the quality of designs, technology, and products. As a course community, we consider how cultural beliefs about race, ethnicity, gender, sexuality, abilities, socioeconomic status, and other intersectional aspects of identity interact with beliefs about engineering, influence diversity in the field, and affect equity in engineering education and practice. We also explore how engineering cultures and environments respond to and change with individual and institutional agency. The course involves weekly presentations by scholars and engineers, readings, short writing assignments, small-group discussion, and hands-on, student-driven projects. Students can enroll in the course for 1 unit (lectures only), or 3 units (lectures+discussion+project). For 1 unit, students should sign up for Section 1 and Credit/No Credit grading, and for 3 units students should sign up for Section 2 and either the C/NC or Grade option.
Same as: CSRE 117, ENGR 117, ENGR 217, FEMGEN 117, FEMGEN 217

CSRE 218. Islam, Race and Revolution: A Pan-American Approach. 3-5 Units.
Taking a pan-American approach to the study of religious traditions, this upper-level course traces the history of the critical intersection between race, religion and revolution among Muslims from the turn of the nineteenth century until the present day. Moving from the Atlantic Revolutions of the late eighteenth and early nineteenth centuries, to the United States, to the decolonizing Third World, and then finally to the contemporary Middle East, this class will emphasize that Islam and race together have been used by many groups in order to challenge existing power structures, agitate for change, and more than occasionally, transform the social, cultural and governmental structures comprising their worlds. Moreover, although this class is concentrated upon religious formations in the Americas, students will explore global events throughout the Muslim world in order to examine how global politics contribute to religious formations, solidarities and identities. At the conclusion of this course, students will be expected to write a 10-15 page research paper, and a topic will be chosen in consultation with the instructor. Students will also be expected to write weekly reflection papers, which will serve to facilitate class discussion. Undergraduates register for 200-level for 5 units. Graduate students register for 300-level for 3-5 units.
Same as: AMSTUD 218, RELIGST 218, RELIGST 318

CSRE 220. Public Policy Institute. 1-2 Unit.
** This course meets and concludes prior to Autumn Quarter. If you were not a student in this year's PPI, please DO NOT ENROLL. **nnPublic Policy Institute serves to: provide students with information and perspectives on important public policy issues that have particular relevancy to matters of race and ethnicity in American society, past and present; expose students to faculty and other professionals working on public policy-related issues; and provide insight into the legislative process of public policy making at the state and local levels. Students are expected to conduct research necessary to write a policy brief on a particular issue, and makena presentation based on the policy brief. A field trip to Sacramento introduces students to policymakers and current policy matters of importance to marginalized communities in California.

CSRE 221D. Crafting Challenging Conversations in a Conflicted World. 3 Units.
In moments of divisive, time-sensitive conflict and disagreement, interdependent community groups that are we-us oriented often struggle to maintain cohesive relationships. In this interactive, project-based course, participants will dive into the art of designing new products, services, or experiences for conflict. Throughout the course, participants can expect to unpack the fundamentals of design thinking and components of strong listening, leadership, and effective cultural competency. Individual one-on-one conversations as well as indigenous forms of group-interviewing, known as Peacemaking and Ho'oponopono, will be also explored. At the end of the course, students can expect to have created a low-resolution prototype based on qualitative research that answers the question: How might we lead with community-centered approaches, rather than with independent, divisive reactions in moments of conflict?.
Same as: NATIVEAM 221

CSRE 222. The Political Psychology of Intolerance. 5 Units.
This seminar explores the political psychology of intolerance. It focuses on two problems in particular race in America and the challenge of Muslim inclusion in Western Europe. It concentrates on primary research. The readings consist of both classic and contemporary (including on-going) studies of prejudice and politics.
Same as: POLISCI 222

CSRE 223. Building Creative Cultures in Organizations. 4-5 Units.
We will be visiting partner organizations off campus on Wednesdays during class. Therefore, we would strongly encourage students to plan their schedules including extra travel time to and from Stanford. All organizations should be within a 30 minute drive to campus.nn To apply for the class, submit an application: https://docs.google.com/forms/d/e/1FAIpQLSeGrrVae_2PkTXhYRrlhv0AXK8KslTFsvZeMcTlmMgix6LrxA/viewformnn**For more information, check out the course website: https://dschool.stanford.edu/classes/building-creative-culture-in-organizationsnnStudents will spend half of their class time at the d.school and half of their class time at organizations across Silicon Valley, ranging from startups to large enterprises. Through empathy interviews with employees you will learn to identify facilitators and barriers that organizations face when they transition to human-centered and design thinking culture. You will design and test interventions that will help them enhance their creative culture. The course is highly experiential and interdisciplinary. Come ready to unpack the biggest challenges of creative teams, explore interesting companies, connect with engaging thought leaders, and reflect on the future of work.

CSRE 226. Race and Racism in American Politics. 5 Units.
Topics include the historical conceptualization of race; whether and how racial animus reveals itself and the forms it might take; its role in the creation and maintenance of economic stratification; its effect on contemporary U.S. partisan and electoral politics; and policy making consequences.
Same as: AMSTUD 226, POLISCI 226, POLISCI 326

CSRE 226D. The Holocaust: Insights from New Research. 4-5 Units.
Overview of the history of the Holocaust, the genocide of European Jews. Explores its causes, course, consequences, and memory. Addresses the events themselves, as well as the roles of perpetrators and bystanders, dilemmas faced by victims, collaboration of local populations, and the issue of rescue. Considers how the Holocaust was and is remembered and commemorated by victims and participants alike. Uses different kinds of sources: scholarly work, memoirs, diaries, film, and primary documents.

CSRE 226X. Curating Experience: Representation in and beyond Museums. 2-4 Units.
In an age when some 50% of museum visitors only "visit" museums online and when digital technologies have broken open archival access, anyone can be a curator, a critic, an historian, an archivist. In this context, how do museums create experiences that teach visitors about who they are and about the world around them? What are the politics of representation that shape learning in these environments? Using an experimental instructional approach, students will reconsider and redefine what it means to curate experience. (This course must be taken for a minimum of 3 units to satisfy a Ways requirement.).
Same as: AMSTUD 226X, EDUC 226

CSRE 227. Juvenile Crime, Juvenile Justice. 3 Units.
Juveniles are accorded special status under the American legal system. This introductory course will examine the historical precedents and philosophical reasons for treating juveniles differently from adults, and review empirical evidence about child development that can illuminate the reasons for their special status within the court system. Students will learn about the distribution of juvenile delinquency and the impact of significant social and institutional influences on delinquency: family, school, peers, and drugs. The course will also provide a detailed overview of the juvenile system, from its beginning to the current state of the institution, which will include a review of police work with juveniles, pretrial procedures, and the juvenile court and corrections systems. Major court rulings that have shaped contemporary juvenile justice will be presented. Finally, the course will consider dispositional options available to Courts, and will identify the most effective in reducing delinquency. By the conclusion of this course, students should have an understanding of the juvenile justice system and how it compares with the adult justice system, what programs work to reduce recidivism, and be cognizant of some of the major legal and policy issues confronting that system today. The course format will combine lecture, group discussions, and guest presentations. Students may also have the opportunity to observe the juvenile justice system first hand by attending a juvenile court session, visiting a correctional facility for adjudicated delinquents, and hearing directly from those who work with high-risk youth on probation or in the community. Written Work. Each student will write four reflection papers, 5-7 pages each (about 1,700 words) over the quarter. Due dates will be listed in the class syllabus. Elements used in grading: Final grades will be based on the four reflection papers (20% each) and class participation (20%). This course is open to 2Ls, and 3Ls in the Law School. Cross-listed with Comparative Studies in Race & Ethnicity (CSRE 227); open to Juniors and Seniors.

CSRE 229. Racial Justice Through Law. 3 Units.
Racial inequality pervades American life. Race related controversies arise with depressing regularity. This, more than half a century after the Supreme Court's landmark decision in Brown v Board of Education, after landmark federal civil rights legislation, and at a time when many Americans profess to be colorblind. This course will examine why and how racial injustice persists, and the role of law in furthering or impeding the cause of racial justice. These questions will be explored across a variety of settings, including criminal justice, college admissions, political participation, primary/secondary education, employment, housing, hate speech, and the formation of family relationships. The class will employ a discussion based approach in which student participation is essential. Elements used in grading: Exam, class participation. Open to Junior and Senior undergraduates. Meets along with LAW 229.

CSRE 230. Law, Order, & Algorithms. 3 Units.
Human decision making is increasingly being displaced by predictive algorithms. Judges sentence defendants based on statistical risk scores; regulators take enforcement actions based on predicted violations; advertisers target materials based on demographic attributes; and employers evaluate applicants and employees based on machine-learned models. One concern with the rise of such algorithmic decision making is that it may replicate or exacerbate human bias. This course surveys the legal and ethical principles for assessing the equity of algorithms, describes statistical techniques for designing fair systems, and considers how anti-discrimination law and the design of algorithms may need to evolve to account for machine bias. Concepts will be developed in part through guided in-class coding exercises. Admission is by consent of instructor and is limited to 20 students. To enroll in the class, please complete the course application by March 20, available at: https://5harad.com/mse330/. Grading is based on response papers, class participation, and a final project. Prerequisite: CS 106A or equivalent knowledge of coding.
Same as: CS 209, MS&E 330, SOC 279

CSRE 230A. Digital Civil Society. 3 Units.
Digital technologies are changing the way members of the civil society come together to change the world. The 'civil society' includes social movements, grassroots activism, philanthropists, unions, nonprofits, NGOs, charities, and cooperatives, among others. Their mission is to effect important social and political transformations to bring about what they see as a better world. But their work and strategies are subject to significant changes in the digital era. The course will analyze the opportunities and challenges digital technologies present for associational life, free expression, privacy, and collective action. We will cover a wide range of key themes, including digital rights advocacy and racial justice, community-owned networks and de-colonial design, activist resistance to surveillance technologies, algorithmic bias, Black Twitter, and digital misinformation, micro-targeting and voter suppression. The course is global in scope (we will read authors and study cases from America, Europe, Asia, and Africa), taught by a multidisciplinary team (history, communication, computational social science, education), and is committed to a syllabus centering on the scholarship, expertise, and voices of marginalized communities.No prerequisite.
Same as: AFRICAAM 230A, COMM 230A

CSRE 230C. Digital Civil Society. 3 Units.
Digital technologies have fundamentally changed how people come together to make change in the world, a sphere of action commonly called 'civil society'. How did this happen, what's being done about it, and what does it mean for democratic governance and collective action in the future? This course analyzes the opportunities and challenges technology presents to associational life, free expression, individual privacy, and collective action. Year-long seminar sequence for advanced undergraduates or master's students. Each quarter may be taken independently. Spring focuses on emergent trends related to democracy and associational life, from the 2010s and into the future. Topics include the Arab Spring, global political propaganda, 'born digital' organizations, the development of electronic governments, and biotechnologies.
Same as: COMM 230C

CSRE 233A. Counseling Theories and Interventions from a Multicultural Perspective. 3-5 Units.
In an era of globalization characterized by widespread migration and cultural contacts, professionals face a unique challenge: How does one practice successfully when working with clients/students from so many different backgrounds? This course focuses upon the need to examine, conceptualize, and work with individuals according to the multiple ways in which they identify themselves. It will systematically examine multicultural counseling concepts, issues, and research. Literature on counselor and client characteristics such as social status or race/ethnicity and their effects on the counseling process and outcome will be reviewed. Issues in consultation with culturally and linguistically diverse parents and students and work with migrant children and their families are but a few of the topics covered in this course.
Same as: AFRICAAM 233A, EDUC 233A

CSRE 243. Writing Across Languages and Cultures: Research in Writing and Writing Instruction. 3-5 Units.
Theoretical perspectives that have dominated the literature on writing research. Reports, articles, and chapters on writing research, theory, and instruction; current and historical perspectives in writing research and research findings relating to teaching and learning in this area.
Same as: EDUC 145, EDUC 243

CSRE 245. Understanding Racial and Ethnic Identity Development. 3-5 Units.
This seminar will explore the impact and relative salience of racial/ethnic identity on select issues including: discrimination, social justice, mental health and academic performance. Theoretical perspectives on identity development will be reviewed, along with research on other social identity variables, such as social class, gender and regional identifications. New areas within this field such as the complexity of multiracial identity status and intersectional invisibility will also be discussed. Though the class will be rooted in psychology and psychological models of identity formation, no prior exposure to psychology is assumed and other disciplines-including cultural studies, feminist studies, and literature-will be incorporated into the course materials. Students will work with community partners to better understand the nuances of racial and ethnic identity development in different contexts. (Cardinal Course certified by the Haas Center).
Same as: AFRICAAM 245, EDUC 245, PSYCH 245A

CSRE 246. Constructing Race and Religion in America. 4-5 Units.
This seminar focuses on the interrelationships between social constructions of race and social interpretations of religion in America. How have assumptions about race shaped religious worldviews? How have religious beliefs shaped racial attitudes? How have ideas about religion and race contributed to notions of what it means to be "American"? We will look at primary and secondary sources and at the historical development of ideas and practices over time.
Same as: AFRICAAM 236, AMSTUD 246, HISTORY 256G, HISTORY 356G, RELIGST 246, RELIGST 346

CSRE 248X. Language, Literacy, and Culture. 3-4 Units.
This field-based Cardinal Course will provide a unique opportunity to combine theory and practice in the study of language, literacy, and culture in educational settings. It is a collaborative partnership between Stanford (through the Haas Center for Public Service) and the Boys and Girls Club of the Peninsula. Stanford students will work directly with children enrolled in the Boys and Girls Club after-school program at a youth center in Redwood City.
Same as: EDUC 248

CSRE 249. The Algerian Wars. 3-5 Units.
From Algiers the White to Algiers the Red, Algiers, the Mecca of the Revolutionaries in the words of Amilcar Cabral, this course offers to study the Algerian Wars since the French conquest of Algeria (1830-) to the Algerian civil war of the 1990s. We will revisit the ways in which the war has been narrated in literature and cinema, popular culture, and political discourse. A special focus will be given to the Algerian War of Independence (1954-1962). The course considers the racial representations of the war in the media, the continuing legacies surrounding the conflict in France, Africa, and the United States, from Che Guevara to the Black Panthers. A key focus will be the transmission of collective memory through transnational lenses, and analyses of commemorative events and movies. nReadings from James Baldwin, Assia Djebar, Albert Camus, Frantz Fanon, Mouloud Feraoun. Movies include "The Battle of Algiers," "Days of Glory," and "Viva Laldjérie." nTaught in English.
Same as: FRENCH 249, HISTORY 239G, JEWISHST 249

CSRE 250J. Baldwin and Hansberry: The Myriad Meanings of Love. 4 Units.
This course looks at major dramatic works by James Baldwin and Lorraine Hansberry. Both of these queer black writers had prophetic things to say about the world-historical significance of major dramas on the 20th Century including civil rights, revolution, gender, colonialism, racism, sexism, war, nationalism and as well as aesthetics and politics.
Same as: AFRICAAM 250J, AMSTUD 250J, FEMGEN 250J, TAPS 250J

CSRE 252C. The Old South: Culture, Society, and Slavery. 5 Units.
This course explores the political, social, and cultural history of the antebellum American South, with an emphasis on the history of African-American slavery. Topics include race and race making, slave community and resistance, gender and reproduction, class and immigration, commodity capitalism, technology, disease and climate, indigenous Southerners, white southern honor culture, the Civil War, and the region's place in national mythmaking and memory.
Same as: AFRICAAM 252C, HISTORY 252C

CSRE 256SI. Race, Class and Global Health. 2 Units.
This course's goal is to critically engage students in the socioeconomic and racial disparities in healthcare outcomes and encourage students to think broadly about the complex relationship between institutions, healthcare providers, socioeconomic status, and race/ethnicity. The topics will center on conceptual issues important for understanding how socioeconomic and minority status can lead to poor health outcomes examining how conscious and unconscious institutional biases affect treatment, care, and access, and addressing proposals for how to reduce disparities in health care. nThe focus of the course is broad. The first three weeks will center on public health issues due to global healthcare trends, including the results of disparities in the United States. These discussions will frame our sessions int he latter sic weeks, which will each consist of a case study of specific cases of disparities and response to such inequities worldwide, from India to Rwanda. nEach class's discussion will be guided by case studies. The readings will come from a variety of sources, including academic journals, more popular journals and magazines, books and government documents. Student will be expected to complete the readings and a reflection in advance of class each week. Each week will additionally include optional readings that will guide additional discussion.

CSRE 258. Black Feminist Theater and Theory. 4 Units.
From the rave reviews garnered by Angelina Weld Grimke's lynching play, Rachel to recent work by Lynn Nottage on Rwanda, black women playwrights have addressed key issues in modern culture and politics. We will analyze and perform work written by black women in the U.S., Britain and the Caribbean in the 20th and 21st centuries. Topics include: sexuality, surrealism, colonialism, freedom, violence, colorism, love, history, community and more. Playwrights include: Angelina Grimke, Lorriane Hansberry, Winsome Pinnock, Adrienne Kennedy, Suzan- Lori Parks, Ntzoke Shange, Pearl Cleage, Sarah Jones, Anna DeVeare Smith, Alice Childress, Lydia Diamond and Zora Neale Hurston.).
Same as: AFRICAAM 258, FEMGEN 258X, TAPS 258

CSRE 260. Race and Ethnicity in Urban California. 4-5 Units.
The course is part of an ongoing research project that examines the consequences of longterm social, economic, and political changes in ethnic and race relations in in urban California. The required readings, discussions, and service learning component all provide a platform for students to explore important issues, past and present, affecting California municipalities undergoing rapid demographic transformation.
Same as: AFRICAAM 169A, AMSTUD 169, URBANST 169

CSRE 262C. African American Literature and the Retreat of Jim Crow. 5 Units.
After the unprecedented carnage of WWII, the postwar era witnessed the slow decline of the segregated Jim Crow order and the onset of landmark civil rights legislation. What role did African American literature and culture play in this historical process? What does this shift in racial theory and praxis mean for black literary production, a tradition constituted by the experience of slavery and racial oppression? Focus on these questions against the backdrop of contemporaneous developments: the onset of the Cold War, decolonization and the formation of the Third World, and the emergence of the "new liberalism.".
Same as: AFRICAAM 262C, AMSTUD 262C

CSRE 264. History of Prisons and Immigration Detention. 4-5 Units.
This course will explore the history of the growing prison and immigration detention systems in the United States. They will pay particular attention to how they developed and how they affect different populations.
Same as: AMSTUD 264, HISTORY 264, HISTORY 364

CSRE 265. Crossing the Atlantic: Race and Identity in the African Diaspora. 3-5 Units.
This course interrogates the relationship between literature, culture, race and identity in the African diaspora. We will analyze racial discourses through literature, and various forms of cultural expression while examining the role of class and gender in these configurations. As we follow the historical and geographical trajectories of people of African descent in different parts of the world, students will explore literary and political movements with the objective of examining how race has been constructed and is performed in different regions of the diaspora. Our readings will take us from Martinique, Guadeloupe, Guyana, France, and Senegal to Cuba, Brazil, Haiti and the Dominican Republic. Topics discussed will include: Race, identity, gender, class, memory, oral tradition, Afro-Caribbean religions, Negrismo, Négritude, Antillanité, Créolité, colonialism, modernity and national belonging. Readings will include the works of: Jean Price-Mars, Léopold Senghor, Aimé Césaire, Léon Damas, Frantz Fanon, Nicolás Guillén, Nancy Morejon, Maryse Condé, Patrick Chamoiseau, Edouard Glissant, among others. Taught in English.
Same as: COMPLIT 264, FRENCH 264

CSRE 285. Texts and Contexts: French-English Translation. 3-5 Units.
This course introduces students to the ways in which translation has shaped the image of France and the Francophone world. What texts and concepts were translated, how, where, and to what effect? Students will work on a translation project throughout the quarter and translate texts from French to English and English to French. Topics may include the role of translation in the development of cultures; the political dimension of translation, translation in the context of migration, and the socio-cultural frameworks that shape translations. Case studies: Camus, Fanon, Glissant, de Beauvoir, Meddeb, Duras. Prior knowledge of French language required.
Same as: COMPLIT 285, FRENCH 185, FRENCH 285

CSRE 291. Urban Schools, Social Policy, and the Gentrifying City. 3-4 Units.
This course is designed to help students develop a more sophisticated understanding of educational inequality in the contemporary U.S. city. This course will survey existing literature about the intersection of gentrification and urban schooling, focusing on policies and practices that gave rise to the current urban condition, theory and research about urban redevelopment, collateral consequences for schools and communities, and how these issues relate to the structure and governance of urban schools as well as to the geography of opportunity more broadly.
Same as: EDUC 390, URBANST 141A

CSRE 292. Education for Liberation: A History of African American Education, 1800 to the Present. 3-5 Units.
This course examines discourses around education and freedom in African American educational thought from the 19th century to the present, using both primary sources and the works of current historians. The course pays particular attention to how the educational philosophies of different African American thinkers reflected their conceptions of what shape freedom might take in the American context, and the tension between educational outlooks that sought inclusion or integration versus those that prized self-determination. We will also be attentive to the ways in which age, gender, geography, class, and color worked to influence the pursuit and achievement of various African American educational visions. This will be a 3-5 credit course and meet as a seminar open both to graduate students and advanced undergraduates.
Same as: EDUC 392

CSRE 298G. Race, Gender, & Sexuality in Chinese History. 5 Units.
This course examines the diverse ways in which identities--particularly race, ethnicity, gender and sexuality have been understood and experienced in Chinese societies, broadly defined, from the imperial period to the present day. Topics include changes in women's lives and status, racial and ethnic categorizations, homosexuality, prostitution, masculinity, and gender-crossing.
Same as: ASNAMST 298, FEMGEN 298C, HISTORY 298C, HISTORY 398C

CSRE 301. Comparative Studies in Race and Ethnicity. 3-5 Units.
an advanced introduction to concepts and debates within the multi-disciplinary field of comparative studies in race and ethnicity.
Same as: ENGLISH 372D

CSRE 302. Decolonizing the Indigenous Classroom. 3-5 Units.
Using Indigenous and decolonizing perspectives on education, this interdisciplinary course will examine interaction and language in cross-cultural educational situations, including language, literacy and interethnic communication as they relate to Indigenous American classrooms. Special attention will be paid to implications of social, cultural and linguistic diversity for educational practice, along with various strategies for bridging intercultural differences between schools and Native communities.
Same as: CSRE 116, EDUC 186, EDUC 286, NATIVEAM 116

CSRE 303. CSRE Graduate Student Workshop Series. 1 Unit.
This course is designed specifically for Graduate Fellows in the Center for Comparative Studies in Race and Ethnicity.

CSRE 326D. The Holocaust: Insights from New Research. 4-5 Units.
Overview of the history of the Holocaust, the genocide of European Jews. Explores its causes, course, consequences, and memory. Addresses the events themselves, as well as the roles of perpetrators and bystanders, dilemmas faced by victims, collaboration of local populations, and the issue of rescue. Considers how the Holocaust was and is remembered and commemorated by victims and participants alike. Uses different kinds of sources: scholarly work, memoirs, diaries, film, and primary documents.
Same as: CSRE 226D, HISTORY 226D, HISTORY 326D, JEWISHST 226E, JEWISHST 326D

CSRE 329. Rethinking Francophone Literature in the 21st Century. 3-5 Units.
This course is a critical examination of literature from the Francophone world of the 20th and 21st centuries. Students will travel through time and space with a selection of novels, poems, essays, and short stories. In this historical and cultural journey through Sub-Saharan Africa, North Africa, the Caribbean, Canada, Vietnam and Mauritius, our objective will be to provide a reassessment of what Francophone studies mean in the 21st century. Topics discussed in the course will include race and representation, national and cultural identity, immigration and nationalism, transnationalism and diaspora, "littérature-monde," the politics of language, postcolonialism and universalism. Readings will include the works of Dani Laferrière, Bessora, Ken Bugul, Alain Mabanckou, Kim Thúy, Ananda Devi, Abdourahman Waberi, Véronique Tadjo and Abdelkebir Khatibi. Taught in French.
Same as: FRENCH 329

CSRE 350G. Performing Race, Gender, and Sexuality. 4 Units.
In this theory and practice-based course, students will examine performances by and scholarly texts about artists who critically and mindfully engage race, gender, and sexuality. Students will cultivate their skills as artist-scholars through written assignments and the creation of performances in response to the assigned material. Attendance and written reflection about a live performance event on campus are required. Students will also learn various meditation practices as tools for making and critiquing performance, in both our seminar discussions and performance workshops. We will approach mindfulness as method and theory in our own practice, as well as in relation to the works studied. We will also consider the ethics and current debates concerning the mindfulness industry. Examples of artists studied include James Luna, Nao Bustamante, Renee Cox, William Pope.L, Cassils, boychild, Curious, Adrian Piper, Xandra Ibarra, Valérie Reding, Guillermo Gomez-Peña, and Ana Mendieta.
Same as: ARTSINST 150G, CSRE 150G, FEMGEN 150G, LIFE 150G, TAPS 150G

CSRE 357. Edward Said, or Scholar vs Empire. 3-4 Units.
How can an intellectual fight forces far larger than a single individual? How can solidarity be an antidote to racism? Why is there no distinction between the local and the global? What is the scholar's role in an alienating political climate? Why are criticism and humanism necessary partners? The author of Orientalism and world-changing frameworks such as Travelling Theory, Permission To Narrate, and Contrapuntal Reading, as well as remarkable texts, such as On Late Style and Representations of the Intellectual, teaches us how criticism can blunt instruments of empire. In this course, students observe the journey of one scholar as he writes between worlds against imperialist supremacy and colonial logic. They'll move from Exile to Indigeneity, Silence to Music, Centers to Margins, Victimhood to Dignity, West to East, Peace to Terror, Theory to Practice, Politics to Knowledge, Religiosity to Secularism, Statehood to Fragmentation, and back.
Same as: ENGLISH 357S, GLOBAL 157, TAPS 157S, TAPS 357S

CSRE 363. Race in Greco-Roman Antiquity. 3-5 Units.
This course will investigate representations of black people in ancient Greek and Roman antiquity. In addition to interrogating the conflation of the terms "race" and "blackness" as it applies to this time period, students will learn how to critique the interference of racial ideologies in modern scholarship, and they will cross-examine the role that race and cultural imperialism have played in the formation of the current discipline of Classics. Students will be invited to incorporate materials that they deem crucial into this discussion of skin color in Greco-Roman antiquity. Therefore, this course will benefit greatly from those with a broad spectrum of interests related to this topic.
Same as: CLASSICS 363

CSRE 364A. Race and Performance. 3-5 Units.
How does race function in performance and dare we say ¿live and in living color?¿ How does one deconstruct discrimination at its roots?n nFrom a perspective of global solidarity and recognition of shared plight among BIPOC communities, we will read and perform plays that represent material and psychological conditions under a common supremacist regime. Where and when possible, we will host a member of the creative team of some plays in our class for a live discussion. Assigned materials include works by Lin-Manuel Miranda, Amiri Baraka, Young Jean Lee, Ayad Akhtar, Susan Lori Parks, David Henry Hwang, Betty Shamieh, Jeremy O. Harris, and Christopher Demos Brown.n nThis class offers undergraduate students a discussion that does not center whiteness, but takes power, history, culture, philosophy, and hierarchy as core points of debate. In the first two weeks, we will establish the common terms of the discussion about stereotypes, representation, and historical claims, but then we will quickly move toward an advanced conversation about effective discourse and activism through art, performance, and cultural production. In this class, we assume that colonialism, slavery, white supremacy, and oppressive contemporary state apparatuses are real, undeniable, and manifest. Since our starting point is clear, our central question is not about recognizing or delineating the issues, but rather, it is a debate about how to identify the target of our criticism in order to counter oppression effectively and dismantle long-standing structures.n nNot all BIPOC communities are represented in this syllabus, as such claim of inclusion in a single quarter would be tokenistic and disingenuous. Instead, we will aspire to understand and negotiate some of the complexities related to race in several communities locally in the U.S. and beyond.
Same as: AFRICAAM 164A, CSRE 164A, TAPS 164

CSRE 371. Representation: Race, Law, and Politics. 2-4 Units.
Graduate seminar. In this course, we will work together to develop a detailed and comprehensive understanding of the concept(s) of political representation. We will do so by examining a number of historical and contemporary theories of political representation developed within philosophy and cognate fields. 2 unit option only for Phil PhDs beyond the second year.
Same as: PHIL 371W

CSRE 385. Race, Ethnicity, and Language: Pedagogical Possibilities. 3-4 Units.
This seminar explores the intersections of language and race/racism/racialization in the public schooling experiences of students of color. We will briefly trace the historical emergence of the related fields of sociolinguistics and linguistic anthropology, explore how each of these scholarly traditions approaches the study of language, and identify key points of overlap and tension between the two fields before considering recent examples of inter-disciplinary scholarship on language and race in urban schools. Issues to be addressed include language variation and change, language and identity, bilingualism and multilingualism, language ideologies, and classroom discourse. We will pay particular attention to the implications of relevant literature for teaching and learning in urban classrooms.
Same as: AFRICAAM 389C, EDUC 389C

CSRE 389A. Race, Ethnicity, and Language: Racial, Ethnic, and Linguistic Formations. 3-5 Units.
Language, as a cultural resource for shaping our identities, is central to the concepts of race and ethnicity. This seminar explores the linguistic construction of race and ethnicity across a wide variety of contexts and communities. We begin with an examination of the concepts of race and ethnicity and what it means to be "doing race," both as scholarship and as part of our everyday lives. Throughout the course, we will take a comparative perspective and highlight how different racial/ethnic formations (Asian, Black, Latino, Native American, White, etc.) participate in similar, yet different, ways of drawing racial and ethnic distinctions. The seminar will draw heavily on scholarship in (linguistic) anthropology, sociolinguistics and education. We will explore how we talk and don't talk about race, how we both position ourselves and are positioned by others, how the way we talk can have real consequences on the trajectory of our lives, and how, despite this, we all participate in maintaining racial and ethnic hierarchies and inequality more generally, particularly in schools.
Same as: ANTHRO 320A, EDUC 389A, LINGUIST 253

CSRE 393. The Art of Punk: Sound, Aesthetics and Performance. 5 Units.
This seminar explores the sonic and visual aesthetics of punk rock since the 1970s. While studying music, videos, zines, and album covers, students will examine the convergence of art with politics among artists, such as Lydia Lunch, Vaginal Davis, and Shizu Saldamando, and bands, including Crass, the Plasmatics, and Los Illegals, as well as punk subgenres, like No Wave, Riot Grrrl, and Queercore. Likewise, students will consider how issues of identity, race, gender and sexuality informed artists and their work.
Same as: ARTHIST 493

CSRE 394. Complicating Minimal Art: Race, Gender, and Sexuality. 5 Units.
In this seminar, students will uncover the sociopolitical complexities of Minimalism, a movement and style of art defined by pared-down geometric forms that emerged in the 1950s and continues to be popular today. Through a critical engagement with Minimalism's art historical narrative and art world controversies, students will consider the influence of key historical events on artists and their work, such as the Civil Rights Movement, Vietnam War, and AIDS Epidemic, as well as issues of race, gender, and sexuality. In the process, students will recover the contributions people of color, women, and queer artists have made to Minimal art.
Same as: ARTHIST 494

CSRE 433. Intersectional Qualitative Approaches. 3-5 Units.
This variable unit, graduate course is designed to explore intersectional analysis because intersectionality is a "method and a disposition, a heuristic and an analytic tool" (Carbado, Crenshaw, Mays, & Tomlinson, 2013, p. 11). This course engages the approaches and analyses possible within an intersectional theoretical framing by examining a wide range of interdisciplinary research methodologies and methods. We will study a myriad of innovative ways of doing intersectional scholarship and given the focus on robust methodological moves, this course will highlight questions of axiology of inquiry, analysis, and representation through an intersectional lens. Our class will investigate and create intersectional conceptual framing for designing and interpreting research. We will explore and develop qualitative or mixed¿methods research data collection, analyses, holistic interpretation, and analytic writing from an intersectional perspective.
Same as: EDUC 433

Jewish Studies Courses

JEWISHST 4. What Didn't Make It into the Bible. 4 Units.
Over two billion people alive today consider the Bible to be sacred scripture. But how did the books that made it into the bible get there in the first place? Who decided what was to be part of the bible and what wasn't? How would history look differently if a given book didn't make the final cut and another one did? Hundreds of ancient Jewish and Christian texts are not included in the Bible. "What Didn't Make It in the Bible" focuses on these excluded writings. We will explore the Dead Sea Scrolls, Gnostic gospels, hear of a five-year-old Jesus throwing temper tantrums while killing (and later resurrecting) his classmates, peruse ancient romance novels, explore the adventures of fallen angels who sired giants (and taught humans about cosmetics), tour heaven and hell, encounter the garden of Eden story told from the perspective of the snake, and learn how the world will end. The course assumes no prior knowledge of Judaism, Christianity, the bible, or ancient history. It is designed for students who are part of faith traditions that consider the bible to be sacred, as well as those who are not. The only prerequisite is an interest in exploring books, groups, and ideas that eventually lost the battles of history and to keep asking the question "why." In critically examining these ancient narratives and the communities that wrote them, you will investigate how religions canonize a scriptural tradition, better appreciate the diversity of early Judaism and Christianity, understand the historical context of these religions, and explore the politics behind what did and did not make it into the bible.
Same as: CLASSICS 9N, RELIGST 4

JEWISHST 4N. A World History of Genocide. 3-5 Units.
Reviews the history of genocide from ancient times until the present. Defines genocide, both in legal and historical terms, and investigates its causes, consequences, and global dimensions. Issues of prevention, punishment, and interdiction. Main periods of concern are the ancient world, Spanish colonial conquest; early modern Asia; settler genocides in America, Australia, and Africa; the Armenian genocide and the Holocaust; genocide in communist societies; and late 20th century genocide.
Same as: HISTORY 4N

JEWISHST 5. Biblical Greek. 3-5 Units.
This is a one term intensive class in Biblical Greek. After quickly learning the basics of the language, we will then dive right into readings from the New Testament and the Septuagint, which is the ancient Greek translation of the Hebrew Bible. No previous knowledge of Greek required. If demand is high for a second term, an additional quarter will be offered in the Spring.
Same as: CLASSICS 6G, RELIGST 171A

JEWISHST 5B. Biblical Greek. 3-5 Units.
This is a continuation of the Winter Quarter Biblical Greek Course. Pre-requisite: CLASSICS 6G or a similar introductory course in Ancient Greek.
Same as: CLASSICS 7G

JEWISHST 5G. Intensive Biblical Greek. 8 Units.
Equivalent to two quarters of Biblical Greek (CLASSICS 6G, 7G). Students will learn the core of New Testament Greek with the goal of learning to accurately translate and read the New Testament. Students will read one-third of the Gospel of John during the course and will be well-prepared to read the Greek New Testament independently after the course. Focus on knowledge of key vocabulary and grammar needed to read the Greek Bible with ease. No previous knowledge of Greek required. Course does not fulfill the Stanford language requirement.
Same as: RELIGST 171X

JEWISHST 18N. Religion and Politics: Comparing Europe to the U.S.. 3-4 Units.
Interdisciplinary and comparative. Historical, political, sociological, and religious studies approaches. The relationship between religion and politics as understood in the U.S. and Europe. How this relationship has become tense both because of the rise of Islam as a public religion in Europe and the rising influence of religious groups in public culture. Different understandings and definitions of the separation of church and state in Western democratic cultures, and differing notions of the public sphere. Case studies to investigate the nature of public conflicts, what issues lead to conflict, and why. Why has the head covering of Muslim women become politicized in Europe? What are the arguments surrounding the Cordoba House, known as the Ground Zero Mosque, and how does this conflict compare to controversies about recent constructions of mosques in Europe? Resources include media, documentaries, and scholarly literature.
Same as: RELIGST 18N

JEWISHST 19N. Everyone Eats: Food, Religion and Culture. 3 Units.
Food is one of the most essential aspects of the human experience. The decisions and choices we make about food define who we have been, who we are now, and who we want to become. In this seminar we will study how food habits have shaped religious traditions, and vice versa, how religious traditions have shaped food ways. Some traditions are centered around food regiments such as the dietary laws, derived from biblical law that shapes Jewish and Christian tradition very differently. Indeed, many religious and ethical thinkers, as well as anthropologists, have interpreted the meanings of the dietary laws very differently. Further, in many religious traditions the killing of animals and consumption of meat is deeply fraught. We will explore the history of food practices and their contemporary impact; the connections between food, religion, and identity; the meanings that religious thinkers and anthropologists have attributed to food habits; as well as the creative translations of religious traditions into contemporary food ethics by various social movements and groups, predominantly in the U.S.
Same as: CSRE 19N, RELIGST 19N

JEWISHST 37Q. Zionism and the Novel. 3 Units.
At the end of the nineteenth century, Zionism emerged as a political movement to establish a national homeland for the Jews, eventually leading to the establishment of the State of Israel in 1948. This seminar uses novels to explore the changes in Zionism, the roots of the conflict in the Middle East, and the potentials for the future. We will take a close look at novels by Israelis, both Jewish and Arab, in order to understand multiple perspectives, and we will also consider works by authors from the North America and from Europe. NOTE: To satisfy a WAYS requirement, this course must be taken for at least 3 units. In AY 2020-21, a 'CR' grade will satisfy the WAYS requirement.
Same as: COMPLIT 37Q

JEWISHST 39S. The Other Side: Ethnography and Travel Writing through Jewish, Christian and Muslim Eyes. 3 Units.
In an age of reality television and social media, we are bombarded with snapshots of the exotic, monstrous, and bizarre. Yet despite their quantity, these images pale in comparison to the qualities of terror, wonder and curiosity that ancient travelers evoked in their encounters with foreign lands and peoples. Early ethnographers, too, painstakingly explored the beliefs and practices of unfamiliar peoples sometimes very close to home. This course surveys their most vivid writings, from ancient Greece to the colonization of the New World, focusing on the relation between fascination with the other and the author's own religious imagination. In particular, it introduces the contributions of Jewish travelers and ethnographers to this history, which has often been written from the standpoint of imperial, ecclesiastical or colonial power. It stresses literary continuities across three general periods (ancient, medieval, and colonial), showing how remarkably consistent patterns of identification spring from diverse encounters.

JEWISHST 53. Exploring Jewish Spirituality. 4 Units.
It was once accepted as fact that Judaism is, at its core, a rational religion devoid of any authentic mystical tradition. But the past century of scholarship has reversed this claim, demonstrating that the spiritual life has been integral to Judaism's vital heart since ancient times. This yearning for a direct immediate experience of God's Presence, a longing to grasp the mysteries of the human soul and know the inner dynamics of the Divine realm, has taken on many different forms across the centuries.
This course will introduce students to the major texts--from theological treatises to poems and incantations--and core ideas of Jewish mysticism and spirituality, tracking their development from the Hebrew Bible to the dawn of modernity. Close attention will be paid to the historical context of these sources, and we will also engage with broader methodological approaches--from phenomenology to philology--regarding the academic study of religion and the comparative consideration of mysticism in particular.
This course assumes no prior background of Judaism or any other religious traditions. All readings will be made available in English. Students are, however, invited to challenge themselves with the "optional/advanced" readings of sources both primary and secondary. Pending interest, students with facility in the original languages (Hebrew or Aramaic) will be given the opportunity to do so.
Same as: RELIGST 53

JEWISHST 85B. Jews in the Contemporary World: The American Jewish Present & Past in Popular Culture, Film, & TV. 3 Units.
(HISTORY 85B is 3 units; HISTORY 185B is 5 units.) Who are American Jews as depicted in popular media-- film, television, etc.-- since the Second World War? How are their religion, politics, mores, and practices represented and what ways, if at all, do such portraits reflect historical trends among Jews and society in general? What can be learned from film or tv about Jewish identity, notions of Jewish power and powerlessness, communal cohesiveness and assimilation, sexuality and the wages of intermarriage or race?.
Same as: CSRE 85B, HISTORY 85B, REES 85B

JEWISHST 86. Exploring the New Testament. 4 Units.
To explore the historical context of the earliest Christians, students will read most of the New Testament as well as many documents that didn't make the final cut. Non-Christian texts, Roman art, and surviving archeological remains will better situate Christianity within the ancient world. Students will read from the Dead Sea Scrolls, explore Gnostic gospels, hear of a five-year-old Jesus throwing divine temper tantrums while killing (and later resurrecting) his classmates, peruse an ancient marriage guide, and engage with recent scholarship in archeology, literary criticism, and history.
Same as: CLASSICS 43, RELIGST 86

JEWISHST 86Q. Blood and Money: The Origins of Antisemitism. 4-5 Units.
For over two millennia, Jews and Judaism have been the object of sustained anxieties, fears, and fantasies, which have in turn underpinned repeated outbreaks of violence and persecution. This course will explore the development and impact of antisemitism from Late Antiquity to the Enlightenment, including the emergence of the Blood libel, the association between Jews and moneylending, and the place of Judaism in Christian and Islamic theology. No prior background in history or Jewish studies is necessary. Prerequisite: PWR 1.
Same as: HISTORY 86Q

JEWISHST 101A. First-Year Hebrew, First Quarter. 5 Units.
In the first-year program, students acquire essential Hebrew through abundant opportunities to interact in the language in meaningful ways. The students learn to function appropriately in the language in a variety of social and cultural contexts.
Same as: AMELANG 128A

JEWISHST 104C. First-Year Yiddish, Third Quarter. 4 Units.
Continuation of AMELANG 140B. Prerequisite: AMELANG 140B. Fulfills the University Foreign Language Requirement.
Same as: AMELANG 140C

JEWISHST 105. Hebrew Forum. 2-4 Units.
Intermediate and advanced level. Biweekly Hebrew discussion on contemporary issues with Israeli guest speakers. Vocabulary enhancement. Focus on exposure to academic Hebrew. May repeat for credit.
Same as: AMELANG 131B

JEWISHST 106. Reflection on the Other: The Arab Israeli Conflict in Literature and Film. 3-5 Units.
How literary works outside the realm of Western culture struggle with questions such as identity, minority, and the issue of the Other. How the Arab is viewed in Hebrew literature, film and music and how the Jew is viewed in Palestinian works in Hebrew or Arabic (in translation to English). Historical, political, and sociological forces that have contributed to the shaping of these writers' views. Guest lectures about the Jew in Palestinian literature and music. Note: To be eligible for WAYS credit, you must take course for a Letter Grade.
Same as: AMELANG 126, COMPLIT 145

JEWISHST 107A. Biblical Hebrew, First Quarter. 2 Units.
Establish a basic familiarity with the grammar and vocabulary of Biblical Hebrew and will begin developing a facility with the language. Students that are enrolled in this course must also enroll in Beginning Hebrew. This course requires no prior knowledge of Hebrew and will begin with learning the alphabet. By the end of the year, students will be able to translate basic biblical texts, will be familiar with common lexica and reference grammars, and will have sufficient foundational knowledge to enable them to continue expanding their knowledge either in a subsequent course or own their own.
Same as: RELIGST 170A

JEWISHST 107B. Biblical Hebrew, Second Quarter. 2 Units.
Continuation of 170A.

JEWISHST 107C. Biblical Hebrew, Third Quarter. 4 Units.
Continuation of 170B.
Same as: AMELANG 170C

JEWISHST 120. Sex and Gender in Judaism and Christianity. 3 Units.
What role do Jewish and Christian traditions play in shaping understandings of gender differences? Is gender always imagined as dual, male and female? This course explores the variety of ways in which Jewish and Christian traditions - often in conversation with and against each other - have shaped gender identities and sexual politics. We will explore the central role that issues around marriage and reproduction played in this conversation. Perhaps surprisingly, early Jews and Christian also espoused deep interest in writing about 'eunuchs' and 'androgynes,' as they thought about Jewish and Christian ways of being a man or a woman. We will examine the variety of these early conversations, and the contemporary Jewish and Christian discussions of feminist, queer, trans- and intersex based on them.
Same as: FEMGEN 130, RELIGST 130

JEWISHST 123. Muslims, Jews, and Christians: Conflict, Coexistence, and Collaboration. 4 Units.
Relationships between Muslims, Jews, and Christians today are informed by a multitude of complex and often painful histories. These faith traditions emerged out of deep and sustained engagement with one another sharing theological and ethical principles, and revering many of the same figures and there have been many periods of rich and productive interaction. Yet there have also been areas of dissension and conflict, and periods when theological, social, or political disagreement devolved into violence and oppression. In recent times (especially following the Holocaust and the establishment of the modern State of Israel), religious, political, and intellectual leaders of Muslim, Jewish, and Christian communities, in the U.S. and around the world, have recognized the need to forge deeper and more meaningful relationships with one another. Knowledge and understanding of the perspectives that different communities and individuals bring to bear on their entangled past, present, and future are a critical part of efforts to resolve intransigent conflicts and advance mutual interests. This course explores some of the most significant moments of interaction through literature and art, polemic and dialogue that have shaped engagements between Muslims, Jews, and Christians throughout history, and examines both prospects and pitfalls for engagement in the present and future.
Same as: RELIGST 133

JEWISHST 125. Modern Jewish Mysticism: Devotion in a Secular Age. 4 Units.
The twentieth-century was a time of tremendous upheaval and unspeakable tragedy for the Jewish communities of Europe. But the past hundred years were also a period of great renewal for Jewish spirituality, a renaissance that has continued into the present day. Beginning with the writings of the Safed Renaissance, the Sabbateanism, and the Hasidic masters, our course will focus on key thinkers in the 19th and 20th centuries, including: Hillel Zeitlin, Martin Buber, Abraham Isaac Kook, Abraham Joshua Heschel, and Arthur Green. Drawing upon essays, homilies, and poems, we will examine the ways in which their works re-cast and reinterpret the Jewish tradition in answer to the singular questions and challenges modernity. We will mark the development of their thinking against the two World Wars, the Holocaust, and the complex and multi-faceted processes of secularization. We will also consider the theological project of modern Jewish mystics in dialogue with modern Jewish philosophers (such as Hermann Cohen, Franz Rosenzweig, and Emmanuel Levinas) as well as modern philosophers and scholars informed by Christianity (from William James to Charles Taylor). This course argues that the processes of sacralization, of reclaiming a life of mystical devotion, are best understood as a unique response to Jewish modernity rather than a retreat to past modalities of religion. In seeking to prove this point, we will explore writers whose work emerged in and engaged with different social and cultural domains. We will investigate their writings with an eye to issues such as power and identity, and will draw upon their works in charting the intersection of mysticism, literature, language and experience. Throughout our readings, we will keep our eye on the sustained impact of feminism on Jewish mysticism in the second half of the twentieth century. This course is structured as a seminar, and our class discussions will be rooted in the primary sources. It assumes no prior background of Judaism or any other religious traditions. All readings will be made available in English.
Same as: RELIGST 165

JEWISHST 127D. Readings in Talmudic Literature. 1 Unit.
Readings of Talmudic texts. Some knowledge of Hebrew is preferred, but not necessary. The goal of the ongoing workshop is to provide Stanford students with the opportunity to engage in regular Talmud study, and to be introduced to a variety of approaches to studying Talmudic texts and thought.
Same as: JEWISHST 227D, RELIGST 170D

JEWISHST 127E. Readings in Talmudic Literature Advanced. 1 Unit.
Readings of the talmudic texts. Knowledge of Hebrew is required. The ongoing seminar is designed to study the making of the talmudic sugya (unit of discourse), along with classic commentaries. Students will consider some of the recent developments in the academic study of Talmudic literature, introduced by the instructor. The goal of the ongoing seminar is to provide Stanford students and faculty with the opportunity to engage in regular Talmud study, and to be introduced to a variety of approaches to studying Talmudic texts. Meeting time and location TBA. May be repeated for credit.
Same as: JEWISHST 227E, RELIGST 170E

JEWISHST 128. Women and Gender in Early Judaism and Christianity. 4 Units.
Beginning with the Hebrew Bible and New Testament, we will explore female figures in early Jewish and Christian literatures, such as Eve, Ruth, Mary, and Junia. Based on this, we will probe the prescriptions for female comportment in early Judaism and Christianity placing these literary prescriptions in conversation with material evidence related to women, such as for example the Babatha archive. We will analyze the politics of patriarchy in ancient discourse, and examine, among other topics, efforts by Christian clergy to silence female prophets in the second and third centuries CE. The bulk of the course will be devoted to the formative years of both Judaism and Christianity in Late Antiquity. This course assumes no prior knowledge of Judaism, Christianity, the Bible, or ancient history. It is designed for students who are part of faith traditions that consider the Bible to be sacred, as well as those who are not. Ancient readings in this course will be supplemented by modern scholarship in classics, early Christian studies, gender studies, queer studies, and the history of sexuality.
Same as: RELIGST 128

JEWISHST 129. Sacred Words: Jewish Thought and the Question of Language. 4 Units.
Jews have long been referred as the people of the book, but they might better be referred to as the people of the word. Drawing upon texts from the Hebrew Bible to the works of modern Hebrew writers like of Hayyim Nahman Bialik and Amoz Oz, this seminar will chart the development of Jewish thinking on language over the past two millennia. We will explore issues such as: the idea of canonization; oral versus written language; the nature and possibility of translation; the origins of language; notions of negative theology; mystical approaches to the word; the rebirth of Hebrew as a spoken and cultural language; and the limits of language after the Holocaust. This course will also bring Jewish thought into dialogue with contemporary philosophical reflections on issues of language. Modern explorations of language will prove an interesting way of deepening our understanding of the Jewish thinkers on one hand, and enriching contemporary intellectual discourse on the other.
Same as: RELIGST 169

JEWISHST 129A. Milk and Honey, Wine and Blood: Food, Justice, and Ethnic Identity in Jewish Culture. 4 Units.
This course examines Jewish culture and the food practices and traditions that have shaped and continue to shape it. Students learn to prepare a variety of meals while studying about the historical and literary traditions associated with them, such as the dietary `laws¿ and the long history of their interpretation, as well as the cultivation of eating as devotional practice in Jewish mystical traditions. We will explore how regional foods the world over contribute to the formation of distinct Jewish ethnic identities, and how these traditions shape contemporary Jewish food ethics. The course includes guest visits by professional chefs and food writers, and field trips to a local winery.
Same as: RELIGST 129

JEWISHST 130VP. Introduction to Social Demography: A Comparative Approach (Israel & US). 3 Units.
In this class we will learn about Israel's unique demographic structure and we will compare it to the US and other countries. Reading materials include general theories as well as research published in scholarly journals. In the first half of this class we will review basic demographic concepts (mortality, fertility and migration), and we will apply them to the Israeli context, with comparisons between different social groups in Israel and with comparison to the US. We will also review basic demographic theories (theories of population change) and apply them to different countries. nnIn the second half of the class we will focus on demography of the family. We will ask how fertility, marriage and divorce differ for different population groups in Israel and the US, and we will tie family processes to current theories of gender and family change. We will also learn how demographic processes may be related to the reproduction of poverty, and inequality.
Same as: SOC 119VP

JEWISHST 131VP. Poverty and Inequality in Israel and the US: A Comparative Approach. 3 Units.
Poverty rates in Israel are high and have been relatively stable in recent decades, with about one fifth of all households (and a third of all children) living below the poverty line. In this class we will learn about poverty and inequality in Israel and we will compare with the US and other countries.nnIn the first few weeks of this class we will review basic theories of poverty and inequality and we will discuss how theories regarding poverty have changed over the years, from the "culture of poverty" to theories of welfare state regimes. We will also learn about various ways of measuring poverty, material hardship, and inequality, and we will review the methods and data used.nnIn the remaining weeks of the class we will turn to substantive topics such as gender, immigration, ethnicity/nationality, welfare policy, age, and health. Within each topic we will survey the debates within contemporary scholarship and we will compare Israel and the US. Examination of these issues will introduce students to some of the challenges that Israeli society faces today.
Same as: CSRE 120P, SOC 120VP

JEWISHST 132. Between Nation-Building and Liberalization: The Welfare State in Israel. 3 Units.
According to one commentator, the political economy of Israel is characterized by embedded illiberalism. In the context of a national and territorial conflict, the Israeli state fostered comprehensive nation-building projects (such as immigration absorption), via employment and social protection schemes. This course surveys the distinctive development of the Israeli welfare state in comparative perspective, and analyzes its particular politics and outcomes in the form of inclusion but also exclusion of different populations from full citizenship. The course will follow a chronological path from the pre-state crystallization of national welfare institutions to the current neo-liberalization trend that seems to undermine collectivist projects and advance the re-commodification of citizenship. Throughout the course we will discuss issues such as: the role of labor and nationalism in the design of social policy, the production of national, ethnic and gender inequality, and the dynamics of change and continuity following heightened liberalization and internationalization since the 1980s. The course exposes students to key issues of the sociology of the welfare state with particular emphasis on the development and role of the state in a deeply conflicted society, using the Israeli experience. At the conclusion of the course students are expected to understand how welfare state institutions reflect but also reproduce societal schisms and conflicts, and be familiar with central aspects of Israeli politics past and present.
Same as: SOC 102

JEWISHST 132A. Social Inequality in Israel. 3 Units.
Like the US, Israel is a nation of immigrants. Israel additionally shares with the US vast economic, ethnic/racial and gender gaps, which are shaped and are being shaped by the demographic diversity characterizing its society. The course will provide a comparative framework for analyzing social inequality in Israel. We will start by reviewing essential concepts and theories in the study of social stratification. We will then review the main cleavages characterizing Israeli society, while comparing them to gaps in other advances societies and particularly the US. We will focus on class, gender and ethnicity as the main distinctions and will examine their implications for differences in life chances in several domains across the life course. We will conclude with a discussion of possible scenarios for change, which are relevant to both Israel and the US. Throughout the course, we will study critical thinking techniques and will use them for analyzing issues that are central for the analysis of social inequality in Israel and elsewhere.
Same as: CSRE 132A, SOC 102A

JEWISHST 132D. Sociology of Jewishness. 3-5 Units.
Examines the place of the Jewish people in society throughout various locales and historical periods to understand how interactions among Jews and with other groups have shaped Jewish identities. Topics include modernism, the Holocaust, Israel/nationhood, race/ethnicity, intermarriage, and assimilation. Uses theoretical, empirical, and historical material from multiple social scientific fields of study and explores the study of Judaism from several major sociological lenses.
Same as: CSRE 132J, SOC 132J

JEWISHST 132VP. Family and Society: A Comparative Approach (Israel & the US). 3 Units.
Families are changing: Non-marital partnerships such as cohabitation are becoming more common, marriage is delayed and fertility is declining. In this class we will learn about how families are changing in Israel and we will compare with the US and other countries. Reading materials include general theories as well as research published in scholarly journals. nnAfter reviewing general theories and major scholarly debates concerning issues of family change, we will turn to specific family processes and compare Israel, the US and other countries. We will ask how family transitions may differ for different population groups and at different stages of the life course, and we will tie family processes to current theories of gender. nnWe will cover a wide range of topics, from marriage and marital dissolution to cohabitation, LAT and remarriage. We will also discuss changes in women's labor force participation and how it bears on fertility, parenthood and household division of labor. Within each substantive topic we will survey the debates within contemporary scholarship and we will compare Israel and the US.
Same as: SOC 121VP, SOC 221VP

JEWISHST 133. Sociology of Citizenship. 3 Units.
Not only a legal status, citizenship forms a major concern for political sociologists interested in questions of membership, exclusion, redistribution, and struggles over the boundaries of collective identity. Citizenship is in essence membership in a political community that entails rights and duties, and structures a tripartite relationship between the individual, community and state. The institutions of citizenship include formal and bureaucratic rules of eligibility ¿ but also informal institutions such as identity and belonging. Throughout the course, students are exposed to key issues of the sociology of citizenship such as the historically different paths of men, women, minority groups and immigrants into citizenship, the contested development of rights and duties, the regulation of population, as well as insurgency and collective attempts to rearticulate the terms of the ¿contract¿ with the state. Israel, the USA, France and Germany are used as empirical illustrations. At the conclusion of the course students will know how to utilize the analytic framework of citizenship in order to analyze a wide range of political phenomena in contemporary societies.
Same as: SOC 103

JEWISHST 133A. WELFARE, WORK AND POVERTY.. 3 Units.
Early theorists of the welfare state described it as a reaction to the emergence of needs and interests of specific social groups during processes of economic development and change. Later theorists countered that the welfare state does not merely react to social cleavages during times of economic change but rather works to actively shape them, in line with worldviews or the interests of dominant group members. Adopting the latter approach, the goal of this course is to provide the tools and knowledge necessary for a critical evaluation of the social services provided to Israeli citizens and their impact on social and economic inequalities. The course will survey various approaches to the understanding of the goals of the welfare state. A comparative and historical account of the development of the welfare state will be presented, while highlighting recent developments, such as the increase in poverty rates and the aging of the population. During the course, we will examine the diverse needs that are served by the welfare state, as well as major dilemmas associated with the provision of services. Throughout the course, we will study critical thinking techniques and will use them for analyzing issues that are central for the development of social policies in Israel and the US.
Same as: CSRE 133J, SOC 103A

JEWISHST 139. Rereading Judaism in Light of Feminism. 4 Units.
During the past three decades, Jewish feminists have asked new questions of traditional rabbinic texts, Jewish law, history, and religious life and thought. Analysis of the legal and narrative texts, rituals, theology, and community to better understand contemporary Jewish life as influenced by feminism.
Same as: FEMGEN 139

JEWISHST 143. Literature and Society in Africa and the Caribbean. 4 Units.
This course explores texts and films from Francophone Africa and the Caribbean in the 20th and 21st centuries. The course will explore the connections between Sub-Saharan Africa, the Maghreb and the Caribbean through both foundational and contemporary works while considering their engagement with the historical and political contexts in which they were produced. This course will also serve to improve students' speaking and writing skills in French while sharpening their knowledge of the linguistic and conceptual tools needed to conduct literary analysis. The diverse topics discussed in the course will include national and cultural identity, race and class, gender and sexuality, orality and textuality, transnationalism and migration, colonialism and decolonization, history and memory, and the politics of language. Readings include the works of writers and filmmakers such as Djibril Tamsir Niane, Léopold Senghor, Aimé Césaire, Albert Memmi, Patrick Chamoiseau, Leonora Miano, Leila Slimani, Dani Laferrière and Ousmane Sembène. Taught in French. Students are highly encouraged to complete FRENLANG 124 or to successfully test above this level through the Language Center. This course fulfills the Writing in the Major (WIM) requirement.
Same as: AFRICAAM 133, AFRICAST 132, COMPLIT 133A, COMPLIT 233A, CSRE 133E, FRENCH 133

JEWISHST 144B. Poetic Thinking Across Media. 4 Units.
Even before Novalis claimed that the world must be romanticized, thinkers, writers, and artists wanted to perceive the human and natural world poetically. The pre- and post-romantic poetic modes of thinking they created are the subject of this course. Readings include Ecclestias, Zhaozhou Congshen, Montaigne, Nietzsche, Kafka, Benjamin, Arendt, and Sontag. This course will also present poetic thinking in the visual arts–– from the expressionism of Ingmar Bergman to the neo-romanticism of Gerhard Richter.

JEWISHST 147A. The Hebrew Bible in Literature. 3-5 Units.
Close reading of major biblical stories and poems that influenced modern literature written in English and Hebrew. Hebrew texts will be read in translation to English. Each class will include a section from the Hebrew Bible as well as a modern text or film based on the biblical story/poem. Discussion of questions such as: the meaning and function of myths and the influence of the Hebrew Bible on the development of literary styles and genres.
Same as: JEWISHST 347A

JEWISHST 147B. The Hebrew and Jewish Short Story. 3-5 Units.
Short stories from Israel, the US and Europe including works by Agnon, Kafka, Keret, Castel-Bloom, Kashua, Singer, Benjamin, Freud, biblical myths and more. The class will engage with questions related to the short story as a literary form and the history of the short story. Reading and discussion in English. Optional: special section with readings and discussions in Hebrew. Note: To be eligible for WAYS credit, you must take the course for a Letter Grade. In AY 2020-21, a 'CR' grade will satisfy the WAYS requirement.
Same as: COMPLIT 127B

JEWISHST 148. Writing Between Languages: The Case of Eastern European Jewish Literature. 1-5 Unit.
Eastern European Jews spoke and read Hebrew, Yiddish, and their co-territorial languages (Russian, Polish, etc.). In the modern period they developed secular literatures in all of them, and their writing reflected their own multilinguality and evolving language ideologies. We focus on major literary and sociolinguistic texts. Reading and discussion in English; students should have some reading knowledge of at least one relevant language as well. ***This course must be taken for a minimum of 3 units and a letter grade to be eligible for Ways credit***.
Same as: JEWISHST 348, SLAVIC 198, SLAVIC 398

JEWISHST 150. Texts that Changed the World from the Ancient Middle East. 3-5 Units.
This course traces the story of the cradle of human civilization. We will begin with the earliest human stories, the Gilgamesh Epic and biblical literature, and follow the path of the development of law, religion, philosophy and literature in the ancient Mediterranean or Middle Eastern world, to the emergence of Jewish and Christian thinking. We will pose questions about how this past continues to inform our present: What stories, myths, and ideas remain foundational to us? How did the stories and myths shape civilizations and form larger communities? How did the earliest stories conceive of human life and the divine? What are the ideas about the order of nature, and the place of human life within that order? How is the relationship between the individual and society constituted? This course is part of the Humanities Core: https://humanitiescore.stanford.edu/.
Same as: COMPLIT 31, HUMCORE 111, RELIGST 150

JEWISHST 155D. Jewish American Literature and Film. 5 Units.
From its inception, Jewish-American literature has taken as its subject as well as its context the idea of Jewishness itself. Jewish culture is a diasporic one, and for this reason the concept of Jewishness differs from country to country and across time. What stays remarkably similar, though, is Jewish self-perception and relatedly Jewish literary style. This is as true for the first-generation immigrant writers like Isaac Bashevis Singer and Anzia Yezierska who came to the United States from abroad as it is for their second-generation children born in the United States, and the children of those children. In this course, we will consider the difficulties of displacement for the emigrant generation and their efforts to sustain their cultural integrity in the multicultural American environment. We'll also examine the often comic revolt of their American-born children and grandchildren against their (grand-)parents nostalgia and failure to assimilate. Only by considering these transnational roots can one understand the particularity of the Jewish-American novel in relation to mainstream and minority American literatures. In investigating the link between American Jewish writers and their literary progenitors, we will draw largely but not exclusively from Russia and the countries of Eastern Europe.
Same as: AMSTUD 145D, ENGLISH 145D, REES 145D

JEWISHST 155J. The Jewish-American Novel: Diaspora, Privilege, Anxiety, Comedy. 4-5 Units.
Jews are sometimes referred to as 'the people of the book.' Would Portnoy's Complaint count as a book that constitutes Jewish-American peoplehood? What about Fear of Flying? This seminar introduces students to influential Jewish-American novels (and some short stories and film) from the late nineteenth century to the present day. These works return time and again to questions of diaspora, race, queer social belonging, and the duty to a Jewish past, mythical or real. Through close readings of short stories and novels coupled with secondary readings about Jewish-American history and culture, we will explore how American Jewishness is constructed differently in changing historical climates. What makes a text Jewish? What do we mean by Jewish humor and Jewish seriousness? How do Jewish formulations of gender and power respond to Jews' entrance into the white American mainstream? As we read, we'll think through and elaborate on models of ethnicity, privilege, sexuality, and American pluralism. Authors include Cahan, Yezierska, Singer, Roth, Bellow, Malamud, Ozick, Mailer, Jong, and Englander.
Same as: AMSTUD 145J, ENGLISH 145J

JEWISHST 185B. Jews in the Contemporary World: The American Jewish Present & Past in Popular Culture, Film, & TV. 4-5 Units.
(HISTORY 185B is 5 units; HISTORY 85B IS 3 units.) Who are American Jews as depicted in popular media -- film, television, etc. -- since the Second World War? How are their religion, politics, mores, and practices represented and what ways, if at all, do such portraits reflect historical trends among Jews and society in general? What can be learned from film or tv about Jewish identity, notions of Jewish power and powerlessness, communal cohesiveness and assimilation, sexuality and the wages of intermarriage or race?.
Same as: CSRE 185B, HISTORY 185B, HISTORY 385C, REES 185B, SLAVIC 183

JEWISHST 186. Jews in Trump's America and Before. 5 Units.
This class considers the notion of American Jewish exceptionalism through the lens of Trump's America. The social and economic success of American Jewry over the last 350 years is remarkable, yet Jews continue to find their position in American society called into question. This course moves between past and present and will consider key moments in American Jewish life with a particular emphasis on contemporary currents, including post-liberal identity politics, Israel, and the rise of white supremacy.
Same as: HISTORY 286F

JEWISHST 199B. Directed Reading in Yiddish, Second Quarter. 1-5 Unit.
For intermediate or advanced students. May be repeated for credit.

JEWISHST 205. Reading Hebrew, First Quarter. 2-4 Units.
Introduction to Hebrew literature through short stories and poetry by notable Israeli writers. In Hebrew. Prerequisite: one year of Hebrew or equivalent.

JEWISHST 211. Out of Eden: Deportation, Exile, and Expulsion from Antiquity to the Renaissance. 4-5 Units.
This course examines the long pedigree of modern deportations and mass expulsions, from the forced resettlements of the ancient world to the expulsion of Jews from Spain in 1492, and from the outlawry of Saga-era Iceland to the culture of civic exile in Renaissance Italy. The course focuses on Europe and the Mediterranean from antiquity to the early modern period, but students are welcome to venture beyond these geographical and chronological boundaries for their final papers.
Same as: HISTORY 211, HISTORY 311

JEWISHST 215. Understanding Jews. 1-2 Unit.
This discussion-based course will give students an opportunity to explore the constellation of religious, ethnic, national, cultural, artistic, spiritual, and political forces that shape Jewish life in the 21st century. Drawing on historical documents, classical texts, and contemporary events, this course will give students from any background an opportunity to ask hard questions, deepen their own understandings, and challenge their conceptions of what makes Jewish life ¿Jewish.¿ No matter where you went for Sunday school ¿ church, synagogue, the woods, or nowhere at all ¿ this course is a chance to question what you know, and interrogate how you came to know what you know about Jews, Judaism, and Jewish culture.
Same as: AMSTUD 215

JEWISHST 221C. Aramaic Texts. 1-5 Unit.
Readings in Aramaic/Syriac with special focus on grammar and syntax of ancient texts.
Same as: JEWISHST 321C, RELIGST 221C, RELIGST 321C

JEWISHST 221D. Readings in Syriac Literature. 2-5 Units.
In recent years, there has been growing interest in the works of Syriac speaking Christians in antiquity and beyond. This course offers an introduction to the Syriac language, including its script, vocabulary and grammar, and a chance to read from a selection of foundational Syriac Christian texts.
Same as: JEWISHST 321D, RELIGST 221D, RELIGST 321D

JEWISHST 226E. The Holocaust: Insights from New Research. 4-5 Units.
Overview of the history of the Holocaust, the genocide of European Jews. Explores its causes, course, consequences, and memory. Addresses the events themselves, as well as the roles of perpetrators and bystanders, dilemmas faced by victims, collaboration of local populations, and the issue of rescue. Considers how the Holocaust was and is remembered and commemorated by victims and participants alike. Uses different kinds of sources: scholarly work, memoirs, diaries, film, and primary documents.
Same as: CSRE 226D, CSRE 326D, HISTORY 226D, HISTORY 326D, JEWISHST 326D

JEWISHST 227D. Readings in Talmudic Literature. 1 Unit.
Readings of Talmudic texts. Some knowledge of Hebrew is preferred, but not necessary. The goal of the ongoing workshop is to provide Stanford students with the opportunity to engage in regular Talmud study, and to be introduced to a variety of approaches to studying Talmudic texts and thought.
Same as: JEWISHST 127D, RELIGST 170D

JEWISHST 227E. Readings in Talmudic Literature Advanced. 1 Unit.
Readings of the talmudic texts. Knowledge of Hebrew is required. The ongoing seminar is designed to study the making of the talmudic sugya (unit of discourse), along with classic commentaries. Students will consider some of the recent developments in the academic study of Talmudic literature, introduced by the instructor. The goal of the ongoing seminar is to provide Stanford students and faculty with the opportunity to engage in regular Talmud study, and to be introduced to a variety of approaches to studying Talmudic texts. Meeting time and location TBA. May be repeated for credit.
Same as: JEWISHST 127E, RELIGST 170E

JEWISHST 240. The Yiddish Story. 3-5 Units.
The Yiddish language is associated with jokes, folktales, and miracle legends, as well as modern stories. This class traces the development of Yiddish literature through these short oral and written forms, following Jewish writers out of the East European market town to cities in the Soviet Union, Israel, and especially the United States. We conclude with stories written in other languages about Yiddish writers. Readings include Sholem Aleichem, I. L. Peretz, Isaac Bashevis Singer, Esther Singer-Kreitman, Cynthia Ozick, and Dina Rubina. Readings in English; optional discussion section for students who read Yiddish.
Same as: AMSTUD 240Y

JEWISHST 242G. Myth and Modernity. 3-5 Units.
Masters of German 20th- and 21st-Century literature and philosophy as they present aesthetic innovation and confront the challenges of modern technology, social alienation, manmade catastrophes, and imagine the future. Readings include Nietzsche, Freud, Rilke, Musil, Brecht, Kafka, Doeblin, Benjamin, Juenger, Arendt, Musil, Mann, Adorno, Celan, Grass, Bachmann, Bernhardt, Wolf, and Kluge. Taught in English. Note for German Studies grad students: GERMAN 322 will fulfill the grad core requirement since GERMAN 332 is not being offered this year. NOTE: Enrollment requires Professor Eshel's consent. Please contact him directly at eshel@stanford.edu and answer these 2 questions: "Why do you want to take this course?" and "What do you think you can add to the discussion?" Applications will be considered in the order in which they were received. Enrollment is limited to 20 students.
Same as: COMPLIT 222A, GERMAN 222, GERMAN 322, JEWISHST 342

JEWISHST 243A. Hannah Arendt: Facing Totalitarianism. 3-5 Units.
Like hardly any other thinker of the modern age, Hannah Arendt's thought offers us timeless insights into the fabric of the modern age, especially regarding the perennial danger of totalitarianism. This course offers an in-depth introduction to Arendt's most important works in their various contexts, as well as a consideration of their reverberations in contemporary philosophy and literature. Readings include Arendt's The Origin of Totalitarianism, The Human Condition, Between Past and Future, Men in Dark Times, On Revolution,Eichmann in Jerusalem, and The Life of the Mind, as well as considerations of Hannah Arendt's work by Max Frisch, Jürgen Habermas, Seyla Benhabib, Judith Butler, Giorgio Agamben, and others. Special attention will be given to Arendt's writings on literature with an emphasis on Kafka, Brecht, Auden, Sartre, and Camus. This course will be synchronously conducted, but will also use an innovative, Stanford-developed, online platform called Poetic Thinking. Poetic Thinking allows students to share both their scholarly and creative work with each other. Based on the newest technology and beautifully designed, it greatly enhances their course experience.
Same as: COMPLIT 353B, GERMAN 253, GERMAN 353

JEWISHST 249. The Algerian Wars. 3-5 Units.
From Algiers the White to Algiers the Red, Algiers, the Mecca of the Revolutionaries in the words of Amilcar Cabral, this course offers to study the Algerian Wars since the French conquest of Algeria (1830-) to the Algerian civil war of the 1990s. We will revisit the ways in which the war has been narrated in literature and cinema, popular culture, and political discourse. A special focus will be given to the Algerian War of Independence (1954-1962). The course considers the racial representations of the war in the media, the continuing legacies surrounding the conflict in France, Africa, and the United States, from Che Guevara to the Black Panthers. A key focus will be the transmission of collective memory through transnational lenses, and analyses of commemorative events and movies. nReadings from James Baldwin, Assia Djebar, Albert Camus, Frantz Fanon, Mouloud Feraoun. Movies include "The Battle of Algiers," "Days of Glory," and "Viva Laldjérie." nTaught in English.
Same as: CSRE 249, FRENCH 249, HISTORY 239G

JEWISHST 265. Jewish Law: Introduction and Topics. 2 Units.
This course will provide an overview of the field of Jewish Law and will seek to provide a few case studies of topics in Jewish Law. All the readings are in English and this course presupposes no background in Jewish Law. Jewish Law is the world's oldest complex legal systems with distinct and idiosyncratic approaches to family, commercial, ritual and many other areas of law. It also has developed an elaborate "conflicts of law" sub-literature focusing on when should Jewish Law apply and when should some other legal system apply, reflecting the long history of the Jewish community in the diaspora as a minority. In this course, we will consider how Jewish law approaches a number of specific topics and we will ponder as well the proper interaction between Jewish law and secular legal norms, Jewish Law and changes in technology, Jewish law and sovereignty, Jewish Law and Bioethics and Jewish law and Family. Other topics will be added as we all see fit. Students who are interested in making a presentation on an area of their choice are welcome to do so. The course will seek to include an optional supplementary "field trip" to see a rabbinical court in action in California. The Learning Outcomes provided by this court include the following: Students who take this course will: 1. Exhibit knowledge and understanding of key concepts in substantive law, procedural law, and legal thought in Jewish Law. 2. Demonstrate facility with legal analysis and reasoning in the Jewish Legal tradition and will demonstrate the ability to conduct legal research in Jewish Law. After the term begins, students accepted into the course can transfer, with consent of the instructor, from section (01) into section (02), which meets the R requirement. Elements used in grading: Attendance, Class Participation, Final Paper. Cross-listed with the Law School (LAW 5038).

JEWISHST 281K. Departures: Late Ottoman Displacements of Muslims, Christians, and Jews, 1853-1923. 5 Units.
In the late nineteenth and early twentieth centuries, millions of people moved into and out of the Ottoman Empire, sometimes voluntarily and sometimes under extremely violent circumstances. More often than not, they moved in groups that were religiously defined. This course examines how these developments shaped the future of the modern Middle East, Balkans, and beyond. Questions include: How did migration and the idea of the nation shape each other? What does it mean to call a group or a migration "religious"? Why did certain types of diversity become a "problem," in the eyes of the state? What caused these population displacements? What can this topic teach us about today's mass migrations?.
Same as: HISTORY 281K

JEWISHST 282. Circles of Hell: Poland in World War II. 5 Units.
Looks at the experience and representation of Poland's wartime history from the Nazi-Soviet Pact (1939) to the aftermath of Yalta (1945). Examines Nazi and Soviet ideology and practice in Poland, as well as the ways Poles responded, resisted, and survived. Considers wartime relations among Polish citizens, particularly Poles and Jews. In this regard, interrogates the traditional self-characterization of Poles as innocent victims, looking at their relationship to the Holocaust, thus engaging in a passionate debate still raging in Polish society.
Same as: HISTORY 228, HISTORY 328, JEWISHST 382

JEWISHST 282K. The Holocaust and Its Aftermath. 4-5 Units.
This seminar gives an overview over different aspects of the history of the Holocaust and its aftermath and will examine key issues in recent Holocaust historiography and questions of memory and representation. Special emphasis is put on the nature of the historian's task, as viewed through the lens of historians of the Holocaust, as well as to the significance of the Holocaust in history and how it has changed over time. The course will confront students with historiographical texts and historical documents, with photography and film, works of scholarship and art.
Same as: HISTORY 202K, HISTORY 302K, JEWISHST 382K

JEWISHST 284C. Genocide and Humanitarian Intervention. 3 Units.
Open to medical students, graduate students, and undergraduate students. Traces the history of genocide in the 20th century and the question of humanitarian intervention to stop it, a topic that has been especially controversial since the end of the Cold War. The pre-1990s discussion begins with the Armenian genocide during the First World War and includes the Holocaust and Cambodia under the Khmer Rouge in the 1970s. Coverage of genocide and humanitarian intervention since the 1990s includes the wars in Bosnia, Rwanda, Kosovo, the Congo and Sudan.
Same as: HISTORY 224C, HISTORY 324C, JEWISHST 384C, PEDS 224

JEWISHST 285C. The Immigrant in Modern America. 5 Units.
The 2016 presidential election propelled the topic of immigration to the center of public attention. This is not the first time, however, that questions of immigration and what it means to be an American have revealed deep divisions within the U.S. This course explores the reception of immigrants in modern America, including differing views toward immigration; how immigrants help shape ideas about the American nation; and the growth of state bureaucracy and policing apparatus as a response.
Same as: HISTORY 285C

JEWISHST 286D. Yours in Struggle: African Americans and Jews in the 20th Century U.S.. 5 Units.
This colloquium explores the history of African Americans and Jews in 20th century US beginning with Jewish immigration from Eastern Europe and the Great Migration to America's urban centers. It considers the geographical and economic tensions that developed between two minority groups living in close proximity; the appropriation of black culture; Jewish claims to whiteness and performance of blackness; intercommunal relations during the Civil Rights movement; the breakdown of the black-Jewish alliance in the late 1960s; and the lingering ramifications of this shift today.
Same as: HISTORY 286D

JEWISHST 287S. Research Seminar in Ottoman and Middle East History. 4-5 Units.
Student-selected research topics. May be repeated for credit.
Same as: HISTORY 481, JEWISHST 481

JEWISHST 288C. Jews of the Modern Middle East and North Africa. 5 Units.
This course will explore the cultural, social, and political histories of the Jews of the Middle East and North Africa (MENA) from 1860 to present times. The geographic concentration will range from Morocco to Iran, Iraq to Turkey, and everywhere in between. Topics include: Jewish culture and identity in Islamic contexts; the impacts of colonialism, westernization, and nationalism; Jewish-Muslim relations; the racialization of MENA Jews; the Holocaust; the experience and place of MENA Jews in Israel; and "Jews of Color.".
Same as: HISTORY 288C

JEWISHST 291X. Learning Religion: How People Acquire Religious Commitments. 4 Units.
This course will examine how people learn religion outside of school, and in conversation with popular cultural texts and practices. Taking a broad social-constructivist approach to the variety of ways people learn, this course will explore how people assemble ideas about faith, identity, community, and practice, and how those ideas inform individual, communal and global notions of religion. Much of this work takes place in formal educational environments including missionary and parochial schools, Muslim madrasas or Jewish yeshivot. However, even more takes place outside of school, as people develop skills and strategies in conversation with broader social trends. This course takes an interdisciplinary approach to questions that lie at the intersection of religion, popular culture, and education. May be repeat for credit.
Same as: AMSTUD 231X, EDUC 231, RELIGST 231X

JEWISHST 297X. American Jewish History: Learning to be Jewish in America. 2-4 Units.
This course will be a seminar in American Jewish History through the lens of education. It will address both the relationship between Jews and American educational systems, as well as the history of Jewish education in America. Plotting the course along these two axes will provide a productive matrix for a focused examination of the American Jewish experience. History students must take course for at least 3 units.
Same as: AMSTUD 279X, EDUC 279, HISTORY 288D, RELIGST 279X

JEWISHST 299A. Directed Reading in Yiddish, First Quarter. 1-5 Unit.

Native American Studies Courses

NATIVEAM 5A. Muwekma House Seminar. 1 Unit.
.

NATIVEAM 5B. Muwekma House Seminar. 1 Unit.
Second Quarter of Muwekma House Seminar.

NATIVEAM 14. Indigenous Peoples in Film and Visual Media: Reframing Narratives of Race, Gender and Personhood. 2 Units.
This class explores the multiple valences of Indigenous Peoples within the genre of visual media and film with articular attention to race and gender as reflective and reflexive categories. Using the lenses of, anthropology, postcolonial, Indigenous and Gender Studies this course will examine the ways in which the imagery of indigenous peoples has been woven into Western narratives, appropriated as projections of Western masculinity and in more recent years reclaimed by indigenous filmmakers and documentarians. The format of the class will involve a "flipped classroom" pedagogy, weekly screenings and closely supervised student presentations on topics related to the course. Weekly screenings of films, lectures and discussions will require mandatory attendance at every class meeting and within working groups. Students will develop skills to identify visual media referents, related to contemporary and digital contexts while gaining appreciation for indigenous identity history and sovereignty weekly reflection papers are required. No previous film studies experience is necessary.

NATIVEAM 16. Native Americans in the 21st Century: Encounters, Identity, and Sovereignty in Contemporary America. 5 Units.
What does it mean to be a Native American in the 21st century? Beyond traditional portrayals of military conquests, cultural collapse, and assimilation, the relationships between Native Americans and American society. Focus is on three themes leading to in-class moot court trials: colonial encounters and colonizing discourses; frontiers and boundaries; and sovereignty of self and nation. Topics include gender in native communities, American Indian law, readings by native authors, and Indians in film and popular culture.
Same as: ANTHRO 16, ARCHLGY 16

NATIVEAM 39. Long Live Our 4Bil. Year Old Mother: Black Feminist Praxis, Indigenous Resistance, Queer Possibility. 1-4 Unit.
How can art facilitate a culture that values women, mothers, transfolks, caregivers, girls? How can black, indigenous, and people of color frameworks help us reckon with oppressive systems that threaten safety and survival for marginalized people and the lands that sustain us? How can these questions reveal the brilliant and inventive forms of survival that precede and transcend harmful systems toward a world of possibility? Each week, this course will call on artists, scholars, and organizers of color who clarify the urgency and interconnection of issues from patriarchal violence to environmental degradation; criminalization to legacies of settler colonialism. These same thinkers will also speak to the imaginative, everyday knowledge and creative healing practices that our forebears have used for millennia to give vision and rise to true transformation.
Same as: AFRICAAM 39, CSRE 39, FEMGEN 39

NATIVEAM 50Q. Life and Death of Words. 4 Units.
In this course, we explore the world of words: their creation, evolution, borrowing, change, and death. Words are the key to understanding the culture and ideas of a people, and by tracing the biographies of words we are able to discern how the world was, is, and might be perceived and described. We trace how words are formed, and how they change in pronunciation, spelling, meaning, and usage over time. How does a word get into the dictionary? What do words reveal about status, class, region, and race? How is the language of men and women critiqued differently within our society? How does slang evolve? How do languages become endangered or die, and what is lost when they do? We will visit the Facebook Content Strategy Team and learn more about the role words play in shaping our online experiences. Together, the class will collect Stanford language and redesign the digital dictionary of the future. Trigger Warning: Some of the subject matter of this course is sensitive and may cause offense. Please consider this prior to enrolling in the course.
Same as: CSRE 50Q, ENGLISH 50Q, FEMGEN 50Q

NATIVEAM 57A. Cherokee Language Lab. 1 Unit.
This course is intended for students who have already completed First Year Cherokee and would like to continue their exposure, learning, and understanding of the language.

NATIVEAM 100. Introduction to Native American Studies. 3 Units.
This survey course is designed to expose students to the interdisciplinary content of the major, its evolution, and importantly, the methods through which scholarship and practice are communicated. Specific attention will be given to decolonizing methodologies that historically erased or misrepresented Native people in scholarship. Course readings and discussions emphasize pedagogical models and scholarly works that embrace Indigenous ways of knowing and being, including Storytelling, Traditional Environmental Knowledge, Peacemaking, and the importance of centering a framework in tribal language and culture.

NATIVEAM 103S. Gender in Native American Societies. 5 Units.
Seminar examines the impact of colonialism on gender roles & gender relations in American Indian communities beginning with the 17th century to the present. Topics include demographic changes; social, political & economic transformations associated with biological & spiritual assaults; the dynamism & diversity of native societies. Sources include history, ethnography, biography, autobiography, the novel & film.
Same as: CSRE 103S, FEMGEN 103S

NATIVEAM 108S. American Indian Religious Freedom. 3 Units.
The persistence of tribal spiritual beliefs and practices in light of legal challenges (sacred geography and the 1st Amendment), treatment of the dead and sacred objects (repatriation), consumerism (New Age commodification), and cultural intellectual property protection (trademark, copyright, patent law). Focus is on contemporary issues and cases, analyzed through interdisciplinary scholarship and practical strategies to protect the fundamental liberty of American Indian religious freedom.
Same as: CSRE 108S

NATIVEAM 109A. Federal Indian Law. 3 Units.
Cases, legislation, comparative justice models, and historical and cultural material. The interlocking relationships of tribal, federal, and state governments. Emphasis is on economic development, religious freedom, and environmental justice issues in Indian country.
Same as: CSRE 109A

NATIVEAM 109B. Native Nation Building. 3 Units.
The history of competing tribal and Western economic models, and the legal, political, social, and cultural implications for tribal economic development. Case studies include mineral resource extraction, gaming, and cultural tourism. 21st-century strategies for sustainable economic development and protection of political and cultural sovereignty.
Same as: CSRE 109B

NATIVEAM 111B. Muwekma: Landscape Archaeology and the Narratives of California Natives. 3-5 Units.
This course explores the unique history of San Francisco Bay Area tribes with particular attention to Muwekma Ohlone- the descendent community associated with the landscape surrounding and including Stanford University. The story of Muwekma provides a window into the history of California Indians from prehistory to Spanish exploration and colonization, the role of Missionaries and the controversial legacy of Junipero Serra, Indigenous rebellions throughout California, citizenship and land title during the 19th century, the historical role of anthropology and archaeology in shaping policy and recognition of Muwekma, and the fight for acknowledgement of Muwekma as a federally recognized tribe. We will visit local sites associated with this history and participate in field surveys of the landscape of Muwekma.
Same as: ANTHRO 111C, ARCHLGY 111B

NATIVEAM 115. Introduction to Native American History. 5 Units.
This course incorporates a Native American perspective in the assigned readings and is an introduction to Native American History from contact with Europeans to the present. History, from a Western perspective, is secular and objectively evaluative whereas for most Indigenous peoples, history is a moral endeavor (Walker, Lakota Society 113). A focus in the course is the civil rights era in American history when Native American protest movements were active. Colonization and decolonization, as they historically occurred are an emphasis throughout the course using texts written from the perspective of the colonized at the end of the 20th century in addition to the main text. Students will be encouraged to critically explore issues of interest through two short papers and one longer paper that is summarized in a 15-20 minute presentation on a topic of interest relating to the course.

NATIVEAM 116. Decolonizing the Indigenous Classroom. 3-5 Units.
Using Indigenous and decolonizing perspectives on education, this interdisciplinary course will examine interaction and language in cross-cultural educational situations, including language, literacy and interethnic communication as they relate to Indigenous American classrooms. Special attention will be paid to implications of social, cultural and linguistic diversity for educational practice, along with various strategies for bridging intercultural differences between schools and Native communities.
Same as: CSRE 116, CSRE 302, EDUC 186, EDUC 286

NATIVEAM 117S. History of Native Americans in California. 3-5 Units.
This course examines the political histories and cultural themes of Native Americans in California, 1700s1950s. Throughout the semester we will focus on: demographics, diversity of tribal cultures; regional environmental backgrounds; the Spanish Era and missionization; the Mexican Era and secularization; relations with the United States Government and the State of California, including the gold rush period, statehood, unratified treaties, origin of reservations/rancherias, and other federal policies, e.g., Allotment Act, Indian Reorganization Act and termination.
Same as: CSRE 117S, HISTORY 250A

NATIVEAM 118. Heritage, Environment, and Sovereignty in Hawaii. 4 Units.
This course explores the cultural, political economic, and environmental status of contemporary Hawaiians. What sorts of sustainable economic and environmental systems did Hawaiians use in prehistory? How was colonization of the Hawaiian Islands informed and shaped by American economic interests and the nascent imperialsm of the early 20th centrury? How was sovereignty and Native Hawaiian identity been shaped by these forces? How has tourism and the leisure industry affected the natural environment? This course uses archaeological methods, ethnohistorical sources, and historical analysis in an exploration of contemporary Hawaiian social economic and political life.
Same as: CSRE 118E, EARTHSYS 118

NATIVEAM 119S. The History of Native Americans of California. 5 Units.
How the federal government placed education at the center of its Indian policy in second half of 19th century, subjecting Native Americans to programs designed to erase native cultures and American Indian responses to those programs. Topics include traditional Indian education, role of religious groups, Meriam Report, Navajo-Hopi Rehabilitation Act, Johnson-O'Malley Act, and public schools.
Same as: EDUC 119S, EDUC 429S

NATIVEAM 120. Is Pocahontas a Myth? Native American Women in History. 3-5 Units.
This course will look at notable Native American Women in Native American history starting with Native American oral tradition narratives about important women in specific tribal narratives including origin narratives used in Native American tribal history. Native American history is not required in any national curriculum and as a result, Native American people(s) encounter many stereotypes and false beliefs about indigenous peoples of the United States. This course will focus on the role of women in Native American history including historic narratives in oral tradition as maintained in specific Native American histories (as told from a Native American perspective).

NATIVEAM 121. Discourse of the Colonized: Native American and Indigenous Voices. 5 Units.
Using the assigned texts covering the protest movements in the 20th century to the texts written from the perspective of the colonized at the end of the 20th century, students will engage in discussions on decolonization. Students will be encouraged to critically explore issues of interest through two short papers and a 15-20 minute presentation on the topic of interest relating to decolonization for Native Americans in one longer paper. Approaching research from an Indigenous perspective will be encouraged throughout.
Same as: CSRE 121

NATIVEAM 122. Historiography & Native American Oral Traditions and Narratives. 4 Units.
This course is an introduction to Native American Literature in the United States in a (post) colonial, or decolonized context (in the last seventy years). The readings focus on the complex social and political influences that have shaped Native American literature in the last half of the twentieth century to the present. It is an introduction to nNative American fiction, poetry, drama, nonfiction and autobiography. It draws on the historical (literary sovereignty) and theoretical frameworks (American Indian Literary Nationalism) used by Native American writers in the United States; how trends in Native American writing build on and integrate traditional modes of Native American nstorytelling (oral tradition & the verbal arts). It takes a specific in - depth look at Native American oral tradition. Where the overarching aim of the course is to address the nquestion: How do you define Native American literature? Students will be required to provide their own definition from what they learn about Native American oral tradition and the challenges (historic and otherwise) inherent in a (post) colonial or decolonized world for Native Americans.

NATIVEAM 123A. American Indians and the Cinema. 5 Units.
Hollywood and the film industry have had a major influence on American society for nearly a century. Initially designed to provide entertainment, the cinema broadened its impact by creating images perceived as real and essentialist. Hollywood's Indians have been the main source of information about who American Indians are and Hollywood has helped shape inaccurate and stereotypical perceptions that continue to exist today. This course looks chronologically at cinematic interpretations and critically examines accurate portrayals of American Indians and of American history.
Same as: CSRE 123A

NATIVEAM 126. Mo'olelo Aloha Aina: Hawaiian Perspectives on Storytelling, Land, and Sovereignty. 2 Units.
This course will introduce a wide variety of topics pertaining to the culture and history of the Hawaiian Islands and the aboriginal people of Hawai¿i (k¿naka maoli). Topics will range from Hawaiian perspectives on genealogies, Hawaiian conceptions of land governance, brief overview of Hawaiian Kingdom history, case studies of modern Hawaiian activism, and more. Students will be introduced to surface-level coverage of included topics through a variety of readings and interactive assignments.

NATIVEAM 132. Decolonizing the American Indigenous Classroom. 3-5 Units.
Using Indigenous and decolonizing perspectives on education, this interdisciplinary course will examine interaction and language in cross-cultural educational situations, including language, literacy and interethnic communication as they relate to Indigenous American classrooms. Special attention will be paid to implications of social, cultural and linguistic diversity for educational practice, along with various strategies for bridging intercultural differences between schools and Native communities.

NATIVEAM 139. American Indians in Contemporary Society. 4 Units.
(Graduate students register for 239.) The social position of American Indians in contemporary American society, 1890 to the present. The demographic resurgence of American Indians, changes in social and economic status, ethnic identification and political mobilization, and institutions such as tribal governments and the Bureau of Indian Affairs. Recommended: 138 or a course in American history.
Same as: SOC 139, SOC 239

NATIVEAM 161. Entrepreneurship for Social and Racial Equity. 3 Units.
This course is designed to provide students with an introduction to business ownership with a focus on owning and operating businesses within diverse communities with an aim to create social impact for future generations as well as profitability and sustainability models. The course will introduce the beginning elements of creating a business (formation, product, business plan) as well as the additional overlay of social impact and cultural considerations. Types of financing as well as effective pitching will also be covered. Course materials will include instructor presentations, case studies, homework assignments, outside hours at campus ¿labs¿, creation of students¿ own business concept plan and guest lectures from successful entrepreneurs working within Silicon Valley and diverse communities. Resources (financing sources, accelerators and incubators), case studies, role models and guest lecturers will be an integral part of this course which can lead to internship opportunities (the latter via application).
Same as: CSRE 161P

NATIVEAM 162. Tribal Economic Development and Sustainability. 3-5 Units.
Native Americans, Alaska Natives and Inuit are disproportionately on the forefront of climate change and are being forced to adapt to climate change now. One of the biggest challenges Indigenous Nations face is building sustainable businesses that respect the environment while providing for current and future generations. This course will survey environmental, regulatory, political and financing issues associated with economic development on tribal, Alaska Native and Inuit lands. We will examine Indigenous business success stories as well as an overview of major challenges to building sustainable businesses. We will engage with Indigenous leaders and industry experts to discuss the challenges of building businesses that provide jobs and economic opportunities for Indigenous communities now while also taking into account the responsibilities Indigenous leadership has to future generations.
Same as: EARTHSYS 163

NATIVEAM 170. Introduction to American Indian Literature. 5 Units.
This course provides a general introduction to American Indian literatures, beginning with early translations, including oral literatures and autobiographies, and continuing with contemporary poetry and fiction written by American Indian writers. We will want to pay particular attention to the American Indian writers¿ connections to a specific locale or place. In what ways are the stories and poems evocative of a long-standing relationship to a "home landscape"? What is the nature of the relationship? How is that relationship to place similar to or different from our own? At the same time, we will want to pay attention to the nature and scope of the various representations of American Indians in the texts we examine, and ask how the representations reinforce and/or dispel popular and often stereotypical images of American Indian people. Finally, we will want to be aware of and understand our position as readers, particularly as readers who come from and are constituted by historical, social, political, cultural, and ethnic worlds different from or similar to the worlds we find in the books that we are reading.
Same as: CSRE 170

NATIVEAM 200R. Directed Research. 1-5 Unit.
.

NATIVEAM 200W. Directed Reading. 1-5 Unit.
.

NATIVEAM 221. Crafting Challenging Conversations in a Conflicted World. 3 Units.
In moments of divisive, time-sensitive conflict and disagreement, interdependent community groups that are we-us oriented often struggle to maintain cohesive relationships. In this interactive, project-based course, participants will dive into the art of designing new products, services, or experiences for conflict. Throughout the course, participants can expect to unpack the fundamentals of design thinking and components of strong listening, leadership, and effective cultural competency. Individual one-on-one conversations as well as indigenous forms of group-interviewing, known as Peacemaking and Ho'oponopono, will be also explored. At the end of the course, students can expect to have created a low-resolution prototype based on qualitative research that answers the question: How might we lead with community-centered approaches, rather than with independent, divisive reactions in moments of conflict?.
Same as: CSRE 221D

NATIVEAM 240. Psychology and American Indian/Alaska Native Mental Health. 3-5 Units.
Western medicine's definition of health as the absence of sickness, disease, or pathology; Native American cultures' definition of health as the beauty of physical, spiritual, emotional, and social things, and sickness as something out of balance. Topics include: historical trauma; spirituality and healing; cultural identity; values and acculturation; and individual, school, and community-based interventions. Prerequisite: experience working with American Indian communities.
Same as: EDUC 340, PSYCH 272

NATIVEAM 255. Native American Identity in the American Imagination: 19th Century to Present. 5 Units.
Because cultural identity is similar to and overlaps with identity politics, this course will examine Native American identity in current culture through American imagination and perspective as to what it is to be Native American today. Historic perspectives from the 19th century to the present will be covered as well.

DIVISION OF LITERATURES, CULTURES, AND LANGUAGES

Courses offered by the Division of Literatures, Cultures, and Languages are listed under the subject code DLCL on the Stanford Bulletin's ExploreCourses web site (https://explorecourses.stanford.edu/search/?view=catalog&catalog=&page=0&q=DLCL&filter-catalognumber-DLCL=on).

The Division of Literatures, Cultures, and Languages consists of:

Five academic departments

- Comparative Literature (p. 1203)
- French and Italian (p. 1463)
- German Studies (p. 1497)
- Iberian and Latin American Cultures (p. 1650)
- Slavic Languages and Literatures (p. 2083)

(p. 2083)Eight focal groups:

- Collaborative Teaching Project
- Humanities Education
- Materia
- PATH+ (Persian, Arabic, Turkish, Hebrew)
- Philosophy and Literature
- Renaissances
- The Contemporary and Workshop in Poetics

And the Language Center (p. 1722), which oversees language instruction at Stanford.

The division brings together scholars and teachers dedicated to the study of literatures, cultures, and languages from humanistic and interdisciplinary perspectives. The departments in the division are distinguished by the quality and versatility of their faculty, a wide variety of approaches to cultural traditions and expressions, and the intense focus on the mastery of languages. This wealth of academic resources, together with small classes and the emphasis on individual advising, creates a superior opportunity for students who wish to be introduced to or develop a deeper understanding of non-English speaking cultures.

The division's departments and the Language Center offer instruction at all levels, including introductory and general courses that do not require knowledge of a language other than English. These courses satisfy a variety of undergraduate requirements and can serve as a basis for developing a minor or a major program in the member departments. The more advanced and specialized courses requiring skills in a particular language are listed under the relevant departments, as are descriptions of the minor and major programs.

Focal Groups

While the five departments in the Division of Literatures, Cultures, and Languages serve common interests in literary and cultural traditions and their languages, the DLCL's Focal Groups bring together faculty members and graduate students who share topics and approaches that range across languages and national literatures. These groups are designed to respond directly to the research interests of the faculty as a community, and reflect long-term commitments by the participants. They are conceived as portals that open from the Division outward to the wider community of literary and humanities scholars at Stanford. The membership may include any member of the Stanford faculty or any Ph.D. student with an interest in the topic. Most Focal Groups include participants from several humanities departments outside the DLCL.

Thus the DLCL is characterized by two axes of intellectual inquiry:

- the departmental axis, which is organized by language, nation, and culture
- the focal axis, which may be organized by genre, period, methodology, or other criteria.

The convergence of the two axes, departments and Focal Groups, locates faculty members and graduate students in at least two intersecting communities. The DLCL believes that this convergence gives institutional form to the intellectual conditions under which many scholars of literature and culture presently work.

Each Focal Group maintains a standing research workshop at which both faculty and graduate student members discuss their work. Several Focal Groups offer formal courses; and all groups are responsible for overseeing research-oriented activities and extracurricular events in the relevant area, including sponsoring conferences, publications, podcasts, and other activities that disseminate the outcomes of their research.

Collaborative Teaching Project

Chair: Laura Wittman (French and Italian)

The Collaborative Teaching Project (CTP) has supported Stanford faculty and graduate students by offering a series of team-taught courses in the humanities, with the goal of preparing graduate students for careers as liberal arts educators. CTP thus facilitates and funds collaborations between one faculty member and 1-2 graduate students in order to co-teach a course. The graduate students and their faculty mentor work together on as many aspects of the course as possible, including syllabus, gathering and choosing materials, preparing assignments, lectures, presentations, class activities, and other in-class events, grading and feedback, evaluation of the course itself, and so on.

Humanities Education

Chair: Russell Berman (Comparative Literature, German Studies)

Faculty Members: Cécile Alduy (French and Italian), Elizabeth Bernhardt (German Studies, Language Center), Eamonn Callan (School of Education), Adrian Daub (German Studies), Thomas Ehrlich (School of Education), Marisa Galvez (French and Italian), Pam Grossman (School of Education), Orrin Robinson (German Studies), Gabriella Safran (Slavic Languages and Literatures), Kathryn Starkey (German Studies), Mitchell Stevens (School of Education), Guadalupe Valdés (School of Education)

Web Site: https://dlcl.stanford.edu/groups/humanities-education-0 (https://dlcl.stanford.edu/groups/humanities-education-0/)

The Focal Group on Humanities Education explores issues concerning teaching and learning in the humanities, including research on student learning, innovation in pedagogy, the role of new technologies in humanities instruction, and professional issues for humanities teachers at all educational levels.

Materia

Chair: Héctor Hoyos (Iberian and Latin American Cultures)

Web Site: https://dlcl.stanford.edu/content/materia-0 (https://dlcl.stanford.edu/content/materia-0/)

MATERIA is a new discursive space on campus for sustained intellectual exchange on a central tendency in contemporary criticism: the decentering of humans as “our object of study.” We are an inclusive, interdisciplinary group that finds in the notion of post-anthropocentrism an umbrella for some of the most interesting debates of recent years. These span not only post-humanism and new materialism, but also animal and object studies.

Persian, Arabic, Turkish, and Hebrew Languages, Literatures, and Cultures (PATH+)

Chair: Alexander Key (Comparative Literature)

PATH+ is a DLCL focal group that is considering the future of Persian, Arabic, Turkish, and Hebrew languages, literatures, and cultures in the DLCL. The PATH+ conversation includes scholars, artists, and intellectuals working in and around these languages, literatures, and cultures from across Stanford and from peer institutions internationally.

Philosophy and Literature

Chairs: R. Lanier Anderson (Philosophy), Joshua Landy (French and Italian)

Faculty Members: Keith Baker (History), John Bender (Comparative Literature, English), Russell Berman (Comparative Literature, German Studies), Alexis Burgess (Philosophy), Martón Dornbach (German Studies), Jean-Pierre Dupuy (French and Italian), Amir Eshel (Comparative Literature, German Studies), Gregory Freidin (Slavic Languages and Literatures), Robert Harrison (French and Italian), David Hills (Philosophy), Héctor Hoyos (Iberian and Latin American Cultures), Michelle Karnes (English), Alexander Key (Comparative Literature), Sianne Ngai (English), Marília Librandi Rocha (Iberian and Latin American Cultures), Joan Ramon Resina (Iberian and Latin American Cultures, Comparative Literature), Nariman Skakov (Slavic Languages and Literatures), Blakey Vermeule (English), Laura Wittman (French and Italian), Lee Yearley (Religious Studies)

Web Site: https://dlcl.stanford.edu/groups/philosophy-and-literature (https://dlcl.stanford.edu/groups/philosophy-and-literature/)

The Focal Group on Philosophy and Literature brings together faculty and students from nine departments to investigate questions in aesthetics and literary theory, philosophically-inflected literary texts, and the form of philosophical writings. Fields of interest include both continental and analytic philosophy, as well as cognitive science, political philosophy, rational choice theory, and related fields. The group offers undergraduate tracks within eight majors, a graduate workshop, and a lecture series.

Renaissances

Chair: Roland Greene (Comparative Literature, English)

Faculty Members: Cécile Alduy (French and Italian), Shahzad Bashir (Religious Studies), Paula Findlen (History), Tamar Herzog (History), Nicholas Jenkins (English), Alexander Key (Comparative Literature), David Lummus (French and Italian), Bissera Pentcheva (Art and Art History), Morten Steen Hansen (Art and Art History).

Web Site: http://dlcl.stanford.edu/groups/renaissances (http://dlcl.stanford.edu/groups/renaissances/)

The Renaissances Group brings together faculty members and students from over a dozen departments at Stanford to consider the present and future of early modern literary studies (a period spanning the fourteenth through the seventeenth centuries). Taking seriously the plural form of the group's name, we seek to explore the early modern period from a wide range of disciplinary, cultural, linguistic, and geographical perspectives.

The Contemporary

Chair: Amir Eshel (Comparative Literature, German Studies)

Web Site: https://dlcl.stanford.edu/content/contemporary (https://dlcl.stanford.edu/content/contemporary/)

The Contemporary focal group examines "the contemporary" with a focus on defining moments such as 1945, 1973, 1989, and 2001. Building upon a 3 year body of work as a DLCL research group, The Contemporary focal group has particularly focused on U.S., European, and Middle Eastern cultural and political forces that characterize our "contemporary." The group employs a comparative and interdisciplinary approach to the hybrid term "contemporary" as it intersects various fields and serves as a heuristic device to understand phenomena in politics, culture, and the arts.

Workshop in Poetics

Chairs: Roland Greene (Comparative Literature, English), Nicholas Jenkins (English)

Faculty Members: Marisa Galvez (French and Italian), Alexander Key (Comparative Literature)

Web Site: http://dlcl.stanford.edu/workshop-poetics-0+ (http://dlcl.stanford.edu/workshop-poetics-0+/)

The Workshop in Poetics Focal Group is concerned with the theoretical and practical dimensions of the reading and criticism of poetry. During the five years of its existence, the Workshop has become a central venue at Stanford enabling participants to share their individual projects in a general conversation outside of disciplinary and national confinements. The two dimensions that the workshop sees as urgent are:

- poetics in its specificity as an arena for theory and interpretive practice.
- historical poetics as a particular set of challenges for the reader and scholar.

The core mission is to offer Stanford graduate students a space to develop and critique their current projects.

Minor in Modern Languages

Academic Advisor: Elizabeth Bernhardt-Kamil

The Division of Literatures, Cultures, and Languages offers an undergraduate minor in Modern Languages that permits students to demonstrate strength in two distinct modern languages and their literatures. The minor draws upon courses housed within the DLCL, East Asian Languages and Cultures, the Stanford Language Center, and the Special Language Program.

Declaring the Minor

Students declare the minor in Modern Languages through Axess. The minor program is administered by the DLCL undergraduate student support office located in Pigott Hall, room 128 and may be contacted at odunlop@stanford.edu. Plans for completing the minor must be approved by through the student support office.

Minor Program

- Students enrolled in the Modern Languages minor must take 6 courses of 3 units or more, for a total of 22 units minimum.
- Students will study two modern languages, Language A and Language B.
  - Language A: two intermediate-level or higher courses, for 8 units minimum, and one literature course of 3-5 units.
  - Language B: two intermediate-level or higher courses, for 8 units minimum, and one literature course of 3-5 units.

Requirements

- Stanford Language Center courses and BOSP language courses must be second-year level or beyond.
- Literature courses from BOSP programs are pre-approved for the minor.
- Literature courses taught by Stanford faculty (Academic Council members) will be approved with permission of the Program Administrator.

- Language courses may not include conversational, oral communication, business, or medical language courses.
- Advanced Placement and transfer credits may not be applied to the minor.
- All courses must be taken for a letter grade.
- Coursework may not duplicate work counted toward other majors or minors. By University policy, no more than 36 units may be required in this minor.

Minor in Middle Eastern Languages, Literatures, and Cultures

Faculty Director: Alexander Key

The undergraduate minor in Middle Eastern Languages, Literatures, and Cultures (MELLAC) has been designed to give students majoring in a variety of departments an opportunity to gain a substantial introduction to Arabic, Hebrew, Persian, Turkish, Middle Eastern, and African languages, and to the cultures and civilizations of the Middle East and Africa.

Declaring the Minor

Contact the faculty director, Alexander Key (akey@stanford.edu), before declaring the minor in Axess. The minor is administered through the DLCL undergraduate student support office in Pigott Hall, room 128.

Minor Program Overview

The minor in Middle Eastern Languages, Literatures, and Cultures (MELLAC) has five tracks. Coursework in each track may not duplicate work counted toward other majors or minors.

Minor in Middle Eastern Languages, Literatures, and Cultures: Arabic Track

The minor track requirements are:

- Minimum of 24 units total for this minor track.
- Completion of six ARABLANG courses at the third and fourth year levels, excluding conversation and colloquial courses. All courses must be taken for a letter grade.
- Up to 5 units of transfer credit may count towards this minor, subject to approval of the faculty director.
- Students must test for proficiency in Arabic through the Language Center by Winter Quarter of their senior year. Students should minimally receive a notation of intermediate-high. Those requiring outside tutoring are advised to seek resources available through the DLCL student services office in Pigott Hall 128, odunlop@gmail.com.
- All courses must be approved by the faculty director.

Minor in Middle Eastern Languages, Literatures, and Cultures: Hebrew Track

The minor track requirements are:

- Minimum of 32 units total for this minor track.
- Minimum of 3 HEBREW language classes. Students may test out of this requirement with the approval of the faculty director.
- Minimum of 20 units of Hebrew literature and culture courses, one of which must be listed in COMPLIT. The Hebrew Forum may count towards this requirement with the approval of the faculty director.
- All courses must be approved by the faculty director.

Minor in Middle Eastern Languages, Literatures, and Cultures: African Languages, Literatures and Cultures Track

Requirements for the minor are:

- Minimum 32 units for this minor track.
- Three AMELANG language classes in an African language.
- All three courses must be in the same language.
- 20 additional units from relevant literature and culture courses, one of these courses must be a COMPLIT course.
- Other relevant courses are listed under AFRICAST.
- The faculty director may approve some upper-level language classes to count towards the 20 additional units.
- All courses must be approved by the faculty director.

Minor in Middle Eastern Languages, Literatures, and Cultures: Persian Track

The minor track requirements are:

- Minimum of 30 units total for this minor track.
- Completion of 20 units of Persian courses listed in AMELANG.
- Completion of 10 units of Persian courses listed in COMPLIT.
- All courses must be approved by the faculty director.

Minor in Middle Eastern Languages, Literatures, and Cultures: Turkish Track

The minor track requirements are:

- Minimum 30 units total for this minor track.
- 15 units of Turkish courses listed in AMELANG.
- 15 units of Turkish courses listed in COMPLIT.
- All courses must be approved by the faculty director.

COVID-19-Related Degree Requirement Changes

For information on how the Minor in Medieval Studies requirements have been affected by the pandemic, see the "COVID-19 Policies tab (p. 1305)" in the "Division of Literatures, Cultures, and Languages" of this bulletin. For University-wide policy changes related to the pandemic, see the "COVID-19 and Academic Continuity (p. 5)" section of this bulletin.

Minor in Medieval Studies

Faculty Director: Marisa Galvez

The Division of Literatures, Cultures, and Languages offers an undergraduate minor in Medieval Studies. The minor in Medieval Studies:

- provides Stanford students with the historical knowledge and framework through which to view globalism;
- embeds the study of medieval culture in a coherent framework that resonates with contemporary issues of community building, the virtual world and mobility;
- and promotes an innovative cross-disciplinary and skill-based approach to Medieval Studies.

Declaring the Minor

Students should declare the minor in Medieval Studies in Axess. The undergraduate program is administered by the DLCL student services office located in Pigott Hall, room 128.

Requirements

Students in any major field qualify for the minor by meeting the following requirements:

- Students complete 6 courses courses of 3 units or more for a total of 25 units.
- The 6 courses must include an introductory core course taken for 5 units.

		Units
ARTHIST 106	Byzantine Art and Architecture, 300-1453 C.E.	5
DLCL 204	Digital Humanities Across Borders	3-5
HISTORY 115D	Europe in the Middle Ages, 300-1500	3-5

- Electives may be selected from a large number of offerings in a variety of disciplines according to student interests, but they must follow a coherent course of study. This course of study must be approved by the Undergraduate Faculty Director. Courses are relevant to the major in departments across the University including English, East Asian Studies, History, Religious Studies, Music, Comparative Literature, German, French, Italian, Iberian and Latin American Cultures, and Slavic Languages and Literatures, and Classics.
- Up to 5 units may be taken in a medieval language, such as (but not limited to) Old English, Old Norse, Medieval Latin, Old French, Middle High German, Classical Arabic.
- Appropriate courses offered through BOSP may count toward this minor.
- No transfer credit may be used toward the Medieval Studies minor, and course work in this minor may not duplicate work counted toward other majors or minors.
- Advanced placement credit and transfer credit do not apply to this minor.
- All courses must be taken for a letter grade.

Minor in Translation Studies

Faculty Director: Alexander Key

Minor Adviser: Cintia Santana

The Division of Literatures, Cultures, and Languages, in cooperation with East Asian Languages and Cultures and the English Department, teaches undergraduates to develop and apply their foreign language knowledge to the production and analysis of translations. The minor is designed to give students majoring in a variety of fields the tools to consider the practical and theoretical issues brought up by translation as an aesthetic, cultural, and ethical practice.

Declaring the Minor

Students will declare the minor in Axess, and then contact the minor adviser, Cintia Santana (csantana@stanford.edu). The program is administered by the DLCL student services office located in Pigott Hall, room 128.

Requirements

Students must take a minimum of 6 courses for 3 units or more and a minimum of 23 units for a letter grade, in fulfillment of the following requirements:

	Units
1. Prerequisite: Complete or test out of a first-year course in the language of interest.	
2. Core course: At least 4 units in a Translation Studies core course: ENGLISH/DLCL 293 or FRENCH 185 or Comparative Literature 228/ JAPAN 123/223.	4
3. Language study: At least 8 units, second year or beyond (not including conversation/oral communication) and/or relevant literature courses taught in the target language. OSP and transfer units may be considered in consultation with the minor adviser.	8
4. Literature study: At least 7 units in relevant literature courses at the 100-level or above, taught in a DLCL department, East Asian Languages and Cultures, or Classics, and determined in consultation with the minor adviser. For students interested in translation from English into another language, appropriate literature courses in the English department may be substituted.	7
5. Electives: At least 4 units in a creative writing course, or a course that foregrounds translation in departments such as Anthropology, any DLCL department, English, East Asian Languages and Cultures, Classics, Linguistics (e.g., LINGUIST 130A), or Computer Science (e.g., CS 124), determined in consultation with the minor adviser.	4
6. Final Project: Students must also complete a capstone project: a significant translation and/or translation studies project (e.g. 20 pages of prose, 10 poems, or similar appropriate amount to be determined in consultation with the minor adviser). This work may be carried out under the supervision of an instructor in a required course or as an independent study.	
Total Units	23

Minor in Modern Languages

Academic Advisor: Elizabeth Bernhardt-Kamil

The Division of Literatures, Cultures, and Languages offers an undergraduate minor in Modern Languages that permits students to demonstrate strength in two distinct modern languages and their literatures. The minor draws upon courses housed within the DLCL, East Asian Languages and Cultures, the Stanford Language Center, and the Special Language Program.

Declaring the Minor

Students declare the minor in Modern Languages through Axess. The minor program is administered by the DLCL undergraduate student support office located in Pigott Hall, room 128 and may be contacted at odunlop@stanford.edu. Plans for completing the minor must be approved by through the student support office.

Minor Program

- Students enrolled in the Modern Languages minor must take 6 courses of 3 units or more, for a total of 22 units minimum.
- Students will study two modern languages, Language A and Language B.
  - Language A: two intermediate-level or higher courses, for 8 units minimum, and one literature course of 3-5 units.
  - Language B: two intermediate-level or higher courses, for 8 units minimum, and one literature course of 3-5 units.

Requirements

- Stanford Language Center courses and BOSP language courses must be second-year level or beyond.
- Literature courses from BOSP programs are pre-approved for the minor.
- Literature courses taught by Stanford faculty (Academic Council members) will be approved with permission of the Program Administrator.
- Language courses may not include conversational, oral communication, business, or medical language courses.
- Advanced Placement and transfer credits may not be applied to the minor.
- All courses must be taken for a letter grade.
- Coursework may not duplicate work counted toward other majors or minors. By University policy, no more than 36 units may be required in this minor.

Minor in Middle Eastern Languages, Literatures, and Cultures

Faculty Director: Alexander Key

The undergraduate minor in Middle Eastern Languages, Literatures, and Cultures (MELLAC) has been designed to give students majoring in a variety of departments an opportunity to gain a substantial introduction to Arabic, Hebrew, Persian, Turkish, Middle Eastern, and African languages, and to the cultures and civilizations of the Middle East and Africa.

Declaring the Minor

Contact the faculty director, Alexander Key (akey@stanford.edu), before declaring the minor in Axess. The minor is administered through the DLCL undergraduate student support office in Pigott Hall, room 128.

Minor Program Overview

The minor in Middle Eastern Languages, Literatures, and Cultures (MELLAC) has five tracks. Coursework in each track may not duplicate work counted toward other majors or minors.

Minor in Middle Eastern Languages, Literatures, and Cultures: Arabic Track

The minor track requirements are:

- Minimum of 24 units total for this minor track.
- Completion of six ARABLANG courses at the third and fourth year levels, excluding conversation and colloquial courses. All courses must be taken for a letter grade.
- Up to 5 units of transfer credit may count towards this minor, subject to approval of the faculty director.
- Students must test for proficiency in Arabic through the Language Center by Winter Quarter of their senior year. Students should minimally receive a notation of intermediate-high. Those requiring outside tutoring are advised to seek resources available through the DLCL student services office in Pigott Hall 128, odunlop@gmail.com.
- All courses must be approved by the faculty director.

Minor in Middle Eastern Languages, Literatures, and Cultures: Hebrew Track

The minor track requirements are:

- Minimum of 32 units total for this minor track.
- Minimum of 3 HEBREW language classes. Students may test out of this requirement with the approval of the faculty director.
- Minimum of 20 units of Hebrew literature and culture courses, one of which must be listed in COMPLIT. The Hebrew Forum may count towards this requirement with the approval of the faculty director.
- All courses must be approved by the faculty director.

Minor in Middle Eastern Languages, Literatures, and Cultures: African Languages, Literatures and Cultures Track

Requirements for the minor are:

- Minimum 32 units for this minor track.
- Three AMELANG language classes in an African language.
- All three courses must be in the same language.
- 20 additional units from relevant literature and culture courses, one of these courses must be a COMPLIT course.
- Other relevant courses are listed under AFRICAST.
- The faculty director may approve some upper-level language classes to count towards the 20 additional units.
- All courses must be approved by the faculty director.

Minor in Middle Eastern Languages, Literatures, and Cultures: Persian Track

The minor track requirements are:

- Minimum of 30 units total for this minor track.
- Completion of 20 units of Persian courses listed in AMELANG.
- Completion of 10 units of Persian courses listed in COMPLIT.
- All courses must be approved by the faculty director.

Minor in Middle Eastern Languages, Literatures, and Cultures: Turkish Track

The minor track requirements are:

- Minimum 30 units total for this minor track.
- 15 units of Turkish courses listed in AMELANG.
- 15 units of Turkish courses listed in COMPLIT.
- All courses must be approved by the faculty director.

COVID-19-Related Degree Requirement Changes

For information on how the Minor in Medieval Studies requirements have been affected by the pandemic, see the "COVID-19 Policies tab (p. 1305)" in the "Division of Literatures, Cultures, and Languages" of this bulletin. For University-wide policy changes related to the pandemic, see the "COVID-19 and Academic Continuity (p. 5)" section of this bulletin.

Minor in Medieval Studies

Faculty Director: Marisa Galvez

The Division of Literatures, Cultures, and Languages offers an undergraduate minor in Medieval Studies. The minor in Medieval Studies:

- provides Stanford students with the historical knowledge and framework through which to view globalism;
- embeds the study of medieval culture in a coherent framework that resonates with contemporary issues of community building, the virtual world and mobility;
- and promotes an innovative cross-disciplinary and skill-based approach to Medieval Studies.

Declaring the Minor

Students should declare the minor in Medieval Studies in Axess. The undergraduate program is administered by the DLCL student services office located in Pigott Hall, room 128.

Requirements

Students in any major field qualify for the minor by meeting the following requirements:

- Students complete 6 courses courses of 3 units or more for a total of 25 units.
- The 6 courses must include an introductory core course taken for 5 units.

		Units
ARTHIST 106	Byzantine Art and Architecture, 300-1453 C.E.	5
DLCL 204	Digital Humanities Across Borders	3-5
HISTORY 115D	Europe in the Middle Ages, 300-1500	3-5

- Electives may be selected from a large number of offerings in a variety of disciplines according to student interests, but they must follow a coherent course of study. This course of study must be approved by the Undergraduate Faculty Director. Courses are relevant to the major in departments across the University including English, East Asian Studies, History, Religious Studies, Music, Comparative Literature, German, French, Italian, Iberian and Latin American Cultures, and Slavic Languages and Literatures, and Classics.
- Up to 5 units may be taken in a medieval language, such as (but not limited to) Old English, Old Norse, Medieval Latin, Old French, Middle High German, Classical Arabic.
- Appropriate courses offered through BOSP may count toward this minor.
- No transfer credit may be used toward the Medieval Studies minor, and course work in this minor may not duplicate work counted toward other majors or minors.
- Advanced placement credit and transfer credit do not apply to this minor.
- All courses must be taken for a letter grade.

Minor in Translation Studies

Faculty Director: Alexander Key

Minor Adviser: Cintia Santana

The Division of Literatures, Cultures, and Languages, in cooperation with East Asian Languages and Cultures and the English Department, teaches undergraduates to develop and apply their foreign language knowledge to the production and analysis of translations. The minor is designed to give students majoring in a variety of fields the tools to consider the practical and theoretical issues brought up by translation as an aesthetic, cultural, and ethical practice.

Declaring the Minor

Students will declare the minor in Axess, and then contact the minor adviser, Cintia Santana (csantana@stanford.edu). The program is administered by the DLCL student services office located in Pigott Hall, room 128.

Requirements

Students must take a minimum of 6 courses for 3 units or more and a minimum of 23 units for a letter grade, in fulfillment of the following requirements:

	Units
1. Prerequisite: Complete or test out of a first-year course in the language of interest.	
2. Core course: At least 4 units in a Translation Studies core course: ENGLISH/DLCL 293 or FRENCH 185 or Comparative Literature 228/ JAPAN 123/223.	4
3. Language study: At least 8 units, second year or beyond (not including conversation/oral communication) and/or relevant literature courses taught in the target language. OSP and transfer units may be considered in consultation with the minor adviser.	8
4. Literature study: At least 7 units in relevant literature courses at the 100-level or above, taught in a DLCL department, East Asian Languages and Cultures, or Classics, and determined in consultation with the minor adviser. For students interested in translation from English into another language, appropriate literature courses in the English department may be substituted.	7
5. Electives: At least 4 units in a creative writing course, or a course that foregrounds translation in departments such as Anthropology, any DLCL department, English, East Asian Languages and Cultures, Classics, Linguistics (e.g., LINGUIST 130A), or Computer Science (e.g., CS 124), determined in consultation with the minor adviser.	4
6. Final Project: Students must also complete a capstone project: a significant translation and/or translation studies project (e.g. 20 pages of prose, 10 poems, or similar appropriate amount to be determined in consultation with the minor adviser). This work may be carried out under the supervision of an instructor in a required course or as an independent study.	
Total Units	23

Ph.D. Minor in Philosophy, Literature, and the Arts

Faculty Director: Joshua Landy, French and Italian, and Comparative Literature

Director of Graduate Studies: Adrian Daub, German Studies, and Comparative Literature

Overview

The Ph.D. minor in Philosophy, Literature, and the Arts offers rigorous, structured training for students interested in the interdisciplinary intersection of philosophy with criticism in literature and the arts.

Application and Admission

Students declare the minor after admission to candidacy and before attaining TGR status by submitting an Application for Ph.D. Minor (http://studentaffairs.stanford.edu/sites/default/files/registrar/files/app_phd_minor.pdf) form.

Requirements for the Ph.D. Minor in Philosophy, Literature, and the Arts

All students in the Ph.D. Minor in Philosophy, Literature, and the Arts take:

1. PHIL 333 (https://exploredegrees.stanford.edu/search/?P=PHIL%20333)/DLCL 333 (https://exploredegrees.stanford.edu/search/?P=DLCL%20333) Philosophy, Literature, and the Arts Core Seminar, team taught by faculty from philosophy and from a literature or arts department.

2. Two additional courses at the 200 level or above which are deemed by the Committee in Charge to include material of substantial special relevance to the domain of philosophy, literature, and the arts. A list of approved courses may be found each year at https://philit.stanford.edu/graduates/graduate-special-relevance-courses (https://philit.stanford.edu/graduates/graduate-special-relevance-courses/). At least one of these courses should be offered in a participating department other than the student's major department (e.g., a philosophy course for students in literature and arts departments, a literature or arts course for philosophy students).

3. All students take two graduate-level courses providing a structured program of course work in the student's minor field (such as philosophy for literature and arts students, or literary or arts criticism for philosophy students):

    - Graduate students in Philosophy take two graduate-level courses in a single literature, or in one of the arts.

    - Graduate students in literature or arts departments, including Classics, take two graduate-level courses in Philosophy, at least one of which must be in metaphysics, epistemology, or the philosophies of language, mind, or action (the PHIL 280s series and related upper-level seminars), and at least one of which must be in value theory (understood to include ethics, aesthetics, and political philosophy, the PHIL 270s series and related upper-level seminars)

    - Graduate students in other departments submit a plan of study for approval by the Faculty Director reflecting graduate-level course work that provides a background both within philosophy and within the study of literature or the arts that is substantially equivalent to that achieved by philosophy, literature, or arts students in their minor field. Students are advised that this plan of study may involve more course work than would be needed for students whose major field is in literature, arts, or philosophy departments.

4. If the five required courses do not total 20 units, students may satisfy the 20 unit requirement by taking units of DLCL 222 (https://exploredegrees.stanford.edu/search/?P=DLCL%20222) Philosophy and Literature or by taking additional graduate level courses of special relevance at their discretion and with the agreement of their minor adviser.

Notes:

- Students are encouraged to include a member from the minor field on the University Oral Committee or on another of the general examination committees if that is judged more appropriate by the student's departmental and minor advisers. Students in departments which deploy the University Oral as a dissertation defense are advised that a member from the student's minor field should be involved on the dissertation committee throughout the dissertation writing period.

- Currently-enrolled students (as of August 31, 2017) in the old Ph.D. minor in the Humanities, or in its Philosophy, Literature, and the Arts subplan, have the option to continue under the current Ph.D. minor name or to change to the new Ph.D. minor in Philosophy, Literature, and the Arts. Students were required to make this election by the end of Autumn Quarter 2017-18. New students (as of September 1, 2017) would enroll in the Ph.D. minor in Philosophy, Literature, and the Arts. The subplan is no longer be available for student enrollment as of September 1, 2017.

Ph.D. Minor in Philosophy, Literature, and the Arts

Faculty Director: Joshua Landy, French and Italian, and Comparative Literature

Director of Graduate Studies: Adrian Daub, German Studies, and Comparative Literature

Overview

The Ph.D. minor in Philosophy, Literature, and the Arts offers rigorous, structured training for students interested in the interdisciplinary intersection of philosophy with criticism in literature and the arts.

Application and Admission

Students declare the minor after admission to candidacy and before attaining TGR status by submitting an Application for Ph.D. Minor (http://studentaffairs.stanford.edu/sites/default/files/registrar/files/app_phd_minor.pdf) form.

Requirements for the Ph.D. Minor in Philosophy, Literature, and the Arts

All students in the Ph.D. Minor in Philosophy, Literature, and the Arts take:

1. PHIL 333 (https://exploredegrees.stanford.edu/search/?P=PHIL%20333)/DLCL 333 (https://exploredegrees.stanford.edu/search/?P=DLCL%20333) Philosophy, Literature, and the Arts Core Seminar, team taught by faculty from philosophy and from a literature or arts department.

2. Two additional courses at the 200 level or above which are deemed by the Committee in Charge to include material of substantial special relevance to the domain of philosophy, literature, and the arts. A list of approved courses may be found each year at https://philit.stanford.edu/graduates/graduate-special-relevance-courses (https://philit.stanford.edu/graduates/graduate-special-relevance-courses/). At least one of these courses should be offered in a participating department other than the student's major department (e.g., a philosophy course for students in literature and arts departments, a literature or arts course for philosophy students).

3. All students take two graduate-level courses providing a structured program of course work in the student's minor field (such as philosophy for literature and arts students, or literary or arts criticism for philosophy students):

    - Graduate students in Philosophy take two graduate-level courses in a single literature, or in one of the arts.

    - Graduate students in literature or arts departments, including Classics, take two graduate-level courses in Philosophy, at least one of which must be in metaphysics, epistemology, or the philosophies of language, mind, or action (the PHIL 280s series and related upper-level seminars), and at least one of which must be in value theory (understood to include ethics, aesthetics, and political philosophy, the PHIL 270s series and related upper-level seminars)

    - Graduate students in other departments submit a plan of study for approval by the Faculty Director reflecting graduate-level

course work that provides a background both within philosophy and within the study of literature or the arts that is substantially equivalent to that achieved by philosophy, literature, or arts students in their minor field. Students are advised that this plan of study may involve more course work than would be needed for students whose major field is in literature, arts, or philosophy departments.

4. If the five required courses do not total 20 units, students may satisfy the 20 unit requirement by taking units of DLCL 222 (https://exploredegrees.stanford.edu/search/?P=DLCL%20222) Philosophy and Literature or by taking additional graduate level courses of special relevance at their discretion and with the agreement of their minor adviser.

Notes:

- Students are encouraged to include a member from the minor field on the University Oral Committee or on another of the general examination committees if that is judged more appropriate by the student's departmental and minor advisers. Students in departments which deploy the University Oral as a dissertation defense are advised that a member from the student's minor field should be involved on the dissertation committee throughout the dissertation writing period.
- Currently-enrolled students (as of August 31, 2017) in the old Ph.D. minor in the Humanities, or in its Philosophy, Literature, and the Arts subplan, have the option to continue under the current Ph.D. minor name or to change to the new Ph.D. minor in Philosophy, Literature, and the Arts. Students were required to make this election by the end of Autumn Quarter 2017-18. New students (as of September 1, 2017) would enroll in the Ph.D. minor in Philosophy, Literature, and the Arts. The subplan is no longer be available for student enrollment as of September 1, 2017.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a "credit" or "no credit" grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a "credit" or "satisfactory" grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

The Division of Literatures, Cultures, and Languages minor programs count all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of undergraduate degree requirements that otherwise require a letter grade.

Graduate Degree Requirements

Grading

Doctoral students in the department must take required courses for a letter grade and are expected to earn a grade of 'B' or better in each required course. In other courses, doctoral students are expected to earn a grade of 'B' or better in each course taken for a letter grade in AY 2020-21 that will count towards their degree requirement. Any grade of 'B-' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty: while the grade will stand, the student may be required to revise and resubmit the work associated with that course. For courses taken for CR/NC, instructors will be asked to submit written assessment to the student and the department of what would be the equivalent letter grade to allow for review of satisfactory academic achievement by the DGS and department.

Certificate in Language Program Management

Faculty Director: Elizabeth Bernhardt

Programs in contemporary foreign language teaching preparation entail a knowledge base that has grown over the past 30 years, rooted in data from an explosion of linguistic as well as applied linguistic research.

In tandem with the Language Center's primary focus on learning research and theory, which graduate students explore in the teaching preparation program, the Language Program Management certificate focuses on developing the professional leadership and academic skills necessary for a career that includes the coordination and management of language learning.

The program funds summer internships which enable the completion of a certificate in Language Program Management and are intended to help Stanford graduate students prepare themselves for such work in complement to their literary studies. The certificate program is not declared on Axess and does not appear on the transcript or diploma.

Prerequisites

1. Foreign language acquisition: Oral Proficiency Interview (OPI) rating of at least advanced mid
2. Academic and professional development:
    - DLCL 301 The Learning and Teaching of Second Languages
    - Modified Oral Proficiency Interview (MOPI) Assessment workshop (2 days)
    - Limited OPI Tester Certification (average 6 months)
    - Teaching of three first-year language courses through the Language Center

These are generally met by the end of a graduate student's second year in the PhD program. Once meeting these criteria, the student may be admitted to the Program.

Requirements

Upon admission to the program, students must complete the following:

1. DLCL 302 The Learning and Teaching of Second-Language Literatures: a course designed to focus student attention on the development of oral language proficiency through the upper levels and emphasize the need for upper register speaking and writing for literature learning and teaching.
2. OPI workshop (additional 2 days of training at the Advanced and Superior levels): this workshop is the extension of the MOPI. It focuses on upper register performance on the FSI-ACTFL scale. Hosted by either the Language Center, regional workshop, or at the national meeting of the ACTFL.
3. Completion of Writing Proficiency Familiarization workshop (Winter Quarter): Workshop conducted by a certified writing tester and structured in parallel to the MOPI/OPI assessment paradigm.

4. DLCL 303 Language Program Management (Summer Quarter): an administrative internship including, but not limited to, experiences with the following:
    - Shadow faculty and staff in select areas of administration and supervision within the Language Center and DLCL
    - Placement testing and student advisement
    - Technology in teaching and learning
    - Processes for teacher observation and feedback
    - Procedures in staff supervision and human resources
    - Course scheduling, budgeting, staffing, and searches
    - Interface with external programs (e.g., BOSP, Bechtel, VPTL)

Division Chair: Cécile Alduy

Courses

DLCL 11. Great Books, Big Ideas from Ancient Greece and Rome. 3 Units.
This course will journey through ancient Greek and Roman literature from Homer to St. Augustine, in constant conversation with the other HumCore travelers in the Ancient Middle East, Africa and South Asia, and Early China. It will introduce participants to some of its fascinating features and big ideas (such as the idea of history); and it will reflect on questions including: What is an honorable life? Who is the Other? How does a society fall apart? Where does human subjectivity fit into a world of matter, cause and effect? Should art serve an exterior purpose? Do we have any duties to the past? This course is part of the Humanities Core: https://humanitiescore.stanford.edu/.
Same as: CLASSICS 37, HUMCORE 112

DLCL 12Q. Humanities Core: Great Books, Big Ideas -- Europe, Middle Ages and Renaissance. 3-4 Units.
This three-quarter sequence asks big questions of major texts in the European and American tradition. What is a good life? How should society be organized? Who belongs? How should honor, love, sin, and similar abstractions govern our actions? What duty do we owe to the past and future? The second quarter focuses on the transition from the Middle Ages to Modernity, Europe's re-acquaintance with classical antiquity and its first contacts with the New World. Authors include Dante, Shakespeare, Machiavelli, Cervantes, and Milton. N.B. This is the second of three courses in the European track. These courses offer an unparalleled opportunity to study European history and culture, past and present. Take all three to experience a year-long intellectual community dedicated to exploring how ideas have shaped our world and future. Students who take HUMCORE 11 and HUMCORE 12Q will have preferential admission to HUMCORE 13Q (a WR2 seminar).
Same as: FRENCH 12Q, HUMCORE 12Q, ILAC 12Q

DLCL 13. Humanities Core: Great Books, Big Ideas -- Europe, Modern. 3 Units.
This three-quarter sequence asks big questions of major texts in the European and American tradition. What is a good life? How should society be organized? Who belongs? How should honor, love, sin, and similar abstractions govern our actions? What duty do we owe to the past and future? This third and final quarter focuses on the modern period, from the rise of revolutionary ideas to the experiences of totalitarianism and decolonization in the twentieth century. Authors include Locke, Mary Shelley, Marx, Nietzsche, Freud, Weber, Primo Levi, and Frantz Fanon.
Same as: FRENCH 13, HISTORY 239C, HUMCORE 13, PHIL 13

DLCL 13Q. Humanities Core: Great Books, Big Ideas -- Europe, Modern. 3-4 Units.
This three-quarter sequence asks big questions of major texts in the European and American tradition. What is a good life? How should society be organized? Who belongs? How should honor, love, sin, and similar abstractions govern our actions? What duty do we owe to the past and future? This third and final quarter focuses on the modern period, from the rise of revolutionary ideas to the experiences of totalitarianism and decolonization in the twentieth century. Authors include Locke, Mary Shelley, Marx, Nietzsche, Freud, Weber, Primo Levi, and Frantz Fanon. N.B. This is the third of three courses in the European track. These courses offer an unparalleled opportunity to study European history and culture, past and present. Take all three to experience a year-long intellectual community dedicated to exploring how ideas have shaped our world and future. Students who take HUMCORE 11 and HUMCORE 12Q will have preferential admission to HUMCORE 13Q (a WR2 seminar). **NOTE** This class meets Monday and Wednesday in room 20-22K and Fridays in room 260-113 to attend a lecture along with the other two HUMCORE courses this quarter.
Same as: GERMAN 13Q, HUMCORE 13Q

DLCL 33. Humanities Core: Global Identity, Culture, and Politics from the Middle East. 3 Units.
How do we face the future? What resources do we have? Which power structures hold us back and which empower us? What are our identities at college in the Bay Area? In 1850s Lebanon, Abu Faris Shidyaq faced all these same questions (except the last one; he was a Christian magazine editor). In this course we will engage with claims about identity, culture, and politics that some might say come from the "Middle East" but that we understand as global. Ganzeer's graphic novel is as much for California as it is for Egypt. Ataturk's speech is about power and identity just like Donald Trump is about power and identity. In Turkish novels and in Arabic poetry, the people we engage in this course look to their pasts and our futures. What happens next? This is the third of three courses in the Middle Eastern track. These courses offer an unparalleled opportunity to study Middle Eastern history and culture, past and present. Take all three to experience a year-long intellectual community dedicated to exploring how ideas have shaped our world and future.future.
Same as: COMPLIT 33, HUMCORE 33

DLCL 52. Global Humanities: The Grand Millennium, 800-1800. 3-4 Units.
How should we live? This course explores ethical pathways in European, Islamic, and East Asian traditions: mysticism and rationality, passion and duty, this and other worldly, ambition and peace of mind. They all seem to be pairs of opposites, but as we'll see, some important historical figures managed to follow two or more of them at once. We will read works by successful thinkers, travelers, poets, lovers, and bureaucrats written between 800 and 1900 C.E. We will ask ourselves whether we agree with their choices and judgments about what is a life well lived.
Same as: HISTORY 206D, HUMCORE 52, JAPAN 52

DLCL 100. CAPITALS: How Cities Shape Cultures, States, and People. 3-5 Units.
This course takes students on a trip to major capital cities, at different moments in time: Renaissance Florence, Golden Age Madrid, Colonial Mexico City, Enlightenment and Romantic Paris, Existential and Revolutionary St. Petersburg, Roaring Berlin, Modernist Vienna, and bustling Buenos Aires. While exploring each place in a particular historical moment, we will also consider the relations between culture, power, and social life. How does the cultural life of a country intersect with the political activity of a capital? How do large cities shape our everyday experience, our aesthetic preferences, and our sense of history? Why do some cities become cultural capitals? Primary materials for this course will consist of literary, visual, sociological, and historical documents (in translation); authors we will read include Boccaccio, Dante, Sor Juana, Montesquieu, Baudelaire, Gogol, Irmgard Keun, Freud, and Borges. Note: To be eligible for WAYS credit, you must take the course for a Letter Grade.
Same as: COMPLIT 100, FRENCH 175, GERMAN 175, HISTORY 206E, ILAC 175, ITALIAN 175, URBANST 153

DLCL 101. Translation Matters: Applications in the 21st Century. 1-2 Unit.
For students interested in translation, interpreting, and translationnstudies. The course will highlight guest speakers who apply translation inna variety of professional contexts (e.g. medical, legal, literary, religious contexts, localization, machine-translation).

DLCL 102. 10 Jobs in 10 Weeks: Leveraging Your Liberal Arts Career. 1 Unit.
This interactive course gives students a taste of 10 different career fields over 10 weeks to help students explore and reflect on career interests, values, and goals. Students will also participate in exercises that help them to articulate the core skills humanities, arts, and social sciences students bring to their careers. Each week features alumni from different industries, who share about their work and lead students through an interactive case or project from a typical workday.

DLCL 111Q. Texts and Contexts: Spanish/English Literary Translation Workshop. 4 Units.
This course introduces students to the theoretical knowledge and practical skills necessary to translate literary texts from Spanish to English and English to Spanish. Students will workshop and revise a translation project throughout the quarter. Topics may include comparative syntaxes, morphologies, and semantic systems; register and tone; audience; the role of translation in the development of languages and cultures; and the ideological and socio-cultural forces that shape translations.
Same as: COMPLIT 111Q, ILAC 111Q

DLCL 113Q. Borges and Translation. 3-5 Units.
Borges's creative process and practice as seen through the lens of translation. How do Borges's texts articulate the relationships between reading, writing, and translation? Topics include authorship, fidelity, irreverence, and innovation. Readings will draw on Borges's short stories, translations, and essays. Taught in Spanish. Prerequisite: 100-level course in Spanish or permission of instructor.
Same as: ILAC 113Q

DLCL 121. Performing the Middle Ages. 3-5 Units.
Through an analysis of medieval courtly love, religious, satirical, and Crusade lyrics, we will study the rise of a new subjectivity; the female voice; the roles of poet, audience, and patron; oral and manuscript transmission; and political propaganda. Special attention will be given to performance as a reimagining of self and social identity. Authors include Bertran de Born, Marie de France, Hildegard von Bingen, Walther von der Vogelweide, Dante, and Chaucer. Students will have the opportunity to produce a creative project that brings medieval ideas about performance into dialogue with modern conceptions. Taught in English, all texts in translation. NOTE: for AY 2018-19 FRENCH 166 Food, Text, Music: A Multidisciplinary Lab on the Art of Feasting counts for DLCL 121.

DLCL 122. Medieval Manuscripts, Digital Methodologies. 3-5 Units.
Medieval Studies is entering a phase of digital abundance. In the last seven years, more medieval material has been put online than has ever been available for study at any point in the past. How can we engage with the growing mass of digitized material available to us? How does this sudden access impact the work we do, the types of questions we ask, the connections we make, and the audiences we write for?nnIn this course, we will examine and evaluate digital medieval resources and software that has been created for interacting with those resources. Students will have the opportunity to design and create an innovative project based on medieval primary sources held at Stanford, applying current digital methods in the analysis and presentation of those resources.
Same as: ENGLISH 122

DLCL 123. Medieval Journeys: Introduction through the Art and Architecture. 5 Units.
The course explores the experience and imagination of medieval journeys through an interdisciplinary, cross-cultural, and skills-based approaches. As a foundations class, this survey of medieval culture engages in particular the art and architecture of the period. The Middle Ages is presented as a network of global economies, fueled by a desire for natural resources, access to luxury goods and holy sites. We will study a large geographical area encompassing the British Isles, Europe, the Mediterranean, Central Asia, India, and East Africa and trace the connectivity of these lands in economic, political, religious, and artistic terms from the fourth to the fourteenth century C.E. The students will have two lectures and one discussion session per week. Depending on the size of the class, it is possible that a graduate student TA will run the discussion session. Our goal is to give a skills-oriented approach to the Middle Ages and to engage students in creative projects that will satisfy either the Ways-Creative Expression requirement or Ways-Engaging Difference. NOTE: for AY 2018-19 HISTORY 115D Europe in the Middle Ages, 300-1500 counts for DLCL 123.
Same as: ARTHIST 105B, ARTHIST 305B

DLCL 141. Poems, Poetry, Worlds. 5 Units.
What is poetry? How does it speak in many voices to questions of philosophy, history, society, and personal experience? Why does it matter? The reading and interpretation of poetry in crosscultural comparison as experience, invention, form, sound, knowledge, and part of the world. The readings address poetry of several cultures (Brazil, Chile, France, Germany, Greece, Italy, Occitania, Peru) in comparative relation to that of the English-speaking world, and in light of classic and recent theories of poetry.
Same as: COMPLIT 121

DLCL 142. Literature as Performance. 5 Units.
The purpose of this course is to re-embed great dramatic texts in a history and theory of performance, using Bay Area and Stanford productions, audiovisual materials, and your own trans-medial projects to help us reconceive theater off the page, moving in time, space and thought.
Same as: COMPLIT 122

DLCL 143. The Novel and the World. 5 Units.
The European Design of the Novel. The course will trace the development of the modern literary genre par excellence through some of its great milestones from the 17th century to the present. Works by Cervantes, Austen, Flaubert, Dostoevsky, Queirós, Kafka, Woolf, Verga, and Rodoreda.
Same as: COMPLIT 123

DLCL 144. An Introduction to Persian Literature, an Aesthetic Tradition Over a Millennium Old. 3-4 Units.
This course aims at familiarizing undergraduate/graduate students with some of the most significant classical and modern works of Persian literature, an aesthetic tradition over a millennium old. It requires no prior knowledge of, or familiarity with the canon of Persian literature, as it works through lecture-discussions on the history of Persian literature coupled with close readings and analyses of the best modern translations available in English along with the Persian texts. As such, students with knowledge of four quarters of Persian Language or more are encouraged; however, the requirement is to have one year of Persian Language class. The course will include some discussions of literary history, literary translation and cross-cultural interactions as well as questions of historical trends, literary genres and other areas of interest to comparative literary studies. Students will be encouraged to search and share relevant secondary sources, both online and in print. Students will also be encouraged to explore additional works of their choice and share their findings with other class members. Attendance is an integral part of the course and will play a crucial part in determining active participation. Take-home and midterm tests are designed to ensure that students keep up with the reading and are able to place the literary works in their proper aesthetic, social, and historical contexts. A final term paper on a relevant topic agreed upon between students and the instructor in individual conferences should bring together the result of the lectures, discussions and various readings in a statement of some significance with a scope that will connect more than one work and one period of Persian literature.

DLCL 189A. Honors Thesis Seminar. 4 Units.
For undergraduate majors in DLCL departments; required for honors students. Planning, researching, and writing an honors thesis. Oral presentations and peer workshops. Research and writing methodologies, and larger critical issues in literary studies. NOTE: The professor will send a survey to students that are enrolled to determine the day / time this class will meet.

DLCL 189B. Honors Thesis Seminar. 2-4 Units.
For undergraduate majors in DLCL departments; required for honors students. Planning, researching, and writing an honors thesis. Oral presentations and peer workshops. Research and writing methodologies, and larger critical issues in literary studies.

DLCL 189C. Honors Thesis Seminar. 2-4 Units.
For undergraduate majors in DLCL departments; required for honors students. Planning, researching, and writing an honors thesis. Oral presentations and peer workshops. Research and writing methodologies, and larger critical issues in literary studies.

DLCL 199. Honors Thesis Oral Presentation. 1 Unit.
For undergraduate majors in DLCL departments; required for honors students. Oral presentations and peer workshops. Regular advisory meetings required.

DLCL 203. The Early Printed Book. 1-5 Unit.
This course will focus on the printed book in Europe from the fifteenth through the sixteenth century. An ongoing theme will be the transition from a purely manuscript culture to one in which both manuscript and print thrived. The course will have a bibliographical as well as an historical focus. covering typography, illustration, and the collation of early printed books. Taught in English.

DLCL 204. Digital Humanities Across Borders. 3-5 Units.
What if you could take a handwritten manuscript, or a pile of 100 books, and map all the locations that are referenced, or see which characters interact with one another, or how different translators adapted the same novel -- without reading through each text to manually compile those lists? Digital humanities tools and methods make it possible, but most tools and tutorials assume the texts are in English. If you work with text (literature, historical documents, fanfic, tweets, or any other textual material) in languages other than English, DLCL 204 is for you. In 1:1 consultation with the instructor, you'll chart your own path based on the language you're working with, the format of the text, and what questions you'd like to try to answer. No previous programming or other technical experience is required, just a reading knowledge of a language other than English (modern or historical). We'll cover the whole process of using digital tools, from start to finish: text acquisition, text enrichment, and analysis/visualization, all of which have applications in a wide range of job contexts within and beyond academia. You'll also have the chance to hear from scholars who are doing digital humanities work in non-English languages, about their experience working across the technical and linguistic borders within their discipline, and within the broader DH community. While this course will be online and primarily asynchronous, there will be opportunities for students to meet synchronously throughout the quarter in language- and tool-based affinity groups.
Same as: COMPLIT 204A, ENGLISH 204

DLCL 205. Project Management and Ethical Collaboration for Humanists. 3-5 Units.
What does it look like to manage a collaborative project in a way that's both effective and ethical, taking into account the needs of people as well as the task? This class will cover project management and collaboration as they are practiced in digital humanities, "alt-ac" (alternative academic) jobs, and similar environments outside academia. In addition to readings and discussion, students will participate in a simulation of one year in the life of a digital humanities project (in the style of Dungeons and Dragons and similar role-playing games), with each student playing the role of a member on the project team.
Same as: DLCL 305

DLCL 209. Paleography of Medieval and Early Modern Manuscripts. 3-5 Units.
Introductory course in the history of writing and of the book, from the late antique period until the advent of printing. Opportunity to learn to read and interpret medieval manuscripts through hands-on examination of original materials in Special Collections of Stanford Libraries as well as through digital images. Offers critical training in the reading of manuscripts for students from departments as diverse as Classics, History, Philosophy, Religious Studies, English, and the Division of Languages Cultures and Literatures.
Same as: CLASSICS 215, HISTORY 309G, RELIGST 204

DLCL 219. Collaborative Teaching Project. 1 Unit.
The Collaborative Teaching Project (CTP) has supported Stanford faculty and graduate students by offering a series of team-taught courses in the humanities, with the goal of preparing graduate students for careers as liberal arts educators. CTP thus facilitates and funds collaborations between one faculty member and 1-2 graduate students in order to co-teach a course. The graduate students and their faculty mentor work together on as many aspects of the course as possible, including syllabus, gathering and choosing materials, preparing assignments, lectures, presentations, class activities, and other in-class events, grading and feedback, evaluation of the course itself, and so on.

DLCL 220. Humanities Education. 1 Unit.
Humanities Education explores issues concerning teaching and learning in the humanities, including research on student learning, innovation in pedagogy, the role of new technologies in humanities instruction, and professional issues for humanities teachers at all educational levels.

DLCL 221. Materia. 1 Unit.
Materia is a focal group on post-anthropocentrism, Latin Americanist and otherwise. Building on and expanding the theoretical framework offered by thinkers such as Fernando Ortiz, Bruno Latour, and Jane Bennett, we engage with works of literature and criticism that de-center the human as object of study. To earn the unit, undergraduate and graduate students should attend the workshops held by the focal group, prepare the pre-circulated readings, and actively contribute to discussion throughout the year. The latter can take place during plenary, over office hours with faculty coordinators, or via contributions to the focal group's online platforms. A short quarterly response paper that relates group discussions with the student's ongoing research is recommended. May be repeated for credit.

DLCL 222. Philosophy and Literature. 1 Unit.
The Focal Group in Philosophy and Literature brings together scholars and students from eight departments to investigate questions in aesthetics and literary theory, philosophically-inflected literary texts, and the form of philosophical writings. Fields of interest include both continental and analytic philosophy, as well as cognitive science, political philosophy, rational choice theory, and related fields. Students may sign up for a unit of credit each quarter via DLCL 222. To earn the unit, students must secure written permission in advance from one of the instructors, before the final study list deadline. They must then do one of the following three things: (a) attend an event hosted by the Philosophy and Literature group (including events hosted by the graduate workshop) and write up a reaction paper of 2-5 pages; (b) present a paper of their own to the graduate workshop; (c) agree with one of the DLCL 222 instructors on a reading related to the year's activities, and meet with him/her for a discussion of that reading. Prerequisite for undergraduates: undergraduate students wishing to take DLCL 222 must previously have taken the philosophy and literature gateway course PHIL 81 (CLASSICS 42, COMPLIT 181, ENGLISH 81, FRENCH 181, GERMAN 181, ITALIAN 181, SLAVIC 181) or a class taught by one of the instructors of DLCL 222.

DLCL 223. Renaissances. 1 Unit.
The Renaissances Group brings together faculty members and students from several departments at Stanford to consider the present and future of early modern literary studies (a period spanning the fourteenth through the seventeenth centuries). Taking seriously the plural form of the group's name, we seek to explore the early modern period from a wide range of disciplinary, cultural, linguistic, and geographical perspectives.

DLCL 224. Workshop in Poetics. 1 Unit.
The Workshop in Poetics is concerned with the theoretical and practical dimensions of the reading and criticism of poetry. During the many years of its existence, the Workshop has become a central venue at Stanford enabling participants to share their individual projects in a general conversation outside of disciplinary and national confinements. The two dimensions that the workshop sees as urgent are: poetics in its specificity as an arena for theory and interpretive practice, and historical poetics as a particular set of challenges for the reader and scholar.

DLCL 227. Persian, Arabic, Turkish, and Hebrew Languages, Literatures, and Cultures. 1 Unit.
PATH+ is a DLCL focal group that provides a space for conversations about Persian, Arabic, Turkish, and Hebrew languages, literatures, and cultures in the DLCL. To earn the unit, undergraduate and graduate students should attend the workshops held by the focal group and contribute one substantive response during the quarter. This can come in the form of an individual discussion with one of the two lead faculty, 1,500 words of contribution to the focal group's online platforms, or a presentation to the group itself.

DLCL 229. The Contemporary. 1 Unit.
The Contemporary is a focal group dedicated to the study of recent innovative works in literature and the arts as they touch on social, political, and philosophical concerns of our era. Building on and expanding the theoretical framework offered by thinkers as Hannah Arendt, Paul Rabinow, or Giorgio Agamben, we seek to trace the capacity of the artistic imagination to broaden the vocabulary with which we address contemporary challenges to freedom and to meaningful action. To earn the unit, undergraduate and graduate students should attend the workshops held by the focal group and contribute one substantive response during the year. This can come in the form of an individual discussion with one of the two lead faculty, 1,500 words of contribution to the focal group's online platforms, or a presentation to the group itself. May be repeated for credit.

DLCL 230. Medieval Studies Workshop. 1 Unit.
The Medieval Studies Workshop brings together faculty members and Ph.D. students from several departments to consider interdisciplinary scholarly developments in the field of medieval studies, a period spanning the fifth through the fifteenth century CE. To earn the unit, graduate students should attend the workshops held by the focal group and actively contribute to discussion throughout the year. The latter can take place during plenary or over office hours with faculty leaders. May be repeated for credit.

DLCL 237. Political Exhumations. Killing Sites Research in Comparative Perspective. 3-5 Units.
The course discusses the politics and practices of exhumation of individual and mass graves. The problem of exhumations will be considered as a distinct socio-political phenomenon characteristic of contemporary times and related to transitional justice. The course will offer analysis of case studies of political exhumations of victims of the Dirty War in Argentina, ethnic cleansing in former Yugoslavia, the Holocaust, communist violence in Poland, the Rwandan genocide, and the Spanish Civil War. The course will make use of new interpretations of genocide studies, research of mass graves, such as environmental and forensic approaches.
Same as: ANTHRO 137D, ARCHLGY 137, ARCHLGY 237, REES 237

DLCL 239. Borges and Translation. 3-5 Units.
Borges's creative process and practice as seen through the lens of translation. How do Borges's texts articulate the relationships between reading, writing, and translation? Topics include authorship, fidelity, irreverence, and innovation. Readings will draw on Borges's short stories, translations, and essays. Taught in Spanish. Prerequisite: 100-level course in Spanish or permission of instructor.

DLCL 245. LA ALJAMÍA, ROMÁRABE LANGUAGE. 3-5 Units.
This specific course will offer an overview of Aljamía, language of the Moors, considered an "Islamic variant of Spanish" that serves them to approach respectfully the language of their religious cult-material reality, beyond their day-to-day communication. Students will study a crucial part of the history of medieval and early modern Spain and especially the history of Moors as a community of crypto Muslims.

DLCL 254. Animism, Gaia, and Alternative Approaches to the Environment. 3-5 Units.
Indigenous knowledges have been traditionally treated as a field of research for anthropologists and as mistaken epistemologies, i.e., un-scientific and irrational folklore. However, within the framework of environmental humanities, current interest in non-anthropocentric approaches and epistemic injustice, animism emerged as a critique of modern epistemology and an alternative to the Western worldview. Treating native thought as an equivalent to Western knowledge will be presented as a (potentially) decolonizing and liberating practice. This course may be of interest to anthropology, archaeology and literature students working in the fields of ecocriticism and the environmental humanities/social sciences, students interested in the Anthropocene, geologic/mineral, bio-, eco- and geosocial collectives, symbiotic life-forms and non-human agencies. The course is designed as a research seminar for students interested in theory of the humanities and social sciences and simultaneously helping students to develop their individual projects and thesis.
Same as: ANTHRO 154C, ANTHRO 254C, ARCHLGY 154, ARCHLGY 254, REES 254

DLCL 259C. Ecological Humanities. 3 Units.
What sort of topics, research questions, approaches, theories and concepts lead to an integration of various kinds of knowledges? Ecological Humanities provides a conceptual platform for a merger of humanities and social sciences with earth and life sciences, soil science and forensic sciences. The course will discuss such selected topics as the Anthropocene, geologic/mineral and exhumed subjects/personae, bio- and geosocial collectives, symbiotic life-forms, non-human agencies, and forensic landscapes as examples of this merger.
Same as: ANTHRO 159C, ANTHRO 259C, REES 259C

DLCL 293. Literary Translation. 4 Units.
An overview of translation theories and practices over time. The aesthetic, ethical, and political questions raised by the act and art of translation and how these pertain to the translator's tasks. Discussion of particular translation challenges and the decision processes taken to address these issues. Coursework includes assigned theoretical readings, comparative translations, and the undertaking of an individual translation project.
Same as: ENGLISH 293

DLCL 298. Preparing to Teach English as a Second Language. 3 Units.
This course focuses on practical aspects of teaching English to speakers of other languages. Its primary focus is an overview of the structure of English, which is crucial for effective English language instruction. Students in this course will also have practicum experience including classroom observations, pedagogical text evaluations, and supervised instruction of English language learners.

DLCL 299. DLCL CS+ CAPSTONE. 2 Units.
Only DLCL/CS+ joint majors may enroll in this course.

DLCL 301. The Learning and Teaching of Second Languages. 3 Units.
This course approaches the teaching of second languages from a learning perspective. In other words, it eschews the traditional focus on ¿teaching methods¿ and emphasizes instructional decision-making within the context of learners¿ intellectual and linguistic development. The course is designed to prepare language instructors to teach languages at the beginning and intermediate levels in a variety of university settings to an array of populations.

DLCL 302. The Learning and Teaching of Second-Language Literatures. 1-3 Unit.
This course is a follow-up to The Learning and Teaching of Second Languages (DLCL 301) and is structured to reflect the needs and challenges of students and teachers embarking on courses at the late second-year level and beyond. Participants will focus on a language and literary area within a chosen foreign language. They will interrogate how literature learning assists further language acquisition and how the level of language knowledge facilitates and impedes literary interpretation and reading comprehension. Prerequisite: DLCL 301.

DLCL 303. Language Program Management. 1-3 Unit.
Administrative Internship in Language Program Management. Experiences can include, but are not limited to, the following: Shadow faculty and staff in select areas of administration and supervision within the Language Center and DLCL; Placement testing and student advisement; Technology in teaching and learning; Processes for teacher observation and feedback; Procedures in staff supervision and Human Resources; Course scheduling, budgeting, staffing, and searches; Interface with external programs (e.g. BOSP, Bechtel, CTL).

DLCL 305. Project Management and Ethical Collaboration for Humanists. 3-5 Units.
What does it look like to manage a collaborative project in a way that's both effective and ethical, taking into account the needs of people as well as the task? This class will cover project management and collaboration as they are practiced in digital humanities, "alt-ac" (alternative academic) jobs, and similar environments outside academia. In addition to readings and discussion, students will participate in a simulation of one year in the life of a digital humanities project (in the style of Dungeons and Dragons and similar role-playing games), with each student playing the role of a member on the project team.
Same as: DLCL 205

DLCL 311. Professional Workshop. 1-2 Unit.
Meets regularly throughout the year to discuss issues in the professional study of literature. Topics include the academic job market and the challenges of research and teaching at different types of institutions. Supervised by the graduate affairs committee of the DLCL. May be repeated for credit.

DLCL 312. Pitching and Publishing in Popular Media. 1 Unit.
Most of the time, writing a pitch for a popular outlet just means writing an email. So why be intimidated? This course will outline the procedure for pitching essays and articles to popular media: how to convince an editor, agent, or anyone else that your idea is compelling, relevant, and deliverable. We'll take a holistic approach to self-presentation that includes presenting yourself with confidence, optimizing your social media and web platform, networking effectively, writing excellent queries and pitches, avoiding the slush pile, and perhaps most importantly, persevering through the inevitable self-doubt and rejection.We will focus on distinguishing the language, topics and hooks of popular media writing from those of academic writing, learn how to target and query editors on shortform pieces (personal essays, news stories, etc.), and explore how humanists can effectively self-advocate and get paid for their work.
Same as: ENGLISH 318, FEMGEN 312F

DLCL 321. Classical Seminar: Rethinking Classics. 4-5 Units.
Literary and philosophical texts from Antiquity (including Homer, the Greek tragedians, Plato, Aristotle, Virgil, and Augustine). In each case, we will examine the cultural contexts in which each text was composed (e.g. political regimes and ideologies; attitudes towards gender and sexuality; hierarchies of class and status; discourses on "barbarians" and resident aliens). We will study various theoretical approaches to these books in an effort to "rethink" these texts in the 21st century.
Same as: CLASSICS 244

DLCL 322. Medieval Seminar. 3-5 Units.
The cultural,literary, and artistic evolution of the Middle Ages. The barbarian invasions and the Germanic ethos, the Celtic heritage,and the monastic tradition. Romanesque art and architecture,pilgrimages,and the Crusades. Gothic aesthetics, chivalry and courtly love, scholasticism, and the rise of universities. The late Middle Ages, humanism, and the threshold of the Renaissance. Texts include: Beowulf, Mabinogion, Song of Roland, Chretien de Troyes' Lancelot and Yvain, Dante's Divine Comedy, Boccaccio's Decameron, and Chaucer's Canterbury Tales.nn3-5 units.

DLCL 323. Early Modern Seminar. 3-5 Units.
Explores some of the key texts of European early modernity and the critical paradigms according to which the idea of the "Renaissance" has been formed, analyzed, and questioned since the 19th century. Will aim to provide a broad introduction to Early Modern studies from the point of view of the Italian Renaissance and its reception in different European contexts. Taught in English.

DLCL 325. Modern Seminar. 3-5 Units.
The postmodern condition as post-WWII rupture in Western tradition; moral, political, cultural, and aesthetical dimensions. Sources include literature, philosophy, essays, films, and painting. Authors and artists include: Primo Levi, Hannah Arendt, Alain Resnais, Samuel Beckett, Georges Bataille, Michel Foucault, Theodor Adorno, David Riesman, Georges Perec, Juliet Mitchell, and Francis Bacon.

DLCL 333. Philosophy, Literature, and the Arts Core Seminar. 2-4 Units.
This course serves as the Core Seminar for the PhD Minor in Philosophy, Literature, and the Arts. It introduces students to a wide range of topics at the intersection of philosophy with literary and arts criticism. The seminar is intended for graduate students. It is suitable for theoretically ambitious students of literature and the arts, philosophers with interests in value theory, aesthetics, and topics in language and mind, and other students with strong interest in the psychological importance of engagement with the arts. May be repeated for credit. In this year¿s installment, we focus on how artistic kinds or genres help set the terms on which individual works are experienced, understood, and valued, with special attention to lyric poetry and music.
Same as: ENGLISH 333, MUSIC 332, PHIL 333

DLCL 354A. DLCL Film Series: Rebel With a Cause. 1 Unit.
This quarter's film series will examine the representation of resistance, rebellion, and revolt in international cinema. Starting with Michael Almereyda's biographical drama Experimenter (2015), we will examine Stanley Milgram's studies on complicity, conformity, and resistance in his famous experiments on following instructions to inflict pain. From there we will move to canonical cinematic representations of acts of resistance like Florian Henckel von Donnersmarck's The Lives of Others (2006), Jean-Pierre Melville's Army of Shadows (1969), and Sergei Eisenstein's Battleship Potemkin (1925) to discuss why these films have been canonized as some of the most suspenseful and powerful films of all time. Viewing Marcel Carné's Children of Paradise (1945), filmed during the Nazi Occupation of France, and Victor Erice's The Spirit of the Beehive (1973), filmed during the Franco regime in Spain, will allow us to discuss the ways that cinema itself is used as a tool of resistance. And discussing Walter Salles' Motorcycle Diaries (2004), Francisco Vargas' The Violin (2005), and Quentin Tarantino's Inglourious Basterds (2009) will allow us to explore the ways that resistance in diverse forms from unexpected actors can lead to movements that may or may not change the world. Discussion will focus on analyzing the structures, actors, and acts of resistance, rebellion, and revolt in international film. In particular we will look at who resists and why; how a rebel's identity and social position affects his or her political engagement; and how different forms of resistance can create movements that evolve from grassroots, across governments, and around the globe. In our study of representations of resistance across different schools and cultures of cinema, film technologies, and cinematic history, we will also address the ways that film creates suspense and intrigue, represents cause and effect, and prompts questions of ethics. Screening Schedule: April 4 Experimenter (2015) Michael Almereyda , April 11 Army of Shadows (1969) Jean-Pierre Melville, April 18 Children of Paradise (1946) Marcel Carné , April 25 Battleship Potemkin (1925) Sergei Eisenstein, May 2 The Lives of Others (2006) Florian Henckel von Donnersmarck, May 9 Motorcycle Diaries (2004) Walter Salles, May 16 The Violin (2005) Francisco Vargas, May 23 The Battle of Algiers (1966) Gillo Pontecorvo, June 6 The Spirit of the Beehive (1973) Victor Erice , and June 13 Inglourious Basterds (2009) Quentin Tarantino.

DLCL 369. Introduction to the Profession of Literary Studies. 1-2 Unit.
A survey of how literary theory and other methods have been made institutional since the nineteenth century. The readings and conversation are designed for entering Ph.D. students in the national literature departments and comparative literature.
Same as: COMPLIT 369, FRENCH 369, GERMAN 369, ITALIAN 369

DLCL 396. Humanities+Design: Visualizing the Grand Tour. 4-5 Units.
Study of the eighteenth-century Grand Tour of Italy through visualization tools of the digital age. Critical readings in both visual epistemology and current Grand Tour studies; interrogating the relationship between quantitative and qualitative approaches in digital humanities; what new insights in eighteenth-century British travel to Italy does data visualization offer us? Students will transform traditional texts and documents into digital datasets, developing individual data analysis projects using text mining, data capture and visualization techniques.
Same as: CLASSICS 396, HISTORY 336E

EAST ASIAN LANGUAGES AND CULTURES

Courses offered by the Department of East Asian Languages and Cultures are listed on the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu/) web site under the subject codes:

- CHINA (https://explorecourses.stanford.edu/search/?q=CHINA&view=catalog&page=0&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&filter-departmentcode-CHINA=on&collapse=&filter-catalognumber-CHINA=on&filter-catalognumber-CHINA=on)
- JAPAN (https://explorecourses.stanford.edu/search/?q=JAPAN&view=catalog&page=0&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-JAPAN=on&filter-catalognumber-JAPAN=on)
- KOREA (https://explorecourses.stanford.edu/search/?q=KOREA&view=catalog&page=0&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&filter-departmentcode-KOREA=on&collapse=&filter-catalognumber-KOREA=on&filter-catalognumber-KOREA=on)
- EALC (https://explorecourses.stanford.edu/search/?q=EALC&view=catalog&page=0&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&filter-departmentcode-EALC=on&collapse=&filter-catalognumber-EALC=on&filter-catalognumber-EALC=on) (East Asian Languages and Cultures)

Language courses are listed on the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu/) web site under:

- CHINLANG (Chinese Language) (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=CHINLANG&filter-catalognumber-CHINLANG=on)
- JAPANLNG (Japanese Language) (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=JAPANLNG&filter-catalognumber-JAPANLNG=on)
- KORLANG (Korean Language) (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=KORLANG&filter-catalognumber-KORLANG=on)

The Department of East Asian Languages and Cultures offers programs for students who wish to engage with the cultures of China, Japan, and Korea as articulated in language, linguistics, literature, film, cultural studies, and visual arts. Students emerge with a sophisticated understanding of culture as a dynamic process embodied in language and other representational media, especially the verbal and visual forms that are central to humanistic study. Department faculty represent a broad range of research interests and specialties, and visiting scholars and postdoctoral fellows from the Stanford Humanities Center, the Andrew W. Mellon Fellowship of Scholars in the Humanities, the Freeman Spogli Institute for International Studies, and the Center for East Asian Studies add to the intellectual vitality of the department.

East Asian Languages and Cultures offers a full range of courses at the undergraduate and graduate levels. Undergraduate courses concentrate on language, literature, and other cultural forms from the earliest times to the present, covering traditional and contemporary topics from Confucian conceptions of self and society to inflections of gender in the twentieth century. Classes emphasize developing powers of critical thinking and expression that will serve students well no matter what their ultimate career goals. Graduate programs offer courses of study involving advanced language training, engagement with primary texts and other materials, literary history, and training in research methodologies and critical approaches.

East Asian language skills provide a foundation for advanced academic training and professional careers in fields such as business, diplomacy, education, and law. The department also offers opportunities for students who choose to double-major or minor in other academic disciplines, including anthropology, art history, economics, education, history, linguistics, philosophy, political science, religious studies, and sociology.

The department accepts candidates for the degrees of Bachelor of Arts, Master of Arts, and Doctor of Philosophy in Chinese and Japanese, and Bachelor of Arts in East Asian Studies. It also offers undergraduate minors and the Ph.D. minor in Chinese or Japanese language and literature.

For information concerning other opportunities for the study about Asian history, societies, and cultures, see the following departments and programs: Anthropology, Art and Art History, Business, Comparative Literature, East Asian Studies, Economics, History, Law, Linguistics, Philosophy, Political Science, Religious Studies, and Sociology.

Undergraduate Mission Statements for East Asian Languages and Cultures

East Asian Studies Major

The mission of the program in East Asian Studies is to enable students to obtain a comprehensive understanding of East Asia broadly conceived, which is the area stretching from Japan through Korea and China to the contiguous areas of the Central Asian landmass. Majors are expected to have a good mastery of an East Asian language and focus on a particular sub-region or a substantive issue involving the region as a whole. The classes emphasize the developing powers of critical thinking and expression, which serve students well no matter what their ultimate career goals in business, government service, academia, or the professions.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. effective and nuanced skills interpreting primary and secondary source materials.
2. a good grasp on their own work of the course material and methodologies in East Asian studies.
3. analytical writing skills and close reading skills.
4. effective oral communication skills.

East Asian Studies, China Subplan Major

The mission of the undergraduate program in Chinese is to expose students to a variety of perspectives in Chinese language, culture, and history by providing them with training in writing and communication, literature, and civilization. The classes emphasize the developing powers of critical thinking and expression, which serve students well no matter what their ultimate career goals in business, government service, academia, or the professions.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. effective and nuanced skills interpreting primary and secondary source materials.
2. a good grasp on their own work of the course material and methodologies in the studies of Chinese.
3. analytical writing skills and close reading skills.
4. effective oral communication skills.

East Asian Studies, Japan Subplan Major

The mission of the undergraduate program in Japanese is to expose students to a variety of perspectives in Japanese language, culture, and history by providing students with training in writing and communication, literature, and civilization. The classes emphasize the developing powers of critical thinking and expression, which serve students well no matter what their ultimate career goals in business, government service, academia, or the professions.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. effective and nuanced skills interpreting primary and secondary source materials.
2. a good grasp on their own work of the course material and methodologies in the studies of Japanese.
3. analytical writing skills and close reading skills.
4. effective oral communication skills.

East Asian Studies, Korea Subplan Major

The mission of the undergraduate program in Korean is to expose students to a variety of perspectives in Korean language, culture, and history by providing students with training in writing and communication, literature, and civilization. The classes emphasize the developing powers of critical thinking and expression, which serve students well no matter what their ultimate career goals in business, government service, academia, or the professions.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. effective and nuanced skills interpreting primary and secondary source materials.
2. a good grasp on their own work of the course material and methodologies in the studies of Korean.
3. analytical writing skills and close reading skills.
4. effective oral communication skills.

Study Abroad

There are several exciting opportunities for Stanford students interested in Japan and China. The Kyoto Consortium for Japanese Studies (KCJS (http://www.kcjs.jp/)), is designed for undergraduates wishing to do advanced work in Japanese language and Japanese studies. The language requirement is two years of Japanese. Students may attend either one or two semesters.

The BOSP Kyoto program (https://undergrad.stanford.edu/programs/bosp/explore/kyoto/) combines an Autumn and/or Spring Quarter of academic study with an optional internship in Japan. Founded in collaboration with the School of Engineering, it provides students with the opportunity to fit language immersion and practical classroom experience into their busy schedules. It also welcomes students in the sciences, social sciences, and humanities. Autumn Quarter participants must have completed JAPANLNG 1 First-Year Japanese Language, Culture, and Communication, First Quarter. Spring Quarter participants must have completed JAPANLNG 2 First-Year Japanese Language, Culture, and Communication, Second Quarter. Preference is given to students with additional language study, as well as those who have taken courses in Japanese literature and culture, or in Japanese linguistics. It is hosted on the Doshisha University campus in the heart of Kyoto. For information about either program in Kyoto, students should contact the Bing Overseas Studies Program office in Sweet Hall.

Undergraduates interested in studying Chinese language, history, culture, and society are encouraged to apply to the BOSP Hong Kong Program (https://undergrad.stanford.edu/programs/bosp/explore/hong-kong/), offered only in the Autumn Quarter. In partnership with the Chinese University of Hong Kong (CUHK), BOSP will welcome its first group of students in Hong Kong during the Autumn Quarter of the 2019-20 academic year. For more information on studying abroad in Hong Kong, contact Lizzy Monroe (lmonroe@stanford.edu; 650-725-6769). There are no prerequisites for the Hong Kong Program. In addition to Mandarin, Stanford students may choose to enroll in "survival" Cantonese and Putonghua elective courses.

The Inter-University Center for Japanese Language Studies (IUC) (https://web.stanford.edu/dept/IUC/cgi-bin/), located in Yokohama, is designed for students who seek the most advanced level of training in Japanese. This program accepts students with high intermediate Japanese language skills who seek Japan-related careers. Students should take note of the Inter-University Program for Chinese Language Studies (IUP) (http://ieas.berkeley.edu/iup/) at Tsinghua University (wbhaas@stanford.edu; +86 18518379420) and the Inter-University Center (IUC) for Japanese Language Studies (http://stanford.edu/dept/IUC/) in Yokohama (iucjapan@stanford.edu; 650-725-1490). Stanford is a member of these consortia. Graduate students interested in the graduate exchange program with the Department of Chinese at Peking University in Beijing should consult the chair of the department early in the academic year.

Currently, Stanford University does not offer a study abroad program for students to study Korean in South Korea. Students interested in opportunities in South Korea should contact Professor Dafna Zur (dzur@stanford.edu) to discuss different Korea language immersion programs offered by other Universities.

Graduate Programs in East Asian Languages and Cultures

Learning Outcomes

The purpose of the master's program is to further develop knowledge and skills in East Asian Languages and Cultures and to prepare students for a professional career or doctoral studies. This is achieved through the completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in East Asian Languages and Cultures. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the

knowledge of East Asian Languages and Cultures and to interpret and present the results of such research.

Admission

All students contemplating application for admission to graduate study must have a creditable undergraduate record. The applicant need not have majored in Chinese or Japanese as an undergraduate but must have had the equivalent of at least three years of training in the language in which he or she intends to specialize, and must also demonstrate a command of English adequate for the pursuit of graduate study. Applicants should not wish merely to acquire or improve language skills, but to pursue study in one of the following fields: Chinese archaeology, Chinese linguistics, Chinese literature, Chinese philosophy, Japanese cultural history, Japanese literature, Japanese linguistics, and Japanese visual culture.

All interested students are required to submit their application via Stanford's Graduate Admissions website (https://gradadmissions.stanford.edu/applying/). EALC requires students to submit official transcripts, writing samples, personal statements, letters of recommendation, and GRE test scores. International students must also submit TOEFL scores. For a full list of requirements, please check the Graduate Admissions website.

Bachelor of Arts

The department offers a Bachelor of Arts degree with the following options:

- Bachelor of Arts in East Asian Studies
- Bachelor of Arts in East Asian Studies, China Subplan (p. 1315)
- Bachelor of Arts in East Asian Studies, Japan Subplan (p.)
- Bachelor of Arts in East Asian Studies, Korea Subplan (p.)

As of September 2016, the department no longer offers the following degrees:

- Bachelor of Arts in Chinese (replaced by Bachelor of Arts in East Asian Studies, China Subplan)
- Bachelor of Arts in Japanese (replaced by Bachelor of Arts in East Asian Studies, Japan Subplan)

Students who previously enrolled in those degrees may choose to complete the major, following the requirements stated in previous Stanford Bulletins (http://exploredegrees.stanford.edu/archive/#text). Check with the department for further clarification.

Bachelor of Arts in East Asian Studies

Majors in East Asian Studies begin or continue the mastery of Chinese, Japanese, or Korean. Within the humanities or social sciences, they may focus on a particular sub-region, for example, Japan; South China, Hong Kong, and Taiwan; or western China and Central Asia; or a substantive issue involving the region as a whole, such as environmental protection, public health, rural development, historiography, cultural expression, or religious beliefs. The major seeks to reduce the complexity of a region to intellectually manageable proportions and illuminate the interrelationships among the various facets of society.

Potential majors should declare by the end of the sophomore year on Axess, and must meet with the student services officer (SSO) or Director of Undergraduate Studies (DUS) to discuss and submit a proposal to complete the East Asian Studies major. The major declaration request will not be approved on Axess until a proposal has been submitted and approved. Majors must complete at least 75 units of course work on China, Japan, and/or Korea in addition to a 3 unit EALC 198 Senior Colloquium. Courses to be credited toward major requirements must be completed with a letter grade of 'C' or better.

The following requirements are in addition to the University's basic requirements for the bachelor's degree (p. 31). Letter grades are mandatory for required courses.

Degree Requirements

I. Language

Proficiency in Chinese, Japanese, or Korean language at the second-year level or above, to be met either by coursework or examination. Students who meet the language proficiency requirement through examination are still expected to: 1) take an additional 15 units of language at a higher level, 2) enroll in literature courses taught in the language, 3) complete another first-year language classes in an another Asian language. No more than 30 units of language courses are counted toward the major.

II. Area Courses

Complete three area courses, one in each category below: Humanities, History, Social Sciences. Courses listed are examples and not exhaustive; if uncertain whether a particular course fits into one of these categories, contact the department to check.

A. Humanities	
CHINA 153	Chinese Bodies, Chinese Selves
JAPAN 124	Manga as Literature
JAPAN 284	Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting
KOREA 101N	Kangnam Style: K-pop and the Globalization of Korean Soft Power
KOREA 121	Doing the Right Thing: Ethical Dilemmas in Korean Film
RELIGST 50	Exploring Buddhism
RELIGST 55	Exploring Zen Buddhism
RELIGST 56	Exploring Chinese Religions
B. History	
HISTORY 11SC	How Is a Buddhist
HISTORY 95	Modern Korean History
HISTORY 106A	Global Human Geography: Asia and Africa
HISTORY 195	Modern Korean History
HISTORY 292F	Culture and Religions in Korean History
C. Social Sciences	
EASTASN 217	Health and Healthcare Systems in East Asia
JAPAN 151	Japanese Business Culture and Systems
POLISCI 148	Chinese Politics
SOC 116	Chinese Organizations and Management
SOC 117A	China Under Mao
SOC 167A	Asia-Pacific Transformation

III. Substantive Concentration

Complete four courses with a thematic coherence on East Asia, one of which must be a seminar above the 100-level. Examples include China, Japan, or Korea; or, in recognition of the new subregions which are emerging, South China and Taiwan, or Central Asia. Examples include:

- East Asian religions and philosophies
- Culture and society of modern Japan
- Ethnic identities in East Asia
- Arts and literature in late imperial China
- Foreign policy in East Asia
- Social transformation of modern Korea
- China's political economy

See ExploreCourses under CHINA, EASTASN, JAPAN, KOREA, and EALC or other relevant departments.

IV. Capstone Essay

Submit a final paper - Capstone Essay (~ 7,500 words) or Honors Thesis (~ 15,000 words) and present the research to EALC peers and faculty.

The topic should be built upon the student's thematic interest.

Majors are required to take the Senior Colloquium course in Winter Quarter of the Senior year, and enroll in at least one Senior Research course (CHINA/JAPAN/KOREA 198C or CHINA/JAPAN/KOREA 198H) with their research adviser in the the senior year.

EALC 198	Senior Colloquium
CHINA 198C	Senior Research
JAPAN 198C	Senior Research
KOREA 198C	Senior Research
CHINA 198H	Senior Research
JAPAN 198H	Senior Research
KOREA 198H	Senior Research

A faculty adviser for the capstone essay must be finalized no later than the second week of the Autumn Quarter of senior year.

Senior Capstone and Honors Thesis Presentations will be held in the Spring Quarter; students must present as part of their final project.

V. Overseas Studies

Majors must study abroad for at least one quarter overseas in the country of focus.

If the abroad program is not through the Bing Overseas Studies Program, students should consult with the Dept SSO or DUS prior to studying abroad.

VI. Writing in the Major

An East Asian Studies course that satisfies the University Writing in the Major requirement (WIM) should be completed before beginning the senior capstone essay or honors thesis. Depending on the country of focus students should choose from the following 3 WIM courses:

Students may enroll in multiple WIM courses, but indicate the primary course counted as 'WIM.'

CHINA 111	Literature in 20th-Century China
JAPAN 138	Introduction to Modern Japanese Literature and Culture
KOREA 120	Narratives of Modern and Contemporary Korea

VII. Unit Minimum

The courses taken for the major must add up to at least 78 units, comprised of the 3 unit Senior Colloqium and at least 75 additional units, all taken for a letter grade. Courses must be at least 3 units and taken with a letter grade to be counted towards the degree.

Majors are encouraged to distribute their coursework among at least three disciplines and two subregions in Asia. The subregions need not be traditionally defined.

Bachelor of Arts in East Asian Studies, China Subplan

The Bachelor of Arts in East Asian Studies, China Subplan, offers students the ability to study East Asia with a special focus on Chinese culture and language. The Bachelor of Arts in East Asian Studies, China Subplan, replaced the department's Bachelor of Arts in Chinese. Students currently pursuing the Bachelor of Arts in Chinese may choose to continue his or her plan of study, or opt to complete the Bachelor of Arts in East Asian Studies, China Subplan requirement instead. Note: Once students drop the Bachelor of Arts in Chinese on Axess, they cannot re-enroll/declare under the Bachelor of Arts in Chinese again. Consult the Director of Undergraduate Studies or student services officer for more clarification.

The following requirements are in addition to the University's basic requirements for the bachelor's degree (p. 31). Letter grades are mandatory for required courses. The following courses, as well as their prerequisites, must be completed with a grade point average (GPA) of 2.0 or better.

Degree Requirements

Units

I. Gateway Courses

Students must take two gateway courses appropriate to the East Asian Studies, China Subplan. These Gateway courses should have a focus on East Asian culture ("East Asian Gateway Course Cluster") and/or Chinese culture ("Gateway Course Cluster for the China Subplan").

The courses listed below are examples and not exhaustive. At least one of the two courses chosen must be taught by the department. Students pursuing the EAS-China Subplan major should consult with the DUS or SSO to make sure that courses fit under these categories.

East Asian Gateway Course Cluster

EASTASN 97	The International Relations of Asia since World War II
ECON 124	Economic Development and Challenges of East Asia
HISTORY 92A	The Historical Roots of Modern East Asia
RELIGST 55	Exploring Zen Buddhism
SOC 167A	Asia-Pacific Transformation
THINK 53	Food Talks: The Language of Food

Gateway Course Cluster for China Subplan

CHINA 110	How to Be Modern in China: A Gateway to the World Course
CHINA 168	The Chinese Family
ESF 9	Education as Self-Fashioning: Chinese Traditions of the Self
or ESF 9A	Education as Self-Fashioning: Chinese Traditions of the Self
POLISCI 148	Chinese Politics
RELIGST 56	Exploring Chinese Religions
SOC 116	Chinese Organizations and Management
SOC 117A	China Under Mao

II. Proficiency of the Modern Chinese Language, at the Third-Year Level

Students must be proficient in modern Chinese at Stanford's third-year level. Language assessment exams are offered by the Language Center to determine language proficiency.

Students may select different series (see below) for learning the modern Chinese language, and continue until completion of third-year modern Chinese. Determine the appropriate series after taking the Placement Exam and consulting with a Chinese Language Instructor.

Series A (Non-Heritage Speakers):

CHINLANG 1	First-Year Modern Chinese, First Quarter
CHINLANG 2	First-Year Modern Chinese, Second Quarter
CHINLANG 3	First-Year Modern Chinese, Third Quarter

Series B (Heritage speakers):

CHINLANG 1B	First-Year Modern Chinese for Bilingual Students, First Quarter

CHINLANG 2B	First-Year Modern Chinese for Bilingual Students, Second Quarter
CHINLANG 3B	First-Year Modern Chinese for Bilingual Students, Third Quarter

Series C (Summer Intensive Program):

CHINLANG 5	

III. Classical Chinese

Take one classical Chinese course.

Additional classical Chinese courses taken may fulfill additional culture course requirements (IV-B.)

CHINA 105	Beginning Classical Chinese, First Quarter
CHINA 106	Beginning Classical Chinese, Second Quarter
CHINA 107	Beginning Classical Chinese, Third Quarter

IV. Additional Courses **22-25**

A. Complete Three CHINA courses at the 100 level, one in each of the following areas:

- Pre-modern China
- Modern China
- Chinese linguistics

B. Four additional culture courses, as approved by the DUS or SSO. One of these should be a HISTORY course on China, offered by the Department of History.

C. Fulfill the Writing in the Major (WIM) requirement by taking CHINA 111.

CHINA 111	Literature in 20th-Century China

V. Senior Capstone Essay or Honors Thesis

Winter Quarter, Senior year: Students must enroll in the Senior Colloquium course to work on research and writing methods with DUS to work on their Senior Capstone Essay or Senior Honors Thesis.

EALC 198	Senior Colloquium

Spring Quarter, Senior year: Students enroll in a Senior Research course with their topic adviser. Students may also enroll in Senior Research with their topic adviser in the Fall and/or Winter Quarter(s) the senior year. Students must enroll in at least one Senior Research course with their topic adviser.

CHINA 198C	Senior Research
CHINA 198H	Senior Research

Spring Quarter, Senior year: Students submit and present the final research project to EALC faculty and peers.

Bachelor of Arts in East Asian Studies, Japan Subplan

The Bachelor of Arts in East Asia, Japan Subplan, offers students the ability to study East Asia with a special focus on Japanese culture and language. The Bachelor of Arts in East Asian Studies, Japan Subplan, replaced the department's Bachelor of Arts in Japanese. Students currently pursuing the Bachelor of Arts in Japanese may choose to continue his or her plan of study, or opt to complete the Bachelor of Arts in East Asian Studies, Japan Subplan requirement instead. *Note:* Once students drop the Bachelor of Arts in Japanese on Axess, he or she cannot re-enroll/declare under the Bachelor of Arts in Japanese again. Consult Prof. Yiqun Zhou, Director of Undergraduate Studies, or Ai Tran, EALC's student services officer, for more clarification.

The following requirements are in addition to the University's basic requirements for the bachelor's degree (p. 31). Letter grades are mandatory for required courses. The following courses, as well as their prerequisites, must be completed with a grade point average (GPA) of 2.0 or better:

Degree Requirements

		Units
I. Gateway Courses		**6-10**

Students must take two gateway courses appropriate to the East Asian Studies, Japan Subplan. These Gateway courses should have a focus on East Asian culture ("East Asian Gateway Course Cluster") and/or Japanese culture ("Gateway Course Cluster for the Japan Subplan").

The courses listed below are examples and not exhaustive. At least one of the two courses chosen must be taught by the department. Students pursuing the EAS-Japan Subplan major should consult with the DUS or SSO to make sure that courses fit under these categories.

East Asian Gateway Course Cluster

EASTASN 97	The International Relations of Asia since World War II
ECON 124	Economic Development and Challenges of East Asia
HISTORY 92A	The Historical Roots of Modern East Asia
RELIGST 55	Exploring Zen Buddhism
SOC 167A	Asia-Pacific Transformation
THINK 53	Food Talks: The Language of Food

Gateway Course Cluster for Japan Subplan

JAPAN 82N	Joys and Pains of Growing Up and Older in Japan
JAPAN 110	Romance, Desire, and Sexuality in Modern Japanese Literature
JAPAN 122	Translating Cool: Globalized Popular Culture in Asia
JAPAN 148	Modern Japanese Narratives: Literature and Film
JAPAN 151	Japanese Business Culture and Systems
JAPAN 160	Classical Japanese Literature in Translation
JAPAN 184	Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting
JAPAN 186	

II. Proficiency of the Modern Japanese Language, at the Third-Year Level		**45**

Students must be proficient in modern Japanese at Stanford's third-year level. Language assessment exams are offered by the Language Center to determine language proficiency.

After taking the Placement Exam and consulting with a Japanese Language Instructor, enroll in the appropriate courses until the completion of third-year Japanese coursework.

First-year, Modern Japanese:

JAPANLNG 1	First-Year Japanese Language, Culture, and Communication, First Quarter
JAPANLNG 2	First-Year Japanese Language, Culture, and Communication, Second Quarter
JAPANLNG 3	First-Year Japanese Language, Culture, and Communication, Third Quarter

Second-year, Modern Japanese:

JAPANLNG 21	Second-Year Japanese Language, Culture, and Communication, First Quarter
JAPANLNG 22	Second-Year Japanese Language, Culture, and Communication, Second Quarter
JAPANLNG 23	Second-Year Japanese Language, Culture, and Communication, Third Quarter

Third-year, Modern Japanese:

JAPANLNG 101	Third-Year Japanese Language, Culture, and Communication, First Quarter
JAPANLNG 102	Third-Year Japanese Language, Culture, and Communication, Second Quarter
JAPANLNG 103	Third-Year Japanese Language, Culture, and Communication, Third Quarter

III. Additional Courses **25**

A. Complete Three JAPAN courses at the 100-level with one in each of the following areas:

- Pre-modern Japan
- Modern Japan
- Japanese Linguistics

B. Four additional culture courses dealing with Japan primarily at the 100-level, as approved by the DUS or SSO.

C. Fulfill the Writing in the Major (WIM) requirement by taking JAPAN 138.

JAPAN 138	Introduction to Modern Japanese Literature and Culture

IV. Senior Capstone Essay or Honors Thesis

Winter Quarter, Senior year: Students must enroll in the Senior Colloquium course to work on research and writing methods with DUS to work on their Senior Capstone Essay or Senior Honors Thesis.

EALC 198	Senior Colloquium

Spring Quarter, Senior year: Students enroll in a Senior Research course with their topic adviser. Students may also enroll in Senior Research with their topic adviser in the Fall and/or Winter Quarter(s) the senior year. Students must enroll in at least one Senior Research course with their topic adviser.

JAPAN 198C	Senior Research
JAPAN 198H	Senior Research

Spring Quarter, Senior year: Students submit and present the final research project to EALC faculty and peers.

Additional notes:

- Students who complete third-year Japanese at KCJS satisfy the language requirement but are required to take a placement test if they wish to enroll in:
  - JAPANLNG 211 Fourth-Year Japanese, First Quarter
  - JAPANLNG 212 Fourth-Year Japanese, Second Quarter
  - JAPANLNG 213 Fourth-Year Japanese, Third Quarter

These requirements are in addition to the University's basic requirements for the bachelor's degree. Letter grades are mandatory for required courses.

Bachelor of Arts in East Asian Studies, Korean Subplan

The Bachelor of Arts in East Asia, Korean Subplan, offers students the ability to study East Asia with a special focus on Korean culture and language. The following requirements are in addition to the University's basic requirements for the bachelor's degree (p. 31). Letter grades are mandatory for required courses. The following courses, as well as their prerequisites, must be completed with a grade point average (GPA) of 2.0 or better.

Degree Requirements

	Units
I. Gateway Courses	**6-10**

Students must take two gateway courses appropriate to the East Asian Studies, Korea Subplan. These Gateway courses should have a focus on East Asian culture ("East Asian Gateway Course Cluster") and/or Korean culture ("Gateway Course Cluster for the Korea Subplan").

The courses listed below are examples and not exhaustive. At least one of the two courses chosen must be taught by the department. Students pursuing the EAS-Korea Subplan major should consult with the DUS or SSO to make sure that courses fit under these categories.

East Asian Gateway Course Cluster	
THINK 53	Food Talks: The Language of Food
RELIGST 55	Exploring Zen Buddhism
HISTORY 92A	The Historical Roots of Modern East Asia
ECON 124	Economic Development and Challenges of East Asia
SOC 167A	Asia-Pacific Transformation
Gateway Course Cluster for Korea Subplan	
KOREA 122	Translating Cool: Globalized Popular Culture in Asia
KOREA 101N	Kangnam Style: K-pop and the Globalization of Korean Soft Power

II. Three Years of Modern Korean **45**

Students must be proficient in modern Korean at Stanford's third-year level. Language assessment exams are offered by the Language Center to determine language proficiency.

After taking the Placement Exam and consulting with a Korean Language Instructor, enroll in the appropriate courses until the completion of third-year Korean coursework.

First-year modern Korean:	
KORLANG 1	First-Year Korean, First Quarter
KORLANG 2	First-Year Korean, Second Quarter
KORLANG 3	First-Year Korean, Third Quarter
Second-year modern Korean:	
KORLANG 21	Second-Year Korean, First Quarter
KORLANG 22	Second-Year Korean, Second Quarter
KORLANG 23	Second-Year Korean, Third Quarter
Third-year modern Korean:	
KORLANG 101	Third-Year Korean, First Quarter
KORLANG 102	Third-Year Korean, Second Quarter
KORLANG 103	Third-Year Korean, Third Quarter

III. Additional Courses

A. Complete the Writing in the Major (WIM) requirement.

KOREA 120	Narratives of Modern and Contemporary Korea

B. Take six additional culture courses at the 100-level, at least two of six courses must be offered by the department.

IV. Senior Capstone Essay or Honors Thesis **4**

Winter Quarter, Senior year: Students must enroll in the Senior Colloquium course to work on research and writing methods with DUS to work on their Senior Capstone Essay or Senior Honors Thesis.

EALC 198	Senior Colloquium

Spring Quarter, Senior year: Students enroll in a Senior Research course with their topic adviser. Students may also enroll in Senior Research with their topic adviser in the Fall and/or Winter Quarter(s) the senior year. Students must enroll in at least one Senior Research course with their topic adviser.

KOREA 198H	Senior Research
KOREA 198C	Senior Research

Spring Quarter, Senior year: Students submit and present the final research project to EALC faculty and peers.

Honors Program

Majors with an overall grade point average (GPA) of 3.5 may apply for the honors program by submitting a senior thesis proposal to the honors committee during the Winter or Spring Quarter of the junior year. The proposal must include:

- a thesis outline
- a list of all relevant courses the student has taken and plans to take; one advanced-level colloquium or seminar dealing with China is required
- a preliminary reading list including a work or works in Chinese, Japanese, or Korean
- the name of a faculty member who has agreed to act as the honors topic advisor.

Students must discuss the honors project with the DUS and receive approval before conducting honors research. Without approval, students should plan to complete the capstone essay.

If the proposal is approved, research begins in Spring Quarter of the junior year, or by Autumn Quarter at the latest, when the student enrolls in 2-5 units of credit for senior research. In Winter Quarter, students enroll for 2-5 units in Senior Research (CHINA 198H Senior Research, JAPAN 198H Senior Research, or KOREA 198H Senior Research) with the thesis supervisor while writing the thesis, and the finished essay (normally about 15,000 words) is submitted to the committee no later than April 15 of the senior year. Students enroll in the Senior Colloquium, EALC 198 Senior Colloquium, in the senior year to polish and present their theses (instead of writing a capstone essay). Eight to eleven units of credit are granted for honors course work and the finished thesis.

Overseas Studies

Courses approved for the East Asian Languages and Cultures majors which are taught overseas can be found in the "Overseas Studies (p. 217)" section of this Bulletin, or in the Overseas Studies office, Sweet Hall. To find course offerings in for courses, use BOSP's Course Search (https://undergrad.stanford.edu/programs/bosp/explore/search-courses/).

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu) web site or the Bing Overseas Studies (http://bosp.stanford.edu) web site. Students should consult with the SSO or DUS for applicability of Overseas Studies courses to a major or minor program.

The department offers: a minor in East Asian Studies; a Minor in East Asian Studies, China Subplan; Minor in East Asian Studies, Japan Subplan; Minor in East Asian Studies, Japanese Language Subplan; and a Minor in East Asian Studies, Korea Subplan. A Minor in Translation Studies is offered by the DLCL.

Minor in East Asian Studies

The goal of the minor in East Asian Studies is to provide the student with a broad background in East Asian culture as a whole, while allowing the student to focus on a geographical or temporal aspect of East Asia. The minor may be designed from the following, for a total of six courses and a minimum of 20 units. All courses for the minor must be taken for a letter grade, a minimum of 3 units, and completed with a GPA of 2.0 or better. Consult with the department to potentially count one of the BOSP courses taught by a Stanford home campus faculty member toward the minor.

	Units
I. Area Courses	**9-15**
Take three courses on East Asia, one in each of the following categories; if uncertain whether a particular course fits into one of these categories; check with the DUS or SSO to confirm whether selected coursework will fulfill category requirement:	
A. History	
B. Humanities	
C. Social Sciences	
II. Additional Courses	**9-15**
A. Complete one undergraduate seminar above the 100-level	
B. Complete two East Asian culture courses, including literature courses but excluding language courses.	

Applications for the minor should be submitted online through Axess. Students must also meet with the student services officer (SSO) or Director of Undergraduate Studies (DUS) to approve the degree program proposal. Students should declare the minor no later than the second quarter of the junior year.

Minor in East Asian Studies, China Subplan

The undergraduate minor in Chinese has been designed to give students majoring in other departments an opportunity to gain a substantial introduction to the Chinese language, as well as an introduction to the culture and civilization of East Asia. The minors consist of a minimum of 20 units from the following requirements. All courses for the minor must be taken for a letter grade, a minimum of 3 units, and completed with a GPA of 2.0 or better. Consult with the department to potentially count one of the BOSP courses taught by a Stanford home campus faculty member toward the minor.

	Units
I. Proficiency in Modern Chinese	**15-30**
Students pursuing the minor must take at least 2 years of modern Chinese, and be at least proficient at Stanford's second-year level. Language assessment exams are offered by the Language Center to determine language proficiency.	
Students who already have a competence at the second-year level may fulfill the language component of the minor by taking three courses in the department using materials in Chinese. These courses may be language courses such as the third-year Chinese language sequence, the fourth-year language sequence, or they may be advanced literature and linguistics courses, depending on the capabilities and interests of the student.	
II. Gateway Courses	**6-10**
Students must take two gateway courses appropriate to the East Asian Studies, China Subplan. These Gateway courses should have a focus on East Asian culture ("East Asian Gateway Course Cluster") and/or Chinese culture ("Gateway Course Cluster for the China Subplan").	
The courses listed below are examples and not exhaustive. At least one of the two courses chosen must be taught by the department. Students pursuing the EAS-China Subplan minor should consult with the DUS or SSO to make sure that courses fit under these categories.	
III. Additional Courses	**9-15**
Complete three 100-level culture courses selected from among the department's offerings in the literature, linguistics, and civilization of the relevant minor area.	

Minor in East Asian Studies, Japan Subplan

The undergraduate minor in Japanese has been designed to give students majoring in other departments an opportunity to gain a substantial introduction to the Japanese language, as well as an introduction to the culture and civilization of East Asia. The minors consist of a minimum of 20 units from the following requirements. All courses for the minor must be taken for a letter grade, a minimum of 3 units, and completed with a GPA of 2.0 or better. Consult with the department to potentially count one of the BOSP courses taught by a Stanford home campus faculty member toward the minor.

	Units
I. Proficiency in Modern Japanese	**15-30**
Students pursuing the minor must take at least 2 years of modern Japanese, and be at least proficient at Stanford's second-year level. Language assessment exams are offered by the Language Center to determine language proficiency.	
Students who already have a competence at the second-year level may fulfill the language component of the minor by taking three courses in the department using materials in Chinese. These courses may be language courses such as the third-year Japanese language sequence, the fourth-year language sequence, or they may be advanced literature and linguistics courses, depending on the capabilities and interests of the student.	
Obtain permission from the SSO or DUS before proceeding.	
II. Two Gateway Courses	**6-10**
Students must take two Gateway courses appropriate to the East Asian Studies, Japan Subplan. These Gateway courses should have a focus on East Asian culture ("East Asian Gateway Course Cluster") and/or Japanee culture ("Gateway Course Cluster for the Japan Subplan").	
At least one of the two courses chosen must be taught by the department. Students pursuing the EAS-Japan Subplan minor should consult with the DUS or SSO to make sure that courses fit under these categories.	
III. Three Japanese content courses	**9-10**
Complete three 100-level culture courses selected from among the department's offerings in the literature, linguistics, and civilization of the relevant minor area.	

Minor in East Asian Studies, Japanese Language Subplan

The undergraduate minor in East Asian Studies, Japanese Language subplan, has been designed to give students majoring in other departments and the opportunity to gain a substantial introduction to the Japanese language, as well as an introduction to the culture and civilization of East Asia. The minors consist of a minimum of 20 units from the following requirements. All courses for the minor must be taken for a letter grade, a minimum of 3 units, and completed with a GPA of 2.0 or better. Consult with the department to potentially count one of the BOSP courses taught by a Stanford home campus faculty member toward the minor.

I. Proficiency of Modern Japanese, at the Fourth-Year level

Proficiency of the modern Japanese language through Stanford's fourth-year level.

Students who place out of fourth-year Japanese (JAPAN 213: Fourth-Year Japanese, Third Quarter) are required to take 3 courses in addition to JAPAN 235: Academic Readings in Japanese.

JAPAN 235	Academic Readings in Japanese I

II. Additional Courses

Students must take two additional JAPAN courses with materials in Japanese. Courses should be at the 100-level or higher.

Minor in East Asian Studies, Korea Subplan

The undergraduate minor in Korean has been designed to give students majoring in other departments an opportunity to gain a substantial introduction to the Korean language, as well as an introduction to the culture and civilizations of East Asia. The minors consist of a minimum of 20 units from the following requirements. All courses for the minor must be taken for a letter grade, a minimum of 3 units, and completed with a GPA of 2.0 or better. Consult with the department to potentially count one of the BOSP courses taught by a Stanford home campus faculty member toward the minor.

	Units
I. Proficiency in modern Korean	**15-30**
Students pursuing the minor must take at least two years of modern Korean, and be at least proficient at Stanford's second-year level. Language assessment exams are offered by the Language Center to determine language proficiency.	
Students who already have a competence at the second-year level may fulfill the language component of the minor by taking three courses in the department using materials in Korean. These courses may be language courses such as the third-year Korean language sequence, the fourth-year language sequence, or they may be advanced literature and linguistics courses, depending on the capabilities and interests of the student.	
Obtain permission from the SSO or DUS before proceeding.	
II. Complete two gateway courses	**6-10**
Students must take two gateway courses appropriate to the East Asian Studies, Korea Subplan. These Gateway courses should have a focus on East Asian culture ("East Asian Gateway Course Cluster") and/or Korean culture ("Gateway Course Cluster for the Korea Subplan").	
The courses listed below are examples and not exhaustive. At least one of the two courses chosen must be taught by the department. Students pursuing the EAS-Korea Subplan minor should consult with the DUS or SSO to make sure that courses fit under these categories.	
III. Additional Courses	
Complete three 100-level culture courses selected from among the department's offerings in the literature, linguistics, and civilization of the relevant minor area. Up to one course can be approved from outside the department with the DUS or SSO approval.	

Minor in Translation Studies

Faculty Director: Alexander Key

Minor Adviser: Cintia Santana

The Division of Literatures, Cultures, and Languages, in cooperation with East Asian Languages and Cultures and the English Department, teaches undergraduates to develop and apply their foreign language knowledge to the production and analysis of translations. The minor is designed to give students majoring in a variety of fields the tools to consider the practical and theoretical issues brought up by translation as an aesthetic, cultural, and ethical practice.

Declaring the Minor

Students will declare the minor in Axess, and then contact the minor adviser, Cintia Santana (csantana@stanford.edu). The program is administered by the DLCL student services office located in Pigott Hall, room 128.

Requirements

Students must take a minimum of 6 courses for 3 units or more and a minimum of 23 units for a letter grade, in fulfillment of the following requirements:

	Units
1. Prerequisite: Complete or test out of a first-year course in the language of interest.	
2. Core course: At least 4 units in a Translation Studies core course: ENGLISH/DLCL 293 or FRENCH 185 or Comparative Literature 228/ JAPAN 123/223.	4
3. Language study: At least 8 units, second year or beyond (not including conversation/oral communication) and/or relevant literature courses taught in the target language. OSP and transfer units may be considered in consultation with the minor adviser.	8
4. Literature study: At least 7 units in relevant literature courses at the 100-level or above, taught in a DLCL department, East Asian Languages and Cultures, or Classics, and determined in consultation with the minor adviser. For students interested in translation from English into another language, appropriate literature courses in the English department may be substituted.	7
5. Electives: At least 4 units in a creative writing course, or a course that foregrounds translation in departments such as Anthropology, any DLCL department, English, East Asian Languages and Cultures, Classics, Linguistics (e.g., LINGUIST 130A), or Computer Science (e.g., CS 124), determined in consultation with the minor adviser.	4
6. Final Project: Students must also complete a capstone project: a significant translation and/or translation studies project (e.g. 20 pages of prose, 10 poems, or similar appropriate amount to be determined in consultation with the minor adviser). This work may be carried out under the supervision of an instructor in a required course or as an independent study.	
Total Units	23

Master of Arts Programs in East Asian Languages and Cultures

1. The department offers a Master of Arts in Chinese (p. 1320), a Master of Arts in Chinese—Archaeology subplan (p. 1321), and a Master of Arts in Japanese (p. 1321). These programs are described below.
2. The normal length of study for the degree is two years.
3. No financial aid is available for those applicants who wish to obtain the M.A. only.
4. Students who wish to spend the first year of graduate study at the Beijing or Yokohama centers must obtain department approval first.
5. Candidates for the degree must be in residence at Stanford in California during the final quarter of registration.
6. A thesis or an annotated translation of a text of suitable literary or historical worth is required for the M.A. degree. Under special circumstances, a paper approved by the graduate advisor may be substituted.
7. The University's basic requirements for the master's degree, including a 45-unit minimum requirement, are given in the "Graduate Degrees (p. 65)" section of this Bulletin. Department requirements are set forth below.

Master of Arts in Chinese

The M.A. program in Chinese is designed for students with strong academic records and an interest in pursuing postgraduate research in Chinese literature, philosophy, or linguistics, but who have not yet acquired the language skills or disciplinary foundation necessary to enter a Ph.D. program. (Note: Students who wish to pursue advanced language training in preparation for post-graduate research in other fields of Chinese studies are referred to the interdisciplinary M.A. program in the Center for East Asian Studies.)

The candidate must finish third-year Chinese, and one course in advanced classical Chinese with a letter grade of 'B' or higher. Placement tests in modern and in classical Chinese will be given for incoming students during orientation week, Autumn Quarter. Those who fail to place into advanced level classical must take beginning classical Chinese. Qualified students may, upon consultation with the graduate advisor, be permitted to certify that they have attained the equivalent level of proficiency by passing examinations.

1. Demonstrate proficiency in both modern and classical Chinese through completion of one of the tracks of third-year Chinese with a letter grade of 'B' or higher :

		Units
CHINLANG 103	Third-Year Modern Chinese, Third Quarter	5
CHINLANG 103B	Third-Year Modern Chinese for Bilingual Students, Third Quarter	3

2. One of three advanced classical Chinese courses:

		Units
CHINA 208	Advanced Classical Chinese: Philosophical Texts	3-5
CHINA 209	Advanced Classical Chinese: Historical Narration	2-5
CHINA 210	Advanced Classical Chinese: Literary Essays	2-5

3. Complete the following for a letter grade of 'B' or higher:

		Units
CHINA 201	Proseminar: Bibliographic and Research Methods in Chinese Studies	3-5

4. Four CHINA courses numbered above 200:

Courses listed are examples and not exhaustive; if uncertain whether a particular course fits into one of these categories, contact the department to check. The following courses are offered this year:

		Units
CHINA 201	Proseminar: Bibliographic and Research Methods in Chinese Studies	3-5
CHINA 205	Beginning Classical Chinese, First Quarter	2-5
CHINA 206	Beginning Classical Chinese, Second Quarter	2-5
CHINA 207	Beginning Classical Chinese, Third Quarter	2-5
CHINA 208	Advanced Classical Chinese: Philosophical Texts	3-5
CHINA 209	Advanced Classical Chinese: Historical Narration	2-5
CHINA 211	Literature in 20th-Century China	4-5
CHINA 215	Sex, Gender, and Power in Modern China	3-5
CHINA 251	Popular Culture and Casino Capitalism in China	3-4
CHINA 253	Chinese Bodies, Chinese Selves	3-5

CHINA 263	Chinese Biographies of Women	3-5
CHINA 274	New Directions in the Study of Poetry and Literati Culture	3-4, 4
CHINA 275	Constructing National History in East Asian Archaeology	3-5
CHINA 340	Chinese Justice: Law, Morality, and Literature	2-5
CHINA 371	Critical Theory and Ecology: A Cross-Cultural Perspective	2-5
CHINA 390	Practicum Internship	1
CHINA 391	Seminar in Chinese Syntax	4

5. Two upper-division or graduate-level courses in fields such as Chinese anthropology, art history, history, philosophy, politics, religious studies, or another relevant field, as approved by the graduate advisor in consultation with the student's individual advisor
6. A master's thesis

		Units
CHINA 299	Master's Thesis or Translation	2-5

return to top (p. 1320)

Master of Arts in Chinese, Archaeology Subplan

The M.A. in Chinese, Archaeology subplan, is designed for students with an interest in pursuing postgraduate research in Chinese archaeology who have not yet acquired the language skills or disciplinary foundation necessary to enter a Ph.D. program. The subplan is declared on Axess. Subplans are printed on the transcript and the diploma and are elected via the Declaration or Change to a Field of Study (https://studentaffairs.stanford.edu/sites/default/files/registrar/files/grad-subplan-change.pdf) form.

Degree Requirements

A candidate must:

1. Demonstrate proficiency in both modern and classical Chinese by completing:
   a. third-year Chinese through with a minimum grade of 'B+'.
   b. one of three advanced classical Chinese courses:

		Units
CHINA 275	Constructing National History in East Asian Archaeology	3-5
CHINA 276	Emergence of Chinese Civilization from Caves to Palaces	3-4
CHINA 376	Methods, Theories, and Practice in Chinese Archaeology	2-5

   c. Qualified students may, upon consultation with the graduate advisor, be permitted to certify that they have attained the equivalent level of proficiency by passing examinations or presenting documentary evidence of attendance at a bachelor's institution in which Chinese is the language of instruction. Exemptions may also be granted to students who study prehistoric archaeology. Instead, these students should take required course work relating to archaeology which is offered in the Stanford Archaeology Center. For details students should consult with the supervisor or the graduate advisor.
2. Complete 45 units, including the following four graduate level CHINGEN or ANTHRO subject code courses appropriate to the Chinese Archaeology track. All courses must be passed with a minimum grade of 'B+'.

a.		Units
ANTHRO 303	Introduction to Archaeological Theory	5
ANTHRO 307	Archaeological Methods	5
CHINA 275	Constructing National History in East Asian Archaeology	3-5
CHINA 376	Methods, Theories, and Practice in Chinese Archaeology	2-5

3. Two upper-division or graduate-level courses in fields such as Chinese anthropology, archaeology, art history, history, philosophy, political science and religious studies, as approved by the graduate advisor in consultation with the student's individual advisor.
4. Master's thesis.

return to top (p. 1320)

Master of Arts in Japanese

The M.A. program in Japanese is designed for students with strong academic records and an interest in pursuing postgraduate research in Japanese literature, cultural history, or linguistics, but who have not yet acquired the language skills or disciplinary foundation necessary to enter a Ph.D. program. *Note:* Students who wish to pursue advanced language training in preparation for postgraduate research in other fields of Japanese studies are referred to the interdisciplinary M.A. program in the Center for East Asian Studies.

The candidate must:

1. Complete third-year:

		Units
JAPANLNG 101	Third-Year Japanese Language, Culture, and Communication, First Quarter	5
JAPANLNG 102	Third-Year Japanese Language, Culture, and Communication, Second Quarter	5
JAPANLNG 103	Third-Year Japanese Language, Culture, and Communication, Third Quarter	5

2. Complete fourth-year Japanese and classical Japanese with a letter grade of 'B' or higher:

		Units
Fourth-year Japanese		9-15
JAPANLNG 211	Fourth-Year Japanese, First Quarter	
JAPANLNG 212	Fourth-Year Japanese, Second Quarter	
JAPANLNG 213	Fourth-Year Japanese, Third Quarter	
Classical Japanese		5-10
JAPAN 265	Readings in Premodern Japanese	
JAPAN 264	Introduction to Premodern Japanese	

   - *Note:* qualified students may, upon consultation with the graduate advisor, be permitted to certify that they have attained the equivalent level of proficiency by passing examinations.
3. Complete the following with a letter grade of 'B' or higher:
   a. four advisor-approved courses in Japanese literature, culture, or linguistics from among the offerings of the Department of East Asian Languages and Cultures, not including courses taken to fulfill the language requirement.

	Courses listed are examples and not exhaustive; if uncertain whether a particular course fits into one of these categories, contact the department to check.	Units
JAPAN 201	Proseminar: Introduction to Graduate Study in Japanese	2-5
JAPAN 221	Translating Japan, Translating the West	3-4

JAPAN 235	Academic Readings in Japanese I	2-4
JAPAN 238	Introduction to Modern Japanese Literature and Culture	3-5
JAPAN 252	Art Animation	2-4
JAPAN 257	Science, Power, and Knowledge: East Asia to 1900	3-5
JAPAN 265	Readings in Premodern Japanese	2-5
JAPAN 288	The Japanese Tea Ceremony: The History, Aesthetics, and Politics Behind a National Pastime	5
JAPAN 292	Analyzing Japanese Text and Talk	2-4
JAPAN 210	Romance, Desire, and Sexuality in Modern Japanese Literature	3-4
JAPAN 297	Points in Japanese Grammar	2-4

b. Complete JAPAN 201 Proseminar: Introduction to Graduate Study in Japanese (2-5 units). Linguistics students should enroll in JAPAN 279 Research in Japanese Linguistics.
c. Two upper-division or graduate-level courses in fields such as Japanese anthropology, art history, history, philosophy, politics, and religion, as approved by the graduate advisor in consultation with the student's individual advisor.
d. A master's thesis; enroll in JAPAN 299 Master's Thesis or Translation (1-5 units).

return to top (p. 1320)

Coterminal Master's in East Asian Studies

Effective Autumn Quarter 2019-20, the department no longer offers a coterminal master's program. Those interested in a coterminal program with an M.A. in East Asian Studies should see the "Center for East Asian Studies (p. 1354)" section of this bulletin.

return to top (p. 1320)

Doctor of Philosophy Programs in East Asian Languages and Cultures

The Ph.D. degree is granted in Chinese and Japanese. Candidates for the degree are expected to acquire a thorough familiarity with Chinese or Japanese literature and linguistics, an adequate command of relevant languages, and a comprehensive knowledge of East Asian history, social institutions, and thought. The University's basic requirements for the Ph.D. are given in the "Graduate Degrees (p. 65)" section of this bulletin. Department requirements for each program can be found in the tab menu. The department offers the following programs:

- Ph.D. in Chinese (p. 1322)
- Ph.D. in Chinese, Archaeology Track (p. 1323)
- Ph.D. in Japanese (p. 1324)
- Ph.D. in Japanese, Linguistics Track (p. 1325)

Admission to Candidacy

Candidacy is the most important University milestone on the way to the Ph.D. degree. Admission to candidacy rests both on the fulfillment of department requirements and on an assessment by the department faculty that the student has the potential to successfully complete the Ph.D.

Following University policy (GAP 4.6.1 (https://gap.stanford.edu/handbooks/gap-handbook/chapter-4/subchapter-6/page-4-6-1/)), students are expected to complete the candidacy requirements by Spring Quarter of the second year of graduate study.

If a student goes to the Inter-University Program for Chinese Language Studies (IUP) at Tsinghua University or the Inter-University Center (IUC) for Japanese Language Studies in Yokohama during the first two years of study, the department may consider an extension for admission to candidacy. The timing of the evaluation of a student admitted with an M.A. in East Asian Studies is decided on an individual basis.

Candidacy is a milestone different from the comprehensive exams which are regularly held in the second and third years. Mastery of the field exams is not to be equated with the potential for doing research. Admission to candidacy indicates that the department faculty consider the student qualified to pursue a program of study leading to the Ph.D.

See also the department's EALC Graduate Student Handbook (https://stanford.app.box.com/s/3ibya7piafebb9v9440pcdg0whhlp6us/) (pdf) for additional information on candidacy.

Doctor of Philosophy in Chinese

The Ph.D. program in Chinese is designed to prepare students for a doctoral degree in Chinese literature, philosophy, or linguistics. Applicants must have a minimum of three years of Chinese language study at Stanford or the equivalent to be considered for admission. Ph.D. students complete the M.A., as described in the "Master's (p. 1320)" tab of this section of this bulletin, on the way to advancing to Ph.D. candidacy. Students who have completed an M.A. in Chinese literature or linguistics elsewhere before joining the Ph.D. program may request transfer of a limited number of course credits toward this M.A. requirement, in accordance with University policy for such units transfer (see the "Graduate Residency Transfer Credit (p. 72)" section of this bulletin). The majority of required course work for Ph.D. students demands the ability to read primary and secondary materials in Chinese. All courses must be taken for a letter grade.

Admission to Candidacy

Candidacy is the most important University milestone on the way to the Ph.D. degree. Admission to candidacy rests both on the fulfillment of department requirements and on an assessment by department faculty that the student has the potential to successfully complete the Ph.D.

Following University policy (GAP 4.6.1 (https://gap.stanford.edu/handbooks/gap-handbook/chapter-4/subchapter-6/page-4-6-1/)), students are expected to complete the candidacy requirements by Spring Quarter of the second year of graduate study. See the EALC Doctoral Program Bulletin page (p. 1322) for additional candidacy details.

Requirements

1. Complete the department's requirements for the M.A. in Chinese, including course units and M.A. thesis. These courses must satisfy the following breath requirements:
   a. Three courses with the CHINA subject code numbered above 200. At least one EALC course must be in a field different from the student's primary specialization (e.g., a modern literature course for students specializing in premodern literature, and vice versa, or a course in Japanese or Korean literature).
   b. Two upper-division or graduate-level courses in other fields such as Chinese anthropology, art history, history, philosophy, politics, religious studies, or another relevant field, as approved by the graduate advisor in consultation with the student's individual advisor.
2. Complete two of three advanced classical Chinese Courses. Note: All incoming Chinese M.A. and Ph.D. students must take a placement exam in classical Chinese held during Orientation Week of fall quarter. Those who do not place into the advanced level must take Beginning Classical Chinese.

- CHINA 208 Advanced Classical Chinese: Philosophical Texts
- CHINA 209 Advanced Classical Chinese: Historical Narration
- CHINA 210 Advanced Classical Chinese: Literary Essays

Other Requirements beyond Candidacy

1. Demonstrate proficiency in at least one supporting language (beyond the near-native level required in Chinese and English), to be chosen in consultation with the primary advisor according to the candidate's specific research goals. For this supporting language (typically Japanese, Korean, or a European language), students must be proficient at second-year level at the minimum; a higher level of proficiency may be required depending on the advisor's recommendation. Reading proficiency must be certified through a written examination or an appropriate amount of course work, to be determined on a case-by-case basis.
2. Students in Chinese literature are required to take one linguistics course (CHINA 291 The Structure of Modern Chinese), and linguistics students must take at least one literature course.
3. Complete two relevant seminars at the 300 level (CHINA 200 Directed Reading in Chinese may be substituted for one of these two seminars.)
4. Take at least one EALC course in a field different from the student's primary specialization (e.g., a modern literature course for students specializing in premodern literature, and vice versa, or a course in Japanese or Korean literature).
5. Pass a set of three comprehensive written examinations, one of which tests the candidate's methodological competence in the relevant discipline. The remaining two fields are chosen, with the approval of the graduate advisor in consultation with the student's individual advisor, from the following: archaeology, anthropology, art, Chinese literature, history, Japanese literature, linguistics, philosophy, and religion. With the advisor's approval, a Ph.D. minor in a supporting field may be deemed equivalent to the completion of one of these three examinations.
6. Before advancing to terminal graduate registration (TGR) status, students should submit a dissertation prospectus. The prospectus should be a comprehensive description of the dissertation project and include sections on the project rationale, key research questions, the contribution to the field the dissertation will make, a literature review, a chapter-by-chapter description, a projected timeline, and a bibliography.
7. Demonstrate pedagogical proficiency by serving as a teaching assistant for a minimum of three quarters, and take DLCL 301 The Learning and Teaching of Second Languages.
8. Pass the University Oral Examination. General regulations governing the oral examination are found in the "Graduate Degrees (p. 68)" section of this Bulletin. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.
9. Submit a dissertation demonstrating ability to undertake original research based on primary and secondary materials in Chinese.

Doctor of Philosophy in Chinese, Archaeology Track

To declare the Archaeology track, use the Declaration or Change to a Field of Study (https://stanford.app.box.com/v/grad-subplan-change/) form.

The Archaeology track is not printed on the transcript or diploma.

Admission to Candidacy

Candidacy is the most important University milestone on the way to the Ph.D. degree. Admission to candidacy rests both on the fulfillment of Department requirements and on an assessment by the Department faculty that the student has the potential to successfully complete the Ph.D.

Following University policy (GAP 4.6.1), students are expected to complete the candidacy requirements by the spring quarter of the second year of graduate study.

See the EALC Doctoral Program Bulletin page (p. 1322) for additional candidacy details.

Requirements

1. Complete one of three advanced classical Chinese courses and the requirements for the M.A. Qualified students may, upon consultation with the graduate advisor, be permitted to certify that they have attained the equivalent level of proficiency by passing examinations or presenting documentary evidence. Exemptions may be granted to students who study prehistoric archaeology. Instead, these students should take coursework offered in the Stanford Archaeology Center. Consult with the graduate advisor.

		Units
CHINA 208	Advanced Classical Chinese: Philosophical Texts	3-5
CHINA 209	Advanced Classical Chinese: Historical Narration	2-5
CHINA 210	Advanced Classical Chinese: Literary Essays	2-5

2. Demonstrate proficiency in at least one supporting foreign language (in addition to Chinese and English), or in a laboratory skill, to be chosen in consultation with the primary advisor according to the candidate's specific research goals. Proficiency (in language(s) and/or laboratory skills must be certified through a written examination or an appropriate amount of coursework, to be determined on a case-by-case basis.
3. Six graduate-level CHINA or ANTHRO courses appropriate to the Chinese Archaeology track, as approved by the advisor:

		Units
The following courses are offered this year:		
ANTHRO 303	Introduction to Archaeological Theory	5
ANTHRO 307	Archaeological Methods	5
ANTHRO 308	Proposal Writing Seminar in Cultural and Social Anthropology	5
ANTHRO 311G	Introduction to Culture and Society Graduate Studies in Anthropology	2
ANTHRO 310G	Introduction to Graduate Studies	2
CHINA 275	Constructing National History in East Asian Archaeology	3-5
CHINA 276	Emergence of Chinese Civilization from Caves to Palaces	3-4

4. Serve as a teaching assistant for two quarters and research assistant in an archaeology laboratory for two quarters.
5. Pass qualifying examinations in Chinese archaeology. In order to advance to Terminal Graduate Registration (TGR) status, students must also complete a prospectus defense.
6. Carry out fieldwork related to dissertation research.
7. Pass University oral examination. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.
8. Submit a dissertation demonstrating ability to undertake original research based on primary materials in Chinese or data related to China.

Doctor of Philosophy in Japanese

The Ph.D. program in Japanese is designed to prepare students for a doctoral degree in Japanese literature, cultural history, or linguistics. Applicants must have a minimum of three years of Japanese language study at Stanford or the equivalent to be considered for admission.

On the way to advancing to Ph.D. candidacy, Ph.D. students must complete an M.A. thesis, or with the permission of their primary advisor, an extended seminar paper 25-30 pages in length (not including bibliography).

The majority of required course work for Ph.D. students demands the ability to read primary and secondary materials in Japanese. Advanced standing may be considered for students entering the Ph.D. program who have already completed an M.A. in Japanese literature or linguistics elsewhere only in cases when the level of prior course work and research is deemed equivalent to departmental requirements for the Ph.D.

All courses must be taken for a letter grade. Prior to advancing to Terminal Graduate Registration (TGR) status, graduate students must complete all requirements except passing the University Oral Exam (i.e., dissertation defense), and submitting the final dissertation.

Admission to Candidacy

Candidacy is the most important University milestone on the way to the Ph.D. degree. Admission to candidacy rests both on the fulfillment of Department requirements and on an assessment by the Department faculty that the student has the potential to successfully complete the Ph.D.

Following University policy (GAP 4.6.1), students are expected to complete the candidacy requirements by the spring quarter of the second year of graduate study. Faculty in the Department will perform a holistic review of the student's academic performance, including classwork, teaching assistantships, and the M.A. Thesis.

See the EALC Doctoral Program Bulletin page (p. 1322) for additional candidacy details.

Requirements for the Ph.D. in Japanese Literature

1. Demonstrate proficiency in both modern and classical Japanese language by completing the following courses, or by demonstrating an equivalent level of linguistic attainment by passing the appropriate certifying examinations:

		Units
Fourth-Year Japanese:		
JAPANLNG 213	Fourth-Year Japanese, Third Quarter	2-4
Premodern Japanese:		
JAPAN 264	Introduction to Premodern Japanese	3-5
JAPAN 265	Readings in Premodern Japanese	2-5

2. Demonstrate proficiency in at least one supporting language, to be chosen in consultation with the primary advisor according to the candidate's specific research goals. For the second language, students must be proficient at the second-year level, at the minimum; a higher level of proficiency may be required depending on the advisor's recommendation. Reading proficiency must be certified through a written examination or an appropriate amount of course work, to be determined on a case-by-case basis. When deemed necessary by the student's advisor(s), working knowledge of a third language may also be required. Reading proficiency must be certified through a written examination or an appropriate amount of course work, to be determined on a case-by-case basis. When deemed necessary by the student's advisor(s), working knowledge of a third language may also be required. Students concentrating in classical Japanese literature are normally expected to fulfill this requirement by completing *kanbun,* JAPAN 265 Readings in Premodern Japanese.
3. Complete eight advisor-approved courses numbered above 200 from among the offerings of the Department of East Asian Languages and Cultures. At least four of these eight courses must be advanced seminars numbered above 300. At least one of these eight courses must deal with Japanese linguistics. For students focusing on modern literature, at least two of these eight courses must deal with premodern material, and for students focusing on premodern literature, at least two of the eight courses must deal with modern material.

		Units
JAPAN 201	Proseminar: Introduction to Graduate Study in Japanese	2-5
JAPAN 210	Romance, Desire, and Sexuality in Modern Japanese Literature	3-4
JAPAN 221	Translating Japan, Translating the West	3-4
JAPAN 235	Academic Readings in Japanese I	2-4
JAPAN 238	Introduction to Modern Japanese Literature and Culture	3-4
JAPAN 252	Art Animation	2-4
JAPAN 257	Science, Power, and Knowledge: East Asia to 1900	3-5
JAPAN 258	A Critical and Historical Survey of Classical Japanese Literature	2-5
JAPAN 264	Introduction to Premodern Japanese	3-5
JAPAN 265	Readings in Premodern Japanese	2-5
JAPAN 279	Research in Japanese Linguistics	2-5
JAPAN 288	The Japanese Tea Ceremony: The History, Aesthetics, and Politics Behind a National Pastime	5
JAPAN 292	Analyzing Japanese Text and Talk	2-4
JAPAN 297	Points in Japanese Grammar	2-4
JAPAN 350	Japanese Historical Fiction	3-5
JAPAN 396	Seminar in Modern Japanese Literature	2-5

4. Complete two upper-division or graduate-level courses in two supporting fields, for a total of four courses outside of Japanese literature or linguistics. Supporting fields, to be determined in consultation with the student's primary advisor, may include Japanese anthropology, art, art history, history, philosophy, politics, and religion, Chinese literature, comparative literature, etc.
5. Complete JAPAN 201 Proseminar: Introduction to Graduate Study in Japanese; this course should be taken in the first or second year.
6. Pass a comprehensive qualifying examination that tests the candidate's breadth and depth in the primary field of research and methodological competence in the relevant discipline.
7. Submit and pass a prospectus defense before advancing to Terminal Graduate Registration (TGR) status. Students should work with their primary advisor to identify a topic, and if necessary, additional exam committee members.
8. Demonstrate pedagogical proficiency by serving as a teaching assistant for a minimum of one quarter and taking DLCL 301 The Learning and Teaching of Second Languages (3 units).
9. Pass the University Oral Examination. General regulations governing the oral examination are found in the "Graduate Degrees (http://www.stanford.edu/dept/registrar/bulletin/4901.htm)" section of this Bulletin. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.
10. Submit a dissertation demonstrating ability to undertake original research based on primary and secondary materials in Japanese.

Doctor of Philosophy in Japanese, Linguistics Track

The Ph.D. program in Japanese is designed to prepare students for a doctoral degree in Japanese linguistics. Applicants must have a minimum of three years of Japanese language study at Stanford or the equivalent to be considered for admission. Ph.D. students complete M.A. requirements on the way to advancing to Ph.D. candidacy. The majority of required course work for Ph.D. students demands the ability to read primary and secondary materials in Japanese. Advanced standing may be considered for students entering the Ph.D. program who have already completed an M.A. in Japanese literature or linguistics elsewhere only in cases when the level of prior course work and research is deemed equivalent to departmental requirements for the Ph.D. All courses must be taken for a letter grade. Prior to advancing to terminal graduate registration (TGR) status, graduate students must complete all requirements except passing the University Oral Exam (i.e., dissertation defense) and submitting the final dissertation.

To declare the Linguistics track, use the Declaration or Change to a Field of Study (https://stanford.app.box.com/v/grad-subplan-change/) form.

Before advancing to Terminal Graduate Registration (TGR) status, students must complete all degree requirements below except pass the University oral examination and submit the final dissertation.

Admission to Candidacy

Candidacy is the most important University milestone on the way to the Ph.D. degree. Admission to candidacy rests both on the fulfillment of Department requirements and on an assessment by the Department faculty that the student has the potential to successfully complete the Ph.D.

Following University policy (GAP 4.6.1), students are expected to complete the candidacy requirements by Spring quarter of the second year of graduate study.

See the EALC Doctoral Program Bulletin page (p. 1322) for additional candidacy details.

Doctor of Philosophy in Japanese Linguistics Candidacy Requirements

1. Modern Japanese language proficiency equivalent to the completion of JAPANLNG 213 Fourth-Year Japanese, Third Quarter.
2. Premodern Japanese language proficiency equivalent to the completion of JAPAN 264 Introduction to Premodern Japanese or JAPAN 265 Readings in Premodern Japanese.
3. Start taking courses for one supporting language.
4. Complete JAPAN 279 Research in Japanese Linguistics.
5. Satisfactory ('B+' and above) work in three graduate courses pertaining to linguistics.
6. Submit a plan for the first qualifying paper or the paper itself. Students admitted to the program with an M.A. in the relevant field and an M.A. thesis may convert it to the first qualifying paper and seek approval.
7. Completion of DLCL 301 The Learning and Teaching of Second Languages.
8. Completion of three quarters of teaching assistant requirements.

Requirements for the Ph.D. in Japanese Linguistics

1. Demonstrate proficiency in both modern and classical Japanese language by completing the following courses, or by demonstrating an equivalent level of linguistic attainment by passing the appropriate certifying examinations:

		Units
A. Complete Fourth-Year Japanese sequence		
JAPANLNG 211	Fourth-Year Japanese, First Quarter	3-5
JAPANLNG 212	Fourth-Year Japanese, Second Quarter	3-5
JAPANLNG 213	Fourth-Year Japanese, Third Quarter	2-4
B. Complete one of the pre-modern Japanese sequence:		
JAPAN 264	Introduction to Premodern Japanese	3-5
or		
JAPAN 265	Readings in Premodern Japanese	2-5

2. Demonstrate proficiency in at least one supporting language, to be chosen in consultation with the primary advisor according to the candidate's specific research goals. For the second language, students must be proficient at the second-year level, at the minimum; a higher level of proficiency may be required depending on the recommendation of the student's advisor(s). Reading proficiency must be certified through a written examination or an appropriate amount of course work, to be determined on a case-by-case basis. When deemed necessary by the student's advisor(s), working knowledge of a third language may also be required.
3. Complete six advisor-approved courses numbered above 200 from among the offerings of the Department of East Asian Languages and Cultures. At least one of these six courses must be an advanced seminar numbered above 300. At least one of these six courses must deal with Japanese literature.
4. Complete five upper-division or graduate-level courses in linguistics and other supporting fields. To be determined in consultation with the student's primary advisor, these may include applied linguistics, Chinese linguistics, psychology, education, anthropology, sociology.
5. Complete JAPAN 279 Research in Japanese Linguistics; this course should be taken in the first or second year at Stanford.
6. Submit two qualifying papers presenting original research in two different subfields of linguistics discussing Japanese data. The length of the paper depends on the topic but generally about 25-30 pages, and the quality is expected to be equivalent to a paper presented at a professional conference and/or publishable in the proceedings. The first qualifying papers should be submitted by Winter Quarter of the third year and the second qualifying papers should be submitted by the Winter Quarter of the fourth year. Students are encouraged to start planning and consulting advising faculty members early in the second year.
7. Submit a dissertation proposal (10-15 pages) accompanied by an annotated bibliography pertaining to the topic of the dissertation and have it approved by the dissertation reading committee after an oral presentation. The annotated bibliography is cumulative and should include, but would not be limited to, the references given in the dissertation proposal. The annotation can be a paragraph (or more, if needed) for each reference. This process should be completed by the spring quarter of the fourth year before TGR.
8. Demonstrate pedagogical proficiency by serving as a teaching assistant for a minimum of one quarter and taking DLCL 301 The Learning and Teaching of Second Languages
9. Pass the University oral examination. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.
10. Submit a dissertation demonstrating ability to undertake original research based on primary and secondary materials in Japanese.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies

relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a "credit" or "no credit" grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a "credit" or "satisfactory" grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

The Department of East Asian Languages and Cultures' major and minor programs will count all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of undergraduate degree requirements that otherwise require a letter grade.

Graduate Degree Requirements

Grading

Doctoral students in the department must take required courses for a letter grade and are expected to earn a grade of 'B' or better in each required course. In other courses, doctoral students are expected to earn a grade of 'B' or better in each course taken for a letter grade in AY 2020-21 that will count towards their degree requirement. Any grade of 'B-' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty: while the grade will stand, the student may be required to revise and resubmit the work associated with that course. For courses taken for CR/NC, instructors will be asked to submit written assessment to the student and the department of what would be the equivalent letter grade to allow for review of satisfactory academic achievement by the DGS and department.

Graduate Advising Expectations

The Department of East Asian Languages and Cultures is committed to providing academic advising in support of graduate student scholarly and professional development. When most effective, this advising relationship entails collaborative and sustained engagement by both the advisor and the advisee. As a best practice, advising expectations should be periodically discussed and reviewed to ensure mutual understanding. Both the advisor and the advisee are expected to maintain professionalism and integrity.

Faculty advisors and department staff guide students in key areas such as selecting courses, designing and conducting research, developing of teaching pedagogy, navigating policies and degree requirements, and exploring academic opportunities and professional pathways.

Graduate students are active contributors to the advising relationship, proactively seeking academic and professional guidance and taking responsibility for informing themselves of policies and degree requirements for their graduate program.

For a statement of University policy on graduate advising, see the "Graduate Advising (p. 80)" section of this bulletin.

Graduate Student Advising

Effective academic advising is a critical component of a successful graduate degree program. At Stanford, all matriculated graduate students are to be advised by a member of the faculty. The nature of academic advising may differ for different programs, students, and at different stages in a degree program. During your time as a graduate student, you will have access to the department staff (in particular the Student Services Officer), Director of Graduate Studies (EALC generally has two DGS, one for Chinese and Japanese studies), and Department Chair, whom you can refer to for degree progress and policy clarification.

In order to meet the department's advising expectations, each student and their advisor meet must meet at least once per quarter for a holistic, structured discussion of the student's recent progress, short-term plans, and longer-term academic and professional goals and to discuss the steps that the student should take to meet these objectives.

Students are expected to meet regularly with their advisors and to keep them informed about their academic progress. Each student and their advisor should mutually agree on the frequency of these meetings when the advising relation begins and reassess their frequency at the start of every quarter.

Doctoral Students

No later than by the end of the second academic year, the student is assigned a faculty advisor. Until you have completed the University Oral Exam (Dissertation Defense) and graduated, you must meet with your advisor at the beginning of each quarter to discuss the courses you plan to take, as well as other academic matters. Your advisor's suggestions regarding professional issues are especially valuable, as it offers insight into the academic environment beyond your particular intellectual interest. During the quarters before your University Oral Examination (Dissertation Defense), you should decide on a faculty member with whom you want to work most closely and approach that person about becoming your advisor; he or she will serve as your primary advisor until the exam. Once you have passed the University Oral Exam (Dissertation Defense), your primary advisor will be the person you have chosen to direct your dissertation.

Master's Students

No later than by the end of your first academic year, you will be assigned a faculty advisor. Until you have completed your Master's Thesis and graduated, you must meet with your advisor at the beginning of each quarter to discuss the courses you plan to take, as well as other academic matters. Your advisor's suggestions regarding professional issues are especially valuable, as it offers insight into the academic environment beyond your particular intellectual interest.

Emeriti: (Professors) Albert E. Dien, Makoto Ueda, Steven D. Carter; (Associate Professor) Susan Matisoff; (Senior Lecturer) Yin Chuang

Chair: Haiyan Lee

Directors of Graduate Studies: Indra Levy (Japanese), Ban Wang (Chinese)

Directors of Undergraduate Studies: Dafna Zur

Professors: Ronald Egan, Haiyan Lee, Li Liu, Yoshiko Matsumoto, Chao Fen Sun, Melinda Takeuchi (East Asian Languages and Cultures, Art and Art History), Ban Wang (East Asian Languages and Cultures, Comparative Literature)

Associate Professors: Indra Levy (East Asian Languages and Cultures, Comparative Literature), James Reichert, Ariel Stilerman, Yiqun Zhou, Dafna Zur

Consulting Professor: Richard Dasher

Lecturers: Thomas Bartlett, Seungyeon Gabrielle Jung

Chinese-Japanese Area Studies Faculty:

Professors: Gordon Chang (History), Mark E. Lewis (History), Paul Harrison (Religious Studies), John Kieschnick (Religious Studies), Thomas Mullaney (History), Jean Oi (Political Science), David Palumbo-Liu (Comparative Literature), Gi-Wook Shin (Sociology), Matthew Sommer (History), Richard Vinograd (Art and Art History), Andrew Walder

(Sociology), Kären Wigen (History), Lee H. Yearley (Religious Studies), Xueguang Zhou (Sociology)

Associate Professors: Miyako Inoue (Anthropology), Matthew Kohrman (Anthropology), Yumi Moon (History), Jun Uchida (History), Jean Ma (Art and Art History)

Assistant Professors: Phillip Lipscy (Political Science), Marci Kwon (Art and Art History), Michaela Mross (Religious Studies)

Chinese Courses

CHINA 20. Humanities Core: Dao, Virtue, and Nature -- Foundations of East Asian Thought. 3 Units.
This course explores the values and questions posed in the formative period of East Asian civilizations. Notions of a Dao ("Way") are common to Confucianism, Daoism, and Buddhism, but those systems of thought have radically different ideas about what that Dao is and how it might be realized in society and an individual's life. These systems of thought appeared first in China, and eventually spread to Korea and Japan. Each culture developed its own ways of reconciling the competing systems, but in each case the comprehensive structure of values and human ideals differs significantly from those that appeared elsewhere in the ancient world. The course examines East Asian ideas about self-cultivation, harmonious society, rulership, and the relation between human and nature with a view toward expanding our understanding of these issues in human history, and highlighting their legacies in Asian civilizations today. The course features selective readings in classics of Confucian, Daoist, and Buddhist texts that present the foundational tenets of Asian thought. N. B. This is the first of three courses in the Humanities Core, East Asian track. These courses show how history and ideas shape our world and future. Take all three to experience a year-long intellectual community dedicated to the life of the mind.
Same as: HUMCORE 20, JAPAN 20, KOREA 20

CHINA 21. Humanities Core: Love and Betrayal in Asia. 3 Units.
Why are lovers in storybooks East and West always star-crossed? Why do love and death seem to go together? For every Romeo and Juliet, there are dozens of doomed lovers in the Asian literary repertoires, from Genji's string of embittered mistresses, to the Butterfly lovers in early modern China, to the voices of desire in Koryo love songs, to the devoted adolescent cousins in Dream of the Red Chamber, to the media stars of Korean romantic drama, now wildly popular throughout Asia. In this course, we explore how the love story has evolved over centuries of East Asian history, asking along the way what we can learn about Chinese, Japanese, and Korean views of family and community, gender and sexuality, truth and deception, trust and betrayal, ritual and emotion, and freedom and solidarity from canonical and non-canonical works in East Asian literatures. N.B. This is the second of three courses in the East Asian track. These courses offer an unparalleled opportunity to study East Asian history and culture, past and present. Take all three to experience a year-long intellectual community dedicated to exploring how ideas have shaped our world and future.
Same as: HUMCORE 21, JAPAN 21, KOREA 21

CHINA 21Q. Humanities Core: Love and Betrayal in Asia. 3 Units.
Why are lovers in storybooks East and West always star-crossed? Why do love and death seem to go together? For every Romeo and Juliet, there are dozens of doomed lovers in the Asian literary repertoires, from Genji's string of embittered mistresses, to the Butterfly lovers in early modern China, to the voices of desire in Koryo love songs, to the devoted adolescent cousins in Dream of the Red Chamber, to the media stars of Korean romantic drama, now wildly popular throughout Asia. In this course, we explore how the love story has evolved over centuries of East Asian history, asking along the way what we can learn about Chinese, Japanese, and Korean views of family and community, gender and sexuality, truth and deception, trust and betrayal, ritual and emotion, and freedom and solidarity from canonical and non-canonical works in East Asian literatures. N.B. This is the second of three courses in the East Asian track. These courses offer an unparalleled opportunity to study East Asian history and culture, past and present. Take all three to experience a year-long intellectual community dedicated to exploring how ideas have shaped our world and future.
Same as: HUMCORE 21Q, JAPAN 21Q, KOREA 21Q

CHINA 24. Humanities Core: How to be Modern in East Asia. 3-5 Units.
Modern East Asia was almost continuously convulsed by war and revolution in the 19th and 20th centuries. But the everyday experience of modernity was structured more profoundly by the widening gulf between the country and the city, economically, politically, and culturally. This course examines literary and cinematic works from China and Japan that respond to and reflect on the city/country divide, framing it against issues of class, gender, national identity, and ethnicity. It also explores changing ideas about home/hometown, native soil, the folk, roots, migration, enlightenment, civilization, progress, modernization, nationalism, cosmopolitanism, and sustainability. All materials are in English. This course is part of the Humanities Core: https://humanitiescore.stanford.edu/.
Same as: COMPLIT 44, HUMCORE 133, JAPAN 24, KOREA 24

CHINA 70N. Animal Planet and the Romance of the Species. 3-4 Units.
Preference to freshmen.This course considers a variety of animal characters in Chinese and Western literatures as potent symbols of cultural values and dynamic sites of ethical reasoning. What does pervasive animal imagery tell us about how we relate to the world and our neighbors? How do animals define the frontiers of humanity and mediate notions of civilization and culture? How do culture, institutions, and political economy shape concepts of human rights and animal welfare? And, above all, what does it mean to be human in the pluralistic and planetary 21st century? Note: To be eligible for WAYS credit, you must take course for a Letter Grade.
Same as: COMPLIT 70N

CHINA 91. Introduction to China. 5 Units.
Required for Chinese and Japanese majors. Introduction to Chinese culture in a historical context. Topics include political and socioeconomic institutions, religion, ethics, education, and art and literature.

CHINA 105. Beginning Classical Chinese, First Quarter. 2-5 Units.
The goal is develop students' reading knowledge of classical Chinese, including basic grammar and commonly used vocabulary. Students will also learn concepts and ideas fundamental in Chinese culture involving family, human relationships, governance, learning, life/death, philosophy, etc. through reading canonical classical Chinese texts. Prerequisite: CHINLANG 23 or equivalent.
Same as: CHINA 205

CHINA 106. Beginning Classical Chinese, Second Quarter. 2-5 Units.
Continue to develop students' reading knowledge of classical Chinese, including basic grammar and commonly used vocabulary. Students will learn more concepts and ideas fundamental in Chinese culture involving family, human relationships, governance, learning, life/death, philosophy, etc. through reading canonical classical Chinese texts. Prerequisite: CHINA 105/205 or equivalent.
Same as: CHINA 206

CHINA 107. Beginning Classical Chinese, Third Quarter. 2-5 Units.
Goal is reading knowledge of classical Chinese. Basic grammar and commonly used vocabulary. Students with no background in classical Chinese who are taking 127/207 to satisfy Chinese major requirements must begin with 125/205. Prerequisite: CHINLANG 126/206 or equivalent.
Same as: CHINA 207

CHINA 110. How to Be Modern in China: A Gateway to the World Course. 3-4 Units.
A gateway course on China, with a focus on the politics of everyday life, in the capital city of Beijing. Introduction to the history and politics of modern China. The pleasures, frictions, and challenges of daily living in the penumbra of power in Beijing as reported, represented, and reflected upon in fiction, film, reportage, social commentary, and scholarly writings. Priority to those preparing to participate in BOSP-Beijing Program or returning from the program.

CHINA 111. Literature in 20th-Century China. 4-5 Units.
(Graduate students register for 211.) How modern Chinese culture evolved from tradition to modernity; the century-long drive to build a modern nation state and to carry out social movements and political reforms. How the individual developed modern notions of love, affection, beauty, and moral relations with community and family. Sources include fiction and film clips. WIM course.
Same as: CHINA 211

CHINA 112. Tiananmen Square: History, Literature, Iconography. 3-5 Units.
Multidisciplinary. Literary and artistic representations of this site of political and ideological struggles throughout the 20th century. Tiananmen-themed creative, documentary, and scholarly works that shed light on the dynamics and processes of modern Chinese culture and politics. No knowledge of Chinese required. Repeat for credit.
Same as: CHINA 212

CHINA 112A. Asian Screen Cultures. 3-5 Units.
Asian screen culture, ranging from cinema to online games, has (re)shaped the global and national/regional imaginings of Asia. The Post-Cold War intensification of intra-Asian interactions has precipitated the rise of a Pan-Asian regional identity wherein the nation-state is not yet obsolete. What role does screen culture plays in the border-crossing interplay among languages, ideologies, aesthetics, and affect? How does the converging media of screen culture capture local/global desires and propel the history of transformation of sign systems from the written words to visual moving images in a digital time? How do we understand the aesthetic, storytelling, and politics of Asian screen cultures vis-à-vis its historical and social context? While exploring these transnational and transdisciplinary questions, this course will deal with topical issues of Pan-Asian identity, (trans)nationalism, (un)translatability, commodity fetishism, locality and globality, technophobia, and politics of gender. Students will learn how to think and write about screen cultures of East Asia in particular and of our world of screens in general.
Same as: CHINA 212A, JAPAN 112A, JAPAN 212A, KOREA 112, KOREA 212

CHINA 113. Love, Passion, and Politics in Chinese Film. 4-5 Units.
Focusing on the emotional structure of love and passion in Chinese films, the course will investigate the structures of feelings and moral relations in modern Chinese history from the 1940s till the present. Examining the interplay between private desire, romantic sentiment, family relations, and political passion, we will explore how men and women in China grapple with emotional and social issues in modern transformations. We will consider romantic love, the uplifting of sexuality into political passion, the intertwining of aesthetic experience with politics, nostalgia in the disenchanted modern world, and the tensions between the individual's self-realization and the community's agenda. Students will learn to "read" films as a work of art and understand how film works as expression of desire, impulse, emotional connections, and communal bonding during times of crisis. Course work includes a midterm exam (25%) and a final exam (25%), a weekly 250-300 word reflection on the film of the week (10%), participation and oral presentation in class (10%), and a paper of 5-7 pages to be submitted after the midterm week (30%).nStarting from the second week, film screening will begin 6: 30 pm Monday before classes on Tuesday and Thursday. The course does not encourage private viewing. At least 5 dinners will be provided for movie-screening events.
Same as: CHINA 213

CHINA 115. Sex, Gender, and Power in Modern China. 3-5 Units.
Investigates how sex, gender, and power are entwined in the Chinese experience of modernity. Topics include anti-footbinding campaigns, free love/free sex, women's mobilization in revolution and war, the new Marriage Law of 1950, Mao's iron girls, postsocialist celebrations of sensuality, and emergent queer politics. Readings range from feminist theory to China-focused historiography, ethnography, memoir, biography, fiction, essay, and film. All course materials are in English.
Same as: CHINA 215, FEMGEN 150, FEMGEN 250

CHINA 116. Chinese Cultural Revolution: Performance, Politics, and Aesthetics. 4 Units.
Events, arts, films, and operas of the Chinese Cultural Revolution. Analysis of political passion, aesthetics, and psychology of mass movements. Places the Cultural Revolution in the long-range context of art, social movements, and politics. Chinese language is not required.
Same as: CHINA 216

CHINA 118. Humanities Core: Everybody Eats: The Language, Culture, and Ethics of Food in East Asia. 3 Units.
Many of us have grown up eating "Asian" at home, with friends, on special occasions, or even without full awareness that Asian is what we were eating. This course situates the three major culinary traditions of East Asia--China, Japan, and Korea--in the histories and civilizations of the region, using food as an introduction to their rich repertoires of literature, art, language, philosophy, religion, and culture. It also situates these seemingly timeless gastronomies within local and global flows, social change, and ethical frameworks. Specifically, we will explore the traditional elements of Korean court food, and the transformation of this cuisine as a consequence of the Korean War and South Korea¿s subsequent globalizing economy; the intersection of traditional Japanese food with past and contemporary identities; and the evolution of Chinese cuisine that accompanies shifting attitudes about the environment, health, and well-being. Questions we will ask ourselves during the quarter include, what is "Asian" about Asian cuisine? How has the language of food changed? Is eating, and talking about eating, a gendered experience? How have changing views of the self and community shifted the conversation around the ethics and ecology of meat consumption?.
Same as: HUMCORE 22, JAPAN 118, KOREA 118

CHINA 118A. Food Culture in China: Past and Present. 2-5 Units.
This course situates the culinary traditions of China in the history and civilization of the region, using food as an introduction to its rich repertoires of literature, art, archaeology, language, philosophy, religion, and culture. It also situates these seemingly timeless gastronomies within local and global flows, social change, and ethical frameworks that question the moral imperatives driving these traditions.nStudents majoring or minoring in EALC must take course for 3 or more units.
Same as: CHINA 218A

CHINA 144. Science, Magic, and Religion in Early China. 3-5 Units.
If the categories we use to think about the world are products of particular cultural and historical experiences, what happens when we bring the categories of the modern West to bear on early China? In this seminar, we will examine early Chinese technologies designed to achieve ethical, physical, or political transformation, and technologies designed to interpret signs, in terms of three classical anthropological categories: science, magic, and religion. How may we apply science, magic, and religion to early China, and what problems might we encounter in doing so? What alternative terms do our sources present, and what questions might they allow us to ask? How was knowledge created in early China, and how do our categories shape the knowledge we create about early China?.
Same as: CHINA 244

CHINA 151. Popular Culture and Casino Capitalism in China. 3-4 Units.
Examination of different forms of Chinese popular culture used to gauge or control fate and uncertainty, from geomancy and qigong to ghost culture and mahjong. Ways in which Chinese are incorporating these cultural forms into the informal economy to get rich quick: rotating credit associations, stock market speculation, pyramid schemes, underground lotteries, counterfeiting. Impact of casino capitalism on Chinese culture and social life today.
Same as: CHINA 251

CHINA 151A. Chinese Music Performance. 1-2 Unit.
This class offers a unique opportunity to learn and perform Chinese music in the dynamic setting of Stanford's Chinese Music Ensemble. We will perform traditional Chinese music on a variety of Chinese instruments and study the fascinating history of Chinese music performance practice. Students will also work individually with music coaches. The course will promote an awareness of Chinese musical culture and is open to students of all levels of experience. Anyone with an interest in learning and performing Chinese music on Chinese instruments is welcome to join. Zero unit enrollment option available with instructor permission. May be repeated for credit for 15 total units. By enrolling in this course you are giving consent for the video and audio recording and distribution of your image and performance for use by any entity at Stanford University.May be repeat for credit.

CHINA 151B. The Nature of Knowledge: Science and Literature in East Asia. 4-5 Units.
"The Nature of Knowledge" explores the intersections of science and humanities East Asia. It covers a broad geographic area (China, Japan, and Korea) along a long temporal space (14th century - present) to investigate how historical notions about the natural world, the human body, and social order defied, informed, and constructed our current categories of science and humanities. The course will make use of medical, geographic, and cosmological treatises from premodern East Asia, portrayals and uses of science in modern literature, film, and media, as well as theoretical and historical essays on the relationships between literature, science, and society.nnAs part of its exploration of science and the humanities in conjunction, the course addresses how understandings of nature are mediated through techniques of narrative, rhetoric, visualization, and demonstration. In the meantime, it also examines how the emergence of modern disciplinary "science" influenced the development of literary language, tropes, and techniques of subject development. This class will expose the ways that science has been mobilized for various ideological projects and to serve different interests, and will produce insights into contemporary debates about the sciences and humanities.
Same as: CHINA 251B, JAPAN 151B, JAPAN 251B, KOREA 151, KOREA 251

CHINA 152. Gods, Ghosts, and Ancestors: Anthropology of Chinese Folk Religion. 3-5 Units.

.
Same as: CHINA 252

CHINA 153. Chinese Bodies, Chinese Selves. 3-5 Units.
Interdisciplinary. The body as a contested site of representational practices, identity politics, cultural values, and social norms. Body images, inscriptions, and practices in relation to health, morality, gender, sexuality, nationalism, consumerism, and global capitalism in China and Taiwan. Sources include anthropological, literary, and historical studies, and fiction and film. No knowledge of Chinese required.
Same as: CHINA 253

CHINA 154. What is Chinese Theater? The Formation of a Tradition. 3-4 Units.
A survey of Chinese drama from its origins to late imperial China. Explores theories of the origins of Chinese drama, contrasting theories with the documented beginnings of theater and its first texts. How traditions turned into "elite theater" in the Ming and Qing dynasties, and how esthetic norms and moral values went into the process of theatrical transformation.
Same as: CHINA 254

CHINA 155. The Culture of Entertainment in China. 3-4 Units.
Sophisticated, organized entertainment in China is evident at least as early as the second century B.C. in the court spectacles described in the early histories and in the depictions of jugglers, dancers and acrobats represented in tomb bas-reliefs. The importance attached to entertainment from ancient times both at court and in society at large is manifest not just in the establishment of imperial institutions such as the Music Bureau, but also in the appearance of large entertainment districts within the cities where people would invest extraordinary amount of resources in the pursuit of pleasure, and in small scale gatherings. The representation of play and pleasure in Chinese culture from a variety of sources (art, history, literature and performance) in different periods of Chinese history. The place of pleasure in Chinese culture, as well as ethical, socio-political and economical concerns. Held in old Knight Bldg., 521 Memorial Way, Rm. 102.
Same as: CHINA 255

CHINA 155A. Health, Politics, and Culture of Modern China. 4-5 Units.
One of the most generative regions for medical anthropology inquiry in recent years has been Asia. This seminar is designed to introduce upper division undergraduates and graduate students to the methodological hurdles, representational challenges, and intellectual rewards of investigating the intersections of health, politics, and culture in contemporary China.
Same as: ANTHRO 148, ANTHRO 248, CHINA 255A

CHINA 155B. Narrative and Storytelling in Premodern China. 4-5 Units.
In premodern China, individuals and groups told stories variously to philosophize and persuade, to commemorate and critique, to educate and entertain, to scandalize and to stimulate. In this class, we will trace the evolution of Chinese narrative storytelling through close readings of some of the most compelling stories in the Chinese tradition, including early philosophical anecdotes and historical accounts, medieval tales and religious performance pieces, and early modern short stories. In the process, we will come to appreciate how Chinese narrative storytelling evolved over time, dwelling on issues such as genre, authorship, textuality, and readership to understand how writers and readers used storytelling to navigate and negotiate the world around them, including issues related to gender and sexuality, social status, and political power.
Same as: CHINA 255B

CHINA 157. Science, Power, and Knowledge: East Asia to 1900. 3-5 Units.
In the early modern period, East Asian societies featured long-established institutions of learning and traditions of knowledge. This course examines the relationship between knowledge and power in East Asia societies prior to 1900. It explores how knowledge production operated in late imperial China (1550-1900), Chos'n Korea (1392-1910), and Tokugawa Japan (1600-1868). Among the themes addressed are: the state's role in patronizing science and knowledge; major intellectual movements; engagement with Western science and religion; East Asian statecraft; and East Asian understandings of space and geography. nTaking a holistic perspective, it places science and technology in 1) a social and cultural context 2) in relation to other bodies and fields of knowledge 3) in comparison to other societies in a similar historical time period. A socially embedded perspective on knowledge and science seeks to appreciate how politics, society, and knowledge are integrated, and in particular how science and knowledge can be both instruments and sites of political power. By exploring these links, the course will also illustrate how our modern disciplinary categories of natural science,social science and the humanities cannot be taken for granted and the areas of knowledge they cover can be deeply intertwined. nnThe course will also address these issues historically and across geographic regions in East Asia and beyond. The comparative lens and frameworks these perspectives can offer will bring an awareness of the diverse traditions of knowledge production in East Asia. Its examination of East Asian encounters with Western paradigms of knowledge throughout the early modern period will also illustrate how communication occurs across cultural, social, and linguistic barriers and how diverse world-views were managed in these encounters. These encounters of knowledge-exchange between Jesuit missionaries, Ming literati, Korean aristocrats, and Japanese doctors also show how cultural identities were constructed, reinforced, and challenged. These identities, expressed through the mastery of knowledge, are essential for understanding how East Asian reckoned with growing pressures to adopt Western industrial technology and military science in the late nineteenth century.

CHINA 157S. Tyranny and Resistance: East Asia's Political Culture and Tradition. 3-5 Units.
What is tyranny? When does political power cease to be legitimate and government become tyrannical? And what can individuals do in the face of tyranny? This course will explore East Asia's long political tradition through the problem of tyranny and its resistance. We will cover a wide range of material. We begin with how seminal political thinkers in East Asia, including Warring States philosophers such as Mencius and Han Feizi, understood the boundary between legitimate and illegitimate authority. We will also look at the strategies used by various political actors, including government officials, cultural or social elites, and common people, when they confronted what they perceived to be the unjust exercise political power, whether in the form of despotic monarchs, corrupt authorities, or general misrule. Our discussions will be wide-ranging. We will pay particular attention to how these historical examples from China, Korea, and Japan¿s past have resonated with modern and contemporary political discussions in contemporary East Asian societies.

CHINA 158. Cultural Images in China-US Relations. 3-5 Units.
New interpretation of the history of China-U.S. relations, 1784-2008, using image studies. Attention to people-to-people communication, cultural interaction, and political imagination during different times and power structures. Discussion of change and continuity of cultural images in textual descriptions, visual materials, symbolic and virtual identities in historical context. Understand how people in China and the United States created, presented, interpreted, and remembered cultural images of each other and how these images affected and were affected by their foreign policies and bilateral relations.
Same as: CHINA 258

CHINA 159. Beijing and Shanghai: Twin Cities in Chinese History. 3-5 Units.
This course discusses a story of twin cities ¿ Beijing and Shanghai, from the imperial period to the present day. The historical movement of people, goods, knowledge, thoughts, technology and shifting of political power and cultural authority has closely linked the two cities together. No other two cities in the Chinese map have more communications, interactions, and mutual influences than Beijing and Shanghai. Indeed, geographic localities, ethnic traits, material lives, and foreign contacts have produced distinct cultural landscapes and patterns of urban development of the twin cities, which provide us with a good case of comparative studies. In Beijing and Shanghai, contemporary forces, including migration, industrialization, marketization, decentralization and globalization are transforming the urban societies. Both of them take center stage in China¿s drama of explosive growth and unprecedented changes. They continue to compete and influence each other in many ways.
Same as: CHINA 259

CHINA 159A. Maoism and the Chinese Communist Party. 4 Units.
One of the most significant moments in Chinese history during the twentieth century was the Chinese Communist Party¿s victory on the mainland in 1949. Nevertheless, it remains a puzzle to many people how the CCP unified China and brought an entirely new ideology to such a large population. This course seeks to answer such intensely debated questions through analyzing the CCP¿s origin and its development of Marxism and Leninism in China, CCP¿s rural revolution and land reform, thought reform among CCP members and intellectuals, and most importantly, Mao Zedong¿s writings. This course offers different or even contrasting perspectives on the Chinese Communist Revolution, such as intellectuals within and outside the Party, foreign journalists in China, as well as highest-level CCP leaders.nAll the readings of this course are primary sources produced during Marxist revolutions within and outside China. Part I introduces some of the most influential communist ¿creed¿ written by Karl Marx, Frederick Engels, and Vladimir Lenin. While there is little consensus among scholars to what degree we can call the Chinese communist revolution a Marxist revolution or a Leninist revolution, Marx¿s and Lenin¿s writings remain the guiding principles to many Chinese communist intellectuals. In Part II, Edgar Snow¿s most influential book Red Star Over China offers the most crucial first-hand perspective on the everyday life of key CCP leaders and the history of the early CCP. It is true that Snow¿s book is a highly romanticized version of the CCP¿s history, yet it offers the most vivid description of CCP¿s rural base in Northwest China and details on some of the most important historical events, such as the Long March. This book also provides valuable information on the ordinary people living in the Communist base. In Part III, we will focus entirely on Mao¿s writings and his interaction with other intellectuals from the May-Fourth period to the 1950s. These writings vividly show Mao¿s unique understanding of China¿s peasant problem, inner-Party struggles, and his vision about a new China. In Part IV, through the eyes of Li Zhisui, Mao¿s private doctor, we will examine how Mao¿s decisions changed the fate of China from 1949 to Mao¿s death in 1976. Parts I to IV build the intellectual and historical foundation for students of Chinese Studies to understand and interpret Mao¿s writings and thoughts.".
Same as: CHINA 259A

CHINA 160. Classical Poetry: Reading, Theory, Interpretation. 4 Units.
Introduction to the reading and interpretation of classical Chinese poetry, with attention to the language of poetry, aesthetics, expressive purposes, and social roles. Readings in Chinese. Prerequisite: three years of modern Chinese or equivalent.
Same as: CHINA 260

CHINA 161. Soldiers and Bandits in Chinese Culture. 3-5 Units.
Social roles and literary images of two groups on the margins of traditional Chinese society; historical and comparative perspectives.
Same as: CHINA 261

CHINA 162. Lyrical and Local Prose. 3-5 Units.
Informal and personal prose of Tang and Song dynasties, with special attention to lyrical expression (prose as close alternative to poetry) and local interest (e.g., in travel diaries). These new uses and styles of prose will be compared with more formal expository prose and with poetry written by the same authors, to better understand the distribution of expressive aims and effects. Prerequisite: Classical Chinese or advanced reading knowledge of Chinese.
Same as: CHINA 262

CHINA 163. Chinese Biographies of Women. 3-5 Units.
Generic and historical analysis of the two-millennia long biographical tradition inaugurated by Liu Xiang, ca. 79-8 B.C.E. Chinese women's history, intellectual history, historiography, and literary studies.
Same as: CHINA 263

CHINA 163A. Order, Patterns, and Disorder in Early China. 3 Units.
This course explores the human impulse of order-making and its limits in the specific context of Early China. Since antiquity, the Chinese civilization displayed constant efforts to understand the natural world and human society, to seek patterns from the numerous and the diverse, and to fathom individuals¿ positions in the world and the proper ways to respond to all its complexity. Such attempts manifested in a cosmology with an emphasis on the resonance between the human and the natural realms, the prescription of ideals for behaviors and morals, the persistent pursuit and celebration of refined patterns in expression, and the state¿s construction of order through policies and cultural projects of standardization. Yet, despite the efforts of order and control, there had always been a strong tendency of anarchy, unveiling how much the seemingly prevailing structures could not contain. The course will probe into ancient philosophy, dynastic histories, literature, and arts to trace these efforts of establishing order and their consequences. The materials will also lead us to contemplate the other side of the story: What was left out? What were the restrictions? What if one failed to conform? Were any advantages found in disorder? This course is part of the Humanities Core: https://humanitiescore.stanford.edu/.
Same as: HUMCORE 113

CHINA 164. Classical Chinese Rituals. 3-5 Units.
Meanings of rituals regarding death, wedding, war, and other activities; historical transformations of classical rituals throughout the premodern period; legacy of the Chinese ritual tradition. Sources include canonical texts.
Same as: CHINA 264

CHINA 166. Chinese Ci Poetry (Song Lyrics). 3-4 Units.
Analysis of the entertainment song ("ci") in 11th and 12th centuries, known for its treatment of romantic love and the affections. How do male writers represent love as experienced by men and by women in entertainment songs? What happens when a woman writes in this form, dominated by male authors? How does the form change from a low-status entertainment genre, widely viewed as frivolous, into a high literary form that excited writers about its new expressive potential? Prerequisite: Advanced reading knowledge of Chinese.
Same as: CHINA 266

CHINA 167. Ghost Stories and Other Strange Tales. 3-4 Units.
Study of the zhiguai tradition, with readings in landmark collections from different dynastic periods (e.g., Tang, Song, Qing). Consideration of the cultural significance as well as the literary qualities of this tradition of storytelling in China. Readings in English.
Same as: CHINA 267

CHINA 168. The Chinese Family. 3-5 Units.
History and literature. Institutional, ritual, affective, and symbolic aspects. Perspectives of gender, class, and social change.
Same as: CHINA 268

CHINA 169. Early Chinese Mythology. 3-5 Units.
The definition of a myth. Major myths of China prior to the rise of Buddhism and Daoism including: tales of the early sage kings such as Yu and the flood; depictions of deities in the underworld; historical myths; tales of immortals in relation to local cults; and tales of the patron deities of crafts.
Same as: CHINA 269

CHINA 170. Chinese Language, Culture, and Society. 2-5 Units.
Functions of languages in Chinese culture and society, origin of the Chinese language, genetic relations with neighboring languages, development of dialects, language contacts, evolution of Chinese writing, language policies in Greater China. Prerequisite: one quarter of Chinese 1 or 1B or equivalent recommended. This course must be taken for a minimum of 3 units and a letter grade to be eligible for Ways credit.
Same as: CHINA 270

CHINA 171. Love and Revenge. 2-4 Units.
Readings of Tang and Song period stories, anecdotal literature, poetry, and song lyrics on the themes of romantic love, unfaithfulness, and revenge. In a society of parental arranged marriage, romantic love (usually outside marriage) takes on its own special meaning, forms of expression, and dangers.
Same as: CHINA 271

CHINA 172. Female Divinities in China. 3-5 Units.
The role of powerful goddesses, such as the Queen Mother of the West, Guanyin, and Chen Jinggu, in Chinese religion. Imperial history to the present day. What roles goddesses played in the spirit world, how this related to the roles of human women, and why a civilization that excluded women from the public sphere granted them such a major, even dominant place, in the religious sphere. Readings in English-language secondary literature.
Same as: CHINA 272

CHINA 173. Manuscripts, Circulation of Texts, Printing. 3-4 Units.
History of texts before the advent of printing as well as during the early period of printing, focus on Tang and Song periods. Attention to the material existence of texts, their circulation, reading habits before and after printing, the balance between orality and writing, the role of memorization, and rewriting during textual transmission. Readings in English.
Same as: CHINA 273

CHINA 174. New Directions in the Study of Poetry and Literati Culture. 3-4 Units.
Inquiry into new approaches and interpretations of the poetic tradition in China in the context of cultural history. Readings in recent scholarship and criticism that situate poetry in print history, manuscript culture, gender studies, social history, etc. Readings in English. Reading knowledge of Chinese desirable but not required.
Same as: CHINA 274

CHINA 175. Constructing National History in East Asian Archaeology. 3-5 Units.
Archaeological studies in contemporary East Asia share a common concern, to contribute to building a national narrative and cultural identity. This course focuses on case studies from China, Korea, and Japan, examining the influence of particular social-political contexts, such as nationalism, on the practice of archaeology in modern times.
Same as: ARCHLGY 135, ARCHLGY 235, CHINA 275

CHINA 176. Emergence of Chinese Civilization from Caves to Palaces. 3-4 Units.
Introduces processes of cultural evolution from the Paleolithic to the Three Dynasties in China. By examining archaeological remains, ancient inscriptions, and traditional texts, four major topics will be discussed: origins of modern humans, beginnings of agriculture, development of social stratification, and emergence of states and urbanism.
Same as: ARCHLGY 111, CHINA 276

CHINA 178. Lives of Confucius. 3-5 Units.
This course examines the transformation of the images of Confucius (551-479 BCE) from his own time to the present day. Major topics include: Confucius and his rivals / critics, the making of Confucius the "Uncrowned King," his apotheosis as China's cultural symbol and civilization's greatest sage, and twists and turns in his modern fate. Comparisons will be made with the development of images of Socrates, Jesus, and other important cultural figures. NOTE: In order for course to count towards major or minor, undergrads must enroll in a minimum of 3 units or higher.
Same as: CHINA 278

CHINA 183A. China's Dynastic Founders. 3-5 Units.
This course examines the lives of China's dynastic founders, among whom we find the most influential, the most celebrated, the most complicated, and the most controversial rulers in premodern Chinese history. We seek to understand the ideas of leadership and legitimacy, the relationships among statecraft, military might, and moral virtue, and the importance of precedents and exemplars in traditional Chinese political culture. Primary readings are the biographies of the dynastic founders in the official histories, supplemented by the representations of these rulers in other genres of writings.
Same as: CHINA 283

CHINA 191. The Structure of Modern Chinese. 2-4 Units.
Introduce to students the basic grammar of Standard Modern Chinese in comparison to English. Students learn about the logic of the Chinese in communicating ideas and events without grammatical markers like plurality, definiteness, tense, subject/object, etc, as well as common uses of verbs and adjectives that are totally different from those in English. Prerequisite: CHINLANG 3 or equivalent, or consent of instructor.
Same as: CHINA 291

CHINA 192. The History of Chinese. 4 Units.
Focuses on syntactic and semantic changes in Chinese over the last three millennia by using electronic corpus of vernacular texts from different times.
Same as: CHINA 292

CHINA 198C. Senior Research. 1 Unit.
EALC students writing a Senior Capstone Essay who wish to do research with their adviser may enroll in this course for 1 unit, for one quarter. May be repeat for credit.
Same as: Capstone Essay

CHINA 198H. Senior Research. 2-5 Units.
EALC seniors or juniors pursuing honors research should sign up for this course under their faculty adviser for research credit.
Same as: Honors Thesis

CHINA 199. Individual Reading in Chinese. 1-4 Unit.
Asian Language majors only. Prerequisite: CHINLANG 103 or consent of instructor. Units by arrangement.

CHINA 200. Directed Reading in Chinese. 1-12 Unit.
Independent studies under the direction of a faculty member for which academic credit may properly be allowed. Research will require in-person access to archival materials in Hoover Institution, Stanford's East Asia Library, and/or Branner Map Collections. For EALC students; non-EALC students, should seek instructor permission before enrolling in section.

CHINA 201. Proseminar: Bibliographic and Research Methods in Chinese Studies. 3-5 Units.
Bibliographic, pedagogical, and research methods in Chinese studies. Prerequisite: 127/207 or equivalent.

CHINA 205. Beginning Classical Chinese, First Quarter. 2-5 Units.
The goal is develop students' reading knowledge of classical Chinese, including basic grammar and commonly used vocabulary. Students will also learn concepts and ideas fundamental in Chinese culture involving family, human relationships, governance, learning, life/death, philosophy, etc. through reading canonical classical Chinese texts. Prerequisite: CHINLANG 23 or equivalent.
Same as: CHINA 105

CHINA 206. Beginning Classical Chinese, Second Quarter. 2-5 Units.
Continue to develop students' reading knowledge of classical Chinese, including basic grammar and commonly used vocabulary. Students will learn more concepts and ideas fundamental in Chinese culture involving family, human relationships, governance, learning, life/death, philosophy, etc. through reading canonical classical Chinese texts. Prerequisite: CHINA 105/205 or equivalent.
Same as: CHINA 106

CHINA 207. Beginning Classical Chinese, Third Quarter. 2-5 Units.
Goal is reading knowledge of classical Chinese. Basic grammar and commonly used vocabulary. Students with no background in classical Chinese who are taking 127/207 to satisfy Chinese major requirements must begin with 125/205. Prerequisite: CHINLANG 126/206 or equivalent.
Same as: CHINA 107

CHINA 208. Advanced Classical Chinese: Philosophical Texts. 3-5 Units.
Prerequisite: CHINA 207 or equivalent.

CHINA 209. Advanced Classical Chinese: Historical Narration. 2-5 Units.
Students must have taken CHINA 107/207, or have received permission from instructor or department to take this course.

CHINA 210. Advanced Classical Chinese: Literary Essays. 2-5 Units.
Readings and grammatical analyses of literary essays thoughout imperial China. Prerequisite: CHINLIT 127/207 or equivalent.

CHINA 211. Literature in 20th-Century China. 4-5 Units.
(Graduate students register for 211.) How modern Chinese culture evolved from tradition to modernity; the century-long drive to build a modern nation state and to carry out social movements and political reforms. How the individual developed modern notions of love, affection, beauty, and moral relations with community and family. Sources include fiction and film clips. WIM course.
Same as: CHINA 111

CHINA 212. Tiananmen Square: History, Literature, Iconography. 3-5 Units.
Multidisciplinary. Literary and artistic representations of this site of political and ideological struggles throughout the 20th century. Tiananmen-themed creative, documentary, and scholarly works that shed light on the dynamics and processes of modern Chinese culture and politics. No knowledge of Chinese required. Repeat for credit.
Same as: CHINA 112

CHINA 212A. Asian Screen Cultures. 3-5 Units.
Asian screen culture, ranging from cinema to online games, has (re)shaped the global and national/regional imaginings of Asia. The Post-Cold War intensification of intra-Asian interactions has precipitated the rise of a Pan-Asian regional identity wherein the nation-state is not yet obsolete. What role does screen culture plays in the border-crossing interplay among languages, ideologies, aesthetics, and affect? How does the converging media of screen culture capture local/global desires and propel the history of transformation of sign systems from the written words to visual moving images in a digital time? How do we understand the aesthetic, storytelling, and politics of Asian screen cultures vis-à-vis its historical and social context? While exploring these transnational and transdisciplinary questions, this course will deal with topical issues of Pan-Asian identity, (trans)nationalism, (un)translatability, commodity fetishism, locality and globality, technophobia, and politics of gender. Students will learn how to think and write about screen cultures of East Asia in particular and of our world of screens in general.
Same as: CHINA 112A, JAPAN 112A, JAPAN 212A, KOREA 112, KOREA 212

CHINA 213. Love, Passion, and Politics in Chinese Film. 4-5 Units.
Focusing on the emotional structure of love and passion in Chinese films, the course will investigate the structures of feelings and moral relations in modern Chinese history from the 1940s till the present. Examining the interplay between private desire, romantic sentiment, family relations, and political passion, we will explore how men and women in China grapple with emotional and social issues in modern transformations. We will consider romantic love, the uplifting of sexuality into political passion, the intertwining of aesthetic experience with politics, nostalgia in the disenchanted modern world, and the tensions between the individual's self-realization and the community's agenda. Students will learn to "read" films as a work of art and understand how film works as expression of desire, impulse, emotional connections, and communal bonding during times of crisis. Course work includes a midterm exam (25%) and a final exam (25%), a weekly 250-300 word reflection on the film of the week (10%), participation and oral presentation in class (10%), and a paper of 5-7 pages to be submitted after the midterm week (30%).nStarting from the second week, film screening will begin 6: 30 pm Monday before classes on Tuesday and Thursday. The course does not encourage private viewing. At least 5 dinners will be provided for movie-screening events.
Same as: CHINA 113

CHINA 215. Sex, Gender, and Power in Modern China. 3-5 Units.
Investigates how sex, gender, and power are entwined in the Chinese experience of modernity. Topics include anti-footbinding campaigns, free love/free sex, women's mobilization in revolution and war, the new Marriage Law of 1950, Mao's iron girls, postsocialist celebrations of sensuality, and emergent queer politics. Readings range from feminist theory to China-focused historiography, ethnography, memoir, biography, fiction, essay, and film. All course materials are in English.
Same as: CHINA 115, FEMGEN 150, FEMGEN 250

CHINA 216. Chinese Cultural Revolution: Performance, Politics, and Aesthetics. 4 Units.
Events, arts, films, and operas of the Chinese Cultural Revolution. Analysis of political passion, aesthetics, and psychology of mass movements. Places the Cultural Revolution in the long-range context of art, social movements, and politics. Chinese language is not required.
Same as: CHINA 116

CHINA 218A. Food Culture in China: Past and Present. 2-5 Units.
This course situates the culinary traditions of China in the history and civilization of the region, using food as an introduction to its rich repertoires of literature, art, archaeology, language, philosophy, religion, and culture. It also situates these seemingly timeless gastronomies within local and global flows, social change, and ethical frameworks that question the moral imperatives driving these traditions.nStudents majoring or minoring in EALC must take course for 3 or more units.
Same as: CHINA 118A

CHINA 230. Image and Text in Chinese Painting. 3-5 Units.
An examination of many types of interactions between images and texts in Chinese painting. These include poetic lines inscribed on paintings (as response or as a theme given to the artist to paint), paintings that emulate or transform ancient poetic couplets, or illustrate poetic and literary narratives, and calligraphic inscriptions. Attention will be given both to comparative perspectives and to the special aesthetic and intellectual consequences that the conjunction of the literary and visual modes give to Chinese artistic expression. [Undergraduate enrollment with consent of one of the instructors].
Same as: ARTHIST 230B, ARTHIST 430B, CHINA 430

CHINA 244. Science, Magic, and Religion in Early China. 3-5 Units.
If the categories we use to think about the world are products of particular cultural and historical experiences, what happens when we bring the categories of the modern West to bear on early China? In this seminar, we will examine early Chinese technologies designed to achieve ethical, physical, or political transformation, and technologies designed to interpret signs, in terms of three classical anthropological categories: science, magic, and religion. How may we apply science, magic, and religion to early China, and what problems might we encounter in doing so? What alternative terms do our sources present, and what questions might they allow us to ask? How was knowledge created in early China, and how do our categories shape the knowledge we create about early China?.
Same as: CHINA 144

CHINA 251. Popular Culture and Casino Capitalism in China. 3-4 Units.
Examination of different forms of Chinese popular culture used to gauge or control fate and uncertainty, from geomancy and qigong to ghost culture and mahjong. Ways in which Chinese are incorporating these cultural forms into the informal economy to get rich quick: rotating credit associations, stock market speculation, pyramid schemes, underground lotteries, counterfeiting. Impact of casino capitalism on Chinese culture and social life today.
Same as: CHINA 151

CHINA 251B. The Nature of Knowledge: Science and Literature in East Asia. 4-5 Units.
"The Nature of Knowledge" explores the intersections of science and humanities East Asia. It covers a broad geographic area (China, Japan, and Korea) along a long temporal space (14th century - present) to investigate how historical notions about the natural world, the human body, and social order defied, informed, and constructed our current categories of science and humanities. The course will make use of medical, geographic, and cosmological treatises from premodern East Asia, portrayals and uses of science in modern literature, film, and media, as well as theoretical and historical essays on the relationships between literature, science, and society.nnAs part of its exploration of science and the humanities in conjunction, the course addresses how understandings of nature are mediated through techniques of narrative, rhetoric, visualization, and demonstration. In the meantime, it also examines how the emergence of modern disciplinary "science" influenced the development of literary language, tropes, and techniques of subject development. This class will expose the ways that science has been mobilized for various ideological projects and to serve different interests, and will produce insights into contemporary debates about the sciences and humanities.
Same as: CHINA 151B, JAPAN 151B, JAPAN 251B, KOREA 151, KOREA 251

CHINA 252. Gods, Ghosts, and Ancestors: Anthropology of Chinese Folk Religion. 3-5 Units.
.
Same as: CHINA 152

CHINA 253. Chinese Bodies, Chinese Selves. 3-5 Units.
Interdisciplinary. The body as a contested site of representational practices, identity politics, cultural values, and social norms. Body images, inscriptions, and practices in relation to health, morality, gender, sexuality, nationalism, consumerism, and global capitalism in China and Taiwan. Sources include anthropological, literary, and historical studies, and fiction and film. No knowledge of Chinese required.
Same as: CHINA 153

CHINA 254. What is Chinese Theater? The Formation of a Tradition. 3-4 Units.
A survey of Chinese drama from its origins to late imperial China. Explores theories of the origins of Chinese drama, contrasting theories with the documented beginnings of theater and its first texts. How traditions turned into "elite theater" in the Ming and Qing dynasties, and how esthetic norms and moral values went into the process of theatrical transformation.
Same as: CHINA 154

CHINA 254A. Shaping the Theater: Two Foundational Plays of Early Chinese Drama. 2-5 Units.
In this class we are going to read the two earliest plays in the Chinese southern dramatic tradition (nanxi) for what they can tell us of the foundation idea of a theater. We will examine Top Graduate Zhang Xie and The Lute, two tales of ambitious families and students, love, betrayal, strained family relations and even attempted murder. We will analyze their structure (music, act division and role organization), as well as the social and moral purpose of drama. Our discussion will focus on what these texts tell us about the purpose of theater, the values it attempts to promote and its social criticism. * Pre-requisite, one year of classical Chinese or equivalent.
Same as: CHINA 354A

CHINA 255. The Culture of Entertainment in China. 3-4 Units.
Sophisticated, organized entertainment in China is evident at least as early as the second century B.C. in the court spectacles described in the early histories and in the depictions of jugglers, dancers and acrobats represented in tomb bas-reliefs. The importance attached to entertainment from ancient times both at court and in society at large is manifest not just in the establishment of imperial institutions such as the Music Bureau, but also in the appearance of large entertainment districts within the cities where people would invest extraordinary amount of resources in the pursuit of pleasure, and in small scale gatherings. The representation of play and pleasure in Chinese culture from a variety of sources (art, history, literature and performance) in different periods of Chinese history. The place of pleasure in Chinese culture, as well as ethical, socio-political and economical concerns. Held in old Knight Bldg., 521 Memorial Way, Rm. 102.
Same as: CHINA 155

CHINA 255A. Health, Politics, and Culture of Modern China. 4-5 Units.
One of the most generative regions for medical anthropology inquiry in recent years has been Asia. This seminar is designed to introduce upper division undergraduates and graduate students to the methodological hurdles, representational challenges, and intellectual rewards of investigating the intersections of health, politics, and culture in contemporary China.
Same as: ANTHRO 148, ANTHRO 248, CHINA 155A

CHINA 255B. Narrative and Storytelling in Premodern China. 4-5 Units.
In premodern China, individuals and groups told stories variously to philosophize and persuade, to commemorate and critique, to educate and entertain, to scandalize and to stimulate. In this class, we will trace the evolution of Chinese narrative storytelling through close readings of some of the most compelling stories in the Chinese tradition, including early philosophical anecdotes and historical accounts, medieval tales and religious performance pieces, and early modern short stories. In the process, we will come to appreciate how Chinese narrative storytelling evolved over time, dwelling on issues such as genre, authorship, textuality, and readership to understand how writers and readers used storytelling to navigate and negotiate the world around them, including issues related to gender and sexuality, social status, and political power.
Same as: CHINA 155B

CHINA 257. Science, Power, and Knowledge: East Asia to 1900. 3-5 Units.
In the early modern period, East Asian societies featured long-established institutions of learning and traditions of knowledge. This course examines the relationship between knowledge and power in East Asia societies prior to 1900. It explores how knowledge production operated in late imperial China (1550-1900), Chos'n Korea (1392-1910), and Tokugawa Japan (1600-1868). Among the themes addressed are: the state's role in patronizing science and knowledge; major intellectual movements; engagement with Western science and religion; East Asian statecraft; and East Asian understandings of space and geography. nTaking a holistic perspective, it places science and technology in 1) a social and cultural context 2) in relation to other bodies and fields of knowledge 3) in comparison to other societies in a similar historical time period. A socially embedded perspective on knowledge and science seeks to appreciate how politics, society, and knowledge are integrated, and in particular how science and knowledge can be both instruments and sites of political power. By exploring these links, the course will also illustrate how our modern disciplinary categories of natural science,social science and the humanities cannot be taken for granted and the areas of knowledge they cover can be deeply intertwined. nnThe course will also address these issues historically and across geographic regions in East Asia and beyond. The comparative lens and frameworks these perspectives can offer will bring an awareness of the diverse traditions of knowledge production in East Asia. Its examination of East Asian encounters with Western paradigms of knowledge throughout the early modern period will also illustrate how communication occurs across cultural, social, and linguistic barriers and how diverse world-views were managed in these encounters. These encounters of knowledge-exchange between Jesuit missionaries, Ming literati, Korean aristocrats, and Japanese doctors also show how cultural identities were constructed, reinforced, and challenged. These identities, expressed through the mastery of knowledge, are essential for understanding how East Asian reckoned with growing pressures to adopt Western industrial technology and military science in the late nineteenth century.
Same as: CHINA 157, HISTORY 294J, JAPAN 157, JAPAN 257, KOREA 157, KOREA 257

CHINA 258. Cultural Images in China-US Relations. 3-5 Units.
New interpretation of the history of China-U.S. relations, 1784-2008, using image studies. Attention to people-to-people communication, cultural interaction, and political imagination during different times and power structures. Discussion of change and continuity of cultural images in textual descriptions, visual materials, symbolic and virtual identities in historical context. Understand how people in China and the United States created, presented, interpreted, and remembered cultural images of each other and how these images affected and were affected by their foreign policies and bilateral relations.
Same as: CHINA 158

CHINA 259. Beijing and Shanghai: Twin Cities in Chinese History. 3-5 Units.
This course discusses a story of twin cities ¿ Beijing and Shanghai, from the imperial period to the present day. The historical movement of people, goods, knowledge, thoughts, technology and shifting of political power and cultural authority has closely linked the two cities together. No other two cities in the Chinese map have more communications, interactions, and mutual influences than Beijing and Shanghai. Indeed, geographic localities, ethnic traits, material lives, and foreign contacts have produced distinct cultural landscapes and patterns of urban development of the twin cities, which provide us with a good case of comparative studies. In Beijing and Shanghai, contemporary forces, including migration, industrialization, marketization, decentralization and globalization are transforming the urban societies. Both of them take center stage in China¿s drama of explosive growth and unprecedented changes. They continue to compete and influence each other in many ways.
Same as: CHINA 159

CHINA 259A. Maoism and the Chinese Communist Party. 4 Units.
One of the most significant moments in Chinese history during the twentieth century was the Chinese Communist Party¿s victory on the mainland in 1949. Nevertheless, it remains a puzzle to many people how the CCP unified China and brought an entirely new ideology to such a large population. This course seeks to answer such intensely debated questions through analyzing the CCP¿s origin and its development of Marxism and Leninism in China, CCP¿s rural revolution and land reform, thought reform among CCP members and intellectuals, and most importantly, Mao Zedong¿s writings. This course offers different or even contrasting perspectives on the Chinese Communist Revolution, such as intellectuals within and outside the Party, foreign journalists in China, as well as highest-level CCP leaders.nAll the readings of this course are primary sources produced during Marxist revolutions within and outside China. Part I introduces some of the most influential communist ¿creed¿ written by Karl Marx, Frederick Engels, and Vladimir Lenin. While there is little consensus among scholars to what degree we can call the Chinese communist revolution a Marxist revolution or a Leninist revolution, Marx¿s and Lenin¿s writings remain the guiding principles to many Chinese communist intellectuals. In Part II, Edgar Snow¿s most influential book Red Star Over China offers the most crucial first-hand perspective on the everyday life of key CCP leaders and the history of the early CCP. It is true that Snow¿s book is a highly romanticized version of the CCP¿s history, yet it offers the most vivid description of CCP¿s rural base in Northwest China and details on some of the most important historical events, such as the Long March. This book also provides valuable information on the ordinary people living in the Communist base. In Part III, we will focus entirely on Mao¿s writings and his interaction with other intellectuals from the May-Fourth period to the 1950s. These writings vividly show Mao¿s unique understanding of China¿s peasant problem, inner-Party struggles, and his vision about a new China. In Part IV, through the eyes of Li Zhisui, Mao¿s private doctor, we will examine how Mao¿s decisions changed the fate of China from 1949 to Mao¿s death in 1976. Parts I to IV build the intellectual and historical foundation for students of Chinese Studies to understand and interpret Mao¿s writings and thoughts.".
Same as: CHINA 159A

CHINA 260. Classical Poetry: Reading, Theory, Interpretation. 4 Units.
Introduction to the reading and interpretation of classical Chinese poetry, with attention to the language of poetry, aesthetics, expressive purposes, and social roles. Readings in Chinese. Prerequisite: three years of modern Chinese or equivalent.
Same as: CHINA 160

CHINA 261. Soldiers and Bandits in Chinese Culture. 3-5 Units.
Social roles and literary images of two groups on the margins of traditional Chinese society; historical and comparative perspectives.
Same as: CHINA 161

CHINA 262. Lyrical and Local Prose. 3-5 Units.
Informal and personal prose of Tang and Song dynasties, with special attention to lyrical expression (prose as close alternative to poetry) and local interest (e.g., in travel diaries). These new uses and styles of prose will be compared with more formal expository prose and with poetry written by the same authors, to better understand the distribution of expressive aims and effects. Prerequisite: Classical Chinese or advanced reading knowledge of Chinese.
Same as: CHINA 162

CHINA 263. Chinese Biographies of Women. 3-5 Units.
Generic and historical analysis of the two-millennia long biographical tradition inaugurated by Liu Xiang, ca. 79-8 B.C.E. Chinese women's history, intellectual history, historiography, and literary studies.
Same as: CHINA 163

CHINA 264. Classical Chinese Rituals. 3-5 Units.
Meanings of rituals regarding death, wedding, war, and other activities; historical transformations of classical rituals throughout the premodern period; legacy of the Chinese ritual tradition. Sources include canonical texts.
Same as: CHINA 164

CHINA 265. Major Figures in Classical Chinese Poetry. 2-5 Units.
This year the course will focus on Su Shi (Su Dongpo), the great 11th century writer. We will look into all the forms he wrote in (3 kinds of poetry, formal prose, informal notes on "things," miracle tales, letters to family and friends, etc.) to get a sense of the range of his interests and expressive outlets. We will also consider the balance between his private life and public persona, the effects that political persecution had on him, and his exploration of the linkage between poetry and the visual arts (painting, calligraphy).
Same as: CHINA 365

CHINA 266. Chinese Ci Poetry (Song Lyrics). 3-4 Units.
Analysis of the entertainment song ("ci") in 11th and 12th centuries, known for its treatment of romantic love and the affections. How do male writers represent love as experienced by men and by women in entertainment songs? What happens when a woman writes in this form, dominated by male authors? How does the form change from a low-status entertainment genre, widely viewed as frivolous, into a high literary form that excited writers about its new expressive potential? Prerequisite: Advanced reading knowledge of Chinese.
Same as: CHINA 166

CHINA 267. Ghost Stories and Other Strange Tales. 3-4 Units.
Study of the zhiguai tradition, with readings in landmark collections from different dynastic periods (e.g., Tang, Song, Qing). Consideration of the cultural significance as well as the literary qualities of this tradition of storytelling in China. Readings in English.
Same as: CHINA 167

CHINA 268. The Chinese Family. 3-5 Units.
History and literature. Institutional, ritual, affective, and symbolic aspects. Perspectives of gender, class, and social change.
Same as: CHINA 168

CHINA 269. Early Chinese Mythology. 3-5 Units.
The definition of a myth. Major myths of China prior to the rise of Buddhism and Daoism including: tales of the early sage kings such as Yu and the flood; depictions of deities in the underworld; historical myths; tales of immortals in relation to local cults; and tales of the patron deities of crafts.
Same as: CHINA 169

CHINA 270. Chinese Language, Culture, and Society. 2-5 Units.
Functions of languages in Chinese culture and society, origin of the Chinese language, genetic relations with neighboring languages, development of dialects, language contacts, evolution of Chinese writing, language policies in Greater China. Prerequisite: one quarter of Chinese 1 or 1B or equivalent recommended. This course must be taken for a minimum of 3 units and a letter grade to be eligible for Ways credit.
Same as: CHINA 170

CHINA 271. Love and Revenge. 2-4 Units.
Readings of Tang and Song period stories, anecdotal literature, poetry, and song lyrics on the themes of romantic love, unfaithfulness, and revenge. In a society of parental arranged marriage, romantic love (usually outside marriage) takes on its own special meaning, forms of expression, and dangers.
Same as: CHINA 171

CHINA 272. Female Divinities in China. 3-5 Units.
The role of powerful goddesses, such as the Queen Mother of the West, Guanyin, and Chen Jinggu, in Chinese religion. Imperial history to the present day. What roles goddesses played in the spirit world, how this related to the roles of human women, and why a civilization that excluded women from the public sphere granted them such a major, even dominant place, in the religious sphere. Readings in English-language secondary literature.
Same as: CHINA 172

CHINA 273. Manuscripts, Circulation of Texts, Printing. 3-4 Units.
History of texts before the advent of printing as well as during the early period of printing, focus on Tang and Song periods. Attention to the material existence of texts, their circulation, reading habits before and after printing, the balance between orality and writing, the role of memorization, and rewriting during textual transmission. Readings in English.
Same as: CHINA 173

CHINA 274. New Directions in the Study of Poetry and Literati Culture. 3-4 Units.
Inquiry into new approaches and interpretations of the poetic tradition in China in the context of cultural history. Readings in recent scholarship and criticism that situate poetry in print history, manuscript culture, gender studies, social history, etc. Readings in English. Reading knowledge of Chinese desirable but not required.
Same as: CHINA 174

CHINA 275. Constructing National History in East Asian Archaeology. 3-5 Units.
Archaeological studies in contemporary East Asia share a common concern, to contribute to building a national narrative and cultural identity. This course focuses on case studies from China, Korea, and Japan, examining the influence of particular social-political contexts, such as nationalism, on the practice of archaeology in modern times.
Same as: ARCHLGY 135, ARCHLGY 235, CHINA 175

CHINA 276. Emergence of Chinese Civilization from Caves to Palaces. 3-4 Units.
Introduces processes of cultural evolution from the Paleolithic to the Three Dynasties in China. By examining archaeological remains, ancient inscriptions, and traditional texts, four major topics will be discussed: origins of modern humans, beginnings of agriculture, development of social stratification, and emergence of states and urbanism.
Same as: ARCHLGY 111, CHINA 176

CHINA 277. Painting, Poetry, and Calligraphy: Word and Image Studies. 2-5 Units.
This course examines the rich interplay of word and image in Chinese culture. Topics include the coexistence of painting, poem, and calligraphy in a single work of art, paintings inspired by poems and visa versa, the ways calligraphy gets written about, and painting criticism. The course serves as an introduction to field of Chinese word and image studies. It will be co-taught by specialists in Chinese literature and art.
Same as: CHINA 377

CHINA 278. Lives of Confucius. 3-5 Units.
This course examines the transformation of the images of Confucius (551-479 BCE) from his own time to the present day. Major topics include: Confucius and his rivals / critics, the making of Confucius the "Uncrowned King," his apotheosis as China's cultural symbol and civilization's greatest sage, and twists and turns in his modern fate. Comparisons will be made with the development of images of Socrates, Jesus, and other important cultural figures. NOTE: In order for course to count towards major or minor, undergrads must enroll in a minimum of 3 units or higher.
Same as: CHINA 178

CHINA 279. For Love of Country: National Narratives in Chinese Literature and Film. 3-5 Units.
Explores the nation as it is constructed, deconstructed, and continuously contested in novels, short stories, films, and other media from the second half of the 20th century in mainland China and Taiwan. Asks how the trope of the nation and the ideology of nationalism mediate the relationships between politics and aesthetics. Explores the nation's internal fault lines of gender, ethnicity, geography, language, and citizenship.
Same as: CHINA 379

CHINA 283. China's Dynastic Founders. 3-5 Units.
This course examines the lives of China's dynastic founders, among whom we find the most influential, the most celebrated, the most complicated, and the most controversial rulers in premodern Chinese history. We seek to understand the ideas of leadership and legitimacy, the relationships among statecraft, military might, and moral virtue, and the importance of precedents and exemplars in traditional Chinese political culture. Primary readings are the biographies of the dynastic founders in the official histories, supplemented by the representations of these rulers in other genres of writings.
Same as: CHINA 183A

CHINA 288. Modern China Studies: State of the Field. 3-5 Units.
This is a survey course designed to acquaint master¿s and doctoral students in East Asian Studies with the latest English-language scholarship on modern China, broadly defined, across the humanities and interpretive social sciences. Each time the course is offered (once every two or three years), the disciplinary emphasis shifts slightly and the readings are completely different. The course may be taken twice.
Same as: CHINA 388

CHINA 289. The Poetics and Politics of Affect in Modern China. 3-5 Units.
The role of affect in modern Chinese aesthetics and politics. Cultural and social theories of affect (love, hate, fear, grief, ressentiment, rage, sympathy, sincerity, shame, and nostalgia); affective discourses across agenres and media including fiction, poetry, film, journalism, and television; and mass social movements such as protest, uprising, and revolution. Advanced undergraduates requires consent of instructor. Recommended: reading knowledge of Chinese.

CHINA 291. The Structure of Modern Chinese. 2-4 Units.
Introduce to students the basic grammar of Standard Modern Chinese in comparison to English. Students learn about the logic of the Chinese in communicating ideas and events without grammatical markers like plurality, definiteness, tense, subject/object, etc, as well as common uses of verbs and adjectives that are totally different from those in English. Prerequisite: CHINLANG 3 or equivalent, or consent of instructor.
Same as: CHINA 191

CHINA 292. The History of Chinese. 4 Units.
Focuses on syntactic and semantic changes in Chinese over the last three millennia by using electronic corpus of vernacular texts from different times.
Same as: CHINA 192

CHINA 299. Master's Thesis or Translation. 2-5 Units.
A total of 5 units taken in one or more quarters.

CHINA 340. Chinese Justice: Law, Morality, and Literature. 2-5 Units.
This course explores the relationship between law and morality in Chinese literature, culture, and society. Readings include court case romances, crime plays, detective novels, and legal dramas from traditional era and modern and contemporary periods. Prior coursework in Chinese history, civilization, or literature is recommended.

CHINA 354A. Shaping the Theater: Two Foundational Plays of Early Chinese Drama. 2-5 Units.
In this class we are going to read the two earliest plays in the Chinese southern dramatic tradition (nanxi) for what they can tell us of the foundation idea of a theater. We will examine Top Graduate Zhang Xie and The Lute, two tales of ambitious families and students, love, betrayal, strained family relations and even attempted murder. We will analyze their structure (music, act division and role organization), as well as the social and moral purpose of drama. Our discussion will focus on what these texts tell us about the purpose of theater, the values it attempts to promote and its social criticism. * Pre-requisite, one year of classical Chinese or equivalent.
Same as: CHINA 254A

CHINA 365. Major Figures in Classical Chinese Poetry. 2-5 Units.
This year the course will focus on Su Shi (Su Dongpo), the great 11th century writer. We will look into all the forms he wrote in (3 kinds of poetry, formal prose, informal notes on "things," miracle tales, letters to family and friends, etc.) to get a sense of the range of his interests and expressive outlets. We will also consider the balance between his private life and public persona, the effects that political persecution had on him, and his exploration of the linkage between poetry and the visual arts (painting, calligraphy).
Same as: CHINA 265

CHINA 369. Late Imperial Chinese Fiction. 2-5 Units.
Primary works examined include Jin Ping Mei, Xingshi yinyuan zhuan, Hongloumeng, Qilu deng, Rulin waishi, and Ernu yingxiong zhuan. Secondary readings focus on social dimensions of the Chinese novel (ca. 1600-1850), but students may explore other aspects of the texts in their presentations and research papers. Comparisons with the English novel, particularly on the rise of the novel and the advent of modernity.

CHINA 371. Critical Theory and Ecology: A Cross-Cultural Perspective. 2-5 Units.
This class will bring together aesthetics, politics, and art around ecological questions. We will survey the key themes in ecocritical humanities and critiques of anthropocentrism by reading selected chapters from Literature and the Environment (Timothy Clark). We will move on to the Marxist eco critique of capitalist economy, human alienation from nature, alienated labor as well as Frankfurt school critiques of instrumental rationality. Major readings include The Enemy of Nature (Kovel), Creating an Ecological Society (Magdofff and Williams), chapters from The Robbery of Nature (Foster and Clark), and essays by Adorno and Benjamin. Taking a comparative perspective, we will study Chinese eco-narratives such as Waste Tide (Chen Qiufan) and Unfolding Beijing (Hao Jingfang).nnChinese is not required. PhD students are required to write a term paper of 20-25 pages. MA and undergraduate students will write two essays of 8 pages in response to the questions.n nTexts to be purchased. Literature and the Environment (Timothy Clark); Creating an Ecological Society (Magdofff and Williams); The Robbery of Nature (Foster and Clark). The rest of readings are available on Canvas.
Same as: COMPLIT 371

CHINA 376. Methods, Theories, and Practice in Chinese Archaeology. 2-5 Units.
This course is designed for graduate students who are interested in Chinese archaeology. We will discuss the current issues in the discipline, particularly related to archaeological research on food and foodways. We will conduct experimental study and laboratory analyses to investigate ancient human behavior in food procurement, preparation, and consumption. The archaeological methods include analyses of use-wear on stone tools and various microbotanical remains (starch, phytoliths, etc.) on artifacts.
Same as: ARCHLGY 376

CHINA 377. Painting, Poetry, and Calligraphy: Word and Image Studies. 2-5 Units.
This course examines the rich interplay of word and image in Chinese culture. Topics include the coexistence of painting, poem, and calligraphy in a single work of art, paintings inspired by poems and visa versa, the ways calligraphy gets written about, and painting criticism. The course serves as an introduction to field of Chinese word and image studies. It will be co-taught by specialists in Chinese literature and art.
Same as: CHINA 277

CHINA 378. Li Qingzhao. 2-4 Units.
This course examines the writings and reception history of Li Qingzhao (1084-1150s), the most renowned woman writer of imperial China. We will read her song lyrics (ci), the most celebrated form of her writings, as well as several of her poems in the shi form and her various prose writings as well. The singularity of her work as a poet and critic will be brought out through comparison with other writers of her day.nnnAttention will also be given to the complicated reception history of her work, from her own day down through late imperial times and into the twentieth century. This history is inseparable from controversies surrounding her conduct and changing notions of womanly virtue in the Ming-Qing period. The legacy of those notions even in modern representations of Li Qingzhao will also be analyzed.nnnClass meets in Knight Bldg, Rm 102.
Same as: CHINA 278

CHINA 379. For Love of Country: National Narratives in Chinese Literature and Film. 3-5 Units.
Explores the nation as it is constructed, deconstructed, and continuously contested in novels, short stories, films, and other media from the second half of the 20th century in mainland China and Taiwan. Asks how the trope of the nation and the ideology of nationalism mediate the relationships between politics and aesthetics. Explores the nation's internal fault lines of gender, ethnicity, geography, language, and citizenship.

Same as: CHINA 288

CHINA 390. Practicum Internship. 1 Unit.
On-the-job training under the guidance of experienced, on-site supervisors. Meets the requirements for curricular practical training for students on F-1 visas. Students submit a concise report detailing work activities, problems worked on, and key results. May be repeated for credit.

CHINA 391. Seminar in Chinese Syntax. 4 Units.
May be repeated for credit.

CHINA 393. Frontier Expansion and Ethnic Statecraft in the Qing Empire. 4-5 Units.
The legacy of the Qing dynasty in the territorial boundaries claimed by the People's Republic of China including the frontier zones that lie outside China proper. How the Qing acquired and ruled its frontier territories. Growth and migration of the Han Chinese population. How the dynasty's Manchu rulers managed ethnic difference. Consequences of Qing expansionism and ethnic statecraft for subject peoples and for the dynasty itself. At what point and by what processes did the Qing become China.
Same as: HISTORY 393

CHINA 395. Gender and Sexuality in Chinese History. 4-5 Units.
.
Same as: FEMGEN 395J, HISTORY 395J

CHINA 399. Dissertation Research. 1-12 Unit.
Independent studies under the direction of a faculty member for which academic credit may properly be allowed. Research will require some in-person access to archival materials in Hoover Institution, Stanford's East Asia Library, and/or Branner Map Collections. For EALC students; non-EALC students, should seek instructor permission before enrolling in section.

CHINA 430. Image and Text in Chinese Painting. 3-5 Units.
An examination of many types of interactions between images and texts in Chinese painting. These include poetic lines inscribed on paintings (as response or as a theme given to the artist to paint), paintings that emulate or transform ancient poetic couplets, or illustrate poetic and literary narratives, and calligraphic inscriptions. Attention will be given both to comparative perspectives and to the special aesthetic and intellectual consequences that the conjunction of the literary and visual modes give to Chinese artistic expression. [Undergraduate enrollment with consent of one of the instructors].

East Asian Languages and Cultures Courses

EALC 9R. Humanities Research Intensive. 2 Units.
Everyone knows that scientists do research, but how do you do research in the humanities? This five-day course, taught over spring break, will introduce you to the excitement of humanities research, while preparing you to develop an independent summer project or to work as a research assistant for a Stanford professor. Through hands-on experience with archival materials in Special Collections and the East Asia Library, you will learn how to formulate a solid research question; how to gather the evidence that will help you to answer that question; how to write up research results; how to critique the research of your fellow students; how to deliver your results in a public setting; and how to write an effective grant proposal. Students who complete this course become Humanities Research Intensive Fellows and receive post-program mentorship during spring quarter, ongoing opportunities to engage with faculty and advanced undergraduates, and eligibility to apply for additional funding to support follow-up research. Freshmen and sophomores only. All majors and undeclared students welcome. No prior research experience necessary. Enrollment limited: apply by 11/4/19 at hri-fellows.stanford.edu.
Same as: CLASSICS 9R, ENGLISH 9R, HISTORY 9R

EALC 36. Dangerous Ideas. 1 Unit.
Ideas matter. Concepts such as revolution, tradition, and hell have inspired social movements, shaped political systems, and dramatically influenced the lives of individuals. Others, like immigration, universal basic income, and youth play an important role in contemporary debates in the United States. All of these ideas are contested, and they have a real power to change lives, for better and for worse. In this one-unit class we will examine these "dangerous" ideas. Each week, a faculty member from a different department in the humanities and arts will explore a concept that has shaped human experience across time and space. Some weeks will have short reading assignments, but you are not required to purchase any materials.
Same as: ARTHIST 36, COMPLIT 36A, ENGLISH 71, ETHICSOC 36X, FRENCH 36, HISTORY 3D, MUSIC 36H, PHIL 36, POLISCI 70, RELIGST 36X, SLAVIC 36

EALC 198. Senior Colloquium. 3 Units.
Students research, write, and present a capstone essay or honors thesis. All EALC undergraduate majors must take this course, be it for the senior capstone essay or honors thesis.

EALC 200. Directed Readings in Asian Languages. 1-12 Unit.
For Chinese, Japanese, and Korean literature. Prerequisite: consent of instructor. (Staff).

EALC 200A. International Technology Management Independent Study. 2-5 Units.
Independent work under the direction of a faculty member; written report or written examination required. Letter grade given on the basis of the report; if not appropriate, student should enroll in 390. May be repeated for credit.

EALC 200B. International Technology Management Independent Study. 2-5 Units.
Independent work under the direction of a faculty member; written report or written examination required. Letter grade given on the basis of the report; if not appropriate, student should enroll in 390. May be repeated for credit.

EALC 402A. Topics in International Technology Management. 1 Unit.
Theme for Autumn 2020 is "Digital transformation among new and traditional industries in Asia." Distinguished guest speakers and panels from industry discuss approaches in Asia to data-driven business models, influencer marketing, DevOps for new AI solutions, data privacy and security, new value chain relationships, etc. See syllabus for specific requirements, which may differ from those of other seminars at Stanford.
Same as: EASTASN 402A, EE 402A

EALC 402T. Entrepreneurship in Asian High Tech Industries. 1 Unit.
Distinctive patterns and challenges of entrepreneurship in Asia; update of business and technology issues in the creation and growth of start-up companies in major Asian economies. Distinguished speakers from industry, government, and academia.
Same as: EASTASN 402T, EE 402T

Japanese Courses

JAPAN 20. Humanities Core: Dao, Virtue, and Nature -- Foundations of East Asian Thought. 3 Units.
This course explores the values and questions posed in the formative period of East Asian civilizations. Notions of a Dao ("Way") are common to Confucianism, Daoism, and Buddhism, but those systems of thought have radically different ideas about what that Dao is and how it might be realized in society and an individual's life. These systems of thought appeared first in China, and eventually spread to Korea and Japan. Each culture developed its own ways of reconciling the competing systems, but in each case the comprehensive structure of values and human ideals differs significantly from those that appeared elsewhere in the ancient world. The course examines East Asian ideas about self-cultivation, harmonious society, rulership, and the relation between human and nature with a view toward expanding our understanding of these issues in human history, and highlighting their legacies in Asian civilizations today. The course features selective readings in classics of Confucian, Daoist, and Buddhist texts that present the foundational tenets of Asian thought. N. B. This is the first of three courses in the Humanities Core, East Asian track. These courses show how history and ideas shape our world and future. Take all three to experience a year-long intellectual community dedicated to the life of the mind.
Same as: CHINA 20, HUMCORE 20, KOREA 20

JAPAN 21. Humanities Core: Love and Betrayal in Asia. 3 Units.
Why are lovers in storybooks East and West always star-crossed? Why do love and death seem to go together? For every Romeo and Juliet, there are dozens of doomed lovers in the Asian literary repertoires, from Genji's string of embittered mistresses, to the Butterfly lovers in early modern China, to the voices of desire in Koryo love songs, to the devoted adolescent cousins in Dream of the Red Chamber, to the media stars of Korean romantic drama, now wildly popular throughout Asia. In this course, we explore how the love story has evolved over centuries of East Asian history, asking along the way what we can learn about Chinese, Japanese, and Korean views of family and community, gender and sexuality, truth and deception, trust and betrayal, ritual and emotion, and freedom and solidarity from canonical and non-canonical works in East Asian literatures. N.B. This is the second of three courses in the East Asian track. These courses offer an unparalleled opportunity to study East Asian history and culture, past and present. Take all three to experience a year-long intellectual community dedicated to exploring how ideas have shaped our world and future.
Same as: CHINA 21, HUMCORE 21, KOREA 21

JAPAN 21Q. Humanities Core: Love and Betrayal in Asia. 3 Units.
Why are lovers in storybooks East and West always star-crossed? Why do love and death seem to go together? For every Romeo and Juliet, there are dozens of doomed lovers in the Asian literary repertoires, from Genji's string of embittered mistresses, to the Butterfly lovers in early modern China, to the voices of desire in Koryo love songs, to the devoted adolescent cousins in Dream of the Red Chamber, to the media stars of Korean romantic drama, now wildly popular throughout Asia. In this course, we explore how the love story has evolved over centuries of East Asian history, asking along the way what we can learn about Chinese, Japanese, and Korean views of family and community, gender and sexuality, truth and deception, trust and betrayal, ritual and emotion, and freedom and solidarity from canonical and non-canonical works in East Asian literatures. Same as: CHINA 21Q, HUMCORE 21Q, KOREA 21Q

JAPAN 24. Humanities Core: How to be Modern in East Asia. 3-5 Units.
Modern East Asia was almost continuously convulsed by war and revolution in the 19th and 20th centuries. But the everyday experience of modernity was structured more profoundly by the widening gulf between the country and the city, economically, politically, and culturally. This course examines literary and cinematic works from China and Japan that respond to and reflect on the city/country divide, framing it against issues of class, gender, national identity, and ethnicity. It also explores changing ideas about home/hometown, native soil, the folk, roots, migration, enlightenment, civilization, progress, modernization, nationalism, cosmopolitanism, and sustainability. All materials are in English. This course is part of the Humanities Core: https://humanitiescore.stanford.edu/.
Same as: CHINA 24, COMPLIT 44, HUMCORE 133, KOREA 24

JAPAN 52. Global Humanities: The Grand Millennium, 800-1800. 3-4 Units.
How should we live? This course explores ethical pathways in European, Islamic, and East Asian traditions: mysticism and rationality, passion and duty, this and other worldly, ambition and peace of mind. They all seem to be pairs of opposites, but as we'll see, some important historical figures managed to follow two or more of them at once. We will read works by successful thinkers, travelers, poets, lovers, and bureaucrats written between 800 and 1900 C.E. We will ask ourselves whether we agree with their choices and judgments about what is a life well lived.
Same as: DLCL 52, HISTORY 206D, HUMCORE 52

JAPAN 60. Asian Arts and Cultures. 5 Units.
An exploration of the visual arts of East and South Asia from ancient to modern times, in their social, religious, literary and political contexts. Analysis of major monuments of painting, sculpture and architecture will be organized around themes that include ritual and funerary arts, Buddhist art and architecture across Asia, landscape and narrative painting, culture and authority in court arts, and urban arts in the early modern world.
Same as: ARTHIST 2

JAPAN 82N. Joys and Pains of Growing Up and Older in Japan. 3 Units.
What do old and young people share in common? With a focus on Japan, a country with a large long-living population, this seminar spotlights older people's lives as a reflectiion of culture and society, history, and current social and personal changes. Through discussion of multidisciplinary studies on age, analysis of narratives, and films, we will gain a closer understanding of Japanese society and the multiple meanings of growing up and older. Students will also create a short video/audio profile of an older individual, and we will explore cross-cultural comparisons. Held in Knight Bldg. Rm. 201.

JAPAN 95A. Japanese Alternative Spring Break. 1 Unit.
An Alternative Spring Break (ASB) course through Haas Center. Directed reading course, designed by the students. http://viaprograms.org/expand-your-boundaries/social-innovation-design-thinking/design-thinking-for-social-innovation/.

JAPAN 110. Romance, Desire, and Sexuality in Modern Japanese Literature. 3-4 Units.
This class is structured around three motifs: love suicide (as a romantic ideal), female desire, and same-sex sexuality. Over the course of the quarter we will look at how these motifs are treated in the art and entertainment from three different moments of Japanese history: the Edo period (1615-1868), the modern period (1920-65), and the contemporary period (1965-present). We will start by focusing on the most traditional representations of these topics. Subsequently, we will consider how later artists and entertainers revisited the conventional treatments of these motifs, informing them with new meanings and social significance. We will devote particular attention to how this material comments upon issues of gender, sexuality, and human relationships in the context of Japan. Informing our perspective will be feminist and queer theories of reading and interpretation.

JAPAN 112A. Asian Screen Cultures. 3-5 Units.
Asian screen culture, ranging from cinema to online games, has (re)shaped the global and national/regional imaginings of Asia. The Post-Cold War intensification of intra-Asian interactions has precipitated the rise of a Pan-Asian regional identity wherein the nation-state is not yet obsolete. What role does screen culture plays in the border-crossing interplay among languages, ideologies, aesthetics, and affect? How does the converging media of screen culture capture local/global desires and propel the history of transformation of sign systems from the written words to visual moving images in a digital time? How do we understand the aesthetic, storytelling, and politics of Asian screen cultures vis-à-vis its historical and social context? While exploring these transnational and transdisciplinary questions, this course will deal with topical issues of Pan-Asian identity, (trans)nationalism, (un)translatability, commodity fetishism, locality and globality, technophobia, and politics of gender. Students will learn how to think and write about screen cultures of East Asia in particular and of our world of screens in general.

JAPAN 118. Humanities Core: Everybody Eats: The Language, Culture, and Ethics of Food in East Asia. 3 Units.
Many of us have grown up eating "Asian" at home, with friends, on special occasions, or even without full awareness that Asian is what we were eating. This course situates the three major culinary traditions of East Asia--China, Japan, and Korea--in the histories and civilizations of the region, using food as an introduction to their rich repertoires of literature, art, language, philosophy, religion, and culture. It also situates these seemingly timeless gastronomies within local and global flows, social change, and ethical frameworks. Specifically, we will explore the traditional elements of Korean court food, and the transformation of this cuisine as a consequence of the Korean War and South Korea¿s subsequent globalizing economy; the intersection of traditional Japanese food with past and contemporary identities; and the evolution of Chinese cuisine that accompanies shifting attitudes about the environment, health, and well-being. Questions we will ask ourselves during the quarter include, what is "Asian" about Asian cuisine? How has the language of food changed? Is eating, and talking about eating, a gendered experience? How have changing views of the self and community shifted the conversation around the ethics and ecology of meat consumption?.

JAPAN 121. Translating Japan, Translating the West. 3-4 Units.
Translation lies at the heart of all intercultural exchange. This course introduces students to the specific ways in which translation has shaped the image of Japan in the West, the image of the West in Japan, and Japan's self-image in the modern period. What texts and concepts were translated by each side, how, and to what effect? No prior knowledge of Japanese language necessary.
Same as: COMPLIT 142B, JAPAN 221

JAPAN 122. Translating Cool: Globalized Popular Culture in Asia. 3-4 Units.
Did you grow up watching Pokémon and Power Rangers? Have you danced along to "Gangnam Style"? As we become increasingly exposed to Asian popular culture and the Internet facilitates instant access to new media, previous localized forms of entertainment--animated cartoons, comics, video games, music videos, film, and soap operas--have become part of a global staple. However, these cultural forms have emerged not only in their original form with mediation of subtitles. Many have undergone various processes of adaptation and translation so that we no longer recognize that these products had ever originated elsewhere. This course will immerse students in a range of Japanese and Korean cultural phenomena to reveal the spectrum of translation practices across national boundaries. We will inquire into why these cultural forms have such compelling and powerful staying power, contextualize them within their frames of production, and explore the strategies, limitations, and potential of translational practices.nnContact instructor for place. dafnazur@stanford.edunKnight 201.
Same as: JAPAN 222, KOREA 122, KOREA 222

JAPAN 123. Critical Translation Studies. 3-5 Units.
Seminal works of translation theory and scholarship from a wide array of disciplinary, regional, linguistic, and historical perspectives. Readings are in English, but students must have at least two years of training or the equivalent in another language, or permission from the instructor. (Important note: Students who wish to count this course toward requirements in the department of East Asian Languages and Cultures must have permission from their EALC advisor.).
Same as: COMPLIT 228, JAPAN 223

JAPAN 124. Manga as Literature. 3-5 Units.
Analysis of representative manga as narratives that combine verbal and visual elements, with attention to historical and cultural background. Representative manga by Tezuka Osamu, Tatsumi Yoshihiro, Koike Kazuo, Taniguchi Jiro, Natsume Ono, Kono Fumiyo, and others. All readings in English.nnnClass meets in Knight Bldg, Rm 018. Contact instructor (sdcarter@stanford.edu) for place.
Same as: JAPAN 224

JAPAN 125. Tokyo, Kyoto, Osaka and beyond: place in modern Japan. 2-5 Units.
From the culturally distinct urban centers of Tokyo, Kyoto, and Osaka to the sharp contrasts between the southernmost and northernmost parts of Japan, modern Japanese literature and film present rich characterizations of place that have shaped Japanese identities at the national, regional, and local levels. This course focuses attention on how these settings operate in key works of literature and film, with an eye toward developing students' understanding of diversity within modern Japan. FOR UNDERGRADS: This course must be taken for a minimum of 3 units and a letter grade to be eligible for Ways credit.
Same as: JAPAN 225

JAPAN 133. Japanese Media Culture. 2-4 Units.
Focuses on the intertwined histories of the postwar Japanese television, anime, music, and video game industries, and how their development intersects with wider trends in Japanese society. We will pay particular attention to questions of affect, labor, and environment in media production, consumption, and style.
Same as: JAPAN 233

JAPAN 138. Introduction to Modern Japanese Literature and Culture. 3-5 Units.
This class introduces key literary texts from Japan¿s modern era (1868-present), locating these works in the larger political, social, and cultural trends of the period. nThe goal of the class is to use literary texts as a point of entry to understand the grand narrative of Japan's journey from its tentative re-entry into the international community in the 1850s, through the cataclysm of the Pacific War, the remarkable prosperity of the bubble years in the 1980s until most recent, post-3/11 catastrophe-evoked Zeitgeist.nnWe will examine a variety of primary texts by such authors as Futabatei Shimei, Higuchi Ichiy¿, Natsume S¿seki, Tanizaki Jun¿ichir¿, Miyamoto Yuriko, Kawabata Yasunari, ¿e Kenzabur¿, Yoshimoto Banana, Tawada Y¿ko, and Yu Miri among others. Each text will be discussed in detail paying attention to its specific character and contextualized within larger political trends (e.g., the modernization program of the Meiji regime, the policies of Japan's wartime government, and postwar Japanese responses to the cold war), social developments (e.g., changing notions of social class, the women's rights movement, the social effects of the postwar economic expansion, ecocriticism), and cultural movements (e.g., literary reform movement of the 1890s, modernism of the 1920s and 30s, postmodernism of the 1980s, and exophony). Students will also be encouraged to think about the ways these texts relate to each other and a variety of issues beyond the Japanese socio-cultural and historical context. nnNo prior knowledge of Japanese is required for this course, although students with sufficient proficiency are welcome to refer to original sources.nPrerequisites: None.
Same as: JAPAN 238

JAPAN 141. Japanese Performance Traditions. 2-5 Units.
Japanese performance traditions present a distinct challenge to modern Western concepts of gender, performance, self-expression, and even the human body itself. This course introduces the socio-historical underpinnings of these traditions, and invites students to engage in a fundamental questioning of the relationship between performance, gender, and cross-cultural interpretation. This course is designed for students with interests in performance, gender, and media as well as those with an interest in Japan. Genres covered include Noh, Kabuki, Bunraku, and Butoh.
Same as: COMPLIT 218A, JAPAN 241

JAPAN 144. Inventing Japan: Traditional Culture in the Modern World. 3-5 Units.
Features of traditional Japanese culture such as temples and shrines, kimono, and cultural practices like the tea ceremony, have played an important role in both domestic and international representations of Japan since the late nineteenth century. In this course students will be introduced to these elements of traditional Japanese culture, while learning to cast a critical eye on the concept of tradition. Themes will include discussion of the gendered nature of tradition in modern Japan and the role played by such traditions in constructing national identity, both in Japan and overseas. We will explore these topics using the theoretical frameworks of invention of tradition and reformatting of tradition. Contact instructor for room. rcorbett@stanford.edu.
Same as: JAPAN 244

JAPAN 148. Modern Japanese Narratives: Literature and Film. 3-5 Units.
Central issues in modern Japanese visual and written narrative. Focus is on competing views of modernity, war, and crises of individual and collective identity and responsibility. Directors and authors include Kurosawa, Mizoguchi, Ozu, Ogai, Akutagawa, Tanizaki, Abe, and Oe.
Same as: JAPAN 248

JAPAN 151. Japanese Business Culture and Systems. 3-5 Units.
Japanese sociocultural dynamics in industrial and corporate structures, negotiating styles, decision making, and crisis management. Practicum on Japan market strategies.
Same as: JAPAN 251

JAPAN 151B. The Nature of Knowledge: Science and Literature in East Asia. 4-5 Units.
"The Nature of Knowledge" explores the intersections of science and humanities East Asia. It covers a broad geographic area (China, Japan, and Korea) along a long temporal space (14th century - present) to investigate how historical notions about the natural world, the human body, and social order defied, informed, and constructed our current categories of science and humanities. The course will make use of medical, geographic, and cosmological treatises from premodern East Asia, portrayals and uses of science in modern literature, film, and media, as well as theoretical and historical essays on the relationships between literature, science, and society.nnAs part of its exploration of science and the humanities in conjunction, the course addresses how understandings of nature are mediated through techniques of narrative, rhetoric, visualization, and demonstration. In the meantime, it also examines how the emergence of modern disciplinary "science" influenced the development of literary language, tropes, and techniques of subject development. This class will expose the ways that science has been mobilized for various ideological projects and to serve different interests, and will produce insights into contemporary debates about the sciences and humanities.
Same as: CHINA 151B, CHINA 251B, JAPAN 251B, KOREA 151, KOREA 251

JAPAN 152. Art Animation. 2-4 Units.
While anime has spread around the world, Japanese art animators have been busy developing a parallel tradition, built from a more personal, experimental, and idiosyncratic approach to the medium. Looking closely at key works from major artists in the field, this course explores art animation from a variety of perspectives: animation scene; philosophical attempts to account for animated movement; and art animation's unique perspective on Japanese culture.
Same as: FILMSTUD 146, JAPAN 252

JAPAN 155. The Vampire in Anime. 3-4 Units.
Analysis of anime where vampires play central roles as characters and/or in plot development. Comparison of character and plot development within anime series and Western vampire literature will be the main focus; attention will also be paid to the development of the vampire as a literary and film character in the West, the conception of the supernatural in Japanese culture, and the points of similarity and difference between the two.
Same as: JAPAN 255

JAPAN 157. Science, Power, and Knowledge: East Asia to 1900. 3-5 Units.
In the early modern period, East Asian societies featured long-established institutions of learning and traditions of knowledge. This course examines the relationship between knowledge and power in East Asia societies prior to 1900. It explores how knowledge production operated in late imperial China (1550-1900), Chos'n Korea (1392-1910), and Tokugawa Japan (1600-1868). Among the themes addressed are: the state's role in patronizing science and knowledge; major intellectual movements; engagement with Western science and religion; East Asian statecraft; and East Asian understandings of space and geography. nTaking a holistic perspective, it places science and technology in 1) a social and cultural context 2) in relation to other bodies and fields of knowledge 3) in comparison to other societies in a similar historical time period. A socially embedded perspective on knowledge and science seeks to appreciate how politics, society, and knowledge are integrated, and in particular how science and knowledge can be both instruments and sites of political power. By exploring these links, the course will also illustrate how our modern disciplinary categories of natural science,social science and the humanities cannot be taken for granted and the areas of knowledge they cover can be deeply intertwined. nnThe course will also address these issues historically and across geographic regions in East Asia and beyond. The comparative lens and frameworks these perspectives can offer will bring an awareness of the diverse traditions of knowledge production in East Asia. Its examination of East Asian encounters with Western paradigms of knowledge throughout the early modern period will also illustrate how communication occurs across cultural, social, and linguistic barriers and how diverse world-views were managed in these encounters. These encounters of knowledge-exchange between Jesuit missionaries, Ming literati, Korean aristocrats, and Japanese doctors also show how cultural identities were constructed, reinforced, and challenged. These identities, expressed through the mastery of knowledge, are essential for understanding how East Asian reckoned with growing pressures to adopt Western industrial technology and military science in the late nineteenth century.

JAPAN 157S. Tyranny and Resistance: East Asia's Political Culture and Tradition. 3-5 Units.
What is tyranny? When does political power cease to be legitimate and government become tyrannical? And what can individuals do in the face of tyranny? This course will explore East Asia's long political tradition through the problem of tyranny and its resistance. We will cover a wide range of material. We begin with how seminal political thinkers in East Asia, including Warring States philosophers such as Mencius and Han Feizi, understood the boundary between legitimate and illegitimate authority. We will also look at the strategies used by various political actors, including government officials, cultural or social elites, and common people, when they confronted what they perceived to be the unjust exercise political power, whether in the form of despotic monarchs, corrupt authorities, or general misrule. Our discussions will be wide-ranging. We will pay particular attention to how these historical examples from China, Korea, and Japan¿s past have resonated with modern and contemporary political discussions in contemporary East Asian societies.
Same as: CHINA 157S, KOREA 157S

JAPAN 158. A Critical and Historical Survey of Classical Japanese Literature. 2-5 Units.
This course presents a broad survey of classical Japanese literature in English translation, with particular emphasis on prose fiction and poetry. We will make use of multiple, complementary modes of literary criticism, beginning with historicism and formalism, which reflect different assumptions and interpretive priorities. The approach is integrative, with attention paid throughout to the intersections between literature, social and institutional history, and religion. Key questions to be explored include the following: How were the major works of classical Japanese literature understood by readers during the medieval and early-modern periods? How did the current canon of classical Japanese literature arise, and what historical forces shaped its development? How might modern modes of literary criticism help us better approach premodern Japanese literature, and what are their limitations?.
Same as: JAPAN 258

JAPAN 159. The Paranormal in Premodern Japan. 4 Units.
This course will explore the various stories of gods, ghosts, demons, and monsters that appear throughout the Premodern period in Japan. The course will use the concept of the paranormal to explore the ways these beings are depicted as living alongside humanity and that humanity can easily and unknowingly enter into the realm of these beings.
Same as: JAPAN 259

JAPAN 160. Classical Japanese Literature in Translation. 4 Units.
Prose, poetry, and drama from the 10th-19th centuries. Historical, intellectual, and cultural context. Works vary each year. May be repeated for credit with consent of instructor.
Same as: JAPAN 260

JAPAN 161. Japanese Ghosts: The Supernatural in Japanese Art and Entertainment. 4 Units.
The complex meanings of ghosts in Japanese culture. Representations of the supernatural in images, drama, oral narratives, prose, film, comics and animation at different moments in Japanese history.
Same as: JAPAN 261

JAPAN 162. Japanese Poetry and Poetics. 2-4 Units.
Heian through Meiji periods with emphasis on relationships between the social and aesthetic. Works vary each year. This year's genre is the diary. Prerequisites: 246, 247, or equivalent.
Same as: JAPAN 262

JAPAN 163. Japanese Performance Traditions. 3-4 Units.
Major paradigms of gender in Japanese performance traditions from ancient to modern times, covering Noh, Kabuki, Bunraku, and Takarazuka.
Same as: JAPAN 263

JAPAN 163A. Beauty and Renunciation in Japan. 3 Units.
Is it okay to feel pleasure? Should humans choose beauty or renunciation? This is the main controversy of medieval Japan. This course introduces students to the famous literary works that created a world of taste, subtlety, and sensuality. We also read essays that warn against the risks of leading a life of gratification, both in this life and in the afterlife. And we discover together the ways in which these two positions can be not that far from each other. Does love always lead to heartbreak? Is the appreciation of nature compatible with the truths of Buddhism? Is it good to have a family? What kind of house should we build for ourselves? Can fictional stories make us better persons? Each week, during the first class meeting, we will focus on these issues in Japan. During the second class meeting, we will participate in a collaborative conversation with the other students and faculty in Humanities Core classes, about other regions and issues. This course is taught in English.
Same as: HUMCORE 123

JAPAN 164. Introduction to Premodern Japanese. 3-5 Units.
Readings from Heian, Kamakura, Muromachi, and early Edo periods with focus on grammar and reading comprehension. Prerequisite: JAPANLNG 129B or 103, or equivalent.
Same as: JAPAN 264

JAPAN 165. Readings in Premodern Japanese. 2-5 Units.
Edo and Meiji periods with focus on grammar and reading comprehension. May be repeated for credit. Prerequisite: 246 or equivalent.
Same as: JAPAN 265

JAPAN 166. Introduction to Sino-Japanese. 3-5 Units.
Readings in Sino-Japanese (*kambun*) texts of the Heian, Kamakura, and Muromachi periods, with focus on grammar and reading comprehension. Prerequisite: 246 or equivalent.
Same as: JAPAN 266

JAPAN 170. The Tale of Genji and Its Historical Reception. 2-5 Units.
Approaches to the tale including 12th-century allegorical and modern feminist readings. Influence upon other works including poetry, Noh plays, short stories, modern novels, and comic book (manga) retellings. Prerequisite for graduate students: JAPANLNG 129B or 103, or equivalent.nnThis course must be taken for a minimum of 3 units and a letter grade to be eligible for Ways credit.
Same as: JAPAN 270

JAPAN 184. Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting. 4 Units.
Changes marking the transition from medieval to early modern Japanese society that generated a revolution in visual culture, as exemplified in subjects deemed fit for representation; how commoners joined elites in pictorializing their world, catalyzed by interactions with the Dutch.
Same as: ARTHIST 184, ARTHIST 384, JAPAN 284

JAPAN 185. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868. 4 Units.
Narratives of conflict, pacification, orthodoxy, nostalgia, and novelty through visual culture during the change of episteme from late medieval to early modern, 16th through early 19th centuries. The rhetorical messages of castles, teahouses, gardens, ceramics, paintings, and prints; the influence of Dutch and Chinese visuality; transformation in the roles of art and artist; tensions between the old and the new leading to the modernization of Japan.
Same as: ARTHIST 187, ARTHIST 387, JAPAN 285

JAPAN 188. The Japanese Tea Ceremony: The History, Aesthetics, and Politics Behind a National Pastime. 5 Units.
The Japanese tea ceremony, the ultimate premodern multimedia phenomenon, integrates architecture, garden design, ceramics, painting, calligraphy, and other treasured objects into a choreographed ritual wherein host, objects, and guests perform designated roles on a tiny stage sometimes only six feet square.. In addition to its much-touted aesthetic and philosophical aspects, the practice of tea includes inevitable political and rhetorical dimensions. This course traces the evolution of tea practice from its inception within the milieu of courtier diversions, Zen monasteries, and warrior villas, through its various permutations into the 20th century, where it was manipulated by the emerging industrialist class for different-but ultimately similar-ends.
Same as: ARTHIST 287A, JAPAN 288

JAPAN 189B. Honors Research. 5 Units.
Open to senior honors students to write thesis.

JAPAN 191. Japanese Pragmatics. 2-4 Units.
The choice of linguistic expressions and our understanding of what is said involve multiple sociocultural, cognitive and discourse factors. Can such pragmatic factors and processes be considered universal to all languages, or are there variations among languages? The course will investigate an array of phenomena observed in Japanese. Through readings and projects, students will deepen their knowledge of Japanese and consider theoretical implications. Prerequisites: one year of Japanese and a course in linguistics, or two years of Japanese, or consent of instructor.
Same as: JAPAN 291

JAPAN 192. Analyzing Japanese Text and Talk. 2-4 Units.
Are there reasons why certain words, phrases, sentences and prosody are chosen by language speakers and writers in specific contexts? What linguistic and extra-linguistic elements give the hearers and readers the impression that certain utterances and passages are friendly, accusatory, officious, humorous, personal, formal, colloquial, etc.? This seminar provides an introduction to different theoretical and analytical approaches to studying language use in context (e.g. pragmatics, sociolinguistics, usage-based grammar, conversational analysis, critical discourse analysis) and an opportunity to critically analyze text and talk. Using the analytical tools acquired through readings and discussions, students will be able to analyze Japanese materials of their selection. The course is designed for graduate students and advanced undergraduate students with interests either (or both) in Japanese linguistics and literature.
Same as: JAPAN 292

JAPAN 193. Acquisition of Japanese as a Second Language. 2-4 Units.
This course provides students with a broad overview of second language acquisition (SLA) research and introduces recent SLA studies on Japanese as a second language (L2). It covers six topics: (1) the evolution of the field, (2) approaches to understanding learner language, (3) current state of knowledge of L2 developmental patterns, (4) theories of L2 learning, (5) factors that affect SLA, and (6) instructed SLA. By reading and discussing exemplary SLA studies on L2 Japanese as well as seminal papers on these topics, students will develop abilities to analyze learner language from multiple perspectives, critically read research reports, and consider implications for L2 teaching.
Same as: JAPAN 293

JAPAN 197. Points in Japanese Grammar. 2-4 Units.
(Formerly JAPANLIT157/257) The course provides practical but in-depth analyses of selected points in Japanese grammar that are often difficult to acquire within the limited hours of language courses. We consider findings from linguistic research, focusing on differences between similar expressions and distinctions that may not be salient in English, with the aim to provide systematic analytical background for more advanced understanding of the language. May be repeat for credit. Prerequisite: JAPANLNG23 or equivalent for JAPAN197; JAPANLNG103 or equivalent for JAPAN297.
Same as: JAPAN 297

JAPAN 198C. Senior Research. 1 Unit.
EALC students writing a Senior Capstone Essay who wish to conduct research with their adviser may enroll in this course for 1 unit, for 1 quarter.
Same as: Capstone Essay

JAPAN 198H. Senior Research. 2-5 Units.
EALC juniors or seniors pursuing honors research should sign up for this course under their faculty adviser for research credit.
Same as: Honors Thesis

JAPAN 199. Individual Reading in Japanese. 1-4 Unit.
Asian Languages majors only. May be repeated for credit. Prerequisites: JAPANLNG 129B or 103, and consent of instructor.

JAPAN 200. Directed Reading in Japanese. 1-12 Unit.
"Independent studies under the direction of a faculty member for which academic credit may properly be allowed. Research will require some in-person access to archival materials in Hoover Institution, Stanford's East Asia Library, and/or Branner Map Collections. For EALC students; non-EALC students, should seek instructor permission before enrolling in section.".

JAPAN 201. Proseminar: Introduction to Graduate Study in Japanese. 2-5 Units.
Bibliographical and research methods. Major trends in literary and cultural theory and critical practice. May be repeated once for credit. Prerequisite: JAPANLNG 103 or 129B, or consent of instructor.

JAPAN 202. Bibliographic and Research Methods in Japanese. 1-3 Unit.
The use of library and online resources for the study of Japanese literature, language, and culture. Prerequisite: JAPANLNG 103 or 129B, or consent of instructor.

JAPAN 203. Teaching Japanese Humanities. 1 Unit.
Prepares graduate students to teach humanities at the undergraduate level. Topics include syllabus development and course design, techniques for generating discussion, effective grading practices, and issues particular to the subject matter.

JAPAN 210. Romance, Desire, and Sexuality in Modern Japanese Literature. 3-4 Units.
This class is structured around three motifs: love suicide (as a romantic ideal), female desire, and same-sex sexuality. Over the course of the quarter we will look at how these motifs are treated in the art and entertainment from three different moments of Japanese history: the Edo period (1615-1868), the modern period (1920-65), and the contemporary period (1965-present). We will start by focusing on the most traditional representations of these topics. Subsequently, we will consider how later artists and entertainers revisited the conventional treatments of these motifs, informing them with new meanings and social significance. We will devote particular attention to how this material comments upon issues of gender, sexuality, and human relationships in the context of Japan. Informing our perspective will be feminist and queer theories of reading and interpretation.
Same as: FEMGEN 110J, FEMGEN 210J, JAPAN 110

JAPAN 212A. Asian Screen Cultures. 3-5 Units.
Asian screen culture, ranging from cinema to online games, has (re)shaped the global and national/regional imaginings of Asia. The Post-Cold War intensification of intra-Asian interactions has precipitated the rise of a Pan-Asian regional identity wherein the nation-state is not yet obsolete. What role does screen culture plays in the border-crossing interplay among languages, ideologies, aesthetics, and affect? How does the converging media of screen culture capture local/global desires and propel the history of transformation of sign systems from the written words to visual moving images in a digital time? How do we understand the aesthetic, storytelling, and politics of Asian screen cultures vis-à-vis its historical and social context? While exploring these transnational and transdisciplinary questions, this course will deal with topical issues of Pan-Asian identity, (trans)nationalism, (un)translatability, commodity fetishism, locality and globality, technophobia, and politics of gender. Students will learn how to think and write about screen cultures of East Asia in particular and of our world of screens in general.

Strategies for reading academic writings in Japanese. Readings of scholarly papers and advanced materials in Japanese in students' research areas in the humanities and social sciences. Prerequisites: JAPANLNG 103, 129B, or equivalent; and consent of instructor. May be repeat for credit.

JAPAN 238. Introduction to Modern Japanese Literature and Culture. 3-5 Units.
This class introduces key literary texts from Japan¿s modern era (1868-present), locating these works in the larger political, social, and cultural trends of the period. nThe goal of the class is to use literary texts as a point of entry to understand the grand narrative of Japan's journey from its tentative re-entry into the international community in the 1850s, through the cataclysm of the Pacific War, the remarkable prosperity of the bubble years in the 1980s until most recent, post-3/11 catastrophe-evoked Zeitgeist.nnWe will examine a variety of primary texts by such authors as Futabatei Shimei, Higuchi Ichiy¿, Natsume S¿seki, Tanizaki Jun¿ichir¿, Miyamoto Yuriko, Kawabata Yasunari, ¿e Kenzabur¿, Yoshimoto Banana, Tawada Y¿ko, and Yu Miri among others. Each text will be discussed in detail paying attention to its specific character and contextualized within larger political trends (e.g., the modernization program of the Meiji regime, the policies of Japan's wartime government, and postwar Japanese responses to the cold war), social developments (e.g., changing notions of social class, the women's rights movement, the social effects of the postwar economic expansion, ecocriticism), and cultural movements (e.g., literary reform movement of the 1890s, modernism of the 1920s and 30s, postmodernism of the 1980s, and exophony). Students will also be encouraged to think about the ways these texts relate to each other and a variety of issues beyond the Japanese socio-cultural and historical context. nnNo prior knowledge of Japanese is required for this course, although students with sufficient proficiency are welcome to refer to original sources.nPrerequisites: None.
Same as: JAPAN 138

JAPAN 239. Modern Japanese Short Stories. 2-4 Units.
This course explores the postwar Japanese short story. We will read representative works by major authors, such as Ishikawa Jun, Hayashi Fumiko, Abe Kobe and Murakami Haruki. Attention will be devoted to both accurate reading of the Japanese prose and more general discussion of the literary features of the texts.

JAPAN 241. Japanese Performance Traditions. 2-5 Units.
Japanese performance traditions present a distinct challenge to modern Western concepts of gender, performance, self-expression, and even the human body itself. This course introduces the socio-historical underpinnings of these traditions, and invites students to engage in a fundamental questioning of the relationship between performance, gender, and cross-cultural interpretation. This course is designed for students with interests in performance, gender, and media as well as those with an interest in Japan. Genres covered include Noh, Kabuki, Bunraku, and Butoh.
Same as: COMPLIT 218A, JAPAN 141

JAPAN 244. Inventing Japan: Traditional Culture in the Modern World. 3-5 Units.
Features of traditional Japanese culture such as temples and shrines, kimono, and cultural practices like the tea ceremony, have played an important role in both domestic and international representations of Japan since the late nineteenth century. In this course students will be introduced to these elements of traditional Japanese culture, while learning to cast a critical eye on the concept of tradition. Themes will include discussion of the gendered nature of tradition in modern Japan and the role played by such traditions in constructing national identity, both in Japan and overseas. We will explore these topics using the theoretical frameworks of invention of tradition and reformatting of tradition. Contact instructor for room. rcorbett@stanford.edu.
Same as: JAPAN 144

JAPAN 248. Modern Japanese Narratives: Literature and Film. 3-5 Units.
Central issues in modern Japanese visual and written narrative. Focus is on competing views of modernity, war, and crises of individual and collective identity and responsibility. Directors and authors include Kurosawa, Mizoguchi, Ozu, Ogai, Akutagawa, Tanizaki, Abe, and Oe.
Same as: JAPAN 148

JAPAN 251. Japanese Business Culture and Systems. 3-5 Units.
Japanese sociocultural dynamics in industrial and corporate structures, negotiating styles, decision making, and crisis management. Practicum on Japan market strategies.
Same as: JAPAN 151

JAPAN 251B. The Nature of Knowledge: Science and Literature in East Asia. 4-5 Units.
"The Nature of Knowledge" explores the intersections of science and humanities East Asia. It covers a broad geographic area (China, Japan, and Korea) along a long temporal space (14th century - present) to investigate how historical notions about the natural world, the human body, and social order defied, informed, and constructed our current categories of science and humanities. The course will make use of medical, geographic, and cosmological treatises from premodern East Asia, portrayals and uses of science in modern literature, film, and media, as well as theoretical and historical essays on the relationships between literature, science, and society.nnAs part of its exploration of science and the humanities in conjunction, the course addresses how understandings of nature are mediated through techniques of narrative, rhetoric, visualization, and demonstration. In the meantime, it also examines how the emergence of modern disciplinary "science" influenced the development of literary language, tropes, and techniques of subject development. This class will expose the ways that science has been mobilized for various ideological projects and to serve different interests, and will produce insights into contemporary debates about the sciences and humanities.
Same as: CHINA 151B, CHINA 251B, JAPAN 151B, KOREA 151, KOREA 251

JAPAN 252. Art Animation. 2-4 Units.
While anime has spread around the world, Japanese art animators have been busy developing a parallel tradition, built from a more personal, experimental, and idiosyncratic approach to the medium. Looking closely at key works from major artists in the field, this course explores art animation from a variety of perspectives: animation scene; philosophical attempts to account for animated movement; and art animation's unique perspective on Japanese culture.
Same as: FILMSTUD 146, JAPAN 152

JAPAN 252A. Special Topics in Japanese Literature. 2-5 Units.
For graduate students working with Japanese literature. This course covers a selection of core texts in modern Japanese fiction and current scholarly approaches to literature in relation to 1) censorship, and 2) film. During the second half of the quarter, students will conduct guided research on these topics, to culminate in a final research paper 20-25 pages in length. For the first half of the quarter, class will be conducted entirely in Japanese. Prerequisite: fourth-year Japanese or the equivalent, and permission of the instructors.

JAPAN 253. Japanese Graduate Seminar: Translation Theory & Premodern Literature. 2-5 Units.
Translation Theory & Premodern Literature course.

JAPAN 255. The Vampire in Anime. 3-4 Units.
Analysis of anime where vampires play central roles as characters and/or in plot development. Comparison of character and plot development within anime series and Western vampire literature will be the main focus; attention will also be paid to the development of the vampire as a literary and film character in the West, the conception of the supernatural in Japanese culture, and the points of similarity and difference between the two.
Same as: JAPAN 155

JAPAN 257. Science, Power, and Knowledge: East Asia to 1900. 3-5 Units.
In the early modern period, East Asian societies featured long-established institutions of learning and traditions of knowledge. This course examines the relationship between knowledge and power in East Asia societies prior to 1900. It explores how knowledge production operated in late imperial China (1550-1900), Chos'n Korea (1392-1910), and Tokugawa Japan (1600-1868). Among the themes addressed are: the state's role in patronizing science and knowledge; major intellectual movements; engagement with Western science and religion; East Asian statecraft; and East Asian understandings of space and geography. nTaking a holistic perspective, it places science and technology in 1) a social and cultural context 2) in relation to other bodies and fields of knowledge 3) in comparison to other societies in a similar historical time period. A socially embedded perspective on knowledge and science seeks to appreciate how politics, society, and knowledge are integrated, and in particular how science and knowledge can be both instruments and sites of political power. By exploring these links, the course will also illustrate how our modern disciplinary categories of natural science,social science and the humanities cannot be taken for granted and the areas of knowledge they cover can be deeply intertwined. nnThe course will also address these issues historically and across geographic regions in East Asia and beyond. The comparative lens and frameworks these perspectives can offer will bring an awareness of the diverse traditions of knowledge production in East Asia. Its examination of East Asian encounters with Western paradigms of knowledge throughout the early modern period will also illustrate how communication occurs across cultural, social, and linguistic barriers and how diverse world-views were managed in these encounters. These encounters of knowledge-exchange between Jesuit missionaries, Ming literati, Korean aristocrats, and Japanese doctors also show how cultural identities were constructed, reinforced, and challenged. These identities, expressed through the mastery of knowledge, are essential for understanding how East Asian reckoned with growing pressures to adopt Western industrial technology and military science in the late nineteenth century.

JAPAN 258. A Critical and Historical Survey of Classical Japanese Literature. 2-5 Units.
This course presents a broad survey of classical Japanese literature in English translation, with particular emphasis on prose fiction and poetry. We will make use of multiple, complementary modes of literary criticism, beginning with historicism and formalism, which reflect different assumptions and interpretive priorities. The approach is integrative, with attention paid throughout to the intersections between literature, social and institutional history, and religion. Key questions to be explored include the following: How were the major works of classical Japanese literature understood by readers during the medieval and early-modern periods? How did the current canon of classical Japanese literature arise, and what historical forces shaped its development? How might modern modes of literary criticism help us better approach premodern Japanese literature, and what are their limitations?.
Same as: JAPAN 158

JAPAN 259. The Paranormal in Premodern Japan. 4 Units.
This course will explore the various stories of gods, ghosts, demons, and monsters that appear throughout the Premodern period in Japan. The course will use the concept of the paranormal to explore the ways these beings are depicted as living alongside humanity and that humanity can easily and unknowingly enter into the realm of these beings.
Same as: JAPAN 159

JAPAN 260. Classical Japanese Literature in Translation. 4 Units.
Prose, poetry, and drama from the 10th-19th centuries. Historical, intellectual, and cultural context. Works vary each year. May be repeated for credit with consent of instructor.
Same as: JAPAN 160

JAPAN 261. Japanese Ghosts: The Supernatural in Japanese Art and Entertainment. 4 Units.
The complex meanings of ghosts in Japanese culture. Representations of the supernatural in images, drama, oral narratives, prose, film, comics and animation at different moments in Japanese history.
Same as: JAPAN 161

JAPAN 262. Japanese Poetry and Poetics. 2-4 Units.
Heian through Meiji periods with emphasis on relationships between the social and aesthetic. Works vary each year. This year's genre is the diary. Prerequisites: 246, 247, or equivalent.
Same as: JAPAN 162

JAPAN 263. Japanese Performance Traditions. 3-4 Units.
Major paradigms of gender in Japanese performance traditions from ancient to modern times, covering Noh, Kabuki, Bunraku, and Takarazuka.
Same as: JAPAN 163

JAPAN 264. Introduction to Premodern Japanese. 3-5 Units.
Readings from Heian, Kamakura, Muromachi, and early Edo periods with focus on grammar and reading comprehension. Prerequisite: JAPANLNG 129B or 103, or equivalent.
Same as: JAPAN 164

JAPAN 265. Readings in Premodern Japanese. 2-5 Units.
Edo and Meiji periods with focus on grammar and reading comprehension. May be repeated for credit. Prerequisite: 246 or equivalent.
Same as: JAPAN 165

JAPAN 266. Introduction to Sino-Japanese. 3-5 Units.
Readings in Sino-Japanese (*kambun*) texts of the Heian, Kamakura, and Muromachi periods, with focus on grammar and reading comprehension. Prerequisite: 246 or equivalent.
Same as: JAPAN 166

JAPAN 270. The Tale of Genji and Its Historical Reception. 2-5 Units.
Approaches to the tale including 12th-century allegorical and modern feminist readings. Influence upon other works including poetry, Noh plays, short stories, modern novels, and comic book (manga) retellings. Prerequisite for graduate students: JAPANLNG 129B or 103, or equivalent.nnThis course must be taken for a minimum of 3 units and a letter grade to be eligible for Ways credit.
Same as: JAPAN 170

JAPAN 279. Research in Japanese Linguistics. 2-5 Units.
This proseminar introduces Japanese linguistics research to graduate students and advanced undergraduate students. Through readings and discussions, students will familiarize themselves with materials and references in both English and Japanese in preparation for conducting research effectively in their own areas of interest in Japanese linguistics. They learn the organization and presentation of research projects and conduct a pilot project in their selected area of interest. May be repeated for credit. Prerequisite: JAPANLNG 103 or consent of instructor.

JAPAN 284. Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting. 4 Units.
Changes marking the transition from medieval to early modern Japanese society that generated a revolution in visual culture, as exemplified in subjects deemed fit for representation; how commoners joined elites in pictorializing their world, catalyzed by interactions with the Dutch.
Same as: ARTHIST 184, ARTHIST 384, JAPAN 184

JAPAN 285. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868. 4 Units.
Narratives of conflict, pacification, orthodoxy, nostalgia, and novelty through visual culture during the change of episteme from late medieval to early modern, 16th through early 19th centuries. The rhetorical messages of castles, teahouses, gardens, ceramics, paintings, and prints; the influence of Dutch and Chinese visuality; transformation in the roles of art and artist; tensions between the old and the new leading to the modernization of Japan.
Same as: ARTHIST 187, ARTHIST 387, JAPAN 185

JAPAN 287. Pictures of the Floating World: Images from Japanese Popular Culture. 5 Units.
Printed objects produced during the Edo period (1600-1868), including the Ukiyo-e (pictures of the floating world) and lesser-studied genres such as printed books (ehon) and popular broadsheets (kawaraban). How a society constructs itself through images. The borders of the acceptable and censorship; theatricality, spectacle, and slippage; the construction of play, set in conflict against the dominant neo-Confucian ideology of fixed social roles.
Same as: ARTHIST 287, ARTHIST 487X

JAPAN 288. The Japanese Tea Ceremony: The History, Aesthetics, and Politics Behind a National Pastime. 5 Units.
The Japanese tea ceremony, the ultimate premodern multimedia phenomenon, integrates architecture, garden design, ceramics, painting, calligraphy, and other treasured objects into a choreographed ritual wherein host, objects, and guests perform designated roles on a tiny stage sometimes only six feet square.. In addition to its much-touted aesthetic and philosophical aspects, the practice of tea includes inevitable political and rhetorical dimensions. This course traces the evolution of tea practice from its inception within the milieu of courtier diversions, Zen monasteries, and warrior villas, through its various permutations into the 20th century, where it was manipulated by the emerging industrialist class for different-but ultimately similar-ends.
Same as: ARTHIST 287A, JAPAN 188

JAPAN 291. Japanese Pragmatics. 2-4 Units.
The choice of linguistic expressions and our understanding of what is said involve multiple sociocultural, cognitive and discourse factors. Can such pragmatic factors and processes be considered universal to all languages, or are there variations among languages? The course will investigate an array of phenomena observed in Japanese. Through readings and projects, students will deepen their knowledge of Japanese and consider theoretical implications. Prerequisites: one year of Japanese and a course in linguistics, or two years of Japanese, or consent of instructor.
Same as: JAPAN 191

JAPAN 292. Analyzing Japanese Text and Talk. 2-4 Units.
Are there reasons why certain words, phrases, sentences and prosody are chosen by language speakers and writers in specific contexts? What linguistic and extra-linguistic elements give the hearers and readers the impression that certain utterances and passages are friendly, accusatory, officious, humorous, personal, formal, colloquial, etc.? This seminar provides an introduction to different theoretical and analytical approaches to studying language use in context (e.g. pragmatics, sociolinguistics, usage-based grammar, conversational analysis, critical discourse analysis) and an opportunity to critically analyze text and talk. Using the analytical tools acquired through readings and discussions, students will be able to analyze Japanese materials of their selection. The course is designed for graduate students and advanced undergraduate students with interests either (or both) in Japanese linguistics and literature.
Same as: JAPAN 192

JAPAN 293. Acquisition of Japanese as a Second Language. 2-4 Units.
This course provides students with a broad overview of second language acquisition (SLA) research and introduces recent SLA studies on Japanese as a second language (L2). It covers six topics: (1) the evolution of the field, (2) approaches to understanding learner language, (3) current state of knowledge of L2 developmental patterns, (4) theories of L2 learning, (5) factors that affect SLA, and (6) instructed SLA. By reading and discussing exemplary SLA studies on L2 Japanese as well as seminal papers on these topics, students will develop abilities to analyze learner language from multiple perspectives, critically read research reports, and consider implications for L2 teaching.
Same as: JAPAN 193

JAPAN 296. Modern Japanese Literature. 2-5 Units.
Advanced readings. May be repeated for credit. Prerequisite: JAPANLNG 213. Formerly JAPANLIT 396.

JAPAN 297. Points in Japanese Grammar. 2-4 Units.
(Formerly JAPANLIT157/257) The course provides practical but in-depth analyses of selected points in Japanese grammar that are often difficult to acquire within the limited hours of language courses. We consider findings from linguistic research, focusing on differences between similar expressions and distinctions that may not be salient in English, with the aim to provide systematic analytical background for more advanced understanding of the language. May be repeat for credit. Prerequisite: JAPANLNG23 or equivalent for JAPAN197; JAPANLNG103 or equivalent for JAPAN297.
Same as: JAPAN 197

JAPAN 298. The Theory and Practice of Japanese Literary Translation. 2-5 Units.
Theory and cultural status of translation in modern Japanese and English. Comparative analysis of practical translation strategies. Final project is a literary translation of publishable quality. Prerequisite: fourth-year Japanese or consent of instructor.

JAPAN 299. Master's Thesis or Translation. 1-5 Unit.
A total of 5 units, taken in one or more quarters.nn (Staff).

JAPAN 350. Japanese Historical Fiction. 1-5 Unit.
Authors include Mori Ogai, Akutagawa Ryunosuke, Tanizaki Jun'ichiro, Enchi Fumiko, Shiba Ryotaro, Fujisawa Shuhei, and Hiraiwa Yumie. Genre theory, and historical and cultural context. Works vary each year. May be repeated for credit.

JAPAN 377. Seminar: Structure of Japanese. 2-4 Units.
Linguistic constructions in Japanese. Topics vary annually. In 2009-10, focus is on noun-modifying constructions in Japanese from multiple perspectives including syntax, semantics, pragmatics, and acquisition. Contrasts with similar constructions in other languages. Typological implications. Prerequisites: courses in Japanese linguistics, consent of instructor.

JAPAN 381. Topics in Pragmatics and Discourse Analysis. 2-4 Units.
Naturally occurring discourse (conversational, narrative, or written) and theoretical implications. Discourse of different age groups, expressions of identity and persona, and individual styles. May be repeated for credit.

JAPAN 382. Research Projects in Japanese Linguistics. 2-5 Units.
For advanced graduate students with specific research projects in Japanese linguistics. Consent of instructor required.

JAPAN 389. Seminar in Premodern Japanese Literature. 2-5 Units.
This graduate seminar examines the major texts, genres, and conceptual developments in the field of premodern Japanese literary studies. It combines three approaches: 1) Reading seminar covering texts in the original Japanese in annotated print editions. 2) Review of current scholarly works in English and Japanese. 3) Methodology and bibliography workshop on digital and analog tools available to the researcher. On a rotating basis we will focus on the Ancient and Classical periods, the Medieval period, and the Early Modern period.

JAPAN 395. Early Modern Japanese Literature. 2-4 Units.
May be repeated for credit. Prerequisite: 247.

JAPAN 396. Seminar in Modern Japanese Literature. 2-5 Units.
Works and topics vary each year. May be repeated for credit. Prerequisite: fourth-year Japanese or consent of instructor.

JAPAN 399. Dissertation Research. 1-12 Unit.
For doctoral students in Japanese working on dissertations.

JAPAN 801. TGR Project. 0 Units.
.

JAPAN 802. TGR Dissertation. 0 Units.
.

Korean Courses

KOREA 20. Humanities Core: Dao, Virtue, and Nature -- Foundations of East Asian Thought. 3 Units.
This course explores the values and questions posed in the formative period of East Asian civilizations. Notions of a Dao ("Way") are common to Confucianism, Daoism, and Buddhism, but those systems of thought have radically different ideas about what that Dao is and how it might be realized in society and an individual's life. These systems of thought appeared first in China, and eventually spread to Korea and Japan. Each culture developed its own ways of reconciling the competing systems, but in each case the comprehensive structure of values and human ideals differs significantly from those that appeared elsewhere in the ancient world. The course examines East Asian ideas about self-cultivation, harmonious society, rulership, and the relation between human and nature with a view toward expanding our understanding of these issues in human history, and highlighting their legacies in Asian civilizations today. The course features selective readings in classics of Confucian, Daoist, and Buddhist texts that present the foundational tenets of Asian thought. N. B. This is the first of three courses in the Humanities Core, East Asian track. These courses show how history and ideas shape our world and future. Take all three to experience a year-long intellectual community dedicated to the life of the mind.
Same as: CHINA 20, HUMCORE 20, JAPAN 20

KOREA 21. Humanities Core: Love and Betrayal in Asia. 3 Units.
Why are lovers in storybooks East and West always star-crossed? Why do love and death seem to go together? For every Romeo and Juliet, there are dozens of doomed lovers in the Asian literary repertoires, from Genji's string of embittered mistresses, to the Butterfly lovers in early modern China, to the voices of desire in Koryo love songs, to the devoted adolescent cousins in Dream of the Red Chamber, to the media stars of Korean romantic drama, now wildly popular throughout Asia. In this course, we explore how the love story has evolved over centuries of East Asian history, asking along the way what we can learn about Chinese, Japanese, and Korean views of family and community, gender and sexuality, truth and deception, trust and betrayal, ritual and emotion, and freedom and solidarity from canonical and non-canonical works in East Asian literatures. N.B. This is the second of three courses in the East Asian track. These courses offer an unparalleled opportunity to study East Asian history and culture, past and present. Take all three to experience a year-long intellectual community dedicated to exploring how ideas have shaped our world and future.
Same as: CHINA 21, HUMCORE 21, JAPAN 21

KOREA 21Q. Humanities Core: Love and Betrayal in Asia. 3 Units.
Why are lovers in storybooks East and West always star-crossed? Why do love and death seem to go together? For every Romeo and Juliet, there are dozens of doomed lovers in the Asian literary repertoires, from Genji's string of embittered mistresses, to the Butterfly lovers in early modern China, to the voices of desire in Koryo love songs, to the devoted adolescent cousins in Dream of the Red Chamber, to the media stars of Korean romantic drama, now wildly popular throughout Asia. In this course, we explore how the love story has evolved over centuries of East Asian history, asking along the way what we can learn about Chinese, Japanese, and Korean views of family and community, gender and sexuality, truth and deception, trust and betrayal, ritual and emotion, and freedom and solidarity from canonical and non-canonical works in East Asian literatures. N.B. This is the second of three courses in the East Asian track. These courses offer an unparalleled opportunity to study East Asian history and culture, past and present. Take all three to experience a year-long intellectual community dedicated to exploring how ideas have shaped our world and future.
Same as: CHINA 21Q, HUMCORE 21Q, JAPAN 21Q

KOREA 24. Humanities Core: How to be Modern in East Asia. 3-5 Units.
Modern East Asia was almost continuously convulsed by war and revolution in the 19th and 20th centuries. But the everyday experience of modernity was structured more profoundly by the widening gulf between the country and the city, economically, politically, and culturally. This course examines literary and cinematic works from China and Japan that respond to and reflect on the city/country divide, framing it against issues of class, gender, national identity, and ethnicity. It also explores changing ideas about home/hometown, native soil, the folk, roots, migration, enlightenment, civilization, progress, modernization, nationalism, cosmopolitanism, and sustainability. All materials are in English. This course is part of the Humanities Core: https://humanitiescore.stanford.edu/.
Same as: CHINA 24, COMPLIT 44, HUMCORE 133, JAPAN 24

KOREA 101N. Kangnam Style: K-pop and the Globalization of Korean Soft Power. 4 Units.
For over a decade now, South Korea has established itself as a tireless generator of soft power, the popularity of its pop-culture spreading from Asia to the rest of the world. This class will look into the economic engine that moves this "cultural contents" industry, and will examine some of its expressions in the form of K-pop. Class meets in East Asia Library (Lathrop Library), Rm 338.

KOREA 112. Asian Screen Cultures. 3-5 Units.
Asian screen culture, ranging from cinema to online games, has (re)shaped the global and national/regional imaginings of Asia. The Post-Cold War intensification of intra-Asian interactions has precipitated the rise of a Pan-Asian regional identity wherein the nation-state is not yet obsolete. What role does screen culture plays in the border-crossing interplay among languages, ideologies, aesthetics, and affect? How does the converging media of screen culture capture local/global desires and propel the history of transformation of sign systems from the written words to visual moving images in a digital time? How do we understand the aesthetic, storytelling, and politics of Asian screen cultures vis-à-vis its historical and social context? While exploring these transnational and transdisciplinary questions, this course will deal with topical issues of Pan-Asian identity, (trans)nationalism, (un)translatability, commodity fetishism, locality and globality, technophobia, and politics of gender. Students will learn how to think and write about screen cultures of East Asia in particular and of our world of screens in general.
Same as: CHINA 112A, CHINA 212A, JAPAN 112A, JAPAN 212A, KOREA 212

KOREA 118. Humanities Core: Everybody Eats: The Language, Culture, and Ethics of Food in East Asia. 3 Units.
Many of us have grown up eating "Asian" at home, with friends, on special occasions, or even without full awareness that Asian is what we were eating. This course situates the three major culinary traditions of East Asia--China, Japan, and Korea--in the histories and civilizations of the region, using food as an introduction to their rich repertoires of literature, art, language, philosophy, religion, and culture. It also situates these seemingly timeless gastronomies within local and global flows, social change, and ethical frameworks. Specifically, we will explore the traditional elements of Korean court food, and the transformation of this cuisine as a consequence of the Korean War and South Korea¿s subsequent globalizing economy; the intersection of traditional Japanese food with past and contemporary identities; and the evolution of Chinese cuisine that accompanies shifting attitudes about the environment, health, and well-being. Questions we will ask ourselves during the quarter include, what is "Asian" about Asian cuisine? How has the language of food changed? Is eating, and talking about eating, a gendered experience? How have changing views of the self and community shifted the conversation around the ethics and ecology of meat consumption?.
Same as: CHINA 118, HUMCORE 22, JAPAN 118

KOREA 120. Narratives of Modern and Contemporary Korea. 4-5 Units.
This introductory survey will examine the development of South and North Korean literature from the turn of the 20th century until the present. The course will be guided by historical and thematic inquiries as we explore literature in the colonial period, in the period of postwar industrialization, and contemporary literature from the last decade. We will supplement our readings with critical writing about Korea from the fields of cultural studies and the social sciences in order to broaden the terms of our engagement with our primary texts.
Same as: KOREA 220

KOREA 121. Doing the Right Thing: Ethical Dilemmas in Korean Film. 3-4 Units.
Ethics and violence seem to be contradictory terms, yet much of Korean film and literature in the past five decades has demonstrated that they are an intricate and in many ways justifiable part of the fabric of contemporary existence. Film exposes time and again the complex ways in which the supposed vanguards of morality, religious institutions, family, schools, and the state are sites of condoned transgression, wherein spiritual and physical violation is inflicted relentlessly. This class will explore the ways in which questions about Truth and the origins of good and evil are mediated through film in the particular context of the political, social, and economic development of postwar South Korea. Tuesday classes will include a brief introduction followed by a film screening that will last on average for two hours; students that are unable to stay until 5 pm will be required to watch the rest of the film on their own.
Same as: KOREA 221

KOREA 122. Translating Cool: Globalized Popular Culture in Asia. 3-4 Units.
Did you grow up watching Pokémon and Power Rangers? Have you danced along to "Gangnam Style"? As we become increasingly exposed to Asian popular culture and the Internet facilitates instant access to new media, previous localized forms of entertainment--animated cartoons, comics, video games, music videos, film, and soap operas--have become part of a global staple. However, these cultural forms have emerged not only in their original form with mediation of subtitles. Many have undergone various processes of adaptation and translation so that we no longer recognize that these products had ever originated elsewhere. This course will immerse students in a range of Japanese and Korean cultural phenomena to reveal the spectrum of translation practices across national boundaries. We will inquire into why these cultural forms have such compelling and powerful staying power, contextualize them within their frames of production, and explore the strategies, limitations, and potential of translational practices.nnContact instructor for place. dafnazur@stanford.edunKnight 201.
Same as: JAPAN 122, JAPAN 222, KOREA 222

KOREA 130. Intimate Encounters: Reading and Translating Korean Literature. 4-5 Units.
Close analysis of fiction and poetry in original Korean. Discussion of the works in a broader context of Korean literature, history, and current events. Translation of Korean fiction that has not previously been translated; select translations will be considered for publication. Prerequisite: three years of Korean language.
Same as: KOREA 230

KOREA 140. Childhood and Children: Culture in East Asia. 3-5 Units.
Literature for children often reflects society's deepest-held convictions and anxieties, and is therefore a critical site for the examination of what is deemed to be the most imperative knowledge for the young generation. In this respect, the analysis of both texts and visual culture for children, including prose, poetry, folk tales, film, and picture books illuminates prevalent discourses of national identity, family, education and gender. Through an examination of a diverse range of genres and supported by the application of literary theories, students will obtain an understanding, in broad strokes, of the birth of childhood and the emergence of children's literature of China, Korea and Japan from the turn of the century until the present.
Same as: KOREA 240

KOREA 151. The Nature of Knowledge: Science and Literature in East Asia. 4-5 Units.
"The Nature of Knowledge" explores the intersections of science and humanities East Asia. It covers a broad geographic area (China, Japan, and Korea) along a long temporal space (14th century - present) to investigate how historical notions about the natural world, the human body, and social order defied, informed, and constructed our current categories of science and humanities. The course will make use of medical, geographic, and cosmological treatises from premodern East Asia, portrayals and uses of science in modern literature, film, and media, as well as theoretical and historical essays on the relationships between literature, science, and society.nnAs part of its exploration of science and the humanities in conjunction, the course addresses how understandings of nature are mediated through techniques of narrative, rhetoric, visualization, and demonstration. In the meantime, it also examines how the emergence of modern disciplinary "science" influenced the development of literary language, tropes, and techniques of subject development. This class will expose the ways that science has been mobilized for various ideological projects and to serve different interests, and will produce insights into contemporary debates about the sciences and humanities.

KOREA 153. Olympic Spectacles: Tokyo, Seoul, Beijing, and Tokyo. 2-5 Units.
The Olympics is the world¿s largest media spectacle watched by millions of people simultaneously. This course studies the summer Olympic games held in East Asia (Tokyo ¿64, Seoul ¿88, and Beijing ¿08) and the spectacles that the host nations created to celebrate their cultures and heritages as well as their newly gained power and status as modern nations. Nation building and branding, modernization and Westernization, Orientalism and self-Orientalization, urban development and gentrification will be studied among other themes. During the 2021 Tokyo Olympics (July 23 ¿ August 3, 2021), we will watch and discuss the events in real time and compare them with the previous games including the 1940 Tokyo Olympics, which was canceled due to World War II.
Same as: KOREA 253

KOREA 154. From State Propaganda to COVID-19 Contract-Tracing: Korean Media and Culture. 2-5 Units.
South Korean media industry is booming. People all over the world listen to K-pop and watch K-drama¿but where did this global phenomenon begin? What is distinctively ¿Korean¿ about the cultural products that we consume? Is ¿Hallyu¿ or ¿K-Wave¿ truly representative of Korean history or culture? If not, what are people missing and misunderstanding? By surveying the history of Korean media from the early 20th century to the present, this course introduces students to critical issues in media studies and Korean culture, which includes: state control and violence, industrialization and urbanization, democracy and labor movements, gender and sexuality, consumer culture, surveillance, and more.
Same as: KOREA 254

KOREA 157. Science, Power, and Knowledge: East Asia to 1900. 3-5 Units.
In the early modern period, East Asian societies featured long-established institutions of learning and traditions of knowledge. This course examines the relationship between knowledge and power in East Asia societies prior to 1900. It explores how knowledge production operated in late imperial China (1550-1900), Chos'n Korea (1392-1910), and Tokugawa Japan (1600-1868). Among the themes addressed are: the state's role in patronizing science and knowledge; major intellectual movements; engagement with Western science and religion; East Asian statecraft; and East Asian understandings of space and geography. nTaking a holistic perspective, it places science and technology in 1) a social and cultural context 2) in relation to other bodies and fields of knowledge 3) in comparison to other societies in a similar historical time period. A socially embedded perspective on knowledge and science seeks to appreciate how politics, society, and knowledge are integrated, and in particular how science and knowledge can be both instruments and sites of political power. By exploring these links, the course will also illustrate how our modern disciplinary categories of natural science,social science and the humanities cannot be taken for granted and the areas of knowledge they cover can be deeply intertwined. nnThe course will also address these issues historically and across geographic regions in East Asia and beyond. The comparative lens and frameworks these perspectives can offer will bring an awareness of the diverse traditions of knowledge production in East Asia. Its examination of East Asian encounters with Western paradigms of knowledge throughout the early modern period will also illustrate how communication occurs across cultural, social, and linguistic barriers and how diverse world-views were managed in these encounters. These encounters of knowledge-exchange between Jesuit missionaries, Ming literati, Korean aristocrats, and Japanese doctors also show how cultural identities were constructed, reinforced, and challenged. These identities, expressed through the mastery of knowledge, are essential for understanding how East Asian reckoned with growing pressures to adopt Western industrial technology and military science in the late nineteenth century.

KOREA 157S. Tyranny and Resistance: East Asia's Political Culture and Tradition. 3-5 Units.
What is tyranny? When does political power cease to be legitimate and government become tyrannical? And what can individuals do in the face of tyranny? This course will explore East Asia's long political tradition through the problem of tyranny and its resistance. We will cover a wide range of material. We begin with how seminal political thinkers in East Asia, including Warring States philosophers such as Mencius and Han Feizi, understood the boundary between legitimate and illegitimate authority. We will also look at the strategies used by various political actors, including government officials, cultural or social elites, and common people, when they confronted what they perceived to be the unjust exercise political power, whether in the form of despotic monarchs, corrupt authorities, or general misrule. Our discussions will be wide-ranging. We will pay particular attention to how these historical examples from China, Korea, and Japan¿s past have resonated with modern and contemporary political discussions in contemporary East Asian societies.
Same as: CHINA 157S, JAPAN 157S

KOREA 158. Korean History and Culture before 1900. 3-5 Units.
This course serves as an introduction to Korean culture, society, and history before the modern period. It begins with a discussion of early Korea and controversies over Korean origins; the bulk of the course will be devoted to the Chos'n period (1392-1910), that from the end of medieval Korea to the modern period. Topics to be covered include: Korean national and ethnic origins, the role of religious and intellectual traditions such as Buddhism and Confucianism, popular and indigenous religious practices, the traditional Korean family and social order, state and society during the Chos'n dynasty, vernacular prose literature, Korean's relations with its neighbors in East Asia, and changing conceptions of Korean identity.nThe course will be conducted through the reading and discussion of primary texts in English translation alongside scholarly research. As such, it will emphasize the interpretation of historical sources, which include personal letters, memoirs, and diaries, traditional histories, diplomatic and political documents, along with religious texts and works of art. Scholarly work will help contextualize these materials, while the class discussions will introduce students to existing scholarly debates about the Korean past. Students will be asked also to examine the premodern past with an eye to contemporary reception. The final project for the class is a film study, where a modern Korean film portraying premodern Korea will be analyzed as a case study of how the past works in public historical memory in contemporary Korea, both North and South. An open-ended research paper is also possible, pending instructor approval.

KOREA 198C. Senior Research. 1-3 Unit.
EALC students writing a Senior Capstone Essay who wish to conduct research with their adviser may enroll in this course for 1 unit, for 1 quarter.
Same as: Capstone Essay

KOREA 198H. Senior Research. 2-5 Units.
EALC seniors or juniors pursuing honors research should sign up for this course under their faculty adviser for research credit.
Same as: Honors Thesis

KOREA 200. Directed Readings in Korean. 1-12 Unit.
Directed Reading in Korean Studies, requires instructor consent before enrolling.

KOREA 212. Asian Screen Cultures. 3-5 Units.
Asian screen culture, ranging from cinema to online games, has (re)shaped the global and national/regional imaginings of Asia. The Post-Cold War intensification of intra-Asian interactions has precipitated the rise of a Pan-Asian regional identity wherein the nation-state is not yet obsolete. What role does screen culture plays in the border-crossing interplay among languages, ideologies, aesthetics, and affect? How does the converging media of screen culture capture local/global desires and propel the history of transformation of sign systems from the written words to visual moving images in a digital time? How do we understand the aesthetic, storytelling, and politics of Asian screen cultures vis-à-vis its historical and social context? While exploring these transnational and transdisciplinary questions, this course will deal with topical issues of Pan-Asian identity, (trans)nationalism, (un)translatability, commodity fetishism, locality and globality, technophobia, and politics of gender. Students will learn how to think and write about screen cultures of East Asia in particular and of our world of screens in general.
Same as: CHINA 112A, CHINA 212A, JAPAN 112A, JAPAN 212A, KOREA 112

KOREA 220. Narratives of Modern and Contemporary Korea. 4-5 Units.
This introductory survey will examine the development of South and North Korean literature from the turn of the 20th century until the present. The course will be guided by historical and thematic inquiries as we explore literature in the colonial period, in the period of postwar industrialization, and contemporary literature from the last decade. We will supplement our readings with critical writing about Korea from the fields of cultural studies and the social sciences in order to broaden the terms of our engagement with our primary texts.
Same as: KOREA 120

KOREA 221. Doing the Right Thing: Ethical Dilemmas in Korean Film. 3-4 Units.
Ethics and violence seem to be contradictory terms, yet much of Korean film and literature in the past five decades has demonstrated that they are an intricate and in many ways justifiable part of the fabric of contemporary existence. Film exposes time and again the complex ways in which the supposed vanguards of morality, religious institutions, family, schools, and the state are sites of condoned transgression, wherein spiritual and physical violation is inflicted relentlessly. This class will explore the ways in which questions about Truth and the origins of good and evil are mediated through film in the particular context of the political, social, and economic development of postwar South Korea. Tuesday classes will include a brief introduction followed by a film screening that will last on average for two hours; students that are unable to stay until 5 pm will be required to watch the rest of the film on their own.
Same as: KOREA 121

KOREA 222. Translating Cool: Globalized Popular Culture in Asia. 3-4 Units.
Did you grow up watching Pokémon and Power Rangers? Have you danced along to "Gangnam Style"? As we become increasingly exposed to Asian popular culture and the Internet facilitates instant access to new media, previous localized forms of entertainment--animated cartoons, comics, video games, music videos, film, and soap operas--have become part of a global staple. However, these cultural forms have emerged not only in their original form with mediation of subtitles. Many have undergone various processes of adaptation and translation so that we no longer recognize that these products had ever originated elsewhere. This course will immerse students in a range of Japanese and Korean cultural phenomena to reveal the spectrum of translation practices across national boundaries. We will inquire into why these cultural forms have such compelling and powerful staying power, contextualize them within their frames of production, and explore the strategies, limitations, and potential of translational practices.nnContact instructor for place. dafnazur@stanford.edunKnight 201.
Same as: JAPAN 122, JAPAN 222, KOREA 122

KOREA 230. Intimate Encounters: Reading and Translating Korean Literature. 4-5 Units.
Close analysis of fiction and poetry in original Korean. Discussion of the works in a broader context of Korean literature, history, and current events. Translation of Korean fiction that has not previously been translated; select translations will be considered for publication. Prerequisite: three years of Korean language.
Same as: KOREA 130

KOREA 231. Topics in Korean Literature. 4-5 Units.
This year's graduate seminar in Korean Literature will focus on the period of the 1970s, an era marked as one of political turmoil and censorship. This class will examine essays and works of fiction produced by Korea's preeminent poets and writers to understand how they grappled with the changing forms of social and political life, urbanization and industrialization, and with increasing censorship over creative works. Readings will be in Korean and English.
Same as: 1970's

KOREA 240. Childhood and Children: Culture in East Asia. 3-5 Units.
Literature for children often reflects society's deepest-held convictions and anxieties, and is therefore a critical site for the examination of what is deemed to be the most imperative knowledge for the young generation. In this respect, the analysis of both texts and visual culture for children, including prose, poetry, folk tales, film, and picture books illuminates prevalent discourses of national identity, family, education and gender. Through an examination of a diverse range of genres and supported by the application of literary theories, students will obtain an understanding, in broad strokes, of the birth of childhood and the emergence of children's literature of China, Korea and Japan from the turn of the century until the present.
Same as: KOREA 140

KOREA 250. More Real than Fiction: Perspectives of History and Theory in Modern Korean Literature. 2-5 Units.
The past two decades have brought about a significant reassessment and new theoretical engagements with colonial and postcolonial Korean fiction. Colonial fiction has typically been read in binary terms: modernist/realist, resistant/collaborative, and political/escapist. In the postwar era, fiction has typically been viewed in frameworks that take into account fallouts from state developmentalism and division, the movements of bodies and capital, precarious social dynamics and gender politics. The purpose of this survey seminar is to interrogate the relationship between Korean fiction and the social/political/economic conditions of its production. We will do so by reading novels and short fiction from the last century alongside recent scholarship from both within and outside the Korean studies field. While doing so, we inquire into the efficacy of the area studies/Korean studies paradigm and investigate theoretical frameworks that might be applicable to Korean fiction in different periods. May be repeated for credit.
Same as: KOREA 350

KOREA 251. The Nature of Knowledge: Science and Literature in East Asia. 4-5 Units.
"The Nature of Knowledge" explores the intersections of science and humanities East Asia. It covers a broad geographic area (China, Japan, and Korea) along a long temporal space (14th century - present) to investigate how historical notions about the natural world, the human body, and social order defied, informed, and constructed our current categories of science and humanities. The course will make use of medical, geographic, and cosmological treatises from premodern East Asia, portrayals and uses of science in modern literature, film, and media, as well as theoretical and historical essays on the relationships between literature, science, and society.nnAs part of its exploration of science and the humanities in conjunction, the course addresses how understandings of nature are mediated through techniques of narrative, rhetoric, visualization, and demonstration. In the meantime, it also examines how the emergence of modern disciplinary "science" influenced the development of literary language, tropes, and techniques of subject development. This class will expose the ways that science has been mobilized for various ideological projects and to serve different interests, and will produce insights into contemporary debates about the sciences and humanities.

KOREA 258. Korean History and Culture before 1900. 3-5 Units.
This course serves as an introduction to Korean culture, society, and history before the modern period. It begins with a discussion of early Korea and controversies over Korean origins; the bulk of the course will be devoted to the Chos'n period (1392-1910), that from the end of medieval Korea to the modern period. Topics to be covered include: Korean national and ethnic origins, the role of religious and intellectual traditions such as Buddhism and Confucianism, popular and indigenous religious practices, the traditional Korean family and social order, state and society during the Chos'n dynasty, vernacular prose literature, Korean's relations with its neighbors in East Asia, and changing conceptions of Korean identity.nThe course will be conducted through the reading and discussion of primary texts in English translation alongside scholarly research. As such, it will emphasize the interpretation of historical sources, which include personal letters, memoirs, and diaries, traditional histories, diplomatic and political documents, along with religious texts and works of art. Scholarly work will help contextualize these materials, while the class discussions will introduce students to existing scholarly debates about the Korean past. Students will be asked also to examine the premodern past with an eye to contemporary reception. The final project for the class is a film study, where a modern Korean film portraying premodern Korea will be analyzed as a case study of how the past works in public historical memory in contemporary Korea, both North and South. An open-ended research paper is also possible, pending instructor approval.
Same as: HISTORY 291K, HISTORY 391K, KOREA 158

KOREA 350. More Real than Fiction: Perspectives of History and Theory in Modern Korean Literature. 2-5 Units.
The past two decades have brought about a significant reassessment and new theoretical engagements with colonial and postcolonial Korean fiction. Colonial fiction has typically been read in binary terms: modernist/realist, resistant/collaborative, and political/escapist. In the postwar era, fiction has typically been viewed in frameworks that take into account fallouts from state developmentalism and division, the movements of bodies and capital, precarious social dynamics and gender politics. The purpose of this survey seminar is to interrogate the relationship between Korean fiction and the social/political/economic conditions of its production. We will do so by reading novels and short fiction from the last century alongside recent scholarship from both within and outside the Korean studies field. While doing so, we inquire into the efficacy of the area studies/Korean studies paradigm and investigate theoretical frameworks that might be applicable to Korean fiction in different periods. May be repeated for credit.
Same as: KOREA 250

KOREA 355. History and Historiography of "Premodern" Korea. 2-5 Units.
This seminar serves as an orientation to the history of ¿premodern¿ Korea through an examination of its historiography. It interrogates how scholars have situated their research questions within existing historiography and the *problématiques* that emerge from this engagement. Students will therefore read earlier, field-defining scholarship alongside more recent, emerging scholarship as a way to understand the development of premodern Korean history as a field. In particular, the course will critically examine the ¿premodern¿/¿modern¿ distinction and evaluate how questions in search of ¿modernity¿ and narratives of ¿modernization¿ have driven research and debates, whether explicitly or implicitly, on the ¿premodern¿ past. Topics to be covered include identity and nationalism, political and social history, gender and law, foreign relations and diplomacy, and economic and social ¿modernization.¿nnAll required readings in English. Ability to read Korean or another Asian language welcome but not required.

EAST ASIAN STUDIES

Courses offered by the Center for East Asian Studies are listed under the subject code EASTASN (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=EASTASN&filter-catalognumber-EASTASN=on) on the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu/) web site. The EASTASN courses listed on ExploreCourses deal primarily with China, Japan, and Korea. Literature courses are listed with the subject codes of CHINA (http://explorecourses.stanford.edu/search/?q=CHINA&view=catalog&page=0&academicYear=&collapse=&filter-departmentcode-CHINA=on&filter-coursestatus-Active=on&filter-catalognumber-CHINA=on), JAPAN (http://explorecourses.stanford.edu/search/?q=JAPAN&view=catalog&page=0&academicYear=&collapse=&filter-departmentcode-JAPAN=on&filter-coursestatus-Active=on&filter-catalognumber-JAPAN=on), KOREA (http://explorecourses.stanford.edu/search/?q=KOREA&view=catalog&page=0&academicYear=&collapse=&filter-coursestatus-Active=on&filter-departmentcode-KOREA=on&filter-catalognumber-KOREA=on), and EALC (http://explorecourses.stanford.edu/search/?q=EALC&view=catalog&page=0&academicYear=&collapse=&filter-departmentcode-EALC=on&filter-coursestatus-Active=on&filter-catalognumber-EALC=on) in ExploreCourses.

Courses in Chinese, Japanese, and Korean language instruction use the subject codes CHINLANG (http://explorecourses.stanford.edu/search/?view=catalog&filter-coursestatus-Active=on&page=0&catalog=&academicYear=&q=CHINLANG&collapse=), JAPANLNG (http://explorecourses.stanford.edu/search/?view=catalog&filter-coursestatus-Active=on&page=0&catalog=&academicYear=&q=JAPANLNG&collapse=), and KORLANG (http://explorecourses.stanford.edu/search/?view=catalog&filter-coursestatus-Active=on&page=0&catalog=&academicYear=&q=KORLANG&collapse=).

Mission

The Center for East Asian Studies (CEAS) supports teaching and research on East Asia-related topics across all disciplines; disseminates knowledge about East Asia through projects of local, regional, national, and international scope; and serves as the intellectual gathering point for a collaborative and innovative community of scholars and students of East Asia. CEAS works with all schools, departments, research centers, and student groups to facilitate and enhance all aspects of East Asia-related research, teaching, outreach and exchange across the Stanford campus.

CEAS is part of Stanford Global Studies (http://sgs.stanford.edu/) in the School of Humanities and Sciences (http://humsci.stanford.edu/). As an East Asia National Resource Center (NRC), supported by the U.S. Department of Education, CEAS serves to strengthen access to and training in the major languages of East Asia, and to broaden East Asia area studies training across all disciplines.

Many other theoretical and methodological courses within various departments at Stanford are taught by faculty who are East Asian specialists; these courses often have a substantial East Asian component and a list of current applicable courses from outside departments may be found on the "Approved Courses" tab of this bulletin.

Undergraduate Programs in East Asian Studies

Undergraduates interested in East Asia can become involved by attending CEAS events, taking courses in the subject codes listed above, or earning a Minor or Bachelor of Arts degree in East Asian Studies. These undergraduate degrees in East Asian Studies are administered by the Department of East Asian Languages and Cultures (https://ealc.stanford.edu/). Stanford Global Studies (https://sgs.stanford.edu/) offers internship opportunities in East Asia, and the Bing Overseas Study Program (http://bosp.stanford.edu/) offers study abroad opportunities in East Asia.

For language study, CEAS provides undergraduate fellowships for language study in China, Japan, or Korea; students must simultaneously apply to a pre-approved language program abroad. Applications are due in February each year. Deadlines and application information can be found on the CEAS website (https://ceas.stanford.edu/). In addition, undergraduates can obtain a coterminal M.A. degree in East Asian Studies (https://ceas.stanford.edu/academics/how-apply/) while concurrently working on their undergraduate major by applying during the regular admissions cycle no later than their senior year.

Graduate Programs in East Asian Studies

Master's Program

Stanford's interdisciplinary M.A. program in East Asian Studies is designed both for students who plan to complete a Ph.D. but who have not yet decided on the particular discipline in which they prefer to work, and for students who wish to gain a background in East Asian Studies in connection with a career in nonacademic fields such as business, law, education, journalism, or government service. The program permits the student to construct a course of study suited to individual intellectual interests and career needs, and is typically completed in two years; the program may be completed within one year, depending on the course load taken and the amount of foreign language training required. Advanced language students or students who are native speakers of Chinese, Japanese, or Korean can potentially complete the program within one year. Students interested in pursuing professional careers are encouraged to plan for additional training through internships or additional graduate professional programs, in conjunction with obtaining an M.A. in East Asian Studies.

The M.A. program allows students a great deal of flexibility in combining language training, interdisciplinary area studies, and a disciplinary concentration. Students are required to demonstrate third year level proficiency in Chinese, Korean or Japanese, according to their research-area focus (either through coursework at Stanford or testing at the 4th year or higher in Stanford language-placement exams), to enroll in a 1 unit core course in East Asian Studies in autumn quarter of the first year, and to complete at least nine additional graduate-level area studies courses, one of which must be chosen from a prescribed list of courses offered in winter quarter of the first year. Of the nine required content courses, three must be in a single department or in the same thematic focus. An M.A. thesis, usually an expansion of a paper written for a graduate seminar or colloquium, is required.

Learning Outcomes

The purpose of the master's program is to further develop specialized knowledge and skills in East Asian Studies, and to prepare students for a professional career or doctoral studies. This is achieved through the completion of East Asia content courses, language training as necessary, and experience with independent research.

Postdoctoral Programs

The Center for East Asian Studies offers a postdoctoral fellowship in Chinese Studies (https://ceas.stanford.edu/opportunities/chinese-studies-postdoctoral-fellowship/) each year. Postdoctoral fellowships

in other areas are available from campus units including but not limited to the Freeman-Spogli Institute for International Studies (http://fsi.stanford.edu/fellowships/), the Walter H. Shorenstein Asia-Pacific Research Center (http://aparc.fsi.stanford.edu/fellowships/14813/), and the Stanford Humanities Center (http://shc.stanford.edu/fellowships/).

Financial Aid

CEAS offers various types of funding for new and continuing students. See the fellowships page (https://ceas.stanford.edu/opportunities/student-prizes-and-fellowships/) of the CEAS web site for the most up-to-date offerings.

Master of Arts in East Asian Studies

University requirements for the master's degree are described in the "Graduate Degrees (p. 65)" section of this bulletin.

The East Asian Studies master's degree program allows a great deal of flexibility in combining language training, interdisciplinary area studies, and a disciplinary concentration. All new students are assigned preliminary faculty advisers at the start of the school year. Members of the staff and faculty are available for academic and career planning. The M.A. program is typically completed in two years, but students who meet the language requirement upon entry and who complete a rigorous selection of courses may be able to graduate in as little as three quarters. Students are urged to complete the course requirements within that first year (3 quarters) unless their goals and background dictate otherwise.

Applicants must submit scores for the General Test of the Graduate Record Examination, official transcripts and a writing sample along with their online application. Foreign applicants are also required to take the Test of English as a Foreign Language (TOEFL). Applications for admission and financial aid should be made online; see the Graduate Admissions (http://gradadmissions.stanford.edu) web site. The deadline for submitting applications for the 2021-22 academic year is December 1, 2020.

Coterminal Master's Program in East Asian Studies

The center admits a limited number of Stanford undergraduates to work toward a coterminal M.A. degree in East Asian Studies. Applications are accepted once a year during the regular CEAS M.A. application cycle. The deadline for the 2021-22 academic year is December 1, 2020. Students may apply after completing 120 units, but no later than the quarter prior to the expected completion of the undergraduate degree. Applicants are expected to meet the same standards as those seeking admission to the M.A. program, and they must submit the following via the online coterminal application:

- a completed Application for Admission to Coterminal Masters' Program (https://www.applyweb.com/stanterm/)
- a written statement of purpose (https://gradadmissions.stanford.edu/applying/starting-your-application/required-application-documents/statement-purpose/)
- an unofficial Stanford transcript
- three letters of recommendation, at least two of which should be from members of the department of concentration
- first 15 pages of a representative writing sample (such as a seminar paper, term paper, honors thesis, or journal article.)
- copy of scores from the General Test of the Graduate Record Exam (official score should be sent to Stanford's school code 4704)
- a list of courses the applicant intends to take to fulfill degree requirements.

Coterm applications are reviewed along with peer applications by the M.A. Admissions Committee of the Center for East Asian Studies (CEAS).

Students must meet all requirements for both B.A. and M.A. degrees. They must complete a total of 15 full-time quarters or the equivalent, or three full quarters after completing 180 units for a total of 226 units. Coterms are not eligible for University financial aid, but are eligible to apply for Foreign Language and Area Studies (FLAS) (https://ceas.stanford.edu/opportunities/student-prizes-and-fellowships/) and other fellowships administered by CEAS.

University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 56)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 65)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate advisor be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

Degree Requirements

Language Requirement

Students must complete the equivalent of Stanford's first three full years of language training in Chinese, Japanese, or Korean. Other East Asian languages may be accepted by petition. Students entering the program without any language preparation should complete first- and second-year Chinese, Japanese, or Korean within the first year of residence at Stanford if they intend to graduate within two years (this would necessitate completing a summer language program). All language courses taken at Stanford used toward fulfilling the language requirement must be for letter grades and completed with a grade of 'B' or higher. Conversation classes cannot be used for meeting this requirement, and units from the language courses numbered 1-99 do not count toward the 46 units required for the degree. Language courses numbered 100 and above can be used toward meeting the 46 units minimum for the degree, but cannot be used toward fulfilling the content courses requirement.

The language requirement may be satisfied in part or in full by placing into an appropriate Stanford language class through the language proficiency exam given by the Language Center. Students who fulfill this minimum three-year language requirement before completing other requirements are encouraged to continue language study, or take courses in which Chinese, Japanese, or Korean are used, for the duration of the program.

The language used to meet the language proficiency requirement should match the student's country/region of focus.

Language courses are listed under the following subject codes on the Stanford Bulletin's ExploreCourses web site: CHINLANG (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=CHINLANG&filter-catalognumber-CHINLANG=on), JAPANLNG (http://explorecourses.stanford.edu/CourseSearch/search/?

view=catalog&catalog=&page=0&q=JAPANLNG&filter-catalognumber-JAPANLNG=on), and KORLANG (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=KORLANG&filter-catalognumber-KORLANG=on).

M.A. Thesis Requirement

A master's thesis, representing a substantial piece of original research, should be filed with the center's program office as part of the graduation requirements. With the adviser's approval, the master's thesis requirement may be satisfied by expanding a research paper written for an advanced course, and should have a minimum of 10,000 words in the main body of the thesis (excluding references, citations, appendices, etc.). The M.A. thesis is due at noon on the last day of classes, of the quarter in which the student applies to graduate; see the Academic Calendar (p. 7) for specific dates.

Students are also required to attend, at a minimum, one CEAS Thesis Workshop at least one quarter prior to the quarter in which the student applies to graduate. CEAS Thesis Workshops are offered biannually.

Area Studies and Unit Requirements

Students must complete a minimum total of 46 units for the degree at Stanford, comprised of:

1. 1-unit core course, EASTASN 330 Core Seminar: Issues and Approaches in East Asian Studies
2. At least 9 approved content courses, at least 30 units of which must be at or above the 200 level (at or above 300 level for HISTORY courses) and meeting the following criteria:
   a. Are on the approved East Asian Studies course list (see Approved Courses tab (p. 1357)), or have been approved by petition (maximum 3 petitions)
   b. Taken for a letter grade and completed with a 'B' or higher ('P' or higher in GSB courses and Law courses)
   c. Taken for 3 units or more
   d. Do not count as part of the language requirement
   e. At least three of the nine courses must be either in the same department or within the same thematic focus across several departments (see sample themes below).
   f. Must include one pre-designated course offered in Winter Quarter of the first year. This year's course options are The International Relations of Asia since World War II (EASTASN 297) and The Nature of Knowledge: Science and Literature in East Asia (JAPAN 251B) (also listed as CHINA 251B/KOREA 251).
3. Additional courses as necessary to reach the minimum 46 units for the degree meeting the following criteria:
   a. Taken for a letter grade
   b. At least level 100 or above (above 200 for HISTORY courses)
   c. Must be an academic content course, such as a lecture, seminar, or colloquium (no activity courses, EFS language classes, etc.) Language classes are acceptable if the course number is above level 100 and it is taken for a letter grade.
4. The cumulative grade point average (GPA) for all courses must be 3.0 or higher; grades for the nine content courses must be a 'B' or higher.

Sample Theme 1

		Units
JAPAN 251	Japanese Business Culture and Systems	3-5
LAW 5016	Japanese Law, Society and Economy	3
JAPAN 238	Introduction to Modern Japanese Literature and Culture	3-5

Sample Theme 2

		Units
EASTASN 289K	Korea and the World	3
KOREA 101N	Kangnam Style: K-pop and the Globalization of Korean Soft Power	4
SOC 211	State and Society in Korea	4

Sample Theme 3

		Units
EASTASN 262	Seminar on the Evolution of the Modern Chinese State, 1550-Present	3-5
POLISCI 348	Chinese Politics	5
INTLPOL 246	China's Foreign Policies: Objectives, Instruments, and Impacts	4

Course Petitions and Directed Reading

Some theory-oriented or methodological courses may be used to meet part of the 9 courses requirements, provided that they are demonstrably useful for understanding East Asian problems. A course petition (https://ceas.stanford.edu/academics/undergraduate-program/forms/) and syllabus must be submitted no later than the end of the second week of the quarter in which the course is offered. Students are limited to 3 petitions total. Credit toward the course requirements is not given for courses taken before entering the M.A. program, however students may take courses for exchange credit at the University of California, Berkeley, with the approval of their adviser and the Office of the University Registrar.

Students may choose to enroll in a directed reading course with a faculty member if the current course offerings do not meet a particular research or study need. Directed reading courses are independent study projects a student may undertake with a relevant Stanford faculty member. Once the student has found a faculty member to support his or her studies, the student must inform the student services officer immediately so that the appropriate section can be added for EASTASN 300 Graduate Directed Reading. The limitations for directed reading units are:

1. A maximum of 5 units may apply towards the 46-unit degree requirement.
2. If applying the units to the 9 courses requirement, the student must submit a detailed syllabus approved by their directed reading instructor prior to enrolling in the course and the course must be taken for at least 3 units.
3. It must be taken for a letter grade.

Joint and Dual Degree Programs in East Asian Studies

East Asian Studies and Law

This joint degree program grants an M.A. degree in East Asian Studies and a Doctor of Jurisprudence (J.D.) degree. It is designed to train students interested in a career in teaching, research, or the practice of law related to East Asian legal affairs. Students must apply separately to the East Asian Studies M.A. program and to the Stanford School of Law and be accepted by both. Completing this combined course of study requires approximately four academic years, depending on the student's background and level of training in Chinese, Japanese, or Korean. Up to 45 units of approved courses may be counted towards both degrees. For more information, see the "Joint Degree Programs (http://exploredegrees.stanford.edu/graduatedegrees/#jointdegreestext)" section of this bulletin and the Stanford Law School's web site (http://www.law.stanford.edu/degrees/joint/). Students who have been accepted by both programs should consult with the departments to determine which courses can be double-counted.

East Asian Studies and Education

This dual degree program grants an M.A. degree in East Asian Studies and a secondary school teaching credential in social studies. To be eligible for this program, students should apply to the M.A. program in East Asian Studies and then apply to the Stanford Teacher Education Program during the first year at Stanford. Completing the dual program requires at least two years, including one summer session when beginning the education component of the program. Admissions processes for both programs are completely independent of one another and units from courses can only be applied to one degree or the other, not both.

East Asian Studies and Business

This dual degree program grants an M.A. degree in East Asian Studies and a Master of Business Administration degree. Students must apply separately to the East Asian Studies M.A. program and the Graduate School of Business and be accepted by both. Completing this combined course of study requires approximately three academic years (perhaps including summer sessions), depending on the student's background and level of training in Chinese, Japanese, or Korean language. Admissions processes for both programs are completely independent of each other and units from courses can only be applied to one degree or the other, not both.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a “credit” or “no credit” grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a “credit” or “satisfactory” grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Graduate Degree Requirements

Grading

Courses used to complete the nine content course degree requirement for the East Asian Studies M.A. Program must be taken for a letter grade when that option is available. Additional elective units used to reach the overall 46-unit requirement for the program can be taken as pass/no pass, although students are highly encouraged to enroll in the graded option, when available. Courses which offer only a pass/no pass option (grade of 'CR'= credit or 'S'= Satisfactory) may also be counted toward satisfaction of the nine content course requirement in academic year 2020-21, provided they are already included on the East Asian Studies Pre-approved course list, or are approved as a petitioned course.

Graduate Advising Expectations

The Center for East Asian Studies is committed to providing academic advising in support of graduate student scholarly and professional development. When most effective, this advising relationship entails collaborative and sustained engagement by both the adviser and the advisee. As a best practice, advising expectations should be periodically discussed and reviewed to ensure mutual understanding. Both the adviser and the advisee are expected to maintain professionalism and integrity.

Faculty advisers guide students in key areas such as selecting courses, designing and conducting research, and exploring academic opportunities and professional pathways. Program administrative staff are available for advising students on program policies and degree requirements, as well as course selection.

Graduate students are active contributors to the advising relationship; they should proactively seek academic and professional guidance, take responsibility for informing themselves of policies and degree requirements for their graduate program, and remain aware of all program-specific and University-wide deadlines.

At or before the start of graduate study, normally at the beginning of Autumn Quarter, each student is assigned an adviser: a member of the program's faculty who provides research advice and guidance in course selection and in exploring academic opportunities and professional pathways. Usually, the same faculty member serves as program adviser for the duration of master's study; however, formal adviser change requests are possible in consultation with CEAS staff.

CEAS students are required to meet with their adviser at least twice per quarter and they must submit adviser meeting forms (https://drive.google.com/file/d/1MeDCzND9nK_q-GQ45esEOMo4LsPHF-nD/view/) to the program office as proof. Students are expected to have a discussion with their adviser during or before the first week of each quarter to agree upon the courses that the student plans to take that quarter.

The department's student services office is also an important part of the advising team. It informs students and advisers about University and department requirements, procedures, and opportunities, and it maintains the official records of advising assignments and approvals. In addition, the center lecturer and student services officer meet with all students in Spring Quarter each year, and are available during the academic year by email and during office hours.

For a statement of University policy on graduate advising, see the "Graduate Advising (p. 80)" section of this bulletin. Academic advising by Stanford faculty is a critical component of all graduate students' education and additional resources can be found in the Policies and Best Practices for Advising Relationships at Stanford (http://stanford.box.com/shared/static/73oj7zqvy9h0fezqf310onbuunv91nyl.pdf) and the Guidelines for Faculty-Student Advising at Stanford (https://stanford.box.com/shared/static/mespm59bcanq03o4pppu7r4n9p4sb6t6.pdf).

Approved Content Courses

Because East Asian Studies is an interdisciplinary major, the majority of the courses that apply toward the degree are listed under other departments. In addition to courses listed under the EASTASN subject code, students should check the list below, as well as on the Stanford Bulletin's ExploreCourses site (http://explorecourses.stanford.edu/) for courses in other departments that will meet the degree requirements for East Asian Studies; such departments include (but are not limited to) Anthropology, East Asian Languages and Cultures, History, Political Science, Religious Studies, and Sociology. Not all courses offered by other departments that have East Asia content may be listed below or on the CEAS web site. If there is a course not listed below that has East Asia content, check with the Center for East Asian Studies staff to verify whether or not it can be used to fulfill the degree requirements.

The following course list represents courses that may, with the adviser's approval, be used to fulfill degree requirements (please see the Law School (https://law.stanford.edu/education/courses/non-law-students/) or GSB (http://www.gsb.stanford.edu/nongsbreg/) web sites for instructions on how to enroll in their courses):

SOC 317B	Chinese Politics and Society	3-5

Courses

EASTASN 77. Divided Memories & Reconciliation: the formation of wartime historical memory in the Pacific. 4 Units.
Divided Memories will examine the formation of historical memory about World War Two in Asia, looking comparatively at the national memories of China, Japan, Korea, and the United States. It will also study efforts at reconciliation in contemporary Asia. The course will look at the role of textbooks, popular culture, with an emphasis on cinema, and elite opinion on the formation of wartime memory. We will study and discuss controversial issues such as war crimes, forced labor, sexual servitude, and the use of atomic weapons. Class will combine lectures with in class discussion, with short essays or papers.
Same as: EASTASN 277

EASTASN 94. The Rise of China in World Affairs. 3-5 Units.
This course examines the impact and implications of the rise of China in contemporary world politics from a historical and international relations perspective. It reviews China's halting progress into the international system, sketches the evolution of PRC foreign policy since 1949, and analyzes China's developmental priorities and domestic political context as they figure into Beijing's interactions with the world. It sketches American policy toward the PRC, and it assesses alternative approaches to dealing with China on such issues as arms and nuclear proliferation, regional security arrangements, international trade and investment, human rights, environmental problems, and the Taiwan and Tibet questions.
Same as: EASTASN 294

EASTASN 97. The International Relations of Asia since World War II. 3-5 Units.
Asian international relations since World War II were dominated by the efforts of the newly independent nation-states of Asia, almost all of which had been colonies before the war, to establish and maintain sovereignty in a context of American and Soviet competition for influence in the region. This course traces the major developments of the period, including the Chinese civil war, the U.S. occupation of Japan, the division of Korea and the Korean War, the South and Southeast Asian independence struggles, the American and Soviet alliance systems, the Vietnam War, the strategic realignments that led to the end of the Cold War in Asia, the emergence of Central Asia, and the legacy of issues that the period has posed for the region today.
Same as: EASTASN 297

EASTASN 117. Health and Healthcare Systems in East Asia. 3-5 Units.
China, Japan, and both Koreas. Healthcare economics as applied to East Asian health policy, including economic development, population aging, infectious disease outbreaks (SARS, avian flu), social health insurance, health service delivery, payment incentives, competition, workforce policy, pharmaceutical industry, and regulation. No prior knowledge of economics or healthcare required.
Same as: EASTASN 217

EASTASN 143. Taiwan's Democratic Evolution. 3-5 Units.
This course is an introduction to the contemporary politics of Taiwan. Once a poor, insecure autocracy, today Taiwan has been transformed into a prosperous and stable liberal democracy, albeit one whose long-term security remains imperiled by the rising power of the People's Republic of China. We will draw on concepts and theories from political science to explore distinct aspects of this ongoing political evolution, including the transition to and consolidation of democracy, origins and trajectory of economic and social development, sources of Taiwanese nationalism, security of the Taiwanese state and its relationship to the PRC and the United States, parties and elections, and public policy processes and challenges.
Same as: EASTASN 243

EASTASN 162. Seminar on the Evolution of the Modern Chinese State, 1550-Present. 3-5 Units.
This seminar will assess the evolving response of the late imperial, early Republican, Nanjing Republic, and the PRC regimes in response to China's changing international setting, to successive revolutions in warfare, and to fundamental economic, social and demographic trends domestically from the 16th century to present. It will assess the capacities of each successive Chinese state to extract resources from society and economy and to mobilize people behind national purposes, to elaborate centralized institutions to pursue national priorities, to marshal military forces for national defense and police forces to sustain domestic order, and to generate popular identities loyal to national authority.
Same as: EASTASN 262

EASTASN 168. Taiwan Security Issues. 3-5 Units.
This course will provide a broad overview of Taiwan's place in the security environment of East Asia, covering the history of US-Taiwan-People's Republic of China relations, Taiwan's ambiguous status in the contemporary inter-state system, cross-Strait trends including the military balance of power and economic integration, the emergence and evolution of "sharp power" threats to Taiwan's security, and domestic politics and the quality of Taiwan's democracy. The course will be offered remotely and integrated with the fall 2020 quarter programming of the Project on Taiwan in the Indo-Pacific at the Hoover Institution. It will feature a combination of guest presentations by outside speakers as part of the PTIP's fall conference agenda, online lectures and discussions led by the instructor, and student presentations. Some course events may be open to the public.
Same as: EASTASN 268

EASTASN 179. Rebalancing Economic Systems in a World Driven by Tech: Quality-of-Life in Socio-Cultural Context. 4 Units.
This course examines the broader consequences of economic models that rely on innovation-driven growth, e.g. increases in social inequality, tension between globalism and isolationism, and tendencies toward authoritarianism. After an overview of the historical outcomes of previous industrial revolutions, we examine how the above trends are exacerbated in the era of digital transformation, comparing different economic systems (e.g. China, India, Japan, and the U.S.) as realized in their socio-political and cultural contexts. We then discuss approaches toward rebalancing existing systems, including metrics for evaluating economic performance and its impact, in order to satisfy the imperatives of social, environmental, and economic sustainability.
Same as: EASTASN 279

EASTASN 189K. Korea and the World. 3 Units.
This course investigates the theoretical and empirical underpinnings of modern Korea. The course offers a rough mix of history, domestic politics, and foreign relations. It also approaches the empirics of Korea through various theoretical lenses ranging from identity to balance of power to alliance theory to sports diplomacy. We will cover a vast expanse of time, ranging from the Kanghwa treaty to Donald Trump and Kim Jong-un. The course divides into four sections. The first is an understanding of the traditional historical and Cold War context of Korea's external relations. The second assesses the drivers of Korea¿s relations with the region, including Japan, the United States, China, and Russia. The next section is a three-week unit on North Korea. The last section investigates the policy priorities and potential pitfalls in Korea's path to unification as well as the implications of a united Korea on the balance of power in East Asia. No previous background on Korea is required.
Same as: EASTASN 289K

EASTASN 217. Health and Healthcare Systems in East Asia. 3-5 Units.
China, Japan, and both Koreas. Healthcare economics as applied to East Asian health policy, including economic development, population aging, infectious disease outbreaks (SARS, avian flu), social health insurance, health service delivery, payment incentives, competition, workforce policy, pharmaceutical industry, and regulation. No prior knowledge of economics or healthcare required.
Same as: EASTASN 117

EASTASN 243. Taiwan's Democratic Evolution. 3-5 Units.
This course is an introduction to the contemporary politics of Taiwan. Once a poor, insecure autocracy, today Taiwan has been transformed into a prosperous and stable liberal democracy, albeit one whose long-term security remains imperiled by the rising power of the People's Republic of China. We will draw on concepts and theories from political science to explore distinct aspects of this ongoing political evolution, including the transition to and consolidation of democracy, origins and trajectory of economic and social development, sources of Taiwanese nationalism, security of the Taiwanese state and its relationship to the PRC and the United States, parties and elections, and public policy processes and challenges.
Same as: EASTASN 143

EASTASN 262. Seminar on the Evolution of the Modern Chinese State, 1550-Present. 3-5 Units.
This seminar will assess the evolving response of the late imperial, early Republican, Nanjing Republic, and the PRC regimes in response to China's changing international setting, to successive revolutions in warfare, and to fundamental economic, social and demographic trends domestically from the 16th century to present. It will assess the capacities of each successive Chinese state to extract resources from society and economy and to mobilize people behind national purposes, to elaborate centralized institutions to pursue national priorities, to marshal military forces for national defense and police forces to sustain domestic order, and to generate popular identities loyal to national authority.
Same as: EASTASN 162

EASTASN 268. Taiwan Security Issues. 3-5 Units.
This course will provide a broad overview of Taiwan's place in the security environment of East Asia, covering the history of US-Taiwan-People's Republic of China relations, Taiwan's ambiguous status in the contemporary inter-state system, cross-Strait trends including the military balance of power and economic integration, the emergence and evolution of "sharp power" threats to Taiwan's security, and domestic politics and the quality of Taiwan's democracy. The course will be offered remotely and integrated with the fall 2020 quarter programming of the Project on Taiwan in the Indo-Pacific at the Hoover Institution. It will feature a combination of guest presentations by outside speakers as part of the PTIP's fall conference agenda, online lectures and discussions led by the instructor, and student presentations. Some course events may be open to the public.
Same as: EASTASN 168

EASTASN 277. Divided Memories & Reconciliation: the formation of wartime historical memory in the Pacific. 4 Units.
Divided Memories will examine the formation of historical memory about World War Two in Asia, looking comparatively at the national memories of China, Japan, Korea, and the United States. It will also study efforts at reconciliation in contemporary Asia. The course will look at the role of textbooks, popular culture, with an emphasis on cinema, and elite opinion on the formation of wartime memory. We will study and discuss controversial issues such as war crimes, forced labor, sexual servitude, and the use of atomic weapons. Class will combine lectures with in class discussion, with short essays or papers.
Same as: EASTASN 77

EASTASN 279. Rebalancing Economic Systems in a World Driven by Tech: Quality-of-Life in Socio-Cultural Context. 4 Units.
This course examines the broader consequences of economic models that rely on innovation-driven growth, e.g. increases in social inequality, tension between globalism and isolationism, and tendencies toward authoritarianism. After an overview of the historical outcomes of previous industrial revolutions, we examine how the above trends are exacerbated in the era of digital transformation, comparing different economic systems (e.g. China, India, Japan, and the U.S.) as realized in their socio-political and cultural contexts. We then discuss approaches toward rebalancing existing systems, including metrics for evaluating economic performance and its impact, in order to satisfy the imperatives of social, environmental, and economic sustainability.
Same as: EASTASN 179

EASTASN 285. The United States, China, & Global Security. 2 Units.
This graduate-level seminar will be taught simultaneously on the campuses of Stanford University and Peking University and will feature a lecture series in which prominent American and Chinese scholars provide presentations that focus on key global security issues. The course content will highlight topics relevant to current U.S.- China relations and their respective roles in Asian and global security. Proposed lecture topics include: an introduction to U.S.- China relations; finance, trade, and investment; cyber security; nonproliferation; maritime security; terrorism; and energy and the environment. Hosted jointly by Stanford University and Peking University, enrollment will be limited to 20 students at each campus and, at Stanford, will be restricted to graduate students and undergraduates with senior standing. Enrollment is competitive, so potential students must complete an application by March 12, 2018 at 5pm: https://web.stanford.edu/dept/CEAS/EASTASN285.fb.
Same as: INTLPOL 285

EASTASN 289K. Korea and the World. 3 Units.
This course investigates the theoretical and empirical underpinnings of modern Korea. The course offers a rough mix of history, domestic politics, and foreign relations. It also approaches the empirics of Korea through various theoretical lenses ranging from identity to balance of power to alliance theory to sports diplomacy. We will cover a vast expanse of time, ranging from the Kanghwa treaty to Donald Trump and Kim Jong-un. The course divides into four sections. The first is an understanding of the traditional historical and Cold War context of Korea's external relations. The second assesses the drivers of Korea¿s relations with the region, including Japan, the United States, China, and Russia. The next section is a three-week unit on North Korea. The last section investigates the policy priorities and potential pitfalls in Korea's path to unification as well as the implications of a united Korea on the balance of power in East Asia. No previous background on Korea is required.
Same as: EASTASN 189K

EASTASN 294. The Rise of China in World Affairs. 3-5 Units.
This course examines the impact and implications of the rise of China in contemporary world politics from a historical and international relations perspective. It reviews China's halting progress into the international system, sketches the evolution of PRC foreign policy since 1949, and analyzes China's developmental priorities and domestic political context as they figure into Beijing's interactions with the world. It sketches American policy toward the PRC, and it assesses alternative approaches to dealing with China on such issues as arms and nuclear proliferation, regional security arrangements, international trade and investment, human rights, environmental problems, and the Taiwan and Tibet questions.
Same as: EASTASN 94

EASTASN 297. The International Relations of Asia since World War II. 3-5 Units.
Asian international relations since World War II were dominated by the efforts of the newly independent nation-states of Asia, almost all of which had been colonies before the war, to establish and maintain sovereignty in a context of American and Soviet competition for influence in the region. This course traces the major developments of the period, including the Chinese civil war, the U.S. occupation of Japan, the division of Korea and the Korean War, the South and Southeast Asian independence struggles, the American and Soviet alliance systems, the Vietnam War, the strategic realignments that led to the end of the Cold War in Asia, the emergence of Central Asia, and the legacy of issues that the period has posed for the region today.
Same as: EASTASN 97

EASTASN 300. Graduate Directed Reading. 1-5 Unit.
Independent studies under the direction of a faculty member for which academic credit may properly be allowed. For East Asian Studies M.A. students only.

EASTASN 301. Graduate Archival Directed Reading. 1 Unit.
Independent studies under the direction of a faculty member for which academic credit may properly be allowed. Research will require in-person access to archival materials in Hoover Institution, Stanford's East Asia Library, and/or Branner Map Collections. For East Asian Studies M.A. students only.

EASTASN 330. Core Seminar: Issues and Approaches in East Asian Studies. 1 Unit.
For East Asian Studies M.A. students only.

EASTASN 390. Practicum Internship. 1 Unit.
On-the-job training under the guidance of experienced, on-site supervisors. Meets the requirements for curricular practical training for students on F-1 visas. Students submit a concise report detailing work activities, problems worked on, and key results. May be repeated for credit. Prerequisite: qualified offer of employment and consent of adviser.

EASTASN 402A. Topics in International Technology Management. 1 Unit.
Theme for Autumn 2020 is "Digital transformation among new and traditional industries in Asia." Distinguished guest speakers and panels from industry discuss approaches in Asia to data-driven business models, influencer marketing, DevOps for new AI solutions, data privacy and security, new value chain relationships, etc. See syllabus for specific requirements, which may differ from those of other seminars at Stanford.
Same as: EALC 402A, EE 402A

EASTASN 402T. Entrepreneurship in Asian High Tech Industries. 1 Unit.
Distinctive patterns and challenges of entrepreneurship in Asia; update of business and technology issues in the creation and growth of start-up companies in major Asian economies. Distinguished speakers from industry, government, and academia.
Same as: EALC 402T, EE 402T

EASTASN 801. TGR Project. 0 Units.
.

ECONOMICS

Courses offered by the Department of Economics (http://economics.stanford.edu/) are listed under the subject code ECON on the (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=ECON&filter-catalognumber-ECON=on) Stanford Bulletin's (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=ECON&filter-catalognumber-ECON=on) ExploreCourses web site (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=ECON&filter-catalognumber-ECON=on).

The department's purpose is to acquaint students with the economic aspects of modern society, to familiarize them with techniques for the analysis of contemporary economic problems, and to develop in them an ability to exercise judgment in evaluating public policy. There is training for the general student as well as for those who plan careers as economists in civil service, private enterprise, teaching, or research.

The department's curriculum is an integral part of Stanford's programs in International Relations, Public Policy, and Urban Studies.

The faculty interests and research cover a wide spectrum of topics in most fields of economics, including behavioral economics, comparative institutional analysis, econometrics, economic development, economic history, experimental economics, industrial organization, international trade, labor, macro- and microeconomic theory, mathematical economics, environmental economics, and public finance.

Mission of the Undergraduate Program in Economics

The mission of the undergraduate program in Economics is to acquaint students with the economic aspects of modern society, to familiarize them with techniques for the analysis of contemporary economic problems, and to develop in them an ability to exercise judgment in evaluating public policy. The program introduces students to macro- and microeconomic theory, teaches them to think and write clearly about economic problems and policy issues and to apply the basic tools of economic analysis. The undergraduate major provides an excellent background for those who plan careers in government and private enterprise as well as those pursuing graduate degrees in professional schools or in the field of economics.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. understanding of core knowledge within Economics.
2. ability to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
3. ability to write clearly and persuasively and communicate ideas clearly.
4. ability to evaluate theory and critique research within the discipline.

Graduate Programs in Economics

The primary objective of the graduate program is to educate students as research economists. In the process, students also acquire the background and skills necessary for careers as university teachers and as practitioners of economics. The curriculum includes a comprehensive treatment of modern theory and empirical techniques. Currently, 20 to 25 students are admitted each year.

Graduate programs in economics are designed to ensure that students receive a thorough grounding in the methodology of theoretical and empirical economics, while at the same time providing specialized training in a wide variety of subfields and a broad understanding of associated institutional structures. Toward these ends, the program is arranged so that the student has little choice in the curriculum at the outset but considerable latitude later on.

Students admitted to graduate standing in the department are expected to have a strong background in college-level economics, mathematics, and statistics. Preparation ordinarily consists of a college major in economics, a year-long calculus sequence that includes multivariate analysis, a course in linear algebra, and a rigorous course in probability and statistics.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Economics and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Economics. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Economics and and to interpret and present the results of such research.

Fellowships and Assistantships

The department awards a number of fellowships for graduate study. All students whose records justify continuation in the program may be assured support for the second through fifth years in the form of employment as a teaching or research assistant. All first year and a few second or third year students are typically awarded full fellowships, including a stipend and tuition. Second year students who are not on fellowship receive support in their entire second year (and surrounding summers) through a second year RAship. Third and fourth year students typically arrange for RA support directly with a faculty adviser or request TA support through the department. These half-time (20 hours per week) appointments provide a living wage and tuition allowance. Entering students are not eligible for research or teaching assistantships. Students in their final job market year are encouraged to apply for SIEPR dissertation research fellowships.

Bachelor of Arts in Economics

The Department of Economics offers a Bachelor of Arts in Economics. Eligible students may also pursue a Bachelor of Arts with Honors (p. 1365). The department also offers a minor in Economics (p. 1365).

Suggested Preparation for the Major

The total number of units required for the major is 80. Students are encouraged to complete the core courses 1-6 below, as early as possible. Ideally, students should complete the core during the sophomore year, before taking upper division courses. Courses may not be taken before the prerequisites are completed. The required number of field courses is five. There is great flexibility in the choice of electives, including some upper-division math, statistics, and computer science.

How to Declare the Major

- Complete the online Econ Major Declaration form and submit it to the Director of Undergraduate Studies (DUS): Declare the Econ Major (https://docs.google.com/forms/d/e/1FAIpQLSd-

TR9JJglwzJh3hE5v4rZQXSad7SIYlGn255GwvK3ZLrp_3w/viewform/?usp=sf_link)

- When the declaration form is submitted, the DUS reviews the forms and emails the student and the assigned advisor.
- The student then makes an appointment to meet with the advisor to go over the declaration form.
- At the conclusion of the meeting the student requests that the advisor notify the Undergraduate Student Services Officer that the plan is approved.
- The student declares in Axess (https://axess.sahr.stanford.edu/).
- The student makes an appointment to meet with the Student Services Officer, to finalize the major declaration and she approves the declaration in Axess.
- The student must declare by the end of the quarter prior to the quarter of graduation. Students may not declare during Summer Quarter, the last week of Autumn or Winter Quarter or last two weeks of Spring Quarter.

Degree Requirements

The total number of units required for the major is 80. At least 55 of those units must be taken at Stanford in California. All courses counting toward the economics major must be taken for a letter grade and a GPA in the major of 2.0 (C) or better must be achieved.

Students scoring a 5 on both the advanced placement microeconomics and advanced placement macroeconomics exam may petition the Director of Undergraduate Studies to have the ECON 1 Principles of Economics course requirement waived. Students do not receive units credit for placing out of ECON 1 Principles of Economics.

To use transfer credit in partial satisfaction of the requirements, the student must obtain written consent from the department's Director of Undergraduate Study, who establishes the amount of credit to be granted toward the department requirements (see the Information Book for Undergraduate Economics Majors). Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics major. See the department's Transfer Credit web site for additional information.

Course prerequisites are enforced. Students taking courses to satisfy prerequisites in another department or institution must petition for Stanford course substitution or transfer credit approval in order to satisfy course prerequisites.

The time limit for satisfactory completion of a course is one year from the date an incomplete is given, although instructors may set a shorter time limit. Students are responsible for seeing that all grades of 'incomplete' are cleared within the time limit.

Course Requirements

		Units
Core Courses		**30**
ECON 1	Principles of Economics	5
ECON 50	Economic Analysis I (Prerequisites: ECON 1 and MATH 51 (or CME 100 or CME 100A))	5
ECON 51	Economic Analysis II (Prerequisite: ECON 50)	5
ECON 52	Economic Analysis III (Prerequisite: ECON 50)	5
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists (Prerequisite: MATH 20 or equivalent) [1]	5
ECON 102B	Applied Econometrics (Prerequisite: ECON 102A) [2]	5
Field Courses		**25**
Must be taken at Stanford in California.		
Select five of the following:		
ECON 102C	Advanced Topics in Econometrics	5
ECON 102D	Econometric Methods for Public Policy Analysis and Business Decision-Making	5
ECON 111	Money and Banking	5
ECON 112	Financial Markets and Institutions: Recent Developments	5
ECON 118	Development Economics	5
ECON 125	Economic Development, Microfinance, and Social Networks	5
ECON 126	Economics of Health and Medical Care	5
ECON 135	Foundations of Finance [3]	3
or ECON 140	Introduction to Financial Economics	
ECON 136	Market Design	5
ECON 137	Decision Modeling and Information	5
ECON 141	Public Finance and Fiscal Policy	5
ECON 145	Labor Economics	5
ECON 146	Economics of Education	5
ECON 147	The Economics of Labor Markets	5
ECON 149	The Modern Firm in Theory and Practice	5
ECON 155	Environmental Economics and Policy	5
ECON 157	Imperfect Competition	5
ECON 158	Regulatory Economics	5
ECON 160	Game Theory and Economic Applications [4]	5
or ECON 180	Honors Game Theory	
ECON 165	International Finance	5
ECON 166	International Trade	5
ECON 178	Behavioral Economics	5
ECON 179	Experimental Economics	5
ECON 198	Junior Honors Seminar	5
ECON 199D	Honors Thesis Research	1-10
Writing in the Major (WIM) Course		**5**
Must be taken at Stanford in California. This course should be taken only after completing ECON 51 Economic Analysis II and ECON 52 Economic Analysis III, ECON 102B Applied Econometrics, and at least two field courses.		
ECON 101	Economic Policy Seminar	5
Electives [5]		**20**
20 units in addition to the field courses taken; choose from any ECON courses offered for a letter grade.		
Total Units		**80**

1. It is recommended that students satisfy this basic statistics requirement early in their program.
2. Material in ECON 102B Applied Econometrics is used in a number of field courses. Students are advised to take ECON 102B Applied Econometrics early in their program.
3. Students may not count units from both courses towards their major as the courses are too similar in content.
4. Students may not count units from both courses towards their field course requirements as the courses cover similar subject matter.

[5] Up to 10 units of this requirement may be fulfilled by upper-division math, statistics, or computer science (https://economics.stanford.edu/undergraduate/major/) with the approval of the Director of Undergraduate Studies.
A maximum of 10 units of transfer credit or of ECON 139D Directed Reading, may be taken under this section. Suitable transfer credit must be approved in writing by the Director of Undergraduate Studies. Advanced undergraduate majors with strong quantitative preparation may enroll in graduate (200-level) courses with permission of the Director of Undergraduate Studies and the course instructor. Some courses offered by Overseas Studies may be counted towards this requirement. The department does not give credit for internships.

Flexible Tracks

Flexible Tracks listings of economics courses are provided to emphasize the diverse interests of Economics majors. Flexible Tracks do not add major requirements. Flexible Tracks may be examined in the department's Information Book for Economics Majors (http://economics.stanford.edu/undergraduate/). These flexible tracks are not declared in Axess and are not printed on the transcript or diploma. Flexible Tracks are provided for the following areas of emphasis (field courses are in bold):

- Behavioral & Experimental (ECON 13N, 46, **136 (or 182), 137, 160 (or 180)**, **178, 179**)
- Finance (ECON 43, 44, **111, 112, 140, 141,** 143, **165,** 184)
- International & Development (ECON 15N, 46, 106, **118,** 124, **125,** 127**,** 130, 131, 162**, 164, 165, 166**)
- Policy (ESF 1, ECON 11N, 15N, 17N, 19Q, 22N, 23N, 46, 47, **111, 118, 126,** 130, **141, 144, 145, 146, 147,** 150, 154**, 155,** 159)
- Research (ECON **102C, 102D, 136 (or 182), 137, 160 (or 180), 198, 199D, 202, 210**)
- Strategy (ECON 19Q, **136 (or 182), 137, 149, 157, 158, 160 (or 180)**)

Honors Program

The honors program offers an opportunity for independent research, creativity, and achievement. It is designed to encourage a more intensive study of economics than is required for the normal major, with course and research work of exceptional quality. Honors students submit their theses in writing and present them during the Honors Research Symposium during Spring Quarter. The honors program requires:

1. Completing all requirements for the major; plus five additional units, bringing the total to 85 units.
2. Achieving a grade point average (GPA) of at least 3.5 for the required courses of the Economics major (excluding ECON 139D Directed Reading and ECON 199D Honors Thesis Research). See details in the Information Book for Economics Majors.
3. Complete ECON 102B Applied Econometrics and at least two Econ upper division courses most relevant for the proposed topic of the honors thesis by the end of the junior year. (These can be included in the basic 80 units.)
4. Candidates must write an honors thesis in their senior year for at least one unit and up to nine units of credit in their thesis advisor's section of ECON 199D Honors Thesis Research. Additionally, winter registration for one unit of Honors Thesis Research, under the Director of the Honors Program section number is mandatory for all honors students. The thesis must be of very high quality and written under the direction of a member of the department or its affiliated faculty. Units of ECON 199D Honors Thesis Research do not count toward the course work requirements for the basic economics major, or in the computation of the GPA requirement for honors.

Juniors interested in the honors program should contact the honors program director for more information. Prospective candidates for the honors program should submit an application to the director no later than the third Wednesday of Autumn Quarter for Spring Quarter degree conferral. Also required, in the same quarter, is a three-page thesis proposal that must be approved by the thesis advisor.

return to top of page (p. 1363)

Minor in Economics

The minor in Economics has two main goals: to acquaint students with the rudiments of micro- and macroeconomic theory that are required of all majors; and to allow students to build competence in the application of this theory to two fields of economics of their choosing, and the opportunity to specialize further in any one of these fields by taking one additional advanced course in the Department of Economics.

Students must complete their declaration of the minor no later than the last day of the preceding quarter before their degree conferral.

Degree Requirements

At least 20 out of the 35 units for the minor must be taken at Stanford. Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics minor.

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit. The combined total of all units for the minor must equate to the grade point average (GPA) of 2.0 (C) or better.

Course Requirements

		Units
Core Courses		**20**
ECON 1	Principles of Economics	5
ECON 50	Economic Analysis I (Prerequisites: ECON 1 and MATH 51 or CME 100 or CME 100A)	5
ECON 51	Economic Analysis II (Prerequisite: ECON 50)	5
ECON 52	Economic Analysis III (Prerequisite: ECON 50)	5
Field Courses		**10**
Must be taken at Stanford in California		
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	5
ECON 102B	Applied Econometrics	5

ECON 135	Foundations of Finance [1]	3
or ECON 140	Introduction to Financial Economics	
ECON 136	Market Design [2]	5
or ECON 182		
ECON 137	Decision Modeling and Information [2]	5
or ECON 181		

ECON 141	Public Finance and Fiscal Policy	5
ECON 145	Labor Economics	5
ECON 146	Economics of Education	5
ECON 147	The Economics of Labor Markets	5
ECON 149	The Modern Firm in Theory and Practice	5
ECON 155	Environmental Economics and Policy	5
ECON 157	Imperfect Competition	5
ECON 158	Regulatory Economics	5
ECON 160	Game Theory and Economic Applications [2]	5
or ECON 180	Honors Game Theory	
ECON 164		5
ECON 165	International Finance	5
ECON 166	International Trade	5
ECON 178	Behavioral Economics	5
ECON 179	Experimental Economics	5
ECON 198	Junior Honors Seminar	5
ECON 202	Microeconomics I [3]	2-5
ECON 210	Macroeconomics I [3]	2-5
Electives		**5**
Select from: Any ECON courses offered for letter grades		
Total Units		**35**

1. Students may not count units from both courses towards their minor as the courses are too similar in content.
2. Students may not count units from both courses towards their minor as the courses cover similar subject matter.
3. Students may enroll with permission of the Director of Undergraduate Studies and the course instructor.

Master of Arts in Economics

University requirements for the master's degree are described in the "Graduate Degrees (p. 65)" section of this bulletin.

The Economics department does not offer a terminal M.A. degree. An M.A degree may only be pursued in combination with a doctoral degree from Economics or another department at the University. Students must be currently enrolled in a Ph.D. program at Stanford before adding the Economics M.A. degree. Economics students may, but need not, elect to add this degree in addition to their current Ph.D. degree after they have been enrolled at Stanford for at least one quarter.

Adding the M.A. Degree

While a formal application to the M.A program is not required, current Ph.D. students (including those in the Economics Ph.D. program) must:

1. Submit a Graduate Authorization Petition (https://registrar.stanford.edu/students/graduate-degree-progress/graduate-program-authorization-petition/) via Axess in order to add the M.A. as an additional degree.
   Students must have completed the Stanford requirements for a B.A. in Economics or approximately equivalent training. Since students are required to take some of the same courses as Ph.D. candidates, similar preparation in mathematics and statistics generally is expected before the petition to add the M.A. will be approved.
2. Complete the Master's Program Proposal form (https://stanford.app.box.com/v/progpropma/) and submit it to the Economics Student Services Manager.
3. Apply to graduate (in Axess, before the quarterly deadline) in the quarter you wish to confer the degree. The degree is not conferred automatically.

Degree Requirements

A master's program must satisfy these criteria:

1. Completing, at Stanford, at least 45 units of credit beyond those required for the bachelor's degree, of which at least 40 units must be in the Department of Economics. Students must complete ECON 202 Microeconomics I or ECON 202N Microeconomics I For Non-Economics PhDs students and at least three other 200-level lecture courses. They must receive a grade of 'B-' or better in ECON 202 Microeconomics I or ECON 202N Microeconomics I For Non-Economics PhDs students. Undergraduate courses must be numbered 105 or higher (with the exception of the ECON 102A Introduction to Statistical Methods (Postcalculus) for Social Scientists,ECON 102B Applied Econometrics,ECON 102C Advanced Topics in Econometrics sequence listed below). No seminar courses numbered 300 or above can be counted.
2. Demonstrating competence in empirical methodology by receiving a grade of 'B-' or better in both ECON 270 Intermediate Econometrics I and ECON 271 Intermediate Econometrics II, or by receiving a grade of 'B-' or above in each of ECON 102A Introduction to Statistical Methods (Postcalculus) for Social Scientists, ECON 102B Applied Econometrics, and ECON 102C Advanced Topics in Econometrics.
3. Submitting two term papers (or a thesis of sufficient quality). At least one of these papers must be deemed to represent graduate-level work. Normally, this means that it is written in connection with a 200-level course. A maximum of 5 units of credit can be earned for a directed reading/thesis (ECON 239D, ECON 400, or comparable thesis course in home department) toward the 45-unit degree requirement. In lieu of this paper requirement, students may elect to take two additional 200+ level Economics courses.
4. A grade point average (GPA) of 3.0 must be maintained for all master's level work. All lecture courses must be taken for a letter grade.

Doctor of Philosophy in Economics

University requirements for the Ph.D. are described in the "Graduate Degrees (p. 65)" section of this bulletin.

Students admitted to graduate standing in the department are expected to have a strong background in college-level economics, mathematics, and statistics. Preparation ordinarily consists of a college major in economics, a year-long calculus sequence that includes multivariate analysis, a course in linear algebra, and a rigorous course in probability and statistics. When deemed appropriate, a student may be required to complete the necessary background preparation at Stanford. All students take a common core curriculum at the outset and later branch out into the desired fields of specialization.

Well-prepared students should anticipate spending, with some overlap, approximately two years in course work and another two years in seminars, independent study, and dissertation research. A minimum of 135 completed units is required for the degree. The goal is to complete the program in five years, although some types of research programs may require at least six years to complete. The department has a strong commitment to guiding students through the program expeditiously.

Questions and petitions concerning the program and the admissions process should be addressed to the Director of Graduate Study, who has responsibility for administering the graduate program.

Requirements for the Ph.D.

Specific requirements are best discussed in two stages, the first consisting of requirements for admission to candidacy and the second involving further requirements for earning the degree.

Admission to Candidacy for Ph.D.

A student may apply for admission to candidacy when the following minimal requirements are met:

Graduate Core

1. Successful completion of core sequences in microeconomics, macroeconomics, and econometrics:

		Units
A. Microeconomics		
ECON 202	Microeconomics I	2-5
ECON 203	Microeconomics II	2-5
ECON 204	Microeconomics III	3-5
B. Macroeconomics		
ECON 210	Macroeconomics I	2-5
ECON 211	Macroeconomics II	2-5
ECON 212	Macroeconomics III	3-5
C. Econometrics		
ECON 270	Intermediate Econometrics I	2-5
ECON 271	Intermediate Econometrics II	2-5
ECON 272	Intermediate Econometrics III	3-5

   To pass a sequence, an overall grade of 'B' is required for the sequence, and individual course grades must be 'B-' or better. Petitions to substitute courses or waive out of any core course must be submitted to the Director of Graduate Study at least two weeks before the start of the term.

2. Completing the requirements in two additional advanced fields of specialization from the list below or, if approved in advance by the Director of Graduate Study, in one such field together with a substantial amount of work toward a second field taught in a related department (e.g. GSB Finance). Students may request permission from the Director of Graduate Study to create a field not listed as an advanced field below, such as International Finance or Law & Economics. Requirements for completing a field can usually be satisfied by completing two courses and a paper, although students in some fields may be advised to add a third course, which can then be counted toward the distribution requirement discussed later. A minimum grade average of B is required to pass a field sequence. Individual course grades cannot be less than a B- in order to count for field course credit. Specific requirements for completing each field can be found on the Economics department website (http://economics.stanford.edu/).
3. Completing a candidacy paper, normally written in conjunction with one of the advanced specialty fields selected above. Submission of this paper or another research paper is required by the first day of Autumn Quarter of the third year. Satisfactory presentation of this paper is required in the Autumn quarter third year seminar. It is expected that the student meet, and indeed exceed, the above standards by the end of the first quarter in the third year of residency. When this is not possible for any reason, the Director of Graduate Study should be consulted as early as possible during the third year.

Once it is deemed that the above standards have been met, the student should complete the Application for Candidacy for Degree of Doctor of Philosophy. After a student fulfills the department prerequisites for applying for candidacy and submits their candidacy application form, the faculty votes to determine whether the student has the potential to successfully complete the requirements of the degree program. If approved, candidacy remains valid for five years (although it can be terminated earlier by the department if progress is deficient); it can be renewed or extended beyond this period only under unusual circumstances. Failure to advance to candidacy results in dismissal from the program.

Further Requirements for the Ph.D. Degree

1. *Third Year Seminar:* presentation of an expanded research paper in Spring Quarter of the third year.
2. *Distribution Requirement:* Students must complete four other graduate-level courses meeting the following requirements:
   a. at least one course from the area of economic history, unless history is one of the two fields of specialization.
   b. courses in at least two fields other than the two fields of specialization. Distribution courses cannot be crosslisted in those fields.
   c. with advance approval of the Director of Graduate Study, some of these distribution courses may be drawn from related fields taught in other departments. However, including courses taken to meet either the specialization or distribution requirements, no more than two courses in total may be taken outside the Economics department.
   d. all courses used to fulfill distribution requirements must be passed with a grade of B or better.
3. *Teaching Experience:* Each student must serve as a teaching assistant for at least one quarter. It is strongly recommended that this requirement be satisfied before the fourth year of residence.
4. *Seminar Participation:* Each student is expected to participate in at least two all-year research seminars by the end of the fourth year of residence. Normally, participation in a seminar requires one or more oral presentations and the submission of a research paper (which, however, need not be completely separate from dissertation research). Detailed information on fulfilling the seminar requirements can be found on the Economics department website (http://economics.stanford.edu/).
5. *Ph.D. Dissertation:* The process involves selecting a topic, choosing an appropriate adviser, submitting a prospectus (signed by the adviser) outlining the proposed research, selecting a three-member reading committee (usually all from the Department of Economics, although exceptions can be made under certain circumstances), passing the University oral examination at which these three faculty (and two other members of the Academic Council) ask questions about the completed research, and submitting a final draft of the work signed by all members of the reading committee. The student is advised to initiate this process as early as possible.

Graduate Fields

A. Behavioral and Experimental Economics

To receive credit for this field, students must take the following three courses. Research papers and presentations are requirements of these courses.

		Units
ECON 278	Behavioral and Experimental Economics I	2-5
ECON 279	Behavioral and Experimental Economics II	3-5
ECON 280	Behavioral and Experimental Economics III	3-5

B. Econometric Methods For Causal Inference

To receive credit for the Econometric Methods field, students must complete the two courses from the list below.

		Units
ECON 292	Quantitative Methods for Empirical Research	3-5
ECON 293	Machine Learning and Causal Inference	3
STATS 361	Causal Inference	3

C. Econometrics

A student may satisfy the requirements for the econometrics field by completing the requirements of one of two subfields:

- **C-A: Theoretical Econometrics:**

  To receive credit in the theoretical econometrics subfield, students must complete two courses from:

		Units
ECON 273	Advanced Econometrics I	3-5
ECON 274	Advanced Econometrics II	3-5

- **C-B: Applied Econometrics:**

  To receive credit in the applied econometrics subfield, students must complete ECON 273 and either ECON 275 or ECON 276 or ECON 292 (also known as GSB MGTECON 640). Students must also complete a course (or set of courses) that is empirically oriented. The last requirements must be approved by the Director of Graduate Study in consultation with the instructor of 275, 276 or 292.

		Units
ECON 273	Advanced Econometrics I	3-5
ECON 275	Economics-Based Econometrics	3-5
ECON 276	(not offered this year)	2-5
ECON 292	Quantitative Methods for Empirical Research	3-5

D. Economic Development

To receive credit for this field, students must complete two courses from the following list. Students are required to develop and present a series of research ideas throughout each course. Regular attendance at the Development Economics workshop and the Development student workshop is required.

		Units
ECON 214	Development Economics I	2-5
ECON 215	Development Economics II	2-5
ECON 216	Development Economics III	3-5

E. Economic History/Institutions

Students must complete two courses from the following list and develop a research proposal in each course. Presentation of a research proposal is required at the end of the second year. Regular attendance (at least four quarters) at the economic history workshop is required.

		Units
ECON 226	U.S. Economic History	2-5
ECON 227		2-5
ECON 228		2-5
ECON 229	Topics in Economic History	3-5

F. Environmental, Resource and Energy Economics

To receive credit for this field, students must complete:

		Units
ECON 250	Environmental Economics	2-5
ECON 251	Natural Resource and Energy Economics	2-5

G. Finance

To receive credit for the field, students must complete two courses from list list below. A 20-minute research project proposal is required.

		Units
ECON 236	Financial Economics I	3-5
ECON 237	Financial Economics II	2-5
FINANCE 622	Dynamic Asset Pricing Theory	4
FINANCE 624	Corporate Finance Theory	4
FINANCE 625	Empirical Asset Pricing	3

H. Industrial Organization

To receive credit for the field, students must complete:

		Units
ECON 257	Industrial Organization 1	2-5
ECON 258	Industrial Organization IIA [1]	3-5

1 ECON 251 can substitute for ECON 258 only, as long as the student is not also using ECON 251 to fulfill requirements for the Environmental field.

2 Students who select Industrial Organization as a primary focus are expected to also take ECON 260.

I. International Trade and Finance

To receive credit for this field, students must complete two courses from the list below, but are encouraged to take all three courses. Those interested in an **International Trade** concentration should take, at a minimum, 266 and 268; those interested in an **International Finance** concentration should take, at a minimum, 268 and 269. Students are expected to develop and present a research proposal in each course.

		Units
ECON 266	International Trade I	3-5
ECON 268	International Finance and Exchange Rates	3-5
ECON 269	International Finance and Exchange Rates II	3-5
Students must pass all courses with a grade of B or better. With instructor approval, students can substitute another macroeconomics class for 268 or 269.		

J. Labor Economics

To receive credit for this field, students must complete two courses from:

		Units
ECON 246	Labor Economics I	2-5
ECON 247	Labor Economics II	2-5
ECON 248	Labor Economics III	3-5
Each course requires completion of a term paper. Each course must be passed with a grade of B or better.		

K. Macroeconomics

Requirements for this field are completion of two courses from the list below. Presentation of a research proposal in each course is required. ECON 236 and 237 may not be double-counted towards both the macroeconomics and the finance field.

		Units
ECON 233	Advanced Macroeconomics I	2-5
ECON 234	Advanced Macroeconomics II	2-5
ECON 235	(not offered this year)	2-5
ECON 236	Financial Economics I	3-5
ECON 237	Financial Economics II	2-5

L. Market Design

To receive credit for this field, students must take two from the following and give a research presentation:

		Units
ECON 283	Theory and Practice of Auction Market Design	2-5

ECON 284	Simplicity and Complexity in Economic Theory	3-5
ECON 285	Matching and Market Design	2-5
ECON 287	Mechanism and Market Design	3
ECON 289	Advanced Topics in Game Theory and Information Economics	2-5

M. Microeconomic Theory

To receive credit for this field, students must complete two courses from the following and give a research presentation:

		Units
ECON 282	Contracts, Information, and Incentives	3-5
ECON 286	Game Theory and Economic Applications	3-5
ECON 291	Social and Economic Networks	3-5

N. Political Economy

To receive credit for this field, students must pass the two courses below with grades of B or better. Students may petition to substitute Econ 221 for a comparable course in the political science department.

ECON 220	Political Economy I	3-5
ECON 221	Political Economy II	2-5

O. Public Economics

To receive credit for the field, students must complete the two courses from the list below and develop an original research project. Regular attendance at the Public Economics workshop is required for students in their third year or above to receive credit for the field.

		Units
ECON 241	Public Economics I	2-5
ECON 242	Public Economics II	3-5
ECON 243	Public Economics III	2-5

Ph.D. Minor in Economics

To be recommended for the Ph.D. degree with Economics as a minor subject, a student must qualify in three fields of economics, at least one of which must be in the core economics sequence (Microeconomics, Macroeconomics, Econometrics). The standard of achievement in these fields is the same for minor as for major candidates, including minimum grade requirements, paper submissions and research presentations where appropriate. All courses used for the Ph.D. minor must be taken for a letter grade.

Joint Degree Programs in Economics with the School of Law

J.D./M.A. and J.D./PH.D.

The Department of Economics and the School of Law offer a joint program leading to either a J.D. degree combined with an M.A. degree in Economics, or to a J.D. degree combined with a Ph.D. in Economics.

The J.D./M.A. and J.D./Ph.D. degree programs are designed for students who wish to prepare themselves for careers in areas relating to both law and economics. Students interested in either joint degree program must apply and gain entrance separately to the School of Law and the Department of Economics and, as an additional step, must secure permission from both academic units to pursue degrees in those units as part of a joint degree program. Interest in either joint degree program should be noted on the student's admission applications and may be considered by the admission committee of each program. Alternatively, an enrolled student in either the Law School or the Economics department may apply for admission to the other program and for joint degree status in both academic units after commencing study in either program.

Joint degree students may elect to begin their course of study in either the School of Law or the Department of Economics. Faculty advisers from each academic unit participate in the planning and supervising of the student's joint program. Students must be enrolled full time in the Law School for the first year of law school, and, at some point during the joint program, may be required to devote one or more quarters largely or exclusively to studies in the Economics program regardless of whether enrollment at that time is in the Law School or in the Department of Economics. At all other times, enrollment may be in the graduate school or the Law School, and students may choose courses from either program regardless of where enrolled. Students must satisfy the requirements for both the J.D. and the M.A. or Ph.D. degrees as specified in this bulletin or by the School of Law.

The Law School approves courses from the Economics Department that may count toward the J.D. degree, and the Economics department approves courses from the Law School that may count toward the M.A. or Ph.D. degree in Economics. In either case, approval may consist of a list applicable to all joint degree students or may be tailored to each individual student's program. The list may differ depending on whether the student is pursuing an M.A. or a Ph.D. in Economics.

In the case of a J.D./M.A. program, no more than 45 quarter hours of approved courses may be counted toward both degrees. In the case of a J.D./Ph.D. program, no more than 54 quarter hours of approved courses may be counted toward both degrees. In either case, no more than 36 quarter hours of courses that originate outside the Law School may count toward the Law degree. To the extent that courses under this joint degree program originate outside the Law School but count toward the Law degree, the Law School credits permitted under Section 17(1) of the Law School Regulations shall be reduced on a unit-per-unit basis, but not below zero. The maximum number of Law School credits that may be counted toward the M.A. or the Ph.D. in Economics is the greater of: (a) 5 quarter hours in the case of the M.A. and 10 quarter hours in the case of the Ph.D.; or (b) the maximum number of hours from courses outside of the department that M.A. or Ph.D. candidates in Economics are permitted to count toward the applicable degree under general departmental guidelines or in the case of a particular student's individual program.

Tuition and financial aid arrangements are normally made through the school in which the student is then enrolled.

For more information, see the Law School's Degrees and Joint Degrees (http://www.law.stanford.edu/program/degrees/) web site.

Joint Degree Program in Ph.D. in Economics and Master of Public Policy

The Ph.D./M.P.P. joint degree is designed for students who wish to prepare themselves for careers in areas relating to both policy and economics. Students interested in this degree first apply to the Economics Department, indicating an interest in the joint program. There is one admissions application and one fee. If the decision is made by the department to admit the applicant, the file is then forwarded to the M.P.P. program. An admission decision, based on the information in the Ph.D. application, is made promptly, and the department informs the student of the decision.

Students may also apply to the M.P.P. after having commenced study in the Economics Department at Stanford, by first receiving the consent of the Director of Graduate Studies in Economics and then applying to the Public Policy program.

Students must have a faculty adviser from the Economics Department to assist with the planning and supervising of the joint program. The adviser

is usually chosen from among the department's Public Policy-affiliated faculty.

Tuition and financial aid arrangements are made through the Economics Department.

Requirements for the M.P.P./Ph.D. in Economics

Core M.P.P. curriculum of 45 units

		Units
PUBLPOL 301B	Economic Policy Analysis for Policymakers	4-5
PUBLPOL 302A	Introduction to American Law	3-5
PUBLPOL 302B	Economic Analysis of Law	3
PUBLPOL 304A		3-4
PUBLPOL 305B	Public Policy and Social Psychology: Implications and Applications	4
PUBLPOL 306	Writing and Rhetoric for Policy Audiences	4
PUBLPOL 307		4-5
PUBLPOL 309	Practicum	1-10
PUBLPOL 311	Public Policy Colloquium	1
LAW 7508	Problem Solving and Decision Making for Public Policy and Social Change	4
Total Units		31-45

Other Programs

Other programs leading to dual degrees may be arranged. For example, the Ph.D. in Economics combines with one or two years of study in the School of Law, leading to the nonprofessional Master of Legal Studies (M.L.S.) degree. A dual degree program does not permit counting any courses toward both the Economics and the Law degrees. For more information, see the Law School's Degrees and Joint Degrees (http://www.law.stanford.edu/program/degrees/) web site.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a “credit” or “no credit” grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a “credit” or “satisfactory” grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

In academic year 2020-21, the Department of Economics will count courses taken with a grade of 'CR' (credit) towards the satisfaction of its undergraduate degree requirements so long as (i) the number of units taken CR does not exceed 15 and (ii) the CR courses are not ECON 50, ECON 51, ECON 52, ECON 102B, or ECON 199D (Honors Research). In academic year 2020-21, the five aforementioned courses must be taken for a letter grade if they are to count towards the satisfaction of the degree requirements. Apart from the five aforementioned courses, even courses that normally require a letter grade will count towards the degree requirements if they are taken CR.

Graduate Degree Requirements

Grading

The Department of Economics counts all first year (core) courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of graduate degree requirements that otherwise require a letter grade provided that the instructor affirms that the work was done at a 'B-' or better level for each individual course and a 'B' average or better across each field sequence.

For second year+ (field & distribution) courses, a grade of 'CR' (credit) or 'S' (satisfactory) will count towards satisfaction of graduate degree requirements that otherwise require a letter grade provided that the instructor affirms that the work was done at a 'B' or better level.

Graduate Advising Expectations

For a statement of University policy on graduate advising, see the "Graduate Advising (p. 80)" section of this bulletin.

The Department of Economics is committed to providing academic advising in support of graduate student scholarly and professional development. When most effective, this advising relationship entails collaborative and sustained engagement by both the adviser and the advisee. As a best practice, advising expectations should be periodically discussed and reviewed to ensure mutual understanding. Both the adviser and the advisee are expected to maintain professionalism and integrity.

Faculty advisers guide students in key areas such as selecting courses, designing and conducting research, developing of teaching pedagogy, navigating policies and degree requirements, and exploring academic opportunities and professional pathways.

Graduate students are active contributors to the advising relationship, proactively seeking academic and professional guidance and taking responsibility for informing themselves of policies and degree requirements for their graduate program. Outlined below are a list of specific responsibilities of the various advising relationships, year by year.

First Year

First-year students are assigned to an adviser in groups of four or five students, so that there are only a handful of first-year advisers. First-year advisers should meet with students early in Autumn Quarter and offer to help with any questions as the year progresses. Including the DGS, Ph.D. administrator, student mentors, study groups, core course instructors, and the first-year seminar series, students have a variety of information sources. The adviser is simply another person to whom the students can turn to for basic and broad advice about the program.

If a first year adviser sees a student struggling academically or personally, please ensure that they are connected to the help that they need, and if unsure of how to help please consult with the DGS.

Second-Year RAship

The second-year RA-ship is an opportunity for students to gain experience with research. The RA-ship is subsidized by the department and averages 15 hours/week (rather than the 20 for standard RAships in later years) for the entire second year (and surrounding summers). Students are advised to ensure that it is as educational as possible. Some students have fellowships and thus do not need RA support, but should still seek advisers and should be given the same attention to ensure that their research is progressing.

Second-Year Paper

The second-year paper is due at the beginning of Autumn Quarter of the third year, and students have to agree with a faculty member to oversee that paper by the end of the Spring Quarter of the second year.

An adviser on a second-year paper should make sure that the student is progressing on the paper during the Summer by setting a timeline and meeting with them at key points. It is essential that this be finished on time so that students can move on to new projects or to further develop it during the third year. Students are encouraged to talk to multiple faculty, but the person who signs their paper should take responsibility. The student also has a responsibility to be seeking advice and communicating regularly with their adviser, both about progress and unexpected setbacks, both of which are inevitable in research. Note that second-year papers can be co-authored with other students and/or faculty.

Third-Year Advising

The third-year seminar helps shepherd students through the transition to dissertation research; however, it is not a substitute for an adviser but rather a complement. Students should clear their slides for their third-year presentations with their advisers before the presentations.

The adviser and student are both responsible for ensuring that they meet regularly and have set a clear a timeline and goals for their research.

At the end of the third year, students meet with the DGS and present a form signed by someone agreeing to advise their dissertation research, and they should have plans for a dissertation and a committee. If a faculty member is advising a student during the third year and does not plan to continue that relationship, the faculty member is responsible for letting the student know early enough so that s/he can find a new adviser going forward. Occasionally, students who are getting substantial advice from more than one person may wish to designate co-primary advisers. This involves a serious commitment in terms of time and attention from all of the primary advisers, and should involve more than window-dressing.

Fourth Year and Beyond

Advisers and students should be meeting regularly and have a clear plan and timeline for completion of a dissertation research and going on the market. The adviser's role includes providing guidance concerning designing, implementing, conducting, writing, presenting, submitting (where, how, etc.), and revising their research. The adviser should meet regularly with the student and inform the DGS if a student is languishing or falling behind in their research.

Advisers should be very clear with students about how their research is progressing and what they need to do to improve. Students are responsible for being broadly engaged, keeping their adviser regularly informed of their progress, and seeking advice from several faculty, attending and participating in conferences, regularly attending seminars, talking with other students, and more generally being regularly involved in research-related activities.

Faculty who are on a student's dissertation committee must discuss the student's job market prospects with him or her well in advance of the job market. It is essential to calibrate students' expectations appropriately. If the student aspires to jobs for which a committee member feels s/he cannot write supportive letters, that faculty must make that fact absolutely clear to the student well in advance. The faculty member must also confer with other committee members to determine whether they are in agreement concerning the student's progress, job market plans, and likely prospects. A dissertation committee member whose assessment of a student is out of line with the rest of the committee has an obligation to make their views known to the committee well before the student enters to job market, and should be willing to withdraw from the committee if it is in the student's best interest. Committee members should therefore compare their assessments, at the latest, by the start of the Autumn Quarter during which the student enters the job market.

Students need to become self-sufficient; most of these aspects of conducting and disseminating research are not learned via courses or readings, but by doing coupled with timely advice. It is the most important, and rewarding, part of the Ph.D. program.

An extensive and detailed guide to the adviser/advisee relationship and responsibilities appears on the department's website (https://economics.stanford.edu/).

Emeriti: (Professors) Takeshi Amemiya, Timothy F. Bresnahan, Paul A. David, Walter Falcon, Victor R. Fuchs, John G. Gurley, Peter J. Hammond, Donald Harris, Anne O. Krueger, Mordecai Kurz, Lawrence J. Lau, Roger G. Noll, John H. Pencavel, Thomas Sargent, John B. Shoven, David A. Starrett, Joseph E. Stiglitz, Gavin Wright

Chair: B. Douglas Bernheim

Vice Chair: Monika Piazzesi

Director of Graduate Studies: Luigi Pistaferri

Director of Undergraduate Studies: Frank Wolak

Professors: Ran Abramitzky, Kyle Bagwell, B. Douglas Bernheim, Nicholas Bloom, Michael Boskin, Mark Duggan, Pascaline Dupas, Liran Einav, Matthew Gentzkow, Lawrence Goulder, Avner Greif, Robert E. Hall, Han Hong, Caroline Hoxby, Guido Imbens, Matthew Jackson, Patrick Kehoe, Pete Klenow, Jonathan Levin, Thomas E. MaCurdy, Neale Mahoney, Paul R. Milgrom, Muriel Niederle, Monika Piazzesi, Luigi Pistaferri, Joseph Romano, Alvin Roth, K. Martin Schneider, Ilya Segal, John B. Taylor, Alessandra Voena, Heidi L. Williams, Frank Wolak

Associate Professors: Gabriel Carroll, Arun Chandrasekhar

Assistant Professors: Adrien Auclert, Luigi Bocola, Ignacio Cuesta, Daniel Fetter, Bradley Larsen, Melanie Morten, Petra Persson, Isaac Sorkin

Lecturers: Marcelo Clerici-Arias, Gopi Shah Goda, Alexander Gould, Ward Hanson, Gregory La Blanc, Chris Makler, Scott McKeon, Mark Tendall, Ramin Toloui

Postdocs: Ravi Jagadeesan, Øvind Schøyen, Colin Sullivan

Courtesy Professors: Anat Admati, Susan Athey, Jay Bhattacharya, Jeremy Bulow, Steve Callander, Darrell Duffie, Marcel Fafchamps, James D. Fearon, Stephen H. Haber, Charles Kolstad, David M. Kreps, Edward Lazear, Rosamond L. Naylor, Peter C. Reiss, Gregory Rosston, Kenneth Singleton, Andrzej Skrzypacz

Visiting Assistant Professors: Assaf Romm

Overseas Studies Courses in Economics

The Bing Overseas Studies Program (http://bosp.stanford.edu) (BOSP) manages Stanford international and domestic study away programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The BOSP course search site (https://undergrad.stanford.edu/programs/bosp/explore/search-courses/) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu) or Bing Overseas Studies (http://bosp.stanford.edu).

Due to COVID-19, all BOSP programs have been suspended for Autumn Quarter 2020-21. All courses and quarters of operation are subject to change.

		Units
OSPBER 82	Globalization and Germany	4-5
OSPFLOR 26	Economics of the EU	5
OSPMADRD 54	Contemporary Spanish Economy and the European Union	4
OSPPARIS 91	The Future of Globalization: Economics, Politics and the Environment	5
OSPSANTG 119X	The Chilean Economy: History, International Relations, and Development Strategies	5

Courses

ECON 1. Principles of Economics. 5 Units.
This is an introductory course in economics. We will cover both microeconomics (investigating decisions by individuals and firms) and macroeconomics (examining the economy as a whole). The primary goal is to develop and then build on your understanding of the analytical tools and approaches used by economists. This will help you to interpret economic news and economic data at a much deeper level while also forming your own opinions on economic issues. The course will also provide a strong foundation for those of you who want to continue on with intermediate microeconomics and/or intermediate macroeconomics and possibly beyond.

ECON 1V. Principles of Economics. 5 Units.
The course covers all of economics at a basic level. It stresses the key idea that economics is about making purposeful choice with limited resources and about people interacting with other people as they make these choices. Most of those interactions occur in markets, and the course is mainly about markets, including labor markets and capital markets. We show why free competitive markets can improve people's lives and how they have removed millions from people from poverty, with many more, we hope, to come; we show how monopolies and environmental spillovers cause market failures; we show how to remedy these failures through government policy; and we explain why government failure can also be a problem. The overall goal is to use economics to understand the big issues of the day including economic growth, inequality, crises, and unemployment. The goal of this course is to learn how to use economic analysis to reach reasoned conclusions about the big issues of the day from the workings and benefits of a market economy to the causes of economic growth, financial crises, and unemployment.

ECON 4. Democracy Matters. 1 Unit.
Should the U.S. close its border to immigrants? What are the ramifications of income inequality? How has COVID-19 changed life as we know it? Why are Americans so politically polarized? How can we address racial injustice? As the 2020 election approaches, faculty members from across Stanford will explore and examine some of the biggest challenges facing society today. Each week will be dedicated to a different topic, ranging from health care and the economy to racial injustice and challenges to democracy. Faculty with expertise in philosophy, economics, law, political science, psychology, medicine, history, and more will come together for lively conversations about the issues not only shaping this election season but also the nation and world at large. There will also be a Q&A following the initial discussion. Attendance and supplemental course readings are the only requirements for the course.
Same as: PHIL 30, POLISCI 42, PUBLPOL 4

ECON 5. Frontiers in Economic Research and Policy. 1 Unit.
Interested in exploring how economics is used in professional, policy, and research settings? This course will feature weekly presentations from Stanford faculty and scholars and economists in government, non-profit, and business to demonstrate how economic analysis can be applied to a wide range of practical and policy problems. May be repeated for credit. Pre-requisites: none.

ECON 10. Microcosm of Silicon Valley and Wall Street. 1 Unit.
Seminar in applied economics with focus on the microcosm of Silicon Valley, how growth companies are originated, managed and financed from start-up to IPO. Round-table discussion format. Applicable to those students with an interest in technology company formation, growth and finance including interaction with Wall Street. Enrollment limited to 10 juniors, seniors and co-term students. Application found at https://economics.stanford.edu/academics/undergraduate-program/forms.

ECON 11N. Understanding the Welfare System. 3 Units.
Welfare-reform legislation passed by the federal government in the mid-1990s heralded a dramatic step in the movement that has been termed the devolution revolution, which is again being discussed in the context of healthcare reform. The centerpiece of devolution is the transfer of more responsibilities for antipoverty programs to the states. We will explore the effects of these reforms and the role that devolution plays in the ongoing debates over the designs of programs that make up America's social safety net. In addition to discussing conventional welfare programs (e.g., Medicaid, food stamps, TANF, SSI) and other governmental policies assisting low-income families (EITC, minimum wages), we will examine the trends in governmental spending on anti-poverty programs and how our nation defines poverty and eligibility for income support. We will apply economics principles throughout to understand the effectiveness of America's antipoverty programs and their consequences on the behavior and circumstances of families. Prerequisites: A basic understanding/knowledge of introductory economics is recommended.

ECON 12. Economics of Artificial Intelligence. 1 Unit.
How will artificial intelligence and machine learning reshape the economy? This course examines the prospective impact of AI on jobs, wages, inequality, industrial power, and global competition. We begin by examining the effects of previous technological revolutions (from the Industrial Revolution to the digital age) on living standards, relative power of labor and capital, and organization of economic activity. We then review the tools and methods economists use to analyze the potential consequences of AI and machine learning. We conclude by assessing priorities for government policy, including opportunities for harnessing AI to create a more prosperous and equitable society.

ECON 14. Navigating Financial Crises: From Emerging Markets to COVID-19. 1 Unit.
What causes financial crises? What are the keys to anticipating, preventing, and managing disruptions in the global financial system? This course prepares students to navigate future episodes as policymakers, finance professionals, and citizens by going inside the practical decisions made in an unfolding crisis, from the U.S. government and IMF to the boardroom and trading floor. Students will learn warning signs of distress; market structures that govern crisis dynamics; strategic interactions among the key actors; and lessons learned for creating a more resilient system. Concepts will be applied to real-world experiences in emerging market crises, the U.S. housing and global financial crisis, the European sovereign crisis, and as well the extraordinary fiscal and central bank responses to the COVID-19 crisis.
Same as: PUBLPOL 14

ECON 17N. Energy, the Environment, and the Economy. 3 Units.
Examines the intimate relationship between environmental quality and the production and consumption of energy. Assesses the economics efficiency and political economy implications of a number of current topics in energy and environmental economics. Topics include: the economic theory of exhaustible resources, Greenhouse Gas Emissions (GHG) control (cap and trade mechanisms and carbon fees), GHG emissions offsets, the Strategic Petroleum Reserve (SPR), the "smart" transmission grid for electricity, nuclear energy and nuclear waste, the real cost of renewable energy, natural gas and coal-fired electricity production, the global coal and natural gas markets, Corporate Average Fuel Efficiency (CAFE) and Low-Carbon Fuel Standards (LCFS), Energy Efficiency Investments and Demand Response, and Carbon Capture and Sequestration (CCS). For all topics, there will be reading to explain the economics and engineering behind the topic and class discussion to clarify and elaborate on this interaction. Prerequisite: Econ 1 is recommended.

ECON 19Q. Government by the Numbers. 3 Units.
Spending by federal, state, and local governments accounts for about one-third of U.S. GDP and governments employ more than one-in-seven workers in the U.S. For most U.S. residents, government is represented by a complicated web of federal, state, and local policies. There is an increasingly contentious debate about the proper role of the government and regarding the impact of specific government policies. This debate is rarely grounded in a common set of facts. In this seminar, we will explore how each level of government interacts with U.S. residents through government services, public programs, taxes, and regulations. We will examine financial results for different levels of government while considering the net effects of government intervention on the health and economic well-being of individuals and families. Particular attention will be paid to certain sectors (e.g. education, health care, etc.) and to certain groups (e.g. those in poverty, the elderly, etc.). Along the way we will accumulate a set of metrics to assess the performance of each level of government while highlighting the formidable challenges of such an exercise. Prerequisite: Econ 1.
Same as: PUBLPOL 19Q

ECON 22N. Causes and Consequences of the Rise in Inequality. 3 Units.
In this class we will discuss the economic and institutional causes of the rise in inequality in the US and other countries over the last 40 years. We will also discuss the consequences of inequality in terms of social justice, economic welfare, aggregate economic performance, intergenerational mobility, and the possible implications of inequality for the recent global financial crisis.

ECON 23N. Capitalism, Socialism and Democracy. 3 Units.
We will explore the evolution and current performance of capitalist and socialist economies, their interaction with democracy, and the contemporary debate about the appropriate roles of individual vs. collective rights and responsibilities.

ECON 25N. Public Policy and Personal Finance. 3 Units.
The seminar will provide an introduction and discussion of the impact of public policy on personal finance. Voters regularly rate the economy as one of the most important factors shaping their political views and most of those opinions are focused on their individual bottom lines. In this course we will discuss the rationale for different public policies and how they affect personal financial situations. We will explore personal finance issues such as taxes, loans, charity, insurance, and pensions. Using the context of (hypothetical) personal finance positions, we will discuss the public policy implications of various proposals and how they affect different groups of people, for example: the implications of differential tax rates for different types of income, the promotion of home ownership in the U.S., and policies to care for our aging population. While economic policy will be the focus of much of the course, we will also examine some of the implications of social policies on personal finance as well. There will be weekly readings and several short policy-related writing assignments.
Same as: PUBLPOL 55N

ECON 27N. The Economics of Gender. 3 Units.
This seminar draws on empirical and theoretical insights from multiple fields within economics. The objective is to understand the role of gender in economic decision making, and the changing significance, timing and meaning of work, career and family. We will focus on recent work in experimental economics, and empirical work in the developed world. But at times we will widen the perspective to developing countries and consider historical changes as well.

ECON 43. Introduction to Financial Decision-Making. 5 Units.
The purpose of the class is for you to obtain greater comfort making the major financial decisions your life journey will require. Illustrative examples, case studies, historical and statistical evidence, and some simple analytical tools will be presented. We hope to help students avoid damaging mistakes in the decisions that will determine their financial flexibility and safeguard them against life's uncertainties. Students will learn how to keep more options open and to live with fewer constraints by making sound financial decisions. Topics include making a financial plan and budget, managing money, saving, investing in stocks and other assets, purchasing insurance, taxes and inflation, inheritance, financial markets and financial advisors.

ECON 44. The Modern Financial System. 3 Units.
The purpose of the class is to introduce you to the modern financial system. What are the major financial instruments -- bonds, bank loans and also equity - and how are their prices determined. What are the key financial institutions that lend, provide liquidity and make markets. What role does the government play through regulation, monetary policy and special intervention in crisis time. We'll devote particular attention to the payments system: how do households and firms make payments, how do financial institutions organize these payments, and how could this business change with potential entry of new digital currencies, provided by central banks or the private sector. Prerequisites: Econ 1 is recommended.

ECON 46. Networks and Human Behavior. 5 Units.
Two threads are interwoven: why social and economic networks have special features, and how those features shape power, opinions, opportunities, and behaviors. Some of the topics included are: the different ways in which a person's position in a network determines their influence; which systematic errors people make when forming opinions based on what they learn from others; how financial contagions work and why are they different from the spread of a flu; the role of splits in our social networks in inequality, immobility, and polarization; and how network patterns of trade and globalization have changed international conflict and wars. The course requires analyzing network data, which will be provided. No prerequisite but Econ 102A or equivalent is recommended.

ECON 47. Media Markets and Social Good. 5 Units.
This class will apply tools from economics and related social sciences to study the functioning of media markets and their impact on society. The guiding question will be: when and how do media best serve the social good? Topics will include the economics of two-sided markets, media bias, polarization, social media, fake news, advertising, propaganda, effects of media on children, media and crime, and the role of media in corruption, protests and censorship. The course will give students a non-technical introduction to social science empirical methods, including regression analysis, causal inference, experimental and quasi-experimental methods, and machine learning.

ECON 50. Economic Analysis I. 5 Units.
Individual consumer and firm behavior under perfect competition. The role of markets and prices in a decentralized economy. Monopoly in partial equilibrium. Economic tools developed from multivariable calculus using partial differentiation and techniques for constrained and unconstrained optimization. Prerequisites: Econ 1 or 1V, and Math 51 or Math 51A or CME 100 or CME 100A.

ECON 51. Economic Analysis II. 5 Units.
Neoclassical analysis of general equilibrium, welfare economics, imperfect competition, externalities and public goods, risk and uncertainty, game theory, adverse selection, and moral hazard. Multivariate calculus is used. Prerequisite: ECON 50.

ECON 52. Economic Analysis III. 5 Units.
Long-run economic growth and short-run economic fluctuations. Focus on the macroeconomic tools of government: fiscal policy (spending and taxes) and monetary policy, and their effects on growth, employment, and inflation. Prerequisites: ECON 50.

ECON 78N. Economic Policies of the Presidential Candidates. 3 Units.
In nearly all polls, American voters rank the economy as one of their most important concerns. In the presidential election, much of the debate for voters will be on questions of economic policy. In this course, we will delve deeply into economic policy issues to understand options for government intervention and possible outcomes. We will combine economic analysis with political science methodology to understand efficient and implementable policy proposals.nnSpecific areas of interest will be taxation, budget, entitlement programs, economic regulation and competition policy, trade, demography, income inequality, and monetary policy. The course will incorporate other timely and salient policy issues as they arise during the course of the campaign. n nStudents will be expected to write a short paper and make an oral presentation to the class. A wide range of topics will be acceptable, including those directly related to campaign issues as well as other long-term economic issues facing the country.
Same as: PUBLPOL 78N

ECON 101. Economic Policy Seminar. 5 Units.
Economic policy analysis, writing, and oral presentation. Topics vary with instructor. Limited enrollment. Prerequisites: Econ 51 and 52, 102B, and two field courses. Some sections require additional prerequisites.

ECON 102A. Introduction to Statistical Methods (Postcalculus) for Social Scientists. 5 Units.
Probabilistic modeling and statistical techniques relevant for economics. Concepts include: probability trees, conditional probability, random variables, discrete and continuous distributions, correlation, central limit theorems, point estimation, hypothesis testing and confidence intervals for both one and two populations. Prerequisite: MATH 20 or equivalent.

ECON 102B. Applied Econometrics. 5 Units.
Hypothesis tests and confidence intervals for population variances, chi-squared goodness-of-fit tests, hypothesis tests for independence, simple linear regression model, testing regression parameters, prediction, multiple regression, omitted variable bias, multicollinearity, F-tests, regression with indicator random variables, simultaneous equation models and instrumental variables. Topics vary slightly depending on the quarter. Prerequisites: Econ 102A or equivalent. Recommended: computer experience (course often uses STATA software to run regressions).

ECON 102C. Advanced Topics in Econometrics. 5 Units.
The program evaluation problem. Identifying and estimating the effects of policies on outcomes of interest (e.g., tax rates on labor supply, etc.). Identifying and estimating the effects of human capital on earnings and other labor market outcomes. Topics: Instrumental variables estimation; limited dependent variable models (probit, logit, Tobit models); Panel data techniques (fixed and random effect models, dynamic panel data models); Duration models; Bootstrap and Estimation by Simulation. Prerequisite: Econ 102B.

ECON 102D. Econometric Methods for Public Policy Analysis and Business Decision-Making. 5 Units.
This course focuses on the use of econometric methods in public policy analysis and business decision-making. Building on methods taught in Economics 102A and 102B, additional descriptive, predictive and causal econometric modeling methods will be introduced along with the assumptions required for the validity of each methodology. Methods for designing randomized controlled trials (RCT) and analyzing the resulting data will be discussed. The methods for recovering economically meaningful magnitudes such as price elasticities of demand and other behavioral responses from observational data will be discussed. Both classical econometric methods and modern techniques in machine learning will be employed. The class will be taught using the R programming language. Students will perform both in-class and out-of-class assignments working with actual datasets to address policy-relevant decisions and simulation exercises designed to deepen their knowledge of these methods. Prerequisites: Econ102A, Econ102B.

ECON 106. World Food Economy. 5 Units.
The economics of food production, consumption, and trade. The micro- and macro- determinants of food supply and demand, including the interrelationship among food, income, population, and public-sector decision making. Emphasis on the role of agriculture in poverty alleviation, economic development, and environmental outcomes. Grades based on mid-term exam and group modeling project and presentation. Enrollment is by application only and will be capped at 25, with priority given to upper level undergraduates in Economics and Earth Systems and graduate students (graduate students enroll in 206). Application found at https://economics.stanford.edu/academics/undergraduate-program/forms.
Same as: EARTHSYS 106, EARTHSYS 206, ECON 206, ESS 106, ESS 206

ECON 111. Money and Banking. 5 Units.
The primary course goal is for students to master the logic, intuition and operation of a financial system - money, financial markets (money and capital markets, debt and equity markets, derivatives markets), and financial institutions and intermediaries (the Central Bank, depository institutions, credit unions, pension funds, insurance companies, venture capital firms, investment banks, mutual funds, etc.). In other words, how money/capital change hands between agents over time, directly and through institutions. Material will be both quantitative and qualitative, yet always highly analytical with a focus on active learning - there will be an approximately equal emphasis on solving mathematical finance problems (e.g. bond or option pricing) and on policy analysis (e.g. monetary policy and financial regulation.) Students will not be rewarded for memorizing and regurgitating facts, but rather for demonstrating the ability to reason with difficult problems and situations with which they might not previously be familiar. Prerequisite: Econ 50, 52. Strongly recommended but not required: some familiarity with finance and statistics (e.g. Econ 135 or 140, Econ 102A).

ECON 112. Financial Markets and Institutions: Recent Developments. 5 Units.
The course covers innovations, challenges and proposed changes to the financial system. Topics include new mortgage products, foreclosure rules, securitization, credit ratings, credit derivatives, dealer networks, repo financing, implications for prudential regulation & monetary policy. Emphasis is on quantitative studies of these topics. Prerequisites: Econ 52, Econ 102B.

ECON 118. Development Economics. 5 Units.
The microeconomic problems and policy concerns of less developed countries. Topics include: health and education; risk and insurance; microfinance; agriculture; technology; governance. Emphasis is on economic models and empirical evidence. Prerequisites: ECON 50, ECON 102B.

ECON 124. Economic Development and Challenges of East Asia. 3-5 Units.
(Formerly IPS 224) This course explores East Asia's rapid economic development and the current economic challenges. For the purpose of this course, we will focus on China, Japan, and Korea. The first part of the course examines economic growth in East Asia and the main mechanisms. In this context, we will examine government and industrial policy, international trade, firms and business groups, and human capital. We will discuss the validity of an East Asian model for economic growth. The second part of the course focuses on the current economic challenges confronting these countries, such as, political economy, human capital, inequality, and entrepreneurship and innovation. Readings will come from books, journal articles, reports, news articles, and case studies. Many of the readings will have an empirical component and students will be able to develop their understanding of how empirical evidence is presented in articles. Prerequisites: INTPOL 301B, Polisci150A(355A), Econ 102B or equivalent courses that cover regression analysis.
Same as: INTLPOL 224

ECON 125. Economic Development, Microfinance, and Social Networks. 5 Units.
An introduction to the study of the financial lives of households in less developed countries, focusing on savings, credit, informal insurance, the expansion of microfinance, social learning, public finance/redistribution, and social networks. Prerequisites- Econ 51 or Publpol 51 and Econ 102B.

ECON 126. Economics of Health and Medical Care. 5 Units.
Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: demand for medical care and medical insurance; institutions in the health sector; economics of information applied to the market for health insurance and for health care; measurement and valuation of health; competition in health care delivery. Graduate students with research interests should take ECON 249. Prerequisites: ECON 50 and either ECON 102A or STATS 116 or the equivalent. Recommended: ECON 51.
Same as: BIOMEDIN 156, BIOMEDIN 256, HRP 256

ECON 127. Economics of Health Improvement in Developing Countries. 5 Units.
Application of economic paradigms and empirical methods to health improvement in developing countries. Emphasis is on unifying analytic frameworks and evaluation of empirical evidence. How economic views differ from public health, medicine, and epidemiology; analytic paradigms for health and population change; the demand for health; the role of health in international development. Prerequisites: ECON 50 and ECON 102B.
Same as: MED 262

ECON 131. The Chinese Economy. 4 Units.
This is a survey course of the Chinese economy with emphasis on understanding the process of economic reform, transition and development during the past 40 years. It will help students learn the different historical stages of institutional changes, develop an informed perspective on economic and political rationale and the effectiveness of the economic policies that have shaped China's economic emergence, and think critically about the process of economic and social changes. Prerequisite: Econ 1.

ECON 135. Foundations of Finance. 3 Units.
For graduate students and advanced undergraduates. This course teaches the foundations of finance. Topics include internal rate of return and net present value, Black-Scholes option pricing, portfolio diversification and the Capital Asset Pricing Model, relationships between risk and return, market efficiency, and the valuation of derivative securities. Much of the analysis will build on the Arrow-DeBreu state preference model. Next, adverse selection and moral hazard in contracting and the design of auctions will be discussed. Towards the end of the course applied topics such as bank capital regulation, sovereign debt, pension funds, university endowments, and the evaluation of private equity performance and fees will be discussed, depending on time. Prerequisites: MATH 51, ECON 50, ECON 102A, or equivalents; ability to use spreadsheets, and basic probability and statistics concepts including random variables, expected value, variance, covariance, and simple estimation and regression.

ECON 136. Market Design. 5 Units.
Use of economic theory and analysis to design allocation mechanisms and market institutions. Course focuses on three areas: the design of matching algorithms to solve assignment problems, with applications to school choice, entry-level labor markets, and kidney exchanges; the design of auctions to solve general resource allocation problems, with applications to the sale of natural resources, financial assets, radio spectrum, and advertising; and the design of platforms and exchanges, with applications to internet markets. Emphasis on connecting economic theory to practical applications. Students must write term paper.

ECON 137. Decision Modeling and Information. 5 Units.
Effective decision models consider a decision maker's alternatives, information and preferences. The construction of such models in single-party situations with emphasis on the role of information. The course then evolves to two-party decision situations where one party has more information than the other. Models examined include: bidding exercises and the winner's curse, the Akerlof Model and adverse selection, the Principal-Agent model and risk sharing, moral hazard and contract design. Prerequisite: ECON 102A or equivalent. Recommended: Econ 50, Optimization and simulation in Excel.

ECON 139D. Directed Reading. 1-10 Unit.
May be repeated for credit.

ECON 140. Introduction to Financial Economics. 5 Units.
Modern portfolio theory and corporate finance. Topics: present value and discounting, interest rates and yield to maturity, various financial instruments including financial futures, mutual funds, the efficient market theory, basic asset pricing theory, the capital asset pricing model, and models for pricing options and other contingent claims. Use of derivatives for hedging. Prerequisites: ECON 50, ECON 102A.

ECON 141. Public Finance and Fiscal Policy. 5 Units.
What role should and does government play in the economy? What are the effects of government spending, borrowing, and taxation on efficiency, equity and economic stability and growth? The course covers economic, historical and statistical analyses and current policy debates in the U.S. and around the world. Policy topics: Fiscal crises, budget deficits, the national debt and intergenerational equity; tax systems and tax reform; social security and healthcare programs and reforms; transfers to the poor; public goods and externalities; fiscal federalism; public investment and cost-benefit analysis; and the political economy of government decision-making. Prerequisites: ECON 51 (Public Policy majors may take PUBLPOL 51 as a substitute for ECON 51), ECON 52 (can be taken concurrently).
Same as: PUBLPOL 107

ECON 143. Finance, Corporations, and Society. 4 Units.
Both "free market capitalism" and democracy are in crisis around the world. This interdisciplinary course will help you understand the issues by exploring the interactions between the financial system, corporations, governments, and broader society. Topics include basic financial decisions of individuals and corporations, consumer finance (including mortgages, student loans, insurance and savings), financial markets and firms, corporations and their governance, the role of disclosures and regulations, political economy and government institutions, and the role of the media. We will discuss current events and policy debates regularly throughout the course. The approach will be rigorous and analytical but not overly mathematical. Visitors with relevant experience will enrich the discussion.
Same as: INTLPOL 227, POLISCI 127A, PUBLPOL 143

ECON 144. Family and Society. 5 Units.
The family into which a child is born plays a powerful role in determining lifetime opportunities. This course will apply tools from economics and related social sciences to study how the functioning of families is shaped by laws, social insurance, social norms, and technology. Topics will include intergenerational transmission of wealth and health, the importance of the early family environment, partnership formation, cohabitation and marriage, teen pregnancy and contraception, assisted reproduction, Tiger Moms and Helicopter Parenting, and the employment effects of parenthood. In the context of these topics, the course will cover social science empirical methods, including regression analysis, causal inference, and quasi-experimental methods. Throughout the course, we will think critically about the role of the government and how the design of public policy targeting families affect our ability to solve some of the most important social and economic problems of our time. Prerequisites: Econ 50.

ECON 145. Labor Economics. 5 Units.
Analysis and description of labor markets. Determination of employment, hours of work, and wages. Wage differentials. Earnings inequality. Trade unions and worker co-operatives. Historical and international comparisons.. Prerequisites: ECON 51 (Public Policy majors may take PUBLPOL 51 as a substitute for ECON 51), ECON 102B.

ECON 146. Economics of Education. 5 Units.
How a decision to invest in education is affected by factors including ability and family background. Markets for elementary and secondary schooling; topics such as vouchers and charter schools, accountability, expenditure equalization among schools, and the teacher labor market.The market for college education emphasizing how college tuition is determined, and whether students are matched efficiently with colleges. How education affects economic growth, focusing on developing countries. Theory and empirical results. Application of economics from fields such as public economics, labor economics, macroeconomics, and industrial organization. Prerequisites: ECON 50, ECON 102B.

ECON 147. The Economics of Labor Markets. 5 Units.
This course will cover the economics of labor markets. Topics include: determinants of employment and unemployment; job creation and job destruction. The effects of technological change on the labor market. The effects of a universal basic income. There is a final exam. Prerequisites: ECON 51 (Public Policy majors may take PUBLPOL 51 as a substitute for ECON 51), Econ 52, Econ 102B.

ECON 149. The Modern Firm in Theory and Practice. 5 Units.
Examines the empirics on the economics, management and strategy of organizations (e.g. firms). Topics include the organization of firms in US and internationally. Management practices around information systems, target setting and human resources. Focus on management practices in manufacturing, but also analyze retail, hospitals and schools, plus some recent field-experiments in developing countries. Prerequisites: ECON 51 (Public Policy majors may take PUBLPOL 51 as a substitute for ECON 51), ECON 102B.

ECON 150. Economic Policy Analysis. 4-5 Units.
The relationship between microeconomic analysis and public policy making. How economic policy analysis is done and why political leaders regard it as useful but not definitive in making policy decisions. Economic rationales for policy interventions, methods of policy evaluation and the role of benefit-cost analysis, economic models of politics and their application to policy making, and the relationship of income distribution to policy choice. Theoretical foundations of policy making and analysis, and applications to program adoption and implementation. Prerequisites: ECON 50 and ECON 102B. Undergraduate Public Policy students are required to take this class for a letter grade and enroll in this class for five units.
Same as: PUBLPOL 104, PUBLPOL 204

ECON 151. Tackling Big Questions Using Social Data Science. 5 Units.
Big data can help us provide answers to fundamental social questions, from poverty and social mobility, to climate change, migration, and the spread of disease. But making sense of data requires more than just statistical techniques: it calls for models of how humans behave and interact with each other. Social data science combines the analysis of big data with social science theory. We will take a project-oriented, many models-many methods approach: for each topic or question of general interest, we will first introduce simple formal models from across the social sciences to guide our thinking. Then we will collect and analyze the relevant data, applying data science techniques such as machine learning and causal inference. Prerequisites are Econ 102A and 102B.
Same as: POLISCI 151

ECON 152. The Future of Finance. 2 Units.
This 2-credit course will examine vast changes driven by innovation both from within traditional finance and from new ecosystems in fintech among others. Breathtaking advances in financial theory, big data, machine learning, artificial intelligence, computational capability, IoT, payment systems (e.g. blockchain, crypto currencies), new products (e.g. robo advising, digital lending, crowd funding, smart contracts), new trading processes (e.g. algorithmic trading, AI-driven sales & trading), and new markets (e.g. ETFs, zero-cost products), among others are changing not only how financial and non-financial firms conduct business but also how investors and supervisors view the players and the markets. nWe will discuss critical strategy, policy and legal issues, some resolved and others yet to be (e.g. failed business models, cyber challenges, financial warfare, fake news, bias problems, legal standing for cryptos). The course will feature perspectives from guest speakers including top finance executives and Silicon Valley entrepreneurs on up-to-the-minute challenges and opportunities in finance. nWe will discuss slowing global growth against the backdrop of ongoing intervention and wildcards in the capital markets of the U.S., Europe, Hong Kong, Singapore, China, India, Japan, the Middle East and Latin America. We will look forward at strategic opportunities and power players appearing and being dethroned in the markets to discuss who is likely to thrive ¿ and not survive ¿ in the new global financial landscape. nnPrerequisites: If you are an undergraduate wishing to take this course, apply by completing the course application and provide a brief bio here: https://forms.gle/9BGYr8brdYwPS8Cu8.
Same as: ECON 252, PUBLPOL 364

ECON 154. Law and Economics. 4-5 Units.
This course explores the role of law in promoting social well-being (happiness). Law, among its other functions, can serve as a mechanism to harmonize private incentives with cooperative gains, to support an equitable division of those gains, and to deter "cheating" and dystopia. Law is thus essential to civilization. Economic analysis of law focuses on the welfare-enhancing incentive effects of law and its enforcement and on law's role in reducing the risks of cooperation, achieved by fixing expectations of what courts or the state will do in various futures. Specific topics include welfare economics, torts, property, contracts, regulation, process and antitrust. Requires a term paper applying economic analysis to a case, procedure, or law. Prerequisite: ECON 50.
Same as: PUBLPOL 106, PUBLPOL 206

ECON 155. Environmental Economics and Policy. 5 Units.
Economic sources of environmental problems and alternative policies for dealing with them (technology standards, emissions taxes, and marketable pollution permits). Evaluation of policies addressing local air pollution, global climate change, and the use of renewable resources. Connections between population growth, economic output, environmental quality, sustainable development, and human welfare. Prerequisite: ECON 50. May be taken concurrently with consent of the instructor.

ECON 157. Imperfect Competition. 5 Units.
The interaction between firms and consumers in markets that fall outside the benchmark competitive model. How firms acquire and exploit market power. Game theory and information economics to analyze how firms interact strategically. Topics include monopoly, price discrimination, advertising, oligopoly pricing, product differentiation, collusion and cartel behaviour, and anti competitive behavior. Sources include theoretical models, real-world examples, and empirical papers. Prerequisite: ECON 51 (Public Policy majors may take PUBLPOL 51 as a substitute for ECON 51).

ECON 158. Regulatory Economics. 5 Units.
Economics 158 examines public policies for dealing with problems arising in markets in which competitive forces are weak. The focus is on monopolies, oligopolies, cartels, and other environments where market mechanisms are unlikely to produce outcomes that benefit consumers more than the alternatives involving costly government intervention. The two main areas examined are competition policy and economic regulation. Competition policy refers to laws that define certain market behavior as illegal because it is harmful to competition or fails to provide consumer benefits that justify its costs to consumers. Economic regulation refers to policies in which government controls prices and/or decides the terms and conditions under which firms can participate in a market. A growing area of study and policy design is the introduction of market mechanisms into formerly regulated industries such as: telecommunications, electricity, airlines, railroads, postal delivery services and environmental regulation. Cross-listed with Law 1056. Prerequisites: Econ 51 or equivalent.

ECON 159. Economic, Legal, and Political Analysis of Climate-Change Policy. 5 Units.
This course will advance students understanding of economic, legal, and political approaches to avoiding or managing the problem of global climate change. Theoretical contributions as well as empirical analyses will be considered. It will address economic issues, legal constraints, and political challenges associated with various emissions-reduction and adaptation strategies, and it will consider policy efforts at the local, national, and international levels. Specific topics include: interactions among overlapping climate policies, the strengths and weaknesses of alternative policy instruments, trade-offs among alternative policy objectives, and decision making under uncertainty. Prerequisites: Econ 50 or its equivalent.
Same as: EARTHSYS 159, ECON 209, PUBLPOL 159

ECON 160. Game Theory and Economic Applications. 5 Units.
Introduction to game theory and its applications to economics. Topics: strategic and extensive form games, dominant strategies, Nash equilibrium, subgame-perfect equilibrium, and Bayesian equilibrium. The theory is applied to repeated games, voting, auctions, and bargaining with examples from economics and political science. Prerequisites: Working knowledge of calculus and basic probability theory.

ECON 162. Games Developing Nations Play. 3-5 Units.
If, as economists argue, development can make everyone in a society better off, why do leaders fail to pursue policies that promote development? The course uses game theoretic approaches from both economics and political science to address this question. Incentive problems are at the heart of explanations for development failure. Specifically, the course focuses on a series of questions central to the development problem: Why do developing countries have weak and often counterproductive political institutions? Why is violence (civil wars, ethnic conflict, military coups) so prevalent in the developing world, and how does it interact with development? Why do developing economies fail to generate high levels of income and wealth? We study how various kinds of development traps arise, preventing development for most countries. We also explain how some countries have overcome such traps. This approach emphasizes the importance of simultaneous economic and political development as two different facets of the same developmental process. No background in game theory is required.
Same as: POLISCI 247A, POLISCI 347A

ECON 165. International Finance. 5 Units.
We will explore models for analyzing a wide variety of issues in open-economy macroeconomics, such as the balance of payments; the determination of exchange rates; monetary and fiscal policy under flexible and fixed exchange rate regimes; exchange rate crises; sovereign debt crises and the possibility of contagion. Our theoretical framework will structure our examination of important historical episodes and contemporary policy debates; the textbook will be supplemented with readings from recent scholarly articles and mainstream news sources. Active class participation is an important part of the course. Prerequisite: ECON 52.

ECON 166. International Trade. 5 Units.
Explaining patterns of trade among nations; characterizing the sources of comparative advantage in production and the prospect of gains from economies of scale. Enumerating and accounting for the net aggregate gains from trade, and identifying winners and losers from globalization. Analyzing the effects of international labor migration, foreign direct investment, outsourcing, and multinational companies. Strategic trade policy; international trade agreements; labor and environmental implications. We will review relevant theoretical frameworks, examine empirical evidence, and discuss historical and contemporary policy debates as covered in the popular press; active class participation is an important part of the course. Prerequisite: ECON 51 (Public Policy majors may take PUBLPOL 51 as a substitute for ECON 51).

ECON 178. Behavioral Economics. 5 Units.
The field of behavioral economics draws on insights from other disciplines, especially psychology, to enrich our understanding of economic behavior. The course will discuss how people may display systematic behavioral patterns that diverge from the predictions of standard economic models, as well as the ways in which economists incorporate those considerations into their theories, and the implications of those theories for market outcomes and public policies. Prerequisites: ECON 50 and ECON 102A. Econ 51 is recommended.

ECON 179. Experimental Economics. 5 Units.
Methods and major subject areas that have been addressed by laboratory experiments. Focus is on a series of experiments that build on one another. Topics include decision making, two player games, auctions, and market institutions. How experiments are used to learn about preferences and behavior, trust, fairness, and learning. Final presentation of group projects. Prerequisites: ECON 51 (Public Policy majors may take PUBLPOL 51 as a substitute for ECON 51), ECON 102A.

ECON 180. Honors Game Theory. 5 Units.
Rigorous introduction to game theory and applications. Topics include solution concepts for static and dynamic games of complete and incomplete information, signaling games, repeated games, bargaining, and elements of cooperative game theory. Applications mainly from economics, but also political science, biology, and computer science. Prerequisites: Experience with abstract mathematics and willingness to work hard. No background in economics required.

ECON 184. Institutional Investment Management: Theory and Practice. 4 Units.
This course provides an introduction to the theory and practice of institutional investment management including asset allocation and manager selection across public and private equity, absolute return, real assets, and fixed income. The course is taught by the CIO of Stanford's endowment and takes the perspective of an institution with a long-term investment horizon like Stanford. We introduce and apply a framework for assessing investment strategies and investment firms. Students put theory into practice by meeting with leading investors from various asset classes. Enrollment capped at 20. To apply please send a statement of interest and an unofficial transcript to econ184@smc.stanford.edu by December 20, 2019. Prerequisites: Econ 50 and Econ 102A, may be taken concurrently.

ECON 198. Junior Honors Seminar. 5 Units.
For juniors (advanced sophomores will be considered) who expect to write an honors thesis in Economics or Public Policy. Weekly sessions go through the process of selecting a research question, finding relevant bibliography, writing a literature review, introduction, and study design, culminating in the write-up of an honors thesis proposal (prospectus) and the oral presentation of each student's research project. Students also interact with potential advisors, and outline a program of study for their senior year. To apply, complete the application at https://economics.stanford.edu/undergraduate/forms.
Same as: PUBLPOL 197

ECON 199D. Honors Thesis Research. 1-10 Unit.
In-depth study of an appropriate question and completion of a thesis of very high quality. Normally written under the direction of a member of the Department of Economics (or some closely related department). See description of honors program. Register for at least 1 unit for at least one quarter after your honors application is approved. Winter registration for one unit under the supervision of the Director of the Honors Program is mandatory for all honors students.

ECON 202. Microeconomics I. 2-5 Units.
(Non-Economics graduate students register for 202N.) Open to advanced undergraduates with consent of instructors. Theory of the consumer and the implications of constrained maximization; uses of indirect utility and expenditure functions; theory of the producer, profit maximization, and cost minimization; monotone comparative statics; behavior under uncertainty; partial equilibrium analysis and introduction to models of general equilibrium. Limited enrollment. Prerequisite: thorough understanding of the elements of multivariate calculus and linear algebra.

ECON 202N. Microeconomics I For Non-Economics PhDs students. 2-5 Units.
Theory of the consumer and the implications of constrained maximization; uses of indirect utility and expenditure functions; theory of the producer, profit maximization, and cost minimization; behavior under uncertainty; partial equilibrium analysis and introduction to models of general equilibrium; discussion of how assumptions and models stand up to recent developments in empirical and in particular behavioral economics. Prerequisite: understanding of basic calculus and some familiarity with writing basic proofs.

ECON 203. Microeconomics II. 3-5 Units.
(Non-Economics graduate students register for 203N.) Non-cooperative game theory including normal and extensive forms, solution concepts, games with incomplete information, and repeated games. Externalities and public goods. The theory of imperfect competition: static Bertrand and Cournot competition, dynamic oligopoly, entry decisions, entry deterrence, strategic behavior to alter market conditions. Limited enrollment. Prerequisite: ECON 202.

ECON 204. Microeconomics III. 3-5 Units.
Social Choice, including Arrow's theorem, the Gibbard-Satterthwaite theorem, and the Vickrey-Clarke-Groves mechanism. The theory of contracts, emphasizing contractual incompleteness and the problem of moral hazard. Incentive regulation. Competition with imperfect information, including signaling and adverse selection. Competitive equilibrium and the core. Limited enrollment. Non-Econ students need permission of instructor to enroll. Prerequisite: ECON 202 and 203.

ECON 206. World Food Economy. 5 Units.
The economics of food production, consumption, and trade. The micro- and macro- determinants of food supply and demand, including the interrelationship among food, income, population, and public-sector decision making. Emphasis on the role of agriculture in poverty alleviation, economic development, and environmental outcomes. Grades based on mid-term exam and group modeling project and presentation. Enrollment is by application only and will be capped at 25, with priority given to upper level undergraduates in Economics and Earth Systems and graduate students (graduate students enroll in 206). Application found at https://economics.stanford.edu/academics/undergraduate-program/forms.
Same as: EARTHSYS 106, EARTHSYS 206, ECON 106, ESS 106, ESS 206

ECON 209. Economic, Legal, and Political Analysis of Climate-Change Policy. 5 Units.
This course will advance students understanding of economic, legal, and political approaches to avoiding or managing the problem of global climate change. Theoretical contributions as well as empirical analyses will be considered. It will address economic issues, legal constraints, and political challenges associated with various emissions-reduction and adaptation strategies, and it will consider policy efforts at the local, national, and international levels. Specific topics include: interactions among overlapping climate policies, the strengths and weaknesses of alternative policy instruments, trade-offs among alternative policy objectives, and decision making under uncertainty. Prerequisites: Econ 50 or its equivalent.
Same as: EARTHSYS 159, ECON 159, PUBLPOL 159

ECON 210. Macroeconomics I. 2-5 Units.
Dynamic programming applied to a variety of economic problems. These problems will be formulated in discrete or continuous time, with or without uncertainty, with a finite or infinite horizon. There will be weekly problem sets and a take-home final that will require MATLAB programming. Limited enrollment.

ECON 211. Macroeconomics II. 3-5 Units.
Dynamic stochastic general equilibrium models using dynamic programming methods that are solved with MATLAB. Growth models (neoclassical, human capital, technical change) using optimal control theory. Limited enrollment. Prerequisite: ECON 210.

ECON 212. Macroeconomics III. 3-5 Units.
Real business cycle and new Keynesian models: business cycle fluctuations, inflation dynamics, the effects of monetary and fiscal policy, and optimal policy. Models of heterogeneity: search models of the labor market; precautionary savings and general equilibrium with incomplete markets; constrained efficiency; endogenous market incompleteness and recursive contracts; optimal taxation and redistribution. Limited enrollment. Prerequisites: ECON 203, ECON 210, ECON 211.

ECON 214. Development Economics I. 3-5 Units.
This course uses microeconomic theory and empirical analyses to understand barriers to human and economic development in lower income countries, as well as how public policies are formulated and their effectiveness at alleviating poverty. Topics include institutions and governance; human capital accumulation; productivity; inequality; poverty traps. Prerequisites: 202 or 202N, 270.

ECON 215. Development Economics II. 3-5 Units.
This is a course focusing on macro development research. It will cover dynamic models of growth and development, with a focus on migration; technological change; the functioning of financial markets; barriers to agricultural productivity; informal financial systems (savings, credit, and insurance); and public finance in less developed countries. Prerequisites: 202 or 202N, 270.

ECON 216. Development Economics III. 3-5 Units.
This course focuses on savings, credit, informal insurance, the expansion of microfinance, social networks, social learning and technology adoption, public finance and firm organizations. Prerequisite: 202, 203, 204, 210, 211, 212, 270, 271, 272.

ECON 220. Political Economy I. 3-5 Units.
Introduction to empirical and theoretical research in political economy. This course focuses on issues in democracies, while Political Economy II focuses on issues in non-democracies. Topics may include institutional foundations, social choice, electoral competition and candidate positioning, accountability, voter behavior, polarization, media and political communication, redistribution, special interests and lobbying, collective action, immigration, and populism. Prerequisite for Econ PhD students: ECON 202 and 270 or permission of instructors. Prerequisites for Political Science PhD students: POLISCI 450A, POLISCI 450B, and POLISCI 356A.
Same as: POLISCI 460A

ECON 221. Political Economy II. 3-5 Units.
Continuation of ECON 220 / POLISCI 460A. Preparation for advanced research in political economy. This quarter will focus on topics related to culture, institutions, political and economic development, historical evolution, nondemocratic politics, conflict and cooperation. We will cover both empirical and theoretical work. Prerequisite for Political Science PhDnstudents: POLISCI 356A.
Same as: POLISCI 460B

ECON 226. U.S. Economic History. 2-5 Units.
The role of economic history as a distinctive approach to the study of economics, using illustrations from U.S. history. Topics include: historical and institutional foundations of the U.S. rise to world economic preeminence; economic causes and consequences of slavery; the American national system of technology; the Great Depression of the 1930s and the policy response; inequality and intergenerational mobility; the growth of social insurance. Intended for graduate students.

ECON 229. Topics in Economic History. 3-5 Units.
Topics in Economic History: covers topics in Economic History such as the industrial revolution, the demographic transition, the great divergence, the importance of institutions, the diffusion of knowledge, the causes and consequences of income inequality, and immigration over the last two centuries. The course will highlight the roles of economic history in modern economics, the use of economic theory in guiding hypothesis testing, and the construction of new datasets and the execution of empirical analysis. The course is open to PhD students only.

ECON 233. Advanced Macroeconomics I. 2-5 Units.
Topics in the theory and empirics of economic growth. For PhD-level students.

ECON 234. Advanced Macroeconomics II. 3-5 Units.
This is an advanced class on monetary economics. We cover empirical evidence, neoclassical models, recent advances in New Keynesian models, monetary policy with heterogeneous agents and financial frictions, alternative models of price setting and other topics. Students enrolled in MGTECON 612 take the class for 4 units. Students develop a research proposal and present it to the instructors as the final exam. Prerequisite: Satisfaction of the economics department's core macro requirement or consent of the instructors.

ECON 236. Financial Economics I. 3-5 Units.
This course will cover research topics at the boundary between macroeconomics and finance. Topics may include the study of macroeconomic models with financial frictions, conventional and unconventional monetary policy, its transmission mechanism and the term structure of interest rates, sovereign debt crises, search frictions and segmentation in housing markets, (over)leveraging by households, heterogeneous expectations, excess volatility, financial bubbles and crises. Prerequisites: 210, 211, 212.

ECON 237. Financial Economics II. 3-5 Units.
This Ph.D. course will cover research topics at the boundary between macroeconomics and finance. Topics will include the study of macroeconomic models with financial frictions, the term structure of interest rates, conventional and unconventional monetary policy, sovereign debt crises, search frictions and segmentation in housing markets, (over)leveraging by households, heterogeneous expectations, excess volatility, financial bubbles and crises. Student presentations and course paper requirement. Designed for second year PhD students in economics or finance.
Same as: MGTECON 617

ECON 239D. Directed Reading. 1-10 Unit.
May be repeated for credit.

ECON 241. Public Economics I. 2-5 Units.
Design of tax systems, transfers intended to alleviate poverty, the effect of taxes on earnings, fees intended to internalize externalities like pollution, school finance and other forms of fiscal federalism, local public goods such as schools, policy evaluation with behavioral decision makers. Students will learn to apply sophisticated applications of frontier applied econometric techniques including synthetic controls, regression discontinuity, advanced instrumental variables methods. Prerequisites: ECON 202-204, ECON 210, ECON 270, ECON 271, or equivalent with consent of instructor.

ECON 242. Public Economics II. 3-5 Units.
This course will explore the rationale for and economic effects of social insurance programs including but not limited to social security, unemployment insurance, disability insurance, and public health insurance. The course will also include four lectures on behavioral public economics. The focus of these lectures will be on developing a framework for conducting welfare analysis in settings with behavioral consumers, and then on applying that framework to issues in public economics, starting with optimal commodity taxation (including ¿sin taxes¿), followed by policies affecting personal saving, as well as the taxation of earnings (including implications for social insurance). Additional topics covered in the course will include other important areas of government expenditure and regulation such as education, defense procurement, economic stimulus, and environmental regulation. Course will cover both theoretical and empirical evidence and prerequisites are ECON 202-204 and ECON 270-272 or similar with permission of instructor.

ECON 243. Public Economics III. 3-5 Units.
The first part of the course concerns inequality and the design of social insurance. We also explore questions in the intersection of public and family economics such as the unit of taxation, and the interaction between social insurance and intra-family insurance. The second half of the course covers local public policy and urban economics, and includes topics such as spatial equilibrium, placed-based policies and housing policy. Prerequisites: Econ 202, 203, 204, 210, 270, 271, or equivalent with consent of instructor. Recommended: Econ 241.270, 271, or equivalent with consent of instructor. Recommended: Econ 241 and 242.

ECON 244. Market Failures and Public Policy. 3-5 Units.
Market failures are the classic justification for government intervention in private markets. This course will focus on a small number of economically important markets where market failures are thought to be important: credit, health care, innovation, and insurance. For each of these markets, we will discuss theory and evidence on the existence and magnitude of market failures, and theory and evidence on the efficiency of public policy interventions designed to address those market failures. Prerequisites: ECON 202-204, ECON 270, ECON 271, or equivalent with consent of instructor.

ECON 246. Labor Economics I. 2-5 Units.
Topics in current applied microeconomic research including intertemporal labor supply models, public policy, program evaluation, job search, migration, consumption behavior. Student and faculty presentations.

ECON 247. Labor Economics II. 3-5 Units.
Recent topics in applied micro, focusing on papers from top journals (QJE, AER, JPE, Econometrica and REStud) over the last ten years. Broad overview of current topic and techniques in applied-micro research. Topics include inequality, polarization and skill-biased technical change, discrimination, technology adoption and the spread of information, management practices, field experiments, peer effects and academic spillovers. Combination of student and faculty presentations. Additional sessions on general presentations, paper writing and research skills to prepare for job market. Typically also run a class trip to the NBER West-Coast labor meetings at the San Francisco Fed.

ECON 248. Labor Economics III. 3-5 Units.
This course focuses on household decision making, the economics of discrimination, and the economics of migration. We will examine unitary, cooperative and non-cooperative models of the household, the collective model, dynamic extensions of the collective model with frictions. We will then discuss empirical applications of these models to labor supply, retirement behavior, human capital accumulation, division of labor within the family and migration decisions.

ECON 249. Topics in Health Economics I. 3-5 Units.
Course will cover various topics in health economics, from theoretical and empirical perspectives. Topics will include public financing and public policy in health care and health insurance; demand and supply of health insurance and healthcare; physicians' incentives; patient decision-making; competition policy in healthcare markets, intellectual property in the context of pharmaceutical drugs and medical technology; other aspects of interaction between public and private sectors in healthcare and health insurance markets. Key emphasis on recent work and empirical methods and modelling. Prerequisites: Micro and Econometrics first year sequences (or equivalent). Curricular prerequisites (if applicable): First year graduate Microeconomics and Econometrics sequences (or equivalent).
Same as: HRP 249, MED 249

ECON 250. Environmental Economics. 3-5 Units.
Theoretical and empirical analysis of sources of and solutions to environmental problems, with application to local pollution challenges and global environmental issues such as climate change. Topics include: analysis of market failure, choice of environmental policy instruments, integrating environmental and distortionary taxes, environmental policy making under uncertainty, valuing environmental amenities, and measuring /promoting sustainable development.

ECON 251. Natural Resource and Energy Economics. 2-5 Units.
Economic theory and empirical analysis of non-renewable and renewable natural resources, with considerable attention to energy provision and use. Topics include: exhaustible resources; renewable resources; and energy industry market structure, pricing, and performance. Prerequisites: 202, 203, 204, 271, and 272, or equivalents with consent of instructor.

ECON 252. The Future of Finance. 2 Units.
This 2-credit course will examine vast changes driven by innovation both from within traditional finance and from new ecosystems in fintech among others. Breathtaking advances in financial theory, big data, machine learning, artificial intelligence, computational capability, IoT, payment systems (e.g. blockchain, crypto currencies), new products (e.g. robo advising, digital lending, crowd funding, smart contracts), new trading processes (e.g. algorithmic trading, AI-driven sales & trading), and new markets (e.g. ETFs, zero-cost products), among others are changing not only how financial and non-financial firms conduct business but also how investors and supervisors view the players and the markets. nWe will discuss critical strategy, policy and legal issues, some resolved and others yet to be (e.g. failed business models, cyber challenges, financial warfare, fake news, bias problems, legal standing for cryptos). The course will feature perspectives from guest speakers including top finance executives and Silicon Valley entrepreneurs on up-to-the-minute challenges and opportunities in finance. nWe will discuss slowing global growth against the backdrop of ongoing intervention and wildcards in the capital markets of the U.S., Europe, Hong Kong, Singapore, China, India, Japan, the Middle East and Latin America. We will look forward at strategic opportunities and power players appearing and being dethroned in the markets to discuss who is likely to thrive ¿ and not survive ¿ in the new global financial landscape. nnPrerequisites: If you are an undergraduate wishing to take this course, apply by completing the course application and provide a brief bio here: https://forms.gle/9BGYr8brdYwPS8Cu8.
Same as: ECON 152, PUBLPOL 364

ECON 255. Economics of Communication. 2-5 Units.
This course will cover theoretical and empirical work on the provision of information in markets. Likely topics include: theory of strategic communication; persuasion; media; advertising and brands; financial analysis and disclosure; political communication; text analysis using machine learning and natural language processing methods. Prerequisites: Econ 202 and 210 (or equivalent).

ECON 257. Industrial Organization 1. 2-5 Units.
Theoretical and empirical analyses of the determinants of market structure; firm behavior and market efficiency in oligopolies; price discrimination; price dispersion and consumer search; differentiated products; the role of information in markets, including insurance and adverse selection; auctions; collusion and cartel behavior; advertising; entry and market structure; market dynamics; strategic behavior.

ECON 258. Industrial Organization IIA. 3-5 Units.
Topics may include theoretical and empirical analysis of bargaining, dynamic models of entry and investment, models of household borrowing, models of markets with asymmetric information, advertising, brands, and markets for information, and research at the boundaries between IO and neighboring fields such as trade, behavioral economics, and household finance. Prerequisite: Econ 257.

ECON 260. Industrial Organization III. 3-5 Units.
Course combines individual meetings and student presentations, with an aim of initiating dissertation research in industrial organization. Prerequisites: ECON 257, ECON 258. Enrollment by non-Econ PhD students requires instructors' consent.

ECON 266. International Trade I. 3-5 Units.
The first part of this course covers Ricardian, factor-proportions and monopolistic-competition models of international trade. The second part of the course covers commercial policy, with an emphasis on the economics of trade agreements. Students are expected to develop and present a research proposal. Prerequisites: Econ 202 or permission of instructor.

ECON 267. International Trade II. 2-5 Units.
The course will cover quantitative and empirical work in trade, trade policy, and related subjects.

ECON 268. International Finance and Exchange Rates. 3-5 Units.
Benchmark open economy models. Solution methods for macroeconomic models. Analysis and evaluation of quantitative macroeconomic models. Main applications: Sovereign debt and default; Financial crises and sudden stops; Hedging, interest parity relationships, and the determination of exchange rates; Liability dollarization.

ECON 269. International Finance and Exchange Rates II. 3-5 Units.
This is the second half of the international finance sequence. Part I: intertemporal approach to the current account, international real business cycle models, international risk-sharing, gains from financial integration, global imbalances, and exchange rate determination. Part 2: open-economy monetary models and currency unions. Part 3: international finance policy, capital controls and foreign exchange interventions. Part 4: sovereign debt. . Prerequisites:Econ 210, 211, 212 and 268.

ECON 270. Intermediate Econometrics I. 2-5 Units.
Probability, random variables, and distributions; large sample theory; theory of estimation and hypothesis testing. Limited enrollment. Prerequisites: math and probability at the level of Chapter 2, Paul G. Hoel, Introduction to Mathematical Statistics, 5th ed.

ECON 271. Intermediate Econometrics II. 3-5 Units.
Analysis of Randomized Experiments, Linear Regression Model, Instrumental Variables, Methods for Causal Effects. Prerequisite: Econ 270 or MGTECON 603 or permission of instructor.

ECON 272. Intermediate Econometrics III. 3-5 Units.
Simultaneous equation models, nonlinear estimation and testing, linear time series analysis, structural modeling. Prerequisites: Econ 271 or permission of instructor.

ECON 273. Advanced Econometrics I. 3-5 Units.
Possible topics: parametric asymptotic theory. M and Z estimators. General large sample results for maximum likelihood; nonlinear least squares; and nonlinear instrumental variables estimators including the generalized method of moments estimator under general conditions. Model selection test. Consistent model selection criteria. Nonnested hypothesis testing. Markov chain Monte Carlo methods. Nonparametric and semiparametric methods. Quantile Regression methods.

ECON 274. Advanced Econometrics II. 3-5 Units.
(Formerly 273B); Possible topics: nonparametric density estimation and regression analysis; sieve approximation; contiguity; convergence of experiments; cross validation; indirect inference; resampling methods: bootstrap and subsampling; quantile regression; nonstandard asymptotic distribution theory; empirical processes; set identification and inference, large sample efficiency and optimality; multiple hypothesis testing; randomization and permutation tests; inference for dependent data.

ECON 275. Economics-Based Econometrics. 3-5 Units.
This course presents methods for constructing econometric specifications and systems directly based on economic models. One such approach formulates stochastic economic models that give rise to empirically implementable econometric models. The discussion will cover methods for estimating, diagnostic testing, and drawing inferences about the underlying economic primitives, including both parametric and non-parametric identification of economic structures. Applications include models from all fields of empirical microeconomics Industrial Organization, Labor, Public Finance, and Energy and Environmental Economics. Examples include: consumer demand models integrating corner solutions, intertemporal models of household and firm behavior, and dynamic models of single and multi-agent interactions with complete and incomplete information. These include auction markets, oligopolies, regulator-firm interactions, and nonlinear pricing.. The major theme of the course is to present a general framework for economic theory-based empirical research that allows researchers to recover the underlying economic primitives driving observed outcomes of an economic environment. Prerequisites: Econ 202, 203, 204, 270, 271, 272.

ECON 278. Behavioral and Experimental Economics I. 2-5 Units.
This is the first part of a three course sequence (along with Econ 279 & 280-formerly 277) on behavioral and experimental economics. The sequence has two main objectives: 1) examines theories and evidence related to the psychology of economic decision making, 2) Introduces methods of experimental economics, and explores major subject areas (including those not falling within behavioral economics) that have been addressed through laboratory experiments. Focuses on series of experiments that build on one another in an effort to test between competing theoretical frameworks, with the objects of improving the explanatory and predictive performance of standard models, and of providing a foundation for more reliable normative analyses of policy issues. Prerequisites: 204 and 271, or consent of instructor.

ECON 279. Behavioral and Experimental Economics II. 3-5 Units.
This is part of a three course sequence (along with Econ 278 & 280-formerly 277) on behavioral and experimental economics. The sequence has two main objectives: 1) examines theories and evidence related to the psychology of economic decision making, 2) Introduces methods of experimental economics, and explores major subject areas (including those not falling within behavioral economics) that have been addressed through laboratory experiments. Focuses on series of experiments that build on one another in an effort to test between competing theoretical frameworks, with the objects of improving the explanatory and predictive performance of standard models, and of providing a foundation for more reliable normative analyses of policy issues. Prerequisites: 204 and 271, or consent of instructor.

ECON 280. Behavioral and Experimental Economics III. 3-5 Units.
Economics 280 (formerly ECON 277) is a course primarily directed at graduate students in the Economics department writing dissertations with behavioral or experimental components. Economics 280 is the third part of a three course sequence (along with Econ 278 & 279). The first two quarters, which are taught primarily in lecture format, have two main objectives: 1) examining theories and evidence related to the psychology of economic decision making; 2) introducing methods of experimental economics, and exploring major subject areas (including those not falling within behavioral economics) that have been addressed through laboratory experiments. Focuses on series of experiments that build on one another in an effort to test between competing theoretical frameworks, with the objectives of improving the explanatory and predictive performance of standard models, and of providing a foundation for more reliable normative analyses of policy issues. This third quarter is a practicum, focused on students who have taken (at least one of) the first two quarters and who are now preparing an experimental or behavioral study of their own. Prerequisites: Non-Econ Phd students must complete 204 and 271, or have consent of instructor.

ECON 282. Contracts, Information, and Incentives. 3-5 Units.
Basic theories and recent developments in mechanism design and the theory of contracts. Topics include: hidden characteristics and hidden action models with one and many agents, design of mechanisms and markets with limited communication, long-term relationships under commitment and under renegotiation, property rights and theories of the firm.

ECON 283. Theory and Practice of Auction Market Design. 2-5 Units.
This class will focus on several topics in auction market design and related areas. It is an advanced course, intended as a sequel to the more basic market/mechanism/auction design courses offered at the Economics department and the GSB. Students are expected to be familiar with the material in those courses. We will briefly review some basics of auction theory, but the main goal of the class is to bring students closer to doing independent research and introduce them to recent contributions and currently active research areas. Specific topics may include: multi-item and combinatorial auctions; robust auction design; applied auction design with practical applications; matching and pricing on the Internet; radio spectrum auctions; securities markets; commodities; complex procurements. Grading based on presentation, assignment, and term paper.

ECON 284. Simplicity and Complexity in Economic Theory. 3-5 Units.
Technology has enabled the emergence of economic systems of formerly inconceivable complexity. Nevertheless, some technology-related economic problems are so complex that either supercomputers cannot solve them in a reasonable time, or they are too complex for humans to comprehend. Thus, modern economic designs must still be simple enough for humans to understand, and must address computationally complex problems in an efficient fashion. This topics course explores simplicity and complexity in economics, primarily via theoretical models. We will focus on recent advances. Key topics include (but are not limited to) resource allocation in complex environments, communication complexity and information aggregation in markets, robust mechanisms, dynamic matching theory, influence maximization in networks, and the design of simple (user-friendly) mechanisms. Some applications include paired kidney exchange, auctions for electricity and for radio spectrum, ride-sharing platforms, and the diffusion of information. Prerequisites: Econ 203 or equivalent.
Same as: CS 360

ECON 285. Matching and Market Design. 2-5 Units.
This is an introduction to market design, intended mainly for second year PhD students in economics (but also open to other graduate students from around the university and to undergrads who have taken undergrad market design). It will emphasize the combined use of economic theory, experiments, and empirical analysis to analyze and engineer market rules and institutions. In this first quarter we will pay particular attention to matching markets, which are those in which price doesn't do all of the work, and which include some kind of application or selection process. We will also cover some of the basics of auction theory, with a particular emphasis on its connections to matching. In recent years market designers have participated in the design and implementation of a number of marketplaces, and the course will emphasize the relation between theory and practice, for example in the design of labor market clearinghouses for American doctors, school choice programs in a growing number of American cities (including New York and Boston), the allocation of organs for transplantation, online advertising auctions, and the market for transportation. Various forms of market failure will also be discussed. Assignment: One final paper. The objective of the final paper is to study an existing market or an environment with a potential role for a market, describe the relevant market design questions, and evaluate how the current market design works and/or propose improvements on the current design.

ECON 286. Game Theory and Economic Applications. 3-5 Units.
Aims to provide a solid basis in game-theoretic tools and concepts, both for theorists and for students focusing in other fields. Technical material will include solution concepts and refinements, potential games, supermodular games, repeated games, reputation, and bargaining models. The class will also address some foundational issues, such as epistemic and evolutionary modeling.Prerequisite: 203 or consent of instructor.

ECON 287. Mechanism and Market Design. 3 Units.
Primarily for doctoral students. Focus on quantitative models dealing with sustainability and related to operations management. Prerequisite: consent of instructor. May be repeated for credit.
Same as: MS&E 365

ECON 289. Advanced Topics in Game Theory and Information Economics. 2-5 Units.
Topics course covering a variety of game theory topics with emphasis on market design, such as matching theory and auction theory. Final paper required. Prerequisites: ECON 285 or equivalent. ECON 283 recommended.

ECON 290. Multiperson Decision Theory. 3 Units.
Students and faculty review and present recent research papers on basic theories and economic applications of decision theory, game theory and mechanism design. Applications include market design and analyses of incentives and strategic behavior in markets, and selected topics such as auctions, bargaining, contracting, and computation.

ECON 291. Social and Economic Networks. 3-5 Units.
Synthesis of research on social and economic networks by sociologists, economists, computer scientists, physicists, and mathematicians, with an emphasis on modeling. Includes methods for describing and measuring networks, empirical observations about network structure, models of random and strategic network formation, as well as analyses of contagion, diffusion, learning, peer influence, games played on networks, and networked markets.

ECON 292. Quantitative Methods for Empirical Research. 3-5 Units.
This is an advanced course on quantitative methods for empirical research. Students are expected to have taken a course in linear models before. In this course I will discuss modern econometric methods for nonlinear models, including maximum likelihood and generalized method of moments. The emphasis will be on how these methods are used in sophisticated empirical work in social sciences. Special topics include discrete choice models and methods for estimating treatment effects.

ECON 293. Machine Learning and Causal Inference. 3 Units.
This course will cover statistical methods based on the machine learning literature that can be used for causal inference. In economics and the social sciences more broadly, empirical analyses typically estimate the effects of counterfactual policies, such as the effect of implementing a government policy, changing a price, showing advertisements, or introducing new products. This course will review when and how machine learning methods can be used for causal inference, and it will also review recent modifications and extensions to standard methods to adapt them to causal inference and provide statistical theory for hypothesis testing. We consider causal inference methods based on randomized experiments as well as observational studies, including methods such as instrumental variables and those based on longitudinal data. We consider the estimation of average treatment effects as well as personalized policies. Lectures will focus on theoretical developments, while classwork will consist primarily of empirical applications of the methods. Prerequisite: Prior coursework in basic observational study methods for causal inference, including instrumental variables, fixed effects modeling, regression discontinuity designs, etc. Students should be comfortable reading and engaging with empirical research in economics and related fields.

ECON 299. Practical Training. 1-10 Unit.
Students obtain employment in a relevant research or industrial activity to enhance their professional experience consistent with their degree programs. At the start of the quarter, students must submit a one page statement showing the relevance of the employment to the degree program along with an offer letter. Submit this documentation to the Econ professor, who has agreed to the student enrolling in their Econ 299 section. At the end of the quarter, a three page final report must be supplied documenting work done and relevance to degree program. May be repeated for credit.

ECON 300. Third-Year Seminar. 3-10 Units.
Restricted to Economics Ph.D. students. Students present current research. May be repeated for credit.

ECON 310. Macroeconomic Workshop. 1-10 Unit.
.

ECON 315. Development Workshop. 1-10 Unit.
.

ECON 325. Economic History Workshop. 1-10 Unit.
May be repeated for credit.

ECON 335. Experimental/Behavioral Seminar. 1-10 Unit.
Field seminar in experimental and behavioral economics.

ECON 341. Public Economics and Environmental Economics Seminar. 1-10 Unit.
Issues in measuring and evaluating the economic performance of government tax, expenditure, debt, and regulatory policies; their effects on levels and distribution of income, wealth, and environmental quality; alternative policies and methods of evaluation. Workshop format combines student research, faculty presentations, and guest speakers. Prerequisite: ECON 241 or consent of instructor.

ECON 345. Labor Economics Seminar. 1-10 Unit.
.

ECON 354. Law and Economics Seminar. 2-3 Units.
This seminar will examine current research by lawyers and economists on a variety of topics in law and economics. Several sessions of the seminar will consist of an invited speaker, usually from another university, who will discuss his or her current research. Representative of these sessions have been discussions of compensation for government regulations and takings, liability rules for controlling accidents, the definition of markets in antitrust analysis, the role of the government as a controlling shareholder, and optimal drug patent length. Contact the instructor listed for the class to request permission to enroll. Cross-listed with the Law School (Law 7506 and Law 7507).

ECON 355. Industrial Organization Workshop. 1-10 Unit.
Current research in the field by visitors, presentations by students, and discussion of recent papers. Students write an original research paper, make a formal presentation, and lead a structured discussion.

ECON 365. International Trade Workshop. 1-10 Unit.
.

ECON 370. Econometrics Workshop. 1-10 Unit.
.

ECON 391. Microeconomic Theory Seminar. 1-10 Unit.
.

ECON 400. Ph.D. Dissertation. 1-15 Unit.
Pre-TGR dissertation research.(Staff).

ECON 801. TGR Project. 0 Units.
.

ECON 802. TGR Dissertation. 0 Units.
.

ENGLISH

Courses offered by the Department of English are listed under the subject code ENGLISH on the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=ENGLISH&filter-catalognumber-ENGLISH=on) web site.

Mission of the Department of English

To study English at Stanford is to explore, deeply and rewardingly, the rich legacy of literature written in English, past and present. The department offers a wealth of courses on individual authors, the history of literary genres, literary theory, new media, and creative writing. Given the emphasis on critical thinking and interpretation, the English major is in turn an excellent preparation for many professional fields, including teaching, journalism, law, publishing, medicine, and business. The graduate program features rigorous training in the research and analysis of British, American, and global literary histories and texts, preparing students to produce scholarship of originality and importance, and to teach literature at the highest levels.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of major theories, methods, and concepts of literary study and critical analysis.
2. an awareness of how authors and texts develop in relation to their historical contexts.
3. a comprehension of the formal qualities of key literary genres, forms, and styles.
4. an effective style of writing and a powerful use of language.

Bachelor of Arts in English

In the undergraduate program, students explore the traditions of literature in English. Courses emphasize interpretive thinking and creative writing, examining the dynamics of literary and cultural history, the structures of literary form and genre, and the practices of reading, writing, and critical analysis.

Doctor of Philosophy in English

The graduate program features rigorous training in the research and analysis of British, American and Anglophone literary histories and texts, preparing students to produce scholarship of originality and importance, and to teach literature at advanced levels.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in British, American and Anglophone literary histories and texts and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have produced substantial scholarship and demonstrated the ability to conduct independent research and analysis in English. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the discipline of English Literature and present the results of such research.

Other Programs in English

Ph.D. in Modern Thought and Literature

Stanford also offers a Ph.D. degree in Modern Thought and Literature. Under this program, students devote approximately half of their time to a modern literature from the Enlightenment to the present, and the other half to interdisciplinary studies. Interested students should see the "Modern Thought and Literature" section of this bulletin and consult the director of the program.

Creative Writing Fellowships

The Creative Writing Program each year offers five two-year fellowships in poetry and five two-year fellowships in fiction. These are not degree-granting fellowships. Information is available in the Creative Writing office, (650) 725-1208.

Bachelor of Arts in English

The Department of English offers a Bachelor of Arts in English. Eligible students may also pursue a Bachelor of Art with Honors (p. 1387). The department also offers minors in English Literature (p. 1389) , Digital Humanities, and Creative Writing (p. 1390).

The English major is designed to provide students with both an understanding of the development of literatures in English and an appreciation of the variety and richness of literary texts. It offers a rigorous training in interpretive thinking and precise expression.

Suggested Preparation for the Major

Prospective English majors are advised to consider Thinking Matters courses that relate to literature to satisfy a major requirement. Also recommended is any introductory seminar taught by English department faculty through Stanford Introductory Studies.

		Units
Suggested Preparatory Courses for the Major		
See "Degree Requirements" below to determine if and how some of these courses may be counted towards degree requirements.		
Thinking Matters Courses		
THINK 49	Stories Everywhere	4
Introductory Seminars		
ENGLISH 40N	Theatrical Wonders from Shakespeare to Mozart	3
ENGLISH 82N	Thinking about Photographs	3
ENGLISH 14Q	It's the Freakiest Show: David Bowie's Intertextual Imagination	3
ENGLISH 17N	Animal Poems	3-5
ENGLISH 30N	Character	3
ENGLISH 31N	Love and Death	3
ENGLISH 33N	A Way of Life: Historic Journeys to Sacred Place	3
ENGLISH 52N	Mixed-Race Politics and Culture	3
ENGLISH 89N	Literature of Adoption	3
ENGLISH 13Q	Imaginative Realms	3
ENGLISH 16Q	Family Stories	3
ENGLISH 18Q	Writer's Salon	3
ENGLISH 19Q	I Bet You Think You're Funny: Humor Writing Workshop	3
ENGLISH 21Q	Write Like a Poet: From Tradition to Innovation	3
ENGLISH 22Q	Writing Mystical, Spiritual, and Altered Experiences	3

ENGLISH 23Q	First Chapters: Please Allow Me to Introduce My Novel	3
ENGLISH 24Q	Leaving Patriarchy: A Course for All Genders	3
ENGLISH 90Q	Sports Writing	3
ENGLISH 93Q	The American Road Trip	3
ENGLISH 94Q	The Future is Feminine	3

How to Declare the Major in English

Students interested in majoring in English are encouraged to declare during their sophomore year, but no later than the beginning of their junior year. They are urged to discuss their plans with the undergraduate student services officer as early as possible, and to fulfill the core requirements for the major in their freshman and sophomore years.

To declare the major, a student must:

- fill out the Declaration of Major in Axess
- choose a faculty advisor, and
- submit a completed program proposal form approved by your faculty advisor.

Degree Requirements

It is required that a student meet with the advisor at least once per academic year to discuss progress towards degree completion. Quarterly meetings are highly encouraged. It is recommended that a student meet with the advisor at least once per quarter to discuss progress towards degree completion.

Course Requirements

Rules that apply to all English majors irrespective of field of study or degree option

1. Courses can only be counted once, i.e., can only satisfy one requirement.
2. Two of the elective courses may be taken on a credit/no credit basis at the discretion of the instructor.

The total number of units required to graduate for each degree option is specified in the relevant section following. All courses should be taken for 5 units. Irrespective of field of study or degree option, all English majors must complete the following requirements:

		Units
Required Courses (35 units)		
All required courses must be taken for 5 units.		
Historical courses		
One course in the 10 series [1]		5
ENGLISH 10A	Introduction to English I: Mapping Monsters in British Literature, 650-1650	
ENGLISH 10B	Introduction to English I: What Is Literary History?	
ENGLISH 10D	Introduction to English I: Women, Gender, and Sexuality in Early British Literature	
One course in the 11 series [2]		5
ENGLISH 11A	Introduction to English II: From Milton to the Romantics	
ENGLISH 11B	Introduction to English II: American Literature and Culture to 1855	
ENGLISH 11C	Introduction to English II: Revolutionary Energies: Milton and the Transcendentalists	
One course in the 12 series [3]		5
ENGLISH 12A	Introduction to English III: Introduction to African American Literature	
ENGLISH 12B	Introduction to English III: Literature and the Crises of Humanism	
ENGLISH 12C	Introduction to English III: Modern Literature	
Methodology courses		
ENGLISH 160	Poetry and Poetics	
ENGLISH 161	Narrative and Narrative Theory	
Writing in the Major (WIM)		
ENGLISH 5A	WISE: Unfinished Novels	
ENGLISH 5B	WISE: Mental Health and Literature, Mid-century to Present	
ENGLISH 5C	WISE: Revelation and Apocalypse: Literature at the End of the World 1300-2000	
ENGLISH 5D	WISE: Bad Reading: Pleasure and Politics in Literary Value	
ENGLISH 5E	WISE: The Novel of Love	
ENGLISH 5F	WISE: Serial Children's Literature: Lemony Snicket's A Series of Unfortunate Events	
ENGLISH 5G	WISE: Blackness and the American Canon	
ENGLISH 5H	WISE: Dialogue in American Literature	
One pre-1800 historical course		**5**
The following courses offered in 2019-20 fulfill this requirement.		
ENGLISH 115C	Hamlet and the Critics	
ENGLISH 251B	Paradise Lost	
ENGLISH 200C	Introduction to Manuscript Studies	
ENGLISH 201	The Bible and Literature	
ENGLISH 115G	Shakespeare: Five Tragedies	
ENGLISH 115E	Shakespeare and his Contexts: Race, Religion, Sexuality, Gender	
ENGLISH 107B	Literature of the English Revolution	
ENGLISH 237	Before Novels	
ENGLISH 122C	Medieval Fantasy Literature	
ENGLISH 114C	¿Books Promiscuously Read¿: Varieties of Renaissance Experience	
SLE 91	Structured Liberal Education	
SLE 92	Structured Liberal Education	
Fields of Study		**35-50 units**
Each student must choose one of five fields of study. See below for complete information.		
Total Units		55-70

Transfer Credit and Course Equivalency

Students who take a class with substantial Anglophone literary content outside the department may petition for course equivalency to count that course towards the English major, at the discretion of the Director of Undergraduate Studies. Such courses cannot fulfill English literature core requirements; students may not receive course equivalency credit for more than two classes, and students should not take for granted that any particular course will be accepted.

Transfer students only may apply as many as four literature courses taken at approved universities toward the English major. Approval of such courses toward the major and its requirements is at the discretion of the Director of Undergraduate Studies.

Request for transfer credit, including course syllabi and official transcripts, should be submitted to the undergraduate student services

officer, and to the Office of the Registrar's external credit evaluation section. After-the-fact petitions for courses taken outside the department may be refused.

Fields of Study

Because the Department of English recognizes that the needs and interests of literature students vary, it has approved several major programs of study. Each of these has different objectives and requirements; students should consider carefully which program of study corresponds most closely to their personal and intellectual objectives. The department offers the following fields of study for degrees in English.

I. Literature (35 units)

This field of study is not declared in Axess. It does not appear on either the official transcript or the diploma. This program provides for the interests of students who wish to understand the range and historical development of British, American and Anglophone literatures and a variety of critical methods by which their texts can be interpreted. The major emphasizes the study of literary forms and genres and theories of textual analysis. In addition to the degree requirements required of all majors and listed above, students must complete at least 35 additional units of courses consisting of:

- Seven additional approved elective courses, only one of which may be a creative writing course, chosen from among those offered by the Department of English. In place of one of these seven elective courses, students may choose one upper-division course in a foreign literature read in the original language.

II. Literature with Creative Writing Emphasis (40 units)

This field of study (subplan) is printed on the transcript and diploma and is elected in Axess. This program is designed for students who want a sound basic knowledge of the English literary tradition as a whole and at the same time want to develop skills in writing poetry or prose. In addition to the degree requirements required of all majors and listed above, students must complete at least 40 additional units of approved courses, in either the prose or poetry concentration:

Prose Concentration

		Units
ENGLISH 90	Fiction Writing	5
or ENGLISH 91	Creative Nonfiction	
ENGLISH 92	Reading and Writing Poetry (Can be fulfilled with a poetry literature seminar)	5
ENGLISH 146S	Secret Lives of the Short Story	5
ENGLISH 190	Intermediate Fiction Writing (or any 190 series or 191 series)	5
or ENGLISH 191	Intermediate Creative Nonfiction	
4 elective literature courses (One of the courses may be fulfilled with a creative writing workshop).		20
Total Units		40

Poetry Concentration

		Units
ENGLISH 90	Fiction Writing (Can be fulfilled with a prose literature seminar)	5
or ENGLISH 91	Creative Nonfiction	
ENGLISH 92	Reading and Writing Poetry	5
ENGLISH 192	Intermediate Poetry Writing (or any 192 series)	5
One literature course in poetry		5
4 elective literature courses (One of the courses may be fulfilled with a creative writing workshop)		20
Total Units		40

III. Literature and Interdisciplinary Studies (40 units)

This field of study (subplan) is printed on the transcript and diploma and is elected in Axess. This program is intended for students who wish to combine the study of one broadly defined literary topic, period, genre, theme or problem with an interdisciplinary program of courses (generally chosen from one other discipline) relevant to that inquiry. In addition to the degree requirements required of all majors and listed above, students must complete at least 40 additional units of approved courses including:

1. Five elective literature courses chosen from among those offered by the Department of English. Students must select two of these courses in relation to their interdisciplinary focus.
2. Three courses related to the area of inquiry. These courses may be chosen from another department or interdisciplinary program within the School of Humanities and Sciences including (but not limited to) such as African American Studies (http://www.stanford.edu/dept/AAAS/), Anthropology (https://www.stanford.edu/dept/anthropology/cgi-bin/web/), Art and Art History (http://art.stanford.edu/), Classics (http://www.stanford.edu/dept/classics/cgi-bin/web/), Comparative Literature (http://www.stanford.edu/dept/DLCL/cgi-bin/web/dept/complit/), Comparative Studies in Race and Ethnicity (http://ccsre.stanford.edu/), Feminist Studies (http://www.stanford.edu/dept/femstudies/), Human Biology (https://humbio.stanford.edu/), Music (http://music.stanford.edu/Home/), Philosophy (http://philosophy.stanford.edu/), Political Science (http://politicalscience.stanford.edu/), Psychology (http://psychology.stanford.edu/), Religious Studies (http://www.stanford.edu/dept/relstud/), Science, Technology, and Society (http://sts.stanford.edu/), and Sociology (http://sociology.stanford.edu/). These courses should form a coherent program and must be relevant to the focus of the courses chosen by the student to meet the requirement. Each of these courses must be approved in advance by the interdisciplinary program director.
3. In addition, students in this program must complete an interdisciplinary project, in the form of a 15-20 page interdisciplinary paper or its equivalent. This may be completed with ENGLISH 194 Individual Research, ENGLISH 197 Seniors Honors Essay, ENGLISH 198 Individual Work, ENGLISH 199 Senior Independent Essay, or a paper integrating the material in two courses the student is taking in two different disciplines.

The final course plan (in the form of a 1 to 2 paragraph summary of coherent course of study) and interdisciplinary project must be approved by the faculty advisor and the interdisciplinary advisor by the time the student applies to graduate.

IV. Literature and Foreign Language Literature (40 units)

This field of study (subplan) is printed on the transcript and diploma and is elected in Axess. This track provides a focus in British and American literature with additional work in foreign language literature. Current options include: French literature; German literature; Italian literature; or Spanish literature. These subplans appear on the diploma as follows: English & French Literature, English & German Literature, English & Italian Literature, and English & Spanish Literature. In addition to the degree requirements required of all majors and listed above, students must complete at least 40 additional units of approved courses including:

1. Four elective courses chosen from among those offered by the Department of English, one of which may be a creative writing course.
2. A coherent program of four courses in the foreign language literature, read in the original language, approved by the Director

of Undergraduate Studies in English and by the relevant foreign language department.

V. Literature and Philosophy (40-50 units)

This field of study (subplan) is printed on the transcript and diploma and is elected in Axess. Students should meet with the undergraduate director concerning the Literature and Philosophy focus. This track is for students who wish to explore interdisciplinary studies at the intersection of literature and philosophy while acquiring knowledge of the English language literary tradition as a whole. In addition to the degree requirements required of all majors and listed above, students must complete at least 40-50 additional units of approved courses including:

1. PHIL 80 Mind, Matter, and Meaning (WIM): Prerequisite: introductory philosophy course.
2. Gateway course: ENGLISH 81 Philosophy and Literature. This course should be taken as early as possible in the student's career, normally in the sophomore year.
3. Aesthetics, Ethics, Political Philosophy: one course from PHIL 170 Ethical Theory series.
4. Language, Mind, Metaphysics, and Epistemology: one course from PHIL 180 Metaphysics series.
5. History of Philosophy: one course in the history of Philosophy, numbered above PHIL 100 Greek Philosophy.
6. Two upper division courses of special relevance to the study of Philosophy and Literature. Both of these courses must be in the English department. A list of approved courses (http://philit.stanford.edu/programs/relevance.html) is available on the Philosophy and Literature web site.
7. Two additional elective courses in the English department.
8. One capstone seminar (http://philit.stanford.edu/programs/capstone.html) of relevance to the study of Philosophy and Literature.

Additional Information

Advanced Research Options

Individual Research

Students taking 100- or 200-level courses may, with the consent of the instructor, write a follow-up 5-unit paper based on the course material and due no later than the end of the succeeding quarter (register for ENGLISH 194 Individual Research). The research paper is written under the direct supervision of the professor; it must be submitted first in a preliminary draft and subsequently in a final version.

Overseas Studies or Study Abroad

The flexibility of the English major permits students to attend an overseas campus in any quarter, but it is advisable, and in some cases essential, that students spend their senior year at Stanford if they wish to participate in the honors program or in a special in-depth reading course. For more information on Stanford overseas programs, see the "Overseas Studies (p. 217)" section of this bulletin.

Students should consult their advisors and the undergraduate program officer to make sure that they can fulfill the requirements before graduation. The Stanford Program in Oxford usually offers courses which apply toward both University requirements and area requirements for the English major. In either case, students should save the syllabi from their courses if they wish to apply to use them to fulfill an English major requirement.

See the Overseas tab (p. 1395) in this section of the bulletin for courses offered this year.

Overseas Studies Courses in English

The Bing Overseas Studies Program (http://bosp.stanford.edu) (BOSP) manages Stanford international and domestic study away programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The BOSP course search site (https://undergrad.stanford.edu/programs/bosp/explore/search-courses/) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu) or Bing Overseas Studies (http://bosp.stanford.edu).

Due to COVID-19, all BOSP programs have been suspended for Autumn Quarter 2020-21. All courses and quarters of operation are subject to change.

Capstone: Senior Independent Essay

The senior independent essay gives senior English majors the opportunity to work throughout the year on a sustained piece of critical or scholarly work of around 10,000 words on a topic of their choice, with the close guidance of a faculty advisor. Each student is responsible for finding an advisor, who must approve the proposed topic before the end of the third quarter prior to expected graduation. The senior essay is read and graded by the advisor and one other member of the English faculty. Senior independent essay students register for ENGLISH 199 Senior Independent Essay.

Honors Program

Students wishing to undertake a formal program of advanced literary criticism and scholarship, including the honors seminar and independent research, are invited to apply for the honors program in the Spring Quarter of the junior year. Any outstanding student is encouraged to engage in an honors thesis project.

Admission is selective. Admission is announced in early May based on submission, by April 15 of the junior year, of the senior honors application package including a thesis proposal. Accepted students then submit a revised proposal and bibliography by June 15. Honors students are encouraged to complete before the start of their senior year the three methodology courses that are English major requirements:

		Units
ENGLISH 160	Poetry and Poetics	5
ENGLISH 161	Narrative and Narrative Theory	5
WISE course		
ENGLISH 5A	WISE: Unfinished Novels	
ENGLISH 5B	WISE: Mental Health and Literature, Mid-century to Present	
ENGLISH 5C	WISE: Revelation and Apocalypse: Literature at the End of the World 1300-2000	
ENGLISH 5D	WISE: Bad Reading: Pleasure and Politics in Literary Value	
ENGLISH 5E	WISE: The Novel of Love	
ENGLISH 5F	WISE: Serial Children's Literature: Lemony Snicket's A Series of Unfortunate Events	
ENGLISH 5G	WISE: Blackness and the American Canon	
ENGLISH 5H	WISE: Dialogue in American Literature	

In September before the senior year, students are encouraged to participate in the Bing Honors College. In Autumn Quarter of the senior year, students take a mandatory 5 unit honors seminar (ENGLISH 196A Honors Seminar: Critical Approaches to Literature) on critical approaches

to literature. The senior year seminar is designed to introduce students to the analysis and production of advanced literary scholarship. Students planning on studying abroad in the senior year should privilege Winter Quarter, rather than Autumn.

In Winter and Spring quarters of the senior year, honors students complete the senior honors essay for a total of 10 units under supervision of a faculty advisor.

The deadline for submitting the honors essay is May 6, 2021. Essays that receive a grade of 'A-' or above are awarded honors.

In addition to fulfilling the requirements of the major, students in the honors program must complete 15 units of the following:

		Units
ENGLISH 196A	Honors Seminar: Critical Approaches to Literature	5
ENGLISH 197	Seniors Honors Essay	10
Total Units		15

return to top of page (p. 1384)

Joint Major Program: English and Computer Science

The joint major program (JMP) was discontinued at the end of the academic year 2018-19. Students may no longer declare this program. All students with declared joint majors are permitted to complete their degree; faculty and departments are committed to providing the necessary advising support.

See the "Joint Major Program (p. 33)" section of this bulletin for a description of University requirements for the JMP. See also the Undergraduate Advising and Research JMP (https://majors.stanford.edu/more-ways-explore/joint-majors-csx/) web site and its associated FAQs.

Students completing the JMP receive a B.A.S. (Bachelor of Arts and Science).

English Major Requirements in the Joint Major Program

The joint major is structured to let students thoughtfully explore the intersection of Computer Science and literary studies. Students would ideally declare the program during the sophomore year. Students are required to complete requirements in English and Computer Science. See the "Computer Science Joint Major Progra (p. 714)m (p. 714)" section of this bulletin for details on Computer Science requirements.

The requirements for English are adapted from the English major and are stated in full below. Students in the CS+English JMP are required to complete 58 total units in English compared to 68-80 units which is typically required by the English major. Students in CS+English are not required to take the Writing Intensive Seminar in English (WISE) course. Additionally, students in CS+English only have to fulfill five electives. The University Writing in the Major requirement for students in the CS+English JMP is fulfilled by the Computer Science Writing in the Major requirement. To declare the CS+English JMP, students must complete a program proposal. (https://stanford.box.com/shared/static/h6erjrj75rercs2gua9z8dm4mgnswqru.pdf)

Students are encouraged to compile an ePortfolio of reflections, ideas, and work on the interplay between humanities and computer science.

Integrative Experience

In the senior year, students are required to undertake a capstone project which involves both programming and literary research, and could include work on digital editions, analyses of corpora, the creation of electronic literature, digital representations of literary venues, studies of natural language processing as applied to literary analysis, or any other project that draws integrally on both disciplines. All capstone projects must be approved by both the student's Computer Science advisor and English advisor. This project normally takes one quarter, and should be taken concurrently with the Computer Science capstone requirement. In English, students are required to complete 3 units of ENGLISH 198 Individual Work with a faculty advisor in English as part of the integrative project. In preparation for the Independent Study in English, students must secure an advisor, complete the CS+English Capstone form (https://stanford.box.com/shared/static/hl0zna48liez8u10ulqs.pdf), and submit a written proposal of the project.

Required Core Courses (30 Units)

		Units
Historical courses		
One course in the 10 series [1]		5
ENGLISH 10A	Introduction to English I: Mapping Monsters in British Literature, 650-1650	
ENGLISH 10B	Introduction to English I: What Is Literary History?	
ENGLISH 10D	Introduction to English I: Women, Gender, and Sexuality in Early British Literature	
One course in the 11 series [2]		5
ENGLISH 11A	Introduction to English II: From Milton to the Romantics	
ENGLISH 11B	Introduction to English II: American Literature and Culture to 1855	
One course in the 12 series [3]		5
ENGLISH 12A	Introduction to English III: Introduction to African American Literature	
ENGLISH 12B	Introduction to English III: Literature and the Crises of Humanism	
ENGLISH 12C	Introduction to English III: Modern Literature	
One additional history of literature course [4] [5]		5
Methodology courses		
ENGLISH 160	Poetry and Poetics	5
ENGLISH 161	Narrative and Narrative Theory	5
Total Units		30

[4] In 2019-20 the following courses satisfy the history of literature requirement
- ENGLISH 115C Hamlet and the Critics
- ENGLISH 251B Paradise Lost
- ENGLISH 200C Introduction to Manuscript Studies
- ENGLISH 201 The Bible and Literature
- ENGLISH 115E Shakespeare and his Contexts: Race, Religion, Sexuality, Gender
- ENGLISH 107B Literature of the English Revolution
- ENGLISH 237 Before Novels
- ENGLISH 112C Humanities Core: The Renaissance in Europe
- ENGLISH 114C ¿Books Promiscuously Read¿: Varieties of Renaissance Experience

[5] This requirement may also be fulfilled with the following Thinking Matters or SLE courses:
- ESF 1 Education as Self-Fashioning: The Active, Inquiring, Beautiful Life
- THINK 49 Stories Everywhere
- SLE 91 Structured Liberal Education and SLE 92 Structured Liberal Education

Rules that apply to all English majors irrespective of field of study or degree option:

1. Courses can only be counted once, i.e. can only satisfy one requirement.
2. Two of the elective courses may be taken on a credit/no credit basis at the discretion of the instructor.

Field of Study Electives (25 Units)

Because the Department of English recognizes that the needs and interests of CS+English students vary, it has approved two major programs of study: Literature and Literature with Creative Writing. Each of these has different objectives and requirements; students should consider carefully which program of study corresponds most closely to their personal and intellectual objectives.

I. Literature

This field of study is not declared in Axess. It does not appear on either the official transcript or the diploma. This program provides for the interests of students who wish to understand the range and historical development of British, American and Anglophone literatures and a variety of critical methods by which their texts can be interpreted. The major emphasizes the study of literary forms and genres and theories of textual analysis. In addition to the degree requirements required of all joint majors and listed above, students must complete at least 25 additional units of courses consisting of five additional approved elective courses, only one of which may be a creative writing course, chosen from among those offered by the Department of English. In place of one of these five elective courses, students may choose one upper-division course in a foreign literature read in the original language.

II. Literature with Creative Writing Emphasis

This subplan is printed on the transcript and diploma and is elected in Axess.This program is designed for students who want a sound basic knowledge of the English literary tradition as a whole and at the same time want to develop skills in writing poetry or prose. In addition to the degree requirements required of all joint majors and listed above, students must complete at least 25 additional units of approved courses, in either the prose or poetry concentration:

Prose Concentration –

		Units
ENGLISH 90	Fiction Writing	5
or ENGLISH 91	Creative Nonfiction	
ENGLISH 92	Reading and Writing Poetry	5
ENGLISH 190	Intermediate Fiction Writing (or any 190 series or 191 series)	5
or ENGLISH 191	Intermediate Creative Nonfiction	
ENGLISH 146S	Secret Lives of the Short Story	5
One elective literature course		5
Total Units		25

Poetry Concentration –

		Units
ENGLISH 92	Reading and Writing Poetry	5
ENGLISH 90	Fiction Writing	5
or ENGLISH 91	Creative Nonfiction	
ENGLISH 192	Intermediate Poetry Writing (or any 192 series)	5
One literature course in poetry		5
One elective literature course		5
Total Units		25

Integrative Experience (3 Units)

		Units
ENGLISH 198	Individual Work [1]	3

[1] Students in the CS+English JMP are required to enroll for three units of ENGLISH 198 Individual Work with a faculty adviser in English as part of the integrative project. These units should be completed concurrently with the Computer Science capstone requirement.

Dropping a Joint Major Program

To drop the joint major, students must submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program (https://stanford.box.com/change-UG-program/). Students may also consult the Student Services Center (http://studentservicescenter.stanford.edu/) with questions concerning dropping the joint major.

Transcript and Diploma

Students completing a joint major graduate with a B.A.S. degree. The two majors are identified on one diploma separated by a hyphen. There will be a notation indicating that the student has completed a "Joint Major." The two majors are identified on the transcript with a notation indicating that the student has completed a "Joint Major."

Minor in English Literature

The minor in English Literature encourages students to specialize in an area of interest. We require students to complete at least one period survey course, and one methodology overview course, to provide the background knowledge and skills to explore their chosen field.

Degree Requirements

In order to graduate with a minor in English, students must complete a total of 25 units of English literature classes:

Required Courses for the Minor

		Units
Historical courses		
Select any one of the following historical courses:		5
ENGLISH 10A	Introduction to English I: Mapping Monsters in British Literature, 650-1650	
ENGLISH 10B	Introduction to English I: What Is Literary History?	
ENGLISH 10D	Introduction to English I: Women, Gender, and Sexuality in Early British Literature	
ENGLISH 11A	Introduction to English II: From Milton to the Romantics	
ENGLISH 11B	Introduction to English II: American Literature and Culture to 1855	
ENGLISH 11C	Introduction to English II: Revolutionary Energies: Milton and the Transcendentalists	
ENGLISH 12A	Introduction to English III: Introduction to African American Literature	
ENGLISH 12B	Introduction to English III: Literature and the Crises of Humanism	
ENGLISH 12C	Introduction to English III: Modern Literature	
Methodology courses		
Select one of the following:		5
ENGLISH 160	Poetry and Poetics	
ENGLISH 161	Narrative and Narrative Theory	
Elective courses		

All classes with an English course number may count towards the minor. Only one course in Creative Writing may count, and only one IntroSem. Any student may petition the Director of Undergraduate Studies to have one course with substantial Anglophone literary content taken outside the department count towards the minor. Students who declared prior to the 2020-21 academic year may fulfill the requirements of this version of the minor or the old one, as they prefer.	15

Minor in Creative Writing (30 units)

The minor in Creative Writing offers a structured environment in which students interested in writing prose or poetry develop their skills while receiving an introduction to literary forms. Students choose a concentration in prose, poetry, or fiction into film.

Degree Requirements

In order to graduate with a minor in Creative Writing, students must complete the following program of six 5-unit courses for a total of 30 units. All courses must be taken for a letter grade. Courses taken abroad or at other institutions may not be counted towards the minor.

Required Courses for the Minor

Students must complete at least 30 units of approved courses, in the prose, poetry or fiction into film concentration:

Prose concentration

		Units
Select one of the following introductory prose courses:		5
Any ENGLISH 90 series		
Any ENGLISH 91 series		
ENGLISH 146S	Secret Lives of the Short Story	5
Any ENGLISH 92 series		5
Select two of the following intermediate or advanced prose courses:		10
any ENGLISH 190 series		
any ENGLISH 191 series		
ENGLISH 290	Advanced Fiction Writing	
ENGLISH 291	Advanced Creative Nonfiction	
One 5 unit elective course in English literature		5
Total Units		30

Poetry concentration

		Units
Any ENGLISH 92 series		5
Select one of the following introductory prose courses:		5
Any ENGLISH 90 series		
Any ENGLISH 91 series		
ENGLISH 160	Poetry and Poetics	5
Select two of the following intermediate or advanced poetry courses:		10
any ENGLISH 192 series		
ENGLISH 292	Advanced Poetry Writing	
One 5 unit elective course in English literature		5
Total Units		30

Fiction into Film concentration

		Units
ENGLISH 90	Fiction Writing	5
ENGLISH 146S	Secret Lives of the Short Story	5
ENGLISH 190F	Fiction into Film	5
Select one of the following intermediate or advanced prose courses:		5
Any ENGLISH 190 series		
ENGLISH 290	Advanced Fiction Writing	
Select one of the following courses:		5
ENGLISH 190SW	Screenwriting Intensive	
ENGLISH 198F	Hoffs-Roach Fiction into Film Tutorial	
One 5 unit elective course in English literature		5
Total Units		30

Minor in Digital Humanities

The minor in Digital Humanities combines humanistic inquiry with digital methods and tools to generate new questions and to foster innovative research. Students will develop critical skills that are applicable within and beyond an academic setting. The minor consists of three clusters: Spatial Humanities, Quantitative Textual Analysis, and Text Technologies. Students may choose to specialize in one of these areas.

- Spatial Humanities ranges from theory (space as a category of analysis) to technical representation/analysis of spatial distribution through algorithms. It can draw upon anthropology, geography, and other disciplines with a tradition of interest in space; meanwhile, it can feed into (for instance) literary studies.
- Quantitative Textual Analysis includes anything that uses computers to quantify formal properties of texts, ranging from word frequencies to chapter divisions to character networks. Genre, authorship, sentiment analysis, "opinion mining" -- all of these can play a role. It intersects with linguistics/NLP; Classics and Cognitive Psychology can also be allies.
- Text Technologies encompasses technologies of communication; social media analysis; database creation, coding, TEI; technologies of publishing and text access; digital curation of virtual exhibitions (which allows us to bring in the arts, digital imaging, etc.).

Degree Requirements

Students must take a minimum of twenty units: at least one core course (5 units), and at least five other courses of at least three units each. Students complete twenty or more units in courses relevant to the major in departments across the university including Anthropology, Art, Communications, Computer Science, East Asian Languages and Cultures, Engineering, English, French, History, Italian, Linguistics, Music, Philosophy, Religious Studies, and Theatre and Performance. These electives are to be determined in consultation with the advisor to the minor (a faculty member in English).

Not all courses are offered every year. For current info please see Explore Courses (https://explorecourses.stanford.edu) or contact the student services team.

Required Courses for the Minor

		Units
Required Introductory Course		
Select one of the following:		5
ENGLISH 184E	Literary Text Mining (Quantitative Textual Analysis concentration)	
At the time of publication, courses for the Digital Humanities minor are still under development. They will be published here as soon as they are available.		
Elective Courses		
Five courses in the chosen concentration		15
Total Units		20

Coterminal Master of Arts in English

Current Stanford undergraduate majors in English who are interested in further postgraduate work may apply for the coterminal M.A. in English. The Admissions Committee also considers applicants from related fields, such as Modern Thought and Literature, Comparative Literature, and American Studies, if they have fulfilled the requirements for the B.A. in English. The committee does, however, give preference to English majors.

Candidates for a coterminal master's degree must fulfill all requirements for the M.A. in English (including the graduate language requirement), as well as general and major requirements for the B.A. in English. No courses used to satisfy the B.A. requirements (either as General Education Requirements or department requirements) may be applied toward the M.A. No courses taken more than two quarters prior to admission to the coterminal master's program may be used to meet the 45-unit University minimum requirement for the master's degree. A minimum GPA of 3.7 in the major is required of those applying for the coterminal master's degree. The department accepts applications once a year; the application deadline is February 1 for admission in the Spring Quarter immediately following. There are no exceptions to this deadline. All application materials are submitted directly to the English Coterminal Online Application (https://applyweb.com/stanterm/). The department does not fund coterminal M.A. students.

Admission Requirements

To apply for admission to the English coterminal M.A. program, students must submit the Coterminal Online Application (https://applyweb.com/stanterm/), which includes the following:

1. A statement of purpose giving the reasons the student wishes to pursue this program and its place in his or her future plans.
2. A writing sample of critical or analytical prose, about 12-25 pages in length.
3. An official undergraduate transcript.
4. Three letters of recommendation from members of the faculty who know the applicant well and who can speak directly to the question of his or her ability to do graduate-level work.
5. Preliminary Master's Program Proposal; this is a form in the application packet. Specify at least 45 units of course work relevant to the degree program.
6. Coterminal Course Approval Form (this form is required only if transferring courses from undergraduate to the graduate program at the time of application; students will be allowed to transfer courses between their undergraduate and graduate careers for a limited time). To be eligible for transfer, courses must have been taken in the two quarters preceding admission to the M.A. program (please note that no courses taken earlier than Autumn quarter of the senior year may count toward the M.A.).

University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 56)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 65)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken two quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate advisor be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

Degree Requirements

- M.A. candidates must complete with a 3.0 (B) grade point average (GPA) at least nine courses (a minimum of 45 units), at least two of which must be 300-level courses.
- Ordinarily, graduate students enroll in courses numbered 200 and above. They may take no more than two 100-level courses without the consent of the Director of Graduate Studies. No more than two courses may be taken outside the department and these must be pre-approved by the Director of Graduate Studies.
- The master's student may take no more than 5 units of ENGLISH 398 Research Course.
- No creative writing courses may be used to fulfill the requirements.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (p. 56)" section of this bulletin. For University coterminal master's degree application forms, see the Registrar's Publications page (https://studentaffairs.stanford.edu/registrar/publications/#Coterm).

Required Courses

	Units
Historical Courses	**20**
Two courses in literature pre-1800	
Two courses in literature post-1800	
Elective Courses	**25**
Five courses from those offered in the English department [1] [2]	
Additional Requirement	
Reading knowledge of a foreign language [3]	
Total Units	45

[1] Five elective courses should represent a mixture of survey and specialized courses chosen to guarantee familiarity with a majority of the works on the qualifying exam reading list for doctoral candidates.

[2] Candidates who can demonstrate unusually strong preparation in the history of English literature may undertake a 40 to 60 page master's thesis. Candidates register for 10 units of ENGLISH 399 Thesis and are required to take only three elective courses.

[3] Reading knowledge of a foreign languages: may be fulfilled in any of the following ways:

- A reading examination given each quarter by the various language departments, except for Latin and Greek.
- For Latin and Greek, an examination given by one of the Department of English faculty.
- Passage with a grade of 'B' or higher of a course in literature numbered 100 or higher in a foreign language department at Stanford.
- Passage of the following, respectively, with a grade of 'B' or higher. FRENLANG 250 Reading French, , GERLANG 250 Reading German, ITALLANG 250 Reading Italian, SPANLANG 250 Reading Spanish.

Coterminal Program with School of Education

Students interested in becoming middle school and high school teachers of English may apply for admission to the coterminal teaching program (CTP) of the Stanford Teacher Education Program (STEP) in the School of Education.

CTP students complete a special curriculum in English language, composition, and literature that combines a full English major with supplemental course work in subjects commonly taught in California public schools and a core program of foundational courses in educational theory and practice. They are then admitted to STEP for a fifth year of pedagogical study and practice teaching. Students who complete the curriculum requirements are able to enter STEP without the necessity of taking either the GRE or the usual subject matter assessment tests.

At the end of five years, CTP students receive a B.A. in English, an M.A. in Education, and a California Secondary Teaching Credential.

Students normally apply to the coterminal teaching program at the end of their sophomore year or at the beginning of their junior year. For complete program details and for information on how to apply, consult the Director of Undergraduate Studies in English or the CTP coordinator in the School of Education.

Doctor of Philosophy in English

Admission

Students with a bachelor's degree in English or a closely related field may apply to pursue graduate work toward an advanced degree in English at Stanford. International students whose first language is not English are also required to take the TOEFL examination (with certain exceptions: see the Office of Graduate Admissions (http://gradadmissions.stanford.edu) web site).

University Degree Requirements

University requirements for the Ph.D. are described in the "Graduate Degrees (http://stanford.edu/dept/registrar/bulletin/4901.htm)" section of this bulletin.

Department Degree Requirements

The following department degree requirements, which apply to students entering the program in Autumn Quarter 2013 and thereafter, deal with such matters as residence, dissertation, and examinations, and are in addition to the University's basic requirements for the doctorate. Students should also consult the most recent edition of the English Ph.D. Handbook.

A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the bachelor's degree. Candidates are required to complete at least 135 units of graduate work in addition to the doctoral dissertation. At least three consecutive quarters of graduate work, and the final course work in the doctoral program, must be taken at Stanford.

A student may count no more than 65 units of non-graded courses toward the 135 course units required for the Ph.D., without the written consent of the Director of Graduate Studies. A student takes at least 70 graded units (normally fourteen courses) of the 135 required total units. 5 of these 70 units may be fulfilled with ENGLISH 398 Research Course or ENGLISH 398R Revision and Development of a Paper. ENGLISH 396L Pedagogy Seminar I does not count toward the 70 graded units. No more than 10 units (normally two courses) may come from 100-level courses

This program is designed to be completed in five years.

One pedagogical seminar and four quarters of supervised teaching constitute the teaching requirement for the Ph.D. Typically a student teaches three times as a teaching assistant in a literature course. For the fourth course, students have the option of applying to design and teach Writing Intensive Seminar in English (WISE) for undergraduate English majors or teaching a fourth quarter as a T.A.

- 1st year: One quarter as T.A. (leading 1-2 discussion sections of undergraduate literature)
- 2nd year: One quarter as T.A. (leading 1-2 discussion sections of undergraduate literature)
- 3rd/4th/5th years: Two quarters of teaching, including the possibility of TAing or teaching WISE.

I. English and American Literature

Students are expected to do course work across the full range of English and American literature. Students are required to fulfill the following requirements. Note: fulfillment of requirements 1, 2, and 3 must be through Stanford courses; students are not excused from these three requirements or granted credit for course work done elsewhere.

1. **Units**

Required Courses:		
ENGLISH 396	Introduction to Graduate Study for Ph.D. Students	5
ENGLISH 396L	Pedagogy Seminar I	2

2. Graduate-level (at least 200-level) course work in English literature before 1700, and English or American literature after 1700 (at least 5 units of each).
3. Graduate-level (at least 200-level) course work in some aspect of literary theory such as courses in literary theory itself, narrative theory, poetics, rhetoric, cultural studies, gender studies (at least 5 units).
4. Students concentrating in British literature are expected to take at least one course (5 units) in American literature; students concentrating in American literature are expected to take at least one course (5 units) in British literature.
5. Of all courses taken, a minimum of six courses for a letter grade must be graduate colloquia and seminars, of which at least three must be graduate seminars. The colloquia and seminars should be from different genres and periods, as approved by the advisor.
6. The remaining units of graded, graduate-level courses and seminars should be distributed according to the advisor's judgment and the candidate's needs.
7. Consent of the Director of Graduate Studies if courses taken outside the Department of English are to count toward the requirement of 70 graded units of course work.
8. An oral qualifying examination based on a reading guide, to be taken at the end of the summer after the first year of graduate work. The final decision as to qualification is made by the graduate studies committee in consideration of the student's overall record for the first year's work in conjunction with performance on the examination. Note: A student coming to the doctoral program who has done graduate work at another university must petition in the first year at Stanford for transfer credit for course work completed elsewhere. The petition should list the courses and grades, and describe the nature and scope of course work, as well as the content, contact hours, and writing requirements. A syllabus must be included. The Director of Graduate Studies considers the petition in conjunction with the student's overall performance.
9. *University Oral Examination*—A University oral examination covering the field of concentration (as defined by the student and the student's advisor). Students take 10 units of an Orals Preparation workshop led by the Director of Graduate Studies in Spring quarter of the second year. The oral examination, based on a reading list established by the

candidate in consultation with his or her advisor, is taken ideally by the end of Autumn Quarter of the third year of graduate study, but no later than the end of the Winter Quarter.

10. *Dissertation*—As early as possible during graduate study, a Ph.D. candidate is expected to find a topic requiring extensive original research and to seek out a member of the department as his or her advisor. The advisor works with the student to select a committee to supervise the dissertation. Candidates should take this crucial step as early in their graduate careers as possible. The committee may well advise extra preparation within or outside the department, and time should be allowed for such work. After the dissertation topic has been approved, the candidate should file a formal reading committee form as prescribed by the University. Once a first chapter has been drafted, the student meets with the full reading committee for a one hour colloquium. The dissertation must be submitted to the advisor as a rough draft, but in substantially final form, at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree.
11. *Closing Colloquium*—Prior to the submission of the dissertation the student and the dissertation committee holds a closing colloquium designed to look forward toward the next steps; identify the major accomplishments of the dissertation and the major questions/issues/problems that remain; consider possibilities for revision, book or article publication, etc. and to provide some intellectual closure to the dissertation.

II. English and Comparative Literature

The Ph.D. program in English and Comparative Literature is designed for students wishing an extensive knowledge of the literature, thought, and history of England and of at least one foreign country, for one period. Approximately half of the student's course work and reading is devoted to this period, with the remainder of the time given to other periods of English and American literature since 1350.

This degree, administered by the Department of English, is to be distinguished from the Ph.D. in Comparative Literature. The latter program is intended for students unusually well prepared in foreign languages and involves advanced work in three literatures, one of which may be English. Interested students should consult a Department of English advisor, but faculty from Comparative Literature may also provide useful supplementary information.

The requirements are as follows:

1. Knowledge of the basic structure of the English language. This requirement may be met by examination, or by taking 10 units of courses chosen from among those offered in linguistics, English philology, and early and middle English literature. No particular courses are required of all students.
2. Required Courses:

		Units
ENGLISH 396	Introduction to Graduate Study for Ph.D. Students	5
ENGLISH 396L	Pedagogy Seminar I	2

3. A knowledge of one foreign language sufficient to take graduate-level literature courses in a foreign-language department and an advanced reading knowledge of a second language.
4. A minimum of 45 units in the history, thought, and literature of one period, in two or more languages, one of which must be English and one foreign. Students normally include at least two courses in a foreign literature read in the original language and two courses listed under Comparative Literature or Modern Thought and Literature. As many as 20 units of this requirement may be satisfied through courses in reading and research.
5. A minimum of six courses for a letter grade from graduate colloquia and graduate seminars, of which three must be graduate seminars and of which at least four must be in the Department of English. Among these courses, students should take one in literary theory or criticism. These colloquia and seminars should be in different genres and periods as approved by the advisor.
6. An oral qualifying examination: see item 8 under requirements of the Ph.D. program in English Literature. For qualifications in the doctoral program in English and Comparative Literature, candidates are not held responsible for literature before 1350, but instead include on their reading list a selection of works from a foreign literature read in the original language.
7. *University Oral Examination*—A University oral examination covering the field of concentration (as defined by the student and the student's advisor). Students take 10 units of an Orals Preparation workshop led by the Director of Graduate Studies in Spring quarter of the second year. The oral examination, based on a reading list established by the candidate in consultation with his or her advisor, is taken ideally by the end of Autumn Quarter of the third year of graduate study, but no later than the end of the Winter Quarter.
8. *Dissertation*—As early as possible during graduate study, a Ph.D. candidate is expected to find a topic requiring extensive original research and to seek out a member of the department as his or her advisor. The advisor works with the student to select a committee to supervise the dissertation. Candidates should take this crucial step as early in their graduate careers as possible. The committee may well advise extra preparation within or outside the department, and time should be allowed for such work. After the dissertation topic has been approved, the candidate should file a formal reading committee form as prescribed by the University. Once a first chapter has been drafted, the student meets with the full reading committee for a one hour colloquium. The dissertation must be submitted to the advisor as a rough draft, but in substantially final form, at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree.
9. *Closing Colloquium*—Prior to the submission of the dissertation the student and the dissertation committee holds a closing colloquium designed to look forward toward the next steps; identify the major accomplishments of the dissertation and the major questions/issues/problems that remain; consider possibilities for revision, book or article publication, etc. and to provide some intellectual closure to the dissertation.

Language Requirements

Candidates for the Ph.D. degree (except those in English and Comparative Literature, for whom special language requirements prevail) must demonstrate a reading knowledge of two foreign languages. Candidates in the earlier periods must offer Latin and one of the following languages: French, German, Greek, Italian, or Spanish. In some instances, they may be required to offer a third language. Candidates in the later period (that is, after the Renaissance) must demonstrate a reading knowledge of two languages for which Stanford regularly administers a competency exam. In all cases, the choice of languages offered must have the approval of the candidate's advisor. Any substitution of another language must be approved by the Director of Graduate Studies.

The graduate studies committee does not accept courses taken as an undergraduate in satisfaction of the language requirement for doctoral candidates. For students coming to doctoral work at Stanford from graduate work done elsewhere, satisfaction of a foreign language requirement is determined by the Director of Graduate Studies based on the contact hours, syllabus, reading list, etc. Transfer is not automatic.

The candidate must satisfy one language requirement by the end of the first year (that is, before the qualifying examination), and the other by the end of the third year.

Foreign language requirements for the Ph.D. may be fulfilled in any of the following ways:

1. A reading examination given each quarter by the various language departments, except for Latin and Greek.
2. For Latin and Greek, an examination given by one of the Department of English faculty.
3. Passage with a grade of 'B' or higher of a course in literature numbered 100 or higher in a foreign language department at Stanford. As an alternative for Latin, French, Italian, German, and Spanish, passage of the following, respectively, with a grade of 'B' or higher:

		Units
FRENLANG 250	Reading French	4
GERLANG 250	Reading German	4
ITALLANG 250	Reading Italian	4
SPANLANG 250	Reading Spanish	3

Joint Degree Program with the School of Law (J.D./Ph.D.)

The Department of English and the School of Law offer a joint program leading to a J.D. degree combined with a Ph.D. in English.

This J.D./Ph.D. program is designed to provide an opportunity for students to develop a deep expertise combining study in English with law, providing strong preparation for academic positions in literature departments or law schools as well as outside of academia in the public humanities, law, arts administration, or public policy.

Admission to the J.D./Ph.D. Program

Students interested in the joint degree program must apply and gain entrance separately to the Law School's J.D. program and the Department of English's Ph.D. program. Students must also gain permission from both academic units to pursue the two degrees as part of a joint degree program. Interest in the joint degree program should be noted on the student's admission applications and may be considered by the admission committee of each program. Alternatively, an enrolled student in either the Law School or the English department may apply for admission to the other program and for joint degree status in both academic units.

Joint degree students may elect to begin their course of study in either the School of Law or the Department of English. Students are enrolled full-time in the Law School for the first year of that program, and may be required to be enrolled full-time in the Ph.D. program for one or more quarters, as determined by the English department. At all other times, enrollment may be in either academic unit, and students may choose courses from either program.

Degree Requirements

The Law School approves courses from English that may count toward the J.D. degree, and the English department approves Law School courses that may count toward the Ph.D. in English. Some courses may be approved broadly as countable toward both degrees for all students; other courses may be approved on a case-by-case basis, taking into consideration the particular student's fields of focus and other courses taken.

Faculty advisors from each academic unit participate in planning and supervising each student's joint program. Both units assign at least one faculty member to provide advice and supervision related to the joint degree program.

Students must complete 190 quarter units to complete both degrees. Up to 54 units of approved courses may be counted toward both degrees.

The two academic units have agreed to apply the same tuition agreement that operates for other established J.D./Ph.D. Namely, tuition is exclusive to the School of Law during the joint degree student's first year of the law program and is exclusive to the English department's Ph.D. program during all other quarters. Tuition rates within each academic unit for any given quarter match rates that apply to non-joint-degree students at similar stages of their studies in the unit.

For more information, see the Law School's Degrees and Joint Degrees (http://www.law.stanford.edu/program/degrees/) web site.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a “credit” or “no credit” grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a “credit” or “satisfactory” grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

The Department of English has not changed its policy concerning 'CR' (credit) or 'S' (satisfactory) grades in degree requirements requiring a letter grade for academic year 2020-21. The department will accept CR/NC classes towards the major for the 20-21 academic year.

Other Undergraduate Policies

If a student has difficulty completing an undergraduate degree requirement due to the COVID-19 pandemic, (e.g., a study abroad requirement, a laboratory research requirement), the student should consult with the Director of Undergraduate Studies to identify academic options to fulfill degree requirements. Creative Writing minors should consult with the Assistant Director.

Graduate Degree Requirements

Grading

As per the policy for the 2020-21 academic year, graduate students have the option of taking a course for a CR/NC or S/NC grading basis. Students may use any graduate-level course graded as CR/NC or S/NC toward the 70 graded units for the PhD program, provided that the grade equivalent in the course taken for CR/NC or S/NC is B+ or higher. This means that a student may receive credit for a course indicating that the letter grade equivalent for their work is a C- or higher, but only courses in which their work is assessed as a B+ or higher (regardless of whether they receive a grade of CR or S) can be counted towards the program requirements.

Graduate Advising Expectations

The Department of English is committed to providing academic advising in support of graduate student scholarly and professional development. When most effective, this advising relationship entails collaborative and sustained engagement by both the advisor and the advisee. As a best practice, advising expectations should be periodically discussed and reviewed to ensure mutual understanding. Both the advisor and the advisee are expected to maintain professionalism and integrity.

Faculty advisors guide students in key areas such as selecting courses, designing and conducting research, developing of teaching pedagogy, navigating policies and degree requirements, and exploring academic opportunities and professional pathways.

Graduate students are active contributors to the advising relationship, proactively seeking academic and professional guidance and taking responsibility for informing themselves of policies and degree requirements for their graduate program.

For a statement of University policy on graduate advising, see the "Graduate Advising (p. 80)" section of this bulletin.

Overseas Studies Courses in English

The Bing Overseas Studies Program (http://bosp.stanford.edu) (BOSP) manages Stanford international and domestic study away programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The BOSP course search site (https://undergrad.stanford.edu/programs/bosp/explore/search-courses/) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu) or Bing Overseas Studies (http://bosp.stanford.edu).

Due to COVID-19, all BOSP programs have been suspended for Autumn Quarter 2020-21. All courses and quarters of operation are subject to change.

		Units
OSPOXFRD 16	Creative Writing and Human Rights	5
OSPSANTG 44	Introduction to Borderlands Literature of the Americas	3-5

Courses

ENGLISH 1D. Dickens Book Club. 1 Unit.
Through the academic year, we will read one Dickens novel, one number a week for 19 weeks, as the Victorians would have done as they read the serialized novel over the course of 19 months. The group gets together once a week for an hour and a half to discuss each number, to look carefully at the pattern that the author is weaving, to guess, as the Victorians would have done, what might be coming next, and to investigate the Victorian world Dickens presents. We look carefully at themes, characters, metaphorical patterns, and scenes that form Dickens' literary world, and spend increasing time evaluating the critique that Dickens levels at Victorian life. The weekly gatherings are casual; the discussion is lively and pointed.

ENGLISH 1G. The Gothic: Transcultural, Multilingual, and Interdisciplinary Approaches to the Genre. 1 Unit.
Description: This course is a research platform for the interdisciplinary and cross-cultural study of the Gothic literary and cinematic genres. We consider the Gothic to have rich traditions whose contributions to Queer and LGBTQ+ studies, cultural theory, political economy, bio-ethics, and techno-science, remain under-explored. By looking at the world from the peripheralized standpoints of the ¿monstrous,¿ the abject, the dark, the uncanny, and the tumultuous, the Gothic offers unique though often overlooked critical insights into modern societies. Students enrolled in this course will participate in research activities and reading discussions oriented towards crafting interdisciplinary Gothic syllabi for the future and a cross-cultural Encyclopedia of the Gothic.

ENGLISH 2. Reading for Justice: A collaboration. 1 Unit.
The video-taped 8 minute and 46 second murder of George Floyd in May 2020, at the height of the Coronavirus pandemic shutdown in the U.S., lit a match on the tinderbox of racial injustice. The callousness with which the murder was carried out, the calm refusal of the policeman kneeling on Floyd¿s neck to heed the horrified objections of witnesses at the scene, and an in-the-bones familiarity for too many of us across the country regarding disproportionate police violence against people of color was finally too much to bear. Only the last in a long list of maiming and murders by state authorities of men, women, and children from racialized communities (African American, Latinx, and Native) across the country, Floyd¿s murder precipitated an anguished outcry for justice by feeling people of all races across the world. Floyd was not the first, and unfortunately he is not the last, to be so abused. The difference now is that many more of us understand that we have to stand up and demand an end to the injustice.nAmid calls to urgent action in support of racial and gender justice, this reading group/course considers literatures in English specifically through the lens of Reading and Teaching for Justice. The goal of this course is to train readers to attend to the perspectives of those whose lives are often denied, dismissed, disregarded, even as we attend to how and why works of literature that exclude such voices who hail from a variety of equity-seeking groups, both within and without the literary texts selected. Reading for Justice requests that as readers we engage deeply with what justice means for us today, and also what it has meant historically.

ENGLISH 5A. WISE: Unfinished Novels. 5 Units.
Few species of writing are more exquisitely uncomfortable than a novel that is not (and never will be) finished. An author dies, or loses interest, or flouts convention: whatever the cause, unfinished novels demand an especially dynamic relationship between reader and text, precipitating either wild flights of imagination or scrupulous detective work, if not both at once. In the nineteenth century, a period obsessed with all things comprehensive and complete, such fragmentariness would have appeared still more challenging, even subversive. Closely reading works by Jane Austen, Edgar Allan Poe, and Charles Dickens, along with select critical interpretations, this course will invite participants to ask: what do unfinished novels reveal to us that finished ones cannot? What peculiar insights do they give us into the processes and pressures of literary production? And what exactly is our role in consuming them?nNote: This Writing-Intensive Seminar in English (WISE) course fulfills WIM for English majors. Non-majors are welcome, space permitting. Enrollment is by permission (contact vbeebe@stanford.edu). For more information go to https://english.stanford.edu/writing-intensive-seminars-english-wise.

ENGLISH 5B. WISE: Mental Health and Literature, Mid-century to Present. 5 Units.
Is there something wrong with us, or with our world? Rising rates of clinical depression and other conditions have rendered mental health a pressing cultural concern, especially for young adults, leading institutions of higher education to expand resources to support student needs. But we have not always thought about mental health the ways we do today. In this course we read landmark literary texts from midcentury to present that both reflect and shape cultural constructions of mental health. From Toni Morrison's The Bluest Eye (1970) to Elizabeth Wurtzel's Prozac Nation (1994)to Ottessa Moshfegh's My Year of Rest and Relaxation (2018), we examine how literature destabilizes would-be binaries between mental health and mental illness. How do intersectional identity factors such as gender, race, and class inform whose mental illness is deemed deserving of treatment and whose is instead criminalized? Honing our critical writing skills by learning to employ the tools of cultural criticism, feminist theory, and critical race studies, we also engage selections from Doris Lessing, Anne Sexton, Sylvia Plath, Ralph Ellison, Richard Wright, Esmé Weijun Wang, and others. Traversing short stories, essays, drama, poetry, memoir, and novels, this timely multi-genre course equips us to historically contextualize and meaningfully respond to the current mental health crisis.nNote: This Writing-Intensive Seminar in English (WISE) course fulfills WIM for English majors. Non-majors are welcome, space permitting. Enrollment is by permission (contact vbeebe@stanford.edu). For more information go to https://english.stanford.edu/writing-intensive-seminars-english-wise.

ENGLISH 5C. WISE: Revelation and Apocalypse: Literature at the End of the World 1300-2000. 5 Units.
Apocalyptic thinking never goes out of fashion, nor does literature that deals with the end times. This course explores two major categories of apocalyptic thinking-- largely defined by religious and medical discourses--and the connection between the two. From Revelation, the last book of the New Testament, to early modern reckonings inspired by fire and plague, to Romantic-era sci-fi by Mary Shelley, to Station Eleven, a 2014 novel which takes place after an apocalyptic flu pandemic, we will read both millenarians and millennials, considering different visions of the end of the world, and what may come after. We'll also ask, what are the stakes--what historical concerns and cultural obsessions are revealed, after all--in these varied prophetic imaginings?nNote: This Writing-Intensive Seminar in English (WISE) course fulfills WIM for English majors. Non-majors are welcome, space permitting. Enrollment is by permission (contact vbeebe@stanford.edu). For more information go to https://english.stanford.edu/writing-intensive-seminars-english-wise.

ENGLISH 5D. WISE: Bad Reading: Pleasure and Politics in Literary Value. 5 Units.
As students of literature, we aspire to be good readers of the texts we encounter. But to see ourselves as good readers is implicitly(perhaps even complicitly)to set ourselves against another form of literary consumption: bad reading, and, by association, bad readers. Yet what makes reading "bad" or "good"? And who decides? The more we look, the less self-evident or definitive the distinction becomes,our footing precipitously dropping away into questions about our own reading practices and how society values them. The precarious label "bad reading" comes into even sharper relief when we consider that the term has long been associated not just with certain modes of reading, but also with certain classes of readers and certain kinds of books, from gory gothic thrillers and racy romances to sci-fi and comics. In this course, we will trace the definitions and stakes of bad reading from the nineteenth century to the present day, through sources ranging from Jane Austen and Virginia Woolf to contemporary think-pieces on young adult literature and race in publishing. Along the way, we will aim both to discover whether bad reading is really so bad after all, and to understand how ideologies of gender, class, and race have shaped our conceptions of literary value.nNote: This Writing-Intensive Seminar in English (WISE) course fulfills WIM for English majors. Non-majors are welcome, space permitting. Enrollment is by permission (contact vbeebe@stanford.edu). For more information go to https://english.stanford.edu/writing-intensive-seminars-english-wise.

ENGLISH 5E. WISE: The Novel of Love. 5 Units.
How do love plots change over time? In this seminar, we will learn to think critically about idealized romantic fantasy as we explore the "novel of love" from its 18th century origins through the 20th century, and into the present, focusing on case study texts by Elizabeth Inchbald, E.M. Forster, and James Baldwin. We will begin by learning about the cultural and socioeconomic conditions associated with the rise of the novel in modern Europe. We will then think about how issues of class, race, gender, sexuality, and mobility transform representations of `love¿ across centuries and continents. Students will also be invited to apply their discoveries to contemporary love stories, including digital and audiovisual forms. Sociological and historical accounts will supplement the literary readings. Writing assignments are structured to build cumulatively towards the final paper, following collaborative rounds of revision and presentation. Developing critical self-awareness through engagement with various critical models, students will be encouraged to experiment with the traditional form of the academic essay.nNote: This Writing-Intensive Seminar in English (WISE) course fulfills WIM for English majors. Non-majors are welcome, space permitting. Enrollment is by permission (contact vbeebe@stanford.edu). For more information go to https://english.stanford.edu/writing-intensive-seminars-english-wise.

ENGLISH 5F. WISE: Serial Children's Literature: Lemony Snicket's A Series of Unfortunate Events. 5 Units.
In this course we will look at Lemony Snicket's A Series of Unfortunate Events as a multi-genre block-busting phenomenon in its own right and as a case study in seriality and children's literature. Reading books 1-13 alongside research on literary markets and adolescent development we'll ask: How do we write about literature that exists simultaneously at the scale of a single novel and a series? What literary and socialpsychological theories help us make meaning of these texts? What audiences, and what needs within those audiences, did the series speak to in its cultural moment? What methods are appropriate for answering what questions? As we explore the world of best-sellers and book deals alongside questions of "appropriateness" and popularity we will engage various methodological angles, including literary critical, digital humanities, and sociological approaches. (No previous experience in sociology or digital humanities is required.) Final research projects may be produced on any text or texts related to course themes.nNote: This Writing-Intensive Seminar in English (WISE) course fulfills WIM for English majors. Non-majors are welcome, space permitting. Enrollment is by permission (contact vbeebe@stanford.edu). For more information go to https://english.stanford.edu/writing-intensive-seminars-english-wise.

ENGLISH 5G. WISE: Blackness and the American Canon. 5 Units.
The Black feminist novelist Toni Morrison once wrote that ¿it only seems that the canon of American literature is `naturally' or `inevitably' `white.' In fact it is studiously so. The impact of this revelation may feel alien to many students of literature today, for whom 'the canon' is little more than a euphemism for the 'Dead White Men' preserved in it, but for Morrison and the generation of intellectuals she belonged to, that recognition was the great cultural struggle of their era. This struggle, now remembered as the 'Canon Wars,' upset every convention of traditional literary scholarship, and set the terms for literary critical practice to this day. This course introduces students to key methods and stakes in 21st century literary research (to be practiced in their own development of a research project) through the Canon Wars and their legacies. Standing loosely in for `canon,' `war,' and `legacy,' we will read three novels together: Edgar Allan Poe's Narrative of Arthur Gordon Pym of Nantucket, Toni Morrison's The Bluest Eye, and Mat Johnson's Pym. Through these novels, students will practice literary criticism and learn about its history, focusing on how the debates of the late 20th century created a framework for centering Blackness in the study of American culture, and cleared space for the emergent field of African American/Black Studies.nNote: This Writing-Intensive Seminar in English (WISE) course fulfills WIM for English majors. Non-majors are welcome, space permitting. Enrollment is by permission (contact vbeebe@stanford.edu). For more information go to https://english.stanford.edu/writing-intensive-seminars-english-wise.

ENGLISH 5H. WISE: Dialogue in American Literature. 5 Units.
What would literature be without conversations between characters? Dialogue is what brings fiction to life. In the words of literary critic Mikhail Bakhtin, 'the speaking person' is what 'makes a novel a novel.' In this course, we explore the crucial role dialogue plays in literature, treating every sentence of narrative fiction as a choice between characters, speech and some other mode of representation. We will pay close attention to both how fiction represents speaking persons and how dialogue interacts with the novel's other discourses. What can the dialogue scene as a formal unit tell us about narrative structure? How does dialogue shape plot? How does it animate character? Who gets to speak for themselves and which voices are passed over or suppressed? To explore these questions of form and politics, we'll read select works of fiction (by authors including Herman Melville, Zora Neale Hurston, and Margaret Millar) in conversation with major works of narrative theory.nNote: This Writing-Intensive Seminar in English (WISE) course fulfills WIM for English majors. Non-majors are welcome, space permitting. Enrollment is by permission (contact vbeebe@stanford.edu). For more information go to https://english.stanford.edu/writing-intensive-seminars-english-wise.

ENGLISH 9CA. American Road Trip. 3 Units.
From Whitman to Kerouac, Alec Soth to Georgia O'Keeffe, the lure of travel has inspired many American artists to pack up their bags and hit the open road. In this Creative Expressions course we will be exploring the art and literature of the great American road trip, including prose, poetry, films, and photography. We will be reading and writing in a variety of genres, workshopping our own stories, and considering the ways in which our personal journeys have come to inform and define our lives. The course includes a number of campus-wide field trips, and an end-of-quarter road trip down the California coast. NOTE: Students must attend the first class meeting to retain their roster spot.

ENGLISH 9CE. Creative Expression in Writing. 3 Units.
Primary focus on giving students a skill set to tap into their own creativity. Opportunities for students to explore their creative strengths, develop a vocabulary with which to discuss their own creativity, and experiment with the craft and adventure of their own writing. Students will come out of the course strengthened in their ability to identify and pursue their own creative interests. For undergrads only. NOTE: For undergraduates only. Students must attend the first class meeting to retain their roster spot.

ENGLISH 9CF. Poetry Into Film. 3 Units.
This course focuses on the intersection between film and poetry. Students will complete three short films based on both published and student-authored poems. From concept to final cut, students will script, storyboard, soundtrack, and visually design each production before filming, editing, and screening their films for class. As such, the course will serve as an introduction to both poetry and digital filmmaking.nNOTE: Students must attend the first class meeting to retain their roster spot.

ENGLISH 9CI. Inspired By Science: A Writing Workshop. 3 Units.
How can your interest in science and the environment be enriched by a regular creative practice? How do you begin to write a poem or essay about the wonders of the natural world or the nuances of climate change? What are the tools and strategies available to creative writers, and how can these techniques be used to communicate complex concepts and research to wide-audiences? We begin to answer these questions by drawing inspiration from the rich tradition of scientists who write and writers who integrate science. Emphasizing writing process over finished product, students maintain journals throughout the quarter, responding to daily prompts that encourage both practice and play. Through open-ended and exploratory writing, along with specific exercises to learn the writer¿s craft students develop a sense of their own style and voice. Note: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 9CP. Poetry Off the Page. 3 Units.
With recent blockbuster films like Patterson and major prizes being awarded to artists like Bob Dylan and Kendrick Lamar, the borders of what constitutes traditional literature are shifting. In this Creative Writing course we will be looking at literature `off the page,¿ in songwriting, spoken word, multi-media, and visual art. We will be workshopping our own creative projects and exploring the boundaries of contemporary literature. Artists we¿ll be looking at include Iron and Wine, Lil Wayne, Allen Ginsberg, Beyonce, David Lynch, Patti Smith, Mark Strand, Anne Carson, Danez Smith, Bon Iver, and Lou Reed.nNOTE: Students must attend the first class meeting to retain their roster spot.

ENGLISH 9CT. Special Topics in Creative Expression. 3 Units.
Focus on a particular topic or process of creative expression. Primary focus on giving students a skill set to tap into their own creativity. Opportunities for students to explore their creative strengths, develop a vocabulary with which to discuss their own creativity, and experiment with the craft and adventure of their own writing. Students will come out of the course strengthened in their ability to identify and pursue their own creative interests. NOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot. May repeat for credit.

ENGLISH 9CV. Creative Expression in Writing. 3 Units.
Online workshop whose primary focus is to give students a skill set to tap into their own creativity. Opportunities for students to explore their creative strengths, develop a vocabulary with which to discuss their own creativity, and experiment with the craft and adventure of their own writing. Students will come out of the course strengthened in their ability to identify and pursue their own creative interests. For undergrads only.

ENGLISH 9CW. Writing and World Literature. 3 Units.
This course is an introduction to reading and writing short fiction and poetry. For inspiration and imitation, students will read models drawn from a diverse body of global literature. In a supportive, discussion-based environment, students will develop their own creativity and experiment with the craft and adventure of their own writing. Students will come out of the course strengthened in their ability to identify and pursue their own creative interests.nNOTE: Students must attend the first class meeting to retain their roster spot.

ENGLISH 9R. Humanities Research Intensive. 2 Units.
Everyone knows that scientists do research, but how do you do research in the humanities? This five-day course, taught over spring break, will introduce you to the excitement of humanities research, while preparing you to develop an independent summer project or to work as a research assistant for a Stanford professor. Through hands-on experience with archival materials in Special Collections and the East Asia Library, you will learn how to formulate a solid research question; how to gather the evidence that will help you to answer that question; how to write up research results; how to critique the research of your fellow students; how to deliver your results in a public setting; and how to write an effective grant proposal. Students who complete this course become Humanities Research Intensive Fellows and receive post-program mentorship during spring quarter, ongoing opportunities to engage with faculty and advanced undergraduates, and eligibility to apply for additional funding to support follow-up research. Freshmen and sophomores only. All majors and undeclared students welcome. No prior research experience necessary. Enrollment limited: apply by 11/4/19 at hri-fellows.stanford.edu.
Same as: CLASSICS 9R, EALC 9R, HISTORY 9R

ENGLISH 9SF. Fight the Future: Speculative Fiction and Social Justice. 3 Units.
Imagining the future has been one of the most important ways humans have assessed their present. In this salon-style seminar we'll focus on modern speculative fiction as social critique, especially of regimes of patriarchy, racism, and capitalism. The first three weeks will be devoted to the work of Margaret Atwood, who will visit the class. The remaining seven weeks will explore other speculative fiction, broadly defined and across era and geography, that also engages with oppression and freedom, sex, love, and other dynamics of power. Guest lecturers will discuss the work of authors such as Octavia Butler, Samuel R. Delany, Franz Kafka, Philip K. Dick, Ursula LeGuin, and others.

ENGLISH 10A. Introduction to English I: Mapping Monsters in British Literature, 650-1650. 5 Units.
Werewolves, dragons, cannibals, witches, sea monsters, faeries, moral monstrosity, madness, the uncanny and the grotesque the monstrous is frightening, fury-filled, unknowable, and seductive. Monsters inhabit the literary imagination and the historic landscape. Monsters live on the margins of society; they are culturally and ideologically fraught; they exhibit sexual, racial, religious, and physical difference. In this course, we shall examine the depiction and meaning of the monster in literature, manuscript images, and maps from England and Wales from about 650CE to 1650CE.

ENGLISH 10B. Introduction to English I: What Is Literary History?. 5 Units.
From the 14th to the 17th centuries, how are literary developments involved with historical events and social conditions? Discussion of how literature works as a force in culture, not only a reflection of other forces. Chaucer¿s General Prologue and Knight¿s Tale; Sir Gawain and the Green Knight; More, Utopia; Wyatt, Sidney, poems; Spenser, The Faerie Queene, Book Two; Shakespeare, King Lear; Donne, Songs and Sonets and Holy Sonnets; Cavendish, Blazing World.

ENGLISH 10D. Introduction to English I: Women, Gender, and Sexuality in Early British Literature. 5 Units.
How were gender and sexuality constructed and depicted a thousand years ago? How was illicit love depicted? How can women¿s silenced voices be heard? In this course, we¿ll examine British poetry, prose, and performance from c.600 to 1600 that challenge preconceptions about early people and culture, literary form and function. The readings will show how issues of voice, positionality, and identity are both fluid and surprising in the pre-modern era. We¿ll study texts written by and about women; texts that center transitional gender and non-binary sexualities; and texts that highlight the tension created by self and society, between being-in-the-world and conventional norms.nnAmong the works we¿ll study (in translation) are Old English and Welsh women¿s lyrics, saints¿ lives, guides for confined religious life, romance in French and Middle English, Chaucer¿s Canterbury Tales, sixteenth-century women¿s poetry and letters, and Renaissance drama.

ENGLISH 11A. Introduction to English II: From Milton to the Romantics. 3-5 Units.
English majors must take class for 5 units. Major moments in English literary history, from John Milton's 'Paradise Lost' to John Keats's 'Hyperion'. The trajectory involves a variety of literary forms, including Augustan satire, the illuminated poetry of William Blake's handcrafted books, the historical novel invented by Sir Walter Scott, the society novel of Jane Austen, and William Wordsworth's epic of psychological and artistic development. Literary texts will be studied in the context of important cultural influences, among them civil war, religious dissent, revolution, commercialization, colonialism, and industrialization.

ENGLISH 11B. Introduction to English II: American Literature and Culture to 1855. 5 Units.
(Formerly English 23/123). A survey of early American writings, including sermons, poetry, captivity and slave narratives, essays, autobiography, and fiction, from the colonial era to the eve of the Civil War.
Same as: AMSTUD 150

ENGLISH 11C. Introduction to English II: Revolutionary Energies: Milton and the Transcendentalists. 5 Units.
This course will study four literary masterpieces in depth: John Milton's Paradise Lost (1667; 1674); Book 4 of Jonathan Swift's Gulliver's Travels (1726); Jane Austen's Persuasion (1817); and Herman Melville's Moby Dick (1851). All of these works are complex and will repay close study. But they also work their way into an ongoing literary conversation in the western world and in that sense serve as touchstones for later writers. We will consider each work not only for its own aesthetic accomplishment but also in sometimes passionate debate with its author's historical circumstances.

ENGLISH 11Q. Art in the Metropolis. 3 Units.
This seminar is offered in conjunction with the annual "Arts Immersion" trip to New York that takes place over the spring break and is organized by the Stanford Arts Institute (SAI). Participation in the trip is a requirement for taking part in the seminar (and vice versa). The trip is designed to provide a group of students with the opportunity to immerse themselves in the cultural life of New York City guided by faculty and SAI staff. Students will experience a broad range and variety of art forms (visual arts, theater, opera, dance, etc.) and will meet with prominent arts administrators and practitioners, some of whom are Stanford alumni. For further details and updates about the trip, see https://arts.stanford.edu/for-students/academics/arts-immersion/new-york/.
Same as: ARTSINST 11Q, MUSIC 11Q, TAPS 11Q

ENGLISH 12A. Introduction to English III: Introduction to African American Literature. 3-5 Units.
In his bold study, What Was African American Literature?, Kenneth Warren defines African American literature as a late nineteenth- to mid-twentieth-century response to the nation's Jim Crow segregated order. But in the aftermath of the Jim Crow era and the Civil Rights movement, can critics still speak, coherently, of "African American literature"? And how does this political conception of African American literary production compare with accounts grounded in black language and culture? Taking up Warren's intervention, this course will explore African American literature from its earliest manifestations in the spirituals and slave narratives to texts composed at the height of desegregation and decolonization struggles at mid-century and beyond. English majors must take this class for 5 units.
Same as: AFRICAAM 43, AMSTUD 12A

ENGLISH 12B. Introduction to English III: Literature and the Crises of Humanism. 5 Units.
Traces the development of British and American literature from 1850 to present in relation to nineteenth and twentieth-century crises of humanism. Starting with the realist novel, we will explore how poetry and fiction challenged and reinforced the exclusion of certain classes of people from full humanity. We will see how modernist writers demolished humanist norms of character and plot, and weigh literature¿s responses to the inhumanities of WWII and totalitarianism. Finally, we will encounter critiques of the humanist legacy from postcolonial and ethnic writers, and from posthuman speculative fiction. Concludes with a discussion of humanism and the ¿humanities¿ today.

ENGLISH 12C. Introduction to English III: Modern Literature. 5 Units.
Survey of the major trends in literary history from 1850 to the present.

ENGLISH 13Q. Imaginative Realms. 3 Units.
This class looks at the tradition of the imagined universe in fiction and poetry. Special topics include magical realism, artificial intelligence, and dystopias. Primary focus on giving students a skill set to tap into their own creativity. Opportunities for students to explore their creative strengths, develop a vocabulary with which to discuss their own creativity, and experiment with the craft and adventure of their own writing. For undergrads only.

ENGLISH 14Q. It's the Freakiest Show: David Bowie's Intertextual Imagination. 4 Units.
David Bowie's career began in the early 60s with a mix of folk, rock, and psychedelia; he then helped define an era with his performance of a gender bending, glam rock alien prior to engaging with German expressionism and minimalist electronic music; in the `80s, he brought a generation to the dance floor with chart topping hits before turning to drum `n bass and industrial music for inspiration; he finished his life as an enigmatic but engaged artist releasing poignant albums until his death. Through these many transitions, Bowie had a constant ¿ he was a voracious reader ¿ a practice that informed his work throughout his life.n nIn this class students will explore the place of literature in the work of musician, actor, and visual artist David Bowie. They will consider how Bowie's work embodies, questions, critiques, and engages with ¿the literary.¿ This course will focus on the relationship between Bowie's artistic output and work by other artists, both canonical and Avant Garde such as Andy Warhol, Iggy Pop, W.B. Yeats, T.S. Elliot, and William Burroughs. It will involve close readings of song lyrics and comparative reading of albums with literary forms such as the novel, poetry, and critical essay. We will also consider how Bowie's music was fueled by and in turn inspires new relationships between music, literature, cinema, and theater.n nThroughout, students will engage with and apply theories of writing, reading, and authorship and will explore questions of time, place, style, gender, and mortality. In addition to written analytical work, students will produce their own creative projects (poem, short story, song, album cover, etc.) in relation to something they find interesting or inspiring in Bowie¿s ouvre. Students will compose in varied modes (speaking, writing, video), in varied situations, and for varied audiences. Doing so, will enable students to explore the interplay between written, oral, and visual forms of communication, learn skills and strategies of oral delivery, and craft messages for both academic and public audiences.

ENGLISH 15Q. Family Trees: The Intergenerational Novel. 3 Units.
The vast majority of novels feature a central protagonist, or a cast of characters whose interactions play out over weeks or months. But some stories overflow our life spans, and cannot be truthfully told without the novelist reaching far back in time. In this Sophomore Seminar, we will consider three novels that seek to tell larger, more ambitious stories that span decades and continents. In the process, we will discuss how novelists build believable worlds, craft memorable characters, keep us engaged as readers, and manage such ambitious projects.

ENGLISH 16Q. Family Stories. 3 Units.
This creative writing workshop will explore the idea of family. We¿ll begin with our questions: How do we conceptualize the word family? How do family histories, stories, mythologies, and languages shape our narratives? What does family have to do with the construction of a self? How can we investigate the self and all of its many contexts in writing? We¿ll consider how we might work from our questions in order to craft work that is meaningful and revealing. Students will have the opportunity to write in both poetry and prose, as well as to develop their own creative cross-genre projects. Along the way, we¿ll discuss elements of craft essential to strong writing: how to turn the self into a speaker; how create the world of a piece through image, detail, and metaphor; how to craft beautiful sentences and lines; how to find a form; and many other topics.

ENGLISH 17N. Animal Poems. 3-5 Units.
Animals have always appealed to the human imagination. This course provides basic a rubric for analyzing a variety of animal poems in order (1) to make you better readers of poetry and (2) to examine some of the most pressing philosophical questions that have been raised in the growing field of animal studies. The animals that concern us here are not allegorical¿the serpent as evil, the fox as cunning, the dove as a figure for love. Rather, they are creatures that, in their stubborn animality, provoke the imagination of the poet.

ENGLISH 17Q. Political Poetry. 3 Units.
This workshop is devoted to reading and creating politically engaged poetry. Students will look closely at the intersection between activism, identity, and form, focusing on 20th and 21st century poets responding to their sociohistorical moment.

ENGLISH 18Q. Writer's Salon. 3 Units.
This course explores from a writer's perspective what it takes to craft a successful novel, short story collection, or book of poetry. You will read three prize-winning books from Bay Area authors, including Creative Writing instructors here at Stanford. Each author will visit our class to talk about their work and the writing process. From week to week, you will complete short writing exercises culminating in a longer story or series of poems that you share with class. For undergrads only.

ENGLISH 19Q. I Bet You Think You're Funny: Humor Writing Workshop. 3 Units.
Nothing is harder than being funny on purpose. We often associate humor with lightness, and sometimes that's appropriate, but humor is inextricably interlinked with pain and anger, and our funniest moments often spring from our deepest wounds. Humor can also allow us a platform for rage and indignation when other forms of rhetoric feel inadequate. This workshop will take students through the techniques and aesthetics of humor writing, in a variety of forms, and the main product of the quarter will be to submit for workshop a sustained piece of humor writing. For undergrads only.

ENGLISH 21Q. Write Like a Poet: From Tradition to Innovation. 3 Units.
In this poetry workshop, we will spend the first half of the quarter reading and writing in traditional forms and the second half innovating from those forms. When discussing poetry, what do we mean when we talk about craft? What is prosody and why is it important? What are the relationships between form and content? What does a modern sonnet look like? We will consider how a writer might honor a tradition without being confined by it. The culmination of the course will be a project in which the student invents (and writes in) a form of their own. All interested students are welcome¿beginners and experts alike.

ENGLISH 22Q. Writing Mystical, Spiritual, and Altered Experiences. 3 Units.
Because mystical, spiritual, and altered states of experience have always been a part of human life, we've always been trying to write about them. While some try to claim these subjects are frivolous, dated, or even dangerous, writers keep coming back to them, including some of the best writers of our time. Lucky for us, the results have been exhilarating. In this class, we'll look at a range of writers and forms to understand how these ancient subjects are handled in the contemporary context, including works by journalists Michael Pollan and Jia Tolentino, Scientists Robin Wall Kimmerer and Oliver Sacks, fiction writers Denis Johnson and Hillary Mantel, and poets Max Ritvo and Christopher Wiman. Most importantly, we'll write our own pieces of questioning, exploration, and awe.

ENGLISH 23Q. First Chapters: Please Allow Me to Introduce My Novel. 3 Units.
In this course we¿ll explore how an effective first chapter immerses us in the voice of the narrator, introduces a series of themes and problems, indicates character desires and fears, and most importantly enchants and inspires its readers. We¿ll write short reaction papers and hold discussions in small and large groups. In the second half of the quarter, students will compose their own first novel chapter of around 8-12 pages, and we¿ll workshop them in class. The final goal is to have a revised first chapter, a short outline for the rest of a book, and an increased knowledge of writing original and irresistible opening chapters.

ENGLISH 24Q. Leaving Patriarchy: A Course for All Genders. 3 Units.
This is a creative writing course for writers of all genders who are interested in thinking about patriarchy and how to resist it. Our course will aim to complicate the idea that men benefit from patriarchy and are its primary enforcers, while the rest of us are simply suffering under it. We'll ask ourselves how patriarchy is bad for ALL of us, and how ALL of us are implicated in its perpetuation. Do we ALL have the reasons and the resources to leave patriarchy--and can we start to leave it right now? We'll read works of scholarship and literature that investigate patriarchy as a human relational problem. We'll write fiction and nonfiction in which we explore the ways patriarchy has shaped us, challenge ourselves to resist its manifestations in our relationships, envision a future without patriarchy, and begin to live that future right now. Most crucially, we will practice creating a space in which all of us can speak without fear of judgment about our experiences of a fraught topic.

ENGLISH 30N. Character. 3 Units.
"I have a dream..." How do loose bits of textual material transform into literary characters of heft and substance? Before reflecting on the "rounded" characters associated with novels and more recent genres of writing, this class will survey a handful of ancient, medieval, and early modern texts to consider alternative models of the literary subject. We will have occasion to consider texts that primarily deploy characters as embodiments of concepts or ideals, and will think critically, too, of historical movements that have formed our taste for literary figures of flesh and blood. A focus on the implied people of texts requires a reckoning with social categories and ethical distinctions more generally. We will thus read throughout with an eye toward the literary and sociopolitical structures that make it possible to perpetuate--if not to realize--the fantasy of knowing others "by the content of their character.".

ENGLISH 31N. Love and Death. 3 Units.
How do we put into words the ineffeable emotions generated by love and grief? How have writers, across centuries and many different literary traditions, sung the praises of a beloved, or lamented the ache of loss? In this hybrid literature and creative writing course, we will alternate between the close-reading of model texts, and generating original poetry and prose written under the influence of literary heroes.

ENGLISH 33N. A Way of Life: Historic Journeys to Sacred Place. 3 Units.
In a world of touchscreens and instant knowledge, going on a journey for the good of the soul might seem weird. But pilgrimage has witnessed a huge resurgence. Why? We'll study the global pilgrimage through its long history, constructing tour guides and maps for visiting the world's most sacred places. From Italy to Japan to India to Saudi Arabia and Britain, these often-spectacular routes inspire and test travelers. What motivates these journeys? What happens once we get there?.

ENGLISH 40N. Theatrical Wonders from Shakespeare to Mozart. 3 Units.
What is the secret of theatrical illusion? How does the theater move us to wonder, sympathetic identification, and reflection? How can the theater help society understand and manage social conflict and historical change? We will ask these questions through a close examination--on the page and on the stage--of dramatic masterpieces by Shakespeare and Mozart. We will attend live performances of Gounod¿s opera Romeo and Juliet and of Mozart¿s opera The Marriage of Figaro. No prior knowledge of music or foreign languages is required; neither is prior experience in theatricals.

ENGLISH 41N. Family Drama: American Plays about Families. 3 Units.
Focus on great dramas about family life (Albee, Kushner, Shephard, Vogel, Kron, Nottage, Parks). Communication in writing and speaking about conflict central to learning in this class.
Same as: AMSTUD 41N, TAPS 40N

ENGLISH 50. HUMANITIES HOUSE WORKSHOP. 1 Unit.
For student-run workshops and research seminars in Ng House / Humanities House. Open to both residents and non-residents. May be repeated for credit. This course code covers several discrete workshops each quarter; sign up for a particular workshop via the Google Form at https://goo.gl/forms/TRU0AogJP3IHyUmr2.

ENGLISH 50A. Character Development: Writing a Script, Creating Engaging Characters. 1 Unit.
Seminar with Writer in Residence John Markus (BA English '78); meets for seven sessions over three weeks in February. Students will work one on one and in small groups with this professional writer and Stanford alum. John has written everything from stand-up to critically-acclaimed network and cable television shows to independent films to, most recently, theatrical plays. This seminar is designed for students who would like to produce a piece of work in three weeks and/or to pursue a writing profession.

ENGLISH 50B. A Humanist's Guide to Art, Community, Design, and the Earth. 1 Unit.
This short, intensive seminar features Humanities Scholar & Artist in Residence Clare Whistler (visiting from England April 15-30) will meet for dialogue, workshop, creation, and improvisation. This workshop will help students to think through methods of humanistic inquiry as ways of integrating meaning and purpose into their lives; it will focus on projects, research, collaborations, walking explorations, and relationships. This course will be of interest to students who would like to maintain humanistic values, make a decent living, find good mentors and collaborators, and create communities that are attentive to their constructed and natural environments. This year's course will center on personal assignments and will focus in particular on the theme of gardens.nnThe course will meet M/W 5-7 PM with optional Friday studio time. The first meeting is Monday, April 15.

ENGLISH 50Q. Life and Death of Words. 4 Units.
In this course, we explore the world of words: their creation, evolution, borrowing, change, and death. Words are the key to understanding the culture and ideas of a people, and by tracing the biographies of words we are able to discern how the world was, is, and might be perceived and described. We trace how words are formed, and how they change in pronunciation, spelling, meaning, and usage over time. How does a word get into the dictionary? What do words reveal about status, class, region, and race? How is the language of men and women critiqued differently within our society? How does slang evolve? How do languages become endangered or die, and what is lost when they do? We will visit the Facebook Content Strategy Team and learn more about the role words play in shaping our online experiences. Together, the class will collect Stanford language and redesign the digital dictionary of the future. Trigger Warning: Some of the subject matter of this course is sensitive and may cause offense. Please consider this prior to enrolling in the course.
Same as: CSRE 50Q, FEMGEN 50Q, NATIVEAM 50Q

ENGLISH 52N. Mixed-Race Politics and Culture. 3 Units.
Today, almost one-third of Americans identify with a racial/ethnic minority group, and more than 9 million Americans identify with multiple races. What are the implications of such diversity for American politics and culture? In this course, we approach issues of race from an interdisciplinary perspective, employing research in the social sciences and humanities to assess how race shapes perceptions of identity as well as political behavior in 21st century U.S. We will examine issues surrounding the role of multiculturalism, immigration, acculturation, racial representation and racial prejudice in American society. Topics we will explore include the political and social formation of "race"; racial representation in the media, arts, and popular culture; the rise and decline of the "one-drop rule" and its effect on political and cultural attachments; the politicization of Census categories and the rise of the Multiracial Movement.
Same as: AFRICAAM 52N

ENGLISH 54N. Visible Bodies: Black Female Authors and the Politics of Publishing in Africa. 4 Units.
Where are the African female writers of the twentieth century and the present day? This Introductory Seminar addresses the critical problem of the marginalization of black female authors within established canons of modern African literature. We will explore, analyse and interrogate the reasons why, and the ways in which, women-authored bodies of work from this period continue to be lost, misplaced, forgotten, and ignored by a male-dominated and largely European/white publishing industry in the context of colonialism, apartheid and globalization. nnYou will be introduced to key twentieth-century and more contemporary female authors from Africa, some of them published but many more unpublished or out-of-print. The class will look at the challenges these female authors faced in publishing, including how they navigated a hostile publishing industry and a lack of funding and intellectual support for black writers, especially female writers. nnWe will also examine the strategies these writers used to mitigate their apparent marginality, including looking at how women self-published, how they used newspapers as publication venues, how they have increasingly turned to digital platforms, and how many sought international publishing networks outside of the African continent. As one of the primary assessments for the seminar, you will be asked to conceptualize and design an in-depth and imaginative pitch for a new publishing platform that specializes in African female authors. nnYou will also have the opportunity for in-depth engagement (both in class and in one-on-one mentor sessions) with a range of leading pioneers in the field of publishing and literature in Africa. Figures like Ainehi Edoro (founder of Brittle Paper) and Zukiswa Wanner (prize-winning author of The Madams and Men of the South), amongst others, will be guests to our Zoom classroom. One of our industry specialists will meet with you to offer detailed feedback on your proposal for your imagined publishing platform. nnYou can expect a roughly 50/50 division between synchronous and asynchronous learning, as well as plenty of opportunity to collaborate with peers in smaller settings.
Same as: AFRICAAM 140N, AFRICAST 51N, HISTORY 41N

ENGLISH 71. Dangerous Ideas. 1 Unit.
Ideas matter. Concepts such as revolution, tradition, and hell have inspired social movements, shaped political systems, and dramatically influenced the lives of individuals. Others, like immigration, universal basic income, and youth play an important role in contemporary debates in the United States. All of these ideas are contested, and they have a real power to change lives, for better and for worse. In this one-unit class we will examine these "dangerous" ideas. Each week, a faculty member from a different department in the humanities and arts will explore a concept that has shaped human experience across time and space. Some weeks will have short reading assignments, but you are not required to purchase any materials.
Same as: ARTHIST 36, COMPLIT 36A, EALC 36, ETHICSOC 36X, FRENCH 36, HISTORY 3D, MUSIC 36H, PHIL 36, POLISCI 70, RELIGST 36X, SLAVIC 36

ENGLISH 81. Philosophy and Literature. 3-5 Units.
What, if anything, does reading literature do for our lives? What can literature offer that other forms of writing cannot? Can fictions teach us anything? Can they make people more moral? Why do we take pleasure in tragic stories? This course introduces students to major problems at the intersection of philosophy and literature. It addresses key questions about the value of literature, philosophical puzzles about the nature of fiction and literary language, and ways that philosophy and literature interact. Readings span literature, film, and philosophical theories of art. Authors may include Sophocles, Dickinson, Toni Morrison, Proust, Woolf, Walton, Nietzsche, and Sartre. Students master close reading techniques and philosophical analysis, and write papers combining the two. This is the required gateway course for the Philosophy and Literature major tracks. Majors should register in their home department.
Same as: CLASSICS 42, COMPLIT 181, FRENCH 181, GERMAN 181, ILAC 181, ITALIAN 181, PHIL 81, SLAVIC 181

ENGLISH 82N. Thinking about Photographs. 3 Units.
The course will begin with a short history of photography since the 19th century; followed by both a hands-on exploration of different types of photographs (possibly using the Cantor Collection) and then a more theoretical discussion of some of the acknowledged classics of photographic writing (Susan Sontag's *On Photography,* Roland Barthes' *Camera lucida*, Linfield's *The Cruel Radiance*.

ENGLISH 83N. City, Space, Literature. 3 Units.
This course presents a literary tour of various cities as a way of thinking about space, representation, and the urban. Using literature and film, the course will explore these from a variety of perspectives. The focus will be thematic rather than chronological, but an attempt will also be made to trace the different ways in which cities have been represented from the late nineteenth century to recent times. Ideas of space, cosmopolitanism, and the urban will be explored through films such as The Bourne Identity and The Lunchbox, as well as in the writings of Arthur Conan Doyle, Walter Mosley, Virginia Woolf, James Joyce, Fiston Mwanza Mujila, Karen Tei Yamashita, and Mohsin Hamid, among others.
Same as: URBANST 83N

ENGLISH 89N. Literature of Adoption. 3 Units.
Why does adoption figure so prominently in western narrative? From Oedipus to Harry Potter, the classical and popular traditions of literature often include stories of displaced children, orphans and adoptees. This course will examine the allure of the adoption narrative, both to authors and to audiences. Issues of transracial adoption will also be discussed and we will be concerned with memoir and documentary film toward the end of the quarter. No previous knowledge of adoption is required.
Same as: TAPS 89N

ENGLISH 90. Fiction Writing. 5 Units.
The elements of fiction writing: narration, description, and dialogue. Students write complete stories and participate in story workshops. May be repeated for credit. Prerequisite: PWR 1 (waived in summer quarter). NOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 90E. Investigating Identity Through Filipinx Fiction. 5 Units.
This course is both a reading seminar featuring canonical and contemporary Filipinx authors (including Mia Alvar, Carlos Bulosan, Elaine Castillo, Bienvenido Santos, Lysley Tenorio and José Rizal) and a writing workshop where students generate short stories exploring identity. Rizal's seminal novels Noli Me Tangere and El filibusterismo are ¿the earliest artistic expressions of the Asian colonial experience from the point of view of the oppressed¿ and through his work and the work of other Filipinx authors, we discover how both national and individual identities are not only challenged by adversity, trauma, violence, and war but also forged and strengthened by them. Note: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.
Same as: ASNAMST 90E, COMPLIT 89

ENGLISH 90H. Humor Writing Workshop. 5 Units.
What makes writing funny? What are we doing when we try to be funny? In this creative writing workshop, you'll exercise your native wit by writing short pieces of humor in a variety of forms. We'll practice writing jokes, parody, satire, sketches, stories, and more, study theories of humor, research practical principles and structures that writers have repeatedly used to make things funny, and enjoy and analyze examples of humor old and new to use as models. In the service of creating and understanding humor, we'll also explore questions about what purposes humor serves, and what relationship humor has with power, culture, and history.

ENGLISH 90M. Queer Stories. 5 Units.
Like other 90 and 91-level courses, 90M will explore basic elements of fiction and nonfiction writing. Students will read a wide variety of stories and essays in order to develop a language for working through the themes, forms, and concerns of the queer prose canon. Students will complete and workshop a piece of writing that in some way draws upon the aesthetics or sensibilities of the work we have read, culled from exercises completed throughout the quarter. This final piece may be a short story, a personal essay, a chapter from a novel or memoir, or a piece that, in the spirit of queerness, blurs or interrogates standard demarcations of genre. The course is open to any and all students, regardless of how they define their gender or sexuality. NOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.
Same as: FEMGEN 90M

ENGLISH 90Q. Sports Writing. 3 Units.
Study and practice of the unique narratives, tropes, images and arguments that creative writers develop when they write about popular sport. From regional fandom to individualist adventuring, boxing and baseball to mascot dancing and table tennis, exceptional creative writers mine from a diversity of leisure activity a rich vein of ¿sports writing¿ in the creative nonfiction genre. In doing so, they demonstrate the creative and formal adaptability required to write with excellence about any subject matter, and under the circumstances of any subjectivity. Discussion of the ways in which writers have framed, and even critiqued, our interest in athletic events, spectatorship, and athletic beauty. Writers include Joyce Carol Oates, Roland Barthes, David James Duncan, Arnold Rampersad, John Updike, Maxine Kumin, Susan Sterling, Ernest Hemingway, Norman Mailer, Dervla Murphy, Haruki Murakami, Don DeLillo, Henry Louis Gates, Jr., Annie Dillard, John McPhee, and Laura Hillenbrand. Close readings of essays on form and sport, as well as book excerpts. Students will engage in class discussions and write short weekly papers, leading to a more comprehensive project at the end of the quarter.

ENGLISH 90V. Fiction Writing. 5 Units.
Online workshop course that explores the ways in which writers of fiction have used language to examine the world, to create compelling characters, and to move readers. We will begin by studying a selection of stories that demonstrate the many techniques writers use to create fictional worlds; we'll use these stories as models for writing exercises and short assignments, leading to a full story draft. We will study figurative language, character and setting development, and dramatic structure, among other elements of story craft. Then, each student will submit a full draft and receive feedback from the instructor and his/her classmates. This course is taught entirely online, but retains the feel of a traditional classroom. Optional synchronous elements such as discussion and virtual office hours provide the student direct interaction with both the instructor and his/her classmates. Feedback on written work ¿ both offered to and given by the student ¿ is essential to the course and creates class rapport.

ENGLISH 90W. Writing and War. 5 Units.
This introductory, five-unit course is designed for all students interested in reading the literature of and studying the expression of military conflict. Bridging the experiences of Veteran and non-Veteran students will be a central aim of the course and will be reflected in enrollment, reading materials, visiting guests and final narrative project.

ENGLISH 91. Creative Nonfiction. 5 Units.
Historical and contemporary as a broad genre including travel and nature writing, memoir, biography, journalism, and the personal essay. Students use creative means to express factual content. May be repeated for credit. Prerequisite: PWR 1 (waived in summer quarter and for SLE students). NOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 91A. Asian American Autobiography/W. 3-5 Units.
This is a dual purpose class: a writing workshop in which you will generate autobiographical vignettes/essays as well as a reading seminar featuring prose from a wide range of contemporary Asian-American writers. Some of the many questions we will consider are: What exactly is Asian-American memoir? Are there salient subjects and tropes that define the literature? And in what ways do our writerly interactions both resistant and assimilative with a predominantly non-Asian context in turn recreate that context? We'll be working/experimenting with various modes of telling, including personal essay, the epistolary form, verse, and even fictional scenarios. First priority to undergrads. Students must attend the first class meeting to retain their roster spot.
Same as: AMSTUD 91A, ASNAMST 91A, CSRE 91D

ENGLISH 91DC. Writing the Memoir. 5 Units.
Open to DCI Fellows and Partners only. In this course, we will practice the art and craft of writing memoir: works of prose inspired by the memory of personal events and history. In our practice, we will look at different strategies for writing with meaning and insight about the events in our lives. We will read a variety of models by published authors who have made sense of the personal alongside the profound: the sad, joyful, simple and complicated stuff of living and being alive. Our learning will be discussion-driven. You should expect to do daily writing in the class, and to write and read widely between our class meetings. We will read, discuss, and imitate excerpts of memoirs by such authors as Augustine, Andrew Solomon, Joyce Carol Oates, Tim O¿Brien, Joan Didion, and Eavan Boland, among many others. At least half of our class time will be devoted to the discussion of participants' work. The course will address issues ranging from how we select and write about events from our personal lives, to the ethical obligations of memoirists, to the ways we can explore new understanding about the past, as well as our own courage and reluctance to share personal writing. Writers at all levels of experience and comfort with creative writing are very welcome.

ENGLISH 91DF. Documentary Fictions. 4 Units.
More and more of the best American fiction, plays, and even comics are being created out of documentary practices such as in-depth interviewing, oral histories, and reporting. Novels like Dave Eggers' What is the What, plays like Anna Deavere Smith's Twilight: Los Angeles, and narrative journalism like Rebecca Skloot's The Immortal Life of Henrietta Lacks, all act as both witnesses and translators of people's direct experience and push art into social activism in new ways. In this course students will examine the research methods, artistic craft, and ethics of these rich, genre-bending works and then create documentary fictions of their own. Readings will include works by Truman Capote, Dave Eggers, and Lisa Taddeo, as well as Katherine Boo, author of the award-winning Behind the Beautiful Forevers, who will visit the class. No prior creative writing or journalism experience required. Note: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 91NW. Nature Writing. 5 Units.
In this course we will be reading some of the most beautiful, magical, vital, dangerous andrevolutionary essays and stories and poems ever written, and, in our own writing about nature, will be joining that lineage that includes writers such as Henry David Thoreau, Ralph Waldo Emerson, Emily Dickinson, John Muir, Wendell Berry, Rachel Carson, Annie Dillard, and many others. Expect to spend lots of time immersed in nature, literally and literarily. Required materials include: pen, notebook, magnifying glass, binoculars, and a good pair of shoes.nNOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 91V. Creative Nonfiction. 5 Units.
Online workshop course. Historical and contemporary as a broad genre including travel and nature writing, memoir, biography, journalism, and the personal essay. Students use creative means to express factual content.

ENGLISH 91VO. Voices of the Land. 5 Units.
Amazing things can happen when a writer decides to push back from their desk and go out into the world in search of stories to tell. The lives of the subjects, as well as the life of the writer, can be changed forever. In this class, we will read and discuss three classic works of documentary journalism, and students will come up with a documentary project of their own. In the process, we will practice skills such as interviewing subjects, notetaking, photography, story structure, and other techniques of documentary journalism.nNOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 92. Reading and Writing Poetry. 5 Units.
Prerequisite: PWR 1. Issues of poetic craft. How elements of form, music, structure, and content work together to create meaning and experience in a poem. May be repeated for credit. NOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 92AP. Arab and Arab-American Poetry. 5 Units.
In this introductory course, students will write and read widely, exploring various aspects of poetic craft, including imagery, metaphor, line, stanza, music, rhythm, diction, and tone. The course will focus primarily on the rich and varied tradition of Arab and Arab-American poets, with a special emphasis on contemporary poets exploring the intersections of cultural identity, nationhood, race, gender, and sexuality. The first half of the course will consist of close reading a selection of poems, while the second half of the course will consist of workshopping student writing. Through peer critique, students respond closely to the work of fellow writers in a supportive workshop. Writers at all levels of experience and comfort with poetry are welcome.nNOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.
Same as: CSRE 92D

ENGLISH 92BP. Contemporary Black Poetry and Poetics. 5 Units.
In this poetry workshop, students will write and read closely, exploring various aspects of poetic craft, including imagery, metaphor and simile, line, stanza, music, rhythm, diction, and tone. The course reading will focus on the rich diversity of contemporary poetry from the global Black diaspora, with a special emphasis on poetry that investigates the intersections of race, cultural identity, nationhood, gender, and sexuality. Note: No prior knowledge of Black poetry and poetics is required. First priority to undergrads. Students must attend the first class meeting to retain their roster spot.
Same as: AFRICAAM 92BP

ENGLISH 92VP. Visual Arts and Poetry. 5 Units.
This creative writing workshop will make use of Stanford's own Cantor Arts Center and Anderson Collection to explore the relationship between poetry and visual art. We'll read poets whose work incorporates painting, drawing, printmaking, photography, film, and ekphrasis, and will engage poetically with art on view at Stanford. Each student will produce a mixed media chapbook by the end of the quarter. Readings will include works by Claudia Rankine, Theresa Hak Kyung Cha, Anne Carson, William Blake, Robin Coste Lewis, Maggie Nelson, Layli Long Soldier, Rainer Maria Rilke, and Etel Adnan. Note: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 93Q. The American Road Trip. 3 Units.
From Whitman to Kerouac, Alec Soth to Georgia O¿Keeffe, the lure of travel has inspired many American artists to pack up their bags and hit the open road. In this course we will be exploring the art and literature of the great American road trip. We will be reading and writing in a variety of genres, workshopping our own personal projects, and considering a wide breadth of narrative approaches. Assignments will range from reading Cormac McCarthy¿s novel, *The Road,* to listening to Bob Dylan¿s album, ¿Highway 61 Revisited.¿ We will be looking at films like *Badlands* and *Thelma and Louise,*¿acquainting ourselves with contemporary photographers, going on a number of campus-wide field trips, and finishing the quarter with an actual road trip down the California coast. Anyone with a sense of adventure is welcome!.

ENGLISH 94. Creative Writing Across Genres. 5 Units.
For minors in creative writing. The forms and conventions of the contemporary short story and poem. How form, technique, and content combine to make stories and poems organic. Prerequisite: 90, 91, or 92.

ENGLISH 94Q. The Future is Feminine. 3 Units.
Gender is one of the great social issues of our time. What does it mean to be female or feminine? How has femininity been defined, performed, punished, or celebrated? Writers are some of our most serious and eloquent investigators of these questions, and in this class we'll read many of our greatest writers on the subject of femininity, as embodied by both men and women, children and adults, protagonists and antagonists. From Virginia Woolf to Ernest Hemingway, from Beloved to Gone Girl (and even "RuPaul's Drag Race"), we'll ask how the feminine is rendered and contested. We'll do so in order to develop a history and a vocabulary of femininity so that we may, in this important time, write our own way in to the conversation. This is first and foremost a creative writing class, and our goals will be to consider in our own work the importance of the feminine across the entire spectrum of gender, sex, and identity. We will also study how we write about femininity, using other writers as models and inspiration. As we engage with these other writers, we will think broadly and bravely, and explore the expressive opportunities inherent in writing. We will explore our own creative practices through readings, prompted exercises, improv, games, collaboration, workshop, and revision, all with an eye toward writing the feminine future.
Same as: FEMGEN 94Q

ENGLISH 106A. A.I.-Activism-Art. 3-5 Units.
Lecture/studio course exploring arts and humanities scholarship and practice engaging with, and generated by, emerging emerging and exponential technologies. Our course will explore intersections of art and artificial intelligence with an emphasis on social impact and racial justice. Open to all undergraduates.
Same as: ARTHIST 168A, CSRE 106A

ENGLISH 106B. Bad Taste. 3-5 Units.
While English classes usually focus on works of art and literature collectively considered good, this class revels in the bad: the embarrassing or disgusting, the artistic failure, the guilty pleasure. With the help of some influential theorists of aesthetic badness, and a selection of ¿bad¿ examples drawn from poetry, fiction, film, and visual art, we will examine the categories¿ugly, kitschy, campy, sappy, problematic, and so on¿that have been and continue to be used to police what is and is not art, and to distinguish ¿good¿ art from ¿bad.¿ We will consider how artistic hierarchies become entangled with other kinds of hierarchies, exploring how ¿bad¿ art both sustains and subverts racial, sexual, and economic power. Why, for example, are the terms ¿rom com¿ and ¿chick flick¿ so often used dismissively? What makes a work of art provocative and avant-garde, rather than offensive¿or simply gross? And when does the ¿merely¿ bad become ¿so-bad-it¿s-good¿? In the final three weeks of the course, the students will be asked to reflect on the terms they themselves use to evaluate and describe cultural products, and to provide categories and case studies from their own experiences as consumers.

ENGLISH 107B. Literature of the English Revolution. 3-5 Units.
At the beginning of the seventeenth century it was possible for English monarchs to invoke a divine right to rule. Within decades, the churn of petitions, printed pamphlets, and newsbooks would overturn bedrock assumptions of sociopolitical continuity, reconstituting the body politic. In addition to reading through the textual agitation that is popular politics, we will likely consider movements of radical democracy and egalitarianism (the Levellers, Diggers) alongside works of lyric poetry (Herrick, Marvell) and political philosophy (Filmer, Locke).

ENGLISH 110A. Books to Bollywood. 3-5 Units.
This course will investigate filmic adaptations of Anglophone literary texts in India. We will study popular films as well as Indian art cinema, alongside their novelistic inspirations, which range from seventeenthÂ-century texts to twentyÂfirst century ones. The course's multimedia approach will require students to interpret novels and films in relation to and in dialogue with one another, analyzing not only the pair of texts but the process of adaptation itself. Doing so will raise cultural questions around globalization, universalism and feminism, as well as generic questions regarding the limitations and strengths of different media to represent different kinds of stories. We will situate all these questions within a larger discussion of the relationship of medium to modernity in India. Students will also gain the terminology and the analytic framework needed to write cogently about the two different media, both on their own and in relation to one another.

ENGLISH 112B. African Literature: From Chinua Achebe to Afrofuturism. 3-5 Units.
This course will be an exploration of the major writers and diverse literary traditions of the African continent. We will examine various elements (genre, form, orality, etc.) across a variety of political, social, and literary categories (colonial/postcolonial, modernism/postmodernism, gender, class, literary history, religion, etc.). We will also address issues such as African literature and its relationship to world literature and the question of language and of translation. Writers to be discussed will include Chinua Achebe, Wole Soyinka, Tsitsi Dangarembga, Fiston Mwanza Mujila, Kamel Daoud, Tayeb Salih, and NoViolet Bulawayo, among others.nThe class will be structured around the close-reading of passages from individual texts with an attempt to relate the details derived from the reading process to larger areas of significance within the field. Students should make sure to bring their texts to class with them and must be prepared to contribute to class discussions.
Same as: AFRICAAM 112B

ENGLISH 112C. Humanities Core: The Renaissance in Europe. 3 Units.
The Renaissance in Europe saw a cultural flowering founded on the achievements of pagan antiquity, a new humanism founded on the conviction that nothing which has ever interested living men and women can wholly lose its vitality, and the foundation of the modern state. We start with those ¿Renaissance men¿ Leonardo Da Vinci, Michelangelo, and Raphael. We then turn to Martin Luther¿s rejection of Papal Rome and his erection of a competing, Protestant ideal. Montaigne and Shakespeare invent our modern sense of subjectivity before our eyes. And Machiavelli and Hobbes create a science of power politics. Each week, during the first class meeting, we will focus on these issues in Europe. During the second class meeting, we will participate in a collaborative conversation with the other students and faculty in Humanities Core classes, about other regions and issues. This course is taught in English . This course is part of the Humanities Core: https://humanitiescore.stanford.edu/.
Same as: HUMCORE 122

ENGLISH 113. 'The secret of deep human sympathy': Great Victorian Novels. 5 Units.
The Victorian period is often referred to as the Age of the Novel: never before or since did fiction play such a central part in the English literary landscape. Through a close scrutiny of works by Charles Dickens, Charlotte Brontë, George Eliot and Thomas Hardy, this course will probe the formal innovations of four major nineteenth-century writers. Each novel will be tackled through five main approaches: the contexts that informed the work (such as the development of London, evolving attitudes towards criminality, subjectivity, childhood, and biology); the impact of publication methods on the novel (Oliver Twist and Tess of the d¿Urbervilles originally appeared in periodicals as, respectively, a monthly and a weekly serial; Jane Eyre and Adam Bede were first published as three-volume novels); innovations with narrative voice (for example how the novelists make use of third-person omniscient and first-person narration, and how and why they address the reader); the novels¿ stylistic particularities (from their manipulation of imagery to their experimentation with genre); and the major critical debates surrounding them (such as recent discussions concerning the extent to which the Victorian novel consolidated or challenged nineteenth-century values). Throughnour four novels, we will span the Victorian period, from Queen Victoria¿s arrival on the throne to anxieties and experimentations of the fin-de-siècle.

ENGLISH 114C. ¿Books Promiscuously Read¿: Varieties of Renaissance Experience. 3-5 Units.
What is the point of reading? In this course we will begin by exploring the ways in which writers from Antiquity through the Renaissance attempted to answer that crucial question. Keeping in mind that to read a writer is to read a reader, we will examine central topics of the Renaissance (such as rhetoric, statecraft, religion, gender) while thinking about how modes of reading inform the craft of writing. Texts will range from the established classics to the often neglected, so the course will benefit students with all levels of familiarity with the period. Authors may include Aristotle, Cicero, Seneca, St. Augustine, Petrarch, Erasmus, Machiavelli, Udall, Sidney, Shakespeare, Whitney, Lanyer, and Milton.

ENGLISH 115. Virtual Italy: Methods for Historical Data Science. 4-5 Units.
Classical Italy attracted thousands of travelers throughout the 1700s. Referring to their journey as the "Grand Tour," travelers pursued intellectual passions, promoted careers, and satisfied wanderlust, all while collecting antiquities to fill museums and estates back home. What can computational approaches tell us about who traveled, where and why? We will read travel accounts; experiment with parsing; and visualize historical data. Final projects to form credited contributions to the Grand Tour Project, a cutting-edge digital platform. No prior programming experience necessary.
Same as: CLASSICS 115, HISTORY 238C, ITALIAN 115

ENGLISH 115C. Hamlet and the Critics. 3-5 Units.
Focus is on Shakespeare's *Hamlet* as a site of rich critical controversy from the eighteenth century to the present. Aim is to read, discuss, and evaluate different approaches to the play, from biographical, theatrical, and psychological to formalist, materialist, feminist, new historicist, and, most recently, quantitative. The ambition is to see whether there can be great literature without (a) great (deal of) criticism. The challenge is to understand the theory of literature through the study of its criticism.
Same as: TAPS 151C

ENGLISH 115E. Shakespeare and his Contexts: Race, Religion, Sexuality, Gender. 5 Units.
.

ENGLISH 115F. Tragedy: Forms and Conflicts. 3-5 Units.
This course introduces students to central questions of tragedy. Why do we find tragic spectacle so compelling, even pleasurable? What role does conflict play in individual selfhood and social formation? And why does tragedy elicit such strong theoretical and philosophical responses? At the same time, the course provides an introduction to literary history through the study of genre. What might connect modern tragedy to ancient Greek drama? How are genres transformed through reading, commentary, and adaptation? The course will be based on close reading and discussion of authors including Sophocles, Seneca, Shakespeare, Calderon, Milton, and Buchner.
Same as: TAPS 115F

ENGLISH 115G. Shakespeare: Five Tragedies. 3-5 Units.
Readings of five plays: Hamlet, Othello, King Lear, Macbeth, and Antony and Cleopatra. We will begin with a brief overview of Shakespeare's life and times and the theatrical conditions he worked within. However, our efforts will be focused primarily on direct engagement with Shakespeare's plays themselves. Sessions will include discussions of Shakespearean tragic language, reading aloud of specific scenes, and exploration of what unites and differentiates these plays. Finally, we will reflect continuously on what makes tragedy such a strange, rich and necessary form, where (as one philosopher wrote) ¿in suffering failure, the loser conquers.¿.

ENGLISH 118. Literature and the Brain. 3 Units.
Recent developments in and neuroscience and experimental psychology have transformed the way we think about the operations of the brain. What can we learn from this about the nature and function of literary texts? Can innovative ways of speaking affect ways of thinking? Do creative metaphors draw on embodied cognition? Can fictions strengthen our "theory of mind" capabilities? What role does mental imagery play in the appreciation of descriptions? Does (weak) modularity help explain the mechanism and purpose of self-reflexivity? Can the distinctions among types of memory shed light on what narrative works have to offer?.
Same as: COMPLIT 138, COMPLIT 238, ENGLISH 218, FRENCH 118, FRENCH 218, PSYC 126, PSYCH 118F

ENGLISH 118A. Illness in Literature. 5 Units.
This class provides an overview of illness narratives in fiction from the 19th century to the present. We will examine how authors use language, plot, and structure to portray illness and even recreate its sensations within the reader. We will also study how domestic arrangements, art, medicine and technology mediate the experience of disease. Our discussion of fiction will be buttressed by theoretical texts about the function (and breakdown) of language when deployed to describe physical and mental suffering. Finally, we will consider the ethics of writing about illness. What does it mean to find beauty in descriptions of pain? What role can literature play in building empathy for experiences we have not (yet) experienced ourselves?.

ENGLISH 122. Medieval Manuscripts, Digital Methodologies. 3-5 Units.
Medieval Studies is entering a phase of digital abundance. In the last seven years, more medieval material has been put online than has ever been available for study at any point in the past. How can we engage with the growing mass of digitized material available to us? How does this sudden access impact the work we do, the types of questions we ask, the connections we make, and the audiences we write for?nnIn this course, we will examine and evaluate digital medieval resources and software that has been created for interacting with those resources. Students will have the opportunity to design and create an innovative project based on medieval primary sources held at Stanford, applying current digital methods in the analysis and presentation of those resources.
Same as: DLCL 122

ENGLISH 122C. Medieval Fantasy Literature. 3-5 Units.
This is a comparative medieval literature course that surveys Anglo-Norman and English romance, English and Norse heroic epic, and Norse and Celtic mythology. What significance and meaning did medieval writers from different times and places see in magic and monsters; what superstitions and beliefs converged in their efforts to represent things ¿from the other side,¿ and what compelled them to do so? We will address such questions by reading the literature against the social, cultural, and religious contexts that shaped medieval life and artistic production. Finally we will turn to the modern era with J. R. R. Tolkien's The Fellowship of the Ring and Kazuo Ishiguro's The Buried Giant, reflecting on how literary medievalism has cultivated the tropes of medieval fantasy to produce works which mediate between an imagined history, sublime fabrication, and contemporary concerns.

ENGLISH 124. The American West. 5 Units.
The American West is characterized by frontier mythology, vast distances, marked aridity, and unique political and economic characteristics. This course integrates several disciplinary perspectives into a comprehensive examination of Western North America: its history, physical geography, climate, literature, art, film, institutions, politics, demography, economy, and continuing policy challenges. Students examine themes fundamental to understanding the region: time, space, water, peoples, and boom and bust cycles.
Same as: AMSTUD 124A, ARTHIST 152, HISTORY 151, POLISCI 124A

ENGLISH 124A. Latinx Literature. 3-5 Units.
.

ENGLISH 124C. Cultures of the U.S.-Mexico Borderlands. 3-5 Units.
Cultures of the U.S.-Mexico Borderlands: Since becoming president, Donald Trump has deported more than a million migrants and started building a multi-billion-dollar border wall. Although some of Trump¿s actions have seemed anomalous, they have all relied on and reaffirmed longstanding legacies of settler colonialism and racial capitalism. In this seminar, we will look at these legacies through the eyes of the Natives, Latinxs, whites, and others who have lived in the U.S.-Mexico borderlands. Within the confines of literature, we will read novelists like Willa Cather, essayists like Valeria Luiselli, and poets like Simon Ortiz (Acoma Pueblo). Meanwhile, across the more capacious category of culture, we will engage with promoters who encouraged whites to claim homesteads, periodistas who emboldened Latinxs to protect pueblos, and leaders who helped Natives fight for sovereignty. By blending literary studies and ethnic studies, we will gain a thorough grasp of the territories that have taken shape since the U.S.-Mexico War (1846¿48), especially the ones that we currently call Arizona, California, New Mexico, and Texas. From these concrete contexts, we will ask and answer more abstract questions: What are borders¿are they physical boundaries, or are they psychosocial conditions? Similarly, what are nations¿are they stable and homogeneous groups, or are they flexible and diverse communities? Ultimately, what are human beings¿can they be branded as illegal aliens, or do they have inalienable rights? During the quarter, we will work through these questions both collectively and individually: to enrich our in-class discussions, each five-unit student will complete a four- to five-page reading of a single source, a six- to eight-page paper on several sources, and a multimedia borderlands map.
Same as: AMSTUD 124, CHILATST 124C

ENGLISH 135. What is all this juice and all this joy? Great Victorian Poetry. 5 Units.
In this course we will study the works of major Victorian poets across various genres, including: Tennyson, Browning, Hopkins, Meredith, Rossetti, Arnold, Barrett Browning and Swinburne.nThis course would work well alongside Great Victorian Novels.

ENGLISH 136B. Big Novels. 5 Units.
In this seminar we'll read three conspicuously ambitious nineteenth-century novels: Bleak House (Charles Dickens), The Brothers Karamazov (Fydor Dostoevsky) and Moby Dick (Herman Melville). Why does the nineteenth-century produce these famously big novels? Why tell these particular stories in such extravagant, unprecedented ways? These are famously demanding and rewarding works of art, and the main aim of our seminar will be to closely engage each novel, to read it actively and reflectively, and to plumb its narrative, aesthetic and philosophical complexity.

ENGLISH 137B. We see into the life of things: Forms of Romanticism. 5 Units.
This course will offer a survey of ten major Romantic writers who published between the 1780s and 1820s, and of their innovations in four key genres: poetry, life-writing (including both travel-writing and autobiography), essays, and the novel. These texts variously appeared as strange, absurd, trivial, alarming and even revolutionary to their first readers, and this course will seek to recapture the artistic, imaginative, social, political and philosophical ferment which inspired the Romantics and which they hoped would reanimate and refocus their contemporaries at a time of remarkable socio-political change.

ENGLISH 138E. The Gothic in Literature and Culture. 3-5 Units.
This course introduces students to the major features of Gothic narrative, a form that emerges at the same time as the Enlightenment, and that retains its power into our present. Surveying Gothic novels, as well as novellas and short stories with Gothic elements, we will learn about the defining features of the form and investigate its meaning in the cultural imagination. Gothic narratives, the course will suggest, examine the power of irrational forces in a secular age: forces that range from barbaric human practices, to supernatural activity, to the re-enchantment of modern existence. We will also consider the importance for Gothic authors and readers of the relation among narrative. spectacle and the visual arts. Primary works may include Ann Radcliffe's <e>The Italian, Jane Austen's Northanger Abbey</e>, Victor Hugo's <e>The Hunchback of Notre Dame</e>, E.T.A. Hoffman's <e>The Sandman</e>, Mary Shelly's <e>Frankenstein</e>, and Edgar Allen Poe's <e>The Narrative of Arthur Gordon Pym</e>. We may also do a section on vampires, including Bram Stoker's <e>Dracula</e>, and its remake in film by F.W. Murnau and Werner Herzog. Critical selections by Edmund Burke, Sigmund Freud, Walter Benjamin, Michel Foucault, and Terry Castle, among others.
Same as: COMPLIT 118

ENGLISH 139B. American Women Writers, 1850-1920. 3-5 Units.
This course traces the ways in which female writers negotiated a series of literary, social, and intellectual movements, from abolitionism and sentimentalism in the nineteenth century to Progressivism and avant-garde modernism in the twentieth. Authors include Harriet Beecher Stowe, Harriet Jacobs, Rebecca Harding Davis, Emily Dickinson, Kate Chopin, Edith Wharton, Gertrude Stein, Willa Cather, and Charlotte Perkins Gilman.
Same as: AMSTUD 139B, FEMGEN 139B

ENGLISH 143B. The Problem of Politics in Native Art. 5 Units.
This course will examine the ways in which the politics of tribal sovereignty, decolonization and resistance to American presence and perspective play out in the various artistic mediums Native artists engage. This will include but not be limited to fiction, creative nonfiction, poetry, film and visual art.

ENGLISH 144D. American Arts & The Great Depression. 3-5 Units.
American culture in the 1930s and 40s is easy to dismiss. It can seem too parochial, too patriotic, too escapist. But looking closer we find ¿bold and persistent experimentation¿ in the face of inequality and unrest. How does a photograph respond to want? A novel produce community? A musical call for revolution? In this course we¿ll consider a diverse cast of objects and artists: phototexts by James Agee and Walker Evans, Richard Wright, and Dorothea Lange and Paul Taylor; the films of Busby Berkeley, Charlie Chaplin, Frank Capra, Fred Astaire, and Pere Lorenz; paintings by Grant Wood, Grandma Moses, and Diego Rivera; and the fiction of Tillie Olsen and Nathanael West. We¿ll explore the Federal Arts Projects¿which put thousands to work ¿describing America to Americans¿ in the form of government-funded plays, symphonies, and guidebooks, and were fiercely contested by conservative critics of the New Deal¿and examine their continuing legacy. Students will reflect on primary and secondary readings and digital archives in a series of short papers.

ENGLISH 145D. Jewish American Literature and Film. 5 Units.
From its inception, Jewish-American literature has taken as its subject as well as its context the idea of Jewishness itself. Jewish culture is a diasporic one, and for this reason the concept of Jewishness differs from country to country and across time. What stays remarkably similar, though, is Jewish self-perception and relatedly Jewish literary style. This is as true for the first-generation immigrant writers like Isaac Bashevis Singer and Anzia Yezierska who came to the United States from abroad as it is for their second-generation children born in the United States, and the children of those children. In this course, we will consider the difficulties of displacement for the emigrant generation and their efforts to sustain their cultural integrity in the multicultural American environment. We'll also examine the often comic revolt of their American-born children and grandchildren against their (grand-)parents nostalgia and failure to assimilate. Only by considering these transnational roots can one understand the particularity of the Jewish-American novel in relation to mainstream and minority American literatures. In investigating the link between American Jewish writers and their literary progenitors, we will draw largely but not exclusively from Russia and the countries of Eastern Europe.
Same as: AMSTUD 145D, JEWISHST 155D, REES 145D

ENGLISH 145G. US Fiction 1945 to 2000. 5 Units.
Major works of US fiction since World War II, in social, historical, and aesthetic perspective. Ellison, Bellow, O'Connor, Pynchon, Reed, Morrison, Robinson, DeLillo, Gaitskill.

ENGLISH 145J. The Jewish-American Novel: Diaspora, Privilege, Anxiety, Comedy. 4-5 Units.
Jews are sometimes referred to as 'the people of the book.' Would Portnoy's Complaint count as a book that constitutes Jewish-American peoplehood? What about Fear of Flying? This seminar introduces students to influential Jewish-American novels (and some short stories and film) from the late nineteenth century to the present day. These works return time and again to questions of diaspora, race, queer social belonging, and the duty to a Jewish past, mythical or real. Through close readings of short stories and novels coupled with secondary readings about Jewish-American history and culture, we will explore how American Jewishness is constructed differently in changing historical climates. What makes a text Jewish? What do we mean by Jewish humor and Jewish seriousness? How do Jewish formulations of gender and power respond to Jews' entrance into the white American mainstream? As we read, we'll think through and elaborate on models of ethnicity, privilege, sexuality, and American pluralism. Authors include Cahan, Yezierska, Singer, Roth, Bellow, Malamud, Ozick, Mailer, Jong, and Englander.
Same as: AMSTUD 145J, JEWISHST 155J

ENGLISH 146C. Hemingway, Hurston, Faulkner, and Fitzgerald. 3-5 Units.
While Hemingway and Fitzgerald were flirting with the expatriate avant-garde in Europe, Hurston and Faulkner were performing anthropological field-work in the local cultures of the American South. Focus on the tremendous diversity of concerns and styles of four writers who marked America's coming-of-age as a literary nation with their multifarious experiments in representing the regional and the global, the racial and the cosmopolitan, the macho and the feminist, the decadent and the impoverished.
Same as: AMSTUD 146C

ENGLISH 146S. Secret Lives of the Short Story. 3-5 Units.
An exploration of the Short Story's evolution and variety of voices from its emergence in the 19th century to the present day. Weekly themes include the Detective Story, Immigration, Failure, Science Fiction, and Adolescence. We'll read a range of mostly American writers Edgar Allan Poe, James Baldwin, Raymond Carver, Grace Paley, Alice Sola Kim with an eye to uncovering the historical, cultural, and stylistic secrets of the Short Story, from both a literary criticism and a creative writing viewpoint.

ENGLISH 150A. The Poetic Memory. 3 Units.
In this course, we'll read an array of contemporary poetry traversing personal and public history. As we generate original poetry and prose unearthing our personal narratives, we'll consider how poetry and memory intersect, what it means to explore your life and the past through the poetic lens, how autobiography works in books of poetry, and what "the truth" means when writing about life experiences.

ENGLISH 150B. Poetry and Desire. 5 Units.
A close reading of poems of love, lust, and longing from Sappho to the present. In this seminar, we will consider the erotic impulse as central to lyric, while also understanding poetry as a record of shifting attitudes toward sex and sexuality, love, marriage, and gender. Alongside theories of desire, we will examine the erotic poem¿s relationship with the elegy, the ode, and the political poem. Frequent written assignments, critical and creative, will respond to poems by a range of authors from Shakespeare and Crashaw to Whitman and Cavafy, Lucille Clifton, Louise Glück, and Carl Phillips.

ENGLISH 150C. Reading and Writing Contemporary Environmental Poetry. 3 Units.
In this course, we will learn what it means to write fluidly about oceans and rivers, to write beautifully about mulch, to think creatively about jellyfish, to center the climate catastrophe in verse. Considering the human animal in the fight with and for each other and the Earth, we will explore how the environmental justice movement has been shaped and described by the social justice movement and recent poetic innovations. Through careful reading, critical and creative responses, and both synchronous and asynchronous discussion, we will investigate the changing ways that contemporary environmental poets engage with the greater-than-human world.

ENGLISH 150G. The Woman Poet of the 21st Century. 5 Units.
This class seeks to renew the paradigm of the woman poet: two words that Eavan Boland calls ¿magnetically opposed.¿ What and who is the woman poet in the 21st century? What artifice, myths, forms (such as the domestic poem) have women poets inherited? Students will read poetry by Gwendolyn Brooks, Jos Charles, Layli Long Soldier, Sylvia Plath, Adrienne Rich, Natasha Trethewey, and others; as well as letters and memoirs. This class is driven by discussion based on students' mapping out the various context and expectations that these poets meet, suggest, or defy. Students should expect to write analytical responses and creative pieces that struggle with the context of the current day.

ENGLISH 151H. Wastelands. 5 Units.
Have human beings ruined the world? Was it war, or industry, or consumerism, or something else that did it? Beginning with an in-depth exploration of some of the key works of literary modernism, this class will trace the image of the devastated landscape as it develops over the course of the 20th and 21st centuries, arriving finally at literary representations of the contemporary zombie apocalypse. Authors to include T.S Eliot, Ernest Hemingway, Nathanael West, Willa Cather, Cormac McCarthy, and others.

ENGLISH 154F. Film & Philosophy. 3 Units.
Issues of authenticity, morality, personal identity, and the value of truth explored through film; philosophical investigation of the filmic medium itself. Screenings to include Blade Runner (Scott), Do The Right Thing (Lee), The Seventh Seal (Bergman), Fight Club (Fincher), La Jetée (Marker), Memento (Nolan), and Eternal Sunshine of the Spotless Mind (Kaufman). Taught in English.
Same as: COMPLIT 154A, FRENCH 154, ITALIAN 154, PHIL 193C, PHIL 293C

ENGLISH 157H. Creative Writing & Science: The Artful Interpreter. 5 Units.
What role does creativity play in the life of a scientist? How has science inspired great literature? How do you write accessibly and expressively about things like whales, DNA or cancer? This course usually begins with a field trip to Hopkins Marine Station where Stanford labs buzz with activity alongside barking seals and crashing waves. While we won't be able to visit Monterey Bay this quarter, the spirit of interdisciplinary exchange will not be lost, and students will be encouraged to get outside and engage with their local environments. As historian Jill Lepore writes of Rachel Carson: ¿She could not have written Silent Spring if she hadn't, for decades, scrambled down rocks, rolled up her pant legs, and waded into tide pools, thinking about how one thing can change another...¿n nAs a small workshop course writing process and the study of literary craft form the foundation of our work together. For inspiration we will read nonfiction by scientists who write for wide audiences and literary giants who draw from science. Students will explore the intersection between creative expression and scientific curiosity, completing three short essays and offering supportive peer feedback throughout the quarter. This course is open to all undergraduates. Note: Students must attend the first class meeting to retain their roster spot.

ENGLISH 158H. Science Meets Literature on the Monterey Peninsula. 5 Units.
(Graduate students register for 258H.) This course will consider the remarkable nexus of scientific research and literature that developed on the Monterey Peninsula in the first half of the 20th century and how the two areas of creativity influenced each other. The period of focus begins with the 1932 association of John and Carol Steinbeck, Ed Ricketts, and Joseph Campbell, all of whom were highly influenced by the Carmel poet, Robinson Jeffers ¿ and ends with the novels Cannery Row (1945) and Sweet Thursday (1954). An indisputable high-tide mark, Sea of Cortez: A Leisurely of Travel and Research (1941) will be considered in detail. Weekend field trips will include intertidal exploration, a tour of the Jeffers Tor House in Carmel, and whale watching on Monterey Bay.
Same as: BIOHOPK 158H, BIOHOPK 258H

ENGLISH 159. James Baldwin & Twentieth Century Literature. 5 Units.
Black, gay and gifted, Baldwin was hailed as a "spokesman for the race", although he personally, and controversially, eschewed titles and classifications of all kinds. This course examines his classic novels and essays as well his exciting work across many lesser-examined domains - poetry, music, theatre, sermon, photo-text, children's literature, public media, comedy and artistic collaboration. Placing his work in context with other writers of the 20C (Faulkner, Wright,Morrison) and capitalizing on a resurgence of interest in the writer (NYC just dedicated a year of celebration of Baldwin and there are 2 new journals dedicated to study of Baldwin), the course seeks to capture the power and influence of Baldwin's work during the Civil Rights era as well as his relevance in the "post-race" transnational 21st century, when his prescient questioning of the boundaries of race, sex, love, leadership and country assume new urgency.nNOTE: Enrollment by department consent. To apply, please email Prof. Elam (melam@stanford.edu) with your name, year, major, and one sentence about why you would like to take this class.
Same as: AFRICAAM 159, FEMGEN 159

ENGLISH 160. Poetry and Poetics. 5 Units.
Introduction to the reading of poetry, with emphasis on how the sense of poems is shaped through diction, imagery, and technical elements of verse.nEnglish majors must take this class for 5 units.

ENGLISH 161. Narrative and Narrative Theory. 5 Units.
An introduction to stories and storytelling--that is, to narrative. What is narrative? When is narrative fictional and when non-fictional? How is it done, word by word, sentence by sentence? Must it be in prose? Can it be in pictures? How has storytelling changed over time? Focus on various forms, genres, structures, and characteristics of narrative. nEnglish majors must take this class for 5 units.
Same as: COMPLIT 161E

ENGLISH 163F. Shakespeare Now and Then. 5 Units.
In this Introduction to Shakespeare on film, we will study approximately five Shakespearean plays, including *Romeo and Juliet, Much Ado About Nothing*, and *Macbeth*, alongside a selection of their movie adaptations. As well as getting to grips with the plays printed texts, we will investigate how the plays meanings and significations can change radically in performance.

ENGLISH 165. Perspectives on American Identity. 5 Units.
Required for American Studies majors. In this seminar we trace diverse and changing interpretations of American identity by exploring autobiographical, literary, and/or visual texts from the 18th through the 20th century in conversation with sociological, political, and historical accounts. *Fulfills Writing In the Major Requirement for American Studies Majors*.
Same as: AMSTUD 160

ENGLISH 168A. Imagining the Oceans. 5 Units.
How has Western culture constructed the world's oceans since the beginning of global ocean exploration? How have imaginative visions of the ocean been shaped by marine science, technology, exploration, commerce and leisure? Primary authors read might include Cook, Equiano, Ricketts, and Steinbeck; Defoe, Cooper, Melville, Conrad, Woolf, Hemingway and Ghosh; Coleridge, Baudelaire, Moore, Bishop and Walcott. Critical readings include Schmitt, Rediker and Linebaugh, Baucom, Best, Corbin, Auden, Sontag and Heller-Roazen. Possible field trips include the Cantor Arts Center and Hopkins Marine Station.

ENGLISH 169B. Asian-American Literature and Criticism. 5 Units.
This course provides a broad overview of twentieth and twenty-first century Asian-American fiction and memoirs as well as the major critical frameworks that have arisen since the emergence of the Asian-American studies as a formal discipline in the 1960s. We¿ll begin by reading early works such as the Filipino-American writer Carlos Bulosan's 1947 novel America is in the Heart within the context of Cold War America and end with an examination of post-9/11 Asian-American literature, including Ruth Ozeki¿s A Tale for the Time Being and Qais Akbar Omar¿s A Fort of Nine Towers. By comparing the experiences of writers from East, Southeast, and Central Asia, we¿ll aim to arrive at a nuanced understanding of how imperialism, war, immigration, and legal battles have shaped the experiences of Asian-Americans. In addition to our weekly discussions, this seminar will also feature intensive writing tutorials designed to challenge students to produce a work of original scholarship.

ENGLISH 169D. Contemporary Asian American Stories. 5 Units.
This course will examine the aesthetics and politics of contemporary Asian American storytellers, with an emphasis on work produced within the past five years. We will investigate the pressures historically placed on Asian Americans to tell a certain kind of story¿e.g. the immigrant story in a realist mode¿and the ways writers have found to surprise, question, and innovate, moving beyond those boundaries to explore issues of race, sexuality, science, memory, citizenship, and belonging. Course materials will consist of novels, short stories, graphic narrative, and film, and may include work by Ocean Vuong, Mira Jacobs, Gish Jen, Charles Yu, and Adrian Tomine, as well as Lulu Wang¿s 2019 film The Farewell. This seminar will feature both analytical and creative components, and students will be encouraged to produce both kinds of responses to the material.
Same as: ASNAMST 169D

ENGLISH 172C. Cultures of the U.S.-Mexico Borderlands. 3-5 Units.
In recent years, the U.S. has deported millions of migrants and begun work on a multi-billion-dollar border wall. Although these acts have sometimes seemed unprecedented, they have relied on and reaffirmed earlier attempts to manage mobile communities, police environmental boundaries, and define national identities. In this seminar, we will learn how Natives, Latinxs, whites, and other ethno-racial groups have imagined the U.S.-Mexico borderlands. Reading elite aesthetic forms like literature and art alongside pop cultural practices such as newspapers and songs, we will ask and answer a range of questions about this inequitable yet interdependent region: How has the U.S. tried to control Native and Mexican territories? How have conquered people and migrants adapted to and influenced their new homes? How have ethnicity, race, gender, sexuality, and class operated on both sides of the border? These historical questions will lead us to a range of theoretical inquiries: What are borders¿are they physical boundaries, or are they psychosocial conditions? Similarly, what are nations¿are they stable and homogeneous groups, or are they flexible and diverse communities? Ultimately, what are human beings¿can they be branded as illegal aliens, or do they have inalienable rights? While we will wrestle with these questions together, we will also work through them independently. In a world increasingly divided between migrants and citizens, we will use writing as a form of critical reasoning, cross-cultural understanding, and political debate.

ENGLISH 172D. Introduction to Comparative Studies in Race and Ethnicity. 5 Units.
How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. Includes an optional Haas Center for Public Service certified Community Engaged Learning section. In accordance with Stanford virtual learning policies implemented for the Spring Quarter, all community engagement activities for this section will be conducted virtually. Please sign up for section 2 #33285 with Kendra, A. if you are interested in participating in virtual community engagement.
Same as: CSRE 196C, PSYCH 155, SOC 146, TAPS 165

ENGLISH 172E. The Literature of the Americas. 5 Units.
A wide-ranging overview of the literatures of the Americas inncomparative perspective, emphasizing continuities and crises that are common to North American, Central American, and South American literatures as well as the distinctive national and cultural elements of a diverse array of primary works. Topics include the definitions of such concepts as empire and colonialism, the encounters between worldviews of European and indigenous peoples, the emergence of creole and racially mixed populations, slavery, the New World voice, myths of America as paradise or utopia, the coming of modernism, twentieth-century avant-gardes, and distinctive modern episodes--the Harlem Renaissance, the Beats, magic realism, Noigandres--in unaccustomed conversation with each other.
Same as: AMSTUD 142, COMPLIT 142, CSRE 142

ENGLISH 177B. Contemporary American Short Stories. 3-5 Units.
An exploration of the power and diversity of the American short story ranging from the 1970s to the present day. By examining short stories historically, critically, and¿above all¿as art objects, students will learn how to read, interpret, critique, and enjoy short stories as social, political, and humanist documents. Students will learn techniques to craft their own short stories and their own critical essays in a course that combines creative practice and the art of critical appreciation.

ENGLISH 182E. Photography in Fiction. 5 Units.
Since its invention in the early 19th century, photography has found countless documentary and artistic applications. As an art form, it is not only a medium of its own, but one which has entered into fascinating dialogue with other media, from film to dance. Perhaps nowhere has photography been put to such intriguing multimedia use as in fiction. Since the early 20thcentury, authors as diverse as Virginia Woolf, German novelist W.G. Sebald, and the contemporary Sri-Lankan-Canadian writer Michael Ondaatje, have deployed photographs throughout their texts. In this course, we will look at this literary tradition, exploring the way that text and image enter into a complex dance, at times enhancing narrative, at times troubling it. What can we make of these strange and wonderful hybrids? What place do images have in traditional narratives? What are the ethics of such work in an age in which the technological distinction between truth and fiction is becoming ever more blurred? As we read (and look), we will find ourselves not only drawn into the narratives themselves, but sent beyond them, into questions of history, gender, trauma, and memory.

ENGLISH 182J. "When We Dead Awaken": Breakthroughs in Conceptions of the Gendered Self in Literature and the Arts. 4-5 Units.
Remarkable breakthroughs In conceptions of the gendered self are everywhere evident in literature and the arts, beginning primarily with the Early Modern world and continuing into today. Many of these works inhere in innovations in literary and artistic forms in order to capture and even evoke the strong cognitive, or psychological, dimension of such ¿awakenings.¿ The reader, or viewer, is often challenged to adapt her or his mind to new forms of thought, such as John Donne¿s seventeenth century creation of the Dramatic Monologue, a form popular with modern writers, which requires the reader¿s cognitive ¿presence¿ in order to fill out the dramatic scene. In so doing, the reader often supplies the presence of the female voice and thereby enters into her self-consciousness and inner thoughts. Adrienne Rich, for example, specifically ¿rewrites¿ one of Donne¿s major poems from the female perspective. This can be, in Rich¿s words, an ¿awakening¿ for the active reader, as he or she assumes that often-unspoken female perspective. The course will also explore male conceptions of the self and how such conceptions are often grounded in cultural attitudes imposed on male subjects, which can contribute to gender-bias toward women, a subject often neglected in exploring gendered attitudes, but which is now gaining more study, for example, in Shakespeare¿s ¿Othello.¿ Readings from recent developments in the neurosciences and cognitive studies will be included in our study of artistic forms and how such forms can activate particular mindsets. Writers and artists will include Shakespeare, Michelangelo, John Donne, Virginia Woolf, Adrienne Rich, Gertrude Stein, Picasso, June Wayne, and Edward Albee¿s 1960¿s play, ¿Who¿s Afraid of Virginia Woolf?¿.
Same as: FEMGEN 112, FEMGEN 212

ENGLISH 183E. Self-Impersonation: Autobiography, Memoir, Fictional Autobiography. 5 Units.
This course will examine the intersecting genres of fiction, autobiography, and memoir. Topics will include the literary construction of selfhood and its constituent categories; the role of language in the development of the self; the relational nature of the self (vis-à-vis the family, "society," nation, God); the cultural status of "individuality"; conceptions of childhood; and the role of individual testimony in our understanding of family, religious and cultural identity. In addition to short theoretical works, authors may include: Marguerite Duras; Elena Ferrante; Sam Shepard; Gertrude Stein; Karl Ove Knausgaard; Marcel Proust; Vladimir Nabokov; Primo Levi; Roland Barthes; and J. M. Coetzee.
Same as: COMPLIT 183

ENGLISH 184C. Data and Knowledge in the Humanities. 5 Units.
How do different disciplines understand and use data, and how do skills such as interpretation and critical thought work with data to create knowledge? The introduction of mathematics reshaped disciplines like cosmology and sociology in the past while, in the present, the humanities are facing the same challenges with the emergence of fields such as spatial history and the digital humanities. In this class we will study how the introduction of data has transformed the way that we create knowledge.

ENGLISH 184E. Literary Text Mining. 5 Units.
This course will train students in applied methods for computationally analyzing texts for humanities research. The skills students will gain will include basic programming for textual analysis, applied statistical evaluation of results and the ability to present these results within a formal research paper or presentation. Students in the course will also learn the prerequisite steps of such an analysis including corpus selection and cleaning, metadata collection, and selecting and creating an appropriate visualization for the results.

ENGLISH 185D. Ulysses and Difficulty. 3-5 Units.
James Joyce's Ulysses is widely hailed as a masterpiece of world literature¿¿the most important expression which the present age has found,¿ as T. S. Eliot put it¿yet it is perhaps equally famous for its endless capacity to defeat and frustrate its readers. This course, which is built around a careful reading of Ulysses in its entirety, will tackle the problem of the novel's difficulty head-on. What specific features constitute its difficulty, and what ends do they serve? How do the novel's different modes of difficulty affect how we read and interpret it? And what is at stake, politically and ideologically, in the novel¿s refusal to be easily ¿readable¿? In addition to the primary text, we will devote critical attention to its various reading apparatuses (schemas, annotations, online summaries), along with secondary readings that foreground its interpretive challenges. In the process, we will seek to develop a more refined vocabulary for talking about difficult texts, while also thinking more broadly about the role of difficulty in modernist aesthetics.

ENGLISH 186B. The American Underground: Crime and the Criminal in American Literature. 5 Units.
The literary representation of crime and the criminal from postrevolutionary through contemporary American literature. Topics will include the enigma of the criminal personality; varieties of crime, from those underwritten by religious or ethical principle to those produced by the deformations of bias; the impact on narrative form of the challenge of narrating crime; and the significance attributed to gratuitous crime in the American cultural context.

ENGLISH 187C. The Evolution of the Feminist First-Person Essay, 2000-present. 3-5 Units.
The internet age has coincided with the rise of new and reinvented modes of nonfiction writing by women online. The feminist first-person essay (what simply goes by ¿personal essay¿ in the business) has transformed internet writing formally, politically, and economically. The explosion innpopularity and shareability of this nonfiction subgenre has generated a host of new media and catapulted a new coterie of women writers into prominence. Which authors have exerted the most influence upon this new subgenre, how does the emergence of the first-person essay by women signify a mainstreaming of feminist dialectic, and how has this emergence been received by both a popular readership and the media establishment?nThis discussion-based course will investigate how the growth of the feminist first-person essay has promoted new publications and modes of publication. It will trace the genesis of the online personal essay genre from public journals like LiveJournal, Blogspot, and Tumblr, via its codification in online publications like The Toast, The Rumpus, Gawker, Jezebel, Guernica, The Hairpin, The Awl, and xoJane, to its eventual breakthrough into established newspapers, magazines, and traditionally published memoirs and essay collections.nWe will investigate questions like: How can the rendering of one individual's story benefit the political mandate of the collective? What is the first person¿s effect, and affect, in interspersing an author¿s personal experience, and what feminist potential does it contain? How does the myth of journalistic ¿objectivity¿ conflict with the presentation of the first person, and how has this objectivity myth descended from patriarchal tropes of legitimation? What do the terms ¿confessional¿ and ¿silence-breaking¿ connote? How has social media simultaneously empowered these new modes of public feminist dialogue and also exposed feminist public intellectuals to alarming levels of harassment and abuse? How successfully has the personal essay subgenre acted in de-centering hegemonic identity structures including whiteness, class privilege, and heterosexuality? What role has the feminist first-person essay played in the emergence of heavily digitized political movements including Black Lives Matter and #MeToo? What is ¿trauma porn¿, and how does it interface with the capitalistic structures of the first-person essay economy; what problems arise when capitalism and confessionalism intersect?.
Same as: FEMGEN 187C

ENGLISH 190. Intermediate Fiction Writing. 5 Units.
Intermediate course in the craft and art of fiction writing. Students read a diverse range of short stories and novel excerpts, complete writing exercises, and submit a short and longer story to be workshopped and revised. Prerequisite: 90 or 91. NOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 190D. Dialogue Writing. 5 Units.
Study how dialogue develops character, reveals information, moves plots forward, and creates tension. Use of short story, novels, graphic novels, and films. Students will write many short assignments, one dialogue scene, and one longer story or script (10-20pages). Prerequisite: 90.nNOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 190E. Novel Writing Intensive. 5 Units.
The main requirement for this course is a 50,000 word novel. The course explores elements of novel writing including fictional structure, character creation, scene vs. summary, as well as description, narration, and dialogue. Students will read four to five short novels during the first half of the course and then participate in National Novel Writing Month, an international writing event. Students will additionally write synopses, outlines, character sketches, and search tirelessly for the novel's engine: its voice. Designed for any student who has always wanted to write a novel. Prerequisite: 90 or 91. NOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 190F. Fiction into Film. 5 Units.
Workshop. For screenwriting students. Story craft, structure, and dialogue. Assignments include short scene creation, character development, and a long story. How fictional works are adapted to screenplays, and how each form uses elements of conflict, time, summary, and scene. Prerequisite: 90.nNOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 190G. The Graphic Novel. 5 Units.
Interdisciplinary. Evolution, subject matter, form, conventions, possibilities, and future of the graphic novel genre. Guest lectures. Collaborative creation of a graphic novel by a team of writers, illustrators, and designers. Prerequisite: consent of instructor.

ENGLISH 190HF. Hybrid Forms: Creative Writing Across Genres. 5 Units.
What can we learn about fiction when it's written with the concision of a poem? What can we learn about the elliptical thinking of poetry through an extended essay? What freedoms do certain forms allow and take away? This writing workshop focuses on hybrid forms that cross traditional boundaries of genre. Students will read in a wide variety of models, including flash fiction and prose poetry and longer forms that combine genres. We'll discuss how these pieces challenge our expectations, then respond with our own writing. Weekly exercises will culminate in a longer multi-genre project that your share in workshop. NOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.
Same as: ENGLISH 192HF

ENGLISH 190L. Levinthal Tutorial in Fiction. 5 Units.
Undergraduate writers work individually with visiting Stegner Fellows in fiction. Students design their own curriculum; Stegner Fellows act as writing mentors and advisers. Students will meet once per week with the Stegner Fellow and also four times a quarter in discussions sections with other students and the Levinthal Program Coordinators. Times to be announced upon acceptance. Prerequisites: any course in 90 or 91 series; submitted application and manuscript.

ENGLISH 190LC. Levinthal Tutorial in Graphic Novel/Comics. 5 Units.
Undergraduate writers work individually with visiting Stegner Fellows in graphic novel/comics. Students design their own curriculum; Stegner Fellows act as writing mentors and advisers. Students will meet once per week with the Stegner Fellow and also four times a quarter in discussions sections with other students and the Levinthal Program Coordinators. Times to be announced upon acceptance. Prerequisites: any course in 90, 91, or 92 series; submitted application and manuscript.

ENGLISH 190M. Intermediate Queer Stories. 5 Units.
Intermediate Queer Stories is a workshop class open to any and all students, regardless of how they define their gender or sexuality. The goals of the class are to read widely in the canon of twentieth and twenty-first century queer prose literature, and to create work that draws on the styles, modes, and subjects of these writers. In the second half of the class, students will workshop a longer piece of their own writing that in some way draws upon the aesthetics or sensibilities of the writers we have read. This piece may be a short story, a personal essay, a chapter from a novel or memoir, or a piece that, in the spirit of queerness, blurs or interrogates standard demarcations of genre.

ENGLISH 190NS. Novel Salon. 5 Units.
Who better to discuss a book with than its author? In this course we will immerse ourselves in eight novels and meet with their authors to hear about their drafting, revising, and publishing experiences. We will read as writers¿for inspiration and craft¿and analyze novels for structure, scope, character development, dialogue, setting, style, and theme. We will examine how craft conventions are applied and subverted, while asking, ¿What makes a novel work?¿ Students will write about, discuss, and present the novels we read, participate in Q&A with visiting authors, and complete in-class writing exercises designed to inform and inspire. Note: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 190S. Short Story Salon. 5 Units.
Who better to discuss a book with than its author? In this course we will immerse ourselves in eight short story collections and meet with many of the authors of these collections to hear about their experience drafting, revising, and sending their books out into the world. We will read as writers for inspiration and craft and analyze the collections for structure, character development, dialogue, setting, language, and theme. We will pay particular attention to the range, arrangement, and architecture of the story collection as a whole. How does a collection become greater than the sum of its parts? How does an author manage so many stops and starts? We will write about, discuss, and present the collections we read, participate in Q&A with visiting authors, and complete weekly in-class writing exercises designed to inform and inspire our own writing.

ENGLISH 190SL. Light Through Language: Service Learning Through Creative Writing. 2-5 Units.
This course merges the art of creative writing with service learning in the greater Bay Area. Students travel to St. Basil School in Vallejo three times over the course of the quarter and complete 15 total hours of fieldwork, providing classroom guidance and support to 6th-8th grade Language Arts students. Students will also collaborate and lead short writing activities in the field, developing a vocabulary with which to discuss their own creativity while discovering what it means to be a socially-engaged artist. The course culminates in an on-campus public reading featuring Stanford students and St. Basil students. Note: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 190SW. Screenwriting Intensive. 5 Units.
The main requirement for this course is a full length film script. The course explores elements of screenwriting including beat structure, character creation, scene vs. montage, as well as description and dialogue. Students will read four to five screenplays during the first half of the course and then write a 90-page film script in the second half of the course. Students will additionally write synopses, treatments, character sketches, and beat sheets. Designed for any student who has always wanted to write a screenplay.

ENGLISH 190T. Special Topics in Intermediate Fiction Writing. 5 Units.
Focus on a particular topic or process. Work includes aspects of reading short stories and novels, writing at least 30-50 pages of fiction, and responding to peers' work in workshop. May be repeated for credit. Prerequisite: 91 or 90.

ENGLISH 190V. Reading for Writers. 5 Units.
Taught by the Stein Visiting Fiction Writer. Prerequisite: 90 or 91.

ENGLISH 190W. Contemporary Women Writers. 3-5 Units.
"Every word a woman writes changes the story of the world, revises the official version¿¿is this what sets contemporary women writers apart? How can we understand the relation between the radically unprecedented material such writers explore and ¿the official version¿? What do we find compelling in their challenging of structure, style, chronology, character? Our reading- and writing-intensive seminar will dig into the ways women writers confront, appropriate, subvert, or re-imagine convention, investigating, for example, current debate about the value of ¿dislikable¿ or ¿angry¿ women characters and their impact on readers. While pursuing such issues, you'll write a variety of both essayistic and fictional responses, each of which is designed to complicate and enlarge your creative and critical responsiveness and to spark ideas for your final project. By affirming risk-taking and originality throughout our quarter, seminar conversation will support gains in your close-reading practice and in articulating your views, including respectful dissent, in lively discourse¿in short, skills highly useful in a writer¿s existence. Our texts will come from various genres, including short stories, novels, essays, blog posts, reviews, memoir.
Same as: FEMGEN 190W

ENGLISH 190YA. Young Adult Fiction. 5 Units.
This is an intermediate course on the art and craft of fiction writing in the young adult genre. We will read widely in the genre. The aim of our reading will be to discover principles of craft, at the sentence level and at the narrative level, that generate powerful and enduring fiction. As we read, we will work to develop a writer's definition of YA. What are the differences between great YA and other great literature? What are the best ways to understand quality in a YA text? Within what bounds, stylistic, ethical, and otherwise, are we working as practitioners of the art form? Students will begin a young adult novel and submit pages from their work to the class on a regular basis. We will convene as a workshop to discuss one another's work.nNOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 191. Intermediate Creative Nonfiction. 5 Units.
Continuation of ENGLISH 91. Reading a variety of creative essays, completing short writing exercises, and discussing narrative techniques in class. Students submit a short (2-5 page) and a longer (8-20 page) nonfictional work to be workshopped and revised. Prerequisite ENGLISH 90 or ENGLISH 91. NOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 191DC. DCI Intermediate Memoir Workshop. 5 Units.
English 191DC will provide an intermediate-level course in the art and craft of writing memoir. It will build on those strategies for writing with meaning and insight about the events in our lives that were presented in English 91DC. During the term, we will read texts that broadly innovate within and outside of the formal traditions of the memoir form, finding new and exciting ways to represent personal experience. This section will also serve as the continuing examination and practice of the formal elements of the memoir. During the term, Fellows will write, workshop, present to the class, and revise at least two short pieces, one long pieces, and working drafts of excerpts. All workshops will serve as the springboard for our larger class conversation about theme and craft. During the quarter, we will meet in individual conferences. Throughout the quarter, creative work will be assigned in the form of essays, imitations, and revisions. Critical work will be assigned in the form of planning and leading class discussions, and writing and discussing critiques of colleagues¿ essays. A variety of creative prompts, critical exercises, and assigned readings will foster your understanding and appreciation of the memoir form, as well as your growth as a creative writer. Energetic, committed participation is a must.

ENGLISH 191L. Levinthal Tutorial in Nonfiction. 5 Units.
Undergraduate writers work individually with visiting Stegner Fellows in nonfiction. Students design their own curriculum; Stegner Fellows act as writing mentors and advisers. Students will meet once per week with the Stegner Fellow and also four times a quarter in discussions sections with other students and the Levinthal Program Coordinators. Times to be announced upon acceptance. Prerequisites: any course in 90 or 91 series; submitted application and manuscript.

ENGLISH 191T. Special Topics in Intermediate Creative Nonfiction. 5 Units.
Workshop. Special Topics continuation of 91. Focus is on forms of the essay. Works from across time and nationality for their craft and technique; experimentation with writing exercises. Students read and respond to each other's longer nonfiction projects. May be repeated for credit. Prerequisite: 91 or 90.nNOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 191V. Reading for Creative Non-Fiction Writers. 5 Units.
Taught by the Stein Visiting Writer. Prerequisite English 90 or 91. Permission number required to enroll.nNOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 192. Intermediate Poetry Writing. 5 Units.
Students will examine a diverse range of contemporary poetry. Students write and revise several poems that will develop into a larger poetic project. Prerequisite: 92. NOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 192AP. Intermediate Arab and Arab-American Poetry. 5 Units.
In this course, students will write and read widely, exploring various aspects of poetic craft, including imagery, metaphor, line, stanza, music, rhythm, diction, and tone. The course will focus primarily on the rich and varied tradition of Arab and Arab-American poets, with a special emphasis on contemporary poets exploring the intersections of cultural identity, nationhood, race, gender, and sexuality. The first half of the course will consist of close reading a selection of poems, while the second half of the course will consist of workshopping student writing. Through peer critique, students respond closely to the work of fellow writers in a supportive workshop. NOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 192HF. Hybrid Forms: Creative Writing Across Genres. 5 Units.
What can we learn about fiction when it's written with the concision of a poem? What can we learn about the elliptical thinking of poetry through an extended essay? What freedoms do certain forms allow and take away? This writing workshop focuses on hybrid forms that cross traditional boundaries of genre. Students will read in a wide variety of models, including flash fiction and prose poetry and longer forms that combine genres. We'll discuss how these pieces challenge our expectations, then respond with our own writing. Weekly exercises will culminate in a longer multi-genre project that your share in workshop. NOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 192L. Levinthal Tutorial in Poetry. 5 Units.
Undergraduate writers work individually with visiting Stegner Fellows in poetry. Students design their own curriculum; Stegner Fellows act as writing mentors and advisers. Students will meet once per week with the Stegner Fellow and also four times a quarter in discussions sections with other students and the Levinthal Program Coordinators. Times to be announced upon acceptance. Prerequisites: any course in 92 series; submitted application and manuscript.

ENGLISH 192PS. Poetry Salon. 5 Units.
Have you ever wanted to talk to the author after reading a favorite book? In this course, we will read seven collections of poetry and host their poets to discuss the processes behind each collection. We will read deeply (at the level of the poem) and consider widely (the ambition and arrangement of a book) with a focus on craft. Students will also write poems, participate in Q&A with visiting poets, and produce a small chapbook of their own work by the end of the quarter.

ENGLISH 192T. Topics in Intermediate Poetry Writing. 5 Units.
Generation and discussion of student poems. How to recognize a poem's internal structure; how to seek models for work. Students submit portfolio for group critique. May be repeated for credit. Prerequisite: ENGLISH 92.

ENGLISH 192V. The Occasions of Poetry. 5 Units.
Taught by the Mohr Visiting Poet. Prerequisite: 92. By application. Permission number required to enroll.

ENGLISH 194. Individual Research. 5 Units.
See section above on Undergraduate Programs, Opportunities for Advanced Work, Individual Research.

ENGLISH 194C. Curricular Practical Training. 1 Unit.
CPT course required for international students completing degree.

ENGLISH 195T. Oxford Tutorial. 6-7 Units.
This class is being offered in collaboration with the Stanford Program in Oxford, Bing Overseas Studies Program.nnTo greatly enhance the student¿s exposure and understanding of annspecific set of information . In each tutorial a large volume of materialnnwithin the specific subject matter is surveyed and synthesized by thennstudent. The tutorial reading lists are designed to increase students¿nnfamiliarity with key concepts, arguments, and techniques specific to thennfield of study they have chosen.nnTo develop specific learning skills through independent study andnncreative expression. Students are required to spend approximately 19nnhours per week in pursuit of their chosen topic. This study is supervisednnby the tutor and tested in the tutorial, but is also independently designednnand managed by the student. Such experience enables greaternnintellectual independence and confidence. Students are also required tonnproduce creative intellectual work on a weekly basis, most notably in thennform of a 2,000 word tutorial paper, that is scrutinized during the tutorialnnsession. The emphasis on multiple, successive, and productive works ofnnacademic agency increases the student¿s facility in expressing andnndefending sound academic judgements in the field. nnOpen to English majors and pre-approved participants only. Enrollment limited. All students must complete the course application at https://stanford.app.box.com/file/247002216612?s=elbmqjywtpyhdj0qwiopphxb1r49ieif and turn it in to Stephanie Solywoda (solywoda@stanford.edu) and Kimberly Marsh (ksmarsh@stanford.edu) by email. A permission code will be given to admitted students to register for the class.

ENGLISH 196A. Honors Seminar: Critical Approaches to Literature. 5 Units.
Overview of literary-critical methodologies, with a practical emphasis shaped by participants' current honors projects. Restricted to students in the English Honors Program.

ENGLISH 197. Seniors Honors Essay. 1-10 Unit.
In two quarters.

ENGLISH 198. Individual Work. 1-5 Unit.
Undergraduates who wish to study a subject or area not covered by regular courses may, with consent, enroll for individual work under the supervision of a member of the department. 198 may not be used to fulfill departmental area or elective requirements without consent. Group seminars are not appropriate for 198.

ENGLISH 198F. Hoffs-Roach Fiction into Film Tutorial. 2-5 Units.
Up to three undergraduate writers work with Fiction Into Film instructors. Students design their own curriculum, and Instructors act as writing mentors and advisers. Prerequisite: 190F. By application. Submitted manuscript required.

ENGLISH 199. Senior Independent Essay. 1-10 Unit.
Open, with department approval, to seniors majoring in non-Honors English who wish to work throughout the year on a 10,000 word critical or scholarly essay. Applicants submit a sample of their expository prose, proposed topic, and bibliography to the Director of Undergraduate Studies before preregistration in May of the junior year. Each student accepted is responsible for finding a department faculty adviser. May be repeated for credit.

ENGLISH 200C. Introduction to Manuscript Studies. 3-5 Units.
An introduction to manuscript studies as an interdisciplinary field. Students will learn to read original manuscripts from the medieval and Renaissance periods in different scripts, be able to situate them materially, culturally, and intellectually, and will work on final projects focused on specific manuscript objects from the Stanford Special Collections.

ENGLISH 201. The Bible and Literature. 5 Units.
Differences in translations of the Bible into English. Recognizing and interpreting biblical allusion in texts from the medieval to modern periods. Readings from the Bible and from British, Canadian, American, and African American, and African literature in English.

ENGLISH 203. Michel Foucault. 3-5 Units.
This course examines the middle period of the work of the philosopher, historian, and social theorist Michel Foucault. We will study Foucault¿s portrayal of the workings of power in modern societies, on topics of rule, reform, governance, population, psychology, and identity. The course will examine four major works tracing changes in Western Europe from roughly 1680 to 1980: The History of Sexuality, Vol. 1; Discipline and Punish; Security, Territory, Population; and The Birth of Biopolitics. The course considers Foucault as a historian and theorist, not as a literary critic. Some notice will be taken of the implications of his theories for literature, arts, and media, and for the daily life and self-conception of any individual in the late modern United States.

ENGLISH 204. Digital Humanities Across Borders. 3-5 Units.
What if you could take a handwritten manuscript, or a pile of 100 books, and map all the locations that are referenced, or see which characters interact with one another, or how different translators adapted the same novel -- without reading through each text to manually compile those lists? Digital humanities tools and methods make it possible, but most tools and tutorials assume the texts are in English. If you work with text (literature, historical documents, fanfic, tweets, or any other textual material) in languages other than English, DLCL 204 is for you. In 1:1 consultation with the instructor, you'll chart your own path based on the language you're working with, the format of the text, and what questions you'd like to try to answer. No previous programming or other technical experience is required, just a reading knowledge of a language other than English (modern or historical). We'll cover the whole process of using digital tools, from start to finish: text acquisition, text enrichment, and analysis/visualization, all of which have applications in a wide range of job contexts within and beyond academia. You'll also have the chance to hear from scholars who are doing digital humanities work in non-English languages, about their experience working across the technical and linguistic borders within their discipline, and within the broader DH community. While this course will be online and primarily asynchronous, there will be opportunities for students to meet synchronously throughout the quarter in language- and tool-based affinity groups.
Same as: COMPLIT 204A, DLCL 204

ENGLISH 206. Dante and the Romantics. 5 Units.
Dante Alighieri has profoundly influenced literary tradition. The Romantic poets admired Dante¿s capacity to find spiritual redemption in moments of personal crisis, melancholy, and alienation. They drew inspiration from his protomodern blend of lyric and epic, of romance and dream vision, and of allegorical pilgrimage and spiritual autobiography. Prophetic poets like P.B. Shelley and John Keats turned to Dante in their dying attempts at epic. William Blake illustrated The Divine Comedy and adapted the Dantean style of visionary world-making in his own illuminated poetry. T.S. Eliot (a belated Romantic in poems like ¿The Love Song of J. Alfred Prufrock¿) used Dante¿s technique of the dramatic monologue as a vehicle to explore character. This course will focus on The Inferno and its lasting legacy on the poetry of modernity.
Same as: ITALIAN 206

ENGLISH 218. Literature and the Brain. 3 Units.
Recent developments in and neuroscience and experimental psychology have transformed the way we think about the operations of the brain. What can we learn from this about the nature and function of literary texts? Can innovative ways of speaking affect ways of thinking? Do creative metaphors draw on embodied cognition? Can fictions strengthen our "theory of mind" capabilities? What role does mental imagery play in the appreciation of descriptions? Does (weak) modularity help explain the mechanism and purpose of self-reflexivity? Can the distinctions among types of memory shed light on what narrative works have to offer?.
Same as: COMPLIT 138, COMPLIT 238, ENGLISH 118, FRENCH 118, FRENCH 218, PSYC 126, PSYCH 118F

ENGLISH 222. Jane Austen and Virginia Woolf. 3-5 Units.
.

ENGLISH 224. Doing Literary History: Orwell in the World. 5 Units.
This course will bring together the disciplines of history and literary studies by looking closely at the work of one major twentieth-century author: the British writer and political polemicist George Orwell. In 1946, Orwell writes, "What I have most wanted to do throughout the past ten years is to make political writing into an art." In these years, Orwell writes about-- and often participates in or witnesses first-hand--a series of major events and crises. These include British imperialism in Burma, urban poverty in Europe, class inequality in England, the conflict between Socialism and Fascism in Spain, and the rise of totalitarianism in the Soviet Union. In engaging all of these events, Orwell experiments with different literary forms, moving between fiction and non-fiction, novel and autobiography, essay and memoir, manifesto and fable, literature and journalism. Few writers demand such sustained and equal attention to text and context: in this course we will move back-and-forth between Orwell's varied writing and the urgent social and political contexts it addresses.
Same as: HISTORY 200K

ENGLISH 224B. Nature, Race, and Indigeneity in the U.S. Imagination. 3-5 Units.
Nature is one of the weirdest words in the English language¿it can refer to human trait (it is in her nature), a nonhuman environment (we walked in nature, a divine power (mother nature), or a biological process (¿nature calls¿). Despite¿and indeed, because of¿these ambiguities, nature has played pivotal roles in the territory that has come to be known as the United States. In various guises, nature has inspired pilgrims, pioneers, and tourists. At the same time, nature has staged struggles between settlers and Natives, whites and racialized peoples, upper classes and working classes. As both a cultural construct and a material reality, therefore, nature has brought us together and torn us apart. In this seminar, we will learn how Natives, Latinxs, Blacks, whites, and other ethno-racial groups have depicted and dwelled in the U.S. By engaging with a variety of media¿from literature and visual art to law and public policy¿we will recover conflicting ideas of nature. And by reading in the environmental humanities¿including history, anthropology, and literary criticism¿we will discover how these ideas have impacted human and more-than-human worlds. While our inquiries will take us from prehistory to the present, they will converge on the future; now that we are destroying our ecosystems, extinguishing our fellow species, and transforming our atmosphere, we will ask, is there still such a thing as nature?.
Same as: AMSTUD 224

ENGLISH 225. Postcolonial Tragedy. 5 Units.
This course will survey debates on literary tragedy from a postcolonial perspective. Theories of tragedy from Aristotle, Martha Nussbaum, Judith Butler, the German Idealists and various others will be explored for viewpoints on tragedy that will in their turn be tested against a number of literary texts from the postcolonial literary tradition. Works by the Greeks, Shakespeare, Chinua Achebe, Wole Soyinka, Gabriel Garcia Márquez, Toni Morrison, Jean Rhys, Arundhati Roy, and Tayeb Salih will be explored for a working definition of postcolonial tragedy.nPlease note that knowledge of Shakespearean tragedy will be taken for granted in this class If you are not already acquainted with Shakespeare you are encouraged to familiarise yourself with Hamlet, Macbeth, King Lear, and Othello before taking the class. Frequent references will be made in class to these and other plays. Familiarity with Greek tragedy will also be useful during the first weeks of the course. Attention will be paid especially to Sophocles' Oedipus Rex and Philoctetes, Aeschylus's Oresteia, and Euripides's Medea.Any kind of familiarity with the Greeks is better than none at all, so please be sure to be at the very least acquainted with their central characters and plotlines.

ENGLISH 237. Before Novels. 5 Units.
What is at stake when we identify ancient, medieval, or early modern works as proto-novelistic, especially when such texts encompass the wondrous, the mystical, the factual, and/or didactic? What do the ¿prosaic¿ dimensions of prose fiction disclose about our conceptions or history, truth, or reality? Readings for this course may include (in English translation where applicable) Lucian, A True History; Kempe, The Book of Margery Kempe; Cervantes, Don Quixote; Nashe, The Unfortunate Traveller; Hooke, Micrographia; Defoe, A Journal of the Plague Year; Austen, Persuasion.

ENGLISH 251. Paradise Lost for Beginners. 3-5 Units.
A reading class for those studying Paradise Lost in its entirety for the first time. A close reading of this very long poem, plus study of pertinent Miltonic prose, as well as historical background and classic interpretive essays.

ENGLISH 251B. Paradise Lost. 5 Units.
A reading class for those studying Paradise Lost in its entirety for the first time. A close reading of this very long poem, plus study of pertinent Miltonic prose, as well as historical background and classic interpretive essays.

ENGLISH 253A. Historical Manuscript in Digital Contexts. 3-5 Units.
How can Digital Humanities technologies help explore the contexts of historical texts? How can the physical make-up of a source be coded and represented? What does a text's spatial dimension tell us? This class will use three DH technologies to explore the different contexts of medieval texts, TEI (Text Encoding Initiative), GIS (Geographic Information Systems) and IIIF (International Image Interoperability Framework). We will examine these through the multilingual tradition of the romance Floris and Blancheflour, as well as the study of online materials in Stanford's Special Collections.

ENGLISH 284H. What is Text?. 3-5 Units.
Words and images, sounds and symbols are transformed into meaning through different media, but how are we to understand the complexity of the messages we encounter daily? We shall explore the ways in which we decipher TEXT through different media (film, book), materials (paper, capacitive touchscreen), tools (pen, recorder, camera), and environment (cinema, bedroom, coffeeshop), and reflect on how we create texts by adaptation into different forms. Students will design their own new versions of well-known texts in this course.

ENGLISH 285. Decolonial Feminist Fiction. 3-5 Units.
Comparative race course focusing on the relationship between thematic content and literary form. By attending to occluded interpretations of the social world through the proliferating perspectives enabled by multifocal narrative structures, decolonial writers amplify the perspectives of marginalized persons in the service of creating a better world. Orange, There There; Evaristo, Girl, Woman, Other; Viramontes, Their Dogs Came with Them; Morrison, A Mercy; Egan, Visit from the Goon Squad; Erdrich, The Plagues of Doves.

ENGLISH 290. Advanced Fiction Writing. 5 Units.
Workshop critique of original short stories or novel. Prerequisites: manuscript, consent of instructor, and 190-level fiction workshop. nNOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.

ENGLISH 291. Advanced Creative Nonfiction. 5 Units.
English 291 takes as its occasion for your creative and critical development an examination of essays and book excerpts in various creative nonfiction subgenres. These essays and excerpts work within traditional and innovative forms to find new and exciting ways to represent personal experience. This course also serves as the continuing examination and practice of creative nonfiction in English 191. You will write, workshop, present to the class, and revise drafts of work. All workshops will serve as the springboard for larger class conversations about theme and craft. A variety of creative prompts, critical exercises, and assigned readings will foster your understanding and appreciation of creative nonfiction, as well as your growth as a creative writer. All prompts will move you toward a culminating project of realizing either an essay to submit for possible publication or a draft book-length synopsis and outline. This course is designed for students who have completed English 191. Students who have completed creative nonfiction writing course elsewhere or who have extensive other writing workshop experience may petition the instructor for enrollment. Energetic, committed participation is a must.

ENGLISH 292. Advanced Poetry Writing. 5 Units.
Focus is on generation and discussion of student poems, and seeking published models for the work.

ENGLISH 293. Literary Translation. 4 Units.
An overview of translation theories and practices over time. The aesthetic, ethical, and political questions raised by the act and art of translation and how these pertain to the translator's tasks. Discussion of particular translation challenges and the decision processes taken to address these issues. Coursework includes assigned theoretical readings, comparative translations, and the undertaking of an individual translation project.
Same as: DLCL 293

ENGLISH 302. Early Modern Prose Fictions. 3-5 Units.
The course considers the English and European prose fictions of the sixteenth and seventeenth centuries--romances, picaresques, pastorals, narratives of social class, and other genres--in the context of Renaissance and present-day theories of fiction. How is narrative form conditioned by social reality, and in turn how does it provide a zone for reflection on that reality in terms different from those of the more codified genres of drama and poetry?.

ENGLISH 305H. Readings in Close Reading. 5 Units.
The difference between reading and reading closely. Is close reading a specific method of literary criticism or theory, or does it describe a sensibility that can accompany any interpretation? Categories and frameworks for this ubiquitous, often undefined critical practice. Different, sometimes competing, traditions of close reading and recent critiques and alternatives. Texts could include Empson, Barthes, Auerbach, T. J. Clark, Adorno, Brooks, de Man, D. A. Miller, Helen Vendler.

ENGLISH 307D. Bringing the Archives to Life. 5 Units.
Introduction to the critical skills required for working in the archives. Students will be taught the core methods for working with archival sources, and will be trained in the transcription, editing, interpretation, and publication of primary textual materials. Our textual materials will be generically varied and chronologically diverse, and we shall move from late medieval to contemporary holdings in Stanford University Library¿s Special Collections, in other archives at Stanford, and in local private holdings.

ENGLISH 308. The Civilizing Process. 3-5 Units.
This course considers historical changes in daily life, as practices and everyday ethics as well as ideas and rhetoric, to conceptualize the large-scale meanings of modernity and modernization, from roughly 1600 to the present. Beginning with a series of major thinkers from the mid-20th century Norbert Elias, Hannah Arendt, Michel Foucault, and Pierre Bourdieu we will assess the compatibility of their accounts of modern changes to domains they call, variously, habitus, interdependence, power, action, work, labor, and life. The first half of the quarter will be devoted to these theories. The second half will consider recent work in literary history, social and cultural history, gender and sexual theory, which has attempted to demarcate and explain a number of revolutions in human practices located in different historical moments and phases of the ongoing modernizing process: an affective revolution, humanitarian revolution, rights revolution, sex-gender and sexual revolutions, towards revolutions, too, of practices concerning nonhuman entities and statistical or aggregated visions of humanity. Though oriented to literary-historical knowledge, reading will be heavily historical and social-scientific; students are expected to absorb and respect the disciplinary and methodological canons of various disciplines, and graduate students from outside literature will be welcomed. This course is for graduate students only.

ENGLISH 310B. The Riddle of the Author. 5 Units.
Even after "the death of the author," the author has proven hard to replace or ignore in literary analysis. The concept remains unsettled but inescapable. This course explores the ways authorship manifests itself within different types of scholarship, ranging from single-author criticism to biography. How do these different modes interpret, and represent, an author? How do they understand the relationship between writer, life and work? Possible authors include Auden, Bishop, Dickens, George Eliot, Ellison, Freud, Hurston, James, Orwell, and Plath.

ENGLISH 313. Performance and Performativity. 5 Units.
Performance theory through topics including: affect/trauma, embodiment, empathy, theatricality/performativity, specularity/visibility, liveness/disappearance, belonging/abjection, and utopias and dystopias. Readings from Schechner, Phelan, Austin, Butler, Conquergood, Roach, Schneider, Silverman, Caruth, Fanon, Moten, Anzaldúa, Agamben, Freud, and Lacan. May be repeated for credit.
Same as: FEMGEN 313, TAPS 313

ENGLISH 314. Epic and Empire. 5 Units.
Focus is on Virgil's Aeneid and its influence, tracing the European epic tradition (Ariosto, Tasso, Camoes, Spenser, and Milton) to New World discovery and mercantile expansion in the early modern period.
Same as: COMPLIT 320A

ENGLISH 316. American Story Cycles. 3-5 Units.
A survey of American literature told through the history of an important, complex, and neglected genre, the short story cycle, ranging from Washington Irving¿s Tales of a Traveller (1824) to William Faulkner's Go Down, Moses (1942). Other authors include Nathaniel Hawthorne, Edgar Allan Poe, Sarah Orne Jewett, Charles Chesnutt, Gertrude Stein, and Sherwood Anderson. The course will introduce students to the patterns of American literary development, its social and cultural contexts, and the major critical/theoretical lenses through which it has been understood. In particular, we will consider the unique formal qualities of the story cycle its liminal status between novel and story collection, its vacillation between unity and multiplicity, connection and disconnection in relation to broader American questions of identity and community.

ENGLISH 318. Pitching and Publishing in Popular Media. 1 Unit.
Most of the time, writing a pitch for a popular outlet just means writing an email. So why be intimidated? This course will outline the procedure for pitching essays and articles to popular media: how to convince an editor, agent, or anyone else that your idea is compelling, relevant, and deliverable. We'll take a holistic approach to self-presentation that includes presenting yourself with confidence, optimizing your social media and web platform, networking effectively, writing excellent queries and pitches, avoiding the slush pile, and perhaps most importantly, persevering through the inevitable self-doubt and rejection.We will focus on distinguishing the language, topics and hooks of popular media writing from those of academic writing, learn how to target and query editors on shortform pieces (personal essays, news stories, etc.), and explore how humanists can effectively self-advocate and get paid for their work.
Same as: DLCL 312, FEMGEN 312F

ENGLISH 318A. Advanced Workshop in Pitching and Publishing for Popular Media. 1 Unit.
Graduate students may self-determine a popular media project¿such as an essay, column/series of essays, podcast, agent query, or book proposal¿to be completed, with consent, under the mentorship of the Graduate Humanities Public Writing Project. Prerequisite: Pitching and Publishing in Popular Media (DLCL 312/ENG 318/FEMGEN 312F), approved project proposal. Students will determine their individual meeting schedule with the instructor, and will also convene for at least one group meeting.
Same as: FEMGEN 312G

ENGLISH 319A. The World, The Globe, The Planet. 5 Units.
This course will introduce graduate students to several competing concepts of world-circulating literatures and methodologies for studying them. As the title suggests, the course introduces students to more established ideas of "World Literature", concepts around "globalization" and its distinction from the World category, as well as ideas of Planetarity, including ecocritical approaches.

ENGLISH 327. Genres of the Novel. 5 Units.
Provides students with an overview of some major genres in the history of the modern novel, along with major theorists in the critical understanding of the form. Novels might include works by Cervantes, Defoe, Lafayette, Radcliffe, Goethe, Scott, Balzac, Melville, and Woolf. Theorists might include Lukacs, Bakhtin, Jameson, Gallagher, Barthes, Kristeva, and Bourdieu. *PLEASE NOTE: Course for graduate students only.*.
Same as: COMPLIT 327, FRENCH 327

ENGLISH 333. Philosophy, Literature, and the Arts Core Seminar. 2-4 Units.
This course serves as the Core Seminar for the PhD Minor in Philosophy, Literature, and the Arts. It introduces students to a wide range of topics at the intersection of philosophy with literary and arts criticism. The seminar is intended for graduate students. It is suitable for theoretically ambitious students of literature and the arts, philosophers with interests in value theory, aesthetics, and topics in language and mind, and other students with strong interest in the psychological importance of engagement with the arts. May be repeated for credit. In this year¿s installment, we focus on how artistic kinds or genres help set the terms on which individual works are experienced, understood, and valued, with special attention to lyric poetry and music.
Same as: DLCL 333, MUSIC 332, PHIL 333

ENGLISH 334B. Concepts of Modernity II: Culture, Aesthetics, and Society in the Age of Globalization. 5 Units.
Emphasis on world-system theory, theories of coloniality and power, and aesthetic modernity/postmodernity in their relation to culture broadly understood.
Same as: COMPLIT 334B, MTL 334B

ENGLISH 350. Law and Literature. 3-4 Units.
After its heyday in the 1970s and 1980s, many wondered whether the law and literature movement would retain vitality. Within the last decade there has, however, been an explosion of energy in the field, which has expanded beyond the boundaries of the literary text narrowly conceived and incorporated a range of other genres and humanistic approaches. Several recent or forthcoming books survey the range of emerging scholarship and the potential for new directions within the field. Using one of these--New Directions in Law and Literature (Oxford, 2017)--as a guide, this course will delve into a variety of topics that law and literature approaches can illuminate. These include, among others, conceptions of sovereignty and non-sovereign collectivities, the construction of the citizen and refugee, competing visions of marriage and its alternatives, law and the rhetorical tradition, and theoretical perspectives on intellectual property. Nearly every session will pair recent scholarship in the field with a literary or artistic work, ranging from Claudia Rankine's Citizen to Shakespeare's Merchant of Venice. Students taking the course for R credit can take the course for either 3 or 4 units, depending on the paper length. This class is limited to 22 students, with an effort made to have students from SLS (16 students will be selected by lottery) and six non-law students by consent of instructor. Elements used in grading: Attendance, Class Participation, Written Assignments, Final Paper. Cross-listed with the Law School (LAW 3517).

ENGLISH 350D. Constitutional Theory. 4-5 Units.
(Same as LAW 7014.) The guiding question of this course will be how we should think about the role of the U.S. Constitution in American law and American life. In considering this issue, we will address debates about constitutional interpretation (including both originalism and living constitutionalism), the nature and features of constitutional change within the American context, the role of federalism and the separation of powers in the constitutional scheme, and the nature of American constitutionalism as opposed to English and continental European models. We will tackle these debates in the context of some specific contemporary controversies about the Constitution, including: How do the civil rights movement and other social movements impact our understanding of the Constitution?; Does the Constitution reject a European-style inquisitorial process in favor of an Anglo-American vision of due process?; How important is consensus within the Supreme Court to establishing the legitimacy of constitutional meanings?; Why do we have nine Supreme Court justices, and; What is the Constitution, and how much does it include outside of the written document? Throughout we will be contemplating the extent to which our interpretation of the constitution depends on our vision of American democracy and the good society.

ENGLISH 357S. Edward Said, or Scholar vs Empire. 3-4 Units.
How can an intellectual fight forces far larger than a single individual? How can solidarity be an antidote to racism? Why is there no distinction between the local and the global? What is the scholar's role in an alienating political climate? Why are criticism and humanism necessary partners? The author of Orientalism and world-changing frameworks such as Travelling Theory, Permission To Narrate, and Contrapuntal Reading, as well as remarkable texts, such as On Late Style and Representations of the Intellectual, teaches us how criticism can blunt instruments of empire. In this course, students observe the journey of one scholar as he writes between worlds against imperialist supremacy and colonial logic. They'll move from Exile to Indigeneity, Silence to Music, Centers to Margins, Victimhood to Dignity, West to East, Peace to Terror, Theory to Practice, Politics to Knowledge, Religiosity to Secularism, Statehood to Fragmentation, and back.
Same as: CSRE 357, GLOBAL 157, TAPS 157S, TAPS 357S

ENGLISH 362E. Toni Morrison: Modernism, Postmodernism, and World Literature. 5 Units.
This course will take a close look at Toni Morrison's oeuvre to explore question of Modernism, Postmodernism, and World Literature. Texts to be looked at will include The Bluest Eye, Sula, Song of Solomon, Jazz, Paradise, Beloved, Love, and Playing in the Dark, among others.

ENGLISH 363C. Women and Puritanism. 5 Units.
dynamic between popular and established cultural forms, the formation of alternative and minority spiritualities, gender and historical representation, the relation of literary, religious, and political forms, and the advent of sentimentalism.

ENGLISH 368A. Imagining the Oceans. 5 Units.
How has Western culture constructed the world's oceans since the beginning of global ocean exploration? How have imaginative visions of the ocean been shaped by marine science, technology, exploration, commerce and leisure? Primary authors read might include Cook, Banks, Equiano, Ricketts, and Steinbeck; Defoe, Cooper, Verne, Conrad, Woolf and Hemingway; Coleridge, Baudelaire, Moore, Bishop and Walcott. Critical readings include Schmitt, Rediker and Linebaugh, Baucom, Best, Corbin, Auden, Sontag and Heller-Roazen. Films by Sekula, Painlevé and Bigelow. Seminar coordinated with a 2015 Cantor Arts Center public exhibition. Visits to the Cantor; other possible field trips include Hopkins Marine Station and SF Maritime Historical Park. Open to graduate students only.
Same as: COMPLIT 368A, FRENCH 368A

ENGLISH 372D. Comparative Studies in Race and Ethnicity. 3-5 Units.
an advanced introduction to concepts and debates within the multi-disciplinary field of comparative studies in race and ethnicity.
Same as: CSRE 301

ENGLISH 373. Shakespearean Tragedy and Its Critics. 3-5 Units.
A close study of Shakespeare's major tragedies and exemplary criticism from the Restoration to the present.

ENGLISH 375E. The Poetry of Animality: Romantic to Contemporary. 5 Units.
Animals provide poets with an opportunity to stop and pay attention, to reflect upon the difference as well as the mirroring registered in the encounter between human and non-human animals. Incorporating work from the interdisciplinary field of animal studies, this course will explore the poetry of animality: songbirds, swimmers, crawlers, predators, hoverers, hoppers, spinners, burrowers, scavengers, noble wanderers, climbers, slitherers, and all the feline tribe of tiger as represented in poetry from the Romantic period century through the contemporary.

ENGLISH 380A. Pro Seminar. 3 Units.
This is a workshop for students in years four and beyond who are transitioning from grad student to professional life. Topics include: job letters, revising seminar paper into journal article, how to focus dissertation topics. Cross-listed with TAPS.

ENGLISH 381B. Theories of Race and Ethnicity. 5 Units.
This interdisciplinary and reading-intensive course has been designed to familiarize you with the key scholars, as well as the most recent developments, in theorizations of race and ethnicity in literary and cultural studies, performance studies, visual studies, and philosophy. As we work our way through this diverse set of readings, particular attention will be paid to how the various approaches illuminate key issues under current debate: subjectivity, identity, biological difference, racial representation, affect, and political activism.

ENGLISH 388B. Critical Theory: New Direction. 3-5 Units.
A survey of five new(ish) approaches to literature and the visual/performing arts crucial for graduate work. These are: critical race theory, eco-criticism, ethics, sexuality and machine learning.
Same as: TAPS 388B

ENGLISH 390. Graduate Fiction Workshop. 3 Units.
For Stegner fellows in the writing program. May be repeated for credit. Prerequisite: consent of instructor.

ENGLISH 392. Graduate Poetry Workshop. 3 Units.
For Stegner fellows in the writing program. May be repeated for credit. Prerequisite: consent of instructor.

ENGLISH 394. Independent Study. 1-10 Unit.
Preparation for first-year Ph.D. qualifying examination and third year Ph.D. oral exam.

ENGLISH 395. Ad Hoc Graduate Seminar. 1-5 Unit.
Three or more graduate students who wish in the following quarter to study a subject or an area not covered by regular courses and seminars may plan an informal seminar and approach a member of the department to supervise it.

ENGLISH 396. Introduction to Graduate Study for Ph.D. Students. 5 Units.
Required for first-year graduate students in English. The major historical, professional, and methodological approaches to the study of literature in English.

ENGLISH 396L. Pedagogy Seminar I. 2 Units.
Required for first-year Ph.D students in English. Prerequisite for teaching required for Ph.D. students in English, Modern Thought and Literature and Comparative Literature. Preparation for surviving as teaching assistants in undergraduate literature courses. Focus is on leading discussions and grading papers.

ENGLISH 396P. Publication Workshop: The Article. 3-5 Units.
For English Ph.D. candidates only. A practical and theoretical study of the genre of the journal article, with critical reflection on its status as a gateway to academic professionalization and as a highly specialized form of public address. We will be reading articles published over the last decade across a diverse range of journals, focusing on issues surrounding methodology, style, tone, and audience. Participants will work on developing an already polished piece of writing into the form of an article publishable by a peer-reviewed publication. Admission by application in Autumn quarter .

ENGLISH 398. Research Course. 1-18 Unit.
A special subject of investigation under supervision of a member of the department. Thesis work is not registered under this number.

ENGLISH 398L. Literary Lab. 2-5 Units.
Gathering and analyzing data, constructing hypotheses and designing experiments to test them, writing programs [if needed], preparing visuals and texts for articles or conferences. Requires a year-long participation in the activities of the Lab.
Same as: COMPLIT 398L

ENGLISH 398Q. Qualifying Exam Workshop. 10 Units.
Qualifying Exam Workshop for 1st year cohort.

ENGLISH 398R. Revision and Development of a Paper. 4-5 Units.
Students revise and develop a paper under the supervision of a faculty member with a view to possible publication.

ENGLISH 398W. Orals, Publication and Dissertation Workshop. 2 Units.
For third- and fourth-year graduate students in English. Strategies for studying for and passing the oral examination, publishing articles, and for writing and researching dissertations and dissertation proposals. May be repeated for credit.

ENGLISH 399. Thesis. 1-10 Unit.
For M.A. students only. Regular meetings with thesis advisers required.

ENGLISH 802. TGR Dissertation. 0 Units.
.

ETHICS IN SOCIETY PROGRAM

The Program in Ethics in Society consists of an interdisciplinary honors program and a minor that are open to undergraduates in all majors.

Mission of the Program in Ethics in Society

The Program in Ethics in Society, which operates under the umbrella of the Bowen H. McCoy Family Center for Ethics in Society, is designed to foster scholarship, teaching, and moral reflection on fundamental issues in personal and public life. The program is grounded in moral and political philosophy, but it extends its concerns across a broad range of traditional disciplinary domains. The program is guided by the idea that ethical thought has application to current social questions and conflicts, and it seeks to encourage moral reflection and practice in areas such as business, technology, international relations, law, medicine, politics, science, and public service.

Ethics in Society Courses

Courses offered by the Program in Ethics in Society are listed under the subject code ETHICSOC on the Stanford Bulletin's ExploreCourses (https://explorecourses.stanford.edu/search/?q=ETHICSOC&view=catalog&page=0&academicYear=&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&collapse=&filter-departmentcode-ETHICSOC=on&filter-catalognumber-ETHICSOC=on&filter-coursestatus-Active=on&filter-catalognumber-ETHICSOC=on) web site. There are many course offerings at Stanford that address moral and political questions, only some of which are crosslisted by the Program in Ethics in Society.

Honors in Ethics in Society

The honors program in Ethics in Society offers undergraduates the opportunity to write a senior honors thesis within a community of interdisciplinary scholars. The course of study combines the analytical rigor of moral and political philosophy with the subject matter of each student's major to develop a sophisticated understanding of problems of social concern. Such problems include: the nature and implications of treating people with equal dignity and respect; the scope of liberty; the legitimacy of government; and the meaning of responsibility. The program poses these issues and others in the context of debates which arise in our common public life. It thus extends moral concern and reflection across disciplines such as medicine, law, economics, political science, sociology, computer science, international relations, and public policy.

Students in the program write honors theses on such topics, employing moral and political philosophy to address practical problems. Previous theses have considered questions such as the just distribution of health care, obligations to future generations, the role of ethical values in education, the moral implications of genetic engineering, and the relationship between gender inequality and the structures of work and family. Students in the program have won scholarships to graduate study including Marshall, Rhodes, and Fulbright fellowships. Others have taken the step from moral analysis to moral commitment, pursuing careers of public service.

The honors program in Ethics in Society is open to majors in every field and must be taken in addition to a department major. Applicants must declare a major before applying to the program. Applicants should have an overall GPA of B+ or higher. Required courses must be taken for a letter grade.

Students interested in pursuing honors in Ethics in Society can apply for early acceptance in spring of their sophomore year or apply at the regular deadline in mid-October of their junior year. Students should contact the program coordinator for more information and to begin the application process.

Requirements

		Units
Core Courses		
ETHICSOC 20	Introduction to Moral Philosophy	4-5
or ETHICSOC 170	Ethical Theory	
ETHICSOC 171	Justice	4-5
ETHICSOC 190	Ethics in Society Honors Seminar	4
Electives		
Two 4- or 5-unit undergraduate courses on a subject approved by the faculty director, designed to support research conducted for or connected to the honors thesis.		8-10
Thesis units spread across Autumn, Winter, and Spring quarters		**10**
ETHICSOC 200A	Ethics in Society Honors Thesis	
ETHICSOC 200B	Ethics in Society Honors Thesis	
ETHICSOC 200C	Ethics in Society Honors Thesis	

Thesis subject must be approved by the honors adviser and students must receive a grade of 'B+' or higher on their thesis to receive honors in Ethics in Society.

Typically, ETHICSOC 20 or ETHICSOC 170 and ETHICSOC 171 are completed before the Winter Quarter of the junior year. The Ethics in Society Honors Seminar (ETHICSOC 190) is offered only in Winter Quarter and must be taken in the junior year. Specialization courses can be completed at any time and courses taken prior to acceptance in the Program can be used to fulfill this requirement.

Students are expected to enroll in 10 units for writing their theses in their senior year (ETHICSOC 200A, ETHICSOC 200B, and EHTICSOC 200C). Up to 5 units may be taken in one quarter.

The honors thesis is generally due the first Monday in May. Students also complete preliminary and final thesis presentations in the senior year and an oral examination after submission of the thesis. To receive honors in Ethics in Society, students must fulfill all requirements, maintain a program GPA of 3.3 and receive a grade of 'B+' or higher on their thesis. Courses taken to fulfill the Ethics in Society honors requirements may be double-counted for any major.

Minor in Ethics in Society

The Ethics in Society minor is open to students in any department who wish to explore moral issues in personal and public life.

Students must declare the minor in Axess no later than the last day of Autumn Quarter of their senior year, although they are advised to declare sooner. Students are invited to discuss the minor with the program's faculty director and prepare a proposal that includes a list of courses planned to fulfill the requirements, and the focus of minor study. The faculty director approves this proposal. Students interested in pursuing a minor in Ethics in Society should contact the program coordinator, Pam Goodman <pgoodman@stanford.edu> for more information and to begin the planning process.

A minor in Ethics in Society requires six courses for a minimum of 25 units. All courses must be taken for a letter grade. Courses credited to either Ethics in Society minor track below may not be double-counted toward major or other minor requirements.*

*Exception: For Ethics and Technology track, majors in the Engineering School may double-count CS 182/CS 182W for their Technology in Society requirement.

General Track

		Units
Foundational Courses		
ETHICSOC 20	Introduction to Moral Philosophy	4-5
or ETHICSOC 170	Ethical Theory	
ETHICSOC/PHIL 171	Justice	4-5
ETHICSOC Electives		
Two ETHICSOC courses at the 100-level or above relating to the theme of the minor. For a complete list of courses, visit the ETHICSOC Courses link on the Ethics in Society webpage.		8-10
University-Wide Electives		
Two courses at the 100-level or above that address moral or political problems, in either theory or practice, relating to the student's chosen focus. These may be further ETHICSOC offerings OR courses with substantial ethical content taken in other departments of the university. The latter requires approval of the program's faculty director.		8-10

Students are encouraged to reflect on the coherence of their coursework, and organize it around a central theme such as environmental ethics, ethics and public policy, ethics and economics, ethics and health care, ethics and race, etc. Ethical Reasoning courses that fit the student's thematic focus may be counted towards the University-wide electives in the minor. Electives are normally taken after completion of the Foundational Courses.

Ethics and Technology Track

		Units
Foundational Courses		
ETHICSOC 20	Introduction to Moral Philosophy	5
or ETHICSOC 171	Justice	
ETHICSOC 182	Ethics, Public Policy, and Technological Change	5
ETHICSOC Elective One ETHICSOC elective at the 100 level or above.		4-5
University-Wide Electives		
Three electives to be selected from a list of undergraduate courses that currently count towards the elective requirement for the Ethics and Technology minor. These courses cover various topics on technology, human values, and social impact from an interdisciplinary perspective. For a complete list of applicable courses, please see the Ethics and Technology link on the Ethics in Society webpage, or click the Ethics & Technology Electives button at the top of this page.		

Ethics and Technology Electives

Students pursuing the Ethics and Technology minor are required to supplement the foundational courses with three additional electives from the list below. These courses cover various topics in technology, human values, and social innovation from an interdisciplinary perspective and are drawn from across the university. The list is updated regularly and students are invited to petition the program director to add a course that is not currently listed and coheres with the aims of the minor.

		Units
ANTHRO 119B	Tech Ethics and Ethnography: the human in human-computer interaction	3-5
ANTHRO 132C	Technology and Inequality	4-5
ANTHRO 138	Medical Ethics in a Global World: Examining Race, Difference and Power in the Research Enterprise	5
BIOE 122	BioSecurity and Pandemic Resilience	4-5
COMM 124	Truth, Trust, and Tech	4-5
COMM 154	The Politics of Algorithms	4-5
CS 80Q	Race and Gender in Silicon Valley	3
CS 152	Trust and Safety Engineering	3
CS 181	Computers, Ethics, and Public Policy	4
CS 184	Bridging Policy and Tech Through Design	3
ENGR 148	Principled Entrepreneurial Decisions	3
ETHICSOC 121N	Ethics of Sports	3
ETHICSOC 131X	Ethics in Bioengineering	3
ETHICSOC 178M	Introduction to Environmental Ethics	4-5
GENE 104Q	Law and the Biosciences	3
HISTORY 202F	Surveillance States and Societies	4-5
HUMBIO 174	Foundations of Bioethics	3
HUMBIO 178A	Intro to Disability Studies: Disability and Technology	5
INTLPOL 221	Politics of Data: Algorithmic Culture, Big Data, and Information Waste	3-4
INTLPOL 253	AI and Rule of Law: A Global Perspective	2-3
INTLPOL 257	Technology & Public Purpose: Practical Solutions for Innovation's Public Dilemmas	4-5
INTLPOL 268	Hack Lab	3
LAW 4026	Internet Platforms and Free Expression	2-3
LAW 4039	Regulating Artificial Intelligence	3
ME 267	Ethics and Equity in Transportation Systems	3
MED 73N	Scientific Method and Bias	3
MS&E 193	Technology and National Security: Past, Present, and Future	3-4
MS&E 234	Data Privacy and Ethics	3
MS&E 254	The Ethical Analyst	1-3
MS&E 296	Technology, Innovation and Modern War: Keeping America's Edge in an Era of Great Power Competition	4
MS&E 330	Law, Order, & Algorithms	3
NBIO 101	Social and Ethical Issues in the Neurosciences	2-4
PHIL 20N	Philosophy of Artificial Intelligence	3
PHIL 60	Introduction to Philosophy of Science	5
POLISCI 114S	International Security in a Changing World	5
PSYC 240	Designing for the 2 Billion: Leading Innovation in Mental Health	4
PSYCH 9N	Reading the Brain: the Scientific, Ethical, and Legal Implications of Brain Imaging	3
PUBLPOL 103F	Ethics of Truth in a Post-Truth World	2-3
PUBLPOL 134	Ethics on the Edge: Business, Non-Profit Organizations, Government, and Individuals	3
SOC 157	Ending Poverty with Technology	5
STS 1	The Public Life of Science and Technology	4
STS 190	Environment and Society	4
SYMSYS 115	Critique of Technology	3-4
SYMSYS 201	Digital Technology, Society, and Democracy	3

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies

relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a "credit" or "no credit" grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a "credit" or "satisfactory" grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

The Center for Ethics in society counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of undergraduate degree requirements that otherwise require a letter grade.

Other Requirements

If a student has difficulty completing an undergraduate degree requirement due to the COVID-19 pandemic, (e.g., a study abroad requirement, a laboratory research requirement), the student should consult with the Program Coordinator to identify academic options to fulfill degree requirements.

Ethics in Society (ETHICSOC) courses given this year are listed here by quarter offered. Each quarter is linked to ExploreCourses where you can find times and locations.

Autumn Quarter

ExploreCourses: ETHICSOC courses offered Autumn Quarter (https://explorecourses.stanford.edu/search/?q=ETHICSOC&view=catalog&page=0&academicYear=20162017&filter-term-Autumn=on&collapse=&filter-catalognumber-ETHICSOC=on&filter-coursestatus-Active=on&filter-catalognumber-ETHICSOC=on)

		Units
ETHICSOC 134R	The Ethics of Elections	5
ETHICSOC 171	Justice	4-5
ETHICSOC 172	History of Modern Moral Philosophy	4
ETHICSOC 199	Independent Studies in Ethics in Society	1-15
ETHICSOC 200A	Ethics in Society Honors Thesis	5
ETHICSOC 200B	Ethics in Society Honors Thesis	1-5
ETHICSOC 200C	Ethics in Society Honors Thesis	1-5
ETHICSOC 204	Introduction to Philosophy of Education	3

Winter Quarter

Courses

ETHICSOC 19SI. Philosophy of the Covid-19 Pandemic. 1 Unit.
The coronavirus pandemic has brought philosophical questions about morality, politics, and bioethics into sharp relief. These include questions about how to balance personal freedom and collective interests, how to allocate medical resources, and issues of justice in the treatment of ¿essential workers,¿ among other topics. This class provides a setting for in-depth, group discussion of these questions and more. It will bring together 10-20 students to read articles, hear from guest lecturers, and deliberate about these issues. The goal is to engage students in philosophy as an accessible, interpersonal practice of questioning concepts and refining our beliefs about the world around us. Prior study of philosophy is not needed. Although rooted in philosophy, this class will examine topics through the lens of economics, public policy, law, psychology, and more. Readings are drawn from both formal texts and thought-pieces/op-eds from mainstream publications. To apply for the class, please fill out this form by Friday September 4th, 2020 at 11:59pm PST https://forms.gle/iqtuQLLRuUv6V5cK7.

ETHICSOC 20. Introduction to Moral Philosophy. 5 Units.
What should I do with my life? What kind of person should I be? How should we treat others? What makes actions right or wrong? What is good and what is bad? What should we value? How should we organize society? Is there any reason to be moral? Is morality relative or subjective? How, if at all, can such questions be answered? Intensive introduction to theories and techniques in contemporary moral philosophy.
Same as: PHIL 2

ETHICSOC 24SI. Deliberative Discussions. 1 Unit.
Deliberative Discussions - spurred at the initiative of the ASSU Undergraduate Senate - aims to help depolarize our campus by offering the opportunity for students of different backgrounds, beliefs, and experiences to meet regularly and share in a process of mutual exchange. Rooted in the understanding that polarization can consist of both ideological and social distance, Deliberative Discussions will focus on what is necessary for respectful and deliberative listening and allow students to practice engaging diverse perspectives. Participants will learn about and from one another as they acquire skills and tools that will help them to transform contentious debates into meaningful exchange. Discussion topics will be informed by participant preference. For questions about enrolling, email Collin Anthony (canthony@stanford.edu).

ETHICSOC 25SI. Effective Altruism - How can we have the biggest positive impact?. 1 Unit.
This course will introduce students to Effective Altruism - a social movement and philosophy attempting to maximize positive social impact, along with critiques and questions raised by the philosophy. The course will feature lectures, discussions and workshops to think through how we can increase our impact with our careers, time, donations and other resources.

ETHICSOC 36X. Dangerous Ideas. 1 Unit.
Ideas matter. Concepts such as revolution, tradition, and hell have inspired social movements, shaped political systems, and dramatically influenced the lives of individuals. Others, like immigration, universal basic income, and youth play an important role in contemporary debates in the United States. All of these ideas are contested, and they have a real power to change lives, for better and for worse. In this one-unit class we will examine these "dangerous" ideas. Each week, a faculty member from a different department in the humanities and arts will explore a concept that has shaped human experience across time and space. Some weeks will have short reading assignments, but you are not required to purchase any materials.
Same as: ARTHIST 36, COMPLIT 36A, EALC 36, ENGLISH 71, FRENCH 36, HISTORY 3D, MUSIC 36H, PHIL 36, POLISCI 70, RELIGST 36X, SLAVIC 36

ETHICSOC 79. Ethics and Leadership in Public Service. 3-4 Units.
This course explores ethical questions that arise in public service work, as well as leadership theory and skills relevant to public service work. Through readings, discussions, in-class activities, assignments, and guest lectures, students will develop a foundation and vision for a future of ethical and effective service leadership. This course serves as a gateway for interested students to participate in the Haas Center's Public Service Leadership Program.
Same as: CSRE 126C, EDUC 126A, URBANST 126A

ETHICSOC 95. Leadership Challenges in Public Service. 4-5 Units.
This course will examine the responsibilities and challenges for those who occupy leadership roles in public service, broadly defined to include work in government, non-profit organizations, academia, and philanthropy, whether as a full- time career or part ¿time volunteer. Topics will include characteristics and styles of leadership, organizational dynamics, forms of influence, decision making, diversity, social change, and ethical responsibilities. Class sessions will include visitors who have occupied prominent leadership roles. Readings will include excerpts of relevant research, problems, exercises, and case studies. This course serves as a gateway for students participating in the Public Service Leadership Program, coordinated through the Haas Center. The class will be capped at 40 students.
Same as: PUBLPOL 111

ETHICSOC 105. Philosophy of Disability. 4 Units.
This course is an introduction to the ethical and political issues concerning disability. It aims to provide students with a set of tools to think critically about the connections between our ideas about disability, interpersonal relationships and political institutions. The first part of the course explores different conceptions of disability, and their relationships to ideas such as impairment, disorder, disease, dependence, disadvantage. The second part of the course considers how these conceptions interact with or shape the fundamental ideas around which our interpersonal relationships and common institutions are built. What standards of care and non-interference are reasonable? What does it mean to be independent, free, equal or have political representation? How might these ideas be re-configured if we conceptualize disability differently?.

ETHICSOC 106. Human Rights in Comparative and Historical Perspective. 3-5 Units.
This course examines core human rights issues and concepts from a comparative and historical perspective. In the beginning part of the course we will focus on current debates about the universality of human rights norms, considering the foundation of the international human rights regime and claims that it is a product of western colonialism, imperialism, or hegemony. We will then discuss a series of issues where the debates about universality are particularly acute: gender inequality and discrimination, sexual violence, child marriage and forced marriage more generally, and other related topics. We will also consider the way in which issues of gender-based violence arise in the context of internal and international conflicts.
Same as: CLASSICS 116, HUMRTS 106

ETHICSOC 109. On Condoned Violence: from Punishment to Pleasure. 4-5 Units.
This course offers students an introduction to issues surrounding the ways in which punishment and violence have been justified in the Western tradition. The readings address condoned violence broadly understood, covering a wide array of practices that produce suffering, but are considered justifiable to one degree or another by states or societies: judicial punishment, incarceration, the death penalty, pornography, and industrial farming practices, among others. We shall not discuss war, but will focus instead on domestic phenomena. By considering how such forms of violence are justified, the course aims to critically approach the notion that human societies are generally moving towards greater kindness and empathy. This seminar will bring together texts from political theory and political philosophy, legal theory, comparative politics, alongside several other cultural attachés. This class is on the Pre-Approved Courses list for the Political Science department.

ETHICSOC 121. History of Political Philosophy. 4 Units.
Nation-states issue legal commands, and wield overwhelming power to coercively enforce them. On one hand, this allows states to protect people from each other. On the other hand, what protects people from the state, even if is democratic, when it facilitates domination and oppression of some citizens by others? In this course we are introduced to authors grappling with these issues in the evolving canon of Western political philosophy from ancient Greece to the 20th century. This takes us through questions about obligation, the state, consent, rights, democracy, property, free speech, socialism, gender, race. Authors whose arguments we will study and scrutinize include Plato, Hobbes, Locke, Rousseau, Marx, Mill, Wollstonecraft, Douglass, and Rawls, along with critics and commentators.
Same as: PHIL 121, PHIL 221

ETHICSOC 121N. Ethics of Sports. 3 Units.
This seminar will be focused on the ethical challenges that are encountered in sport. We will focus on the moral and political issues that affect the world of sport and which athletes, coaches, sports commentators and fans are faced with. For instance, we will ask questions such as: what is a fair game (the ethics of effort, merit, success)? Is it ethical to train people to use violence (the ethics of martial arts)? Are divisions by gender categories justified and what should we think of gender testing? Is the use of animals in sport ever justified? Which forms of performance enhancements are acceptable in sport (the ethics of drug use and enhancements through technologies)? Should we ban sports that damage the players¿ health? Does society owe social support to people who hurt themselves while practicing extreme sports? nnThe class will be structured around small group discussions and exercises as well as brief lectures to introduce key moral and political concepts (such as fairness, equality, freedom, justice, exploitation, etc.). I will also bring guests speakers who are involved in a sport activity at Stanford or who have worked on sports as part of their academic careers. By the end of the seminar, students will have a good understanding of the various ethical challenges that surround the world of sport. They will be able to critically discuss sport activities, norms, modes of assessments and policies (on campus and beyond). They will also be prepared to apply the critical ethical thinking that they will have deployed onto other topics than sports. They will have been introduced to the normative approach to social issues, which consists in asking how things should be rather than describing how things are. They will be prepared to take more advanced classes in ethics, political theory, as well as moral and political philosophy.
Same as: PHIL 21N

ETHICSOC 124G. Introduction to Animal Ethics. 2 Units.
In this introductory course we will engage in an interdisciplinary discussion about the theoretical and applied aspects of animal rights and the ethical treatment of animals. This course will be of interest to a wide range of students: philosophers, political scientists, ecologists, environmental scientists, and biologists. Throughout the course we will focus on the following questions: Do non-human animals have moral status and do we have moral obligations toward them? If so, what grounds the moral status of animals? Are some animals `persons¿? Do we have the right to eat and farm animals, use them in scientific and cosmetic experiments, display them in zoos and circuses, and keep them as pets? Under what circumstances would these actions be permissible, if at all? Was animal domestication a mistake? Basic familiarity with ethical theory (such as covered by PHIL2) is recommended.
Same as: PHIL 24G

ETHICSOC 130. 20th Century Political Theory: Liberalism and its Critics. 5 Units.
In this course, students learn and engage with the debates that have animated political theory since the early 20th century. What is the proper relationship between the individual, the community, and the state? Are liberty and equality in conflict, and, if so, which should take priority? What does justice mean in a large and diverse modern society? The subtitle of the course, borrowed from a book by Michael Sandel, is "Liberalism and its Critics" because the questions we discuss in this class center on the meaning of, and alternatives to, the liberal idea that the basic goal of society should be the protection of individual rights. Readings include selections from works by John Rawls, Hannah Arendt, Robert Nozick, Michael Sandel, Iris Marion Young, and Martha Nussbaum. No prior experience with political theory is necessary.
Same as: PHIL 171P, POLISCI 130

ETHICSOC 130A. Classical Seminar: Origins of Political Thought. 3-5 Units.
Political philosophy in classical antiquity, centered on reading canonical works of Thucydides, Plato, Aristotle against other texts and against the political and historical background. Topics include: interdependence, legitimacy, justice; political obligation, citizenship, and leadership; origins and development of democracy; law, civic strife, and constitutional change.
Same as: CLASSICS 181, CLASSICS 381, PHIL 176A, PHIL 276A, POLISCI 230A, POLISCI 330A

ETHICSOC 131S. Modern Political Thought: Machiavelli to Marx and Mill. 5 Units.
This course offers an introduction to the history of Western political thought from the late fifteenth through the nineteenth centuries. We will consider the development of ideas like individual rights, government by consent, and the protection of private property. We will also explore the ways in which these ideas continue to animate contemporary political debates. Thinkers covered will include: Niccolò Machiavelli, Thomas Hobbes, John Locke, Jean-Jacques Rousseau, Edmund Burke, John Stuart Mill, and Karl Marx.
Same as: POLISCI 131L

ETHICSOC 131X. Ethics in Bioengineering. 3 Units.
Bioengineering focuses on the development and application of new technologies in the biology and medicine. These technologies often have powerful effects on living systems at the microscopic and macroscopic level. They can provide great benefit to society, but they also can be used in dangerous or damaging ways. These effects may be positive or negative, and so it is critical that bioengineers understand the basic principles of ethics when thinking about how the technologies they develop can and should be applied. On a personal level, every bioengineer should understand the basic principles of ethical behavior in the professional setting. This course will involve substantial writing, and will use case-study methodology to introduce both societal and personal ethical principles, with a focus on practical applications.
Same as: BIOE 131

ETHICSOC 133. Ethics and Politics of Public Service. 3-5 Units.
Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford.
Same as: CSRE 178, PHIL 175A, PHIL 275A, POLISCI 133, PUBLPOL 103D, URBANST 122

ETHICSOC 134. Ethics for Activists. 5 Units.
Activists devote sustained effort and attention toward achieving particular goals of social and political change. Do we have an ethical obligation to be activists? And how should those who do choose to be activists (for whatever reason) understand the ethics of that role? Questions discussed in this course may include: When is civil disobedience appropriate, and what does it entail? Should activists feel constrained by obligations of fairness, honesty, or civility toward those with whom we disagree? Are there special ethical considerations in activism on behalf of those who cannot advocate for themselves? What is solidarity and what does it require of us? Students in this course will develop skills in analyzing, evaluating, and constructing logical arguments about ethical concerns related to activism, but class discussions will also address the potential limitations of logical argument in ethical and political reasoning.
Same as: POLISCI 134

ETHICSOC 134R. The Ethics of Elections. 5 Units.
Do you have a duty to vote? Should immigrants be allowed to vote? Should we make voting mandatory? How (if at all) should we regulate campaign finance? Should we even have elections at all? In this course, we will explore these and other ethical questions related to electoral participation and the design of electoral institutions. We will evaluate arguments from political philosophers, political scientists, and politicians to better understand how electoral systems promote important democratic values and how this affects citizens' and political leaders' ethical obligations. We will focus, in particular, on issues in electoral design that have been relevant in recent US elections (e.g. gerrymandering), though many of the ethical issues we will discuss in this course will be relevant in any electoral democracy.
Same as: POLISCI 132A

ETHICSOC 135. Citizenship. 5 Units.
This class begins from the core definition of citizenship as membership in a political community and explores the many debates about what that membership means. Who is (or ought to be) a citizen? Who gets to decide? What responsibilities come with citizenship? Is being a citizen analogous to being a friend, a family member, a business partner? How can citizenship be gained, and can it ever be lost? These debates figure in the earliest recorded political philosophy but also animate contemporary political debates. This class uses ancient, medieval, and modern texts to examine these questions and different answers given over time. We¿ÄôIl pay particular attention to understandings of democratic citizenship but look at non-democratic citizenship as well. Students will develop and defend their own views on these questions, using the class texts as foundations. No experience with political philosophy is required or expected, and students can expect to learn or hone the skills (writing / reading / analysis) of political philosophy.
Same as: PHIL 135X, POLISCI 135

ETHICSOC 135F. Deliberative Democracy and its Critics. 3-5 Units.
This course examines the theory and practice of deliberative democracy and engages both in a dialogue with critics. Can a democracy which emphasizes people thinking and talking together on the basis of good information be made practical in the modern age? What kinds of distortions arise when people try to discuss politics or policy together? The course draws on ideas of deliberation from Madison and Mill to Rawls and Habermas as well as criticisms from the jury literature, from the psychology of group processes and from the most recent normative and empirical literature on deliberative forums. Deliberative Polling, its applications, defenders and critics, both normative and empirical, will provide a key case for discussion.
Same as: AMSTUD 135, COMM 135, COMM 235, COMM 335, POLISCI 234P, POLISCI 334P

ETHICSOC 135R. The Ethics of Democratic Citizenship. 5 Units.
We usually think about democratic citizenship in terms of rights and opportunities, but are these benefits of democracy accompanied by special obligations? Do citizens of a democracy have an obligation to take an interest in politics and to actively influence political decision making? How should citizens respond when a democracy¿s laws become especially burdensome? Do citizens of a democracy have a special obligation to obey the law? In this course, we will read classical and contemporary political philosophy including Plato's Crito and King's "Letter from a Birmingham Jail" to explore how political thinkers have understood and argued for the ethics of citizenship. Students in this course will draw on these materials to construct their own arguments, and to identify and assess implicit appeals to the ethics of citizenship in popular culture and contemporary public discourse, from The Simpsons to President Obama's speeches.
Same as: POLISCI 135D

ETHICSOC 136R. Introduction to Global Justice. 4 Units.
This course explores the normative demands and definitions of justice that transcend the nation-state and its borders, through the lenses of political justice, economic justice, and human rights. What are our duties (if any) towards those who live in other countries? Should we be held morally responsible for their suffering? What if we have contributed to it? Should we be asked to remedy it? At what cost? These are some of the questions driving the course. Although rooted in political theory and philosophy, the course will examine contemporary problems that have been addressed by other scholarly disciplines, public debates, and popular media, such as immigration and open borders, climate change refugees, and the morality of global capitalism (from exploitative labor to blood diamonds). As such, readings will combine canonical pieces of political theory and philosophy with readings from other scholarly disciplines, newspaper articles, and popular media.
Same as: INTNLREL 136R, PHIL 76, POLISCI 136R, POLISCI 336

ETHICSOC 145. The Ethics of Migration. 4 Units.
How should states treat immigrants and would-be immigrants? On what grounds can immigration be justly restricted, and through what means? This module engages with these complex questions by offering a broad overview of key issues in the ethics of migration and their relation to public policy. Guided by the tools of contemporary political philosophy, you will reflect closely upon a series of pressing issues including the basis of the state¿s right to exclude non-citizens, the prospect of open borders and their tensions with egalitarian justice, the human right to free movement, and the rights of refugees and undocumented migrants.

ETHICSOC 151. The First Amendment: Freedom of Speech and Press. 4-5 Units.
The First Amendment: Freedom of Speech and Press (7084): Introduction to the constitutional protections for freedom of speech, press, and expressive association. All the major Supreme Court cases dealing with issues such as incitement, libel, hate speech, obscenity, commercial speech, and campaign finance. There are no prerequisites, but a basic understanding of American government would be useful. This course is crosslisted in the university and undergraduates are eligible to take it. Elements used in grading: Law students will be evaluated based on class participation and a final exam. Non-law students will be evaluated on class participation, a midterm and final exam, and nonlaw students will participate in a moot court on a hypothetical case. Non-law students will also have an additional one hour discussion section each week led by a teaching assistant. Cross-listed with Communication (COMM 151, COMM 251) and Political Science (POLISCI 125P). nnnClass time will be 11:10-12:40 on Mondays and Wednesdays.
Same as: COMM 151, COMM 251, POLISCI 125P

ETHICSOC 155. The Ethics And Politics of Effective Altruism. 4-5 Units.
What should I do? How should I live? These are the central questions that practical ethics seeks to answer. "Effective altruism" (EA), a growing school of thought and popular social movement, offers a clear and attractive response. It holds that we should try to do the best that we can for the world, and that we should do so on the basis of careful reasoning and reliable evidence. In a short amount of time, effective altruism has become a popular theoretical framework for thinking about our duties to others, and for navigating difficult practical questions. How much do I owe to others? To whom do I have obligations? How should I choose amongst different strategies for discharging these obligations? The course examines the theoretical assumptions behind effective altruism, its internal debates, external criticisms, and rival alternatives. We explore these questions in part by focusing on certain case studies that highlight different elements of the EA approach: organ donation, career choice, animal treatment, and global poverty. Guest lecturers, representing prominent advocates and critics of effective altruism, may also be added to the schedule, pending availability.

ETHICSOC 170. Ethical Theory. 4 Units.
This course explores some major topics/themes in ethical theory from the middle of the 20th century through the present. We'll read philosophy by John Rawls, Thomas Nagel, Bernard Williams, Christine Korsgaard, G.E.M. Anscombe, Philipa Foot, and others. Substantial background in moral philosophy will be assumed. Students should have completed Philosophy 2 (or its equivalent ¿ if you have questions, please contact the instructor).
Same as: PHIL 170, PHIL 270

ETHICSOC 171. Justice. 4-5 Units.
In this course, we explore three sets of questions relating to justice and the meaning of a just society: (1) Liberty: What is liberty, and why is it important? Which liberties must a just society protect? (2) Equality: What is equality, and why is it important? What sorts of equality should a just society ensure? (3) Reconciliation: Are liberty and equality in conflict? If so, how should we respond to the conflict between them? We approach these topics by examining competing theories of justice including utilitarianism, libertarianism/classical liberalism, and egalitarian liberalism. The class also serves as an introduction to how to do political philosophy, and students approaching these topics for the first time are welcome. Political Science majors taking this course to fulfill the WIM requirement should enroll in POLISCI 103.
Same as: PHIL 171, POLISCI 103, POLISCI 336S, PUBLPOL 103C

ETHICSOC 172. History of Modern Moral Philosophy. 4 Units.
prerequisites: Phil 2 and Phil 80. Grads enroll in 272.
Same as: PHIL 172, PHIL 272

ETHICSOC 172C. The Ethics of Care. 4 Units.
Since the 1970s, a number of feminists, socialists, and virtue theorists have directed their attention to the importance of care in practical philosophy. In this class, we will focus on the ambition to employ the notion of care in systematic political ethics. We will address the relationship between care and integrity, care and community, care and justice, and the role of care in thinking about the ethics of economics. Students will be evaluated on the basis of three essays. There will be no final exam. All readings will be available online; no books required.
Same as: PHIL 172C

ETHICSOC 173. Introduction to Feminist Philosophy. 4 Units.
If feminism is a political practice aimed at ending patriarchy, what is the point of feminist philosophy? This course provides an introduction to feminist philosophy by exploring how important theoretical questions around sex and gender bear on practical ethical and political debates. The first part of the course will examine some of the broader theoretical questions in feminist philosophy, including: the metaphysics of gender, the demands of intersectionality, and feminist critiques of capitalism and liberalism. Questions will include: How should we understand the category `woman¿? How does gender intersect with other axes of oppression? Is capitalism inherently patriarchal? The second part of the course will address more applied topics of ethical and political debate, such as: objectification, pornography, consent, markets in women¿s sexual and reproductive labor, and the institution of marriage.
Same as: FEMGEN 173R, PHIL 90R

ETHICSOC 174. Ethics in a Human Life. 4 Units.
Ethical questions pervade a human life from before a person is conceived until after she dies, and at every point in between. This course raises a series of ethical questions, following along the path of a person's life - questions that arise before, during, and after she lives it. We will explore distinctive questions that a life presents at each of several familiar stages: prior to birth, childhood, adulthood, death, and even beyond. We will consider how some philosophers have tried to answer these questions, and we will think about how answering them might help us form a better understanding of the ethical shape of a human life as a whole.
Same as: HUMBIO 174A, PHIL 74A

ETHICSOC 174B. Universal Basic Income: the philosophy behind the proposal. 3 Units.
Universal basic income (or UBI) is a regular cash allowance given to all members of a community without means test, regardless of personal desert, and with no strings attached. Once a utopian proposal, the policy is now discussed and piloted throughout the world. The growth of income and wealth inequalities, the precariousness of labor, and the persistence of abject poverty have all been important drivers of renewed interest in UBI in the United States. But it is without a doubt the fear that automation may displace workers from the labor market at unprecedented rates that explains the revival of the policy in recent years, including by many in or around Silicon Valley. Among the various objections to the proposal, one concerns its moral adequacy: Isn't it fundamentally unjust to give cash to all indiscriminately rather than to those who need it and deserve it? Over the years, a variety of scholars have defended the policy on moral grounds, arguing that UBI is a tool of equality, liberal freedom, republican freedom, gender equity, or racial equity. Many others have attacked UBI on those very same grounds, making the case that alternative policy proposals like the job guarantee, means-tested benefits, conditional benefits, or reparations should be preferred. Students will learn a great deal about political theory and ethics in general but always through the specific angle of the policy proposal, and they will become experts on the philosophy, politics and economics of UBI. The seminar is open to undergraduate and graduate students in all departments. There are no pre-requisites.
Same as: ETHICSOC 274B, PHIL 174B, PHIL 274B, POLISCI 134E, POLISCI 338

ETHICSOC 174E. Egalitarianism: A course on the history and theory of egalitarianism and anti-egalitarianism. 4 Units.
Egalitarianism is a conception of justice that takes the value of equality to be of primary political and moral importance. There are many different ways to be an egalitarian - it all depends on what we take to be the currency of egalitarian justice. Are we trying to equalize basic rights and liberties, or resources, opportunities, positions, status, respect, welfare, or capabilities? Is equality really what we should try to achieve in a just society? Or should we just make sure everyone has enough? Why do egalitarians think that such society would still be unjust; and how do they proceed to argue for equality?nnThis class will introduce students to egalitarian and anti-egalitarian thought by looking both at the history of egalitarian thinking and at contemporary accounts in defense of equality. It will provide an in depth introduction to the concepts that are used when inequalities are discussed by philosophers, economists, scientists and politicians. The class will attest of the varieties of approaches and perspectives to equality. For instance, we will learn from the 19th century debate on racial inequalities to understand how anti-egalitarian discourses are constructed; we will look into Rousseau's conception of social equality in the Second Discourse and the Social Contract; and we will engage with contemporary egalitarian theories by studying Rawlsian and post-Rawlsian forms of egalitarianism.
Same as: PHIL 174E, PHIL 274E, POLISCI 138E

ETHICSOC 174L. Betrayal and Loyalty, Treason and Trust. 2 Units.
The main topic of the seminar is Betrayal: its meaning as well as its moral, legal and political implications. We shall discuss various notions of betrayal: Political (military) betrayal such as treason, Religious betrayal with Judas as its emblem, but also apostasy (converting one's religion) which is regarded both as a basic human right and also as an act of betrayal, social betrayal - betraying class solidarity as well as Ideological betrayal - betraying a cause. On top of political betrayal we shall deal with personal betrayal, especially in the form of infidelity and in the form of financial betrayal of the kind performed by Madoff. The contrasting notions to betrayal, especially loyalty and trust, will get special consideration so as to shed light or cast shadow, as the case may be, on the idea of betrayal. The seminar will focus not only on the normative aspect of betrayal - moral or legal, but also on the psychological motivations for betraying others. The seminar will revolve around glaring historical examples of betrayal but also use informed fictional novels, plays and movies from Shakespeare and Pinter, to John Le Carre. SAME AS LAW 520.
Same as: ETHICSOC 274L, PHIL 174L, PHIL 274L

ETHICSOC 175B. Philosophy of Law. 4 Units.
This course will explore foundational issues about the nature of law and its relation to morality, and about legal responsibility and criminal punishment. Prerequisite: graduate student standing in philosophy or, for others, prior course work in philosophy that includes Philosophy 80.
Same as: PHIL 175, PHIL 275

ETHICSOC 175W. Philosophy of Law: Protest, Punishment, and Racial Justice. 4 Units.
In this course, we will examine some of the central questions in philosophy of law, including: What is law? What gives law its authority? Must we obey the law? If so, when and why? How should we understand and respond to unjust laws? When is civil disobedience morally permissible? Is civil disobedience ever morally required?nWhat is punishment for? What are prisons for? What is the case for reparations?.
Same as: CSRE 175W, PHIL 175W, PHIL 275W

ETHICSOC 175X. Philosophy of Public Policy. 4 Units.
From healthcare to voting reforms, social protection and educational policies, public policies are underpinned by moral values. When we debate those policies, we typically appeal to values like justice, fairness, equality, freedom, privacy, and safety. A proper understanding of those values, what they mean, how they may conflict, and how they can be weighed against each other is essential to developing a competent and critical eye on our complex political world. We will ask questions such as: Is compulsory voting justified? Should children have the right to vote? Is affirmative action just? What is wrong with racial profiling? What are the duties of citizens of affluent countries towards migrants? Do we have a right to privacy? Is giving cash to all unconditionally fair? This class will introduce students to a number of methods and frameworks coming out of ethics and political philosophy and will give students a lot of time to practice ethically informed debates on public policies. At the end of this class, students should have the skills to critically examine a wide range of diverse policy proposals from the perspective of ethics, moral and political philosophy. There are no prerequisites. Undergraduates and graduates from all departments are welcome to attend.
Same as: PHIL 175B, PHIL 275B, POLISCI 135E, POLISCI 235E, PUBLPOL 177

ETHICSOC 176. Political Philosophy: The Social Contract Tradition. 4 Units.
(Graduate students register for 276.) What makes political institutions legitimate? What makes them just? When do citizens have a right to revolt against those who rule over them? Which of our fellow citizens must we tolerate?Surprisingly, the answers given by some of the most prominent modern philosophers turn on the idea of a social contract. We will focus on the work of Hobbes, Locke, Rousseau, and Rawls.
Same as: PHIL 176, PHIL 276, POLISCI 137A, POLISCI 337A

ETHICSOC 178M. Introduction to Environmental Ethics. 4-5 Units.
How should human beings relate to the natural world? Do we have moral obligations toward non-human animals and other parts of nature? And what do we owe to other human beings, including future generations, with respect to the environment? The first part of this course will examine such questions in light of some of our current ethical theories: considering what those theories suggest regarding the extent and nature of our environmental obligations; and also whether reflection on such obligations can prove informative about the adequacy of our ethical theories. In the second part of the course, we will use the tools that we have acquired to tackle various ethical questions that confront us in our dealings with the natural world, looking at subjects such as: animal rights; conservation; economic approaches to the environment; access to and control over natural resources; environmental justice and pollution; climate change; technology and the environment; and environmental activism.
Same as: ETHICSOC 278M, PHIL 178M, PHIL 278M, POLISCI 134L

ETHICSOC 179W. Du Bois and Democracy. 4 Units.
In this course, we will work together to develop a detailed and comprehensive understanding of the political philosophy of W. E. B. Du Bois, giving special attention to the development of his democratic theory. We will do so by reading a number of key texts by Du Bois as well as contemporary scholarship from philosophy and cognate fields.
Same as: CSRE 179W, PHIL 179W, PHIL 279W

ETHICSOC 181. Architecture, Space, and Politics. 4-5 Units.
We spend most of our lives in buildings and cities that are planned by architects and urbanists. What are the normative considerations that should guide how these spaces are designed? What social role should architecture aim to play? and what criteria should we use to assess whether an architectural intervention is successful or not? This course seeks to address these questions by bringing architecture in conversation with contemporary normative political theory. It examines both how political theory can inform our thinking about architecture, and how the work of architects -- with its attention to the specificities of the built environment -- can advance our thinking about politics.

ETHICSOC 182. Ethics, Public Policy, and Technological Change. 5 Units.
Examination of recent developments in computing technology and platforms through the lenses of philosophy, public policy, social science, and engineering. Course is organized around four main units: algorithmic decision-making and bias; data privacy and civil liberties; artificial intelligence and autonomous systems; and the power of private computing platforms. Each unit considers the promise, perils, rights, and responsibilities at play in technological developments. Prerequisite: CS106A.
Same as: COMM 180, CS 182, PHIL 82, POLISCI 182, PUBLPOL 182

ETHICSOC 185M. Contemporary Moral Problems. 4-5 Units.
This course is an introduction to contemporary ethical thought with a focus on the morality of harming others and saving others from harm. It aims to develop students' ability to think carefully and rationally about moral issues, to acquaint them with modern moral theory, and to encourage them to develop their own considered positions about important real-world issues. In the first part of the course, we will explore fundamental topics in the ethics of harm. Among other questions, we will ask: How extensive are one's moral duties to improve the lives of the less fortunate? When is it permissible to inflict harm on others for the sake of the greater good? Does the moral permissibility of a person's action depend on her intentions? Can a person be harmed by being brought into existence? In the second part of the course, we will turn to practical questions. Some of these will be familiar; for example: Is abortion morally permissible? What obligations do we have to protect the planet for the sake of future generations? Other questions we will ask are newer and less well-trodden. These will include: How does the availability of new technology, in particular artificial intelligence, change the moral landscape of the ethics of war? What moral principles should govern the programming and operation of autonomous vehicles?.
Same as: PHIL 72, POLISCI 134P

ETHICSOC 187. The Ethics, Law and Politics of Artificial Intelligence. 4 Units.
This course explores cutting-edge disputes in the ethics, law and politics of artificial intelligence. We will examine the relation between foundational questions about fairness, autonomy, corporate responsibility, and the value of human life; and practical questions about the ethical design and regulation of emerging technologies. Topics include superintelligence and existential risk, explainable intelligent systems, nudging and targeted advertising, and algorithmic fairness.

ETHICSOC 190. Ethics in Society Honors Seminar. 4 Units.
For students planning honors in Ethics in Society. Methods of research. Students present issues of public and personal morality; topics chosen with advice of instructor.
Same as: PHIL 178

ETHICSOC 195. Ethics in Society Workshop. 1 Unit.
Workshop for Ethics in Society seniors completing their honors thesis.

ETHICSOC 199. Independent Studies in Ethics in Society. 1-15 Unit.
May be repeated for credit.

ETHICSOC 200A. Ethics in Society Honors Thesis. 1-5 Unit.
Limited to Ethics in Society honors students, who must enroll once in 200A, once in 200B, and once in 200C in their senior year. Students enrolling in 200A for less than 3 units must get approval from the faculty director.

ETHICSOC 200B. Ethics in Society Honors Thesis. 1-5 Unit.
Limited to Ethics in Society honors students, who must enroll once in 200A, once in 200B, and once in 200C in their senior year. Students enrolling in 200B for less than 3 units must get approval from the faculty director.

ETHICSOC 200C. Ethics in Society Honors Thesis. 1-5 Unit.
Limited to Ethics in Society honors students, who must enroll once in 200A, once in 200B, and once in 200C in their senior year. Students enrolling in 200C for less than 3 units must get approval from the faculty director.

ETHICSOC 202. EMOTIONS: MORALITY AND LAW. 2 Units.
If emotions are the stuff of life, some emotions are the stuff of our moral and legal life. Emotions such as: guilt, shame, revenge, indignation, resentment, disgust, envy, jealousy and humiliation, along with forgiveness, compassion, pity, mercy and patriotism, play a central role in our moral and legal life. The course is about these emotions, their meaning and role in morality and law. Issues such as the relationship between punishment and revenge, or between envy and equality, or St. Paul¿s contrast between law and love, or Nietzsche¿s idea that resentment is what feeds morality, will be discussed alongside other intriguing topics.
Same as: ETHICSOC 302, PHIL 177B, PHIL 277B

ETHICSOC 203R. Ethics in Real Life: How Philosophy Can Make Us Better People. 4 Units.
Socrates thought that philosophy was supposed to be practical, but most of the philosophy we do today is anything but. This course will convince you that philosophy actually is useful outside of the classroom--and can have a real impact on your everyday decisions and how to live your life. We'll grapple with tough practical questions such as: 'Is it selfish if I choose to have biological children instead of adopting kids who need homes?' 'Am I behaving badly if I don't wear a helmet when I ride my bike?' 'Should I major in a subject that will help me make a lot of money so I can then donate most of it to overseas aid instead of choosing a major that will make me happy?' Throughout the course, we will discuss philosophical questions about blame, impartiality, the force of different 'shoulds', and whether there are such things as universal moral rules that apply to everyone.

ETHICSOC 204. Introduction to Philosophy of Education. 3 Units.
How to think philosophically about educational problems. Recent influential scholarship in philosophy of education. No previous study in philosophy required.
Same as: EDUC 204

ETHICSOC 205R. JUST AND UNJUST WARS. 2 Units.
War is violent, but also a means by which political communities pursue collective interests. When, in light of these features, is the recourse to armed force justified? Pacifists argue that because war is so violent it is never justified, and that there is no such thing as a just war. Realists, in contrast, argue that war is simply a fact of life and not a proper subject for moral judgment, any more than we would judge an attack by a pack of wolves in moral terms. In between is just war theory, which claims that some wars, but not all, are morally justified. We will explore these theories, and will consider how just war theory comports with international law rules governing recourse to force. We will also explore justice in war, that is, the moral and legal rules governing the conduct of war, such as the requirement to avoid targeting non-combatants. Finally, we will consider how war should be terminated; what should be the nature of justified peace? We will critically evaluate the application of just war theory in the context of contemporary security problems, including: (1) transnational conflicts between states and nonstate groups and the so-called "war on terrorism"; (2) civil wars; (3) demands for military intervention to halt humanitarian atrocities taking place in another state. Same as LAW 751.
Same as: ETHICSOC 305R, PHIL 205R, PHIL 305R

ETHICSOC 207R. Democratic Accountability and Transparency. 5 Units.
This course critically examines two related democratic values, accountability and transparency. We begin with historical perspectives on accountability, tracing its centrality to democratic politics to ancient Athens and early modern debates about the nature and function of political representation. But the bulk of the course deals with contemporary issues and problems: how should we conceive of accountability, both conceptually and normatively, and what is its relationship to other values such as transparency and publicity? What forms of accountability are appropriate for modern democratic politics? Is accountability only for elites, or should ordinary citizens be accountable to one another? In what contexts are transparency and publicity valuable, and when might we instead find their operation counter-productive and troubling? Readings draw from canonical texts as well as contemporary political theory, philosophy, and political science.

ETHICSOC 217X. Free Speech, Academic Freedom, and Democracy. 3 Units.
The course examines connected ideas of free speech, academic freedom, and democratic legitimacy that are still widely shared by many of us but have been subject to skeptical pressures both outside and inside the academy in recent years. The course explores the principled basis of these ideas, how well they might (or might not) be defended against skeptical challenge, and how they might be applied in particular controversies about the rights of students, instructors, and researchers.
Same as: EDUC 217, PHIL 278C

ETHICSOC 232T. Theories and Practices of Civil Society, Philanthropy, and the Nonprofit Sector. 5 Units.
What is the basis of private action for public good? How are charitable dollars distributed and what role do nonprofit organizations and philanthropic dollars play in civil society and modern democracy? In the "Philanthropy Lab" component of this course, students will award $100,000 in grants to local nonprofits. Students will explore how nonprofit organizations operate domestically and globally as well as the historical development and modern structure of civil society and philanthropy. Readings in political philosophy, history, political sociology, and public policy. Political Science majors who are taking this course to fulfill the WIM requirement should enroll in POLISCI 236S.
Same as: POLISCI 236, POLISCI 236S

ETHICSOC 233R. The Ethics of Religious Politics. 5 Units.
Is it possible for a deeply committed religious person to be a good citizen in a liberal, pluralistic democracy? Is it morally inappropriate for religious citizens to appeal to the teachings of their tradition when they support and vote for laws that coerce fellow citizens? Must the religiously committed be prepared to defend their arguments by appealing to 'secular reasons' ostensibly accessible to all 'reasonable' citizens? What is so special about religious claims of conscience and expression that they warrant special protection in the constitution of most liberal democracies? Is freedom of religion an illusion when it is left to ostensibly secular courts to decide what counts as religion? Exploration of the debates surrounding the public role of religion in a religiously pluralistic American democracy through the writings of scholars on all sides of the issue from the fields of law, political science, philosophy, and religious studies.

ETHICSOC 234. Democratic Theory. 5 Units.
Most people agree that democracy is a good thing, but do we agree on what democracy is? This course will examine the concept of democracy in political philosophy. We will address the following questions: What reason(s), if any, do we have for valuing democracy? What does it mean to treat people as political equals? When does a group of individuals constitute "a people," and how can a people make genuinely collective decisions? Can democracy really be compatible with social inequality? With an entrenched constitution? With representation?.
Same as: PHIL 176P, POLISCI 234

ETHICSOC 237. Civil Society and Democracy in Comparative Perspective. 5 Units.
A cross-national approach to the study of civil societies and their role in democracy. The concept of civil society--historical, normative, and empirical. Is civil society a universal or culturally relative concept? Does civil society provide a supportive platform for democracy or defend a protected realm of private action against the state? How are the norms of individual rights, the common good, and tolerance balanced in diverse civil societies? Results of theoretical exploration applied to student-conducted empirical research projects on civil societies in eight countries. Summary comparative discussions. Prerequisite: a course on civil society or political theory. Students will conduct original research in teams of two on the selected nations. Enrollment limited to 18. Enrollment preference given to students who have taken PoliSci 236S/EthicSoc 232T.
Same as: POLISCI 237S

ETHICSOC 274B. Universal Basic Income: the philosophy behind the proposal. 3 Units.
Universal basic income (or UBI) is a regular cash allowance given to all members of a community without means test, regardless of personal desert, and with no strings attached. Once a utopian proposal, the policy is now discussed and piloted throughout the world. The growth of income and wealth inequalities, the precariousness of labor, and the persistence of abject poverty have all been important drivers of renewed interest in UBI in the United States. But it is without a doubt the fear that automation may displace workers from the labor market at unprecedented rates that explains the revival of the policy in recent years, including by many in or around Silicon Valley. Among the various objections to the proposal, one concerns its moral adequacy: Isn't it fundamentally unjust to give cash to all indiscriminately rather than to those who need it and deserve it? Over the years, a variety of scholars have defended the policy on moral grounds, arguing that UBI is a tool of equality, liberal freedom, republican freedom, gender equity, or racial equity. Many others have attacked UBI on those very same grounds, making the case that alternative policy proposals like the job guarantee, means-tested benefits, conditional benefits, or reparations should be preferred. Students will learn a great deal about political theory and ethics in general but always through the specific angle of the policy proposal, and they will become experts on the philosophy, politics and economics of UBI. The seminar is open to undergraduate and graduate students in all departments. There are no pre-requisites.
Same as: ETHICSOC 174B, PHIL 174B, PHIL 274B, POLISCI 134E, POLISCI 338

ETHICSOC 274L. Betrayal and Loyalty, Treason and Trust. 2 Units.
The main topic of the seminar is Betrayal: its meaning as well as its moral, legal and political implications. We shall discuss various notions of betrayal: Political (military) betrayal such as treason, Religious betrayal with Judas as its emblem, but also apostasy (converting one's religion) which is regarded both as a basic human right and also as an act of betrayal, social betrayal - betraying class solidarity as well as Ideological betrayal - betraying a cause. On top of political betrayal we shall deal with personal betrayal, especially in the form of infidelity and in the form of financial betrayal of the kind performed by Madoff. The contrasting notions to betrayal, especially loyalty and trust, will get special consideration so as to shed light or cast shadow, as the case may be, on the idea of betrayal. The seminar will focus not only on the normative aspect of betrayal - moral or legal, but also on the psychological motivations for betraying others. The seminar will revolve around glaring historical examples of betrayal but also use informed fictional novels, plays and movies from Shakespeare and Pinter, to John Le Carre. SAME AS LAW 520.
Same as: ETHICSOC 174L, PHIL 174L, PHIL 274L

ETHICSOC 278M. Introduction to Environmental Ethics. 4-5 Units.
How should human beings relate to the natural world? Do we have moral obligations toward non-human animals and other parts of nature? And what do we owe to other human beings, including future generations, with respect to the environment? The first part of this course will examine such questions in light of some of our current ethical theories: considering what those theories suggest regarding the extent and nature of our environmental obligations; and also whether reflection on such obligations can prove informative about the adequacy of our ethical theories. In the second part of the course, we will use the tools that we have acquired to tackle various ethical questions that confront us in our dealings with the natural world, looking at subjects such as: animal rights; conservation; economic approaches to the environment; access to and control over natural resources; environmental justice and pollution; climate change; technology and the environment; and environmental activism.
Same as: ETHICSOC 178M, PHIL 178M, PHIL 278M, POLISCI 134L

ETHICSOC 280. Transitional Justice, Human Rights, and International Criminal Tribunals. 3-5 Units.
(Formerly IPS 280) Historical backdrop of the Nuremberg and Tokyo Tribunals. The creation and operation of the Yugoslav and Rwanda Tribunals (ICTY and ICTR). The development of hybrid tribunals in East Timor, Sierra Leone, and Cambodia, including evaluation of their success in addressing perceived shortcomings of the ICTY and ICTR. Examination of the role of the International Criminal Court and the extent to which it will succeed in supplanting all other ad hoc international justice mechanisms and fulfill its goals. Analysis focuses on the politics of creating such courts, their interaction with the states in which the conflicts took place, the process of establishing prosecutorial priorities, the body of law they have produced, and their effectiveness in addressing the needs of victims in post-conflict societies.
Same as: HUMRTS 103, INTLPOL 280, INTNLREL 180A

ETHICSOC 301. Conflicts, Ethics, and the Academy. 1-3 Unit.
(Same as LAW 684) This course looks at conflicts of interest and ethical issues as they arise within academic work. The participants will be drawn from schools and departments across the University so that the discussion will prompt different examples of, and perspectives on, the issues we discuss. Topics will include the conflicts that arise from sponsored research, including choices of topics, shaping of conclusions, and nondisclosure agreements; issues of informed consent with respect to human subjects research, and the special issues raised by research conducted outside the United States; peer review, co-authorship, and other policies connected to scholarly publication; and the ethics of the classroom and conflicts of interest implicating professor-student relationships. Representative readings will include Marcia Angell's work, Drug Companies and Doctors: A Story of Corruption, N.Y. Rev. Books, Jan. 15, 2009, and Is Academic Medicine for Sale? 342 N. Engl. J. Med. 1516 (2000) (and responses); William R. Freudenburg, Seeding Science, Courting Conclusions: Reexamining the Intersection of Science, Corporate Cash, and the Law, 20 Sociological Forum 3 (2005); Max Weber, Science as a Vocation; legal cases; and conflict-of-interest policies adopted by various universities and professional organizations. The course will include an informal dinner at the end of each session. The goal of the course is to have students across disciplines think about the ethical issues they will confront in an academic or research career. Non-law students should enroll in ETHICSOC 301.

ETHICSOC 302. EMOTIONS: MORALITY AND LAW. 2 Units.
If emotions are the stuff of life, some emotions are the stuff of our moral and legal life. Emotions such as: guilt, shame, revenge, indignation, resentment, disgust, envy, jealousy and humiliation, along with forgiveness, compassion, pity, mercy and patriotism, play a central role in our moral and legal life. The course is about these emotions, their meaning and role in morality and law. Issues such as the relationship between punishment and revenge, or between envy and equality, or St. Paul¿s contrast between law and love, or Nietzsche¿s idea that resentment is what feeds morality, will be discussed alongside other intriguing topics.
Same as: ETHICSOC 202, PHIL 177B, PHIL 277B

ETHICSOC 303R. Ethics, Economics and the Market. 4 Units.
Economic analysis inevitably raises moral questions. Getting clear on those moral questions, and the competing answers to them, can help improve both economic analysis and our understanding of the values involved in alternative social policies. This course focuses on a central economic institution: the market. How have the benefits and costs of using markets been understood? For example, it is often claimed that markets are good for welfare, but how is welfare to be understood? What is the connection between markets and different values such as equality and autonomy? What, if anything is wrong with markets in everything? Are there moral considerations that allow us to, distinguish different markets? This course examines competing answers to these questions, drawing on historical and contemporary literature. Readings include Adam Smith, JS Mill, Karl Marx, Michael Walzer, Dan Hausman and Michael McPherson and Debra Satz among others. For graduate students only.
Same as: PHIL 375, POLISCI 434A

ETHICSOC 305R. JUST AND UNJUST WARS. 2 Units.
War is violent, but also a means by which political communities pursue collective interests. When, in light of these features, is the recourse to armed force justified? Pacifists argue that because war is so violent it is never justified, and that there is no such thing as a just war. Realists, in contrast, argue that war is simply a fact of life and not a proper subject for moral judgment, any more than we would judge an attack by a pack of wolves in moral terms. In between is just war theory, which claims that some wars, but not all, are morally justified. We will explore these theories, and will consider how just war theory comports with international law rules governing recourse to force. We will also explore justice in war, that is, the moral and legal rules governing the conduct of war, such as the requirement to avoid targeting non-combatants. Finally, we will consider how war should be terminated; what should be the nature of justified peace? We will critically evaluate the application of just war theory in the context of contemporary security problems, including: (1) transnational conflicts between states and nonstate groups and the so-called "war on terrorism"; (2) civil wars; (3) demands for military intervention to halt humanitarian atrocities taking place in another state. Same as LAW 751.
Same as: ETHICSOC 205R, PHIL 205R, PHIL 305R

ETHICSOC 371R. Inequality: Economic and Philosophical Perspectives. 5 Units.
The nature of and problem of inequality is central to both economics and philosophy. Economists study the causes of inequality, design tools to measure it and track it over time, and examine its consequences. Philosophers are centrally concerned with the justification of inequality and the reasons why various types of inequality are or are not objectionable.nIn this class we bring both of these approaches together. Our class explores the different meanings of and measurements for understanding inequality, our best understandings of how much inequality there is, its causes, its consequences, and whether we ought to reduce it, and if so, how. nThis is an interdisciplinary graduate seminar. We propose some familiarity with basic ideas in economics and basic ideas in contemporary political philosophy; we will explain and learn about more complex ideas as we proceed. The class will be capped at 20 students.
Same as: PHIL 371D, POLISCI 431L

ETHICSOC 372R. Ending Wars: A Just Peace or Just a Peace. 2 Units.
Much of just war theory focuses on the justifications for resorting to armed force and the conduct of hostilities. But what are the ethical and legal principles that govern ending wars and making peace? This course will explore the theory of "just peace," including such problems as when a party to war may demand the unconditional surrender of its adversary and what kinds of compromises are ethically permissible in order to end ¿ or to avoid ¿ armed conflict. We will also consider the terms and practices the winning party in war may impose on the loser, such as reparations and occupation (particularly transformative occupation). In addition, we will examine the topic of transitional justice, including issues related to amnesty, forgiveness, criminal and other forms of accountability, and reconciliation. Elements used in grading: Class Participation, Written Assignments, Final Exam.
Same as: PHIL 372M

ETHICSOC 374R. Science, Religion, and Democracy. 3-5 Units.
How should conflicts between citizens with science-based and religion-based beliefs be handled in modern liberal democracies? Are religion-based beliefs as suitable for discussion within the public sphere as science-based beliefs? Are there still important conflicts between science and religion, e.g., Darwinian evolution versus creationism or intelligent design? How have philosophy and recent theology been engaged with such conflicts and how should they be engaged now? What are the political ramifications? This is a graduate-level seminar; undergraduates must obtain permission of the instructors.
Same as: PHIL 374F, RELIGST 374F

ETHICSOC 378B. Unequal Relationships. 2-4 Units.
Over the past three decades, a relational egalitarian conception of equality has emerged in political philosophy. Proponents of the view argue that the point of equality is to establish communities where people are able to stand and relate as equals. This entails building societies free from a variety of modes of relating that are thought to be detrimental to our status as moral equals. The list of those inegalitarian relationships is long and includes oppression, domination, exploitation, marginalization, objectification, demonization, infantilization, and stigmatization. The relational approach to equality departs from the more distributive conceptions of equality that were offered in the 70s and after. The theories of justice proposed in response are still comparatively underdeveloped and need further elaboration, but they all concur in rejecting both the overly distributive paradigm and the preoccupation with individual responsibility central to most other egalitarian accounts. This graduate seminar will introduce students to the rich literature on equality in contemporary political philosophy, with a special focus on identifying and scrutinizing unequal relationships. Each week will be centered on a specific type of such unequal relationship, trying to understand how it operates, what social function it serves, and what makes it specifically harmful or wrongful to groups and individuals. Although there are no formal pre-requisites, this class is primarily designed for students considering writing a thesis in political or moral theory as well as for students in other disciplines who want to advance their understanding of equality as a moral value. Seniors in philosophy and political science with a substantial training in political theory will also be considered and should email the PI to communicate their interest. 2 unit option only for Phil PhDs beyond the second year.
Same as: PHIL 378B, POLISCI 338B

ETHICSOC 432X. Selections in Modern Political Thought. 3-5 Units.
This graduate-level seminar explores selections from the canon of Western political thought from the late fifteenth through nineteenth centuries. Throughout the course, we will engage in close textual readings of individual thinkers and consider some of the larger questions raised by political modernity. This offering will focus on American political thought from the Puritan era through the turn of the 20th century. We will pay special attention to dissenting voices and to texts that address the settler empire, slavery, and the color line. Thinkers covered will include: John Winthrop, Thomas Jefferson, James Madison, Alexander Hamilton, "Brutus," William Apess, Henry David Thoreau, John C. Calhoun, David Walker, Abraham Lincoln, Frederick Douglass, and W.E.B. Du Bois.
Same as: POLISCI 432R

FEMINIST, GENDER, AND SEXUALITY STUDIES

Courses offered by the Program in Feminist, Gender, and Sexuality Studies are listed under the subject code FEMGEN on the (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=FEMST&filter-catalognumber-FEMST=on) Stanford Bulletin's (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=FEMST&filter-catalognumber-FEMST=on) ExploreCourses web site (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=FEMST&filter-catalognumber-FEMST=on).

The Program in Feminist, Gender, and Sexuality Studies offers an undergraduate major and minor, and an interdisciplinary honors program that is open to students in all majors. Each Feminist, Gender, and Sexuality Studies student builds an individual program of study around a self-defined thematic focus, integrating courses from multiple departments. The program encourages work in the arts and supports creative honors theses. Feminist, Gender, and Sexuality Studies majors may declare Arts & Culture, Global Studies, Health, or LGBT/Queer Studies as a subplan, or may design their own thematic focus. Subplans are printed on the diploma; individual thematic foci are not printed on the diploma. See the "Bachelor's" (p. 1432) tab of this section of the bulletin for descriptions of the subplans.

Curriculum guidelines and forms for the undergraduate major, minor, and honors programs are available on the program web site (https://feminist.stanford.edu/undergraduates/). See the program web site for additional contact information (https://feminist.stanford.edu/about/).

The Program in Feminist, Gender, and Sexuality Studies offers the option of a Ph.D. minor to graduate students already enrolled in a Ph.D. program at Stanford University. The Ph.D. minor in Feminist, Gender, and Sexuality Studies provides graduate students pursuing Ph.D.s broad interdisciplinary knowledge in the field and prepares them to teach courses in the subject. The goal of the program is to bring together graduate students and faculty from different departments, programs, and schools who use feminist and queer perspectives in their research.

Mission of the Undergraduate Program in Feminist, Gender, and Sexuality Studies

The interdepartmental Program in Feminist, Gender, and Sexuality Studies provides students with knowledge and skills to investigate the significance of gender and sexuality in all areas of human life. Feminist, Gender, and Sexuality Studies examines how societies structure gender roles, relations, and identities, and how these intersect with other hierarchies of power, such as class, race, nationality, ethnicity, sexuality, ability, and age. The program coordinates courses offered across the University in feminist and lesbian, gay, bisexual, transgender, and queer studies. Students learn to employ critical gender and sexuality studies methodologies to analyze the assumptions about gender and sexuality that inform the study of individuals, cultures, social institutions, policy, and areas of scholarly inquiry. The program prepares majors for graduate study in humanities and social sciences and for professional schools.

Learning Outcomes (Undergraduate)

The program expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the undergraduate program. Students are expected to demonstrate:

1. understanding of how social hierarchies related to gender, sexuality, race and ethnicity have developed historically, cross-culturally, and transnationally.
2. knowledge of the histories of feminist, gender, sexuality, and/or LGBT/queer social movements and their intersections with other social movements.
3. knowledge and comprehension of feminist, gender, sexuality, and/or LGBT/queer theories and methods for social, historical, literary and cultural analysis.
4. skill in making and communicating feminist, gender, sexuality, and/or LGBT/queer analyses of data, texts, and arguments.
5. competence in applying theory to practical experience for social transformation and citizenship.

Bachelor of Arts in Feminist, Gender, and Sexuality Studies

The major in Feminist, Gender, and Sexuality Studies requires 63 units and may be taken as a single major, as one of multiple majors, or as a secondary major. FEMGEN core courses must be taken for a letter grade. A student wishing to major in Feminist, Gender, and Sexuality Studies should declare the major via Axess, by Autumn Quarter of the junior year. The student then selects a subplan or develops an individualized proposal describing a thematic focus and outlining a course of study, approved by a prospective adviser from the list of affiliated faculty. The proposal is then submitted to the Program Office (Bldg. 460, Room 216) for approval by the Director.

A maximum of 10 of the 63 units for the major may be taken on a credit/no credit or satisfactory/no credit basis; a maximum of 10 units may be taken as independent study or directed reading.

If taken as one of multiple majors, none of the 63 units counted toward the major in Feminist, Gender, and Sexuality Studies may overlap with units counted toward the major in another department or program. If taken as a secondary major, the units counted toward the Feminist, Gender, and Sexuality Studies major may also be counted as fulfilling the major requirements in another department or program if that department or program consents.

Curriculum

The major in Feminist, Gender, and Sexuality Studies includes a total of at least 12 approved courses for a minimum of 63 units. The courses are divided among the core, the focus, and electives to reach the total course requirement.

Not all courses are offered every year; consult ExploreCourses (https://explorecourses.stanford.edu/search/?view=catalog&academicYear=&q=FEMGEN&filter-departmentcode-FEMGEN=on&filter-coursestatus-Active=on&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&page=0) for current course offerings.

Courses not listed below that relate to the themes of Feminist, Gender, and Sexuality Studies may potentially be counted towards the major as well; contact the academic services administrator (apotemski@stanford.edu) or other FGSS staff for more information.

Degree Requirements

The Core

		Units
1. Introductory Course		
FEMGEN 101	Introduction to Feminist, Gender, and Sexuality Studies	5
2. Feminist Theories and Method		

FEMGEN 103	Feminist and Queer Theories and Methods Across the Disciplines	2-5
3. Junior and Senior Seminars and Practica		
FEMGEN 104A	Junior Seminar and Practicum	1
FEMGEN 104B	Senior Seminar and Practicum	2
4. One feminist, gender, or sexuality theory course from approved course list below.		**3-5**
FEMGEN 63N	The Feminist Critique: The History and Politics of Gender Equality	
FEMGEN 130S	Sex and the Novel	
FEMGEN 131	Introduction to Queer Theory	
FEMGEN 134	The Marriage Plot	
FEMGEN 138	Men's Violence Against Women in Literature: A Critical and Social Analysis	
FEMGEN 154	Black Feminist Theory	
FEMGEN 155	The Changing American Family	
FEMGEN 163	Queer America	
FEMGEN 297	Gender and Education in Global and Comparative Perspectives	
FEMGEN 313	Performance and Performativity	
FEMGEN 314	Performing Identities	
FEMGEN 363D	Feminist Theory: Thinking Through/With/About the Gendered Body	
ANTHRO 90B	Theory of Cultural and Social Anthropology	
5. One Feminist, Gender, and Sexuality Studies or a related course in Global Perspectives		**3-5**
FEMGEN 17	Gender and Power in Ancient Greece	
FEMGEN 111	Reproductive Politics in the United States and Abroad	
FEMGEN 129		
FEMGEN 144F		
FEMGEN 144X	Transforming Self and Systems: Crossing Borders of Race, Nation, Gender, Sexuality, and Class	
FEMGEN 150	Sex, Gender, and Power in Modern China	
FEMGEN 180	Gender Relations in Islam	
FEMGEN 181A		
FEMGEN 206	Global Medical Issues Affecting Women	
FEMGEN 250	Sex, Gender, and Power in Modern China	
FEMGEN 395J	Gender and Sexuality in Chinese History	
6. One Feminist, Gender, and Sexuality Studies or a related course in Intersection Structures of Oppression (Race, Ethnicity, and/or Class)		**3-5**
FEMGEN 94H		
FEMGEN 103S	Gender in Native American Societies	
FEMGEN 141	Activism and Intersectionality	
FEMGEN 149	Gender Violence: Critical Race, Feminist, and Queer Perspectives	
FEMGEN 157P	Solidarity and Racial Justice	
FEMGEN 159	James Baldwin & Twentieth Century Literature	
7. One Feminist, Gender, and Sexuality Studies or a related course in Lesbian, Gay, Bisexual, Transgender/Queer Studies		
FEMGEN 36N	Gay Autobiography	
FEMGEN 109	Looking Back, Moving Forward: Raising Critical Awareness in Gender and Sports	
FEMGEN 115	Queer Reading and Queer Writing in Early Modern England	
FEMGEN 116	Narrating Queer Trauma	
FEMGEN 117Q	Queer Arts: Remembering and Imagining Social Change	
FEMGEN 118	Transgender Cultural Studies	
FEMGEN 121	Intro to Queer Studies	
FEMGEN 140D	LGBTQ History of the United States	
FEMGEN 119	Archaeology of Gender and Sexuality	5
Total Units		24-33

Writing in the Major (WIM)

Majors in Feminist, Gender, and Sexuality Studies may satisfy the Writing in the Major (WIM) requirement by taking one of the approved WIM courses in the list below. Honors students satisfy the WIM requirement through their honors work. Not all courses are offered every year; consult ExploreCourses (https://explorecourses.stanford.edu/search/?view=catalog&academicYear=&q=FEMGEN&filter-departmentcode-FEMGEN=on&filter-coursestatus-Active=on&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&page=0) for current course offerings.

		Units
WIM Courses for Majors		**4-5**
AMSTUD 160	Perspectives on American Identity	
ANTHRO 90B	Theory of Cultural and Social Anthropology	
LINGUIST 150	Language and Society	
FEMGEN 157	Language as Political Tool: Feminist and LGBTQ Movements and Impacts	
Total Units		4-5

Practicum

The practicum courses (FEMGEN 104A Junior Seminar and Practicum, FEMGEN 104B Senior Seminar and Practicum) bring together theory and practical experience. The practicum involves field research, community service, or other relevant experience such as a public service internship. Students plan their practicum during Winter Quarter of the junior year in FEMGEN 104A Junior Seminar and Practicum (1 unit). The practicum is normally done over the summer between junior and senior year and may be taken for additional units. It is followed by FEMGEN 104B Senior Seminar and Practicum (2 units), in Autumn Quarter of the senior year.

The Focus

All Feminist, Gender, and Sexuality Studies majors must complete the Feminist, Gender, and Sexuality Studies major core requirements (7 courses) and an additional 5 courses constituting an area of focus. Those 5 courses should be chosen in consultation with the student's adviser and the Associate Director.

FGSS majors have the option of declaring a formal subplan *or* of designing an individualized thematic focus. Subplans are noted on student transcripts and diplomas; individually designed thematic foci are not noted on the transcript or diploma. The following are the four formal subplans:

Arts & Culture Subplan

The Arts & Culture subplan is appropriate for fields of study focusing on interpretation, production, and consumption of messages of feminism, gender, and sexuality through arts, media, literature and performance.

Not all courses are offered every year; consult ExploreCourses (https://explorecourses.stanford.edu/search/?view=catalog&academicYear=&q=FEMGEN&filter-departmentcode-FEMGEN=on&filter-coursestatus-Active=on&filter-term-

Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&page=0) for current course offerings.

Courses that may fulfill requirements include but are not limited to:

		Units
LINGUIST 52N	Spoken Sexuality: Language and the Social Construction of Sexuality	3
FEMGEN 102	Art and Social Criticism	5
FEMGEN 109	Looking Back, Moving Forward: Raising Critical Awareness in Gender and Sports	3
FEMGEN 117Q	Queer Arts: Remembering and Imagining Social Change	4-5
FEMGEN 130S	Sex and the Novel	5
FEMGEN 134	The Marriage Plot	5
FEMGEN 144F		5
FEMGEN 145	Culture Wars: Art and Social Conflict in the USA, 1890-1950	4
FEMGEN 159	James Baldwin & Twentieth Century Literature	5
FEMGEN 183	Re- Imagining American Borders	5
FEMGEN 188Q	Imagining Women: Writers in Print and in Person	4-5
FEMGEN 205	Songs of Love and War: Gender, Crusade, Politics	3-5
FEMGEN 250J	Baldwin and Hansberry: The Myriad Meanings of Love	4
FEMGEN 261	Personal Narratives in Feminist, Gender, and Sexuality Studies	4-5
FEMGEN 287G		5
FEMGEN 313	Performance and Performativity	5
FEMGEN 314	Performing Identities	4

Health Subplan

The Health subplan is appropriate for fields of study focusing on feminist perspectives of science and technologies, gender justice and human rights, gender health and medicine, access/disparities/needs regarding health and sexuality, and women's roles as practitioners and researchers.

Not all courses are offered every year; consult ExploreCourses (https://explorecourses.stanford.edu/search/?view=catalog&academicYear=&q=FEMGEN&filter-departmentcode-FEMGEN=on&filter-coursestatus-Active=on&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&page=0) for current course offerings.

Courses that may fulfill requirements include but are not limited to:

		Units
FEMGEN 94H		4
FEMGEN 114	Sexual Diversity and Health	1
FEMGEN 124	Challenging Sex and Gender Dichotomies in Medicine	1
FEMGEN 129		4
FEMGEN 138	Men's Violence Against Women in Literature: A Critical and Social Analysis	3-5
FEMGEN 143	One in Five: The Law, Politics, and Policy of Campus Sexual Assault	3-5
FEMGEN 156H	Women and Medicine in US History: Women as Patients, Healers and Doctors	5
FEMGEN 206	Global Medical Issues Affecting Women	1
FEMGEN 216X	Narrating Queer Trauma	4-5
FEMGEN 224	Challenging Sex and Gender Dichotomies in Medicine	1
FEMGEN 230	Sexual Function and Diversity in Medical Disciplines	2-3
FEMGEN 237	Health Impact of Sexual Assault and Relationship Abuse across the Lifecourse	1-3
FEMGEN 241	Sex and Gender in Human Physiology and Disease	2-3
FEMGEN 256	Current Topics and Controversies in Women's Health	2-3
FEMGEN 260	Disability, Gender, and Identity: Women's Personal Experiences	5

Global Studies Subplan

The Global Studies subplan is appropriate for fields of study focusing cross-cultural perspectives on gender, gender justice and human rights, race/class/gender intersections, gender/spirituality/religion, geopolitical contexts of feminism and LGBTQ activism, and gender and education.

Not all courses are offered every year; consult ExploreCourses (https://explorecourses.stanford.edu/search/?view=catalog&academicYear=&q=FEMGEN&filter-departmentcode-FEMGEN=on&filter-coursestatus-Active=on&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&page=0) for current course offerings.

Courses that may fulfill requirements include but are not limited to:

		Units
FEMGEN 111	Reproductive Politics in the United States and Abroad	3-5
FEMGEN 115	Queer Reading and Queer Writing in Early Modern England	5
FEMGEN 129		4
FEMGEN 130	Sex and Gender in Judaism and Christianity	3
FEMGEN 144F		5
FEMGEN 144X	Transforming Self and Systems: Crossing Borders of Race, Nation, Gender, Sexuality, and Class	5
FEMGEN 150	Sex, Gender, and Power in Modern China	3-5
FEMGEN 180	Gender Relations in Islam	4
FEMGEN 206	Global Medical Issues Affecting Women	1-2
FEMGEN 250	Sex, Gender, and Power in Modern China	3-5
FEMGEN 297	Gender and Education in Global and Comparative Perspectives	4
FEMGEN 395J	Gender and Sexuality in Chinese History	4-5

LGBT/Queer Studies Subplan

The LGBT/Queer Studies subplan is appropriate for fields of study focusing on history and theories of lesbian, gay, bisexual, transgender, and queer identities, communities, cultural practices, politics, and legal and medical issues.

Not all courses are offered every year; consult ExploreCourses (https://explorecourses.stanford.edu/search/?view=catalog&academicYear=&q=FEMGEN&filter-departmentcode-FEMGEN=on&filter-coursestatus-Active=on&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&page=0) for current course offerings.

Courses that may fulfill requirements include but are not limited to:

		Units
FEMGEN 36N	Gay Autobiography	4
LINGUIST 52N	Spoken Sexuality: Language and the Social Construction of Sexuality	3
FEMGEN 113	Transgender Studies	3-4
FEMGEN 114	Sexual Diversity and Health	1

FEMGEN 119	Archaeology of Gender and Sexuality	5

Additional Information

Overseas Studies Courses in Feminist, Gender, and Sexuality Studies

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu) web site or the Bing Overseas Studies (http://bosp.stanford.edu) web site. Students should consult the Associate Director for applicability of Overseas Studies courses to a major or minor program.

Honors Program in Feminist, Gender, and Sexuality Studies

For Majors in Feminist, Gender, and Sexuality Studies

Admission—The honors program offers an opportunity to do independent research for a senior thesis. It is open to students with a grade point average (GPA) of 3.5 or better in course work in Feminist, Gender, and Sexuality Studies, or demonstrated academic competence. Students should begin the application process by consulting with the Program Director or the Associate Director as early as possible in the junior year, preferably by the end of Winter Quarter.

During the application process, students design a project in consultation with their proposed thesis advisers and the Associate Director. A proposal describing the project and the number of units to be taken toward the honors directed project must be submitted to the program office for final approval. All projects must have a primary focus on gender or sexuality. See the honors section of the program web site (https://feminist.stanford.edu/undergraduates/honors-program/) for additional details.

Note: FEMGEN 199A/B/C Honors Seminar and FEMGEN 105 Honors Work units do not count towards the 63 units for the major or the 30 units for the minor.

Requirements

1. Students enroll for 2-3 units per quarter in FEMGEN 199A, FEMGEN 199B, and FEMGEN 199C Feminist, Gender, and Sexuality Studies Honors Workshop.
2. Students in the honors program also enroll for FEMGEN 105 Honors Work with their respective advisers, for an additional 2-3 units each quarter. The combined number of units in 199 and 105 must be 10-15 units over the course of senior year.
3. A semifinal draft of the thesis is due early in Spring Quarter of the senior year.
4. The final thesis must be submitted by May 15 (or the following Monday should May 15 fall on a weekend). The completed thesis must be submitted with the Thesis Completion Form, which requires the adviser's signature of approval. Creative projects must include a section of critical analysis. For guidelines, see the honors section of the program web site (https://feminist.stanford.edu/undergraduates/honors-program/).

For Majors in Other Departments

Interdisciplinary Honors in Feminist, Gender, and Sexuality Studies for majors in other departments or programs, as distinguished from honors for students pursuing a major in Feminist, Gender, and Sexuality Studies, is intended to complement study in any major. Feminist, Gender, and Sexuality Studies minors who wish to pursue honors in Feminist, Gender, and Sexuality Studies should apply through the process for non-majors.

Admission

The Feminist, Gender, and Sexuality Studies honors program is open to students majoring in any field with an overall GPA of 3.5 or better or demonstrated academic competence.

Students must complete the following with a grade of 'B+' or better:

- Either FEMGEN 101 Introduction to Feminist, Gender, and Sexuality Studies *or* FEMGEN 103 Feminist and Queer Theories and Methods Across the Disciplines, *and* and two other FGSS courses that relate to their research topic.

Students should begin the application process by consulting with the Program Director or the Associate Director as early as possible in the junior year, preferably by the end of Winter Quarter. During the application process, students design a project in consultation with their proposed thesis advisers and the Associate Director. A proposal describing the project and the number of units to be taken toward the honors directed project must be submitted to the program office for final approval. All projects must have a primary focus on gender or sexuality. See the honors section of the program web site (https://feminist.stanford.edu/undergraduates/honors-program/) for additional details.

Requirements

1. Students enroll for 2-3 units per quarter in FEMGEN 199A, FEMGEN 199B, and FEMGEN 199C Feminist, Gender, and Sexuality Studies Honors Workshop.
2. Students in the honors program also enroll for FEMGEN 105 Honors Work with their respective advisers, for an additional 2-3 units each quarter. The combined number of units in 199 and 105 must be 10-15 units over the course of senior year..
3. A semifinal draft of the thesis is due early in Spring Quarter of the senior year.
4. The final thesis must be submitted by May 15 (or the following Monday should May 15 fall on a weekend). The completed thesis must be submitted with the Thesis Completion Form, which requires the adviser's signature of approval. Creative projects must include a section of critical analysis. For guidelines, see the honors section of the program web site (https://feminist.stanford.edu/undergraduates/honors/).

Flexibility

For students pursuing honors during the 2020-21 Academic Year, please work with our honors program coordinator, Maxe Crandall, regarding flexibility in meeting honors program requirements due to student leaves of absence, or other COVID-related challenges.

Minor in Feminist, Gender, and Sexuality Studies

1. A student wishing to minor in Feminist, Gender, and Sexuality Studies should apply to the minor via Axess, preferably by Winter Quarter of the junior year.
2. The student then develops an individualized proposal outlining a course of study to be approved by the Associate Director (maxec@stanford.edu).
3. The approved proposal is then submitted to the program office (Bldg. 460, Room 216) or via email to apotemski@stanford.edu.

The minor in Feminist, Gender, and Sexuality Studies consists of at least six courses for a minimum of 30 units. None of the units for the FGSS minor may count towards the student's major.

Requirements

		Units
1. Introductory Course		
FEMGEN 101	Introduction to Feminist, Gender, and Sexuality Studies	4-5
2. One of the feminist, gender, or sexuality theory courses from the approved course list on the Bachelor's tab		
3. Focus Courses		
At least 4 courses of 3 or more units each		

The Focus

At least 4 of the courses for the minor should relate to a thematic focus defined by the student and faculty adviser. See the suggested clusters listed in the "Bachelor of Arts in Feminist, Gender, and Sexuality Studies (p. 1432)" section of this bulletin. At least one course within the thematic focus should address race/ethnicity and/or global perspectives on feminist, gender, and sexuality studies.

Ph.D Minor in Feminist, Gender, and Sexuality Studies

The Ph.D. minor in Feminist, Gender, and Sexuality Studies provides graduate students pursuing Ph.D.s broad interdisciplinary knowledge in the field and prepares them to teach courses in the subject. The goal of the program is to bring together graduate students and faculty from different departments, programs, and schools who use feminist and queer perspectives in their research.

Application and Acceptance

Prospective students submit a Ph.D. minor application form outlining an academic plan with courses and quarters to satisfy the minor requirements. The form must be signed by the student's home department faculty adviser.

An Application for Ph.D. Minor (http://studentaffairs.stanford.edu/sites/default/files/registrar/files/app_phd_minor.pdf) outlining a program of study must be approved by the major and minor departments and submitted to the Student Services Center. This form is submitted at the time of admission to candidacy or at the appropriate time thereafter. Prior to that time, students are expected to have been working with an adviser from the affiliated faculty in Feminist, Gender, and Sexuality Studies to ensure that all the requirements can be met without delaying progress to degree or to TGR status. Students are encouraged to consult with the Director or Associate Director as soon as they have developed an interest in pursuing the minor. A student who is planning to apply for a master's degree on the way to the Ph.D. should plan out the course of study carefully, since units for the minor may not also be counted toward a Stanford master's degree.

An accepted student selects a Feminist, Gender, and Sexuality Studies faculty adviser with assistance from the program director. The adviser meets with the student to discuss and sign the academic plan outlined on the Application for Ph.D. Minor form. The plan represents a student's best estimate of courses planned to meet the minor requirements. Students who wish to enroll in the minor after the Winter Quarter of their first year must demonstrate that their participation will not delay their time to degree or their time to TGR.

Students must remain in good academic standing in their home departments.

Requirements

To receive the Ph.D. Minor in Feminist, Gender, and Sexuality Studies, students fulfill the following requirements, for a minimum of 20 units at the graduate level (typically 200-level or higher).

		Units
Required Course		
FEMGEN 203	Feminist and Queer Theories and Methods Across the Disciplines (REQUIRED)	3-5
A second feminist theory course such as:		**4-5**
ANTHRO 201	Introduction to Cultural and Social Anthropology	
FEMGEN 238	Men's Violence Against Women in Literature: A Critical and Social Analysis	
FEMGEN 239	Queer Theory	
FEMGEN 314	Performing Identities	
FEMGEN 363D	Feminist Theory: Thinking Through/With/About the Gendered Body	
SOC 242	Sociology of Gender	
SOC 252	The Social Determinants of Health	
SOC 255	The Changing American Family	
10 units of elective graduate-level courses or related courses (a minimum of 2 courses, but 3 courses if necessary in order to achieve 10 units): graduate-level courses or related courses in Feminist, Gender, and Sexuality Studies, one of which may be from the student's home department. The following are examples of appropriate elective courses. Check ExploreCourses for scheduling information.		10
FEMGEN 205	Songs of Love and War: Gender, Crusade, Politics	3-5
FEMGEN 208B		4-5
FEMGEN 209	Looking Back, Moving Forward: Raising Critical Awareness in Gender and Sports	3
FEMGEN 213	Transgender Studies	3-4
FEMGEN 214	Sexual Diversity and Health	1
FEMGEN 216X	Narrating Queer Trauma	4-5
FEMGEN 223X		5
FEMGEN 224	Challenging Sex and Gender Dichotomies in Medicine	1
FEMGEN 226A		3-5
FEMGEN 230	Sexual Function and Diversity in Medical Disciplines	2
FEMGEN 230X		2
FEMGEN 235A		2-5
FEMGEN 236	Literature and Transgression	3-5

FEMGEN 237	Health Impact of Sexual Assault and Relationship Abuse across the Lifecourse	1-3
FEMGEN 240D	LGBTQ History of the United States	4-5
FEMGEN 241W		5
FEMGEN 242	Sociology of Gender	3
FEMGEN 250	Sex, Gender, and Power in Modern China	3-5
FEMGEN 255	The Changing American Family	4
FEMGEN 256	Current Topics and Controversies in Women's Health	2-3
FEMGEN 257	Language as Political Tool: Feminist and LGBTQ Movements and Impacts	3-5
FEMGEN 260	Disability, Gender, and Identity: Women's Personal Experiences	5
FEMGEN 272E		4-5
FEMGEN 295J		5
FEMGEN 297	Gender and Education in Global and Comparative Perspectives	4
FEMGEN 310X		3-5
FEMGEN 311C		1-2
FEMGEN 313	Performance and Performativity	1-4
FEMGEN 360	Disability, Gender, and Identity: Women's Personal Experiences	5
FEMGEN 395J	Gender and Sexuality in Chinese History	4-5

Academic Progress

Students submit an annual progress report listing the courses completed towards the minor and courses planned in future quarters. This form is approved by both the main faculty adviser and the Feminist, Gender, and Sexuality Studies faculty adviser. Students meet with their Feminist, Gender, and Sexuality Studies faculty adviser to discuss their progress report.

Notation

Students who complete all the requirements receive the following notation on their transcript and diploma: Ph.D. Minor in Feminist, Gender, and Sexuality Studies.

Sponsorship

The Ph.D. minor in Feminist, Gender, and Sexuality Studies is sponsored by the Program in Modern Thought and Literature. The minor is administered by the Program in Feminist, Gender, and Sexuality Studies.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a “credit” or “no credit” grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a “credit” or “satisfactory” grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

The Program in Feminist, Gender, and Sexuality Studies counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of undergraduate degree requirements that otherwise require a letter grade.

Other Undergraduate Policies

The Honors Program for Feminist, Gender, and Sexuality Studies will consider flexibility in meeting program requirements on a case-by-case basis.

Graduate Degree Requirements

Grading

The Program in Feminist, Gender, and Sexuality Studies counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of graduate degree requirements that otherwise require a letter grade provided that the instructor affirms that the work was done at a 'B-' or better level.

Graduate Advising Expectations

The Department of Feminist, Gender, and Sexuality Studies is committed to providing academic advising in support of graduate student scholarly and professional development. When most effective, this advising relationship entails collaborative and sustained engagement by both the adviser and the advisee for students enrolled in the Ph.D. minor in Feminist, Gender, and Sexuality Studies. Students enrolled in the Ph.D. minor are encouraged to consult their advisers each quarter. As a best practice, advising expectations should be periodically discussed and reviewed to ensure mutual understanding. Both the adviser and the advisee are expected to maintain professionalism and integrity.

Faculty advisers guide students in key areas such as selecting courses, designing and conducting research, developing of teaching pedagogy, navigating policies and degree requirements, and exploring academic opportunities and professional pathways.

Graduate students are active contributors to the advising relationship, proactively seeking academic and professional guidance and taking responsibility for informing themselves of policies and degree requirements for their graduate program.

For a statement of University policy on graduate advising, see the "Graduate Advising (p. 80)" section of this bulletin.

Overseas Studies Courses in Feminist, Gender, and Sexuality Studies

The Bing Overseas Studies Program (http://bosp.stanford.edu) (BOSP) manages Stanford international and domestic study away programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The BOSP course search site (https://undergrad.stanford.edu/programs/bosp/explore/search-courses/) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu) or Bing Overseas Studies (http://bosp.stanford.edu).

Due to COVID-19, all BOSP programs have been suspended for Autumn Quarter 2020-21. All courses and quarters of operation are subject to change.

		Units
OSPBER 174	Sports, Culture, and Gender in Comparative Perspective	3-5
OSPFLOR 34	The Virgin Mother, Goddess of Beauty, Grand Duchess, and the Lady: Women in Florentine Art	4
OSPFLOR 67	The Celluloid Gaze: Gender, Identity and Sexuality in Cinema	4
OSPHONGK 42	Gender and Sexuality in Contemporary Society	4
OSPKYOTO 41	Queer Culture and Life in Japan	4
OSPMADRD 45	Women in Art: Case Study in the Madrid Museums	4
OSPOXFRD 117W	Gender and Social Change in Modern Britain	4-5

Courses

FEMGEN 3E. Michelle Obama in American Culture. 1 Unit.
Never before has the United States had a First Lady like Michelle Obama. During her eight years in the White House, Michelle Obama transformed traditional meanings of womanhood, marriage, motherhood, and style and created new possibilities for what it means to be strong and what it means to be beautiful. No First Lady has ever been so scrutinized but also so beloved: from her J. Crew dresses to her Let's Move campaign, from her vegetable gardens to her chiseled arms, and from her powerful speeches to her casual and always authentic personality. This class examines the impact on American culture of the most popular First Lady in American history.
Same as: AFRICAAM 3E, AMSTUD 3E, CSRE 3E, HISTORY 3E

FEMGEN 5C. Human Trafficking: Historical, Legal, and Medical Perspectives. 3 Units.
(Same as History 105C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution, labor exploitation, and organ trade, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning. Required weekly 50-min. discussion section, time TBD. Students interested in service learning should consult with the instructor and will enroll in an additional course.
Same as: CSRE 5C, HISTORY 5C, INTNLREL 5C

FEMGEN 5S. Comparative Partitions: Religion, Identity, and the Nation-State. 5 Units.
This course looks at demands for representation made by religious minority communities, specifically by Indian Muslim and European Jewish intellectuals, in the twentieth century. We will explore what national belonging means from the perspective of minorities against the backdrop of global discussions of anticolonialism, national self determination, and equal representation. Through primary sources, namely political tracts and speeches, oral histories, literary sources, and historical maps, we question how authors from different backgrounds constructed religious communities as nations in need of states.
Same as: HISTORY 5S

FEMGEN 6W. Community-Engaged Learning Workshop on Human Trafficking - Part I. 3 Units.
Considers purpose, practice, and ethics of service learning. Provides training for students' work in community. Examines current scope of human trafficking in Bay Area, pressing concerns, capacity and obstacles to effectively address them. Students work with community partners dedicated to confronting human trafficking and problems it entails on a daily basis. Must currently be enrolled in or have previously taken History 5C/105C (FemGen 5C/105C, HumBio 178H, IR 105C, CSRE 5C/105C). (Cardinal Course certified by the Haas Center).
Same as: HISTORY 6W, HUMRTS 6W

FEMGEN 7W. Community-Engaged Learning Workshop on Human Trafficking - Part II. 3 Units.
Prerequisite: HISTORY6W (FEMGEN 6W). Continuation of HISTORY 6W (FEMGEN 6W). Students will continue working on their projects with their community partners. Several class meetings and small group consultations throughout the quarter. (Cardinal Course certified by the Haas Center).
Same as: HISTORY 7W, HUMRTS 7W

FEMGEN 9SI. A Road to Diversity inclusion: Learning to Embrace the Intersection of Identities within Athletics. 1 Unit.
This course explores the interaction of one¿s identities within the context of athletics. With an emphasis on the importance of self-awareness and story telling, we will navigate how all identities intersect and affect the privilege we receive within current society. We will specifically look at how race, ethnicity, sexual orientation, religion, socioeconomic status, mental health, and disabilities interact with our identity as athletes. ¿A Road to Diversity Inclusion: Learning to Embrace the Intersection of Identities within Athletics¿ will help athletes find their voice and use it for positive social change within their communities.

FEMGEN 10A. BAY AREA DOMESTIC WORKERS: RIGHTS: A GRASSROOTS CAMPAIGN FOR SOCIAL JUSTICE. 1 Unit.
In this Alternative Spring Break course and trip, we will examine how ournsociety and institutions allow for and perpetuate the exploitation andnoppression of domestic workers. Historically, domestic workers have largelynbeen excluded from basic labor protections. We cannot think criticallynabout the issues domestic workers face without considering the rolesngender, race and ethnicity, immigration status, and language play in thenindustry. We will use a conceptual framework based on citizenship andnreproductive labor theory to address themes in the context of Bay Areanmigrant women of color who are vehemently campaigning for equal labornrights. Through collaborations with domestic worker organizations based innSan Francisco and Oakland, ASB participants will learn how this movementnseeks to transform the domestic work industry through multilingual andnmulticultural alliances.

FEMGEN 11SI. Protecting your Bubble: Self Defense Strategies for College Students. 1 Unit.
This course will offer self defense training for students, with a focus on mental and physical defense, primarily against sexual assault. The course will focus on an "empowerment" method of self defense, seeking to provide tools and build confidence in students for a variety of situations. Students will participate in group discussions on the topic of sexual assault on college campuses, as well as physical and mental self defense tactics both to build confidence in any situation, prevent assault, and to employ in dangerous situations.

FEMGEN 12SI. Beyond the Athlete: Intersection of Diversity, Storytelling, and Athletics. 1-2 Unit.
This course explores the interaction of one's identities within the context of athletics. With an emphasis on the importance of self-awareness and storytelling, we will navigate how all identities intersect and affect the privilege we receive within current society. We will specifically look at how race, ethnicity, sexual orientations, religion, socioeconomic status, mental health, and disabilities interact with the sphere of athletics. "Beyond the Athlete: Intersection of Storytelling, Diversity, and Athletics" will help students find their voice and use it for positive social change within their communities.

FEMGEN 13. Stanford Anti-Violence Educator Training. 2 Units.
The Stanford Anti-Violence Educators (SAVE) Program seeks to cultivate a more resilient, supportive, and safe Stanford culture by engaging students in peer-to-peer dialogues about sexuality and consent, equipping them with skills to better relate with others. In this class, you will develop the knowledge and skill to facilitate peer education workshops with a variety of groups on campus throughout the year, including the required frosh curriculum. We will engage in conversations about sexuality, gender, identity, boundaries, and communication. We will examine social discourses, campus norms, systems of oppression, as well as explore new ways for the community to engage itself on these topics. The class will offer the structure and guidance to 1) gain in-depth knowledge of SAVE curricula content, 2) facilitate with presence, authenticity, and connection, and 3) increase self-efficacy as a leader for cultural change.

FEMGEN 13N. Women Making Music. 3 Units.
Preference to freshmen. Women's musical activities across times and cultures; how ideas about gender influence the creation, performance, and perception of music.
Same as: MUSIC 14N

FEMGEN 17. Gender and Power in Ancient Greece. 4 Units.
(Formerly CLASSGEN 17.) Introduction to the sex-gender system of ancient Greece, with comparative material from modern America. How myths, religious rituals, athletics, politics and theater reinforced gender stereotypes and sometimes undermined them. Skills: finding clues, identifying patterns and making connections amongst the components of a strange and beautiful culture very different from our own. Weekly participation in a discussion section is required.

FEMGEN 20Q. Making of the Modern Woman: Robots, Aliens, & the Feminine in Science Fiction. 3 Units.
What does the genre of science fiction have to say about gender identity? How are women in science fiction represented by themselves and by others? Who are women? What is gender and how is it constructed and performed? What is the relationship between man and machine? Between woman and machine? How is gender represented through narratives of literal alien otherness? What does it mean to be a woman online or in gamer culture? Material will include feminist analysis of gender in popular science fiction literature and visual media from 19th through 21st centuries. Texts range from Mary Shelley's Frankenstein to Alex Garland¿s Ex Machina.nnThis course will be reading and writing intensive but should also offer opportunities for spirited discussion. We will be engaging with sensitive subjects such as race, class, gender, and sexuality. Assignments include weekly short essays, discussion leadership, individual presentations, and a final research paper.

FEMGEN 21R. StoryCraft: Athlete Relationships. 2 Units.
What is intimacy like as an athlete? What are the stereotypes and the realities? In this class, athletic-identifying students will learn about relationships from the inside out: through an examination and telling of their lived experiences. We will explore various perspectives on intimacy and relationships that illuminate different aspects of our lives and then dive into our own stories to discover the many facets of intimacy. Due to the personal nature of the topic, we will emphasize safety, trust, and confidentiality throughout. The class offers the structure and guidance to 1) mine your life for stories, 2) craft the structure and shape of your stories, and 3) perform with presence, authenticity, and connection. nPlease fill out this short application for enrollment: bit.ly/Winter2021StoryCraft.
Same as: TAPS 21AR

FEMGEN 21S. StoryCraft: On Relationships. 2 Units.
Do we need love? And if so, what does it look like? In this class, students will learn about relationships from the inside out: through an examination and telling of their lived experiences. We will explore various perspectives on intimacy and relationships that illuminate different aspects of our lives, and then dive into our own stories to discover the many facets of intimacy. Due to the personal nature of the topic, we will emphasize safety, trust, and confidentiality throughout. The class offers the structure and guidance to 1) mine your life for stories, 2) craft the structure and shape of your stories, and 3) perform with presence, authenticity, and connection. Please fill out this short application for enrollment: bit.ly/Fall2020StoryCraft.
Same as: TAPS 21S

FEMGEN 21T. StoryCraft: Sexuality, Intimacy & Relationships. 2 Units.
What are the roles of sexuality, intimacy, and relationships in my life? How do I tell a compelling story? In this class, students will learn about these topics from the inside out. We will explore various perspectives on sexuality, intimacy, and relationships and then dive into our own stories to discover the richness and vibrancy of this part of our lives. Due to the personal nature of the topic, we will emphasize safety, trust, and confidentiality throughout. The class offers the structure and guidance to 1) mine your life for stories, 2) craft the structure and shape of your stories, and 3) perform with presence, authenticity, and connection. Students will be selected from this class to tell their stories in Beyond Sex Ed Part 1 during NSO 2020. Please fill out this short application for enrollment: bit.ly/Spring2020StoryCraft. Class will be held in KINGSCOTE Gardens 140.
Same as: TAPS 21T

FEMGEN 24N. Sappho: Erotic Poetess of Lesbos. 3 Units.
Preference to freshmen. Sappho's surviving fragments in English; traditions referring to or fantasizing about her disputed life. How her poetry and legend inspired women authors and male poets such as Swinburne, Baudelaire, and Pound. Paintings inspired by Sappho in ancient and modern times, and composers who put her poetry to music.
Same as: CLASSICS 16N

FEMGEN 36N. Gay Autobiography. 4 Units.
Preference to freshmen. Gender, identity, and solidarity as represented in nine autobiographies: Isherwood, Ackerley, Duberman, Monette, Louganis, Barbin, Cammermeyer, Gingrich, and Lorde. To what degree do these writers view sexual orientation as a defining feature of their selves? Is there a difference between the way men and women view identity? What politics follow from these writers' experiences?.
Same as: HISTORY 36N

FEMGEN 39. Long Live Our 4Bil. Year Old Mother: Black Feminist Praxis, Indigenous Resistance, Queer Possibility. 1-4 Unit.
How can art facilitate a culture that values women, mothers, transfolks, caregivers, girls? How can black, indigenous, and people of color frameworks help us reckon with oppressive systems that threaten safety and survival for marginalized people and the lands that sustain us? How can these questions reveal the brilliant and inventive forms of survival that precede and transcend harmful systems toward a world of possibility? Each week, this course will call on artists, scholars, and organizers of color who clarify the urgency and interconnection of issues from patriarchal violence to environmental degradation; criminalization to legacies of settler colonialism. These same thinkers will also speak to the imaginative, everyday knowledge and creative healing practices that our forebears have used for millennia to give vision and rise to true transformation.
Same as: AFRICAAM 39, CSRE 39, NATIVEAM 39

FEMGEN 41Q. Madwomen and Madmen: Gender and the History of Mental Illness in the U.S.. 3 Units.
This seminar explores the ways that gender and historical context shaped the experience and treatment of mental illness in U.S. history. What is the relationship between historically constructed ideas of femininity and masculinity and madness? Why have women been the witches and hysterics of the past, while men experienced neurasthenia and schizoid conditions? Why have there historically been more women than men among the mentally ill? How has the emotional and psychological suffering of women differed from that of men, and how has it changed over time? Among the sources we use to explore these questions are memoirs and films such as The Three Faces of Eve and One Flew Over the Cuckoos Nest. By contrasting the changing ways women and men experienced mental illness and were treated in the past, this seminar will elucidate the historically embedded nature of medical ideas, diagnoses and treatments.
Same as: AMSTUD 41Q

FEMGEN 44Q. Gendered Innovations in Science, Medicine, Engineering, and Environment. 4-5 Units.
Explores ¿Gendered Innovations¿ or how sex, gender, and intersectional analysis in research sparks discovery and innovation. Section 1 focuses on the history of women in science. Section 2 looks at transforming research institutions. Section 3 explores ¿Gendered Innovations. ¿ Topics include historical background, basic concepts, social robots, sustainability, medicine & public health, facial recognition, inclusive crash test dummies, and more. Stanford University is engaged in a multi-year collaboration with the European Commission and the U.S. National Science Foundation project on Gendered Innovations in Science, Health & Medicine, Engineering, and Environment, and this class will contribute that project. This course fulfills the second level Writing and Rhetoric Requirement (WRITE 2) and emphasizes oral, multimedia presentation, and writing skills. Each student will develop a case study illustrating how sex, gender, and intersectional analysis can lead to innovation and enhance social equalities.
Same as: HISTORY 44Q

FEMGEN 50Q. Life and Death of Words. 4 Units.
In this course, we explore the world of words: their creation, evolution, borrowing, change, and death. Words are the key to understanding the culture and ideas of a people, and by tracing the biographies of words we are able to discern how the world was, is, and might be perceived and described. We trace how words are formed, and how they change in pronunciation, spelling, meaning, and usage over time. How does a word get into the dictionary? What do words reveal about status, class, region, and race? How is the language of men and women critiqued differently within our society? How does slang evolve? How do languages become endangered or die, and what is lost when they do? We will visit the Facebook Content Strategy Team and learn more about the role words play in shaping our online experiences. Together, the class will collect Stanford language and redesign the digital dictionary of the future. Trigger Warning: Some of the subject matter of this course is sensitive and may cause offense. Please consider this prior to enrolling in the course.
Same as: CSRE 50Q, ENGLISH 50Q, NATIVEAM 50Q

FEMGEN 52N. Spoken Sexuality: Language and the Social Construction of Sexuality. 3 Units.
The many ways language is used in the construction of sexuality and sexual identity. How language is used as a resource for performing and perceiving sexual identity. Drawing on linguistic analyses of pronunciation, word choice, and grammar, questions such as: Is there a gay accent? Why isn't there a lesbian accent? How do transgendered people modify their linguistic behavior when transitioning? How are unmarked (heterosexual) identities linguistically constructed? Sexuality as an issue of identity, as well as of desire. Iconic relations between elements of language such as breathy voice quality and high pitch, and aspects of desire such as arousal and excitement. How language encodes ideologies about sexuality; how language is used to talk about sexuality in public discourses about gay marriage and bullying, as well as in personal narratives of coming out. How language encodes dominant ideologies about sexuality, evident in labels for sexual minorities as well as terminology for sex acts. Discussions of readings, explorations of how sexuality is portrayed in popular media, and analyses of primary data. Final research paper on a topic of student choice.
Same as: LINGUIST 52N

FEMGEN 54Q. African American Women's Lives. 3-4 Units.
Preference to sophomores. African American women have been placed on the periphery of many historical documents. This course will encourage students to think critically about historical sources and to use creative and rigorous historical methods to recover African American women¿s experiences. Drawing largely on primary sources such as letters, personal journals, literature and film, this course explores the everyday lives of African American women in 19th- and 20th-century America. We will begin in our present moment with a discussion of Michelle Obama and then we will look back on the lives and times of a wide range of African American women including: Charlotte Forten Grimké, a 19th-century reformer and teacher; Nella Larsen, a Harlem Renaissance novelist; Josephine Baker, the expatriate entertainer and singer; and Ida B. Wells and Ella Baker, two luminaries of civil rights activism. We will examine the struggles of African American women to define their own lives and improve the social, economic, political and cultural conditions of black communities. Topics will include women¿s enslavement and freedom, kinship and family relations, institution and community building, violence, labor and leisure, changing gender roles, consumer and beauty culture, social activism, and the politics of sexuality.
Same as: AFRICAAM 54Q, AMSTUD 54Q, HISTORY 54Q

FEMGEN 62S. From Runaway Wives to Dancing Girls: Urban Women in the Long Nineteenth Century. 5 Units.
This course explores the ways in which women - white and black, immigrant and native born, free and enslaved - lived and labored in American cities during the long nineteenth century. Together we will examine a variety of primary sources including diaries, municipal and institutional records, newspapers, memoirs, oral histories, and visual culture. We will also consider whose stories are told and explore how historians make sense of times very different from our own. Priority given to History majors and minors.
Same as: HISTORY 62S

FEMGEN 63N. The Feminist Critique: The History and Politics of Gender Equality. 3-4 Units.
This course explores the long history of ideas about gender and equality. Each week we read, dissect, compare, and critique a set of primary historical documents (political and literary) from around the world, moving from the 15th century to the present. We tease out changing arguments about education, the body, sexuality, violence, labor, politics, and the very meaning of gender, and we place feminist critics within national and global political contexts.
Same as: AMSTUD 63N, CSRE 63N, HISTORY 63N

FEMGEN 90M. Queer Stories. 5 Units.
Like other 90 and 91-level courses, 90M will explore basic elements of fiction and nonfiction writing. Students will read a wide variety of stories and essays in order to develop a language for working through the themes, forms, and concerns of the queer prose canon. Students will complete and workshop a piece of writing that in some way draws upon the aesthetics or sensibilities of the work we have read, culled from exercises completed throughout the quarter. This final piece may be a short story, a personal essay, a chapter from a novel or memoir, or a piece that, in the spirit of queerness, blurs or interrogates standard demarcations of genre. The course is open to any and all students, regardless of how they define their gender or sexuality. NOTE: First priority to undergrads. Students must attend the first class meeting to retain their roster spot.
Same as: ENGLISH 90M

FEMGEN 94Q. The Future is Feminine. 3 Units.
Gender is one of the great social issues of our time. What does it mean to be female or feminine? How has femininity been defined, performed, punished, or celebrated? Writers are some of our most serious and eloquent investigators of these questions, and in this class we'll read many of our greatest writers on the subject of femininity, as embodied by both men and women, children and adults, protagonists and antagonists. From Virginia Woolf to Ernest Hemingway, from Beloved to Gone Girl (and even "RuPaul's Drag Race"), we'll ask how the feminine is rendered and contested. We'll do so in order to develop a history and a vocabulary of femininity so that we may, in this important time, write our own way in to the conversation. This is first and foremost a creative writing class, and our goals will be to consider in our own work the importance of the feminine across the entire spectrum of gender, sex, and identity. We will also study how we write about femininity, using other writers as models and inspiration. As we engage with these other writers, we will think broadly and bravely, and explore the expressive opportunities inherent in writing. We will explore our own creative practices through readings, prompted exercises, improv, games, collaboration, workshop, and revision, all with an eye toward writing the feminine future.
Same as: ENGLISH 94Q

FEMGEN 97. Bow Down: Queer Hip-Hop Pedagogy. 3 Units.
Although Hip-Hop is frequently associated with homophobia, violence, sexism, and misogyny it continues to resonate with people the world over. By going beyond a surface level critique of Hip-Hop culture, this course explores the ways that queerness operates in and in conjunction with Hip-Hop culture. Topics covered include Hip-Hop and feminism, tensions between Hip-Hop and queerness, the role of commercialization of Hip-Hop in queer representation and inclusion with the culture, and how the intersections of Hip-Hop and queer theory can speak to issues of identity, power and privilege.

FEMGEN 98. Queer Music. 1-2 Unit.
This course explores the cultural and historical overlap of two marginal categories¿the queer, the musical¿with a focus on what these critical concepts can teach us much about identity, identification, and belonging. We will discuss genres including classical, musical theater, rap, pop, country, and punk as well as queer socialities formed in and through these musical scenes. We will think critically about the subtleties of musical language and queer affect, the circulation of gay rumors, and the diva as an object of queer obsession while asking how race, gender, and class as well as elitism, status, and taste inform such inquiries.

FEMGEN 99. Seeds of Change. 1 Unit.
This course is a required training for student leaders of the Seeds of Change initiative. This initiative takes an interdisciplinary approach to STEM education, infusing students' technical training with leadership training through a lens of gender inequality - bringing together key components of feminist pedagogy, service-learning, and experiential education to create a transformational learning experience. In this three-quarter course (Fall, Winter, Spring), student leaders will: learn the core content featured in the Seeds of Change curriculum, reflect on their experiences as both learners and teachers of this content, hone their own leadership and group facilitation skills, and engage as researchers in the initiative's evaluation efforts. NOTE: Instructor Consent Required. Please email kpedersen@stanford.edu *Cardinal Course certified by the Haas Center. See syllabus for adjusted course schedule and times.

FEMGEN 100X. Grassroots Community Organizing: Building Power for Collective Liberation. 3-5 Units.
Taught by long-time community organizer, Beatriz Herrera. This course explores the theory, practice and history of grassroots community organizing as a method for developing community power to promoting social justice. We will develop skills for 1-on-1 relational meetings, media messaging, fundraising strategies, power structure analysis, and strategies organizing across racial/ethnic difference. And we will contextualize these through the theories and practices developed in the racial, gender, queer, environmental, immigrant, housing and economic justice movements to better understand how organizing has been used to engage communities in the process of social change. Through this class, students will gain the hard skills and analytical tools needed to successfully organize campaigns and movements that work to address complex systems of power, privilege, and oppression. As a Community-Engaged Learning course, students will work directly with community organizations on campaigns to address community needs, deepen their knowledge of theory and history through hands-on practice, and develop a critical analysis of inequality at the structural and interpersonal levels. Placements with community organizations are limited. Enrollment will be determined on the first day through a simple application process. Students will have the option to continue the course for a second quarter in the Winter, where they will execute a campaign either on campus or in collaboration with their community partner.
Same as: AFRICAAM 100, CSRE 100, URBANST 108

FEMGEN 101. Introduction to Feminist, Gender, and Sexuality Studies. 4-5 Units.
Introduction to interdisciplinary approaches to gender, sexuality, queer, trans and feminist studies. Topics include the emergence of sexuality studies in the academy, social justice and new subjects, science and technology, art and activism, history, film and memory, the documentation and performance of difference, and relevant socio-economic and political formations such as work and the family. Students learn to think critically about race, gender, and sexuality from local and global perspectives.
Same as: AMSTUD 107, CSRE 108, TAPS 108

FEMGEN 102. Art and Social Criticism. 5 Units.
Visual artists have long been in the forefront of social criticism in America. Since the 1960s, various visual strategies have helped emergent progressive political movements articulate and represent complex social issues. Which artists and particular art works/projects have become key anchors for discourses on racism, sexism, economic and social inequality, immigrant rights and climate change? We will learn about a spectrum of political art designed to raise social awareness, spark social change and rouse protest. The Art Workers Coalition's agit-prop opposing the Vietnam War and ACT-UP's emblematic signs and symbols during the AIDS/HIV crisis of the 1980s galvanized a generation into action. Works such as Judy Chicago's The Dinner Party (1979), Fred Wilson's Mining the Museum (1992), and Glenn Ligon's paintings appropriating fragments from African-American literature all raised awareness by excavating historical evidence of the long legacy resisting marginalization. For three decades feminist artists Adrian Piper, Barbara Kruger and the Guerilla Girls have combined institutional critique and direct address into a provocative form of criticality. Recent art for social justice is reaching ever broadening publics by redrawing the role of artist and audience exemplified by the democratization of poster making and internet campaigns of Occupy and the Movement for Black Lives. We will also consider the collective aesthetic activisms in the Post-Occupy era including Global Ultra Luxury Faction, Climate Justice art projects, and the visual culture of Trump era mass protests. Why are each of these examples successful as influential and enduring markers of social criticism? What have these socially responsive practices contributed to our understanding of American history?.
Same as: AFRICAAM 102B, AMSTUD 102, ARTHIST 162B, CSRE 102A

FEMGEN 103. Feminist and Queer Theories and Methods Across the Disciplines. 2-5 Units.
(Graduate Students register for PHIL 279A or FEMGEN 203) This course is an opportunity to explore the difference feminist and queer perspectives make in creative arts, humanities, and social science research.nPrerequisites: Feminist Studies 101 or equivalent with consent of instructor.nNOTE: This course must be taken for a letter grade and a minimum of 3 units to be eligible for WAYS credit. The 2 unit option is for graduate students only.
Same as: FEMGEN 203, PHIL 179A, PHIL 279A

FEMGEN 103S. Gender in Native American Societies. 5 Units.
Seminar examines the impact of colonialism on gender roles & gender relations in American Indian communities beginning with the 17th century to the present. Topics include demographic changes; social, political & economic transformations associated with biological & spiritual assaults; the dynamism & diversity of native societies. Sources include history, ethnography, biography, autobiography, the novel & film.
Same as: CSRE 103S, NATIVEAM 103S

FEMGEN 104A. Junior Seminar and Practicum. 1 Unit.
Preference to and required of Feminist Studies majors; others require consent of instuctor. Feminist experiential learning projects related to critical studies in gender and sexuality. Identifying goals, grant proposal writing, and negotiating ethical issues in feminist praxis. Developing the relationship between potential projects and their academic focus in the major.

FEMGEN 104B. Senior Seminar and Practicum. 2 Units.
Required for Feminist Studies majors. Non-majors enrolled with consent of instructor. Students develop oral reports on their practicum and its relationship to their academic work, submit a report draft and revised written analysis of the practicum, and discuss applications of feminist scholarship. May be repeated once for credit.

FEMGEN 105. Honors Work. 1-15 Unit.
(Staff).

FEMGEN 105C. Human Trafficking: Historical, Legal, and Medical Perspectives. 5 Units.
(Same as HISTORY 5C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution, labor exploitation, and organ trade, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning. Required weekly 50-min. discussion section, time TBD. Students interested in service learning should consult with the instructor and will enroll in an additional course.
Same as: CSRE 105C, HISTORY 105C, HUMRTS 112, INTNLREL 105C

FEMGEN 105P. FGSS Honors Preparation Seminar. 1 Unit.
This 2 unit course will provide students the opportunity to explore possible honors topics, project design, advisor options, and university resources including grants, libraries, and faculty. nOver the 10 weeks, students will review related research, potential methodologies, explore creative genres, and consider summer research and preparation. Students will use their findings to write a proposal to submit to the honors program as well as a proposal to submit to UAR for undergraduate funding. After completing the proposal, students will have more clear next steps for their honors projects, including summer research needs, spring course selection as it relates to their topic, and building advisor relationships.

FEMGEN 106Q. Gender and Media. 3-4 Units.
From childhood, individuals are presented with texts and images about what it means to be female, what it means to be male, but rarely what it means to question that binary. These images and texts also present what it means to be in relationship with one another, and what it means to reject established gender roles. In this course, students will examine and research how lessons learned from popular culture impact the treatment and expectations of people individually as well as in relationship with each other. Specifically, we will analyze the ways in which news articles, movie clips, magazine advertisements, television commercials as well as other texts present gender identities as binary as well as gender roles of those binary structures. How are the roles and bodies of all genders presented as objects open to scrutiny, critique, exploitation, abuse, and awe? After examining rhetorical strategies and devices, we¿ll read excerpts from texts by social critics such as Susan Bordo who analyze culture and it¿s presentation of bodies. Through case studies of films and campaign ads, visits to spaces on campus that construct gender binaries, and field trips to off campus sites, we will explore how representations of gender challenge or reinforce messages in popular media.

FEMGEN 107A. Ripped from the Headlines: Current Feminist, Gender, and Sexuality Issues and Questions. 1-2 Unit.
Discussion of current issues and questions related to Feminist, Gender, and Sexuality Studies.

FEMGEN 107C. You're Majoring in What?! Why Feminism is Still Relevant. 1-2 Unit.
Stanford Feminist Study alum and community activists will join this weekly seminar to share how studying feminism has helped them professionally. Together speakers and students will explore answers to questions such as: ¿Why study feminism, sexuality, or gender studies? ¿ ¿Why is feminism still relevant?¿.

FEMGEN 107G. Sisterhood, Brotherhood, & Gender Identity: The Histories, Stories, and Constructs of Greek Life. 1 Unit.
In this course, we will explore the history, the development, the critiques and praise of sororities and fraternities. We¿ll pay particular attention to how gender and sexuality are framed in those discussions¿ones by outsiders as well as ones by insiders. How do Greek organizations present their activities and goals? What values and roles do they highlight during recruitment? Who joins them? What expectations are there for participants? What are the perceived benefits that come with joining? What does it mean to be a ¿fraternity brother¿ or a ¿sorority sister¿ in modern Greek organizations? How are sorority women and fraternity men discussed by outsiders? How do the stereotypes of Greek life impact perceptions of individuals as well as particular sororities and fraternities? To consider these questions, we¿ll look at historical documents and analyze how groups described themselves as they were establishing; we¿ll also analyze recent documents (websites, books, etc.) to consider current ways organizations describe themselves, their activities, and their values. We¿ll use both to consider how the messages created by and about Greek organizations shape public perceptions as well as individuals¿ experiences of gender and sexuality identity.

FEMGEN 107M. College Culture & Masculinity. 1-2 Unit.
Students in this course will interrogate masculinity and its impacts on culture broadly, with a focus on college campuses. Some questions considered will include: How do structures and expectations of masculinity impact sexual assault and response to sexual assault? Where on campus do we see pressure to perform masculinity? What expectations do some campus communities, such as athletics and Greek life, have of their members to perform and maintain masculinity? How are male identifying individuals expected to behave in communities shaped by masculinity? What spaces are there for gender non-conforming folks in communities shaped by masculinity? How do structures of masculinity impact expectations of femininity and femme in these spaces and others?.

FEMGEN 107P. Momcore, Me Too, and Hook-Ups: Gender, Sexuality, and Power in Politics and Practice. 1-2 Unit.
Students bring widely varying experiences of relationships, whether romantic, familial, platonic, sexual, or professional. This course provides students an opportunity to explore how power functions in these relationships. Relying on feminist critiques of power, students will examine how constructions of gender and sexuality impact our daily lives as well as how we relate to others in those relationships while negotiating power. Activities, readings, and discussions will prompt students to reflect on ways society constructs sex, gender, and intimacy via media and politics. We will explore the following themes through an intersectional lens: codes of masculinity, concepts and practicalities of affirmative consent in straight and LGBTQIA contexts, sexual harassment and sexual empowerment, and the lived experience of dating, romance, and relationships.

FEMGEN 107S. Barbie Girls vs Sea Monsters: Gender, Sexuality, & Identity in American Culture. 1-2 Unit.
Incoming students bring widely varying experiences of intimate relationships, whether romantic, familial, platonic, or sexual. This course provides students an opportunity to examine sexuality as a broad concept encompassing a dimension of our humanity and its surrounding cultural systems, impacting how we relate with one another: our experience of sex, gender, intimacy, and worldview. Activities, readings, and discussions will prompt students to reflect on society constructs sex, gender, and intimacy. Themes will include intersectional feminism and codes of masculinity, concepts and practicalities of affirmative consent in straight and LGBTQIA contexts, gender and sexual identity spectrums, and the lived experience of dating, romance, and relationships.

FEMGEN 108. Internship in Feminist Studies. 1-5 Unit.
Supervised field, community, or lab experience in law offices, medical research and labs, social service agencies, legislative and other public offices, or local and national organizations that address issues related to gender and/or sexuality. One unit represents approximately three hours work per week. Required paper. May be repeated for credit. Service Learning Course (certified by Haas Center). Feminist, Gender, and Sexuality Majors may not receive 108 credit for their required practicum, as they are to sign up for FEMGEN 104 A & B instead. Prerequisites: Course work in Feminist, Gender, and Sexuality Studies, written proposal and application form submitted for approval by program office, written consent of faculty sponsor. Course may be taken 3 times total, for a max of 15 units.

FEMGEN 108A. Enacting Community Liberation: Women's Community Center. 1 Unit.
Campus internships are crucial forms of community-building that provide students hands-on experience with organizing, outreach, and community care. Moving from theory to praxis, the FGSS department in partnership with the Women's Community Center offers the ¿Enacting Community Liberation¿ internship.nnIn accordance with the mission of the WCC, this internship will focus on addressing issues of gender, identity, equity, and justice through a lens of intersectionality. The WCC strives to center the most marginalized, and create programming, projects, and services that serve said populations - understanding that when the needs of the most marginalized are met, everyone will be cared for.nnThis is a year-long internship, with the ability to receive one unit of course credit per quarter for up to 3 quarters of the academic year.

FEMGEN 108B. Gender in the Arab and Middle Eastern City. 5 Units.
What are the components of gendered experience in the city, and how are these shaped by history and culture? How do meanings attributed to Islam and the Middle East obscure the specificity of women¿s and men¿s lives in Muslim-majority cities? This course explores gender norms and gendered experience in the major cities of Arab-majority countries, Iran and Turkey. Assigned historical and sociological readings contextualize feminism in these countries. Established and recent anthropological publications address modernity, mobility, reproduction, consumption, and social movements within urban contexts. Students will engage with some of the key figures shaping debates about gender, class, and Islam in countries of the region typically referenced as North Africa and the Middle East (MENA). They will also evaluate regional media addressing concerns about gender in light of the historical content of the course and related political concepts.
Same as: ANTHRO 108B, URBANST 108B

FEMGEN 109. Looking Back, Moving Forward: Raising Critical Awareness in Gender and Sports. 3 Units.
In 1972, Title IX legislation opened up a vast range of opportunities for women in sports. Since then, women's sports have continued to grow yet the fight for recognition and equality persists. Simply put, men's sports are more popular than women's--so much so, in fact, that people often make the hierarchical distinction between "sports" and "women's sports." But what would it take to get more women's sports featured on ESPN or more female athletes on the cover of Sports Illustrated? And, given the well-documented corruption at the highest levels of men's sports, should such an ascent in popularity be the goal for women's sports? This course will map out and respond to the multifaceted issues that emerge when women enter the sports world. Throughout the quarter, we will explore the fight for gender equality in sports through historical, cultural, and rhetorical lenses. NOTE: Class will meet in Old Union, Room 302.
Same as: FEMGEN 209

FEMGEN 109E. Global Women Leaders: Past and Present. 3-4 Units.
This course will introduce students to global women's history, and focus on the emergence of women political leaders in the 20th century. We will begin by looking at the history of patriarchy around the world, and then consider the growth of feminist politics. We will look at movements for women's self-determination in the 19th and 20th centuries, and women's emergence as national political leaders in the 20th century. We then focus on a series of global women leaders, primarily heads of state, and explore their biographies and historical contributions. What conditions have permitted women to emerge as heads of state in the 20th century? Have women made a distinctive contribution as heads of state and political activists? In addition to lectures and discussions, class meetings include viewing several films.

FEMGEN 109S. Gender & Sports: Beyond Equality Speaker Series. 1 Unit.
To be taken in conjunction with attendance at the Winter Quarter Gender & Sports Speaker Series. This discussion group will meet 2-3 times during the quarter. Course times will be determined at the start of Winter Quarter. For questions, email rmeisels@stanford.edu. Repeatable for credit.

FEMGEN 110J. Romance, Desire, and Sexuality in Modern Japanese Literature. 3-4 Units.
This class is structured around three motifs: love suicide (as a romantic ideal), female desire, and same-sex sexuality. Over the course of the quarter we will look at how these motifs are treated in the art and entertainment from three different moments of Japanese history: the Edo period (1615-1868), the modern period (1920-65), and the contemporary period (1965-present). We will start by focusing on the most traditional representations of these topics. Subsequently, we will consider how later artists and entertainers revisited the conventional treatments of these motifs, informing them with new meanings and social significance. We will devote particular attention to how this material comments upon issues of gender, sexuality, and human relationships in the context of Japan. Informing our perspective will be feminist and queer theories of reading and interpretation.
Same as: FEMGEN 210J, JAPAN 110, JAPAN 210

FEMGEN 111. Reproductive Politics in the United States and Abroad. 3-5 Units.
Course description: This course examines the issues and debates surrounding women's reproduction in the United States and beyond. It pays special attention to how knowledge and technology travel across national/cultural borders and how women's reproductive functions are deeply connected to international politics and events abroad. Topics include: birth control, population control, abortion, sex education, sex trafficking, genetic counseling, assisted reproductive technologies, midwifery, breastfeeding, menstruation, and reproductive hazards.
Same as: AMSTUD 111

FEMGEN 112. "When We Dead Awaken": Breakthroughs in Conceptions of the Gendered Self in Literature and the Arts. 4-5 Units.
Remarkable breakthroughs In conceptions of the gendered self are everywhere evident in literature and the arts, beginning primarily with the Early Modern world and continuing into today. Many of these works inhere in innovations in literary and artistic forms in order to capture and even evoke the strong cognitive, or psychological, dimension of such ¿awakenings.¿ The reader, or viewer, is often challenged to adapt her or his mind to new forms of thought, such as John Donne¿s seventeenth century creation of the Dramatic Monologue, a form popular with modern writers, which requires the reader¿s cognitive ¿presence¿ in order to fill out the dramatic scene. In so doing, the reader often supplies the presence of the female voice and thereby enters into her self-consciousness and inner thoughts. Adrienne Rich, for example, specifically ¿rewrites¿ one of Donne¿s major poems from the female perspective. This can be, in Rich¿s words, an ¿awakening¿ for the active reader, as he or she assumes that often-unspoken female perspective. The course will also explore male conceptions of the self and how such conceptions are often grounded in cultural attitudes imposed on male subjects, which can contribute to gender-bias toward women, a subject often neglected in exploring gendered attitudes, but which is now gaining more study, for example, in Shakespeare¿s ¿Othello.¿ Readings from recent developments in the neurosciences and cognitive studies will be included in our study of artistic forms and how such forms can activate particular mindsets. Writers and artists will include Shakespeare, Michelangelo, John Donne, Virginia Woolf, Adrienne Rich, Gertrude Stein, Picasso, June Wayne, and Edward Albee¿s 1960¿s play, ¿Who¿s Afraid of Virginia Woolf?¿.
Same as: ENGLISH 182J, FEMGEN 212

FEMGEN 113. Transgender Studies. 3-4 Units.
Transgender and gender-expansive identities are the subject of growing attention and (often sensationalist) interest in the media as well as in the healthcare field, yet there exists a dearth of legitimate academic courses, research and writing that reflect and explore gender identity and expression as a fluid spectrum rather than a fixed binary. This course will address transgender and gender expansive identities from historical, medical, literary, developmental and sociopolitical perspectives.
Same as: FEMGEN 213

FEMGEN 113X. Feminist Poetry in the U.S., 1973-2017. 3-5 Units.
Traces the development of feminist poetry in the United States from second wave feminists like Adrienne Rich, Audre Lorde, and Alicia Ostriker to contemporary poetry of Anne Boyer, Steph Burt, and Eileen Myles, among others. We will think broadly about the relationship between politics and poetry, and focus specifically on the influences of second- and third- wave feminism on poetry produced by women in the U.S. from the 1970s until today.Note: To be eligible for WAYS credit, you must take the course for a Letter Grade.

FEMGEN 114. Sexual Diversity and Health. 1 Unit.
Explores multiple aspects of sexual diversity and health, including: kink/BDSM, polyamory, trans* sexuality, asexuality, high-risk sex, inter-sex-tionality, questioning gender and sexual binaries, and more. The format includes a one-day conference featuring a variety of expert speakers covering different aspects of sexual diversity and health, followed by a debriefing and discussion session to integrate what has been heard and learned.
Same as: FEMGEN 214

FEMGEN 115. Queer Reading and Queer Writing in Early Modern England. 5 Units.
Considers the possibility of identifying queer reading and writing practices in early modern England as well the theoretical and historical obstacles such a project necessarily encounters. Focus on the role which Renaissance discourses of desire continue to play in our negotiations of homo/erotic subjectivity, identity politics, and sexual and gender difference. Study of Renaissance queerness in relation to the classical tradition on the one hand and the contemporary discourses of religion, law, and politics on the other. Readings include plays, poems, and prose narratives as well as letters, pamphlets, and ephemeral literature. Both major and minor authors will be represented.

FEMGEN 115A. The Queer 20th Century: German LGBTQ Literature and Film. 3-5 Units.
What was it like to be queer in 20th-century Germany? This course examines the rich and sometimes surprising LGBTQ culture of 20th-century Germany, featuring stories that are often left out of traditional seminars. Through literature and film, we will learn about pioneering gay rights activists, persecution under National Socialism, emancipation movements under capitalism and socialism, and debates that are shaping queer life in contemporary Germany. Taught in English; students of all backgrounds are very welcome. Remote synchronous, with plenty of opportunities for breakout rooms, student discussion, Zoom breaks, and off-screen work.
Same as: FEMGEN 215A, GERMAN 115, GERMAN 215

FEMGEN 116. Narrating Queer Trauma. 4-5 Units.
Psychiatrist Dori Laub has argued that the process of narrating trauma is essential to the healing process. Not only is telling the story important, but it is also crucial to have someone else bear witness to the narrative. But how do people even begin to narrate stories of violence and pain, and how do we become good listeners? How are these stories told and heard in the specific context of queer world making? This course will explore narratives of trauma in queer lives through literature, film, media, and performance in conjunction with trauma theory and psychoanalysis. We will pay specific attention to questions of community, healing, violence, and affect at the intersections of queerness and race, sex, disability, class, gender, and nationality.
Same as: FEMGEN 216X

FEMGEN 117. Expanding Engineering Limits: Culture, Diversity, and Equity. 3 Units.
This course investigates how culture and diversity shape who becomes an engineer, what problems get solved, and the quality of designs, technology, and products. As a course community, we consider how cultural beliefs about race, ethnicity, gender, sexuality, abilities, socioeconomic status, and other intersectional aspects of identity interact with beliefs about engineering, influence diversity in the field, and affect equity in engineering education and practice. We also explore how engineering cultures and environments respond to and change with individual and institutional agency. The course involves weekly presentations by scholars and engineers, readings, short writing assignments, small-group discussion, and hands-on, student-driven projects. Students can enroll in the course for 1 unit (lectures only), or 3 units (lectures+discussion+project). For 1 unit, students should sign up for Section 1 and Credit/No Credit grading, and for 3 units students should sign up for Section 2 and either the C/NC or Grade option.
Same as: CSRE 117, CSRE 217, ENGR 117, ENGR 217, FEMGEN 217

FEMGEN 117F. Race, Gender, and Sexuality in Contemporary American Film. 4-5 Units.
This course introduces students to the theoretical and analytical frameworks necessary to critically understand constructions of race, gender, and sexuality in contemporary American film. Through a sustained engagement with a range of independent and Hollywood films produced since 2000, students analyze the ways that cinematic representations have both reflected and constructed dominant notions of race, gender, and sexuality in the United States. Utilizing an intersectional framework that sees race, gender, and sexuality as always defined by one another, the course examines the ways that dominant notions of difference have been maintained and contested through film in the United States. Readings include work by Michael Omi & Howard Winant, Patricia Hill Collins, Jodi Melamed, Stuart Hall, Lisa Duggan and bell hooks. Films to be discussed include Moonlight, Mosquita y Mari, Kumu Hina, Hustlers, and Crazy Rich Asians. To enroll in the course, please fill out the following form: https://forms.gle/RKqURW6niyB1LRyEA.
Same as: AFRICAAM 117J, AMSTUD 117, ASNAMST 117D, CSRE 117D

FEMGEN 117Q. Queer Arts: Remembering and Imagining Social Change. 4-5 Units.
This interdisciplinary fine arts course is designed to examine the nature of artistic imagination, sources of creativity and the way this work helps shape social change. We will consider the relationship among muses, mentors and models for queer artists engaged in such fields as visual art, music, theatre, film, creative writing and dance. Exploring various cultures, lands and times, we will study the relationship between memory and vision in serious art. We will ask questions about the role of the artist in the academy and the broader social responsibility of the artist. We will locate some of the similarities and differences among artists, engage with different disciplines, and discover what we can learn from one another. This seminar requires the strong voices of all participants. To encourage students to take their ideas and questions beyond the classroom, we will be attending art events (performances, exhibits, readings) individually and in groups.nnThe learning goals include a serious exploration of individual students¿ creativity, a more nuanced appreciation of diverse arts and a stronger understanding of the multifaceted nature of gender, race and class. Students will develop their abilities to write well-argued papers. They will stretch their imaginations in the written and oral assignments. And they will grow more confident as public speakers and seminar participants.
Same as: CSRE 117Q

FEMGEN 118. Transgender Cultural Studies. 4-5 Units.
In the United States, we seem to be in a ¿transgender moment,¿ or we¿ve reached what Time magazine has called the ¿transgender tipping point.¿ In this course, we will explore what this cultural moment means for the representation of transgender, nonbinary, and gender non-conforming people. We will look historically and globally at differences in representation in order to better understand our current cultural moment. We will explore multiple genres, formats, and authorial points of view to critically think through how and by whom trans stories are told. How do interlocking systems of oppression continue to dictate and drive trans representation and narrative; how do trans authors and artists push back against these systems to (re)construct their own narrative and image? Through a critical engagement with film, memoir, graphic narrative, poetry, and fiction created by and/or about trans* people, this course will engage students with an instersectional approach to trans identity and representation in concert with racial identity, sexuality, disability, socio-economic status, age, gender, and citizenship.

FEMGEN 119. Archaeology of Gender and Sexuality. 5 Units.
How archaeologists study sex, sexuality, and gender through the material remains left behind by past cultures and communities. Theoretical and methodological issues; case studies from prehistoric and historic archaeology.
Same as: ANTHRO 111, ARCHLGY 129

FEMGEN 121. Intro to Queer Studies. 4-5 Units.
This course provides an interdisciplinary grounding in historical and theoretical foundations of queer culture and theory. A critical interrogation of sex, gender, sexuality, pleasure, and embodiment will provide students with a framework for producing their own queer cultural critique. We will explore LGBTQ history alongside contemporary queer issues in popular culture, health, science, government policy, and politics. This course will also address the intersections of sexuality and gender with race, class, ability, age, nationality, and religion. Students will engage with multiple disciplinary approaches that have both shaped queer studies and have been shaped by queer methodology.

FEMGEN 122. Reality Television and All Things Basic. 3-5 Units.
In ¿Visual Pleasure and Narrative Cinema¿ (1975), feminist film theorist Laura Mulvey argues that ¿the cinema poses questions of the ways the unconscious (formed by the dominant order) structures ways of seeing and pleasure in looking,¿ (804-805), conceptualizing what has become ubiquitously known as ¿the male gaze.¿ Mulvey's theory of the male gaze in film centers on two processes, the pleasures produced through objectification and those produced through identification. Feminists of color who study the politics of popular media have critiqued as well as expanded on Mulvey's notion of the male gaze, including bell hook's articulation of an oppositional gaze¿a critical gaze¿a possible site of resistance for colonized black people.nnWithin the last two decades, reality television has become a staple of popular culture in the U.S., a key component of the representational politics of audiovisual media. Thinking the processes of objectification and identification more expansively and privileging bell hook¿s formulation of critical spectatorship, what types of pleasures are produced through the addition of the category ¿reality? ¿ How does this relate to our understandings of racialized gender in the U.S.? Is reality television ¿this generation¿s¿ soap opera, a feminized genre of (melo)drama? And does this form of reality simply reproduce the heteronormative order, or can this form of media ever subvert normative prescriptions regarding gender, age, race, class, and sex(uality)?.
Same as: CSRE 122B

FEMGEN 123. Sex and Love in Modern U.S. Society. 3 Units.
Social influences on private intimate relations involving romantic love and sexuality. Topics include the sexual revolution, contraception, dating, hook-ups, cohabitation, sexual orientation, and changing cultural meanings of marriage, gender, and romantic love.
Same as: SOC 123, SOC 223

FEMGEN 124. Challenging Sex and Gender Dichotomies in Medicine. 1 Unit.
Explores and challenges the traditional physiological bases for distinguishing human males from females, as well as the psychosocial factors that play a role in experiencing and expressing gender and sexuality. Topics include the influence of sociocultural (gender) norms and behaviors on human biology, the interactions of sex and gender on medical outcomes, the importance of understanding the spectrum of sex, gender, and sexuality in clinical practice.
Same as: FEMGEN 224

FEMGEN 125V. Virginia Woolf in the Age of #MeToo. 3-5 Units.
How does a groundbreaking first wave feminist theorist and novelistic innovator speak intergenerationally? Everything about #MeToo can be found in Virginia Woolf's works, from gender oppression, to the politics of women's entry into the public sphere, to the struggle of women to be heard and believed. We begin with A Room of One's Own (1929) and Three Guineas (1938), tying them to media coverage of #MeToo, then turn to the identity politics of her fiction and to broader histories of feminism and feminist theory.

FEMGEN 126D. Victorian Sex. 5 Units.
How can we make sense of a culture of extraordinary sexual repression that nevertheless seemed fully preoccupied with sex? Examination of the depictions of sex in Victorian literary and cultural texts. Authors include: Collins, Braddon, the Brownings, Swinburne, Stoker and Wilde.

FEMGEN 127. Human in a Time of War. 3-5 Units.
It has often been said that the post-9/11 era has been one of never-ending war for the United States. Privatization and the increasing proliferation of ever more removed technologies of killing have raised questions regarding the disposability of racialized populations targeted for submission or containment. The global, ubiquitous nature of the U.S. military industrial complex has made war synonymous with impunity.nnHowever, racialized populations have arguably been under siege and positioned as disposable since the colonization of the Americas. This course draws upon Alexander Weheliye¿s (2014) challenge to move beyond the particular, querying how racialized, gendered experiences condition more expansive notions of the human. Following Jodi Kim¿s notion of the protracted afterlife of the Cold War as epistemological structure, this course traces the continuities and transformations in constructions of populations as more or less human, from settler colonial conquest to the post-9/11 era. How has racial and gendered violence functioned to determine not only which bodies matter but which lives are legible and which subjects granted the full range of human complexity? Recognizing the ¿layered interconnectedness of political violence, racialization, and the human,¿ this course also engages ¿the existence of alternative modes of life alongside the violence, subjection, exploitation, and racialization that define the modern human¿ (Weheliye, 1-2).
Same as: CSRE 127C

FEMGEN 129A. Body Text. 4-5 Units.
Written on the body is a secret code only visible in certain lights; the accumulations of a lifetime gather there. In places the palimpsest is so heavily worked that the letters feel like braille. I like to keep my body rolled up away from prying eyes. Never unfold too much, tell the whole story. Jeanette Winterson, Written on the BodynThis course asks when and where flesh becomes text. Through an eclectic mix of short stories, novels, film, nonfiction, and critical theory, we will think through how text becomes a metaphor for, substitute for, and/or extension of the body. What exactly do we talk about when we talk about The Body How are bodies written into and out of existence? Topics will include the virtual body, the eating-disordered body, the choreographed body, the medicalized trans body, and the black body in the carceral state. Throughout the course, we will draw out the theoretical in the literary and the literary in the theoretical, and will pay special attention to the relationship between embodied practice and (traditionally) disembodied thought.

FEMGEN 130. Sex and Gender in Judaism and Christianity. 3 Units.
What role do Jewish and Christian traditions play in shaping understandings of gender differences? Is gender always imagined as dual, male and female? This course explores the variety of ways in which Jewish and Christian traditions - often in conversation with and against each other - have shaped gender identities and sexual politics. We will explore the central role that issues around marriage and reproduction played in this conversation. Perhaps surprisingly, early Jews and Christian also espoused deep interest in writing about 'eunuchs' and 'androgynes,' as they thought about Jewish and Christian ways of being a man or a woman. We will examine the variety of these early conversations, and the contemporary Jewish and Christian discussions of feminist, queer, trans- and intersex based on them.
Same as: JEWISHST 120, RELIGST 130

FEMGEN 130S. Sex and the Novel. 5 Units.
How do novels represent sexual life? This course reads texts from the eighteenth century to the present day, and considers how novelists represent the discombobulating effects of desire in fictional prose. Authors may include: S. Richardson, N. Hawthorne, J. Austen, E. Brontë, G. Gissing, H. James, D.H. Lawrence, J. Joyce, V. Nabokov, J. Baldwin, A. Hollinghurst and Z. Smith.

FEMGEN 131. Introduction to Queer Theory. 3-5 Units.
What can Queer Theory help us do and undo? Emerging at the intersections of feminist theory, queer activism, and critical race studies in the 1990's, Queer Theory has become a dynamic interdisciplinary field that informs a wide range of cultural and artistic practices. This course will introduce students to the development of queer theory as well as core concepts and controversies in the field. While considering theoretical frames for thinking gender, sexuality, and sex, we will explore the possibilities--and limitations--of queer theory with a focus on doing and undoing identity, knowledge, and power.

FEMGEN 132. Intersectional Feminism. 4 Units.
This course is focused on the feminist concept of intersectionality. As a mode of Black feminist thought, lived activist practice, and interdisciplinary research methodology, intersectionality allows us to think about overlapping forms of identity and the interlocking power structures that produce systematic oppression and discrimination. We will examine the origins and development of intersectional feminism and consider its far-reaching impact in social justice work and contemporary activist movements. As we learn the language, methods, and critiques of intersectionality, we will cover issues related to rights, ethics, privilege, and globalization while discussing social difference on micro- and macro-levels.

FEMGEN 133. Transgender Performance and Performativity. 4 Units.
This course examines theater, performance art, dance, and embodied practice by transgender artists. Students will learn the history and politics of transgender performance while considering the creative processes and formal aesthetics trans artists use to make art. We will analyze creative work in conversation with critical and theoretical texts from the fields of performance studies, art history, and queer studies.
Same as: TAPS 133T

FEMGEN 133M. Masculinity: Technologies and Cultures of Gender. 4 Units.
What is masculinity? How are masculinities invested with power and meaning in cultural contexts? How is anthropological attention to them informed by and extending inquiry across the academy in spheres such as culture studies, political theory, gender studies, history, and science and technology studies? Limited enrollment.
Same as: ANTHRO 133, ANTHRO 233

FEMGEN 133T. Transatlantic Female Modernists. 3-5 Units.
How did American and British women writers express their experiences of modernity? A major critical lens on modernism interrogates questions of gender and sexuality, including how women expressed the experiences of `writing as a woman during these years (1910-1940). But distinctions of race, class, culture, nation, and literary inheritance were powerful determinants on how individual writers gave voice to their creative aspirations. This course explores what binds and what differentiates various forms of aesthetic, political, and cultural representation in the works of pioneering transatlantic innovators: Virginia Woolf; Charlotte Perkins Gilman; Zora Neale Hurston; Djuna Barnes; Katherine Mansfield; Nella Larson; Amy Lowell; H.D.; Jessie Fauset; Nancy Cunard.

FEMGEN 134. The Marriage Plot. 5 Units.
The centrality of the marriage plot in the development of the British novel beginning in the 18th century with Samuel Richardson's *Pamela* and ending with Woolf's modernist novel *Mrs. Dalloway*. The relationship between novelistic plotting and the development of female characters into marriageable women. What is the relationship between the novel and feminine subjectivity? What aspects of marriage make it work as a plotting device? What kinds of marriages do marriage plots allow? Is the development of women's political agency related to their prominence in the novel form?.

FEMGEN 134D. Sex, Courtship, and Marriage in America. 3 Units.
How people meet, who they date, and when they settle down have all changed dramatically in recent decades. This course will provide students with a thorough overview of demographic, sociological, and historical perspectives on sex, relationships, and family in the United States. Students will become familiar with the empirical patterns and trends, political and cultural debates, and policy issues concerning historical and modern romantic and sexual relationships, as well as the major theories and research methods used in the sociological study of relationships. Throughout the course, we will explore how changes in modern relationships may affect broader patterns of social inequality and family structure. Additionally, we will examine how the mate selection process intersects with various aspects of gender, sexuality, class, race, and technology.
Same as: SOC 134D

FEMGEN 135. Body Politics. 1-2 Unit.
This weekly course facilitates conversations on issues of the body across a wide spectrum of contemporary experiences, controversies, and contexts. Informed by gender studies, critical race theory, and feminist theory, we will explore current events related to racialized violence, size liberation, reproductive rights, HIV criminalization, rape culture, disability, transgender rights, and health and fitness.

FEMGEN 136. Transnational Sexualities. 3-5 Units.
This course considers the impact of globalization on sexual identities and cultures from a transnational perspective. We will consider how shifting geographical discourses and practices have redefined gender and sexuality across cultures, across borders. With a dual goal of destabilizing the assumptions in liberal human rights agendas and the heterosexual/homosexual binary, we will examine the politics of migration and diaspora; queer nationalisms and homonationalisms; queer transnational labor flows; urban-rural divides and difference; neoliberalism and queer gentrification, among other current debates across postcolonial, feminist, queer, legal, and transnational sexuality studies.

FEMGEN 137. Beauty and Power. 1-2 Unit.
Beauty functions as a form of currency that can grant access, privilege, and possibility. How do European beauty standards collude with patriarchal power to justify social inequalities? This class facilitates weekly discussions that focus on the social construction of beauty and its socio-political impact on people of all genders. We will chart the intersections of beauty and power in order to consider the colonial construction of racial and sexual hierarchies, the $445 billion beauty industry, and daily practices that subvert, queer, or decolonize beauty. With the goal of expanding our sense of what beauty is and does, we will mine feminist theory and popular culture for surprising commentary on topics including objectification, aging, celebrity, self-fashioning, and the politics of counter-aesthetics.

FEMGEN 138. Men's Violence Against Women in Literature: A Critical and Social Analysis. 3-5 Units.
Literature, as a social and cultural product of its time, can inform and deepen our understanding of oppression. Using literature as a vehicle, this course will explore the impact of and responses to men's violence against women. Students will critically assess how the author has portrayed the topic of sexual assault and relationship abuse, how the characters and/or author exhibits victim blaming, and, if the characters were living today, would current policies adequately hold the perpetrator responsible, provide safety and justice for the survivor, and challenge rape culture. In dialogue with theoretical texts, we will analyze the literary representations of patriarchy that inform societal acceptance of gender-based violence, identify the historical prevalence of victim blaming and impunity in these works, and assess the implications on policy making at the individual, community and political level. Students will critically examine literature including Shakespeare's Taming of the Shrew, Thomas Hardy's Tess of the D'Ubervilles, Zora Neale Hurston's Their Eyes Were Watching God, Louise Erdrich's The Round House and Joyce Carol Oates' We Were the Mulvaneys. There is an optional service-learning component.
Same as: FEMGEN 238

FEMGEN 138A. How College Works: An Introduction to the Sociology of Higher Education. 3-5 Units.
This course is designed for students who want to better understand the elite 4-year college system and how inequalities are both perpetuated and ameliorated by its structure and practices (focusing on gender, race, and first generation college students). This course will prepare students for their own undergraduate study at Stanford, using research and reflection. Focusing on the sociology of higher education, the course draws from research in education, sociology and gender studies. This course is designed for undergraduates, with a notable utility for first-year students, but anyone is welcome!.
Same as: EDUC 138

FEMGEN 139. Rereading Judaism in Light of Feminism. 4 Units.
During the past three decades, Jewish feminists have asked new questions of traditional rabbinic texts, Jewish law, history, and religious life and thought. Analysis of the legal and narrative texts, rituals, theology, and community to better understand contemporary Jewish life as influenced by feminism.
Same as: JEWISHST 139

FEMGEN 139B. American Women Writers, 1850-1920. 3-5 Units.
This course traces the ways in which female writers negotiated a series of literary, social, and intellectual movements, from abolitionism and sentimentalism in the nineteenth century to Progressivism and avant-garde modernism in the twentieth. Authors include Harriet Beecher Stowe, Harriet Jacobs, Rebecca Harding Davis, Emily Dickinson, Kate Chopin, Edith Wharton, Gertrude Stein, Willa Cather, and Charlotte Perkins Gilman.
Same as: AMSTUD 139B, ENGLISH 139B

FEMGEN 140A. Destroying Dichotomies: Exploring Multiple Sex, Gender, and Sexual Identities. 3-5 Units.
This course is designed to broaden the student's awareness of the human experience by introducing scholarly debates about sex, gender and sexual identities and expressions. We will consider the socially constructed nature of sex, gender and sexuality and examine the history and community of those who identify as intersexual, transgender, homosexual, bisexual, asexual, pansexual and/or queer through texts, discussion, films, and class presentations.

FEMGEN 140D. LGBTQ History of the United States. 4-5 Units.
An introductory course that explores LGBT/Queer social, cultural, and political history in the United States. By analyzing primary documents that range from personal accounts (private letters, autobiography, early LGBT magazines, and oral history interviews) to popular culture (postcards, art, political posters, lesbian pulp fiction, and film) to medical, military, and legal papers, students will understand how the categories of gender and sexuality have changed over the past 150 years. This class investigates the relationship among queer, straight and transgender identities. Seminar discussions will question how the intersections of race, class, gender, and sexuality influenced the construction of these categories.
Same as: FEMGEN 240D, HISTORY 257C

FEMGEN 141. Activism and Intersectionality. 3-4 Units.
How are contemporary U.S. social movements shaped by the intersections of race, class, gender, and sexuality? This course explores the emergence, dynamics, tactics, and targets of social movements. Readings include empirical and theoretical social movement texts, including deep dives into Black, White, and Chicana feminisms; the KKK; and queer/LGBT movements. We will explore how social movement emergence and persistence is related to participants¿ identities and experiences with inequality; how the dynamics, targets, and tactics of mobilized participants are shaped by race, class, gender, and/or sexuality; and how social movement scholars have addressed the intersectional nature of inequality, identity, and community.
Same as: AFRICAAM 141X, CSRE 141X, SOC 153

FEMGEN 142. Sociology of Gender. 3 Units.
The aim of this course is to provide students with an understanding of the sociological conceptualization of gender. Through the sociological lens, gender is not an individual attribute or a role, but rather a system of social practices that constructs two different categories of people men and women and organizes social interaction and inequality around this difference. First we will explore what ¿gender¿ is according to sociologists and the current state of gender inequality in the labor market, at home, and at school. We will then investigate how gender structures our everyday lives through the individual, interactional, and institutional levels. Finally, we will discuss avenues for reducing gender inequality. Throughout the course, we will prioritize reading, evaluating, and questioning sociological theory and research on gender.".
Same as: FEMGEN 242, SOC 142, SOC 242

FEMGEN 143. One in Five: The Law, Politics, and Policy of Campus Sexual Assault. 3-5 Units.
TRIGGER WARNING: Over the past several years the issue of campus sexual assault and harassment has exploded into the public discourse. Multiple studies have reinforced the finding that between 20-25% of college women (and a similar proportion of students identifying as transgender and gender-nonconforming, as well as approximately 10% of male students) experience sexual assault carried out through force or while the victim was incapacitated during their time in college. Fraternities have been found to be associated with an increased risk of female sexual assault on campus. Vulnerable students and those from marginalized groups are often found to be at increased risk. This is also a significant problem in k12 education. Sexual harassment rates are even higher. Survivors have come forward across the country with harrowing stories of assault followed by what they describe as an insensitive or indifferent response from college administrators. These survivors have launched one of the most successful, and surprising, social movements in recent memory. As a result, the federal government under President Obama stepped up its civil rights enforcement in this area, with over 300 colleges and universities under investigation for allegedly mishandling student sexual assault complaints as of the end of that administration. At the same time, the Obama administration¿s heightened response led to a series of high-profile lawsuits by accused students who assert that they were falsely accused or subjected to mishandled investigations that lacked sufficient due process protections. The one thing that survivors and accused students appear to agree on is that colleges are not handling these matters appropriately and appeared to be more concerned with protection the institutional brand than with stopping rape or protecting student rights. Colleges have meanwhile complained of being whipsawed between survivors, accused students, interest groups, and enforcement authorities. In an about-face that many found shocking, the Trump Administration rescinded all of the Obama-era guidance on the subject of sexual harassment and has promulgated new proposed regulations that would offer significantly greater protection to accused students and to institutions and commensurately less protection to survivors. An increasingly partisan Congress has been unable to pass legislation addressing the issue.This course focuses on the legal, policy, and political issues surrounding sexual assault and harassment on college campuses. Each week we will read, dissect, compare and critique a set of readings that include social science, history, literature, legal, policy, journalism, and narrative explorations of the topic of campus sexual assault. We will explore the history of gender-based violence and the efforts to implement legal protections for survivors in the educational context. We will also study the basic legal frameworks governing campus assault, focusing on the relevant federal laws such as Title IX and the Clery Act. We will critically explore the ways that responses to this violence have varied by the race, class, gender identity, sexual orientation, and other characteristics of parties and institutions. We will hear from guest speakers who are actively involved in shaping policy and advocating in this area, including lawyers, activists, journalists, and policymakers. This year we will also host special guest speaker Chanel Miller, author of the bestselling memoir Know My Name. The subject matter of this course is sensitive, and students are expected to treat the material with maturity. Much of the reading and subject matter may be upsetting and/or triggering for students who identify as survivors. There is no therapeutic component for this course, although supportive campus resources and Title IX staff are available for those who need them.Elements used in grading: Grades will be based on class attendance, class participation, and a research paper or project and class presentation Enrollment is by INSTRUCTOR PERMISSION. Access the consent form here feminist.stanford.edu/academics/undergraduate-program/forms or email etsurkov@stanford.edu to request a form via email. Applications will be reviewed on a rolling basis until the class is full. Demand for the class is high and participation is capped at 18. The class usually fills quickly, so make sure to apply early. Cross-listed with the Law School (LAW 7065 and with Sociology (SOC 188).
Same as: SOC 188

FEMGEN 144. Sex, Gender, and Intersectional Analysis in Science, Medicine, Engineering, and Environment. 5 Units.
(HISTORY 44 is offered for 3 units; HISTORY 144 is offered for 5 units.) Explores "Gendered Innovations" or how sex, gender, and intersectional analysis in research sparks discovery and innovation. Section 1 focuses on the history of women in science. Section 2 looks at transforming research institutions. Section 3 explores Gendered Innovations. Topics include historical background, basic concepts, social robots, sustainability, medicine & public health, facial recognition, inclusive crash test dummies, and more. Stanford University is engaged in a multi-year collaboration with the European Commission and the U.S. National Science Foundation project on Gendered Innovations in Science, Health & Medicine, Engineering, and Environment, and this class will contribute that project. The operative questions is: how can sex, gender, and intersectional analysis lead to discovery and enhance social equalities?.
Same as: HISTORY 144

FEMGEN 144X. Transforming Self and Systems: Crossing Borders of Race, Nation, Gender, Sexuality, and Class. 5 Units.
Exploration of crossing borders within ourselves, and between us and them, based on a belief that understanding the self leads to understanding others. How personal identity struggles have meaning beyond the individual, how self healing can lead to community healing, how the personal is political, and how artistic self expression based in self understanding can address social issues. The tensions of victimization and agency, contemplation and action, humanities and science, embracing knowledge that comes from the heart as well as the mind. Studies are founded in synergistic consciousness as movement toward meaning, balance, connectedness, and wholeness. Engaging these questions through group process, journaling, reading, drama, creative writing, and storytelling. Study is academic and self-reflective, with an emphasis on developing and presenting creative works in various media that express identity development across borders.

FEMGEN 145. Culture Wars: Art and Social Conflict in the USA, 1890-1950. 4 Units.
This course examines social conflicts and political controversies in American culture through the lens of visual art and photography. We consider how visual images both reflect and participate in the social and political life of the nation and how the terms of citizenship have been represented¿and, at times, contested¿by artists throughout the first half of the 20th century. The class explores the relation between American art and the body politic by focusing on issues of poverty, war, censorship, consumerism, class identity, and racial division.
Same as: AMSTUD 145M, ARTHIST 145, ARTHIST 345

FEMGEN 146. The Politics of Epidemics. 4-5 Units.
When it comes to healthcare, whose bodies matter, who deserves care? How do scholars, activists, and patients confront and combat widespread healthcare disparities? This course explores prevailing epidemics of our moment (including HIV/AIDS, breast cancer, opioid addiction, and Lyme disease) in order to consider how infectious disease, moral panic, and national identity interplay across public health platforms, scientific research, and popular rhetoric. We will utilize intersectional frameworks to consider the histories, politics, and broader context of current epidemiological data and larger questions about doctor bias, the gender gap in pain, and cultural fears related to illness and the body. How do treatment, media coverage, policy, and access to care change according to population, location, and technology?.
Same as: PUBLPOL 166

FEMGEN 149. Gender Violence: Critical Race, Feminist, and Queer Perspectives. 5 Units.
This course examines the problem of domestic violence, sexual violence, and other forms of gender violence using critical race, legal, feminist, and queer theory. Readings reflect an interdisciplinary approach to understanding gender violence as it is understood in U.S. law, history, culture, and politics. We will explore foundational theories for why gender violence persists as well as its relationship to structural power along axes of race, gender, class, sexuality, and nation. This course will also consider feminist anti-violence social movements and debates within legal and philosophical approaches to gender violence.

FEMGEN 150. Sex, Gender, and Power in Modern China. 3-5 Units.
Investigates how sex, gender, and power are entwined in the Chinese experience of modernity. Topics include anti-footbinding campaigns, free love/free sex, women's mobilization in revolution and war, the new Marriage Law of 1950, Mao's iron girls, postsocialist celebrations of sensuality, and emergent queer politics. Readings range from feminist theory to China-focused historiography, ethnography, memoir, biography, fiction, essay, and film. All course materials are in English.
Same as: CHINA 115, CHINA 215, FEMGEN 250

FEMGEN 150G. Performing Race, Gender, and Sexuality. 4 Units.
In this theory and practice-based course, students will examine performances by and scholarly texts about artists who critically and mindfully engage race, gender, and sexuality. Students will cultivate their skills as artist-scholars through written assignments and the creation of performances in response to the assigned material. Attendance and written reflection about a live performance event on campus are required. Students will also learn various meditation practices as tools for making and critiquing performance, in both our seminar discussions and performance workshops. We will approach mindfulness as method and theory in our own practice, as well as in relation to the works studied. We will also consider the ethics and current debates concerning the mindfulness industry. Examples of artists studied include James Luna, Nao Bustamante, Renee Cox, William Pope.L, Cassils, boychild, Curious, Adrian Piper, Xandra Ibarra, Valérie Reding, Guillermo Gomez-Peña, and Ana Mendieta.
Same as: ARTSINST 150G, CSRE 150G, CSRE 350G, LIFE 150G, TAPS 150G

FEMGEN 151. Feminist Life-Writing. 4-5 Units.
This course explores life-writing as a form of feminist praxis. Feminist life-writing is an art form grounded in truth-telling, activism, and self-making that emerges from the long tradition of women writing private lives. Beginning with the politicized practices of second wave feminists up through contemporary trends in memoir and autofiction, we will confront an array of intersectional autobiographies that connect personal experience to broader movements, power structures, and oppressions. How has life-writing contributed to the articulation of feminist consciousness? How has feminism impacted the methods marginalized authors use to create forms for belonging and self-determination? As we think about the politics of life-writing, we will also consider feminist rhetorical and aesthetic strategies for confronting issues like trauma, disability, incarceration, motherhood, and friendship. Each student will conduct a large-scale research project focused on an author, genre, or theme of their choice. As we research the critical historical contexts for feminist memoir, we will simultaneously conduct our own creative experiments in life-writing.

FEMGEN 152. 'Tis all in pieces: Space and Gender on the Threshold of the Modern World. 5 Units.
These dramatic words, spoken by the British poet John Donne, signal the onset of the Early Modern world and the profound reconfigurations of space and related structures of thought, including conceptions of the self and the encoding of gender roles. We will explore the vibrant Early Modern world in the context of space and representations of gender, sexuality, and race as manifest in unprecedented literary and artistic forms, such as Shakespeare¿s ¿Othello,¿ Marlowe¿s ¿Doctor Faustus,, ¿ the poetry of John Donne, the art of Michelangelo and Caravaggio as well as key historical and cultural texts. And we will visit the Cantor Arts Center (on campus) for a guided tour and lecture on art and perspective. We also will read and discuss selected texts from the modern world, such as Samuel Beckett¿s ¿Waiting for Godot¿ and poetry and commentary by Adrienne Rich, to study both changes and continuities with the Early Modern period. We will consider the vital cognitive role of the reader or viewer in the formation of particular instances of artistic form, including recent---and highly thought-provoking---material from the neurosciences and cognitive studies.nnNote: Instructor will consider changes in meeting times/days to accommodate student schedules if feasible. Please send request to: hbrooks@stanford.edu.
Same as: FEMGEN 252

FEMGEN 153. Warhol's World. 5 Units.
Andy Warhol's art has never before been more widely exhibited, published, or licensed for commercial use, product design, and publication than it is today. For all Warhol's promiscuous visibility and global cachet at the current moment, there is much we have yet to learn about his work and the conditions of its making. This course considers the wide world of Warhol's art and life, including his commercial work of the 1950s, Pop art and films of the 1960s, and celebrity portraiture of the 1970s and 80s. Of particular interest throughout will be Warhol's photography as it reflects his interest in wealth and celebrity on the one hand and on the everyday life of everyday people on the other. The course will include multiple visits to Contact Warhol: Photography without End, an exhibition co-curated by Prof. Meyer on view throughout the quarter at the Cantor Arts Center.
Same as: AMSTUD 153, ARTHIST 153, ARTHIST 353, TAPS 153W, TAPS 353W

FEMGEN 153Q. Reading and Writing the Gendered Story. 4-5 Units.
Exploration of novels, stories, memoirs and micro-narratives in which gender plays a major role. The texts are by writers of varied genders and sexual orientations as well as varied class, racial and national backgrounds. Written assignments present a mixture of academic and creative options.
Same as: CSRE 153Q

FEMGEN 154. Black Feminist Theory. 5 Units.
This course will examine black feminist theoretical traditions, marking black women's analytic interventions into sexual and pleasure politics, reproduction, citizenship, power, violence, agency, art, representation, and questions of the body. Exploring concepts like intersectionality, matrices of violence, the politics of respectability, womanism, and other contours of a black feminist liberation politic, we will look to black feminist scholars, activists, and artists from the 19th century to today.
Same as: AFRICAAM 154

FEMGEN 154E. Black Feminist Epistemology and Analytics. 5 Units.
Building from the foundational canon of black feminist theory and praxis, this seminar will explore more recent advances in black feminist epistemologies and modes of analysis. Students will engage black feminist conceptions of the human and the self; love and relationality in precarious conditions; speculative queer, sexual, and body politics; aesthetics and cultural theory; and contemporary proposals for radical freedom and social transformation. We will consider how black feminist theory not only engages, builds on, critiques, and transforms other schools of thought, but also produces its own systems of reason and interpretation.
Same as: AFRICAAM 139

FEMGEN 154G. Black Magic: Ethnicity, Race, and Identity in Performance Cultures. 3-4 Units.
In 2013, CaShawn Thompson devised a Twitter hashtag, #blackgirlmagic, to celebrate the beauty and intelligence of black women. Twitter users quickly adopted the slogan, using the hashtag to celebrate everyday moments of beauty, accomplishment, and magic. The slogan offered a contemporary iteration of an historical alignment: namely, the concept of "magic" with both Black people as well as "blackness." This course explores the legacy of Black magic--and black magic--through performance texts including plays, poetry, films, and novels. We will investigate the creation of magical worlds, the discursive alignment of magic with blackness, and the contemporary manifestation of a historical phenomenon. We will cover, through lecture and discussion, the history of black magic representation as well as the relationship between magic and religion. Our goal will be to understand the impact and history of discursive alignments: what relationship does "black magic" have to and for "black bodies"? How do we understand a history of performance practice as being caught up in complicated legacies of suspicion, celebration, self-definition? The course will give participants a grounding in black performance texts, plays, and theoretical writings. *This course will also satisfy the TAPS department WIM requirement.*.
Same as: AFRICAAM 154G, CSRE 154D, TAPS 154G

FEMGEN 155. The Changing American Family. 4 Units.
Family change from historical, social, demographic, and legal perspectives. Extramarital cohabitation, divorce, later marriage, interracial marriage, and same-sex cohabitation. The emergence of same-sex marriage as a political issue. Are recent changes in the American family really as dramatic as they seem? Theories about what causes family systems to change.
Same as: FEMGEN 255, SOC 155, SOC 255

FEMGEN 156H. Women and Medicine in US History: Women as Patients, Healers and Doctors. 5 Units.
This course explores ideas about women's bodies in sickness and health, as well as women's encounters with lay and professional healers in the United States from the eighteenth century to the present. We begin with healthy women and explore ideas about women's life cycle in the past, including women's sexuality, the history of birth control, abortion, childbirth, and aging. We then turn to the history of women healers including midwives, lay physicians, professional physicians and nurses. Finally, we examine women's illnesses and their treatment as well as the lives of women with disabilities in the past. We will examine differences in women's experience with medicine on the basis of race, ethnicity, sexuality and class. We will relate this history to issues in contemporary medicine, and consider the efforts of women to gain control of their bodies and health care throughout US history.
Same as: AMSTUD 156H

FEMGEN 156X. Language, Gender, & Sexuality. 4 Units.
The role of language in the construction of gender, the maintenance of the gender order, and social change. Field projects explore hypotheses about the interaction of language and gender. No knowledge of linguistics required.
Same as: LINGUIST 156

FEMGEN 157. Language as Political Tool: Feminist and LGBTQ Movements and Impacts. 3-5 Units.
How does a social or political movement gain traction? For example, how did 20th-century movements of the disenfranchised, such as the Civil Rights movement, LGBTQ movements, or feminist movements, gain a voice and eventually enact change? In the mediascape of today, where everyone with access to a computer could have a voice, how does a movement change the national conversation? How do written and verbal choices of the movements impact their success and outreach to supporters? In this course, students will write and revise their own arguments in order to best understand the rhetorical potential in these movements¿ choices and to consider how those rhetorical moves are incorporated into political discourse. We'll examine the role of rhetoric, the use of argument to persuade, in social movements working toward social justice, party platforms, and public policy.
Same as: AMSTUD 157X, FEMGEN 257

FEMGEN 157P. Solidarity and Racial Justice. 4-5 Units.
Is multiracial solidarity necessary to overcome oppression that disproportionately affects certain communities of color? What is frontline leadership and what role should people play if they are not part of frontline communities? In this course we will critically examine practices of solidarity and allyship in movements for collective liberation. Through analysis of historical and contemporary movements, as well as participation in movement work, we will see how movements have built multiracial solidarity to address issues that are important to the liberation of all. We will also see how racial justice intersects with other identities and issues. This course is for students that want to learn how to practice solidarity, whether to be better allies or to work more effectively with allies. There will be a community engaged learning option for this course. Students who choose to participate in this option will either work with Stanford's DGen Office or a community organization that is explicitly devoted to multiracial movement-building.
Same as: AFRICAAM 157P, AMSTUD 157P, CSRE 157P

FEMGEN 158. Black Queer Theory. 5 Units.
This course takes a multifaceted approach to black queer theory, not only taking up black theories of gender and queer sexuality, but queer theoretical interrogations of blackness and race. The course will also examine some of the important ways that black queer theory reads and is intersected with issues like affect, epistemology, space and geography, power and subjectivity, religion, economy, the body, and the law, asking questions like: How have scholars critiqued the very language of queer and the ways it works as a signifier of white marginality? What are the different spaces we can find queer black relationality, eroticism, and kinship? How do we negotiate issues like trans*misogyny or tensions around gender and sexuality in the context of race? Throughout the course, students will become versed in foundational and emerging black queer theory as we engage scholars like Sharon Holland, Cathy Cohen, Hortense Spillers, Marlon B. Ross, Aliyyah Abdur-Rahman, Barbara Smith, Roderick Ferguson, Robert Reid-Pharr, E. Patrick Johnson, and many others. Students will also gain practice applying black queer theory as an interpretive lens for contemporary social issues and cultural production including film, music, art, and performance.
Same as: AFRICAAM 158

FEMGEN 159. James Baldwin & Twentieth Century Literature. 5 Units.
Black, gay and gifted, Baldwin was hailed as a "spokesman for the race", although he personally, and controversially, eschewed titles and classifications of all kinds. This course examines his classic novels and essays as well his exciting work across many lesser-examined domains - poetry, music, theatre, sermon, photo-text, children's literature, public media, comedy and artistic collaboration. Placing his work in context with other writers of the 20C (Faulkner, Wright,Morrison) and capitalizing on a resurgence of interest in the writer (NYC just dedicated a year of celebration of Baldwin and there are 2 new journals dedicated to study of Baldwin), the course seeks to capture the power and influence of Baldwin's work during the Civil Rights era as well as his relevance in the "post-race" transnational 21st century, when his prescient questioning of the boundaries of race, sex, love, leadership and country assume new urgency.nNOTE: Enrollment by department consent. To apply, please email Prof. Elam (melam@stanford.edu) with your name, year, major, and one sentence about why you would like to take this class.
Same as: AFRICAAM 159, ENGLISH 159

FEMGEN 160. Performance and History: Rethinking the Ballerina. 4 Units.
The ballerina occupies a unique place in popular imagination as an object of over-determined femininity as well as an emblem of extreme physical accomplishment for the female dancer. This seminar is designed as an investigation into histories of the ballerina as an iconographic symbol and cultural reference point for challenges to political and gender ideals. Through readings, videos, discussions and viewings of live performances this class investigates pivotal works, artists and eras in the global histories of ballet from its origins as a symbol of patronage and power in the 15th century through to its radical experiments as a site of cultural obedience and disobedience in the 20th and 21st centuries.
Same as: TAPS 160, TAPS 260

FEMGEN 160M. Introduction to Representations of the Middle East in Dance, Performance, & Popular Culture. 3-4 Units.
This course will introduce students to the ways in which the Middle East has been represented and performed by/in the 'West' through dance, performance, and popular culture in both historical and contemporary contexts. A brief look through today's media sources exposes a wide range of racialized and gendered representations of the Middle East that shape the way the world imagines the Middle East to be. As postcolonial theorist Edward Said explains, the framework we call Orientalism establishes the ontological character of the Orient and the Oriental as inherently `Other'. Starting with 19th century colonialism and continuing into the post-9/11 era, this course will trace the Western production, circulation, and consumption of representations of the Middle East as 'Other' in relation to global geopolitics. We will further examine dance forms produced in mid-twentieth century Iran and Egypt, with particular attention to nation-state building and constructions of gender. Finally, we will examine artistic productions and practices from the Middle East and Middle Eastern diasporic communities that respond to colonialism, war, displacement, secularism, and Euro-American Empire. Using dance studies, postcolonial feminist, and critical race theoretical frameworks, we will consider the gender, racial, political, and cultural implications of selected performance works and practices in order to analyze how bodies produce meaning in dance, performance art, theater, film, photography, and new media. Students will engage in multiple modes of learning; the course will include lectures, engaged group discussions, viewing of live and recorded performance, embodied participation in dance practice, student oral presentations, and a variety of writing exercises. Course assignments will culminate in a final research project related to class themes and methods.
Same as: CSRE 160M, DANCE 160M, TAPS 160M

FEMGEN 161. The Politics of Sex: Work, Family, and Citizenship in Modern American Women's History. 3-5 Units.
This course explores the transition from Victorian to modern American womanhood by asking how Native, European, African, Mexican, and Asian American women navigated the changing sexual, economic, and political landscapes of the twentieth century. Through secondary readings, primary sources, films, music, and literature we explore the opportunities and boundaries on groups of women in the context of historical events that included immigration, urbanization, wartime, depression, the Cold War, as well as recurrent feminist and conservative political movements.
Same as: AMSTUD 161, CSRE 162, HISTORY 61, HISTORY 161

FEMGEN 161D. Introduction to Dance Studies: Dancing Across Stages, Clubs, Screens, and Borders. 3-4 Units.
This introduction to dance studies course explores dance practice and performance as means for producing cultural meaning. Through theoretical and historical texts and viewing live and recorded dance, we will develop tools for analyzing dance and understanding its place in social, cultural, and political structures. This uses dance and choreography as a lens to more deeply understand a wide range of identity and cultural formations, such as gender, race, sexuality, (dis)ability, (trans)nationality, and empire. We will analyze dancing bodies that move across stages, dance clubs, film screens, and border zones. We will examine dance from diverse locales and time periods including ballet, modern and contemporary dance, contact improvisation, folkloric dance, burlesque, street dance, queer club dance, drag performance, music videos, TV dance competitions, and intermedia/new media performance. In addition to providing theoretical and methodological grounding in dance studies, this course develops performance analysis skills and hones the ability to write critically and skillfully about dance. No previous experience in dance is necessary to successfully complete the course.
Same as: CSRE 61, DANCE 161D, TAPS 161D

FEMGEN 163. Queer America. 4 Units.
This class explores queer art, photography and politics in the United States since 1930. Our approach will be grounded in close attention to the history and visual representation of sexual minorities in particular historical moments and social contexts. We will consider the cultural and political effects of World War II, the Cold War, the civil rights movement, psychedelics, hippie culture and sexual liberation, lesbian separatism, the AIDS crisis, and marriage equality.
Same as: AMSTUD 163, ARTHIST 163

FEMGEN 166. The Divine Feminine in India. 4 Units.
What happens when God is a woman? Is the Goddess a feminist? The Goddess, in her numerous incarnations, is foundational to much of Indian religiosity, whether Hindu, Buddhist, or even Jain¿and in turn, without her story, much of the theology and practice of these religions remains incomprehensible. This course examines the principal expressions of the theology and ritual worship of the Goddess in Indian history, from the Vedas to the Hindu Epics, to Indian philosophy, tantric ritual practice and modern global and new age movements in order to understand how the gendering of divinity affects theological speculation, religious experience, and embodied religious identity.
Same as: RELIGST 166

FEMGEN 169. Introduction to Intersectionality. 4 Units.
"Intersectionality" is so popular, it's almost impossible to avoid: it was added to the Merriam-Webster dictionary in 2017, it was painted on signs at the Women's Marches, and it guides modern day social movement organizers. But what does intersectionality mean? What can intersectionality offer And what does it mean for research and social movements to be truly intersectional? The aim of this course is to provide students with an understanding of the concept of intersectionality. First, we will delve into the works (chiefly from Black feminist scholars) that provide the foundation for today's concept of intersectionality. We will then explore, compare, and critique sociological research that applies (or fails to apply) an intersectional lens to its objects of study. Finally, we will investigate the use of intersectionality in social movements and outside academia. Throughout the course, we will prioritize reading, evaluating, and questioning sociological theory and research.
Same as: AFRICAAM 169B, SOC 169

FEMGEN 173. Gender and Higher Education: National and International Perspectives. 3-4 Units.
This course examines the ways in which higher education structures and policies interact with gender, gender identity, and other characteristics in the United States, around the world, and over time. Attention is paid to how changes in those structures and policies relate to access to, experiences in, and outcomes of higher education by gender. Students can expect to gain an understanding of theories and perspectives from the social sciences relevant to an understanding of the role of higher education in relation to structures of gender differentiation and hierarchy. Topics include undergraduate and graduate education; identity and sexuality; gender and science; gender and faculty; and feminist scholarship and pedagogy.
Same as: EDUC 173, EDUC 273, SOC 173, SOC 273

FEMGEN 173R. Introduction to Feminist Philosophy. 4 Units.
If feminism is a political practice aimed at ending patriarchy, what is the point of feminist philosophy? This course provides an introduction to feminist philosophy by exploring how important theoretical questions around sex and gender bear on practical ethical and political debates. The first part of the course will examine some of the broader theoretical questions in feminist philosophy, including: the metaphysics of gender, the demands of intersectionality, and feminist critiques of capitalism and liberalism. Questions will include: How should we understand the category `woman¿? How does gender intersect with other axes of oppression? Is capitalism inherently patriarchal? The second part of the course will address more applied topics of ethical and political debate, such as: objectification, pornography, consent, markets in women¿s sexual and reproductive labor, and the institution of marriage.
Same as: ETHICSOC 173, PHIL 90R

FEMGEN 180. Gender Relations in Islam. 4 Units.
This course investigates the ways in which gender identities and relationships between men and women have been articulated, constructed, and refashioned throughout the Muslim world. Starting with problematizing the fixed notions of gender and sexuality, we map the attitudes toward these notions through visiting a diverse array of sources from the Qur¿an, Sunna, and legal documents to historical and anthropological case studies, literature, and film from South East Asia to Europe and North America. We examine the notions of femininity and masculinity in the Qur¿an, family laws, and attitudes toward homosexuality and transgendered populations. We read examples of ambiguous use of language with regards to gender and sexuality in Persian poetry and mystical traditions. We study the dynamic relationship between Islam and Feminism in the Muslim world. Finally, we witness the implications of these attitudes in our case studies and stories, from a divorce court in Iran to a wedding in Sudan.
Same as: RELIGST 180

FEMGEN 183. Re- Imagining American Borders. 5 Units.
In this third volatile and violent year of the Trump presidency, American borders of all kinds seem to be dangerously tight. This is seen in the literal horror of immigrant detention centers filled with hungry, sick children taken from parents, ongoing mass incarceration and police attacks on young black and brown men and gendered violence targeting trans Americans and pro-choice movements. Additionally urban and rural antagonisms and constant social media anger with a kind of newly brutal linguistic framing are all underscoring a vision of an America of intractable difference. The hopeful transformation from the 2018 elections, which is having enormous reverberations in the present 2020 presidential campaigns, is interestingly also based in a discourse of difference. This course investigates sources of these borderlines and most crucially how novelists, filmmakers, poets, visual artists and essayists perceive racial, ethnic, gender, religious, sexual orientation and class borders in this country as they may re-imagine difference possibly via Vijay Prashad's polyculturalism or Gloria Anzaldùa's borderlands. Texts include those of Ta-Nehisi Coates, Boots Riley, Dee Rees, Ryan Coogler, Nelly Rosario, Janice Lobo Sapigao, Layli Long Soldier, Naomi Shihab Nye, Edwidge Danticat, Sherman Alexie, Shailja Patel, Kara Walker, and the podcast Ear Hustle, narratives created and produced from inside San Quentin, along with Shane Bauer's undercover expose of an American prison. Course guests will include actors and writers from the acclaimed web series, The North Pole, showing parts of the new second season of biting, humorous stories of gentrification, racism and immigration issues in West Oakland. And the Bay Area founder of the only women-run, inclusive mosque in the US, Rabi¿a Keeble, will speak with us about an American Islam with a Muslim community that embraces difference. Course work includes active discussion, journal entries, one comparative analytical essay and a creative final project/with analytical paper examining personal or community identities.
Same as: AMSTUD 183, CSRE 183

FEMGEN 183A. Sex, Money, and Power: An Approach Through Feminist Anthropology. 3 Units.
What are the sexual politics of labor and capital? How is the global economy shaped by sex, love, and intimacy? This course will examine intimacy--gender, sexuality, kinship, and care-- as a lense for understanding and interrogating socio-political and economic systems from an anthropological perspective. By refusing the categorical separation of the private or domestic realm from the realm of politics, this course will critically interrogate the naturalization of particular intimate configurations (like the family, romantic couple, and domestic labor) in global contexts of colonialism, (neo)liberalism, and global capitalism. It will explore how domains of seemingly ¿private¿ sentiment and personal relations are connected to liberal and illiberal forms of power, inequality, exploitation and control, as well as to processes of incorporation, citizenship, and care. Finally, through selected ethnographic texts, this course will also look at the intimate as staging ground for social resistance, political refusal, economic ingenuity, and creativity.
Same as: ANTHRO 183A

FEMGEN 187C. The Evolution of the Feminist First-Person Essay, 2000-present. 3-5 Units.
The internet age has coincided with the rise of new and reinvented modes of nonfiction writing by women online. The feminist first-person essay (what simply goes by ¿personal essay¿ in the business) has transformed internet writing formally, politically, and economically. The explosion innpopularity and shareability of this nonfiction subgenre has generated a host of new media and catapulted a new coterie of women writers into prominence. Which authors have exerted the most influence upon this new subgenre, how does the emergence of the first-person essay by women signify a mainstreaming of feminist dialectic, and how has this emergence been received by both a popular readership and the media establishment?nThis discussion-based course will investigate how the growth of the feminist first-person essay has promoted new publications and modes of publication. It will trace the genesis of the online personal essay genre from public journals like LiveJournal, Blogspot, and Tumblr, via its codification in online publications like The Toast, The Rumpus, Gawker, Jezebel, Guernica, The Hairpin, The Awl, and xoJane, to its eventual breakthrough into established newspapers, magazines, and traditionally published memoirs and essay collections.nWe will investigate questions like: How can the rendering of one individual's story benefit the political mandate of the collective? What is the first person¿s effect, and affect, in interspersing an author¿s personal experience, and what feminist potential does it contain? How does the myth of journalistic ¿objectivity¿ conflict with the presentation of the first person, and how has this objectivity myth descended from patriarchal tropes of legitimation? What do the terms ¿confessional¿ and ¿silence-breaking¿ connote? How has social media simultaneously empowered these new modes of public feminist dialogue and also exposed feminist public intellectuals to alarming levels of harassment and abuse? How successfully has the personal essay subgenre acted in de-centering hegemonic identity structures including whiteness, class privilege, and heterosexuality? What role has the feminist first-person essay played in the emergence of heavily digitized political movements including Black Lives Matter and #MeToo? What is ¿trauma porn¿, and how does it interface with the capitalistic structures of the first-person essay economy; what problems arise when capitalism and confessionalism intersect?.
Same as: ENGLISH 187C

FEMGEN 187X. Sex, Gender, and Violence: French Women Writers Today. 1-5 Unit.
Long before the 2017 #Metoo campaign, French women writers have explored through powerful fictions and autobiographies the different shades of economic, social, psychological, physical, or sexual violence that is exerted against, but also by and between, women. How does literature - the power of words - address, deconstruct or comfort power dynamics (during sex and between the sexes) that are usually silenced, taboo or unspeakable? Themes explored: sex and gender, sex and power, rape culture, sexual and moral taboos (incest, abortion, pornography, infanticide, lesbianism), the body as social stigma or source of meaning. Special attention given to narrative and descriptive strategies designed to avert, expose, deconstruct or account for specifically feminine experiences (rape, orgasm, pregnancy). Authors include Marie Darrieusecq, Christine Angot, Annie Ernaux, Marie NDiaye, Virginie Despentes, Leila Slimani, Ivan Jablonka along with feminist theory. Taught in French.
Same as: FEMGEN 287X, FEMGEN 387X, FRENCH 187, FRENCH 287, FRENCH 387

FEMGEN 188Q. Imagining Women: Writers in Print and in Person. 4-5 Units.
Gender roles, gender relations and sexual identity explored in contemporary literature and conversation with guest authors. Weekly meetings designated for book discussion and meeting with authors. Interest in writing and a curiosity about diverse women's lives would be helpful to students. Students will use such tools as close reading, research, analysis and imagination. Seminar requires strong voice of all participants. Oral presentations, discussion papers, final projects.
Same as: CSRE 188Q

FEMGEN 190W. Contemporary Women Writers. 3-5 Units.
"Every word a woman writes changes the story of the world, revises the official version¿¿is this what sets contemporary women writers apart? How can we understand the relation between the radically unprecedented material such writers explore and ¿the official version¿? What do we find compelling in their challenging of structure, style, chronology, character? Our reading- and writing-intensive seminar will dig into the ways women writers confront, appropriate, subvert, or re-imagine convention, investigating, for example, current debate about the value of ¿dislikable¿ or ¿angry¿ women characters and their impact on readers. While pursuing such issues, you'll write a variety of both essayistic and fictional responses, each of which is designed to complicate and enlarge your creative and critical responsiveness and to spark ideas for your final project. By affirming risk-taking and originality throughout our quarter, seminar conversation will support gains in your close-reading practice and in articulating your views, including respectful dissent, in lively discourse¿in short, skills highly useful in a writer¿s existence. Our texts will come from various genres, including short stories, novels, essays, blog posts, reviews, memoir.
Same as: ENGLISH 190W

FEMGEN 191Q. Writing Women's Lives. 2 Units.
Creative writing through dialogue focusing on prose about the lives of women in different cultures and generations. Novels, short stories, and micro-narrative including fiction and memoir. Students produce work using research, memory, imagination, and metaphor.

FEMGEN 192. Women in French Cinema: 1958-. 3-5 Units.
Women as objects and subjects of the voyeuristic gaze inherent to cinema. The myth of the feminine idol in French films in historical and cultural context since the New Wave until now. The mythology of stars as the imaginary vehicle that helped France to change from traditional society to modern, culturally mixed nation. The evolution of female characters, roles, actresses, directors in the film industry. Filmmakers include Vadim, Buñuel, Truffaut, Varda, Chabrol, Colline Serreau, Tonie Marshall. Discussion in English; films in French with English subtitles.
Same as: FILMSTUD 112, FRENCH 192

FEMGEN 193G. Psychological Well-Being on Campus: A Focus on Gender and Sexual Identities. 1 Unit.
This course examines mental health and psychological well-being across the spectrum of gender and sexual identities. It addresses the unique challenges that face LGBTQ-identified students, and provides tools for supporting peers as they navigate these challenges. Discussion topics include current conceptualizations of gender identity and sexual orientation, including sexual and gender fluidity; the intersection of queer identities with multiple identities such as ethnic/racial identify and faith/spirituality; unpacking stereotypes; queer relationships and sexuality, coming out and disclosure, and mental health issues.
Same as: EDUC 193G

FEMGEN 195. Directed Reading. 1-15 Unit.
May be repeated for credit. (Staff).

FEMGEN 195X. Research in Feminist, Gender, & Sexuality Studies. 1-5 Unit.
Independent research conducted under faculty or graduate student supervision. May be taken for a maximum of 3 quarters of credit.

FEMGEN 199A. Feminist, Gender, and Sexuality Studies Honors Workshop. 2-3 Units.
Required of seniors in the Feminist, Gender, and Sexuality Studies honors program. Participants share ongoing work on their honors theses. Prerequisite: consent of Instructor.

FEMGEN 199B. Feminist, Gender, and Sexuality Studies Honors Workshop. 2-3 Units.
Required of seniors in the Feminist, Gender, and Sexuality Studies honors program. Participppants share ongoing work on their honors theses. Prerequisite: consent of instructor.

FEMGEN 199C. Feminist, Gender, and Sexuality Studies Honors Workshop. 2-3 Units.
Required of seniors in the Feminist, Gender, and Sexuality Studies honors program. Participppants share ongoing work on their honors theses. Prerequisite: consent of instructor.

FEMGEN 199X. Preparation for Senior Thesis. 2-3 Units.
This course is designed for juniors (majors, minors, and those seeking Interdisciplinary Honors in CSRE or FGSS) who intend to write a senior thesis in one of the CSRE Family of Programs or FGSS Interdisciplinary Honors. The course offers resources and strategies for putting together a significant and original senior thesis. Topics to be covered include: getting funding; finding an advisor; navigating the institutional review board; formulating an appropriate question; and finding the right data/medium/texts.
Same as: AFRICAAM 199X, ANTHRO 189X, CSRE 199

FEMGEN 203. Feminist and Queer Theories and Methods Across the Disciplines. 2-5 Units.
(Graduate Students register for PHIL 279A or FEMGEN 203) This course is an opportunity to explore the difference feminist and queer perspectives make in creative arts, humanities, and social science research.nPrerequisites: Feminist Studies 101 or equivalent with consent of instructor.nNOTE: This course must be taken for a letter grade and a minimum of 3 units to be eligible for WAYS credit. The 2 unit option is for graduate students only.
Same as: FEMGEN 103, PHIL 179A, PHIL 279A

FEMGEN 205. Songs of Love and War: Gender, Crusade, Politics. 3-5 Units.
Analysis of medieval love, satirical and Crusade lyrics of the trouabdours. Study of deictic address, corporeal subjectivity, the female voice, love debates, and the body as a figure of political conflict. Course readings include medieval treatises on lyric and modern translations of the troubadour tradition. Works by Ovid, Bernart de Ventadorn, Bertran de Born, La Comtessa de Dia, Thibaut de Champagne, Raimon Vidal, Dante, and Pound. Taught in English. Course includes a lab component for creation of multi-media translation projects: trobar. stanford.edu.
Same as: FRENCH 205

FEMGEN 206. Global Medical Issues Affecting Women. 1-2 Unit.
This course probes the principal issues affecting women and girls medically around the world. Through interactive discussions, guest lectures, case studies, and academic readings, students become acquainted with the most critical challenges to women's health globally, and use selected analytical tools to assess how these may be addressed efficiently, cost-effectively, and sustainably. Topics include women's cancer, birth control, infertility, female genital mutilation, midwifery, obstetric fistula, breastfeeding, violence against women, and women's representation in biomedical research. The aim is to cultivate in students a nuanced appreciation of women's unique needs, roles, and challenges in the contemporary global health landscape. For second unit, students do a midterm project and final project on a topic of their choosing which has been approved by the instructor, as well as meet with the instructor in small groups 2-3 additional times (days/times TBD depending on schedules) throughout the quarter to discuss progress.
Same as: SOMGEN 206

FEMGEN 207D. Transhistory Colloquium. 4-5 Units.
Colloquium on the history of transgender practices and identities. Readings will include scholarly texts from the emerging historical field of transhistory as well as adjacent fields within gender history. Colloquium will investigate avenues for deepening transhistory through further historical inquiry.
Same as: FEMGEN 307D, HISTORY 207D, HISTORY 307D

FEMGEN 209. Looking Back, Moving Forward: Raising Critical Awareness in Gender and Sports. 3 Units.
In 1972, Title IX legislation opened up a vast range of opportunities for women in sports. Since then, women's sports have continued to grow yet the fight for recognition and equality persists. Simply put, men's sports are more popular than women's--so much so, in fact, that people often make the hierarchical distinction between "sports" and "women's sports." But what would it take to get more women's sports featured on ESPN or more female athletes on the cover of Sports Illustrated? And, given the well-documented corruption at the highest levels of men's sports, should such an ascent in popularity be the goal for women's sports? This course will map out and respond to the multifaceted issues that emerge when women enter the sports world. Throughout the quarter, we will explore the fight for gender equality in sports through historical, cultural, and rhetorical lenses. NOTE: Class will meet in Old Union, Room 302.
Same as: FEMGEN 109

FEMGEN 210J. Romance, Desire, and Sexuality in Modern Japanese Literature. 3-4 Units.
This class is structured around three motifs: love suicide (as a romantic ideal), female desire, and same-sex sexuality. Over the course of the quarter we will look at how these motifs are treated in the art and entertainment from three different moments of Japanese history: the Edo period (1615-1868), the modern period (1920-65), and the contemporary period (1965-present). We will start by focusing on the most traditional representations of these topics. Subsequently, we will consider how later artists and entertainers revisited the conventional treatments of these motifs, informing them with new meanings and social significance. We will devote particular attention to how this material comments upon issues of gender, sexuality, and human relationships in the context of Japan. Informing our perspective will be feminist and queer theories of reading and interpretation.
Same as: FEMGEN 110J, JAPAN 110, JAPAN 210

FEMGEN 212. "When We Dead Awaken": Breakthroughs in Conceptions of the Gendered Self in Literature and the Arts. 4-5 Units.
Remarkable breakthroughs In conceptions of the gendered self are everywhere evident in literature and the arts, beginning primarily with the Early Modern world and continuing into today. Many of these works inhere in innovations in literary and artistic forms in order to capture and even evoke the strong cognitive, or psychological, dimension of such ¿awakenings.¿ The reader, or viewer, is often challenged to adapt her or his mind to new forms of thought, such as John Donne¿s seventeenth century creation of the Dramatic Monologue, a form popular with modern writers, which requires the reader¿s cognitive ¿presence¿ in order to fill out the dramatic scene. In so doing, the reader often supplies the presence of the female voice and thereby enters into her self-consciousness and inner thoughts. Adrienne Rich, for example, specifically ¿rewrites¿ one of Donne¿s major poems from the female perspective. This can be, in Rich¿s words, an ¿awakening¿ for the active reader, as he or she assumes that often-unspoken female perspective. The course will also explore male conceptions of the self and how such conceptions are often grounded in cultural attitudes imposed on male subjects, which can contribute to gender-bias toward women, a subject often neglected in exploring gendered attitudes, but which is now gaining more study, for example, in Shakespeare¿s ¿Othello.¿ Readings from recent developments in the neurosciences and cognitive studies will be included in our study of artistic forms and how such forms can activate particular mindsets. Writers and artists will include Shakespeare, Michelangelo, John Donne, Virginia Woolf, Adrienne Rich, Gertrude Stein, Picasso, June Wayne, and Edward Albee¿s 1960¿s play, ¿Who¿s Afraid of Virginia Woolf?¿.
Same as: ENGLISH 182J, FEMGEN 112

FEMGEN 213. Transgender Studies. 3-4 Units.
Transgender and gender-expansive identities are the subject of growing attention and (often sensationalist) interest in the media as well as in the healthcare field, yet there exists a dearth of legitimate academic courses, research and writing that reflect and explore gender identity and expression as a fluid spectrum rather than a fixed binary. This course will address transgender and gender expansive identities from historical, medical, literary, developmental and sociopolitical perspectives.
Same as: FEMGEN 113

FEMGEN 214. Sexual Diversity and Health. 1 Unit.
Explores multiple aspects of sexual diversity and health, including: kink/BDSM, polyamory, trans* sexuality, asexuality, high-risk sex, inter-sextionality, questioning gender and sexual binaries, and more. The format includes a one-day conference featuring a variety of expert speakers covering different aspects of sexual diversity and health, followed by a debriefing and discussion session to integrate what has been heard and learned.
Same as: FEMGEN 114

FEMGEN 215A. The Queer 20th Century: German LGBTQ Literature and Film. 3-5 Units.
What was it like to be queer in 20th-century Germany? This course examines the rich and sometimes surprising LGBTQ culture of 20th-century Germany, featuring stories that are often left out of traditional seminars. Through literature and film, we will learn about pioneering gay rights activists, persecution under National Socialism, emancipation movements under capitalism and socialism, and debates that are shaping queer life in contemporary Germany. Taught in English; students of all backgrounds are very welcome. Remote synchronous, with plenty of opportunities for breakout rooms, student discussion, Zoom breaks, and off-screen work.
Same as: FEMGEN 115A, GERMAN 115, GERMAN 215

FEMGEN 216X. Narrating Queer Trauma. 4-5 Units.
Psychiatrist Dori Laub has argued that the process of narrating trauma is essential to the healing process. Not only is telling the story important, but it is also crucial to have someone else bear witness to the narrative. But how do people even begin to narrate stories of violence and pain, and how do we become good listeners? How are these stories told and heard in the specific context of queer world making? This course will explore narratives of trauma in queer lives through literature, film, media, and performance in conjunction with trauma theory and psychoanalysis. We will pay specific attention to questions of community, healing, violence, and affect at the intersections of queerness and race, sex, disability, class, gender, and nationality.
Same as: FEMGEN 116

FEMGEN 217. Expanding Engineering Limits: Culture, Diversity, and Equity. 3 Units.
This course investigates how culture and diversity shape who becomes an engineer, what problems get solved, and the quality of designs, technology, and products. As a course community, we consider how cultural beliefs about race, ethnicity, gender, sexuality, abilities, socioeconomic status, and other intersectional aspects of identity interact with beliefs about engineering, influence diversity in the field, and affect equity in engineering education and practice. We also explore how engineering cultures and environments respond to and change with individual and institutional agency. The course involves weekly presentations by scholars and engineers, readings, short writing assignments, small-group discussion, and hands-on, student-driven projects. Students can enroll in the course for 1 unit (lectures only), or 3 units (lectures+discussion+project). For 1 unit, students should sign up for Section 1 and Credit/No Credit grading, and for 3 units students should sign up for Section 2 and either the C/NC or Grade option.
Same as: CSRE 117, CSRE 217, ENGR 117, ENGR 217, FEMGEN 117

FEMGEN 224. Challenging Sex and Gender Dichotomies in Medicine. 1 Unit.
Explores and challenges the traditional physiological bases for distinguishing human males from females, as well as the psychosocial factors that play a role in experiencing and expressing gender and sexuality. Topics include the influence of sociocultural (gender) norms and behaviors on human biology, the interactions of sex and gender on medical outcomes, the importance of understanding the spectrum of sex, gender, and sexuality in clinical practice.
Same as: FEMGEN 124

FEMGEN 230. Sexual Function and Diversity in Medical Disciplines. 2-3 Units.
This course is a coordinated seminar series that presents evidence-based health promotion and disease prevention guidelines by clinical and translational research and population health science faculty of clinical departments other than Medicine (the focus of CHPR 260) of the Stanford School of Medicine, including; Anesthesiology & Perioperative, & Pain Medicine, Cardiothoracic gy, Emergency Medicine, Neurology & Neurological Sciences, Neurosurgery, Obstetrics & Gynecology, Ophthalmology, Orthopaedic Surgery, Otolaryngology, Pathology, Pediatrics, Psychiatry & Behavioral Sciences, Radiation Oncology, Radiology, Surgery and Urology. CHPR master's program students must enroll in CHPR 230 for a letter grade and priority for enrollment will be given to current CHPR students. For third unit, graduate students attend INDE 215 Queer Health & Medicine and complete assignments for that section. For third unit and WAYs, undergrads enroll in SOMGEN 130. Prerequisites: CHPR 201 or HUMBIO 126/CHPR 226 or equivalent or consent of instructor.
Same as: CHPR 230, SOMGEN 230

FEMGEN 236. Literature and Transgression. 3-5 Units.
Close reading and analysis of erotic-sexual and aesthetic-stylistic transgression in selected works by such authors as Baudelaire, Wilde, Flaubert, Rachilde, Schnitzler, Kafka, Joyce, Barnes, Eliot, Bataille, Burroughs, Thomas Mann, Kathy Acker, as well as in recent digital literature and online communities. Along with understanding the changing cultural, social, and political contexts of what constitutes "transgression" or censorship, students will gain knowledge of influential theories of transgression and conceptual limits by Foucault, Blanchot, and contemporary queer and feminist writers.
Same as: COMPLIT 236

FEMGEN 237. Health Impact of Sexual Assault and Relationship Abuse across the Lifecourse. 1-3 Unit.
(Human Biology students must enroll in HUMBIO 28 or AFRICAAM 28. Med/Grad students should enroll in SOMGEN 237 for 1-3 units.) An overview of the acute and chronic physical and psychological health impact of sexual abuse through the perspective of survivors of childhood, adolescent, young and middle adult, and elder abuse, including special populations such as pregnant women, military and veterans, prison inmates, individuals with mental or physical impairments. Also addresses: race/ethnicity, gender identity, sexual orientation, and other demographic and societal factors, including issues specific to college culture. Professionals with expertise in sexual assault present behavioral and prevention efforts such as bystander intervention training, medical screening, counseling and other interventions to manage the emotional trauma of abuse. Undergraduates must enroll for 3 units.To receive a letter grade in any listing, students must enroll for 3 units. This course must be taken for a letter grade and a minimum of 3 units to be eligible for Ways credit.
Same as: AFRICAAM 28, HUMBIO 28, SOMGEN 237

FEMGEN 238. Men's Violence Against Women in Literature: A Critical and Social Analysis. 3-5 Units.
Literature, as a social and cultural product of its time, can inform and deepen our understanding of oppression. Using literature as a vehicle, this course will explore the impact of and responses to men's violence against women. Students will critically assess how the author has portrayed the topic of sexual assault and relationship abuse, how the characters and/or author exhibits victim blaming, and, if the characters were living today, would current policies adequately hold the perpetrator responsible, provide safety and justice for the survivor, and challenge rape culture. In dialogue with theoretical texts, we will analyze the literary representations of patriarchy that inform societal acceptance of gender-based violence, identify the historical prevalence of victim blaming and impunity in these works, and assess the implications on policy making at the individual, community and political level. Students will critically examine literature including Shakespeare's Taming of the Shrew, Thomas Hardy's Tess of the D'Ubervilles, Zora Neale Hurston's Their Eyes Were Watching God, Louise Erdrich's The Round House and Joyce Carol Oates' We Were the Mulvaneys. There is an optional service-learning component.
Same as: FEMGEN 138

FEMGEN 239. Queer Theory. 3-5 Units.
Do we really need a theory in order to be queer? Queer Theory emerged in response to feminist thought, and the study of the history of sexuality, building on their insights, but also uncovering their blind spots. Without Queer Theory, few of the discourses around desire, power and gender identity that we take for granted on college campuses today would exist. Yet there is also a real risk that reality has left the theory behind. In this course, we will try to answer the question: What do we need queer theory for? Do we still need it? And if so, of what kind? The course is designed to introduce students to core texts of queer theory, and to connect them to current debates, be this around trans rights, the representation of homosexuality or the fight against campus sexual assault.
Same as: COMPLIT 239, GERMAN 239

FEMGEN 240D. LGBTQ History of the United States. 4-5 Units.
An introductory course that explores LGBT/Queer social, cultural, and political history in the United States. By analyzing primary documents that range from personal accounts (private letters, autobiography, early LGBT magazines, and oral history interviews) to popular culture (postcards, art, political posters, lesbian pulp fiction, and film) to medical, military, and legal papers, students will understand how the categories of gender and sexuality have changed over the past 150 years. This class investigates the relationship among queer, straight and transgender identities. Seminar discussions will question how the intersections of race, class, gender, and sexuality influenced the construction of these categories.
Same as: FEMGEN 140D, HISTORY 257C

FEMGEN 241. Sex and Gender in Human Physiology and Disease. 2-3 Units.
(HUMBIO students must enroll in HUMBIO 140. PhD minor in FGSS must enroll in FEMGEN 241. Med students must enroll in MED 240.) Chromosomal, hormonal and environmental influences that lead to male and female and intersex reproductive anatomy and physiology and neuroendocrine regulation. Masculinizing and feminizing effects of endogenous and exogenous sex hormones and sociocultural factors, in particular gender identity, (social) gender norms and relationships, on the musculoskeletal, neurological, cardiovascular, immunological and other systems and tissues, e.g. adipose, skin, etc. over the lifecourse, from conception to puberty, through reproductive phases (including changes during the menstrual cycle and pregnancy up to and beyond menopause in women, and with aging in both sexes). Transgender health issues. Guest lecturers. Enrollment limited to students with sophomore academic standing or above. Prerequisites: Human Biology Core or Biology Foundations or equivalent, or consent of instructor.
Same as: HUMBIO 140, MED 240

FEMGEN 242. Sociology of Gender. 3 Units.
The aim of this course is to provide students with an understanding of the sociological conceptualization of gender. Through the sociological lens, gender is not an individual attribute or a role, but rather a system of social practices that constructs two different categories of people men and women and organizes social interaction and inequality around this difference. First we will explore what ¿gender¿ is according to sociologists and the current state of gender inequality in the labor market, at home, and at school. We will then investigate how gender structures our everyday lives through the individual, interactional, and institutional levels. Finally, we will discuss avenues for reducing gender inequality. Throughout the course, we will prioritize reading, evaluating, and questioning sociological theory and research on gender.".
Same as: FEMGEN 142, SOC 142, SOC 242

FEMGEN 250. Sex, Gender, and Power in Modern China. 3-5 Units.
Investigates how sex, gender, and power are entwined in the Chinese experience of modernity. Topics include anti-footbinding campaigns, free love/free sex, women's mobilization in revolution and war, the new Marriage Law of 1950, Mao's iron girls, postsocialist celebrations of sensuality, and emergent queer politics. Readings range from feminist theory to China-focused historiography, ethnography, memoir, biography, fiction, essay, and film. All course materials are in English.
Same as: CHINA 115, CHINA 215, FEMGEN 150

FEMGEN 250J. Baldwin and Hansberry: The Myriad Meanings of Love. 4 Units.
This course looks at major dramatic works by James Baldwin and Lorraine Hansberry. Both of these queer black writers had prophetic things to say about the world-historical significance of major dramas on the 20th Century including civil rights, revolution, gender, colonialism, racism, sexism, war, nationalism and as well as aesthetics and politics.
Same as: AFRICAAM 250J, AMSTUD 250J, CSRE 250J, TAPS 250J

FEMGEN 252. 'Tis all in pieces: Space and Gender on the Threshold of the Modern World. 5 Units.
These dramatic words, spoken by the British poet John Donne, signal the onset of the Early Modern world and the profound reconfigurations of space and related structures of thought, including conceptions of the self and the encoding of gender roles. We will explore the vibrant Early Modern world in the context of space and representations of gender, sexuality, and race as manifest in unprecedented literary and artistic forms, such as Shakespeare¿s ¿Othello,¿ Marlowe¿s ¿Doctor Faustus,„ ¿ the poetry of John Donne, the art of Michelangelo and Caravaggio as well as key historical and cultural texts. And we will visit the Cantor Arts Center (on campus) for a guided tour and lecture on art and perspective. We also will read and discuss selected texts from the modern world, such as Samuel Beckett¿s ¿Waiting for Godot¿ and poetry and commentary by Adrienne Rich, to study both changes and continuities with the Early Modern period. We will consider the vital cognitive role of the reader or viewer in the formation of particular instances of artistic form, including recent-–and highly thought-provoking-–material from the neurosciences and cognitive studies.nnNote: Instructor will consider changes in meeting times/days to accommodate student schedules if feasible. Please send request to: hbrooks@stanford.edu.
Same as: FEMGEN 152

FEMGEN 253L. Caring Labor in the United States. 3-5 Units.
Who cares for America's children, elderly, and infirm? How is the structure of these labor forces influenced by ideologies of race, gender, and class? Beginning with theories of reproductive and caring labor, we examine the history of coerced and enslaved care and then caring as free labor. We will look at housework, child care, nursing, and elder care, among others, and will also examine how activists, policy makers, and workers have imagined new ways of performing and valuing care.
Same as: AFRICAAM 253, HISTORY 253L

FEMGEN 255. The Changing American Family. 4 Units.
Family change from historical, social, demographic, and legal perspectives. Extramarital cohabitation, divorce, later marriage, interracial marriage, and same-sex cohabitation. The emergence of same-sex marriage as a political issue. Are recent changes in the American family really as dramatic as they seem? Theories about what causes family systems to change.
Same as: FEMGEN 155, SOC 155, SOC 255

FEMGEN 255B. Contested Masculinities in Modern America. 5 Units.
This course examines masculinity in the twentieth-century United States across academic disciplines. Suspending the idea that manhood is biologically fixed or innate, this course presents masculinity as socially constructed and in a state of ongoing contest and crisis. Students will explore what it has meant (and means) to be a man in America, how masculinity has related to femininity and feminism, and masculinity's intersection with other identities like race, ethnicity, religion, and sexual orientation. Assigned materials include an array of readings in History, African and African American Studies, Gender and Women's Studies, Art History, and American Studies, along with documentary and fictional films.
Same as: HISTORY 255B

FEMGEN 256. Current Topics and Controversies in Women's Health. 2-3 Units.
(HUMBIO students must enroll in HUMBIO 125. PhD minor in FGSS must enroll in FEMGEN 256. Med students must enroll in OBGYN 256.) Interdisciplinary. Focus is primarily on the U.S., with selected global women's health topics. Topics include: leading causes of morbidity and mortality across the life course; reproductive (e.g. gynecologic & obstetric) health issues; sexual function; importance of lifestyle (e.g. diet, exercise, weight control), including eating disorders; mental health; sexual and relationship abuse; issues for special populations. In-class Student Debates on key controversies in women's health. Guest lecturers. Undergraduates must enroll for 3 units. PhD minor in FGSS should enroll for 2 - 3 units. Med students should enroll for 2 units. To receive a letter grade in any listing, students must enroll for 3 units. This course must be taken for a letter grade and a minimum of 3 units to be eligible for Ways credit. Enrollment limited to students with sophomore academic standing or above. Undergraduate prerequisite: Human Biology Core or Biology Foundations or equivalent or consent of instructor.
Same as: HUMBIO 125, OBGYN 256

FEMGEN 257. Language as Political Tool: Feminist and LGBTQ Movements and Impacts. 3-5 Units.
How does a social or political movement gain traction? For example, how did 20th-century movements of the disenfranchised, such as the Civil Rights movement, LGBTQ movements, or feminist movements, gain a voice and eventually enact change? In the mediascape of today, where everyone with access to a computer could have a voice, how does a movement change the national conversation? How do written and verbal choices of the movements impact their success and outreach to supporters? In this course, students will write and revise their own arguments in order to best understand the rhetorical potential in these movements¿ choices and to consider how those rhetorical moves are incorporated into political discourse. We'll examine the role of rhetoric, the use of argument to persuade, in social movements working toward social justice, party platforms, and public policy.
Same as: AMSTUD 157X, FEMGEN 157

FEMGEN 257X. Simone Weil, Simone de Beauvoir, Hannah Arendt, and Adriana Cavarero. 3-5 Units.
What does it mean to say the personal is the political, or, in the case of Arendt, that the personal is not political, especially if you are a woman? This course explores how Weil, De Beauvoir, Arendt, and Caverero contend with the question of personhood, in its variegated social, political, ethical, and gendered dimensions. Particular attention will be given to a philosophy of social change and personal transformation, and to the enduring relevance of these women's thought to issues of our day. Texts include selections from "Gravity and Grace," "The Second Sex," "The Ethics of Ambiguity," "The Human Condition," "Between Past and Future," "Stately Bodies," and "Relating Narratives.".
Same as: COMPLIT 257, COMPLIT 357A, FEMGEN 357X, FRENCH 257, FRENCH 357, ITALIAN 257, ITALIAN 357

FEMGEN 258. History of Sexual Violence in America. 4-5 Units.
This undergraduate/graduate colloquium explores the history of sexual violence in America, with particular attention to the intersections of gender and race in the construction of rape. We discuss the changing definitions of sexual violence in law and in cultural representations from early settlement through the late-twentieth century, including slavery, wartime and prison rape, the history of lynching and anti-lynching movements, and feminist responses to sexual violence. In addition to introducing students to the literature on sexual violence, the course attempts to teach critical skills in the analysis of secondary and primary historical texts. Students write short weekly reading responses and a final paper; no final exam; fifth unit research or CEL options.nnLimited enrollment, permission of instructor required. Submit application form and indicate interest in CEL option. Priority admission to History, FGSS, CSRE, AFRICAAM, and AMSTUD declared majors and minors. (Cardinal Course certified by the Haas Center).
Same as: AFRICAAM 192, AMSTUD 258, CSRE 192E, FEMGEN 358, HISTORY 258, HISTORY 358

FEMGEN 258X. Black Feminist Theater and Theory. 4 Units.
From the rave reviews garnered by Angelina Weld Grimke's lynching play, Rachel to recent work by Lynn Nottage on Rwanda, black women playwrights have addressed key issues in modern culture and politics. We will analyze and perform work written by black women in the U.S., Britain and the Caribbean in the 20th and 21st centuries. Topics include: sexuality, surrealism, colonialism, freedom, violence, colorism, love, history, community and more. Playwrights include: Angelina Grimke, Lorriane Hansberry, Winsome Pinnock, Adrienne Kennedy, Suzan- Lori Parks, Ntzoke Shange, Pearl Cleage, Sarah Jones, Anna DeVeare Smith, Alice Childress, Lydia Diamond and Zora Neale Hurston.).
Same as: AFRICAAM 258, CSRE 258, TAPS 258

FEMGEN 260. Disability, Gender, and Identity: Women's Personal Experiences. 5 Units.
This course explores visible and invisible disabilities, focusing on issues of gender and identity in the personal experiences of women. The course emphasizes psychological as well as physical health, the diversity of disability experiences, self-labeling, caretaking, stigma and passing, and social and political aspects. Disabilities covered include blindness, multiple sclerosis, diabetes, arthritis, emotional and learning disabilities, and conditions requiring wheelchairs and other forms of assistance. The readings draw from the disability studies literature and emphasize women's personal narratives in sociological perspective. Note: Instructor Consent Required.
Same as: AMSTUD 260, FEMGEN 360

FEMGEN 261. Personal Narratives in Feminist, Gender, and Sexuality Studies. 4-5 Units.
This course explores the contribution of personal narratives to knowledge in the field of feminist, gender, and sexuality studies. Each week, students do extensive readings of exemplary personal narratives that have contributed in substance and method to the field and that have opened up new areas of inquiry. These narratives deal especially with issues of individual and group identity; gender, sexuality, racial and ethnic diversity; and disability. Students select a topic of special interest to them to focus their readings and guide individual research during the quarter. The approach of the course is feminist, ethnographic, and welcoming of a variety of approaches to personal narrative. Instructor consent required; students apply at the first class meeting.
Same as: AMSTUD 261, FEMGEN 361

FEMGEN 262. Sex and the Early Church. 4 Units.
Sex and the Early Church examines the ways first- through sixth-century Christians addressed questions regarding human sexuality. We will pay particular attention to the relationship between sexuality and issues of gender, culture, power, and resistance. We will read a Roman gynecological manual, an ancient dating guide, the world's first harlequin romance novels, ancient pornography, early Christian martyrdom accounts, stories of female and male saints, instructions for how to best battle demons, visionary accounts, and monastic rules. These will be supplemented by modern scholarship in classics, early Christian studies, gender studies, queer studies, and the history of sexuality. The purpose of our exploration is not simply to better understand ancient views of gender and sexuality. Rather, this investigation of a society whose sexual system often seems so surprising aims to denaturalize many of our own assumptions concerning gender and sexuality. In the process, we will also examine the ways these first centuries of what eventually became the world's largest religious tradition has profoundly affected the sexual norms of our own time. The seminar assumes no prior knowledge of Judaism, Christianity, the bible, or ancient history.
Same as: CLASSICS 262, RELIGST 262, RELIGST 362

FEMGEN 287X. Sex, Gender, and Violence: French Women Writers Today. 1-5 Unit.
Long before the 2017 #Metoo campaign, French women writers have explored through powerful fictions and autobiographies the different shades of economic, social, psychological, physical, or sexual violence that is exerted against, but also by and between, women. How does literature - the power of words - address, deconstruct or comfort power dynamics (during sex and between the sexes) that are usually silenced, taboo or unspeakable? Themes explored: sex and gender, sex and power, rape culture, sexual and moral taboos (incest, abortion, pornography, infanticide, lesbianism), the body as social stigma or source of meaning. Special attention given to narrative and descriptive strategies designed to avert, expose, deconstruct or account for specifically feminine experiences (rape, orgasm, pregnancy). Authors include Marie Darrieusecq, Christine Angot, Annie Ernaux, Marie NDiaye, Virginie Despentes, Leila Slimani, Ivan Jablonka along with feminist theory. Taught in French.

FEMGEN 292. Gender in Modern South Asia. 5 Units.
Gender is crucial to understanding the political, cultural, and economic trajectories of communities in colonial and postcolonial South Asia. Throughout this course, we will ask a series of questions: How does gender structure conceptions of home, community, and homeland in South Asia? How do gender and religion become represented in movements for nation-states? How does women's participation in anticolonial politics and fights for equal representation in postcolonial nation-states affect our understanding of gender in South Asia today? Readings examine the creation and impact of religious personal law under British colonial rule, the role of masculinity in the British-Indian army, perspectives on religion and clothing, the interplay of rights movements and anti-colonialism, and the status of women in postcolonial India, Pakistan, and Bangladesh. Students will also explore a range of primary sources, including political treatises, short stories, didactic manuals, autobiographies, and travelogues.
Same as: HISTORY 292C

FEMGEN 297. Gender and Education in Global and Comparative Perspectives. 3-4 Units.
This course introduces students to theories and perspectives from the social sciences relevant to an understanding of the role of education in relation to structures of gender differentiation, hierarchy, and power. It familiarizes students with and enables them to critically evaluate research on the status of children, adolescents, and young adults around the world and their participation patterns in various sectors of society, particularly in education. Students have the opportunity to gain research skills by designing research proposals or to develop action plans on topics of their choosing related to gender and education from global and/or comparative perspectives.
Same as: EDUC 197, SOC 134

FEMGEN 298C. Race, Gender, & Sexuality in Chinese History. 5 Units.
This course examines the diverse ways in which identities--particularly race, ethnicity, gender and sexuality have been understood and experienced in Chinese societies, broadly defined, from the imperial period to the present day. Topics include changes in women's lives and status, racial and ethnic categorizations, homosexuality, prostitution, masculinity, and gender-crossing.
Same as: ASNAMST 298, CSRE 298G, HISTORY 298C, HISTORY 398C

FEMGEN 299. Graduate Workshop: Feminist, Gender, and Sexuality Studies. 1-3 Unit.
Theory, methods, and research in feminist, gender, and sexuality studies, through presentations of ongoing work by students, faculty, and guest speakers, and discussion of recent literature and controversies, feminist pedagogy and career development issues. Restricted to doctoral students. Repeatable for credit. Required for PhD Minors in Feminist, Gender, and Sexuality Studies (3 quarters min.).

FEMGEN 307D. Transhistory Colloquium. 4-5 Units.
Colloquium on the history of transgender practices and identities. Readings will include scholarly texts from the emerging historical field of transhistory as well as adjacent fields within gender history. Colloquium will investigate avenues for deepening transhistory through further historical inquiry.
Same as: FEMGEN 207D, HISTORY 207D, HISTORY 307D

FEMGEN 312F. Pitching and Publishing in Popular Media. 1 Unit.
Most of the time, writing a pitch for a popular outlet just means writing an email. So why be intimidated? This course will outline the procedure for pitching essays and articles to popular media: how to convince an editor, agent, or anyone else that your idea is compelling, relevant, and deliverable. We'll take a holistic approach to self-presentation that includes presenting yourself with confidence, optimizing your social media and web platform, networking effectively, writing excellent queries and pitches, avoiding the slush pile, and perhaps most importantly, persevering through the inevitable self-doubt and rejection.We will focus on distinguishing the language, topics and hooks of popular media writing from those of academic writing, learn how to target and query editors on shortform pieces (personal essays, news stories, etc.), and explore how humanists can effectively self-advocate and get paid for their work.
Same as: DLCL 312, ENGLISH 318

FEMGEN 312G. Advanced Workshop in Pitching and Publishing for Popular Media. 1 Unit.
Graduate students may self-determine a popular media project¿such as an essay, column/series of essays, podcast, agent query, or book proposal¿to be completed, with consent, under the mentorship of the Graduate Humanities Public Writing Project. Prerequisite: Pitching and Publishing in Popular Media (DLCL 312/ENG 318/FEMGEN 312F), approved project proposal. Students will determine their individual meeting schedule with the instructor, and will also convene for at least one group meeting.
Same as: ENGLISH 318A

FEMGEN 313. Performance and Performativity. 5 Units.
Performance theory through topics including: affect/trauma, embodiment, empathy, theatricality/performativity, specularity/visibility, liveness/disappearance, belonging/abjection, and utopias and dystopias. Readings from Schechner, Phelan, Austin, Butler, Conquergood, Roach, Schneider, Silverman, Caruth, Fanon, Moten, Anzaldúa, Agamben, Freud, and Lacan. May be repeated for credit.
Same as: ENGLISH 313, TAPS 313

FEMGEN 314. Performing Identities. 4 Units.
This course examines claims and counter-claims of identity, a heated political and cultural concept over the past few decades. We will consider the ways in which theories of performance have offered generative discursive frameworks for the study of identities, variously shaped by vectors of race, gender, sexuality, religion, class, nation, ethnicity, among others. How is identity as a social category different from identity as a unique and personal attribute of selfhood? Throughout the course we will focus on the inter-locking ways in which certain dimensions of identity become salient at particular historical conjunctures. In addition, we will consider the complex discourses of identity within transnational and historical frameworks. Readings include Robin Bernstein, Ann Pellegrini, Tavia Nyong¿o, Jose Munoz, Michael Taussig, Wendy Brown, Talal Asad, Jasbir Puar, among others.
Same as: TAPS 314

FEMGEN 344F. Intersectional Design: An Expanded Approach to Gender in Tech. 4-5 Units.
This d-school seminar prototypes concepts and methods for "inclusive" design. From the moment we arrive on the planet, gender shapes our perception of the world. Examples of products (including objects, services, and systems) gone awry will serve as prompts for design activities, challenges, and discussions on gender issues to illustrate the different needs of women, men, and gender-fluid people. Class sessions mix use case explorations with design methodology, design thinking abilities, and guest speakers from technology, design, and academia. Students will be asked to work in interdisciplinary teams on several design challenges, culminating in the development of a toolkit for inclusive design. Methods will interact in crucial ways to create "intersectional thinking" (i.e., to consider how gender, ethnicity, sexuality, socio-economic status, etc. work together to require new solutions in design). Topics include: algorithms, media, seat belts for pregnant women, robotics, assistive technologies, tech for developing worlds, video games, urban/rural design, software development, and many more. Admission by application only. Visit d.school.stanford.edu/classes for more information.
Same as: HISTORY 244F, HISTORY 344F

FEMGEN 357X. Simone Weil, Simone de Beauvoir, Hannah Arendt, and Adriana Cavarero. 3-5 Units.
What does it mean to say the personal is the political, or, in the case of Arendt, that the personal is not political, especially if you are a woman? This course explores how Weil, De Beauvoir, Arendt, and Caverero contend with the question of personhood, in its variegated social, political, ethical, and gendered dimensions. Particular attention will be given to a philosophy of social change and personal transformation, and to the enduring relevance of these women's thought to issues of our day. Texts include selections from "Gravity and Grace," "The Second Sex," "The Ethics of Ambiguity," "The Human Condition," "Between Past and Future," "Stately Bodies," and "Relating Narratives.".
Same as: COMPLIT 257, COMPLIT 357A, FEMGEN 257X, FRENCH 257, FRENCH 357, ITALIAN 257, ITALIAN 357

FEMGEN 358. History of Sexual Violence in America. 4-5 Units.
This undergraduate/graduate colloquium explores the history of sexual violence in America, with particular attention to the intersections of gender and race in the construction of rape. We discuss the changing definitions of sexual violence in law and in cultural representations from early settlement through the late-twentieth century, including slavery, wartime and prison rape, the history of lynching and anti-lynching movements, and feminist responses to sexual violence. In addition to introducing students to the literature on sexual violence, the course attempts to teach critical skills in the analysis of secondary and primary historical texts. Students write short weekly reading responses and a final paper; no final exam; fifth unit research or CEL options.nnLimited enrollment, permission of instructor required. Submit application form and indicate interest in CEL option. Priority admission to History, FGSS, CSRE, AFRICAAM, and AMSTUD declared majors and minors. (Cardinal Course certified by the Haas Center).
Same as: AFRICAAM 192, AMSTUD 258, CSRE 192E, FEMGEN 258, HISTORY 258, HISTORY 358

FEMGEN 360. Disability, Gender, and Identity: Women's Personal Experiences. 5 Units.
This course explores visible and invisible disabilities, focusing on issues of gender and identity in the personal experiences of women. The course emphasizes psychological as well as physical health, the diversity of disability experiences, self-labeling, caretaking, stigma and passing, and social and political aspects. Disabilities covered include blindness, multiple sclerosis, diabetes, arthritis, emotional and learning disabilities, and conditions requiring wheelchairs and other forms of assistance. The readings draw from the disability studies literature and emphasize women's personal narratives in sociological perspective. Note: Instructor Consent Required.
Same as: AMSTUD 260, FEMGEN 260

FEMGEN 361. Personal Narratives in Feminist, Gender, and Sexuality Studies. 4-5 Units.
This course explores the contribution of personal narratives to knowledge in the field of feminist, gender, and sexuality studies. Each week, students do extensive readings of exemplary personal narratives that have contributed in substance and method to the field and that have opened up new areas of inquiry. These narratives deal especially with issues of individual and group identity; gender, sexuality, racial and ethnic diversity; and disability. Students select a topic of special interest to them to focus their readings and guide individual research during the quarter. The approach of the course is feminist, ethnographic, and welcoming of a variety of approaches to personal narrative. Instructor consent required; students apply at the first class meeting.
Same as: AMSTUD 261, FEMGEN 261

FEMGEN 363D. Feminist Theory: Thinking Through/With/About the Gendered Body. 5 Units.
Organized around a series of case studies, this graduate feminist theory course will consider issues related to the complex relationship between sex, gender, sexuality, biological reproduction, violence, and social power. It is a core course for the PhD minor in Feminist, Gender, and Sexuality Studies. Enrollment is limited to PhD-level students.

FEMGEN 385N. Transfeminism. 2-4 Units.
This graduate seminar explores the metaphysics, ethics, and epistemology of transness, using sources from the 1970s to the present, primarily focused on the US, the UK, and Canada. Among the questions we¿ll investigate are: How can we theorize about gender in a way that acknowledges the breadth and diversity of embodied human experience? How should we understand trans femininity, trans masculinity, and genderqueerness? What is the relationship between a person¿s internal sense of their own gender, and the gendered expectations of the broader society where they live?2 unit option only for Phil PhDs beyond the second year.
Same as: PHIL 385N

FEMGEN 387X. Sex, Gender, and Violence: French Women Writers Today. 1-5 Unit.
Long before the 2017 #Metoo campaign, French women writers have explored through powerful fictions and autobiographies the different shades of economic, social, psychological, physical, or sexual violence that is exerted against, but also by and between, women. How does literature - the power of words - address, deconstruct or comfort power dynamics (during sex and between the sexes) that are usually silenced, taboo or unspeakable? Themes explored: sex and gender, sex and power, rape culture, sexual and moral taboos (incest, abortion, pornography, infanticide, lesbianism), the body as social stigma or source of meaning. Special attention given to narrative and descriptive strategies designed to avert, expose, deconstruct or account for specifically feminine experiences (rape, orgasm, pregnancy). Authors include Marie Darrieusecq, Christine Angot, Annie Ernaux, Marie NDiaye, Virginie Despentes, Leila Slimani, Ivan Jablonka along with feminist theory. Taught in French.
Same as: FEMGEN 187X, FEMGEN 287X, FRENCH 187, FRENCH 287, FRENCH 387

FEMGEN 395. Graduate Independent Study. 1-15 Unit.
Students pursue a special subject of investigation under supervision of an affiliated faculty member. May be repeated for credit.

FEMGEN 395J. Gender and Sexuality in Chinese History. 4-5 Units.
.
Same as: CHINA 395, HISTORY 395J

FEMGEN 444. Graduate Research Seminar: Gender in Science, Medicine, and Engineering. 5 Units.
Theory and practice of gender in STEM. 1. "Fix the Numbers of Women" focuses on increasing women's participation; 2. "Fix the Institutions" promotes gender equality in careers through structural change in research organizations; 3. "Fix the Knowledge" or "gendered innovations" stimulates excellence in science and technology by integrating gender analysis into research. Seminar explores harnessing the creative power of gender analysis to enhance knowledge and spark innovation.
Same as: HISTORY 444

FEMGEN 466. Queer America. 5 Units.
This class explores queer art, photography and politics in the United States since 1930. Our approach will be grounded in close attention to the history and visual representation of sexual minorities in particular historical moments and social contexts. We will consider the cultural and political effects of World War II, the Cold War, the civil rights movement, psychedelics, hippie culture and sexual liberation, lesbian separatism, the AIDS crisis, and marriage equality.
Same as: ARTHIST 466

FRENCH AND ITALIAN

Courses offered by the Department of French and Italian are listed on the Stanford Bulletin's ExploreCourses web site under the subject codes FRENCH (French General and Literature) and ITALIAN (Italian General and Literature). For courses in French or Italian language instruction with the subject code FRENLANG or ITALLANG, see the "Language Center (http://exploredegrees.stanford.edu/schoolofhumanitiesandsciences/languagecenter/)" section of this bulletin.

The department is a part of the Division of Literatures, Cultures, and Languages (http://exploredegrees.stanford.edu/schoolofhumanitiesandsciences/divisionofliteraturesculturesandlanguages/).

French Section

The French section provides students with the opportunity to pursue course work at all levels in French language, literature, cultural and intellectual history, theory, film, and Francophone studies. It understands the domain of French Studies as encompassing the complex of cultural, political, social, scientific, commercial, and intellectual phenomena associated with French-speaking parts of the world, from France and Belgium to Canada, Africa, and the Caribbean.

Three degree programs are available in French: a B.A., a terminal M.A., and a Ph.D. A Ph.D. in French and Italian is also available.

Visiting faculty and instructors contribute regularly to the life of the French section. The section maintains contacts with the Ecole Normale Supérieure, the Institut d'Etudes Politiques, and the Ecole Polytechnique.

A curator for Romance languages oversees the extensive French collection at Green Library. The Hoover Institute on War, Revolution, and Peace also includes materials on 20th-century France and French social and political movements.

Stanford Center for Interdisciplinary Studies

The Stanford Center for Interdisciplinary Studies (https://francestanford.stanford.edu/), founded in partnership with the French Ministry of Foreign Affairs, aims to bridge the disciplines of the humanities, social sciences, sciences, engineering, business, and law, to address historical and contemporary issues. Its programs bring faculty and students from across Stanford's departments and schools in contact with colleagues in France to explore issues of common intellectual concern. The center invites French-speaking scholars to offer courses or give lectures or seminars on campus. It facilitates internships for Stanford students in computer science and engineering in Sophia-Antipolis, France's new high-tech center near Nice.

Stanford in Paris

The Bing Overseas Studies Program in Paris offers undergraduates the opportunity to study in France during Autumn, Winter, and Spring quarters. It provides a wide range of academic options, including course work at the Stanford center and at the University of Paris, independent study projects, and internships. In addition, the program promotes interaction with the local community through volunteer employment, homestays, and internships. The minimum language requirement for admission into Stanford in Paris is one year of French at the college level.

Courses offered in Paris may count toward fulfillment of the requirements of the French major or minor. Students should consult with the Chair of Undergraduate Studies before and after attending the program, in order to ensure that course work and skills acquired abroad can be coordinated appropriately with their degree program. Detailed information, including program requirements and curricular offerings, may be obtained from the "Overseas Studies" section of this bulletin, the Stanford in Paris (http://osp.stanford.edu/program/paris/) web site, or the Overseas Studies Program Office in Sweet Hall.

La Maison Française

La Maison Française, 610 Mayfield, is an undergraduate residence that serves as a campus French cultural center, hosting in-house seminars as well as social events, film series, readings, and lectures by distinguished representatives of French and Francophone intellectual, artistic, and political life. Assignment is made through the regular housing draw.

Mission of the Undergraduate Program in French

The mission of the undergraduate in French is to expose students to a variety of perspectives in French language, culture, and history by providing majors and minors with training in writing and communication as well cultural, textual, and historical analysis. Through such skills, students develop into critical and global thinkers prepared for careers in business, social service, journalism, and government, or for graduate study in French.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. oral proficiency in French beyond the interpersonal level with presentational language abilities.
2. writing proficiency in French beyond the interpersonal level with presentational language abilities.
3. close reading skills of authentic texts in French.
4. the ability to develop effective and nuanced lines of interpretation.

Italian Section

The Italian section offers graduate and undergraduate programs in Italian language, literature, culture, and intellectual history. Course offerings range from small, specialized graduate seminars to general courses open to all students on authors such as Dante, Boccaccio, and Machiavelli.

Three degree programs are available in Italian: a B.A., a Ph.D., and Ph.D. in French and Italian. An Italian minor program is available to undergraduates.

Collections in Green Research Library are strong in the medieval, Renaissance, and contemporary periods; the Italian section is one of the larger constituents of the western European collection at the Hoover Institution for the Study of War, Revolution, and Peace; and the Music Library has excellent holdings in Italian opera.

La Casa Italiana

La Casa Italiana, 562 Mayfield, is an undergraduate residence devoted to developing an awareness of Italian language and culture. It works closely with the Italian Cultural Institute in San Francisco and with other local cultural organizations. It hosts visiting representatives of Italian intellectual, artistic, and political life. A number of departmental courses are taught at the Casa, which also offers in-house seminars. Assignment is made through the regular undergraduate housing draw.

Stanford in Florence

The Bing Overseas Studies Program in Florence affords undergraduates with at least three quarters of Italian language the opportunity to take advantage of the unique intellectual and visual resources of the city and to focus on two areas: Renaissance history and art, and contemporary Italian and European studies. The program is structured to help integrate

students into Italian culture through homestays, Florence University courses, the Language Partners Program, research, internship and public service opportunities, and by conducting some of the program's classes in Italian. Many courses offered in Florence may count toward the fulfillment of requirements for the Italian major or minor. Students are encouraged to consult with the Italian undergraduate adviser before and after a sojourn in Florence to ensure that their course selections meet Italian section requirements. Information on the Florence program is available in the "Overseas Studies" section of this bulletin, the Stanford in Florence (http://osp.stanford.edu/program/florence/) web site, or at the Overseas Studies office in Sweet Hall.

Mission of the Undergraduate Program in Italian

The mission of the undergraduate program in Italian is to expose students to a variety of perspectives in Italian language, culture, and history by providing majors with training in writing and communication as well as cultural, textual, and historical analysis in order to develop students into critical and global thinkers prepared for careers in business, social service, and government, or for graduate study in Italian.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. oral proficiency in Italian beyond the interpersonal level with presentational language abilities.
2. writing proficiency in Italian beyond the interpersonal level with presentational language abilities.
3. close reading skills of authentic texts in Italian.
4. the ability to develop effective and nuanced lines of interpretation.

Graduate Programs in French and Italian

The department offers a Ph.D. and terminal M.A. in French, a Ph.D. in Italian, and a Ph.D. in French and Italian.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in French or Italian and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in French, Italian, or French and Italian. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of French, Italian, or French and Italian and to interpret and present the results of such research.

Bachelor of Arts in French

The French section offers a major and a minor in French. Students are encouraged to pursue a course of study tailored to their individual needs and interests. A degree in French serves as a stepping stone to entering international business, law, translation, and teaching, or as preparation for graduate studies in French, history, or comparative literature.

The French major allows students to combine their work in French with work from another field such as African studies, linguistics, art history, music, economics, history, education, medicine, international relations, political science, or other foreign languages and literatures. The literature and philosophy specialization offers students the opportunity to pursue interdisciplinary studies at the intersection of literature and philosophy in a structured manner and alongside similarly interested students from a variety of humanistic disciplines.

Declaring the Major

Students declare the major in French through Axess. Students should meet with the Director of Undergraduate Studies and the undergraduate student services officer in Pigott Hall, room 128, to discuss appropriate courses and options within the major, and to plan the course of study.

Requirements

Complete a minimum of 60 units of coursework in the major.

- These units may not be used towards any other major or minor.
- Courses applied to the major must be taken for a letter grade, and a grade point average (GPA) of 2.0 or better must be achieved in each course.
- Limit independent study courses to no more than 12 units of coursework for the major.
- Relevant courses from other departments or programs and earn credit toward the major as electives with the prior consent of the Director of Undergraduate Studies.
- Limit to 12 units coursework completed at another university to count toward the major, and only with approval by the Director of Undergraduate Studies.

Coursework

To enroll in all French literature courses, students are highly encouraged to complete FRENLANG 124 Advanced French: Composition, Writing, and Presentation, or successfully tested above this level through the Language Center.

1. Recommended Introductory Course counts toward the major course unit requirement.

		Units
FRENCH 129	Camus	4-5

2. Required Courses. 3 courses minimum. For 2020-21, FRENCH 129, 131 and 133 fulfill the Writing in the Major (WIM) requirement.

		Units
FRENCH 130	Introduction to Medieval and Renaissance French Literature	4
FRENCH 131	Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France	4
FRENCH 132	Literature, Revolutions, and Changes in 19th- and 20th-Century France	4
FRENCH 133	Literature and Society in Africa and the Caribbean (WIM)	4

3. Medieval/Early Modern Course. Students must take one course that concerns the period before 1800. See the Director of Undergraduate Studies for additional appropriate courses.

		Units
FRENCH 130	Introduction to Medieval and Renaissance French Literature	4

4. Capstone Course. In their senior year students must enroll in a 3 unit Independent Study to prepare a final project that reflects their coursework in the major. In consultation with the Director of Undergraduate Studies, students choose a project from a menu of options. Options include but are not limited to a creative project or short

essay. They will present this project to members of the department before graduation.

5. Oral Proficiency Interview (OPI). Students must take the Oral Proficiency Interview (OPI) two quarters prior to degree conferral through the Stanford Language Center (https://language.stanford.edu/).

6. Electives. Students must complete a total of 60 units towards the major. A maximum of 30 units can be elective courses. Elective courses can be taken within the following parameters:

- *Coursework within the department.* Additional FRENCH courses taught by French faculty (may be taught in English or French) at the 100- or 200- level.
- *Language course work.* Up to three language courses in French at or above FRENLANG 21C for a maximum of 13 units.
- *Coursework in other departments relevant to the degree*, with approval by the Director of Undergraduate Studies.
- *Bing Overseas Program.* Courses taken at the Bing Overseas Studies in Paris program with prior approval of the Director of Undergraduate Studies.
- *Thinking Matters or Education as Self-Fashioning courses* taught at least partially by a faculty member of the French and Italian Department. Students may count a maximum of 10 units.
- *Structured Liberal Education.* Students may count up to 10 units of SLE towards the major electives.
- *Digital Humanities course.* Student work must reflect French interests. Prior approval of the Director of Undergraduate Studies. Maximum of 5 units.

Bachelor of Arts in French, French and Philosophy Subplan

The French and Philosophy subplan requires a total of 65 units as described below. Students interested in this option should review the Philosophy and Literature web site (http://philit.stanford.edu/). Substitutions and transfer credit are not normally permitted for the PHIL 170 series class or the PHIL 180 series class, and are never permitted for PHIL 80, FRENCH 181, or the capstone seminar. Up to 10 units of courses taken in the Philosophy department may be taken 'CR/NC' or 'S/NC'; the remainder must be taken for a letter grade. Once a student has completed the SLE sequence (all three quarters) they may count up to 10 units towards this major. The SLE units can replace one history of philosophy course and one upper-division French course.

Required French Coursework

1. Advanced Language. FRENLANG 124 Advanced French: Composition, Writing, and Presentation

2. Required Courses. Students must take three of the following core courses.

		Units
FRENCH 130	Introduction to Medieval and Renaissance French Literature	4
FRENCH 131	Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France	4
FRENCH 132	Literature, Revolutions, and Changes in 19th- and 20th-Century France	4
FRENCH 133	Literature and Society in Africa and the Caribbean	4

3. Upper division French Courses. At least three courses numbered FRENCH 140 or higher.

4. Students must take the Oral Proficiency Interview (OPI) two quarters prior to degree conferral through the Stanford Language Center (https://language.stanford.edu/.html).

Required Philosophy Coursework

1. *Philosophy Writing in the Major.*

		Units
PHIL 80	Mind, Matter, and Meaning (WIM) (prerequisite: introductory philosophy course)	5

2. *Philosophy and Literature Course.* This course should be taken as early as possible in the student's career, normally in the sophomore year.

		Units
FRENCH 181	Philosophy and Literature	3-5

3. *Aesthetics, Ethics, Political Philosophy.* One course from the PHIL 170 Ethical Theory series.
4. *Language, Mind Metaphysics, and Epistemology.* One course from the PHIL 180 series.
5. *History of Philosophy.* Two courses in the history of Philosophy, numbered above PHIL 100.
6. Two additional elective courses of special relevance to the study of philosophy and literature. A list of approved courses may be found on the Philosophy and Literature (http://philit.stanford.edu/programs/relevance.html) web site. Students must consult with the Chair of Undergraduate Studies in French. See https://philit.stanford.edu/undergraduates/undergraduate-special-relevance-courses (https://philit.stanford.edu/undergraduates/undergraduate-special-relevance-courses/).
7. *Capstone.* Students must do one of the following: (a) take one of the officially-designated Philosophy and Literature capstone seminars listed below; (b) write an honors thesis (see “Honors Program” for instructions); or (c) write a 5,000-word paper on a topic of their choosing, serving as the culmination of their work in the field. To make time to write the paper, students must enroll in a 3-unit, letter-grade independent study with a faculty member (or affiliate) in the Philosophy and Literature Focal Group. The paper must involve both philosophy and literature, and the topic must be approved by the faculty member by the add/drop deadline.

		Units
COMPLIT 283A	Modern Notions of 'The Holy'	3-5
PHIL 194W	Capstone Seminar: Imagination in Fiction and Philosophy	4
PHIL 194Z	Capstone: Living a Meaningful Literary Life	4

Honors Program

Students majoring in any DLCL department (i.e., Comparative Literature, French and Italian, German Studies, Iberian and Latin American Cultures, and Slavic Languages and Literatures) who have an overall grade point average (GPA) of 3.3 or above and who maintain a 3.5 (GPA) in their major courses, are eligible to participate in the DLCL's honors program.

Declaring Honors

Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty in their junior year by May 1. During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL Honors application, and an outline of planned course work for their senior year. When their applications are approved by their home department, students will request honors through Axess.

Honors theses vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40 to 90 pages not including bibliography and notes.

Honors students are encouraged to participate in the DLCL program hosted by Bing Honors College. This DLCL Honors College is designed to help students develop their projects and is offered at the end of the summer before senior year. Applications must be submitted through the Bing program. For more information, view the Bing Honors (https://undergrad.stanford.edu/programs/bhc/) web site.

Program Requirements

A minimum of 10 units total, described below, and a completed thesis is required. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15, of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

1. Spring Quarter of the junior year (optional): DLCL 189C Honors Thesis Seminar, 2-4 units S/NC, under the primary thesis adviser. Drafting or revision of the thesis proposal. The proposal is reviewed by the Chair of Undergraduate Studies and the Director of the department and will be approved or returned for submission.
2. Autumn Quarter of the senior year (required): DLCL 189A Honors Thesis Seminar, 4 units S/NC, taught by a DLCL appointed faculty member. Course focuses on researching and writing the honors thesis.
3. Winter Quarter of the senior year (required): DLCL 189B Honors Thesis Seminar, 2-4 units S/NC, under the primary thesis adviser. Focus is on writing under guidance of primary adviser.
4. Spring Quarter of the senior year (option; mandatory if not taken during junior year): DLCL 189C Honors Thesis Seminar, 2-4 units S/NC, under the primary thesis adviser. Honors essays are due to the thesis adviser and student services officer no later than 5:00 p.m. on May 15 of the terminal year.
5. Spring Quarter of the senior year (required) DLCL 199 Honors Thesis Oral Presentation, 1 unit S/NC. Enroll with primary thesis adviser.

The honors thesis in the DLCL embodies Stanford's excellence in course work and research. It is simultaneously one element of the student's intellectual legacy and part of the University's official history. The faculty considers the honors thesis to be far more than a final paper; rather, it is the product of solid research that contributes to conversations taking place within a larger scholarly community and representative of the intellectual vitality of the discipline. For all of these reasons, DLCL honors theses will be visible to future scholars researching similar questions through full online access through the Stanford Digital Repository (https://library.stanford.edu/research/stanford-digital-repository/) (SDR) and may be used as course materials for future Stanford honors preparatory courses. For similar purposes, a printed copy may also be kept in DLCL spaces. Students who wish to limit the availability or formats in which the thesis may be shared may do so by filling out the appropriate form with the DLCL student affairs officer.

Bachelor of Arts in Italian

The Italian section offers a major and a minor. Students are encouraged to pursue a course of study tailored to their individual needs and interests. A degree in Italian serves as a stepping stone to entering international business, law, translation, and teaching, or as preparation for graduate studies in Italian, history, or comparative literature.

The Italian major allows students to combine their work in Italian with work from another field such as linguistics, art history, music, economics, history, education, medicine, international relations, political science, or other foreign languages and literatures. The literature and philosophy specialization offers students the opportunity to pursue interdisciplinary studies at the intersection of literature and philosophy in a structured manner and alongside similarly interested students from a variety of humanistic disciplines.

Declaring the Major

Students declare the major in Italian through Axess. Students should meet with the Director of Undergraduate Studies and the DLCL undergraduate student support officer to discuss appropriate courses and options within the major, and to plan the course of study.

Requirements

Complete a minimum of 60 units of course work in the major.

- These 60 units may not be used towards any other major or minor.
- Courses applied to the major must be taken for a letter grade, and a grade point average (GPA) of 2.0 or better must be achieved in each course.
- No more than 12 units of coursework for the major should be taken as independent study courses.
- Relevant courses from other departments or programs may also earn credit toward the major as electives with prior approval from the Director of Undergraduate Studies.
- Limit to 12 units of coursework completed at another university to count toward the major, and only with approval by the Director of Undergraduate Studies.

Coursework

To enroll in all ITALIAN or ITALLANG courses taught in Italian at or above the 100 level, students must have successfully completed ITALLANG 22A or the equivalent.

1. Recommended Introductory Courses count as electives toward the major.

		Units
ITALIAN 148	Cinema and the Real: Italian Neo-Realism and the French New Wave	3-5
ITALIAN 155	The Mafia in Society, Film, and Fiction	4

2. Intermediate Language. Students may earn up to 12 units in second-year language courses (maximum 12 units).

		Units
ITALLANG 21	Second Year Italian, First Quarter	4
ITALLANG 22	Second-Year Italian, Second Quarter	4
ITALLANG 23	Second-Year Italian, Third Quarter	3-4
or		
ITALLANG 21A	Accelerated Second-Year Italian, Part 1	5
ITALLANG 22A	Accelerated Second-Year Italian, Part 2	5

3. Required Courses. Students must take all three of the following core courses at Stanford (12 units). For 2020-21, ITALIAN 128 The Italian Renaissance and the Path to Modernity fulfills the Writing in the Major (WIM) requirement.

		Units
ITALIAN 127	Inventing Italian Literature: Dante, Boccaccio, Petrarca	4
ITALIAN 128	The Italian Renaissance and the Path to Modernity (WIM)	4
ITALIAN 129	19th and 20th Century Literature and Culture: Constructing and Re-Constructing Italy	4

4. Capstone Course: In their senior year, students must enroll in a 3-unit Independent Study to prepare a final project that reflects their coursework in the major. In consultation with the Director of Undergraduate Studies, students choose a project from a menu of options. Options include but are not limited to a creative project or short essay. Students will present this project to the faculty of the department before graduation.

5. Students must take the Oral Proficiency Interview (OPI) two quarters prior to degree conferral through the Stanford Language Center (https://language.stanford.edu/.html).

6. Electives. Students must complete a total of 60 units towards the major. A maximum of 33 units can be elective courses. Elective courses can be taken within the following parameters:

- *Coursework within the department.* Additional ITALIAN courses taught by Italian faculty (may be taught in English or Italian) at the 100- or 200- level.
- Coursework in other departments relevant to the degree, on Italian topics, with the approval of the Director of Undergraduate Studies. Maximum of 14 units.
- *Bing Overseas Program.* Courses taken at the Bing Overseas Studies in Florence program with approval of the Chair of Undergraduate Studies.
- *Thinking Matters or Education as Self-Fashioning courses* taught at least partially by a faculty member of the French and Italian Department. Students may count a maximum of 10 units.
- *Structured Liberal Education.* Students may count 10 units of SLE coursework towards their major elective totals.
- *Digital Humanities Course.* Student work must reflect Italian interests. Prior approval of the Director of Undergraduate Studies. Maximum of 5 units.

Italian and Philosophy Subplan

The Italian and Philosophy subplan requires a total of 65 units as described below. Students interested in this subplan should review the Philosophy and Literature (https://philit.stanford.edu/undergraduates/undergraduates-overview/) website. Substitutions and transfer credit are not normally permitted for the PHIL 170 series class or the PHIL 180 series class, and are never permitted for PHIL 80, ITALIAN 181 Philosophy and Literature or the capstone seminar. Up to 10 units of courses taken in the Philosophy department may be taken 'CR/NC' or 'S/NC'; the remainder must be taken for a letter grade. Once a student has completed the SLE sequence (all three quarters) they may count up to 10 units towards this major. The SLE units can replace one history of philosophy course and one upper-division ITALIAN course.

Required Italian Course Work

- *Intermediate Language.* Students may earn up to 12 units in second-year language courses (maximum 12 units).

		Units
ITALLANG 21	Second Year Italian, First Quarter	4
ITALLANG 22	Second-Year Italian, Second Quarter	4
ITALLANG 23	Second-Year Italian, Third Quarter	3-4

or

		Units
ITALLANG 21A	Accelerated Second-Year Italian, Part 1	5
ITALLANG 22A	Accelerated Second-Year Italian, Part 2	5

- *Required ITALIAN Courses.*Students must take all three of the following core courses at Stanford (12 units) ITALIAN 128 fulfills the Writing in the Major (WIM) requirement.

		Units
ITALIAN 127	Inventing Italian Literature: Dante, Boccaccio, Petrarca	4
ITALIAN 128	The Italian Renaissance and the Path to Modernity	4
ITALIAN 129	19th and 20th Century Literature and Culture: Constructing and Re-Constructing Italy	4

- *Studies in Italian Culture.* Students must complete a minimum of 10 additional units (2-3 courses) in ITALIAN coursework (taught in English or Italian).
- *Additional Requirements.* Students must take the Oral Proficiency Interview (OPI) two quarters prior to degree conferral. Students should contact the Language Center to arrange the assessment.

Required Philosophy Coursework

1. *Philosophy Writing in the Major.*

		Units
PHIL 80	Mind, Matter, and Meaning (WIM) (prerequisite: introductory philosophy course)	5

2. *Philosophy and Literature Course.* This course should be taken as early as possible in the student's career, normally in the sophomore year.

		Units
FRENCH 181	Philosophy and Literature	3-5

3. *Aesthetics, Ethics, Political Philosophy.* One course from the PHIL 170 Ethical Theory series.
4. *Language, Mind Metaphysics, and Epistemology.* One course from the PHIL 180 series.
5. *History of Philosophy.* Two courses in the history of Philosophy, numbered above PHIL 100.
6. Two additional elective courses of special relevance to the study of philosophy and literature. A list of approved courses may be found on the Philosophy and Literature (http://philit.stanford.edu/programs/relevance.html) web site. Students must consult with the Chair of Undergraduate Studies in French. See https://philit.stanford.edu/undergraduates/undergraduate-special-relevance-courses (https://philit.stanford.edu/undergraduates/undergraduate-special-relevance-courses/).
7. *Capstone.* Students must do one of the following: (a) take one of the officially-designated Philosophy and Literature capstone seminars listed below; (b) write an honors thesis (see “Honors Program” for instructions); or (c) write a 5,000-word paper on a topic of their choosing, serving as the culmination of their work in the field. To make time to write the paper, students must enroll in a 3-unit, letter-grade independent study with a faculty member (or affiliate) in the Philosophy and Literature Focal Group. The paper must involve both philosophy and literature, and the topic must be approved by the faculty member by the add/drop deadline.

		Units
COMPLIT 283A	Modern Notions of 'The Holy'	3-5
PHIL 194W	Capstone Seminar: Imagination in Fiction and Philosophy	4
PHIL 194Z	Capstone: Living a Meaningful Literary Life	4

Honors Program

Students majoring in any DLCL department (i.e., Comparative Literature, French and Italian, German Studies, Iberian and Latin American Cultures, and Slavic Languages and Literatures) who have an overall grade point average (GPA) of 3.3 or above and who maintain a 3.5 (GPA) in their major courses, are eligible to participate in the DLCL's honors program.

Declaring Honors

Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty in their junior year by May 1. During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL Honors application, and an outline of planned course work for their senior year. When their applications are approved by their home department, students will request honors through Axess.

Honors theses vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40 to 90 pages not including bibliography and notes.

Honors students are encouraged to participate in the DLCL program hosted by Bing Honors College. This DLCL Honors College is designed to help students develop their projects and is offered at the end of the summer before senior year. Applications must be submitted through the Bing program. For more information, view the Bing Honors (https://undergrad.stanford.edu/programs/bhc/) web site.

Program Requirements

A minimum of 10 units total, described below, and a completed thesis is required. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15, of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

1. Spring Quarter of the junior year (optional): DLCL 189C Honors Thesis Seminar, 2-4 units S/NC, under the primary thesis adviser. Drafting or revision of the thesis proposal. The proposal is reviewed by the Chair of Undergraduate Studies and the Director of the department and will be approved or returned for submission.
2. Autumn Quarter of the senior year (required): DLCL 189A Honors Thesis Seminar, 4 units S/NC, taught by a DLCL appointed faculty member. Course focuses on researching and writing the honors thesis.
3. Winter Quarter of the senior year (required): DLCL 189B Honors Thesis Seminar, 2-4 units S/NC, under the primary thesis adviser. Focus is on writing under guidance of primary adviser.
4. Spring Quarter of the senior year (option; mandatory if not taken during junior year): DLCL 189C Honors Thesis Seminar, 2-4 units S/NC, under the primary thesis adviser. Honors essays are due to the thesis adviser and student services officer no later than 5:00 p.m. on May 15 of the terminal year.
5. Spring Quarter of the senior year (required) DLCL 199 Honors Thesis Oral Presentation, 1 unit S/NC. Enroll with primary thesis adviser.

The honors thesis in the DLCL embodies Stanford's excellence in course work and research. It is simultaneously one element of the student's intellectual legacy and part of the University's official history. The faculty considers the honors thesis to be far more than a final paper; rather, it is the product of solid research that contributes to conversations taking place within a larger scholarly community and representative of the intellectual vitality of the discipline. For all of these reasons, DLCL honors theses will be visible to future scholars researching similar questions through full online access through the Stanford Digital Repository (https://library.stanford.edu/research/stanford-digital-repository/) (SDR) and may be used as course materials for future Stanford honors preparatory courses. For similar purposes, a printed copy may also be kept in DLCL spaces. Students who wish to limit the availability or formats in which the thesis may be shared may do so by filling out the appropriate form with the DLCL student affairs officer.

Minor in French

Declaring the Minor

Students declare the major in French through Axess. Students should meet with the Director of Undergraduate Studies and undergraduate student support officer to discuss appropriate courses and options within the minor, and to plan the course of study.

Requirements of the Minor

To earn a minor in French, students must:

- Complete a minimum of 6 courses at 3 units or more and total 24 units of course work in the department.
- These 24 units may not be used towards any other major or minor.
- Courses applied to the minor must be taken for a letter grade, and a grade point average (GPA) of 2.0 or better must be achieved in each course.
- To enroll in all French literature courses, students are highly encouraged to complete FRENLANG 124 Advanced French: Composition, Writing, and Presentation or successfully tested above this level through the Stanford Language Center (https://language.stanford.edu/).

Coursework for the Minor

1. Required Courses: Students must take a minimum of three French Literature courses. Two must be from the FRENCH 130 sequence (8 units):

		Units
FRENCH 130	Introduction to Medieval and Renaissance French Literature	4
FRENCH 131	Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France	4
FRENCH 132	Literature, Revolutions, and Changes in 19th- and 20th-Century France	4
FRENCH 133	Literature and Society in Africa and the Caribbean	4

2. Electives. A maximum of 12 elective units may be applied to the minor. Prior approval from the Director of Undergraduate Studies is required. The following courses have been pre-approved as electives:

		Units
Courses taught in FRENCH department		
FRENLANG 21C	Second-Year French: Cultural Emphasis, First Quarter	4
FRENLANG 22C	Second-Year French: Cultural Emphasis, Second Quarter	4
FRENLANG 23C	Second-Year French: Cultural Emphasis, Third Quarter	4
FRENLANG 120	Advanced French Oral Communication	3
FRENLANG 124	Advanced French: Composition, Writing, and Presentation	4-5
OSPPARIS courses. Courses taken at the Bing Overseas Studies in Paris program with prior approval of the Chair of Undergraduate Studies (language of instruction must be French)		

Education as Self-Fashioning and, Thinking Matters courses taught at least partially by a faculty member in French. Maximum of 5 units.	5
Structured Liberal Education Students may count 5 units of SLE towards the major electives. Maximum of 5 units.	
Digital Humanities Course. Student work must reflect French interests. Prior approval of the Chair of Undergraduate Studies. Maximum of 5 units.	

Minor in Italian

Declaring the Major

Students declare the minor in Italian through Axess. Students should meet with the Director of Undergraduate Studies and undergraduate student support officer to discuss appropriate courses and options within the minor, and to plan the course of study.

Requirements of the Minor

To earn a minor in Italian, students must:

- Complete a minimum of 6 courses at 3 units or more and total 24 units of coursework in Italian language and culture.
- These 24 units may not be used towards any other major or minor.
- Courses applied to the minor must be taken for a letter grade, and a grade point average (GPA) of 2.0 or better must be achieved in each course.
- To enroll in all ITALIAN or ITALLANG courses taught in Italian at or above the 100 level, students must have successfully completed ITALLANG 22A or the equivalent. Language assessments for placement purposes may be arranged through the Stanford Language Center (https://language.stanford.edu/).

Coursework for the Major

1. *Intermediate Language.*Students may earn up to 12 units in second-year language courses (maximum 12 units)

		Units
ITALLANG 21	Second Year Italian, First Quarter	4
ITALLANG 22	Second-Year Italian, Second Quarter	4
ITALLANG 23	Second-Year Italian, Third Quarter	3-4

or

ITALLANG 21A	Accelerated Second-Year Italian, Part 1	5
ITALLANG 22A	Accelerated Second-Year Italian, Part 2	5

2. *Required Courses.* Students must take at least two of the following courses taught in Italian at Stanford (minimum 6 units). At least one course must be ITALIAN 127, 128 or 129:

ITALLANG 114	Composition, Writing, and Presentation	3
ITALLANG 115	Academic and Creative Writing	3
ITALIAN 127	Inventing Italian Literature: Dante, Boccaccio, Petrarca	4
ITALIAN 128	The Italian Renaissance and the Path to Modernity	4
ITALIAN 129	19th and 20th Century Literature and Culture: Constructing and Re-Constructing Italy	4

* With approval of the Director of Undergraduate Studies, one of these courses may be replaced by a course taken at BOSP Florence.

3. *Electives*. A maximum of 10 elective units may be applied to the minor. Prior approval from the Chair of Undergraduate Studies is required. The following courses have been pre-approved as electives:

- Coursework within the ITALIAN department at the 100- or 200- level.
- *Bing Overseas Program.* Courses taken at the Bing Overseas Studies in Florence program with prior approval of the Director of Undergraduate Studies.
- *Thinking Matters* or *Education as Self-Fashioning* courses taught at least partially by a faculty member in Italian. Maximum of 5 units.
- *Structured Liberal Education.* Students may count 5 units of SLE towards the major electives. Maximum of 5 units.
- *Digital Humanities* course*.* Student work must reflect Italian interests. Prior approval of the Director of Undergraduate Studies. Maximum of 5 units.

Minor in Modern Languages

The Division of Literatures, Cultures, and Languages offers an undergraduate minor in Modern Languages that permits students to demonstrate strength in two distinct modern languages and their literatures. See the "Division of Literatures, Cultures, and Languages (p.)" section of this bulletin for further details about the minor and its requirements.

Coterminal Master's Program in French

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (p. 56)" section of this bulletin. For University coterminal master's degree application forms, see the Registrar's Publications page (https://studentaffairs.stanford.edu/registrar/publications/#Coterm).

Each year the department admits a small number of undergraduates to the coterminal M.A. degree in French. Applications for Autumn Quarter must be submitted by January 31 of the senior year to the director of the department. Students must submit the Coterminal Online Application (https://applyweb.com/stanterm/) and include the following:

- a written statement of purpose
- two letters of recommendation from faculty at Stanford
- a transcript.

Students accepted into the coterminal program must have been undergraduate majors in French and must meet all requirements both for the B.A. and the M.A.

University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 56)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 65)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken during or after the first quarter of the sophomore year are eligible for consideration for transfer to the graduate career; the timing of the first graduate quarter is not a factor. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate advisor be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

Master of Arts in French

University regulations pertaining to the M.A. are listed in the "Graduate Degrees (p. 65)" section of this bulletin.

The terminal M.A. in French provides a flexible combination of language, literature, cultural history, and methodology course work designed to enhance the preparation of secondary school, junior college, or college teachers.

Candidates must complete a minimum of 45 units of graduate work, all courses being taken for a letter grade, with a minimum grade point average (GPA) of 3.3, as well as pass the master's examination at the end of their studies. To fulfill the requirements in a single year, enrollment must be for an average of 15 units per quarter.

Candidates must take one cultural history course (to be taken either inside or outside the Department of French and Italian). All remaining units are to be taken in advanced French literature courses (200 level or above), three of which must be concerned with the pre-revolutionary period of French cultural history.

Applicants should consult Graduate Admissions (http://gradadmissions.stanford.edu/) for information related to the application process. Candidates for this degree are not eligible for financial aid or for teaching assistantships.

Examination

The terminal M.A. examination is administered between the third and fifth week of Spring Quarter by a three-member committee, selected each year by the Director of Graduate Studies. It consists of two parts:

1. **Written Exam**
   The two-hour written exam tests the candidate's general knowledge of French literature and is based on the French Ph.D. reading list which may be obtained from the Director of Graduate Studies, Student Services Manager, or by referencing the French and Italian Graduate Student Handbook.
   The exam requires that the candidate answer two questions (out of three) in a manner that demonstrates his/her ability to synthesize and draw parallels between periods, genres, and systems of representation on the basis of the standard reading list. One question must be answered in French. Use of a dictionary is allowed.
   If the student's performance on the exam is deemed a 'pass' by two out of three of the members of the examining committee, the student is then permitted to go on to the oral examination (taken later the same week). Should the candidate fail the M.A. written exam, he/she is given a second chance at the end of Spring Quarter.
2. **Oral Exam**
   The 90-minute oral exam is based upon the student's answers on the written exam. It examines the candidate's knowledge and understanding of French literary history on the basis of the standard reading list.
   At the conclusion of the oral exam, the examination committee meets in closed session and discusses the student's performance on the written and the oral portions of the examination. If it is judged adequate, the M.A. degree is granted. In no event may the master's written and oral exams be taken more than twice.

Doctor of Philosophy in French

University regulations pertaining to the Ph.D. are listed in the "Graduate Degrees (p. 65)" section of this bulletin.

Degree Requirements

1. **Course work**
   A candidate for the Ph.D. degree must complete at least 135 units of graduate-level study. 72 of the 135 units must be taken within the department. All courses counted towards the 135-unit requirement for the PhD be at the graduate level. Excess course work can be taken at the undergraduate level but may not be used towards the Ph.D. requirements. All course work should be selected in consultation with the Director of Graduate Studies.
   Required Courses:

		Units
DLCL 301	The Learning and Teaching of Second Languages (must be taken in the first year of studies)	3
DLCL 311	Professional Workshop	1
A minimum of five courses on French literature and culture taught at the graduate level. Three of the required five courses must be taken within the first year.		15

   Elective Courses— Apart from the required courses above, students are granted considerable freedom in structuring a course of study appropriate to their individual needs. During the first year, most course work is done within the French and Italian department, in order to ensure an adequate preparation for the qualifying examination. Students are encouraged to take a variety of courses in order to be exposed to different periods and issues. Students are not allowed to take Independent Study during their first year. In the second and third years, however, the program of study is tailored to the specific interests of the student.

2. **Examinations**
   Completion of all department and University examinations.
3. **Dissertation**
   Submission and approval of a dissertation.
4. **Teaching**
   Ph.D. students are required to teach a minimum of five courses within their five years of funding.
5. **Language Requirements**
   Attaining a native or near-native fluency in French is a requirement to qualify for the Ph.D. degree. Upon entering the program, candidates must contact the Language Center and arrange to take the OPI (Oral Proficiency Interview) to determine their fluency in French. An advanced level or above must have been reached by the time candidates take their qualifying exam in Autumn Quarter of the second year of study. If a student fails to score in the advanced bracket of the OPI test upon entering, he/she is tested again at the beginning of the second year. It is the responsibility of the candidates to design a course of study to improve his or her proficiency in French. Candidates who do not meet the minimum language requirement must discuss their plans to meet this requirement with the Director of Graduate Studies.
   In addition, candidates are required to achieve a high level of proficiency in one additional foreign language, with the language in question to be determined by the student and adviser as a function of the student's area of specialization. Such proficiency may be demonstrated either by completing a graduate seminar in the language in question, or by passing an exam that establishes a third-year or above level of competence in writing, reading, and speaking. In the case of ancient Greek and Latin, a high level of proficiency means a level superior to a second-year collegiate level of proficiency in

reading and writing. The second foreign language requirement must be completed by the end of the third year.

6. **Candidacy**
   Admission to candidacy is an important decision grounded in an overall assessment of a student's ability to successfully complete the Ph.D. program. Per University policy, students are expected to complete department qualifying procedures and apply for candidacy by the end of the second year in residence. In reviewing a student for admission to candidacy, the faculty considers a student's academic progress including but not limited to: advanced language proficiency, coursework, performance on the Qualifying Exam (or Field Exam for those with a waiver of the Qualifying Exam), and successful completion of teaching and research assistantships. A student must also have completed at least 3 units of work with each of 4 Stanford faculty members prior to consideration for candidacy. Students applying to candidacy must provide for their annual review a writing sample in French (or English for French native speakers) corresponding to a paper completed for a course taken at Stanford. In addition to successful completion of department prerequisites, a student is only admitted to candidacy if the faculty makes the judgment that the student has the potential to successfully complete the requirements of the degree program. Candidacy is determined by faculty vote. Failure to advance to candidacy results in the dismissal of the student from the doctoral program. Candidacy is valid for five years and students are required to maintain active candidacy through conferral of the doctoral degree. All requirements for the degree must be completed before candidacy expires. The Department of French and Italian conducts regular reviews of each student's academic performance, both prior to and following successful admission to candidacy. Failure to make satisfactory progress to degree may result in dismissal from the doctoral program. Additional information about University candidacy policy is available in the Bulletin (p. 67) and GAP (http://gap.stanford.edu/4-6.html).

7. **TGR Status**
   Doctoral students who have been admitted to candidacy, completed all required courses and degree requirements other than the dissertation, completed 135 units, and submitted a Doctoral Dissertation Reading Committee form, must request Terminal Graduate Registration status to complete their dissertations. Each quarter, all TGR students must enroll in FRENCH 802 TGR Dissertation for zero units, in the appropriate section for their adviser.

Grading

Doctoral students in the department must take required courses for a letter grade if available and are expected to earn a grade of 'B+' or better in each course. Any grade of 'B' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty: while the grade will stand, the student may be required to revise and resubmit the work associated with that course.

Examinations

There are three examinations: the qualifying examination, the field examination, and the University oral examination. Students may not take any department or University exam while course work is incomplete.

Qualifying Examination

The first oral examination, which takes place in the week prior to autumn quarter of the second year of study, tests the student's knowledge of language and literature and his/her aptitude for critical thinking. The examining committee, determined by the Director of French and Italian, schedules the precise exam date and time.

The exam is based on a standard reading list covering major works from all periods of literature in the language(s) of study, from the Middle Ages to present day. The list may be expanded to reflect a student's particular interests, but not abridged. The reading list may be obtained from the Director of Graduate Studies, the student services manager, or by referencing the French and Italian student handbook.

The exam is 90 minutes in length and consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given in English or in the language of study and should engage, in a succinct manner, an issue or set of issues of broad relevance to the literary history of the language(s) of study. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggestive and not exhaustive, so as to provoke further discussion. You may bring a single letter-sized page of notes, printed in 12-point font, with no full sentences except for quotations; you must hand it in at the end of the exam.
2. A 70-minute question and answer period in which the examining committee follows up on the candidate's presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in the language(s) of study. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit and demonstrate the ability to formulate an original point of view on such texts and contexts.

Students who do not pass the qualifying exam their first time may be placed on probation with limited enrollment and be allowed to retake the exam at the end of Autumn Quarter. Should the student not pass the retake exam, his or her studies in the Ph.D. program are concluded.

Students already holding an advanced degree in the relevant area may request to be excused from the Qualifying Exam. However, the student must present a formal request for a waiver to the Director of Graduate Studies by the end of autumn quarter of the first year. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the Qualifying Exam would involve considerable repetition of already competed work is such a waiver likely to be granted.

Field Examination

The second oral examination takes place in week prior to Autumn Quarter of the third year of study. Students waived from the qualifying exam take the field exam in the week prior to Autumn Quarter of the second year of study. The exam is 100 minutes in length and consists of two parts:

1. A 20-minute presentation by the student on a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his/her adviser and the Director of Graduate Studies. The student should design this research project so that it has the focus of an article or a seminar he/she might teach. The student should discuss the proposed topic with the Director of Graduate Studies before the end of the quarter preceding the quarter in which he/she plans to take the exam; together they choose a committee of three faculty members with interests close to the proposed topic. In most cases, one of these committee members is the student's adviser. This presentation is followed by a 20-minute discussion.
2. A 60-minute discussion of a reading list, assembled by the student, which covers about a century of writing. The reading list should include works in all genres relevant to the period covered and should be around two single-spaced pages in length. The list may well include critical and scholarly works or texts from outside the traditional domain of literary studies in the chosen tradition (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the Director and faculty advisers have agreed to define these materials as the student's field. Students are required to discuss the reading list for the examination with the Director of Graduate

Studies and with members of their committee during the quarter preceding the examination. A final reading list must be submitted to the committee no later than two weeks preceding the examination. Each member of the committee is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications. The aim of these questions is to establish the student's credentials as a specialist in the period of his/her choosing, so the core of the reading list must be made up of texts that are essential to any specialist. It follows that reading lists must not focus on the narrow area of the student's research interest. The tendency to bias reading lists towards the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work may prove relevant, but students should also remember that the examination is the central means of certifying their expertise in a literary period.

The University Oral Examination

This examination takes the form of a dissertation proposal defense. It is to be taken no later than Spring Quarter of the student's third year. Students must have completed all course work and language requirements before the quarter in which they take the University oral examination. One quarter prior to the University oral examination, students must schedule the exam date and time as well as work with their primary adviser to obtain an outside chair for the examination.

Two weeks before the exam, the student must submit to the committee a 25-35 page proposal, which must contain the following parts:

1. a clear presentation of the student's central thesis
2. a synthetic overview of the dissertation
3. a description of the methodology that is used in the dissertation
4. an in-depth discussion of current secondary sources on the topic.

The student must also append a bibliography, but this does not take the place of number 4. The proposal must be prepared in close consultation with the dissertation director during the months preceding the exam.

The exam committee consists of four members, in addition to a committee chair from outside the Division of Literatures, Cultures, and Languages, whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list.

After a 20-minute presentation on the part of the candidate, each member of the committee (apart from the committee chair) questions the student for 20 minutes. At the end of the hour and forty minutes, the faculty readers vote on the outcome of the exam. If the outcome is favorable, (four out of five votes in favor of the student passing), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory, the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second exam. A student who fails a second time will be released from the Ph.D. program and awarded a terminal M.A. degree.

Advising

Given the interdisciplinary nature of the Ph.D. programs and the opportunity they afford each student to create an individualized program of study, regular consultation with an adviser is of the utmost importance. The adviser for all entering graduate students is the Director of Graduate Studies, whose responsibility it is to assist students with their course planning and to keep a running check on progress in completing the course, teaching, and language requirements. By the end of the second year of study, each student should have chosen a faculty adviser whose expertise is appropriate to his/her own area of research and interests.

Yearly Review

The faculty provide students with timely and constructive feedback on their progress toward the Ph.D. In order to evaluate students' progress and to identify potential problem areas, the department's faculty reviews the academic progress of each student at the end of the academic year. The yearly reviews are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. Possible outcomes of the yearly review include (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period on probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; (2) continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program. Students leaving the program at the end of the first or second year are usually allowed to complete the requirements to receive an M.A. degree, if this does not involve additional residency or financial support.

Ph.D. Minor for Graduate Students in French or Italian

The Ph.D. may be combined with a minor in a related field, including Comparative Literature, Linguistics, Modern Thought and Literature, Art History, History, Music, Philosophy, and Spanish. Ph.D. candidates in French may minor in Italian, and vice versa. Students interested in a minor should design their course of study with their advisor(s).

Ph.D. Minor in French Literature

The department offers a minor in French Literature. The requirement for a minor in French is completion of 24 units of graduate course work in the French section. Interested students should consult the Director of Graduate Studies.

Doctor of Philosophy in Italian

University regulations pertaining to the Ph.D. are listed in the "Graduate Degrees (p. 65)" section of this bulletin.

Degree Requirements

1. **Course work**
   A candidate for the Ph.D. degree must complete at least 135 units of graduate-level study. 72 of the 135 units must be taken within the department. All courses counted towards the 135-unit requirement for the PhD be at the graduate level. Excess coursework can be taken at the UG level, but not used towards the PhD requirements. All course work should be selected in consultation with the Director of Graduate Studies.
   Required Courses—

		Units
DLCL 301	The Learning and Teaching of Second Languages (must be taken in the first year of studies)	3
DLCL 311	Professional Workshop	1
A minimum of five courses on Italian literature and culture taught at the graduate level. Three of the required five courses must be taken within the first year.		15

   Elective Courses— Apart from the required courses above, students are granted considerable freedom in structuring a course of study

appropriate to their individual needs. During the first year, most course work is done within the French and Italian department, in order to ensure an adequate preparation for the qualifying examination. Students are encouraged to take a variety of courses in order to be exposed to different periods and issues. Students are not allowed to take Independent Study during their first year. In the second and third years, however, the program of study is tailored to the specific interests of the student.

2. **Examinations**
   Completion of all department and University examinations.
3. **Dissertation**
   Submission and approval of a dissertation.
4. **Teaching**
   Ph.D. students are required to teach a minimum of five courses within their five years of funding.
5. **Language Requirements**
   Attaining a native or near-native fluency in Italian is a requirement to qualify for the Ph.D. degree. Upon entering the program, candidates must contact the Language Center and arrange to take the OPI (Oral Proficiency Interview) to determine their fluency in Italian. An advanced level or above must have been reached by the time candidates take their qualifying exam in the Autumn Quarter of the second year of study. If a student fails to score in the advanced bracket of the OPI test upon entering, he/she is tested again at the beginning of the second year. It is the responsibility of the candidates to design a course of study to improve their proficiency in Italian. Candidates who do not meet the minimum language requirement must discuss their plans to meet this requirement with the Director of Graduate Studies. By the end of the third year, students must have passed a reading examination in one additional foreign language. If the candidate's period of concentration is earlier than the Romantic period, this must be Latin; if Romantic or later, French.
6. **Candidacy**
   Admission to candidacy is an important decision grounded in an overall assessment of a student's ability to successfully complete the Ph.D. program. Per University policy, students are expected to complete department qualifying procedures and apply for candidacy by the end of the second year in residence. In reviewing a student for admission to candidacy, the faculty considers a student's academic progress including but not limited to: advanced language proficiency, course work, performance on the Qualifying Exam (or Field Exam for those with a waiver of the Qualifying Exam), and successful completion of teaching and research assistantships. A student must also have completed at least 3 units of work with each of four Stanford faculty members prior to consideration for candidacy. Students applying to candidacy must provide for their annual review a writing sample in Italian (or English for Italian native speakers) corresponding to a paper completed for a course taken at Stanford. In addition to successful completion of department prerequisites, a student is only admitted to candidacy if the faculty makes the judgment that the student has the potential to successfully complete the requirements of the degree program. Candidacy is determined by faculty vote. Failure to advance to candidacy results in the dismissal of the student from the doctoral program. Candidacy is valid for five years and students are required to maintain active candidacy through conferral of the doctoral degree. All requirements for the degree must be completed before candidacy expires. The Department of French and Italian conducts regular reviews of each student's academic performance, both prior to and following successful admission to candidacy. Failure to make satisfactory progress to degree may result in dismissal from the doctoral program. Additional information about University candidacy policy is available in the Bulletin (p. 67) and GAP (http://gap.stanford.edu/4-6.html).
7. **TGR Status**
   Doctoral students who have been admitted to candidacy, completed all required courses and degree requirements other than the dissertation, completed 135 units, and submitted a Doctoral Dissertation Reading Committee form, must request Terminal Graduate Registration status to complete their dissertations. Each quarter, all TGR students must enroll in ITALIAN 802 TGR Dissertation for zero units, in the appropriate section for their adviser.

Grading

Doctoral students in the department must take required courses for a letter grade if available and are expected to earn a grade of 'B+' or better in each course. Any grade of 'B' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty: while the grade will stand, the student may be required to revise and resubmit the work associated with that course.

Examinations

There are three examinations: the qualifying examination, the field examination, and the University oral examination. Students may not take any department or University exam while course work is incomplete.

Qualifying Examination

The first oral examination, which takes place in the first two weeks of October of the second year of study, tests the student's knowledge of language and literature and his/her aptitude for critical thinking. The examining committee, determined by the Director of French and Italian, schedules the precise exam date and time.

The exam is based on a standard reading list covering major works from all periods of literature in the language(s) of study, from the Middle Ages to present day. The list may be expanded to reflect a student's particular interests, but not abridged. The reading list may be obtained from the Director of Graduate Studies, the student services manager, or by referencing the French and Italian student handbook.

The exam is 90 minutes in length and consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given in English or in the language of study and should engage, in a succinct manner, an issue or set of issues of broad relevance to the literary history of the language(s) of study. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggesting and not exhaustive, so as to provoke further discussion.
2. A 70-minute question and answer period in which the examining committee follows up on the candidate's presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in the language(s) of study. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit and demonstrate the ability to formulate an original point of view on such texts and contexts.

Students who do not pass the qualifying exam their first time may be placed on probation with limited enrollment and be allowed to retake the exam at the end of Autumn Quarter. Should the student not pass the retake exam, his/her studies in the Ph.D. program are concluded.

Students already holding an advanced degree in the relevant area may request to be excused from the Qualifying Exam. However, the student must present a formal request for a waiver to the Director of Graduate Studies by the end of autumn quarter of the first year. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the Qualifying Exam

would involve considerable repetition of already competed work is such a waiver likely to be granted.

Field Examination

The second oral examination takes place in the Autumn Quarter of the third year of study. The exam is 100 minutes in length and consists of two parts:

1. A 20-minute presentation by the student on a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his/her adviser and the Director of Graduate Studies. The student should design this research project so that it has the focus of an article or a seminar he/she might teach. The student should discuss the proposed topic with the Director of Graduate Studies before the end of the quarter preceding the quarter in which he/she plans to take the exam; together they choose a committee of three faculty members with interests close to the proposed topic. (In most cases, one of these committee members is the student's adviser.) This presentation is followed by a 20-minute discussion.
2. A 60-minute discussion of a reading list, assembled by the student, which covers about a century of writing. The reading list should include works in all genres relevant to the period covered and should be around two single-spaced pages in length. The list may well include critical and scholarly works or texts from outside the traditional domain of literary studies in the chosen tradition (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the Director and faculty advisers have agreed to define these materials as the student's field. Students are required to discuss the reading list for the examination with the Director of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be submitted to the committee no later than two weeks preceding the examination. Each member of the committee is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications. The aim of these questions is to establish the student's credentials as a specialist in the period of his/her choosing, so the core of the reading list must be made up of texts that are essential to any specialist. It follows that reading lists must not focus on the narrow area of the student's research interest. The tendency to bias reading lists towards the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work may prove relevant, but students should also remember that the examination is the central means of certifying their expertise in a literary period.

The University Oral Examination

This examination takes the form of a dissertation proposal defense. It is to be taken no later than Autumn Quarter of the student's fourth year. Students must have completed all course work and language requirements before the quarter in which they take the University oral examination. One quarter prior to the University oral examination, students must schedule the exam date and time as well as work with their primary adviser to obtain an outside chair for the examination.

Two weeks before the exam, the student must submit to the committee a 25-35 page proposal, which must contain the following parts:

1. a clear presentation of the student's central thesis
2. a synthetic overview of the dissertation
3. a description of the methodology that is used in the dissertation
4. an in-depth discussion of current secondary sources on the topic.

The student must also append a bibliography, but this does not take the place of number 4. The proposal must be prepared in close consultation with the dissertation director during the months preceding the exam.

The exam committee consists of four members, in addition to a committee chair from outside the Division of Literatures, Cultures, and Languages, whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list.

After a 20-minute presentation on the part of the candidate, each member of the committee (apart from the committee chair) questions the student for 20 minutes. At the end of the hour and forty minutes, the faculty readers vote on the outcome of the exam. If the outcome is favorable, (four out of five votes in favor of the student passing), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory, the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second exam. A student who fails a second time will be released from the Ph.D. program and awarded a terminal M.A. degree.

Advising

Given the interdisciplinary nature of the Ph.D. programs and the opportunity they afford each student to create an individualized program of study, regular consultation with an adviser is of the utmost importance. The adviser for all entering graduate students is the Director of Graduate Studies, whose responsibility it is to assist students with their course planning and to keep a running check on progress in completing the course, teaching, and language requirements. By the end of the second year of study, each student should have chosen a faculty adviser whose expertise is appropriate to his/her own area of research and interests.

Yearly Review

The faculty provide students with timely and constructive feedback on their progress toward the Ph.D. In order to evaluate students' progress and to identify potential problem areas, the department's faculty reviews the academic progress of each student at the end of the academic year. The yearly reviews are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. Possible outcomes of the yearly review include (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period on probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; or (2) continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program. Students leaving the program at the end of the first or second year are usually allowed to complete the requirements to receive an M.A. degree, if this does not involve additional residency or financial support.

Ph.D. Minor for Graduate Students in French or Italian

The Ph.D. may be combined with a minor in a related field, including Comparative Literature, Linguistics, Modern Thought and Literature, Art History, History, Music, Philosophy, and Spanish. Ph.D. candidates in French may minor in Italian, and vice versa. Students interested in a minor should design their course of study with their adviser(s).

Ph.D. Minor in Italian Literature

The department offers a minor in Italian Literature. The requirement for a minor in Italian is a minimum of 24 units of graduate course work in Italian literature. Interested students should consult the Director of Graduate Studies.

Doctor of Philosophy in French and Italian

University regulations pertaining to the Ph.D. are listed in the "Graduate Degrees (p. 65)" section of this bulletin.

Degree Requirements

1. **Course work—**
   A candidate for the Ph.D. degree must complete at least 135 units of graduate-level study. 72 of the 135 units must be taken within the department. All courses counted towards the 135-unit requirement for the PhD be at the graduate level. Excess coursework can be taken at the UG level, but not used towards the PhD requirements. All course work should be selected in consultation with the Director of Graduate Studies.
   Required courses—
2.

		Units
DLCL 301	The Learning and Teaching of Second Languages (must be taken in first year of studies)	3
DLCL 311	Professional Workshop	1
A minimum of four advanced courses on French literature and culture, and four advanced courses on Italian literature and culture. Four of the required eight courses must be taken within the first year.		24

   Elective Courses—Apart from the required courses above, students are granted considerable freedom in structuring a course of study appropriate to their individual needs. During the first year, most course work is done within the French and Italian department, in order to ensure an adequate preparation for the qualifying examination. Students are encouraged to take a variety of courses in order to be exposed to different historical periods and issues. Students are not allowed to take Independent Study during their first year. In the second and third years, however, the program of study is tailored to the specific interests of the student.

3. **Examinations**
   Successful completion of all department and University examinations.
4. **Dissertation**
   Submission and approval of a dissertation. The dissertation topic must include a substantial quotient of material from both the French and Italian tradition, and the dissertation must include either (1) at least one chapter on French materials and one chapter on Italian materials, or (2) at least two chapters focusing on a comparison between French and Italian materials.
5. **Teaching**
   Ph.D. students are required to teach a minimum of five courses within their five years of funding. Of these five courses the student is required to teach at least one French language course and one Italian language course.
6. **Language Requirements**
   Attaining a native or near-native fluency in both French and Italian is the individual responsibility of all candidates in the Ph.D. program, and remedial course work needed to achieve such fluency cannot count towards the Ph.D. degree.
   For students specializing in areas (a) medieval and renaissance and (b) renaissance and early modern, proficiency in Latin equivalent to a second year collegiate level of proficiency (the equivalent of CLASSICS 11L, CLASSICS 12L , and CLASSICS 13L) in reading is also required. Such proficiency may be demonstrated by successfully completing a course in the language in question (at least second-year level, but preferably a graduate seminar); or by passing an exam that establishes a second-year or above level of competence. In no case is passage of a standard reading competence exam considered sufficient.
   For students specializing in area (c) modern and contemporary, proficiency in a third language (beyond French and Italian) is not required; students are, however, encouraged to acquire competency in a third language or area that is relevant to their research (e.g. German).
   The language requirements should be completed as soon as possible, but in any case not later than the end of the third year.
7. **Candidacy**
   Admission to candidacy is an important decision grounded in an overall assessment of a student's ability to successfully complete the Ph.D. program. Per University policy, students are expected to complete department qualifying procedures and apply for candidacy by the end of the second year in residence. In reviewing a student for admission to candidacy, the faculty considers a student's academic progress including but not limited to: advanced language proficiency, course work, performance on the qualifying exam (or field exam for those with a waiver of the qualifying exam), and successful completion of teaching and research assistantships. A student must also have completed at least 3 units of work with each of 4 Stanford faculty members prior to consideration for candidacy. Students applying to candidacy must provide for their annual review a writing sample in French and Italian (or English for French and/or Italian native speakers) corresponding to a paper completed for a course taken at Stanford. In addition to successful completion of department prerequisites, a student is only admitted to candidacy if the faculty makes the judgment that the student has the potential to successfully complete the requirements of the degree program. Candidacy is determined by faculty vote. Failure to advance to candidacy results in the dismissal of the student from the doctoral program. Candidacy is valid for five years and students are required to maintain active candidacy through conferral of the doctoral degree. All requirements for the degree must be completed before candidacy expires. The Department of French and Italian conducts regular reviews of each student's academic performance, both prior to and following successful admission to candidacy. Failure to make satisfactory progress to degree may result in dismissal from the doctoral program. Additional information about University candidacy policy is available in the Bulletin (p. 67) and GAP (http://gap.stanford.edu/4-6.html).
8. **TGR Status**
   Doctoral students who have been admitted to candidacy, completed all required courses and degree requirements other than the dissertation, completed 135 units, and submitted a Doctoral Dissertation Reading Committee form, must request Terminal Graduate Registration status to complete their dissertations. Each quarter, all TGR students must enroll in FRENCH 802 TGR Dissertation or ITALIAN 802 TGR Dissertation for zero units, in the appropriate section for their adviser.

Grading

Doctoral students in the department must take required courses for a letter grade if available and are expected to earn a grade of 'B+' or better in each course. Any grade of 'B' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty: while the grade stands, the student may be required to revise and resubmit the work associated with that course.

Examinations

There are three examinations: the qualifying examination, the field examination, and the University oral examination. Students may not take any department or University exam while coursework is incomplete.

Qualifying Examination

The first oral examination, which takes place in the first two weeks of October of the second year of study, tests the student's knowledge of language and literature and his/her aptitude for critical thinking. The examining committee, determined by the Director of French and Italian, schedules the precise exam date and time.

Students may take either two qualifying exams, one in French and one in Italian, or a single qualifying exam in French and Italian. The combined French and Italian qualifying exam covers one of three periods, (a) medieval and renaissance, (b) renaissance and early modern, or (c) modern and contemporary. For each period it is based on a standard reading list. The list may be expanded to reflect a student's particular interests, but not abridged. One third of the combined exam takes place in English, one third in French, and one third in Italian (with the student free to choose which portion transpires in which language). The reading lists may be obtained from the Directors of Graduate Studies, the student services manager, or by referencing the French and Italian student handbook.

The exam is 90 minutes in length and consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given in English or in the language of study and should engage, in a succinct manner, an issue or set of issues of broad relevance to the literary history of the language(s) of study. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggesting and not exhaustive, so as to provoke further discussion.
2. A 70-minute question and answer period in which the examining committee follows up on the candidate's presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in the languages of study. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit, and demonstrate the ability to formulate an original point of view on such texts and contexts.

Students who do not pass the qualifying exam their first time may be placed on probation with limited enrollment and be allowed to retake the exam at the end of Autumn Quarter. If the student does not pass the second exam, his/her studies in the Ph.D. program will be concluded.

If, at the qualifying exam stage, a student's work is judged insufficient for admission to candidacy for the Ph.D., the student may petition to continue in French only or Italian only. This petition is reviewed by the qualifying exam committee, the relevant Director of Graduate Studies, and the Director of the Department of French and Italian.

Students already holding an advanced degree in the relevant area may request to be excused from the Qualifying Exam. However, the student must present a formal request for a waiver to the Director of Graduate Studies by the end of autumn quarter of the first year. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the Qualifying Exam would involve considerable repetition of already competed work is such a waiver likely to be granted.

Field Examination

The second oral examination takes place in the Autumn Quarter of the third year of study. The exam is 100 minutes in length and consists of two parts:

1. A 20-minute presentation by the student on a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his/her adviser and the Director of Graduate Studies. The student should design this research project so that it has the focus of an article or a seminar he/she might teach. The student should discuss the proposed topic with the Directors of Graduate Studies before the end of the quarter preceding the quarter in which he/she plans to take the exam; together they choose a committee of three faculty members with interests close to the proposed topic. (In most cases, one of these committee members is the student's adviser.) This presentation is followed by a 20-minute discussion.
2. A 60-minute discussion of a reading list, assembled by the student, which covers about a century of writing. The reading list should include works in all genres relevant to the period covered and should be around two single-spaced pages in length. The list may well include critical and scholarly works or texts from outside the traditional domain of literary studies in the chosen tradition (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the Director and faculty advisers have agreed to define these materials as the student's field. Students are required to discuss the reading list for the examination with the Directors of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be submitted to the committee no later than two weeks preceding the examination. Each member of the committee is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications. The aim of these questions is to establish the student's credentials as a specialist in the period of his/her choosing, so the core of the reading list must be made up of texts that are essential to any specialist. It follows that reading lists must not focus on the narrow area of the student's research interest. The tendency to bias reading lists towards the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work may prove relevant, but students should also remember that the examination is the central means of certifying their expertise in a literary period.

The University Oral Examination

This examination takes the form of a dissertation proposal defense. It is to be taken no later than Autumn Quarter of the student's fourth year. Students must have completed all course work and language requirements before the quarter in which they take the University oral examination. One quarter prior to the University oral examination, students must schedule the exam date and time as well as work with their primary adviser to obtain an outside chair for the examination.

Two weeks before the exam, the student must submit to the committee a 25-35 page proposal. This proposal must contain the following parts:

1. a clear presentation of the student's central thesis
2. a synthetic overview of the dissertation
3. a description of the methodology that is used in the dissertation
4. an in-depth discussion of current secondary sources on the topic.

The student must also append a bibliography, but this does not take the place of number 4. The reading list should include works in both French and Italian in all genres relevant to the period covered. The proposal must be prepared in close consultation with the dissertation director during the months preceding the exam.

The exam committee consists of four members, in addition to a committee chair from outside the Division of Literatures, Cultures, and Languages, whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list.

After a 20-minute presentation on the part of the candidate, each member of the committee (apart from the committee chair) questions the student for 20 minutes. At the end of the hour and forty minutes, the faculty readers vote on the outcome of the exam. If the outcome is favorable (four out of five votes in favor of the student passing), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory, the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second exam. A student who fails a second time will be released from the Ph.D. program and awarded a terminal M.A. degree.

Advising

Given the interdisciplinary nature of the Ph.D. programs and the opportunity they afford each student to create an individualized program of study, regular consultation with an adviser is of the utmost importance. The adviser for all entering graduate students is the Director of Graduate Studies, whose responsibility it is to assist students with their course planning and to keep a running check on progress in completing the course, teaching, and language requirements. By the end of the second year of study, each student should have chosen a faculty adviser whose expertise is appropriate to his/her own area of research and interests.

Yearly Review

The faculty provide students with timely and constructive feedback on their progress toward the Ph.D. In order to evaluate students' progress and to identify potential problem areas, the department's faculty reviews the academic progress of each student at the end of the academic year. The yearly reviews are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. Possible outcomes of the yearly review include (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period on probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; or (2) continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program. Students leaving the program at the end of the first or second year are usually allowed to complete the requirements to receive an M.A. degree, if this does not involve additional residency or financial support.

Ph.D. Minor for Graduate Students in French or Italian

The Ph.D. may be combined with a minor in a related field, including Comparative Literature, Linguistics, Modern Thought and Literature, Art History, History, Music, Philosophy, and Spanish. Ph.D. candidates in French may minor in Italian, and vice versa. Students interested in a minor should design their course of study with their advisor(s).

Ph.D. Minor in French Literature

The department offers a minor in French Literature. The requirement for a minor in French is completion of 24 units of graduate course work in the French section. Interested students should consult the Director of Graduate Studies.

Ph.D. Minor in Italian Literature

The department offers a minor in Italian Literature. The requirement for a minor in Italian is a minimum of 24 units of graduate course work in Italian literature. Interested students should consult the Director of Graduate Studies.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a “credit” or “no credit” grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a “credit” or “satisfactory” grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

The Department of French and Italian counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of undergraduate degree requirements that otherwise require a letter grade.

French Degrees Required Courses Policy

In academic year 2020-21, as Stanford operates on a four-quarter system, students may opt not to be enrolled in one of the four quarters of the year. Students may therefore be unable to take a FRENCH core class (FRENCH 130, 131, 132, 133) because they are on leave during the quarter it is offered. In these cases, the Chair of Undergraduate Studies will, in coordination with the student’s departmental advisor, suggest appropriate substitute classes and approve one of them.

Italian Degrees Required Courses Policy

In academic year 2020-2021, as Stanford operates on a four-quarter system, students may opt not to be enrolled in one of the four quarters of the year. Students may therefore be unable to take a ITALIAN core class (ITALIAN 127, 128, 129) because they are on leave during the quarter it is offered. In these cases, the Chair of Undergraduate Studies will, in coordination with the student’s departmental advisor, suggest appropriate substitute classes and approve one of them.

Graduate Degree Requirements

Grading

Doctoral students in the department must take required courses for a letter grade and are expected to earn a grade of 'B' or better in each required course. In other courses, doctoral students are expected to earn a grade of 'B' or better in each course taken for a letter grade in AY 2020-21 that will count towards their degree requirement. Any grade of 'B-' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty: while the grade will stand, the student may be required to revise and resubmit the work associated with that course. For courses taken for CR/NC, instructors will be asked to submit written assessment to the student and the department of what would be the equivalent letter grade to allow for review of satisfactory academic achievement by the DGS and department.

Graduate Advising Expectations

The Department of French and Italian is committed to providing academic advising in support of graduate student scholarly and professional development. The overall goal of advising, both in the DLCL and the department, is to help graduate students make academic and career choices wisely, and think ahead, in order to craft a long-term plan for their graduate student career and beyond. When most effective, the advising relationship entails collaborative and sustained engagement by both the adviser and the advisee. As a best practice, advising expectations should be periodically discussed and reviewed to ensure mutual understanding. Both the adviser and the advisee are expected to maintain professionalism and integrity. Advising is both an academically invaluable form for the transmission of expertise, as well as a key aspect of creating a strong departmental and Stanford community.

Faculty Advisers

Faculty advisers guide students in key areas such as selecting courses, designing and conducting research, developing of teaching pedagogy, navigating policies and degree requirements, and exploring academic opportunities and professional pathways.

- Upon enrolling, students plan their work under the direction of the Chair of Graduate Studies or a faculty member designated by the program. When the student selects a more specialized adviser, the transition should involve oral or written communication between both advisers and the student concerning the student's progress, goals, and expectations. It is possible for doctoral students to choose two main advisers at the dissertation stage, provided all agree this is academically sound.
- Faculty advisers should meet with assigned students to discuss their selection of courses and to plan from a broader, longer-term perspective, including discussion of Program milestones and a basic timeline; an overview of Department and DLCL offerings beyond courses; student goals and interests and DLCL or Stanford programs that may be relevant; and (for doctoral students) how to transfer previous graduate coursework.
- Faculty advisers and graduate students should meet at least once per quarter to assess the advisee's course of study, performance over the past quarter, and plans for the next quarter, as well as longer term plans. If a student has two advisers, the student should meet at least once per quarter with each adviser and at least once per year with both advisers at the same time.
- For doctoral students, faculty should help their advisees plan for exams, research grant applications, develop research projects, and plan ahead for both the academic job market and the job search beyond academia.
- Faculty advisers should provide feedback about the student's progress to the department during the Annual Review process. For more information about the Annual Review, see the Graduate Handbook.

Graduate Students

Graduate students are active contributors to the advising relationship, proactively seeking academic and professional guidance and taking responsibility for informing themselves of policies and degree requirements for their graduate program.

- Upon enrolling, students plan their work under the direction of the Chair of Graduate Studies or a faculty member designated by the program. As the student develops a field of expertise, the student choose a program adviser to replace the Chair of Graduate Studies role. The transition should involve oral or written communication between both advisers and the student concerning the student's progress, goals, and expectations.
- Graduate students and faculty advisers and should meet at least once per quarter to assess the advisee's course of study, performance over the past quarter, and plans for the next quarter, as well as longer term plans. If a student has two advisers, the student should meet at least once per quarter with each adviser and at least once per year with both advisers at the same time.
- Students should consult with their advisers on all academic matters, including coursework, conference presentations and publications, research travel, and teaching plans.
- Students should provide a thorough self-evaluation each year for the annual review. For more information about the Annual Review, see the Graduate Handbook.

For a statement of University policy on graduate advising, see the "Graduate Advising (p. 80)" section of this bulletin.

Faculty in French and Italian

Director: Laura Wittman

Chair of Graduate Studies: Cécile Alduy (French), Laura Wittman (Italian)

Chairs of Undergraduate Studies: Marisa Galvez (French for Autumn), Fatoumata Seck (French for Winter/ Spring), Sarah Prodan (Italian)

Professors: Cécile Alduy, Jean-Pierre Dupuy, Dan Edelstein, Joshua Landy, Robert Harrison

Associate Professors: Marisa Galvez, Laura Wittman

Assistant Professors: Sarah Prodan, Fatoumata Seck

Lecturers: Andrei Pesic

Courtesy Professors: Keith Baker, Margaret Cohen, Paula Findlen

Courtesy Associate Professor: James P. Daughton

Emeriti: (Professors) Jean-Marie Apostolidès, John G. Barson, Robert G. Cohn, John Freccero, Hans U. Gumbrecht, Ralph M. Hester, Elisabeth Mudimbe-Boyi, Carolyn Springer

Overseas Studies Courses in French

The Bing Overseas Studies Program (http://bosp.stanford.edu) (BOSP) manages Stanford international and domestic study away programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The BOSP course search site (https://undergrad.stanford.edu/programs/bosp/explore/search-courses/) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu) or Bing Overseas Studies (http://bosp.stanford.edu).

Due to COVID-19, all BOSP programs have been suspended for Autumn Quarter 2020-21. All courses and quarters of operation are subject to change.

		Units
OSPPARIS 30	The Avant Garde in France through Literature, Art, and Theater	4
OSPPARIS 32	French History and Politics: Understanding the Present through the Past	5
OSPPARIS 54	The Artist's World: The Workshop, Patronage and Public in 19th and 20th Century France	4

OSPPARIS 92	Building Paris: Its History, Architecture, and Urban Design	4
OSPPARIS 186F	Contemporary African Literature in French	4

Overseas Studies Courses in Italian

The Bing Overseas Studies Program (http://bosp.stanford.edu) (BOSP) manages Stanford international and domestic study away programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The BOSP course search site (https://undergrad.stanford.edu/programs/bosp/explore/search-courses/) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu) or Bing Overseas Studies (http://bosp.stanford.edu).

Due to COVID-19, all BOSP programs have been suspended for Autumn Quarter 2020-21. All courses and quarters of operation are subject to change.

		Units
OSPFLOR 34	The Virgin Mother, Goddess of Beauty, Grand Duchess, and the Lady: Women in Florentine Art	4
OSPFLOR 41	The Florentine Sketchbook: A Visual Arts Practicum	4
OSPFLOR 48	Sharing Beauty in Florence: Collectors, Collections and the Shaping of the Western Museum Tradition	4
OSPFLOR 49	On-Screen Battles: Filmic Portrayals of Fascism and World War II	5
OSPFLOR 54	High Renaissance and Mannerism: the Great Italian Masters of the 15th and 16th Centuries	4
OSPFLOR 58	Space as History: Social Vision and Urban Change	4
OSPFLOR 67	The Celluloid Gaze: Gender, Identity and Sexuality in Cinema	4
OSPFLOR 71	A Studio with a View: Drawing, Painting and Informing your Aesthetic in Florence	4
OSPFLOR 111Y	From Giotto to Michelangelo: The Birth and Flowering of Renaissance Art in Florence	4
OSPFLOR 115Y	Building the Cathedral and the Town Hall: Constructing and Deconstructing Symbols of a Civilization	4

French Courses

FRENCH 12Q. Humanities Core: Great Books, Big Ideas -- Europe, Middle Ages and Renaissance. 3-4 Units.
This three-quarter sequence asks big questions of major texts in the European and American tradition. What is a good life? How should society be organized? Who belongs? How should honor, love, sin, and similar abstractions govern our actions? What duty do we owe to the past and future? The second quarter focuses on the transition from the Middle Ages to Modernity, Europe's re-acquaintance with classical antiquity and its first contacts with the New World. Authors include Dante, Shakespeare, Machiavelli, Cervantes, and Milton. N.B. This is the second of three courses in the European track. These courses offer an unparalleled opportunity to study European history and culture, past and present. Take all three to experience a year-long intellectual community dedicated to exploring how ideas have shaped our world and future. Students who take HUMCORE 11 and HUMCORE 12Q will have preferential admission to HUMCORE 13Q (a WR2 seminar).
Same as: DLCL 12Q, HUMCORE 12Q, ILAC 12Q

FRENCH 13. Humanities Core: Great Books, Big Ideas -- Europe, Modern. 3 Units.
This three-quarter sequence asks big questions of major texts in the European and American tradition. What is a good life? How should society be organized? Who belongs? How should honor, love, sin, and similar abstractions govern our actions? What duty do we owe to the past and future? This third and final quarter focuses on the modern period, from the rise of revolutionary ideas to the experiences of totalitarianism and decolonization in the twentieth century. Authors include Locke, Mary Shelley, Marx, Nietzsche, Freud, Weber, Primo Levi, and Frantz Fanon.
Same as: DLCL 13, HISTORY 239C, HUMCORE 13, PHIL 13

FRENCH 36. Dangerous Ideas. 1 Unit.
Ideas matter. Concepts such as revolution, tradition, and hell have inspired social movements, shaped political systems, and dramatically influenced the lives of individuals. Others, like immigration, universal basic income, and youth play an important role in contemporary debates in the United States. All of these ideas are contested, and they have a real power to change lives, for better and for worse. In this one-unit class we will examine these "dangerous" ideas. Each week, a faculty member from a different department in the humanities and arts will explore a concept that has shaped human experience across time and space. Some weeks will have short reading assignments, but you are not required to purchase any materials.
Same as: ARTHIST 36, COMPLIT 36A, EALC 36, ENGLISH 71, ETHICSOC 36X, HISTORY 3D, MUSIC 36H, PHIL 36, POLISCI 70, RELIGST 36X, SLAVIC 36

FRENCH 75N. Narrative Medicine and Near-Death Experiences. 3 Units.
Even if many of us don't fully believe in an afterlife, we remain fascinated by visions of it. This course focuses on Near-Death Experiences and the stories around them, investigating them from the many perspectives pertinent to the growing field of narrative medicine: medical, neurological, cognitive, psychological, sociological, literary, and filmic. The goal is not to understand whether the stories are veridical but what they do for us, as individuals, and as a culture, and in particular how they seek to reshape the patient-doctor relationship. Materials will span the 20th century and come into the present. Taught in English.
Same as: ITALIAN 75N

FRENCH 87N. The New Wave: How The French Reinvented Cinema. 3-4 Units.
Focus on the French New Wave's cinematic revolution of 1959-1962. In a few years, the Nouvelle Vague delivered landmark works such as Truffaut's 400 Blows, Godard's Breathless, Chabrol's Les Cousins or Resnais' Hiroshima mon amour, and changed forever the way we make and think about movies. Why did these films look so radically fresh? What do they say about France's youth culture in the early 60s? How is the author's theory behind them still influencing us today? Focus is on cultural history, aesthetic analysis, interpretation of narrative, sound and visual forms. Taught in English. NOTE: Class meets Tuesday/Thursday 12:00-1:20pm; film screenings Monday 6:00-8:50pm in room 540-108.

FRENCH 110. French Painting from Watteau to Monet. 3-5 Units.
This course offers a survey of painting in France from 1700 to around 1900. It introduces major artists, artworks, and the concepts used by contemporary observers and later art historians to make sense of this extraordinarily rich period. Overarching themes discussed in the class will include the dueling legacies of coloristic virtuosity and classical formalism, new ways of representing visual perception, the opposing artistic effects of absorption and theatricality, the rise and fall of official arts institutions, and the participation of artists and artworks in political upheaval and social change. The course ends with an interrogation of the concept of modernity and its emergence out of dialogue and conflict with artists of the past. Students will learn and practice formal analysis of paintings, as well as interpretations stressing historical context.
Same as: ARTHIST 110, ARTHIST 310, FRENCH 310

FRENCH 118. Literature and the Brain. 3 Units.
Recent developments in and neuroscience and experimental psychology have transformed the way we think about the operations of the brain. What can we learn from this about the nature and function of literary texts? Can innovative ways of speaking affect ways of thinking? Do creative metaphors draw on embodied cognition? Can fictions strengthen our "theory of mind" capabilities? What role does mental imagery play in the appreciation of descriptions? Does (weak) modularity help explain the mechanism and purpose of self-reflexivity? Can the distinctions among types of memory shed light on what narrative works have to offer?.
Same as: COMPLIT 138, COMPLIT 238, ENGLISH 118, ENGLISH 218, FRENCH 218, PSYC 126, PSYCH 118F

FRENCH 120. Coffee and Cigarettes: The Making of French Intellectual Culture. 4-5 Units.
Examines a quintessential French figure "l'intellectuel" from a long-term historical perspective. We will observe how this figure was shaped over time by such other cultural types as the writer, the artist, the historian, the philosopher, and the moralist. Proceeding in counter-chronological order, from the late 20th to the 16th century, we will read a collection of classic French works. As this course is a gateway for French studies, special emphasis will be placed on oral proficiency. Taught in French; readings in French.

FRENCH 121. Jean-Jacques Rousseau: Politics, Philosophy, and Literature. 3-5 Units.
"Man is born free, and everywhere he is in chains." This seminar explores the work of one of the most important and enigmatic thinkers about the problems of modern society: Jean-Jacques Rousseau. Students will read a selection of his most important works in dialogue with other important thinkers of his time. They will grapple with Rousseau's political philosophy in his critique of modernity and his vision for remaking politics, as well as his moral philosophy and influential fictional visions of education and love. We will discuss not only Rousseau's landmark contributions to debates about authenticity, transparency, and self-interest, but also his troubling views on gender. The class will conclude with Rousseau's autobiography and its profound meditation on the formation of selfhood. Taught in French.
Same as: FRENCH 221A

FRENCH 124A. Napoleon. 3-5 Units.
Who was Napoleon? A fierce patriot or a traitor of the Revolution? A beloved emperor or a merciless dictator? There is not one single or indeed final answer to these questions: in this course we shall learn to make a distinction between the historical figure (his life and actual deeds) and the literary character (how his detractors or enthusiasts represented him). We will explore the multi-faceted representations of Napoleon with a particular focus on his portraits in poems, novels, essays, paintings and sculptures. The syllabus will include readings and excerpts from Balzac, Stendhal, Dumas, Hugo, Thackeray, Tolstoy, Manzoni, Foscolo, Calvino. Taught in English.
Same as: COMPLIT 124C

FRENCH 129. Camus. 4-5 Units.
"The admirable conjunction of a man, of an action, and of a work" for Sartre, "the ideal husband of contemporary letters" for Susan Sontag, reading "Camus's fiction as an element in France's methodically constructed political geography of Algeria" for Edward Said, Camus embodies the very French figure of the "intellectuel engagé," or public intellectual. From his birth in 1913 into a poor European family in Algeria to the Nobel Prize in Literature in 1957, from the Mediterranean world to Paris, Camus engaged in the great ethical and political battles of his time, often embracing controversial positions. Through readings and films, we will explore his multiple legacies. Readings from Albert Camus, Jean-Paul Sartre, Assia Djebar, Kamel Daoud, Mouloud Feraoun, Alice Kaplan, Edward Said, Edwidge Danticat. Students will work on their production of written French, in addition to speaking French and reading comprehension. Taught in French. Students are highly encouraged to complete FRENLANG 124 or to successfully test above this level through the Language Center. This course fulfills the Writing in the Major (WIM) requirement.
Same as: COMPLIT 229B, CSRE 129, HISTORY 235F

FRENCH 130. Introduction to Medieval and Renaissance French Literature. 4 Units.
In this introductory course, we will read some key texts of literature written in French between 1100 and 1600, paying special attention to how gender, ethnicity and love played a role in the doing and undoing of communities. What does it mean to be a woman writer when most things were written by men? What does it mean to be a man, at court or at war? What did people learn when traveling to Asia or to the New Continent, and how did it impact the way people conceived of ethnicity? How did people think of ethnic difference in their midst? How can love strengthen an empire, and how can one be sincere when copying a love-poem? These cultural questions will be answered with special attention to literary form. Different genres might have yielded different possibilities to not just represent, but also imagine ways of living together; perhaps the very structure of a sentence allows one to construe one¿s own identity. While the course will be taught in French, no knowledge of Old French, Latin, or Occitan is required. All readings will be done in modern French or English translation. Assignments and discussions are all in French. Students are highly encouraged to complete FRENLANG 124 or to successfully test above this level through the Language Center.

FRENCH 131. Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France. 4 Units.
The literature, culture, and politics of France from Louis XIV to Olympe de Gouges. How this period produced the political and philosophical foundations of modernity. Readings may include Corneille, Molière, Racine, Lafayette, Voltaire, Diderot, Rousseau, Beaumarchais, and Gouges. Taught in French. Students are highly encouraged to complete FRENLANG 124 or to successfully test above this level through the Language Center. This course fulfills the Writing in the Major (WIM) requirement.

FRENCH 132. Literature, Revolutions, and Changes in 19th- and 20th-Century France. 4 Units.
This course will explore several important texts of 19th- and 20th-Century French literature, with the aim of following the evolution of the main literary movements during those centuries of important cultural and social changes. We will study texts related to movements such as Romanticism, Realism, Naturalism, Surrealism, the Absurd, the Nouveau Roman in all major genres (prose, poetry, theater, film) and will regularly refer to other arts, such as painting and music. Authors include Chateaubriand, Musset, Balzac, Flaubert, Maupassant, Baudelaire, Rimbaud, Apollinaire, Proust, Céline, Radiguet, Ionesco, Robbe-Grillet, Duras, Gary. All readings, discussion, and assignments are in French. Students are highly encouraged to complete FRENLANG 124 or to successfully test above this level through the Language Center.

FRENCH 133. Literature and Society in Africa and the Caribbean. 4 Units.
This course explores texts and films from Francophone Africa and the Caribbean in the 20th and 21st centuries. The course will explore the connections between Sub-Saharan Africa, the Maghreb and the Caribbean through both foundational and contemporary works while considering their engagement with the historical and political contexts in which they were produced. This course will also serve to improve students' speaking and writing skills in French while sharpening their knowledge of the linguistic and conceptual tools needed to conduct literary analysis. The diverse topics discussed in the course will include national and cultural identity, race and class, gender and sexuality, orality and textuality, transnationalism and migration, colonialism and decolonization, history and memory, and the politics of language. Readings include the works of writers and filmmakers such as Djibril Tamsir Niane, Léopold Senghor, Aimé Césaire, Albert Memmi, Patrick Chamoiseau, Leonora Miano, Leila Slimani, Dani Laferrière and Ousmane Sembène. Taught in French. Students are highly encouraged to complete FRENLANG 124 or to successfully test above this level through the Language Center. This course fulfills the Writing in the Major (WIM) requirement.
Same as: AFRICAAM 133, AFRICAST 132, COMPLIT 133A, COMPLIT 233A, CSRE 133E, JEWISHST 143

FRENCH 140. Paris: Capital of the Modern World. 4-5 Units.
This course explores how Paris, between the eighteenth and twentieth centuries, became the political, cultural, and artistic capital of the modern world. It considers how the city has both shaped and been shaped by the tumultuous events of modern history- class conflict, industrialization, imperialism, war, and occupation. It will also explore why Paris became the major world destination for intellectuals, artists and writers. Sources will include films, paintings, architecture, novels, travel journals, and memoirs. Course taught in English with an optional French section.
Same as: FRENCH 340, HISTORY 230C, URBANST 184

FRENCH 148. Cinema and the Real: Italian Neo-Realism and the French New Wave. 3-5 Units.
Between the 1940s and 1960s, in Italy and France, a handful of movie directors revolutionized the art of cinema. In the wake of World War II they entirely re-defined the aesthetics of the 7th art in films such as "Bicycle Thieves," "400 Blows," "Rome Open City," and "Breathless." These works shared an aesthetic and a philosophy of "the real" - they eschewed big studios and sets in favor of natural light, on-location shooting, and non-professional actors to capture the present moment. This survey course will explore how the dialogue between Italian neo-realism and the French New Wave has yielded some of the most revolutionary filmic masterpieces of both traditions, while raising theoretical and philosophical questions about form, time, space, fiction, representation, and reality. Films: Roberto Rossellini, Vittorio de Sica, Luchino Visconti, Federico Fellini, François Truffaut, Jean-Luc Godard, Alain Resnais and Agnès Varda.
Same as: FRENCH 248, ITALIAN 148, ITALIAN 248

FRENCH 149. Love at First Sight: Visual Desire, Attraction, and the Pleasures of Art. 3-5 Units.
Why do dating sites rely on photographs? Why do we believe that love is above all a visual force? How is pleasure, even erotic pleasure, achieved through looking? While the psychology of impressions offers some answers, this course uncovers the ways poets, songwriters, and especially artists have explored myths and promoted ideas about the coupling of love and seeing. Week by week, we will be reflecting on love as political critique, social disruption, and magical force. And we will do so by examining some of the most iconic works of art, from Dante's writings on lovesickness to Caravaggio's Narcissus, studying the ways that objects have shifted from keepsakes to targets of our cares. While exploring the visual roots and evolutions of what has become one of life's fundamental drives, this course offers a passionate survey of European art from Giotto's kiss to Fragonard's swing that elicits stimulating questions about the sensorial nature of desire and the human struggle to control emotions.
Same as: ARTHIST 119, ARTHIST 319, FRENCH 349, ITALIAN 149, ITALIAN 349

FRENCH 150. Season and Off-Season of North-African Cinema and Literature. 3-5 Units.
This course explores the emergence of Francophone cinema and literature from North Africa (Algeria, Tunisia, Morocco) in the post-independence era: aesthetics, language metissage and hybridization, ethnic interactions, gender relations, collective imagination and collective memory, nationalism, popular culture, religion, urbanism, post-colonialism, migration, and the Arab Spring will be covered. Special attention will be given to Moroccan cinema, and to the notions of francophone/maghrebi/"beur"/diasporic cinema and literature. Readings from Franz Fanon, Albert Memmi, Kateb Yacine, Albert Camus, Reda Bensmaia, Assia Djebar, Colette Fellous, Abdelkebir Khatibi, Michel de Certeau, Benjamin Stora, Lucette Valensi, Abdelwahab Meddeb. Movies include Viva Laldjérie, Rome plutot que vous, Les Sabots en or, Les Silence des Palais, Halfaouine, Satin Rouge, Le Chant des Mariées, and Mort à Vendre. Taught in French. Films in French and Arabic with English subtitles.
Same as: FRENCH 350

FRENCH 152. French Painting from the Revolution to Impressionism. 3-5 Units.
This course offers a survey of painting in France from 1700 to around 1900. It introduces major artists, artworks, and the concepts used by contemporary observers and later art historians to make sense of this extraordinarily rich period. Overarching themes discussed in the class will include the dueling legacies of coloristic virtuosity and classical formalism, new ways of representing visual perception, the opposing artistic effects of absorption and theatricality, the rise and fall of official arts institutions, and the participation of artists and artworks in political upheaval and social change. The course ends with an interrogation of the concept of modernity and its emergence out of dialogue and conflict with artists of the past. Students will learn and practice formal analysis of paintings, as well as interpretations stressing historical context.
Same as: FRENCH 352

FRENCH 153. « Liberté, Égalité, Fraternité » : French Political Myths and Concepts. 3-5 Units.
"Liberté, égalité, fraternité," but also "laïcité," "diversité," "parité," "universalisme" : the French have forged over the last two centuries key political concepts that are articulated together in a unique way and shape the political consciousness, modes of engagements, aspirations and current debates of what has been called "the most political nation in the world." Along with mythologies such as the People, the Nation, the providential Leader, or the "enemy from within," they are at the centre of semantic and political battles, tugged over by the Left, the Right, populist movements, activists and counter-cultures. How did they emerge? How do they apply today? How does theory compare to practices, principles to day-to-day realities? An introduction through case-studies, films, paintings, cartoons, and texts from political theory, history, politics and literature. Taught in English.
Same as: FRENCH 353

FRENCH 154. Film & Philosophy. 3 Units.
Issues of authenticity, morality, personal identity, and the value of truth explored through film; philosophical investigation of the filmic medium itself. Screenings to include Blade Runner (Scott), Do The Right Thing (Lee), The Seventh Seal (Bergman), Fight Club (Fincher), La Jetée (Marker), Memento (Nolan), and Eternal Sunshine of the Spotless Mind (Kaufman). Taught in English.
Same as: COMPLIT 154A, ENGLISH 154F, ITALIAN 154, PHIL 193C, PHIL 293C

FRENCH 154E. Film & Philosophy CE. 3 Units.
Issues of authenticity, morality, personal identity, and the value of truth explored through film; philosophical investigation of the filmic medium itself. Screenings to include Blade Runner (Scott), Do The Right Thing (Lee), The Seventh Seal (Bergman), Fight Club (Fincher), La Jetée (Marker), Memento (Nolan), and Eternal Sunshine of the Spotless Mind (Kaufman). Taught in English. Satisfies the WAY CE.
Same as: ITALIAN 154E, PHIL 193E, PHIL 293E

FRENCH 166. Food, Text, Music: A Multidisciplinary Lab on the Art of Feasting. 3-5 Units.
Students cook a collection of unfamiliar recipes each week while learning about the cultural milieus in which they originated. The course focuses on the fourteenth and fifteenth centuries, a time of great banquets that brought together chefs, visual artists, poets, musicians, and dancers. Students read late-medieval cookbooks under the guidance of professional chefs, learn songs and poetry with the help of visiting performers, and delve into a burgeoning scholarly literature on food history and sensory experience. We will also study trade routes and food networks, the environmental impact of large-scale banquets, the science of food, and the politics of plenty. This course may count towards the Medieval component of the French major, and corresponds to DLCL 121, a course requirement for the Medieval Studies Minor. Students interested in applying for course must email the professor (jrodin@stanford.edu) by 20 September with a statement of up to 350 words that includes: (a) reasons for wanting to take the class; (b) relevant background in cooking/medieval studies/etc.; (c) stated commitment to attend all ten course meetings; and (d) any dietary restrictions/preferences.
Same as: FRENCH 266, FRENCH 366, MUSIC 133, MUSIC 333

FRENCH 175. CAPITALS: How Cities Shape Cultures, States, and People. 3-5 Units.
This course takes students on a trip to major capital cities, at different moments in time: Renaissance Florence, Golden Age Madrid, Colonial Mexico City, Enlightenment and Romantic Paris, Existential and Revolutionary St. Petersburg, Roaring Berlin, Modernist Vienna, and bustling Buenos Aires. While exploring each place in a particular historical moment, we will also consider the relations between culture, power, and social life. How does the cultural life of a country intersect with the political activity of a capital? How do large cities shape our everyday experience, our aesthetic preferences, and our sense of history? Why do some cities become cultural capitals? Primary materials for this course will consist of literary, visual, sociological, and historical documents (in translation); authors we will read include Boccaccio, Dante, Sor Juana, Montesquieu, Baudelaire, Gogol, Irmgard Keun, Freud, and Borges. Note: To be eligible for WAYS credit, you must take the course for a Letter Grade.
Same as: COMPLIT 100, DLCL 100, GERMAN 175, HISTORY 206E, ILAC 175, ITALIAN 175, URBANST 153

FRENCH 181. Philosophy and Literature. 3-5 Units.
What, if anything, does reading literature do for our lives? What can literature offer that other forms of writing cannot? Can fictions teach us anything? Can they make people more moral? Why do we take pleasure in tragic stories? This course introduces students to major problems at the intersection of philosophy and literature. It addresses key questions about the value of literature, philosophical puzzles about the nature of fiction and literary language, and ways that philosophy and literature interact. Readings span literature, film, and philosophical theories of art. Authors may include Sophocles, Dickinson, Toni Morrison, Proust, Woolf, Walton, Nietzsche, and Sartre. Students master close reading techniques and philosophical analysis, and write papers combining the two. This is the required gateway course for the Philosophy and Literature major tracks. Majors should register in their home department.
Same as: CLASSICS 42, COMPLIT 181, ENGLISH 81, GERMAN 181, ILAC 181, ITALIAN 181, PHIL 81, SLAVIC 181

FRENCH 185. Texts and Contexts: French-English Translation. 3-5 Units.
This course introduces students to the ways in which translation has shaped the image of France and the Francophone world. What texts and concepts were translated, how, where, and to what effect? Students will work on a translation project throughout the quarter and translate texts from French to English and English to French. Topics may include the role of translation in the development of cultures; the political dimension of translation, translation in the context of migration, and the socio-cultural frameworks that shape translations. Case studies: Camus, Fanon, Glissant, de Beauvoir, Meddeb, Duras. Prior knowledge of French language required.
Same as: COMPLIT 285, CSRE 285, FRENCH 285

FRENCH 187. Sex, Gender, and Violence: French Women Writers Today. 1-5 Unit.
Long before the 2017 #Metoo campaign, French women writers have explored through powerful fictions and autobiographies the different shades of economic, social, psychological, physical, or sexual violence that is exerted against, but also by and between, women. How does literature - the power of words - address, deconstruct or comfort power dynamics (during sex and between the sexes) that are usually silenced, taboo or unspeakable? Themes explored: sex and gender, sex and power, rape culture, sexual and moral taboos (incest, abortion, pornography, infanticide, lesbianism), the body as social stigma or source of meaning. Special attention given to narrative and descriptive strategies designed to avert, expose, deconstruct or account for specifically feminine experiences (rape, orgasm, pregnancy). Authors include Marie Darrieusecq, Christine Angot, Annie Ernaux, Marie NDiaye, Virginie Despentes, Leila Slimani, Ivan Jablonka along with feminist theory. Taught in French.
Same as: FEMGEN 187X, FEMGEN 287X, FEMGEN 387X, FRENCH 287, FRENCH 387

FRENCH 192. Women in French Cinema: 1958-. 3-5 Units.
Women as objects and subjects of the voyeuristic gaze inherent to cinema. The myth of the feminine idol in French films in historical and cultural context since the New Wave until now. The mythology of stars as the imaginary vehicle that helped France to change from traditional society to modern, culturally mixed nation. The evolution of female characters, roles, actresses, directors in the film industry. Filmmakers include Vadim, Buñuel, Truffaut, Varda, Chabrol, Colline Serreau, Tonie Marshall. Discussion in English; films in French with English subtitles.
Same as: FEMGEN 192, FILMSTUD 112

FRENCH 199. Individual Work. 1-12 Unit.
Restricted to French majors with consent of department. Normally limited to 4-unit credit toward the major. May be repeated for credit.

FRENCH 205. Songs of Love and War: Gender, Crusade, Politics. 3-5 Units.
Analysis of medieval love, satirical and Crusade lyrics of the trouabdours. Study of deictic address, corporeal subjectivity, the female voice, love debates, and the body as a figure of political conflict. Course readings include medieval treatises on lyric and modern translations of the troubadour tradition. Works by Ovid, Bernart de Ventadorn, Bertran de Born, La Comtessa de Dia, Thibaut de Champagne, Raimon Vidal, Dante, and Pound. Taught in English. Course includes a lab component for creation of multi-media translation projects: trobar. stanford.edu.
Same as: FEMGEN 205

FRENCH 214. Pirandello, Sartre, and Beckett. 3-5 Units.
In this course we will read the main novels and plays of Pirandello, Sartre, and Beckett, with special emphasis on the existentialist themes of their work. Readings include The Late Mattia Pascal, Six Characters in Search of an Author, Henry IV; Nausea, No Exit, "Existentialism is a Humanism"; Molloy, Endgame, Krapp's Last Tape, Waiting for Godot. Taught in English.
Same as: COMPLIT 281E, COMPLIT 381E, FRENCH 314, ITALIAN 214, ITALIAN 314

FRENCH 218. Literature and the Brain. 3 Units.
Recent developments in and neuroscience and experimental psychology have transformed the way we think about the operations of the brain. What can we learn from this about the nature and function of literary texts? Can innovative ways of speaking affect ways of thinking? Do creative metaphors draw on embodied cognition? Can fictions strengthen our "theory of mind" capabilities? What role does mental imagery play in the appreciation of descriptions? Does (weak) modularity help explain the mechanism and purpose of self-reflexivity? Can the distinctions among types of memory shed light on what narrative works have to offer?.
Same as: COMPLIT 138, COMPLIT 238, ENGLISH 118, ENGLISH 218, FRENCH 118, PSYC 126, PSYCH 118F

FRENCH 219. The Renaissance Body in French Literature and Medicine. 3-5 Units.
If the Renaissance is famous for discovering unknown continents and ancient texts the body too was a new territory of conquest. How did literature respond to the rise of an anatomical gaze in the arts and in medicine and how did it stage the aesthetic religious philosophical and moral issues related to such a promotion or deconstruction of the body? Does literature aim at representing the body or does it use it instead as a ubiquitous signifier for intellectual emotional and political ideas? The locus of desire, pleasure and disease, the body also functioned as a reminder of human mortality and was caught in the web of gender issues, religious controversies and new norms of behavior. Texts from prose fiction (Rabelais) poetry (Scève Ronsard Labé D'Aubigné) essays (Montaigne) and emblem literature. Extra documents include music scores tapestries paintings philosophical and anatomical plates from medical treatises. Taught in French.
Same as: FRENCH 319

FRENCH 220. Rethinking Francophonie in the 21st Century. 3-5 Units.
This course is a critical examination of literature from the Francophone world of the 20th and 21st centuries. Students will travel through time and space with a selection of novels, poems, epics, memoirs, essays, manifestos and short stories. In this historical and cultural journey through Sub-Saharan Africa, North Africa, the Caribbean, Canada, Vietnam and Mauritius, our objective will be to provide a reassessment, of what "Francophonie" means in the 21st century. While exploring francophone societies we will examine several canonical texts together with more recent works and consider their engagement with the historical and political contexts in which they were produced. Topics discussed in the course will include: race and representation, national and cultural identity, immigration and nationalism, transnationalism and diaspora, littérature-monde, language politics, postcolonialism and universalism. Readings will include the works of: Aimé Césaire, Lyonnel Trouillot, Edouard Glissant, Boubacar Boris Diop, Alain Mabanckou, Kim Thúy, Ananda Devi, Fatou Diome, Simone Swartz-Bart, Abdelkader Khatibi, among others. Taught in French.

FRENCH 221A. Jean-Jacques Rousseau: Politics, Philosophy, and Literature. 3-5 Units.
"Man is born free, and everywhere he is in chains." This seminar explores the work of one of the most important and enigmatic thinkers about the problems of modern society: Jean-Jacques Rousseau. Students will read a selection of his most important works in dialogue with other important thinkers of his time. They will grapple with Rousseau's political philosophy in his critique of modernity and his vision for remaking politics, as well as his moral philosophy and influential fictional visions of education and love. We will discuss not only Rousseau's landmark contributions to debates about authenticity, transparency, and self-interest, but also his troubling views on gender. The class will conclude with Rousseau's autobiography and its profound meditation on the formation of selfhood. Taught in French.
Same as: FRENCH 121

FRENCH 228. Science, technology and society and the humanities in the face of the looming disaster. 3-5 Units.
How STS and the Humanities can together help think out the looming catastrophes that put the future of humankind in jeopardy.
Same as: ITALIAN 228, POLISCI 233F

FRENCH 228E. Getting Through Proust. 3-5 Units.
Selections from all seven volumes of "In Search of Lost Time". Focus on issues of personal identity (perspective, memory, life-narrative); interpersonal relations (friendship, love, homosexuality, jealousy, indirect expression); knowledge (objective truth, subjective truth, necessary illusions); redemption (enchantment, disenchantment, re-enchantment); aesthetics (music, painting, fiction); and Proust's own style (narrative sequence, sentence structure, irony, metaphor, metonymy, metalepsis). Taught in English; readings in French or English.

FRENCH 230. Giambattista Vico & Claude Lévi-Strauss. 3-5 Units.
An intensive reading of Vico's New Science with special emphasis on Vico's theory of anthropogenesis, myth, and the poetic origins of human consciousness. Vico's thought will be placed in relation to Lévi-Strauss's theories of myth and so-called "primitive thought". Readings include Vico's New Science and Lévi-Strauss's "The Structural Study of Myth", and the first chapters of his book The Savage Mind. Taught in English.
Same as: FRENCH 330, ITALIAN 327

FRENCH 236. Casablanca - Algiers - Tunis : Cities on the Edge. 3-5 Units.
Casablanca, Algiers and Tunis embody three territories, real and imaginary, which never cease to challenge the preconceptions of travelers setting sight on their shores. In this class, we will explore the myriad ways in which these cities of North Africa, on the edge of Europe and of Africa, have been narrated in literature, cinema, and popular culture. Home to Muslims, Christians, and Jews, they are an ebullient laboratory of social, political, religious, and cultural issues, global and local, between the nineteenth and twenty-first centuries. We will look at mass images of these cities, from films to maps, novels to photographs, sketching a new vision of these magnets as places where power, social rituals, legacies of the Ottoman and French colonial pasts, and the influence of the global economy collude and collide. Special focus on class, gender, and race.

FRENCH 238. Art and the Market. 3-5 Units.
This course examines the relationship between art and the market, from the château-builders of the French Renaissance to avant-garde painters in the nineteenth-century Salon des Refusés. Using examples drawn from France, this course explores the relationship between artists and patrons, the changing status of artists in society, patterns of shifting taste, and the effects of museums on making and collecting art. Students will read a mixture of historical texts about art and artists, fictional works depicting the process of artistic creation, and theoretical analyses of the politics embedded in artworks. They will engage in sustained analysis of individual artworks, as well as the market structures in which such artworks were produced and bought. The course will be taught in English, with the option of readings in French for departmental majors.
Same as: ARTHIST 238C

FRENCH 239. The Afterlife of the Middle Ages. 3-5 Units.
Literary works that evoke a medieval past in contrast to a historical present, and critical texts that treat aspects of the medieval or medievalism. How does the concept of medievalism emerge and evolve through the ages? Topics include periodization, philology, critical theory, the study of Gothic architecture, and the use of the term medieval in modern political discourse and postcolonial studies. Authors include Burckhardt, Camille, Chateaubriand, Chrétien de Troyes, Didi-Huberman, Jauss, Michelet, Panofsky, Pound, films by Dreyer and Bergman, and contemporary poetry. Taught in English.
Same as: FRENCH 339

FRENCH 246. Body over Mind. 3-5 Units.
How does modern fiction, aided by modern philosophy, give the lie to Descartes' famous "I think therefore I am"? And how does writing convey the desire for a different, perhaps stronger, integration of mind and body? Does the body speak a particular truth that we must learn to hear, that the mind is not always connected to? How do modern metaphors for the mind-body connection shape our experience? These questions will be explored via the works of major French and Italian writers and thinkers, including Pirandello, Calvino, Camus, Houellebecq, Sartre, and Agamben.
Same as: FRENCH 346, ITALIAN 346

FRENCH 248. Cinema and the Real: Italian Neo-Realism and the French New Wave. 3-5 Units.
Between the 1940s and 1960s, in Italy and France, a handful of movie directors revolutionized the art of cinema. In the wake of World War II they entirely re-defined the aesthetics of the 7th art in films such as "Bicycle Thieves," "400 Blows," "Rome Open City," and "Breathless." These works shared an aesthetic and a philosophy of "the real" - they eschewed big studios and sets in favor of natural light, on-location shooting, and non-professional actors to capture the present moment. This survey course will explore how the dialogue between Italian neo-realism and the French New Wave has yielded some of the most revolutionary filmic masterpieces of both traditions, while raising theoretical and philosophical questions about form, time, space, fiction, representation, and reality. Films: Roberto Rossellini, Vittorio de Sica, Luchino Visconti, Federico Fellini, François Truffaut, Jean-Luc Godard, Alain Resnais and Agnès Varda.
Same as: FRENCH 148, ITALIAN 148, ITALIAN 248

FRENCH 249. The Algerian Wars. 3-5 Units.
From Algiers the White to Algiers the Red, Algiers, the Mecca of the Revolutionaries in the words of Amilcar Cabral, this course offers to study the Algerian Wars since the French conquest of Algeria (1830-) to the Algerian civil war of the 1990s. We will revisit the ways in which the war has been narrated in literature and cinema, popular culture, and political discourse. A special focus will be given to the Algerian War of Independence (1954-1962). The course considers the racial representations of the war in the media, the continuing legacies surrounding the conflict in France, Africa, and the United States, from Che Guevara to the Black Panthers. A key focus will be the transmission of collective memory through transnational lenses, and analyses of commemorative events and movies. nReadings from James Baldwin, Assia Djebar, Albert Camus, Frantz Fanon, Mouloud Feraoun. Movies include "The Battle of Algiers," "Days of Glory," and "Viva Laldjérie." nTaught in English.
Same as: CSRE 249, HISTORY 239G, JEWISHST 249

FRENCH 252. Art and Power: From Royal Spectacle to Revolutionary Ritual. 3-5 Units.
From the Palace of Versailles to grand operas to Jacques-Louis David's portraits of revolutionary martyrs, rarely have the arts been so powerfully mobilized by the State as in early modern France. This course examines how the arts were used from Louis XIV to the Revolution in order to broadcast political authority across Europe. We will also consider the resistance to such attempts to elicit shock-and-awe through artistic patronage. By studying music, architecture, garden design, the visual arts, and theater together, students will gain a new perspective on works of art in their political contexts. But we will also examine the libelous pamphlets and satirical cartoons that turned the monarchy¿s grandeur against itself, ending the course with an examination of the new artistic regime of the French Revolution. The course will be taught in English with the option of French readings for departmental majors.
Same as: ARTHIST 252A

FRENCH 257. Simone Weil, Simone de Beauvoir, Hannah Arendt, and Adriana Cavarero. 3-5 Units.
What does it mean to say the personal is the political, or, in the case of Arendt, that the personal is not political, especially if you are a woman? This course explores how Weil, De Beauvoir, Arendt, and Caverero contend with the question of personhood, in its variegated social, political, ethical, and gendered dimensions. Particular attention will be given to a philosophy of social change and personal transformation, and to the enduring relevance of these women's thought to issues of our day. Texts include selections from "Gravity and Grace," "The Second Sex," "The Ethics of Ambiguity," "The Human Condition," "Between Past and Future," "Stately Bodies," and "Relating Narratives.".
Same as: COMPLIT 257, COMPLIT 357A, FEMGEN 257X, FEMGEN 357X, FRENCH 357, ITALIAN 257, ITALIAN 357

FRENCH 260A. Transcultural Perspectives of South-East Asian Music and Arts. 2-4 Units.
This course will explore the links between aspects of South-East Asian cultures and their influence on modern and contemporary Western art and literature, particularly in France; examples of this influence include Claude Debussy (Gamelan music), Jacques Charpentier (Karnatak music), Auguste Rodin (Khmer art) and Antonin Artaud (Balinese theater). In the course of these interdisciplinary analyses - focalized on music and dance but not limited to it - we will confront key notions in relation to transculturality: orientalism, appropriation, auto-ethnography, nostalgia, exoticism and cosmopolitanism. We will also consider transculturality interior to contemporary creation, through the work of contemporary composers such as Tran Kim Ngoc, Chinary Ung and Tôn-Thât Tiêt. Viewings of sculptures, marionette theater, ballet, opera and cinema will also play an integral role. To satisfy a Ways requirement, this course must be taken for at least 3 units. In AY 2020-21, a letter grade or `CR¿ grade satisfies the Ways requirement. WIM credit in Music at 4 units and a letter grade.
Same as: COMPLIT 148, COMPLIT 267, MUSIC 146N, MUSIC 246N

FRENCH 261. War and Peace: Writings by and about Veterans in the 20th and 21st Centuries. 2-5 Units.
Since the aftermath of World War One, and with increasing urgency in contemporary America, stories about and by veterans are assigned a double role: that of exposing the horror of war yet also defending the possibility of a just war, and that of healing both veterans themselves and the society they return to. Key questions for this course are: Given the current practice of using writing and the hero¿s journey as a model for healing veterans and making their voices heard in our culture, can we look back to post-World-War-One culture and see if writing fulfills a similar function? And given how many post-World-War-One veterans became famous writers, how do we assess the interplay between literature, poetry, memoir, journalism, personal letters, photo accounts? Is there a connection between artistic innovation and the capacity to heal?.
Same as: FRENCH 361, ITALIAN 261, ITALIAN 361

FRENCH 262. Symbolism in Literature and the Arts. 3-5 Units.
This course will deal with the some of the 19th and 20th century authors and artists associated with Symbolism. We will focus on some key theoretical essays about the symbol, as well as on symbolist poetry, novels, visual arts, cinema, and music. In reading authors such as Coleridge, Blake, Poe, Baudelaire, Rimbaud, Verlaine, Mallarmé, Valéry, Pascoli, Campana, d¿Annunzio, and Savinio, we will explore the nature and uses of the symbol in art.
Same as: FRENCH 362, ITALIAN 262, ITALIAN 362

FRENCH 264. Crossing the Atlantic: Race and Identity in the African Diaspora. 3-5 Units.
This course interrogates the relationship between literature, culture, race and identity in the African diaspora. We will analyze racial discourses through literature, and various forms of cultural expression while examining the role of class and gender in these configurations. As we follow the historical and geographical trajectories of people of African descent in different parts of the world, students will explore literary and political movements with the objective of examining how race has been constructed and is performed in different regions of the diaspora. Our readings will take us from Martinique, Guadeloupe, Guyana, France, and Senegal to Cuba, Brazil, Haiti and the Dominican Republic. Topics discussed will include: Race, identity, gender, class, memory, oral tradition, Afro-Caribbean religions, Negrismo, Négritude, Antillanité, Créolité, colonialism, modernity and national belonging. Readings will include the works of: Jean Price-Mars, Léopold Senghor, Aimé Césaire, Léon Damas, Frantz Fanon, Nicolás Guillén, Nancy Morejon, Maryse Condé, Patrick Chamoiseau, Edouard Glissant, among others. Taught in English.
Same as: COMPLIT 264, CSRE 265

FRENCH 265. The Problem of Evil in Literature, Film, and Philosophy. 3-5 Units.
Conceptions of evil and its nature and source, distinctions between natural and moral evil, and what belongs to God versus to the human race have undergone transformations reflected in literature and film. Sources include Rousseau's response to the 1755 Lisbon earthquake; Hannah Arendt's interpretation of Auschwitz; Günther Anders' reading of Hiroshima; and current reflections on looming climatic and nuclear disasters. Readings from Rousseau, Kant, Dostoevsky, Arendt, Anders, Jonas, Camus, Ricoeur, Houellebeck, Girard. Films by Lang, Bergman, Losey, Hitchcock.

FRENCH 272. Body Doubles: From the Fantastic Short Story to Science-Fiction. 2-5 Units.
How do we imagine our bodies through language, at times almost completely refashioning a physical double, be it idealized or abject? How do such body doubles intersect with our sense of self, defining or redefining sexual identity, spiritual aspirations, illness and recovery, and the senses themselves, as our window into reality? This course focuses on short stories from the late 19th- and early 20th-century fantastic genre, and science fiction stories from the following turn of the century, 100 years later: in these revealing instances, body doubles often seem to acquire a will of their own, overwhelming normal physical identity.
Same as: FRENCH 372, ITALIAN 272, ITALIAN 372

FRENCH 279. How the French Reinvented Cinema: The New Wave. 3-5 Units.
Focus on the French New Wave's cinematic revolution of 1959-1962. In a few years, the Nouvelle Vague delivered landmark works such as Truffaut's 400 Blows, Godard's Breathless, Chabrol's The Cousins or Resnais' Hiroshima mon amour, and changed forever the way we make and think about movies. Why did these films look so radically fresh? What do they say about France's youth culture in the early 60s? How is the author's theory behind them still influencing us today? Focus is on cultural history, aesthetic analysis, interpretation of narrative, sound and visual forms. Graduate and Junior/Senior level. Taught in English. NOTE: Class meets Thursday 1:30-4:20pm; film screenings Monday 6:00-8:50pm in room 540-108.
Same as: FRENCH 379

FRENCH 281. Women in Africa and the Caribbean: Tales of Agency. 3-5 Units.
This course explores forms of women¿s agency in African and Caribbean cultural productions. Drawing on literature, visual art and feminist theory we will grapple with the concept of agency in different socio-historical and economic contexts while examining texts and films at the intersection of race, gender and agency. In addition to considering the acts of subversion, negotiation, resistance and transgression, throughout the semester, our investigations of gendered agency will pay particular attention to creativity as a tool to challenge power relations specific to each context explored. Topics include race, class, nationalism, métissage, oral tradition, Afro-Caribbean religions, sexuality, marriage, food and the body. Taught in English.

FRENCH 285. Texts and Contexts: French-English Translation. 3-5 Units.
This course introduces students to the ways in which translation has shaped the image of France and the Francophone world. What texts and concepts were translated, how, where, and to what effect? Students will work on a translation project throughout the quarter and translate texts from French to English and English to French. Topics may include the role of translation in the development of cultures; the political dimension of translation, translation in the context of migration, and the socio-cultural frameworks that shape translations. Case studies: Camus, Fanon, Glissant, de Beauvoir, Meddeb, Duras. Prior knowledge of French language required.
Same as: COMPLIT 285, CSRE 285, FRENCH 185

FRENCH 286. Poetry and Philosophy. 2-5 Units.
When and why do philosophers resort to poetry?nWhat is the relationship between poetic metaphor and philosophical argumentation?nWhy is the poetic often associated with empathy - recently touted as an essential human characteristic - whereas philosophy is considered more objective? nWhat is poetry's role in the pursuit of wisdom or the good life?nAuthors include Nietzsche, Heidegger, Bataille, Agamben, Ricoeur, Derrida, Irigaray, Wyschogrod, and Cavarero.
Same as: FRENCH 386, ITALIAN 286, ITALIAN 386

FRENCH 287. Sex, Gender, and Violence: French Women Writers Today. 1-5 Unit.
Long before the 2017 #Metoo campaign, French women writers have explored through powerful fictions and autobiographies the different shades of economic, social, psychological, physical, or sexual violence that is exerted against, but also by and between, women. How does literature - the power of words - address, deconstruct or comfort power dynamics (during sex and between the sexes) that are usually silenced, taboo or unspeakable? Themes explored: sex and gender, sex and power, rape culture, sexual and moral taboos (incest, abortion, pornography, infanticide, lesbianism), the body as social stigma or source of meaning. Special attention given to narrative and descriptive strategies designed to avert, expose, deconstruct or account for specifically feminine experiences (rape, orgasm, pregnancy). Authors include Marie Darrieusecq, Christine Angot, Annie Ernaux, Marie NDiaye, Virginie Despentes, Leila Slimani, Ivan Jablonka along with feminist theory. Taught in French.

FRENCH 290. Magic, Science, and Religion. 3-5 Units.
With the rise of the human sciences in the later nineteenth century, "magic," "science," and "religion" came to be understood as entirely separate domains, with different versions of truth and divergent methods of inquiry. But how has this division broken down in the past 150 years? How is it, for example, that other people's religion is "merely magic"? How does science still draw on religious categories, in particular to claim the universe is meaningful? How have new forms of magic shaped new age, global culture? We will examine these questions by pairing literary texts with readings from anthropology, history of science, religious studies, and cultural criticism. This course is taught in English.
Same as: COMPLIT 290A, COMPLIT 390A, FRENCH 390, ITALIAN 290, ITALIAN 390

FRENCH 292. Romancing the Stone: Crystal Media from Babylon to Superman. 3-5 Units.
This seminar investigates the importance of rock crystal and its imitations as material, medium, and metaphor from antiquity until modernity. The objects examined include rings, reliquaries, lenses, and the Crystal Aesthetic in early twentieth-century architecture and even Superman's Fortress of Solitude. The texts range from Pliny to Arabic Poetry to Romance Literature to modern manifestos.
Same as: ARTHIST 292, ARTHIST 492, FRENCH 392

FRENCH 307A. Proust and His World. 3-5 Units.
This course is a chance to read together Proust's <e>A la recherche du temps perdu</e>. This seven-volume novel is a stylistic tour de force, a brilliant meditation on defining elements of modernity, and an eccentric meander through art, history and the self. We will look closely at Proust's narrative edifice, and its poetic achievements. We will augment our reading of the novel with secondary selections that enable us to explore the many themes and questions raised by the work, ranging from fashion as a serious mode of modern expression to the phenomenology of memory to the decadence of French culture on the eve of the First World War. We'll look at the importance of Proust for structuralist and post-structuralist critics of the 1960s-1980s, whose paradigms continue to resonate today. We'll also consider together the interest and limits of a single-author course, and the value of absorptive, "slow" reading in our multi-tasking era. Supplementary readings might include selections from Charles Baudelaire, John Ruskin, Henri Bergson, Gérard Genette, Gilles Deleuze, Eve Sedgwick, Maurice Samuels, and Caroline Weber. Reading knowledge of French strongly recommended.
Same as: COMPLIT 307

FRENCH 310. French Painting from Watteau to Monet. 3-5 Units.
This course offers a survey of painting in France from 1700 to around 1900. It introduces major artists, artworks, and the concepts used by contemporary observers and later art historians to make sense of this extraordinarily rich period. Overarching themes discussed in the class will include the dueling legacies of coloristic virtuosity and classical formalism, new ways of representing visual perception, the opposing artistic effects of absorption and theatricality, the rise and fall of official arts institutions, and the participation of artists and artworks in political upheaval and social change. The course ends with an interrogation of the concept of modernity and its emergence out of dialogue and conflict with artists of the past. Students will learn and practice formal analysis of paintings, as well as interpretations stressing historical context.
Same as: ARTHIST 110, ARTHIST 310, FRENCH 110

FRENCH 314. Pirandello, Sartre, and Beckett. 3-5 Units.
In this course we will read the main novels and plays of Pirandello, Sartre, and Beckett, with special emphasis on the existentialist themes of their work. Readings include The Late Mattia Pascal, Six Characters in Search of an Author, Henry IV; Nausea, No Exit, "Existentialism is a Humanism"; Molloy, Endgame, Krapp's Last Tape, Waiting for Godot. Taught in English.
Same as: COMPLIT 281E, COMPLIT 381E, FRENCH 214, ITALIAN 214, ITALIAN 314

FRENCH 319. The Renaissance Body in French Literature and Medicine. 3-5 Units.
If the Renaissance is famous for discovering unknown continents and ancient texts the body too was a new territory of conquest. How did literature respond to the rise of an anatomical gaze in the arts and in medicine and how did it stage the aesthetic religious philosophical and moral issues related to such a promotion or deconstruction of the body? Does literature aim at representing the body or does it use it instead as a ubiquitous signifier for intellectual emotional and political ideas? The locus of desire, pleasure and disease, the body also functioned as a reminder of human mortality and was caught in the web of gender issues, religious controversies and new norms of behavior. Texts from prose fiction (Rabelais) poetry (Scève Ronsard Labé D'Aubigné) essays (Montaigne) and emblem literature. Extra documents include music scores tapestries paintings philosophical and anatomical plates from medical treatises. Taught in French.
Same as: FRENCH 219

FRENCH 320. The Posthumanistic Subject. 3-5 Units.
The course will examine the need to rethink the traditional western idea of the strong subject. Through close readings of works by Agamben, Braidotti, Derrida, Deleuze, Hall, Haraway, Latour, Wolfe, among others, this course will explore posthumanist theories of individual and collective subjectivity that challenge traditional ways of defining the human and the non-human subject/person and promote fundamental reconsideration of issues such as agency, autonomy, essence, freedom, dignity, otherness, substance, personhood, sociality, and life itself. The course would consider, how we can empower the subject and community in order to develop a desired model of participatory democracy. Prerequisite: graduate standing or consent of instructor.

FRENCH 321. Giambattista Vico. 1-5 Unit.
An intensive reading of Vico's New Science. Emphasis will be on Vico's philosophy of history and theories of poetic wisdom, myth, and language. Vico will be put in dialogue with René Descartes, Rousseau, Auguste Compte, Claude Lévi Strauss, and Paul Feyerabend, whose ideas about myth and science converge in striking ways with Vico's.
Same as: ITALIAN 321

FRENCH 322. Decadence and Modernism from Mallarmé to Marinetti. 1-2 Unit.
One hundred years ago, artists feared their work was incompatible with modern economic systems, secular bourgeois values, and materialist science. Accused of being decadent, they took up this term of derision and made it into a program of rebellion that has shaped modern art. This course explores decadent rebellion, with an eye toward how the last turn of the century might be similar to our current one. Writers include Huysmans, Poe, Mallarmé, Nietzsche, Nordau, d'Annunzio, Valéry, Ungaretti, Marinetti, and Breton; we will also consider parallels in the visual arts.

FRENCH 327. Genres of the Novel. 5 Units.
Provides students with an overview of some major genres in the history of the modern novel, along with major theorists in the critical understanding of the form. Novels might include works by Cervantes, Defoe, Lafayette, Radcliffe, Goethe, Scott, Balzac, Melville, and Woolf. Theorists might include Lukacs, Bakhtin, Jameson, Gallagher, Barthes, Kristeva, and Bourdieu. *PLEASE NOTE: Course for graduate students only.*.
Same as: COMPLIT 327, ENGLISH 327

FRENCH 329. Rethinking Francophone Literature in the 21st Century. 3-5 Units.
This course is a critical examination of literature from the Francophone world of the 20th and 21st centuries. Students will travel through time and space with a selection of novels, poems, essays, and short stories. In this historical and cultural journey through Sub-Saharan Africa, North Africa, the Caribbean, Canada, Vietnam and Mauritius, our objective will be to provide a reassessment of what Francophone studies mean in the 21st century. Topics discussed in the course will include race and representation, national and cultural identity, immigration and nationalism, transnationalism and diaspora, "littérature-monde," the politics of language, postcolonialism and universalism. Readings will include the works of Dani Laferrière, Bessora, Ken Bugul, Alain Mabanckou, Kim Thúy, Ananda Devi, Abdourahman Waberi, Véronique Tadjo and Abdelkebir Khatibi. Taught in French.
Same as: CSRE 329

FRENCH 330. Giambattista Vico & Claude Lévi-Strauss. 3-5 Units.
An intensive reading of Vico's New Science with special emphasis on Vico's theory of anthropogenesis, myth, and the poetic origins of human consciousness. Vico's thought will be placed in relation to Lévi-Strauss's theories of myth and so-called "primitive thought". Readings include Vico's New Science and Lévi-Strauss's "The Structural Study of Myth", and the first chapters of his book The Savage Mind. Taught in English.
Same as: FRENCH 230, ITALIAN 327

FRENCH 331. The Craft of Confession and Its Cultural Contexts. 5 Units.
Course examines medieval treatises and literature relating to the practice of confession as well as modern examples, with a focus on medieval concern with a sincere and authentic confession in theological, ethical, and aesthetic terms. Study includes expressions of subjectivity, institutional frameworks of confession, and the phenomenon as an instrument for political activity such as crusade. Texts: Augustine¿s Confessions, pastoral treatises, Aquinas, Arthurian romances concerning the grail legend, crusade lyric, and Foucault; films such as Dreyer and martyrdom videos. Taught in French.

FRENCH 336. Casablanca - Algiers - Tunis : Cities on the Edge. 3-5 Units.
Casablanca, Algiers and Tunis embody three territories, real and imaginary, which never cease to challenge the preconceptions of travelers setting sight on their shores. In this class, we will explore the myriad ways in which these cities of North Africa, on the edge of Europe and of Africa, have been narrated in literature, cinema, and popular culture. Home to Muslims, Christians, and Jews, they are an ebullient laboratory of social, political, religious, and cultural issues, global and local, between the nineteenth and twenty-first centuries. We will look at mass images of these cities, from films to maps, novels to photographs, sketching a new vision of these magnets as places where power, social rituals, legacies of the Ottoman and French colonial pasts, and the influence of the global economy collude and collide. Special focus on class, gender, and race.
Same as: AFRICAAM 236B, COMPLIT 236A, CSRE 140S, FRENCH 236, HISTORY 245C, URBANST 140F

FRENCH 339. The Afterlife of the Middle Ages. 3-5 Units.
Literary works that evoke a medieval past in contrast to a historical present, and critical texts that treat aspects of the medieval or medievalism. How does the concept of medievalism emerge and evolve through the ages? Topics include periodization, philology, critical theory, the study of Gothic architecture, and the use of the term medieval in modern political discourse and postcolonial studies. Authors include Burckhardt, Camille, Chateaubriand, Chrétien de Troyes, Didi-Huberman, Jauss, Michelet, Panofsky, Pound, films by Dreyer and Bergman, and contemporary poetry. Taught in English.
Same as: FRENCH 239

FRENCH 340. Paris: Capital of the Modern World. 4-5 Units.
This course explores how Paris, between the eighteenth and twentieth centuries, became the political, cultural, and artistic capital of the modern world. It considers how the city has both shaped and been shaped by the tumultuous events of modern history- class conflict, industrialization, imperialism, war, and occupation. It will also explore why Paris became the major world destination for intellectuals, artists and writers. Sources will include films, paintings, architecture, novels, travel journals, and memoirs. Course taught in English with an optional French section.
Same as: FRENCH 140, HISTORY 230C, URBANST 184

FRENCH 343. In Defense of Poetry. 3-5 Units.
Beginning with the account of the quarrel between philosophy and poetry in Plato's Republic, we will read definitions and defenses of poetry by authors such as Cicero, Horace, Petrarch, Boccaccio, Sidney, Shelley, and Pound, among others. While we will try to historicize these authors' defenses as much as possible, we will also read them from the perspective of contemporary efforts to defend literature and the humanities. Topics of central concern will be the connection between poetry and ethics, the conflict between poetry and the professions of business, law, and medicine, poetry's place in the university, the political role of the poet, questions of poetic language and form, and the relevance of defenses of poetry to literary theory.

FRENCH 346. Body over Mind. 3-5 Units.
How does modern fiction, aided by modern philosophy, give the lie to Descartes' famous "I think therefore I am"? And how does writing convey the desire for a different, perhaps stronger, integration of mind and body? Does the body speak a particular truth that we must learn to hear, that the mind is not always connected to? How do modern metaphors for the mind-body connection shape our experience? These questions will be explored via the works of major French and Italian writers and thinkers, including Pirandello, Calvino, Camus, Houellebecq, Sartre, and Agamben.
Same as: FRENCH 246, ITALIAN 346

FRENCH 349. Love at First Sight: Visual Desire, Attraction, and the Pleasures of Art. 3-5 Units.
Why do dating sites rely on photographs? Why do we believe that love is above all a visual force? How is pleasure, even erotic pleasure, achieved through looking? While the psychology of impressions offers some answers, this course uncovers the ways poets, songwriters, and especially artists have explored myths and promoted ideas about the coupling of love and seeing. Week by week, we will be reflecting on love as political critique, social disruption, and magical force. And we will do so by examining some of the most iconic works of art, from Dante's writings on lovesickness to Caravaggio's Narcissus, studying the ways that objects have shifted from keepsakes to targets of our cares. While exploring the visual roots and evolutions of what has become one of life's fundamental drives, this course offers a passionate survey of European art from Giotto's kiss to Fragonard's swing that elicits stimulating questions about the sensorial nature of desire and the human struggle to control emotions.
Same as: ARTHIST 119, ARTHIST 319, FRENCH 149, ITALIAN 149, ITALIAN 349

FRENCH 350. Season and Off-Season of North-African Cinema and Literature. 3-5 Units.
This course explores the emergence of Francophone cinema and literature from North Africa (Algeria, Tunisia, Morocco) in the post-independence era: aesthetics, language metissage and hybridization, ethnic interactions, gender relations, collective imagination and collective memory, nationalism, popular culture, religion, urbanism, post-colonialism, migration, and the Arab Spring will be covered. Special attention will be given to Moroccan cinema, and to the notions of francophone/maghrebi/"beur"/diasporic cinema and literature. Readings from Franz Fanon, Albert Memmi, Kateb Yacine, Albert Camus, Reda Bensmaia, Assia Djebar, Colette Fellous, Abdelkebir Khatibi, Michel de Certeau, Benjamin Stora, Lucette Valensi, Abdelwahab Meddeb. Movies include Viva Laldjérie, Rome plutot que vous, Les Sabots en or, Les Silence des Palais, Halfaouine, Satin Rouge, Le Chant des Mariées, and Mort à Vendre. Taught in French. Films in French and Arabic with English subtitles.
Same as: FRENCH 150

FRENCH 352. French Painting from the Revolution to Impressionism. 3-5 Units.
This course offers a survey of painting in France from 1700 to around 1900. It introduces major artists, artworks, and the concepts used by contemporary observers and later art historians to make sense of this extraordinarily rich period. Overarching themes discussed in the class will include the dueling legacies of coloristic virtuosity and classical formalism, new ways of representing visual perception, the opposing artistic effects of absorption and theatricality, the rise and fall of official arts institutions, and the participation of artists and artworks in political upheaval and social change. The course ends with an interrogation of the concept of modernity and its emergence out of dialogue and conflict with artists of the past. Students will learn and practice formal analysis of paintings, as well as interpretations stressing historical context.
Same as: FRENCH 152

FRENCH 353. « Liberté, Égalité, Fraternité » : French Political Myths and Concepts. 3-5 Units.
"Liberté, égalité, fraternité," but also "laïcité," "diversité," "parité," "universalisme" : the French have forged over the last two centuries key political concepts that are articulated together in a unique way and shape the political consciousness, modes of engagements, aspirations and current debates of what has been called "the most political nation in the world." Along with mythologies such as the People, the Nation, the providential Leader, or the "enemy from within," they are at the centre of semantic and political battles, tugged over by the Left, the Right, populist movements, activists and counter-cultures. How did they emerge? How do they apply today? How does theory compare to practices, principles to day-to-day realities? An introduction through case-studies, films, paintings, cartoons, and texts from political theory, history, politics and literature. Taught in English.
Same as: FRENCH 153

FRENCH 357. Simone Weil, Simone de Beauvoir, Hannah Arendt, and Adriana Cavarero. 3-5 Units.
What does it mean to say the personal is the political, or, in the case of Arendt, that the personal is not political, especially if you are a woman? This course explores how Weil, De Beauvoir, Arendt, and Caverero contend with the question of personhood, in its variegated social, political, ethical, and gendered dimensions. Particular attention will be given to a philosophy of social change and personal transformation, and to the enduring relevance of these women's thought to issues of our day. Texts include selections from "Gravity and Grace," "The Second Sex," "The Ethics of Ambiguity," "The Human Condition," "Between Past and Future," "Stately Bodies," and "Relating Narratives.".

FRENCH 361. War and Peace: Writings by and about Veterans in the 20th and 21st Centuries. 2-5 Units.
Since the aftermath of World War One, and with increasing urgency in contemporary America, stories about and by veterans are assigned a double role: that of exposing the horror of war yet also defending the possibility of a just war, and that of healing both veterans themselves and the society they return to. Key questions for this course are: Given the current practice of using writing and the hero¿s journey as a model for healing veterans and making their voices heard in our culture, can we look back to post-World-War-One culture and see if writing fulfills a similar function? And given how many post-World-War-One veterans became famous writers, how do we assess the interplay between literature, poetry, memoir, journalism, personal letters, photo accounts? Is there a connection between artistic innovation and the capacity to heal?.
Same as: FRENCH 261, ITALIAN 261, ITALIAN 361

FRENCH 362. Symbolism in Literature and the Arts. 3-5 Units.
This course will deal with the some of the 19th and 20th century authors and artists associated with Symbolism. We will focus on some key theoretical essays about the symbol, as well as on symbolist poetry, novels, visual arts, cinema, and music. In reading authors such as Coleridge, Blake, Poe, Baudelaire, Rimbaud, Verlaine, Mallarmé, Valéry, Pascoli, Campana, d¿Annunzio, and Savinio, we will explore the nature and uses of the symbol in art.
Same as: FRENCH 262, ITALIAN 262, ITALIAN 362

FRENCH 365. The Problem of Evil in Philosophy, Literature, and Film. 5 Units.
This workshop will explore how the existence of evil in the world has been perceived, felt, analyzed, conceptualized, and dealt with over time, from the 1755 Lisbon earthquake and tsunami to our post-Auschwitz, post-Hiroshima era. We'll take it for granted that "the problem of evil is the guiding force of modern thought" (Susan Neiman, Evil in Modern Thought.) We'll ask why this is apparently no longer the case. Such philosophers as Rousseau, Voltaire, Diderot, Leibniz, Kant, Heidegger, Hannah Arendt, Günther Anders, Hans Jonas and Ivan Illich will be our guides. One could argue, however, that theology, metaphysics or moral philosophy are not up to the task of making sense of evil if they are not aided by literature and, today, film. Fiction can often articulate ideas that escape the grasp of philosophy. NOTE: Enrollment is capped and limited to graduate students: To be considered for enrollment in this course, please submit by March 13, 2020 a letter of motivation fleshing out the state of your own research or reflections in this domain. This letter should be sent to the instructor at jpdupuy@stanford.edu.

FRENCH 366. Food, Text, Music: A Multidisciplinary Lab on the Art of Feasting. 3-5 Units.
Students cook a collection of unfamiliar recipes each week while learning about the cultural milieus in which they originated. The course focuses on the fourteenth and fifteenth centuries, a time of great banquets that brought together chefs, visual artists, poets, musicians, and dancers. Students read late-medieval cookbooks under the guidance of professional chefs, learn songs and poetry with the help of visiting performers, and delve into a burgeoning scholarly literature on food history and sensory experience. We will also study trade routes and food networks, the environmental impact of large-scale banquets, the science of food, and the politics of plenty. This course may count towards the Medieval component of the French major, and corresponds to DLCL 121, a course requirement for the Medieval Studies Minor. Students interested in applying for course must email the professor (jrodin@stanford.edu) by 20 September with a statement of up to 350 words that includes: (a) reasons for wanting to take the class; (b) relevant background in cooking/medieval studies/etc.; (c) stated commitment to attend all ten course meetings; and (d) any dietary restrictions/preferences.
Same as: FRENCH 166, FRENCH 266, MUSIC 133, MUSIC 333

FRENCH 368A. Imagining the Oceans. 5 Units.
How has Western culture constructed the world's oceans since the beginning of global ocean exploration? How have imaginative visions of the ocean been shaped by marine science, technology, exploration, commerce and leisure? Primary authors read might include Cook, Banks, Equiano, Ricketts, and Steinbeck; Defoe, Cooper, Verne, Conrad, Woolf and Hemingway; Coleridge, Baudelaire, Moore, Bishop and Walcott. Critical readings include Schmitt, Rediker and Linebaugh, Baucom, Best, Corbin, Auden, Sontag and Heller-Roazen. Films by Sekula, Painlevé and Bigelow. Seminar coordinated with a 2015 Cantor Arts Center public exhibition. Visits to the Cantor; other possible field trips include Hopkins Marine Station and SF Maritime Historical Park. Open to graduate students only.
Same as: COMPLIT 368A, ENGLISH 368A

FRENCH 369. Introduction to the Profession of Literary Studies. 1-2 Unit.
A survey of how literary theory and other methods have been made institutional since the nineteenth century. The readings and conversation are designed for entering Ph.D. students in the national literature departments and comparative literature.
Same as: COMPLIT 369, DLCL 369, GERMAN 369, ITALIAN 369

FRENCH 372. Body Doubles: From the Fantastic Short Story to Science-Fiction. 2-5 Units.
How do we imagine our bodies through language, at times almost completely refashioning a physical double, be it idealized or abject? How do such body doubles intersect with our sense of self, defining or redefining sexual identity, spiritual aspirations, illness and recovery, and the senses themselves, as our window into reality? This course focuses on short stories from the late 19th- and early 20th-century fantastic genre, and science fiction stories from the following turn of the century, 100 years later. in these revealing instances, body doubles often seem to acquire a will of their own, overwhelming normal physical identity.
Same as: FRENCH 272, ITALIAN 272, ITALIAN 372

FRENCH 377. Medieval Lyric: How Lyric Moves. 3-5 Units.
Through the study of various vernacular premodern traditions, this graduate level course examines the qualities that make texts "lyric" and place them into conversation with contemporary theories of lyric. The course will situate medieval lyric within the critical discourse of poetics, the Global South, the archive, and anachrony. We will consider the movement of verse within and among various material contexts (song, manuscript, artworks, objects, tombstones). Poets considered: troubadours, trouvères, Galician-Portugese cantigas d'amigo, Stilnovists, Dante, Petrarchan poetry, Jean Renart, Charles d'Orléans, Villon, Pound, Brazilian Concrete Poetry.
Same as: COMPLIT 377, ITALIAN 377

FRENCH 379. How the French Reinvented Cinema: The New Wave. 3-5 Units.
Focus on the French New Wave's cinematic revolution of 1959-1962. In a few years, the Nouvelle Vague delivered landmark works such as Truffaut's 400 Blows, Godard's Breathless, Chabrol's The Cousins or Resnais' Hiroshima mon amour, and changed forever the way we make and think about movies. Why did these films look so radically fresh? What do they say about France's youth culture in the early 60s? How is the author's theory behind them still influencing us today? Focus is on cultural history, aesthetic analysis, interpretation of narrative, sound and visual forms. Graduate and Junior/Senior level. Taught in English. NOTE: Class meets Thursday 1:30-4:20pm; film screenings Monday 6:00-8:50pm in room 540-108.
Same as: FRENCH 279

FRENCH 380. Critical Poetics. 3-5 Units.
After recent critiques of "close" methods of literary criticism and reading practices, what claims can we make today about the literary object? Can we ever return to broad and general categories of poetics that were formulated by the major syncretic works of twentieth-century literary criticism by figures such as Auerbach, Curtius, and Frye? This course will discuss recent debates around literariness and concepts of poetics that move past a hermeneutic of suspicion and embrace the productive energies of form and affect produced by literary texts, including new methods of data analysis and concepts of genres in historical time.

FRENCH 386. Poetry and Philosophy. 2-5 Units.
When and why do philosophers resort to poetry?nWhat is the relationship between poetic metaphor and philosophical argumentation?nWhy is the poetic often associated with empathy - recently touted as an essential human characteristic - whereas philosophy is considered more objective? nWhat is poetry's role in the pursuit of wisdom or the good life?nAuthors include Nietzsche, Heidegger, Bataille, Agamben, Ricoeur, Derrida, Irigaray, Wyschogrod, and Cavarero.
Same as: FRENCH 286, ITALIAN 286, ITALIAN 386

FRENCH 387. Sex, Gender, and Violence: French Women Writers Today. 1-5 Unit.
Long before the 2017 #Metoo campaign, French women writers have explored through powerful fictions and autobiographies the different shades of economic, social, psychological, physical, or sexual violence that is exerted against, but also by and between, women. How does literature - the power of words - address, deconstruct or comfort power dynamics (during sex and between the sexes) that are usually silenced, taboo or unspeakable? Themes explored: sex and gender, sex and power, rape culture, sexual and moral taboos (incest, abortion, pornography, infanticide, lesbianism), the body as social stigma or source of meaning. Special attention given to narrative and descriptive strategies designed to avert, expose, deconstruct or account for specifically feminine experiences (rape, orgasm, pregnancy). Authors include Marie Darrieusecq, Christine Angot, Annie Ernaux, Marie NDiaye, Virginie Despentes, Leila Slimani, Ivan Jablonka along with feminist theory. Taught in French.
Same as: FEMGEN 187X, FEMGEN 287X, FEMGEN 387X, FRENCH 187, FRENCH 287

FRENCH 390. Magic, Science, and Religion. 3-5 Units.
With the rise of the human sciences in the later nineteenth century, "magic," "science," and "religion" came to be understood as entirely separate domains, with different versions of truth and divergent methods of inquiry. But how has this division broken down in the past 150 years? How is it, for example, that other people's religion is "merely magic"? How does science still draw on religious categories, in particular to claim the universe is meaningful? How have new forms of magic shaped new age, global culture? We will examine these questions by pairing literary texts with readings from anthropology, history of science, religious studies, and cultural criticism. This course is taught in English.
Same as: COMPLIT 290A, COMPLIT 390A, FRENCH 290, ITALIAN 290, ITALIAN 390

FRENCH 392. Romancing the Stone: Crystal Media from Babylon to Superman. 3-5 Units.
This seminar investigates the importance of rock crystal and its imitations as material, medium, and metaphor from antiquity until modernity. The objects examined include rings, reliquaries, lenses, and the Crystal Aesthetic in early twentieth-century architecture and even Superman's Fortress of Solitude. The texts range from Pliny to Arabic Poetry to Romance Literature to modern manifestos.
Same as: ARTHIST 292, ARTHIST 492, FRENCH 292

FRENCH 395. Philosophical Reading Group. 1 Unit.
Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with Professor Robert Harrison is required. May be repeated for credit. Taught in English.
Same as: COMPLIT 359A, ITALIAN 395

FRENCH 398. Intensive Reading in French/Italian. 10 Units.
Enrollment is limited to French/Italian Ph.D. students. Course is designed for French/Italian Ph.D. students to prepare for department milestone exams.
Same as: ITALIAN 398

Italian Courses

ITALIAN 75N. Narrative Medicine and Near-Death Experiences. 3 Units.
Even if many of us don't fully believe in an afterlife, we remain fascinated by visions of it. This course focuses on Near-Death Experiences and the stories around them, investigating them from the many perspectives pertinent to the growing field of narrative medicine: medical, neurological, cognitive, psychological, sociological, literary, and filmic. The goal is not to understand whether the stories are veridical but what they do for us, as individuals, and as a culture, and in particular how they seek to reshape the patient-doctor relationship. Materials will span the 20th century and come into the present. Taught in English.
Same as: FRENCH 75N

ITALIAN 101. Italy: The Good, the Bad and the Ugly. 3 Units.
Renowned for its rich cultural tradition, Italy is also one of the most problematic nations in Europe. This course explores the contradictions at the heart of Italy by examining how art and literature provide a unique perspective onto modern Italian history. We will focus on key phenomena that contribute both positively and negatively to the complex "spirit" of Italy, such as the presence of the past, political realism and idealism, revolution, corruption, decadence, war, immigration, and crises of all kinds. Through the study of historical and literary texts, films, and news media, the course seeks to understand Italy's current place in Europe and its future trajectory by looking to its past as a point of comparison. Taught in English.

ITALIAN 115. Virtual Italy: Methods for Historical Data Science. 4-5 Units.
Classical Italy attracted thousands of travelers throughout the 1700s. Referring to their journey as the "Grand Tour," travelers pursued intellectual passions, promoted careers, and satisfied wanderlust, all while collecting antiquities to fill museums and estates back home. What can computational approaches tell us about who traveled, where and why? We will read travel accounts; experiment with parsing; and visualize historical data. Final projects to form credited contributions to the Grand Tour Project, a cutting-edge digital platform. No prior programming experience necessary.
Same as: CLASSICS 115, ENGLISH 115, HISTORY 238C

ITALIAN 127. Inventing Italian Literature: Dante, Boccaccio, Petrarca. 4 Units.
This course examines the origins of Italian literature in the late Middle Ages. We will read selections from Dante's Vita Nuova and Inferno; Petrarca's Canzoniere; and Boccaccio's Decameron. Taught in Italian.
Recommended: ITALLANG 22A or equivalent level of proficiency.

ITALIAN 128. The Italian Renaissance and the Path to Modernity. 4 Units.
Are humans free and self-determining agents possessed of infinite potential or limited beings subject to the vagaries of fortune? What is the relationship between love and beauty? Is it better for a leader to inspire love or fear? These are the kind of questions Renaissance thinkers asked and we will pursue in our study of the literature, art, and history of Italy from the fifteenth through the eighteenth centuries. In this course, you will become acquainted with major writers, thinkers, and artists, and key ideas, innovations, and movements. Examining masterpieces of literature (poetry and prose), art (painting, drawing and sculpture), theater and music, including works of the High Renaissance, we will explore such topics as love, power, faith, reason, and contingency in human affairs. With the themes of discovery, invention and adaption as our guide, we will reflect on perennial tensions between imitation and inspiration, tradition and innovation, and conformity and transgression in Renaissance and early modern Italy. Taught in Italian. Recommended: ITALLANG 22A or equivalent (2 years of Italian). This course fulfills the Writing in the Major (WIM) requirement.

ITALIAN 129. 19th and 20th Century Literature and Culture: Constructing and Re-Constructing Italy. 4 Units.
This course will explore 19th and 20th century Italian history through a literary and cinematic lens. The Italian Risorgimento and unification in the mid-19th century opened a series of debates that resonated throughout the 20th century and its political and social turns: by looking at several works of literature, essays, films, and visual art, students will reflect on the cultural, historical, political, and social dynamics that shaped the Belpaese throughout the past two centuries. The construction of modern Italy will be analyzed as both an ideological and aesthetic process, to provide students with a grasp of how Italian-ness has been shaped from the 19th century to today. This course is both an introduction to modern Italian literature and culture, and a continuation of the study of the Italian language. All class discussion, reading, and writing will be in Italian. Recommended: ITALLANG 22A or equivalent.

ITALIAN 138. The Politics of Love in 20th-Century Italy. 3-5 Units.
Italy is often associated with love and passion, both in its literary and cinematic representations as well as in the tourism industry, promising visitors unprecedented opportunities for romance and excitement.nHow has this conception of Italy emerged and developed? Does it still hold us captive today? How has the idea of a "romantic Italy" shifted over the years, as Italian society itself has undergone significant transformations? nWe will explore these questions through literature (both poetry and prose), philosophy, history, and film. Topics will include sexuality, love, gender, marriage, and divorce, and the way they have been debated in modern Italian society and politics. The course will be taught in English and the materials will be discussed in translation.

ITALIAN 142. The Good Life: Renaissance Perspectives on Perennial Questions. 3-5 Units.
What constitutes a good life? What conditions and relationships enable one to live well, and what attitudes and activities, systems and structures bring them about or make them possible? Renaissance men and women asked such questions, turning to study of the classical past and to close observation of their contemporary world in search of satisfying answers. This course will explore their reflections and investigations, experimentations and creations, examining seminal conceptions and ideals of the Renaissance through their expression in text and image. Topics will include beauty and love; virtue and honor; excellence and exceptionalism; freedom and justice; power and authority; leadership and governance; wealth and prosperity; work and service; education and religion; health and medicine; family, friendship and community. Focusing on Italian contexts with reference to broader European and global trends, discussion and analysis will center on discrepancies between the real and the ideal in Renaissance society and culture. Taught in English. NOTE: New Italian Studies Assistant Professor Sarah Prodan will teach this course.

ITALIAN 148. Cinema and the Real: Italian Neo-Realism and the French New Wave. 3-5 Units.
Between the 1940s and 1960s, in Italy and France, a handful of movie directors revolutionized the art of cinema. In the wake of World War II they entirely re-defined the aesthetics of the 7th art in films such as "Bicycle Thieves," "400 Blows," "Rome Open City," and "Breathless." These works shared an aesthetic and a philosophy of "the real" - they eschewed big studios and sets in favor of natural light, on-location shooting, and non-professional actors to capture the present moment. This survey course will explore how the dialogue between Italian neo-realism and the French New Wave has yielded some of the most revolutionary filmic masterpieces of both traditions, while raising theoretical and philosophical questions about form, time, space, fiction, representation, and reality. Films: Roberto Rossellini, Vittorio de Sica, Luchino Visconti, Federico Fellini, François Truffaut, Jean-Luc Godard, Alain Resnais and Agnès Varda.

ITALIAN 149. Love at First Sight: Visual Desire, Attraction, and the Pleasures of Art. 3-5 Units.
Why do dating sites rely on photographs? Why do we believe that love is above all a visual force? How is pleasure, even erotic pleasure, achieved through looking? While the psychology of impressions offers some answers, this course uncovers the ways poets, songwriters, and especially artists have explored myths and promoted ideas about the coupling of love and seeing. Week by week, we will be reflecting on love as political critique, social disruption, and magical force. And we will do so by examining some of the most iconic works of art, from Dante's writings on lovesickness to Caravaggio's Narcissus, studying the ways that objects have shifted from keepsakes to targets of our cares. While exploring the visual roots and evolutions of what has become one of life's fundamental drives, this course offers a passionate survey of European art from Giotto's kiss to Fragonard's swing that elicits stimulating questions about the sensorial nature of desire and the human struggle to control emotions.

ITALIAN 152. Boccaccio's Decameron: The Ethics of Storytelling. 3-5 Units.
This course involves an in-depth study of Boccaccio's Decameron in the context of medieval theories of poetry and interpretation. The goal is to understand more fully the relationship between literature and lived experience implied by Boccaccio's fictions. We will address key critical issues and theoretical approaches related to the text. Taught in English translation, there will be an optional supplementary Italian discussion section during weeks 2-9.
Same as: ITALIAN 352

ITALIAN 154. Film & Philosophy. 3 Units.
Issues of authenticity, morality, personal identity, and the value of truth explored through film; philosophical investigation of the filmic medium itself. Screenings to include Blade Runner (Scott), Do The Right Thing (Lee), The Seventh Seal (Bergman), Fight Club (Fincher), La Jetée (Marker), Memento (Nolan), and Eternal Sunshine of the Spotless Mind (Kaufman). Taught in English.
Same as: COMPLIT 154A, ENGLISH 154F, FRENCH 154, PHIL 193C, PHIL 293C

ITALIAN 154E. Film & Philosophy CE. 3 Units.
Issues of authenticity, morality, personal identity, and the value of truth explored through film; philosophical investigation of the filmic medium itself. Screenings to include Blade Runner (Scott), Do The Right Thing (Lee), The Seventh Seal (Bergman), Fight Club (Fincher), La Jetée (Marker), Memento (Nolan), and Eternal Sunshine of the Spotless Mind (Kaufman). Taught in English. Satisfies the WAY CE.

ITALIAN 155. The Mafia in Society, Film, and Fiction. 4 Units.
The mafia has become a global problem through its infiltration of international business, and its model of organized crime has spread all over the world from its origins in Sicily. At the same time, film and fiction remain fascinated by a romantic, heroic vision of the mafia. Compares both Italian and American fantasies of the Mafia to its history and impact on Italian and global culture. Taught in English.
Same as: COMPLIT 155A

ITALIAN 175. CAPITALS: How Cities Shape Cultures, States, and People. 3-5 Units.
This course takes students on a trip to major capital cities, at different moments in time: Renaissance Florence, Golden Age Madrid, Colonial Mexico City, Enlightenment and Romantic Paris, Existential and Revolutionary St. Petersburg, Roaring Berlin, Modernist Vienna, and bustling Buenos Aires. While exploring each place in a particular historical moment, we will also consider the relations between culture, power, and social life. How does the cultural life of a country intersect with the political activity of a capital? How do large cities shape our everyday experience, our aesthetic preferences, and our sense of history? Why do some cities become cultural capitals? Primary materials for this course will consist of literary, visual, sociological, and historical documents (in translation); authors we will read include Boccaccio, Dante, Sor Juana, Montesquieu, Baudelaire, Gogol, Irmgard Keun, Freud, and Borges. Note: To be eligible for WAYS credit, you must take the course for a Letter Grade.
Same as: COMPLIT 100, DLCL 100, FRENCH 175, GERMAN 175, HISTORY 206E, ILAC 175, URBANST 153

ITALIAN 181. Philosophy and Literature. 3-5 Units.
What, if anything, does reading literature do for our lives? What can literature offer that other forms of writing cannot? Can fictions teach us anything? Can they make people more moral? Why do we take pleasure in tragic stories? This course introduces students to major problems at the intersection of philosophy and literature. It addresses key questions about the value of literature, philosophical puzzles about the nature of fiction and literary language, and ways that philosophy and literature interact. Readings span literature, film, and philosophical theories of art. Authors may include Sophocles, Dickinson, Toni Morrison, Proust, Woolf, Walton, Nietzsche, and Sartre. Students master close reading techniques and philosophical analysis, and write papers combining the two. This is the required gateway course for the Philosophy and Literature major tracks. Majors should register in their home department.
Same as: CLASSICS 42, COMPLIT 181, ENGLISH 81, FRENCH 181, GERMAN 181, ILAC 181, PHIL 81, SLAVIC 181

ITALIAN 190. The Celluloid Gaze: Gender, Identity and Sexuality in Cinema. 4 Units.
This course examines femininity and gender representation in cinema. The rich tradition of film theory, from the key semiotic approaches of the 1970s-1990s until the current and equally influential methodologies, will provide the framework for an informed analysis of the films. Topics: the question of the gaze, the power of looking, of being looked at, and of looking back; women as disruption in the patriarchal/cultural text; maternity both as a sign of normalcy as well as a locus for obsession and manic concerns; the woman¿s body as a place of illness and sexuality. Our main object of investigation will be Italian cinema but we will also analyze a few Hollywood films which have inspired much feminist debate; we will focus as well on recent cinematic re-conceptualizations of gender and sexuality. Students will become familiar with key theoretical concepts such as the gaze, desire, intersectionality, masochism and masquerade, as well as modes of feminist resistance to traditional gender hierarchies. Taught in English.

ITALIAN 199. Individual Work. 1-12 Unit.
.

ITALIAN 200. Italian Modernities: Lecture Series and Course. 1-2 Unit.
Over the course of the whole year, we will invite 6 speakers to present work on modern Italian culture and literature; these sessions will be supplemented by seminar meetings in which we discuss the work of our guests and prepare writing projects that relate to them. May be repeated for credit.
Same as: ITALIAN 300

ITALIAN 206. Dante and the Romantics. 5 Units.
Dante Alighieri has profoundly influenced literary tradition. The Romantic poets admired Dante¿s capacity to find spiritual redemption in moments of personal crisis, melancholy, and alienation. They drew inspiration from his protomodern blend of lyric and epic, of romance and dream vision, and of allegorical pilgrimage and spiritual autobiography. Prophetic poets like P.B. Shelley and John Keats turned to Dante in their dying attempts at epic. William Blake illustrated The Divine Comedy and adapted the Dantean style of visionary world-making in his own illuminated poetry. T.S. Eliot (a belated Romantic in poems like ¿The Love Song of J. Alfred Prufrock¿) used Dante¿s technique of the dramatic monologue as a vehicle to explore character. This course will focus on The Inferno and its lasting legacy on the poetry of modernity.
Same as: ENGLISH 206

ITALIAN 214. Pirandello, Sartre, and Beckett. 3-5 Units.
In this course we will read the main novels and plays of Pirandello, Sartre, and Beckett, with special emphasis on the existentialist themes of their work. Readings include The Late Mattia Pascal, Six Characters in Search of an Author, Henry IV; Nausea, No Exit, "Existentialism is a Humanism"; Molloy, Endgame, Krapp's Last Tape, Waiting for Godot. Taught in English.
Same as: COMPLIT 281E, COMPLIT 381E, FRENCH 214, FRENCH 314, ITALIAN 314

ITALIAN 216. Michelangelo Architect. 5 Units.
The architecture of Michelangelo Buonarroti (1475-1564), "Father and Master of all the Arts," redefined the possibilities of architectural expression for generations. This course considers his civic, ecclesiastic, and palatial works. It proceeds from his beginnings in Medicean Florence to his fulfillment in Papal Rome. It examines the anxiety of influence following his death and his enduring legacy in modernism. Topics include: Michelangelo's debt to Classical and Early Renaissance prototypes; his transformation of the canon; the iterative sketch as disegno; architecture and the body; the queering of architectural language; sketch, scale, and materiality; Modernism and Michelangelo. The historiography of Michelangelo has predominantly favored studies in painting and sculpture. Our focus on architecture encourages students to test new ideas and alternative approaches to his work.

ITALIAN 228. Science, technology and society and the humanities in the face of the looming disaster. 3-5 Units.
How STS and the Humanities can together help think out the looming catastrophes that put the future of humankind in jeopardy.
Same as: FRENCH 228, POLISCI 233F

ITALIAN 232B. Heretics, Prostitutes and Merchants: The Venetian Empire. 5 Units.
Between 1200-1600, Venice created a powerful empire at the boundary between East and West that controlled much of the Mediterranean, with a merchant society that allowed social groups, religions, and ethnicities to coexist. Topics include the features of Venetian society, the relationship between center and periphery, order and disorder, orthodoxy and heresy, the role of politics, art, and culture in the Venetian Renaissance, and the empire's decline as a political power and reinvention as a tourist site and living museum.
Same as: HISTORY 232B

ITALIAN 233. When Worlds Collide: The Trial of Galileo. 4-5 Units.
In 1633, the Italian mathematician Galileo was tried and condemned for advocating that the sun, not the earth, was the center of the cosmos. The Catholic Church did not formally admit that Galileo was right until 1992. Examines the many factors that led to the trial of Galileo and looks at multiple perspectives on this signal event in the history of science and religion. Considers the nature and definition of intellectual heresy in the sixteenth and early seventeenth centuries, and examines the writings of Galileo's infamous predecessor Giordano Bruno (burned at the stake in 1600). Looks closely at documents surrounding the trial and related literature on Renaissance and Reformation Italy in order to understand the perspectives of various participants in this famous event. Focal point of seminar involves the examination of the many different histories that can be produced from Galileo's trial. What, in the end, were the crimes of Galileo?.
Same as: HISTORY 235D, HISTORY 335D, ITALIAN 333

ITALIAN 237. Michelangelo: Gateway to Early Modern Italy. 3-5 Units.
Revered as one of the greatest artists in history, Michelangelo Buonarroti's extraordinarily long and prodigious existence (1475-1564) spanned the Renaissance and the Reformation in Italy. The celebrity artist left behind not only sculptures, paintings, drawings, and architectural designs, but also an abundantly rich and heterogeneous collection of artifacts, including direct and indirect correspondence (approximately 1400 letters), an eclectic assortment of personal notes, documents and contracts, and 302 poems and 41 poetic fragments. This course will explore the life and production of Michelangelo in relation to those of his contemporaries. Using the biography of the artist as a thread, this interdisciplinary course will draw on a range of critical methodologies and approaches to investigate the civilization and culture of Italy in the fifteenth and sixteenth centuries. Course themes will follow key tensions that defined the period and that found expression in Michelangelo: physical-spiritual, classical-Christian, tradition-innovation, individual-collective.

ITALIAN 240. Great Minds of the Italian Renaissance and their World. 3-5 Units.
What enabled Leonardo da Vinci to excel in over a dozen fields from painting to engineering and to anticipate flight four hundred years before the first aircraft took off? How did Michelangelo paint the Sistine Chapel Ceiling? What forces and insights led Machiavelli to write "The Prince"? An historical moment and a cultural era, the Italian Renaissance famously saw monumental achievements in literature, art, and architecture, influential developments in science and technology, and the flourishing of multi-talented individuals who contributed profoundly, expertly, and simultaneously to very different fields. In this course on the great thinkers, writers, and achievers of the Italian Renaissance, we will study these ¿universal geniuses¿ and their world. Investigating the writings, thought, and lives of such figures as Leonardo da Vinci, Niccolò Machiavelli, and Galileo Galilei, we will interrogate historical and contemporary ideas concerning genius, creativity, and the phenomenon of ¿Renaissance man¿ known as polymathy. Taught in English.

ITALIAN 257. Simone Weil, Simone de Beauvoir, Hannah Arendt, and Adriana Cavarero. 3-5 Units.
What does it mean to say the personal is the political, or, in the case of Arendt, that the personal is not political, especially if you are a woman? This course explores how Weil, De Beauvoir, Arendt, and Caverero contend with the question of personhood, in its variegated social, political, ethical, and gendered dimensions. Particular attention will be given to a philosophy of social change and personal transformation, and to the enduring relevance of these women's thought to issues of our day. Texts include selections from "Gravity and Grace," "The Second Sex," "The Ethics of Ambiguity," "The Human Condition," "Between Past and Future," "Stately Bodies," and "Relating Narratives.".

ITALIAN 261. War and Peace: Writings by and about Veterans in the 20th and 21st Centuries. 2-5 Units.
Since the aftermath of World War One, and with increasing urgency in contemporary America, stories about and by veterans are assigned a double role: that of exposing the horror of war yet also defending the possibility of a just war, and that of healing both veterans themselves and the society they return to. Key questions for this course are: Given the current practice of using writing and the hero¿s journey as a model for healing veterans and making their voices heard in our culture, can we look back to post-World-War-One culture and see if writing fulfills a similar function? And given how many post-World-War-One veterans became famous writers, how do we assess the interplay between literature, poetry, memoir, journalism, personal letters, photo accounts? Is there a connection between artistic innovation and the capacity to heal?.
Same as: FRENCH 261, FRENCH 361, ITALIAN 361

ITALIAN 262. Symbolism in Literature and the Arts. 3-5 Units.
This course will deal with the some of the 19th and 20th century authors and artists associated with Symbolism. We will focus on some key theoretical essays about the symbol, as well as on symbolist poetry, novels, visual arts, cinema, and music. In reading authors such as Coleridge, Blake, Poe, Baudelaire, Rimbaud, Verlaine, Mallarmé, Valéry, Pascoli, Campana, d¿Annunzio, and Savinio, we will explore the nature and uses of the symbol in art.
Same as: FRENCH 262, FRENCH 362, ITALIAN 362

ITALIAN 265. Word and Image. 3-5 Units.
What impact do images have on our reading of a text? How do words influence our understanding of images or our reading of pictures? What makes a visual interpretation of written words or a verbal rendering of an image successful? These questions will guide our investigation of the manifold connections between words and images in this course on intermediality and the relations and interrelations between writing and art from classical antiquity to the present. Readings and discussions will include such topics as the life and afterlife in word and image of Ovid's "Metamorphoses," Dante's "Divine Comedy," Ludovico Ariosto's "Orlando Furioso," and John Milton's "Paradise Lost;" the writings and creative production of poet-artists Michelangelo Buonarroti, William Blake, and Dante Gabriel Rossetti; innovations in and correspondences between literature and art in the modern period, from symbolism in the nineteenth century through the flourishing of European avant-garde movements in the twentieth century.
Same as: ARTHIST 265A, ARTHIST 465A, COMPLIT 225, ITALIAN 365

ITALIAN 272. Body Doubles: From the Fantastic Short Story to Science-Fiction. 2-5 Units.
How do we imagine our bodies through language, at times almost completely refashioning a physical double, be it idealized or abject? How do such body doubles intersect with our sense of self, defining or redefining sexual identity, spiritual aspirations, illness and recovery, and the senses themselves, as our window into reality? This course focuses on short stories from the late 19th- and early 20th-century fantastic genre, and science fiction stories from the following turn of the century, 100 years later: in these revealing instances, body doubles often seem to acquire a will of their own, overwhelming normal physical identity.
Same as: FRENCH 272, FRENCH 372, ITALIAN 372

ITALIAN 286. Poetry and Philosophy. 2-5 Units.
When and why do philosophers resort to poetry?nWhat is the relationship between poetic metaphor and philosophical argumentation?nWhy is the poetic often associated with empathy - recently touted as an essential human characteristic - whereas philosophy is considered more objective? nWhat is poetry's role in the pursuit of wisdom or the good life?nAuthors include Nietzsche, Heidegger, Bataille, Agamben, Ricoeur, Derrida, Irigaray, Wyschogrod, and Cavarero.
Same as: FRENCH 286, FRENCH 386, ITALIAN 386

ITALIAN 290. Magic, Science, and Religion. 3-5 Units.
With the rise of the human sciences in the later nineteenth century, "magic," "science," and "religion" came to be understood as entirely separate domains, with different versions of truth and divergent methods of inquiry. But how has this division broken down in the past 150 years? How is it, for example, that other people's religion is "merely magic"? How does science still draw on religious categories, in particular to claim the universe is meaningful? How have new forms of magic shaped new age, global culture? We will examine these questions by pairing literary texts with readings from anthropology, history of science, religious studies, and cultural criticism. This course is taught in English.
Same as: COMPLIT 290A, COMPLIT 390A, FRENCH 290, FRENCH 390, ITALIAN 390

ITALIAN 300. Italian Modernities: Lecture Series and Course. 1-2 Unit.
Over the course of the whole year, we will invite 6 speakers to present work on modern Italian culture and literature; these sessions will be supplemented by seminar meetings in which we discuss the work of our guests and prepare writing projects that relate to them. May be repeated for credit.
Same as: ITALIAN 200

ITALIAN 312. Feminist Activists. 3-5 Units.
Is it true that European, and Italian, feminism is more cultural and artistic, whereas American feminists foreground political and economic issues? How can we understand the connections and disjunctions between activism and literature in both contexts, and in the history of feminism from the early twentieth centuty to the present? How do these different strands of feminism come together today in global thinking? We will read both feminist fiction and theory to discuss these questions; authors include Aleramo, Woolf, Banti, McCarthy, Bulter, and Cavarero.

ITALIAN 314. Pirandello, Sartre, and Beckett. 3-5 Units.
In this course we will read the main novels and plays of Pirandello, Sartre, and Beckett, with special emphasis on the existentialist themes of their work. Readings include The Late Mattia Pascal, Six Characters in Search of an Author, Henry IV; Nausea, No Exit, "Existentialism is a Humanism"; Molloy, Endgame, Krapp's Last Tape, Waiting for Godot. Taught in English.

ITALIAN 321. Giambattista Vico. 1-5 Unit.
An intensive reading of Vico's New Science. Emphasis will be on Vico's philosophy of history and theories of poetic wisdom, myth, and language. Vico will be put in dialogue with René Descartes, Rousseau, Auguste Compte, Claude Lévi Strauss, and Paul Feyerabend, whose ideas about myth and science converge in striking ways with Vico's.
Same as: FRENCH 321

ITALIAN 325. Petrarch & Petrarchism: Fragments of the Self. 3-5 Units.
In this course we will examine Francis Petrarch's book of Italian lyric poems, Rerum vulgarium fragmenta, and its reception in early modern France, England, and Spain. Readings from Petrarch's epistolary and ethical writings will contextualize historically and intellectually the aesthetics and ethics of the fragment in his poetry. With this foundation, we will investigate the long-lasting impact of Petrarch's work on Renaissance poetry and humanism, with attention to both the literary and the material aspects of its reception. Taught in English.

ITALIAN 327. Giambattista Vico & Claude Lévi-Strauss. 3-5 Units.
An intensive reading of Vico's New Science with special emphasis on Vico's theory of anthropogenesis, myth, and the poetic origins of human consciousness. Vico's thought will be placed in relation to Lévi-Strauss's theories of myth and so-called "primitive thought". Readings include Vico's New Science and Lévi-Strauss's "The Structural Study of Myth", and the first chapters of his book The Savage Mind. Taught in English.
Same as: FRENCH 230, FRENCH 330

ITALIAN 352. Boccaccio's Decameron: The Ethics of Storytelling. 3-5 Units.
This course involves an in-depth study of Boccaccio's Decameron in the context of medieval theories of poetry and interpretation. The goal is to understand more fully the relationship between literature and lived experience implied by Boccaccio's fictions. We will address key critical issues and theoretical approaches related to the text. Taught in English translation, there will be an optional supplementary Italian discussion section during weeks 2-9.
Same as: ITALIAN 152

ITALIAN 357. Simone Weil, Simone de Beauvoir, Hannah Arendt, and Adriana Cavarero. 3-5 Units.
What does it mean to say the personal is the political, or, in the case of Arendt, that the personal is not political, especially if you are a woman? This course explores how Weil, De Beauvoir, Arendt, and Caverero contend with the question of personhood, in its variegated social, political, ethical, and gendered dimensions. Particular attention will be given to a philosophy of social change and personal transformation, and to the enduring relevance of these women's thought to issues of our day. Texts include selections from "Gravity and Grace," "The Second Sex," "The Ethics of Ambiguity," "The Human Condition," "Between Past and Future," "Stately Bodies," and "Relating Narratives.".
Same as: COMPLIT 257, COMPLIT 357A, FEMGEN 257X, FEMGEN 357X, FRENCH 257, FRENCH 357, ITALIAN 257

ITALIAN 361. War and Peace: Writings by and about Veterans in the 20th and 21st Centuries. 2-5 Units.
Since the aftermath of World War One, and with increasing urgency in contemporary America, stories about and by veterans are assigned a double role: that of exposing the horror of war yet also defending the possibility of a just war, and that of healing both veterans themselves and the society they return to. Key questions for this course are: Given the current practice of using writing and the hero¿s journey as a model for healing veterans and making their voices heard in our culture, can we look back to post-World-War-One culture and see if writing fulfills a similar function? And given how many post-World-War-One veterans became famous writers, how do we assess the interplay between literature, poetry, memoir, journalism, personal letters, photo accounts? Is there a connection between artistic innovation and the capacity to heal?.
Same as: FRENCH 261, FRENCH 361, ITALIAN 261

ITALIAN 362. Symbolism in Literature and the Arts. 3-5 Units.
This course will deal with the some of the 19th and 20th century authors and artists associated with Symbolism. We will focus on some key theoretical essays about the symbol, as well as on symbolist poetry, novels, visual arts, cinema, and music. In reading authors such as Coleridge, Blake, Poe, Baudelaire, Rimbaud, Verlaine, Mallarmé, Valéry, Pascoli, Campana, d¿Annunzio, and Savinio, we will explore the nature and uses of the symbol in art.
Same as: FRENCH 262, FRENCH 362, ITALIAN 262

ITALIAN 365. Word and Image. 3-5 Units.
What impact do images have on our reading of a text? How do words influence our understanding of images or our reading of pictures? What makes a visual interpretation of written words or a verbal rendering of an image successful? These questions will guide our investigation of the manifold connections between words and images in this course on intermediality and the relations and interrelations between writing and art from classical antiquity to the present. Readings and discussions will include such topics as the life and afterlife in word and image of Ovid's "Metamorphoses," Dante's "Divine Comedy," Ludovico Ariosto's "Orlando Furioso," and John Milton's "Paradise Lost;" the writings and creative production of poet-artists Michelangelo Buonarroti, William Blake, and Dante Gabriel Rossetti; innovations in and correspondences between literature and art in the modern period, from symbolism in the nineteenth century through the flourishing of European avant-garde movements in the twentieth century.
Same as: ARTHIST 265A, ARTHIST 465A, COMPLIT 225, ITALIAN 265

ITALIAN 369. Introduction to the Profession of Literary Studies. 1-2 Unit.
A survey of how literary theory and other methods have been made institutional since the nineteenth century. The readings and conversation are designed for entering Ph.D. students in the national literature departments and comparative literature.
Same as: COMPLIT 369, DLCL 369, FRENCH 369, GERMAN 369

ITALIAN 372. Body Doubles: From the Fantastic Short Story to Science-Fiction. 2-5 Units.
How do we imagine our bodies through language, at times almost completely refashioning a physical double, be it idealized or abject? How do such body doubles intersect with our sense of self, defining or redefining sexual identity, spiritual aspirations, illness and recovery, and the senses themselves, as our window into reality? This course focuses on short stories from the late 19th- and early 20th-century fantastic genre, and science fiction stories from the following turn of the century, 100 years later: in these revealing instances, body doubles often seem to acquire a will of their own, overwhelming normal physical identity.
Same as: FRENCH 272, FRENCH 372, ITALIAN 272

ITALIAN 377. Medieval Lyric: How Lyric Moves. 3-5 Units.
Through the study of various vernacular premodern traditions, this graduate level course examines the qualities that make texts "lyric" and place them into conversation with contemporary theories of lyric. The course will situate medieval lyric within the critical discourse of poetics, the Global South, the archive, and anachrony. We will consider the movement of verse within and among various material contexts (song, manuscript, artworks, objects, tombstones). Poets considered: troubadours, trouvères, Galician-Portugese cantigas d'amigo, Stilnovists, Dante, Petrarchan poetry, Jean Renart, Charles d'Orléans, Villon, Pound, Brazilian Concrete Poetry.
Same as: COMPLIT 377, FRENCH 377

ITALIAN 386. Poetry and Philosophy. 2-5 Units.
When and why do philosophers resort to poetry?nWhat is the relationship between poetic metaphor and philosophical argumentation?nWhy is the poetic often associated with empathy - recently touted as an essential human characteristic - whereas philosophy is considered more objective? nWhat is poetry's role in the pursuit of wisdom or the good life?nAuthors include Nietzsche, Heidegger, Bataille, Agamben, Ricoeur, Derrida, Irigaray, Wyschogrod, and Cavarero.
Same as: FRENCH 286, FRENCH 386, ITALIAN 286

ITALIAN 390. Magic, Science, and Religion. 3-5 Units.
With the rise of the human sciences in the later nineteenth century, "magic," "science," and "religion" came to be understood as entirely separate domains, with different versions of truth and divergent methods of inquiry. But how has this division broken down in the past 150 years? How is it, for example, that other people's religion is "merely magic"? How does science still draw on religious categories, in particular to claim the universe is meaningful? How have new forms of magic shaped new age, global culture? We will examine these questions by pairing literary texts with readings from anthropology, history of science, religious studies, and cultural criticism. This course is taught in English.
Same as: COMPLIT 290A, COMPLIT 390A, FRENCH 290, FRENCH 390, ITALIAN 290

ITALIAN 395. Philosophical Reading Group. 1 Unit.
Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with Professor Robert Harrison is required. May be repeated for credit. Taught in English.
Same as: COMPLIT 359A, FRENCH 395

ITALIAN 398. Intensive Reading in French/Italian. 10 Units.
Enrollment is limited to French/Italian Ph.D. students. Course is designed for French/Italian Ph.D. students to prepare for department milestone exams.
Same as: FRENCH 398

ITALIAN 399. Individual Work. 1-12 Unit.
Repeatable for Credit.

ITALIAN 802. TGR Dissertation. 0 Units.
.

GERMAN STUDIES

Courses offered by the Department of German Studies are listed on the *Stanford Bulletin's* ExploreCourses web site under the subject code GERMAN. For courses in German language instruction with the subject code GERLANG, see the "Language Center" section of this bulletin.

The department is a part of the Division of Literatures, Cultures, and Languages (p. 1298).

The department provides students with the linguistic and analytic ability to explore the significance of the cultural traditions and political histories of the German-speaking countries of Central Europe. At the same time, the interdisciplinary study of German culture, which can include art, economics, history, literature, media theory, philosophy, political science, and other fields, encourages students to evaluate broader and contradictory legacies of the German past, the history of rapid modernization and the status of Germany, Austria, and Switzerland today.

The German experience of national identity, political unification, and integration into the European Union sheds light on wider issues of cultural cohesion and difference, as well as on the causes and meaning of phenomena such as racial prejudice, anti-Semitism, and the Holocaust. In general, an education in German Studies not only encourages the student to consider the impact of German-speaking thinkers and artists, but also provides a lens through which the contours of the present and past, in Europe and elsewhere, can be evaluated.

The department offers students the opportunity to pursue course work at all levels in the languages, cultures, literatures, and societies of the German-language traditions. Whether interested in German literature, the influence of German philosophy on other fields in the humanities, or the character of German society and politics, students find a broad range of courses covering language acquisition and refinement, literary history and criticism, cultural history and theory, history of thought, continental philosophy, and linguistics.

By carefully planning their programs, students may fulfill the B.A. requirements for a double major in German Studies and another subject. A coterminal program is offered for the B.A. and M.A. degrees in German Studies. Doctoral students may elect Ph.D. minors in Comparative Literature, Humanities, Linguistics, and Modern Thought and Literature.

Special collections and facilities at Stanford offer possibilities for extensive research in German Studies and related fields pertaining to Central Europe. Facilities include the Stanford University Libraries and the Hoover Institution on War, Revolution, and Peace. Special collections include the Hildebrand Collection (texts and early editions from the 16th to the 19th century), the Austrian Collection (with emphasis on source material to the time of Maria Theresa and Joseph II, the Napoleonic wars, and the Revolution of 1848), and the Stanford Collection of German, Austrian, and Swiss Culture. New collections emphasize culture and cultural politics in the former German Democratic Republic. The Hoover Institution has a unique collection of historical and political documents pertaining to Germany and Central Europe from 1870 to the present. The department also has its own reference library.

Haus Mitteleuropa, the German theme house at 620 Mayfield, is an undergraduate residence devoted to developing an awareness of the culture of Central Europe. A number of department courses are regularly taught at the house, and there are in-house seminars and conversation courses. Assignment is made through the regular undergraduate housing draw.

Mission of the Undergraduate Program in German Studies

The mission of the undergraduate program in German Studies is to provide students with the German language skills, the ability to interpret literature and other cultural material, and the capacity to analyze the societies of the German-speaking countries of Central Europe. In addition, its interdisciplinary component prepares students to understand other cultures from the perspectives of multiple disciplines. The program prepares students for careers in business, social service, and government, and for graduate work in German Studies.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. oral proficiency in German beyond the interpersonal level with presentational language abilities.
2. writing proficiency in German beyond the interpersonal level with presentational language abilities.
3. close reading skills of authentic texts in German.
4. the ability to develop effective and nuanced lines of interpretation.

Graduate Programs in German Studies

The University requirements for the M.A. and Ph.D. degrees are described in the "Graduate Degrees" section of this bulletin.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in German Studies and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in German Studies. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of German Studies and to pursue career tracks in higher education and in other sectors.

German Studies and a Minor Field

Students may work toward a Ph.D. in German Studies with minors in such areas as Comparative Literature, History, Humanities, Linguistics, or Modern Thought and Literature. Students obtaining a Ph.D. in such combinations may require additional training.

Bachelor of Arts in German Studies

Requirements

- 60 units minimum.
- Majors must demonstrate basic language skills, either by completing GERLANG 1, 2, 3, First-Year German, or the equivalent such as an appropriate course of study at the Stanford in Berlin Center.
- All courses taken for a letter grade, unless only offered for a faculty-elected S/NC (no more than 10 units)
- Courses may not be used towards any other major or minor.
- A maximum of 10 Advanced Placement (AP) units may be counted towards the major with the approval of the Chair of Undergraduate Studies.

- With the exception of GERMAN 191, which is required, all courses listed below are recommended, and substitutes are permitted with the approval of the Chair of Undergraduate Studies. Students may combine a major in German Studies with a major in any other field. Relevant courses in other fields may count towards the German Studies major with approval. Check ExploreCourses (https://explorecourses.stanford.edu/) for current listings.

Declaring the Major

Students declare the major in German Studies through Axess. Students meet with the Chair of Undergraduate Studies and undergraduate student support officer to discuss appropriate courses and options within the major, and to plan a course of study.

Course Requirements

Completion of 60 units. Units earned towards the Bachelor of Arts in German Studies with honors degree may be applied to the 60 unit total.

1. Writing in the Major (WIM Requirement):

		Units
GERMAN 116	Writing About Germany: New Topics, New Genres	3-5

2. Completion of three GERMAN Courses from 120 and 130 Series, each taught in the German language.

		Units
GERMAN 120A	Berlin: Literature and Culture in the 20th Century and Beyond	3-5
GERMAN 120B	Fairy Tales	3-5
GERMAN 120C	German in Public: 99 German Songs	3-5
GERMAN 120D	The German Graphic Novel	3-5
GERMAN 131	What is German Literature?	3-5
GERMAN 132	History and Politics of the Future in Germany, 1900-Present	3-5
GERMAN 135	German Conversation	3

3. Senior Capstone Project:

		Units
GERMAN 191	German Capstone Project	1

4. Students must take the Oral Proficiency Interview (OPI) two quarters prior to degree conferral. Students should contact the Stanford Language Center to arrange assessment.

5. Remaining units must be completed through elective courses approved in consultation with the Chair of Undergraduate Studies.

- All courses taken at the Berlin Overseas campus are pre-approved as major electives.
- Structured Liberal Education (SLE)/ ESF, IntroSems or Thinking Matters (THINK) courses may contribute for a maximum of 10 units.
- Subject to approval by the Chair of Undergraduate Studies, courses from other fields may count if they contribute to the student's language skills, the ability to interpret literature and other cultural material, or the capacity to analyze societies.

German and Philosophy Subplan

The German and Philosophy subplan offers students the opportunity to combine studies in literature and philosophy. Students take most of their courses from departments specializing in the intersection of literature and philosophy. This option requires a minimum of 16 courses, for a minimum total of 65 units. A student who has completed the SLE sequence (all three quarters) may count up to 10 units towards this major. The SLE units can replace one history of philosophy course and one upper-division German course.

Degree Requirements

German Studies:

1. Completion of three GERMAN Courses from 120 and 130 Series, each taught in the German language.

		Units
GERMAN 120A	Berlin: Literature and Culture in the 20th Century and Beyond	3-5
GERMAN 120B	Fairy Tales	3-5
GERMAN 120C	German in Public: 99 German Songs	3-5
GERMAN 120D	The German Graphic Novel	3-5
GERMAN 131	What is German Literature?	3-5
GERMAN 132	History and Politics of the Future in Germany, 1900-Present	3-5
GERMAN 133	Marx, Nietzsche, Freud	3-5

2. GERMAN 191 German Capstone Project
3. Students must take the Oral Proficiency Interview (OPI) two quarters prior to degree conferral.

Philosophy:

1. PHIL 80 Mind, Matter, and Meaning; fulfills the Writing-in-the-Major (WIM) requirement.
2. GERMAN 181 Philosophy and Literature
3. Aesthetics, Ethics, Political Philosophy: one course from PHIL 170 series.
4. Language, Mind Metaphysics, and Epistemology: one course from PHIL 180 series.
5. History of Philosophy: one course in the history of Philosophy, numbered above PHIL 100.
6. Two additional elective courses of special relevance to the study of philosophy and literature as identified by the committee in charge of the program. Students must consult with their advisers, the Chair of Undergraduate Studies, and the undergraduate adviser of the program in philosophical and literary thought.
7. Capstone: Students must do one of the following: (a) take one of the officially-designated Philosophy and Literature capstone seminars listed below, in the senior year; (b) write an honors thesis (see “Honors Program” for instructions); or (c) write a 5,000-word paper on a topic of their choosing, serving as the culmination of their work in the field. To make time to write the paper, students must enroll in a 3-unit, letter-grade independent study with a faculty member (or affiliate) in the Philosophy and Literature Focal Group. The paper must involve both philosophy and literature, and the topic must be approved by the faculty member by the add/drop deadline.
8.

		Units
GERMAN 125	Nietzsche: Life as Performance	3-5
COMPLIT 283A	Modern Notions of 'The Holy'	3-5
PHIL 194W	Capstone Seminar: Imagination in Fiction and Philosophy	4
PHIL 194Z	Capstone: Living a Meaningful Literary Life	4

Units devoted to meeting the department’s language requirement are not counted toward the 65-unit requirement.

The capstone seminar and the two related courses must be approved by both the German Studies Chair of Undergraduate Studies and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. Substitutions, including transfer credit, are not normally permitted for items 3b, 3c, and 3d, and are not

permitted under any circumstances for items 2, 3a, and 5. Up to 10 units taken in the Philosophy Department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade.

Honors Program

Students majoring in any DLCL department (i.e., Comparative Literature, French and Italian, German Studies, Iberian and Latin American Cultures, and Slavic Languages and Literatures) who have an overall grade point average (GPA) of 3.3 or above and who maintain a 3.5 (GPA) in their major courses, are eligible to participate in the DLCL's honors program.

Declaring Honors

Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty in their junior year by May 1. During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL Honors application, and an outline of planned course work for their senior year. When their applications are approved by their home department, students will request honors through Axess.

Honors theses vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40 to 90 pages not including bibliography and notes.

Honors students are encouraged to participate in the DLCL program hosted by Bing Honors College. This DLCL Honors College is designed to help students develop their projects and is offered at the end of the summer before senior year. Applications must be submitted through the Bing program. For more information, view the Bing Honors (https://undergrad.stanford.edu/programs/bhc/) web site.

Program Requirements

A minimum of 10 units total, described below, and a completed thesis is required. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15, of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

1. Spring Quarter of the junior year (optional): DLCL 189C Honors Thesis Seminar, 2-4 units S/NC, under the primary thesis adviser. Drafting or revision of the thesis proposal. The proposal is reviewed by the Chair of Undergraduate Studies and the Director of the department and will be approved or returned for submission.
2. Autumn Quarter of the senior year (required): DLCL 189A Honors Thesis Seminar, 4 units S/NC, taught by a DLCL appointed faculty member. Course focuses on researching and writing the honors thesis.
3. Winter Quarter of the senior year (required): DLCL 189B Honors Thesis Seminar, 2-4 units S/NC, under the primary thesis adviser. Focus is on writing under guidance of primary adviser.
4. Spring Quarter of the senior year (option; mandatory if not taken during junior year): DLCL 189C Honors Thesis Seminar, 2-4 units S/NC, under the primary thesis adviser. Honors essays are due to the thesis adviser and student services officer no later than 5:00 p.m. on May 15 of the terminal year.
5. Spring Quarter of the senior year (required) DLCL 199 Honors Thesis Oral Presentation, 1 unit S/NC. Enroll with primary thesis adviser.

The honors thesis in the DLCL embodies Stanford's excellence in course work and research. It is simultaneously one element of the student's intellectual legacy and part of the University's official history. The faculty considers the honors thesis to be far more than a final paper; rather, it is the product of solid research that contributes to conversations taking place within a larger scholarly community and representative of the intellectual vitality of the discipline. For all of these reasons, DLCL honors theses will be visible to future scholars researching similar questions through full online access through the Stanford Digital Repository (https://library.stanford.edu/research/stanford-digital-repository/) (SDR) and may be used as course materials for future Stanford honors preparatory courses. For similar purposes, a printed copy may also be kept in DLCL spaces. Students who wish to limit the availability or formats in which the thesis may be shared may do so by filling out the appropriate form with the DLCL student affairs officer.

Overseas Studies and Internships in German Studies

All students who are planning to study at Stanford in Berlin or engage in an internship are encouraged to consult with the Chair of Undergraduate Studies and the Overseas Studies office about integrating work done abroad into their degree program. Through the Center, students with at least two years of college-level German can also take courses at the Freie Universität, Technische Universität, or Humboldt Universität. All credits earned in Berlin can be applied to the undergraduate major in German Studies. For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses (http://explorecourses.stanford.edu) web site, or the Bing Overseas Studies (http://bosp.stanford.edu) web site.

Internships in Germany are arranged through the Bing Overseas Studies Program. In addition, students may consult with the department to arrange local internships involving German language use or issues pertaining to Germany or Central Europe. Returning interns who wish to develop a paper based on their experience should enroll in GERMAN 116 Writing about Germany.

Minor in German Studies

The Department of German Studies offers a minor in German Studies.

Declaring the Minor

Students declare the major in German Studies through Axess. Students should meet with the Chair of Undergraduate Studies and undergraduate student support officer to discuss appropriate courses and options within the minor, and to plan the course of study.

Requirements

- At least 6 courses of 3 units or more and at least 24 units of course work.
- 15 units must be taken in the subject code of GERMAN or with faculty members from German Studies.
- All GERLANG courses from the Language Center may be counted.
- All courses of 3 units or more at the Bing Overseas Studies Center OSPBER in Berlin have been pre-approved for the minor.
- Students may use 5 units from SLE and/or a Thinking Matters course taught by a German Studies faculty member toward their electives for the minor.
- A maximum of 5 units of transfer credit may be applied with the approval of the Chair of Undergraduate Studies.
- Units may not be double counted.
- All courses must be taken for a letter grade, except where letter grades are not offered.

Minor in Modern Languages

The Division of Literatures, Cultures, and Languages offers an undergraduate minor in Modern Languages that permits students to demonstrate strength in two distinct modern languages and their literatures. See the "Division of Literatures, Cultures, and Languages

(p. 1299)" section of this bulletin for further details about this minor and its requirements.

Master of Arts in German Studies

This program is designed for those who do not intend to continue studies through the Ph.D. degree at Stanford. In order to complete the M.A. degree, students must complete a minimum of 45 units of graduate work. If students enroll for three quarters for a minimum of 15 units per quarter, they will be able to fulfill the M.A. requirements in one year. The M.A. program requires students to take the three graduate core courses (GERMAN 330, GERMAN 331, and GERMAN 322). These courses cover texts from our core reading lists in three areas of German Studies: pre-1700. 1700-1900, and post-1900. The remaining courses may be selected by the student but they must be graduate-level courses in German and/or approved courses in related fields such as art history, comparative literature, linguistics, history, or philosophy.

M.A. candidates must take an oral examination toward the end of their last quarter. In preparation for the oral exam students are expected to compile a reading list of 60 texts comprised of:

- 15 items from each of the three core; lists (pre-1700, 1700-1900, 1900-2000)
- 10 items from the film/opera lists
- 5 additional items of their own choice

This M.A. reading list must be compiled in consultation with the advisor.

Coterminal Program

Students may apply to combine programs for the B.A. and M.A. degrees in German Studies. Coterminal students in German Studies may count eligible courses taken up to one academic year before enrollment in the first graduate quarter. Students are reminded that course transfer is subject to approval of the undergraduate and graduate departments.

University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 56)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 65)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken during or after the first quarter of the sophomore year are eligible for consideration for transfer to the graduate career; the timing of the first graduate quarter is not a factor. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate advisor be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

Doctor of Philosophy in German Studies

The requirements for the Ph.D. in German Studies include:

1. Required Courses. A total of 135 units is required for the Ph.D.; doctoral candidates must complete at least one course with each member of the department. All courses counted towards the 135-unit requirement for the Ph.D. must be at the graduate level. Undergraduate courses may be taken but not used towards the Ph.D. requirements.
   During the Autumn, Winter, and Spring quarters in year one, students are required each quarter to enroll in and complete at least two graduate courses taught by German Studies faculty and submit at least one seminar paper in German Studies. DLCL 301 The Learning and Teaching of Second Languages is a required course for all doctoral students and must be taken in the Spring of the first year. It is highly recommended that students take GERMAN 369 Introduction to the Profession of Literary Studies (not offered this year) in year one or two. GERMAN 330, GERMAN 331, and GERMAN 322 must be taken in the first two years of study. Students should take all courses for letter grades when the option is available. During the Summer Quarter of year one, students may take a language course, or conduct research abroad, but they must also enroll in independent study units with their adviser (GERMAN 399 Individual Work) and complete a research paper.
   In year two, students are required to enroll and complete one graduate course and submit one seminar paper each quarter (Autumn, Winter, Spring). It is highly recommended that students take DLCL 311 Professional Workshop in year two. During the second Summer Quarter, students enroll in independent study units (GERMAN 399 Individual Work) with their adviser and complete a dissertation chapter or prospectus.
   All graduate students must participate in the German Graduate Colloquium (students may enroll in GERMAN 397 Graduate Studies Colloquium for 1 unit per quarter). For more information, see the Graduate Handbook 2019-20.
2. Units. All German Studies seminars are offered for 3-5 units with different requirements for each unit designation. Students writing seminar papers should enroll in 5 units.
   a. *First Year.* During the Autumn, Winter, and Spring quarters students must enroll in at least 18 graduate units. Students must enroll in at least two courses each quarter offered by German Studies faculty. During the Summer of the first year, students enroll in GERMAN 399 Individual Work and complete a research paper on a topic in their presumed area of specialization. For more information, see the Graduate Handbook 2019-20.
   b. *Second Year.* Students must enroll in 10 graduate units each quarter during their second year of graduate study. In the Autumn Quarter, students enroll in individual work (GERMAN 399 Individual Work) with a faculty adviser to refine the research paper written over the Summer. It must be submitted to a reading committee comprised of three faculty members by the end of the Autumn Quarter. In the Winter and Spring quarters, students take seminars that are pertinent to the dissertation topic. During the second Summer, students enroll in GERMAN 399 Individual Work and complete a draft dissertation chapter, which is presented to a faculty committee at the beginning of the Autumn Quarter. For more information, see the Graduate Handbook 2019-2020.
   c. *Third Year.* Students who have not reached TGR status (135 units) must complete 10 units each quarter during their third year of graduate study until TGR status is achieved. Students may enroll in 1-10 independent study units (GERMAN 399 Individual Work) with their adviser.
3. Qualifying Examination. Immediately following the end of classes in the Spring Quarter of the first year, all Ph.D. students must take their qualifying examination. This examination is designed to cover the full range of German literary history. It is based on the German Studies reading list available in the Graduate Handbook 2019-20 and builds on the core courses GERMAN 330, GERMAN 331, and GERMAN 322. Students who fail this examination may request to retake it once

before October 15. A second fail of the qualifying examination results in dismissal from the Ph.D. program.

4. Qualifying Paper Submission. Based upon summer independent study and progress in GERMAN 399 Individual Work, the Ph.D. student submits a polished research paper in Autumn Quarter of their second year. The paper must be submitted by December 1 and is reviewed by a committee of three faculty members, including the adviser, who determine approval. A qualifying paper that does not meet approval may be revised and resubmitted by February 15. A second failure to submit a paper meeting approval of the faculty readers results in dismissal from the program.
5. Candidacy. Admission to candidacy is an important decision grounded in an overall assessment of a student's ability to successfully complete the Ph.D. program. Per University policy, students are expected to complete departmental qualifying procedures and apply for candidacy by the end of the second year in residence. In reviewing a student for admission to candidacy, the faculty considers a student's academic progress including but not limited to: advanced language proficiency, course work, performance on the qualifying exam, the qualifying paper, and successful completion of teaching/research assistantships.
    a. In addition to successful completion of department prerequisites, a student is only admitted to candidacy if the faculty makes the judgment that the student has the potential to successfully complete the requirements of the degree program. Candidacy is determined by faculty vote. Failure to advance to candidacy results in the dismissal of the student from the doctoral program. Candidacy is valid for five years and students are required to maintain active candidacy through conferral of the doctoral degree. All requirements for the degree must be completed before candidacy expires. Additional information about University candidacy policy is available in the Bulletin (p. 67) and GAP (http://gap.stanford.edu/4-6.html).
6. Dissertation Chapter Defense (Prospectus). Building on work in Winter and Spring quarters of the student's second year, and ideally on the qualifying paper, students spend the Summer Quarter of the second year completing a draft chapter of the dissertation or a detailed preliminary dissertation prospectus. It must be discussed in a one-hour session of the reading committee at the beginning of the Autumn Quarter. The reading committee is comprised of three faculty members. At least two members of the reading committee must have primary appointments in German Studies. Students select members of the reading committee in consultation with the primary adviser.
7. After completion of the dissertation prospectus, all students are strongly encouraged to spend at least one quarter abroad in a German-speaking country, while remaining in regular contact with their advisers.
8. Language Requirement. A reading knowledge of one language other than English and German is required. Students in Medieval Studies must also have a reading knowledge of Latin. Reading knowledge is assessed by an examination administered by the Language Center. The language requirement must be satisfied by the Autumn Quarter of the fifth year.
9. The University Oral Examination. The University Oral Examination in the Department of German Studies involves a defense of a substantial portion of the dissertation, normally at least three draft chapters, and takes place no later than the end of Autumn Quarter of the fifth year. The student's work must be distributed to the committee at least four weeks before the formal University Oral Examination. The committee consists of the dissertation committee (three faculty members), one additional reader, plus an outside chair, selected in consultation with the primary adviser. The examination lasts no longer than two hours. It begins with a brief statement by the candidate (no longer than 15 minutes) followed by questions from the four examiners, each of whom is limited to 20 minutes. The remaining time is reserved for optional questions from the chair of the examination. Students who fail the University Oral Examination are allowed one opportunity to retake it. A second fail of the University oral examination results in dismissal from the Ph.D. program.
10. Public Lecture. All Ph.D. students are strongly encouraged to give a public lecture on the topic of their dissertation. This lecture may be scheduled after the successful completion of the University oral exam.
11. Submission and approval of a dissertation.
12. Teaching Assistant. The teaching requirement includes four quarters of language teaching during the second and third years of study and is mandatory for continued enrollment or support in the program. Students must also teach a fifth course which may be a language course, but they may alternatively request to teach or co-teach a literature course at a later time in the course of study, normally once their dissertation has reached an advanced stage, contingent upon department need and subject to approval of the Director of German Studies. Such teaching does not extend the length or scope of support. Graduate students are advised to develop skills in the teaching of literature by participating in the teaching of undergraduate courses beyond language courses. Students may enroll in independent studies with faculty members to gain experience as apprentices in undergraduate teaching.
13. Research Assistant. The department expects candidates to demonstrate research skills appropriate to their special areas of study.
14. Graduate Studies Colloquium.Enrollment and/or participation in the Colloquium is mandatory for all students (students conducting research abroad are exempt). The Colloquium meets every two weeks throughout the year and involves presentation of student work and professionalization workshops.
15. German Studies Lecture Series. Regular attendance at lectures sponsored by the department is required. Students may enroll in the German Studies Lecture Series for one unit. Enrolled students are required to read a book by one of the speakers and submit a brief book report, or complete a similar assignment in consultation with the faculty coordinator of the Lecture Series.
16. The principal conditions for continued registration of a graduate student are the timely and satisfactory completion of University, department, and program requirements for the degree, and fulfillment of minimum progress requirements. Failure to meet these requirements results in corrective measures, which may include a written warning, academic probation, and/or dismissal from the program.
17. Annual Review. The Department of German Studies conducts annual reviews of each student's academic performance at the end of the Spring Quarter. All students are given feedback from the Chair of Graduate Studies, helping them to identify areas of strength and potential weakness. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. At any point during the degree program, evidence that a student is performing at a less than satisfactory level may be cause for a formal academic review of that student. Possible outcomes of the annual review include: continuation of the student in good standing, or placing the student on probation, with specific guidelines for the period of probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: restoration to good standing; continued probation, with guidelines for necessary remedial steps; or dismissal from the program.

Ph.D. Minor in German Studies

The department offers a Ph.D. Minor in German Studies. The requirement for the Ph.D. minor is completion of 25 units of graduate course work in

German Studies classes. Interested students should consult the Director of Graduate Studies.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a “credit” or “no credit” grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a “credit” or “satisfactory” grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

The German Department counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of undergraduate degree requirements that otherwise require a letter grade.

Required Courses Policy

In academic year 2020-2021, as Stanford operates on a four-quarter system, students may opt not to be enrolled in one of the four quarters of the year. German majors may therefore be unable to take GERMAN 116 because they are on leave during the quarters it is offered. In these cases, the Chair of Undergraduate Studies will suggest and approve an appropriate substitute class.

Graduate Degree Requirements

Grading

Doctoral students in the department must take required courses for a letter grade and are expected to earn a grade of 'B' or better in each required course. In other courses, doctoral students are expected to earn a grade of 'B' or better in each course taken for a letter grade in AY 2020-21 that will count towards their degree requirement. Any grade of 'B-' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty: while the grade will stand, the student may be required to revise and resubmit the work associated with that course. For courses taken for CR/NC, instructors will be asked to submit written assessment to the student and the department of what would be the equivalent letter grade to allow for review of satisfactory academic achievement by the DGS and department.

Graduate Advising Expectations

The Department of German Studies is committed to providing academic advising in support of graduate student scholarly and professional development. The overall goal of advising, both in the DLCL and the department, is to help graduate students make academic and career choices wisely, and think ahead, in order to craft a long-term plan for their graduate student career and beyond. When most effective, the advising relationship entails collaborative and sustained engagement by both the adviser and the advisee. As a best practice, advising expectations should be periodically discussed and reviewed to ensure mutual understanding. Both the adviser and the advisee are expected to maintain professionalism and integrity. Advising is both an academically invaluable form for the transmission of expertise, as well as a key aspect of creating a strong departmental and Stanford community.

Faculty Advisers

Faculty advisers guide students in key areas such as selecting courses, designing and conducting research, developing of teaching pedagogy, navigating policies and degree requirements, and exploring academic opportunities and professional pathways.

- Upon enrolling, students plan their work under the direction of the Chair of Graduate Studies or a faculty member designated by the program. When the student selects a more specialized adviser, the transition should involve oral or written communication between both advisers and the student concerning the student's progress, goals, and expectations. It is possible for doctoral students to choose two main advisers at the dissertation stage, provided all agree this is academically sound.
- Faculty advisers should meet with assigned students to discuss their selection of courses and to plan from a broader, longer-term perspective, including discussion of Program milestones and a basic timeline; an overview of Department and DLCL offerings beyond courses; student goals and interests and DLCL or Stanford programs that may be relevant; and (for doctoral students) how to transfer previous graduate coursework.
- Faculty advisers and graduate students should meet at least once per quarter to assess the advisee's course of study, performance over the past quarter, and plans for the next quarter, as well as longer term plans. If a student has two advisers, the student should meet at least once per quarter with each adviser and at least once per year with both advisers at the same time.
- For doctoral students, faculty should help their advisees plan for exams, research grant applications, develop research projects, and plan ahead for both the academic job market and the job search beyond academia.
- Faculty advisers should provide feedback about the student's progress to the department during the Annual Review process. For more information about the Annual Review, see the Graduate Handbook.

Graduate Students

Graduate students are active contributors to the advising relationship, proactively seeking academic and professional guidance and taking responsibility for informing themselves of policies and degree requirements for their graduate program.

- Upon enrolling, students plan their work under the direction of the Chair of Graduate Studies or a faculty member designated by the program. As the student develops a field of expertise, the student chooses a program adviser to replace the Chair of Graduate Studies role. The transition should involve oral or written communication between both advisers and the student concerning the student's progress, goals, and expectations.
- Graduate students and faculty advisers and should meet at least once per quarter to assess the advisee's course of study, performance over the past quarter, and plans for the next quarter, as well as longer term plans. If a student has two advisers, the student should meet at least once per quarter with each adviser and at least once per year with both advisers at the same time.
- Students should consult with their advisers on all academic matters, including coursework, conference presentations and publications, research travel, and teaching plans.
- Students should provide a thorough self-evaluation each year for the annual review. For more information about the Annual Review, see the Graduate Handbook.

For a statement of University policy on graduate advising, see the "Graduate Advising (p. 80)" section of this bulletin.

Faculty in German Studies

Director: Elizabeth Bernhardt-Kamil

Chair of Graduate Studies: Amir Eshel

Chair of Undergraduate Studies: Elizabeth Bernhardt-Kamil

Professors: Russell A. Berman (also Comparative Literature), Elizabeth Bernhardt-Kamil, Adrian Daub (also Comparative Literature), Amir Eshel (also Comparative Literature), Matthew Wilson Smith, Kathryn Starkey (on leave)

Assistant Professor: Lea Pao

Overseas Studies Courses in German Studies

The Bing Overseas Studies Program (http://bosp.stanford.edu) (BOSP) manages Stanford international and domestic study away programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The BOSP course search site (https://undergrad.stanford.edu/programs/bosp/explore/search-courses/) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu) or Bing Overseas Studies (http://bosp.stanford.edu).

Due to COVID-19, all BOSP programs have been suspended for Autumn Quarter 2020-21. All courses and quarters of operation are subject to change.

		Units
OSPBER 17	Split Images: A Century of Cinema	3-4
OSPBER 66	Theory from the Bleachers: Reading German Sports and Culture	3
OSPBER 70	The Long Way to the West: German History from the 18th Century to the Present	4-5
OSPBER 71	EU in Crisis	4-5
OSPBER 101A	Contemporary Theater	5
OSPBER 126X	A People's Union? Money, Markets, and Identity in the EU	4-5
OSPBER 174	Sports, Culture, and Gender in Comparative Perspective	3-5

Courses

GERMAN 13Q. Humanities Core: Great Books, Big Ideas -- Europe, Modern. 3-4 Units.
This three-quarter sequence asks big questions of major texts in the European and American tradition. What is a good life? How should society be organized? Who belongs? How should honor, love, sin, and similar abstractions govern our actions? What duty do we owe to the past and future? This third and final quarter focuses on the modern period, from the rise of revolutionary ideas to the experiences of totalitarianism and decolonization in the twentieth century. Authors include Locke, Mary Shelley, Marx, Nietzsche, Freud, Weber, Primo Levi, and Frantz Fanon. N.B. This is the third of three courses in the European track. These courses offer an unparalleled opportunity to study European history and culture, past and present. Take all three to experience a year-long intellectual community dedicated to exploring how ideas have shaped our world and future. Students who take HUMCORE 11 and HUMCORE 12Q will have preferential admission to HUMCORE 13Q (a WR2 seminar). **NOTE** This class meets Monday and Wednesday in room 20-22K and Fridays in room 260-113 to attend a lecture along with the other two HUMCORE courses this quarter.
Same as: DLCL 13Q, HUMCORE 13Q

GERMAN 57N. Nietzsche and the Search for Meaning. 3 Units.
Many of us have heard his declarations of the death of God, the arrival of the Superman, and the need to live beyond good and evil. But what, beyond such sound bites, did Nietzsche actually teach? How can his writings be understood in the context of their own time? And what significance might they hold for us today?.

GERMAN 60N. German Crime. 3 Units.
Crime is as old as humanity, as old as storytelling. Cain's murder of Abel, Antigone's burial of Polynices, Robin Hood's robbing from the rich: all of these testify to the ongoing fascination with crime and criminality, and to literature's role in policing, and probing, the boundaries of social legitimacy. This is a course about murders, break-ins, betrayals, sexual infidelity and violence, and crimes against humanity, and the ways those crimes, sometimes moral, sometimes legal, and sometimes not really even exactly criminal, teach us about German and German literature in recent centuries. Course material will include modern and classical crime fiction (Friedrich Glauser, Friedrich Dürrenmatt, Jakob Arjouni, Thomas Glavinic), crime in novelistic, theatrical and poetic genres (Anna Seghers, Bertolt Brecht, Heinrich von Kleist, Friedrich Schiller), and German-language television and film (Fritz Lang's "M,"Carol Reed's "The Third Man," "Tatort"). nThis course is for students with good knowledge of German. Students without German can participate in a special section with English language material.nGerman Studies Assistant Professor Lea Pao will teach this course.

GERMAN 68N. Franz Kafka: Literature and the Modern Human Condition. 3 Units.
This class will address major works by Franz Kafka and consider Kafka as a modernist writer whose work reflects on modernity. We will also examine the role of Kafka's themes and poetics in the work of contemporary writers.

GERMAN 75N. Famous Last Words. 3 Units.
What would you say if you knew it would be the last thing you would ever say? Who would you want to hear your words? Would you want to inspire somebody? Terrify them? Shout your defiance or your love in their direction?nThis is a course about last words the final utterances left as legacies for the world in the face of revolution, war, betrayal, heartbreak, or that simplest of endings, death. We will look at a wide variety of last words, including last words codified as genres¿quotations, suicide notes, epitaphs, dying declarations, Japanese death poems, confessions, and the like as literary devices (last sentences, envois, punch lines, epilogues), and as forms of social or cultural practice (the making of heroes, idols, and martyrs in religious, political, and popular culture). We will look at fictional last words, real last words, last words spoken by heroes, gods, and ordinary people. And we will end the course, each of us, by writing out our own last words imagining what we each would write, if we had to sum up what mattered most to us, and if we wanted some small selection of signs to stand in, as it has for many of the authors we will read, for our life and the legacy of it.

GERMAN 97. 10 Poems That Will Change Your Life. 3-5 Units.
This course is for anyone who has ever been afraid of poetry, anyone who has ever thought that poems are too difficult to understand, a course for anyone who has fallen in love with poetry before, and for anyone who has used a poem to make a difference in someone's life. You will learn how to read, understand, and if you don't already like poetry. We will read poems from different centuries, different kinds of writers, and different media (paper, computer screens, and even DNA); they will be about loss and love and war and loyalty and bacteria. Some of them will be about you. You will develop interpretive skills that come with this range of poetic forms and structures and will learn how to think about what it means for something to be poetic, whether it is a poem, a Leonard Cohen song, a last minute field goal, or a toilet. Can the poems in this class really change your life? (What would that even mean? We'll discuss.) Maybe; maybe not. But they're certainly going to try.

GERMAN 101. Germany in 5 Words. 3-5 Units.
This course explores German history, culture and politics by tracing five (largely untranslatable) words and exploring the debates they have engendered in Germany over the past 200 years. This course is intended as preparation for students wishing to spend a quarter at the Bing Overseas Studies campus in Berlin, but is open to everyone. Taught in English.

GERMAN 106. Turkish-German Literature, Cinema, and Theater. 3-5 Units.
One in five people in Germany now has, as it is termed, a background of migration. Immigration from Turkey is probably the most prominent not only in terms of its massiveness and demographic consequences, but also for its significant role in changing Germany's overall cultural, social, and economic landscape. In this course, through analyzing selected literary works, films, and plays produced by Turkish-German writers and artists, we will discuss complex ideas like migration, ethnicity, race, religion, gender, and class, resorting not to oversimplifications and binary thinking but instead to relevant literary concepts and formative historical moments which have shaped the Turkish-German experience. Remote synchronous with plenty of opportunities to participate in group and breakout room discussions and creative projects.
Same as: GERMAN 206

GERMAN 109. The End of Europe (as we know it) - Germany and the Future of the European Union. 3-5 Units.
Europe is struggling with the impact of the sovereign debt crisis of the Eurozone, mass migration, political extremism and xenophobia, external and internal security challenges, as well as political and social needs for reform to mention only some of the most pressing problems. The European Union, a project of an ever closer union of European states with currently 28 members started with the promise to provide peace, stability and prosperity. This narrative attracted new members in five enlargement rounds since the 1970s while today Eurosceptic parties, separatist movements as well as internal and external critics of the EU question the European integration project as such. nnThe course starts with the narrative of the success story of European integration and its achievements. This is followed by an analysis of current crises and future problems. In a third step we will discuss consequences and strategies to deal with challenges for Europe as a whole, as well as the EU and its members in particular. The course will follow ongoing debates within and outside of the EU. It includes global reflections on the state European situation and it makes comparisons with responses to similar challenges in other parts of the world.

GERMAN 111. The End of the Western World (as we know it): German Responses to Global Challenges. 3-5 Units.
Germany defines its foreign policy being based on two pillars: being a part of an integrated Europe and belonging to the Western World. For decades, America and Europe have remained closely connected politically, economically, and culturally. This close working relationship, however, now risks coming to an end, or getting substantially weakened. When asked to identify his "biggest foe globally right now," President Trump put the European Union on the list, along with China and Russia. Not only deeds but already words have far reaching consequences for Germany in a number of respects. The course addresses the question whether "The Western World" is coming to an end and discusses root causes and possible implications. As the course unfolds, we will cover a number of timely topics, including the future of NATO and why multilateralism matters, how an open society can survive the rising tide of populism, how migration is changing demographics and politics on both sides of the Atlantic, and the prospects for finding political solutions to climate change. We will even address German and European approaches to dealing with digitization and the protection of private data. The course will be discussion based, and include a number of illuminating studies; our goal is to increase students' understanding of the major challenges facing the decades-old American-European alliance and how Germany is dealing with them. Students will need no prior knowledge of Germany and the European Union. Knowledge of the American perspective is welcome but not required.

GERMAN 115. The Queer 20th Century: German LGBTQ Literature and Film. 3-5 Units.
What was it like to be queer in 20th-century Germany? This course examines the rich and sometimes surprising LGBTQ culture of 20th-century Germany, featuring stories that are often left out of traditional seminars. Through literature and film, we will learn about pioneering gay rights activists, persecution under National Socialism, emancipation movements under capitalism and socialism, and debates that are shaping queer life in contemporary Germany. Taught in English; students of all backgrounds are very welcome. Remote synchronous, with plenty of opportunities for breakout rooms, student discussion, Zoom breaks, and off-screen work.
Same as: FEMGEN 115A, FEMGEN 215A, GERMAN 215

GERMAN 116. Writing About Germany: New Topics, New Genres. 3-5 Units.
Writing about various topics in German Studies. Topics based on student interests: current politics, economics, European affairs, start-ups in Germany. Intensive focus on writing. Students may write on their experience at Stanford in Berlin or their internship. Fulfills the WIM requirement for German Studies majors.

GERMAN 120. Contemporary Politics in Germany. 3-5 Units.
This course provides an opportunity to engage with issues and actors, politicians and parties in contemporary Germany, while building German language abilities. We will work with current events texts, news reports, speeches and websites. Course goals include building analytic and interpretive capacities of political topics in today's Europe, including the European Union, foreign policy, and environmentalism. Differences between US and German political culture are a central topic. At least one year German language study required.

GERMAN 120A. Berlin: Literature and Culture in the 20th Century and Beyond. 3-5 Units.
For much of the twentieth century Berlin has been at the epicentre of geopolitics, the Berlin Wall standing as the physical manifestation of a fragile world order. Huge social and political upheavals in the city have inspired much cultural production. Through novels, poetry, films, speeches and more we will examine the Golden Era of Weimar Berlin, the National Socialist period, the Cold War division, reunification, and the contemporary city. Authors include Keun, Döblin, Fallada, Schernikau, Wolf, Brussig, Erpenbeck. Taught in GermanPrerequisite: GERLANG 3 or permission of instructor.

GERMAN 120B. Fairy Tales. 3-5 Units.
In this course, we will explore the fairy tale genre both from a systematic and historical perspective. We will start by asking how fairy tales differ from other short prose texts like legends and fables. We will then focus on bigger themes, allowing us to discern differences within this literary form, namely: the fantastic and the real, motif constancy and variation, narration and orality, animality and the human. Over the course of the seminar, we will not only delve into the world-famous folk tale collection of the Grimm brothers, but also the more stylized Romantic "Kunstmärchen" tradition (Goethe, Brentano, Hoffmann). Examples from the later 19th-century (Keller, Storm) and the 20th century (Hofmannsthal, Kafka, Döblin, Bachmann) demonstrate attempts to reformulate the fairy tale tradition by transgressing its boundaries. Taught in German. Prerequisite: GERLANG 3 or permission of instructor.

GERMAN 120C. German in Public: 99 German Songs. 3-5 Units.
Germany is the land of Beethoven and Brahms, but has also given the world Marlene Dietrich, Nena, and Rammstein. This course aims to introduce you to a variety of music repertories, and a range of ways through popular songs to think and talk about 200 years of German history, art, culture, and politics. While we explore some of the great ¿classics¿ of the musical canon in the German speaking countries, we will also discover the social, critical, and political impacts expressed and triggered by folksongs, rock, punk, hip-hop, techno, and heavy metal music. Our focus will be on particular German genres and obsessions by listening not only good songs but also bad ones, very goofy and entertaining pieces. A class to hum along to! Taught in German. Prerequisite: One year of German or permission of instructor.

GERMAN 120D. The German Graphic Novel. 3-5 Units.
This course is an introduction to the history, theory, and social life of German graphic novels. We will look at early examples of text-and-image (Sebastian Brant¿s "Ship of Fools," a satire published in 1497, Heinrich Hoffmann¿s "Der Struwwelpeter," an 1845 children¿s book detailing various forms of misbehavior in spine-chilling visual detail, or Wilhelm Busch¿s 1895 tale of the mischievous brothers "Max und Moritz") and modern and contemporary comics, political caricatures, and graphic novels from Swiss, German, and Austrian artists (Nicolas Mahler, Gerhard Haderer, Manfred Deix, Ulli Lust, Max Goldt, or Anke Feuchtenberger). This course is in German; no prior knowledge of the topic is required. You will develop your German reading, speaking, and writing skills through a variety of short creative assignments and in-class discussions, develop critical reading skills as they attend to specific formal features, and improve your abilities to think historically about the emergence and development of aesthetic forms.

GERMAN 125. Nietzsche: Life as Performance. 3-5 Units.
Nietzsche famously considered that "there is no 'being' behind the deed, its effect, and what becomes of it; the 'doer' is invented as an afterthought - the doing is everything." How should we understand this idea of a deed without a doer, how might it relate to performance, and what influence has it had on modern culture? In order to answer these questions, we will consider Nietzsche's writings alongside some of the artworks that influenced Nietzsche or were influenced by him.
Same as: GERMAN 325, TAPS 152L, TAPS 325

GERMAN 131. What is German Literature?. 3-5 Units.
How have migration and minority discourses changed the German literary and cultural tradition? What is German literature today, and how does it differ from the traditional notion of Germany as the land of "Dichter und Denker?" We will read texts by Goethe, Novalis, Annette von Droste-Hülshoff, Thomas Mann, Kafka, Anna Seghers, Brecht, Christa Wolf, Emine Sevgi Özdamar, Yoko Tawada, and Sasha Marianna Salzmann, and discuss such topics as identity formation, race, ethnicity, gender, sexuality, religion, class, and ecocriticism. Taught in German. GERLANG 3 or equivalent required.

GERMAN 132. History and Politics of the Future in Germany, 1900-Present. 3-5 Units.
The twentieth century brought profound changes to Germany, including two World Wars, changing borders, and the division between competing Cold War ideological blocs. At the same time, the necessity to build and reshape Germany also inspired politicians, writers, and filmmakers to think about how society could be made anew. The century especially ushered in a new era for thoughts about the future. Thinkers imagined new technologies, social structures, and political orders as they dreamed about a German future that could be different from its recent past. Furthermore, this period represented a golden age of German science fiction, as authors thought about what the future could and should be.nThis class considers the possibilities that Germans imagined for the future in the face of ambiguous promises of peace and warfare, democracy and totalitarianism, and capitalism and communism. Regardless of whether these hopes, dreams, and fears came to fruition, historical visions of the future illuminate the lives of Germans during the twentieth century.nThis course will use close readings of several types of primary sources, including films, television shows, short stories, political posters, art, and newspaper articles. We will consider what different thinkers anticipated as the possibilities for the development of the country and what they saw as the driving forces of change, such as mechanics and computers, political parties, and social movements. We will discuss which advancements they thought seemed likely and which seemed fantastical. Finally, this class will investigate how the future offered a space for dissident thinkers to articulate their frustrations with state and society.

GERMAN 133. Marx, Nietzsche, Freud. 3-5 Units.
We read and discuss selections from works by the key master thinkers who have exerted a lasting influence by debunking long-cherished beliefs. Do these authors uphold or repudiate Enlightenment notions of rationality, autonomy and progress? How do they assess the achievements of civilization? How do their works illuminate the workings of power in social and political contexts? Readings and discussion in German.

GERMAN 134. Freud's Vienna. 3-5 Units.
This course is an introduction to the literature and culture of Vienna between 1890 and 1918. The last decades of the Habsburg Empire are often considered a "Golden Age" for bourgeois Viennese Jews, albeit one with its end already visible on the horizon. Students in the course will explore the city through the eyes of several of Vienna's most prominent writers, including Sigmund Freud and Arthur Schnitzler, and seek their own answers to the questions of the era: Was this a Golden Age at all, and if so, for whom?.

GERMAN 135. German Conversation. 3 Units.
This small, individualized course will offer students the chance to work on their spoken expression and critical thinking, in German. Topics will change each quarter but will span contemporary politics and culture, film, literature, and visual arts. The focus will be on speaking German in small groups, as opposed to formal presentations or written assignments. Students will have the opportunity to pursue topics of personal interest, as well as work collaboratively and individually on projects intended to foster advanced communicative skills.
Same as: GERMAN 235

GERMAN 141. The Magic Mountain: Your Travel Guide to a Great Novel. 1-3 Unit.
In this course, students will read their way through one of the great German novels, Thomas Mann's The Magic Mountain (Der Zauberberg, 1924) an epic stock-taking of European thought and sensibility between the world wars. Students will meet and discuss the novel weekly, each time under the guidance of a different tour guide Stanford faculty, superfans and professors from other institutions. No final paper, no readings other than the novel required. All readings in German (though an English translation will be made available), class discussion in English.

GERMAN 141A. Mephisto: Your Travel Guide to a Great Novel. 1-3 Unit.
In this course, students will read their way through one of the most disputed German novels in the postwar Federal Republic, Klaus Mann's "Mephisto" (1936 published in exile in Amsterdam) a satirical novel about opportunism and the German theater scene during the NS-Regime. Students will meet and discuss the novel weekly, each time under the guidance of a different tour guide Stanford faculty and professors from other institutions. No final paper, no readings other than the novel required. All readings in German (though an English translation will be made available), class discussion in English. NOTE: This course must be taken for a minimum of 3 units and a letter grade to be eligible for Ways credit.

GERMAN 141C. Gottfried's "Tristan and Isolde" - Your Travel Guide to a Great Novel. 1-3 Unit.
Does true love have to break with the rules and norms of society? Gottfried's "Tristan and Isolde," a masterpiece of medieval epic poetry, follows this question through its portrayal of a tragic romance. The course will close-read, analyze and discuss this milestone of German literature, focusing in particular on its notions of love, loyalty, fate, and honor. Later sessions will also include modern adaptations of the Tristan story. Contributions by invited guest speakers and experts will provide different perspectives for us to discuss.

GERMAN 142. Feminist Avant Garde. 3-5 Units.
Feminist Avant Garde.
Same as: GERMAN 342

GERMAN 147. The Conservative Revolution. 3-5 Units.
Rapid modernization in early twentieth-century Germany elicited various conservative criticisms, which became particularly acute after the First World War. The thinkers of the Conservative Revolution gave voice to post-Nietzschean concerns about cultural transformation, combining traditionalist and anti-traditionalist positions. Its legacy anticipates current discussions regarding post-modernity, post-democracy, and the impact of technological change. Texts by authors such as: Jünger, Heidegger, Hofmannsthal, Borchardt, Mann, Arendt, Marcuse. Taught in English.
Same as: GERMAN 347

GERMAN 157. What kind of Information is Poetry. 1-5 Unit.
"Only a fool reads poetry for facts": To read a poem with the same fact-seeking attention required by using a dictionary, reading a newspaper article, or following a recipe is, perhaps, foolish. But if it is, it is so only because it means the reader has not understood what a poem is supposed to do. Consider Wittgenstein's famous warning: "Do not forget that a poem, even though it is composed in the language of information, is not used in the language-game of giving information." A poem, even though it is made of the same (kinds of) words as information, ought not to be treated as information (the sentence seems to say). Distinct in their respective functions, poetry and information form two ends of an opposition: one for the creative possibilities for human expression, the other for the practical and mechanical tasks of everyday life.nBut what really "is" information? Has poetry not, since the beginning of time, also functioned as vehicle for storing, quantifying, and communicating things¿from historical events, the law, to agricultural manuals, just as "informational" texts do? How has the emergence of technological media in our so-called Information Age altered, reinforced, or revolutionized the place of poetry in the realm of human communication?nThese questions will motivate this course, which is also a general introduction to poetry and poetics. We will closely read German texts from the Musipilli to digital-born poetry, and secondary material from thinkers and theorists such as Schlegel, Schleiermacher, Benjamin, Wittgenstein, Flusser, and Bense, to learn how various methods of reading and literary criticism - from formalism and structuralism to Digital Humanities approaches - have developed alongside something like "information" as literary quality and social form.nAssistant Professor Lea Pao will teach this course.
Same as: GERMAN 357

GERMAN 174. The Poem as Medium. 3-5 Units.
Since Marshall McLuhan formulated his theory of "media" as "extensions of ourselves," we've come to understand the history of human communication in terms of its physical carriers, tools, and technologies. From cuneiform, hieroglyphs, and logographic writing systems, to the alphabet, to algorithms; from clay tablets, to papyrus, to LED screens; from scrolls, to books, to the gramophone, to DNA - the medium and the message shape how we store and communicate information. Poetry's place in this history of media has been both elusive and strangely consistent. In media theory, the poem, which Hans Magnus Enzensberger once called an "archaic medium" and Niklas Luhman a "paradoxical form of communication," often serves as an example of the non-ordinary, of opacity, untranslatability, self-mediation, or hypermediacy. We will read (often lesser known) texts by media theorists (McLuhan, Kittler, Flusser, Benjamin, Luhmann, Siegfried J. Schmidt, Hayles) and a selection of pre-media theory texts on the mediality and mediacy of poetry (Lessing, Hegel, Herder Schleiermacher, Hamburger), as well as one poem each week as we explore the relation between medium and message, content and form. Taught in German.
Same as: GERMAN 374

GERMAN 175. CAPITALS: How Cities Shape Cultures, States, and People. 3-5 Units.
This course takes students on a trip to major capital cities, at different moments in time: Renaissance Florence, Golden Age Madrid, Colonial Mexico City, Enlightenment and Romantic Paris, Existential and Revolutionary St. Petersburg, Roaring Berlin, Modernist Vienna, and bustling Buenos Aires. While exploring each place in a particular historical moment, we will also consider the relations between culture, power, and social life. How does the cultural life of a country intersect with the political activity of a capital? How do large cities shape our everyday experience, our aesthetic preferences, and our sense of history? Why do some cities become cultural capitals? Primary materials for this course will consist of literary, visual, sociological, and historical documents (in translation); authors we will read include Boccaccio, Dante, Sor Juana, Montesquieu, Baudelaire, Gogol, Irmgard Keun, Freud, and Borges. Note: To be eligible for WAYS credit, you must take the course for a Letter Grade.

GERMAN 181. Philosophy and Literature. 3-5 Units.
What, if anything, does reading literature do for our lives? What can literature offer that other forms of writing cannot? Can fictions teach us anything? Can they make people more moral? Why do we take pleasure in tragic stories? This course introduces students to major problems at the intersection of philosophy and literature. It addresses key questions about the value of literature, philosophical puzzles about the nature of fiction and literary language, and ways that philosophy and literature interact. Readings span literature, film, and philosophical theories of art. Authors may include Sophocles, Dickinson, Toni Morrison, Proust, Woolf, Walton, Nietzsche, and Sartre. Students master close reading techniques and philosophical analysis, and write papers combining the two. This is the required gateway course for the Philosophy and Literature major tracks. Majors should register in their home department.

GERMAN 188. In Search of the Holy Grail: Percival's Quest in Medieval Literature. 3-5 Units.
This course focuses on one of the most famous inventions of the Middle Ages: the Holy Grail. The grail - a mysterious vessel with supernatural properties - is first mentioned in Chrétien de Troyes' "Perceval," but the story is soon rewritten by authors who alter the meaning of both the grail and the quest. By reading three different versions, we will explore how they respond differently to major topics in medieval culture and relevant to today: romantic love, family ties, education, moral guilt, and spiritual practice. The texts are: Chrétien de Troyes' "Perceval," Wolfram von Eschenbach's "Parzival," and the anonymous "Queste del Saint Graal." All readings will be available in English.
Same as: COMPLIT 188, COMPLIT 388, GERMAN 388

GERMAN 189. KRUPP-FLEX: Work-Life Balance in Today's Germany. 2-3 Units.
This class is being offered in collaboration with Stanford in Berlin, Bing Overseas Studies Program. This course will accompany and deepen the experience of Krupp Interns living and working in German cities and towns in summer 2021. Their participant observations in the workplace and in Germany's rich leisure culture, as well as critical consideration of their own assumptions and experiences in the context of cultural exploration, will be recorded in a reflective Arbeitsjournal (critical journal -- genre and language at the discretion of the student). These reflections will be informed by regular reading of the German press (print or online) around themes on which students choose to focus -- be that the history behind the extensive rights and social services that support labor in Germany; or habits, mores and modes of personal interaction in and outside the workplace; or attitudes toward diversity, gender, class in contemporary German culture; or topics of immediate socio-political concern that lend themselves to comparative reflection with home-country culture (e.g. immigration and asylum, structure of systemic and social responses to COVID 19, environmental awareness, vocational training); or religion, or sport culture, or indeed the specific professional sector of the internship itself. Students will submit their completed journals with an annotated reading list at the end of the summer and will give a short presentation during the mandatory Internship Seminar in late August of 2021. Permission code required. You will receive a permission code from Cornelia Kastelan - ckastelan@stanford.edu. This course is restricted to Krupp Internship students in the Program for Stanford Students in Germany.

GERMAN 191. German Capstone Project. 1 Unit.
Each student participates in a capstone interview and discussion with a panel of the German Studies faculty on topics related to German cultural and literary analysis. In prepration for the interview/discussion, students submit written answers to a set of questions based on several authentic cultural texts in German. The written answers, normally in English, should be well-formed and coherent. Within the interview/discussion, students must demonstrate a further understanding of the topic(s) posed, through cogent argument.

GERMAN 199. Individual Work. 1-12 Unit.
Repeatable for Credit. Instructor Consent Required.

GERMAN 206. Turkish-German Literature, Cinema, and Theater. 3-5 Units.
One in five people in Germany now has, as it is termed, a background of migration. Immigration from Turkey is probably the most prominent not only in terms of its massiveness and demographic consequences, but also for its significant role in changing Germany's overall cultural, social, and economic landscape. In this course, through analyzing selected literary works, films, and plays produced by Turkish-German writers and artists, we will discuss complex ideas like migration, ethnicity, race, religion, gender, and class, resorting not to oversimplifications and binary thinking but instead to relevant literary concepts and formative historical moments which have shaped the Turkish-German experience. Remote synchronous with plenty of opportunities to participate in group and breakout room discussions and creative projects.
Same as: GERMAN 106

GERMAN 213. Medieval Germany, 900-1250. 1-5 Unit.
(Undergraduates may sign up for German 213 or History 213F, graduate students should sign up for German 313 or History 313F. This course may be taken for variable units. Check the individual course numbers for unit spreads.) This course will provide a survey of the most important political, historical, and cultural events and trends that took place in the German-speaking lands between 900 and 1250. Important themes include the evolution of imperial ideology and relations with Rome, expansion along the eastern frontier, the crusades, the investiture controversy, the rise of powerful cities and civic identities, monastic reform and intellectual renewal, and the flowering of vernacular literature.nnTo satisfy a Ways requirement, this course must be taken for at least 3 units. In AY 2020-21, a letter grade or "CR" grade satisfies the Ways requirement.
Same as: GERMAN 313, HISTORY 213F, HISTORY 313F

GERMAN 215. The Queer 20th Century: German LGBTQ Literature and Film. 3-5 Units.
What was it like to be queer in 20th-century Germany? This course examines the rich and sometimes surprising LGBTQ culture of 20th-century Germany, featuring stories that are often left out of traditional seminars. Through literature and film, we will learn about pioneering gay rights activists, persecution under National Socialism, emancipation movements under capitalism and socialism, and debates that are shaping queer life in contemporary Germany. Taught in English; students of all backgrounds are very welcome. Remote synchronous, with plenty of opportunities for breakout rooms, student discussion, Zoom breaks, and off-screen work.
Same as: FEMGEN 115A, FEMGEN 215A, GERMAN 115

GERMAN 222. Myth and Modernity. 3-5 Units.
Masters of German 20th- and 21st-Century literature and philosophy as they present aesthetic innovation and confront the challenges of modern technology, social alienation, manmade catastrophes, and imagine the future. Readings include Nietzsche, Freud, Rilke, Musil, Brecht, Kafka, Doeblin, Benjamin, Juenger, Arendt, Musil, Mann, Adorno, Celan, Grass, Bachmann, Bernhardt, Wolf, and Kluge. Taught in English. Note for German Studies grad students: GERMAN 322 will fulfill the grad core requirement since GERMAN 332 is not being offered this year. NOTE: Enrollment requires Professor Eshel's consent. Please contact him directly at eshel@stanford.edu and answer these 2 questions: "Why do you want to take this course?" and "What do you think you can add to the discussion?" Applications will be considered in the order in which they were received. Enrollment is limited to 20 students.
Same as: COMPLIT 222A, GERMAN 322, JEWISHST 242G, JEWISHST 342

GERMAN 230. German Literature (800-1700). 3-5 Units.
In this seminar we will read and discuss a number of key medieval texts: Hartmann von Aue's "Gregorius," Wolfram von Eschenbach's "Parzival," Alber's "Tnugdalus," sermons by Meister Eckhart and a selection of twelfth-century religious poetry. Discussions will focus on sin, atonement and subjectivity. Some course materials are only available in German.
Same as: GERMAN 330

GERMAN 231. German Literature (1700-1900). 3-5 Units.
How the literature of the period between 1750 and 1900 gives voice to new conceptions of selfhood and articulates the emergent self-understanding of modernity. Responses to unprecedented historical experiences such as the French Revolution and the ensuing wars, changes in the understanding of nature, the crisis of foundations, and the persistence of theological motifs. Lessing, Herder, Goethe, Schiller, Holderlin, Kleist, Heine, Buchner, Keller, and Fontane. Taught in English, readings in German.
Same as: GERMAN 331

GERMAN 232. German Literature 3: Modernity and the Unspeakable. 3-5 Units.
Masterpieces of German literature, drama, and film from the first half of the 20th century. Particular focus on modernism and the crisis of language. What urgent truths (whether psychological, political, spiritual, or sexual) cannot be expressed, and how do art and dreams attempt to speak the unspeakable? Readings and viewings include works by Hofmannsthal, Schnitzler, Freud, Wedekind, Mann, Musil, Kafka, Toller, Höch, Rilke, Schoenberg, Riefensthal, Benjamin, and Brecht. Taught in English.
Same as: GERMAN 332

GERMAN 235. German Conversation. 3 Units.
This small, individualized course will offer students the chance to work on their spoken expression and critical thinking, in German. Topics will change each quarter but will span contemporary politics and culture, film, literature, and visual arts. The focus will be on speaking German in small groups, as opposed to formal presentations or written assignments. Students will have the opportunity to pursue topics of personal interest, as well as work collaboratively and individually on projects intended to foster advanced communicative skills.
Same as: GERMAN 135

GERMAN 237. Fascism after Fascism. 3-5 Units.
When World War II ended, most of the states that described themselves as "fascist" ended with it. Nevertheless, fascism haunted postwar democracy as an ever-present threat. The question of what exactly had characterized fascism, and what parts of it persisted within liberal democracies themselves, were continuously and contentiously debated. This question has emerged all the more forcefully in recent years as "illiberal," or "right-wing populist," movements and governments have begun to question the basic premises of liberal democracy. What was fascism, and what would it mean for it to return? This course considers writings by philosophers, historians, journalists and writers, and moves from early anti-fascist writings to critiques of online movements and neo-reactionaries.
Same as: COMPLIT 237

GERMAN 239. Queer Theory. 3-5 Units.
Do we really need a theory in order to be queer? Queer Theory emerged in response to feminist thought, and the study of the history of sexuality, building on their insights, but also uncovering their blind spots. Without Queer Theory, few of the discourses around desire, power and gender identity that we take for granted on college campuses today would exist. Yet there is also a real risk that reality has left the theory behind. In this course, we will try to answer the question: What do we need queer theory for? Do we still need it? And if so, of what kind? The course is designed to introduce students to core texts of queer theory, and to connect them to current debates, be this around trans rights, the representation of homosexuality or the fight against campus sexual assault.
Same as: COMPLIT 239, FEMGEN 239

GERMAN 253. Hannah Arendt: Facing Totalitarianism. 3-5 Units.
Like hardly any other thinker of the modern age, Hannah Arendt's thought offers us timeless insights into the fabric of the modern age, especially regarding the perennial danger of totalitarianism. This course offers an in-depth introduction to Arendt's most important works in their various contexts, as well as a consideration of their reverberations in contemporary philosophy and literature. Readings include Arendt's The Origin of Totalitarianism, The Human Condition, Between Past and Future, Men in Dark Times, On Revolution,Eichmann in Jerusalem, and The Life of the Mind, as well as considerations of Hannah Arendt's work by Max Frisch, Jürgen Habermas, Seyla Benhabib, Judith Butler, Giorgio Agamben, and others. Special attention will be given to Arendt's writings on literature with an emphasis on Kafka, Brecht, Auden, Sartre, and Camus. This course will be synchronously conducted, but will also use an innovative, Stanford-developed, online platform called Poetic Thinking. Poetic Thinking allows students to share both their scholarly and creative work with each other. Based on the newest technology and beautifully designed, it greatly enhances their course experience.
Same as: COMPLIT 353B, GERMAN 353, JEWISHST 243A

GERMAN 256. Thomas Bernhard. 3-5 Units.
This is a course about the Austrian writer Thomas Bernhard, his work, and his time.
Same as: GERMAN 356

GERMAN 261. Theorie des Erzählens. 3-5 Units.
This course approaches the history of narrative theory from the German perspective: we will read canonical and foundational texts that have shaped the way we read and study narrative¿from the usual suspects (Gerard Genette, Yuri Lotman, Tzvetan Todorov, Algirdas Julien Greimas) to the (here) lesser known German theorists of narrative forms and literary theory (Frank K. Stanzel, Käte Hamburger, Monika Fludernik, Siegfried J. Schmidt). Alongside these theoretical approaches, we will read two German novels, which we¿ll use as experimental playground to better test and understand how and why literary theory can help us construct models of reading, world-making, human experience, and storytelling. Towards the end of the course, we¿ll switch to the open questions and future of narrative theory: what media of long-form storytelling come after the novel? What do they have in common with, say, the novels of J.W. Goethe, Adalbert Stifter, Lou Andreas-Salomé, or Ingeborg Bachmann? How would we expand narrative theory to include today¿s most important and engaging sites of storytelling (like video games or serial television)? Taught in German.
Same as: GERMAN 361

GERMAN 265. Middle High German. 1-3 Unit.
Middle High German (MHG), a form of German spoken in the High Middle Ages c. 1050¿1350, constitutes one of the most important medieval languages of Europe. Numerous fundamental classics of European literature were originally composed in MHG, among them the Nibelungenlied, Wolfram von Eschenbach¿s Parzival, and Meister Eckhart¿s German Sermons. Reading skills in this language will thus allow literary scholars and historians to both appreciate well-known texts in their original form and access a range of untranslated literary works and sources. Working with different textual examples, students will learn how to read and translate MHG texts. They will additionally gain an overview of the history of the German language. Focusing on reading comprehension, this course will take a hands-on approach to key methods and concepts of historical linguistics (etymology, dialectology, historical semantics, phonetic history, premodern Germanic morphology and syntax). Additionally, students will learn how to work with printed and digital tools for translating MHG texts (lexical databases, dictionaries, historical grammars). German skills of intermediate level or higher are required. Assignments include weekly translation exercises.

GERMAN 267. Prospects for Transatlantic Relations: What Holds the West Together?. 1-2 Unit.
This seminar treats disintegration tendencies in the trans-Atlantic West, including the impact of China and Russia in globalization and north-south issues inside the EU. This course involves participation in an international conference during October and the preparation of individual research papers.nMeeting times: This seminar will meet from 9:00 to 11:00am in room 260-252 on Monday, October 21, Wednesday, October 23 and Friday, October 25, 2019.
Same as: GERMAN 367

GERMAN 268. Socialism: Theory, Literature, Practice. 3-5 Units.
The prospect of socialism has circulated in the cultural and political programs of many countries, and socialist programs have informed the real governance structures in some. This course examines some of the theoretical texts that have described socialism as well as critical responses. In addition, the treatment of socialism in literature will be discussed as well as considerations of the outcomes of institutionalized programs. Readings will include texts by authors such as Marx, Lenin, Hayek, Friedman, Koestler, Steinbeck, Wolf, Brauenig, Wright and others.
Same as: COMPLIT 268

GERMAN 270. Sovereignty and the Limits of Globalization and Technology. 3-5 Units.
Current opposition to globalization is emerging in many countries in the various forms of populism, restrictive trade policies, protest parties and localism, accompanied by appeals to national interests and cultural traditions. At stake is the reassertion of state sovereignty against market processes and internationalist claims. This seminar explores the tensions between state and market, their cultural contexts, new technologies, and the importance of community belonging. Readings include texts by authors such as Marx, Nietzsche, Schmitt, Strauss, Girard, Lasch, Bloom, Appiah. Student research projects on contemporary topics. NOTE: To be considered for enrollment in this course, please complete and submit this short application by October 19, 2018, 11:59pm PST. Students accepted to participate in this course will be notified on October 26, 2018 by 6:00pm. Auditors are not permitted.nLink to application: http://web.stanford.edu/~conorato/german270.fb.

GERMAN 275. Outer Space Exploration in Germany in the Twentieth Century. 1-5 Unit.
Since the nineteenth century, Germans, like their counterparts around the world, have considered the meaning and the role of humanity in outer space. As space travel developed from a dream to a reality, and as Germany changed borders and political systems among empires, dictatorships, socialist states, and capitalist states, German interest in spaceflight remained, although the meaning found in the stars changed dramatically. This course considers Germans' dreams of and predictions for outer space travel alongside German technological developments in spaceflight. It includes the different German states throughout the century, including Weimar Germany, National Socialism, East Germany, and West Germany. The course looks at science fiction films and novels, newspaper reports, scientific developments, and German space engineering projects, which together demonstrate how and why space travel often found high levels of support in Germany. Students will engage in historical and cultural analysis through course readings, discussions, and assignments.nNOTE: To be eligible for WAYS credit, you must take this course for a minimum of 3 units and a letter grade.
Same as: HISTORY 237G

GERMAN 277. Stagnation or Progress. 3-5 Units.
Vibrant cultures draw on the dynamism of innovation and creativity, but they can decline through stagnation, forms of which we have been facing in recent years: deceleration of technological innovation, prospects of slowed economic growth, and a generalized cultural stagnation or decadence. This seminar examines this problem and asks about antidotes, whether as progress, renaissance, or disruption. Readings drawn from authors such as Nietzsche, Burckhardt, Spengler Strauss, Girard, Lasch and contemporary treatments of technology, economy and culture. Taught in English. NOTE: To be considered for enrollment in this course, please complete and submit this short application by January 31, 2020, 11:59pm PST. Students accepted to participate in this course will be notified on February 7, 2020 by 6:00pm. Auditors are not permitted. nLink to syllabus: https://stanford.box.com/s/h18yow1j80zv9vvlbk64suchzs2c0rcc Link to application: http://web.stanford.edu/~conorato/german277.fb.

GERMAN 281. G.W.F. Hegel: System, History, Dialectics. 3-5 Units.
This course is intended to introduce students to the study of G.W.F. Hegel. The seminar will read several of Hegel's central works and discuss his reception in the later 19th and 20th century.

GERMAN 283A. Modern Notions of 'The Holy'. 3-5 Units.
This course explores the question, "What may we call 'holy' in the modern era?" by focusing on key writers and thinkers, who in various ways, and in different times raised this question: Friedrich Hölderlin, Hermann Cohen, Franz Kafka, Martin Heidegger, Martin Buber, Franz Rosenzweig, Else Lasker-Schüler, Walter Benjamin, Ernst Bloch, Hannah Arendt, Margarete Susman, Nelly Sachs, Paul Celan, and Judith Butler.nnThis course will be synchronous-conducted, but will also use an innovative, Stanford-developed, on-line platform called Poetic Thinking. Poetic Thinking allows students to share both their scholarly and creative work with each other. Based on the newest technology and beautifully designed, it will greatly enhance their course experience.

GERMAN 286. Forming the world: Pragmatism and Aesthetics. 3-5 Units.
This course will explore key pragmatist philosophical and theoretical approaches to literature, the visual arts, and music. How are human lives mediated by and through aesthetic experience, in the realm of the private as well as the public. Rather than positing a metaphysical idea of beauty, the thinkers and artists we engage ask how texts and artworks render us sensitive to our multifaceted contingencies, and how we may speak and write about them. Readings and viewings include R. W. Emerson, Friedrich Nietzsche, Emily Dickinson, Martin Heidegger, John Dewey, T. W. Adorno, Hannah Arendt, Richard Rorty, Terrence Malick, J. M. Coetzee, Bruno Latour, Marilynne Robinson, Nancy Fraser, Rita Felski, Tania Bruguera, Yivve Citton, Richard Moose, Cheryl Misak, and Shannon Sullivan, among others.
Same as: COMPLIT 286

GERMAN 313. Medieval Germany, 900-1250. 1-5 Unit.
(Undergraduates may sign up for German 213 or History 213F, graduate students should sign up for German 313 or History 313F. This course may be taken for variable units. Check the individual course numbers for unit spreads.) This course will provide a survey of the most important political, historical, and cultural events and trends that took place in the German-speaking lands between 900 and 1250. GERMAN 343. World War Two: Place, Loss, History. 5 Units.
A consideration of how the Second World War still goes on today in the form of haunted absences and vivid representations. Studying literature and art in detail, the seminar will center on some of the places where those absences and representations gather: Portbou, Pearl Harbor, Auschwitz, Guadalcanal, London, Berlin, Hamburg, Rome, Omaha Beach, Peleliu, Monte Cassino, Hollywood. Writers and artists include: James Jones, Georges Didi-Huberman, Walter Benjamin, Eduardo Cadava, W.G. Sebald, Rachel Whiteread, Ingeborg Bachman, Wis¿awa Szymborska, Eugene Sledge, Hans Erich Nossack, Jorie Graham, Gerhard Richter, Dani Karavan, Tom Lea, W. Eugene Smith, Val Lewton, and Terrence Malick.
Same as: ARTHIST 401

GERMAN 347. The Conservative Revolution. 3-5 Units.
Rapid modernization in early twentieth-century Germany elicited various conservative criticisms, which became particularly acute after the First World War. The thinkers of the Conservative Revolution gave voice to post-Nietzschean concerns about cultural transformation, combining traditionalist and anti-traditionalist positions. Its legacy anticipates current discussions regarding post-modernity, post-democracy, and the impact of technological change. Texts by authors such as: Jünger, Heidegger, Hofmannsthal, Borchardt, Mann, Arendt, Marcuse. Taught in English.
Same as: GERMAN 147

GERMAN 353. Hannah Arendt: Facing Totalitarianism. 3-5 Units.
Like hardly any other thinker of the modern age, Hannah Arendt's thought offers us timeless insights into the fabric of the modern age, especially regarding the perennial danger of totalitarianism. This course offers an in-depth introduction to Arendt's most important works in their various contexts, as well as a consideration of their reverberations in contemporary philosophy and literature. Readings include Arendt's The Origin of Totalitarianism, The Human Condition, Between Past and Future, Men in Dark Times, On Revolution,Eichmann in Jerusalem, and The Life of the Mind, as well as considerations of Hannah Arendt's work by Max Frisch, Jürgen Habermas, Seyla Benhabib, Judith Butler, Giorgio Agamben, and others. Special attention will be given to Arendt's writings on literature with an emphasis on Kafka, Brecht, Auden, Sartre, and Camus. This course will be synchronously conducted, but will also use an innovative, Stanford-developed, online platform called Poetic Thinking. Poetic Thinking allows students to share both their scholarly and creative work with each other. Based on the newest technology and beautifully designed, it greatly enhances their course experience.
Same as: COMPLIT 353B, GERMAN 253, JEWISHST 243A

GERMAN 356. Thomas Bernhard. 3-5 Units.
This is a course about the Austrian writer Thomas Bernhard, his work, and his time.
Same as: GERMAN 256

GERMAN 357. What kind of Information is Poetry. 1-5 Unit.
"Only a fool reads poetry for facts": To read a poem with the same fact-seeking attention required by using a dictionary, reading a newspaper article, or following a recipe is, perhaps, foolish. But if it is, it is so only because it means the reader has not understood what a poem is supposed to do. Consider Wittgenstein's famous warning: "Do not forget that a poem, even though it is composed in the language of information, is not used in the language-game of giving information." A poem, even though it is made of the same (kinds of) words as information, ought not to be treated as information (the sentence seems to say). Distinct in their respective functions, poetry and information form two ends of an opposition: one for the creative possibilities for human expression, the other for the practical and mechanical tasks of everyday life.nBut what really "is" information? Has poetry not, since the beginning of time, also functioned as vehicle for storing, quantifying, and communicating things¿from historical events, the law, to agricultural manuals, just as "informational" texts do? How has the emergence of technological media in our so-called Information Age altered, reinforced, or revolutionized the place of poetry in the realm of human communication?nThese questions will motivate this course, which is also a general introduction to poetry and poetics. We will closely read German texts from the Musipilli to digital-born poetry, and secondary material from thinkers and theorists such as Schlegel, Schleiermacher, Benjamin, Wittgenstein, Flusser, and Bense, to learn how various methods of reading and literary criticism - from formalism and structuralism to Digital Humanities approaches - have developed alongside something like "information" as literary quality and social form.nAssistant Professor Lea Pao will teach this course.
Same as: GERMAN 157

GERMAN 358. Seminar in Medieval German Studies. 3-5 Units.
In this weekly seminar we will read primary materials, and important scholarship, and discuss ongoing debates and trends in medieval studies. The reading list will be determined in consultation with the participants; students will be invited to share their own work with the group. All graduate students working in medieval studies or interested in deepening their familiarity with medieval studies are encouraged to participate.

GERMAN 361. Theorie des Erzählens. 3-5 Units.
This course approaches the history of narrative theory from the German perspective: we will read canonical and foundational texts that have shaped the way we read and study narrative¿from the usual suspects (Gerard Genette, Yuri Lotman, Tzvetan Todorov, Algirdas Julien Greimas) to the (here) lesser known German theorists of narrative forms and literary theory (Frank K. Stanzel, Käte Hamburger, Monika Fludernik, Siegfried J. Schmidt). Alongside these theoretical approaches, we will read two German novels, which we¿ll use as experimental playground to better test and understand how and why literary theory can help us construct models of reading, world-making, human experience, and storytelling. Towards the end of the course, we¿ll switch to the open questions and future of narrative theory: what media of long-form storytelling come after the novel? What do they have in common with, say, the novels of J.W. Goethe, Adalbert Stifter, Lou Andreas-Salomé, or Ingeborg Bachmann? How would we expand narrative theory to include today¿s most important and engaging sites of storytelling (like video games or serial television)? Taught in German.
Same as: GERMAN 261

GERMAN 367. Prospects for Transatlantic Relations: What Holds the West Together?. 1-2 Unit.
This seminar treats disintegration tendencies in the trans-Atlantic West, including the impact of China and Russia in globalization and north-south issues inside the EU. This course involves participation in an international conference during October and the preparation of individual research papers.nMeeting times: This seminar will meet from 9:00 to 11:00am in room 260-252 on Monday, October 21, Wednesday, October 23 and Friday, October 25, 2019.
Same as: GERMAN 267

GERMAN 369. Introduction to the Profession of Literary Studies. 1-2 Unit.
A survey of how literary theory and other methods have been made institutional since the nineteenth century. The readings and conversation are designed for entering Ph.D. students in the national literature departments and comparative literature.
Same as: COMPLIT 369, DLCL 369, FRENCH 369, ITALIAN 369

GERMAN 374. The Poem as Medium. 3-5 Units.
Since Marshall McLuhan formulated his theory of "media" as "extensions of ourselves," we've come to understand the history of human communication in terms of its physical carriers, tools, and technologies. From cuneiform, hieroglyphs, and logographic writing systems, to the alphabet, to algorithms; from clay tablets, to papyrus, to LED screens; from scrolls, to books, to the gramophone, to DNA - the medium and the message shape how we store and communicate information. Poetry's place in this history of media has been both elusive and strangely consistent. In media theory, the poem, which Hans Magnus Enzensberger once called an "archaic medium" and Niklas Luhman a "paradoxical form of communication," often serves as an example of the non-ordinary, of opacity, untranslatability, self-mediation, or hypermediacy. We will read (often lesser known) texts by media theorists (McLuhan, Kittler, Flusser, Benjamin, Luhmann, Siegfried J. Schmidt, Hayles) and a selection of pre-media theory texts on the mediality and mediacy of poetry (Lessing, Hegel, Herder Schleiermacher, Hamburger), as well as one poem each week as we explore the relation between medium and message, content and form. Taught in German.
Same as: GERMAN 174

GERMAN 383A. Modern Notions of 'The Holy'. 3-5 Units.
This course explores the question, "What may we call 'holy' in the modern era?" by focusing on key writers and thinkers, who in various ways, and in different times raised this question: Friedrich Hölderlin, Hermann Cohen, Franz Kafka, Martin Heidegger, Martin Buber, Franz Rosenzweig, Else Lasker-Schüler, Walter Benjamin, Ernst Bloch, Hannah Arendt, Margarete Susman, Nelly Sachs, Paul Celan, and Judith Butler.nnThis course will be synchronous-conducted, but will also use an innovative, Stanford-developed, on-line platform called Poetic Thinking. Poetic Thinking allows students to share both their scholarly and creative work with each other. Based on the newest technology and beautifully designed, it will greatly enhance their course experience.
Same as: COMPLIT 283A, COMPLIT 383A, GERMAN 283A, RELIGST 283A, RELIGST 383A

GERMAN 384. The Nervous Age: Neurosis, Neurology, and Nineteenth-century Theatre. 1-4 Unit.
The nineteenth century witnessed profound developments in neurological and psychological sciences, developments that fundamentally altered conceptions of embodiment, agency, and mind. This course will place these scientific shifts in conversation with theatrical transformations of the period. We will read nineteenth-century neuropsychologists such as Charles Bell, Johannes Müller, George Miller Beard, Jean-Martin Charcot, and Hippolyte Bernheim alongside artists such as Percy Shelley, Georg Büchner, Richard Wagner, Émile Zola, and August Strindberg. NOTE: Only for German Studies PhD students.

GERMAN 388. In Search of the Holy Grail: Percival's Quest in Medieval Literature. 3-5 Units.
This course focuses on one of the most famous inventions of the Middle Ages: the Holy Grail. The grail - a mysterious vessel with supernatural properties - is first mentioned in Chrétien de Troyes' "Perceval," but the story is soon rewritten by authors who alter the meaning of both the grail and the quest. By reading three different versions, we will explore how they respond differently to major topics in medieval culture and relevant to today: romantic love, family ties, education, moral guilt, and spiritual practice. The texts are: Chrétien de Troyes' "Perceval," Wolfram von Eschenbach's "Parzival," and the anonymous "Queste del Saint Graal." All readings will be available in English.
Same as: COMPLIT 188, COMPLIT 388, GERMAN 188

GERMAN 396. German Studies Lecture Series. 1 Unit.
What's happening in German Studies today? The GSLS invites 3 speakers per quarter to present on their work and research in German literature, culture, politics, and history, offering students an insight into the current field of German Studies and an engagement with topics ranging from medieval fabrics to the refugee crisis. Luncheons are scheduled every first Tuesday of the month. To earn the unit for this course, students will attend the lecture, read 1-2 articles or book chapters written by the speaker of the week, and complete one short 2-page writing assignment (this could be a reflection, a review, a creative assignment, a poetic adaptation of a talk - we'll discuss).

GERMAN 397. Graduate Studies Colloquium. 1 Unit.
Colloquium for graduate students in German Studies. Taught in English. May be repeated for credit.

GERMAN 399. Individual Work. 1-12 Unit.
Repeatable for Credit. Instructor Consent Required.

GERMAN 680. Curricular Practical Training. 1-3 Unit.
CPT course required for international students completing degree. nPrerequisite: German Studies Ph.D candidate.

GERMAN 802. TGR Dissertation. 0 Units.
.

GLOBAL STUDIES

The Stanford Global Studies Division (SGS) is a hub for internationally focused research and teaching on campus. SGS prepares Stanford students for the world through an interdisciplinary education that cultivates knowledge of different cultures, and deepens our understanding of the global affairs through innovative research. Stanford Global Studies is comprised of 14 centers and programs, which are described below.

Global Studies Minor

The Global Studies minor (https://sgs.stanford.edu/programs-centers/global-studies-minor/) is available to Stanford undergraduates from any major, and is designed to provide students with the opportunity to pursue interdisciplinary study in one of six specializations, including in-depth language study, while integrating this knowledge into a larger vision of global affairs:

- African Studies (https://africanstudies.stanford.edu/study/academic-programs/undergraduate-minor/)
- European Studies (http://tec.fsi.stanford.edu/node/219264/)
- Iranian Studies (https://iranian-studies.stanford.edu/students/minor/)
- Islamic Studies (https://islamicstudies.stanford.edu/)
- Latin American Studies (https://clas.stanford.edu/academics/undergraduate-minor/)
- South Asian Studies (https://southasia.stanford.edu/)

Students who have participated or plan to participate in the Bing Overseas Studies Program (BOSP) are especially encouraged to enroll as most units earned through the BOSP program satisfy the Global Studies minor.

All students are required to complete 28 units, including a 3 unit gateway course GLOBAL 101 Critical Issues in Global Affairs. The remaining 25 units are unique to each specialization. For questions, contact Dr. Katherine Kuhns at kkuhns@stanford.edu.

To declare the Global Studies minor, students must:

1. Set up an appointment with the appropriate specialization adviser (see appropriate specialization page for contact information).
2. Declare the Global Studies minor and subplan in Axess (http://axess.stanford.edu).

Center for African Studies

Director: James Ferguson
Office: 127 Encina Commons
Web Site: http://africanstudies.stanford.edu (http://africanstudies.stanford.edu/)

The Center for African Studies (CAS) coordinates an interdisciplinary program in African Studies for undergraduates and graduate students. The program seeks to enrich understanding of the interactions among the social, economic, cultural, historical, linguistic, genetic, geopolitical, ecological, and biomedical factors that shape and have shaped African societies. CAS offers a certificate and a specialization in African Studies as part of the Global Studies minor (https://africanstudies.stanford.edu/study/academic-programs/undergraduate-minor/). For further information, see the "African Studies (p. 918)" section of this bulletin.

Center for East Asian Studies

Director: Dafna Zur
Office: Knight Building, 521 Memorial Way
Web Site: http://ceas.stanford.edu (http://ceas.stanford.edu/)

The Center for East Asian Studies (CEAS) supports teaching and research on East Asia-related topics across all disciplines; disseminates knowledge about East Asia through projects of local, regional, national, and international scope; and serves as the intellectual gathering point for a collaborative and innovative community of scholars and students of East Asia. CEAS works with all schools, departments, research centers, and student groups to facilitate and enhance all aspects of East Asia-related research, teaching, outreach, and exchange across the Stanford campus.

For further information, see the "East Asian Studies (p. 1353)" section of this bulletin.

France-Stanford Center for Interdisciplinary Studies

Director: Amalia Kessler
Office: Building 260, Room 122
Web Site: http://francestanford.stanford.edu (http://francestanford.stanford.edu/)

The France-Stanford Center for Interdisciplinary Studies, founded in partnership with the French Ministry of Foreign Affairs, aims to bridge the disciplines of the humanities, social sciences, sciences, engineering, business, and law, addressing historical and contemporary issues of significance for France and the United States. The Center brings together Stanford faculty and students and academics in France to advance collaborative research and foster interdisciplinary inquiry. Its programs include conferences, support for collaborative research projects, internships, exchanges, lectures, and seminars.

Global Studies Internship Program

Web Site: https://global-internships.stanford.edu

The Stanford Global Studies Division offers highly qualified Stanford students an opportunity to extend classroom knowledge of the world to immersive cultural and working experiences every summer through the Global Studies Internship Program. Currently enrolled freshmen, sophomores, juniors, seniors, and coterms at Stanford in all majors are eligible to apply, including students who are undeclared. For more information, visit http://global-internships.stanford.edu/.

WSD HANDA Center for Human Rights and International Justice

Director: David Cohen
Office: Encina Hall West, Room W208
Web Site: https://handacenter.stanford.edu/

The WSD HANDA Center equips a new generation of leaders with the knowledge and skills necessary to protect and promote human rights and dignity for all. Reflecting a deep commitment to international justice and the rule of law, the center collaborates with partners across Stanford University and beyond on innovative programs that foster critical inquiry in the classroom and in the world. The center offers an undergraduate minor. For further information, see the "Human Rights (p. 1642)" section of this bulletin.

Program in International Relations

Director: Kenneth Schultz
Office: Encina Hall West, Room W216
Web Site: http://internationalrelations.stanford.edu (http://internationalrelations.stanford.edu/)

International Relations (IR) is an interdisciplinary undergraduate major focusing on changing political, economic, and cultural relations within the international system in the modern era. The IR program also offers an interdisciplinary minor (p. 1704) and honors program. For further information, see the "International Relations (p. 1691)" section of this bulletin.

Hamid and Christina Moghadam Program in Iranian Studies

Director: Abbas Milani
Office: 615 Crothers Way
Web Site: http://iranian-studies.stanford.edu (http://iranian-studies.stanford.edu/)

The Hamid and Christina Moghadam Program in Iranian Studies at Stanford University provides an interdisciplinary and multidisciplinary platform for the study of modern Iranian history, culture, politics, society, and economy. The program combines pedagogy, policy analysis, and research on all aspects of Iran as a civilization, one of the oldest in the world. The program offers research support, internships, a range of events and initiatives, and a specialization in Iranian Studies as part of the Global Studies minor (https://iranian-studies.stanford.edu/students/minor/).

Sohaib and Sara Abbasi Program in Islamic Studies

Director: Lisa Blaydes
Office: Encina Commons 124D, 615 Crothers Way
Web Site: http://islamicstudies.stanford.edu (http://islamicstudies.stanford.edu/)

The mission of the Sohaib and Sara Abbasi Program in Islamic Studies is to serve as a forum for interdisciplinary research and teaching in Islamic studies, complemented by seminars, colloquia and public lectures. The program seeks to illuminate Islamic history from its beginnings to the 21st century, the religion of Islam in its many aspects, and the diversity of Muslim cultures and societies, past and present, not only in the Middle East but also including South and Southeast Asia, Africa, Europe, and America. In addition to geographical breadth, the program promotes scholarship from both the humanities and the social sciences. The program offers student grants for research and language training and a specialization in Islamic Studies as part of the Global Studies minor (https://islamicstudies.stanford.edu/study/undergraduate-minor/).

Taube Center For Jewish Studies

Director: Ari Kelman
Office: Building 360, Room 362H
Web Site: http://jewishstudies.stanford.edu (http://jewishstudies.stanford.edu/)

The interdisciplinary Taube Center for Jewish Studies coordinates and promotes the study of all aspects of Jewish life. The center offers an undergraduate minor and an interdisciplinary major through the Center for Comparative Studies in Race and Ethnicity (https://ccsre.stanford.edu/academics/undergraduate-program/). For further information, see the "Jewish Studies (p. 1712)" section of this bulletin.

Center for Latin American Studies

Director: Alberto Díaz-Cayeros
Office: Bolivar House
Web Site: http://las.stanford.edu (http://las.stanford.edu/)

The Stanford Center for Latin American Studies supports research and teaching on Latin America by the faculty and students of Stanford in all fields of study. The center offers a master's degree, in addition to a specialization in Latin American Studies as part of the Global Studies minor (https://clas.stanford.edu/academics/undergraduate-minor/). For further information, see the "Center for Latin American Studies (p. 1763)" section of this bulletin.

Mediterranean Studies Forum

Director: Lisa Blaydes
Office: Encina Commons 124D, 615 Crothers Way
Web Site: http://mediterraneanstudies.stanford.edu (http://mediterraneanstudies.stanford.edu/)

The Mediterranean Studies Forum encourages scholars to explore the interplay among societies, cultures, and communities around the Mediterranean Basin from the Middle Ages to the present. The forum also studies the relations of the Mediterranean with other regions and areas of the world. The central goal of the forum is to contribute to interfield and interdisciplinary dialogue among scholars of these areas through lectures, colloquia, workshops, conferences, and publications. Particular programming fields include Turkish Studies and Sephardic Studies.

Center for Russian, East European and Eurasian Studies

Director: Amir Weiner
Office: 615 Crothers Way
Web Site: http://creees.stanford.edu (http://creees.stanford.edu/)

The Center for Russian, East European and Eurasian Studies (CREEES) is Stanford University's hub for the interdisciplinary study of a vast region stretching from the former Berlin Wall to the Bering Strait. CREEES is home to a one year master's degree, and supports undergraduates and graduate students throughout campus, especially in regards to funding for research and language study. CREEES also hosts renowned visiting scholars, lecture series, conferences, and public events. For further information, see the "Center for Russian, East European and Eurasian Studies (p. 2060)" section of this bulletin.

Center for South Asia

Director: Jisha Menon
Office: 615 Crothers Way
Web Site: http://southasia.stanford.edu (http://southasia.stanford.edu/)

The Center for South Asia (CSA) serves to coordinate and develop Stanford's resources for the study of South Asia across all the disciplines in the School of Humanities and Sciences. It works closely with departments and other units of the University to increase faculty strength, support research, enhance the curriculum, build the library collection, and sponsor programs and events. The program also offers a specialization in South Asian Studies as part of the Global Studies minor (https://southasia.stanford.edu/academics/undergraduate-minor/).

The Europe Center

Director: Anna Grzymala-Busse
Office: Encina Hall Central C243
Web Site: https://tec.fsi.stanford.edu/

The Europe Center is a multidisciplinary institute committed to the examination of European society, culture, politics, diplomacy, and security. The program also offers a specialization in European Studies as part of the Global Studies minor (http://tec.fsi.stanford.edu/node/219264/).

Minor in Global Studies

The minor in Global Studies is designed to give students an in-depth interdisciplinary study in one of six specializations within a larger global perspective.

Global Studies is centered on the interdisciplinary study of regions and their intersecting cultures, languages, history, politics, and societies. Historically, Global (or Area) Studies have sought ways to understand the distinctiveness of cultures and nations by applying the combined knowledge from the social sciences and humanities to their study. This approach was further developed during World War II and the Cold War to be able to understand both American allies and enemies.

Today, Global Studies examine regions and cultures within the larger context of globalization. It applies more branches of knowledge, from human biology and earth sciences to music and management engineering, to better understand the character of regions, their respective developmental trajectories, and the way those trajectories fit into a larger global context.

All students are required to complete 28 units, including a 3 unit gateway course GLOBAL 101 Critical Issues in Global Affairs. The remaining 25 units are unique to each specialization. Students participating in the Bing Overseas Studies Program are especially encouraged to enroll.

Each student chooses one of the six specializations. The specialization appears on the transcript but it does not appear on the diploma.

Admission

Students from any major interested in applying for admission to the Global Studies minor program should consult the relevant center adviser, or Executive Director of Stanford Global Studies, Kate Kuhns (kkuhns@stanford.edu). To declare the Global Studies minor with one of six specializations, students must:

1. Set up an appointment with the appropriate specialization adviser (see appropriate specialization page for contact information).
2. Declare the Global Studies minor and subplan in Axess (http://axess.stanford.edu).

COVID-19-Related Degree Requirement Changes

For information on how the Global Studies with African Studies Specialization minor requirements have been affected by the pandemic, see the "COVID-19 Policies tab (p. 1520)" in the "Stanford Global Studies" section of this bulletin. For University-wide policy changes related to the pandemic, see the "COVID-19 and Academic Continuity (p. 5)" section of this bulletin.

Minor in Global Studies with African Studies Specialization

The minor in Global Studies, African Studies specialization, offers students the opportunity to complement their major course of study with an in-depth, interdisciplinary exploration of the cultures, histories, politics, religions, and societies of Africa.

Students from any major interested in applying for admission to this minor program should consult the minor adviser at the Center for African Studies. Students declare the minor and the African Studies specialization in Axess (http://axess.stanford.edu) (see below for detailed instructions).

Students consult with their minor adviser to develop individual programs. The minor is especially well-suited for undergraduates who plan to make service, research, or study abroad in Africa as part of their Stanford experience.

Declaring the Global Studies Minor with African Studies Specialization

To declare the Global Studies minor with African Studies specialization, students must:

1. Set up an appointment with Laura Hubbard, <lhubbard@stanford.edu>, Associate Director for the Center for African Studies.
2. Declare the Global Studies minor and subplan in Axess (http://axess.stanford.edu).

Learning Outcomes

The SGS minor specialization in African Studies enables students to:

1. develop critical knowledge and skills in African Studies
2. organize their interest in Africa into a coherent course of study through directed mentorship and participation in intellectual community.
3. prepare for research, study, or service in Africa

Upon completion of requirements, final certification of the minor is made by the Center for African Studies. The minor and the specialization appear on the transcript but they do not appear on the diploma.

Requirements

A total of 28 units which include the following:

1. GLOBAL 101 Critical Issues in Global Affairs (3 units)
2. A minimum of 25 units of Africa-related courses. Students may not double-count courses for completing major and minor requirements. Coursework must be letter-graded, except where letter grades are not offered.
3. At least one quarter's exposure to a sub-Saharan African language. The Center for African Studies (p. 918) and the Special Languages Program of the Language Center (p. 1722) can arrange instruction in any of several languages spoken in West, East, Central, and Southern Africa.
4. One entry level course that covers more than one region of Africa.
5. A designated focus of study, either disciplinary or regional, through a three course concentration developed with the minor adviser.
6. Students may work with the subplan advisor to develop a capstone project to count towards the unit fulfillment of the minor. Projects may include (but are not limited to):

1. Research with units through directed reading under the supervision of the subplan advisor.

- Research may take place at Stanford or during a relevant study abroad program, and options may include regional fieldwork, creative arts projects, short films, etc.

2. Advanced language study beyond the subplan minimum requirement with units through directed reading under the supervision of the subplan advisor.

- Intensive language training may take place at Stanford, off-campus, or overseas.

Students may propose other projects related to their subplan.

Course List

For a representative, rather than comprehensive, list of courses that count towards the minor, see the Related Courses (p. 1520) tab in this

section of the Bulletin. Other courses may also fulfill the requirements; students should consult their African Studies minor adviser concerning which courses might fulfill minor requirements.

COVID-19-Related Degree Requirement Changes

For information on how the Global Studies with European Studies Specialization minor requirements have been affected by the pandemic, see the "COVID-19 Policies tab (p. 1520)" in the "Stanford Global Studies" section of this bulletin. For University-wide policy changes related to the pandemic, see the "COVID-19 and Academic Continuity (p. 5)" section of this bulletin.

Minor in Global Studies with European Studies Specialization

The Stanford Global Studies, European Studies specialization, is designed for undergraduates with an interdisciplinary interest in the history, culture, politics, societies, and institutions of Europe, past and present.

The minor is especially well-suited for undergraduates who plan to make Europe-based overseas studies a part of their Stanford experience.

Declaring the Global Studies Minor with European Studies Specialization

To declare the Global Studies minor with European Studies specialization, students must:

1. Set up an appointment with minor advisers, Anna Grzymala-Busse (amgbusse@stanford.edu), Faculty Director for The Europe Center, or Christophe Crombez (crombez@stanford.edu) to discuss your academic plan.
2. Declare the Global Studies minor and subplan in Axess (http://axess.stanford.edu).

Learning Outcomes

The SGS minor specialization in European Studies enables students to:

1. Organize their studies in a coherent and mentored minor.
2. Prepare for or follow up on involvement in a Bing Overseas Studies Program in Europe.

Upon completion of requirements, final certification of the minor is made by Stanford Global Studies. The minor and the specialization appear on the transcript but they do not appear on the diploma.

Requirements

1. Completion of 28 units that include the following:
   a. GLOBAL 101 Critical Issues in Global Affairs (3 units)
   b. INTNLREL 122 Introduction to European Studies (5 units)
   c. 5 unit survey course on European history or culture. The list of course alternatives that fulfill this requirement this year are:
      - DLCL 100 CAPITALS: How Cities Shape Cultures, States, and People
      - HISTORY 106B Global Human Geography: Europe and Americas
      - HISTORY 132 Ordinary Lives: A Social History of the Everyday in Early Modern Europe
      - HISTORY 230D Europe in the World, 1789-Present
   d. 15 additional units on a coherent theme of interest developed with the minor adviser. This combination of courses can be on any thematic subject with an interdisciplinary and comparative focus on Europe. See the Related Courses tab below for example courses.
   e. At least 13 of the 28 units need to be completed on the Stanford campus.
   f. Coursework must be letter-graded work, except where letter grades are not offered.
2. Advanced proficiency in a modern European language achieved by one of the following:
   a. Completion of six quarters of college-level study of a modern European language.
   b. Completion of a course taught in a modern European language at the 100-level or higher and with a letter grade of 'B' or higher. This may be a course on a European language or literature, or other subject as long as it fulfills the above criteria. (This course may fulfill both the minor foreign language requirement and the minor 28 unit minimum requirement.)
   c. Achieve the advanced proficiency level on the ACTFL scale in a test administered by the Stanford Language Center. (p. 1722)
3. Students may work with the subplan advisor to develop a capstone project to count towards the unit fulfillment of the minor. Projects may include (but are not limited to):

1. Research with units through directed reading under the supervision of the subplan advisor.

   - Research may take place at Stanford or during a relevant study abroad program, and options may include regional fieldwork, creative arts projects, short films, etc.

2. Advanced language study beyond the subplan minimum requirement with units through directed reading under the supervision of the subplan advisor.

   - Intensive language training may take place at Stanford, off-campus, or overseas.

Students may propose other projects related to their subplan.

Course List

For a representative, rather than comprehensive, list of courses that count towards the minor, see the Related Courses (p. 1521) tab in this section of the Bulletin. Other courses may also fulfill the requirements; students should consult their European Studies minor adviser concerning which courses might fulfill minor requirements.

COVID-19-Related Degree Requirement Changes

For information on how the Global Studies with Iranian Studies Specialization minor requirements have been affected by the pandemic, see the "COVID-19 Policies tab (p. 1520)" in the "Stanford Global Studies" section of this bulletin. For University-wide policy changes related to the pandemic, see the "COVID-19 and Academic Continuity (p. 5)" section of this bulletin.

Minor in Global Studies with Iranian Studies Specialization

The Stanford Global Studies, Iranian Studies specialization, is designed for undergraduates with an interdisciplinary interest in the modern history and politics of Iran or the Middle East; Islam, particularly Shiism; the geopolitics of the Middle East; and the religions, ethnicities, and cultures.

Students consult with their minor adviser to develop individual programs. The minor is especially well-suited for undergraduates who plan graduate studies, teaching, or research and analysis focused on Iran.

Upon completion of requirements, final certification of the minor is made by Stanford Global Studies. The minor and the specialization appear on the transcript but they do not appear on the diploma.

Declaring the Global Studies Minor with Iranian Studies Specialization

To declare the Global Studies minor with Iranian Studies specialization, students must:

1. Set up an appointment with Roma Parhad (rparhad@stanford.edu), Associate Director for the Iranian Studies Program.

Declare the Global Studies minor and subplan in Axess (http://axess.stanford.edu).

Learning Outcomes

The SGS minor specialization in Iranian Studies enables students to:

1. Develop critical knowledge and skills in Iranian Studies.

2. Organize their interest in Iranian Studies into a coherent course of study through directed mentorship and participation in an intellectual community.

3. Enhance students' ability to understand and participate in an increasingly global world.

Upon completion of requirements, final certification of the minor is made by the Iranian Studies Program. The minor and the specialization appear on the transcript but they do not appear on the diploma.

Requirements

A total of 28 units which include the following:

1. GLOBAL 101 Critical Issues in Global Affairs (3 units)
2. One area-specific entry course that deals with Iran and the Middle East. If a student wants to take a course on a subject matter not directly related to Iran, the consent of the Director of Iranian Studies is required.
3. A minimum of 25 units of qualifying courses. 15 units must be from the list of core courses. The remaining 10 units can be chosen from the list of approved elective courses.
   - Coursework must be letter-graded work, except where letter grades are not offered.
   - Students may not double-count courses for completing major and minor requirements.
4. Completion of two quarters of Persian language, or proven proficiency in the language.
5. Students may work with the subplan advisor to develop a capstone project to count towards the unit fulfillment of the minor. Projects may include (but are not limited to):

1. Research with units through directed reading under the supervision of the subplan advisor.

   - Research may take place at Stanford or during a relevant study abroad program, and options may include regional fieldwork, creative arts projects, short films, etc.

2. Advanced language study beyond the subplan minimum requirement with units through directed reading under the supervision of the subplan advisor.

   - Intensive language training may take place at Stanford, off-campus, or overseas.

Students may propose other projects related to their subplan.

Course List

For a representative, rather than comprehensive, list of courses that count towards the minor, see the Related Courses (p. 1522) tab in this section of the Bulletin. Other courses may also fulfill the requirements; students should consult their Iranian Studies minor adviser concerning which courses might fulfill minor requirements.

COVID-19-Related Degree Requirement Changes

For information on how the Global Studies with Islamic Studies Specialization minor requirements have been affected by the pandemic, see the "COVID-19 Policies tab (p. 1520)" in the "Stanford Global Studies" section of this bulletin. For University-wide policy changes related to the pandemic, see the "COVID-19 and Academic Continuity (p. 5)" section of this bulletin.

Minor in Global Studies with Islamic Studies Specialization

The minor in Stanford Global Studies, Islamic Studies specialization, offers students an interdisciplinary and global exploration of Islam and Muslim societies and cultures. Focus is on knowledge of Islam in all its internal complexity, the history of Islam from its beginnings to the 21st century, Islamic social contexts, and the diversity of human experience as seen in literature and the arts originating in societies affected by Islamic civilizations. Students explore the global extent of Islam and the growth of its diasporas by taking courses on geographical regions such as the Middle East, South Asia, Eurasia, Africa, Western Europe, and Americas) and from disciplines such as anthropology, art and art history, comparative literature, history, political science, international relations, and religious studies.

Students consult with their minor adviser to develop individual programs.

Declaring the Global Studies Minor with Islamic Studies Specialization

To declare the Global Studies minor with Islamic Studies specialization, students must:

1. Set up an appointment with Colin Hamill <chamill@stanford.edu>, Associate Director for the Islamic Studies Program to discuss your academic plan.
2. Declare the Global Studies minor and subplan in Axess (http://axess.stanford.edu).

Learning Outcomes

The SGS minor specialization in Islamic Studies enables students to:

1. organize their studies in a coherent and mentored minor.
2. gain exposure to the past and present of Islam in diverse social, political, and cultural settings around the globe.
3. prepare for or follow up on involvement in a Bing Overseas Studies Program such as in Istanbul, France, Germany, or Cape Town.

Upon completion of requirements, final certification of the minor is made by the Abbasi Program in Islamic Studies. The minor and the

specialization appear on the transcript but they do not appear on the diploma.

Requirements

1. Completion of 28 units that includes GLOBAL 101 Critical Issues in Global Affairs (3 units)
2. A minimum of 25 units of Islamic studies-related courses. Coursework must be letter-graded, except where letter grades are not offered.
3. At least one course must be an area-specific entry course focusing on the Islamic world. The following courses may be used to fulfill this requirement:
   - GLOBAL 134 The Birth of Islam: Authority, Community, and Resistance (3-5 units)
   - GLOBAL 133 The Medieval Middle East: Crusaders, Turks, and Mongols (3-5 units)
   - MUSIC 186E Sounds of Islam (3 units)
   - PHIL 101A History of Philosophy from Al-Kindi to Averroes (3-5 units)
   - POLISCI 149S Islam, Iran, and the West (5 units)
   - POLISCI 149T Middle Eastern Politics (5 units)
4. At least one course must be from each of the following areas:
   - Islamic Arts, Literatures, and Cultures
   - Islam, History, and Politics
   - Religion of Islam
5. Completion of three courses in a relevant language such as Arabic, Persian, Turkish, Ottoman Turkish, Urdu, Pashto, Kazakh, or Swahili.
6. Students may work with the subplan advisor to develop a capstone project to count towards the unit fulfillment of the minor. Projects may include (but are not limited to):

   1. Research with units through directed reading under the supervision of the subplan advisor.

      - Research may take place at Stanford or during a relevant study abroad program, and options may include regional fieldwork, creative arts projects, short films, etc.

   2. Advanced language study beyond the subplan minimum requirement with units through directed reading under the supervision of the subplan advisor.

      - Intensive language training may take place at Stanford, off-campus, or overseas.

Students may propose other projects related to their subplan.

Course List

For a representative, rather than comprehensive, list of courses that count towards the minor, see the Related Courses (p. 1523) tab in this section of the Bulletin. Other courses may also fulfill the requirements; students should consult their Islamic Studies minor adviser concerning which courses might fulfill minor requirements.

COVID-19-Related Degree Requirement Changes

For information on how the Global Studies with Latin American Studies Specialization minor requirements have been affected by the pandemic, see the "COVID-19 Policies tab (p. 1520)" in the "Stanford Global Studies" section of this bulletin. For University-wide policy changes related to the pandemic, see the "COVID-19 and Academic Continuity (p. 5)" section of this bulletin.

Minor in Global Studies with Latin American Studies Specialization

The minor in Global Studies, Latin American Studies (LAS) specialization, consists of a core set of courses surveying the history, politics, society, ecology, and culture of the Latin American region; advanced language training; and in-depth course work.

Students from any major interested in applying for admission to the minor in Global Studies, Latin American Studies (LAS) specialization, should consult Stanford Global Studies and the Center for Latin American Studies (CLAS (https://clas.stanford.edu/academics/undergraduate-minor/)). Students who wish to complete the minor must declare online (through Axess (http://axess.stanford.edu)) and submit a proposal of course work no later than the second quarter of the junior year. The minor must be completed by the second quarter of the senior year. Units taken for a student's major cannot be double-counted towards the minor.

Students consult with their minor adviser to develop individual programs. The minor is especially well-suited for undergraduates who plan to make service, research, or study abroad in Latin America a part of their Stanford experience.

The Global Studies Minor with Specialization in Latin American Studies is open to students in any major.

Upon completion of all requirements, final certification of the minor is made by the Center for Latin American Studies subcommittee on undergraduate programs. The minor and the specialization appear on the transcript but they do not appear on the diploma.

Declaring the Global Studies Minor with Latin American Studies Specialization

To declare the Global Studies minor with Latin American Studies specialization, students must:

1. Set up an appointment with the CLAS associate director to discuss your academic plan.
2. Declare the Global Studies minor and subplan in Axess (http://axess.stanford.edu).

Requirements

1. Students may not double-count courses for completing major and minor requirements. Completion of 28 units as follows:
   a. GLOBAL 101 Critical Issues in Global Affairs (3 units)
   b. A 5-unit course surveying Latin America, either ILAC 131 Introduction to Latin America: Cultural Perspectives or an approved substitute. For further information contact a CLAS undergraduate adviser at latinamerica@stanford.edu.
   c. 20 additional units in courses which together comprise a coherent focus on a theoretical problem or issue of the region, such as but not limited to
      i. culture and identity
      ii. political economy
      iii. sustainable development.
   d. At least 15 of the 28 units must be completed at Stanford.
   e. All courses to be counted toward the minor must be taken for a letter grade, except where letter grades are not offered.
2. Foreign Language Requirement. The minimum requirement for completion of the minor in Global Studies with Latin American Studies Specialization is advanced proficiency in Spanish or Portuguese by one of the following:
   a. Completion of seven quarters of college-level study of Spanish or Portuguese.
   b. Completion of a course taught in Spanish or Portuguese at the 100-level or higher, with a letter grade of 'B' or higher. This may

be a course on Spanish or Portuguese language or literature, or some other subject.

c. Achievement of the advanced proficiency level on the ACTFL scale in a test administered by the Stanford Language Center. Contact the Stanford Language Center (p. 1722) for test dates and procedures.

3. Students may work with the subplan advisor to develop a capstone project to count towards the unit fulfillment of the minor. Projects may include (but are not limited to):

1. Research with units through directed reading under the supervision of the subplan advisor.

- Research may take place at Stanford or during a relevant study abroad program, and options may include regional fieldwork, creative arts projects, short films, etc.

2. Advanced language study beyond the subplan minimum requirement with units through directed reading under the supervision of the subplan advisor.

- Intensive language training may take place at Stanford, off-campus, or overseas.

Students may propose other projects related to their subplan.

Course List

For a representative, rather than comprehensive, list of courses that count towards the minor, see the Related Courses (p. 1525) tab in this section of the Bulletin. Other courses may also fulfill the requirements; students should consult their Latin American Studies minor adviser concerning which courses might fulfill minor requirements.

COVID-19-Related Degree Requirement Changes

For information on how the Global Studies with South Asian Studies Specialization minor requirements have been affected by the pandemic, see the "COVID-19 Policies tab (p. 1520)" in the "Stanford Global Studies" section of this bulletin. For University-wide policy changes related to the pandemic, see the "COVID-19 and Academic Continuity (p. 5)" section of this bulletin.

Minor in Global Studies with South Asian Studies Specialization

The minor in Stanford Global Studies, South Asian Studies specialization, offers students a focused study from an interdisciplinary perspective of the cultures, histories, politics, religions, and societies of South Asia, including India, Pakistan, Sri Lanka, Nepal, Bhutan, Bangladesh, and the Maldives.

The Global Studies Minor with Specialization in South Asian Studies is open to students in any major. Students consult with their minor adviser to develop individual programs.

Declaring the Global Studies Minor with South Asian Studies Specialization

To declare the Global Studies minor with South Asian Studies specialization, students must:

1. Set up an appointment with Lalita du Perron (lalita@stanford.edu), Associate Director for the South Asian Studies Center, to discuss your academic plan.
2. Declare the Global Studies minor and subplan in Axess (http://axess.stanford.edu).

Learning Outcomes

The SGS minor specialization in South Asian Studies enables students to:

1. acquire a nuanced and sophisticated understanding of the texts and contexts of South Asian Studies .
2. work on this geographical and disciplinary area within the broader contours, conversations, and methods of Global Studies.
3. enhance students' ability to understand and participate in an increasingly global world.
4. develop critical and wide-ranging insight into a key world area.

Upon completion of requirements, final certification of the minor is made by the Center for South Asian Studies. The minor and the specialization appear on the transcript but they do not appear on the diploma.

Requirements

A total of 28 units which include the following:

1. GLOBAL 101 Critical Issues in Global Affairs (3 units)
2. At least 25 units of qualifying courses. Students may not double-count courses for completing major and minor requirements. At least 10 of the 25 units must be completed at Stanford. All courses to be counted toward the minor must be taken for a letter grade, except where letter grades are not offered.
   a. A 5-unit core course such as ANTHRO 149 or HISTORY 106A Global Human Geography: Asia and Africa.
   b. 20 units in courses that together represent an area of interdisciplinary focus such as, but not limited to, the following:
      i. immigration and law
      ii. urbanization and film
      iii. history and culture
   c. All courses, with the exception of Overseas Studies courses, must be taken at the 100-level or higher. For a list of courses, see the "Related Courses" tab in this section.
3. Foreign Language Requirement. Language requirement: Intermediate proficiency in a South Asian language by one of the following methods:
   a. Completion of two introductory language courses in a South Asian language such as Urdu, Hindi, Persian, Bengali, Pashto, Tamil, Telugu, Kannada, Gujarati, Malayalam, Garhwali, Nepalese, Tibetan, or Sindhi; other languages may also qualify.
   b. Intermediate proficiency in any of the above languages, as measured by the ACTFL scale in a test administered by the Stanford Language Center (p. 1722).
4. Students may work with the subplan advisor to develop a capstone project to count towards the unit fulfillment of the minor. Projects may include (but are not limited to):

1. Research with units through directed reading under the supervision of the subplan advisor.

- Research may take place at Stanford or during a relevant study abroad program, and options may include regional fieldwork, creative arts projects, short films, etc.

2. Advanced language study beyond the subplan minimum requirement with units through directed reading under the supervision of the subplan advisor.

- Intensive language training may take place at Stanford, off-campus, or overseas.

Students may propose other projects related to their subplan.

Course List

For a representative, rather than comprehensive, list of courses that count towards the minor, see the Related Courses (p. 1527) tab in this section of the Bulletin. Other courses may also fulfill the requirements; students should consult their South Asian Studies minor adviser concerning which courses might fulfill minor requirements.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a "credit" or "no credit" grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a "credit" or "satisfactory" grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Stanford Global Minor Requirements

Grading

Stanford Global Studies counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of undergraduate degree requirements that otherwise require a letter grade.

Islamic Studies Specialization

The following is a current selection of courses related to Islamic Studies. Students should consult with their minor adviser to determine the applicability of any course to the minor in Stanford Global Studies, Islamic Studies specialization.

		Units
Islamic Arts, Literatures, and Cultures		
AFRICAAM 94	Public Space in Iran: Murals, Graffiti, Performance	3-4
AMELANG 126	Reflection on the Other: The Arab Israeli Conflict in Literature and Film	3-5
AMSTUD 15	Global Flows: The Globalization of Hip Hop Art, Culture, and Politics	1-2
ANTHRO 132	Religion and Politics in the Muslim World	5
ANTHRO 147B	World Heritage in Global Conflict	5
ANTHRO 247B	World Heritage in Global Conflict	5
ARCHLGY 147B	World Heritage in Global Conflict	5
ARTHIST 1A	Decolonizing the Western Canon: Introduction to Art and Architecture from Prehistory to Medieval	5
ARTHIST 105B	Medieval Journeys: Introduction through the Art and Architecture	5
ARTHIST 208	Hagia Sophia	5
ARTHIST 208B	The Art of Medieval Spain: Muslims, Christians, Jews	5
ARTHIST 405	Art, Ekphrasis, and Music in Byzantium and Islam	5
ARTHIST 408	Hagia Sophia	5
ARTHIST 408B	The Art of Medieval Spain: Muslims, Christians, Jews	5
ARTHIST 409	Theories of the Image: Byzantium, Islam and the Latin West	5
CLASSICS 47	Ancient Knowledge, New Frontiers: How the Greek Legacy Became Islamic Science	3
CLASSICS 56	Decolonizing the Western Canon: Introduction to Art and Architecture from Prehistory to Medieval	5
COMPLIT 102	Film Series: Understanding Turkey Through Film	1-2
COMPLIT 107A	Ancient Knowledge, New Frontiers: How the Greek Legacy Became Islamic Science	3
COMPLIT 121	Poems, Poetry, Worlds	5
COMPLIT 134A	Classics of Persian Literature	3-5
COMPLIT 145	Reflection on the Other: The Arab Israeli Conflict in Literature and Film	3-5
COMPLIT 234	Classics of Persian Literature	3-5
COMPLIT 243	The Age of Beloveds: Inflections of Desire in Persian and Ottoman Literature	3-5
COMPLIT 243A	From Idol to Equal: Changing Images of Love in 20th-Century Persian and Turkish Literature	3-5
COMPLIT 243B	Advanced Readings in Arabic Literature and Science II	3-5
COMPLIT 244	Modern Persian Poetry	3-5
COMPLIT 249A	The Iranian Cinema: Image and Meaning	1-3
COMPLIT 249B	Iranian Cinema in Diaspora	1-3
COMPLIT 249C	Contemporary Iranian Theater	1-3
COMPLIT 252A	Great Arabic Poetry	3-5
COMPLIT 252B	Great Arabic Prose	3-5
CSRE 129	Camus	4-5
CSRE 160M	Introduction to Representations of the Middle East in Dance, Performance, & Popular Culture	3-4
CSRE 249	The Algerian Wars	3-5
DLCL 227	Persian, Arabic, Turkish, and Hebrew Languages, Literatures, and Cultures	1
DLCL 245	LA ALJAMÍA, ROMÁRABE LANGUAGE	3-5
ENGLISH 92AP	Arab and Arab-American Poetry	5
FRENCH 249	The Algerian Wars	3-5
GLOBAL 199	Capstone Project: Global Studies Minor	1-5
GLOBAL 249A	The Iranian Cinema: Image and Meaning	1-3
GLOBAL 249B	Iranian Cinema in Diaspora	1-3
GLOBAL 249C	Contemporary Iranian Theater	1-3
HISTORY 239G	The Algerian Wars	3-5
HUMCORE 121	Ancient Knowledge, New Frontiers: How the Greek Legacy Became Islamic Science	3
ILAC 157	Medieval and Early Modern Iberian Literatures	3-5
ILAC 278A	Senior Seminar: The Iberian Pastoral	3-5
JEWISHST 106	Reflection on the Other: The Arab Israeli Conflict in Literature and Film	3-5
MUSIC 7B	Musical Cultures of the World	2-3

African Studies Courses

AFRICAST 51N. Visible Bodies: Black Female Authors and the Politics of Publishing in Africa. 4 Units.
Where are the African female writers of the twentieth century and the present day? This Introductory Seminar addresses the critical problem of the marginalization of black female authors within established canons of modern African literature. We will explore, analyse and interrogate the reasons why, and the ways in which, women-authored bodies of work from this period continue to be lost, misplaced, forgotten, and ignored by a male-dominated and largely European/white publishing industry in the context of colonialism, apartheid and globalization. nnYou will be introduced to key twentieth-century and more contemporary female authors from Africa, some of them published but many more unpublished or out-of-print. The class will look at the challenges these female authors faced in publishing, including how they navigated a hostile publishing industry and a lack of funding and intellectual support for black writers, especially female writers. nnWe will also examine the strategies these writers used to mitigate their apparent marginality, including looking at how women self-published, how they used newspapers as publication venues, how they have increasingly turned to digital platforms, and how many sought international publishing networks outside of the African continent. As one of the primary assessments for the seminar, you will be asked to conceptualize and design an in-depth and imaginative pitch for a new publishing platform that specializes in African female authors. nnYou will also have the opportunity for in-depth engagement (both in class and in one-on-one mentor sessions) with a range of leading pioneers in the field of publishing and literature in Africa. Figures like Ainehi Edoro (founder of Brittle Paper) and Zukiswa Wanner (prize-winning author of The Madams and Men of the South), amongst others, will be guests to our Zoom classroom. One of our industry specialists will meet with you to offer detailed feedback on your proposal for your imagined publishing platform. nnYou can expect a roughly 50/50 division between synchronous and asynchronous learning, as well as plenty of opportunity to collaborate with peers in smaller settings.
Same as: AFRICAAM 140N, ENGLISH 54N, HISTORY 41N

AFRICAST 58. Egypt in the Age of Heresy. 3-5 Units.
Perhaps the most controversial era in ancient Egyptian history, the Amarna period (c.1350-1334 BCE) was marked by great sociocultural transformation, notably the introduction of a new 'religion' (often considered the world's first form of monotheism), the construction of a new royal city, and radical departures in artistic and architectural styles. This course will introduce archaeological and textual sources of ancient Egypt, investigating topics such as theological promotion, projections of power, social structure, urban design, interregional diplomacy, and historical legacy during the inception, height, and aftermath of this highly enigmatic period. Students with or without prior background are equally encouraged.

AFRICAST 90. Black Earth Rising: Law and Society in Postcolonial Africa. 5 Units.
Is the International Criminal Court a neocolonial institution? Should African art in Western museums be returned? Why have anti-homosexuality laws emerged in many African countries? This course engages these questions, and more, to explore how Africans have grappled with the legacies of colonialism through law since independence. Reading court documents, listening to witness testimonies, analyzing legal codes, and watching cultural commentaries¿including hit TV series Black Earth Rising¿students will examine the histories of legal conflict in Africa and their implications for the present and future of African societies. This course fulfills the Social Inquiry and Engaging Diversity Ways requirements.

AFRICAST 111. Education for All? The Global and Local in Public Policy Making in Africa. 3-5 Units.
Policy making in Africa and the intersection of policy processes and their political and economic dimensions. The failure to implement agreements by international institutions, national governments, and nongovernmental organizations to promote education. Case studies of crowded and poorly equipped schools, overburdened and underprepared teachers, and underfunded education systems.
Same as: AFRICAAM 211, AFRICAST 211

AFRICAST 112. AIDS, Literacy, and Land: Foreign Aid and Development in Africa. 3-5 Units.
Foreign aid can help Africa, say the advocates. Certainly not, say the critics. Is foreign aid a solution? or a problem? Should there be more aid, less aid, or none at all? Africa has developed imaginative and innovative approaches in many sectors. At the same time, many African countries have become increasingly dependent on foreign aid. How do foreign aid and local initiatives intersect? We will examine several contentious issues in contemporary Africa, exploring roots, contested analyses, and proposed solutions, examining foreign aid and the aid relationship. As African communities and countries work to shape their future, what are the foreign roles, and what are their consequences?.
Same as: AFRICAAM 111, AFRICAST 212

AFRICAST 113V. Freedom in Chains: Black Slavery in the Atlantic, 1400s-1800s. 3-5 Units.
This course will focus on the history of slavery in the British, French, Spanish, Portuguese and Dutch Atlantic world(s), from the late 1400s to the 1800s. Its main focus will be on the experiences of enslaved Africans and their descendants. Between the sixteenth and nineteenth centuries, the Europeans forcibly embarked over 10 million Africans to the Americas. Drawing on methodologies used by historians, archaeologists and anthropologists, the course will reconstruct the daily lives and the socio-economic, cultural and political histories of these captives. We will seek to hear their voices by investigating a variety of historical testimonies and recent scholarship. The course will examine slavery in the context of broader trends in Atlantic World studies, a field that has grown considerably in recent years, providing new ways of understanding historical developments across national boundaries. We will seek to identify commonalities and differences across time periods and regions and the reasons for those differences. Covered topics will include slave ship voyages, labor, agency, the creation of new identities (creolization), religion, race, gender, resistance, legacies, and memory.

AFRICAST 114N. Desert Biogeography of Namibia Prefield Seminar. 3 Units.
Desert environments make up a third of the land areas on Earth, ranging from the hottest to the coldest environments. Aridity leads to the development of unique adaptations among the organisms that inhabit them. Climate change and other processes of desertification as well as increasing human demand for habitable and cultivatable areas have resulting in increasing need to better understand these systems. Namibia is a model system for studying these processes and includes the Sossuvlei (Sand Sea) World Heritable Site. This seminar will prepare students for their overseas field experience in Namibia. The seminar will provide an introduction to desert biogeography and culture, using Namibia as a case study. During the seminar, students will each give two presentations on aspects of desert biogeography and ecology, specific organisms and their adaptations to arid environments, cultural adaptations of indigenous peoples and immigrants, ecological threats and conservation efforts, and/or national and international policy towards deserts. Additional assignments include a comprehensive dossier and a final exam. Students will also carry out background research for the presentations they will be giving during the field seminar where access to the internet and to other scholarly resources will be limited. In addition, we will cover logistics, health and safety, cultural sensitivity, geography, and politics. We will deal with post-field issues such as reverse culture shock, and ways in which participants can consolidate and build up their abroad experiences after they return to campus.

AFRICAST 119. Novel Perspectives on South Africa. 2-3 Units.
21st-century South Africa continues its literary effervescence. In this class we'll sample some recent novels and related writings to tease out the issues shaping the country (and to some degree the continent) at present. Is `South African literature' a meaningful category today? What are the most significant features we can identify in new writings and how do they relate to contemporary social dynamics? The course will appeal to anyone interested in present-day Cape Town or Johannesburg, including students who have spent a term in BOSP-Cape Town or plan to do so in future. Both undergraduate and graduate students are welcome. 2-3 units. Course may be repeated for credit.nn nnAll students will write short analyses from the prescribed texts. Students taking the course for three units will write an extended essay on a topic agreed with the instructor.

AFRICAST 122F. Histories of Race in Science and Medicine at Home and Abroad. 4 Units.
This course has as its primary objective, the historical study of the intersection of race, science and medicine in the US and abroad with an emphasis on Africa and its Diasporas in the US. By drawing on literature from history, science and technology studies, sociology and other related disciplines, the course will consider the sociological and cultural concept of race and its usefulness as an analytical category. The course will explore how the study of race became its own ¿science¿ in the late-Enlightenment era, the history of eugenics--a science of race aimed at the ostensible betterment of the overall population through the systematic killing or "letting die" of humanity¿s "undesirable" parts, discuss how the ideology of pseudo-scientific racism underpinned the health policies of the French and British Empires in Africa, explore the fraught relationship between race and medicine in the US, discuss how biological notions of race have quietly slipped back into scientific projects in the 21st century and explore how various social justice advocates and scholars have resisted the scientific racisms of the present and future and/or proposed new paths towards a more equitable and accessible science.

AFRICAST 127. African Art and Politics, c. 1900 - Present. 4 Units.
This course explores the relationship between art and politics in twentieth century Africa. Artistic production and consumption is considered in the context of various major political shifts, from the experience of colonialism to the struggle against Apartheid. Each week we will look closely at different works of art and examine how artists and designers responded to such challenges as independence, modernization and globalization. We will look at painting, sculpture, religious art, public and performance art, photography and film. How western perceptions and understanding of African art have shifted, and how museums have framed African art throughout the twentieth century will remain important points of discussion throughout the course.
Same as: ARTHIST 127A

AFRICAST 132. Literature and Society in Africa and the Caribbean. 4 Units.
This course explores texts and films from Francophone Africa and the Caribbean in the 20th and 21st centuries. The course will explore the connections between Sub-Saharan Africa, the Maghreb and the Caribbean through both foundational and contemporary works while considering their engagement with the historical and political contexts in which they were produced. This course will also serve to improve students' speaking and writing skills in French while sharpening their knowledge of the linguistic and conceptual tools needed to conduct literary analysis. The diverse topics discussed in the course will include national and cultural identity, race and class, gender and sexuality, orality and textuality, transnationalism and migration, colonialism and decolonization, history and memory, and the politics of language. Readings include the works of writers and filmmakers such as Djibril Tamsir Niane, Léopold Senghor, Aimé Césaire, Albert Memmi, Patrick Chamoiseau, Leonora Miano, Leila Slimani, Dani Laferrière and Ousmane Sembène. Taught in French. Students are highly encouraged to complete FRENLANG 124 or to successfully test above this level through the Language Center. This course fulfills the Writing in the Major (WIM) requirement.

AFRICAST 135. Designing Research-Based Interventions to Solve Global Health Problems. 3-4 Units.
The excitement around social innovation and entrepreneurship has spawned numerous startups focused on tackling world problems, particularly in the fields of education and health. The best social ventures are launched with careful consideration paid to research, design, and efficacy. This course offers students insights into understanding how to effectively develop, evaluate, and scale social ventures. Using TeachAids (an award-winning nonprofit educational technology social venture used in 82 countries) as a primary case study, students will be given an in-depth look into how the entity was founded and scaled globally. Guest speakers will include world-class experts and entrepreneurs in Philanthropy, Medicine, Communications, Education, and Technology. Open to both undergraduate and graduate students.
Same as: AFRICAST 235, EDUC 135, EDUC 335, EPI 235, HUMBIO 26, MED 235

AFRICAST 142. Challenging the Status Quo: Social Entrepreneurs Advancing Democracy, Development and Justice. 3-5 Units.
This seminar is part of a broader program on Social Entrepreneurship at CDDRL in partnership with the Haas Center for Public Service. It will use practice to better inform theory. Working with three visiting social entrepreneurs from developing and developed country contexts students will use case studies of successful and failed social change strategies to explore relationships between social entrepreneurship, gender, democracy, development and justice. It interrogates current definitions of democracy and development and explores how they can become more inclusive of marginalized populations. This is a service learning class in which students will learn by working on projects that support the social entrepreneurs' efforts to promote social change. Students should register for either 3 OR 5 units only. Students enrolled in the full 5 units will have a service-learning component along with the course. Students enrolled for 3 units will not complete the service-learning component. Limited enrollment. Attendance at the first class is mandatory in order to participate in service learning.
Same as: AFRICAST 242, CSRE 142C, INTNLREL 142

AFRICAST 146M. New Keywords in African Sound. 3-4 Units.
This course identifies and considers new keywords for the study of contemporary African music and sound. Each week we will foster discussion around a keyword and a constellation of case studies. The sonic practices we will encounter range from South African house music to Ghanaian honk horns; from Congolese rumba bands to Tunisian trance singers; from listening to the radio in a Tanzanian homestead to making hip hop music videos on the Kenyan coast. By exploring the unexpected interconnections between contemporary African musical communities, we will discuss new keywords arising in current scholarship, including technologies like the amplifier and the hard drive, spaces like the studio and the city, and analytics like pleasure and hotness. We will also engage with established concepts for the study of postcolonial African cultures, including nationalism, cosmopolitanism, globalization, diaspora, and Pan-Africanism. This is a seminar-based course open to graduate students, upper level undergraduate students, and other students with consent of the instructor. Proficiency in music is not required. WIM at 4 units only.
Same as: AFRICAAM 146D, CSRE 146D, MUSIC 146M, MUSIC 246M

AFRICAST 151. AIDS in Africa. 3 Units.
Medical, social, and political aspects of the HIV epidemic in sub-Saharan Africa including: biology, transmission, diagnosis,and treatment of HIV; mother-to-child transmission and breastfeeding; vaccines; community and activist responses to the HIV epidemic; economics of HIV treatment; governance and health; ethics in research and program implementation.

AFRICAST 195. Shifting Frames. 1-2 Unit.
This is a student driven, dialogue based, and intellectual community focused course. We will explore and challenge the taken-for-granted framing of key African issues and debates. Engagement with discussion leaders drawing on their own research and case studies from across the African continent will guide us across shifting terrain. This course centers the scholarship and voices of African students. Topics include: Afropolitanism, Brain Drain/ Gain, Education, Leadership, Global Health, AI Application in Africa, Economic Development, Industrial Policy, LGBTQI Rights, Gender and Sexuality.

AFRICAST 199. Independent Study or Directed Reading. 1-5 Unit.
May be repeated for credit.

AFRICAST 211. Education for All? The Global and Local in Public Policy Making in Africa. 3-5 Units.
Policy making in Africa and the intersection of policy processes and their political and economic dimensions. The failure to implement agreements by international institutions, national governments, and nongovernmental organizations to promote education. Case studies of crowded and poorly equipped schools, overburdened and underprepared teachers, and underfunded education systems.

AFRICAST 248. Religion, Radicalization and Media in Africa since 1945. 4-5 Units.
What are the paths to religious radicalization, and what role have media- new and old- played in these conversion journeys? We examine how Pentecostal Christians and Reformist Muslims in countries such as South Africa, Nigeria, Sudan, and Ethiopia have used multiple media forms- newspapers, cell phones, TV, radio, and the internet- to gain new converts, contest the authority of colonial and post-colonial states, construct transnational communities, and position themselves as key political players.
Same as: AFRICAST 348, HISTORY 248, HISTORY 348, RELIGST 230X, RELIGST 330X

AFRICAST 249. Bodies, Technologies, and Natures in Africa. 4-5 Units.
This interdisciplinary course explores how modern African histories, bodies, and natures have been entangled with technological activities. Viewing Africans as experts and innovators, we consider how technologies have mediated, represented, or performed power in African societies. Topics include infrastructure, extraction, medicine, weapons, communications, sanitation, and more. Themes woven through the course include citizenship, mobility, labor, bricolage, in/formal economies, and technopolitical geographies, among others. Readings draw from history, anthropology, geography, and social/cultural theory.
Same as: ANTHRO 348B, HISTORY 349

East Asian Studies Courses

EASTASN 77. Divided Memories & Reconciliation: the formation of wartime historical memory in the Pacific. 4 Units.
Divided Memories will examine the formation of historical memory about World War Two in Asia, looking comparatively at the national memories of China, Japan, Korea, and the United States. It will also study efforts at reconciliation in contemporary Asia. The course will look at the role of textbooks, popular culture, with an emphasis on cinema, and elite opinion on the formation of wartime memory. We will study and discuss controversial issues such as war crimes, forced labor, sexual servitude, and the use of atomic weapons. Class will combine lectures with in class discussion, with short essays or papers.
Same as: EASTASN 277

EASTASN 94. The Rise of China in World Affairs. 3-5 Units.
This course examines the impact and implications of the rise of China in contemporary world politics from a historical and international relations perspective. It reviews China's halting progress into the international system, sketches the evolution of PRC foreign policy since 1949, and analyzes China's developmental priorities and domestic political context as they figure into Beijing's interactions with the world. It sketches American policy toward the PRC, and it assesses alternative approaches to dealing with China on such issues as arms and nuclear proliferation, regional security arrangements, international trade and investment, human rights, environmental problems, and the Taiwan and Tibet questions.
Same as: EASTASN 294

EASTASN 97. The International Relations of Asia since World War II. 3-5 Units.
Asian international relations since World War II were dominated by the efforts of the newly independent nation-states of Asia, almost all of which had been colonies before the war, to establish and maintain sovereignty in a context of American and Soviet competition for influence in the region. This course traces the major developments of the period, including the Chinese civil war, the U.S. occupation of Japan, the division of Korea and the Korean War, the South and Southeast Asian independence struggles, the American and Soviet alliance systems, the Vietnam War, the strategic realignments that led to the end of the Cold War in Asia, the emergence of Central Asia, and the legacy of issues that the period has posed for the region today.
Same as: EASTASN 297

EASTASN 117. Health and Healthcare Systems in East Asia. 3-5 Units.
China, Japan, and both Koreas. Healthcare economics as applied to East Asian health policy, including economic development, population aging, infectious disease outbreaks (SARS, avian flu), social health insurance, health service delivery, payment incentives, competition, workforce policy, pharmaceutical industry, and regulation. No prior knowledge of economics or healthcare required.
Same as: EASTASN 217

EASTASN 143. Taiwan's Democratic Evolution. 3-5 Units.
This course is an introduction to the contemporary politics of Taiwan. Once a poor, insecure autocracy, today Taiwan has been transformed into a prosperous and stable liberal democracy, albeit one whose long-term security remains imperiled by the rising power of the People's Republic of China. We will draw on concepts and theories from political science to explore distinct aspects of this ongoing political evolution, including the transition to and consolidation of democracy, origins and trajectory of economic and social development, sources of Taiwanese nationalism, security of the Taiwanese state and its relationship to the PRC and the United States, parties and elections, and public policy processes and challenges.
Same as: EASTASN 243

EASTASN 162. Seminar on the Evolution of the Modern Chinese State, 1550-Present. 3-5 Units.
This seminar will assess the evolving response of the late imperial, early Republican, Nanjing Republic, and the PRC regimes in response to China's changing international setting, to successive revolutions in warfare, and to fundamental economic, social and demographic trends domestically from the 16th century to present. It will assess the capacities of each successive Chinese state to extract resources from society and economy and to mobilize people behind national purposes, to elaborate centralized institutions to pursue national priorities, to marshal military forces for national defense and police forces to sustain domestic order, and to generate popular identities loyal to national authority.
Same as: EASTASN 262

EASTASN 168. Taiwan Security Issues. 3-5 Units.
This course will provide a broad overview of Taiwan's place in the security environment of East Asia, covering the history of US-Taiwan-People's Republic of China relations, Taiwan's ambiguous status in the contemporary inter-state system, cross-Strait trends including the military balance of power and economic integration, the emergence and evolution of "sharp power" threats to Taiwan's security, and domestic politics and the quality of Taiwan's democracy. The course will be offered remotely and integrated with the fall 2020 quarter programming of the Project on Taiwan in the Indo-Pacific at the Hoover Institution. It will feature a combination of guest presentations by outside speakers as part of the PTIP's fall conference agenda, online lectures and discussions led by the instructor, and student presentations. Some course events may be open to the public.
Same as: EASTASN 268

EASTASN 179. Rebalancing Economic Systems in a World Driven by Tech: Quality-of-Life in Socio-Cultural Context. 4 Units.
This course examines the broader consequences of economic models that rely on innovation-driven growth, e.g. increases in social inequality, tension between globalism and isolationism, and tendencies toward authoritarianism. After an overview of the historical outcomes of previous industrial revolutions, we examine how the above trends are exacerbated in the era of digital transformation, comparing different economic systems (e.g. China, India, Japan, and the U.S.) as realized in their socio-political and cultural contexts. We then discuss approaches toward rebalancing existing systems, including metrics for evaluating economic performance and its impact, in order to satisfy the imperatives of social, environmental, and economic sustainability.
Same as: EASTASN 279

EASTASN 189K. Korea and the World. 3 Units.
This course investigates the theoretical and empirical underpinnings of modern Korea. The course offers a rough mix of history, domestic politics, and foreign relations. It also approaches the empirics of Korea through various theoretical lenses ranging from identity to balance of power to alliance theory to sports diplomacy. We will cover a vast expanse of time, ranging from the Kanghwa treaty to Donald Trump and Kim Jong-un. The course divides into four sections. The first is an understanding of the traditional historical and Cold War context of Korea's external relations. The second assesses the drivers of Korea¿s relations with the region, including Japan, the United States, China, and Russia. The next section is a three-week unit on North Korea. The last section investigates the policy priorities and potential pitfalls in Korea's path to unification as well as the implications of a united Korea on the balance of power in East Asia. No previous background on Korea is required.
Same as: EASTASN 289K

EASTASN 217. Health and Healthcare Systems in East Asia. 3-5 Units.
China, Japan, and both Koreas. Healthcare economics as applied to East Asian health policy, including economic development, population aging, infectious disease outbreaks (SARS, avian flu), social health insurance, health service delivery, payment incentives, competition, workforce policy, pharmaceutical industry, and regulation. No prior knowledge of economics or healthcare required.
Same as: EASTASN 117

Same as: EASTASN 179

EASTASN 285. The United States, China, & Global Security. 2 Units.
This graduate-level seminar will be taught simultaneously on the campuses of Stanford University and Peking University and will feature a lecture series in which prominent American and Chinese scholars provide presentations that focus on key global security issues. The course content will highlight topics relevant to current U.S.- China relations and their respective roles in Asian and global security. Proposed lecture topics include: an introduction to U.S.- China relations; finance, trade, and investment; cyber security; nonproliferation; maritime security; terrorism; and energy and the environment. Hosted jointly by Stanford University and Peking University, enrollment will be limited to 20 students at each campus and, at Stanford, will be restricted to graduate students and undergraduates with senior standing. Enrollment is competitive, so potential students must complete an application by March 12, 2018 at 5pm: https://web.stanford.edu/dept/CEAS/EASTASN285.fb.
Same as: INTLPOL 285

EASTASN 289K. Korea and the World. 3 Units.

EASTASN 294. The Rise of China in World Affairs. 3-5 Units.
This course examines the impact and implications of the rise of China in contemporary world politics from a historical and international relations perspective. It reviews China's halting progress into the international system, sketches the evolution of PRC foreign policy since 1949, and analyzes China's developmental priorities and domestic political context as they figure into Beijing's interactions with the world. It sketches American policy toward the PRC, and it assesses alternative approaches to dealing with China on such issues as arms and nuclear proliferation, regional security arrangements, international trade and investment, human rights, environmental problems, and the Taiwan and Tibet questions.
Same as: EASTASN 94

EASTASN 297. The International Relations of Asia since World War II. 3-5 Units.
Asian international relations since World War II were dominated by the efforts of the newly independent nation-states of Asia, almost all of which had been colonies before the war, to establish and maintain sovereignty in a context of American and Soviet competition for influence in the region. This course traces the major developments of the period, including the Chinese civil war, the U.S. occupation of Japan, the division of Korea and the Korean War, the South and Southeast Asian independence struggles, the American and Soviet alliance systems, the Vietnam War, the strategic realignments that led to the end of the Cold War in Asia, the emergence of Central Asia, and the legacy of issues that the period has posed for the region today.
Same as: EASTASN 97

EASTASN 300. Graduate Directed Reading. 1-5 Unit.
Independent studies under the direction of a faculty member for which academic credit may properly be allowed. For East Asian Studies M.A. students only.

EASTASN 301. Graduate Archival Directed Reading. 1 Unit.
Independent studies under the direction of a faculty member for which academic credit may properly be allowed. Research will require in-person access to archival materials in Hoover Institution, Stanford's East Asia Library, and/or Branner Map Collections. For East Asian Studies M.A. students only.

EASTASN 330. Core Seminar: Issues and Approaches in East Asian Studies. 1 Unit.
For East Asian Studies M.A. students only.

EASTASN 390. Practicum Internship. 1 Unit.
On-the-job training under the guidance of experienced, on-site supervisors. Meets the requirements for curricular practical training for students on F-1 visas. Students submit a concise report detailing work activities, problems worked on, and key results. May be repeated for credit. Prerequisite: qualified offer of employment and consent of adviser.

EASTASN 402A. Topics in International Technology Management. 1 Unit.
Theme for Autumn 2020 is "Digital transformation among new and traditional industries in Asia." Distinguished guest speakers and panels from industry discuss approaches in Asia to data-driven business models, influencer marketing, DevOps for new AI solutions, data privacy and security, new value chain relationships, etc. See syllabus for specific requirements, which may differ from those of other seminars at Stanford.
Same as: EALC 402A, EE 402A

EASTASN 402T. Entrepreneurship in Asian High Tech Industries. 1 Unit.
Distinctive patterns and challenges of entrepreneurship in Asia; update of business and technology issues in the creation and growth of start-up companies in major Asian economies. Distinguished speakers from industry, government, and academia.
Same as: EALC 402T, EE 402T

EASTASN 801. TGR Project. 0 Units.

Courses

International Relations Courses

INTNLREL 5C. Human Trafficking: Historical, Legal, and Medical Perspectives. 3 Units.
(Same as History 105C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution, labor exploitation, and organ trade, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning. Required weekly 50-min. discussion section, time TBD. Students interested in service learning should consult with the instructor and will enroll in an additional course.
Same as: CSRE 5C, FEMGEN 5C, HISTORY 5C

INTNLREL 33SI. Myths and Realities of U.S.-China Relations. 2 Units.
This course introduces students to the U.S.-China relationship through a weekly speaker series followed by student-led discussions. Speakers from academia and industry will explore topics such as the business environment of China, the politics of the Sino-American dynamic, and technological growth in China. The purpose of the course is to tackle the myths and misconceptions surrounding U.S.-China relations, and build in students a strong foundational understanding of the multiple facets of the bilateral relationship. Students will be exposed to a variety of issues and will be able to explore a topic of interest through a capstone presentation at the end of the course.

INTNLREL 60Q. United Nations Peacekeeping. 3 Units.
Focus is on an examination of United Nations peacekeeping, from its inception in 1956 in the wake of the Suez Crisis, to its increasingly important role as an enforcer of political stability in sub-Saharan Africa. Examines the practice of "classic" peacekeeping as it developed during the Cold War, the rise and fall of "second-generation" peacekeeping, and the reemergence of a muscular form of peacekeeping in sub-Saharan Africa more recently. Topics include the basic history of the United Nations since 1945, he fundamentals of the United Nations Charter, and the historical trajectory of U.N. peaeckeeping and the evolving arguments of its proponents and critics over the years.
Same as: PEDS 60Q

INTNLREL 61Q. Food and security. 3 Units.
The course will provide a broad overview of key policy issues concerning agricultural development and food security, and will assess how global governance is addressing the problem of food security. At the same time the course will provide an overview of the field of international security, and examine how governments and international institutions are beginning to include food in discussions of security.
Same as: EARTHSYS 61Q, ESS 61Q

INTNLREL 62Q. Mass Atrocities: Reckoning and Reconciliation. 3 Units.
Imagine you live in a country in which a delusional dictator imprisons untold masses in labor and concentration camps, and kills millions of them. Imagine you live in another country, in which one ethnic group slaughters the other. Imagine you live in yet another country in which a racial white minority terrorizes and violently discriminates against a huge majority of black population. Or, imagine you live in a country in which members of one group engage in an "ethnic cleansing" of their former neighbors.nnNow imagine this: Some big political change comes to each of these societies, and the perpetrators lose their power and are finally stopped from committing any more crimes and atrocities. Now comes the time to decide how to bring about justice for the past wrongs. It is also a question of how to come to terms with the terrible past. How to remember it? How to confront it? How to judge the perpetrators? How to identify them? How to punish them appropriately if at all? Also, is it possible to ever reconcile with the former oppressors and enemies? Maybe even to forgive them? If so, under what circumstances? What is necessary for such reconciliation? What if some of the victims were also perpetrators?nnThe scenarios mentioned above are real ones¿they happened in Germany, Rwanda, South Africa, Bosnia, and elsewhere. In this IntroSem we will explore the social, political, and legal arrangements societies debated about, negotiated, and used to deal with the atrocities of the past. We will assess their utility in the process of ¿transitional justice.¿ We will scrutinize crimes tribunals and truth commissions, and inquire whether they enabled the victims to gain a sense of justice and fairness. Likewise, we will consider under what conditions those victims might ever be capable of a genuine reconciliation.

INTNLREL 63Q. International Organizations and Accountability. 3 Units.
International organizations (IOs), like the IMF, the World Bank, the United Nations, and others, have been widely criticized as insufficiently accountable. For example, some argue that states are not able to control IOs whose bureaucracies have grown out of control and run amok, while others argue that the real problem is that communities most impacted by IO activities, such as those receiving World Bank loans or UN peacekeeping operations, are least able to influence their activities. Still others contend that the voting rules by which states control IOs are outdated and should be reformed to remedy these problems.nnThrough readings, discussions and case studies, students will learn about a range of international organizations in order to better understand what they do and how they are supposed to be controlled. In addition, we will evaluate the critiques of IO accountability that come from the right and the left, as well as the North, South, East and West, and will analyze different mechanisms of accountability, both formal and informal. Students will have the opportunity to research and present on specific international organizations and accountability mechanisms.

INTNLREL 64Q. Leadership and International Organizations. 3 Units.
What do intergovernmental organizations like the United Nations, the World Food Program, the United Nations High Commission for Refugees actually do? Do these organizations simply act on the interests of the governments that comprise them? Or do they have some autonomy to pursue their own programs, plans, and priorities? Does leadership of these organizations matter for their performance? What dilemmas do the leaders or intergovernmental organizations face as they try to satisfy governments while serving people in need all over the world? This course will get at these questions through examining the lives, careers and choices of leaders of major international organizations over the last thirty years. Reading assignments will include memoirs and biographies of leaders of international organizations, as well as analytical and empirical studies of international organizations. We plan on inviting former and current leaders of international organizations to visit the seminar.

INTNLREL 76. Protagonists in Policy. 1 Unit.
Interested in learning from activists, academics, and politicians about the different ways you can be an agent of change and affect public policy? This course presents a lecture/discussion series in which students will have the opportunity to engage with influential speakers to discover and learn more about timely topics relating to policy, government, and international affairs. Speakers will be selected in cooperation with the Policy Dinners Committee, a branch of Stanford in Government.
Same as: POLISCI 76

INTNLREL 82. The Ending of World War I: Three Perspectives. 2 Units.
This course is required for those students who will be taking the BOSP Overseas Seminar, The Ending of the First World War and the Shaping of the 20th Century. Enrollment is limited to students who will be taking the overseas seminar, or are waitlisted for the seminar.nnThis course has three learning goals: 1.) to provide historical background on the war and the events and processes leading up to the ending of the war; 2.) to help students formulate possible research topics for the Overseas Seminar; and 3.) to acquaint the students with archival research in preparation for their time in London. The course will be taught from the perspectives of military history, political science, and literature. Each week we will meet to discuss the reading material.

INTNLREL 101Z. Introduction to International Relations. 4 Units.
Approaches to the study of conflict and cooperation in world affairs. Applications to war, terrorism, trade policy, the environment, and world poverty. Debates about the ethics of war and the global distribution of wealth.
Same as: POLISCI 101Z

INTNLREL 102. History of the International System since 1914. 5 Units.
After defining the characteristics of the international system at the beginning of the twentieth century, this course reviews the primary developments in its functioning in the century that followed. Topics include the major wars and peace settlements; the emergence of Nazism and Communism; the Cold War; decolonization; and globalization. The role of international institutions and international society will also be a focus as will the challenges of climate change, inequality, migration, and terrorism.
Same as: HISTORY 102

INTNLREL 103F. The Changing Face of War: Introduction to Military History. 3-5 Units.
Introduces students to the rich history of military affairs and, at the same time, examines the ways in which we think of change and continuity in military history. How did war evolve from ancient times, both in styles of warfare and perceptions of war? What is the nature of the relationship between war and society? Is there such a thing as a Western way of war? What role does technology play in transforming military affairs? What is a military revolution and can it be manufactured or induced? Chronologically following the evolution of warfare from Ancient Greece to present day so-called new wars, we will continuously investigate how the interdependencies between technological advances, social change, philosophical debates and economic pressures both shaped and were influenced by war. Students satisfying the WiM requirement for the major in International Relations, must enroll in INTNLREL 103F course listing.
Same as: HISTORY 3F, HISTORY 103F

INTNLREL 105C. Human Trafficking: Historical, Legal, and Medical Perspectives. 5 Units.
(Same as HISTORY 5C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution, labor exploitation, and organ trade, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning. Required weekly 50-min. discussion section, time TBD. Students interested in service learning should consult with the instructor and will enroll in an additional course.
Same as: CSRE 105C, FEMGEN 105C, HISTORY 105C, HUMRTS 112

INTNLREL 110C. America and the World Economy. 5 Units.
Examination of contemporary US foreign economic policy. Areas studied: the changing role of the dollar; mechanism of international monetary management; recent crises in world markets including those in Europe and Asia; role of IMF, World Bank and WTO in stabilizing world economy; trade politics and policies; the effects of the globalization of business on future US prosperity. Political Science majors taking this course for WIM credit should enroll in POLISCI 110C.
Same as: POLISCI 110C, POLISCI 110X

INTNLREL 110D. War and Peace in American Foreign Policy. 3-5 Units.
The causes of war in American foreign policy. Issues: international and domestic sources of war and peace; war and the American political system; war, intervention, and peace making in the post-Cold War period. Political Science majors taking this course to fulfill the WIM requirement should enroll in POLISCI 110D for 5 units. International Relations majors taking this course should enroll in INTNLREL 110D for 5 units. SCPD students should enroll for 3 units.
Same as: AMSTUD 110D, POLISCI 110D, POLISCI 110Y

INTNLREL 114D. Democracy, Development, and the Rule of Law. 3-5 Units.
This course explores the different dimensions of development - economic, social, and political - as well as the way that modern institutions (the state, market systems, the rule of law, and democratic accountability) developed and interacted with other factors across different societies around the world. The class will feature additional special guest lectures by Francis Fukuyama, Larry Diamond, Michael McFaul, Anna Grzymala-Busse, and other faculty and researchers affiliated with the Center on Democracy, Development, and the Rule of Law. Undergraduate students should enroll in this course for 5 units. Graduate students should enroll for 3.
Same as: INTLPOL 230, POLISCI 114D, POLISCI 314D

INTNLREL 118S. Political Economy of International Trade and Investment. 5 Units.
How domestic and international politics influence the economic relations between countries. Why do governments promote or oppose globalization? Why do countries cooperate economically in some situations but not others? Why do countries adopt bad economic policies? Focus on the politics of international trade and investment. Course approaches each topic by examining alternative theoretical approaches and evaluate these theories using historical and contemporary evidence from many geographical regions around the world. Prerequisites: ECON 1A, ECON 1B, and a statistics course.
Same as: POLISCI 218S

INTNLREL 122. Introduction to European Studies. 5 Units.
This course offers an introduction to major topics in the study of historical and contemporary Europe. We focus on European politics, economics and culture. First, we study what makes Europe special, and how its distinct identity has been influenced by its history. Next, we analyze Europe's politics. We study parliamentary government and proportional representation electoral systems, and how they affect policy. Subsequently, we examine the challenges the European economy faces. We further study the European Union and transatlantic relations.
Same as: POLISCI 213E

INTNLREL 123. The Future of the European Union: Challenges and Opportunities. 5 Units.
First, this course analyzes the EU's greatest challenge, preserving the monetary union, and discusses the political and economic reforms needed to achieve that goal. In this context the course also studies the fiscal and budgetary polices of the EU. Second, the course discusses the EU's role in global politics, its desire to play a more prominent role, and the ways to reach that objective. Third, the course analyzes the EU's institutional challenges in its efforts to enhance its democratic character.

INTNLREL 124. Immigration Issues in Europe. 4-5 Units.
This course will consider responses to mass migration in Europe and its contribution to a radicalized political landscape. Sampling immigrant integration policies from Germany, Sweden, Denmark, France, Britain, Hungary, Poland, and Italy will help us examine public discourse on cultural and civic assimilation of mostly Muslim immigrants. Issues such as security and counterterrorism, as well as obstacles to cooperation with countries outside the EU (Turkey, Libya), will be included.

INTNLREL 135A. International Environmental Law and Policy: Oceans and Climate Change. 4-5 Units.
This seminar offers an introduction to International Environmental Law, with a strong emphasis on oceans and climate change, its underlying principles, how it is developed and implemented, and the challenges of enforcing it. We will focus on oceans and climate change, exploring the United Nations Law of the Sea Convention (UNCLOS) and the United Nations Framework Convention for Climate Change (UNFCCC). We will explain why these agreements are described as ¿umbrella conventions¿ and how new conventions like the Paris Agreement fit within them. There will be guest speakers, a negotiation simulation, and a legal design sprint focused on re-imagining International Environmental Law.

INTNLREL 136R. Introduction to Global Justice. 4 Units.
This course explores the normative demands and definitions of justice that transcend the nation-state and its borders, through the lenses of political justice, economic justice, and human rights. What are our duties (if any) towards those who live in other countries? Should we be held morally responsible for their suffering? What if we have contributed to it? Should we be asked to remedy it? At what cost? These are some of the questions driving the course. Although rooted in political theory and philosophy, the course will examine contemporary problems that have been addressed by other scholarly disciplines, public debates, and popular media, such as immigration and open borders, climate change refugees, and the morality of global capitalism (from exploitative labor to blood diamonds). As such, readings will combine canonical pieces of political theory and philosophy with readings from other scholarly disciplines, newspaper articles, and popular media.
Same as: ETHICSOC 136R, PHIL 76, POLISCI 136R, POLISCI 336

INTNLREL 140A. International Law and International Relations. 4-5 Units.
International law, as a body of law, performs multiple, competing functions. It serves the interests, and seeks to limit the actions, of state actors. It is also a political rhetoric captured by the oppressed, and a foundation for activism and resistance. The purpose of this seminar is to illuminate this malleable nature of international law, to explain its foundational principles and sources, and to evaluate the contours of its role as law and discourse. Questions that will accompany us throughout this seminar include: What is the character of international legal rules? Do they matter in international politics? How effective are they? What potential and what limitations do they have? In addition to exploring such questions against the backdrop of theories of international relations, we will consider several topics which bring tensions between international law and international relations to the fore, such as use of force, human rights, and international criminal law.

INTNLREL 140C. The U.S., U.N. Peacekeeping, and Humanitarian War. 4-5 Units.
The involvement of U.S. and the UN in major wars and international interventions since the 1991 Gulf War. The UN Charter's provisions on the use of force, the origins and evolution of peacekeeping, the reasons for the breakthrough to peacemaking and peace enforcement in the 90s, and the ongoing debates over the legality and wisdom of humanitarian intervention. Case studies include Croatia and Bosnia, Somalia, Rwanda, Kosovo, East Timor, and Afghanistan. *International Relations majors taking this course to fulfill the WiM requirement should enroll in INTNLREL 140C for 5 units.
Same as: HISTORY 201C, INTNLREL 140X

INTNLREL 140X. The U.S., U.N. Peacekeeping, and Humanitarian War. 4-5 Units.
The involvement of U.S. and the UN in major wars and international interventions since the 1991 Gulf War. The UN Charter's provisions on the use of force, the origins and evolution of peacekeeping, the reasons for the breakthrough to peacemaking and peace enforcement in the 90s, and the ongoing debates over the legality and wisdom of humanitarian intervention. Case studies include Croatia and Bosnia, Somalia, Rwanda, Kosovo, East Timor, and Afghanistan. *International Relations majors taking this course to fulfill the WiM requirement should enroll in INTNLREL 140C for 5 units.
Same as: HISTORY 201C, INTNLREL 140C

INTNLREL 141A. Camera as Witness: International Human Rights Documentaries. 5 Units.
Rarely screened documentary films, focusing on global problems, human rights issues, and aesthetic challenges in making documentaries on international topics. Meetings with filmmakers.

INTNLREL 142. Challenging the Status Quo: Social Entrepreneurs Advancing Democracy, Development and Justice. 3-5 Units.
This seminar is part of a broader program on Social Entrepreneurship at CDDRL in partnership with the Haas Center for Public Service. It will use practice to better inform theory. Working with three visiting social entrepreneurs from developing and developed country contexts students will use case studies of successful and failed social change strategies to explore relationships between social entrepreneurship, gender, democracy, development and justice. It interrogates current definitions of democracy and development and explores how they can become more inclusive of marginalized populations. This is a service learning class in which students will learn by working on projects that support the social entrepreneurs' efforts to promote social change. Students should register for either 3 OR 5 units only. Students enrolled in the full 5 units will have a service-learning component along with the course. Students enrolled for 3 units will not complete the service-learning component. Limited enrollment. Attendance at the first class is mandatory in order to participate in service learning.
Same as: AFRICAST 142, AFRICAST 242, CSRE 142C

INTNLREL 143. State and Society in Korea. 4 Units.
20th-century Korea from a comparative historical perspective. Colonialism, nationalism, development, state-society relations, democratization, and globalization with reference to the Korean experience.
Same as: SOC 111, SOC 211

INTNLREL 145. Genocide and Humanitarian Intervention. 4 Units.
The course, traces the history of genocide in the 20th century and the question of humanitarian intervention to stop it, a topic that has been especially controversial since the end of the Cold War. The pre-1990s discussion begins with the Armenian genocide during the First World War and includes the Holocaust and Cambodia under the Khmer Rouge in the 1970s. Coverage of genocide and humanitarian intervention since the 1990s includes the wars in Bosnia, Rwanda, Kosovo, the Congo, and Sudan. The final session of the course will be devoted to a discussion of the International Criminal Court and the separate criminal tribunals that have been tasked with investigating and punishing the perpetrators of genocide.

INTNLREL 146A. Energy and Climate Cooperation in the Western Hemisphere. 4 Units.
The seminar provides an overview of the current political dynamics in each of the major fossil fuel producing countries in the Western Hemisphere and its impact on local energy exploration and production. It also explores the potential for expanding existing or developing new renewable energy resources throughout the Americas, and impacts on the local environment, food prices, and land use issues. The course examines the feasibility of integrating energy markets and establishing initiatives to reduce greenhouse gas emissions at the regional and hemispheric level. The seminar focuses on Chile, a country that lacks significant petroleum and natural gas reserves and has traditionally been a major user of coal. Accordingly, the country has been at the forefront of efforts to facilitate the regional integration of energy markets and develop renewable and non-traditional energy resources. The course concludes with a discussion of the Energy and Climate Partnership of the Americas or ECPA, launched by the Obama administration at the Fifth Summit of the Americas in Trinidad in April 2009, and China¿s increasing role in Latin America¿s energy sector.

INTNLREL 147. Political Economy of the Southern Cone Countries of South America. 5 Units.
This seminar examines the economic and political development of the five countries that make up South America's Southern Cone (i.e., Argentina, Brazil, Chile, Paraguay, and Uruguay) as well as Bolivia (which was historically part of the sub-region and with which today it has close commercial ties). In particular, the course focuses on the era of Import Substitution Industrialization (ISI), explores the reasons why that model of economic development eventually collapsed and how this contributed to the rise of military dictatorships, looks at the return to democratic rule and the adoption of market-oriented economic policies, and concludes with a discussion of the contemporary situation.

INTNLREL 154. The Cold War: An International History. 5 Units.
Though it ended twenty years ago, we still live in a world shaped by the Cold War. Beginning with its origins in the mid-1940s, this course will trace the evolution of the global struggle, until its culmination at the end of the 1980s. Students will be asked to ponder the fundamental nature of the Cold War, what kept it alive for nearly fifty years, how it ended, and its long term legacy for the world. As distinguished from the lecture taught in previous quarters, this class will closely investigate ten major Cold War battlegrounds over the quarter. Selected case studies will include: the division of Germany, Iran in the 1950s, Cuba, Vietnam, the Six Day War, the Chilean coup, sub-Saharan Africa, Afghanistan, Central America, and the Eastern European revolutions of 1989. Students will be asked to consult a combination of original documents and recent histories.
Same as: HISTORY 166C

INTNLREL 160. United Nations Peacekeeping. 4 Units.
This seminar is devoted to an examination of United Nations peacekeeping, from its inception in 1956 in the wake of the Suez Crisis, to its increasingly important role as an enforcer of political stability in sub-Saharan Africa. We will look at the practice of "classic" peacekeeping as it developed during the Cold War, with the striking exception of the Congo Crisis of 1960; the rise and fall of so-called "second-generation peacekeeping"¿more accurately labeled "peace enforcement"¿in the early 1990s in Bosnia and Somalia; and the reemergence in recent years of a muscular form of peacekeeping in sub-Saharan Africa, most notably in Congo in 2013.nStudents will learn the basic history of the United Nations since 1945 and the fundamentals of the United Nations Charter, especially with respect to the use of force and the sovereignty of member states. While the course does not attempt to provide comprehensive coverage of the historical details of any particular peacekeeping mission, students should come away with a firm grasp of the historical trajectory of U.N. peacekeeping and the evolving arguments of its proponents and critics over the years.nEach session of the course is structured around the discussion of assigned readings. Students are expected to complete the readings before class and to come to class prepared to participate in discussions. Each student will serve as rapporteur for one of the assigned readings, providing a critical summary of the reading in question and helping to stimulate the discussion to follow. The instructor will occasionally begin a session with brief introductory remarks (no more than ten minutes) to provide historical context about one or another topic. Required coursework includes two short papers whose particular topic and guidelines will be announced in class.

INTNLREL 168. America as a World Power in the Modern Era. 5 Units.
This course will examine the modern history of American foreign relations, from the turn of the twentieth century to the present. Beginning with the fateful decision to go to war with Spain, it will examine the major crises and choices that have defined the "American Century." Our study of U.S. foreign relations will consider such key factors as geopolitics, domestic politics, bureaucracy, psychology, race, and culture. IR majors taking this course to fulfill the IR WIM requirement should enroll in INTNLREL168W.
Same as: HISTORY 152K, INTNLREL 168W

INTNLREL 168A. American Interventions, 1898-Present. 5 Units.
This class seeks to examine the modern American experience with limited wars, beginning with distant and yet pertinent cases, and culminating in the war in Iraq. Although this class will examine war as a consequence of foreign policy, it will not focus primarily on presidential decision making. Rather, it will place wartime policy in a broader frame, considering it alongside popular and media perceptions of the war, the efforts of antiwar movements, civil-military relations, civil reconstruction efforts, and conditions on the battlefield. We will also examine, when possible, the postwar experience.
Same as: HISTORY 259E, HISTORY 359E

INTNLREL 168W. America as a World Power in the Modern Era. 5 Units.
This course will examine the modern history of American foreign relations, from the turn of the twentieth century to the present. Beginning with the fateful decision to go to war with Spain, it will examine the major crises and choices that have defined the "American Century." Our study of U.S. foreign relations will consider such key factors as geopolitics, domestic politics, bureaucracy, psychology, race, and culture. IR majors taking this course to fulfill the IR WIM requirement should enroll in INTNLREL168W.
Same as: HISTORY 152K, INTNLREL 168

INTNLREL 173. Presidents and Foreign Policy in Modern History. 5 Units.
Nothing better illustrates the evolution of the modern presidency than the arena of foreign policy. This class will examine the changing role and choices of successive presidential administrations over the past century, examining such factors as geopolitics, domestic politics, the bureaucracy, ideology, psychology, and culture. Students will be encouraged to think historically about the institution of the presidency, while examining specific case studies, from the First World War to the conflicts of the 21st century.
Same as: HISTORY 261G

INTNLREL 174. Diplomacy on the Ground: Case Studies in the Challenges of Representing Your Country. 5 Units.
The tragic death of Ambassador Chris Stevens has recently highlighted the dangers of diplomacy in the modern era. This class will look at how Americans in embassies have historically confronted questions such as authoritarian rule, human rights abuses, violent changes of government, and covert action. Case studies will include the Berlin embassy in the 1930s, Tehran in 1979, and George Kennan's experiences in Moscow, among others. Recommended for students contemplating careers in diplomatic service. *IR majors taking this course to fulfill the IR WIM requirement should enroll in INTNLREL174. As space is limited, first-year students must obtain the instructor's prior consent before enrolling.
Same as: HISTORY 252B

INTNLREL 175. American Empire in the Pacific. 3 Units.
This course will provide an interdisciplinary overview of the history and current state of American empire in the Pacific Islands. Through the lenses of law, history, and anthropology, the course will chart the progression of the American empire, beginning with early colonization, through World War II and the Cold War, to present day, including modern challenges facing communities affected by U.S. imperialism, decolonization movements, and the intersection of empire and climate change. Themes include cultural imperialism, militarization and experimentation, human rights and global ethics, and social and environmental justice.

INTNLREL 179. Major Themes in U.S.-Latin America Diplomatic History. 5 Units.
This seminar provides an overview of the most important events and initiatives that have characterized the relationship of the United States of America with its neighbors to the south, including Mexico, the Caribbean (especially Cuba, Haiti, and the Dominican Republic), Central America, and South America since the proclamation of the Monroe Doctrine in the early 19th century until the Obama Administration. In particular, the course examines the motivations for the Theodore Roosevelt Corollary to the Monroe Doctrine and the resulting period of blatant interventionism known as "Dollar Diplomacy," the Good Neighbor Policy of Franklin Delano Roosevelt, the brutal Cold War period, as well as policies pursued by the Clinton, George W. Bush, and Obama administrations, such as the Free Trade Area of the Americas (FTAA) and the Energy and Climate Partnership of the Americas (ECPA). The seminar explores not only what motivated U.S. policy makers and how their polices were implemented (and explains why they either succeeded or failed), but also discusses the impacts on individual countries and/or the region as a whole and the long-term consequences whose repercussions are still being felt today. The course also examines the major features of the inter-American system from the Pan American Union to the creation of the Organization of American States (OAS) and its continued relevancy in light of new institutional frameworks such as the Community of Latin American and Caribbean States (CELAC) and the Union of South American Nations (UNASUR) that exclude the United States of America.

INTNLREL 180A. Transitional Justice, Human Rights, and International Criminal Tribunals. 3-5 Units.
(Formerly IPS 280) Historical backdrop of the Nuremberg and Tokyo Tribunals. The creation and operation of the Yugoslav and Rwanda Tribunals (ICTY and ICTR). The development of hybrid tribunals in East Timor, Sierra Leone, and Cambodia, including evaluation of their success in addressing perceived shortcomings of the ICTY and ICTR. Examination of the role of the International Criminal Court and the extent to which it will succeed in supplanting all other ad hoc international justice mechanisms and fulfill its goals. Analysis focuses on the politics of creating such courts, their interaction with the states in which the conflicts took place, the process of establishing prosecutorial priorities, the body of law they have produced, and their effectiveness in addressing the needs of victims in post-conflict societies.

INTNLREL 182. The Great War. 5 Units.
The First World War provided a prototype for a new, horrific kind of war. It catalyzed the emergence of modern means of warfare and the social mechanisms necessary to sustain the industrialized war machine. Killing millions, it became the blueprint for the total war that succeeded it. It also brought about new social and political orders, transforming the societies which it mobilized at unprecedented levels.n nThis course will examine the military, political, economic, social and cultural aspects of the conflict. We will discuss the origins and outbreak of the war, the land, sea and air campaigns, the war's economic and social consequences, the home fronts, the war's final stages in eastern and western Europe as well as non-European fronts, and finally, the war's impact on the international system and on its belligerents and participants' perceptions of the new reality it had created.

INTNLREL 183. The Modern Battle. 5 Units.
The purpose of this seminar is to examine the evolution of modern warfare by closely following four modern battles/campaigns. For this purpose the seminar offers four mock staff rides, facilitating highly engaged, well-researched experience for participants. In a mock staff ride, students are assigned roles; each student is playing a general or staff officer who was involved in the battle/campaign. Students will research their roles and, during the staff ride, will be required to explain "their" decisions and actions. Staff rides will not deviate from historical records, but closely examine how decisions were made, what pressures and forces were in action, battle outcomes, etc. This in-depth examination will allow students to gain a deeper understanding of how modern tactics, technology, means of communications, and the scale of warfare can decide, and indeed decided, campaigns. We will will spend two weeks preparing for and playing each staff ride. One meeting will be dedicated to discussing the forces shaping the chosen battle/campaign: the identity and goals ofnthe belligerents, the economic, technological, cultural and other factors involved, as well as the initial general plan. The second meeting will be dedicated to the battle itself. The four battles will illustrate major developments in modern warfare.
Same as: HISTORY 206C

INTNLREL 189. PRACTICAL TRAINING. 1-3 Unit.
Students obtain internship in a relevant research or industrial activity to enhance their professional experience consistent with their degree program and area of concentration. Prior to enrolling students must get internship approved by the director. At the end of the quarter, a three page final report must be supplied documenting work done and relevance to degree program. Meets the requirements for Curricular Practical Training for students on F-1 visas. Student is responsible for arranging own internship. Limited to declared International Relations students only who are non-US citizens. May be repeated for credit.

INTNLREL 197. Directed Reading in International Relations. 1-5 Unit.
Open only to declared International Relations majors.n (Staff).

INTNLREL 198. Senior Thesis. 2-10 Units.
Open only to declared International Relations majors with approved senior thesis proposals.

INTNLREL 200A. International Relations Honors Field Research. 3 Units.
For juniors planning to write an honors thesis during senior year. Initial steps to prepare for independent research. Professional tools for conceptualizing a research agenda and developing a research strategy. Preparation for field research through skills such as data management and statistics, references and library searches, and fellowship and grant writing. Creating a work schedule for the summer break and first steps in writing. Prerequisite: acceptance to IR honors program.

INTNLREL 200B. International Relations Honors Seminar. 3 Units.
Second of two-part sequence. For seniors working on their honors theses. Professional tools, analysis of research findings, and initial steps in writing of thesis. How to write a literature review, formulate a chapter structure, and set a timeline and work schedule for the senior year. Skills such as data analysis and presentation, and writing strategies. Prerequisites: acceptance to IR honors program, and 199 or 200A. * Course satisfies the WiM requirement for International Relations majors who are accepted into the IR Honors program.

INTNLREL 200C. IR Honors Thesis Writing. 1 Unit.
Mandatory seminar for International Relations Honors Students who are writing their Honors Thesis. INTNLREL 200A and 200B are prerequisites.

INTNLREL 202. Original Research in International Relations. 5 Units.
This new course offers IR majors an opportunity to conduct in-depth, original research and write an original research paper on a topic of their choosing within a single quarter. It is ideally suited for students who have a question that has intrigued them and that they would like to answer through original research. Through this course, students will narrow their interests into a clear research question, develop a research design, review relevant literature that addresses this question, conduct original empirical research and produce a final research paper. The course is designed for IR majors, and thus has an interdisciplinary focus and embraces methodological diversity. It may also be petitioned to count towards the IR major.

Jewish Studies Courses

JEWISHST 4. What Didn't Make It into the Bible. 4 Units.
Over two billion people alive today consider the Bible to be sacred scripture. But how did the books that made it into the bible get there in the first place? Who decided what was to be part of the bible and what wasn't? How would history look differently if a given book didn't make the final cut and another one did? Hundreds of ancient Jewish and Christian texts are not included in the Bible. "What Didn't Make It in the Bible" focuses on these excluded writings. We will explore the Dead Sea Scrolls, Gnostic gospels, hear of a five-year-old Jesus throwing temper tantrums while killing (and later resurrecting) his classmates, peruse ancient romance novels, explore the adventures of fallen angels who sired giants (and taught humans about cosmetics), tour heaven and hell, encounter the garden of Eden story told from the perspective of the snake, and learn how the world will end. The course assumes no prior knowledge of Judaism, Christianity, the bible, or ancient history. It is designed for students who are part of faith traditions that consider the bible to be sacred, as well as those who are not. The only prerequisite is an interest in exploring books, groups, and ideas that eventually lost the battles of history and to keep asking the question "why." In critically examining these ancient narratives and the communities that wrote them, you will investigate how religions canonize a scriptural tradition, better appreciate the diversity of early Judaism and Christianity, understand the historical context of these religions, and explore the politics behind what did and did not make it into the bible.
Same as: CLASSICS 9N, RELIGST 4

JEWISHST 4N. A World History of Genocide. 3-5 Units.
Reviews the history of genocide from ancient times until the present. Defines genocide, both in legal and historical terms, and investigates its causes, consequences, and global dimensions. Issues of prevention, punishment, and interdiction. Main periods of concern are the ancient world, Spanish colonial conquest; early modern Asia; settler genocides in America, Australia, and Africa; the Armenian genocide and the Holocaust; genocide in communist societies; and late 20th century genocide.
Same as: HISTORY 4N

JEWISHST 5. Biblical Greek. 3-5 Units.
This is a one term intensive class in Biblical Greek. After quickly learning the basics of the language, we will then dive right into readings from the New Testament and the Septuagint, which is the ancient Greek translation of the Hebrew Bible. No previous knowledge of Greek required. If demand is high for a second term, an additional quarter will be offered in the Spring.
Same as: CLASSICS 6G, RELIGST 171A

JEWISHST 5B. Biblical Greek. 3-5 Units.
This is a continuation of the Winter Quarter Biblical Greek Course. Pre-requisite: CLASSICS 6G or a similar introductory course in Ancient Greek.
Same as: CLASSICS 7G

JEWISHST 5G. Intensive Biblical Greek. 8 Units.
Equivalent to two quarters of Biblical Greek (CLASSICS 6G, 7G). Students will learn the core of New Testament Greek with the goal of learning to accurately translate and read the New Testament. Students will read one-third of the Gospel of John during the course and will be well-prepared to read the Greek New Testament independently after the course. Focus on knowledge of key vocabulary and grammar needed to read the Greek Bible with ease. No previous knowledge of Greek required. Course does not fulfill the Stanford language requirement.
Same as: RELIGST 171X

JEWISHST 18N. Religion and Politics: Comparing Europe to the U.S.. 3-4 Units.
Interdisciplinary and comparative. Historical, political, sociological, and religious studies approaches. The relationship between religion and politics as understood in the U.S. and Europe. How this relationship has become tense both because of the rise of Islam as a public religion in Europe and the rising influence of religious groups in public culture. Different understandings and definitions of the separation of church and state in Western democratic cultures, and differing notions of the public sphere. Case studies to investigate the nature of public conflicts, what issues lead to conflict, and why. Why has the head covering of Muslim women become politicized in Europe? What are the arguments surrounding the Cordoba House, known as the Ground Zero Mosque, and how does this conflict compare to controversies about recent constructions of mosques in Europe? Resources include media, documentaries, and scholarly literature.
Same as: RELIGST 18N

JEWISHST 19N. Everyone Eats: Food, Religion and Culture. 3 Units.
Food is one of the most essential aspects of the human experience. The decisions and choices we make about food define who we have been, who we are now, and who we want to become. In this seminar we will study how food habits have shaped religious traditions, and vice versa, how religious traditions have shaped food ways. Some traditions are centered around food regiments such as the dietary laws, derived from biblical law that shapes Jewish and Christian tradition very differently. Indeed, many religious and ethical thinkers, as well as anthropologists, have interpreted the meanings of the dietary laws very differently. Further, in many religious traditions the killing of animals and consumption of meat is deeply fraught. We will explore the history of food practices and their contemporary impact; the connections between food, religion, and identity; the meanings that religious thinkers and anthropologists have attributed to food habits; as well as the creative translations of religious traditions into contemporary food ethics by various social movements and groups, predominantly in the U.S.
Same as: CSRE 19N, RELIGST 19N

JEWISHST 37Q. Zionism and the Novel. 3 Units.
At the end of the nineteenth century, Zionism emerged as a political movement to establish a national homeland for the Jews, eventually leading to the establishment of the State of Israel in 1948. This seminar uses novels to explore the changes in Zionism, the roots of the conflict in the Middle East, and the potentials for the future. We will take a close look at novels by Israelis, both Jewish and Arab, in order to understand multiple perspectives, and we will also consider works by authors from the North America and from Europe. NOTE: To satisfy a WAYS requirement, this course must be taken for at least 3 units. In AY 2020-21, a 'CR' grade will satisfy the WAYS requirement.
Same as: COMPLIT 37Q

JEWISHST 39S. The Other Side: Ethnography and Travel Writing through Jewish, Christian and Muslim Eyes. 3 Units.
In an age of reality television and social media, we are bombarded with snapshots of the exotic, monstrous, and bizarre. Yet despite their quantity, these images pale in comparison to the qualities of terror, wonder and curiosity that ancient travelers evoked in their encounters with foreign lands and peoples. Early ethnographers, too, painstakingly explored the beliefs and practices of unfamiliar peoples sometimes very close to home. This course surveys their most vivid writings, from ancient Greece to the colonization of the New World, focusing on the relation between fascination with the other and the author's own religious imagination. In particular, it introduces the contributions of Jewish travelers and ethnographers to this history, which has often been written from the standpoint of imperial, ecclesiastical or colonial power. It stresses literary continuities across three general periods (ancient, medieval, and colonial), showing how remarkably consistent patterns of identification spring from diverse encounters.

JEWISHST 53. Exploring Jewish Spirituality. 4 Units.
It was once accepted as fact that Judaism is, at its core, a rational religion devoid of any authentic mystical tradition. But the past century of scholarship has reversed this claim, demonstrating that the spiritual life has been integral to Judaism's vital heart since ancient times. This yearning for a direct immediate experience of God's Presence, a longing to grasp the mysteries of the human soul and know the inner dynamics of the Divine realm, has taken on many different forms across the centuries.
This course will introduce students to the major texts--from theological treatises to poems and incantations--and core ideas of Jewish mysticism and spirituality, tracking their development from the Hebrew Bible to the dawn of modernity. Close attention will be paid to the historical context of these sources, and we will also engage with broader methodological approaches--from phenomenology to philology--regarding the academic study of religion and the comparative consideration of mysticism in particular.
This course assumes no prior background of Judaism or any other religious traditions. All readings will be made available in English. Students are, however, invited to challenge themselves with the "optional/advanced" readings of sources both primary and secondary. Pending interest, students with facility in the original languages (Hebrew or Aramaic) will be given the opportunity to do so.
Same as: RELIGST 53

JEWISHST 85B. Jews in the Contemporary World: The American Jewish Present & Past in Popular Culture, Film, & TV. 3 Units.
(HISTORY 85B is 3 units; HISTORY 185B is 5 units.) Who are American Jews as depicted in popular media-- film, television, etc.-- since the Second World War? How are their religion, politics, mores, and practices represented and what ways, if at all, do such portraits reflect historical trends among Jews and society in general? What can be learned from film or tv about Jewish identity, notions of Jewish power and powerlessness, communal cohesiveness and assimilation, sexuality and the wages of intermarriage or race?.
Same as: CSRE 85B, HISTORY 85B, REES 85B

JEWISHST 86. Exploring the New Testament. 4 Units.
To explore the historical context of the earliest Christians, students will read most of the New Testament as well as many documents that didn't make the final cut. Non-Christian texts, Roman art, and surviving archeological remains will better situate Christianity within the ancient world. Students will read from the Dead Sea Scrolls, explore Gnostic gospels, hear of a five-year-old Jesus throwing divine temper tantrums while killing (and later resurrecting) his classmates, peruse an ancient marriage guide, and engage with recent scholarship in archeology, literary criticism, and history.
Same as: CLASSICS 43, RELIGST 86

JEWISHST 86Q. Blood and Money: The Origins of Antisemitism. 4-5 Units.
For over two millennia, Jews and Judaism have been the object of sustained anxieties, fears, and fantasies, which have in turn underpinned repeated outbreaks of violence and persecution. This course will explore the development and impact of antisemitism from Late Antiquity to the Enlightenment, including the emergence of the Blood libel, the association between Jews and moneylending, and the place of Judaism in Christian and Islamic theology. No prior background in history or Jewish studies is necessary. Prerequisite: PWR 1.
Same as: HISTORY 86Q

JEWISHST 101A. First-Year Hebrew, First Quarter. 5 Units.
In the first-year program, students acquire essential Hebrew through abundant opportunities to interact in the language in meaningful ways. The students learn to function appropriately in the language in a variety of social and cultural contexts.
Same as: AMELANG 128A

JEWISHST 101B. First-Year Hebrew, Second Quarter. 5 Units.
Continuation of AMELANG 128A. Prerequisite: Placement Test, AMELANG 128A.
Same as: AMELANG 128B

JEWISHST 101C. First-Year Hebrew, Third Quarter. 5 Units.
Continuation of AMELANG 128B. Prerequisite: Placement Test, AMELANG 128B. Fulfill the University Foreign Language Requirement.
Same as: AMELANG 128C

JEWISHST 102A. Second-Year Hebrew, First Quarter. 4 Units.
Continuation of AMELANG 128C. Sequence integrating culture and language. Emphasis is on proficiency in oral and written discourse including presentational language and socio culturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: Placement Test, First Year Hebrew .
Same as: AMELANG 129A

JEWISHST 102B. Second-Year Hebrew, Second Quarter. 4 Units.
Continuation of AMELANG 129A. Sequence integrating culture and language. Emphasis is on proficiency in oral and written discourse including presentational language and socio culturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: Placement Test, Hebrew 129A.
Same as: AMELANG 129B

JEWISHST 102C. Second-Year Hebrew, Third Quarter. 4 Units.
Continuation of AMELANG 129B. Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socio culturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: placement Test, Hebrew129B.
Same as: AMELANG 129C

JEWISHST 103A. Third-Year Hebrew, First Quarter. 3 Units.
Continuation of AMELANG 129C. Prerequisite: Placement Test, AMELANG 129C.
Same as: AMELANG 130A

JEWISHST 104. Hebrew Forum. 1-3 Unit.
Intermediate and advanced level. Biweekly Hebrew discussion on contemporary issues with Israeli guest speakers. Vocabulary enhancement. Focus on exposure to academic Hebrew. May be repeat for credit up to 4 times.
Same as: AMELANG 131A

JEWISHST 104A. First-Year Yiddish, First Quarter. 4 Units.
Reading, writing, and speaking.
Same as: AMELANG 140A

JEWISHST 104B. First-Year Yiddish, Second Quarter. 4 Units.
Continuation of AMELANG 140A. Prerequisite: AMELANG.
Same as: AMELANG 140B

JEWISHST 104C. First-Year Yiddish, Third Quarter. 4 Units.
Continuation of AMELANG 140B. Prerequisite: AMELANG 140B. Fulfills the University Foreign Language Requirement.
Same as: AMELANG 140C

JEWISHST 105. Hebrew Forum. 2-4 Units.
Intermediate and advanced level. Biweekly Hebrew discussion on contemporary issues with Israeli guest speakers. Vocabulary enhancement. Focus on exposure to academic Hebrew. May repeat for credit.
Same as: AMELANG 131B

JEWISHST 106. Reflection on the Other: The Arab Israeli Conflict in Literature and Film. 3-5 Units.
How literary works outside the realm of Western culture struggle with questions such as identity, minority, and the issue of the Other. How the Arab is viewed in Hebrew literature, film and music and how the Jew is viewed in Palestinian works in Hebrew or Arabic (in translation to English). Historical, political, and sociological forces that have contributed to the shaping of these writers' views. Guest lectures about the Jew in Palestinian literature and music. Note: To be eligible for WAYS credit, you must take course for a Letter Grade.
Same as: AMELANG 126, COMPLIT 145

JEWISHST 107A. Biblical Hebrew, First Quarter. 2 Units.
Establish a basic familiarity with the grammar and vocabulary of Biblical Hebrew and will begin developing a facility with the language. Students that are enrolled in this course must also enroll in Beginning Hebrew. This course requires no prior knowledge of Hebrew and will begin with learning the alphabet. By the end of the year, students will be able to translate basic biblical texts, will be familiar with common lexica and reference grammars, and will have sufficient foundational knowledge to enable them to continue expanding their knowledge either in a subsequent course or own their own.
Same as: RELIGST 170A

JEWISHST 107B. Biblical Hebrew, Second Quarter. 2 Units.
Continuation of 170A.

JEWISHST 107C. Biblical Hebrew, Third Quarter. 4 Units.
Continuation of 170B.
Same as: AMELANG 170C

JEWISHST 120. Sex and Gender in Judaism and Christianity. 3 Units.
What role do Jewish and Christian traditions play in shaping understandings of gender differences? Is gender always imagined as dual, male and female? This course explores the variety of ways in which Jewish and Christian traditions - often in conversation with and against each other - have shaped gender identities and sexual politics. We will explore the central role that issues around marriage and reproduction played in this conversation. Perhaps surprisingly, early Jews and Christian also espoused deep interest in writing about 'eunuchs' and 'androgynes,' as they thought about Jewish and Christian ways of being a man or a woman. We will examine the variety of these early conversations, and the contemporary Jewish and Christian discussions of feminist, queer, trans- and intersex based on them.
Same as: FEMGEN 130, RELIGST 130

JEWISHST 123. Muslims, Jews, and Christians: Conflict, Coexistence, and Collaboration. 4 Units.
Relationships between Muslims, Jews, and Christians today are informed by a multitude of complex and often painful histories. These faith traditions emerged out of deep and sustained engagement with one another sharing theological and ethical principles, and revering many of the same figures and there have been many periods of rich and productive interaction. Yet there have also been areas of dissension and conflict, and periods when theological, social, or political disagreement devolved into violence and oppression. In recent times (especially following the Holocaust and the establishment of the modern State of Israel), religious, political, and intellectual leaders of Muslim, Jewish, and Christian communities, in the U.S. and around the world, have recognized the need to forge deeper and more meaningful relationships with one another. Knowledge and understanding of the perspectives that different communities and individuals bring to bear on their entangled past, present, and future are a critical part of efforts to resolve intransigent conflicts and advance mutual interests. This course explores some of the most significant moments of interaction through literature and art, polemic and dialogue that have shaped engagements between Muslims, Jews, and Christians throughout history, and examines both prospects and pitfalls for engagement in the present and future.
Same as: RELIGST 133

JEWISHST 125. Modern Jewish Mysticism: Devotion in a Secular Age. 4 Units.
The twentieth-century was a time of tremendous upheaval and unspeakable tragedy for the Jewish communities of Europe. But the past hundred years were also a period of great renewal for Jewish spirituality, a renaissance that has continued into the present day. Beginning with the writings of the Safed Renaissance, the Sabbateanism, and the Hasidic masters, our course will focus on key thinkers in the 19th and 20th centuries, including: Hillel Zeitlin, Martin Buber, Abraham Isaac Kook, Abraham Joshua Heschel, and Arthur Green. Drawing upon essays, homilies, and poems, we will examine the ways in which their works re-cast and reinterpret the Jewish tradition in answer to the singular questions and challenges modernity. We will mark the development of their thinking against the two World Wars, the Holocaust, and the complex and multi-faceted processes of secularization. We will also consider the theological project of modern Jewish mystics in dialogue with modern Jewish philosophers (such as Hermann Cohen, Franz Rosenzweig, and Emmanuel Levinas) as well as modern philosophers and scholars informed by Christianity (from William James to Charles Taylor). This course argues that the processes of sacralization, of reclaiming a life of mystical devotion, are best understood as a unique response to Jewish modernity rather than a retreat to past modalities of religion. In seeking to prove this point, we will explore writers whose work emerged in and engaged with different social and cultural domains. We will investigate their writings with an eye to issues such as power and identity, and will draw upon their works in charting the intersection of mysticism, literature, language and experience. Throughout our readings, we will keep our eye on the sustained impact of feminism on Jewish mysticism in the second half of the twentieth century. This course is structured as a seminar, and our class discussions will be rooted in the primary sources. It assumes no prior background of Judaism or any other religious traditions. All readings will be made available in English.
Same as: RELIGST 165

JEWISHST 127D. Readings in Talmudic Literature. 1 Unit.
Readings of Talmudic texts. Some knowledge of Hebrew is preferred, but not necessary. The goal of the ongoing workshop is to provide Stanford students with the opportunity to engage in regular Talmud study, and to be introduced to a variety of approaches to studying Talmudic texts and thought.
Same as: JEWISHST 227D, RELIGST 170D

JEWISHST 127E. Readings in Talmudic Literature Advanced. 1 Unit.
Readings of the talmudic texts. Knowledge of Hebrew is required. The ongoing seminar is designed to study the making of the talmudic sugya (unit of discourse), along with classic commentaries. Students will consider some of the recent developments in the academic study of Talmudic literature, introduced by the instructor. The goal of the ongoing seminar is to provide Stanford students and faculty with the opportunity to engage in regular Talmud study, and to be introduced to a variety of approaches to studying Talmudic texts. Meeting time and location TBA. May be repeated for credit.
Same as: JEWISHST 227E, RELIGST 170E

JEWISHST 128. Women and Gender in Early Judaism and Christianity. 4 Units.
Beginning with the Hebrew Bible and New Testament, we will explore female figures in early Jewish and Christian literatures, such as Eve, Ruth, Mary, and Junia. Based on this, we will probe the prescriptions for female comportment in early Judaism and Christianity placing these literary prescriptions in conversation with material evidence related to women, such as for example the Babatha archive. We will analyze the politics of patriarchy in ancient discourse, and examine, among other topics, efforts by Christian clergy to silence female prophets in the second and third centuries CE. The bulk of the course will be devoted to the formative years of both Judaism and Christianity in Late Antiquity. This course assumes no prior knowledge of Judaism, Christianity, the Bible, or ancient history. It is designed for students who are part of faith traditions that consider the Bible to be sacred, as well as those who are not. Ancient readings in this course will be supplemented by modern scholarship in classics, early Christian studies, gender studies, queer studies, and the history of sexuality.
Same as: RELIGST 128

JEWISHST 129. Sacred Words: Jewish Thought and the Question of Language. 4 Units.
Jews have long been referred as the people of the book, but they might better be referred to as the people of the word. Drawing upon texts from the Hebrew Bible to the works of modern Hebrew writers like of Hayyim Nahman Bialik and Amoz Oz, this seminar will chart the development of Jewish thinking on language over the past two millennia. We will explore issues such as: the idea of canonization; oral versus written language; the nature and possibility of translation; the origins of language; notions of negative theology; mystical approaches to the word; the rebirth of Hebrew as a spoken and cultural language; and the limits of language after the Holocaust. This course will also bring Jewish thought into dialogue with contemporary philosophical reflections on issues of language. Modern explorations of language will prove an interesting way of deepening our understanding of the Jewish thinkers on one hand, and enriching contemporary intellectual discourse on the other.
Same as: RELIGST 169

JEWISHST 129A. Milk and Honey, Wine and Blood: Food, Justice, and Ethnic Identity in Jewish Culture. 4 Units.
This course examines Jewish culture and the food practices and traditions that have shaped and continue to shape it. Students learn to prepare a variety of meals while studying about the historical and literary traditions associated with them, such as the dietary `laws¿ and the long history of their interpretation, as well as the cultivation of eating as devotional practice in Jewish mystical traditions. We will explore how regional foods the world over contribute to the formation of distinct Jewish ethnic identities, and how these traditions shape contemporary Jewish food ethics. The course includes guest visits by professional chefs and food writers, and field trips to a local winery.
Same as: RELIGST 129

JEWISHST 130VP. Introduction to Social Demography: A Comparative Approach (Israel & US). 3 Units.
In this class we will learn about Israel's unique demographic structure and we will compare it to the US and other countries. Reading materials include general theories as well as research published in scholarly journals. In the first half of this class we will review basic demographic concepts (mortality, fertility and migration), and we will apply them to the Israeli context, with comparisons between different social groups in Israel and with comparison to the US. We will also review basic demographic theories (theories of population change) and apply them to different countries. nnIn the second half of the class we will focus on demography of the family. We will ask how fertility, marriage and divorce differ for different population groups in Israel and the US, and we will tie family processes to current theories of gender and family change. We will also learn how demographic processes may be related to the reproduction of poverty, and inequality.
Same as: SOC 119VP

JEWISHST 131VP. Poverty and Inequality in Israel and the US: A Comparative Approach. 3 Units.
Poverty rates in Israel are high and have been relatively stable in recent decades, with about one fifth of all households (and a third of all children) living below the poverty line. In this class we will learn about poverty and inequality in Israel and we will compare with the US and other countries.nnIn the first few weeks of this class we will review basic theories of poverty and inequality and we will discuss how theories regarding poverty have changed over the years, from the "culture of poverty" to theories of welfare state regimes. We will also learn about various ways of measuring poverty, material hardship, and inequality, and we will review the methods and data used.nnIn the remaining weeks of the class we will turn to substantive topics such as gender, immigration, ethnicity/nationality, welfare policy, age, and health. Within each topic we will survey the debates within contemporary scholarship and we will compare Israel and the US. Examination of these issues will introduce students to some of the challenges that Israeli society faces today.
Same as: CSRE 120P, SOC 120VP

JEWISHST 132. Between Nation-Building and Liberalization: The Welfare State in Israel. 3 Units.
According to one commentator, the political economy of Israel is characterized by embedded illiberalism. In the context of a national and territorial conflict, the Israeli state fostered comprehensive nation-building projects (such as immigration absorption), via employment and social protection schemes. This course surveys the distinctive development of the Israeli welfare state in comparative perspective, and analyzes its particular politics and outcomes in the form of inclusion but also exclusion of different populations from full citizenship. The course will follow a chronological path from the pre-state crystallization of national welfare institutions to the current neo-liberalization trend that seems to undermine collectivist projects and advance the re-commodification of citizenship. Throughout the course we will discuss issues such as: the role of labor and nationalism in the design of social policy, the production of national, ethnic and gender inequality, and the dynamics of change and continuity following heightened liberalization and internationalization since the 1980s. The course exposes students to key issues of the sociology of the welfare state with particular emphasis on the development and role of the state in a deeply conflicted society, using the Israeli experience. At the conclusion of the course students are expected to understand how welfare state institutions reflect but also reproduce societal schisms and conflicts, and be familiar with central aspects of Israeli politics past and present.
Same as: SOC 102

JEWISHST 132A. Social Inequality in Israel. 3 Units.
Like the US, Israel is a nation of immigrants. Israel additionally shares with the US vast economic, ethnic/racial and gender gaps, which are shaped and are being shaped by the demographic diversity characterizing its society. The course will provide a comparative framework for analyzing social inequality in Israel. We will start by reviewing essential concepts and theories in the study of social stratification. We will then review the main cleavages characterizing Israeli society, while comparing them to gaps in other advances societies and particularly the US. We will focus on class, gender and ethnicity as the main distinctions and will examine their implications for differences in life chances in several domains across the life course. We will conclude with a discussion of possible scenarios for change, which are relevant to both Israel and the US. Throughout the course, we will study critical thinking techniques and will use them for analyzing issues that are central for the analysis of social inequality in Israel and elsewhere.
Same as: CSRE 132A, SOC 102A

JEWISHST 132D. Sociology of Jewishness. 3-5 Units.
Examines the place of the Jewish people in society throughout various locales and historical periods to understand how interactions among Jews and with other groups have shaped Jewish identities. Topics include modernism, the Holocaust, Israel/nationhood, race/ethnicity, intermarriage, and assimilation. Uses theoretical, empirical, and historical material from multiple social scientific fields of study and explores the study of Judaism from several major sociological lenses.
Same as: CSRE 132J, SOC 132J

JEWISHST 132VP. Family and Society: A Comparative Approach (Israel & the US). 3 Units.
Families are changing: Non-marital partnerships such as cohabitation are becoming more common, marriage is delayed and fertility is declining. In this class we will learn about how families are changing in Israel and we will compare with the US and other countries. Reading materials include general theories as well as research published in scholarly journals. nnAfter reviewing general theories and major scholarly debates concerning issues of family change, we will turn to specific family processes and compare Israel, the US and other countries. We will ask how family transitions may differ for different population groups and at different stages of the life course, and we will tie family processes to current theories of gender. nnWe will cover a wide range of topics, from marriage and marital dissolution to cohabitation, LAT and remarriage. We will also discuss changes in women's labor force participation and how it bears on fertility, parenthood and household division of labor. Within each substantive topic we will survey the debates within contemporary scholarship and we will compare Israel and the US.

JEWISHST 133. Sociology of Citizenship. 3 Units.
Not only a legal status, citizenship forms a major concern for political sociologists interested in questions of membership, exclusion, redistribution, and struggles over the boundaries of collective identity. Citizenship is in essence membership in a political community that entails rights and duties, and structures a tripartite relationship between the individual, community and state. The institutions of citizenship include formal and bureaucratic rules of eligibility ¿ but also informal institutions such as identity and belonging. Throughout the course, students are exposed to key issues of the sociology of citizenship such as the historically different paths of men, women, minority groups and immigrants into citizenship, the contested development of rights and duties, the regulation of population, as well as insurgency and collective attempts to rearticulate the terms of the ¿contract¿ with the state. Israel, the USA, France and Germany are used as empirical illustrations. At the conclusion of the course students will know how to utilize the analytic framework of citizenship in order to analyze a wide range of political phenomena in contemporary societies.

JEWISHST 133A. WELFARE, WORK AND POVERTY.. 3 Units.
Early theorists of the welfare state described it as a reaction to the emergence of needs and interests of specific social groups during processes of economic development and change. Later theorists countered that the welfare state does not merely react to social cleavages during times of economic change but rather works to actively shape them, in line with worldviews or the interests of dominant group members. Adopting the latter approach, the goal of this course is to provide the tools and knowledge necessary for a critical evaluation of the social services provided to Israeli citizens and their impact on social and economic inequalities. The course will survey various approaches to the understanding of the goals of the welfare state. A comparative and historical account of the development of the welfare state will be presented, while highlighting recent developments, such as the increase in poverty rates and the aging of the population. During the course, we will examine the diverse needs that are served by the welfare state, as well as major dilemmas associated with the provision of services. Throughout the course, we will study critical thinking techniques and will use them for analyzing issues that are central for the development of social policies in Israel and the US.

JEWISHST 143. Literature and Society in Africa and the Caribbean. 4 Units.
This course explores texts and films from Francophone Africa and the Caribbean in the 20th and 21st centuries. The course will explore the connections between Sub-Saharan Africa, the Maghreb and the Caribbean through both foundational and contemporary works while considering their engagement with the historical and political contexts in which they were produced. This course will also serve to improve students' speaking and writing skills in French while sharpening their knowledge of the linguistic and conceptual tools needed to conduct literary analysis. The diverse topics discussed in the course will include national and cultural identity, race and class, gender and sexuality, orality and textuality, transnationalism and migration, colonialism and decolonization, history and memory, and the politics of language. Readings include the works of writers and filmmakers such as Djibril Tamsir Niane, Léopold Senghor, Aimé Césaire, Albert Memmi, Patrick Chamoiseau, Leonora Miano, Leila Slimani, Dani Laferrière and Ousmane Sembène. Taught in French. Students are highly encouraged to complete FRENLANG 124 or to successfully test above this level through the Language Center. This course fulfills the Writing in the Major (WIM) requirement.
