JEWISHST 144B. Poetic Thinking Across Media. 4 Units.
Even before Novalis claimed that the world must be romanticized, thinkers, writers, and artists wanted to perceive the human and natural world poetically. The pre- and post-romantic poetic modes of thinking they created are the subject of this course. Readings include Ecclestias, Zhaozhou Congshen, Montaigne, Nietzsche, Kafka, Benjamin, Arendt, and Sontag. This course will also present poetic thinking in the visual arts–from the expressionism of Ingmar Bergman to the neo-romanticism of Gerhard Richter.

JEWISHST 147A. The Hebrew Bible in Literature. 3-5 Units.
Close reading of major biblical stories and poems that influenced modern literature written in English and Hebrew. Hebrew texts will be read in translation to English. Each class will include a section from the Hebrew Bible as well as a modern text or film based on the biblical story/poem. Discussion of questions such as: the meaning and function of myths and the influence of the Hebrew Bible on the development of literary styles and genres.
Same as: JEWISHST 347A

JEWISHST 147B. The Hebrew and Jewish Short Story. 3-5 Units.
Short stories from Israel, the US and Europe including works by Agnon, Kafka, Keret, Castel-Bloom, Kashua, Singer, Benjamin, Freud, biblical myths and more. The class will engage with questions related to the short story as a literary form and the history of the short story. Reading and discussion in English. Optional: special section with readings and discussions in Hebrew. Note: To be eligible for WAYS credit, you must take the course for a Letter Grade. In AY 2020-21, a 'CR' grade will satisfy the WAYS requirement.
Same as: COMPLIT 127B

JEWISHST 148. Writing Between Languages: The Case of Eastern European Jewish Literature. 1-5 Unit.
Eastern European Jews spoke and read Hebrew, Yiddish, and their co-territorial languages (Russian, Polish, etc.). In the modern period they developed secular literatures in all of them, and their writing reflected their own multilinguality and evolving language ideologies. We focus on major literary and sociolinguistic texts. Reading and discussion in English; students should have some reading knowledge of at least one relevant language as well. ***This course must be taken for a minimum of 3 units and a letter grade to be eligible for Ways credit***.
Same as: JEWISHST 348, SLAVIC 198, SLAVIC 398

JEWISHST 150. Texts that Changed the World from the Ancient Middle East. 3-5 Units.
This course traces the story of the cradle of human civilization. We will begin with the earliest human stories, the Gilgamesh Epic and biblical literature, and follow the path of the development of law, religion, philosophy and literature in the ancient Mediterranean or Middle Eastern world, to the emergence of Jewish and Christian thinking. We will pose questions about how this past continues to inform our present: What stories, myths, and ideas remain foundational to us? How did the stories and myths shape civilizations and form larger communities? How did the earliest stories conceive of human life and the divine? What are the ideas about the order of nature, and the place of human life within that order? How is the relationship between the individual and society constituted? This course is part of the Humanities Core: https://humanitiescore.stanford.edu/.
Same as: COMPLIT 31, HUMCORE 111, RELIGST 150

JEWISHST 155D. Jewish American Literature and Film. 5 Units.
From its inception, Jewish-American literature has taken as its subject as well as its context the idea of Jewishness itself. Jewish culture is a diasporic one, and for this reason the concept of Jewishness differs from country to country and across time. What stays remarkably similar, though, is Jewish self-perception and relatedly Jewish literary style. This is as true for the first-generation immigrant writers like Isaac Bashevis Singer and Anzia Yezierska who came to the United States from abroad as it is for their second-generation children born in the United States, and the children of those children. In this course, we will consider the difficulties of displacement for the emigrant generation and their efforts to sustain their cultural integrity in the multicultural American environment. We'll also examine the often comic revolt of their American-born children and grandchildren against their (grand-)parents nostalgia and failure to assimilate. Only by considering these transnational roots can one understand the particularity of the Jewish-American novel in relation to mainstream and minority American literatures. In investigating the link between American Jewish writers and their literary progenitors, we will draw largely but not exclusively from Russia and the countries of Eastern Europe.
Same as: AMSTUD 145D, ENGLISH 145D, REES 145D

JEWISHST 155J. The Jewish-American Novel: Diaspora, Privilege, Anxiety, Comedy. 4-5 Units.
Jews are sometimes referred to as 'the people of the book.' Would Portnoy's Complaint count as a book that constitutes Jewish-American peoplehood? What about Fear of Flying? This seminar introduces students to influential Jewish-American novels (and some short stories and film) from the late nineteenth century to the present day. These works return time and again to questions of diaspora, race, queer social belonging, and the duty to a Jewish past, mythical or real. Through close readings of short stories and novels coupled with secondary readings about Jewish-American history and culture, we will explore how American Jewishness is constructed differently in changing historical climates. What makes a text Jewish? What do we mean by Jewish humor and Jewish seriousness? How do Jewish formulations of gender and power respond to Jews' entrance into the white American mainstream? As we read, we'll think through and elaborate on models of ethnicity, privilege, sexuality, and American pluralism. Authors include Cahan, Yezierska, Singer, Roth, Bellow, Malamud, Ozick, Mailer, Jong, and Englander.
Same as: AMSTUD 145J, ENGLISH 145J

JEWISHST 185B. Jews in the Contemporary World: The American Jewish Present & Past in Popular Culture, Film, & TV. 4-5 Units.
(HISTORY 185B is 5 units; HISTORY 85B IS 3 units.) Who are American Jews as depicted in popular media -- film, television, etc. -- since the Second World War? How are their religion, politics, mores, and practices represented and what ways, if at all, do such portraits reflect historical trends among Jews and society in general? What can be learned from film or tv about Jewish identity, notions of Jewish power and powerlessness, communal cohesiveness and assimilation, sexuality and the wages of intermarriage or race?.
Same as: CSRE 185B, HISTORY 185B, HISTORY 385C, REES 185B, SLAVIC 183

JEWISHST 186. Jews in Trump's America and Before. 5 Units.
This class considers the notion of American Jewish exceptionalism through the lens of Trump's America. The social and economic success of American Jewry over the last 350 years is remarkable, yet Jews continue to find their position in American society called into question. This course moves between past and present and will consider key moments in American Jewish life with a particular emphasis on contemporary currents, including post-liberal identity politics, Israel, and the rise of white supremacy.
Same as: HISTORY 286F

JEWISHST 199B. Directed Reading in Yiddish, Second Quarter. 1-5 Unit.
For intermediate or advanced students. May be repeated for credit.

JEWISHST 205. Reading Hebrew, First Quarter. 2-4 Units.
Introduction to Hebrew literature through short stories and poetry by notable Israeli writers. In Hebrew. Prerequisite: one year of Hebrew or equivalent.

JEWISHST 211. Out of Eden: Deportation, Exile, and Expulsion from Antiquity to the Renaissance. 4-5 Units.
This course examines the long pedigree of modern deportations and mass expulsions, from the forced resettlements of the ancient world to the expulsion of Jews from Spain in 1492, and from the outlawry of Saga-era Iceland to the culture of civic exile in Renaissance Italy. The course focuses on Europe and the Mediterranean from antiquity to the early modern period, but students are welcome to venture beyond these geographical and chronological boundaries for their final papers.
Same as: HISTORY 211, HISTORY 311

JEWISHST 215. Understanding Jews. 1-2 Unit.
This discussion-based course will give students an opportunity to explore the constellation of religious, ethnic, national, cultural, artistic, spiritual, and political forces that shape Jewish life in the 21st century. Drawing on historical documents, classical texts, and contemporary events, this course will give students from any background an opportunity to ask hard questions, deepen their own understandings, and challenge their conceptions of what makes Jewish life ¿Jewish.¿ No matter where you went for Sunday school ¿ church, synagogue, the woods, or nowhere at all ¿ this course is a chance to question what you know, and interrogate how you came to know what you know about Jews, Judaism, and Jewish culture.
Same as: AMSTUD 215

JEWISHST 221C. Aramaic Texts. 1-5 Unit.
Readings in Aramaic/Syriac with special focus on grammar and syntax of ancient texts.
Same as: JEWISHST 321C, RELIGST 221C, RELIGST 321C

JEWISHST 221D. Readings in Syriac Literature. 2-5 Units.
In recent years, there has been growing interest in the works of Syriac speaking Christians in antiquity and beyond. This course offers an introduction to the Syriac language, including its script, vocabulary and grammar, and a chance to read from a selection of foundational Syriac Christian texts.
Same as: JEWISHST 321D, RELIGST 221D, RELIGST 321D

JEWISHST 226E. The Holocaust: Insights from New Research. 4-5 Units.
Overview of the history of the Holocaust, the genocide of European Jews. Explores its causes, course, consequences, and memory. Addresses the events themselves, as well as the roles of perpetrators and bystanders, dilemmas faced by victims, collaboration of local populations, and the issue of rescue. Considers how the Holocaust was and is remembered and commemorated by victims and participants alike. Uses different kinds of sources: scholarly work, memoirs, diaries, film, and primary documents.
Same as: CSRE 226D, CSRE 326D, HISTORY 226D, HISTORY 326D, JEWISHST 326D

JEWISHST 227D. Readings in Talmudic Literature. 1 Unit.
Readings of Talmudic texts. Some knowledge of Hebrew is preferred, but not necessary. The goal of the ongoing workshop is to provide Stanford students with the opportunity to engage in regular Talmud study, and to be introduced to a variety of approaches to studying Talmudic texts and thought.
Same as: JEWISHST 127D, RELIGST 170D

JEWISHST 227E. Readings in Talmudic Literature Advanced. 1 Unit.
Readings of the talmudic texts. Knowledge of Hebrew is required. The ongoing seminar is designed to study the making of the talmudic sugya (unit of discourse), along with classic commentaries. Students will consider some of the recent developments in the academic study of Talmudic literature, introduced by the instructor. The goal of the ongoing seminar is to provide Stanford students and faculty with the opportunity to engage in regular Talmud study, and to be introduced to a variety of approaches to studying Talmudic texts. Meeting time and location TBA. May be repeated for credit.
Same as: JEWISHST 127E, RELIGST 170E

JEWISHST 240. The Yiddish Story. 3-5 Units.
The Yiddish language is associated with jokes, folktales, and miracle legends, as well as modern stories. This class traces the development of Yiddish literature through these short oral and written forms, following Jewish writers out of the East European market town to cities in the Soviet Union, Israel, and especially the United States. We conclude with stories written in other languages about Yiddish writers. Readings include Sholem Aleichem, I. L. Peretz, Isaac Bashevis Singer, Esther Singer-Kreitman, Cynthia Ozick, and Dina Rubina. Readings in English; optional discussion section for students who read Yiddish.
Same as: AMSTUD 240Y

JEWISHST 242G. Myth and Modernity. 3-5 Units.
Masters of German 20th- and 21st-Century literature and philosophy as they present aesthetic innovation and confront the challenges of modern technology, social alienation, manmade catastrophes, and imagine the future. Readings include Nietzsche, Freud, Rilke, Musil, Brecht, Kafka, Doeblin, Benjamin, Juenger, Arendt, Musil, Mann, Adorno, Celan, Grass, Bachmann, Bernhardt, Wolf, and Kluge. Taught in English. Note for German Studies grad students: GERMAN 322 will fulfill the grad core requirement since GERMAN 332 is not being offered this year. NOTE: Enrollment requires Professor Eshel's consent. Please contact him directly at eshel@stanford.edu and answer these 2 questions: "Why do you want to take this course?" and "What do you think you can add to the discussion?" Applications will be considered in the order in which they were received. Enrollment is limited to 20 students.
Same as: COMPLIT 222A, GERMAN 222, GERMAN 322, JEWISHST 342

JEWISHST 243A. Hannah Arendt: Facing Totalitarianism. 3-5 Units.
Like hardly any other thinker of the modern age, Hannah Arendt's thought offers us timeless insights into the fabric of the modern age, especially regarding the perennial danger of totalitarianism. This course offers an in-depth introduction to Arendt's most important works in their various contexts, as well as a consideration of their reverberations in contemporary philosophy and literature. Readings include Arendt's The Origin of Totalitarianism, The Human Condition, Between Past and Future, Men in Dark Times, On Revolution,Eichmann in Jerusalem, and The Life of the Mind, as well as considerations of Hannah Arendt's work by Max Frisch, Jürgen Habermas, Seyla Benhabib, Judith Butler, Giorgio Agamben, and others. Special attention will be given to Arendt's writings on literature with an emphasis on Kafka, Brecht, Auden, Sartre, and Camus. This course will be synchronously conducted, but will also use an innovative, Stanford-developed, online platform called Poetic Thinking. Poetic Thinking allows students to share both their scholarly and creative work with each other. Based on the newest technology and beautifully designed, it greatly enhances their course experience.
Same as: COMPLIT 353B, GERMAN 253, GERMAN 353

JEWISHST 249. The Algerian Wars. 3-5 Units.
From Algiers the White to Algiers the Red, Algiers, the Mecca of the Revolutionaries in the words of Amilcar Cabral, this course offers to study the Algerian Wars since the French conquest of Algeria (1830-) to the Algerian civil war of the 1990s. We will revisit the ways in which the war has been narrated in literature and cinema, popular culture, and political discourse. A special focus will be given to the Algerian War of Independence (1954-1962). The course considers the racial representations of the war in the media, the continuing legacies surrounding the conflict in France, Africa, and the United States, from Che Guevara to the Black Panthers. A key focus will be the transmission of collective memory through transnational lenses, and analyses of commemorative events and movies. nReadings from James Baldwin, Assia Djebar, Albert Camus, Frantz Fanon, Mouloud Feraoun. Movies include "The Battle of Algiers," "Days of Glory," and "Viva Laldjérie." nTaught in English.
Same as: CSRE 249, FRENCH 249, HISTORY 239G

JEWISHST 265. Jewish Law: Introduction and Topics. 2 Units.
This course will provide an overview of the field of Jewish Law and will seek to provide a few case studies of topics in Jewish Law. All the readings are in English and this course presupposes no background in Jewish Law. Jewish Law is the world's oldest complex legal systems with distinct and idiosyncratic approaches to family, commercial, ritual and many other areas of law. It also has developed an elaborate "conflicts of law" sub-literature focusing on when should Jewish Law apply and when should some other legal system apply, reflecting the long history of the Jewish community in the diaspora as a minority. In this course, we will consider how Jewish law approaches a number of specific topics and we will ponder as well the proper interaction between Jewish law and secular legal norms, Jewish Law and changes in technology, Jewish law and sovereignty, Jewish Law and Bioethics and Jewish law and Family. Other topics will be added as we all see fit. Students who are interested in making a presentation on an area of their choice are welcome to do so. The course will seek to include an optional supplementary "field trip" to see a rabbinical court in action in California. The Learning Outcomes provided by this court include the following: Students who take this course will: 1. Exhibit knowledge and understanding of key concepts in substantive law, procedural law, and legal thought in Jewish Law. 2. Demonstrate facility with legal analysis and reasoning in the Jewish Legal tradition and will demonstrate the ability to conduct legal research in Jewish Law. After the term begins, students accepted into the course can transfer, with consent of the instructor, from section (01) into section (02), which meets the R requirement. Elements used in grading: Attendance, Class Participation, Final Paper. Cross-listed with the Law School (LAW 5038).

JEWISHST 281K. Departures: Late Ottoman Displacements of Muslims, Christians, and Jews, 1853-1923. 5 Units.
In the late nineteenth and early twentieth centuries, millions of people moved into and out of the Ottoman Empire, sometimes voluntarily and sometimes under extremely violent circumstances. More often than not, they moved in groups that were religiously defined. This course examines how these developments shaped the future of the modern Middle East, Balkans, and beyond. Questions include: How did migration and the idea of the nation shape each other? What does it mean to call a group or a migration "religious"? Why did certain types of diversity become a "problem," in the eyes of the state? What caused these population displacements? What can this topic teach us about today's mass migrations?.
Same as: HISTORY 281K

JEWISHST 282. Circles of Hell: Poland in World War II. 5 Units.
Looks at the experience and representation of Poland's wartime history from the Nazi-Soviet Pact (1939) to the aftermath of Yalta (1945). Examines Nazi and Soviet ideology and practice in Poland, as well as the ways Poles responded, resisted, and survived. Considers wartime relations among Polish citizens, particularly Poles and Jews. In this regard, interrogates the traditional self-characterization of Poles as innocent victims, looking at their relationship to the Holocaust, thus engaging in a passionate debate still raging in Polish society.
Same as: HISTORY 228, HISTORY 328, JEWISHST 382

JEWISHST 282K. The Holocaust and Its Aftermath. 4-5 Units.
This seminar gives an overview over different aspects of the history of the Holocaust and its aftermath and will examine key issues in recent Holocaust historiography and questions of memory and representation. Special emphasis is put on the nature of the historian's task, as viewed through the lens of historians of the Holocaust, as well as to the significance of the Holocaust in history and how it has changed over time. The course will confront students with historiographical texts and historical documents, with photography and film, works of scholarship and art.
Same as: HISTORY 202K, HISTORY 302K, JEWISHST 382K

JEWISHST 284C. Genocide and Humanitarian Intervention. 3 Units.
Open to medical students, graduate students, and undergraduate students. Traces the history of genocide in the 20th century and the question of humanitarian intervention to stop it, a topic that has been especially controversial since the end of the Cold War. The pre-1990s discussion begins with the Armenian genocide during the First World War and includes the Holocaust and Cambodia under the Khmer Rouge in the 1970s. Coverage of genocide and humanitarian intervention since the 1990s includes the wars in Bosnia, Rwanda, Kosovo, the Congo and Sudan.
Same as: HISTORY 224C, HISTORY 324C, JEWISHST 384C, PEDS 224

JEWISHST 285C. The Immigrant in Modern America. 5 Units.
The 2016 presidential election propelled the topic of immigration to the center of public attention. This is not the first time, however, that questions of immigration and what it means to be an American have revealed deep divisions within the U.S. This course explores the reception of immigrants in modern America, including differing views toward immigration; how immigrants help shape ideas about the American nation; and the growth of state bureaucracy and policing apparatus as a response.
Same as: HISTORY 285C

JEWISHST 286D. Yours in Struggle: African Americans and Jews in the 20th Century U.S.. 5 Units.
This colloquium explores the history of African Americans and Jews in 20th century US beginning with Jewish immigration from Eastern Europe and the Great Migration to America's urban centers. It considers the geographical and economic tensions that developed between two minority groups living in close proximity; the appropriation of black culture; Jewish claims to whiteness and performance of blackness; intercommunal relations during the Civil Rights movement; the breakdown of the black-Jewish alliance in the late 1960s; and the lingering ramifications of this shift today.
Same as: HISTORY 286D

JEWISHST 287S. Research Seminar in Ottoman and Middle East History. 4-5 Units.
Student-selected research topics. May be repeated for credit.
Same as: HISTORY 481, JEWISHST 481

JEWISHST 288C. Jews of the Modern Middle East and North Africa. 5 Units.
This course will explore the cultural, social, and political histories of the Jews of the Middle East and North Africa (MENA) from 1860 to present times. The geographic concentration will range from Morocco to Iran, Iraq to Turkey, and everywhere in between. Topics include: Jewish culture and identity in Islamic contexts; the impacts of colonialism, westernization, and nationalism; Jewish-Muslim relations; the racialization of MENA Jews; the Holocaust; the experience and place of MENA Jews in Israel; and "Jews of Color.".
Same as: HISTORY 288C

JEWISHST 291X. Learning Religion: How People Acquire Religious Commitments. 4 Units.
This course will examine how people learn religion outside of school, and in conversation with popular cultural texts and practices. Taking a broad social-constructivist approach to the variety of ways people learn, this course will explore how people assemble ideas about faith, identity, community, and practice, and how those ideas inform individual, communal and global notions of religion. Much of this work takes place in formal educational environments including missionary and parochial schools, Muslim madrasas or Jewish yeshivot. However, even more takes place outside of school, as people develop skills and strategies in conversation with broader social trends. This course takes an interdisciplinary approach to questions that lie at the intersection of religion, popular culture, and education. May be repeat for credit.
Same as: AMSTUD 231X, EDUC 231, RELIGST 231X

JEWISHST 297X. American Jewish History: Learning to be Jewish in America. 2-4 Units.
This course will be a seminar in American Jewish History through the lens of education. It will address both the relationship between Jews and American educational systems, as well as the history of Jewish education in America. Plotting the course along these two axes will provide a productive matrix for a focused examination of the American Jewish experience. History students must take course for at least 3 units.
Same as: AMSTUD 279X, EDUC 279, HISTORY 288D, RELIGST 279X

JEWISHST 299A. Directed Reading in Yiddish, First Quarter. 1-5 Unit.
Directed Reading in Yiddish, First Quarter.

JEWISHST 301. Colloquium on Jews, Judaism, and Jewish Culture. 1 Unit.
An interdisciplinary graduate student colloquium for Stanford graduate students interested in Jewish Studies.

JEWISHST 321C. Aramaic Texts. 1-5 Unit.
Readings in Aramaic/Syriac with special focus on grammar and syntax of ancient texts.
Same as: JEWISHST 221C, RELIGST 221C, RELIGST 321C

JEWISHST 321D. Readings in Syriac Literature. 2-5 Units.
In recent years, there has been growing interest in the works of Syriac speaking Christians in antiquity and beyond. This course offers an introduction to the Syriac language, including its script, vocabulary and grammar, and a chance to read from a selection of foundational Syriac Christian texts.

HISTORY

Courses offered by the Department of History are listed under the subject code History on the Stanford Bulletin's ExploreCourses web site (https://explorecourses.stanford.edu/search/?view=catalog&academicYear=&page=0&q=HISTORY&filter-catalognumber-HISTORY=on&filter-coursestatus-Active=on&filter-term-Summer=on).

Mission of the Department of History

History courses teach the analytical, interpretive, and writing knowledge and skills necessary for understanding the connections between past and present. History is a pragmatic discipline in which the analysis of change over time involves sifting the influences and perspectives that affect the course of events, and evaluating the different forms of evidence historians exploit to make sense of them. Teaching students how to weigh these sources and convert the findings into persuasive analysis lies at the heart of the department's teaching. Graduates with a History major pursue careers and graduate study in law, public service, business, writing, education, and journalism.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of what it means to think historically: locating subjects in time and place and being sensitive to the contingencies of context and to change over time.
2. critical and interpretive thinking skills using course's primary source materials.
3. the ability to identify different types of sources of historical knowledge.
4. analytical writing skills and close reading skills.
5. effective oral communication skills.

Degrees Offered

The Department of History offers the following degree programs: Bachelor of Arts, Bachelor of Arts and Sciences, Master of Arts, and Doctor of Philosophy.

Graduate Programs in History

The primary goal of the Stanford Department of History's graduate program is the training of scholars. Most students who receive doctorates in the program go on to teach at colleges or universities. Other students have obtained positions in university administration and research.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in History and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in History. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of History and to interpret and present the results of such research.

Bachelor of Arts in History

The Department of History offers a Bachelor of Arts in History. Eligible students may also pursue a Bachelor of Arts with Honors (p. 1557). The department also offers a minor in History (p. 1559).

Suggested Preparation for the Major

Before declaring the History major, students must take one lecture course. They must take a second lecture course within one year of declaring. Fulfilling this requirement are courses numbered HISTORY 1-199 (with the exception of Frosh (xxN) and Sophomore (xxQ) Introductory Seminars).

Lecture Courses

		Units
The choices for 2020-21 are:		
HISTORY 1A	Global History: The Ancient World	3-5
HISTORY 1B	Global History: The Early Modern World, 1300 to 1800	3-5
HISTORY 1C	Global History: Modern Times	3-5
HISTORY 102	History of the International System since 1914	5
HISTORY 103D	Human Society and Environmental Change	4
HISTORY 103F	The Changing Face of War: Introduction to Military History	5
HISTORY 105C	Human Trafficking: Historical, Legal, and Medical Perspectives	5
HISTORY 106A	Global Human Geography: Asia and Africa	5
HISTORY 106B	Global Human Geography: Europe and Americas	5
HISTORY 110C	The Problem of Modern Europe	5
HISTORY 115D	Europe in the Middle Ages, 300-1500	3-5
HISTORY 116	Traders and Crusaders in the Medieval Mediterranean	3-5
HISTORY 133B	Revolutionary England: The Stuart Age	5
HISTORY 134A	The European Witch Hunts	5
HISTORY 139	Modern Britain and the British Empire	5
HISTORY 140	World History of Science	5
HISTORY 140A	The Scientific Revolution	5
HISTORY 144	Sex, Gender, and Intersectional Analysis in Science, Medicine, Engineering, and Environment	5
HISTORY 145B	Africa in the 20th Century	5
HISTORY 150A	Colonial and Revolutionary America	5
HISTORY 150B	Nineteenth Century America	5
HISTORY 150C	The United States in the Twentieth Century	5
HISTORY 155F	The Civil War and Reconstruction Era, 1830 to 1877	3-5
HISTORY 173	Mexican Migration to the United States	3-5
HISTORY 174	Mexico Since 1876: The Road to Ayotzinapa	5
HISTORY 179C	The Ethical Challenges of the Climate Catastrophe	3-5
HISTORY 181B	Formation of the Contemporary Middle East	5
HISTORY 185B	Jews in the Contemporary World: The American Jewish Present & Past in Popular Culture, Film, & TV	4-5
HISTORY 187	The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan	5
HISTORY 195	Modern Korean History	5
HISTORY 195C	Modern Japanese History: From Samurai to Pokemon	5
HISTORY 198	The History of Modern China	5

Degree Requirements

Completion of the major requires planning. History majors should plan to meet with their faculty advisors twice yearly, once in the Autumn and once in the Winter or Spring quarters. These meetings should take place within the first three weeks of the quarter, before the final study list deadline.

1. Courses comprising the 63 units must be taken for a letter grade, and the student must maintain a grade point average (GPA) in History courses of 2.0 or higher.
2. At least nine courses must be taken from within the Stanford Department of History. Transfer students and those who study abroad may be granted exemptions from this requirement at the discretion of the Director of Undergraduate Studies.
3. At least six quarters of enrollment in the major. Each candidate for the B.A. in History should declare the major by the Autumn Quarter of the third year of study or earlier, if possible.
4. One HISTORY 299S (https://exploredegrees.stanford.edu/search/?P=HISTORY%20299S) Undergraduate Directed Research and Writing taken for 3-5 units and for a letter grade may be applied toward the thirteen courses required for the B.A. in History.
5. Capstone: The History department organizes a series of luncheon workshops quarterly, at which students present their research essays and honors theses.
6. The department encourages students to acquire proficiency in foreign languages and study at one of Stanford's overseas programs. Such studies are not only valuable in themselves; they can provide an opportunity for independent research and a foundation for honors essays and graduate study.
7. Advanced Placement credits do not fulfill any major requirements.

For further information on History courses' satisfaction of major requirements, see the Department of History (http://history.stanford.edu/programs/undergraduate/) web site.

Writing in the Major (WIM):

History's Writing in the Major requirement is satisfied by completing HISTORY 209S Research Seminar for Majors.

This course may be taken in either the junior or senior year, but not before completing the sources and methods seminar requirement. Students write a 20-25 page research essay. Original research and revision are important parts of the research essay. Students must conduct substantial research in the libraries and must submit at least two drafts (a rough draft and a final draft) of the essay. Students who wish to write an honors thesis should take HISTORY 209S Research Seminar for Majors in the junior year. Where appropriate, a student can use the research seminar to begin working on the honors thesis.

HISTORY 209S Research Seminar for Majors fulfills the WIM requirement only. It does not fulfill geographical requirements or small group course requirements.

Students select their research topics based on the general topics of each quarter's offerings.

- HISTORY 209S Research Seminar for Majors
  - Autumn: Honors; Crime and Punishment in Early Modern Europe and America
  - Winter: Race, Gender, Sexuality in the U.S.
  - Spring: Europe Before 1500; Early Empires; Open Topic
  - Summer: Arms-Makers in History; Early Modern Travel Accounts

Course Requirements

History majors are required to complete a minimum of 63 units (i.e., a minimum of 13 courses) to include:

		Units
1. One Sources and Methods Seminar (HISTORY 1S-99S) [1]		**5**
Sources and Methods courses offered this year are:		
HISTORY 13S	Misfits of the Middle Ages: Persecution and Tolerance in Medieval Europe	5
HISTORY 18S	Pirates, Captives, and Renegades: Encounters in the Early Modern Mediterranean World	5
HISTORY 23S	Sex and Socialism	5
HISTORY 32S	Utopian Dreams, Dystopian Nightmares: Visions of the Ideal Society in Early Modern Britain	5
HISTORY 47S	Black Earth Rising: Law and Society in Postcolonial Africa	5
HISTORY 64S	The Religious Right and Its Critics in America from 1920 to Today	5
HISTORY 82S	Enemies Within: Hostile Minorities in Israel and Iraq in the 20th Century	5
HISTORY 89S	Chinese Diaspora and the Making of the Pacific World, 1750-1911	5
HISTORY 98S	Crime and Punishment in Late Imperial China: Law, State Formation, and Society	5
2. Two 200-level undergraduate colloquia (HISTORY 200-298) [2]		**10**
3. One Doing History colloquium (HISTORY 200x) [3]		**5**
HISTORY 200A	Doing Legal History	5
HISTORY 200B	Doing Environmental History: Climate Change... the podcast	5
HISTORY 200C	Doing the History of Race and Ethnicity	5
HISTORY 200J	Doing Oral History	5
HISTORY 200M	Doing Digital History	5
HISTORY 200R	Doing Community History: Asian Americans and the Pandemic	5
HISTORY 200Y	Doing Colonial History	5
4. Two lecture courses [4]		**10**
One of which must be either		
A Europe survey course such as:		
HISTORY 110C	The Problem of Modern Europe	
Or, a United States survey course such as:		
HISTORY 150A	Colonial and Revolutionary America	
HISTORY 150B	Nineteenth Century America	
HISTORY 150C	The United States in the Twentieth Century	
The second must be a lecture course in African, Asian, Middle East, or Latin American History, such as:		
HISTORY 145B	Africa in the 20th Century	
HISTORY 174	Mexico Since 1876: The Road to Ayotzinapa	
HISTORY 181B	Formation of the Contemporary Middle East	
HISTORY 195C	Modern Japanese History: From Samurai to Pokemon	
5. Completion of the Writing in the Major (WIM) requirement [5]		
HISTORY 209S	Research Seminar for Majors	5
6. At least 6 additional courses to total a minimum of 63 units.		**28**
Total Units		143

1. Sources and Methods seminars constitute the department's 'skills' class and should be taken as early as possible in a student's course of study. They are designed for freshmen and sophomores considering or beginning the History major. This requirement must be completed prior to enrolling in HISTORY 209S Research Seminar for Majors.
2. ExploreCourses lists all colloquia offered in 2020-21 (https://explorecourses.stanford.edu/search/?filter-term-Winter=on&filter-academiclevel-UG=on&q=HISTORY&view=catalog&filter-catalognumber-HISTORY=on&filter-term-Summer=on&filter-term-Autumn=on&filter-component-COL=on&filter-term-Spring=on&page=0&filter-coursestatus-Active=on&collapse=%2c6%2c7%2c&academicYear=20202021).
3. Course requirement beginning with declared majors of academic year 2019-20.
4. Students may count courses they took as prerequisites to the major for this requirement.
5. In completing this course, students must write a 20-25 page essay based on original research and including at least two drafts. HISTORY 209S Research Seminar for Majors may be taken in either the junior or the senior year. Students must complete the Sources and Methods seminar before enrolling in the Research Seminar.

History Fields of Study or Degree Options

The Department of History offers six tracks to the B.A. in History. These tracks are not declared in Axess and are not printed on the transcript or diploma.

The General History track emphasizes breadth of study among historical areas and periods as well as concentration in one selected field. The Global Affairs and World History track emphasizes an understanding of today's world through a historical examination of its evolution, from the early modern to the contemporary era. The four tracks with interdisciplinary emphasis (History, Philosophy, and the Arts; History of Science and Medicine; History and Law; and Public History/Public Service) combine the study of history with the methods and approaches of other disciplines, and involve substantial course work outside of History.

General History Track

In addition to completing the requirements for all History majors, the student in the General History track is required to satisfy breadth and concentration requirements.

1. *Breadth Requirements:* to ensure chronological and geographical breadth, at least two courses must be completed in a pre-modern chronological period and in each of three geographical fields:
   a. Field I (Africa, Asia, and Middle East)
   b. Field II (the Americas)
   c. Field III (Europe, including Western Europe, Eastern Europe, and Russia).
   d. Courses fulfilling the pre-modern chronological period (Field IV) may also count for Fields I-III.

2. Courses for 2020-21 follow below.
3. *Concentration:* to develop some measure of expertise, students must complete four courses in a single area (including one undergraduate colloquium or research seminar). The proposed concentration must be approved by the major advisor; a proposal for a thematic concentration must be approved by both the advisor and the department's director of undergraduate studies. Areas of concentration are:
   - Africa
   - Asia
   - Eastern Europe and Russia
   - Europe before 1700
   - Europe since 1700
   - Jewish History
   - Latin America
   - Science and Medicine
   - The United States
   - The Middle East
   - International History
   - Comparative Empires and Cultures
   - or a thematic subject treated comparatively, such as war and revolution, work, gender, family history, popular culture, or high culture.
4. *Required course:* HISTORY 102 History of the International System since 1914 is a required course for students who select the International History concentration. This course is offered in Autumn Quarter.

		Units
Field I: Africa/Asia/Middle East		
HISTORY 41N	Visible Bodies: Black Female Authors and the Politics of Publishing in Africa	4
HISTORY 82S	Enemies Within: Hostile Minorities in Israel and Iraq in the 20th Century	5
HISTORY 98S	Crime and Punishment in Late Imperial China: Law, State Formation, and Society	5
HISTORY 106A	Global Human Geography: Asia and Africa	5
HISTORY 145B	Africa in the 20th Century	5
HISTORY 185B	Jews in the Contemporary World: The American Jewish Present & Past in Popular Culture, Film, & TV	4-5
HISTORY 187	The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan	5
HISTORY 195	Modern Korean History	5
HISTORY 195C	Modern Japanese History: From Samurai to Pokemon	5
HISTORY 197	Southeast Asia: From Antiquity to the Modern Era	3-5
HISTORY 198	The History of Modern China	5
HISTORY 200Y	Doing Colonial History	5
HISTORY 202F	Surveillance States and Societies	4-5
HISTORY 204G	War and Society	4-5
HISTORY 248	Religion, Radicalization and Media in Africa since 1945	4-5
HISTORY 281K	Departures: Late Ottoman Displacements of Muslims, Christians, and Jews, 1853-1923	5
HISTORY 282J	Disasters in Middle Eastern History	5
HISTORY 283F	Capital and Crisis in the Middle East and the World	5
HISTORY 284F	Empires, Markets and Networks: Early Modern Islamic World Between Europe and China, 1400-1900	4-5
HISTORY 288C	Jews of the Modern Middle East and North Africa	5
HISTORY 290	North Korea in Historical Perspective	4-5
HISTORY 292D	Japan in Asia, Asia in Japan	4-5
Field II: The Americas		
HISTORY 64S	The Religious Right and Its Critics in America from 1920 to Today	5
HISTORY 106B	Global Human Geography: Europe and Americas	5
HISTORY 150A	Colonial and Revolutionary America	5
HISTORY 150B	Nineteenth Century America	5
HISTORY 150C	The United States in the Twentieth Century	5
HISTORY 155F	The Civil War and Reconstruction Era, 1830 to 1877	3-5
HISTORY 173	Mexican Migration to the United States	3-5
HISTORY 174	Mexico Since 1876: The Road to Ayotzinapa	5
HISTORY 179C	The Ethical Challenges of the Climate Catastrophe	3-5
HISTORY 200J	Doing Oral History	5
HISTORY 200R	Doing Community History: Asian Americans and the Pandemic	5
HISTORY 203F	Racial Justice in the Nuclear Age	5
HISTORY 251C	The American Enlightenment	5
HISTORY 251J	The End of American Slavery, 1776-1865	4-5
HISTORY 253F	Thinking the American Revolution	4-5
HISTORY 256E	The American Civil War: The Lived Experience	5
HISTORY 257E	History of Conservatism	4-5
HISTORY 260P	American Protest Movements, Past and Present	5
HISTORY 261E	Introduction to Asian American History	5
Field III: Europe, Eastern Europe, and Russia		
HISTORY 10C	The Problem of Modern Europe	3
HISTORY 13S	Misfits of the Middle Ages: Persecution and Tolerance in Medieval Europe	5
HISTORY 15D	Europe in the Middle Ages, 300-1500	3-5
HISTORY 16	Traders and Crusaders in the Medieval Mediterranean	3-5
HISTORY 32S	Utopian Dreams, Dystopian Nightmares: Visions of the Ideal Society in Early Modern Britain	5
HISTORY 33B	Revolutionary England: The Stuart Age	3
HISTORY 39	Modern Britain and the British Empire	3
HISTORY 39Q	Were They Really "Hard Times"? Mid-Victorian Social Movements and Charles Dickens	3
HISTORY 40A	The Scientific Revolution	3
HISTORY 42N	The Missing Link	4

HISTORY 85B	Jews in the Contemporary World: The American Jewish Present & Past in Popular Culture, Film, & TV	3
HISTORY 106B	Global Human Geography: Europe and Americas	5
HISTORY 110C	The Problem of Modern Europe	5
HISTORY 115D	Europe in the Middle Ages, 300-1500	3-5
HISTORY 116	Traders and Crusaders in the Medieval Mediterranean	3-5
HISTORY 133B	Revolutionary England: The Stuart Age	5
HISTORY 134A	The European Witch Hunts	5
HISTORY 139	Modern Britain and the British Empire	5
HISTORY 140A	The Scientific Revolution	5
HISTORY 185B	Jews in the Contemporary World: The American Jewish Present & Past in Popular Culture, Film, & TV	4-5
HISTORY 202G	Peoples, Armies and Governments of the Second World War	4-5
HISTORY 203	Premodern Economic Cultures	4-5
HISTORY 204G	War and Society	4-5
HISTORY 210D	Neighbors: Intimate Relationships and Everyday Life in Hitler's Europe	5
HISTORY 210J	Fascism and Authoritarianism	5
HISTORY 211	Out of Eden: Deportation, Exile, and Expulsion from Antiquity to the Renaissance	4-5
HISTORY 213F	Medieval Germany, 900-1250	1-5
HISTORY 215B	Race and Ethnicity in Premodern Europe	3-5
HISTORY 216D	Nationalism, Colonialism, and the Lord of the Rings: The Middle Ages in the Modern World	5
HISTORY 222	Crime and Punishment in Early Modern Europe and Russia	4-5
HISTORY 224A	The Soviet Civilization	4-5
HISTORY 224D	The Soviet Civilization, Part 2	4-5
HISTORY 227B	The Business of Socialism: Economic Life in Cold War Eastern Europe	5
HISTORY 228	Circles of Hell: Poland in World War II	5
HISTORY 230C	Paris: Capital of the Modern World	4-5

HISTORY 284F	Empires, Markets and Networks: Early Modern Islamic World Between Europe and China, 1400-1900	4-5
HISTORY 291G	Pre-Modern Chinese Warfare	4-5

Global Affairs and World History Track

The Global Affairs and World History track is designed to offer an empirically rich curriculum for Stanford students interested in international affairs. The goal is to impart an understanding of today's world through a historical examination of its evolution, from the early modern to the contemporary era. This track appeals to students who are aiming for a career in the international arena, and who seek to inform themselves about the complexities of cultural diversity and spatial differentiation on the ground. Deploying both connective and comparative modes of analysis, majors who choose this track will acquire a robust understanding of the relevance of the past to current events.

The Global Affairs and World History track features gateway courses in Global Human Geography, a recommended skills component, a geographical concentration, and a core cluster of global and comparative

offerings. Students choosing this track also develop proficiency in a foreign language at the second-year level or above. Incorporating primary sources in a language other than English into the capstone seminar or honors thesis is encouraged.

		Units
Gateway Courses		
Students must complete two of the following courses:		
HISTORY 1A	Global History: The Ancient World	
HISTORY 1B	Global History: The Early Modern World, 1300 to 1800	
HISTORY 1C	Global History: Modern Times	
HISTORY 106A	Global Human Geography: Asia and Africa	
HISTORY 106B	Global Human Geography: Europe and Americas	
Note: If a student wishes to do more than two of these courses, the course is applied to the methodological cluster.		
Geographical Cluster		
Students select four History courses in one geographic area, such as Europe, Latin America, Asia, Middle East, or Africa. The faculty coordinator must pre-approve all courses in this cluster.		
Global and Comparative Courses (Methodological Cluster)		
Majors selecting this track take at least 6 thematic history courses of global scope.		
Courses offered in 2020-21 are:		
HISTORY 10N	Thinking About War	3
HISTORY 44Q	Gendered Innovations in Science, Medicine, Engineering, and Environment	4-5
HISTORY 63N	The Feminist Critique: The History and Politics of Gender Equality	3-4
HISTORY 102	History of the International System since 1914	5
HISTORY 103D	Human Society and Environmental Change	4
HISTORY 103F	The Changing Face of War: Introduction to Military History	3-5
HISTORY 105C	Human Trafficking: Historical, Legal, and Medical Perspectives	5
HISTORY 110C	The Problem of Modern Europe	5
HISTORY 139	Modern Britain and the British Empire	5
HISTORY 140	World History of Science	5
HISTORY 140A	The Scientific Revolution	5
HISTORY 144	Sex, Gender, and Intersectional Analysis in Science, Medicine, Engineering, and Environment	5
HISTORY 145B	Africa in the 20th Century	5
HISTORY 173	Mexican Migration to the United States	3-5
HISTORY 179C	The Ethical Challenges of the Climate Catastrophe	3-5
HISTORY 181B	Formation of the Contemporary Middle East	5
HISTORY 187	The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan	5
HISTORY 190	Early Chinese Thought	3-5
HISTORY 195	Modern Korean History	4-5
HISTORY 195C	Modern Japanese History: From Samurai to Pokemon	5
HISTORY 198	The History of Modern China	5
HISTORY 201A	The Global Drug Wars	4-5
HISTORY 202F	Surveillance States and Societies	4-5
HISTORY 202G	Peoples, Armies and Governments of the Second World War	4-5
HISTORY 203C	History of Ignorance	5
HISTORY 204D	Advanced Topics in Agnotology	4-5
HISTORY 204G	War and Society	4-5
HISTORY 216D	Nationalism, Colonialism, and the Lord of the Rings: The Middle Ages in the Modern World	5
HISTORY 224A	The Soviet Civilization	4-5
HISTORY 224C	Genocide and Humanitarian Intervention	3
HISTORY 243C	People, Plants, and Medicine: Colonial Science and Medicine	4-5
HISTORY 243G	Tobacco and Health in World History	4-5
HISTORY 283F	Capital and Crisis in the Middle East and the World	5
HISTORY 284F	Empires, Markets and Networks: Early Modern Islamic World Between Europe and China, 1400-1900	4-5
HISTORY 290	North Korea in Historical Perspective	4-5
HISTORY 291G	Pre-Modern Chinese Warfare	4-5
HISTORY 292D	Japan in Asia, Asia in Japan	4-5

Proficiency in a foreign language: Students electing the Global Affairs and World History track must acquire proficiency in a foreign language through two years of college-level course work (second-year, third-quarter) or by passing a proficiency exam. Language courses do not count toward the 13 required courses in the major; students may, however, be interested in pairing this track in the History major with a foreign language minor.

Skills Training: Students in the Global Affairs and World History track are encouraged to acquire technical proficiencies relevant for geo-historical analysis and fieldwork abroad. Please see the Undergraduate Student Services Coordinator for further information on these courses.

Overseas Study Experience: Students electing this track are encouraged to study abroad, with a Stanford BOSP program or another program approved by the directors of the track. Course work taken overseas may be accepted for credit in the track on a case by case basis, in consultation with a faculty coordinator.

Research Seminar for Majors: HISTORY 209S Research Seminar for Majors fulfills Writing in the Major requirement.

General Requirements:

As for all History majors, students in this track must complete two lecture courses (one Europe or U.S., and one Africa, Asia, Middle East, or Latin America), two 200-level courses, a Sources and Methods seminar, and HISTORY 209S Research Seminar for Majors.

History Tracks with Interdisciplinary Emphasis (HMIE)

These tracks (History, Philosophy, and the Arts; History of Science and Medicine; History and Law; and Public History/Public Service) with Interdisciplinary Emphasis are designed for students who are interested in other disciplines who want to focus on the historical aspects of the subject matter covered by that discipline, who want to understand how interdisciplinary approaches can deepen their understanding of history, or who are primarily interested in developing interdisciplinary approaches to historical scholarship by combining the careful attention to evidence and context that motivates historical research with the analytic and methodological tools of science and the humanities.

In pursuing the designated requirements for all History majors, students in HMIE are required to complete their thirteen courses for the major as follows:

Gateway Course: Students are required to take the appropriate gateway course for their interdisciplinary track. This course introduces students to the application of particular interdisciplinary methods to the study of history. See the section on each HMIE for the gateway course appropriate to that major track. *Note:* The History and the Law track has no gateway course requirement.

Methodological Cluster: This cluster is designed to acquaint students with the ways in which interdisciplinary methods are employed in historical scholarship, by practicing historians and scholars in other disciplines whose work is historical. This program of study must provide methodological coherence and must be approved in advanced by the student's advisor. See the section on each HMIE for the appropriate historical methods courses.

Geographic Cluster: History is embedded in time and place. This cluster is designed to emphasize that the purpose of studying methodology is to more fully understand the history of a particular region of the world. Students select a particular geographic region, as specified in the History major, and complete four courses in that area.

Interdisciplinary Cluster: These courses, taken outside the Department of History, acquaint students with the methods and approaches of another discipline appropriate for the interdisciplinary study of history. This program of study must provide methodological coherence and must be approved in advance by the student's advisor. See the section on each HMIE for appropriate interdisciplinary courses.

Research Seminar for Majors: HISTORY 209S Research Seminar for Majors fulfills Writing in the Major Requirement.

HMIE tracks do not mandate the breadth or concentration requirements of the General History track.

History, Philosophy, and the Arts Track

The History, Philosophy, and the Arts (HPA) track is designed for the student who wishes to complement his or her work in History with study in literature and philosophy, particularly in a foreign language. For the purposes of this track, Arts are defined broadly, including fine art and art history, drama, films, memoirs and autobiography, poetry and novels, as well as canonical works in philosophy, political science, and history of political thought. It appeals to students who are interested in studying the humanities and its conceptual and linguistic worlds in their historical context, or who want to focus on both the literature and history of a specific geographical area while also learning the language of that area.

		Units
Gateway Courses		
Students must take two of the following courses:		
HISTORY 1C	Global History: Modern Times	
HISTORY 115D	Europe in the Middle Ages, 300-1500	
HISTORY 116	Traders and Crusaders in the Medieval Mediterranean	
HISTORY 140A	The Scientific Revolution	
HISTORY 251C	The American Enlightenment	
Note: If a student wishes to do more than two of these courses, the course is applied to the methodological cluster.		
Methodological Cluster		
This two-course cluster teaches students how historians, in particular, analyze literary texts and philosophical works as documentary sources for writing cultural and intellectual history. Students choose two courses from among the pre-approved HPA methodology curriculum. These courses need not be in the student's geographic concentration.		
For 2020-21, these courses are:		
HISTORY 32S	Utopian Dreams, Dystopian Nightmares: Visions of the Ideal Society in Early Modern Britain	5
HISTORY 41N	Visible Bodies: Black Female Authors and the Politics of Publishing in Africa	4
HISTORY 63N	The Feminist Critique: The History and Politics of Gender Equality	3-4
HISTORY 139	Modern Britain and the British Empire	5
HISTORY 150A	Colonial and Revolutionary America	5
HISTORY 150C	The United States in the Twentieth Century	5
HISTORY 187	The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan	5
HISTORY 198	The History of Modern China	5
HISTORY 203C	History of Ignorance	5
HISTORY 204G	War and Society	4-5
HISTORY 211	Out of Eden: Deportation, Exile, and Expulsion from Antiquity to the Renaissance	4-5
HISTORY 213F	Medieval Germany, 900-1250	1-5
HISTORY 215B	Race and Ethnicity in Premodern Europe	3-5
HISTORY 216D	Nationalism, Colonialism, and the Lord of the Rings: The Middle Ages in the Modern World	5
HISTORY 224A	The Soviet Civilization	4-5
HISTORY 233F	Political Thought in Early Modern Britain	4-5
HISTORY 242J	London Low Life in the Nineteenth Century	5
HISTORY 248	Religion, Radicalization and Media in Africa since 1945	4-5
HISTORY 257E	History of Conservatism	4-5
HISTORY 282J	Disasters in Middle Eastern History	5

Geographical Cluster (four courses): Students select four History courses in one geographic area. These are: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East, or Africa. These four courses must be taken in addition to the two methodological courses required above.

Interdisciplinary Cluster (four courses): Four courses, taken outside the Department of History, must address the literature and arts, broadly defined, of the area chosen for the geographic concentration. The student's advisor must pre-approve all courses in this cluster; these courses may not be double-counted towards a minor or major other than History.

Research Seminar for Majors: HISTORY 209S Research Seminar for Majors fulfills Writing in the Major requirement.

General Requirements: Like all History majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or U.S, one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources and Methods seminar, and a Research Seminar for Majors.

History of Science and Medicine Track

The History of Science and Medicine (HS&M) track is a collaborative program of the Department of History and the Program in the History and Philosophy of Science. The major is designed for students interested in

both sciences and humanities, and in the interactions between the two. It is also especially useful for students contemplating medical school, since it allows them to study the history of medicine, biology, and allied sciences in conjunction with fulfilling the premed science requirements.

		Units
Gateway Course		
Students must complete the following:		
HISTORY 140A	The Scientific Revolution	5
Methodological Cluster		
These History courses focus on the history of science and medicine. Students must take three courses.		
For 2020-21, these courses are:		
HISTORY 42N	The Missing Link	4
HISTORY 140	World History of Science	5
HISTORY 144	Sex, Gender, and Intersectional Analysis in Science, Medicine, Engineering, and Environment	5
HISTORY 179C	The Ethical Challenges of the Climate Catastrophe	3-5
HISTORY 203C	History of Ignorance	5
HISTORY 203F	Racial Justice in the Nuclear Age	5
HISTORY 204D	Advanced Topics in Agnotology	4-5
HISTORY 204G	War and Society	4-5
HISTORY 234P	The Age of Plague: Medicine and Society, 1300-1750	5
HISTORY 235L	Alien Imaginations: Extraterrestrial Speculations in Modern European History	5
HISTORY 240	The History of Evolution	4-5
HISTORY 243C	People, Plants, and Medicine: Colonial Science and Medicine	4-5
HISTORY 243G	Tobacco and Health in World History	4-5

Geographical Cluster (four courses): Students select four History courses in one geographic area. Examples include: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East, or Africa. These four courses must be taken in addition to the three methodological cluster courses. Courses in the history of science, technology, and medicine that have a geographic focus may be used to fulfill this requirement, but cannot be double-counted in the methodological cluster.

Interdisciplinary Cluster (four courses): Students select four courses in scientific disciplines and/or in philosophy of science, anthropology of science, or sociology of science. These courses require faculty advisor pre-approval.

Research Seminar for Majors: HISTORY 209S Research Seminar for Majors fulfills the Writing in the Major requirement.

General Requirements: As with all History majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or U.S., one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources and Methods seminar, and a Research Seminar for Majors.

History and Law Track

The History and Law (HL) interdisciplinary track is for students who want to explore the intersections between historical and legal studies. The HL curriculum focuses on the role of legal institutions, policies, and structures in various societies. HL track majors enroll in at least four History department courses that focus on issues of law in civil societies and four courses that provide a geographic concentration. In addition, students enroll in four courses outside History that provide disciplinary or interdisciplinary perspectives on the role of law in shaping societies and a Research Seminar for Majors.

Gateway Course: There is no gateway course for this track. Instead, students take an extra course in the Methodological cluster.

		Units
Methodological Cluster		
Students enroll in at least four History department courses, including courses outside History taught by faculty affiliated with the department, that focus on how law, policies, constitutions, and legal structures affect the development of various societies. Note: The Methodological Cluster for this HIP contains one extra course since there is no Gateway course.		
For 2020-21, these courses are:		
HISTORY 63N	The Feminist Critique: The History and Politics of Gender Equality	3-4
HISTORY 102A	The Romans	3-5
HISTORY 105C	Human Trafficking: Historical, Legal, and Medical Perspectives	5
HISTORY 133B	Revolutionary England: The Stuart Age	5
HISTORY 134A	The European Witch Hunts	5
HISTORY 150A	Colonial and Revolutionary America	5
HISTORY 150B	Nineteenth Century America	5
HISTORY 150C	The United States in the Twentieth Century	5
HISTORY 179C	The Ethical Challenges of the Climate Catastrophe	3-5
HISTORY 187	The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan	5
HISTORY 200A	Doing Legal History	5
HISTORY 201A	The Global Drug Wars	4-5
HISTORY 202F	Surveillance States and Societies	4-5
HISTORY 203C	History of Ignorance	5
HISTORY 204D	Advanced Topics in Agnotology	4-5
HISTORY 204G	War and Society	4-5
HISTORY 211	Out of Eden: Deportation, Exile, and Expulsion from Antiquity to the Renaissance	4-5
HISTORY 222	Crime and Punishment in Early Modern Europe and Russia	4-5
HISTORY 224A	The Soviet Civilization	4-5
HISTORY 233F	Political Thought in Early Modern Britain	4-5
HISTORY 243C	People, Plants, and Medicine: Colonial Science and Medicine	4-5
HISTORY 243G	Tobacco and Health in World History	4-5
HISTORY 251J	The End of American Slavery, 1776-1865	4-5
HISTORY 253F	Thinking the American Revolution	4-5
HISTORY 257E	History of Conservatism	4-5
HISTORY 281K	Departures: Late Ottoman Displacements of Muslims, Christians, and Jews, 1853-1923	5
HISTORY 283F	Capital and Crisis in the Middle East and the World	5
HISTORY 284F	Empires, Markets and Networks: Early Modern Islamic World Between Europe and China, 1400-1900	4-5

Geographical Cluster (four courses): Students select four History courses in one geographic area. These are: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle

East, or Africa. These four courses must be taken in addition to the three methodological courses required above.

Interdisciplinary Cluster (four courses): Students may select from courses offered in the School of Law, School of Education, and others as appropriate. *Note:* Courses in the School of Law and School of Education require the permission of the instructor before undergraduate students can enroll, since these are graduate-level courses.

Research Seminar for Majors: HISTORY 209S Research Seminar for Majors fulfills the Writing in the Major requirement.

General Requirements: Like all history majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or U.S., one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources and Methods seminar, and a Research Seminar for Majors.

Public History/Public Service Track

The Public History/Public Service (PH/PS) interdisciplinary history track is designed for students who wish to include in their course of studies the application of historical study in (1) public settings such as museums and heritage sites, national and state parks, public agencies, and private foundations, and (2) public service settings in non-profit organizations, public agencies, and educational institutions.

PH/PS majors enroll in a gateway course on public history and public service and in four History department courses that provide a geographic concentration as well as completing a two-course methodological requirement. PH/PS majors must also complete an internship through a regularly offered community engaged learning course or through a summer internship or fellowship. In addition, students, in consultation with the PH/PS faculty coordinator,must complete four courses from outside the History department (see the annual listing of community engaged learning courses [Cardinal Courses] provided by the Haas Center for Public Service).

Gateway Course (one course): HISTORY 200R Doing Community History: Asian Americans and the Pandemic

Geographical Cluster (four courses): Students select four History courses in one geographic area, such as the United States, Europe, Latin America, Asia, Middle East, or Africa.

Interdisciplinary Cluster (four courses): Students select four courses from outside the History department that addresses a theme or topic of interest. The faculty coordinator must pre-approve all courses in this cluster.

Methodological Cluster (two courses): Students must enroll in one Sources and Methods seminar course and one additional 200-level History course. The Writing in the Major (WIM) requirement must be completed in a Research Seminar for Majors.

Public Service/Service Learning Internship (one course): Students must engage in at least a one quarter internship through a community engaged learning course or through a full-time public service or public history summer internship or fellowship. This internship must be pre-approved by the faculty coordinator.

Students who complete a paid summer internship in lieu of one for academic credit must enroll in 3 units of HISTORY 299S Undergraduate Directed Research and Writing with the faculty coordinator of the PH/PS track and write a 20-page research paper related to their internship work. This research paper is in addition to that required for the Research Seminar for Majors.

The following History community engaged learning courses are offered in 2020-21:

		Units
HISTORY 6W	Community-Engaged Learning Workshop on Human Trafficking - Part I	3
HISTORY 7W	Community-Engaged Learning Workshop on Human Trafficking - Part II	3
HISTORY 200J	Doing Oral History	5
HISTORY 200M	Doing Digital History	5
HISTORY 200R	Doing Community History: Asian Americans and the Pandemic	5
HISTORY 201A	The Global Drug Wars	4-5

If students elect to fulfill the internship requirement through a History Department service-learning course, they must enroll in an additional course in either the geographical cluster or the Interdisciplinary cluster in order to complete the 13 courses required for the major.

Research Seminar for Majors: HISTORY 209S Research Seminar for Majors fulfills Writing in the Major requirement.

General Requirements: As with all history majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or US, one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources and Methods seminar, and a Research Seminar for Majors.

return to top of page (p. 1550)

Additional Information

Overseas Studies or Study Abroad

Courses offered by Stanford's Bing Overseas Studies Program and appearing on the History department's cognate course list automatically receive credit towards the major or minor in History. Course work completed in non-Stanford Study Abroad programs is evaluated for major/minor credit by designated History department faculty on a case-by-case basis. Students in non-Stanford Study Abroad programs are advised to take classes with reading and writing components comparable to History department course loads.

History Secondary Teacher's Credential

Applicants for the Single Subject Teaching Credential (Secondary) in the social studies may obtain information regarding this program from the Credential Administrator, School of Education.

Honors Program

For a limited number of majors, the department offers a special program leading to Departmental Honors in History. Students accepted for this program, in additional to fulfilling the general requirements stated above, begin work as early as Spring Quarter of the junior year and complete the essay by mid-May of the senior year. In addition to HISTORY 299H (https://exploredegrees.stanford.edu/search/?P=HISTORY%20299H) Junior Honors Colloquium, students must enroll in 11-15 units of Senior Research in the senior year, to be distributed as best fits their specific project. For students in the Honors program, Senior Research units (HISTORY 299A (https://exploredegrees.stanford.edu/search/?P=HISTORY%20299A) Senior Research I, HISTORY 299B (https://exploredegrees.stanford.edu/search/?P=HISTORY%20299B) Senior Research II, HISTORY 299C (https://exploredegrees.stanford.edu/search/?P=HISTORY%20299C) Senior Research III) are taken in addition to the thirteen required courses in History.

To enter this program, the student must be accepted by a member of the department who agrees to advise the research and writing of the essay, and must complete the Junior Honors Colloquium (299H) offered in Winter Quarter. An exception to the latter requirement may be made for those studying overseas Winter Quarter of the junior year, but such

students should consult with the director of the honors program, if possible, prior to going overseas. Students who study abroad for the entire junior year and want to write an honors thesis should plan to take the Research Seminar for Majors in the first quarter following completion of the study abroad program. Under exceptional circumstances, students are admitted to the program in Autumn Quarter of the senior year. Such students must not enroll in any HISTORY 299A (https://exploredegrees.stanford.edu/search/?P=HISTORY%20299A) Senior Research I, HISTORY 299B (https://exploredegrees.stanford.edu/search/?P=HISTORY%20299B) Senior Research II, HISTORY 299C (https://exploredegrees.stanford.edu/search/?P=HISTORY%20299C) Senior Research III, units until HISTORY 209S (https://exploredegrees.stanford.edu/search/?P=HISTORY%20209S) Research Seminar for Majors, has been completed.

In considering an applicant for such a project, the advisor and director of the honors program take into account general preparation in the field of the project and expect a GPA of at least 3.5 in the student's previous work in History and a 3.3 in overall University work. Students completing the thesis with a grade of 'B+' or higher are eligible for Departmental Honors in History. To enter the Honors program, apply at the Department of History office.

Outstanding honors essays may be considered for the University's Robert M. Golden Medal, as well as for departmental James Birdsall Weter prize.

Honors Program Requirements

To graduate with departmental honors in History, students must:

1. complete HISTORY 299H (https://exploredegrees.stanford.edu/search/?P=HISTORY%20299H) Junior Honors Colloquium in the junior year.
2. maintain a GPA of at least 3.3 in overall University work and a 3.5 in the History major during the final 5 quarters of enrollment/thesis preparation, or obtain the consent of the Director of the Honors Program.
3. select both a primary thesis advisor (who is a member of the Stanford History faculty) and a secondary advisor (who is a Stanford University faculty member with an active teaching appointment for the duration of academic year 2020-21) no later than Autumn Quarter of the senior year.
4. submit a completed honors thesis on May 4, 2020 by noon that meets submission requirements and receives a grade of 'B+' or better.
5. enroll in the 11-15 units of Senior Research as specified below.
6. participate in mandatory Honors Program activities throughout senior year (including, but not limited to, writing workshops and the annual Honors Presentation Luncheon) as specified in the Honors Program Handbook.

HISTORY 299A (https://exploredegrees.stanford.edu/search/?P=HISTORY%20299A) Senior Research I, HISTORY 299B (https://exploredegrees.stanford.edu/search/?P=HISTORY%20299B) Senior Research II, HISTORY 299C (https://exploredegrees.stanford.edu/search/?P=HISTORY%20299C) Senior Research III do not fulfill any history major requirements other than honors, but the units do count towards the 180 required for B.A. degree conferral.

		Units
Required Course—To be taken in the junior year:		
HISTORY 299H	Junior Honors Colloquium	1
Required Course—Recommended to be taken in junior year:		
HISTORY 209S	Research Seminar for Majors	5
To be taken in the senior year:		
HISTORY 299A	Senior Research I	1-5
HISTORY 299B	Senior Research II	1-5
HISTORY 299C	Senior Research III	1-5

An exception (for HISTORY 299H (https://exploredegrees.stanford.edu/search/?P=HISTORY%20299H) Junior Honors Colloquium) may be made for those studying overseas Winter Quarter of the junior year, but such students should consult with the Director of the Honors Program prior to going overseas.

return to top of page (p. 1550)

Joint Major Program in History and Computer Science

The joint major program (JMP) was discontinued at the end of the academic year 2018-19. Students may no longer declare this program. All students with declared joint majors are permitted to complete their degree; faculty and departments are committed to providing the necessary advising support.

See the "Joint Major Program (p. 33)" section of this bulletin for a description of University requirements for the JMP. See also the Undergraduate Advising and Research JMP (https://majors.stanford.edu/more-ways-explore/joint-majors-csx/) web site and its associated FAQs.

Students completing the JMP receive a B.A.S. (Bachelor of Arts and Science).

History Major Requirements in the Joint Major Program

See the "Computer Science Joint Major Progra (p. 714)m" section of this bulletin for details on Computer Science requirements.

Students majoring in the History and Computer Science joint major program fulfill all of the breadth, focus, and WIM requirements of the standard History major. Students in the JMP are excused from completing one elective course, reducing the required unit count of the History major from 63 to 59 units (i.e., from a minimum of 13 courses to 12 courses). All courses comprising the major must be taken for a letter grade.

For details on the requirements of the History major, see the Bachelor's tab (p. 1550) of this section of this bulletin.

Integrative Capstone Experience

One of the highlights of the JMP is an integrative capstone experience, which enables students to work with faculty mentors in the two departments to devise and complete original projects that bring together the different fields. Some students may choose to complete capstone projects under the auspices of HISTORY 209S Research Seminar for Majors which is the required Writing in the Major requirement for all History majors including those in the JMP. Others may choose to complete their capstones under the auspices of other courses in Computer Science or History, or in the context of senior honors projects in one or the other or both departments. In keeping with University policy, units obtained from a capstone course taken within a particular department can be applied to only that department's requirements.

Dropping a Joint Major Program

To drop the joint major, students must submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program (https://stanford.box.com/change-UG-program/). Students may also consult the Student Services Center (http://studentservicescenter.stanford.edu/) with questions concerning dropping the joint major.

Transcript and Diploma

Students completing a joint major graduate with a B.A.S. degree. The two majors are identified on one diploma separated by a hyphen. There will be a notation indicating that the student has completed a "Joint Major." The two majors are identified on the transcript with a notation indicating that the student has completed a "Joint Major."

Minor in History

Students must declare the minor in History no later than Autumn Quarter of the senior year via Axess. Minor declarations are approved by the Department of History and confirmation is sent via email to the student.

Degree Requirements

Candidates for the minor in History must complete six courses, at least three of which must have a field or thematic focus. Students completing the minor may choose to concentrate in such fields as African, American, Asian, British, European (medieval, early modern, or modern), Russian and East European history, comparative empires and cultures, or such thematic topics as the history of gender, the family, religion, technology, or revolution. Students may also petition to have a concentration of their own design count toward the minor.

- All six courses must be of at least 3 units each and must be taken for a letter grade.
- The student must maintain a grade point average (GPA) in History courses of 2.0 (C) or higher.
- Two of the six courses must be small-group in format (Stanford Introductory Seminars, Sources and Methods Seminars, departmental colloquia, and research seminars).
- History courses taken at Stanford overseas campuses may count toward the minor, but at least three of the six courses must be taken from Stanford History faculty.
- Advanced Placement credits do not fulfill any minor requirements.

Optional Courses for the Minor

History courses taken at non-Stanford Study Abroad programs may count toward the minor (provided the History Department approves them), but at least three of the six courses must be taken from Stanford History faculty. One course from certain Introduction to the Humanities courses and Thinking Matters courses (those taught by History faculty) may count toward the six-course requirement, but not for the three-course field of concentration. One Undergraduate Directed Research and Writing HISTORY 299S) course may count toward the minor, if taken for 3-5 units and for a letter grade. A maximum of three transfer courses may be used toward the minor.

Coterminal Master's Program in History

The department each year admits a limited number of undergraduates for coterminal M.A. degree in History. Coterminal applications are accepted during Autumn Quarter for admission in Spring Quarter. Applicants are responsible for checking their compliance with University coterminal requirements listed in the "Coterminal Bachelor's and Master's Degrees (p. 56)" section of this bulletin.

Admission

Applicants must meet the same general standards as those seeking admission to the M.A. program. Students must submit the Coterminal Online Application (https://applyweb.com/stanterm/), including a written statement of purpose, a transcript, GRE test scores, and three letters of recommendation, at least two of which should be from members of the Department of History faculty. To be competitive, coterminal applicants should have a 3.75 GPA in their undergraduate history major (or equivalent if they are entering without a History major.) The decision on admission rests with the department faculty upon recommendation by the graduate admissions committee.

Students must meet all requirements for both degrees. They must complete 15 full-time quarters (or the equivalent), or three full-time quarters after completing 180 units, for a total of 225 units. During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three courses that fall within a single Ph.D. field.

The application filing deadline is December 1, 2020.

The coterminal M.A. program is not declarable on Axess.

University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 56)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 65)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken during or after the first quarter of the sophomore year are eligible for consideration for transfer to the graduate career; the timing of the first graduate quarter is not a factor. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate advisor be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

Master of Arts in History

University requirements for the M.A. are described in the "Graduate Degrees (p. 65)" section of this bulletin.

The department requires the completion of nine courses (totaling not less than 45 units) of graduate work; seven courses of this work must be Department of History courses. Of the seven, one must be a seminar and four must be either graduate colloquia or graduate seminars. Directed reading may be counted for a maximum of 10 units. A candidate whose undergraduate training in history is deemed inadequate must complete nine courses of graduate work in the department. The department does not recognize for credit toward the M.A. degree any work that has not received the grade of 'A' or 'B.'

Terminal M.A. Program

Applicants who do not wish to continue beyond the M.A. degree are admitted to this program at the discretion of the faculty in individual fields (U.S., modern Europe, and so on). Students admitted may not apply to enter the Ph.D. program in History during the course of work for the M.A. degree.

M.A. in Teaching (History)

The department cooperates with the School of Education in offering the Master of Arts in Teaching degree. For the general requirements, see the "Graduate School of Education (p.)" section of this bulletin.

For certain additional requirements made by the Department of History, contact the department office. Candidates must possess a teaching credential or relevant teaching experience.

Admission

Applicants for admission to graduate work must take the General Test of the Graduate Record Examination. It may be taken at most American colleges and in nearly all foreign countries. For details, see the Graduate Admissions (http://gradadmissions.stanford.edu) web site.

Students admitted to graduate standing do not automatically become candidates for a graduate degree. With the exception of students in the terminal M.A. program, they are admitted with the expectation that they will be working toward the Ph.D. degree and may become candidates to receive the M.A. degree after completing three quarters of work.

The application filing deadline is December 1, 2020.

Doctor of Philosophy in History

University requirements for the Ph.D. are described in the "Graduate Degrees (p. 65)" section of this bulletin.

Students planning to work for the doctorate in history should be familiar with the general degree requirements of the University outlined in the "Graduate Degrees (p. 65)" section of this bulletin. Those interested in applying for admission to the M.A. and Ph.D. programs should contact the graduate program coordinator in the History department. Online applications are available in September of the year prior to intended enrollment. The application filing deadline is December 1, 2020. Applicants must file a report of their general scores on the Graduate Record Examination and submit a writing sample of 10-25 pages on a historical topic. Successful applicants for the M.A. and Ph.D. programs may enter only in Autumn Quarter.

Upon enrollment in the graduate program in History, the student has a member of the department designated as an adviser with whom to plan the Ph.D. program. Much of the first two years of graduate study is spent taking courses, and, from the outset, the student should be aware that the ultimate objective is not merely the completion of courses but preparation for general examinations and for writing a dissertation.

Admission to the Department of History in the graduate division does not establish any rights respecting candidacy for an advanced degree. At the end of the first year of graduate study, students are evaluated by the faculty and given a progress report. A decision as to whether the student is admitted to candidacy for the Ph.D. is normally made by the start of the student's third year.

After the completion of certain further requirements, students must apply for acceptance for candidacy for the doctorate in the graduate division of the University.

Admission

Applicants for admission to graduate work must take the General Test of the Graduate Record Examination. It may be taken at most American colleges and in nearly all foreign countries. For details, see the Office of Graduate Admissions (http://gradadmissions.stanford.edu) web site.

Students admitted to graduate standing do not automatically become candidates for a graduate degree. With the exception of students in the terminal M.A. program, they are admitted with the expectation that they will be working toward the Ph.D. degree and may become candidates to receive the M.A. degree after completing three quarters of work.

The application filing deadline is December 1, 2020.

Degree Requirements

Required Courses

		Units
For all first-year Ph.D. students		
HISTORY 304	Approaches to History	4-5
HISTORY 305	Graduate Pedagogy Workshop	1
For first-year and second-year Ph.D students in American History		
HISTORY 351A	Core in American History, Part I	4-5
HISTORY 351B	Core in American History, Part II	4-5
HISTORY 351C	Core in American History, Part III	4-5
HISTORY 351D	Core in American History, Part IV	4-5
HISTORY 351E	Core in American History, Part V	4-5
HISTORY 351F	Core in American History, Part VI	4-5

Other Graduate Core Colloquia required for Ph.D. students studying in fields other than the above are listed in the Department of History's Graduate Handbook.

University Oral Examinations

The student is expected to take the University oral examination in the major concentration in the third graduate year.

Dissertation

The student must complete and submit a dissertation which is the result of independent work and is a contribution to knowledge. It should evidence the command of approved techniques of research, ability to organize findings, and competence in expression. For details and procedural information, inquire in the department.

Dissertation Committee

The reading committee consists of the principal dissertation adviser (first reader), and two additional members of the Department (second and third readers) agreed upon by the adviser and the student.

Financial Support

Students who are admitted with financial support are provided multiple years of support through fellowships, teaching and research assistantships, and tuition grants. Applicants should indicate on the admissions application whether they wish to be considered for such support. No separate application for financial aid is required.

U.S. citizens and permanent resident aliens who are interested in area language studies in East Asia, Africa, and the republics of the former Soviet Union may request a Foreign Language and Area Studies (FLAS) fellowship application from the FLAS coordinator of the respective programs offering the FLAS (CEAS, CAS, CREEES). The FLAS application deadlines are in January and February (CAS).

Resources

The degree requirements section relates to formal requirements, but the success of a student's graduate program depends in large part on the quality of the guidance received from faculty and on the library resources available. Prospective graduate applicants are advised to study the list of History faculty and the courses this faculty offers. As to library resources, no detailed statement is possible in this bulletin, but areas in which library resources are unusually strong are described following.

The University Library maintains strong general collections in almost all fields of history. It has a very large microtext collection, including, for instance, all items listed in Charles Evans' American Bibliography, and in the Short-Title Catalogues of English publications, 1474-1700, and virtually complete microfilmed documents of the Department of State to 1906. It also has a number of valuable special collections including the Borel Collection on the History of California; many rare items on early American and early modern European history; the Brasch Collection

on Sir Isaac Newton and scientific thought during his time; the Gimon Collection on French political economy, and other such materials.

The rich collection of the Hoover Institution on the causes, conduct, and results of WW I and WW II are being augmented for the post-1945 period. The materials include government documents, newspaper and serial files, and organization and party publications (especially the British and German Socialist parties). There are also important manuscript collections, including unpublished records of the Paris Peace Conference of 1919 and the Herbert Hoover archives, which contain the records of the Commission for Relief in Belgium, the American Relief Administration, the various technical commissions established at the close of WW I for reconstruction in Central and Eastern Europe, the personal papers of Herbert Hoover as United States Food Administrator, and other important personal papers. Other materials for the period since 1914 relate to revolutions and political ideologies of international importance; colonial and minority problems; propaganda and public opinion; military occupation; peace plans and movements; international relations; international organizations and administration including the publications of the United Nations, as well as principal international conferences. The Hoover Institution also possesses some of the richest collections available anywhere on the British labor movement; Eastern Europe, including the Soviet Union; East Asia (runs of important newspapers and serials and extensive documentary collections, especially for the period of WW II); and Africa since 1860, especially French-speaking Africa, the former British colonies, and South Africa.

Requirements

1. In consultation with the adviser, students select an area of study from the list below in which to concentrate their study and later take the University oral examination. The major concentrations are:
   - Europe, 300-1500
   - Europe, 1400-1800
   - Europe since 1700
   - Jewish History
   - Russia
   - Eastern Europe
   - Middle East and Central Asia
   - South Asia
   - East Asia before 1600
   - China since 1600
   - Japan since 1600
   - Korea since 1800
   - Africa
   - Britain and the British Empire since 1460
   - Latin America
   - The United States (including colonial America)
   - The History of Science and Medicine
   - Transnational, International, and Global
2. The department seeks to provide a core colloquium in every major concentration. Students normally enroll in this colloquium during the first year of graduate study.
3. Students are required to take two research seminars, at least one in the major concentration. Normally, research seminars are taken in the first and second years.
4. Each student, in consultation with the adviser, defines a secondary concentration. This concentration should represent a total of four graduate courses or their equivalents, and it may be fulfilled by working in a historical concentration or an interdisciplinary concentration. The historical concentrations include:
   a. One of the concentrations listed above (other than the student's major concentration).
   b. One of the concentrations listed below, which falls largely outside the student's major concentration:
      - The Ancient Greek World
      - The Roman World
      - Europe, 300-1000
      - Europe, 1000-1400
      - Europe, 1400-1600
      - Europe, 1600-1789
      - Europe, 1700-1871
      - Europe since 1848
      - England, 450-1460
      - Britain and the British Empire, 1460-1714
      - Britain and the British Empire since 1714
      - Russia to 1800
      - Russia since 1800
      - Eastern Europe to 1800
      - Eastern Europe since 1800
      - Jewish History
      - Middle East and Central Asia to 1800
      - Middle East and Central Asia since 1800
      - Africa
      - South Asia
      - China before 1600
      - China since 1600
      - Japan before 1600
      - Japan since 1600
      - Latin America to 1825
      - Latin America since 1810
      - The United States (including Colonial America) to 1865
      - The United States since 1850
      - The History of Science and Medicine
      - Transnational, International, and Global
   c. Work in a national history of sufficiently long time to span chronologically two or more major concentrations. For example, a student with Europe since 1700 as a major concentration may take France from 1000 to the present as a secondary concentration.
   d. A comparative study of a substantial subject across countries or periods. The secondary concentration requirement may also be satisfied in an interdisciplinary concentration. Students plan these concentrations in consultation with their advisers. Interconcentrations require course work outside the Department of History which is related to the student's training as a historian. Interdisciplinary course work can either add to a student's technical competence or broaden his or her approach to the problems of the research concentration.
5. Each student, before conferral of the Ph.D., is required to satisfy the department's teaching requirement.
6. There is no University or department foreign language requirement for the Ph.D. degree. A reading knowledge of one or more foreign languages is required in concentrations where appropriate. The faculty in the major concentration prescribes the necessary languages. In no concentration is a student required to take examinations in more than two foreign languages. Certification of competence in commonly taught languages (that is, French, German, Italian, Portuguese, Russian, and Spanish) for candidates seeking to fulfill the language requirement in this fashion is done by the appropriate language department of the University. Certification of competence in other languages is determined in a manner decided on by faculty in the major concentration. In either case, certification of language competence must be accomplished before a student takes the University oral examination.

7. The student is expected to take the University oral examination in the major concentration in the third graduate year.
8. The student must complete and submit a dissertation which is the result of independent work and is a contribution to knowledge. It should evidence the command of approved techniques of research, ability to organize findings, and competence in expression. For details and procedural information, inquire in the department.

Ph.D. Minor in History

Students pursuing a Ph.D. other than in History may apply for the Ph.D. Minor in History. Ph.D. students cannot pursue a minor in their own program. The minimum University requirement for a Ph.D. minor is 20 units of History course work at the graduate level (courses numbered 300 and above) at Stanford. All units should be in a single field. Units taken for the minor can be counted as part of the overall requirement for the Ph.D. of 135 units taken at Stanford. Courses used for a minor may not be used to meet the requirements for a master's degree.

Degree Requirements

20 units of History course work at the graduate level (HISTORY 300-399W and 400-499X) at Stanford. All units should be in a single field.

Optional Courses for the Minor

A Ph.D. minor form outlining the program of study must be approved by the major and minor departments.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a “credit” or “no credit” grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a “credit” or “satisfactory” grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

The Department of History will accept courses taken with a CR/NC or S/NC grading basis toward the major for the entire period of remote learning in AY 2020-21, with the exception of the honors thesis which must be taken for a letter grade.

Graduate Degree Requirements

Grading

The Department of History expects graduate students to take classes for a letter grade and they should enroll for the letter grade option when available in Axess. If a problem arises over the course of the quarter, the student may request an extension or withdraw from the course (in accordance with University rules). The department will work with students to help in any way it can.

Graduate Advising Expectations

The Department of History is committed to providing academic advising in support of graduate student scholarly and professional development. When most effective, this advising relationship entails collaborative and sustained engagement by both the adviser and the advisee. As a best practice, advising expectations should be periodically discussed and reviewed to ensure mutual understanding. Both the adviser and the advisee are expected to maintain professionalism and integrity.

Faculty advisers guide students in key areas such as selecting courses, designing and conducting research, developing of teaching pedagogy, navigating policies and degree requirements, and exploring academic opportunities and professional pathways.

Graduate students are active contributors to the advising relationship, proactively seeking academic and professional guidance and taking responsibility for informing themselves of policies and degree requirements for their graduate program.

Upon enrolling, all students plan their work under the direction of a faculty member designated by the Department as their adviser. Entering students should meet with their adviser to discuss the selection of courses, choice of major and secondary fields, and the overall plan of their graduate programs. Faculty advisers and graduate student advisees meet at least once a quarter to assess the advisee’s course of study, performance over the past quarter, and plans for the next quarter’s program of study. Students should consult with their advisers on all academic matters. Faculty should help their advisees plan for orals, research grant applications, research projects, and the dissertation. Until a student is advanced to candidacy, the Director of Graduate Studies reviews the student's quarterly transcript and the adviser's evaluation.

Normally the original adviser remains in this capacity during a student’s period of graduate study. However, in the event that a student wishes to change the admitting adviser, they may do so after consultation with and approval of the two faculty members involved. The necessary forms are available from the Graduate Program Coordinator.

The Director of Graduate Studies supervises the Graduate Program in the Department. The Director’s duties include approving the committees for the University oral examination, dissertation prospectus, and dissertation, certifying graduate students’ progress to degree and completion of University and Departmental requirements, and chairing the Department’s Committee on Graduate Studies.

For a statement of University policy on graduate advising, see the "Graduate Advising (https://exploredegrees.stanford.edu/graduatedegrees/#advisingandcredentialstext)" section of this bulletin.

Emeriti: (Professors) Barton J. Bernstein, Joel Beinin, Albert Camarillo, Clayborne Carson, Peter Duus, Terence Emmons, David M. Kennedy, David Holloway, Carolyn Lougee Chappell, Mark Mancall, Peter Paret, Jack N. Rakove, Paul A. Robinson, James J. Sheehan, Peter Stansky, Lyman P. Van Slyke, Richard White; (Senior Lecturer) Joseph J. Corn

Overseas Studies Courses in History

The Bing Overseas Studies Program (http://bosp.stanford.edu) (BOSP) manages Stanford international and domestic study away programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The BOSP course search site (https://undergrad.stanford.edu/programs/bosp/explore/search-courses/) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu) or Bing Overseas Studies (http://bosp.stanford.edu).

Due to COVID-19, all BOSP programs have been suspended for Autumn Quarter 2020-21. All courses and quarters of operation are subject to change.

		Units
OSPAUSTL 40	Australian Studies: History, Society and Culture Down Under	3

Courses

HISTORY 1A. Global History: The Ancient World. 3-5 Units.
World history from the origins of humanity to the Black Death. Focuses on the evolution of complex societies, wealth, violence, hierarchy, and large-scale belief systems.
Same as: CLASSICS 76

HISTORY 1B. Global History: The Early Modern World, 1300 to 1800. 3-5 Units.
(Course is offered for 3 OR 5 units.) Topics include early globalization and cross-cultural exchanges; varying and diverse cultural formations in different parts of the world; the growth and interaction of empires and states; the rise of capitalism and the economic divergence of "the west"; changes in the nature of technology, including military and information technologies; migration of ideas and people (including the slave-trade); disease, climate, and environmental change over time. Designed to accommodate beginning students, non-majors, and more advanced history students.

HISTORY 1C. Global History: Modern Times. 3-5 Units.
History 1C explores the making of our modern world. It investigates the interconnectednhistories of revolution, war, imperialism, migration, race, slavery, democracy, rebellion, nnationalism, feminism, socialism, fascism, genocide, anti-colonialism, neoliberalism, and npopulist authoritarianism. Analyzing memoirs, novels, films, and other sources, we will ninvestigate how key political ideas have transformed societies, cultures, and economies nacross the globe from the late eighteenth century through to the present.

HISTORY 3D. Dangerous Ideas. 1 Unit.
Ideas matter. Concepts such as revolution, tradition, and hell have inspired social movements, shaped political systems, and dramatically influenced the lives of individuals. Others, like immigration, universal basic income, and youth play an important role in contemporary debates in the United States. All of these ideas are contested, and they have a real power to change lives, for better and for worse. In this one-unit class we will examine these "dangerous" ideas. Each week, a faculty member from a different department in the humanities and arts will explore a concept that has shaped human experience across time and space. Some weeks will have short reading assignments, but you are not required to purchase any materials.
Same as: ARTHIST 36, COMPLIT 36A, EALC 36, ENGLISH 71, ETHICSOC 36X, FRENCH 36, MUSIC 36H, PHIL 36, POLISCI 70, RELIGST 36X, SLAVIC 36

HISTORY 3E. Michelle Obama in American Culture. 1 Unit.
Never before has the United States had a First Lady like Michelle Obama. During her eight years in the White House, Michelle Obama transformed traditional meanings of womanhood, marriage, motherhood, and style and created new possibilities for what it means to be strong and what it means to be beautiful. No First Lady has ever been so scrutinized but also so beloved: from her J. Crew dresses to her Let's Move campaign, from her vegetable gardens to her chiseled arms, and from her powerful speeches to her casual and always authentic personality. This class examines the impact on American culture of the most popular First Lady in American history.
Same as: AFRICAAM 3E, AMSTUD 3E, CSRE 3E, FEMGEN 3E

HISTORY 3F. The Changing Face of War: Introduction to Military History. 3-5 Units.
Introduces students to the rich history of military affairs and, at the same time, examines the ways in which we think of change and continuity in military history. How did war evolve from ancient times, both in styles of warfare and perceptions of war? What is the nature of the relationship between war and society? Is there such a thing as a Western way of war? What role does technology play in transforming military affairs? What is a military revolution and can it be manufactured or induced? Chronologically following the evolution of warfare from Ancient Greece to present day so-called new wars, we will continuously investigate how the interdependencies between technological advances, social change, philosophical debates and economic pressures both shaped and were influenced by war. Students satisfying the WiM requirement for the major in International Relations, must enroll in INTNLREL 103F course listing.
Same as: HISTORY 103F, INTNLREL 103F

HISTORY 3G. Hamilton: An American Musical. 1 Unit.
"Hamilton" is one the most popular and most celebrated musicals in American history. It has received 11 Tony Awards, including best musical, and 16 Tony nominations, the most nominations in Broadway history. It won the Pulitzer Prize and a Grammy Award. The musical draws on the language and rhythms of hip-hop and R & B, genres that are underrepresented in the musical theater tradition. "Hamilton" has redefined the American musical, particularly in terms of sound, casting, and storytelling. What explains the deep cultural impact and acclaim for this play?n nThis interdisciplinary course examines Alexander Hamilton and his world as well as Hamilton: An American Musical through a series of lectures from faculty in History, Theater and Performance Studies, English, Music, and Writing and Rhetoric.
Same as: AFRICAAM 5I, AMSTUD 5I, CSRE 5I

HISTORY 3J. Human Trafficking: Historical, Legal, and Medical Perspectives. 1 Unit.
Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution, labor exploitation, and organ trade, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation.

HISTORY 3N. Terrorism. 4 Units.
Why do we categorize some acts of violence as terrorism? How do the practitioners of such violence legitimize their actions? What are the effects of terror on culture, society, and politics? This course explores these questions around the globe from the nineteenth century to the present. Topics include the Russian populists, Ku Klux Klan, IRA, al Qaida, state terror, and the representation of terrorism in law, journalism, literature, film, and TV.

HISTORY 3S. A Global History of the Apocalypse: Millenarian Movements in the Modern World. 5 Units.
This course will examine the rise, fall, and legacy of modern millenarian movements-- movements that claim that our corrupt world is about to be swept away, to be replaced with a particular version of paradise-- in a global perspective. Drawing on an array of sources ranging from proclamations, diaries, criminal confessions, newspaper accounts, cartoons, songs, photographs, and films, we will explore what, if anything, these movements had in common, and their connections to and influences on one another.

HISTORY 4N. A World History of Genocide. 3-5 Units.
Reviews the history of genocide from ancient times until the present. Defines genocide, both in legal and historical terms, and investigates its causes, consequences, and global dimensions. Issues of prevention, punishment, and interdiction. Main periods of concern are the ancient world, Spanish colonial conquest; early modern Asia; settler genocides in America, Australia, and Africa; the Armenian genocide and the Holocaust; genocide in communist societies; and late 20th century genocide.
Same as: JEWISHST 4N

HISTORY 5C. Human Trafficking: Historical, Legal, and Medical Perspectives. 3 Units.
(Same as History 105C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution, labor exploitation, and organ trade, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning. Required weekly 50-min. discussion section, time TBD. Students interested in service learning should consult with the instructor and will enroll in an additional course.
Same as: CSRE 5C, FEMGEN 5C, INTNLREL 5C

HISTORY 5Q. The History of Information: From Movable Type to Machine Learning. 4 Units.
Information has a history-- and it's not the one you've been told by Silicon Valley. In a series of propulsive, empirically rich, and provocative lectures and discussions, this course deep-dives into the history of information and IT, including moveable type, telegraphy, typewriting, personal computing, gaming, social media, algorithms, machine learning, Digital Humanities, and more. You will leave the course with entirely new perspectives on information, including how IT shapes-- and is shaped by-- culture, nationality, gender, ethnicity, economy, and environment.

HISTORY 5S. Comparative Partitions: Religion, Identity, and the Nation-State. 5 Units.
This course looks at demands for representation made by religious minority communities, specifically by Indian Muslim and European Jewish intellectuals, in the twentieth century. We will explore what national belonging means from the perspective of minorities against the backdrop of global discussions of anticolonialism, national self determination, and equal representation. Through primary sources, namely political tracts and speeches, oral histories, literary sources, and historical maps, we question how authors from different backgrounds constructed religious communities as nations in need of states.
Same as: FEMGEN 5S

HISTORY 6W. Community-Engaged Learning Workshop on Human Trafficking - Part I. 3 Units.
Considers purpose, practice, and ethics of service learning. Provides training for students' work in community. Examines current scope of human trafficking in Bay Area, pressing concerns, capacity and obstacles to effectively address them. Students work with community partners dedicated to confronting human trafficking and problems it entails on a daily basis. Must currently be enrolled in or have previously taken History 5C/105C (FemGen 5C/105C, HumBio 178H, IR 105C, CSRE 5C/105C). (Cardinal Course certified by the Haas Center).
Same as: FEMGEN 6W, HUMRTS 6W

HISTORY 7W. Community-Engaged Learning Workshop on Human Trafficking - Part II. 3 Units.
Prerequisite: HISTORY6W (FEMGEN 6W). Continuation of HISTORY 6W (FEMGEN 6W). Students will continue working on their projects with their community partners. Several class meetings and small group consultations throughout the quarter. (Cardinal Course certified by the Haas Center).
Same as: FEMGEN 7W, HUMRTS 7W

HISTORY 9N. How to Start Your Own Country: Sovereignty and State-Formation in Modern History. 3 Units.
What does it mean to start a country, or to acquire and possess sovereignty over a territory? This course will examine the historical evolution of fundamental concepts in our international system: state formation, statehood, and sovereignty. Each week will spotlight a case-study in which sovereignty and statehood have appeared greatly confused and hotly contested. These include: the UK-China lease for control of Hong Kong; the US Naval Station in Guantanamo Bay; the corporate state of the legendary British East India Company; and Disney World.

HISTORY 9R. Humanities Research Intensive. 2 Units.
Everyone knows that scientists do research, but how do you do research in the humanities? This five-day course, taught over spring break, will introduce you to the excitement of humanities research, while preparing you to develop an independent summer project or to work as a research assistant for a Stanford professor. Through hands-on experience with archival materials in Special Collections and the East Asia Library, you will learn how to formulate a solid research question; how to gather the evidence that will help you to answer that question; how to write up research results; how to critique the research of your fellow students; how to deliver your results in a public setting; and how to write an effective grant proposal. Students who complete this course become Humanities Research Intensive Fellows and receive post-program mentorship during spring quarter, ongoing opportunities to engage with faculty and advanced undergraduates, and eligibility to apply for additional funding to support follow-up research. Freshmen and sophomores only. All majors and undeclared students welcome. No prior research experience necessary. Enrollment limited: apply by 11/4/19 at hri-fellows.stanford.edu.
Same as: CLASSICS 9R, EALC 9R, ENGLISH 9R

HISTORY 10C. The Problem of Modern Europe. 3 Units.
(Same as HISTORY 110C. History majors and others taking 5 units, register for 110C.) From the late 18th century to the present. How Europeans responded to rapid social changes caused by political upheaval, industrialization, and modernization. How the experience and legacy of imperialism and colonialism both influenced European society and put in motion a process of globalization that continues to shape international politics today.

HISTORY 10N. Thinking About War. 3 Units.
This course examines classic approaches to war as an intellectual problem, looking at how a matter of such great physical violence and passions can be subjected to understanding and used in philosophy, political theory, and art. Questions to be examined include the definition of war, its causes, its moral value, the nature of its participants, its use in the self-definition of individuals and societies, its relation to political authority, warfare and gender, and the problem of civil war.

HISTORY 10SC. Biography in History, Fiction, and Elsewhere. 2 Units.
How biographers, novelists, critics and others have written about the rhythms of life the lives of the famous as well as the obscure - will be explored in this course. Biographical writing can be frivolous, but at its best it has the capacity to undercover so much of life's richness, complexity, and confusions. We'll study biography with the use of some of the most resonant, compelling examples of the genre. Together we'll read books about poets Sylvia Plath and Ted Hughes, Henry James Aspern Papers, the brilliant novel on biographical writing, A. S. Byatt's Possession, and Norman Mailer on Marilyn Monroe. How one chooses one topic over another; the differences and similarities between the representation of lives in fiction and biography; the benefits and pitfalls of an intense identification with one's own subjects these and other matters will be examined. We'll meet in San Francisco with local writers wrestling with issues of this sort, and students will be encouraged to try their hands at writing about lives based on research, personal observation, or both.

HISTORY 11N. The Roman Empire: Its Grandeur and Fall. 4 Units.
Preference to freshmen. Explore themes on the Roman Empire and its decline from the 1st through the 5th centuries C.E.. What was the political and military glue that held this diverse, multi-ethnic empire together? What were the bases of wealth and how was it distributed? What were the possibilities and limits of economic growth? How integrated was it in culture and religion? What were the causes and consequences of the conversion to Christianity? Why did the Empire fall in the West? How suitable is the analogy of the U.S. in the 21st century?.
Same as: CLASSICS 26N

HISTORY 11SC. How Is a Buddhist. 2 Units.
Buddhism as a system of thought, a culture, a way of life, a definition of reality, a method for investigating it, and a mental, physical, and social practice. Buddhism as a total phenomenon. Readings, films, music, and art. How Buddhist practices constitue the world of the Buddhist.

HISTORY 11W. Service-Learning Workshop on Issues of Education Equity. 1 Unit.
Introduces students to a variety of issues at stake in the public education of at-risk high school youth in California. Participants will hear from some of the leading faculty in the School of Education as well as the Departments of Psychology, Sociology, and others, who will share perspectives on the problems and challenges of educating a diverse student body in the state's public school system. The service-learning component of the workshop is a mentoring project (Stanford Students for Educational Equity) with junior class history students from East Palo Alto Academy High School, a Stanford charter school.
Same as: CSRE 11W

HISTORY 12. Medicine and Disease in the Ancient World. 3 Units.
(Same as HISTORY 112. History majors and others taking 5 units, register for 112.) This course explores medicine and disease through case studies from civilizations of the ancient world such as Egypt, Greece, and Peru. We will discuss how these cultures conceptualized disease, and in turn, how they contended with illnesses. Lectures will address different forms of illness through medical texts, art, and human remains. Weekly discussion will incorporate evidence from these sources to explore both their potential and their limitations.

HISTORY 12N. Income and wealth inequality from the Stone Age to the present. 4 Units.
Rising inequality is a defining feature of our time. How long has economic inequality existed, and when, how and why has the gap between haves and have-nots widened or narrowed over the course of history? This seminar takes a very long-term view of these questions. It is designed to help you appreciate dynamics and complexities that are often obscured by partisan controversies and short-term perspectives, and to provide solid historical background for a better understanding of a growing societal concern.
Same as: CLASSICS 12N

HISTORY 13S. Misfits of the Middle Ages: Persecution and Tolerance in Medieval Europe. 5 Units.
Medieval Europe is infamous for its persecutions. In the popular imagination, the Middle Ages were a uniquely unhappy time for Jews, heretics, lepers, witches, and countless other outsiders. But what is the truth about Europe¿s ¿Dark Ages?¿ What was it actually like to be a Jew in medieval Italy, a leper in England, a heretic in France? Who carried out the persecutions, what motivated them to violence, and did they actually succeed? How do the experiences of medieval Europe¿s outsiders still inform our own notions of tolerance, human rights, and inclusion today?.

HISTORY 15D. Europe in the Middle Ages, 300-1500. 3-5 Units.
(HISTORY 15D is 3 units; HISTORY 115D is 5 units.) This course provides an introduction to Medieval Europe from the fall of Rome to the Renaissance. While the framework of the course is chronological, we'll concentrate particularly on the structure of medieval society. Rural and urban life, kingship and papal government, wars and plagues provide the context for our examination of the lives of medieval people, what they believed, and how they interacted with other, both within Christendom and beyond it. This course may count as DLCL 123, a course requirement for the Medieval Studies Minor.
Same as: HISTORY 115D, RELIGST 115X

HISTORY 15N. Inequality: the Last 100,000 Years. 3 Units.
(Formerly CLASSHIS 13N.) This seminar traces the evolution of resource inequality from the Stone Age to the present. Only this long-term perspective reveals the forces that drive inequality and allows us to address two key questions: what causes inequality, and what factors have been capable of reducing it, at least for a while? We are going to confront challenging arguments: that inequality has been closely tied up with overall economic and human development, and that over the long course of history, war, revolution and pestilence were the most effective equalizers of income and wealth. This class will help you appreciate contexts and complexities that are usually obscured by partisan polemics and short-term thinking. Seminar participants will be directly involved in the instructor's current research project on the history of inequality.
Same as: CLASSICS 28N

HISTORY 16. Traders and Crusaders in the Medieval Mediterranean. 3-5 Units.
Trade and crusade were inextricably interconnected in the high Middle Ages. As merchant ships ferried knights and pilgrims across the Mediterranean, rulers borrowed heavily to finance their expeditions, while military expansion opened new economic opportunities. Course themes include the origins of the Crusading movement; the rise of Venice and other maritime powers; the pivotal roles of the Byzantine and Mongol Empires; relations between Christians, Muslims, and Jews; new military, maritime, and commercial technologies; and the modern legacy of the Crusades.
Same as: HISTORY 116

HISTORY 18S. Pirates, Captives, and Renegades: Encounters in the Early Modern Mediterranean World. 5 Units.
In this course, we will study how mobile subjects, such as (barbary) pirates, slaves, captives, renegades, merchants, and dragomans shaped the history of the early modern Mediterranean. By studying a range of primary sources, including official documents, chronicles, travel accounts, autobiographical texts, objects, and visual materials, we will analyze how people living on the Mediterranean's European, Asian, and African littorals experienced and influenced interactions between regional powers, such as the Italian city states, Spain, Portugal, France, Morocco, and the Ottoman Empire. In order to analyze these accounts, we will employ various historical methods and evaluate what is at stake in understanding cross-cultural/religious encounters and exchanges in the Mediterranean world during the early modern period.

HISTORY 23N. The Soviet Union and the World: View from the Hoover Archives. 3 Units.
This course seeks to explore the Soviet Union's influence on the world from 1917 to its end in 1991 from a variety of perspectives. Hoover Institution archival holdings will be the basic sources for the course.

HISTORY 23S. Sex and Socialism. 5 Units.
Among the major promises made by socialism and communism was the liberation of women from an imperialist, capitalist, and patriarchal world. How did these promises hold up in the face of the realities of revolution and state formation? This course explores the relationship between gender, sex, and sexuality within the state socialist polities of the 20th century. Topics include diversity in barricades and workplaces, motherhood and reproductive rights, medicine and sexology, incarceration and state violence, and homosexuality and gender non-conformity.

HISTORY 25. St. Petersburg: A Cultural Biography. 1 Unit.
This course explores the rich cultural heritage of St. Petersburg: art, architecture, urban planning, literature, dance, music, theater. Lectures will be extensively slide-illustrated, particularly on architecture and art. The course will meet Thursday evenings 7:00-9:00 pm as part of the Continuing Studies Program (CSP) for adult students; undergraduate students are welcome to participate by enrolling in this 1-unit History course. Readings will be posted in Coursework for CSP participants and will be available but optional for undergraduate students. Satisfactory credit for undergraduates will be earned by attending 80% of the lectures and by submitting a 5-page paper on a topic of the student's choice utilizing the CSP assigned readings and sources suggested by the instructor.

HISTORY 25N. Stalin's Europe, 1944-1948. 3 Units.
This freshman seminar explores the history of wartime and postwar Europe through the lenses of the communist parties of Europe, the anti-Soviet forces on the continent, the devastation of the civilian population, and the intentions and actions of the Soviet Union on the one hand, and the United States on the other. We will analyze issues of resistance and collaboration under the Nazis, Allied occupation, and the division of Europe. We will also consider the forcible displacement of peoples and the fate of Jewish survivors. The idea is to understand the harsh and complex realities of European life and politics in this crucial time frame spanning war and peace. One can discover the beginnings of the Cold War in this period, the first signs of the "Iron Curtain," and the origins of the European Union. Our sources for the reconstruction of European life at this crucial time include documents, memoirs, literature, film, and various collections at the Hoover Archives. In addition to analyzing written and visual materials in discussion, presentations, and short essays, you will engage in a quarter long project on one thematic or country study during this period.

HISTORY 28S. Napoleon. 5 Units.
This course examines the life and times of Napoleon Bonaparte. For twenty years, Napoleon commanded and captivated Europe, evoking fascination and fear in equal measure and profoundly shaping the course of the modern world. In this course we follow the arc of his career, from revolutionary to emperor to exile, with each week devoted to a different theme of his life and the age in which he lived. Topics include politics, warfare, revolution, colonialism, gender, popular culture, and the arts. The course has no prerequisites and all readings are in English.

HISTORY 30C. Culture and Society in Reformation England. 3 Units.
(Same as History 130C. History majors and others taking 5 units, register for 130C.) Focuses on the appeal of both Reformed and Catholic ideas in the political and cultural contexts of early modern Europe. Topics include: the Lutheran revolt; the spread of Protestant ideas; Calvin's Geneva; the English Reformation; Tridentine reform and the Jesuits; toleration and the underground churches; wars and religious violence; and the making of European confessional identities. Sources include sermons, religious polemic, autobiographies, graphic prints, poetry, and music.

HISTORY 32S. Utopian Dreams, Dystopian Nightmares: Visions of the Ideal Society in Early Modern Britain. 5 Units.
Visions of the ideal society are a mainstay in the European imagination, from Plato¿s Republic to Charles Fourier¿s phalanstère. Yet utopianism has always been maligned as idealistic, impracticable, or naïve, while its proponents accused variously of hypocrisy, totalitarianism, and abject failure. Nowhere more so has the utopian impulse been felt than in early modern Britain during the age of imperial, scientific, and industrial revolution. This course asks how British writers imagined better futures, starting with Thomas More¿s genre-defining Utopia and ending with the utopian socialists and communitarian experiments of the early nineteenth century. We will ask what utopias can tell us about the societies which imagined them, and appraise their lasting legacies in political thought, social science, and critical theory. Covering themes such as empire, capitalism, gender, enlightenment, and socialism, we will engage with a range of primary sources, including literary texts, cartographic images, political and scientific tracts, and letters, aided by secondary literature from the history of political thought, literary history, the history of science, and theory.

HISTORY 33A. Blood and Roses: The Age of the Tudors. 3 Units.
(Same as HISTORY 133A. History majors and others taking 5 units, register for 133A.) English society and state from the Wars of the Roses to the death of Elizabeth. Political, social, and cultural upheavals of the Tudor period and the changes wrought by the Reformation. The establishment of the Tudor monarchy; destruction of the Catholic church; rise of Puritanism; and 16th-century social and economic changes.

HISTORY 33B. Revolutionary England: The Stuart Age. 3 Units.
(Same as HISTORY 133B. History majors and others taking 5 units, register for 133B.) From the accession of King James I in 1603 to the death of Queen Anne in 1714: a brutal civil war, the execution of one anointed king, and the deposition of another. Topics include the causes and consequences of the English Revolution, the origins of Anglo-American democratic thought, the rise and decline of Puritanism, and the emergence of England as an economic and colonial power. (Como).

HISTORY 36N. Gay Autobiography. 4 Units.
Preference to freshmen. Gender, identity, and solidarity as represented in nine autobiographies: Isherwood, Ackerley, Duberman, Monette, Louganis, Barbin, Cammermeyer, Gingrich, and Lorde. To what degree do these writers view sexual orientation as a defining feature of their selves? Is there a difference between the way men and women view identity? What politics follow from these writers' experiences?.
Same as: FEMGEN 36N

HISTORY 37D. Germany's Wars and the World, 1848-2010. 3-5 Units.
(History 37D is 3 units; History 137D is 5 units.)This course examines a series of explosive encounters between Germans, Europe, and the world. Starting with the overlooked revolutions of 1848 and ending with the reunification of West Germany and East Germany after the Cold War, the course will explore a range of topics: capitalism, communism, imperialism, nationalism, diplomacy, antisemitism, gender, race, and the Holocaust, among others. We will also consider competing visions of Germany its borders, its members, its enemies.
Same as: HISTORY 137D

HISTORY 39. Modern Britain and the British Empire. 3 Units.
(History 39 is offered for 3 units; History 139 is offered for 5 units.) From American Independence to the latest war in Iraq. Topics include: the rise of the modern British state and economy; imperial expansion and contraction; the formation of class, gender, and national identities; mass culture and politics; the world wars; and contemporary racial politics. Focus is on questions of decline, the fortunes and contradictions of British liberalism in an era of imperialism, and the weight of the past in contemporary Britain.

HISTORY 39Q. Were They Really "Hard Times"? Mid-Victorian Social Movements and Charles Dickens. 3 Units.
"It was a town of red brick, or of brick that would have been red if the smoke and ashes had allowed it." So begins Charles Dickens description of Coketown in Hard Times. And it only seems to get more grim from there. But the world that Dickens sought to portray in the novel was a hopeful one, too. And that tension is our starting point. The intent of this class is to more closely examine mid-Victorian Britain in light of Dickens' novel, with particular focus on the rise of some of our modern social movements in the 19th century. While things like the labor movement, abolitionism, feminism, and environmentalism, are not the same now as they were then, this class will explore the argument that the 21st century is still, in some ways, working out 19th century problems and questions. At the same time, this is also a course that seeks to expand the kinds of sources we traditionally use as historians. Thus, while recognizing that literary sources are particularly complex, we will use Hard Times as a guide to our exploration to this fascinating era. We will seek both to better understand this complex, transitional time and to assess the accuracy of Dickens' depictions of socio-political life.nnThrough a combination of short response papers, creative Victorian projects (such as sending a hand-written letter to a classmate), and a final paper/project, this course will give you the opportunity to learn more about the 19th century and the value of being historically minded.nnAs a seminar based course, discussion amongst members of the class is vital. The class will be delivered online using a combination of both synchronous and asynchronous modes. All students are welcome.

HISTORY 40. World History of Science. 3 Units.
(History 40 is 3 units; History 140 is 5 units.) The earliest developments in science, the prehistoric roots of technology, the scientific revolution, and global voyaging. Theories of human origins and the oldest known tools and symbols. Achievements of the Mayans, Aztecs, and native N. Americans. Science and medicine in ancient Greece, Egypt, China, Africa, and India. Science in medieval and Renaissance Europe and the Islamic world including changing cosmologies and natural histories. Theories of scientific growth and decay; how science engages other factors such as material culture and religions.

HISTORY 40A. The Scientific Revolution. 3 Units.
(Same as History 140A. History majors and others taking 5 units, register for History 140A.) What do people know and how do they know it? What counts as scientific knowledge? In the 16th and 17th centuries, understanding the nature of knowledge engaged the attention of individuals and institutions including Copernicus, Galileo, Descartes, Newton, the early Royal Society, and less well-known contemporaries. New meanings of observing, collecting, experimenting, and philosophizing, and political, religious, and cultural ramifications in early modern Europe.

HISTORY 41N. Visible Bodies: Black Female Authors and the Politics of Publishing in Africa. 4 Units.
Where are the African female writers of the twentieth century and the present day? This Introductory Seminar addresses the critical problem of the marginalization of black female authors within established canons of modern African literature. We will explore, analyse and interrogate the reasons why, and the ways in which, women-authored bodies of work from this period continue to be lost, misplaced, forgotten, and ignored by a male-dominated and largely European/white publishing industry in the context of colonialism, apartheid and globalization. nnYou will be introduced to key twentieth-century and more contemporary female authors from Africa, some of them published but many more unpublished or out-of-print. The class will look at the challenges these female authors faced in publishing, including how they navigated a hostile publishing industry and a lack of funding and intellectual support for black writers, especially female writers. nnWe will also examine the strategies these writers used to mitigate their apparent marginality, including looking at how women self-published, how they used newspapers as publication venues, how they have increasingly turned to digital platforms, and how many sought international publishing networks outside of the African continent. As one of the primary assessments for the seminar, you will be asked to conceptualize and design an in-depth and imaginative pitch for a new publishing platform that specializes in African female authors. nnYou will also have the opportunity for in-depth engagement (both in class and in one-on-one mentor sessions) with a range of leading pioneers in the field of publishing and literature in Africa. Figures like Ainehi Edoro (founder of Brittle Paper) and Zukiswa Wanner (prize-winning author of The Madams and Men of the South), amongst others, will be guests to our Zoom classroom. One of our industry specialists will meet with you to offer detailed feedback on your proposal for your imagined publishing platform. nnYou can expect a roughly 50/50 division between synchronous and asynchronous learning, as well as plenty of opportunity to collaborate with peers in smaller settings.
Same as: AFRICAAM 140N, AFRICAST 51N, ENGLISH 54N

HISTORY 42N. The Missing Link. 4 Units.
This course explores the history of evolutionary science, focusing upon debates surrounding the evolutionary place of human beings in the natural world, by examining the history of the idea of a "missing link," an intermediate form between humans and apes. We will consider famous hoaxes such as the Piltdown Man, and films and stories such as King Kong and Planet of the Apes, as well as serious scientific work such as that of EugÃ¨ne Dubois, the paleoanthropologist and geologist who discovered Homo erectus (first called Java Man and then Pithecanthropus erectus) and first developed the notion of a missing link. We will take an interest not only in scientific aspects of missing-link theories but in their accompanying political, social and cultural implications. And we'll watch some classic monster films.

HISTORY 42S. The Circle of Life: Visions of Nature in Modern Science, Religion, Politics and Culture. 5 Units.
A new understanding of nature emerged in the 1700s that fundamentally altered our perception of the living world and humanity's relationship with it. By tracing the evolution of this understanding forward, we gain insight into the interactions among science, religion, politics and culture. Topics include: nature in Romantic science, poetry and art; Darwin's theory of evolution and its afterlife in science, literature and popular culture; the science and politics of the 20th-century environmental movement; and the philosophical presuppositions underlying modern debates about biodiversity. In addition to close readings of canonical texts and contemporary commentaries, students will be introduced to digital history methods. Students will design their own final projects in consultation with the instructor.

HISTORY 44. Sex, Gender, and Intersectional Analysis in Science, Medicine, Engineering, and Environment. 3 Units.
(HISTORY 44 is offered for 3 units; HISTORY 144 is offered for 5 units.) Explores ¿Gendered Innovations¿ or how sex, gender, and intersectional analysis in research sparks discovery and innovation. Section 1 focuses on the history of women in science. Section 2 looks at transforming research institutions. Section 3 explores Gendered Innovations. Topics include historical background, basic concepts, social robots, sustainability, medicine & public health, facial recognition, inclusive crash test dummies, and more. Stanford University is engaged in a multi-year collaboration with the European Commission and the U.S. National Science Foundation project on Gendered Innovations in Science, Health & Medicine, Engineering, and Environment, and this class will contribute that project. The operative questions is: how can sex, gender, and intersectional analysis lead to discovery and enhance social equalities?.

HISTORY 44Q. Gendered Innovations in Science, Medicine, Engineering, and Environment. 4-5 Units.
Explores ¿Gendered Innovations¿ or how sex, gender, and intersectional analysis in research sparks discovery and innovation. Section 1 focuses on the history of women in science. Section 2 looks at transforming research institutions. Section 3 explores ¿Gendered Innovations. ¿ Topics include historical background, basic concepts, social robots, sustainability, medicine & public health, facial recognition, inclusive crash test dummies, and more. Stanford University is engaged in a multi-year collaboration with the European Commission and the U.S. National Science Foundation project on Gendered Innovations in Science, Health & Medicine, Engineering, and Environment, and this class will contribute that project. This course fulfills the second level Writing and Rhetoric Requirement (WRITE 2) and emphasizes oral, multimedia presentation, and writing skills. Each student will develop a case study illustrating how sex, gender, and intersectional analysis can lead to innovation and enhance social equalities.
Same as: FEMGEN 44Q

HISTORY 45B. Africa in the 20th Century. 3 Units.
(Same as HISTORY 145B. History majors and others taking 5 units, register for 145B.) The challenges facing Africans from when the continent fell under colonial rule until independence. Case studies of colonialism and its impact on African men and women drawn from West, Central, and Southern Africa. Novels, plays, polemics, and autobiographies written by Africans.

HISTORY 45N. Power, Prestige and Politics in African Societies. 4 Units.
This seminar infuses a human dimension into the study of politics in Africa. Considering the 1800s to the present day, the seminar prompts students to creatively connect the political with the personal. We will examine how gender, intimate and romantic relationships, arguments between parents and children, attempts to access and harness the power of the sacred, and fights for status and authority of all kinds, were pivotal forces shaping the form that politics and political activism assumed on the continent.

HISTORY 47. History of South Africa. 3 Units.
(Same as HISTORY 147. History majors and others taking 5 units, register for 147.) Introduction, focusing particularly on the modern era. Topics include: precolonial African societies; European colonization; the impact of the mineral revolution; the evolution of African and Afrikaner nationalism; the rise and fall of the apartheid state; the politics of post-apartheid transformation; and the AIDS crisis.
Same as: AFRICAAM 47, CSRE 74

HISTORY 47N. Global History of Death and Dying. 4 Units.
Does death have a history? Explores the changing realities of, attitudes towards and ways of coping with death. The role of death in shaping the modern world via the global slave trades, imperial conquests, pandemics, wars and genocides. Ways people have made sense of death in extraordinary circumstances and during calmer times. Continuities and transformations in death rituals, intellectual and philosophical debates about the personal and social meanings of death, and the consequences of ways and patterns of dying.

HISTORY 47S. Black Earth Rising: Law and Society in Postcolonial Africa. 5 Units.
Is the International Criminal Court a neocolonial institution? Should African art in Western museums be returned? Why have anti-homosexuality laws emerged in many African countries? This course engages these questions, and more, to explore how Africans have grappled with the legacies of colonialism through law since independence. Reading court documents, listening to witness testimonies, analyzing legal codes, and watching cultural commentaries¿including hit TV series Black Earth Rising¿students will examine the histories of legal conflict in Africa and their implications for the present and future of African societies. This course fulfills the Social Inquiry and Engaging Diversity Ways requirements.
Same as: AFRICAST 90

HISTORY 48. The Egyptians. 3-5 Units.
This course traces the emergence and development of the distinctive cultural world of the ancient Egyptians over nearly 4,000 years. Through archaeological and textual evidence, we will investigate the social structures, religious beliefs, and expressive traditions that framed life and death in this extraordinary region. Students with or without prior background are equally encouraged.
Same as: AFRICAAM 30, CLASSICS 82, HISTORY 148

HISTORY 48Q. South Africa: Contested Transitions. 4 Units.
Preference to sophomores. The inauguration of Nelson Mandela as president in May 1994 marked the end of an era and a way of life for South Africa. The changes have been dramatic, yet the legacies of racism and inequality persist. Focus: overlapping and sharply contested transitions. Who advocates and opposes change? Why? What are their historical and social roots and strategies? How do people reconstruct their society? Historical and current sources, including films, novels, and the Internet.
Same as: AFRICAAM 48Q

HISTORY 49S. African Futures: Nationalism, Pan-Africanism, and Beyond. 5 Units.
This course examines decolonization and its aftermath in sub-Saharan Africa. With a "wind of change" sweeping the continent, how did Africans imagine their futures together? From W.E.B. Du Bois to Black Panther, this course will engage in historical readings of political essays, speeches, film, and literature to consider how Africans envisioned their communities beyond empire. Topics will include a variety of projects for African unity, from experiments with Pan-Africanism, to religious revivalism, to Afrofuturist art and aesthetics.
Same as: AFRICAAM 49S

HISTORY 50A. Colonial and Revolutionary America. 3 Units.
(Same as HISTORY 150A. History majors and others taking 5 units, register for 150A.) Survey of the origins of American society and polity in the 17th and 18th centuries. Topics: the migration of Europeans and Africans and the impact on native populations; the emergence of racial slavery and of regional, provincial, Protestant cultures; and the political origins and constitutional consequences of the American Revolution.

HISTORY 50B. Nineteenth Century America. 3 Units.
(Same as HISTORY 150B. History majors and others taking 5 units, register in 150B.) Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture.
Same as: AFRICAAM 50B, CSRE 50S

HISTORY 50C. The United States in the Twentieth Century. 3 Units.
(Same as HISTORY 150C. History majors and others taking 5 units, register for 150C.) 100 years ago, women and most African-Americans couldn't vote; automobiles were rare and computers didn't exist; and the U.S. was a minor power in a world dominated by European empires. This course surveys politics, culture, and social movements to answer the question: How did we get from there to here? Two historical research "labs" or archival sessions focus on the Great Depression in the 1930s and radical and conservative students movements of the 1960s. Suitable for non-majors and majors alike.
Same as: AFRICAAM 50C

HISTORY 50K. John F. Kennedy: Fifty Years Later. 1 Unit.
November 22, 2013 marks the 50th anniversary of President John F. Kennedy's assassination. Half a century on, our visually saturated culture remains besotted with images of the youthful president and his strikingly photogenic family. But the passage of time has also yielded new perspectives on Kennedy's presidency and on his era. November 22, 1963 may well come to be remembered not only as the day when the life of a promising young leader was violently cut short, but also as the pivot between two distinct eras in American history. Ironically, though Kennedy was the first World War II veteran to reach the White House, his death heralded the end of the long postwar season of national pride, optimism, confidence, and widely shared prosperity¿and may have opened the road to the great catastrophe that was the Vietnam War. His passing also helped to pry open the portals to historic changes in the lives of millions of African Americans, as witnessed by Lyndon Johnson's artful invocation of the fallen president to bring about passage of the epic civil rights legislation of the late 1960s. nnThis course will examine the postwar domestic and international settings in which Kennedy rose to and exercised power. It will probe our continuing fascination with his character and with his family; his role as a Cold Warrior, especially in the tense confrontation known as the Cuban Missile Crisis; and his relation to the African American struggle to bury Jim Crow. We will conclude with an assessment of the longer-term historical consequence of his brief moment in the arenas of celebrity and power. Guest speakers will include noted Kennedy biographer Robert Dallek; Johnson biographer Bruce Schulman; Taylor Branch, acclaimed biographer of Martin Luther King, Jr.; and Stanford's own Jennifer Burns, historian of modern America.

HISTORY 51B. The End of American Slavery, 1776-1865. 3-5 Units.
How did the institution of American slavery come to an end? The story is more complex than most people know. This course examines the rival forces that fostered slavery's simultaneous contraction in the North and expansion in the South between 1776 and 1861. It also illuminates, in detail, the final tortuous path to abolition during the Civil War. Throughout, the course introduces a diverse collection of historical figures, including seemingly paradoxical ones, such as slaveholding southerners who professed opposition to slavery and non-slaveholding northerners who acted in ways that preserved it. Historical attitudes toward race are a central integrative theme.
Same as: HISTORY 151B

HISTORY 51Q. American Greed: From Gold Rush to Silicon Valley. 3 Units.
For centuries greed reigned as one of the seven deadly sins, but in the nineteenth century, it went through a major transformation. This course will attempt to solve to puzzle of how greed became an acceptable and desirable component of the American Dream by the end of the Gilded Age. While studies on greed have tended to look to human evolutionary biology or the writings of political economists for answers, this course will turn to specific historical events and trends in the American context in order to trace how ordinary Americans have understood the place and meaning of greed in their lives over the past two centuries. Starting with the Gold Rush, an event that revealed a darker side to the values and ideals of a young nation, we will explore how dreams of El Dorado began a process that saw Americans questioning how the acquisition of wealth fit into their beliefs about what it meant to be an American. We will follow this question as it moved through debates over slavery, the conquest of Native lands, the women's movement, the labor movement, liberalism, monopoly, and the rise of corporations.nnIn the final part of the course, we will jump ahead to the present to look at modern parallels to the Gilded Age. Many of today's conditions, from high income inequality and political disunity to new technologies, appear strikingly similar. Furthermore, the landmark decision in Citizens United and the 2008 bank bailout seem to indicate a nation and culture fully in the grasp of greed, not unlike the earlier period in which the sin first became a virtue. At the same time, however, we see challenges and alternatives presented that call back to earlier ideals. You will work throughout the quarter on a research-based project on a topic of interest to you that connects the present to the past.

HISTORY 52Q. Democracy in Crisis: Learning from the Past. 3 Units.
This Sophomore Seminar will focus on U.S. democracy and will use a series of case studies of major events in our national history to explore what happened and why to American democracy at key pressure points. This historical exploration should shed light on how the current challenges facing American democracy might best be handled. (Cardinal Course certified by the Haas Center).
Same as: EDUC 122Q, POLISCI 20Q

HISTORY 54Q. African American Women's Lives. 3-4 Units.
Preference to sophomores. African American women have been placed on the periphery of many historical documents. This course will encourage students to think critically about historical sources and to use creative and rigorous historical methods to recover African American women¿s experiences. Drawing largely on primary sources such as letters, personal journals, literature and film, this course explores the everyday lives of African American women in 19th- and 20th-century America. We will begin in our present moment with a discussion of Michelle Obama and then we will look back on the lives and times of a wide range of African American women including: Charlotte Forten Grimké, a 19th-century reformer and teacher; Nella Larsen, a Harlem Renaissance novelist; Josephine Baker, the expatriate entertainer and singer; and Ida B. Wells and Ella Baker, two luminaries of civil rights activism. We will examine the struggles of African American women to define their own lives and improve the social, economic, political and cultural conditions of black communities. Topics will include women¿s enslavement and freedom, kinship and family relations, institution and community building, violence, labor and leisure, changing gender roles, consumer and beauty culture, social activism, and the politics of sexuality.
Same as: AFRICAAM 54Q, AMSTUD 54Q, FEMGEN 54Q

HISTORY 54S. The American Civil War. 5 Units.
Few events in American history match the significance of the Civil War, a conflict that freed 4 million people held in bondage and left 750,000 men dead. This course will explore the war from a range of perspectives, including those of Union and Confederate soldiers, African Americans, women, and Native Americans. Based on the documents these different groups left behind, as well as the histories they inspired, we will seek to understand how the Civil War was experienced and commemorated. Priority given to history majors and minors.

HISTORY 55F. The Civil War and Reconstruction Era, 1830 to 1877. 3-5 Units.
(History 55F is 3 units; History 155F is 5 units.)This course explores the causes, course, and consequences of the American Civil War. The Civil War profoundly impacted American life at national, sectional, and constitutional levels, and radically challenged categories of race and citizenship. Topics covered include: the crisis of union and disunion in an expanding republic; slavery, race, and emancipation as national problems and personal experiences; the horrors of total war for individuals and society; and the challenges--social and political--of Reconstruction.
Same as: AFRICAAM 55F, AMSTUD 55F, AMSTUD 155F, HISTORY 155F

HISTORY 57E. State of the Union 2014. 1 Unit.
This course will examine major themes that contribute to the health, or disease, of the US body politic. Challenges and opportunities abound: we live in an age of rising inequality, dazzling technological innovation, economic volatility, geopolitical uncertainty, and the accumulating impact of climate change. These conditions confront our political leaders and us as citizens of a democracy plagued by dysfunction. What are the implications for the body politic? Led by Rob Reich (Political Science, Stanford), David Kennedy (History, Stanford), and James Steyer (CEO, Common Sense Media), the course will bring together distinguished analysts of American politics. Together, we will examine the following topics: inequality; energy and the environment; media and technology; the economy; and the 2014 midterm elections. The course is designed for the entire Stanford community: jointly offered for undergraduate and graduate students at Stanford (through listings in Political Science and History) and for community members through the Continuing Studies Program. For students, the course is available for 1 credit. This course may not be taken for a Letter Grade.
Same as: POLISCI 57E

HISTORY 58Q. American Landscapes of Segregation. 3-4 Units.
This course examines various landscapes of segregation in U.S. history from 19th century reconstruction and settler expansion through the contemporary U.S. security state. Each week we consider different histories of segregation including native reservation and boarding school stories, Jim Crow and post-World War II urban/suburban segregation, school integration and bussing, and the rise of the carceral state. We will ask: How have Americans moved through space with different degrees of freedom and constraint over time, and how has that shaped what it has meant to be an American in different ways for different groups? How has access to land, property, consumer, recreational and educational spaces and resources been regulated by categories of race, gender, sexuality, colonial subjectivity, immigrant status and class? To gain a better sense of our local history, we will also consider how structures of segregation have historically mapped the Bay Area. Sources include primary and secondary historic texts, feature and documentary films, photography, and poetry.
Same as: AFRICAAM 58Q, AMSTUD 58Q

HISTORY 60N. Revolutionaries and Founders. 3 Units.
Americans remain fascinated by the revolutionary generation which secured independence and established a national constitutional republic. Books about the founders come steadily from the presses, some describing the lives of individual revolutionaries, others trying to analyze and explain what made these events possible. This seminar will approach the Revolution through both a biographical and analytical framework, relying both on scholarly writings and the massive array of primary sources that are readily available through letterpress editions and on-line. The course will rely on the instructor's own recent book, Revolutionaries: A New History of the Invention of America, which carries the story from the crisis around the Boston Tea Party of 1773 through the end of President Washington's first administration. The course will be divided evenly between modern scholarship and the careful reading of original materials, and students will write short essays that will involve the analysis of explanatory problems, the close interpretation of documents, and the crafting of historical narratives. Topics to be discussed will include the outbreak of the revolution, constitution-making at both the state and national levels of government, the conduct of the war, and the legacies that Americans particularly associate with Thomas Jefferson, James Madison, and Alexander Hamilton.

HISTORY 61. The Politics of Sex: Work, Family, and Citizenship in Modern American Women's History. 3-5 Units.
This course explores the transition from Victorian to modern American womanhood by asking how Native, European, African, Mexican, and Asian American women navigated the changing sexual, economic, and political landscapes of the twentieth century. Through secondary readings, primary sources, films, music, and literature we explore the opportunities and boundaries on groups of women in the context of historical events that included immigration, urbanization, wartime, depression, the Cold War, as well as recurrent feminist and conservative political movements.
Same as: AMSTUD 161, CSRE 162, FEMGEN 161, HISTORY 161

HISTORY 62S. From Runaway Wives to Dancing Girls: Urban Women in the Long Nineteenth Century. 5 Units.
This course explores the ways in which women - white and black, immigrant and native born, free and enslaved - lived and labored in American cities during the long nineteenth century. Together we will examine a variety of primary sources including diaries, municipal and institutional records, newspapers, memoirs, oral histories, and visual culture. We will also consider whose stories are told and explore how historians make sense of times very different from our own. Priority given to History majors and minors.
Same as: FEMGEN 62S

HISTORY 63N. The Feminist Critique: The History and Politics of Gender Equality. 3-4 Units.
This course explores the long history of ideas about gender and equality. Each week we read, dissect, compare, and critique a set of primary historical documents (political and literary) from around the world, moving from the 15th century to the present. We tease out changing arguments about education, the body, sexuality, violence, labor, politics, and the very meaning of gender, and we place feminist critics within national and global political contexts.
Same as: AMSTUD 63N, CSRE 63N, FEMGEN 63N

HISTORY 64S. The Religious Right and Its Critics in America from 1920 to Today. 5 Units.
In 2016, Donald Trump won 81% of white evangelical voters. Evangelical and conservative Catholic voters, members of the so-called Religious Right, have formed an essential pillar of the Republican Party for the entire lifetime of most Stanford undergraduates. But this was not always the case. In this course, we will discover leaders who shaped the Religious Right through coalition building, ideological line-drawing, and sermonizing as well as those who offered political alternatives of the Irreligious Right and ever-elusive Religious Left.

HISTORY 67S. The Vietnam War/The American War. 5 Units.
This course explores the conflict called "the Vietnam War" in the United States and "the American War" in Vietnam - one of the longest and most violent wars of the twentieth century - from the perspectives of those who experienced it. Engaging diverse primary sources from Vietnam, the U.S., and beyond, the course traces the conflict's global roots and consequences as well as challenges of interpreting war generally. Students have the option of a final paper or an oral history.

HISTORY 68D. American Prophet: The Inner Life and Global Vision of Martin Luther King, Jr.. 3-5 Units.
Martin Luther King, Jr., was the 20th-century's best-known African-American leader, but the religious roots of his charismatic leadership are far less widely known. The documents assembled and published by Stanford's King Research and Education Institute provide the source materials for this exploration of King's swift rise to international prominence as an articulate advocate of global peace and justice.
Same as: AFRICAAM 68D, AMSTUD 168D, CSRE 68, HISTORY 168D

HISTORY 69Q. American Road Trips. 4 Units.
"Nothing behind me, everything ahead of me, as is ever so on the road." --Jack Kerouac, On the Road, 1957. From Jack Kerouac's On the Road to Cheryl Strayed's Wild, this course explores epic road trips of the twentieth century. Travel is a fundamental social and cultural practice through which Americans have constructed ideas about the self, the nation, the past, and the future. The open road, as it is often called, offered excitement, great adventure, and the space for family bonding and memory making. But the footloose and fancy-free nature of travel that Jack Kerouac celebrated was available to some travelers but not to all. Engaging historical and literary texts, film, autobiography, memoir, photography, and music, we will consider the ways that travel and road trips have been represented in American culture. This course examines the following questions: How did men and women experience travel differently? How did the motivations for travel change over time? What role did race, ethnicity, class, relationships, and sexuality play in these trips? Students will work together to plan a road trip of their own which the class will take during the quarter.
Same as: AMSTUD 109Q

HISTORY 70S. The Mexican-American War. 5 Units.
Frequently overshadowed by the Louisiana Purchase and the Civil War, the Mexican-American War was central to antebellum conflicts over territorial expansion, the expansion of slavery, and debates about race, ethnicity, and citizenship. This course examines the long and deep history of the war by situating it within its colonial, national, and borderlands contexts. The course will draw on methods from a range of historical subfields including, diplomatic, political, social, cultural, and spatial history. Priority given to History majors and minors.

HISTORY 71S. American Political Thought from the Civil War to the Cold War. 5 Units.
This course explores America's most important political tradition: liberalism. What does liberalism mean? Does it mean something different today than it did in the past? Using multiple textual and visual sources, students will grapple with how Americans remade liberalism in the 19th and 20th centuries and how political thinkers have understood its meaning over time. We will see how American liberalism was shaped by factors of race, gender, and class and by competing ideologies like conservatism and socialism.

HISTORY 73. Mexican Migration to the United States. 3-5 Units.
(History 73 is 3 units; History 173 is 5 units.) This course is an introduction to the history of Mexican migration to the United States. Barraged with anti-immigrant rhetoric and calls for bigger walls and more restrictive laws, few people in the United States truly understand the historical trends that shape migratory processes, or the multifaceted role played by both US officials and employers in encouraging Mexicans to migrate north. Moreover, few have actually heard the voices and perspectives of migrants themselves. This course seeks to provide students with the opportunity to place migrants' experiences in dialogue with migratory laws as well as the knowledge to embed current understandings of Latin American migration in their meaningful historical context.
Same as: AMSTUD 73, CHILATST 173, HISTORY 173

HISTORY 73S. History of the Police in the United States: Slave Patrols to Ferguson. 5 Units.
How did police come to have the power to use violence? Themes: growth of professional policing, creation of private police forces and vigilantism, and public portrayals of police--by Hollywood and the press. The historical relationship between race and the administration of policing is a central question. Students will hone the methodology necessary to examine primary sources such as police memoirs, court records, police files, detective novels, music videos and photographs. The course fulfills the departmental Sources and Methods requirement. Priority given to history majors and minors.

HISTORY 74. Mexico Since 1876: The Road to Ayotzinapa. 3 Units.
(History 74 is for 3 units; History 174 is for 5 units.) In September of 2014, 43 students from a Mexican teacher's college in Ayotzinapa, Guerrero were abducted and disappeared via the actions of police and organized crime. This shocking human rights violation, as well as the violence and impunity it represented, were symbolic of the decline of the rule of law embodied by Mexico's drug war. How did the nation arrive at this crossroads? This course is an introduction to the history of Mexico from 1876 to the present. Through lectures, discussions, primary and secondary sources, film and documentaries, and written assignments, students will critically explore the events and people that shaped Mexico for over a century. From the Porfirian dictatorship, to the Revolution, to the PRI's "perfect dictatorship," this course analyzes socioeconomic and racial inequality, foreign intervention, urbanization and industrialization, technological innovation and environmental degradation, education and ideology, modernity and migration, culture and media, and the drug trade.

HISTORY 74S. Sounds of the Century: Popular Music and the United States in the 20th Century. 5 Units.
What can popular music teach us about the pst? What can we learn about music if we study it historically? This course grapples with these two questions by examining various examples of American music in the 20th century, as well as more conventional historical sources, scholarly books, and essays. Will pay special attention to how issues of race, gender, sexuality, class, and nation were reflected in and produced by people's interactions with music, inside and outside American borders.

HISTORY 78. Film and History of Latin American Revolutions and Counterrevolutions. 3-5 Units.
Note: Students who have completed HISTORY 78N or 78Q should not enroll in this course. In this course we will watch and critique films made about Latin America's 20th century revolutions focusing on the Cuban, Chilean and Mexican revolutions. We will analyze the films as both social and political commentaries and as aesthetic and cultural works, alongside archivally-based histories of these revolutions.
Same as: FILMSTUD 178, HISTORY 178, ILAC 178

HISTORY 78Q. Film and History of Latin American Revolutions and Counterrevolutions. 3 Units.
In this course we will watch and critique films made about Latin America's 20th century revolutions focusing on the Mexican, Cuban, Chilean and Nicaraguan revolutions. We will analyze the films as both social and political commentaries and as aesthetic and cultural works, alongside archivally-based histories of these revolutions.

HISTORY 79C. The Ethical Challenges of the Climate Catastrophe. 3-5 Units.
(History 79C is 3 units; History 179C is 5 units.) This course explores the ethical challenges of the climate catastrophe from historical, social, economic, political, cultural and scientific perspectives. These include the discovery of global warming over two centuries, the rise of secular and religious denialism and skepticism toward the scientific consensus on it, the dispute between developed and developing countries over how to forge a binding global agreement to mitigate it, and the "role morality" of various actors (scientists, politicians, fossil fuel companies, the media and ordinary individuals) in the US in assessing ethical responsibility for the catastrophe and how to mitigate, adapt, or even geoengineer, it.
Same as: HISTORY 179C

HISTORY 81B. Formation of the Contemporary Middle East. 3 Units.
(Same as HISTORY 181B. 81B is 3 units; 181B is 5 units) This course introduces major themes in the modern history of the region linking the Mediterranean and Indian Ocean worlds. We will begin with the Eurasian context that produced the Safavid and Ottoman dynastic empires and quickly move to the economic and political transformations of the nineteenth century and the imperial dissolution of the early twentieth. Twentieth-century themes will include mass migrations and colonial occupation; nationalism, mass politics and revolution; socialist and Islamist movements; and the growing role of American policy in the region. The course will conclude with a close examination of the profound transformations of the past decade, from the multiform revolutions of the ¿Arab Spring¿ to the equally multiform attempts to repress them.

HISTORY 82G. Making Palestine Visible. 3-5 Units.
Israel-Palestine is one of the most difficult subjects to talk about, in large part because we in the United States do not have much exposure to Palestinian history, culture, and politics in their own terms. This course aims to humanize Palestinians and asks why Palestinian claims to rights are illegible for much of the American public. We begin to answer this question by examining a broad sampling of history, structures of power and law, culture, and contemporary political issues.
Same as: CSRE 82G, HISTORY 182G

HISTORY 82S. Enemies Within: Hostile Minorities in Israel and Iraq in the 20th Century. 5 Units.
This course explores the nation state in the Middle East through the perspectives of minority groups in Israel and Iraq. The class examines the origins of these two states since WWI, and considers the integral role that minority groups have played in their formation. Using an array of primary sources and methods of analysis, we will examine significant political, economic, social, and discursive trends in these states, while keeping in mind the broader regional and global contexts.

HISTORY 83S. Refugees of Palestine and Syria: History, Identity, and Politics of Exile in the Middle East. 5 Units.
Mass displacements of Palestinians (1948, 1967) and Syrians (2011-) remain crucial to our understanding of history and politics of the modern Middle East. The course topics include the media's role in alleviating or worsening refugee crises, the Palestinian "right of return," and the place of religion in the Syrian civil war. By looking at autobiographies, graffiti, revolutionary posters, and music, we will study the construction of refugee identities, through the prism of race, ethnicity, statelessness, gender, and sexual orientation. Priority given to history majors and minors.

HISTORY 85B. Jews in the Contemporary World: The American Jewish Present & Past in Popular Culture, Film, & TV. 3 Units.
(HISTORY 85B is 3 units; HISTORY 185B is 5 units.) Who are American Jews as depicted in popular media-- film, television, etc.-- since the Second World War? How are their religion, politics, mores, and practices represented and what ways, if at all, do such portraits reflect historical trends among Jews and society in general? What can be learned from film or tv about Jewish identity, notions of Jewish power and powerlessness, communal cohesiveness and assimilation, sexuality and the wages of intermarriage or race?.
Same as: CSRE 85B, JEWISHST 85B, REES 85B

HISTORY 86Q. Blood and Money: The Origins of Antisemitism. 4-5 Units.
For over two millennia, Jews and Judaism have been the object of sustained anxieties, fears, and fantasies, which have in turn underpinned repeated outbreaks of violence and persecution. This course will explore the development and impact of antisemitism from Late Antiquity to the Enlightenment, including the emergence of the Blood libel, the association between Jews and moneylending, and the place of Judaism in Christian and Islamic theology. No prior background in history or Jewish studies is necessary. Prerequisite: PWR 1.
Same as: JEWISHST 86Q

HISTORY 87. The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan. 3 Units.
(Same as HISTORY 187. History majors and other taking 5 units, register for 187.) Explores the contested politics of these societies in modern times. Topics include controversies surrounding the meaning of revolution, state building, war, geopolitics, Islamic law, clerical authority, gender, an Islamic economy, culture, and ethnic, national and religious identities from the 1940s to the present. Assignments will focus on primary sources (especially legal documents, poetry, novels, and memoirs) and films.

HISTORY 89S. Chinese Diaspora and the Making of the Pacific World, 1750-1911. 5 Units.
What do the city of Singapore, ICE, the abolition of the slave trade, and the latex condom have in common? All are entangled with the merchant princes, people-smugglers, indentured laborers, and rubber planters that made up the Chinese diaspora in the ¿long¿ 19th century. This course will introduce the primary sources and interpretive techniques that historians use to understand the Chinese diasporic past by focusing on four main themes: autonomy and assimilation, indenture and forced labor, race and immigration, and intellectual and material exchanges.

HISTORY 90. Early Chinese Thought. 3-5 Units.
This lecture course examines the emergence of critical thought in early China. After a brief study of the social and political changes that made this emergence possible, it looks at the nature and roles of the thinkers, and finally their ideas about the social order, the state, war and the army, the family, the cosmos, and the self (both physical and mental). Some brief comparisons with early Greek thought.
Same as: HISTORY 190

HISTORY 91B. The City in Imperial China. 3 Units.
The evolution of cities in the early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative cases from European history. Readings include primary and secondary sources, and visual materials.

HISTORY 91D. China: The Northern and Southern Dynasties. 3 Units.
(Same as HISTORY 191D. History majors and others taking 5 units, register for 191D.) Examines one of the most dynamic periods of Chinese history with the emergence of the institutional religions (Buddhism and Daoism), the development of the garden as an art form, the rise of landscape as a theme of verse and art, the invention of lyric poetry, and the real beginnings of the southward spread of Chinese civilization.

HISTORY 91S. Before Footbinding: Women, Gender, and Sexuality in Early and Medieval China. 5 Units.
This course discusses women, gender, and sexuality from ancient China to the Tang Dynasty (618-907 AD). During this period, gender norms and practices changed with the political system, state ideology, and family structure, as well as religions and literary genres. Using diverse approaches and sources, we will explore topics including family and marriage, women and political power, gender and law, gender and medical care, gender and arts, the construction of femininity and masculinity, and same-sex relations.

HISTORY 92A. The Historical Roots of Modern East Asia. 4-5 Units.
Focus is on China and Japan before and during their transition to modernity. The populous, urbanized, economically advanced, and culturally sophisticated Ming empire and Muromachi shogunate in the 16th century when Europeans first arrived. How the status quo had turned on its head by the early 20th century when European and American steamships dominated the Pacific, China was in social and political upheaval, and Japan had begun its march to empire.
Same as: HISTORY 392E

HISTORY 94B. Japan in the Age of the Samurai. 3 Units.
(Same as HISTORY 194B. History majors and others taking 5 units, register for 194B.) From the Warring States Period to the Meiji Restoration. Topics include the three great unifiers, Tokugawa hegemony, the samurai class, Neoconfucian ideologies, suppression of Christianity, structures of social and economic control, frontiers, the other and otherness, castle-town culture, peasant rebellion, black marketing, print culture, the floating world, National Studies, food culture, samurai activism, black ships, unequal treaties, anti-foreign terrorism, restorationism, millenarianism, modernization as westernization, Japan as imagined community.

HISTORY 95. Modern Korean History. 3 Units.
(Same as HISTORY 195. History majors and others taking 5 units, register for 195.) This lecture course provides a general introduction to the history of modern Korea. Themes include the characteristics of the Chosôn dynasty, reforms and rebellions in the nineteenth century, Korean nationalism; Japan's colonial rule and Korean identities; decolonization and the Korean War; and the different state-building processes in North and South, South Korea's democratization in 1980s, and the current North Korean crisis.

HISTORY 95N. Maps in the Modern World. 4-5 Units.
Preference to freshmen. Focus is on cutting-edge research. Topics: the challenge of grasping the globe as a whole; geography's roots in empire; maps as propaganda and as commodities; the cultural production of scale; and the cartography of imaginery worlds.Sources include resources in the Green Library Special Collections and in the Stanford Spatial History Lab.

HISTORY 96S. The World the Mongols Made: Nomads, Empire, Legacy. 5 Units.
The Mongols created global history. Their enterprise was the largest land-based empire in world history, and it lasted longer than most of the competition. This course will examine the world that the Mongols left behind, a world whose ways the Mongols affected and still continue to affect. In particular we will look first at the Mongol Empire in its entirety and its interactions with the Christian, Muslim, and the Chinese worlds. We will then examine the legacies left by the Mongols in the aftermath of its fracture and reorganization to form various successors.

HISTORY 97. Southeast Asia: From Antiquity to the Modern Era. 3-5 Units.
The history of S.E. Asia, comprising Indonesia, the Philippines, Malaysia, Singapore, Thailand, Vietnam, Burma, Cambodia, and Laos, from antiquity to the present. The spread of Indian cultural influences, the rise of indigenous states, and the emergence of globally linked trade networks. European colonization, economic transformation, the rise of nationalism, the development of the modern state, and the impact of globalization.
Same as: HISTORY 197

HISTORY 98. The History of Modern China. 3 Units.
(Same as HISTORY 198. History majors and others taking 5 units, register for 198.) This course charts major historical transformations in modern China, and will be of interest to those concerned with Chinese politics, culture, society, ethnicity, economy, gender, international relations, and the future of the world.

HISTORY 98N. Beijing, Shanghai, and the Structure of Modern China. 3 Units.
This course examines the transformation of China from the late empire to the present by studying the nature of its two greatest cities. Topics examined will include the evolving physical structure of the cities, their changing relations to the Chinese state and the outside world, shifting understandings of the urban population/crowd, the changing nature of time, new modes of self-definition through patterns of consumption, the cities as topics of literature and movies, and the nature of urban modernity.

HISTORY 98S. Crime and Punishment in Late Imperial China: Law, State Formation, and Society. 5 Units.
How did crime and punishment in late imperial China compare to other parts of the world? What place did the law have in the imperial Chinese state's strategies of governance and in resolving social grievances? How did certain groups and behaviors come to be criminalized, and how did this relate to broader contexts of pre-modern Chinese society? How was Chinese law perceived by foreign observers? Over the course of the quarter, we will utilize a wide range of both Qing legal documents and other types of primary sources to search for answers to these questions.

HISTORY 101. The Greeks. 4-5 Units.
250 years ago, for almost the first time in history, a few societies rejected kings who claimed to know what the gods wanted and began moving toward democracy. Only once before had this happened--in ancient Greece. This course asks how the Greeks did this, and what they can teach us today. It uses texts and archaeology to trace the material and military sides of the story as well as cultural developments, and looks at Greek slavery and misogyny as well as their achievements. Weekly participation in a discussion section is required.
Same as: CLASSICS 83

HISTORY 102. History of the International System since 1914. 5 Units.
After defining the characteristics of the international system at the beginning of the twentieth century, this course reviews the primary developments in its functioning in the century that followed. Topics include the major wars and peace settlements; the emergence of Nazism and Communism; the Cold War; decolonization; and globalization. The role of international institutions and international society will also be a focus as will the challenges of climate change, inequality, migration, and terrorism.
Same as: INTNLREL 102

HISTORY 102A. The Romans. 3-5 Units.
How did a tiny village create a huge empire and shape the world, and why did it fail? Roman history, imperialism, politics, social life, economic growth, and religious change. Weekly participation in a discussion section is required; enroll in sections on Coursework.
Same as: CLASSICS 84

HISTORY 103D. Human Society and Environmental Change. 4 Units.
Interdisciplinary approaches to understanding human-environment interactions with a focus on economics, policy, culture, history, and the role of the state. Prerequisite: ECON 1.
Same as: EARTHSYS 112, EARTHSYS 212, ESS 112

HISTORY 103F. The Changing Face of War: Introduction to Military History. 3-5 Units.
Introduces students to the rich history of military affairs and, at the same time, examines the ways in which we think of change and continuity in military history. How did war evolve from ancient times, both in styles of warfare and perceptions of war? What is the nature of the relationship between war and society? Is there such a thing as a Western way of war? What role does technology play in transforming military affairs? What is a military revolution and can it be manufactured or induced? Chronologically following the evolution of warfare from Ancient Greece to present day so-called new wars, we will continuously investigate how the interdependencies between technological advances, social change, philosophical debates and economic pressures both shaped and were influenced by war. Students satisfying the WiM requirement for the major in International Relations, must enroll in INTNLREL 103F course listing.
Same as: HISTORY 3F, INTNLREL 103F

HISTORY 105C. Human Trafficking: Historical, Legal, and Medical Perspectives. 5 Units.
(Same as HISTORY 5C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution, labor exploitation, and organ trade, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning. Required weekly 50-min. discussion section, time TBD. Students interested in service learning should consult with the instructor and will enroll in an additional course.
Same as: CSRE 105C, FEMGEN 105C, HUMRTS 112, INTNLREL 105C

HISTORY 106A. Global Human Geography: Asia and Africa. 5 Units.
Global patterns of demography, economic and social development, geopolitics, and cultural differentiation, covering E. Asia, S. Asia, S.E. Asia, Central Asia, N. Africa, and sub-Saharan Africa. Use of maps to depict geographical patterns and processes.

HISTORY 106B. Global Human Geography: Europe and Americas. 5 Units.
Patterns of demography, economic and social development, geopolitics, and cultural differentiation. Use of maps to depict geographical patterns and processes.

HISTORY 107. Introduction to Urban Studies. 4 Units.
Today, for the first time in history, a majority of people live in cities. By 2050, cities will hold two-thirds of the world¿s population. This transformation touches everyone, and raises critical questions. What draws people to live in cities? How will urban growth affect the world¿s environment? Why are cities so divided by race and by class, and what can be done about it? How do cities change who we are, and how can we change cities? In this class, you will learn to see cities in new ways, from the smallest everyday interactions on a city sidewalk to the largest patterns of global migration and trade. We will use specific examples from cities around the world to illustrate the concepts that we learn in class. The course is intended primarily for freshmen and sophomores.
Same as: URBANST 110

HISTORY 110C. The Problem of Modern Europe. 5 Units.
(Same as HISTORY 10C. History majors and others taking 5 units, register for 110C.) From the late 18th century to the present. How Europeans responded to rapid social changes caused by political upheaval, industrialization, and modernization. How the experience and legacy of imperialism and colonialism both influenced European society and put in motion a process of globalization that continues to shape international politics today.

HISTORY 112. Medicine and Disease in the Ancient World. 5 Units.
(Same as HISTORY 12. History majors and others taking 5 units, register for HISTORY 112.) This course explores medicine and disease through case studies from civilizations of the ancient world such as Egypt, Greece, and Peru. We will discuss how these cultures conceptualized disease, and in turn, how they contended with illnesses. Lectures will address different forms of illness through medical texts, art, and human remains. Weekly discussion will incorporate evidence from these sources to explore both their potential and their limitations.

HISTORY 113. Before Globalization: Understanding Premodern World History. 3-5 Units.
(Formerly CLASSHIS 147.) This course covers the history of the world from 60,000 years ago until 1500 by asking big questions: Why did civilizations develop the way they did? What factors were responsible for similarities and differences between different parts of the world? What does this mean for our newly globalized world?.

HISTORY 114. Origins of History in Greece and Rome. 4-5 Units.
What¿s the history of `History¿? The first ancient historians wrote about commoners and kings, conquest and power¿those who had it, those who wanted it, those without it. Their powerful ways of recounting the past still resonate today and can be harnessed to tell new stories. We will look at how ancients like Herodotus, Thucydides, Tacitus, and Livy turned stories about the past into compelling narratives of loss, growth and decline¿inventing ¿History¿ as we know it. All readings in English.
Same as: CLASSICS 88

HISTORY 115D. Europe in the Middle Ages, 300-1500. 3-5 Units.
(HISTORY 15D is 3 units; HISTORY 115D is 5 units.) This course provides an introduction to Medieval Europe from the fall of Rome to the Renaissance. While the framework of the course is chronological, we'll concentrate particularly on the structure of medieval society. Rural and urban life, kingship and papal government, wars and plagues provide the context for our examination of the lives of medieval people, what they believed, and how they interacted with other, both within Christendom and beyond it. This course may count as DLCL 123, a course requirement for the Medieval Studies Minor.
Same as: HISTORY 15D, RELIGST 115X

HISTORY 116. Traders and Crusaders in the Medieval Mediterranean. 3-5 Units.
Trade and crusade were inextricably interconnected in the high Middle Ages. As merchant ships ferried knights and pilgrims across the Mediterranean, rulers borrowed heavily to finance their expeditions, while military expansion opened new economic opportunities. Course themes include the origins of the Crusading movement; the rise of Venice and other maritime powers; the pivotal roles of the Byzantine and Mongol Empires; relations between Christians, Muslims, and Jews; new military, maritime, and commercial technologies; and the modern legacy of the Crusades.

HISTORY 116M. "You Know Nothing, Jon Snow": Representations and Misrepresentations of the Middle Ages in Film. 5 Units.
Throughout the history of film, writers, directors and producers have made the Middle Ages one of the most popular settings featured in the medium. Some films attempt to faithfully represent this fascinating period in great historical detail. Other films use a deformed image of the Middle Ages as an inspiration for movies that propagate misleading depictions of this important time. Finally, most films could be placed somewhere on the spectrum between these two extremes. This class will examine eight films and one broad theme (e.g., violence, women, politics, etc.) featured in them. Through examination of primary and secondary sources, students will investigate these themes within the context of medieval history, critique their cinematic representation and discuss medievalism and its proponents.

HISTORY 116N. Howard Zinn and the Quest for Historical Truth. 3 Units.
With more than two million copies in print, Howard Zinn's A People's History is a cultural icon. We will use Zinn's book to probe how we determine what was true in the past. A People's History will be our point of departure, but our journey will visit a variety of historical trouble spots: debates about whether the US was founded as a Christian nation, Holocaust denial, and the "Birther" controversy of President Obama.
Same as: EDUC 116N

HISTORY 117. Ancient Empires: Near East. 4-5 Units.
Why do imperialists conquer people? Why do some people resist while others collaborate? This course tries to answer these questions by looking at some of the world's earliest empires. The main focus is on the expansion of the Assyrian and Persian Empires between 900 and 300 BC and the consequences for the ancient Jews, Egyptians, and Greeks. The main readings come from the Bible, Herodotus, and Assyrian and Persian royal inscriptions, and the course combines historical and archaeological data with social scientific approaches. Weekly participation in a discussion section is required.
Same as: CLASSICS 81

HISTORY 120B. The Russian Empire. 5 Units.
From Peter the Great to the Bolsheviks. Russia as an empire; its varied regions, including the Caucasus, Central Asia, Ukraine, Poland, and the Baltics. Focus is on the politics and cultures of empire. Sources include novels, political tracts, paintings, music, and other primary sources.

HISTORY 120C. 20th-Century Russian and Soviet History. 5 Units.
The Soviet polity from the 1917 Revolution to its collapse in 1991. Essentials of Marxist ideology; the Russian Empire in 1917. Causation in history; interpretations of the Revolution; state building in a socialist polity; social engineering through collectivization of agriculture, force-paced industrialization, and cultural revolution; terror as concept and practice; nationality policies in a multiethnic socialist empire; the routinization, decline, and collapse of the revolutionary ethos; and the legacy of the Soviet experiment in the new Russia.

HISTORY 126B. Protestant Reformation. 3-5 Units.
The emergence of Protestant Christianity in 16th-century Europe. Analysis of writings by evangelical reformers (Luther, Calvin, Zwingli, Sattler, Hubmeier, Müntzer) and study of reform movements (Lutheran, Reformed, Anabaptist, Spiritualist) in their medieval context and as expressions of new and influential visions of Christian belief, life, social order.
Same as: RELIGST 126

HISTORY 132. Ordinary Lives: A Social History of the Everyday in Early Modern Europe. 5 Units.
What war meant for foot soldiers and the peasants across whose fields they marched. Ordinary people's lives in the eras of Machiavelli, Shakespeare, the Reformation, and the scientific revolution. Topics include: birth, marriage, and death; city life and peasant culture; lay encounters with religious and intellectual ideas; war and crime; and gender and sexuality.

HISTORY 133A. Blood and Roses: The Age of the Tudors. 5 Units.
English society and state from the Wars of the Roses to the death of Elizabeth. Political, social, and cultural upheavals of the Tudor period and the changes wrought by the Reformation. The establishment of the Tudor monarchy; destruction of the Catholic church; rise of Puritanism; and 16th-century social and economic changes.

HISTORY 133B. Revolutionary England: The Stuart Age. 5 Units.
(Same as HISTORY 33B. HISTORY 133B is 5 units; 33B is 3 units.) From the accession of King James I in 1603 to the death of Queen Anne in 1714: a brutal civil war, the execution of one anointed king, and the deposition of another. Topics include the causes and consequences of the English Revolution, the origins of Anglo-American democratic thought, the rise and decline of Puritanism, and the emergence of England as an economic and colonial power.

HISTORY 134A. The European Witch Hunts. 5 Units.
(Same as HISTORY 34A. History majors and others taking 5 units, register for 134A.) After the Reformation, in the midst of state-building and scientific discovery, Europeans conducted a series of deadly witch hunts, violating their own laws and procedures in the process. What was it about early modernity that fueled witch hunting? Examines witch trials and early modern demonology as well as historians' interpretations of events to seek answers to this question.

HISTORY 137A. Europe, 1945-2002. 5 Units.
Europe's transformation from the end of WW II to an expanded EU. Political, cultural, economic, and social history. Topics: postwar reconstruction, Cold War, consumer versus socialist culture, collapse of Communism, postcommunist integration.

HISTORY 137D. Germany's Wars and the World, 1848-2010. 3-5 Units.
(History 37D is 3 units; History 137D is 5 units.)This course examines a series of explosive encounters between Germans, Europe, and the world. Starting with the overlooked revolutions of 1848 and ending with the reunification of West Germany and East Germany after the Cold War, the course will explore a range of topics: capitalism, communism, imperialism, nationalism, diplomacy, antisemitism, gender, race, and the Holocaust, among others. We will also consider competing visions of Germany its borders, its members, its enemies.
Same as: HISTORY 37D

HISTORY 139. Modern Britain and the British Empire. 5 Units.
(Same as HISTORY 39. History majors and others taking 5 units, register in 139.) From American Independence to the latest war in Iraq. Topics include: the rise of the modern British state and economy; imperial expansion and contraction; the formation of class, gender, and national identities; mass culture and politics; the world wars; and contemporary racial politics. Focus is on questions of decline, the fortunes and contradictions of British liberalism in an era of imperialism, and the weight of the past in contemporary Britain.

HISTORY 140. World History of Science. 5 Units.
(History 40 is 3 units; History 140 is 5 units.) The earliest developments in science, the prehistoric roots of technology, the scientific revolution, and global voyaging. Theories of human origins and the oldest known tools and symbols. Achievements of the Mayans, Aztecs, and native N. Americans. Science and medicine in ancient Greece, Egypt, China, Africa, and India. Science in medieval and Renaissance Europe and the Islamic world including changing cosmologies and natural histories. Theories of scientific growth and decay; how science engages other factors such as material culture and religions.

HISTORY 140A. The Scientific Revolution. 5 Units.
What do people know and how do they know it? What counts as scientific knowledge? In the 16th and 17th centuries, understanding the nature of knowledge engaged the attention of individuals and institutions including Copernicus, Galileo, Descartes, Newton, the early Royal Society, and less well-known contemporaries. New meanings of observing, collecting, experimenting, and philosophizing, and political, religious, and cultural ramifications in early modern Europe.

HISTORY 144. Sex, Gender, and Intersectional Analysis in Science, Medicine, Engineering, and Environment. 5 Units.
(HISTORY 44 is offered for 3 units; HISTORY 144 is offered for 5 units.) Explores "Gendered Innovations" or how sex, gender, and intersectional analysis in research sparks discovery and innovation. Section 1 focuses on the history of women in science. Section 2 looks at transforming research institutions. Section 3 explores Gendered Innovations. Topics include historical background, basic concepts, social robots, sustainability, medicine & public health, facial recognition, inclusive crash test dummies, and more. Stanford University is engaged in a multi-year collaboration with the European Commission and the U.S. National Science Foundation project on Gendered Innovations in Science, Health & Medicine, Engineering, and Environment, and this class will contribute that project. The operative questions is: how can sex, gender, and intersectional analysis lead to discovery and enhance social equalities?.
Same as: FEMGEN 144

HISTORY 145A. Africa Until European Conquest. 5 Units.
Episodes in African history from the earliest records up until European partition of the continent, focusing on how knowledge about the natural, social, and spiritual worlds was linked to the exercise of power. The effects of technological innovations on states and other forms of social complexity; use of religious beliefs and practices to legitimate or critique authority. The effects of slave trades and imperial conquest on these forms of authority.

HISTORY 145B. Africa in the 20th Century. 5 Units.
(Same as HISTORY 45B. Students taking 5 units, register for 145B.) The challenges facing Africans from when the continent fell under colonial rule until independence. Case studies of colonialism and its impact on African men and women drawn from West, Central, and Southern Africa. Novels, plays, polemics, and autobiographies written by Africans.
Same as: AFRICAAM 145B

HISTORY 146. History of Humanitarian Aid in sub-Saharan Africa. 4-5 Units.
Explores humanitarian endeavors through the era of the slave trade, colonialism, the Cold War and the present. Our focus is both local and global examining international humanitarian policy and the effects and perceptions of humanitarian aid within different African localities. Assignments use primary and secondary sources including organizational reports, ethnographies, memoirs and film. Topics: anti-slave trade and abolition movements, `civilizing¿ missions, development, refugees, peacekeeping, famine and women's rights.

HISTORY 147. History of South Africa. 5 Units.
(Same as HISTORY 47. History majors and others taking 5 units, register for 147.) Introduction, focusing particularly on the modern era. Topics include: precolonial African societies; European colonization; the impact of the mineral revolution; the evolution of African and Afrikaner nationalism; the rise and fall of the apartheid state; the politics of post-apartheid transformation; and the AIDS crisis.
Same as: AFRICAAM 147, CSRE 174

HISTORY 148. The Egyptians. 3-5 Units.
This course traces the emergence and development of the distinctive cultural world of the ancient Egyptians over nearly 4,000 years. Through archaeological and textual evidence, we will investigate the social structures, religious beliefs, and expressive traditions that framed life and death in this extraordinary region. Students with or without prior background are equally encouraged.
Same as: AFRICAAM 30, CLASSICS 82, HISTORY 48

HISTORY 149C. The Slave Trade. 5 Units.
(Same as HISTORY 49C. History majors and others taking 5 units, enroll in 149C.) Slave trades and forms of slavery in W. Africa from 1000 to 1885; impacts on lives, social organization, and political structures. Slavery in Islam, the slave market in the Mediterranean and Middle East, and the Saharan slave trade. Slavery within Africa, growth of the Atlantic trade, the Middle Passage, and war and trade that produced slaves. Impact of the Industrial Revolution and European abolition movements on the use of slaves and warfare in Africa. The relationship between slaving and the European conquest of Africa.

HISTORY 150A. Colonial and Revolutionary America. 5 Units.
(HISTORY 50A is 3 units. HISTORY 150A is 5 units) This course surveys early American history from the onset of English colonization of North America in the late sixteenth century through the American Revolution and the creation of the United States in the late eighteenth. It situates the origins and the development of colonial American society as its peoples themselves experienced it, within the wider histories of the North American continent and the Atlantic basin. It considers the diversity of peoples and empires that made up these worlds as well as the complex movement of goods, peoples, and ideas that defined them. The British North American colonies were just one interrelated part of this wider complex. Yet out of that interconnected Atlantic world, those particular colonies produced a revolution for national independence that had a far-reaching impact on the world. The course, accordingly, explores the origins of this revolutionary movement and the nation state that it wrought, one that would rapidly ascend to hemispheric and then global prominence.
Same as: AMSTUD 150A

HISTORY 150B. Nineteenth Century America. 5 Units.
(Same as HISTORY 50B. History majors and others taking 5 units, register for 150B.) Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture.
Same as: AFRICAAM 150B, AMSTUD 150B, CSRE 150S

HISTORY 150C. The United States in the Twentieth Century. 5 Units.
(Same as HISTORY 50C. History majors and others taking 5 units, register for 150C.) 100 years ago, women and most African-Americans couldn't vote; automobiles were rare and computers didn't exist; and the U.S. was a minor power in a world dominated by European empires. This course surveys politics, culture, and social movements to answer the question: How did we get from there to here? Two historical research "labs" or archival sessions focus on the Great Depression in the 1930s and radical and conservative students movements of the 1960s. Suitable for non-majors and majors alike.
Same as: AFRICAAM 150C, AMSTUD 150C

HISTORY 151. The American West. 5 Units.
The American West is characterized by frontier mythology, vast distances, marked aridity, and unique political and economic characteristics. This course integrates several disciplinary perspectives into a comprehensive examination of Western North America: its history, physical geography, climate, literature, art, film, institutions, politics, demography, economy, and continuing policy challenges. Students examine themes fundamental to understanding the region: time, space, water, peoples, and boom and bust cycles.
Same as: AMSTUD 124A, ARTHIST 152, ENGLISH 124, POLISCI 124A

HISTORY 151B. The End of American Slavery, 1776-1865. 3-5 Units.
How did the institution of American slavery come to an end? The story is more complex than most people know. This course examines the rival forces that fostered slavery's simultaneous contraction in the North and expansion in the South between 1776 and 1861. It also illuminates, in detail, the final tortuous path to abolition during the Civil War. Throughout, the course introduces a diverse collection of historical figures, including seemingly paradoxical ones, such as slaveholding southerners who professed opposition to slavery and non-slaveholding northerners who acted in ways that preserved it. Historical attitudes toward race are a central integrative theme.
Same as: HISTORY 51B

HISTORY 152. History of American Law. 5 Units.
(Formerly Law 318. Now Law 3504.) This course examines the growth and development of American legal institutions with particular attention to crime and punishment, slavery and race relations, the role of law in developing the economy, and the place of lawyers in American society, from colonial times to the present. Special Instructions: Any student may write a paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Final exam or paper. Automatic grading penalty waived for writers. Cross-listed with History (HISTORY 152 Consent of instructor required) & (HISTORY 352B).
Same as: HISTORY 352B

HISTORY 152K. America as a World Power in the Modern Era. 5 Units.
This course will examine the modern history of American foreign relations, from the turn of the twentieth century to the present. Beginning with the fateful decision to go to war with Spain, it will examine the major crises and choices that have defined the "American Century." Our study of U.S. foreign relations will consider such key factors as geopolitics, domestic politics, bureaucracy, psychology, race, and culture. IR majors taking this course to fulfill the IR WIM requirement should enroll in INTNLREL168W.
Same as: INTNLREL 168, INTNLREL 168W

HISTORY 153. Creation of the Constitution. 5 Units.
The course begins with readings setting forth the intellectual and experiential background of the framing, including common law and natural rights theory, republicanism, economic & political scientific ideas, and colonial and post-Independence experience. We then study large parts of the debates at the Constitutional Convention, primarily using Madison's Notes. Major topics are the principle of representation, the extent and enumeration of national powers, the construction of the executive and judicial branches, and slavery. Next come the ratification debates, including readings from antifederalist writers, The Federalist, and speeches in ratification conventions. We conclude with the addition of the Bill of Rights. Classes consist of a combination of lecture and extensive participation by students. Elements used in grading: Class participation, In-class exam, supplemented by short take-home essay. Cross-listed with the Law School (LAW 7017).

HISTORY 154. American Intellectual and Cultural History to the Civil War. 5 Units.
(Same as HISTORY 54. History majors and others taking 5 units, register for 154.) How Americans considered problems such as slavery, imperialism, and sectionalism. Topics include: the political legacies of revolution; biological ideas of race; the Second Great Awakening; science before Darwin; reform movements and utopianism; the rise of abolitionism and proslavery thought; phrenology and theories of human sexuality; and varieties of feminism. Sources include texts and images.
Same as: AMSTUD 154

HISTORY 155. The White Supremacist Constitution: American Constitutional History. 5 Units.
This course addresses U.S. constitutional history from the post-Civil War Reconstruction period through the mid-20th century. Because of the breadth of the subject matter, the view will necessarily be partial. In particular we will take as our focus the way the Constitution has provided a point of political mobilization for social movements challenging economic and social inequality. Topics covered include: Civil War Reconstruction and restoration; the rise of corporate capitalism and efforts to constrain it; Progressive Era regulation; the New Deal challenge to federalism and the anti-New Deal backlash; government spending; WWII and the Japanese Internment; the Civil Rights Era, and the War on Poverty. Readings will include both legal and historical materials with a focus on the relationship between law and society. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper. Paper extensions will be granted with instructor permission. No automatic grading penalty for late papers. Cross-listed with the Law School (LAW 7008),.
Same as: AMSTUD 155

HISTORY 155F. The Civil War and Reconstruction Era, 1830 to 1877. 3-5 Units.
(History 55F is 3 units; History 155F is 5 units.)This course explores the causes, course, and consequences of the American Civil War. The Civil War profoundly impacted American life at national, sectional, and constitutional levels, and radically challenged categories of race and citizenship. Topics covered include: the crisis of union and disunion in an expanding republic; slavery, race, and emancipation as national problems and personal experiences; the horrors of total war for individuals and society; and the challenges--social and political--of Reconstruction.
Same as: AFRICAAM 55F, AMSTUD 55F, AMSTUD 155F, HISTORY 55F

HISTORY 158C. History of Higher Education in the U.S.. 3-5 Units.
Major periods of evolution, particularly since the mid-19th century. Premise: insights into contemporary higher education can be obtained through its antecedents, particularly regarding issues of governance, mission, access, curriculum, and the changing organization of colleges and universities.
Same as: AMSTUD 165, EDUC 165, EDUC 265

HISTORY 161. The Politics of Sex: Work, Family, and Citizenship in Modern American Women's History. 3-5 Units.
This course explores the transition from Victorian to modern American womanhood by asking how Native, European, African, Mexican, and Asian American women navigated the changing sexual, economic, and political landscapes of the twentieth century. Through secondary readings, primary sources, films, music, and literature we explore the opportunities and boundaries on groups of women in the context of historical events that included immigration, urbanization, wartime, depression, the Cold War, as well as recurrent feminist and conservative political movements.
Same as: AMSTUD 161, CSRE 162, FEMGEN 161, HISTORY 61

HISTORY 163. A History of North American Wests. 5 Units.
The history, peoples, and natural systems of a region that has never been contained within a single empire or nation state, but has been united by the movement of peoples, species, and things. Topics include smallpox, horses, gold, salmon, rivers, coal, and oil.

HISTORY 164C. From Freedom to Freedom Now: African American History, 1865-1965. 5 Units.
(Same as HISTORY 64C. History majors and others taking 5 units, register for 164C.) Explores the working lives, social worlds, political ideologies and cultural expressions of African Americans from emancipation to the early civil rights era. Topics include: the transition from slavery to freedom, family life, work, culture, leisure patterns, resistance, migration and social activism. Draws largely on primary sources including autobiographies, memoirs, letters, personal journals, newspaper articles, pamphlets, speeches, literature, film and music.
Same as: AMSTUD 164C

HISTORY 166B. Immigration Debates in America, Past and Present. 3-5 Units.
Examines the ways in which the immigration of people from around the world and migration within the United States shaped American nation-building and ideas about national identity in the twentieth century. Focuses on how conflicting ideas about race, gender, ethnicity, and citizenship with respect to particular groups led to policies both of exclusion and integration. Part One begins with the ways in which the American views of race and citizenship in the colonial period through the post-Reconstruction Era led to the passage of the Chinese Exclusion Act in 1882 and subsequently to broader exclusions of immigrants from other parts of Asia, Southern and Eastern Europe, and Mexico. Explores how World War II and the Cold War challenged racial ideologies and led to policies of increasing liberalization culminating in the passage of the 1965 Immigration Act, which eliminated quotas based on national origins and opened the door for new waves of immigrants, especially from Asia and Latin America. Part Two considers new immigration patterns after 1965, including those of refugees, and investigates the contemporary debate over immigration and immigration policy in the post 9/11 era as well as inequalities within the system and the impact of foreign policy on exclusions and inclusions.
Same as: CSRE 166B, HISTORY 366B

HISTORY 166C. The Cold War: An International History. 5 Units.
Though it ended twenty years ago, we still live in a world shaped by the Cold War. Beginning with its origins in the mid-1940s, this course will trace the evolution of the global struggle, until its culmination at the end of the 1980s. Students will be asked to ponder the fundamental nature of the Cold War, what kept it alive for nearly fifty years, how it ended, and its long term legacy for the world. As distinguished from the lecture taught in previous quarters, this class will closely investigate ten major Cold War battlegrounds over the quarter. Selected case studies will include: the division of Germany, Iran in the 1950s, Cuba, Vietnam, the Six Day War, the Chilean coup, sub-Saharan Africa, Afghanistan, Central America, and the Eastern European revolutions of 1989. Students will be asked to consult a combination of original documents and recent histories.
Same as: INTNLREL 154

HISTORY 167A. Martin Luther King, Jr. and the Global Freedom Struggle. 3-5 Units.
Using the unique documentary resources and publications of Stanford's King Research and Education Institute, this course will be taught by Professor Carson and his colleagues at the Institute. It will provide a general introduction to the life and legacy of Martin Luther King, Jr., as well as devote attention to the movements he inspired. In addition to lectures, the course will include presentations of documentaries such as Eyes on the Prize. Students will be expected to read the required texts, participate in class discussions, and take a final exam or submit a research paper (or an audio-visual project developed in consultation with the professor).

HISTORY 168. American History in Film Since World War ll. 3-4 Units.
U.S. society, culture, and politics since WW II through feature films. Topics include: McCarthyism and the Cold War; ethnicity and racial identify; changing sex and gender relationships; the civil rights and anti-war movements; and mass media. Films include: The Best Years of Our Lives, Salt of the Earth, On the Waterfront, Raisin in the Sun, Kramer v Kramer, and Falling Down.

HISTORY 168D. American Prophet: The Inner Life and Global Vision of Martin Luther King, Jr.. 3-5 Units.
Martin Luther King, Jr., was the 20th-century's best-known African-American leader, but the religious roots of his charismatic leadership are far less widely known. The documents assembled and published by Stanford's King Research and Education Institute provide the source materials for this exploration of King's swift rise to international prominence as an articulate advocate of global peace and justice.
Same as: AFRICAAM 68D, AMSTUD 168D, CSRE 68, HISTORY 68D

HISTORY 172A. Mexico: From Colony to Nation, or the History of an impossible Republic?. 5 Units.
Was a republican form of government even possible in 19th-century Mexico after 300 years of colonial rule under the Spanish monarchy? Was the Spanish colonial heritage a positive or a negative legacy according to 19th-century Mexican politicians? How were they to forge a new national identity with so many ethnically and culturally diverse peoples throughout the territory? Just how ¿traditional¿ was, in fact, the colonial period? These are some of the questions we will explore in this course. Journeying from the late colonial period (c.1700) to the 35-year dictatorship known as El Porfiriato (1876-1911) we will examine how Mexico¿s diverse indigenous peoples adapted to both colonial and postcolonial rule, how they actively participated in politics and political discourse to preserve their cultures, customs and colonial privileges, and how after independence in 1821, a new republican political culture was forged. Mexico was not an impossible republic, but rather another kind of republic.

HISTORY 173. Mexican Migration to the United States. 3-5 Units.
(History 73 is 3 units; History 173 is 5 units.) This course is an introduction to the history of Mexican migration to the United States. Barraged with anti-immigrant rhetoric and calls for bigger walls and more restrictive laws, few people in the United States truly understand the historical trends that shape migratory processes, or the multifaceted role played by both US officials and employers in encouraging Mexicans to migrate north. Moreover, few have actually heard the voices and perspectives of migrants themselves. This course seeks to provide students with the opportunity to place migrants' experiences in dialogue with migratory laws as well as the knowledge to embed current understandings of Latin American migration in their meaningful historical context.
Same as: AMSTUD 73, CHILATST 173, HISTORY 73

HISTORY 174. Mexico Since 1876: The Road to Ayotzinapa. 5 Units.
(History 74 is for 3 units; History 174 is for 5 units.) In September of 2014, 43 students from a Mexican teacher's college in Ayotzinapa, Guerrero were abducted and disappeared via the actions of police and organized crime. This shocking human rights violation, as well as the violence and impunity it represented, were symbolic of the decline of the rule of law embodied by Mexico's drug war. How did the nation arrive at this crossroads? This course is an introduction to the history of Mexico from 1876 to the present. Through lectures, discussions, primary and secondary sources, film and documentaries, and written assignments, students will critically explore the events and people that shaped Mexico for over a century. From the Porfirian dictatorship, to the Revolution, to the PRI's "perfect dictatorship," this course analyzes socioeconomic and racial inequality, foreign intervention, urbanization and industrialization, technological innovation and environmental degradation, education and ideology, modernity and migration, culture and media, and the drug trade.

HISTORY 177D. U.S. Intervention and Regime Change in 20th Century Latin America. 5 Units.
Policy discussions of regime change by US politicians, journalists and pundits usually focus on Iraq, Iran, Syria and North Korea, often with little or no historical context or perspective. This course does the opposite and takes seriously the proverbial saying "if history is any guide..." by examining U.S. interventions in Latin America, a region where so-called preventive regime change (covert as well as overt) has been operative policy for well over a century. Investigates the rationales, motivations and strategies behind U.S.-backed or engineered regime changes in Mexico in the 1910s, Guatemala in the 1950s, Chile in the 1970s, and Nicaragua in the 1980s.

HISTORY 178. Film and History of Latin American Revolutions and Counterrevolutions. 3-5 Units.
Note: Students who have completed HISTORY 78N or 78Q should not enroll in this course. In this course we will watch and critique films made about Latin America's 20th century revolutions focusing on the Cuban, Chilean and Mexican revolutions. We will analyze the films as both social and political commentaries and as aesthetic and cultural works, alongside archivally-based histories of these revolutions.
Same as: FILMSTUD 178, HISTORY 78, ILAC 178

HISTORY 179C. The Ethical Challenges of the Climate Catastrophe. 3-5 Units.
(History 79C is 3 units; History 179C is 5 units.) This course explores the ethical challenges of the climate catastrophe from historical, social, economic, political, cultural and scientific perspectives. These include the discovery of global warming over two centuries, the rise of secular and religious denialism and skepticism toward the scientific consensus on it, the dispute between developed and developing countries over how to forge a binding global agreement to mitigate it, and the "role morality" of various actors (scientists, politicians, fossil fuel companies, the media and ordinary individuals) in the US in assessing ethical responsibility for the catastrophe and how to mitigate, adapt, or even geoengineer, it.
Same as: HISTORY 79C

HISTORY 181B. Formation of the Contemporary Middle East. 5 Units.
(Same as 81B. 181B is 5 units; 81B is 3 units) This course introduces major themes in the modern history of the region linking the Mediterranean and Indian Ocean worlds. We will begin with the Eurasian context that produced the Safavid and Ottoman dynastic empires and quickly move to the economic and political transformations of the nineteenth century and the imperial dissolution of the early twentieth. Twentieth-century themes will include mass migrations and colonial occupation; nationalism, mass politics and revolution; socialist and Islamist movements; and the growing role of American policy in the region. The course will conclude with a close examination of the profound transformations of the past decade, from the multiform revolutions of the ¿Arab Spring¿ to the equally multiform attempts to repress them.

HISTORY 182G. Making Palestine Visible. 3-5 Units.
Israel-Palestine is one of the most difficult subjects to talk about, in large part because we in the United States do not have much exposure to Palestinian history, culture, and politics in their own terms. This course aims to humanize Palestinians and asks why Palestinian claims to rights are illegible for much of the American public. We begin to answer this question by examining a broad sampling of history, structures of power and law, culture, and contemporary political issues.
Same as: CSRE 82G, HISTORY 82G

HISTORY 185B. Jews in the Contemporary World: The American Jewish Present & Past in Popular Culture, Film, & TV. 4-5 Units.
(HISTORY 185B is 5 units; HISTORY 85B IS 3 units.) Who are American Jews as depicted in popular media -- film, television, etc. -- since the Second World War? How are their religion, politics, mores, and practices represented and what ways, if at all, do such portraits reflect historical trends among Jews and society in general? What can be learned from film or tv about Jewish identity, notions of Jewish power and powerlessness, communal cohesiveness and assimilation, sexuality and the wages of intermarriage or race?.
Same as: CSRE 185B, HISTORY 385C, JEWISHST 185B, REES 185B, SLAVIC 183

HISTORY 187. The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan. 5 Units.
(Same as HISTORY 87. History majors and others taking 5 units, register for 187.) Explores the contested politics of these societies in modern times. Topics include controversies surrounding the meaning of revolution, state building, war, geopolitics, Islamic law, clerical authority, gender, an Islamic economy, culture and ethnic, national and religious identities from the 1940s to the present. Assignments will focus on primary sources (especially legal documents, poetry, novels, and memoirs) and films.

HISTORY 187D. Zionism and Its Critics. 4-5 Units.
Zionism from its genesis in the 1880s up until the establishment of the state of Israel in May, 1948, exploring the historical, ideological and political dimensions of Zionism. Topics include: the emergence of Zionist ideology in connection to and as a response to challenges of modernity; emancipation; Haskalah (Jewish enlightenment); other national and ideological movements of the period; the ideological crystallization of the movement; and the immigration waves to Palestine.

HISTORY 190. Early Chinese Thought. 3-5 Units.
This lecture course examines the emergence of critical thought in early China. After a brief study of the social and political changes that made this emergence possible, it looks at the nature and roles of the thinkers, and finally their ideas about the social order, the state, war and the army, the family, the cosmos, and the self (both physical and mental). Some brief comparisons with early Greek thought.
Same as: HISTORY 90

HISTORY 191B. The City in Imperial China. 5 Units.
The evolution of cities in the early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative cases from European history. Readings include primary and secondary sources, and visual materials.

HISTORY 191D. China: The Northern and Southern Dynasties. 5 Units.
(Same as HISTORY 91D. History majors and others taking 5 units, register for 191D.) Examines one of the most dynamic periods of Chinese history with the emergence of the institutional religions (Buddhism and Daoism), the development of the garden as an art form, the rise of landscape as a theme of verse and art, the invention of lyric poetry, and the real beginnings of the southward spread of Chinese civilization.

HISTORY 194B. Japan in the Age of the Samurai. 5 Units.
(Same as HISTORY 94B. History majors and others taking 5 units, register for 194B.) From the Warring States Period to the Meiji Restoration. Topics include the three great unifiers, Tokugawa hegemony, the samurai class, Neoconfucian ideologies, suppression of Christianity, structures of social and economic control, frontiers, the other and otherness, castle-town culture, peasant rebellion, black marketing, print culture, the floating world, National Studies, food culture, samurai activism, black ships, unequal treaties, anti-foreign terrorism, restorationism, millenarianism, modernization as westernization, Japan as imagined community.

HISTORY 194G. Humanities Core: Technology and Media in Modern Japan. 3-5 Units.
This course considers the political, economic, social, cultural, and artistic effects of the introduction of new technologies and media to modern China and Japan. The methodology will integrate techniques gleaned from the disciplines of history and literary studies. Our cross-discipline exploration will encompass printed books and images, language reform, communication technology, serialized fiction and commercial journalism, propaganda and censorship, cinema, comics, animation and television, gaming, and the internet. Through examination of these topics we will investigate a wide range of issues including nationality, ethnic identity, class, revolution, cultural identification, gender, sexuality, literacy, colonialism, imperialism, consumerism, materialism, and globalism, to name just a few. Throughout the course we will be attentive not only to the ways that new technology and media are represented in cultural materials but also how they are materialized in these products through the acts of adaptation, translation, transliteration, and remediation.nnStudents will survey, collect, and synthesize archival materials, engage in media analysis, and undertake close readings to illuminate narrative strategies and other signifying effects. This work will in part be facilitated by the Massive Multiplayer Humanities pedagogical model, which involves flipped classrooms, faculty curated online archives, and student initiated group work.

HISTORY 195. Modern Korean History. 4-5 Units.
(Same as HISTORY 95. History majors and others taking 5 units, register for 195.) This lecture course provides a general introduction to the history of modern Korea. Themes include the characteristics of the Chosôn dynasty, reforms and rebellions in the nineteenth century, Korean nationalism; Japan's colonial rule and Korean identities; decolonization and the Korean War; and the different state-building processes in North and South, South Korea's democratization in 1980s, and the current North Korean crisis.

HISTORY 195C. Modern Japanese History: From Samurai to Pokemon. 5 Units.
(Same as HISTORY 95C. History majors and others taking 5 units, register for 195C.) Japan's modern transformation from the late 19th century to the present. Topics include: the Meiji revolution; industrialization and social dislocation; the rise of democracy and empire; total war and US occupation; economic miracle and malaise; Japan as soft power; and politics of memory. Readings and films focus on the lived experience of ordinary men and women across social classes and regions.

HISTORY 197. Southeast Asia: From Antiquity to the Modern Era. 3-5 Units.
The history of S.E. Asia, comprising Indonesia, the Philippines, Malaysia, Singapore, Thailand, Vietnam, Burma, Cambodia, and Laos, from antiquity to the present. The spread of Indian cultural influences, the rise of indigenous states, and the emergence of globally linked trade networks. European colonization, economic transformation, the rise of nationalism, the development of the modern state, and the impact of globalization.
Same as: HISTORY 97

HISTORY 198. The History of Modern China. 5 Units.
(Same as HISTORY 98. History majors and others taking 5 units, register for 198.) This course charts major historical transformations in modern China, and will be of interest to those concerned with Chinese politics, culture, society, ethnicity, economy, gender, international relations, and the future of the world.

HISTORY 198G. Beijing, Shanghai, and the Structure of China. 3-5 Units.
China's modern history through the rivalry of its two most important cities. The course begins in the nineteenth century, contrasting Beijing, the classic imperial capital and a foreign foundation paradoxically celebrated as the embodiment of "traditional" China, with Shanghai, a treaty port and demographic/economic center of China, but identified as a "foreign" city. After following the cities' history through the warlord period, the "Shanghai decade" of Nationalist rule, and the Japanese occupation, the course examines the two cities' developments under Mao and Deng. The course concludes with a look at their current relations and roles, and the transformed nature of China's cities.

HISTORY 200A. Doing Legal History. 5 Units.
What is law, and how do we write its history? Drawing on case studies from a broad range of periods and places, this course will explore how law is made, interpreted, enforced, experienced, and resisted. It will also explore how historians use both legal and non-legal sources to study the ways in which law and society have shaped each other. This course forms part of the "Doing History" series: rigorous undergraduate colloquia that introduce the practice of history within a particular field or thematic area.

HISTORY 200B. Doing Environmental History: Climate Change... the podcast. 5 Units.
This will be a hands-on course that will emphasize how to do environmental history. Students will reflect on what it means to think historically about a pressing contemporary problem--climate change. We will ask historical questions, produce historical knowledge, and as a critical part of the course, present that knowledge to a general audience in the form of a podcast. This course forms part of the "Doing History" series: rigorous undergraduate colloquia that introduce the practice of history within a particular field or thematic area.

HISTORY 200C. Doing the History of Race and Ethnicity. 5 Units.
How does ethnicity and race operate in different time periods, and across different historical, national, and cultural contexts? This course guides students through an historical and cross-cultural exploration of ethnoracial identity formation, racism, ethnopolitics, migration, belonging, and exclusion, using primary and secondary sources to examine how the lived experience of race and ethnicity shapes and is shaped by local, regional, and global dimensions. This course forms part of the "Doing History" series: rigorous undergraduate colloquia that introduce the practice of history within a particular field or thematic area.

HISTORY 200D. Doing the History of Science and Technology. 5 Units.
The history of science has often been at the crux of key debates in the larger field of history, including debates over objectivity and bias, relativism and the problem of "present-ism." This course explores key questions, methods and debates in the history of science and examines how historians of science have addressed these organizing problems of the historical discipline. This course forms part of the "Doing History" series: rigorous undergraduate colloquia that introduce the practice of history within a particular field or thematic area.

HISTORY 200E. Doing Economic History. 5 Units.
The courses examines how historians and economists, from different intellectual traditions and schools, grapple with major problems of economic history including pre-modern agrarian orders; demographic fluctuations; diverse property regimes; financial and commercial expansion; the emergence of fiscal-military state; the industrial revolution; growth and poverty; markets and networks; epidemics and their economic impacts; labor and capital; the rise of capitalism and imperialism; anti-capitalist and socialist movements; immigration; formal and informal economies; ; development and underdevelopment; globalization and environmental crisis; Special emphasis will be given to the theories of the Great Divergence, namely why the West became the dominant economic power over the rest of the world and how different economies responded to that.

HISTORY 200F. Doing Microhistory. 5 Units.
The genre of microhistory was expressly invented in the 1970s to recover the voices of people usually neglected in the past, often based on scanty sources. It's an exciting and risky endeavor, as the historian often has to fill in details lacking in the sources, a historical tightrope act. Class includes three sessions with authors of microhistory who share how they met these challenges:Profs. Zipperstein and Stokes (Stanford) and Getz (San Francisco State).

HISTORY 200J. Doing Oral History. 5 Units.
Students explore exemplary historical works based on oral histories and develop a range of practical skills while completing their own interviews. Topics include oral history and narrative theory, interview techniques, transcript preparation, and digital archiving. Students also learn how to analyze interviews using both qualitative and quantitative methods, practice writing history using oral evidence, and experiment with digital humanities approaches for disseminating oral history, including the Stanford Oral History Text Analysis Project. This course forms part of the "Doing History" series: rigorous undergraduate colloquia that introduce the practice of history within a particular field or thematic area.
Same as: AMSTUD 200J

HISTORY 200K. Doing Literary History: Orwell in the World. 5 Units.
This course will bring together the disciplines of history and literary studies by looking closely at the work of one major twentieth-century author: the British writer and political polemicist George Orwell. In 1946, Orwell writes, "What I have most wanted to do throughout the past ten years is to make political writing into an art." In these years, Orwell writes about-- and often participates in or witnesses first-hand--a series of major events and crises. These include British imperialism in Burma, urban poverty in Europe, class inequality in England, the conflict between Socialism and Fascism in Spain, and the rise of totalitarianism in the Soviet Union. In engaging all of these events, Orwell experiments with different literary forms, moving between fiction and non-fiction, novel and autobiography, essay and memoir, manifesto and fable, literature and journalism. Few writers demand such sustained and equal attention to text and context: in this course we will move back-and-forth between Orwell's varied writing and the urgent social and political contexts it addresses.
Same as: ENGLISH 224

HISTORY 200L. Doing Public History. 5 Units.
Examines history outside the classroom; its role in political/cultural debates in U.S. and abroad. Considers functions, practices, and reception of history in public arena, including museums, memorials, naming of buildings, courtrooms, websites, op-eds. Analyzes controversies arising when historians' work outside the academy challenges the status quo; role funders, interest groups, and the public play in promoting, shaping, or suppressing historical interpretation. Who gets to tell a group's story? What changes can public history enable? Students will engage in public history projects.
Same as: CSRE 201L

HISTORY 200M. Doing Digital History. 5 Units.
This course is designed to introduce students to the theories and methods of digital history. In keeping with the digital humanities¿ commitment to experimentation, public discourse, and praxis, we will compile a web presence for our seminar that includes blog posts from students that engage with the discussions and readings. A series of tutorials will provide hands-on experience with a range of common digital history tools. The course will culminate in a final project in which students apply DH methodologies to their own research interests.

HISTORY 200R. Doing Community History: Asian Americans and the Pandemic. 5 Units.
Students utilize a community-engaged oral history methodology to produce short video documentaries focused on Asian Americans in the Covid-19 pandemic. In producing these collaborative digital history projects, students learn to evaluate the ways social power influences historical documentation at various levels including the making of sources, the construction of archives, and the telling of historical narratives. We ask: how have race and racism, ethnicity and community, gender and class, shaped the ways that the pandemic has influenced the lives of Asian Americans? To what extent have Asian American experiences with the pandemic been shaped by the recent global protests for racial justice and Black liberation? In studying the pandemic and its relationship to histories of race and racism, how should we understand the place of Asian Americans?.

HISTORY 200U. Doing History: Beyond the Book. 5 Units.
.

HISTORY 200Y. Doing Colonial History. 5 Units.
.

HISTORY 201. From Confederate Monuments to Wikipedia: The Politics of Remembering the Past. 5 Units.
Gateway course for Public History/Public Service track. Examines various ways history is used outside of the classroom, and its role in political/cultural debates in the U.S. and abroad. Showcases issues and careers in public history with guest speakers.

HISTORY 201A. The Global Drug Wars. 4-5 Units.
Explores the global story of the struggle over drugs from the nineteenth century to the present. Topics include the history of the opium wars in China, controversies over wine and tobacco in Iran, narco-trafficking and civil war in Lebanon, the Afghan 'narco-state,' Andean cocaine as a global commodity, the politics of U.S.- Mexico drug trafficking, incarceration, drugs, and race in the U.S., and the globalization of the American 'war on drugs.'.
Same as: HISTORY 301A

HISTORY 201B. Spatial History: Concepts, Methods, Problems. 4-5 Units.
What can digital mapping and spatial analysis bring to history? How have historians written spatial history in the past? How do scholars in other disciplines deal with space and what can we learn from them? The course provides students with conceptual and technical skills in spatial history. As part of the exercise to think spatially about the past, students will receive training in Geographic Informational Science (GIS) and develop their own spatial history projects. No prior technical skills are needed for this course.
Same as: HISTORY 401A

HISTORY 201C. The U.S., U.N. Peacekeeping, and Humanitarian War. 4-5 Units.
The involvement of U.S. and the UN in major wars and international interventions since the 1991 Gulf War. The UN Charter's provisions on the use of force, the origins and evolution of peacekeeping, the reasons for the breakthrough to peacemaking and peace enforcement in the 90s, and the ongoing debates over the legality and wisdom of humanitarian intervention. Case studies include Croatia and Bosnia, Somalia, Rwanda, Kosovo, East Timor, and Afghanistan. *International Relations majors taking this course to fulfill the WiM requirement should enroll in INTNLREL 140C for 5 units.
Same as: INTNLREL 140C, INTNLREL 140X

HISTORY 201D. History Goes Pop! Songwriting the Past. 3 Units.
Historical research doesn't always take the form of a thesis, an article, or a book. Sometimes, research leads to film, museum exhibits, works of art, or... music. In this class, students will collaborate to write, record, and produce original pop music (perhaps even an entire album) based on original research in Stanford's wealth of archives and Special Collections. Background in music is NOT required.
Same as: HISTORY 301D

HISTORY 201J. Objects of History: From "Material Culture" to "Making". 4-5 Units.
This class considers objects as historical sources. It surveys diverse approaches to the study and display of physical evidence, from "material culture" to "making." These explorations of object-oriented research will inform the course's hands-on components, working with objects and replicating historical experiences. With its focus on the question of what historical knowledge can be gained through interactivity, the course is suited to students whose interests include museums and public history, reenactment and performance, the maker movement, or interdisciplinary methodology.
Same as: HISTORY 301J

HISTORY 202B. Coffee, Sugar, and Chocolate: Commodities and Consumption in World History, 1200-1800. 4-5 Units.
Many of the basic commodities that we consider staples of everyday life became part of an increasingly interconnected world of trade, goods, and consumption between 1200 and 1800. This seminar offers an introduction to the material culture of the late medieval and early modern world, with an emphasis on the role of European trade and empires in these developments. We will examine recent work on the circulation, use, and consumption of things, starting with the age of the medieval merchant, and followed by the era of the Columbian exchange in the Americas that was also the world of the Renaissance collector, the Ottoman patron, and the Ming connoisseur. This seminar will explore the material horizons of an increasingly interconnected world, with the rise of the Dutch East India Company and other trading societies, and the emergence of the Atlantic economy. It concludes by exploring classic debates about the "birth" of consumer society in the eighteenth century. How did the meaning of things and people's relationships to them change over these centuries? What can we learn about the past by studying things?.
Same as: ARTHIST 302B, HISTORY 302B

HISTORY 202F. Surveillance States and Societies. 4-5 Units.
The course analyzes the evolution, functions, structures and consequences of surveillance in the modern era. Among issues discussed are the rise of the modern state and population politics, information gathering and its uses in domestic and national security arenas, institutions of surveillance in various regimes, the challenge of privacy and ethical dilemmas.
Same as: HISTORY 302F

HISTORY 202G. Peoples, Armies and Governments of the Second World War. 4-5 Units.
Clausewitz conceptualized war as always consisting of a trinity of passion, chance, and reason, mirrored, respectively, in the people, army and government. Following Clausewitz, this course examines the peoples, armies, and governments that shaped World War II. Analyzes the ideological, political, diplomatic and economic motivations and constraints of the belligerents and their resulting strategies, military planning and fighting. Explores the new realities of everyday life on the home fronts and the experiences of non-combatants during the war, the final destruction of National Socialist Germany and Imperial Japan, and the emerging conflict between the victors. How the peoples, armies and governments involved perceived their possibilities and choices as a means to understand the origins, events, dynamics and implications of the greatest war in history.
Same as: HISTORY 302G

HISTORY 202J. Climate Politics: Science and Global Governance. 3-4 Units.
(Formerly IPS 271) Provides a unique perspective on contemporary debates about climate change through a study of their long history. After some background about climate science and a look at how people thought about climate in the 18th, 19th, and early 20th centuries, we explore the co-evolution of climate science and climate politics from World War II to the present. The approach is to examine a series of political issues and debates that established human effects on the global atmosphere as serious problems. We then focus on the UN Framework Convention on Climate Change, the 2015 Paris Agreement, and the future of international climate policy. Assignments include in-class presentations and a policy brief.
Same as: INTLPOL 271

HISTORY 202K. The Holocaust and Its Aftermath. 4-5 Units.
This seminar gives an overview over different aspects of the history of the Holocaust and its aftermath and will examine key issues in recent Holocaust historiography and questions of memory and representation. Special emphasis is put on the nature of the historian's task, as viewed through the lens of historians of the Holocaust, as well as to the significance of the Holocaust in history and how it has changed over time. The course will confront students with historiographical texts and historical documents, with photography and film, works of scholarship and art.
Same as: HISTORY 302K, JEWISHST 282K, JEWISHST 382K

HISTORY 203. Premodern Economic Cultures. 4-5 Units.
Modern economists have made a science of studying the aggregate effects of individual choices. This science is based on the realities of personal freedom and individual choice. Prior to the modern era, however, different realities comprised very different economic cultures: moral economies in which greed was evil and generosity benefitted the patron¿s soul; familial collectives operating within historical conditioned diasporas; economies of obligation that threatened to collapse under their own weight as economic structures shifted. In this course we will be reading cross-culturally to develop an understanding of the shared and distinct elements of premodern economic cultures.
Same as: HISTORY 303

HISTORY 203C. History of Ignorance. 5 Units.
Scholars pay a lot of attention to knowledge--how it arises and impacts society--but much less attention has been given to ignorance, even though its impacts are equally profound. Here we explore the political history of ignorance, through case studies including: corporate denials of harms from particular products (tobacco, asbestos), climate change denialism, and creationist rejections of Darwinian evolution. Students will be expected to produce a research paper tracing the origins and impact of a particular form of ignorance.

HISTORY 203F. Racial Justice in the Nuclear Age. 5 Units.
This upper-level course explores the history of radioactive contamination in the Bay Area and elsewhere. We'll examine the legacy of atomic bomb testing in our region and the current political implications of that legacy. We'll then explore the colonial and postcolonial dimensions of the nuclear age and the long-term contamination it has produced. Case studies vary yearly; they include uranium mining in Africa, nuclear testing in the Pacific, and accidents at Chernobyl and Fukushima. At least one field trip!.
Same as: STS 200T

HISTORY 204A. Reimagining History: Or, Finding the "I" in History. 4-5 Units.
This class explores, through analysis and practice, the ways in which history can be told and experienced through means other than traditional scholarly narratives. Approaches include literary fiction and non-fiction, digital media, graphic arts, maps, exhibitions, and film. A final project will require students to produce their own innovative work of history.
Same as: HISTORY 304A

HISTORY 204D. Advanced Topics in Agnotology. 4-5 Units.
Advanced research into the history of ignorance. Our goal will be to explore how ignorance is created, maintained and destroyed, using case studies from topics such as tobacco denialism, global climate denialism, and other forms of resistance to knowledge making. Course culminates in a research paper on the theory and practice of agnotology, the science of ignorance.
Same as: HISTORY 304D

HISTORY 204E. Totalitarianism. 4-5 Units.
This course analyzes the evolution and nature of revolutionary and totalitarian polities through the reading of monographs on the Puritan Reformation, French Revolutionary, turn of the 20th Century, interwar, and Second World War eras. Among topics explored are the essence of modern ideology and politics, the concept of the body national and social, the modern state, state terror, charismatic leadership, private and public spheres, totalitarian economies, and identities and practices in totalitarian polities.
Same as: HISTORY 307E

HISTORY 204G. War and Society. 4-5 Units.
(History 204G is an undergraduate course offered for 5 units; History 304G is a graduate course offered for 4-5 units.) How Western societies and cultures have responded to modern warfare. The relationship between its destructive capacity and effects on those who produce, are subject to, and must come to terms with its aftermath. Literary representations of WW I; destructive psychological effects of modern warfare including those who take pleasure in killing; changes in relations between the genders; consequences of genocidal ideology and racial prejudice; the theory of just war and its practical implementation; how wars end and commemorated.
Same as: HISTORY 304G, REES 304G

HISTORY 205D. Freedom in Chains: Black Slavery in the Atlantic, 1400s-1800s. 3-5 Units.
This course will focus on the history of slavery in the British, French, Spanish, Portuguese and Dutch Atlantic world(s), from the late 1400s to the 1800s. Its main focus will be on the experiences of enslaved Africans and their descendants. Between the sixteenth and nineteenth centuries, the Europeans forcibly embarked over 10 million Africans to the Americas. Drawing on methodologies used by historians, archaeologists and anthropologists, the course will reconstruct the daily lives and the socio-economic, cultural and political histories of these captives. We will seek to hear their voices by investigating a variety of historical testimonies and recent scholarship. The course will examine slavery in the context of broader trends in Atlantic World studies, a field that has grown considerably in recent years, providing new ways of understanding historical developments across national boundaries. We will seek to identify commonalities and differences across time periods and regions and the reasons for those differences. Covered topics will include slave ship voyages, labor, agency, the creation of new identities (creolization), religion, race, gender, resistance, legacies, and memory.
Same as: AFRICAAM 113V, AFRICAST 113V, CSRE 113V

HISTORY 205K. The Age of Revolution: America, France, and Haiti. 4-5 Units.
(History 205K is an undergraduate course offered for 5 units; History 305K is a graduate course offered for 4-5 units.) This course examines the "Age of Revolution," spanning the 18th and 19th centuries. Primarily, this course will focus on the American, French, and Haitian Revolutions (which overthrew both French and white planter rule). Taken together, these events reshaped definitions of citizenship, property, and government. But could republican principles-- color-blind in rhetoric-- be so in fact? Could nations be both republican and pro-slavery? Studying a wide range of primary materials, this course will explore the problem of revolution in an age of empires, globalization, and slavery.
Same as: AFRICAAM 205K, HISTORY 305K

HISTORY 205L. Prostitution & Sex Trafficking: Regulating Morality and the Status of Women. 5 Units.
Examines governmental policies toward prostitution from the late 19th century to the present. Focuses on the underlying attitudes, assumptions, strategies, and consequences of various historical and current legal frameworks regulating prostitution, including: prohibitionism, abolitionism, legalization, partial decriminalization, and full decriminalization. Special focus on these policies' effects on sex trafficking, sex worker rights, and the status of women. Emphasis on Europe and the U.S., with additional cases from across the globe.

HISTORY 206A. City, Society, Literature- 19th Century Histories. 4 Units.
This course examines the rise of modern cities through an analysis of urban society and the imaginative literature of the 1800s.
Same as: HISTORY 306A, URBANST 106

HISTORY 206C. The Modern Battle. 5 Units.
The purpose of this seminar is to examine the evolution of modern warfare by closely following four modern battles/campaigns. For this purpose the seminar offers four mock staff rides, facilitating highly engaged, well-researched experience for participants. In a mock staff ride, students are assigned roles; each student is playing a general or staff officer who was involved in the battle/campaign. Students will research their roles and, during the staff ride, will be required to explain "their" decisions and actions. Staff rides will not deviate from historical records, but closely examine how decisions were made, what pressures and forces were in action, battle outcomes, etc. This in-depth examination will allow students to gain a deeper understanding of how modern tactics, technology, means of communications, and the scale of warfare can decide, and indeed decided, campaigns. We will will spend two weeks preparing for and playing each staff ride. One meeting will be dedicated to discussing the forces shaping the chosen battle/campaign: the identity and goals ofnthe belligerents, the economic, technological, cultural and other factors involved, as well as the initial general plan. The second meeting will be dedicated to the battle itself. The four battles will illustrate major developments in modern warfare.
Same as: INTNLREL 183

HISTORY 206D. Global Humanities: The Grand Millennium, 800-1800. 3-4 Units.
How should we live? This course explores ethical pathways in European, Islamic, and East Asian traditions: mysticism and rationality, passion and duty, this and other worldly, ambition and peace of mind. They all seem to be pairs of opposites, but as we'll see, some important historical figures managed to follow two or more of them at once. We will read works by successful thinkers, travelers, poets, lovers, and bureaucrats written between 800 and 1900 C.E. We will ask ourselves whether we agree with their choices and judgments about what is a life well lived.
Same as: DLCL 52, HUMCORE 52, JAPAN 52

HISTORY 206E. CAPITALS: How Cities Shape Cultures, States, and People. 3-5 Units.
This course takes students on a trip to major capital cities, at different moments in time: Renaissance Florence, Golden Age Madrid, Colonial Mexico City, Enlightenment and Romantic Paris, Existential and Revolutionary St. Petersburg, Roaring Berlin, Modernist Vienna, and bustling Buenos Aires. While exploring each place in a particular historical moment, we will also consider the relations between culture, power, and social life. How does the cultural life of a country intersect with the political activity of a capital? How do large cities shape our everyday experience, our aesthetic preferences, and our sense of history? Why do some cities become cultural capitals? Primary materials for this course will consist of literary, visual, sociological, and historical documents (in translation); authors we will read include Boccaccio, Dante, Sor Juana, Montesquieu, Baudelaire, Gogol, Irmgard Keun, Freud, and Borges. Note: To be eligible for WAYS credit, you must take the course for a Letter Grade.
Same as: COMPLIT 100, DLCL 100, FRENCH 175, GERMAN 175, ILAC 175, ITALIAN 175, URBANST 153

HISTORY 207. Biography and History. 4-5 Units.
The relationship between biographical and historical writing, primarily in Europe and America. Problems of methodology, evidence, dispassion, and empathy. Texts: biographies, critical literature on biographical work, and novels (A. S. Byatt's *Possession*, Bernard Malamud's *Dubin's Lives*) that illuminate the intellectual underpinnings of biographical labor.
Same as: HISTORY 308

HISTORY 207B. Environment, Technology and Revolution in World History. 4-5 Units.
Exploration of historiographical and interdisciplinary methodologies and approaches to intersections among environmental, technological, and revolutionary social change in diverse geographical and temporal contexts. Readings include broad theoretical and synthetic works as well as case studies of American, French, Mexican, Russian, Chinese, and Hungarian revolutions.

HISTORY 207D. Transhistory Colloquium. 4-5 Units.
Colloquium on the history of transgender practices and identities. Readings will include scholarly texts from the emerging historical field of transhistory as well as adjacent fields within gender history. Colloquium will investigate avenues for deepening transhistory through further historical inquiry.
Same as: FEMGEN 207D, FEMGEN 307D, HISTORY 307D

HISTORY 208. Private Lives, Public Stories: Autobiography in Women's History. 5 Units.
Changing contexts of women's lives and how women's actions have shaped and responded to those contexts.

HISTORY 208D. Pre-Modern Warfare. 4-5 Units.
This course examines the evolving nature of warfare and its impact on society across the Eurasian continent up to the Gunpowder Revolution and rise of the nation-state. Beginning with an attempt to define war, it will trace the evolution of military technology from the Stone Age through the rise of the chariot, the sword, and the mounted rider, and examine how changing methods of conducting warfare were inextricably linked to changes in the social order and political structures.
Same as: HISTORY 308D

HISTORY 208S. Facing the Past: The Politics of Retrospective Justice. 5 Units.
Forms of injustice in history including slavery, genocide, ethnic cleansing, mass rape, forced religious conversion, and torture of prisoners. Mechanisms developed over the last century to define, deter, and alleviate the effects of such offenses, including war crimes tribunals, truth commissions, national apologies, and monetary reparations. Case studies chart the international field of retrospective justice, exploring the legal, political, and moral implications of confronting traumatic pasts.

HISTORY 209B. The Idea of Politics. 4-5 Units.
Can we live without politics? Is politics indispensable for humanity and vice-versa? The idea of politics is that it must transform, through human action, conditions of collective life. But the 20th century produced colliding beliefs about what that life might be and what the human being itself might look like. Explore whether, after the century, we might still think of politics as an ethical idea and the "human" as foundational political category. Keywords: Civility, Cruelty, Friendship, Empire, Democracy, Humanism, Animals.
Same as: HISTORY 309B

HISTORY 209D. Postcolonialism and Universalism. 4-5 Units.
Key texts and motifs from postcolonial theory: empire, class, exile, suffering, textuality, archive in juxtaposition to 20th-century philosophical questions about universal history and the relevance of humanist inquiry.
Same as: HISTORY 309A

HISTORY 209F. Maps in the Early Modern World. 4-5 Units.
The significance of cartographic enterprise across the early modern world. Political, economic, and epistemological imperatives that drove the proliferation of nautical charts, domain surveys, city plans, atlases, and globes; the types of work such artifacts performed for their patrons, viewers, and subjects. Contributions of indigenous knowledge to imperial maps; the career of the map in commerce, surveillance, diplomacy, conquest, and indoctrination. Sources include recent research from Asia, Europe, and the Americas.
Same as: HISTORY 309F

HISTORY 209S. Research Seminar for Majors. 5 Units.
Required of History majors. How to conduct original, historical research and analysis, including methods such as using the libraries and archives at Stanford and elsewhere, and working collaboratively to frame topics, identify sources, and develop analyses. nnAutumn quarter focuses on Honors topics and Crime and Punishment in Early Modern Europe and America; Winter quarter on Race, Gender, Sexuality in U.S History; Spring quarter on Europe Before 1500, Early Empires, and Open Topic; and Summer quarter on Early Modern Travel Accounts and Arms Makers in History.

HISTORY 210. The History of Occupation, 1914-2010. 4-5 Units.
(History 210 is an undergraduate course offered for 5 units; History 310 is a graduate course offered for 4-5 units.) Examines the major cases of occupation in the twentieth century, from the first World War until the present, and issues of similarities, differences, and implications for contemporary policy making. Topics include European and Asian cases emerging from World War I and World War II, the Israeli occupation of the West Bank; the Soviet and American occupations of Afghanistan; and the American occupation of Iraq. Discussions will revolve around the problems, efficacy, and effects of occupation in historical perspective.
Same as: HISTORY 310

HISTORY 210D. Neighbors: Intimate Relationships and Everyday Life in Hitler's Europe. 5 Units.
This course explores how different groups of people experienced Nazi rule in Germany and German-occupied Europe. While we will cover the general history of Hitler's rise to power, the prewar years of his rule, and the Second World War, our focus will be on the effects of fascism on everyday life and relationships between neighbors, family members, partners, friends, and coworkers. How did class, race, gender, religion, and sexual orientation interact with Nazi rule and occupation? The course pays special attention to the fate of European Jews and the Holocaust. On a theoretical level, we will discuss the opportunities and challenges of "Alltagsgeschichte," or the history of everyday life, as an approach to studying Nazi rule. The course provides tools to manage efficiently a fairly high reading load, a skill that will greatly help students to succeed in future academic endeavors.

HISTORY 210J. Fascism and Authoritarianism. 5 Units.
This course introduces students to the history of fascist and authoritarian movements in modern Europe, from their origins through the post-WWII era. Germany and Italy will serve as central case studies, though the course will consider other examples as well. Through analytical consideration of secondary sources, primary texts, and art as political propaganda, we will interrogate the meanings and applications of these fraught and complex terms, the different forms taken by fascist and authoritarian movements, and their relationship to nationalism, race, religion, gender, and economic and political institutions. Why did millions of Europeans accept -- and even enthusiastically support -- fascist and authoritarian regimes? To what extent was a single, charismatic leader central to the success or failure of such governments? The course will conclude with an opportunity to reflect on the degree to which fascism and authoritarianism are concepts that remain relevant to political discourse in the twenty-first century.

HISTORY 211. Out of Eden: Deportation, Exile, and Expulsion from Antiquity to the Renaissance. 4-5 Units.
This course examines the long pedigree of modern deportations and mass expulsions, from the forced resettlements of the ancient world to the expulsion of Jews from Spain in 1492, and from the outlawry of Saga-era Iceland to the culture of civic exile in Renaissance Italy. The course focuses on Europe and the Mediterranean from antiquity to the early modern period, but students are welcome to venture beyond these geographical and chronological boundaries for their final papers.
Same as: HISTORY 311, JEWISHST 211

HISTORY 213F. Medieval Germany, 900-1250. 1-5 Unit.
(Undergraduates may sign up for German 213 or History 213F, graduate students should sign up for German 313 or History 313F. This course may be taken for variable units. Check the individual course numbers for unit spreads.) This course will provide a survey of the most important political, historical, and cultural events and trends that took place in the German-speaking lands between 900 and 1250. Important themes include the evolution of imperial ideology and relations with Rome, expansion along the eastern frontier, the crusades, the investiture controversy, the rise of powerful cities and civic identities, monastic reform and intellectual renewal, and the flowering of vernacular literature.nnTo satisfy a Ways requirement, this course must be taken for at least 3 units. In AY 2020-21, a letter grade or "CR" grade satisfies the Ways requirement.
Same as: GERMAN 213, GERMAN 313, HISTORY 313F

HISTORY 214C. Renaissances: Living, Learning, and Loving around the Mediterranean. 5 Units.
This course explores three watershed moments in Mediterranean history: the Carolingian Renaissance, the Twelfth-Century Renaissance, and the Italian Renaissance. The class examines how each renaissance redefined a specific place and how those changes influenced connections across the Mediterranean world.
Same as: 800-1500 CE

HISTORY 215B. Race and Ethnicity in Premodern Europe. 3-5 Units.
How do historians, art historians, and literary historians of premodern Europe shape their research and their teaching around questions of race? How do current debates on race theory shape our perception of the past and deepen historical inquiry? This graduate colloquium focuses on the most recent publications on race in medieval and early modern studies to reflect on such questions while examining the challenges that race studies put on historical definitions, research methodologies, as well as teaching institutions.
Same as: ARTHIST 207D, ARTHIST 407D, HISTORY 315B

HISTORY 216D. Nationalism, Colonialism, and the Lord of the Rings: The Middle Ages in the Modern World. 5 Units.
From its inception the term "Middle Ages" carried negative connotations. Renaissance humanists bewailed the fall of the Roman Empire and its replacement with "barbarian" kingdoms. Enlightenment philosophes abhorred the Middle Ages even more intensely than their Renaissance forerunners and decried medieval "superstition" and "barbarism." Nevertheless, as part of their rejection of the Enlightenment, nineteenth-century Romantics embraced the Middle Ages and sought inspiration for political and cultural renewal within medieval civilization. From nationalist movements, to colonialism, to movements within high and popular culture interest in the Middle Ages helped fashion the modern world in important ways. This class will explore the complex history associated with the images of the Middle Ages in the modern world.

HISTORY 217S. Minorities In Medieval Europe. 5 Units.
This course examines attitudes towards outsider groups within medieval society and the treatment of these groups by medieval Christians. Heretics, Jews, Muslims, homosexuals, prostitutes and usurers occupied ambivalent and at time dangerous positions within a society that increasingly defined itself as Christian. Differences in the treatment of these various 'outcast' groups, their depiction in art, their legal segregation, and their presumed association with demonic activity are addressed through discussion, and readings from primary and secondary source material.
Same as: RELIGST 217X

HISTORY 218C. Peace and War in Medieval Islam: From the Arab Conquests to the Crusades. 3-5 Units.
This course interrogates the theory and reality of war-making and peacemaking across the first millennium of Islamic history (c.600-c.1600 CE). We will examine major historical events (e.g. the struggle of the early community of Muslims against the pagan tribes of Arabia; Arab expansion and conquest during the seventh and eighth centuries; a sequence of civil wars, dynastic struggles, and schisms within Islam; and external invasions of the Islamic world by crusaders and steppe nomads, etc.). We will also investigate the development of major normative concepts across the Islamic tradition concerning peace and war (e.g. holy war; treaty- and truce-making; treatment of conquered enemies and prisoner; diplomacy with Muslims and non-Muslims, etc.). With respect to these concepts, we will attend especially to change over time and diversity across various sects. Mix of lecture and discussion. Readings will consist of both primary sources (in English translation) and modern scholarship. No previous experience with pre-modern or Islamic history required.
Same as: GLOBAL 190, GLOBAL 232, HISTORY 318C

HISTORY 219C. Science, Technology, and Modernity in the Soviet Union. 5 Units.
Science and technology were integral to the Soviet claim to offer a vision of modernity superior to that of Western capitalism. Science and technology would flourish; society would develop on a scientific basis. The results were more complex than the vision. Topics to be covered: science and Marxism-Leninism; the Lysenko affair; the R&D system; the role of the secret police; the atomic project; the space race; missile development; Andrei Sakharov; technology and innovation.
Same as: HISTORY 319C

HISTORY 221A. Men, Women, and Power in Early Modern Russia, 1500-1800. 5 Units.
Social values, gender relations, and social change in an era of rapid change; challenges to established norms by new constructions of deviance (witchcraft, religious reform, and revolt) and new standards of civility; encounters with non-Russians and the construction of national consciousness. Social values as political ethos: patrimonial autocracy and the reality of female rule in the late 17th and 18th century.

HISTORY 222. Crime and Punishment in Early Modern Europe and Russia. 4-5 Units.
Explores criminal law in early modern Europe and Russia, ca 1500-1800, in law and in practice. Engages debates about use of exemplary public executions as tactic of governance, and about gradual decline in "violence" in Europe over this time. Explores practice of accusatory and inquisitory judicial procedures, judicial torture, forms of punishment, concepts of justice.
Same as: HISTORY 322A

HISTORY 223. Art and Ideas in Imperial Russia. 4-5 Units.
Poetry, novels, symphonic music, theater, opera, painting, design, and architecture: what they reveal about the politics and culture of tsarist Russia.
Same as: HISTORY 323

HISTORY 223E. Cities of Empire: An Urban Journey through Eastern Europe and the Mediterranean. 3-5 Units.
This course explores the cities of the Habsburg, Ottoman and Russian empires in the dynamic and turbulent period of their greatest transformation from the 19th century through the Two World Wars. Through the reading of urban biographies of Venice and Trieste, Vienna, Budapest, Cracow, Lviv, Sarajevo, Belgrade, Salonica, and Odessa, we consider broad historical trends of political, economic, and social modernization, urbanization, identity formation, imperialism, cosmopolitanism, and orientalism. As vibrant centers of coexistence and economic exchange, social and cultural borderlands, and sites of transgression, these cities provide an ideal lens through which to examine these themes in the context of transition from imperial to post-imperial space.
Same as: HISTORY 323E, REES 204, REES 304

HISTORY 224A. The Soviet Civilization. 4-5 Units.
(History 224A is an undergraduate course offered for 5 units; History 424A is a graduate course offered for 4-5 units.) Socialist visions and practices of the organization of society and messianic politics; Soviet mass state violence; culture, living and work spaces. Primary and secondary sources. Research paper or historiographical essay.
Same as: HISTORY 424A, REES 224A

HISTORY 224C. Genocide and Humanitarian Intervention. 3 Units.
Open to medical students, graduate students, and undergraduate students. Traces the history of genocide in the 20th century and the question of humanitarian intervention to stop it, a topic that has been especially controversial since the end of the Cold War. The pre-1990s discussion begins with the Armenian genocide during the First World War and includes the Holocaust and Cambodia under the Khmer Rouge in the 1970s. Coverage of genocide and humanitarian intervention since the 1990s includes the wars in Bosnia, Rwanda, Kosovo, the Congo and Sudan.
Same as: HISTORY 324C, JEWISHST 284C, JEWISHST 384C, PEDS 224

HISTORY 224D. The Soviet Civilization, Part 2. 4-5 Units.
Prerequisite: HISTORY 224A/424A.
Same as: HISTORY 424B

HISTORY 225E. From Vladimir to Putin: Key Themes in Russian History. 4-5 Units.
Formative issues in Russian history from Muscovy to the present: autocracy and totalitarianism; tsars, emperors, and party secretaries; multi-ethnicity and nationalism; serfdom, peasantry; rebellions and revolutions, dissent and opposition; law and legality; public and private spheres; religion and atheism; patterns of collapse. Class format will be discussion of one to two assigned books or major articles per class.
Same as: HISTORY 325E, REES 225E

HISTORY 226D. The Holocaust: Insights from New Research. 4-5 Units.
Overview of the history of the Holocaust, the genocide of European Jews. Explores its causes, course, consequences, and memory. Addresses the events themselves, as well as the roles of perpetrators and bystanders, dilemmas faced by victims, collaboration of local populations, and the issue of rescue. Considers how the Holocaust was and is remembered and commemorated by victims and participants alike. Uses different kinds of sources: scholarly work, memoirs, diaries, film, and primary documents.
Same as: CSRE 226D, CSRE 326D, HISTORY 326D, JEWISHST 226E, JEWISHST 326D

HISTORY 226E. Famine in the Modern World. 3 Units.
Open to medical students, graduate students, and undergraduate students. Examines the major famines of modern history, the controversies surrounding them, and the reasons that famine persists in our increasingly globalized world. Focus is on the relative importance of natural, economic, and political factors as causes of famine in the modern world. Case studies include the Great Irish Famine of the 1840s; the Bengal famine of 1943-44; the Soviet famines of 1921-22 and 1932-33; China's Great Famine of 1959-61; the Ethiopian famines of the 1970s and 80s, and the Somalia famines of the 1990s and of 2011.
Same as: HISTORY 326E, PEDS 226

HISTORY 227B. The Business of Socialism: Economic Life in Cold War Eastern Europe. 5 Units.
This colloquium investigates the processes of buying, making, and selling goods and services in Cold War Eastern Europe and the Soviet Union. We will familiarize ourselves with a variety of approaches to writing the history of economic life and discuss to what extent they are applicable to state socialist systems. Our focus will not be on theories of socialism but on empirically grounded studies that allow for insights into how the system operated in practice and interacted with capitalism. We will, among others, explore the following questions: What was the role of the state in the economies east and west of the Iron Curtain? Are socialism and capitalism two incompatible systems? How did women experience and shape economic life after the Second World War? What had a greater impact on the economies of the region: Cold War politics or globalization?.
Same as: REES 205

HISTORY 227D. All Quiet on the Eastern Front? East Europe and Russia in the First World War. 3-5 Units.
Until recently history has been comparatively quiet about the experience of World War I in the east. Far from being a peripheral theater of war, however, the experiences of war on the Eastern Front were central to shaping the 20th century. Not only was the first shot of the war fired in the east, it was also the site of the most dramatic political revolution. Using scholarly texts, literature and film, this course combines political, military, cultural and social approaches to introduce the causes, conduct and consequences of World War I with a focus on the experiences of soldiers and civilians on the Eastern Front. Topics include: the war of movement, occupation, extreme violence against civilians, the Armenian genocide, population exchanges, the Russian Revolution and civil war, and the disintegration of empires and rise of nation-states.
Same as: HISTORY 327D, REES 227, REES 327

HISTORY 228. Circles of Hell: Poland in World War II. 5 Units.
Looks at the experience and representation of Poland's wartime history from the Nazi-Soviet Pact (1939) to the aftermath of Yalta (1945). Examines Nazi and Soviet ideology and practice in Poland, as well as the ways Poles responded, resisted, and survived. Considers wartime relations among Polish citizens, particularly Poles and Jews. In this regard, interrogates the traditional self-characterization of Poles as innocent victims, looking at their relationship to the Holocaust, thus engaging in a passionate debate still raging in Polish society.
Same as: HISTORY 328, JEWISHST 282, JEWISHST 382

HISTORY 230A. The Witness in Modern History: Memoir, Reportage, Image. 5 Units.
The rise of the witness as icon and debates about its reliability as a historical source. The power of eyewitness accounts to convict accused criminals, inspire indignation about war and genocide, and attract attention to humanitarian crises. Their notorious unreliability due to exaggeration and misapprehension. Sources include reportage, photography, and documentary film. Case studies include criminal cases, war, poverty, and natural disasters.

HISTORY 230C. Paris: Capital of the Modern World. 4-5 Units.
This course explores how Paris, between the eighteenth and twentieth centuries, became the political, cultural, and artistic capital of the modern world. It considers how the city has both shaped and been shaped by the tumultuous events of modern history- class conflict, industrialization, imperialism, war, and occupation. It will also explore why Paris became the major world destination for intellectuals, artists and writers. Sources will include films, paintings, architecture, novels, travel journals, and memoirs. Course taught in English with an optional French section.
Same as: FRENCH 140, FRENCH 340, URBANST 184

HISTORY 230D. Europe in the World, 1789-Present. 4-5 Units.
The European conquest of parts of Africa, Asia, and the South Pacific by European merchants, missionaries, armies, and administrators had significant, and often cataclysmic, effects on indigenous political alliances, cultural practices, and belief systems. But were the effects of expansion entirely one-sided? What impact did the experiences of colonialism have on European politics, culture,and Europe's relations with the rest of the world? Explores how interaction between Europe and the rest of the world redefined the political, racial, sexual, and religious boundaries of both Europe and its colonies and gave rise to the more "globalized' society we live in today.
Same as: HISTORY 330D

HISTORY 230L. Modern Irish History. 5 Units.
.

HISTORY 231E. Paper, Printing, and Digital Revolutions: Transformations of the Book. 4-5 Units.
What is a book? This seminar explores the conceptual implications of approximately two millennia of transformations in the physical and material properties of books. How have the meaning and authority we assign the written word changed as technologies of book production and dissemination have evolved, and how have they remained continuous? Topics covered include the rise of the medieval manuscript codex, the emergence of print culture in early modern Europe, and current debates over the nature of text in the digital age.
Same as: HISTORY 331E

HISTORY 231G. European Reformations. 3-5 Units.
Readings in and discussion of theological and social aspects of sixteenth century reformations: Luther, Radical Reform, Calvin, and Council of Trent, missionary expansion, religious conflict, creative and artistic expressions. Texts include primary sources and secondary scholarly essays and monographs.
Same as: HISTORY 331G, RELIGST 231, RELIGST 331

HISTORY 232B. Heretics, Prostitutes and Merchants: The Venetian Empire. 5 Units.
Between 1200-1600, Venice created a powerful empire at the boundary between East and West that controlled much of the Mediterranean, with a merchant society that allowed social groups, religions, and ethnicities to coexist. Topics include the features of Venetian society, the relationship between center and periphery, order and disorder, orthodoxy and heresy, the role of politics, art, and culture in the Venetian Renaissance, and the empire's decline as a political power and reinvention as a tourist site and living museum.
Same as: ITALIAN 232B

HISTORY 232G. Early Modern Cities. 4-5 Units.
Colloquium on the history of early modern European cities, covering urbanization, street life, neighborhoods, fortifications, guilds and confraternities, charity, vagrancy, and begging, public health, city-countryside relationship, urban constitutions, and confederations. Assignments include annotated bibliography, book review, and a final paper. Second-quarter continuation of research seminar available (HIST299S or HIST402).
Same as: HISTORY 332G

HISTORY 233. Reformation to Civil War: England under the Tudors and Stuarts. 4-5 Units.
English political and religious culture from the end of the Wars of the Roses to the Civil War of the 1640s. Themes include the growth of the size and power of the state, Reformation, creation of a Protestant regime, transformation of the political culture of the ruling elite, emergence of Puritanism, and causes of the Civil War. HISTORY 333 is a prerequisite for HISTORY 402 (Spring quarter).
Same as: HISTORY 333

HISTORY 233C. Two British Revolutions. 4-5 Units.
Current scholarship on Britain,1640-1700, focusing on political and religious history. Topics include: causes and consequences of the English civil war and revolution; rise and fall of revolutionary Puritanism; the Restoration; popular politics in the late 17th century; changing contours of religious life; the crisis leading to the Glorious Revolution; and the new order that emerged after the deposing of James II.
Same as: HISTORY 333C

HISTORY 233F. Political Thought in Early Modern Britain. 4-5 Units.
1500 to 1700. Theorists include Hobbes, Locke, Harrington, the Levellers, and lesser known writers and schools. Foundational ideas and problems underlying modern British and American political thought and life.
Same as: HISTORY 333F

HISTORY 233G. Catholic Politics in Europe, 1789-1992. 5 Units.
What led to the creation of a specifically Catholic mass politics? How did these parties and movements interact with the Vatican and the wider Church? What accounts for political Catholicism's involvement in clerical-fascist states and its important role in shaping the EU? Sources focus on monographs. Research paper using primary sources.

HISTORY 233K. The Invention of the Modern Republic. 4-5 Units.
Examines the history of republican thinking in the Atlantic World from the Renaissance to the French Revolution.
Same as: HISTORY 333K

HISTORY 234P. The Age of Plague: Medicine and Society, 1300-1750. 5 Units.
(Undergraduates, enroll in 234P. Graduates, enroll in 334P) The arrival of plague in Eurasia in 1347-51 affected many late medieval and early modern societies. It transformed their understanding of disease, raised questions about the efficacy of medical knowledge, and inspired new notions of public health. This class explores the history of medicine in the medieval Islamic and European worlds. Changing ideas about the body, the roles of different healers and religion in healing, the growth of hospitals and universities, and the evolution of medical theory and practice will be discussed. How did medicine and society change in the age of plague?.
Same as: STS 200U

HISTORY 234R. Risk and Credit Before Modern Finance. 1 Unit.
In today's world, credit scores are nearly as important as citizenship. Creditworthiness is measured in numbers, but is also bound up with moral qualities. To lack credit is to be on the margins of society, and vice versa. How did we get here? How did lenders mitigate risks before credit scores were available? Where do the risk management tools of modern finance come from? How did merchants trade over long distances when information technology was extremely poor? This one-unit course will address these pressing questions from a historical perspective, starting from the modern U.S. and reaching back in time to the Middle Ages. Classroom discussions and readings include articles written by historians and social scientists, as well as primary sources in English translation.
Same as: HISTORY 334R

HISTORY 235. The Renaissance of War: Politics, Technology, and War in Late Medieval and Renaissance Italy. 5 Units.
The dynamic societies of the Italian Peninsula of the 14th to 16th centuries "prosperous, astonishingly creative, politically fractious, and endemically violent" produced sweeping, deeply consequential changes. Among these were new developments in the theory and practice of war, politics, and diplomacy that laid the foundations for the modern state system and European military power. The class covers: new diplomatic practice; the Military Revolution; state-building; war finance; court culture; and the intersection of these with the shimmering brilliance of Renaissance culture.

HISTORY 235C. Readings in the Supernatural. 4-5 Units.
Class will read and discuss a selection of monographs, scholarly essays, and primary sources on the rich supernatural world of early modern Europe. We will discuss how fairies, werewolves, nightmares, and trolls all became witches, how the binary of angels and demons figured in European thought, and how the marginalized imaginary was reconstituted in theatre and fiction.
Same as: HISTORY 335C

HISTORY 235D. When Worlds Collide: The Trial of Galileo. 4-5 Units.
In 1633, the Italian mathematician Galileo was tried and condemned for advocating that the sun, not the earth, was the center of the cosmos. The Catholic Church did not formally admit that Galileo was right until 1992. Examines the many factors that led to the trial of Galileo and looks at multiple perspectives on this signal event in the history of science and religion. Considers the nature and definition of intellectual heresy in the sixteenth and early seventeenth centuries, and examines the writings of Galileo's infamous predecessor Giordano Bruno (burned at the stake in 1600). Looks closely at documents surrounding the trial and related literature on Renaissance and Reformation Italy in order to understand the perspectives of various participants in this famous event. Focal point of seminar involves the examination of the many different histories that can be produced from Galileo's trial. What, in the end, were the crimes of Galileo?.
Same as: HISTORY 335D, ITALIAN 233, ITALIAN 333

HISTORY 235F. Camus. 4-5 Units.
"The admirable conjunction of a man, of an action, and of a work" for Sartre, "the ideal husband of contemporary letters" for Susan Sontag, reading "Camus's fiction as an element in France's methodically constructed political geography of Algeria" for Edward Said, Camus embodies the very French figure of the "intellectuel engagé," or public intellectual. From his birth in 1913 into a poor European family in Algeria to the Nobel Prize in Literature in 1957, from the Mediterranean world to Paris, Camus engaged in the great ethical and political battles of his time, often embracing controversial positions. Through readings and films, we will explore his multiple legacies. Readings from Albert Camus, Jean-Paul Sartre, Assia Djebar, Kamel Daoud, Mouloud Feraoun, Alice Kaplan, Edward Said, Edwidge Danticat. Students will work on their production of written French, in addition to speaking French and reading comprehension. Taught in French. Students are highly encouraged to complete FRENLANG 124 or to successfully test above this level through the Language Center. This course fulfills the Writing in the Major (WIM) requirement.
Same as: COMPLIT 229B, CSRE 129, FRENCH 129

HISTORY 235J. The Meaning of Life: Modern European Encounters with Consequential Questions. 5 Units.
(History 235J is an undergraduate course offered for 5 units; History 335J is a graduate course offered for 4-5 units.) Across two centuries of social, political, and religious upheaval and transformation, modern Europeans confronted a series of interconnected ¿big questions¿: What is humanity¿s relationship with deity? Where does life, including human life, come from, and where is it going? What considerations should shape human beings¿ relationships with, and actions toward, one another? What is socially and morally acceptable¿or transgressive? Is there life after death, and a spiritual realm distinct from the material world? Through case studies in the history of religion, evolutionary thought, gender and sexuality, and the aims and ends of empire, this course will examine European engagement with these questions across the nineteenth and twentieth centuries (with some background in earlier periods), paying attention to the ways in which the questions people asked¿and the conclusions they drew¿were shaped by social, religious, and political institutions and structures.

HISTORY 235L. Alien Imaginations: Extraterrestrial Speculations in Modern European History. 5 Units.
(History 235L is an undergraduate course offered for 5 units; History 335L is a graduate course offered for 4-5 units.) This course will examine the historical basis and evolution of modern European beliefs concerning the existence and nature of alien life throughout the universe, and the ways in which these imagined alien beings have historically reflected an interplay of social, religious, political, and scientific assumptions, hopes, fears, and preoccupations. We will explore the relationship between belief in extraterrestrial life and historical themes and episodes in European history including the debate over heliocentrism, deism and freethought, theories of life and of human nature, changing concepts of national identity, and the intertwined histories of immigration, colonialism, race, and gender. We will particularly examine how and why concepts of the alien took a dark and sinister turn across the late nineteenth- and early-to-mid-twentieth centuries.

HISTORY 236. The Ethics of Imperialism. 5 Units.
Can a commitment to liberty, progress, and universal rights be reconciled with imperialism? The ethical underpinnings of empire; how modern Europeans provided ethical and political justifications for colonial expansion. How European ideals were used to defend and justify inequality, violence, and genocide. The ethics of American-driven globalization and humanitarianism. Texts include primary sources, philosophical treatises, and historical studies.

HISTORY 236F. The End of the World As They Knew It: Culture, Cafés, and Crisis in Europe, 1880-1918. 4-5 Units.
The years stretching from roughly 1880 to end of the First World War were marked by profound social upheaval and an intense burst of creativity. This seminar will focus on the major cultural movements and big ideas of the period. Topics covered include the rise of mass culture and cinema, the origins of psychoanalysis, anti-Semitism and Zionism, new anxieties about sexuality and the ¿New Woman,¿ anarchism, decadence, degeneration, and Dada ¿ with cameos from Bernhardt, Freud, Klimt, Nietzsche, Toulouse-Lautrec, Wilde, Zola, and other luminaries of the age.
Same as: HISTORY 336F

HISTORY 236J. A Tour of Dangerous Ideas: Radical Thinkers in Modern Europe. 4-5 Units.
In this course we will examine ideas radical to their context in modern European thought, paying close attention to what it has meant to explain features of society, government, and politics in terms of power. What is power? What is human nature, and do all humans possess natural rights? How is human identity interwoven with the practice of power? What makes an idea radical? We will examine these and other questions through close readings of seven thinkers whose ideas shaped the modern period: John Locke, Jean-Jacques Rousseau, Mary Wollstonecraft, John Stuart Mill, Karl Marx, C.L.R. James, and Michel Foucault.
Same as: HISTORY 336J

HISTORY 237C. Building Modernity: Urban Planning and European Cities in the Twentieth Century. 5 Units.
This seminar explores the history of urban planning in twentieth-century Europe. We will discuss visions of ideal cities and attempts at their implementation in the context of democratic and authoritarian systems as well as capitalism and socialism. Through case studies from eastern and western Europe--from Berlin in Germany to Nowa Huta in Poland--we will examine how broader historical trends played out in, and were shaped by, specific local circumstances. The seminar is intended for advanced undergraduate students.
Same as: URBANST 152

HISTORY 237D. The French Revolution and the Birth of Modern Politics. 4-5 Units.
(Students who have taken HISTORY 134 should not enroll in this course.) This course will focus on the birth of modern politics in the French Revolution. The goal will be to understand the structural contradictions of the French monarchy in the pre-revolutionary period, the reasons for the monarchy's failure to resolve those contradictions, and the political dynamic unleashed as they were solved by the revolutionary action of 1789. Sovereignty, democracy, rights, representation, and terror will be principal themes. Lectures will be combined with close reading and discussions of political and philosophical writings of the period.
Same as: HISTORY 337D

HISTORY 237F. 20th Century British History through the Hoover Archives. 4-5 Units.
From the rich resources of the Hoover Institution, the students in this course will select a particular archive (war posters, politician, spy, literary figure, diplomat, etc. etc.) to investigate, to write about,discuss in class, and, it is hoped, present in an exhibition at the Hoover, learning museum skills along the way as well as the history of Britain in the 20th century.
Same as: HISTORY 337F

HISTORY 237G. Outer Space Exploration in Germany in the Twentieth Century. 1-5 Unit.
Since the nineteenth century, Germans, like their counterparts around the world, have considered the meaning and the role of humanity in outer space. As space travel developed from a dream to a reality, and as Germany changed borders and political systems among empires, dictatorships, socialist states, and capitalist states, German interest in spaceflight remained, although the meaning found in the stars changed dramatically. This course considers Germans' dreams of and predictions for outer space travel alongside German technological developments in spaceflight. It includes the different German states throughout the century, including Weimar Germany, National Socialism, East Germany, and West Germany. The course looks at science fiction films and novels, newspaper reports, scientific developments, and German space engineering projects, which together demonstrate how and why space travel often found high levels of support in Germany. Students will engage in historical and cultural analysis through course readings, discussions, and assignments.nNOTE: To be eligible for WAYS credit, you must take this course for a minimum of 3 units and a letter grade.
Same as: GERMAN 275

HISTORY 238C. Virtual Italy: Methods for Historical Data Science. 4-5 Units.
Classical Italy attracted thousands of travelers throughout the 1700s. Referring to their journey as the "Grand Tour," travelers pursued intellectual passions, promoted careers, and satisfied wanderlust, all while collecting antiquities to fill museums and estates back home. What can computational approaches tell us about who traveled, where and why? We will read travel accounts; experiment with parsing; and visualize historical data. Final projects to form credited contributions to the Grand Tour Project, a cutting-edge digital platform. No prior programming experience necessary.
Same as: CLASSICS 115, ENGLISH 115, ITALIAN 115

HISTORY 238G. Ethnography of the Late Middle Ages: Social history and popular culture in the age of the plague. 4-5 Units.
During the late Middle Ages, as Europe was recovering from the devastation of the Black Death, political reorganization contributed to a burst of archival documentation that allows historians richly detailed glimpses of societies in transition. We will be reading selected scholarly articles and monographs covering such topics as persecution, prechristian cultural remnants, folk theologies, festival cultures, peasant revolts, heresy, and the advent of the diabolic witch.
Same as: HISTORY 338G

HISTORY 238J. The European Scramble for Africa: Origins and Debates. 4-5 Units.
Why and how did Europeans claim control of 70% of African in the late nineteenth century? Students will engage with historiographical debates ranging from the national (e.g. British) to the topical (e.g. international law). Students will interrogate some of the primary sources on which debaters have rested their arguments. Key discussions include: the British occupation of Egypt; the autonomy of French colonial policy; the mystery of Germany¿s colonial entry; and, not least, the notorious Berlin Conference of 1884-1885.
Same as: AFRICAAM 238J, HISTORY 338J

HISTORY 239C. Humanities Core: Great Books, Big Ideas -- Europe, Modern. 3 Units.
This three-quarter sequence asks big questions of major texts in the European and American tradition. What is a good life? How should society be organized? Who belongs? How should honor, love, sin, and similar abstractions govern our actions? What duty do we owe to the past and future? This third and final quarter focuses on the modern period, from the rise of revolutionary ideas to the experiences of totalitarianism and decolonization in the twentieth century. Authors include Locke, Mary Shelley, Marx, Nietzsche, Freud, Weber, Primo Levi, and Frantz Fanon.
Same as: DLCL 13, FRENCH 13, HUMCORE 13, PHIL 13

HISTORY 239F. Empire and Information. 4-5 Units.
How do states see? How do they know what they know about their subjects, citizens, economies, and geographies? How does that knowledge shape society, politics, identity, freedom, and modernity? Focus is on the British imperial state activities in S. Asia and Britain: surveillance technologies and information-gathering systems, including mapping, statistics, cultural schemata, and intelligence systems, to render geographies and social bodies legible, visible, and governable.
Same as: HISTORY 339F

HISTORY 239G. The Algerian Wars. 3-5 Units.
From Algiers the White to Algiers the Red, Algiers, the Mecca of the Revolutionaries in the words of Amilcar Cabral, this course offers to study the Algerian Wars since the French conquest of Algeria (1830-) to the Algerian civil war of the 1990s. We will revisit the ways in which the war has been narrated in literature and cinema, popular culture, and political discourse. A special focus will be given to the Algerian War of Independence (1954-1962). The course considers the racial representations of the war in the media, the continuing legacies surrounding the conflict in France, Africa, and the United States, from Che Guevara to the Black Panthers. A key focus will be the transmission of collective memory through transnational lenses, and analyses of commemorative events and movies. nReadings from James Baldwin, Assia Djebar, Albert Camus, Frantz Fanon, Mouloud Feraoun. Movies include "The Battle of Algiers," "Days of Glory," and "Viva Laldjérie." nTaught in English.
Same as: CSRE 249, FRENCH 249, JEWISHST 249

HISTORY 239H. Colonialism and Empire in Modern Europe. 5 Units.
To better understand the history of modern Europe within a global context, explores the following questions: What impact did more than a century of colonialism have on the social lives, cultural attitudes, political loyalties, and intellectual world views of European women and men during the nineteenth century? What accounts for the resiliency of empire during a period of rapid global change that witnessed the rise of modern democracy, economic liberalism, ethnic nationalism, and international socialism?.

HISTORY 239J. Work and Leisure in Nineteenth Century Britain. 4-5 Units.
This course charts the changes wrought by the Industrial Revolution, empire, and social factors in Britons' lives at work and at home in the nineteenth century. Readings will explore trade unionism and Chartism, urban migration, consumer culture, print culture, organized sports, shows, rational leisure" and the development of exhibitions and public museums. Students will gain a sense of how Britons worked and played in a century that gave birth to pastimes and institutions that continue to shape our own.
Same as: HISTORY 339J

HISTORY 239K. Sex, Death, and God in Modern Europe. 4-5 Units.
In the midst of social and political upheaval and transformation, people in modern Europe have grappled with central questions of human existence. What place does humanity occupy in the universe and in relation to God? How does life begin, and under what circumstances? What gives life its meaning? What is socially and morally acceptable--or transgressive? Is there life after death, and a spiritual realm distinct from the material world? This course will examine answers to these questions across the late eighteenth, nineteenth, and twentieth centuries, and the ways in which the questions people asked--and the conclusions they drew--were shaped by social, political, and religious assumptions, hopes, and fears.
Same as: HISTORY 339K

HISTORY 240. The History of Evolution. 4-5 Units.
This course examines the history of evolutionary biology from its emergence around the middle of the eighteenth century. We will consider the continual engagement of evolutionary theories of life with a larger, transforming context: philosophical, political, social, economic, institutional, aesthetic, artistic, literary. Our goal will be to achieve a historical rich and nuanced understanding of how evolutionary thinking about life has developed to its current form.
Same as: HISTORY 340

HISTORY 241C. History of Suggestion and Mind Control. 5 Units.
This course traces the history of suggestion and hypnosis from the birth of mesmerism in the late 18th-century to Cold War controversies over brainwashing, and recent debates on global terrorism and the ethics of technology. Born during the Age of Revolutions, the therapeutic system of mesmerism was quickly pushed to the margins of scientific practice as it was elaborated in the 19th-century but nonetheless remained a key determinant of human experience, politics, social relations, and medical practice. While reading secondary and primary texts, we will follow the evolution of various theories of trance and hypnotic induction alongside the development of scientific approaches to psychology in the West and the non-West to unravel the complex relationship between politics, social reform, labor, international relations, espionage, and indoctrination, and practices of suggestion and mind control.

HISTORY 242D. Knowledge and Information Infrastructures. 3-4 Units.
This course introduces historical, theoretical, and comparative perspectives on knowledge and information systems from the medieval world to the present. Cases include libraries, meteorology, climate science, the Internet, the World Wide Web, and social science data systems. It theorizes how infrastructures form, how they change, and how they shape (and are shaped by) social systems. The course ends with challenges to modern knowledge infrastructures, such as crowdsourcing, citizen science, and alternative and bogus knowledge.
Same as: STS 166

HISTORY 242G. Spaces and Practices of Natural History. 4-5 Units.
Gentleman scientists once practiced natural history by studying specimens collected from around the world, stored in cabinets of curiosity. From the 17th to 19th centuries, natural history moved out of the cabinet and into the field; these environments required new ways of thinking and different types of scientific workers. This course will track how new spaces, practices, and people became associated with natural history and explore how they shaped the content of the field and the social contours of science.
Same as: HISTORY 342G

HISTORY 242J. London Low Life in the Nineteenth Century. 5 Units.
(History 242J is an undergraduate course offered for 5 units; History 342J is a graduate course offered for 4-5 units.) London began the nineteenth century as a city of one million, but was home to over six million people by the century¿s end. How did Londoners in the nineteenth century respond to the challenges and temptations of life in a growing metropolis? How did government and reformers try to influence and control city dwellers¿ behavior? This class seeks to answer these questions by exploring life in Britain¿s capital in the nineteenth century, using the digital database ¿London Low Life¿ as a guide. Contemporary street literature, night-life guides, pamphlets, broadsides, images, reformer¿s tracts, and public-interest journalism are some of the sources that will give us a window into vice, virtue, and daily life in London during a period of great uncertainty and change.

HISTORY 243C. People, Plants, and Medicine: Colonial Science and Medicine. 4-5 Units.
Explores the global exchange of knowledge, technologies, plants, peoples, disease, and medicines. Considers primarily Africans, Amerindians, and Europeans in the eighteenth-century West but also takes examples from other knowledge traditions. Readings treat science and medicine in relation to voyaging, colonialism, slavery, racism, plants, and environmental exchange. Colonial sciences and medicines were important militarily and strategically for positioning emerging nation states in global struggles for land and resources.
Same as: HISTORY 343C

HISTORY 243G. Tobacco and Health in World History. 4-5 Units.
Cigarettes are the world's leading cause of death--but how did we come into this world, where 6 trillion cigarettes are smoked every year? Here we explore the political, cultural, and technological origins of the cigarette and cigarette epidemic, using the tobacco industry's 80 million pages of secret documents. Topics include the history of cigarette advertising and cigarette design, the role of the tobacco industry in fomenting climate change denial, and questions raised by the testimony of experts in court.
Same as: HISTORY 343G

HISTORY 243S. Human Origins: History, Evidence, and Controversy. 4-5 Units.
Research seminar. Debates and controversies include: theories of human origins; interpretations of fossils, early art, and the oldest tools; the origin and fate of the Neanderthals; evolutionary themes in literature and film; visual rhetoric and cliché in anthropological dioramas and phyletic diagrams; the significance of hunting, gathering, and grandmothering; climatological theories and neocatastrophic geologies; molecular anthropology; the impact of racial theories on human origins discourse. Background in human evolution not required.
Same as: HISTORY 443A

HISTORY 244C. The History of the Body in Science, Medicine, and Culture. 4-5 Units.
The human body as a natural and cultural object, historicized. The crosscultural history of the body from the 18th century to the present. Topics include: sciences of sex and race; medical discovery of particular body parts; human experimentation, foot binding, veiling, and other bodily coverings; thinness and obesity; notions of the body politic.
Same as: HISTORY 444C

HISTORY 244F. Intersectional Design: An Expanded Approach to Gender in Tech. 4-5 Units.
This d-school seminar prototypes concepts and methods for "inclusive" design. From the moment we arrive on the planet, gender shapes our perception of the world. Examples of products (including objects, services, and systems) gone awry will serve as prompts for design activities, challenges, and discussions on gender issues to illustrate the different needs of women, men, and gender-fluid people. Class sessions mix use case explorations with design methodology, design thinking abilities, and guest speakers from technology, design, and academia. Students will be asked to work in interdisciplinary teams on several design challenges, culminating in the development of a toolkit for inclusive design. Methods will interact in crucial ways to create "intersectional thinking" (i.e., to consider how gender, ethnicity, sexuality, socio-economic status, etc. work together to require new solutions in design). Topics include: algorithms, media, seat belts for pregnant women, robotics, assistive technologies, tech for developing worlds, video games, urban/rural design, software development, and many more. Admission by application only. Visit d.school.stanford.edu/classes for more information.
Same as: FEMGEN 344F, HISTORY 344F

HISTORY 245C. Casablanca - Algiers - Tunis : Cities on the Edge. 3-5 Units.
Casablanca, Algiers and Tunis embody three territories, real and imaginary, which never cease to challenge the preconceptions of travelers setting sight on their shores. In this class, we will explore the myriad ways in which these cities of North Africa, on the edge of Europe and of Africa, have been narrated in literature, cinema, and popular culture. Home to Muslims, Christians, and Jews, they are an ebullient laboratory of social, political, religious, and cultural issues, global and local, between the nineteenth and twenty-first centuries. We will look at mass images of these cities, from films to maps, novels to photographs, sketching a new vision of these magnets as places where power, social rituals, legacies of the Ottoman and French colonial pasts, and the influence of the global economy collude and collide. Special focus on class, gender, and race.
Same as: AFRICAAM 236B, COMPLIT 236A, CSRE 140S, FRENCH 236, FRENCH 336, URBANST 140F

HISTORY 245G. Law and Colonialism in Africa. 4-5 Units.
Law in colonial Africa provides an opportunity to examine the meanings of social, cultural, and economic change in the anthropological, legal, and historical approaches. Court cases as a new frontier for the social history of Africa. Topics: meanings of conflicts over marriage, divorce, inheritance, property, and authority.
Same as: HISTORY 348D

HISTORY 246F. The African State: An Inconvenient History. 5 Units.
This course offers a history of the formation of postcolonial African states and how they came to be the way they are now. It will explore what exactly is meant by a "state", as well as examine the forms of governments that existed within Africa prior to, and during colonial rule. The course looks at structures and institutions the colonial state erected and what effects they had on their succeeding African states.

HISTORY 248. Religion, Radicalization and Media in Africa since 1945. 4-5 Units.
What are the paths to religious radicalization, and what role have media- new and old- played in these conversion journeys? We examine how Pentecostal Christians and Reformist Muslims in countries such as South Africa, Nigeria, Sudan, and Ethiopia have used multiple media forms- newspapers, cell phones, TV, radio, and the internet- to gain new converts, contest the authority of colonial and post-colonial states, construct transnational communities, and position themselves as key political players.
Same as: AFRICAST 248, AFRICAST 348, HISTORY 348, RELIGST 230X, RELIGST 330X

HISTORY 248D. Histories of Race in Science and Medicine at Home and Abroad. 4 Units.
This course has as its primary objective, the historical study of the intersection of race, science and medicine in the US and abroad with an emphasis on Africa and its Diasporas in the US. By drawing on literature from history, science and technology studies, sociology and other related disciplines, the course will consider the sociological and cultural concept of race and its usefulness as an analytical category. The course will explore how the study of race became its own ¿science¿ in the late-Enlightenment era, the history of eugenics--a science of race aimed at the ostensible betterment of the overall population through the systematic killing or "letting die" of humanity¿s "undesirable" parts, discuss how the ideology of pseudo-scientific racism underpinned the health policies of the French and British Empires in Africa, explore the fraught relationship between race and medicine in the US, discuss how biological notions of race have quietly slipped back into scientific projects in the 21st century and explore how various social justice advocates and scholars have resisted the scientific racisms of the present and future and/or proposed new paths towards a more equitable and accessible science.
Same as: AFRICAAM 122F, AFRICAST 122F, CSRE 122F

HISTORY 249. The Mamluks: Slave-Soldiers and Sultans of Medieval Egypt. 3-5 Units.
Known as ghulam or mamluk in Arabic, the slave-soldier was a ubiquitous phenomenon in the world of medieval Islam. Usually pagan steppe nomads, mamluks were purchased in adolescence, converted to Islam, taught Arabic, and trained to lead armies. Sometimes manumitted and sometimes not, in either case mamluks rose to positions of privilege and prominence in numerous regimes in the medieval Middle East.nnNowhere was the mamluk institution so fundamental as it was in Egypt between 1250 and 1517 CE, when Cairo was ruled by these slave-soldiers, their ranks constantly renewed by imports of new mamluks from the Black Sea and Caucuses. Born in the age of the crusades and ultimately conquered by the Ottoman Empire, the Mamluk Sultanate can be understood as a bridge between the worlds of medieval and early modern Islam, as well as between East and West, sitting astride the major Nile-Red Sea route that linked the Mediterranean world to that of the Indian Ocean and beyond. This class will investigate the rise and fall of the Mamluk Sultanate in Egypt and its key roles in the commercial, diplomatic, and political history both of the medieval Middle East and the wider world.
Same as: GLOBAL 102, GLOBAL 210, HISTORY 349A

HISTORY 250A. History of Native Americans in California. 3-5 Units.
This course examines the political histories and cultural themes of Native Americans in California, 1700s1950s. Throughout the semester we will focus on: demographics, diversity of tribal cultures; regional environmental backgrounds; the Spanish Era and missionization; the Mexican Era and secularization; relations with the United States Government and the State of California, including the gold rush period, statehood, unratified treaties, origin of reservations/rancherias, and other federal policies, e.g., Allotment Act, Indian Reorganization Act and termination.
Same as: CSRE 117S, NATIVEAM 117S

HISTORY 250E. Taxing America: From the Puritans to Prop. 13. 5 Units.
Taxes have shaped American society and politics since before the Revolution. And they've been extremely controversial just as long. In this course we'll try to understand American society and government by looking at the politics of taxation from the colonial period to the twentieth century. Topics include the legitimacy of taxation, the constitution, economic development, inequality, gender, and race.

HISTORY 251C. The American Enlightenment. 5 Units.
The eighteenth century saw the rise of many exciting new political, religious, and scientific theories about human happiness, perfectibility, and progress that today we call "the Enlightenment." Most people associate the Enlightenment with Europe, but in this course we will explore the many ways in which the specific conditions of eighteenth-century North America --such as slavery, the presence of large numbers of indigenous peoples, a colonial political context, and even local animals, rocks, and plants--also shaped the major questions and conversations of the people who strove to become "enlightened." We'll also explore how American Enlightenment ideas have profoundly shaped the way Americans think today about everything from politics to science to race. The class is structured as lecture and discussion, with deep reading in primary sources from the seventeenth and eighteenth centuries.
Same as: AMSTUD 251C

HISTORY 251J. The End of American Slavery, 1776-1865. 4-5 Units.
How did the institution of American slavery come to an end? The story is more complex than most people know. This course examines the rival forces that fostered slavery's simultaneous contraction in the North and expansion in the South between 1776 and 1861. It also illuminates, in detail, the final tortuous path to abolition during the Civil War. Throughout, the course introduces a diverse collection of historical figures, including seemingly paradoxical ones, such as slaveholding southerners who professed opposition to slavery and non-slaveholding northerners who acted in ways that preserved it. Historical attitudes toward race are a central integrative theme.
Same as: AFRICAAM 251J, AMSTUD 251J, HISTORY 351J

HISTORY 252B. Diplomacy on the Ground: Case Studies in the Challenges of Representing Your Country. 5 Units.
The tragic death of Ambassador Chris Stevens has recently highlighted the dangers of diplomacy in the modern era. This class will look at how Americans in embassies have historically confronted questions such as authoritarian rule, human rights abuses, violent changes of government, and covert action. Case studies will include the Berlin embassy in the 1930s, Tehran in 1979, and George Kennan's experiences in Moscow, among others. Recommended for students contemplating careers in diplomatic service. *IR majors taking this course to fulfill the IR WIM requirement should enroll in INTNLREL174. As space is limited, first-year students must obtain the instructor's prior consent before enrolling.
Same as: INTNLREL 174

HISTORY 252C. The Old South: Culture, Society, and Slavery. 5 Units.
This course explores the political, social, and cultural history of the antebellum American South, with an emphasis on the history of African-American slavery. Topics include race and race making, slave community and resistance, gender and reproduction, class and immigration, commodity capitalism, technology, disease and climate, indigenous Southerners, white southern honor culture, the Civil War, and the region's place in national mythmaking and memory.
Same as: AFRICAAM 252C, CSRE 252C

HISTORY 252E. From Gold Rush to Google Bus: History of San Francisco. 4 Units.
This class will examine the history of San Francisco from Native American and colonial settlement through the present. Focus is on social, environmental, and political history, with the theme of power in the city. Topics include Native Americans, the Gold Rush, immigration and nativism, railroads and robber barons, earthquake and fire, progressive reform and unionism, gender, race and civil rights, sexuality and politics, counterculture, redevelopment and gentrification. Students write final project in collaboration with ShapingSF, a participatory community history project documenting and archiving overlooked stories and memories of San Francisco. (Cardinal Course certified by the Haas Center).
Same as: AMSTUD 150X, URBANST 150

HISTORY 253F. Thinking the American Revolution. 4-5 Units.
No period in American history has generated as much creative political thinking as the era of the American Revolution. This course explores the origins and development of that thought from the onset of the dispute between Great Britain and its American colonies over liberty and governance through the debates surrounding the construction and implementation of the United States federal Constitution.
Same as: HISTORY 353F

HISTORY 253L. Caring Labor in the United States. 3-5 Units.
Who cares for America's children, elderly, and infirm? How is the structure of these labor forces influenced by ideologies of race, gender, and class? Beginning with theories of reproductive and caring labor, we examine the history of coerced and enslaved care and then caring as free labor. We will look at housework, child care, nursing, and elder care, among others, and will also examine how activists, policy makers, and workers have imagined new ways of performing and valuing care.
Same as: AFRICAAM 253, FEMGEN 253L

HISTORY 253P. Before the Model Minority: South Asians in the US. 5 Units.
The model minority myth has been used to create a wedge between Asian and Black people in the United States, and masks the histories and lives of itinerant South Asian traders, laborers, and farmers. Beginning in the 1860s, South Asians (mostly male, and often undocumented) traveled to major ports in the US, such as New York City, New Orleans, and the California coast, where they found working-class jobs and married Puerto Rican, African American, Creole, and Mexican women. Some South Asians were double migrants, first brought to British colonies in the Caribbean and South America through indentured servitude, and later migrated to the United States. Their life stories expand to the racial history of the United States by looking beyond a Black/white binary. nnBy juxtaposing immigrant stories with exclusionary US immigration laws, the course touches upon major themes of migration, capitalism, surveillance, race and racism, multiracial couples and communities, resistance, intersectional activism, borderlands and cities in the US, and the formation of national identity. During the quarter, we will seek to connect experiences in the past with contemporary issues of political culture in the United States to engage with the continuing challenge of locating and attaining self-definition, justice, and social progress in a fraught and divided world.
Same as: CSRE 153R

HISTORY 254. Popular Culture and American Nature. 5 Units.
Despite John Muir, Aldo Leopold, and Rachel Carson, it is arguable that the Disney studios have more to do with molding popular attitudes toward the natural world than politicians, ecologists, and activists. Disney as the central figure in the 20th-century American creation of nature. How Disney, the products of his studio, and other primary and secondary texts see environmentalism, science, popular culture, and their interrelationships.

HISTORY 254D. Religion and War in America. 4 Units.
Scholars have devoted much attention to wars in American history, but have not agreed as to whether religion was a major cause or simply a cover for political, economic, and other motives. We will compare interpretations that leave religion out, with those that take it into account. We will also look at the impact of war on the religious lives of ordinary Americans. We will examine both secondary as well as primary sources, beginning with King Philip's War in the 17th century, and ending with the "War on Terror" in the present day.
Same as: AMSTUD 105R, CSRE 105, HISTORY 354D, RELIGST 105

HISTORY 254G. The Causes and Consequences of the American Revolution. 5 Units.
Why did Britain's North American colonies declare independence from an empire they had long revered? What did the American Revolution mean for the people who experienced it? In this course we will explore the explosive origins of the American republic. Topics: revolutionary ideology, empire, the federal constitution, slavery, social conflict, and the international consequences of the American Revolution.

HISTORY 255. Martin Luther King, Jr.: The Social Gospel and the Struggle for Justice. 5 Units.
The religious and political thought of Martin Luther King, Jr., using the documentary resources of the King Institute at Stanford. His social gospel Christianity and prophetic message of radical social transformation. Readings include the forthcoming *The Papers of Martin Luther King, Jr., Volume VI: Advocate of the Social Gospel*.

HISTORY 255B. Contested Masculinities in Modern America. 5 Units.
This course examines masculinity in the twentieth-century United States across academic disciplines. Suspending the idea that manhood is biologically fixed or innate, this course presents masculinity as socially constructed and in a state of ongoing contest and crisis. Students will explore what it has meant (and means) to be a man in America, how masculinity has related to femininity and feminism, and masculinity's intersection with other identities like race, ethnicity, religion, and sexual orientation. Assigned materials include an array of readings in History, African and African American Studies, Gender and Women's Studies, Art History, and American Studies, along with documentary and fictional films.
Same as: FEMGEN 255B

HISTORY 255E. Education, Race, and Inequality in African American History, 1880-1990. 3-5 Units.
Seminar. The relationship among race, power, inequality, and education from the 1880s to the 1990s. How schools have constructed race, the politics of school desegregation, and ties between education and the late 20th-century urban crisis.
Same as: AFRICAAM 116, AMSTUD 216, CSRE 216X, EDUC 216

HISTORY 256E. The American Civil War: The Lived Experience. 5 Units.
What was it like to live in the United States during the Civil War? This course uses the lenses of racial/ethnic identity, gender, class, and geography (among others) to explore the breadth of human experience during this singular moment in American history. It illuminates the varied ways in which Americans, in the Union states and the Confederate states, struggled to move forward and to find meaning in the face of unprecedented division and destruction.
Same as: AFRICAAM 256E, AMSTUD 256E

HISTORY 256G. Constructing Race and Religion in America. 4-5 Units.
This seminar focuses on the interrelationships between social constructions of race and social interpretations of religion in America. How have assumptions about race shaped religious worldviews? How have religious beliefs shaped racial attitudes? How have ideas about religion and race contributed to notions of what it means to be "American"? We will look at primary and secondary sources and at the historical development of ideas and practices over time.
Same as: AFRICAAM 236, AMSTUD 246, CSRE 246, HISTORY 356G, RELIGST 246, RELIGST 346

HISTORY 257C. LGBTQ History of the United States. 4-5 Units.
An introductory course that explores LGBT/Queer social, cultural, and political history in the United States. By analyzing primary documents that range from personal accounts (private letters, autobiography, early LGBT magazines, and oral history interviews) to popular culture (postcards, art, political posters, lesbian pulp fiction, and film) to medical, military, and legal papers, students will understand how the categories of gender and sexuality have changed over the past 150 years. This class investigates the relationship among queer, straight and transgender identities. Seminar discussions will question how the intersections of race, class, gender, and sexuality influenced the construction of these categories.
Same as: FEMGEN 140D, FEMGEN 240D

HISTORY 257E. History of Conservatism. 4-5 Units.
What is conservatism in America? Where did it come from, and where might it be going? Looking at conservatism as a political, social, and intellectual movement, we will consider these questions by reading primary and secondary sources and archival material. Suitable for students of any or no particular political persuasion. No prerequisites or background required, although the reading will be considerable.
Same as: HISTORY 357E

HISTORY 258. History of Sexual Violence in America. 4-5 Units.
This undergraduate/graduate colloquium explores the history of sexual violence in America, with particular attention to the intersections of gender and race in the construction of rape. We discuss the changing definitions of sexual violence in law and in cultural representations from early settlement through the late-twentieth century, including slavery, wartime and prison rape, the history of lynching and anti-lynching movements, and feminist responses to sexual violence. In addition to introducing students to the literature on sexual violence, the course attempts to teach critical skills in the analysis of secondary and primary historical texts. Students write short weekly reading responses and a final paper; no final exam; fifth unit research or CEL options.nnLimited enrollment, permission of instructor required. Submit application form and indicate interest in CEL option. Priority admission to History, FGSS, CSRE, AFRICAAM, and AMSTUD declared majors and minors. (Cardinal Course certified by the Haas Center).
Same as: AFRICAAM 192, AMSTUD 258, CSRE 192E, FEMGEN 258, FEMGEN 358, HISTORY 358

HISTORY 258B. History of Education in the United States. 3-5 Units.
How education came to its current forms and functions, from the colonial experience to the present. Focus is on the 19th-century invention of the common school system, 20th-century emergence of progressive education reform, and the developments since WW II. The role of gender and race, the development of the high school and university, and school organization, curriculum, and teaching. Class meetings will typically end around 1:50pm.
Same as: AMSTUD 201, EDUC 201

HISTORY 258E. History of School Reform: Origins, Policies, Outcomes, and Explanations. 3-5 Units.
Strongly recommended for students in the POLS M.A. program; others welcome. Focus is on 20th-century U.S. Intended and unintended patterns in school change; the paradox of reform that schools are often reforming but never seem to change much; rhetorics of reform and factors that inhibit change. Case studies emphasize the American high school. This course is strongly recommended for POLS students pursuing K -12 leadership.
Same as: EDUC 220D

HISTORY 259A. Poverty and Homelessness in America. 4-5 Units.
Service learning. Students participate in a two quarter internship at a local shelter for homeless individuals or families. Readings include historical, social science, and social commentary literature. Service Learning Course (certified by Haas Center).

HISTORY 259E. American Interventions, 1898-Present. 5 Units.
This class seeks to examine the modern American experience with limited wars, beginning with distant and yet pertinent cases, and culminating in the war in Iraq. Although this class will examine war as a consequence of foreign policy, it will not focus primarily on presidential decision making. Rather, it will place wartime policy in a broader frame, considering it alongside popular and media perceptions of the war, the efforts of antiwar movements, civil-military relations, civil reconstruction efforts, and conditions on the battlefield. We will also examine, when possible, the postwar experience.
Same as: HISTORY 359E, INTNLREL 168A

HISTORY 260K. Exploring American Religious History. 4 Units.
This course will trace how contemporary beliefs and practices connect to historical trends in the American religious landscape.
Same as: AMSTUD 91, CSRE 91, RELIGST 91

HISTORY 260P. American Protest Movements, Past and Present. 5 Units.
(History 260P is an undergraduate course offered for 5 units; History 360P is a graduate course offered for 4-5 units.) Societal change comes only when individuals and groups speak out, perseverantly, against prevailing norms. This course examines the overlapping histories of three nineteenth-century protest movements: antislavery, women¿s rights, and temperance. It focuses on the arguments and tactics used by these movements to persuade Americans to oppose the status quo, and it examines the points of agreement and disagreement that arose within and among these movements. Ultimately, the course connects these past protest movements to more recent analogs, such as Black Lives Matter, ERA ratification, and marijuana legalization. Throughout the course, race, gender, and class serve as central analytical themes.

HISTORY 261. Race, Gender, and Class in Jim Crow America. 5 Units.
How African American life and labor were redefined from 1890-1954. Topics include family life, work, leisure patterns, transnational relations, cultural expressions emphasizing literature and music, resistance and social activisim. Primary sources including visual materials, literature, and film; historical interpretations of the period.

HISTORY 261D. Democracy in Crisis: Historical Perspectives. 5 Units.
Scholars and pundits warn that American democracy is in crisis. But what is at stake? How new is this crisis? And can historical analysis offer insight into our present predicament?nnThis course will examine five historical crises of democracy: the Constitutional Convention, the Civil War, the Progressive Movement, World War II, and the protest movements of the 1960s. For each crisis, we will explore the political, cultural, and intellectual factors that defined and resolved (or failed to resolve) each crisis.

HISTORY 261E. Introduction to Asian American History. 5 Units.
This course provides an introduction to the field of Asian American history. Tracing this history between the arrival of the first wave of Asian immigrants to the US in the mid-nineteenth century and the present, we foreground the voices and personal histories of seemingly everyday Asian Americans. In the process, the course disrupts totalizing national historical narratives that center the US nation-state and its political leaders as the primary agents of historical change.
Same as: AMSTUD 261W, ASNAMST 261

HISTORY 261G. Presidents and Foreign Policy in Modern History. 5 Units.
Nothing better illustrates the evolution of the modern presidency than the arena of foreign policy. This class will examine the changing role and choices of successive presidential administrations over the past century, examining such factors as geopolitics, domestic politics, the bureaucracy, ideology, psychology, and culture. Students will be encouraged to think historically about the institution of the presidency, while examining specific case studies, from the First World War to the conflicts of the 21st century.
Same as: INTNLREL 173

HISTORY 263C. Nature's Bounty: Natural Resources and U.S. Political Economy. 5 Units.
The United States has long been among the wealthiest countries in the world, and its economic life has been closely tied to natural resource extraction. Taking the relation between these two historical facts as a question to be examined rather than a truism to be repeated, this course considers the histories of fossil fuels, plantation agriculture, farming, forestry, fishing, and nuclear energy as they relate to wealth, poverty, and economic thought.

HISTORY 263D. Junipero Serra. 3-5 Units.
Why is Junipero Serra considered a representative figure of California? How have assessments of Serra evolved over the last 200 years? Why does his name appear so often on our campus? In this course we will consider these and other questions in terms of Spanish empire, Native American history, California politics of memory and commemoration, among other approachs. Requirements include weekly reading, class discussion, a field trip to Carmel Mission, short writing assignments, and a formal debate on the ethics naming university or public buildings after historical figures with contested pasts. Taught in English.

HISTORY 264. History of Prisons and Immigration Detention. 4-5 Units.
This course will explore the history of the growing prison and immigration detention systems in the United States. They will pay particular attention to how they developed and how they affect different populations.
Same as: AMSTUD 264, CSRE 264, HISTORY 364

HISTORY 264D. Modern America in Historical Perspective. 5 Units.
.
Same as: SIW 185

HISTORY 267E. Martin Luther King, Jr. - His Life, Ideas, and Legacy. 4-5 Units.
Using the unique documentary resources and publications of Stanford's King Research and Education Institute, this course will provide a general introduction to King's life, visionary ideas, and historical significance. In addition to lectures and discussions, the course will include presentations of documentaries such as Eyes on the Prize. Students will be expected to read the required texts, participate in class discussions, and submit a research paper or an audio-visual project developed in consultation with the professor.
Same as: AFRICAAM 267E, AMSTUD 267E

HISTORY 269F. Modern American History: From Civil Rights to Human Rights. 4-5 Units.
(History 269F is an undergraduate course offered for 5 units; History 369F is a graduate course offered for 4-5 units.) This focuses on American social justice movements during the years since the passage of landmark civil rights legislation during the 1960s, with particular emphasis on efforts to extend rights to all people.
Same as: HISTORY 369F

HISTORY 270E. Queer History of the Americas. 4-5 Units.
This course will examine LGBT history in the Americas. It traces the development of homosexuality as a category of analysis; the construction of trans identity; the ways in which same-sex desire and gender identity were regulated over time; and queer people's struggles for recognition, liberation, and, ultimately, rights.
Same as: HISTORY 370E

HISTORY 270F. History of the Police in the United States. 5 Units.
How did police come to have the power to use violence? Who counts as a police officer and why? Topics include: growth of professional policing, creation of private police forces and vigilantism, slave patrols, political economy of policing, global policing, and cultural depictions of police. The entanglement of race, class, gender, and state power with police work is central.

HISTORY 271. Mexicans in the United States. 5 Units.
This course explores the lives and experiences of Mexicans living in the United States, from 1848 to the present. Themes and topics include: the legacies of colonialism, the Mexican-American War, transnational migration, the effects of economic stratification, race and racialization, and the impact of sexual and gender ideologies on the lives of Mexicans residing north of the border.
Same as: AMSTUD 271, CHILATST 171, CSRE 171H

HISTORY 272. Colonial Mexico: Images and Power. 3-5 Units.
How did images maintain, construct, or transform political power during the conquest and colonization of Mexico? The creation and destruction of visual materials in this period had a complicated relationship with power. The pictographic codices that celebrated the expansive Aztec Empire were created after its fall; and the conquistadors' indigenous allies painted some of the most triumphalist narratives of the conquest. Friars accused indigenous peoples of "idolatry" both to justify the destruction of their images and objects, and to construct legal defenses of their humanity. Colonial authorities frequently claimed Afro-Catholic festivals were seditious. In light of such complexity, official histories that recount the top-down consolidation of royal and viceroyal power are suspiciously simple. What counter-narratives do images and other visual phenomena from this tumultuous period offer? This course introduces students to major texts from Colonial Mexico (royal chronicles, conquistadors' tales, letters, poems, festival accounts) alongside a fascinating trove of images (painted codices with Nahuatl texts, feather mosaics, and indigenous heraldry) and considers how experiences of images and spectacles were transformed into textual accounts ("ekphrasis" or the literary device of description). Taught in Spanish.
Same as: HISTORY 372B, ILAC 214, ILAC 314

HISTORY 273. The European Expansion. 4-5 Units.
The relationship between European monarchies and their colonial domains from the 16th-18th centuries. Reasons for expansion, methods, and results. Case studies include the Spanish, Portuguese, Dutch, French, and English domains in Africa, Asia, and the Americas. Readings include primary and secondary sources.
Same as: HISTORY 373A

HISTORY 273E. The Emergence of Nations in Latin America: Independence Through 1880. 4-5 Units.
This course provides an introduction to the main themes of nineteenth-century Latin American history, including independence from Spain, the emergence of various nation-states, and the development of a new social, political, and economic order in the region.
Same as: HISTORY 373E

HISTORY 274C. The History of Mexicans and Mexican Americans. 4-5 Units.
This course will explore the history of Mexican migrants and Mexican Americans from 1848 to the present.
Same as: CHILATST 274, HISTORY 374C

HISTORY 274E. Urban Poverty and Inequality in Latin America. 5 Units.
We examine historical issues of social inequality, poverty, crime, industrialization, globalization, and environment in major Latin American cities.

HISTORY 278B. The Historical Ecology of Latin America. 4-5 Units.
What role did the natural environment play in the emergence of Latin America as a distinct geographical and socio-cultural world region? How do we analyze the historical relationship between the regions rich and seemingly abundant natural resources and its status as "underdeveloped"? What historical consequences did this relationship have and what alternative, more sustainable developmental paths can we envision for the future in light of the past that we will study? In this course, students will become familiar with the historiography on Latin America (with emphasis on Mexico) that has explored these questions through a variety of approaches, methodologies and points of view.
Same as: HISTORY 378

HISTORY 279. Latin American Development: Economy and Society, 1800-2014. 4-5 Units.
The newly independent nations of Latin America began the 19th century with economies roughly equal to the U.S. and Canada. What explains the economic gap that developed since 1800? Why are some Latin American nations rich and others poor and how have societies changed over time? Marxist, dependency, neoclassical, and institutionalist interpretive frameworks are explored. The effects of globalization on Latin American economic growth, autonomy, and potential for social justice are examined and debated.
Same as: HISTORY 379

HISTORY 279B. Potatoes, Coca, and Tamales: Food in Latin American History. 5 Units.
The history of Latin America is profoundly marked by the production, circulation, preparation, and consumption of food in its most different forms: as a staple food, drugs, ethnic dishes, drinks, etc. This course examines the cultural, social, economic, and environmental significance of food throughout the history of the region, from pre-Columbian times to the present. By selecting specific examples of ingredients, spices, dishes, cooking practices, and dietary habits, we will explore the role of new foods in shaping empires and global trading networks, the global circulation of Latin America's food commodities and internationalization of its cuisine, and food as an expression of identities based on race, class, gender, and nationality, linking them to major trends in the region's history. Students are welcome to explore themes of their interest related to the course topic in their assignments.

HISTORY 279D. Modern Brazil: Economy, Society & Culture. 4-5 Units.
This course addresses the history of modern Brazil from independence in 1822 to the present day. The class focuses on theories of economic development, social structure and change, and cultural life in Brazil's diverse regions.
Same as: HISTORY 379D

HISTORY 280B. The Birth of Islam: Authority, Community, and Resistance. 3-5 Units.
This course explores the historical problem of how authority and community (in both the political and religious sense) were defined and challenged in the early Islamic period. Chronological topics covered include: the political, cultural, and religious world of Late Antiquity into which Muhammad was born; the crystallization of a small community of believers who supported Muhammad's message of radical monotheism and aided him in the conquest and conversion of the Arabian Peninsula; the problems of legacy and leadership in the community of the faithful after Muhammad's death; the Arabo-Islamic conquests beyond Arabia during the 7th and early 8th centuries and the establishment of the first Islamic empire under the rule of the Umayyad clan; the Sunni/Shi'a split (and further splits in Shi'ism); the revolution of 750 A.D. and overthrow of the Umayyads by the 'Abbasids; the flourishing of a sophisticated world of learning and culture under the 'Abbasids; and the waning of the 'Abbasids empire in the tenth century and political reconfiguration of the Islamic lands.
Same as: GLOBAL 134, GLOBAL 234, HISTORY 380B

HISTORY 281A. Twentieth-Century Iraq: A Political and Social History. 5 Units.
The colonial experience, creation of the modern Iraqi state, and transition to military dictatorship. Political movements, religious and tribal elements, and their relation to the state. Geopolitical context.

HISTORY 281E. Oil, Maps, Data: Technology in the Middle East. 4-5 Units.
This course introduces students to a wide range of humanities and social science concepts pertaining to the global study of technology with an emphasis on the Middle East in the 19th, 20th and 21st-centuries. The main body of the course focuses on three case studies namely oil, mapping, and the internet through which issues of power, race, colonialism, financial imperialism, violence, and surveillance will be explored. This colloquium provides a unique perspective on contemporary debates about the politics and ethics of technology through a study of their global circulation.
Same as: HISTORY 381E

HISTORY 281J. The Road to Global Jihad: From Radical Networks to Militant Islamism. 4-5 Units.
This course traces the historical development of Islamically-oriented armed networks without theologizing or essentializing their nature, organizational structures, activities, or violence. We will cover the scholarly studies on militant organizations such as Egyptian Jihad, Al-Gama'at Al-Islamiyya, Taliban, Al-Qaeda, IS(IS), Hizbullah with their sectarian, ideological, and strategic diversity. The trajectory of militant Islamism as various offshoots from earlier global radical Muslim networks will be of critical focus. Basic jihadi texts and historical surveys and monographs on organizations will form the major components of the readings.".

HISTORY 281K. Departures: Late Ottoman Displacements of Muslims, Christians, and Jews, 1853-1923. 5 Units.
In the late nineteenth and early twentieth centuries, millions of people moved into and out of the Ottoman Empire, sometimes voluntarily and sometimes under extremely violent circumstances. More often than not, they moved in groups that were religiously defined. This course examines how these developments shaped the future of the modern Middle East, Balkans, and beyond. Questions include: How did migration and the idea of the nation shape each other? What does it mean to call a group or a migration "religious"? Why did certain types of diversity become a "problem," in the eyes of the state? What caused these population displacements? What can this topic teach us about today's mass migrations?.
Same as: JEWISHST 281K

HISTORY 282. The United States and the Middle East since 1945. 4-5 Units.
Since the end of WW II, U.S. interests in the Middle East have traditionally been defined as access to oil at a reasonable price, trade and markets, containing the influence of the Soviet Union, and the security of Israel. Is this the full range of U.S. interests? How has the pursuit of these interests changed over time? What forces have shaped U.S. policy? What is the impact of U.S. policy on the region itself?.
Same as: HISTORY 382

HISTORY 282J. Disasters in Middle Eastern History. 5 Units.
(History 282J is an undergraduate course offered for 5 units; History 382J is a graduate course offered for 4-5 units.) nnThis course explores the history of disasters in the Middle East from the early modern period to the mid-20th-century. We will trace the evolving meanings of disasters and misfortunes by focusing on critical moments -- plagues, fires, earthquakes, wars -- to examine how people have responded to these events, labeled them, and devised strategies to live with or forget them. The course readings follow the evolution of policies and norms together with the articulation of new forms of knowledge and expertise in the wake of catastrophe. Additionally, particular attention will be paid to how modern conceptions of disaster relate to older understandings of apocalypse, as well as to various strands of "disaster reformism," when rethinking tragedy and time helped assert radical agendas for reforming political, economic, social, communal, racial, and gender relations while remodeling social science and intellectual life. The course focuses on various trajectories of disaster thinking in Arabic, Turkish, Greek, Armenian, and Hebrew.

HISTORY 283C. The Medieval Middle East: Crusaders, Turks, and Mongols. 3-5 Units.
This course surveys the history of the Middle East from c.950 A.D. to c.1517 A.D., placing particular emphasis on the following questions: What were the social, cultural, and political contexts for conversion to Islam in the Middle Ages? How did the interplay of nomadic and sedentary peoples shape Middle Eastern history? What were the nature of Christian-Muslim relations and the fate of religious minorities in an age of Crusade and Jihad? What were the conditions for the rise, flourishing, and eventual collapse of a ¿world-system¿ in this period (with the lands of the Middle East serving as its nexus)? Chronological topics include: the arrival in the Middle East of the Seljuk Turks, new adopters of Islam and recent nomads; the western European crusades to the Holy Land and the establishment of so-called ¿Crusader States¿ in Syria; the subjugation of Iran to pagan Mongols¿and the Mongols¿ eventual conversion to Islam; the rise to power of a dynasty of Turkish slave-soldiers (mamluks) in Cairo and the political reunification of Syria and Egypt under their rule. Readings will consist of both primary sources and works of modern scholarship.
Same as: GLOBAL 133, GLOBAL 233, HISTORY 383C

HISTORY 283F. Capital and Crisis in the Middle East and the World. 5 Units.
(History 283F is an undergraduate course for 5 units; History 383F is a graduate course for 4-5 units.) How do economies change in times of crisis? How do economic crises intersect with pandemics, violence and environmental disaster to redefine the workings of capital? This course approaches these questions through critical reading in the histories of capitalism, crisis, and intersections between legal history and political economy, using the Middle East region as a starting point for the study of global phenomena. We will examine the ways in which constructions like race and ethnicity, gender, and the human/non-human divide have mediated the social and spatial expansion of capital in the region, especially through legal categories and instruments that transform rapidly in times of crisis. Temporally, we will focus our examination between two moments of economic crisis: the ¿long depression¿ of the late nineteenth century and the financial crisis of 2008. We will ground our historical reading in attention to current events, in particular the Middle East¿s ongoing experience of the pandemic-induced global financial crisis of 2020.

HISTORY 283J. Global Islam. 5 Units.
(Undergraduates, enroll in 283J; Graduates, enroll in 383J.) Explores the history and politics of Islam in Africa, Asia, Europe, the Middle East and the Americas --- and of the novel connections that have linked Muslim communities across the globe in modern times.

HISTORY 284. The Ottoman Empire: Conquest, Coexistence, and Coffee. 4-5 Units.
(History 284 is an undergraduate course offered for 5 units; History 384 is a graduate course offered for 4-5 units.) The Ottoman Empire ruled the Middle East, North Africa and Eastern Europe from the 15th to the early 20th centuries. How did the Ottoman enterprise appear in the frontier region between Christendom and the Islamic world? How were diverse peoples, religions, and regions integrated under the Ottoman order? Was there an Ottoman Mediterranean and Indian Ocean? How did reform movements in Islamic, Christian and Jewish thinking transform Ottoman societies? Topics include the Ottoman Empire between Europe and Eastern Islamic World; merchants and their markets; elite, urban, rural and nomadic lives; women, family, childhood and sexuality; life, afterlife and dreams; epidemics and natural disasters. Special emphasis will be given to coffee and coffee houses which shaped public life in the Ottoman World since the 16th century. The survey ends with the rise of nationalism, inter-communal violence and the disintegration of the Ottoman world.
Same as: HISTORY 384

HISTORY 284E. Contemporary Muslim Political Thought. 4-5 Units.
This course aims to provide an intellectual history of contemporary Muslim political thought. It presents post-nineteenth century Muslim contributions to political thought. It is designed as a survey of some major thinkers from the Arab world to Iran and Southeast Asia, from Turkey to North America, who sought to interpret Islam's basic sources and Islamic intellectual legacy. Our readings include primary texts by Tahtawi, Tunisi, Afghani, Rida, Huda Sharawi, Qutb, Shariati, and Mernissi among other prominent figures. We will analyze recurring ideas in this body of thought such as decline, civilization, rationality, ijtihad (Islamic independent reasoning), shura (deliberative decision-making), democracy, secularism, Muslim unity, khilafah (caliphate and vicegerency), freedom, equality, and justice. We will discuss their current significance for the ongoing theoretical debates in Muslim political thought, Muslim intellectual history, and comparative political theory.
Same as: HISTORY 384E

HISTORY 284F. Empires, Markets and Networks: Early Modern Islamic World Between Europe and China, 1400-1900. 4-5 Units.
Focuses on political regimes, transregional connections, economic interactions and sociocultural formations in the early modern Islamic Afro-Eurasia. Topics include complex political-economic systems of the Ottoman, Safavid and Mughal empires and expansion of Turco-Persianate political and literary cultures across the Post-Mongolian Eurasia; experiences of various Muslim, Christian, Jewish and Hindu, as well as urban, rural and nomadic communities and networks under Islamicate political regimes; consolidation of transregional commerce and cultural exchange with the proliferation of networks of merchants, scholars and sufis; new tendencies in knowledge, individual, gender, family, social order, and religion; incorporation of the Islamic world in the global economy; Muslims in the age of revolutions; political and social reforms and consolidation of Muslim internationalism in the age of imperialism.
Same as: HISTORY 384F

HISTORY 285C. The Immigrant in Modern America. 5 Units.
The 2016 presidential election propelled the topic of immigration to the center of public attention. This is not the first time, however, that questions of immigration and what it means to be an American have revealed deep divisions within the U.S. This course explores the reception of immigrants in modern America, including differing views toward immigration; how immigrants help shape ideas about the American nation; and the growth of state bureaucracy and policing apparatus as a response.
Same as: JEWISHST 285C

HISTORY 285E. Counterinsurgency and Torture: Algeria, Vietnam, and Iraq. 5 Units.
This course covers the post-WWII history of counterinsurgency, a type of warfare in which a powerful, state-backed military is pitted against guerrilla fighters, or insurgents. In the context of decolonization (the dissolution of European overseas empires) and the United States' growing role on the world stage, we will examine four counterinsurgency campaigns: the French in Indochina (1946-1954) and Algeria (1954-1962); and the Americans in Vietnam (1964-1973) and Iraq (2003-2011). Using a combination of secondary and primary sources, including declassified government documents, maps, photography, film, music, news broadcasts, and recorded tapes of presidential phone calls, we will ask four overarching questions: 1) How did military planners and politicians learn from prior counterinsurgencies, and what are the strengths and pitfalls of an approach to warfare that applies historical "lessons learned" to contemporary problems? 2) Are torture and violence against civilians the results of mishandled counterinsurgency, or are they inherent to the doctrine? 3) Why have counterinsurgency strategies persisted despite long-term failures and public criticism? 4) How does historical thinking allow us to participate more effectively in debates about counterinsurgency and torture in America today? Throughout, we will explore how counterinsurgency and torture have traveled across space and time, intertwining historical trajectories in Southeast Asia, North Africa, and the Middle East.

HISTORY 286D. Yours in Struggle: African Americans and Jews in the 20th Century U.S.. 5 Units.
This colloquium explores the history of African Americans and Jews in 20th century US beginning with Jewish immigration from Eastern Europe and the Great Migration to America's urban centers. It considers the geographical and economic tensions that developed between two minority groups living in close proximity; the appropriation of black culture; Jewish claims to whiteness and performance of blackness; intercommunal relations during the Civil Rights movement; the breakdown of the black-Jewish alliance in the late 1960s; and the lingering ramifications of this shift today.
Same as: JEWISHST 286D

HISTORY 286E. Labor Migration: Gender, Race, and Capitalism in North Africa and the Middle East. 5 Units.
Current media coverage dwells on the plight of migrants passing through North Africa in search of higher-wage jobs in Europe. But labor migration from, to, and through North Africa and the Middle East is nothing new. Pushing beyond widespread views of labor migration as a policy problem for Western governments to "solve," we will instead explore how migrant laborers shaped the modern history of North Africa and the Middle East, from the late Ottoman Empire until today. We will read an array of texts in history and historical anthropology--each deploying different sources, methods, and empirical examples--to discuss how migrant laborers molded 1) conceptions of race and gender, 2) the development of capitalism, 3) political mobilization, and 4) the boundaries between nations and regions. Among other examples, we will discuss trans-Atlantic migrants from the Ottoman Levant who shaped labor and gender relations within the Middle East and the Americas; migrant workers from North Africa and the Middle East who sustained wartime industries in European empires and metropoles; the construction of an oil economy in the Gulf that was built by migrant labor; and sub-Saharan African domestic workers in the Middle East facing exploitation and crisis. Throughout, we will devote particular attention to the ways in which our readings place migrant laborers and their communities at the center of analysis, despite the fact that migrant laborers do not have a voice in dominant archives.

HISTORY 286F. Jews in Trump's America and Before. 5 Units.
This class considers the notion of American Jewish exceptionalism through the lens of Trump's America. The social and economic success of American Jewry over the last 350 years is remarkable, yet Jews continue to find their position in American society called into question. This course moves between past and present and will consider key moments in American Jewish life with a particular emphasis on contemporary currents, including post-liberal identity politics, Israel, and the rise of white supremacy.
Same as: JEWISHST 186

HISTORY 288C. Jews of the Modern Middle East and North Africa. 5 Units.
This course will explore the cultural, social, and political histories of the Jews of the Middle East and North Africa (MENA) from 1860 to present times. The geographic concentration will range from Morocco to Iran, Iraq to Turkey, and everywhere in between. Topics include: Jewish culture and identity in Islamic contexts; the impacts of colonialism, westernization, and nationalism; Jewish-Muslim relations; the racialization of MENA Jews; the Holocaust; the experience and place of MENA Jews in Israel; and "Jews of Color.".
Same as: JEWISHST 288C

HISTORY 288D. American Jewish History: Learning to be Jewish in America. 2-4 Units.
This course will be a seminar in American Jewish History through the lens of education. It will address both the relationship between Jews and American educational systems, as well as the history of Jewish education in America. Plotting the course along these two axes will provide a productive matrix for a focused examination of the American Jewish experience. History students must take course for at least 3 units.
Same as: AMSTUD 279X, EDUC 279, JEWISHST 297X, RELIGST 279X

HISTORY 290. North Korea in Historical Perspective. 4-5 Units.
This colloquium will approach North Korea from a longer historical perspective and also discuss the country's current crisis and its future. Themes will include the northern region in colonial Korea, Kim Il Sung and Manchurian guerrillas, the USSR and North Korean Revolution, the reconstruction after the Korean War, Juche ideology and the political system, the everyday life of North Korea people, the Cold War and North Korean diplomacy, culture and mass performance, the great famine and economy in transition, the military and nuclear development, and refugees and the succession of leadership.
Same as: HISTORY 390

HISTORY 291G. Pre-Modern Chinese Warfare. 4-5 Units.
This course examines the evolution of warfare in China, and its impact on the evolving political and social orders, from the earliest states through the Mongol conquest. It will study how changing military technology was inextricably linked to changes in the state and society. It will also look at changing Chinese attitudes towards warfare over the same period, from the celebration of heroism, through writing about warfare as an intellectual art, to the links of militarism with steppe peoples/.
Same as: HISTORY 391G

HISTORY 291K. Korean History and Culture before 1900. 3-5 Units.
This course serves as an introduction to Korean culture, society, and history before the modern period. It begins with a discussion of early Korea and controversies over Korean origins; the bulk of the course will be devoted to the Chos'n period (1392-1910), that from the end of medieval Korea to the modern period. Topics to be covered include: Korean national and ethnic origins, the role of religious and intellectual traditions such as Buddhism and Confucianism, popular and indigenous religious practices, the traditional Korean family and social order, state and society during the Chos'n dynasty, vernacular prose literature, Korean's relations with its neighbors in East Asia, and changing conceptions of Korean identity.nThe course will be conducted through the reading and discussion of primary texts in English translation alongside scholarly research. As such, it will emphasize the interpretation of historical sources, which include personal letters, memoirs, and diaries, traditional histories, diplomatic and political documents, along with religious texts and works of art. Scholarly work will help contextualize these materials, while the class discussions will introduce students to existing scholarly debates about the Korean past. Students will be asked also to examine the premodern past with an eye to contemporary reception. The final project for the class is a film study, where a modern Korean film portraying premodern Korea will be analyzed as a case study of how the past works in public historical memory in contemporary Korea, both North and South. An open-ended research paper is also possible, pending instructor approval.
Same as: HISTORY 391K, KOREA 158, KOREA 258

HISTORY 292C. Gender in Modern South Asia. 5 Units.
Gender is crucial to understanding the political, cultural, and economic trajectories of communities in colonial and postcolonial South Asia. Throughout this course, we will ask a series of questions: How does gender structure conceptions of home, community, and homeland in South Asia? How do gender and religion become represented in movements for nation-states? How does women's participation in anticolonial politics and fights for equal representation in postcolonial nation-states affect our understanding of gender in South Asia today? Readings examine the creation and impact of religious personal law under British colonial rule, the role of masculinity in the British-Indian army, perspectives on religion and clothing, the interplay of rights movements and anti-colonialism, and the status of women in postcolonial India, Pakistan, and Bangladesh. Students will also explore a range of primary sources, including political treatises, short stories, didactic manuals, autobiographies, and travelogues.
Same as: FEMGEN 292

HISTORY 292D. Japan in Asia, Asia in Japan. 4-5 Units.
(History 292D is an undergraduate course offered for 5 units; History 392D is a graduate course offered for 4-5 units.) How Japan and Asia mutually shaped each other in the late 19th and 20th centuries. Focus is on Japanese imperialism in Asia and its postwar legacies. Topics include: pan-Asianism and orientalism; colonial modernization in Korea and Taiwan; collaboration and resistance; popular imperialism in Manchuria; total war and empire; comfort women and the politics of apology; the issue of resident Koreans; and economic and cultural integration of postwar Asia.
Same as: HISTORY 392D

HISTORY 292F. Culture and Religions in Korean History. 4-5 Units.
This colloquium explores the major themes of Korean history before 1800 and the role of culture and religions in shaping the everyday life of Chosôn-dynasty Koreans. Themes include the aristocracy and military in the Koryô dynasty, Buddhism and Confucianism in the making of Chosôn Korea, kingship and court culture, slavery and women, family and rituals, death and punishment, and the Korean alphabet (Hangûl) and print culture.
Same as: HISTORY 392F

HISTORY 293C. Stateless in South Asia. 4-5 Units.
Taking statelessness as more than a political condition, this course reviews the myriad aspects of statelessness. Exploring a few critical moments in modern South Asia (1945-2010), this seminar thematically follows the historical construction of statelessness in some of the most conflict-ridden theatres of world politics. This course explores the following questions: Is statelessness always a result of national and nationalist exclusion? What are the ways in which statelessness has amplified the gaps in the coherent rationale of national belonging?.

HISTORY 293F. Chinese Politics and Society. 3-5 Units.
(Doctoral students register for 317B.) This seminar surveys the major turning points that have shaped China's evolution since 1949. The topics covered include the Great Leap Forward, the Cultural Revolution, the political and economic turning point of the early 1980s, the political crisis of 1989, the restructuring of the state sector since the 1990s, and the patterns of protest that have accompanied the rapid social changes over the past three decades. We will conclude the course with current debates about China's future.
Same as: HISTORY 393F, SOC 217B, SOC 317B

HISTORY 294D. Manchuria: Cradle of Conflict, Cockpit of Asia. 4-5 Units.
How did Manchuria become Chinese? This course utilizes the dual waves of early twentieth-century writings and a wide array of recent scholarship dealing with Manchuria to explore the formation of nation-states out of the Qing and Japanese empires in Northeast Asia through the lenses of opium, migration, cities, warlords, and memoir. This course will be of interest to students concerned with developing transcultural understandings of Northeast Asian history.
Same as: HISTORY 394D

HISTORY 294E. The Past in Ancient China. 4-5 Units.
Introduction to the most important sources in the early Chinese historiographical tradition (broadly conceived), examining how the past was mobilized across a range of textual genres including poetry, speeches, philosophy, narrative, and rhetoric. Prior knowledge of premodern Chinese history and culture is not required. All reading materials will be in English; no knowledge of modern or classical Chinese is expected.
Same as: HISTORY 394E

HISTORY 294J. Science, Power, and Knowledge: East Asia to 1900. 3-5 Units.
In the early modern period, East Asian societies featured long-established institutions of learning and traditions of knowledge. This course examines the relationship between knowledge and power in East Asia societies prior to 1900. It explores how knowledge production operated in late imperial China (1550-1900), Chos'n Korea (1392-1910), and Tokugawa Japan (1600-1868). Among the themes addressed are: the state's role in patronizing science and knowledge; major intellectual movements; engagement with Western science and religion; East Asian statecraft; and East Asian understandings of space and geography. nTaking a holistic perspective, it places science and technology in 1) a social and cultural context 2) in relation to other bodies and fields of knowledge 3) in comparison to other societies in a similar historical time period. A socially embedded perspective on knowledge and science seeks to appreciate how politics, society, and knowledge are integrated, and in particular how science and knowledge can be both instruments and sites of political power. By exploring these links, the course will also illustrate how our modern disciplinary categories of natural science,social science and the humanities cannot be taken for granted and the areas of knowledge they cover can be deeply intertwined. nnThe course will also address these issues historically and across geographic regions in East Asia and beyond. The comparative lens and frameworks these perspectives can offer will bring an awareness of the diverse traditions of knowledge production in East Asia. Its examination of East Asian encounters with Western paradigms of knowledge throughout the early modern period will also illustrate how communication occurs across cultural, social, and linguistic barriers and how diverse world-views were managed in these encounters. These encounters of knowledge-exchange between Jesuit missionaries, Ming literati, Korean aristocrats, and Japanese doctors also show how cultural identities were constructed, reinforced, and challenged. These identities, expressed through the mastery of knowledge, are essential for understanding how East Asian reckoned with growing pressures to adopt Western industrial technology and military science in the late nineteenth century.
Same as: CHINA 157, CHINA 257, JAPAN 157, JAPAN 257, KOREA 157, KOREA 257

HISTORY 296. Communism and Revolution in China. 5 Units.
From the formation of the Chinese Communist Party (CCP) in 1921 through the 1949 founding of the People's Republic of China (PRC). Topics include: early theories of socialism in China; the relationship between Chinese communism and the Communist International and Soviet Union; agrarian reformulation of communism by Mao; the communist-nationalist civil war; the Communist Revolution of 1949; and the consolidation of communist power in the PRC.

HISTORY 296E. Modern South Asia, 1500- Present. 5 Units.
This course examines the major political, social, religious, and cultural developments within early modern, colonial, and postcolonial South Asia. Topics include religious reform, the role of women, anticolonialism, and national formation. Students will be introduced to critical writings on the emergence of modernity on the Indian subcontinent.

HISTORY 297. The Cold War and East Asia. 5 Units.
Explores how East Asia negotiated superpower rivalry and global ideological competition during the Cold War. Considers the ways in which China, Japan, and Korea were more than battlegrounds for US-Soviet contestation and played active roles in defining the nature and dynamics of the conflict. Re-examines conventional narratives and periodizations against alternative conceptual models and interpretive frameworks highlighting the constructed nature of the struggle as well as the role of historical and cultural factors in shaping the East Asian experience.
Same as: HISTORY 397

HISTORY 297F. Religion and Power in the Making of Modern South Asia. 3-5 Units.
This course examines the diverse ways that religious traditions have been involved in the brokering of power in South Asia from the late seventeenth century to the present day. We will examine the intersection of religion and power in different arenas, including historical memory, religious festivals, language politics, and violent actions. At the core of our inquiry is how religion is invoked in political contexts (and vice-versa), public displays of religiosity, and the complex dynamics of religion and the state. Among other issues, we will particularly engage with questions of religious identity, knowledge, and violence. Undergraduates must enroll in RELIGST 255 for 5 units. Graduate students must enroll RELIGST 355 for 3-5 units. HISTORY297F must be taken for 4-5 units.
Same as: RELIGST 255, RELIGST 355

HISTORY 297G. Rulers, Reformers, Radicals: History of India in Two Centuries. 5 Units.
This course traces the cultural, religious, literary, and political lineages of India during the last two centuries. It investigates the conditions and impact of colonialism in the formation of the contemporary subcontinent. In doing so, the course examines the ways in which Indians changed their society, culture, and identities as they became entwined with colonial, imperial, and global forces. Over the course of the quarter, we will address the following questions: What was the nature of colonial rule in India? How did the process of colonization shape questions of gender and class, race and caste in India? In societies as diverse as India, is anticolonialism synonymous with nationalism?.

HISTORY 298C. Race, Gender, & Sexuality in Chinese History. 5 Units.
This course examines the diverse ways in which identities--particularly race, ethnicity, gender and sexuality have been understood and experienced in Chinese societies, broadly defined, from the imperial period to the present day. Topics include changes in women's lives and status, racial and ethnic categorizations, homosexuality, prostitution, masculinity, and gender-crossing.
Same as: ASNAMST 298, CSRE 298G, FEMGEN 298C, HISTORY 398C

HISTORY 298E. Chinese Pop Culture: A History. 5 Units.
This discussion course examines the evolution of popular culture in the Chinese-speaking world and diaspora from the late imperial era to the present. Analyzing myth, literature, medicine, music, art, film, fashion, and internet culture will help students understand the revolutionary social and political changes that have transformed modern East Asia.

HISTORY 299A. Senior Research I. 1-5 Unit.
.

HISTORY 299B. Senior Research II. 1-5 Unit.
.

HISTORY 299C. Senior Research III. 1-5 Unit.
.

HISTORY 299D. Tooling Up for Digital Humanities. 1 Unit.
What are the digital humanities? The twenty-first century presents new opportunities in the humanities, such as unprecedented access to millions upon millions of digitized sources along with powerful technological tools to study those sources. Yet it also raises new challenges, such as the responsible and effective use of technology, and defining the nature of digital scholarship and communication. This workshop offers an introduction to fundamental concepts, methods, and issues within the growing field of digital humanities, including managing your online identity, digitizing sources, managing databases, text mining, spatial analysis, visualization, and pedagogy.

HISTORY 299F. Curricular Practical Training. 1 Unit.
Following internship work, students complete a research report outlining work activity, problems investigated, key results and follow-up projects. Meets the requirements for curricular practical training for students on F-1 visas. Student is responsible for arranging own internship and faculty sponsorship.

HISTORY 299H. Junior Honors Colloquium. 1 Unit.
Required of junior History majors planning to write a History honors thesis during senior year. Meets four times during the quarter.

HISTORY 299M. Undergraduate Directed Research: Martin Luther King, Jr., Research and Education Institute. 1-4 Unit.
May be repeated for credit.

HISTORY 299P. Mastering Uncertainty: The Power of Archival Thinking. 1 Unit.
When confronted with chaos and uncertainty, do you know how to stay calm, ask the right questions, and find the answers? Archival researchers do. Do you realize that less than 1 percent of primary sources have been digitized, and that 99 percent still exist in their original formats in collections, small and large, scattered all across the world? Do you know how to find them and use them? Archival researchers do. Through hands-on exercises in Stanford's archives, students learn the fundamentals of archival research. Pursuing their own research interests, students will learn to become self-sufficient, independent researchers capable of navigating uncertainty and producing knowledge--a skill set in demand no matter what their major or post-graduate plans.
Same as: HISTORY 399P

HISTORY 299S. Undergraduate Directed Research and Writing. 1-5 Unit.
May be repeated for credit.

HISTORY 299T. Tough Questions. 1 Unit.
A H&S initiative course.
Same as: HISTORY 399T

HISTORY 301A. The Global Drug Wars. 4-5 Units.
Explores the global story of the struggle over drugs from the nineteenth century to the present. Topics include the history of the opium wars in China, controversies over wine and tobacco in Iran, narco-trafficking and civil war in Lebanon, the Afghan 'narco-state,' Andean cocaine as a global commodity, the politics of U.S.- Mexico drug trafficking, incarceration, drugs, and race in the U.S., and the globalization of the American 'war on drugs.'.
Same as: HISTORY 201A

HISTORY 301D. History Goes Pop! Songwriting the Past. 3 Units.
Historical research doesn't always take the form of a thesis, an article, or a book. Sometimes, research leads to film, museum exhibits, works of art, or... music. In this class, students will collaborate to write, record, and produce original pop music (perhaps even an entire album) based on original research in Stanford's wealth of archives and Special Collections. Background in music is NOT required.
Same as: HISTORY 201D

HISTORY 301J. Objects of History: From "Material Culture" to "Making". 4-5 Units.
This class considers objects as historical sources. It surveys diverse approaches to the study and display of physical evidence, from "material culture" to "making." These explorations of object-oriented research will inform the course's hands-on components, working with objects and replicating historical experiences. With its focus on the question of what historical knowledge can be gained through interactivity, the course is suited to students whose interests include museums and public history, reenactment and performance, the maker movement, or interdisciplinary methodology.
Same as: HISTORY 201J

HISTORY 302. Technopolitics: Materiality, Power, Theory. 4-5 Units.
This graduate readings seminar provides a lively introduction to some of the major themes and issues in the field of Science and Technology Studies (STS). How do technologies and material assemblages perform power? How are their designs and uses shaped by social, cultural, and political dynamics? How do they shape those dynamics? The course draws on an interdisciplinary body of literature in humanities and social science, mixing theoretical material with more empirically oriented studies, and classics with new scholarship.
Same as: ANTHRO 302A

HISTORY 302B. Coffee, Sugar, and Chocolate: Commodities and Consumption in World History, 1200-1800. 4-5 Units.
Many of the basic commodities that we consider staples of everyday life became part of an increasingly interconnected world of trade, goods, and consumption between 1200 and 1800. This seminar offers an introduction to the material culture of the late medieval and early modern world, with an emphasis on the role of European trade and empires in these developments. We will examine recent work on the circulation, use, and consumption of things, starting with the age of the medieval merchant, and followed by the era of the Columbian exchange in the Americas that was also the world of the Renaissance collector, the Ottoman patron, and the Ming connoisseur. This seminar will explore the material horizons of an increasingly interconnected world, with the rise of the Dutch East India Company and other trading societies, and the emergence of the Atlantic economy. It concludes by exploring classic debates about the "birth" of consumer society in the eighteenth century. How did the meaning of things and people's relationships to them change over these centuries? What can we learn about the past by studying things?.
Same as: ARTHIST 302B, HISTORY 202B

HISTORY 302F. Surveillance States and Societies. 4-5 Units.
The course analyzes the evolution, functions, structures and consequences of surveillance in the modern era. Among issues discussed are the rise of the modern state and population politics, information gathering and its uses in domestic and national security arenas, institutions of surveillance in various regimes, the challenge of privacy and ethical dilemmas.
Same as: HISTORY 202F

HISTORY 302G. Peoples, Armies and Governments of the Second World War. 4-5 Units.
Clausewitz conceptualized war as always consisting of a trinity of passion, chance, and reason, mirrored, respectively, in the people, army and government. Following Clausewitz, this course examines the peoples, armies, and governments that shaped World War II. Analyzes the ideological, political, diplomatic and economic motivations and constraints of the belligerents and their resulting strategies, military planning and fighting. Explores the new realities of everyday life on the home fronts and the experiences of non-combatants during the war, the final destruction of National Socialist Germany and Imperial Japan, and the emerging conflict between the victors. How the peoples, armies and governments involved perceived their possibilities and choices as a means to understand the origins, events, dynamics and implications of the greatest war in history.
Same as: HISTORY 202G

HISTORY 302K. The Holocaust and Its Aftermath. 4-5 Units.
This seminar gives an overview over different aspects of the history of the Holocaust and its aftermath and will examine key issues in recent Holocaust historiography and questions of memory and representation. Special emphasis is put on the nature of the historian's task, as viewed through the lens of historians of the Holocaust, as well as to the significance of the Holocaust in history and how it has changed over time. The course will confront students with historiographical texts and historical documents, with photography and film, works of scholarship and art.
Same as: HISTORY 202K, JEWISHST 282K, JEWISHST 382K

HISTORY 303. Premodern Economic Cultures. 4-5 Units.
Modern economists have made a science of studying the aggregate effects of individual choices. This science is based on the realities of personal freedom and individual choice. Prior to the modern era, however, different realities comprised very different economic cultures: moral economies in which greed was evil and generosity benefitted the patron¿s soul; familial collectives operating within historical conditioned diasporas; economies of obligation that threatened to collapse under their own weight as economic structures shifted. In this course we will be reading cross-culturally to develop an understanding of the shared and distinct elements of premodern economic cultures.
Same as: HISTORY 203

HISTORY 303C. History of Ignorance. 4-5 Units.
Scholars pay a lot of attention to knowledge--how it arises and impacts society--but much less attention has been given to ignorance, even though its impacts are equally profound. Here we explore the political history of ignorance, through case studies including: corporate denials of harms from particular products (tobacco, asbestos), climate change denialism, and creationist rejections of Darwinian evolution. Students will be expected to produce a research paper tracing the origins and impact of a particular form of ignorance.

HISTORY 303E. Infrastructure & Power in the Global South. 4-5 Units.
In the last decade, the field of infrastructure studies has entered into conversation with area studies, post/colonial studies, and other scholarship on the "Global South." These intersections have produced dramatic new understandings of what "infrastructures" are, and how to analyze them as conduits of social and political power. This course offers a graduate-level introduction to this recent scholarship, drawing primarily on works from history, anthropology, geography, and architecture.
Same as: AFRICAST 303E, ANTHRO 303E

HISTORY 303F. Words and Things in the History of Classical Scholarship. 4-5 Units.
How have scholars used ancient texts and objects since the revival of the classical tradition? How did antiquarians study and depict objects and relate them to texts and reconstructions of the past? What changed and what stayed the same as humanist scholarship gave way to professional archaeologists, historians, and philologists? Focus is on key works in the history of classics, such as Erasmus and Winckelmann, in their scholarly, cultural, and political contexts, and recent critical trends in intellectual history and the history of disciplines.
Same as: CLASSICS 331

HISTORY 303K. Trauma and History: Intergenerational suffering and collective healing. 4-5 Units.
This course will examine trauma as a historical process, following the intergenerational impacts of history's darker dramas, analyzing collective strategies for coping and healing after trauma, and asking whether we can speak of "traumatized societies." Readings for graduate students will include Ben Shephard's A War of Nerves, Didier Fassin and Richard Rechtman's The Empire of Trauma, and selections from Yael Danieli, ed., Intergenerational Handbook of Multigenerational Legacies of Trauma. Colloquium will be discussion-oriented, but will also include guest discussants from around the world. The course will culminate in a conference to be held at Stanford, June 4-6: "Soul Wounds: Trauma and Healing Across Generations." Undergraduate requirements for 1 credit: Attend weekly "Mind, Body, and Culture" workshop and first hour of Wednesday morning discussion, attend some part of conference on June 4-6. Graduate requirements for 4-5 credits: Attend workshop, read weekly, discussion on Wednesday mornings, write a paper and if desired present at conference.

HISTORY 304. Approaches to History. 4-5 Units.
For first-year History and Classics Ph.D. students. This course explores ideas and debates that have animated historical discourse and shaped historiographical practice over the past half-century or so. The works we will be discussing raise fundamental questions about how historians imagine the past as they try to write about it, how they constitute it as a domain of study, how they can claim to know it, and how (and why) they argue about it.

HISTORY 304A. Reimagining History: Or, Finding the "I" in History. 4-5 Units.
This class explores, through analysis and practice, the ways in which history can be told and experienced through means other than traditional scholarly narratives. Approaches include literary fiction and non-fiction, digital media, graphic arts, maps, exhibitions, and film. A final project will require students to produce their own innovative work of history.
Same as: HISTORY 204A

HISTORY 304D. Advanced Topics in Agnotology. 4-5 Units.
Advanced research into the history of ignorance. Our goal will be to explore how ignorance is created, maintained and destroyed, using case studies from topics such as tobacco denialism, global climate denialism, and other forms of resistance to knowledge making. Course culminates in a research paper on the theory and practice of agnotology, the science of ignorance.
Same as: HISTORY 204D

HISTORY 304G. War and Society. 4-5 Units.
(History 204G is an undergraduate course offered for 5 units; History 304G is a graduate course offered for 4-5 units.) How Western societies and cultures have responded to modern warfare. The relationship between its destructive capacity and effects on those who produce, are subject to, and must come to terms with its aftermath. Literary representations of WW I; destructive psychological effects of modern warfare including those who take pleasure in killing; changes in relations between the genders; consequences of genocidal ideology and racial prejudice; the theory of just war and its practical implementation; how wars end and commemorated.
Same as: HISTORY 204G, REES 304G

HISTORY 305. Graduate Pedagogy Workshop. 1 Unit.
Required of first-year History Ph.D. students. Perspectives on pedagogy for historians: course design, lecturing, leading discussion, evaluation of student learning, use of technology in teaching lectures and seminars. Addressing today's classroom: sexual harassment issues, integrating diversity, designing syllabi to include students with disabilities.

HISTORY 305C. Graduate Workshop Series. 1 Unit.
This is a 1-credit course for which only regular attendance is required, and graduate students may audit any or all of the sessions as they find useful. The majority of the course addresses questions of research, grant writing, and professionalization, while the last few sessions offer general guidance on preparing for the job market.

HISTORY 305K. The Age of Revolution: America, France, and Haiti. 4-5 Units.
(History 205K is an undergraduate course offered for 5 units; History 305K is a graduate course offered for 4-5 units.) This course examines the "Age of Revolution," spanning the 18th and 19th centuries. Primarily, this course will focus on the American, French, and Haitian Revolutions (which overthrew both French and white planter rule). Taken together, these events reshaped definitions of citizenship, property, and government. But could republican principles-- color-blind in rhetoric-- be so in fact? Could nations be both republican and pro-slavery? Studying a wide range of primary materials, this course will explore the problem of revolution in an age of empires, globalization, and slavery.
Same as: AFRICAAM 205K, HISTORY 205K

HISTORY 305L. Prostitution & Sex Trafficking: Regulating Morality and the Status of Women. 4-5 Units.
Examines governmental policies toward prostitution from the late 19th century to the present. Focuses on the underlying attitudes, assumptions, strategies, and consequences of various historical and current legal frameworks regulating prostitution, including: prohibitionism, abolitionism, legalization, partial decriminalization, and full decriminalization. Special focus on these policies' effects on sex trafficking, sex worker rights, and the status of women. Emphasis on Europe and the U.S., with additional cases from across the globe.

HISTORY 306. Beyond Borders: Approaches to Transnational History. 4-5 Units.
This core colloquium for the Transnational, International, and Global (TIG) field will introduce students to the major historiographical trends, methodological challenges, and theoretical approaches to studying and writing transnational histories.

HISTORY 306A. City, Society, Literature- 19th Century Histories. 4 Units.
This course examines the rise of modern cities through an analysis of urban society and the imaginative literature of the 1800s.
Same as: HISTORY 206A, URBANST 106

HISTORY 306D. World History: Graduate Colloquium. 4 Units.
How do historians engage the global scale in the classroom as well as in research? The world history canon including Toynbee, McNeill, Braudel, Wolf, and Wallerstein; contrasting approaches, recent research, and resources for teaching. Recommended: concurrent enrollment in HISTORY 306K.

HISTORY 306F. Identities and Identification in the Atlantic World. 4-5 Units.
How identities and processes of identification changed in Europe, Africa, and the Americas during the early modern period and as a result of the engagement of the inhabitants of these three continents in the Atlantic world.

HISTORY 306G. Colonial Law. 4-5 Units.
Examines the relationship between law and colonialism in Latin America, Africa and Asia during both the early modern and the modern period. By reading some of the seminal works that have been published on this issue, we will seek to understand how law both facilitated and limited colonialism and how colonialism, in turn, had modified the legal systems that had existed previously. Attention will also be given to law an an acculturating agent and to the legal arena as a sphere for conflict resolution, negotiation,and identity formation.

HISTORY 306K. World History Pedagogy Workshop. 1 Unit.
Students draft a syllabus and create a curriculum module for use in a world history lecture course. Corequisite: HISTORY 306D, recommended.

HISTORY 307A. Legal History Workshop. 4-5 Units.
(Same as LAW 3516.) The Legal History Workshop is designed as a forum in which faculty and students from the Law School, the History Department, and elsewhere in the university can discuss some of the best work now being done in the field of legal history. Every other week, an invited speaker will present his or her current research for discussion. In the week prior to a given speaker's presentation, the class will meet as a group to discuss secondary literature relevant to understanding and critiquing the speaker's research. Students will then read the speaker's paper in advance of the following week's workshop presentation. Special Instructions: Students may choose to enroll in one of two sections of the course. In the first, students must write brief responses to each speaker's paper. There will be a total of four speakers, and thus four papers. Guidance will be provided concerning how to frame these response papers, which will be due every two weeks - i.e., on the day before speaker presents. In the second section, students must write a research paper on a legal history topic that they select in consultation with the professors. Enrollment will be limited to 30 students -- 20 from SLS who will be selected by lottery and 10 from H&S. Elements used in grading: Class participation, attendance, assignments and final paper.

HISTORY 307D. Transhistory Colloquium. 4-5 Units.
Colloquium on the history of transgender practices and identities. Readings will include scholarly texts from the emerging historical field of transhistory as well as adjacent fields within gender history. Colloquium will investigate avenues for deepening transhistory through further historical inquiry.
Same as: FEMGEN 207D, FEMGEN 307D, HISTORY 207D

HISTORY 307E. Totalitarianism. 4-5 Units.
This course analyzes the evolution and nature of revolutionary and totalitarian polities through the reading of monographs on the Puritan Reformation, French Revolutionary, turn of the 20th Century, interwar, and Second World War eras. Among topics explored are the essence of modern ideology and politics, the concept of the body national and social, the modern state, state terror, charismatic leadership, private and public spheres, totalitarian economies, and identities and practices in totalitarian polities.
Same as: HISTORY 204E

HISTORY 308. Biography and History. 4-5 Units.
The relationship between biographical and historical writing, primarily in Europe and America. Problems of methodology, evidence, dispassion, and empathy. Texts: biographies, critical literature on biographical work, and novels (A. S. Byatt's *Possession*, Bernard Malamud's *Dubin's Lives*) that illuminate the intellectual underpinnings of biographical labor.
Same as: HISTORY 207

HISTORY 308D. Pre-Modern Warfare. 4-5 Units.
This course examines the evolving nature of warfare and its impact on society across the Eurasian continent up to the Gunpowder Revolution and rise of the nation-state. Beginning with an attempt to define war, it will trace the evolution of military technology from the Stone Age through the rise of the chariot, the sword, and the mounted rider, and examine how changing methods of conducting warfare were inextricably linked to changes in the social order and political structures.
Same as: HISTORY 208D

HISTORY 309A. Postcolonialism and Universalism. 4-5 Units.
Key texts and motifs from postcolonial theory: empire, class, exile, suffering, textuality, archive in juxtaposition to 20th-century philosophical questions about universal history and the relevance of humanist inquiry.
Same as: HISTORY 209D

HISTORY 309B. The Idea of Politics. 4-5 Units.
Can we live without politics? Is politics indispensable for humanity and vice-versa? The idea of politics is that it must transform, through human action, conditions of collective life. But the 20th century produced colliding beliefs about what that life might be and what the human being itself might look like. Explore whether, after the century, we might still think of politics as an ethical idea and the "human" as foundational political category. Keywords: Civility, Cruelty, Friendship, Empire, Democracy, Humanism, Animals.
Same as: HISTORY 209B

HISTORY 309E. History Meets Geography. 4-5 Units.
Focus is on developing competence in GIS computer applications and applying it to historical problems. Previous experience with GIS not required. Recommended: complete the GIS tutorial in Branner Library before the course starts.

HISTORY 309F. Maps in the Early Modern World. 4-5 Units.
The significance of cartographic enterprise across the early modern world. Political, economic, and epistemological imperatives that drove the proliferation of nautical charts, domain surveys, city plans, atlases, and globes; the types of work such artifacts performed for their patrons, viewers, and subjects. Contributions of indigenous knowledge to imperial maps; the career of the map in commerce, surveillance, diplomacy, conquest, and indoctrination. Sources include recent research from Asia, Europe, and the Americas.
Same as: HISTORY 209F

HISTORY 309G. Paleography of Medieval and Early Modern Manuscripts. 3-5 Units.
Introductory course in the history of writing and of the book, from the late antique period until the advent of printing. Opportunity to learn to read and interpret medieval manuscripts through hands-on examination of original materials in Special Collections of Stanford Libraries as well as through digital images. Offers critical training in the reading of manuscripts for students from departments as diverse as Classics, History, Philosophy, Religious Studies, English, and the Division of Languages Cultures and Literatures.
Same as: CLASSICS 215, DLCL 209, RELIGST 204

HISTORY 310. The History of Occupation, 1914-2010. 4-5 Units.
(History 210 is an undergraduate course offered for 5 units; History 310 is a graduate course offered for 4-5 units.) Examines the major cases of occupation in the twentieth century, from the first World War until the present, and issues of similarities, differences, and implications for contemporary policy making. Topics include European and Asian cases emerging from World War I and World War II, the Israeli occupation of the West Bank; the Soviet and American occupations of Afghanistan; and the American occupation of Iraq. Discussions will revolve around the problems, efficacy, and effects of occupation in historical perspective.
Same as: HISTORY 210

HISTORY 311. Out of Eden: Deportation, Exile, and Expulsion from Antiquity to the Renaissance. 4-5 Units.
This course examines the long pedigree of modern deportations and mass expulsions, from the forced resettlements of the ancient world to the expulsion of Jews from Spain in 1492, and from the outlawry of Saga-era Iceland to the culture of civic exile in Renaissance Italy. The course focuses on Europe and the Mediterranean from antiquity to the early modern period, but students are welcome to venture beyond these geographical and chronological boundaries for their final papers.
Same as: HISTORY 211, JEWISHST 211

HISTORY 311A. Family, Gender, and Production in Ancient Rome. 4-5 Units.
Seminar. The household as the basic unit of production in Rome in the context of family relations and ideologies of gender. Methodological challenges of doing social and economic history from literary, epigraphic, and literary texts. Demography of family and kinship in ancient Rome. Ideologies of gender and family roles and their influence on economic production. Economic theories of the family and human capital.

HISTORY 311G. Big Ancient History. 4-5 Units.
How the shift away from thinking about European history in terms of a western civilization model toward embedding it in stories of how global history affects research and teaching on ancient Greece and Rome. Conventional, evolutionary, and global history narratives of the past 5,000 to 15,000 years and some new ideas about how Greco-Roman history might fit into different storylines.

HISTORY 313. Core Colloquium: Graduate Readings in Medieval History. 4-5 Units.
This course serves as a graduate-level introduction to major themes, problems, methods, and historiographical traditions in medieval European history.

HISTORY 313F. Medieval Germany, 900-1250. 1-5 Unit.
(Undergraduates may sign up for German 213 or History 213F, graduate students should sign up for German 313 or History 313F. This course may be taken for variable units. Check the individual course numbers for unit spreads.) This course will provide a survey of the most important political, historical, and cultural events and trends that took place in the German-speaking lands between 900 and 1250. Important themes include the evolution of imperial ideology and relations with Rome, expansion along the eastern frontier, the crusades, the investiture controversy, the rise of powerful cities and civic identities, monastic reform and intellectual renewal, and the flowering of vernacular literature.nnTo satisfy a Ways requirement, this course must be taken for at least 3 units. In AY 2020-21, a letter grade or "CR" grade satisfies the Ways requirement.
Same as: GERMAN 213, GERMAN 313, HISTORY 213F

HISTORY 315. Advanced Paleography. 5 Units.
This course will train students in the transcription and editing of original Medieval and Early Modern textual materials from c. 1000 to 1600, written principally in Latin and English (but other European languages are possible, too). Students will hone their archival skills, learning how to describe, read and present a range of manuscripts and single-leaf documents, before turning their hand to critical interpretation and editing. Students, who must already have experience of working with early archival materials, will focus on the full publication of one individual fragment or document as formal assessment.
Same as: CLASSICS 216, RELIGST 329X

HISTORY 315B. Race and Ethnicity in Premodern Europe. 3-5 Units.
How do historians, art historians, and literary historians of premodern Europe shape their research and their teaching around questions of race? How do current debates on race theory shape our perception of the past and deepen historical inquiry? This graduate colloquium focuses on the most recent publications on race in medieval and early modern studies to reflect on such questions while examining the challenges that race studies put on historical definitions, research methodologies, as well as teaching institutions.
Same as: ARTHIST 207D, ARTHIST 407D, HISTORY 215B

HISTORY 318C. Peace and War in Medieval Islam: From the Arab Conquests to the Crusades. 3-5 Units.
This course interrogates the theory and reality of war-making and peacemaking across the first millennium of Islamic history (c.600-c.1600 CE). We will examine major historical events (e.g. the struggle of the early community of Muslims against the pagan tribes of Arabia; Arab expansion and conquest during the seventh and eighth centuries; a sequence of civil wars, dynastic struggles, and schisms within Islam; and external invasions of the Islamic world by crusaders and steppe nomads, etc.). We will also investigate the development of major normative concepts across the Islamic tradition concerning peace and war (e.g. holy war; treaty- and truce-making; treatment of conquered enemies and prisoner; diplomacy with Muslims and non-Muslims, etc.). With respect to these concepts, we will attend especially to change over time and diversity across various sects. Mix of lecture and discussion. Readings will consist of both primary sources (in English translation) and modern scholarship. No previous experience with pre-modern or Islamic history required.
Same as: GLOBAL 190, GLOBAL 232, HISTORY 218C

HISTORY 319B. Secularity. 4-5 Units.
Classic theories of secularity. Is a secular world possible? How does, historically seen, the notion of the secular emerge, impose itself, and get challenged? Readings include Max Weber, E. Durkheim, R.A. Markus, Carl Schmitt, and Hans Blumenberg, and studies bearing on the Middle Ages, English monastic secularization, the French Revolution, and 20th-century political religions.

HISTORY 319C. Science, Technology, and Modernity in the Soviet Union. 5 Units.
Science and technology were integral to the Soviet claim to offer a vision of modernity superior to that of Western capitalism. Science and technology would flourish; society would develop on a scientific basis. The results were more complex than the vision. Topics to be covered: science and Marxism-Leninism; the Lysenko affair; the R&D system; the role of the secret police; the atomic project; the space race; missile development; Andrei Sakharov; technology and innovation.
Same as: HISTORY 219C

HISTORY 321A. State, Society and Nation in Modern Russian Historiography. 4-5 Units.
Main trends of Russian intellectual history as seen through major historians' treatment of Muscovy: Romanticism, Slavophilism, Hegelianism, Populism, Social Democracy, New Idealism, and Marxism-Leninism.

HISTORY 322A. Crime and Punishment in Early Modern Europe and Russia. 4-5 Units.
Explores criminal law in early modern Europe and Russia, ca 1500-1800, in law and in practice. Engages debates about use of exemplary public executions as tactic of governance, and about gradual decline in "violence" in Europe over this time. Explores practice of accusatory and inquisitory judicial procedures, judicial torture, forms of punishment, concepts of justice.
Same as: HISTORY 222

HISTORY 323. Art and Ideas in Imperial Russia. 4-5 Units.
Poetry, novels, symphonic music, theater, opera, painting, design, and architecture: what they reveal about the politics and culture of tsarist Russia.
Same as: HISTORY 223

HISTORY 323B. Research Methodologies in Early Modern Russian History. 4-5 Units.
.

HISTORY 323E. Cities of Empire: An Urban Journey through Eastern Europe and the Mediterranean. 3-5 Units.
This course explores the cities of the Habsburg, Ottoman and Russian empires in the dynamic and turbulent period of their greatest transformation from the 19th century through the Two World Wars. Through the reading of urban biographies of Venice and Trieste, Vienna, Budapest, Cracow, Lviv, Sarajevo, Belgrade, Salonica, and Odessa, we consider broad historical trends of political, economic, and social modernization, urbanization, identity formation, imperialism, cosmopolitanism, and orientalism. As vibrant centers of coexistence and economic exchange, social and cultural borderlands, and sites of transgression, these cities provide an ideal lens through which to examine these themes in the context of transition from imperial to post-imperial space.
Same as: HISTORY 223E, REES 204, REES 304

HISTORY 324C. Genocide and Humanitarian Intervention. 3 Units.
Open to medical students, graduate students, and undergraduate students. Traces the history of genocide in the 20th century and the question of humanitarian intervention to stop it, a topic that has been especially controversial since the end of the Cold War. The pre-1990s discussion begins with the Armenian genocide during the First World War and includes the Holocaust and Cambodia under the Khmer Rouge in the 1970s. Coverage of genocide and humanitarian intervention since the 1990s includes the wars in Bosnia, Rwanda, Kosovo, the Congo and Sudan.
Same as: HISTORY 224C, JEWISHST 284C, JEWISHST 384C, PEDS 224

HISTORY 324F. The Caucasus and the Muslim World. 4-5 Units.
The linkages connecting the societies of the Caucasus to Muslim communities in Iran, Russia, the Ottoman Empire and Turkey, S. Asia, and the Middle East.

HISTORY 325E. From Vladimir to Putin: Key Themes in Russian History. 4-5 Units.
Formative issues in Russian history from Muscovy to the present: autocracy and totalitarianism; tsars, emperors, and party secretaries; multi-ethnicity and nationalism; serfdom, peasantry; rebellions and revolutions, dissent and opposition; law and legality; public and private spheres; religion and atheism; patterns of collapse. Class format will be discussion of one to two assigned books or major articles per class.
Same as: HISTORY 225E, REES 225E

HISTORY 326A. Modern Europe: Society and Politics. 5 Units.
The goal of this course is to introduce graduate students to major works of history and literature in the field of nineteenth and early-twentieth century history. A colloquia will be given in tandem with a research seminar.

HISTORY 326C. Graduate Colloquium on Balkan History. 4-5 Units.
Designed for History Ph.D. students to develop competence in the history and historiography of the modern Balkans, from the French Revolution to the present. Areas of study include the influence of empires on the region, the rise of nationalism and nation states, the dilemmas of independence, the emergence and decline of communism in the region, and the recurrence of war and ethnic conflict.

HISTORY 326D. The Holocaust: Insights from New Research. 4-5 Units.
Overview of the history of the Holocaust, the genocide of European Jews. Explores its causes, course, consequences, and memory. Addresses the events themselves, as well as the roles of perpetrators and bystanders, dilemmas faced by victims, collaboration of local populations, and the issue of rescue. Considers how the Holocaust was and is remembered and commemorated by victims and participants alike. Uses different kinds of sources: scholarly work, memoirs, diaries, film, and primary documents.
Same as: CSRE 226D, CSRE 326D, HISTORY 226D, JEWISHST 226E, JEWISHST 326D

HISTORY 326E. Famine in the Modern World. 3 Units.
Open to medical students, graduate students, and undergraduate students. Examines the major famines of modern history, the controversies surrounding them, and the reasons that famine persists in our increasingly globalized world. Focus is on the relative importance of natural, economic, and political factors as causes of famine in the modern world. Case studies include the Great Irish Famine of the 1840s; the Bengal famine of 1943-44; the Soviet famines of 1921-22 and 1932-33; China's Great Famine of 1959-61; the Ethiopian famines of the 1970s and 80s, and the Somalia famines of the 1990s and of 2011.
Same as: HISTORY 226E, PEDS 226

HISTORY 327B. The Business of Socialism: Economic Life in Cold War Eastern Europe and the Soviet Union. 4-5 Units.
(Graduate students, enroll in 327B. Undergraduate students, enroll in 227B.) This colloquium investigates the processes of buying, making, and selling goods and services in Cold War Eastern Europe and the Soviet Union. We will familiarize ourselves with a variety of approaches to writing the history of economic life and discuss to what extent they are applicable to state socialist systems. Our focus will not be on theories of socialism but on empirically grounded studies that allow for insights into how the system operated in practice and interacted with capitalism. We will, among others, explore the following questions: What was the role of the state in the economies east and west of the Iron Curtain? Are socialism and capitalism two incompatible systems? How did women experience and shape economic life after the Second World War? What had a greater impact on the economies of the region: Cold War politics or globalization?.

HISTORY 327D. All Quiet on the Eastern Front? East Europe and Russia in the First World War. 3-5 Units.
Until recently history has been comparatively quiet about the experience of World War I in the east. Far from being a peripheral theater of war, however, the experiences of war on the Eastern Front were central to shaping the 20th century. Not only was the first shot of the war fired in the east, it was also the site of the most dramatic political revolution. Using scholarly texts, literature and film, this course combines political, military, cultural and social approaches to introduce the causes, conduct and consequences of World War I with a focus on the experiences of soldiers and civilians on the Eastern Front. Topics include: the war of movement, occupation, extreme violence against civilians, the Armenian genocide, population exchanges, the Russian Revolution and civil war, and the disintegration of empires and rise of nation-states.
Same as: HISTORY 227D, REES 227, REES 327

HISTORY 328. Circles of Hell: Poland in World War II. 5 Units.
Looks at the experience and representation of Poland's wartime history from the Nazi-Soviet Pact (1939) to the aftermath of Yalta (1945). Examines Nazi and Soviet ideology and practice in Poland, as well as the ways Poles responded, resisted, and survived. Considers wartime relations among Polish citizens, particularly Poles and Jews. In this regard, interrogates the traditional self-characterization of Poles as innocent victims, looking at their relationship to the Holocaust, thus engaging in a passionate debate still raging in Polish society.
Same as: HISTORY 228, JEWISHST 282, JEWISHST 382

HISTORY 330. Core Colloquium on Early Modern Europe: Ancien Regime. 4-5 Units.
Topics in the social, political, and religious history of Western Europe, 1550-1789, with an emphasis on France. May be repeated for credit.

HISTORY 330A. Early Modern Colloquium. 4-5 Units.
Historiographical survey from the Renaissance to the Enlightenment. Topics include Renaissance, Reformation, European expansion, state and nation building, printing, military, and scientific revolutions, origins of Enlightenment. Designed to prepare students doing either a primary or secondary graduate field in early modern European history.

HISTORY 330D. Europe in the World, 1789-Present. 4-5 Units.
The European conquest of parts of Africa, Asia, and the South Pacific by European merchants, missionaries, armies, and administrators had significant, and often cataclysmic, effects on indigenous political alliances, cultural practices, and belief systems. But were the effects of expansion entirely one-sided? What impact did the experiences of colonialism have on European politics, culture,and Europe's relations with the rest of the world? Explores how interaction between Europe and the rest of the world redefined the political, racial, sexual, and religious boundaries of both Europe and its colonies and gave rise to the more "globalized' society we live in today.
Same as: HISTORY 230D

HISTORY 331C. Modern European Core: The Twentieth Century. 4-5 Units.
The historiography of 20th-century Europe. Topics include WW I, the Russian Revolution, National Socialism, and the EU.

HISTORY 331D. Core Colloquium on Modern Europe: Intellectual History. 4-5 Units.
.

HISTORY 331E. Paper, Printing, and Digital Revolutions: Transformations of the Book. 4-5 Units.
What is a book? This seminar explores the conceptual implications of approximately two millennia of transformations in the physical and material properties of books. How have the meaning and authority we assign the written word changed as technologies of book production and dissemination have evolved, and how have they remained continuous? Topics covered include the rise of the medieval manuscript codex, the emergence of print culture in early modern Europe, and current debates over the nature of text in the digital age.
Same as: HISTORY 231E

HISTORY 331G. European Reformations. 3-5 Units.
Readings in and discussion of theological and social aspects of sixteenth century reformations: Luther, Radical Reform, Calvin, and Council of Trent, missionary expansion, religious conflict, creative and artistic expressions. Texts include primary sources and secondary scholarly essays and monographs.
Same as: HISTORY 231G, RELIGST 231, RELIGST 331

HISTORY 332B. Heretics, Prostitutes and Merchants: The Venetian Empire. 4-5 Units.
Between 1200-1600, Venice created a powerful empire at the boundary between East and West that controlled much of the Mediterranean, with a merchant society that allowed social groups, religions, and ethnicities to coexist. Topics include the features of Venetian society, the relationship between center and periphery, order and disorder, orthodoxy and heresy, the role of politics, art, and culture in the Venetian Renaissance, and the empire's decline as a political power and reinvention as a tourist site and living museum.
Same as: ITALIAN 332B

HISTORY 332G. Early Modern Cities. 4-5 Units.
Colloquium on the history of early modern European cities, covering urbanization, street life, neighborhoods, fortifications, guilds and confraternities, charity, vagrancy, and begging, public health, city-countryside relationship, urban constitutions, and confederations. Assignments include annotated bibliography, book review, and a final paper. Second-quarter continuation of research seminar available (HIST299S or HIST402).
Same as: HISTORY 232G

HISTORY 333. Reformation to Civil War: England under the Tudors and Stuarts. 4-5 Units.
English political and religious culture from the end of the Wars of the Roses to the Civil War of the 1640s. Themes include the growth of the size and power of the state, Reformation, creation of a Protestant regime, transformation of the political culture of the ruling elite, emergence of Puritanism, and causes of the Civil War. HISTORY 333 is a prerequisite for HISTORY 402 (Spring quarter).
Same as: HISTORY 233

HISTORY 333C. Two British Revolutions. 4-5 Units.
Current scholarship on Britain,1640-1700, focusing on political and religious history. Topics include: causes and consequences of the English civil war and revolution; rise and fall of revolutionary Puritanism; the Restoration; popular politics in the late 17th century; changing contours of religious life; the crisis leading to the Glorious Revolution; and the new order that emerged after the deposing of James II.
Same as: HISTORY 233C

HISTORY 333F. Political Thought in Early Modern Britain. 4-5 Units.
1500 to 1700. Theorists include Hobbes, Locke, Harrington, the Levellers, and lesser known writers and schools. Foundational ideas and problems underlying modern British and American political thought and life.
Same as: HISTORY 233F

HISTORY 333K. The Invention of the Modern Republic. 4-5 Units.
Examines the history of republican thinking in the Atlantic World from the Renaissance to the French Revolution.
Same as: HISTORY 233K

HISTORY 334F. Science, Technology, and Empire. 4-5 Units.
How modern Europe came to be connected to thennwider world through repeated cycles of expansion, circulation, andnnexchange from the mid-nineteenth century to the present. Using weeklynnthemes and in-depth discussions of ¿watershed¿ moments, nnthe roles played by colonialism, migration, commerce, warfare,nntelecommunications, and popular culture in redefining the place ofnnEurope in a changing global landscape will be explored.

HISTORY 334P. The Age of Plague: Medicine and Society, 1300-1750. 4-5 Units.
(Graduates, enroll in 334P. Undergraduates, enroll in 234P.) The arrival of plague in Eurasia in 1347-51 affected many late medieval and early modern societies. It transformed their understanding of disease, raised questions about the efficacy of medical knowledge, and inspired new notions of public health. This class explores the history of medicine in the medieval Islamic and European worlds. Changing ideas about the body, the roles of different healers and religion in healing, the growth of hospitals and universities, and the evolution of medical theory and practice will be discussed. How did medicine and society change in the age of plague?.

HISTORY 334R. Risk and Credit Before Modern Finance. 1 Unit.
In today's world, credit scores are nearly as important as citizenship. Creditworthiness is measured in numbers, but is also bound up with moral qualities. To lack credit is to be on the margins of society, and vice versa. How did we get here? How did lenders mitigate risks before credit scores were available? Where do the risk management tools of modern finance come from? How did merchants trade over long distances when information technology was extremely poor? This one-unit course will address these pressing questions from a historical perspective, starting from the modern U.S. and reaching back in time to the Middle Ages. Classroom discussions and readings include articles written by historians and social scientists, as well as primary sources in English translation.
Same as: HISTORY 234R

HISTORY 335. The Renaissance of War: Politics, Technology, and War in Late Medieval and Renaissance Italy. 4-5 Units.
The dynamic societies of the Italian Peninsula of the 14th to 16th centuries "prosperous, astonishingly creative, politically fractious, and endemically violent" produced sweeping, deeply consequential changes. Among these were new developments in the theory and practice of war, politics, and diplomacy that laid the foundations for the modern state system and European military power. The class covers: new diplomatic practice; the Military Revolution; state-building; war finance; court culture; and the intersection of these with the shimmering brilliance of Renaissance culture.

HISTORY 335C. Readings in the Supernatural. 4-5 Units.
Class will read and discuss a selection of monographs, scholarly essays, and primary sources on the rich supernatural world of early modern Europe. We will discuss how fairies, werewolves, nightmares, and trolls all became witches, how the binary of angels and demons figured in European thought, and how the marginalized imaginary was reconstituted in theatre and fiction.
Same as: HISTORY 235C

HISTORY 335D. When Worlds Collide: The Trial of Galileo. 4-5 Units.
In 1633, the Italian mathematician Galileo was tried and condemned for advocating that the sun, not the earth, was the center of the cosmos. The Catholic Church did not formally admit that Galileo was right until 1992. Examines the many factors that led to the trial of Galileo and looks at multiple perspectives on this signal event in the history of science and religion. Considers the nature and definition of intellectual heresy in the sixteenth and early seventeenth centuries, and examines the writings of Galileo's infamous predecessor Giordano Bruno (burned at the stake in 1600). Looks closely at documents surrounding the trial and related literature on Renaissance and Reformation Italy in order to understand the perspectives of various participants in this famous event. Focal point of seminar involves the examination of the many different histories that can be produced from Galileo's trial. What, in the end, were the crimes of Galileo?.
Same as: HISTORY 235D, ITALIAN 233, ITALIAN 333

HISTORY 335J. The Meaning of Life: Modern European Encounters with Consequential Questions. 4-5 Units.
(History 235J is an undergraduate course offered for 5 units; History 335J is a graduate course offered for 4-5 units.) Across two centuries of social, political, and religious upheaval and transformation, modern Europeans confronted a series of interconnected ¿big questions¿: What is humanity¿s relationship with deity? Where does life, including human life, come from, and where is it going? What considerations should shape human beings¿ relationships with, and actions toward, one another? What is socially and morally acceptable¿or transgressive? Is there life after death, and a spiritual realm distinct from the material world? Through case studies in the history of religion, evolutionary thought, gender and sexuality, and the aims and ends of empire, this course will examine European engagement with these questions across the nineteenth and twentieth centuries (with some background in earlier periods), paying attention to the ways in which the questions people asked¿and the conclusions they drew¿were shaped by social, religious, and political institutions and structures.

HISTORY 335L. Alien Imaginations: Extraterrestrial Speculations in Modern European History. 4-5 Units.
(History 235L is an undergraduate course offered for 5 units; History 335L is a graduate course offered for 4-5 units.) This course will examine the historical basis and evolution of modern European beliefs concerning the existence and nature of alien life throughout the universe, and the ways in which these imagined alien beings have historically reflected an interplay of social, religious, political, and scientific assumptions, hopes, fears, and preoccupations. We will explore the relationship between belief in extraterrestrial life and historical themes and episodes in European history including the debate over heliocentrism, deism and freethought, theories of life and of human nature, changing concepts of national identity, and the intertwined histories of immigration, colonialism, race, and gender. We will particularly examine how and why concepts of the alien took a dark and sinister turn across the late nineteenth- and early-to-mid-twentieth centuries.

HISTORY 336. Modern France. 4-5 Units.
(Daughton).

HISTORY 336E. Humanities+Design: Visualizing the Grand Tour. 4-5 Units.
Study of the eighteenth-century Grand Tour of Italy through visualization tools of the digital age. Critical readings in both visual epistemology and current Grand Tour studies; interrogating the relationship between quantitative and qualitative approaches in digital humanities; what new insights in eighteenth-century British travel to Italy does data visualization offer us? Students will transform traditional texts and documents into digital datasets, developing individual data analysis projects using text mining, data capture and visualization techniques.
Same as: CLASSICS 396, DLCL 396

HISTORY 336F. The End of the World As They Knew It: Culture, Cafés, and Crisis in Europe, 1880-1918. 4-5 Units.
The years stretching from roughly 1880 to end of the First World War were marked by profound social upheaval and an intense burst of creativity. This seminar will focus on the major cultural movements and big ideas of the period. Topics covered include the rise of mass culture and cinema, the origins of psychoanalysis, anti-Semitism and Zionism, new anxieties about sexuality and the ¿New Woman,¿ anarchism, decadence, degeneration, and Dada ¿ with cameos from Bernhardt, Freud, Klimt, Nietzsche, Toulouse-Lautrec, Wilde, Zola, and other luminaries of the age.
Same as: HISTORY 236F

HISTORY 336J. A Tour of Dangerous Ideas: Radical Thinkers in Modern Europe. 4-5 Units.
In this course we will examine ideas radical to their context in modern European thought, paying close attention to what it has meant to explain features of society, government, and politics in terms of power. What is power? What is human nature, and do all humans possess natural rights? How is human identity interwoven with the practice of power? What makes an idea radical? We will examine these and other questions through close readings of seven thinkers whose ideas shaped the modern period: John Locke, Jean-Jacques Rousseau, Mary Wollstonecraft, John Stuart Mill, Karl Marx, C.L.R. James, and Michel Foucault.
Same as: HISTORY 236J

HISTORY 337C. Street History: Learning the Past in School and Out. 3-5 Units.
Interdisciplinary. Since Herodotus, history and memory have competed to shape minds: history cultivates doubt and demands interpretation; memory seeks certainty and detests that which thwarts its aims. History and memory collide in modern society, often violently. How do young people become historical amidst these forces; how do school, family, nation, and mass media contribute to the process?.
Same as: EDUC 356

HISTORY 337D. The French Revolution and the Birth of Modern Politics. 4-5 Units.
(Students who have taken HISTORY 134 should not enroll in this course.) This course will focus on the birth of modern politics in the French Revolution. The goal will be to understand the structural contradictions of the French monarchy in the pre-revolutionary period, the reasons for the monarchy's failure to resolve those contradictions, and the political dynamic unleashed as they were solved by the revolutionary action of 1789. Sovereignty, democracy, rights, representation, and terror will be principal themes. Lectures will be combined with close reading and discussions of political and philosophical writings of the period.
Same as: HISTORY 237D

HISTORY 337F. 20th Century British History through the Hoover Archives. 4-5 Units.
From the rich resources of the Hoover Institution, the students in this course will select a particular archive (war posters, politician, spy, literary figure, diplomat, etc. etc.) to investigate, to write about,discuss in class, and, it is hoped, present in an exhibition at the Hoover, learning museum skills along the way as well as the history of Britain in the 20th century.
Same as: HISTORY 237F

HISTORY 338A. Graduate Colloquium in Modern British History, Part I. 4-5 Units.
Influential approaches to problems in British, European, and imperial history. The 19th-century British experience and its relationship to Europe and empire. National identity, the industrial revolution, class formation, gender, liberalism, and state building. Goal is to prepare specialists and non-specialists for oral exams.

HISTORY 338B. MODERN BRITISH HISTORY PART II. 4-5 Units.
Themes include empire and racism, the crisis of liberalism, the rise of the welfare state, national identity, the experience of total war, the politics of decline, and modernity and British culture.

HISTORY 338G. Ethnography of the Late Middle Ages: Social history and popular culture in the age of the plague. 4-5 Units.
During the late Middle Ages, as Europe was recovering from the devastation of the Black Death, political reorganization contributed to a burst of archival documentation that allows historians richly detailed glimpses of societies in transition. We will be reading selected scholarly articles and monographs covering such topics as persecution, prechristian cultural remnants, folk theologies, festival cultures, peasant revolts, heresy, and the advent of the diabolic witch.
Same as: HISTORY 238G

HISTORY 338J. The European Scramble for Africa: Origins and Debates. 4-5 Units.
Why and how did Europeans claim control of 70% of African in the late nineteenth century? Students will engage with historiographical debates ranging from the national (e.g. British) to the topical (e.g. international law). Students will interrogate some of the primary sources on which debaters have rested their arguments. Key discussions include: the British occupation of Egypt; the autonomy of French colonial policy; the mystery of Germany¿s colonial entry; and, not least, the notorious Berlin Conference of 1884-1885.
Same as: AFRICAAM 238J, HISTORY 238J

HISTORY 339F. Empire and Information. 4-5 Units.
How do states see? How do they know what they know about their subjects, citizens, economies, and geographies? How does that knowledge shape society, politics, identity, freedom, and modernity? Focus is on the British imperial state activities in S. Asia and Britain: surveillance technologies and information-gathering systems, including mapping, statistics, cultural schemata, and intelligence systems, to render geographies and social bodies legible, visible, and governable.
Same as: HISTORY 239F

HISTORY 339H. Modern European History in a Global Age. 4-5 Units.
How scholars can write the history of modern Europe in a way that integrates global and transnational perspectives. Discussed the methodological challenges and merits of various approaches and reviews relevant theoretical and interdisciplinary models for how this can best be done. Topics include globalization, migration, internationalism, colonialism, post-colonialism, modern warfare, and the media.

HISTORY 339J. Work and Leisure in Nineteenth Century Britain. 4-5 Units.
This course charts the changes wrought by the Industrial Revolution, empire, and social factors in Britons' lives at work and at home in the nineteenth century. Readings will explore trade unionism and Chartism, urban migration, consumer culture, print culture, organized sports, shows, rational leisure" and the development of exhibitions and public museums. Students will gain a sense of how Britons worked and played in a century that gave birth to pastimes and institutions that continue to shape our own.
Same as: HISTORY 239J

HISTORY 339K. Sex, Death, and God in Modern Europe. 4-5 Units.
In the midst of social and political upheaval and transformation, people in modern Europe have grappled with central questions of human existence. What place does humanity occupy in the universe and in relation to God? How does life begin, and under what circumstances? What gives life its meaning? What is socially and morally acceptable--or transgressive? Is there life after death, and a spiritual realm distinct from the material world? This course will examine answers to these questions across the late eighteenth, nineteenth, and twentieth centuries, and the ways in which the questions people asked--and the conclusions they drew--were shaped by social, political, and religious assumptions, hopes, and fears.
Same as: HISTORY 239K

HISTORY 340. The History of Evolution. 4-5 Units.
This course examines the history of evolutionary biology from its emergence around the middle of the eighteenth century. We will consider the continual engagement of evolutionary theories of life with a larger, transforming context: philosophical, political, social, economic, institutional, aesthetic, artistic, literary. Our goal will be to achieve a historical rich and nuanced understanding of how evolutionary thinking about life has developed to its current form.
Same as: HISTORY 240

HISTORY 341C. History of Suggestion and Mind Control. 4-5 Units.
This course traces the history of suggestion and hypnosis from the birth of mesmerism in the late 18th-century to Cold War controversies over brainwashing, and recent debates on global terrorism and the ethics of technology. Born during the Age of Revolutions, the therapeutic system of mesmerism was quickly pushed to the margins of scientific practice as it was elaborated in the 19th-century but nonetheless remained a key determinant of human experience, politics, social relations, and medical practice. While reading secondary and primary texts, we will follow the evolution of various theories of trance and hypnotic induction alongside the development of scientific approaches to psychology in the West and the non-West to unravel the complex relationship between politics, social reform, labor, international relations, espionage, and indoctrination, and practices of suggestion and mind control.

HISTORY 342. Darwin in the History of Life. 4-5 Units.
Origins and impact of evolutionary theory from the nineteenth century to the present. Early theories of fossils, the discovery of deep time and uniformitarian geology, debates over evolution vs. extinction, the origin of life, and human origins; the rise of anthropology and racial theory; the changing challenge of creationism, the abuse of evolution in eugenics and Nazi racial hygiene; and new discoveries in the realm of extreme life, evo-devo, neocatastrophism, and the new technological frontier of biomimicry. Attendance at the lectures of HISTORY 142 is required.

HISTORY 342G. Spaces and Practices of Natural History. 4-5 Units.
Gentleman scientists once practiced natural history by studying specimens collected from around the world, stored in cabinets of curiosity. From the 17th to 19th centuries, natural history moved out of the cabinet and into the field; these environments required new ways of thinking and different types of scientific workers. This course will track how new spaces, practices, and people became associated with natural history and explore how they shaped the content of the field and the social contours of science.
Same as: HISTORY 242G

HISTORY 342J. London Low Life in the Nineteenth Century. 4-5 Units.
(History 242J is an undergraduate course offered for 5 units; History 342J is a graduate course offered for 4-5 units.) London began the nineteenth century as a city of one million, but was home to over six million people by the century's end. How did Londoners in the nineteenth century respond to the challenges and temptations of life in a growing metropolis? How did government and reformers try to influence and control city dwellers' behavior? This class seeks to answer these questions by exploring life in Britain's capital in the nineteenth century, using the digital database ¿London Low Life¿ as a guide. Contemporary street literature, night-life guides, pamphlets, broadsides, images, reformer's tracts, and public-interest journalism are some of the sources that will give us a window into vice, virtue, and daily life in London during a period of great uncertainty and change.

HISTORY 343C. People, Plants, and Medicine: Colonial Science and Medicine. 4-5 Units.
Explores the global exchange of knowledge, technologies, plants, peoples, disease, and medicines. Considers primarily Africans, Amerindians, and Europeans in the eighteenth-century West but also takes examples from other knowledge traditions. Readings treat science and medicine in relation to voyaging, colonialism, slavery, racism, plants, and environmental exchange. Colonial sciences and medicines were important militarily and strategically for positioning emerging nation states in global struggles for land and resources.
Same as: HISTORY 243C

HISTORY 343G. Tobacco and Health in World History. 4-5 Units.
Cigarettes are the world's leading cause of death--but how did we come into this world, where 6 trillion cigarettes are smoked every year? Here we explore the political, cultural, and technological origins of the cigarette and cigarette epidemic, using the tobacco industry's 80 million pages of secret documents. Topics include the history of cigarette advertising and cigarette design, the role of the tobacco industry in fomenting climate change denial, and questions raised by the testimony of experts in court.
Same as: HISTORY 243G

HISTORY 344. Narrative Knowing. 1-2 Unit.
Philosophers and historians have been debating the status of narrative explanation for well over 50 years. Until quite recently, a supposed dichotomy between natural science and history has shaped the discussion. Beginning from the origins, history, and limitations of the dichotomy, this seminar will explore how claims for narrative understanding and explanation have come to occupy an increasingly important role in the natural sciences as well as the social sciences. Some classic contributors are Hempel, Danto, Mink, Kuhn, White, Ricouer, Geertz, and Ginzburg. Current authors include Roth, Rheinberger, Kitcher, Beatty, Morgan, and (yes) Wise.
Same as: PHIL 344

HISTORY 344F. Intersectional Design: An Expanded Approach to Gender in Tech. 4-5 Units.
This d-school seminar prototypes concepts and methods for "inclusive" design. From the moment we arrive on the planet, gender shapes our perception of the world. Examples of products (including objects, services, and systems) gone awry will serve as prompts for design activities, challenges, and discussions on gender issues to illustrate the different needs of women, men, and gender-fluid people. Class sessions mix use case explorations with design methodology, design thinking abilities, and guest speakers from technology, design, and academia. Students will be asked to work in interdisciplinary teams on several design challenges, culminating in the development of a toolkit for inclusive design. Methods will interact in crucial ways to create "intersectional thinking" (i.e., to consider how gender, ethnicity, sexuality, socio-economic status, etc. work together to require new solutions in design). Topics include: algorithms, media, seat belts for pregnant women, robotics, assistive technologies, tech for developing worlds, video games, urban/rural design, software development, and many more. Admission by application only. Visit d.school.stanford.edu/classes for more information.
Same as: FEMGEN 344F, HISTORY 244F

HISTORY 345A. Africa in the Era of the Slave Trade. 4-5 Units.
The slave trade, including the trans-Saharan, Indian Ocean, and trans-Atlantic trades, constituted nearly a millennium of interaction with the wider world and set in motion transformations in African societies, polities, and cultures. Topics include the debates about slavery in Africa, the impact of the slave trade on African societies, state formation, economic change, religious change, and household change in the period before the scramble for Africa in the late 19th century.

HISTORY 345B. African Encounters with Colonialism. 4-5 Units.
This colloquium is a broad sweep of some of the main themes in the history of the colonial period for Africa. A course of this nature can not help but be a selective sample of the field. For example, topics on the end of slavery in Africa, on the social history of law in colonial Africa, Islam and religious conversion, nationalism and decolonization are not included here because they are covered by more specialized courses. This course is designed to let students sample different approaches to the history of the colonial period.

HISTORY 346F. Women in African history, Gender in Herstory. 4-5 Units.
This graduate colloquium focuses on the place of women in modern African history. We focus specifically on the literary techniques that African women have used to represent themselves to the outside world. In the course of ten in-depth seminars, we will intensively read a number of African women-authored autobiographies and biographies from the twentieth century to the present day. We look at the auto/biographies of prominent as well as not-so-well-known African women: Winnie Madikizela-Mandela and Wangari Maathai¿s autobiographies will be read alongside the life stories of more ¿ordinary¿ women. The seminar straddles history, literary theory and gender studies, and it encourages students to think critically about the creative ways in which African women have portrayed themselves to their intimates and their families as well as to the wider world.

HISTORY 348. Religion, Radicalization and Media in Africa since 1945. 4-5 Units.
What are the paths to religious radicalization, and what role have media- new and old- played in these conversion journeys? We examine how Pentecostal Christians and Reformist Muslims in countries such as South Africa, Nigeria, Sudan, and Ethiopia have used multiple media forms- newspapers, cell phones, TV, radio, and the internet- to gain new converts, contest the authority of colonial and post-colonial states, construct transnational communities, and position themselves as key political players.
Same as: AFRICAST 248, AFRICAST 348, HISTORY 248, RELIGST 230X, RELIGST 330X

HISTORY 348D. Law and Colonialism in Africa. 4-5 Units.
Law in colonial Africa provides an opportunity to examine the meanings of social, cultural, and economic change in the anthropological, legal, and historical approaches. Court cases as a new frontier for the social history of Africa. Topics: meanings of conflicts over marriage, divorce, inheritance, property, and authority.
Same as: HISTORY 245G

HISTORY 349. Bodies, Technologies, and Natures in Africa. 4-5 Units.
This interdisciplinary course explores how modern African histories, bodies, and natures have been entangled with technological activities. Viewing Africans as experts and innovators, we consider how technologies have mediated, represented, or performed power in African societies. Topics include infrastructure, extraction, medicine, weapons, communications, sanitation, and more. Themes woven through the course include citizenship, mobility, labor, bricolage, in/formal economies, and technopolitical geographies, among others. Readings draw from history, anthropology, geography, and social/cultural theory.
Same as: AFRICAST 249, ANTHRO 348B

HISTORY 349A. The Mamluks: Slave-Soldiers and Sultans of Medieval Egypt. 3-5 Units.
Known as ghulam or mamluk in Arabic, the slave-soldier was a ubiquitous phenomenon in the world of medieval Islam. Usually pagan steppe nomads, mamluks were purchased in adolescence, converted to Islam, taught Arabic, and trained to lead armies. Sometimes manumitted and sometimes not, in either case mamluks rose to positions of privilege and prominence in numerous regimes in the medieval Middle East.nnNowhere was the mamluk institution so fundamental as it was in Egypt between 1250 and 1517 CE, when Cairo was ruled by these slave-soldiers, their ranks constantly renewed by imports of new mamluks from the Black Sea and Caucuses. Born in the age of the crusades and ultimately conquered by the Ottoman Empire, the Mamluk Sultanate can be understood as a bridge between the worlds of medieval and early modern Islam, as well as between East and West, sitting astride the major Nile-Red Sea route that linked the Mediterranean world to that of the Indian Ocean and beyond. This class will investigate the rise and fall of the Mamluk Sultanate in Egypt and its key roles in the commercial, diplomatic, and political history both of the medieval Middle East and the wider world.

HISTORY 351A. Core in American History, Part I. 4-5 Units.
May be repeated for credit.

HISTORY 351B. Core in American History, Part II. 4-5 Units.
.

HISTORY 351C. Core in American History, Part III. 4-5 Units.
.

HISTORY 351D. Core in American History, Part IV. 4-5 Units.
May be repeated once for credit.

HISTORY 351E. Core in American History, Part V. 4-5 Units.
Required of all first-year United States History Ph.D. students. Topics in Twentieth Century United States History.

HISTORY 351F. Core in American History, Part VI. 4-5 Units.
Required of all first-year Ph.D. students in U.S. History.

HISTORY 351J. The End of American Slavery, 1776-1865. 4-5 Units.
How did the institution of American slavery come to an end? The story is more complex than most people know. This course examines the rival forces that fostered slavery's simultaneous contraction in the North and expansion in the South between 1776 and 1861. It also illuminates, in detail, the final tortuous path to abolition during the Civil War. Throughout, the course introduces a diverse collection of historical figures, including seemingly paradoxical ones, such as slaveholding southerners who professed opposition to slavery and non-slaveholding northerners who acted in ways that preserved it. Historical attitudes toward race are a central integrative theme.
Same as: AFRICAAM 251J, AMSTUD 251J, HISTORY 251J

HISTORY 352B. History of American Law. 5 Units.
(Formerly Law 318. Now Law 3504.) This course examines the growth and development of American legal institutions with particular attention to crime and punishment, slavery and race relations, the role of law in developing the economy, and the place of lawyers in American society, from colonial times to the present. Special Instructions: Any student may write a paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Final exam or paper. Automatic grading penalty waived for writers. Cross-listed with History (HISTORY 152 Consent of instructor required) & (HISTORY 352B).
Same as: HISTORY 152

HISTORY 353D. Approaches to American Legal History. 4-5 Units.
(Same as LAW 651.) Legal history may once have been primarily devoted to exploring legal doctrines and key judicial opinions, and thus to be of interest mainly to legal scholars and lawyers. Now, the best writing in legal history resembles historical writing more generally, and the study of legal ideas and practices is increasingly integrated with social, intellectual, cultural, and political history. Examines recent writings in American legal history, ranging broadly across time and space to ask how the field reflects developments in historical writing more generally, and how the use of legal materials affects our understanding of major aspects of American history.

HISTORY 353F. Thinking the American Revolution. 4-5 Units.
No period in American history has generated as much creative political thinking as the era of the American Revolution. This course explores the origins and development of that thought from the onset of the dispute between Great Britain and its American colonies over liberty and governance through the debates surrounding the construction and implementation of the United States federal Constitution.
Same as: HISTORY 253F

HISTORY 354D. Religion and War in America. 4 Units.
Scholars have devoted much attention to wars in American history, but have not agreed as to whether religion was a major cause or simply a cover for political, economic, and other motives. We will compare interpretations that leave religion out, with those that take it into account. We will also look at the impact of war on the religious lives of ordinary Americans. We will examine both secondary as well as primary sources, beginning with King Philip's War in the 17th century, and ending with the "War on Terror" in the present day.
Same as: AMSTUD 105R, CSRE 105, HISTORY 254D, RELIGST 105

HISTORY 354F. Law and Empire in U.S. History. 2-3 Units.
(Same as LAW 3506. Instructor consent required for History 354F.) This course will examine the interrelationship between legal norms and empire in the history of the United States. Topics in this part will include the Constitution as an imperial document; law and the expansion of the United States in western North America, Puerto Rico, and Hawaii; the Insular Cases; and current debates over extraterritoriality and the War on Terror. Substantial readings will consist of scholarly articles, historical cases, and primary sources, and will be provided online. Requirements for the course include regular class participation and, at the students' election, either response papers or a historiographical essay. Students may also elect to complete a research paper, in which case they will receive 3 units and "R" credit.

HISTORY 356E. The American Civil War: The Lived Experience. 4-5 Units.
What was it like to live in the United States during the Civil War? This course uses the lenses of racial/ethnic identity, gender, class, and geography (among others) to explore the breadth of human experience during this singular moment in American history. It illuminates the varied ways in which Americans, in the Union states and the Confederate states, struggled to move forward and to find meaning in the face of unprecedented division and destruction.

HISTORY 356G. Constructing Race and Religion in America. 4-5 Units.
This seminar focuses on the interrelationships between social constructions of race and social interpretations of religion in America. How have assumptions about race shaped religious worldviews? How have religious beliefs shaped racial attitudes? How have ideas about religion and race contributed to notions of what it means to be "American"? We will look at primary and secondary sources and at the historical development of ideas and practices over time.
Same as: AFRICAAM 236, AMSTUD 246, CSRE 246, HISTORY 256G, RELIGST 246, RELIGST 346

HISTORY 357E. History of Conservatism. 4-5 Units.
What is conservatism in America? Where did it come from, and where might it be going? Looking at conservatism as a political, social, and intellectual movement, we will consider these questions by reading primary and secondary sources and archival material. Suitable for students of any or no particular political persuasion. No prerequisites or background required, although the reading will be considerable.
Same as: HISTORY 257E

HISTORY 358. History of Sexual Violence in America. 4-5 Units.
This undergraduate/graduate colloquium explores the history of sexual violence in America, with particular attention to the intersections of gender and race in the construction of rape. We discuss the changing definitions of sexual violence in law and in cultural representations from early settlement through the late-twentieth century, including slavery, wartime and prison rape, the history of lynching and anti-lynching movements, and feminist responses to sexual violence. In addition to introducing students to the literature on sexual violence, the course attempts to teach critical skills in the analysis of secondary and primary historical texts. Students write short weekly reading responses and a final paper; no final exam; fifth unit research or CEL options.nnLimited enrollment, permission of instructor required. Submit application form and indicate interest in CEL option. Priority admission to History, FGSS, CSRE, AFRICAAM, and AMSTUD declared majors and minors. (Cardinal Course certified by the Haas Center).
Same as: AFRICAAM 192, AMSTUD 258, CSRE 192E, FEMGEN 258, FEMGEN 358, HISTORY 258

HISTORY 359E. American Interventions, 1898-Present. 5 Units.
This class seeks to examine the modern American experience with limited wars, beginning with distant and yet pertinent cases, and culminating in the war in Iraq. Although this class will examine war as a consequence of foreign policy, it will not focus primarily on presidential decision making. Rather, it will place wartime policy in a broader frame, considering it alongside popular and media perceptions of the war, the efforts of antiwar movements, civil-military relations, civil reconstruction efforts, and conditions on the battlefield. We will also examine, when possible, the postwar experience.
Same as: HISTORY 259E, INTNLREL 168A

HISTORY 360P. American Protest Movements, Past and Present. 4-5 Units.
(History 260P is an undergraduate course offered for 5 units; History 360P is a graduate course offered for 4-5 units.) Societal change comes only when individuals and groups speak out, perseverantly, against prevailing norms. This course examines the overlapping histories of three nineteenth-century protest movements: antislavery, women¿s rights, and temperance. It focuses on the arguments and tactics used by these movements to persuade Americans to oppose the status quo, and it examines the points of agreement and disagreement that arose within and among these movements. Ultimately, the course connects these past protest movements to more recent analogs, such as Black Lives Matter, ERA ratification, and marijuana legalization. Throughout the course, race, gender, and class serve as central analytical themes.

HISTORY 361D. History of Civil Rights Law. 5 Units.
(Same as LAW 7838.) This is a seminar that will examine canonical civil rights law using history. We will investigate the historical context behind the enactment of particular laws and judicial decisions. We will also discuss the meaning and implications of the term "civil rights law." Readings will include cases, law review articles, primary sources, and history articles. Topics will include segregation, abortion, workers' rights, and disability. 14th Amendment is not a prerequisite for the seminar. Requirements for the course include regular class participation and, at the students' election, either response papers or a historiographical essay. Elements used in grading: Attendance, Class Participation, Written Assignments, Final Paper. CONSENT APPLICATION: To apply for this course, students must complete and submit a Consent Application Form available on the SLS website (Click Courses at the bottom of the homepage and then click Consent of Instructor Forms). See Consent Application Form for instructions and submission deadline.

HISTORY 362G. The Pivotal Decade in U.S. History: 1960's or 1970's?. 4-5 Units.
Which had more lasting impact, the civil war of the 1960s or the conservative revolt of the 1970s? Should the 1970s supersede the 1960s as a pivotal moment when something happened of considerable importance to historians? Considers this debate of the decades comparatively and thematically, addressing topics including civil rights, foreign policy, electoral politics, popular culture, law, economics, labor, and social movement organizing.

HISTORY 364. History of Prisons and Immigration Detention. 4-5 Units.
This course will explore the history of the growing prison and immigration detention systems in the United States. They will pay particular attention to how they developed and how they affect different populations.
Same as: AMSTUD 264, CSRE 264, HISTORY 264

HISTORY 366B. Immigration Debates in America, Past and Present. 3-5 Units.
Examines the ways in which the immigration of people from around the world and migration within the United States shaped American nation-building and ideas about national identity in the twentieth century. Focuses on how conflicting ideas about race, gender, ethnicity, and citizenship with respect to particular groups led to policies both of exclusion and integration. Part One begins with the ways in which the American views of race and citizenship in the colonial period through the post-Reconstruction Era led to the passage of the Chinese Exclusion Act in 1882 and subsequently to broader exclusions of immigrants from other parts of Asia, Southern and Eastern Europe, and Mexico. Explores how World War II and the Cold War challenged racial ideologies and led to policies of increasing liberalization culminating in the passage of the 1965 Immigration Act, which eliminated quotas based on national origins and opened the door for new waves of immigrants, especially from Asia and Latin America. Part Two considers new immigration patterns after 1965, including those of refugees, and investigates the contemporary debate over immigration and immigration policy in the post 9/11 era as well as inequalities within the system and the impact of foreign policy on exclusions and inclusions.
Same as: CSRE 166B, HISTORY 166B

HISTORY 369F. Modern American History: From Civil Rights to Human Rights. 4-5 Units.
(History 269F is an undergraduate course offered for 5 units; History 369F is a graduate course offered for 4-5 units.) This focuses on American social justice movements during the years since the passage of landmark civil rights legislation during the 1960s, with particular emphasis on efforts to extend rights to all people.
Same as: HISTORY 269F

HISTORY 370. Graduate Colloquium on Colonial Latin American History. 4-5 Units.
Sixteenth to nineteenth centuries. Indigenous cultures. The arrival of Europeans and its impact on native and European societies. Culture, religion and institutions, and everyday life. The independence period and the formation of new nations.

HISTORY 370E. Queer History of the Americas. 4-5 Units.
This course will examine LGBT history in the Americas. It traces the development of homosexuality as a category of analysis; the construction of trans identity; the ways in which same-sex desire and gender identity were regulated over time; and queer people's struggles for recognition, liberation, and, ultimately, rights.
Same as: HISTORY 270E

HISTORY 371. Graduate Colloquium: Explorations in Latin American History and Historiography. 4-5 Units.
Introduction to modern Latin American history and historiography, including how to read and use primary sources for independent research.
Same as: ILAC 371

HISTORY 372A. Mexico: From Colony to Nation or the History of an Impossible Republic?. 5 Units.
Was a republican form of government even possible in 19th-century Mexico after 300 years of colonial rule under the Spanish monarchy? Was the Spanish colonial heritage a positive or a negative legacy according to 19th-century Mexican politicians? How were they to forge a new national identity with so many ethnically and culturally diverse peoples throughout the territory? Just how ¿traditional¿ was, in fact, the colonial period? These are some of the questions we will explore in this course. Journeying from the late colonial period (c.1700) to the 35-year dictatorship known as El Porfiriato (1876-1911) we will examine how Mexico¿s diverse indigenous peoples adapted to both colonial and postcolonial rule, how they actively participated in politics and political discourse to preserve their cultures, customs and colonial privileges, and how after independence in 1821, a new republican political culture was forged. Mexico was not an impossible republic, but rather another kind of republic.

HISTORY 372B. Colonial Mexico: Images and Power. 3-5 Units.
How did images maintain, construct, or transform political power during the conquest and colonization of Mexico? The creation and destruction of visual materials in this period had a complicated relationship with power. The pictographic codices that celebrated the expansive Aztec Empire were created after its fall; and the conquistadors' indigenous allies painted some of the most triumphalist narratives of the conquest. Friars accused indigenous peoples of "idolatry" both to justify the destruction of their images and objects, and to construct legal defenses of their humanity. Colonial authorities frequently claimed Afro-Catholic festivals were seditious. In light of such complexity, official histories that recount the top-down consolidation of royal and viceroyal power are suspiciously simple. What counter-narratives do images and other visual phenomena from this tumultuous period offer? This course introduces students to major texts from Colonial Mexico (royal chronicles, conquistadors' tales, letters, poems, festival accounts) alongside a fascinating trove of images (painted codices with Nahuatl texts, feather mosaics, and indigenous heraldry) and considers how experiences of images and spectacles were transformed into textual accounts ("ekphrasis" or the literary device of description). Taught in Spanish.
Same as: HISTORY 272, ILAC 214, ILAC 314

HISTORY 373A. The European Expansion. 4-5 Units.
The relationship between European monarchies and their colonial domains from the 16th-18th centuries. Reasons for expansion, methods, and results. Case studies include the Spanish, Portuguese, Dutch, French, and English domains in Africa, Asia, and the Americas. Readings include primary and secondary sources.
Same as: HISTORY 273

HISTORY 373E. The Emergence of Nations in Latin America: Independence Through 1880. 4-5 Units.
This course provides an introduction to the main themes of nineteenth-century Latin American history, including independence from Spain, the emergence of various nation-states, and the development of a new social, political, and economic order in the region.
Same as: HISTORY 273E

HISTORY 374. Mexico Since 1876: History of a "Failed State"?. 5 Units.
(Same as History 174.) This course is an introduction to the history and diverse peoples of modern Mexico from 1876 to the present. Through lectures, discussions, primary and secondary readings, short documentaries, and written assignments, students will critically explore and analyze the multiplicity of historical processes, events and trends that shaped and were shaped by Mexicans over the course of a century. The course will cover some of the social and political dimensions of rural social change, urbanization and industrialization, technological innovation and misuse, environmental degradation and conservation, education, ideology, culture and media, migration, and the drug trade.

HISTORY 374C. The History of Mexicans and Mexican Americans. 4-5 Units.
This course will explore the history of Mexican migrants and Mexican Americans from 1848 to the present.
Same as: CHILATST 274, HISTORY 274C

HISTORY 375B. Borders and Borderlands in Modern Mexico. 4-5 Units.
Surveys the history of Mexico's borders and borderlands from the nineteenth century to the present. Examines theoretical conceptualizations of the borderlands as well as the historical development of identities and geographic borders within and around Mexico. Topics include the legacies of war, map making, the construction of lo Mexicano, the politics of culture, and migrations to, from, and through Mexico. Analyzes the prevailing trends in Mexicanist historiography.

HISTORY 378. The Historical Ecology of Latin America. 4-5 Units.
What role did the natural environment play in the emergence of Latin America as a distinct geographical and socio-cultural world region? How do we analyze the historical relationship between the regions rich and seemingly abundant natural resources and its status as "underdeveloped"? What historical consequences did this relationship have and what alternative, more sustainable developmental paths can we envision for the future in light of the past that we will study? In this course, students will become familiar with the historiography on Latin America (with emphasis on Mexico) that has explored these questions through a variety of approaches, methodologies and points of view.
Same as: HISTORY 278B

HISTORY 378A. The Logic of Authoritarian Government, Ancient and Modern. 5 Units.
If authoritarianism is less economically efficient than democracy, and if authoritarianism is a less stable form of political organization than democracy, then why are there more authoritarian governments than democracies? To address this paradox, focus is on theoretical and empirical literature on authoritarian governments, and related literatures on the microeconomic analysis of property rights and credible commitments.

HISTORY 379. Latin American Development: Economy and Society, 1800-2014. 4-5 Units.
The newly independent nations of Latin America began the 19th century with economies roughly equal to the U.S. and Canada. What explains the economic gap that developed since 1800? Why are some Latin American nations rich and others poor and how have societies changed over time? Marxist, dependency, neoclassical, and institutionalist interpretive frameworks are explored. The effects of globalization on Latin American economic growth, autonomy, and potential for social justice are examined and debated.
Same as: HISTORY 279

HISTORY 379D. Modern Brazil: Economy, Society & Culture. 4-5 Units.
This course addresses the history of modern Brazil from independence in 1822 to the present day. The class focuses on theories of economic development, social structure and change, and cultural life in Brazil's diverse regions.
Same as: HISTORY 279D

HISTORY 380B. The Birth of Islam: Authority, Community, and Resistance. 3-5 Units.
This course explores the historical problem of how authority and community (in both the political and religious sense) were defined and challenged in the early Islamic period. Chronological topics covered include: the political, cultural, and religious world of Late Antiquity into which Muhammad was born; the crystallization of a small community of believers who supported Muhammad's message of radical monotheism and aided him in the conquest and conversion of the Arabian Peninsula; the problems of legacy and leadership in the community of the faithful after Muhammad's death; the Arabo-Islamic conquests beyond Arabia during the 7th and early 8th centuries and the establishment of the first Islamic empire under the rule of the Umayyad clan; the Sunni/Shi'a split (and further splits in Shi'ism); the revolution of 750 A.D. and overthrow of the Umayyads by the 'Abbasids; the flourishing of a sophisticated world of learning and culture under the 'Abbasids; and the waning of the 'Abbasids empire in the tenth century and political reconfiguration of the Islamic lands.
Same as: GLOBAL 134, GLOBAL 234, HISTORY 280B

HISTORY 380C. Archives, Documents, and Manuscripts: Sources of Ottoman History. 4-5 Units.
The seminar focuses on Ottoman-Turkish texts in various genres - political and moral treatises, histories, legal canons and court records, imperial decrees and fiscal documents, travelogues, private letters and novellas - gathered from archival sources, manuscripts and printed primary material from the 16th to 19th centuries. Students will be introduced to various paleographical and codicological skills. The seminar explores Ottoman-Turkish manuscripts in the Special Collections at Stanford Library. Knowledge of Turkish and Ottoman-Turkish is required.

HISTORY 381. Economic and Social History of the Modern Middle East. 4-5 Units.
The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market are combined with possible case studies of Egypt, Iraq, and Palestine.

HISTORY 381E. Oil, Maps, Data: Technology in the Middle East. 4-5 Units.
This course introduces students to a wide range of humanities and social science concepts pertaining to the global study of technology with an emphasis on the Middle East in the 19th, 20th and 21st-centuries. The main body of the course focuses on three case studies namely oil, mapping, and the internet through which issues of power, race, colonialism, financial imperialism, violence, and surveillance will be explored. This colloquium provides a unique perspective on contemporary debates about the politics and ethics of technology through a study of their global circulation.
Same as: HISTORY 281E

HISTORY 382. The United States and the Middle East since 1945. 4-5 Units.
Since the end of WW II, U.S. interests in the Middle East have traditionally been defined as access to oil at a reasonable price, trade and markets, containing the influence of the Soviet Union, and the security of Israel. Is this the full range of U.S. interests? How has the pursuit of these interests changed over time? What forces have shaped U.S. policy? What is the impact of U.S. policy on the region itself?.
Same as: HISTORY 282

HISTORY 382G. Israel from the Margins. 4-5 Units.
Although secular, European Jews form a minority of the population of the State of Israel, and its history is typically narrated and interpreted from that perspective. Israel looks like a rather different place if it is seen and understood from the point of view of Middle Eastern and North African Jews,including those indigenous to the country before the advent of the modern Zionist movement, orthodox and ultra-orthodox Jews, Palestinian Arabs (nearly twenty percent of Israel's population today), migrant workers (about 200,000), and women. This course does not suggest that their perspectives are necessarily more real or true, only that an understanding of Israel that does not adequately consider them is necessarily false.

HISTORY 382J. Disasters in Middle Eastern History. 4-5 Units.
(History 282J is an undergraduate course offered for 5 units; History 382J is a graduate course offered for 4-5 units.) This course explores the history of disasters in the Middle East from the early modern period to the mid-20th-century. We will trace the evolving meanings of disasters and misfortunes by focusing on critical moments -- plagues, fires, earthquakes, wars -- to examine how people have responded to these events, labeled them, and devised strategies to live with or forget them. The course readings follow the evolution of policies and norms together with the articulation of new forms of knowledge and expertise in the wake of catastrophe. Additionally, particular attention will be paid to how modern conceptions of disaster relate to older understandings of apocalypse, as well as to various strands of "disaster reformism," when rethinking tragedy and time helped assert radical agendas for reforming political, economic, social, communal, racial, and gender relations while remodeling social science and intellectual life. The course focuses on various trajectories of disaster thinking in Arabic, Turkish, Greek, Armenian, and Hebrew.
Same as: ANTHRO 382J

HISTORY 383C. The Medieval Middle East: Crusaders, Turks, and Mongols. 3-5 Units.
This course surveys the history of the Middle East from c.950 A.D. to c.1517 A.D., placing particular emphasis on the following questions: What were the social, cultural, and political contexts for conversion to Islam in the Middle Ages? How did the interplay of nomadic and sedentary peoples shape Middle Eastern history? What were the nature of Christian-Muslim relations and the fate of religious minorities in an age of Crusade and Jihad? What were the conditions for the rise, flourishing, and eventual collapse of a ¿world-system¿ in this period (with the lands of the Middle East serving as its nexus)? Chronological topics include: the arrival in the Middle East of the Seljuk Turks, new adopters of Islam and recent nomads; the western European crusades to the Holy Land and the establishment of so-called ¿Crusader States¿ in Syria; the subjugation of Iran to pagan Mongols¿and the Mongols¿ eventual conversion to Islam; the rise to power of a dynasty of Turkish slave-soldiers (mamluks) in Cairo and the political reunification of Syria and Egypt under their rule. Readings will consist of both primary sources and works of modern scholarship.
Same as: GLOBAL 133, GLOBAL 233, HISTORY 283C

HISTORY 383F. Capital and Crisis in the Middle East and the World. 4-5 Units.
(History 383F is a graduate course for 4-5 units; History 283F is an undergraduate course for 5 units.) How do economies change in times of crisis? How do economic crises intersect with pandemics, violence and environmental disaster to redefine the workings of capital? This course approaches these questions through critical reading in the histories of capitalism, crisis, and intersections between legal history and political economy, using the Middle East region as a starting point for the study of global phenomena. We will examine the ways in which constructions like race and ethnicity, gender, and the human/non-human divide have mediated the social and spatial expansion of capital in the region, especially through legal categories and instruments that transform rapidly in times of crisis. Temporally, we will focus our examination between two moments of economic crisis: the ¿long depression¿ of the late nineteenth century and the financial crisis of 2008. We will ground our historical reading in attention to current events, in particular the Middle East¿s ongoing experience of the pandemic-induced global financial crisis of 2020.

HISTORY 383J. Global Islam. 4-5 Units.
(Undergraduates, enroll in 283J; Graduates, enroll in 383J.) Explores the history and politics of Islam in Africa, Asia, Europe, the Middle East and the Americas --- and of the novel connections that have linked Muslim communities across the globe in modern times.

HISTORY 384. The Ottoman Empire: Conquest, Coexistence, and Coffee. 4-5 Units.
(History 284 is an undergraduate course offered for 5 units; History 384 is a graduate course offered for 4-5 units.) The Ottoman Empire ruled the Middle East, North Africa and Eastern Europe from the 15th to the early 20th centuries. How did the Ottoman enterprise appear in the frontier region between Christendom and the Islamic world? How were diverse peoples, religions, and regions integrated under the Ottoman order? Was there an Ottoman Mediterranean and Indian Ocean? How did reform movements in Islamic, Christian and Jewish thinking transform Ottoman societies? Topics include the Ottoman Empire between Europe and Eastern Islamic World; merchants and their markets; elite, urban, rural and nomadic lives; women, family, childhood and sexuality; life, afterlife and dreams; epidemics and natural disasters. Special emphasis will be given to coffee and coffee houses which shaped public life in the Ottoman World since the 16th century. The survey ends with the rise of nationalism, inter-communal violence and the disintegration of the Ottoman world.
Same as: HISTORY 284

HISTORY 384E. Contemporary Muslim Political Thought. 4-5 Units.
This course aims to provide an intellectual history of contemporary Muslim political thought. It presents post-nineteenth century Muslim contributions to political thought. It is designed as a survey of some major thinkers from the Arab world to Iran and Southeast Asia, from Turkey to North America, who sought to interpret Islam's basic sources and Islamic intellectual legacy. Our readings include primary texts by Tahtawi, Tunisi, Afghani, Rida, Huda Sharawi, Qutb, Shariati, and Mernissi among other prominent figures. We will analyze recurring ideas in this body of thought such as decline, civilization, rationality, ijtihad (Islamic independent reasoning), shura (deliberative decision-making), democracy, secularism, Muslim unity, khilafah (caliphate and vicegerency), freedom, equality, and justice. We will discuss their current significance for the ongoing theoretical debates in Muslim political thought, Muslim intellectual history, and comparative political theory.
Same as: HISTORY 284E

HISTORY 384F. Empires, Markets and Networks: Early Modern Islamic World Between Europe and China, 1400-1900. 4-5 Units.
Focuses on political regimes, transregional connections, economic interactions and sociocultural formations in the early modern Islamic Afro-Eurasia. Topics include complex political-economic systems of the Ottoman, Safavid and Mughal empires and expansion of Turco-Persianate political and literary cultures across the Post-Mongolian Eurasia; experiences of various Muslim, Christian, Jewish and Hindu, as well as urban, rural and nomadic communities and networks under Islamicate political regimes; consolidation of transregional commerce and cultural exchange with the proliferation of networks of merchants, scholars and sufis; new tendencies in knowledge, individual, gender, family, social order, and religion; incorporation of the Islamic world in the global economy; Muslims in the age of revolutions; political and social reforms and consolidation of Muslim internationalism in the age of imperialism.

HISTORY 385C. Jews in the Contemporary World: The American Jewish Present & Past in Popular Culture, Film, & TV. 4-5 Units.
(HISTORY 185B is 5 units; HISTORY 85B IS 3 units.) Who are American Jews as depicted in popular media -- film, television, etc. -- since the Second World War? How are their religion, politics, mores, and practices represented and what ways, if at all, do such portraits reflect historical trends among Jews and society in general? What can be learned from film or tv about Jewish identity, notions of Jewish power and powerlessness, communal cohesiveness and assimilation, sexuality and the wages of intermarriage or race?.
Same as: CSRE 185B, HISTORY 185B, JEWISHST 185B, REES 185B, SLAVIC 183

HISTORY 385K. History of Modern Antisemitism: Nineteenth and Twentieth Centuries. 4-5 Units.
The articulations of anti-Jewish hatred from the advent of Jewish emancipation in Europe. The legacy of premodern Christian demonization and its modern protean transformations as they penetrated and annexed new currents of ideology, notions of identity (social, national, racial), taste, and aesthetics. A history of ideas, representations, and stereotypes, and their relation to historical experience, action, and mobilization. Europe is the focus; case studies also include the Middle East and elsewhere.

HISTORY 386B. The Ottoman Empire in the Age of Revolutions, 1750-1850. 4-5 Units.
Investigates the Ottoman World (the Balkans and the Middle East under the Ottoman Empire) in the Age of Revolutions in the global context. While the Ottoman World is the primary interest, developments in Europe, India and China are also discussed in a comparative perspective. Topics include military and fiscal transformation; regionalism; urban life and formations of public spheres; political crisis, social disturbances and political violence; transformation in the ethnoreligious structures, gender relations and family life; protonationalism in the Balkans and Egypt.

HISTORY 387K. Gentlemen and Jews: History of the Jews of England. 4-5 Units.
Focuses on key chapters in the cultural and political histories of Britain and itsnnJews, between 1650 and 1950 and examines the advantages, as well as possible difficulties, that emerge when connecting Anglo-Jewish history to mainstream British history. What is unique about Jewish emancipation in England, and what are its connections to the formation of British national identity? Is there unique path in which Jewish Enlightenment developed in England? What was the contribution of Jews to British Imperialism? Is there a cultural affinity betweennnEnglish philosemitism and liberalism?.

HISTORY 390. North Korea in Historical Perspective. 4-5 Units.
This colloquium will approach North Korea from a longer historical perspective and also discuss the country's current crisis and its future. Themes will include the northern region in colonial Korea, Kim Il Sung and Manchurian guerrillas, the USSR and North Korean Revolution, the reconstruction after the Korean War, Juche ideology and the political system, the everyday life of North Korea people, the Cold War and North Korean diplomacy, culture and mass performance, the great famine and economy in transition, the military and nuclear development, and refugees and the succession of leadership.
Same as: HISTORY 290

HISTORY 390A. Major Topics in Modern Chinese History: Qing/ Republican Transition. 4-5 Units.
Continuities and discontinuities in society, economy, politics, culture, and thought during the transition from the Qing dynasty to the republic. May be repeated for credit.

HISTORY 391. East Asia in the Early Buddhist Age. 4-5 Units.
Evolution of cities in imperial China through early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative examination of cases from European history.

HISTORY 391B. The City in Imperial China. 4-5 Units.
The evolution of cities in the early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative cases from European history. Readings include primary and secondary sources, and visual materials.

HISTORY 391C. Early Imperial China. 4-5 Units.
The first millennium of imperial China, what endured over the centuries, and the major changes that took place in the political, social, and intellectual realms. Topics include the evolving geographic and environmental background, cities, the countryside, kinship, relations with the outer world, religion, philosophy,and literature. Also examines the nature of empire as a distinctive political form.

HISTORY 391G. Pre-Modern Chinese Warfare. 4-5 Units.
This course examines the evolution of warfare in China, and its impact on the evolving political and social orders, from the earliest states through the Mongol conquest. It will study how changing military technology was inextricably linked to changes in the state and society. It will also look at changing Chinese attitudes towards warfare over the same period, from the celebration of heroism, through writing about warfare as an intellectual art, to the links of militarism with steppe peoples/.
Same as: HISTORY 291G

HISTORY 391K. Korean History and Culture before 1900. 3-5 Units.
This course serves as an introduction to Korean culture, society, and history before the modern period. It begins with a discussion of early Korea and controversies over Korean origins; the bulk of the course will be devoted to the Chos'n period (1392-1910), that from the end of medieval Korea to the modern period. Topics to be covered include: Korean national and ethnic origins, the role of religious and intellectual traditions such as Buddhism and Confucianism, popular and indigenous religious practices, the traditional Korean family and social order, state and society during the Chos'n dynasty, vernacular prose literature, Korean's relations with its neighbors in East Asia, and changing conceptions of Korean identity.nThe course will be conducted through the reading and discussion of primary texts in English translation alongside scholarly research. As such, it will emphasize the interpretation of historical sources, which include personal letters, memoirs, and diaries, traditional histories, diplomatic and political documents, along with religious texts and works of art. Scholarly work will help contextualize these materials, while the class discussions will introduce students to existing scholarly debates about the Korean past. Students will be asked also to examine the premodern past with an eye to contemporary reception. The final project for the class is a film study, where a modern Korean film portraying premodern Korea will be analyzed as a case study of how the past works in public historical memory in contemporary Korea, both North and South. An open-ended research paper is also possible, pending instructor approval.
Same as: HISTORY 291K, KOREA 158, KOREA 258

HISTORY 392A. Gender in Modern South Asia. 4-5 Units.
Gender is crucial to understanding the political, cultural, and economic trajectories of communities in colonial and postcolonial South Asia. Throughout this course, we will ask a series of questions: How does gender structure conceptions of home, community, and homeland in South Asia? How do gender and religion become represented in movements for nation-states? How does women's participation in anticolonial politics and fights for equal representation in postcolonial nation-states affect our understanding of gender in South Asia today? Readings examine the creation and impact of religious personal law under British colonial rule, the role of masculinity in the British-Indian army, perspectives on religion and clothing, the interplay of rights movements and anti-colonialism, and the status of women in postcolonial India, Pakistan, and Bangladesh. Students will also explore a range of primary sources, including political treatises, short stories, didactic manuals, autobiographies, and travelogues.

HISTORY 392D. Japan in Asia, Asia in Japan. 4-5 Units.
(History 292D is an undergraduate course offered for 5 units; History 392D is a graduate course offered for 4-5 units.) How Japan and Asia mutually shaped each other in the late 19th and 20th centuries. Focus is on Japanese imperialism in Asia and its postwar legacies. Topics include: pan-Asianism and orientalism; colonial modernization in Korea and Taiwan; collaboration and resistance; popular imperialism in Manchuria; total war and empire; comfort women and the politics of apology; the issue of resident Koreans; and economic and cultural integration of postwar Asia.
Same as: HISTORY 292D

HISTORY 392E. The Historical Roots of Modern East Asia. 4-5 Units.
Focus is on China and Japan before and during their transition to modernity. The populous, urbanized, economically advanced, and culturally sophisticated Ming empire and Muromachi shogunate in the 16th century when Europeans first arrived. How the status quo had turned on its head by the early 20th century when European and American steamships dominated the Pacific, China was in social and political upheaval, and Japan had begun its march to empire.
Same as: HISTORY 92A

HISTORY 392F. Culture and Religions in Korean History. 4-5 Units.
This colloquium explores the major themes of Korean history before 1800 and the role of culture and religions in shaping the everyday life of Chosôn-dynasty Koreans. Themes include the aristocracy and military in the Koryô dynasty, Buddhism and Confucianism in the making of Chosôn Korea, kingship and court culture, slavery and women, family and rituals, death and punishment, and the Korean alphabet (Hangûl) and print culture.
Same as: HISTORY 292F

HISTORY 393. Frontier Expansion and Ethnic Statecraft in the Qing Empire. 4-5 Units.
The legacy of the Qing dynasty in the territorial boundaries claimed by the People's Republic of China including the frontier zones that lie outside China proper. How the Qing acquired and ruled its frontier territories. Growth and migration of the Han Chinese population. How the dynasty's Manchu rulers managed ethnic difference. Consequences of Qing expansionism and ethnic statecraft for subject peoples and for the dynasty itself. At what point and by what processes did the Qing become China.
Same as: CHINA 393

HISTORY 393F. Chinese Politics and Society. 3-5 Units.
(Doctoral students register for 317B.) This seminar surveys the major turning points that have shaped China's evolution since 1949. The topics covered include the Great Leap Forward, the Cultural Revolution, the political and economic turning point of the early 1980s, the political crisis of 1989, the restructuring of the state sector since the 1990s, and the patterns of protest that have accompanied the rapid social changes over the past three decades. We will conclude the course with current debates about China's future.
Same as: HISTORY 293F, SOC 217B, SOC 317B

HISTORY 394D. Manchuria: Cradle of Conflict, Cockpit of Asia. 4-5 Units.
How did Manchuria become Chinese? This course utilizes the dual waves of early twentieth-century writings and a wide array of recent scholarship dealing with Manchuria to explore the formation of nation-states out of the Qing and Japanese empires in Northeast Asia through the lenses of opium, migration, cities, warlords, and memoir. This course will be of interest to students concerned with developing transcultural understandings of Northeast Asian history.
Same as: HISTORY 294D

HISTORY 394E. The Past in Ancient China. 4-5 Units.
Introduction to the most important sources in the early Chinese historiographical tradition (broadly conceived), examining how the past was mobilized across a range of textual genres including poetry, speeches, philosophy, narrative, and rhetoric. Prior knowledge of premodern Chinese history and culture is not required. All reading materials will be in English; no knowledge of modern or classical Chinese is expected.
Same as: HISTORY 294E

HISTORY 395J. Gender and Sexuality in Chinese History. 4-5 Units.
.
Same as: CHINA 395, FEMGEN 395J

HISTORY 396D. Historiography of Modern Japan. 4-5 Units.
Introduces students to the major historical problems and historiographic trends in the study of modern Japan from the Meiji period to the present. Themes include approaches to late Meiji culture and politics, the formation of imperial subjects and citizens, agrarian society and politics, gender in modern Japan, empire and modernity, total war and transwar state and society, U.S. occupation, and postwar Japan.

HISTORY 397. The Cold War and East Asia. 5 Units.
Explores how East Asia negotiated superpower rivalry and global ideological competition during the Cold War. Considers the ways in which China, Japan, and Korea were more than battlegrounds for US-Soviet contestation and played active roles in defining the nature and dynamics of the conflict. Re-examines conventional narratives and periodizations against alternative conceptual models and interpretive frameworks highlighting the constructed nature of the struggle as well as the role of historical and cultural factors in shaping the East Asian experience.
Same as: HISTORY 297

HISTORY 398C. Race, Gender, & Sexuality in Chinese History. 5 Units.
This course examines the diverse ways in which identities--particularly race, ethnicity, gender and sexuality have been understood and experienced in Chinese societies, broadly defined, from the imperial period to the present day. Topics include changes in women's lives and status, racial and ethnic categorizations, homosexuality, prostitution, masculinity, and gender-crossing.
Same as: ASNAMST 298, CSRE 298G, FEMGEN 298C, HISTORY 298C

HISTORY 398E. Chinese Pop Culture: A History. 4-5 Units.
This discussion course examines the evolution of popular culture in the Chinese-speaking world and diaspora from the late imperial era to the present. Analyzing myth, literature, medicine, music, art, film, fashion, and internet culture will help students understand the revolutionary social and political changes that have transformed modern East Asia.

HISTORY 399E. Preparing for International Field Research: Public Svc or Research, Electronic Version. 1 Unit.
Restricted to students studying at a Stanford Overseas Studies campus; same course content as HISTORY 299X. Problems involved in research abroad: ethical issues; safety; security and conduct; human subjects protocol. Methodologies of research: interviewing, networking, case studies, participant observation, large surveys. Prerequisite: consent of instructor.

HISTORY 399P. Mastering Uncertainty: The Power of Archival Thinking. 1 Unit.
When confronted with chaos and uncertainty, do you know how to stay calm, ask the right questions, and find the answers? Archival researchers do. Do you realize that less than 1 percent of primary sources have been digitized, and that 99 percent still exist in their original formats in collections, small and large, scattered all across the world? Do you know how to find them and use them? Archival researchers do. Through hands-on exercises in Stanford's archives, students learn the fundamentals of archival research. Pursuing their own research interests, students will learn to become self-sufficient, independent researchers capable of navigating uncertainty and producing knowledge--a skill set in demand no matter what their major or post-graduate plans.

A H&S initiative course.
Same as: HISTORY 299T

HISTORY 399W. Graduate Directed Reading. 1-10 Unit.
.

HISTORY 401A. Spatial History: Concepts, Methods, Problems. 4-5 Units.
What can digital mapping and spatial analysis bring to history? How have historians written spatial history in the past? How do scholars in other disciplines deal with space and what can we learn from them? The course provides students with conceptual and technical skills in spatial history. As part of the exercise to think spatially about the past, students will receive training in Geographic Informational Science (GIS) and develop their own spatial history projects. No prior technical skills are needed for this course.
Same as: HISTORY 201B

HISTORY 401B. Spatial History, Part II. 4-5 Units.
Prerequisite: 401A.

HISTORY 403A. Materialities of Power, Part I. 4-5 Units.
How is power made material? And how do material things--objects, commodities, technologies, and infrastructures --reflect, change, consolidate, or distribute power? This research seminar is aimed at PhD students in history, anthropology, and STS who are working on such questions. All geographic specialties welcome. A small amount of common reading will launch the course, whose main goal is to guide students towards producing a research paper draft that's close to submission-ready for a journal. Along the way, we'll also address practical topics, including how to pick and submit to a journal, how to present a paper, and more.
Same as: ANTHRO 402D

HISTORY 403B. Materialities of Power, Part II. 4-5 Units.

HISTORY 424A. The Soviet Civilization. 4-5 Units.
(History 224A is an undergraduate course offered for 5 units; History 424A is a graduate course offered for 4-5 units.) Socialist visions and practices of the organization of society and messianic politics; Soviet mass state violence; culture, living and work spaces. Primary and secondary sources. Research paper or historiographical essay.
Same as: HISTORY 224A, REES 224A

HISTORY 424B. The Soviet Civilization, Part 2. 4-5 Units.
Prerequisite: HISTORY 224A/424A.
Same as: HISTORY 224D

HISTORY 424C. The End of Communism in Europe. 4-5 Units.
Causes, course, and consequences.

HISTORY 430A. Graduate Research Seminar: Early Modern Europe. 3-5 Units.
Students will begin a research project on any aspect of early modern European history, 1400-1800, by taking HISTORY 430A in winter quarter as the first quarter of this two-quarter sequence. Enrollment by permission of instructor.

HISTORY 431. Early Modern Things. 4-5 Units.
How do objects reveal their histories? What can be learned about the past by studying things? The material culture of early modern Europe, ca 1450-1750. Recent work on the circulation, use, and consumption of things, starting with the Columbian exchange which expanded the material horizons of the early modern world in the late 15th century, exploring challenges to the meaning of things in the age of the Reformation and Scientific Revolution, and ending with the birth of consumer society in the 18th century How did the meaning of things and people's relationships to them change over these centuries? What objects, ordinary and extraordinary, secular and sacred, natural and man-made, came to define the emerging features of the early modern world?.

HISTORY 433A. Research Seminar in Modern Europe. 4-5 Units.
Students will complete an article-length research paper based on primary sources.

HISTORY 433B. Research Seminar in Modern Europe. 4-5 Units.
Prerequisite: HISTORY 433A.

HISTORY 438. European History Workshop. 1 Unit.
All European history graduate students in residence register for this weekly workshop, at which dissertation chapters and prospectuses, papers, and grant proposals by students and faculty are read and discussed.

HISTORY 439A. Graduate Research Seminar: Modern Britain and the British Empire. 4-5 Units.
.

HISTORY 439B. Graduate Research Seminar: Modern Britain and the British Empire II. 4-5 Units.
.

HISTORY 443A. Human Origins: History, Evidence, and Controversy. 4-5 Units.
Research seminar. Debates and controversies include: theories of human origins; interpretations of fossils, early art, and the oldest tools; the origin and fate of the Neanderthals; evolutionary themes in literature and film; visual rhetoric and cliché in anthropological dioramas and phyletic diagrams; the significance of hunting, gathering, and grandmothering; climatological theories and neocatastrophic geologies; molecular anthropology; the impact of racial theories on human origins discourse. Background in human evolution not required.
Same as: HISTORY 243S

HISTORY 444. Graduate Research Seminar: Gender in Science, Medicine, and Engineering. 5 Units.
Theory and practice of gender in STEM. 1. "Fix the Numbers of Women" focuses on increasing women's participation; 2. "Fix the Institutions" promotes gender equality in careers through structural change in research organizations; 3. "Fix the Knowledge" or "gendered innovations" stimulates excellence in science and technology by integrating gender analysis into research. Seminar explores harnessing the creative power of gender analysis to enhance knowledge and spark innovation.
Same as: FEMGEN 444

HISTORY 444C. The History of the Body in Science, Medicine, and Culture. 4-5 Units.
The human body as a natural and cultural object, historicized. The crosscultural history of the body from the 18th century to the present. Topics include: sciences of sex and race; medical discovery of particular body parts; human experimentation, foot binding, veiling, and other bodily coverings; thinness and obesity; notions of the body politic.
Same as: HISTORY 244C

HISTORY 445A. Research Seminar in African History. 4-5 Units.
Primary sources such as government records and missionary archives. Students present work in progress. Prerequisite: consent of instructor.

HISTORY 445B. Research Seminar in African History. 4-5 Units.
Primary sources such as government records and missionary archives. Students present work in progress. Prerequisite: consent of instructor.

HISTORY 448A. Colonial States and African Societies, Part I. 4-5 Units.
(History 248S is an undergraduate course offered for 5 units; History 448A is a graduate course offered for 4-5 units.) Colonialism set in motion profound transformations of African societies. These transformations did not occur immediately following military conquest, nor did they occur uniformly throughout the continent. This research seminar will focus directly on the encounter between the colonial state and African societies. The seminar will examine problems of social transformation, the role of the colonial state, and the actions of Africans. Following four weeks of collloquim style discussion, students then embark on independent research on the encounter between one colonial state and its constituent African societies.

HISTORY 448B. Colonial States and African Societies, Part II. 4-5 Units.
Second part of the research seminar offered in the Winter. Students continue their research and present their penultimate drafts in week 8.

HISTORY 452A. Graduate Research Seminar: American Cultural and Intellectual History. 4-5 Units.
Major methods and issues. Goal is to produce a research paper based on primary sources suitable for inclusion in a doctoral dissertation or submission to a peer-reviewed scholarly journal. Topics include: compiling primary and secondary source bibliographies; primary and secondary source issues; and how to articulate an argument. Students produce a prospectus by the end of Spring Quarter. Summer Quarter meetings to discuss outlines, drafts, and problems, culminating in presentation of papers in scholarly conference format.

HISTORY 459A. Grad Research Seminar in U.S. History. 4-5 Units.
.

HISTORY 460. Research Seminar in America in the World. 4-5 Units.
Ways to place American history in an international context. Comparative, transnational, diplomatic, and world systems are approaches to complete a research paper based on research into primary materials. Historical methodologies, research strategies, and essay projects. May be repeated for credit.

HISTORY 468A. Graduate Research Seminar: U.S. History in the 20th Century. 4-5 Units.
.

HISTORY 468B. Graduate Research Seminar: U.S. History in the 20th Century Part II. 4-5 Units.
Prerequisite: History 468A.

HISTORY 471A. Environmental History of Latin America. 5 Units.
What role did the natural environment play in the emergence of Latin America as a distinct geographical and socio-cultural world region? How do we analyze the historical relationship between the regions rich and seemingly abundant natural resources and its status as underdeveloped? What historical consequences did this relationship have and what alternative, more sustainable developmental paths can we envision for the future in light of the past that we will study? In this course, students will become familiar with the historiography on Brazil, Mexico, Peru, Cuba and Honduras that has explored these questions through a variety of approaches, methodologies and points of view.

HISTORY 471B. Environmental History of Latin America. 5 Units.
What role did the natural environment play in the emergence of Latin America as a distinct geographical and socio-cultural world region? How do we analyze the historical relationship between the region's rich and seemingly abundant natural resources and its status as 'underdeveloped'? What historical consequences did this relationship have and what alternative, more sustainable developmental paths can we envision for the future in light of the past that we will study? In this course, students will become familiar with the historiography on Brazil, Mexico, Peru, Cuba and Honduras that has explored these questions through a variety of approaches, methodologies and points of view.

HISTORY 481. Research Seminar in Ottoman and Middle East History. 4-5 Units.
Student-selected research topics. May be repeated for credit.
Same as: JEWISHST 287S, JEWISHST 481

HISTORY 486A. Graduate Research Seminar in Jewish History. 4-5 Units.
.
Same as: JEWISHST 486A

HISTORY 486B. Graduate Research Seminar in Jewish History. 4-5 Units.
Prerequisite: HISTORY 486A.
Same as: JEWISHST 486B

HISTORY 491A. Modern Korea Research Seminar. 4-5 Units.
This graduate seminar prepares students to undertake research using Korean-language sources on a variety of themes in modern Korea. Students will identify characteristics of major online and offline archives in Korean studies, learn essential skills in investigating primary sources, and analyze selected sample documents in class.

HISTORY 491B. Modern Korea Research Seminar. 4-5 Units.
This graduate seminar prepares students to undertake research using Korean-language sources on a variety of themes in modern Korea. Students will identify characteristics of major online and offline archives in Korean studies, learn essential skills in investigating primary sources, and analyze selected sample documents in class.

HISTORY 496A. Research Seminar in Chinese History. 4-5 Units.
First part of a two part sequence. Primary sources and research methods to be used in the study of modern Chinese history.

HISTORY 496B. Research Seminar in Chinese History. 4-5 Units.
Second part of a two part sequence. Primary sources and research methods to be used in the study of modern Chinese history. Prerequisite: HISTORY 496A.

HISTORY 497A. Maps and Gazetteers as Sources for East Asian History. 4-5 Units.
For graduate students of early modern or modern East Asia. Includes weekend workshop on Chinese historical GIS with Harvard's Peter Bol. Students work with the Stanford Spatial History Lab to develop analytical techniques. Prerequisite: background in GIS.

HISTORY 497B. Maps and Gazetters as Sources for East Asian History, Part 2. 4-5 Units.
Prerequisite: HISTORY 497A.

HISTORY 498C. Japanese Imperial Archives, Part 1. 4-5 Units.
First part of a two-quarter research graduate seminar on Japanese imperialism in Asia. Students explore different types of archives, from national and research libraries to online databases; learn various methods of research including oral history; and translate and analyze sample documents including government publications, company histories, police records, and media sources. Prerequisite: advanced reading ability in Japanese.

HISTORY 498D. Japanese Imperial Archives, Part 2. 4-5 Units.
Second part of a two-quarter research graduate seminar on Japanese imperialism in Asia. Students complete research papers based on research conducted for History 498C; the class meets occasionally to report on progress and discuss working drafts. Prerequisite: History 498C.

HISTORY 499X. Graduate Research. 1-10 Unit.
Units by arrangement. May be repeated for credit.

HISTORY 802. TGR Dissertation. 0 Units.
Units by arrangement.

HISTORY AND PHILOSOPHY OF SCIENCE

Courses offered by the Program in History and Philosophy of Science are listed under the subject code HPS on the (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=HPS&filter-catalognumber-HPS=on) Stanford Bulletin's (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=HPS&filter-catalognumber-HPS=on) ExploreCourses web site (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=HPS&filter-catalognumber-HPS=on).

The Program in History and Philosophy of Science (HPS) teaches students to examine the sciences, medicine and technology from a number of perspectives, conceptual, historical and social. The community of scholars includes core faculty and students in History and Philosophy and affiliated members in Classics, Anthropology, English, Political Science, Communication, and other disciplines. Together, they draw upon the multiple methods of their disciplines to study the development, functioning, applications, and social and cultural engagements of the sciences.

Stanford's Program in History and Philosophy of Science is a collaborative enterprise of the departments of History and Philosophy. Each department has its own undergraduate and graduate degree programs in this area, but these overlap and interact through the structure of requirements, advising, team-taught courses, an active graduate student community and a shared colloquium series (http://HPS.stanford.edu/colloquia.html).

The program's courses span from antiquity to the late 20th century, with emphasis on:

- ancient science
- Renaissance science
- the Scientific Revolution
- Enlightenment and transatlantic science
- history of medicine and the body
- history and philosophy of biology
- history and philosophy of modern physics
- history of the philosophy of science from the early modern period to the present
- central issues in contemporary philosophy of science
- gender, science, and technology

Undergraduate Degrees

HPS offers undergraduates the opportunity to study science, medicine and technology by combining scientific and humanistic perspectives in a single program. Students can pursue HPS through the two departments (History and Philosophy) that coordinate this interdisciplinary program. The HPS Program offers students an in-depth understanding of the nature and evolution of scientific ideas, practices, and institutions; their contemporary significance to intellectual life; and their material transformation of the modern world.

The Department of History offers an interdisciplinary track in History of Science, and Medicine (p. 1550). This track is especially well suited to students who wish to combine history and science, or who are interested in studying the history of science and medicine in combination with premed science requirements in preparation for a future career in medicine and public health.

The Department of Philosophy offers a special program in History and Philosophy of Science (p. 1864). This program is especially well suited to students who want to combine their concentration in Philosophy with the study of science and its history.

Students interested in HPS should contact the faculty advisors (in 2020-21 Paula Findlen for History and Michael Friedman for Philosophy) to discuss the undergraduate program.

Graduate Degrees

Graduate students in the Program in History and Philosophy of Science can pursue a Ph.D. either in History, through its Ph.D. concentration in History of Science, Medicine, and Technology, or in Philosophy, through its Ph.D. subplan in History and Philosophy of Science. Diplomas will be issued by the respective departments, but the HPS study will not be noted on the transcript nor on the diploma.

Graduate students in the Program in History and Philosophy of Science that wish to pursue a Ph.D. in Philosophy must fulfill Departmental degree requirements (p. 1870) and the following requirements:

1. HPS colloquium series attendance
2. One of the following graduate level Philosophy of Science courses: 263, 264, 264A, 265, 265C, 266, 267A or 267B
3. One elective seminar in the history of science
4. One elective seminar (in addition to the course satisfying requirement 2) in philosophy of science

Philosophy Ph.D. students declaring the HPS subplan in Axess will have it appear on the official transcript but is not printed on the diploma.

The Program in History and Philosophy of Science degree requirements for the Ph.D. in History of Science, Medicine and Technology, in addition to the general History Department Ph.D. degree requirements (p. 1560), are:

1. HPS colloquium series attendance
2. the History Department core seminar in History of Science, Medicine and Technology
3. Four other courses in the history of science, technology and/or medicine
4. One course in the philosophy of science
5. Four additional courses in a given geographical or national field of research, one of which must be a core course

The courses described above must include two research seminars, at least one of which must be in the history of science, technology and/or medicine. Students are expected to write papers on substantially different topics for each seminar. You should also aim to present your research at the annual meeting of a professional society associated with the history of science, technology and/or medicine sometime during your third or fourth year. For more information, see the program's (http://hps.stanford.edu/grad.html) web site.

Bachelor of Arts Programs

HPS offers undergraduates the opportunity to study science, medicine and technology by combining scientific and humanistic perspectives in a single program. Students can pursue HPS through the two departments (History and Philosophy) that coordinate this interdisciplinary program. The HPS Program offers students an in-depth understanding of the nature and evolution of scientific ideas, practices, and institutions; their contemporary significance to intellectual life; and their material transformation of the modern world.

The Department of History offers an interdisciplinary track in History of Science, and Medicine (p.). This track is especially well suited to students who wish to combine history and science, or who are interested in studying the history of science and medicine in combination with

premed science requirements in preparation for a future career in medicine and public health.

The Department of Philosophy offers a special program in History and Philosophy of Science (p.). This program is especially well suited to students who want to combine their concentration in Philosophy with the study of science and its history.

Students interested in HPS should contact the faculty advisers (in 2020-21 Paula Findlen for History and Michael Friedman for Philosophy) to discuss the undergraduate program.

Course Sequences

The following courses are offered in 2020-21 in the area of History and Philosophy of Science.

Introductory

		Units
HPS/PHIL 60	Introduction to Philosophy of Science	5
HPS/PHIL 61	Philosophy and the Scientific Revolution	5

Science in History

This sequence is designed to introduce students to the history of Science from antiquity to the 20th century. Students are advised to take most or all of this sequence as a core foundation.

		Units
CLASSICS 197	Aristotle's Logic	3-5
HISTORY 40/140	World History of Science	3
HISTORY 40A/140A	The Scientific Revolution	3
HISTORY 42N	The Missing Link	4
HISTORY 44/144	Sex, Gender, and Intersectional Analysis in Science, Medicine, Engineering, and Environment	3
HISTORY 140	World History of Science	5
HISTORY 200D	Doing the History of Science and Technology	5
HISTORY 202B/302B	Coffee, Sugar, and Chocolate: Commodities and Consumption in World History, 1200-1800	4-5
HISTORY 203C/303C	History of Ignorance	5
HISTORY 234P	The Age of Plague: Medicine and Society, 1300-1750	5
HISTORY 235D	When Worlds Collide: The Trial of Galileo	4-5
HISTORY 240/340	The History of Evolution	4-5
HISTORY 342	Darwin in the History of Life	4-5
HISTORY 431	Early Modern Things	4-5
HISTORY 343C/243C	People, Plants, and Medicine: Colonial Science and Medicine	4-5
STS 200P	Leonardo's World: Science, Technology and Art	4-5

Medicine in History

This sequence is designed to introduce students to the history of medicine from antiquity to the 20th century.

		Units
AMSTUD 41Q	Madwomen and Madmen: Gender and the History of Mental Illness in the U.S.	3
HISTORY 234P	The Age of Plague: Medicine and Society, 1300-1750	5
HISTORY 243G/343G	Tobacco and Health in World History	4-5
HISTORY 244C	The History of the Body in Science, Medicine, and Culture	4-5

Philosophical Perspectives on Science, Medicine, and Technology

This sequence is designed to introduce students to the philosophy of science. Students are advised to take HPS 61 Philosophy and the Scientific Revolution above as a starting point, and combine a number of the electives listed below in conjunction with courses in the other concentrations that address their specific interests.

		Units
PHIL 125/225	Kant's First Critique	4
PHIL 162	Philosophy of Mathematics	4
PHIL 164/264	Central Topics in the Philosophy of Science: Theory and Evidence	4
PHIL 165/265	Philosophy of Physics: Space and Time	4
PHIL 167A/267A	Philosophy of Biology	4
PHIL 167B/267B	Philosophy, Biology, and Behavior	4
PHIL 224	Kant's Philosophy of Physical Science	2-4
PHIL 224A	Mathematics in Kant's Philosophy	4
PHIL 263	Significant Figures in Philosophy of Science: Einstein	4
PHIL 265	Philosophy of Physics: Space and Time	4
PHIL 265C	Philosophy of Physics: Probability and Relativity	4
PHIL 266	Probability: Ten Great Ideas About Chance	4
PHIL 324	Kant's System of Nature and Freedom	4
PHIL 326	Kant's Transcendental Deduction	4
PHIL 327	Scientific Philosophy: From Kant to Kuhn and Beyond	2-4
PHIL 361	Social Dimensions of Scientific Knowledge	4
PHIL 362	Grad Seminar on Philosophy of Science	4
PHIL 365	Seminar in Philosophy of Physics	2-4
PHIL 374F	Science, Religion, and Democracy	4

Advanced Course Sequences

Contemporary Perspectives on Science, Medicine and Technology

The following courses focus on contemporary cultural and social science approaches to science, technology, and medicine.

		Units
HPS 199	Directed Reading	1-15
HPS 299	Graduate Individual Work	1-15
HISTORY 44	Sex, Gender, and Intersectional Analysis in Science, Medicine, Engineering, and Environment	3
HISTORY 203F	Racial Justice in the Nuclear Age	5
HISTORY 204D	Advanced Topics in Agnotology	4-5
HISTORY 243S/443A	Human Origins: History, Evidence, and Controversy	4-5
HISTORY 302	Technopolitics: Materiality, Power, Theory	4-5
HISTORY 344F	Intersectional Design: An Expanded Approach to Gender in Tech	4-5
HISTORY 403A	Materialities of Power, Part I	4-5
HISTORY 403B	Materialities of Power, Part II	4-5
HISTORY 444	Graduate Research Seminar: Gender in Science, Medicine, and Engineering	5

Graduate Degrees

Graduate students in the Program in History and Philosophy of Science can pursue a Ph.D. either in History, through its Ph.D. concentration in History of Science, Medicine, and Technology, or in Philosophy, through its Ph.D. subplan in History and Philosophy of Science. Diplomas are issued by the respective departments, but the HPS study is not noted on the transcript nor on the diploma.

Graduate students in the Program in History and Philosophy of Science that wish to pursue a Ph.D. in Philosophy must fulfill Philosophy Department Ph.D. requirements (p.) and the following requirements:

1. HPS colloquium series attendance
2. One of the following graduate level Philosophy of Science courses: 263, 264, 264A, or 266
3. One elective seminar in the history of science
4. One elective seminar (in addition to the course satisfying requirement 2) in philosophy of science

Philosophy Ph.D. students declaring the HPS subplan via the Declaration or Change to a Field of Study form (http://studentaffairs.stanford.edu/sites/default/files/registrar/files/grad-subplan-change.pdf) will have it appear on the official transcript but is not printed on the diploma.

The Program in History and Philosophy of Science degree requirements for the Ph.D. in History of Science, Medicine and Technology, in addition to the general History Department Ph.D. degree requirements (p.), are:

1. HPS colloquium series attendance
2. The History Department core seminar in History of Science, Medicine and Technology
3. Four other courses in the history of science, technology and/or medicine
4. One course in the philosophy of science
5. Four additional courses in a given geographical or national field of research, one of which must be a core course

The courses described above must include two research seminars, at least one of which must be in the history of science, technology and/or medicine. Students are expected to write papers on substantially different topics for each seminar. You should also aim to present your research at the annual meeting of a professional society associated with the history of science, technology and/or medicine sometime during your third or fourth year. For more information, see the program's (http://HPST.stanford.edu/grad.html) web site.

Course Sequences

See the Bachelor's tab for all History and Philosophy of Science courses offered in this academic year.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a “credit” or “no credit” grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a “credit” or “satisfactory” grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

The Program in History and Philosophy of Science refers students to the policies of the Department of History (p. 1562) and the Department of Philosophy (p. 1873) for COVID-19 policies related to their degree programs.

Co-chairs: Paula Findlen (History), Michael Friedman (Philosophy)

Directors of Graduate Studies: Paula Findlen (History), Michael Friedman (Philosophy)

Committee-in-Charge: Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History), Jessica Riskin (History), Thomas Ryckman (Philosophy)

Program Committee: Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Tom Mullaney (History), Reviel Netz (Classics), Robert Proctor (History), Jessica Riskin (History), Thomas Ryckman (Philosophy), Londa Schiebinger (History)

Professors: Keith Baker (History), Paula Findlen (History), Michael Friedman (Philosophy), Gabrielle Hecht (CISAC, History), David Holloway (History, Institute for International Studies, Political Science), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History), Jessica Riskin (History), Londa Schiebinger (History), Fred Turner (Communication), Richard White (History), Caroline Winterer (History)

Associate Professors: Thomas Mullaney (History), Sarah Jain (Anthropology), Priya Satia (History)

Professor (Teaching): Thomas Ryckman (Philosophy)

Professor (Research): Rega Wood (Philosophy, emerita)

Senior Lecturer: Paul Edwards (STS)

Other Affiliation: Henry Lowood (Stanford University Libraries), Larry Lagerstrom (UAR)

Visiting Scholars: Adrienne Mayor (Classics)

Overseas Studies Courses in History and Philosophy of Science

The Bing Overseas Studies Program (http://bosp.stanford.edu) (BOSP) manages Stanford international and domestic study away programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The BOSP course search site (https://undergrad.stanford.edu/programs/bosp/explore/search-courses/) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu) or Bing Overseas Studies (http://bosp.stanford.edu).

Due to COVID-19, all BOSP programs have been suspended for Autumn Quarter 2020-21. All courses and quarters of operation are subject to change.

	Units
explorecourses:OSP hps	

Courses

HPS 60. Introduction to Philosophy of Science. 5 Units.
This course introduces students to tools for the philosophical analysis of science. We will cover issues in observation, experiment, and reasoning, questions about the aims of science, scientific change, and the relations between science and values.
Same as: PHIL 60

HPS 61. Philosophy and the Scientific Revolution. 5 Units.
Galileo's defense of the Copernican world-system that initiated the scientific revolution of the 17th century, led to conflict between science and religion, and influenced the development of modern philosophy. Readings focus on Galileo and Descartes.
Same as: PHIL 61

HPS 199. Directed Reading. 1-15 Unit.
May be repeated for credit.

HPS 299. Graduate Individual Work. 1-15 Unit.
May be repeated for credit.

HUMAN BIOLOGY

Courses offered by the Program in Human Biology are listed under the subject code HUMBIO on the (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=HUMBIO&filter-catalognumber-HUMBIO=on) Stanford Bulletin's (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=HUMBIO&filter-catalognumber-HUMBIO=on) ExploreCourses web site (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=HUMBIO&filter-catalognumber-HUMBIO=on).

The program offers a Bachelor of Arts and a Bachelor of Science in Human Biology, as well as a minor and an honors program.

Mission of the Undergraduate Program in Human Biology

The mission of the undergraduate program in Human Biology is to provide students with an interdisciplinary approach to understanding human beings from biological, behavioral, social, and cultural perspectives. Courses in the major allow students to see connections and parallels with other fields as they learn to formulate and evaluate health, environmental, and other public policy issues that influence human welfare. The program prepares majors to pursue advanced training in professional or graduate programs.

To achieve these goals, all students complete a 30-unit core sequence, normally in the sophomore year, which provides the foundation for the major. Also during the sophomore year, students consult with student advisers to choose a faculty adviser and complete the declaration process. Together they plan a road map of course work designed to help each student focus on an Area of Concentration within Human Biology. Early planning and subsequent refining of an individualized course of study, in consultation with student and faculty advisers, are strengths and requirements of the program. The curriculum draws on faculty from across the University. To complete a B.A. or B.S. in Human Biology, students must take courses from within the program and from other University departments. Many Human Biology majors go on to advanced training in professional schools or graduate programs in the behavioral, natural, and social sciences, including coterminal master's degree programs in other University departments. Additional information about the major may be obtained from the program's offices or at the Program in Human Biology (https://humanbiology.stanford.edu./) web site.

Learning Outcomes (Undergraduate)

The program expects its undergraduate majors to be able to demonstrate the following learning outcomes.

Communication

Because Human Biology is an interdisciplinary program with an emphasis on both empirical inquiry and applied knowledge, excellent communication skills are critical to majors. Successful students must be able to engage with literature and audiences not only from multiple disciplines but also with varying levels of subject expertise and to communicate information and ideas clearly, precisely, concisely, and purposefully in any setting. Toward this end, a graduate of Human Biology is expected to be able to:

1. adopt an appropriate style for written communication in the biological and social sciences
2. accurately summarize a scientific article
3. synthesize and criticize multiple sources of scientific literature
4. revise effectively in response to feedback
5. write collaboratively
6. present information visually in a variety of forms (charts, graphs, figures, and posters) for different audiences, purposes, and occasions
7. communicate in a variety of major scientific genres (such as abstracts, literature reviews, posters, research proposals, research presentations, and policy proposals) and popular genres (such as op-eds, PSA, podcasts, and science blogs)
8. use citations to provide context and to credit others for their intellectual contributions
9. communicate scientific knowledge to both specialist and non-specialist audiences
10. construct a well-supported, logical argument based on relevant evidence and established conceptual frameworks
11. frame a research question in relation to the current state of knowledge in a field
12. articulate a well-reasoned hypothesis
13. listen to any speaker and pose questions
14. deliver an oral presentation and respond to audience questions

Data Analysis

Data is used in the social and biological sciences to make observations and judgments regarding patterns of human behavior and function. These data are sometimes imperfect or incomplete, but they are used nevertheless to make decisions and policies regarding humans individually and in groups within the worlds they inhabit. Thus, students should cultivate a capacity within the Human Biology major to examine and analyze data. A graduate of Human Biology is expected to be able to:

1. recognize that different scientific disciplines draw on various sources and types of evidence
2. translate a research topic into a hypothesis or focused question that can be tested using quantitative or qualitative data
3. identify variables that are relevant to a study and describe their nature (e.g., categorical, continuous) and interrelationships (independent, dependent, covariates)
4. use statistical software to summarize and describe data of various types
5. choose an appropriate analytical framework or statistical model for testing a given hypothesis, considering the structure of the data (e.g., sample size, distribution, qualitative or quantitative nature)
6. employ quantitative or qualitative data to support a conclusion
7. understand and interpret the results of hypothesis tests
8. detect mistakes commonly made in empirical reasoning and data analysis
9. assess the limits of available data and identify potential sources of uncertainty
10. present data accurately, clearly, and effectively in the forms of tables, graphs, and figures
11. explore specialized modes of data analysis such as meta-analysis, bioinformatics, modeling, and epidemiological approaches

Scientific Literacy

The Program in Human Biology prepares students to join a broad scientific community with a culture of building and sharing knowledge. A goal of the major is to cultivate judicious consumers of research in the natural and social sciences, irrespective of their individual career paths. A graduate of Human Biology is expected to be able to:

1. appreciate the distinct roles of common genres of scientific writing, including peer-reviewed research papers, review articles, commentaries, and popular science writing
2. acknowledge and apply the normative and ethical standards of conducting and publishing research, including accuracy, transparency, and responsibility to colleagues and subjects
3. consider the credibility and importance of a published article and its relevance within a field
4. engage with peer-reviewed scientific literature actively and critically
5. identify research questions and understand their theoretical or practical importance
6. assess research methodologies including experimental or other study design
7. evaluate evidence and statistical analyses presented in support of claims
8. interpret data presented in a table, graph, or figure
9. use a hypothesis or conceptual framework to make predictions or pose questions about a novel setting

Student Advisers

Human Biology has an advising program comprising faculty and student advisers. Before declaring Human Biology as the undergraduate major, each student must meet with student advisers who assist in developing a coherent study plan based on an individualized Area of Concentration, and the selection of breadth, depth, and upper-division courses. The student advisers also assist students in selecting an appropriate faculty adviser and a suitable capstone experience for their Area of Concentration and career goals. Student advisers offer drop-in services during scheduled office hours every weekday.

Bachelor of Science in Human Biology

The B.S. in Human Biology (HUMBIO) requires 81+ units in the major divided among four levels of courses: fundamental program requirements, breadth requirement (20+ units), depth requirement (20+ units) and upper-division (3+ courses). The B.S. degree allows students a more scientific and technical focus for their studies, and requires completion of course work and specialization in the biological sciences, physical sciences, mathematics, and/or computer science and engineering. The degree is suitable for a variety of career trajectories, including for attending graduate or professional school, such as medical school. Students who plan to pursue graduate work should be aware of the admission requirements of the schools to which they intend to apply. Early planning is advisable to guarantee completion of major and graduate school requirements.

For the B.S. degree, majors take 10 or more units of breadth courses and five or more classes in the upper-division and depth courses from a set of pre-approved life and natural sciences courses. For the five or more B.S. eligible courses in the depth and upper division, three of those courses must be in the depth section. Many pre-approved courses satisfy University Ways requirements, specifically applied quantitative reasoning, formal reasoning, and scientific methods and analysis courses. Students still also take courses in the social sciences or humanities, although fewer than for the B.A. degree.

How to Declare a Major in Human Biology

Over the course of declaration, a prospective major must consult with the Human Biology advising team to obtain detailed information about the program and guidance in the development of an individual course of study. At the time the major is declared, the student submits a written statement (3-5 pages) of academic and long-term goals and the proposed list of courses satisfying the requirements for the major. The proposal is then reviewed by the student advisers who can help identify an appropriate faculty adviser.

It is important to declare in the sophomore year, and planning may begin once a student in good academic standing has passed two of six courses in the core. The program recommends that students finish the declaration process by the time they finish the HumBio core.

Degree Requirements

Course Requirements

		Units
Human Biology Core		**30**
The required core sequence introduces the biological and social sciences and, most importantly, relationships between the two. Classes meet throughout the academic year. The A and B series are designed to be taken concurrently. The required core sequence introduces the biological and social sciences and, most importantly, relationships between the two. Classes meet throughout the academic year. The A and B series are designed to be taken concurrently. Students should initiate the core in Autumn Quarter of the sophomore year. Freshmen are strongly advised to wait to start the HUMBIO Core until Autumn of sophomore year. Majors must earn a minimum letter grade of 'C-' in every core course. The Human Biology core consists of the following courses:		
HUMBIO 2A	Genetics, Evolution, and Ecology	
HUMBIO 2B	Culture, Evolution, and Society	
HUMBIO 3A	Cell and Developmental Biology	
HUMBIO 3B	Environmental and Health Policy Analysis	
HUMBIO 4A	The Human Organism	
HUMBIO 4B	Behavior, Health, and Development	
Statistics		**3-5**
The statistics course must be taken for a letter grade by majors. The minimum grade requirement is 'C-'. Statistics may be chosen from courses such as:		
BIO 141	Biostatistics	
CME 106	Introduction to Probability and Statistics for Engineers	
CS 109	Introduction to Probability for Computer Scientists	
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	
EDUC 400A	Introduction to Statistical Methods in Education	
EPI 259	Introduction to Probability and Statistics for Epidemiology	
EPI 262	Intermediate Biostatistics: Regression, Prediction, Survival Analysis	
HUMBIO 88	Introduction to Statistics for the Health Sciences	
HUMBIO 89	Introduction to Health Sciences Statistics	
SOC 180B	Introduction to Data Analysis	
SOC 181B	Sociological Methods: Statistics	
STATS 116	Theory of Probability	
Capstone		**1-10**
Complete area from below:		
Human Biology Practicum		
HUMBIO 191	Human Biology Practicum	
Human Biology Synthesis		
HUMBIO 192A	Human Biology Synthesis	
HUMBIO 192W	Human Biology Synthesis	
HUMBIO 192S	Human Biology Synthesis	
Honors in Human Biology		

HUMBIO 194	Honors	
Breadth Courses		**20**
Consistent with the student's chosen area of concentration topic. This requirement allows the student to explore the topic with a broad focus. Courses may include introductory-level courses from across the University and lab courses, and may be taken for credit or letter grade. The minimum grade requirement is 'C-.'		
Depth Courses		**20**
A minimum of five courses totaling at least 20 units consistent with the student's chosen area of concentration topic. This requirement allows the student to gain expertise on on their chosen area. Courses are non-introductory and are usually numbered over 100. Three or more departments must be represented in the depth requirement. Each course must be taken for a letter grade and at least three units. The minimum grade requirement is 'C-'. Three or more courses in the Depth must be in your chosen degree option of B.S..		
Upper Division Electives		
Three courses selected from pre-approved list of life and natural science courses		
Minimum Total Units		**81**

Students who have previously taken HUMBIO 85 Essential Statistics for Human Biology, may use it to fulfill the statistics requirement. In certain circumstances, students completing an additional major or minor in another department may submit a petition to waive the units requirement for Statistics; contact Human Biology student services for more information. Students who did not declare before September 21, 2015, may not use STATS 60 to fulfill the statistics requirement.

Additional Information

Capstone (1-10 units)

The following options fulfill the Capstone (https://humanbiology.stanford.edu/capstone/) requirement:

1. *Human Biology Practicum:* HUMBIO 191 Human Biology Practicum (1 unit total, letter grade). Allows students to integrate their academics with their community-engaged learning, research or pre-professional experiences through reflective written work and presentation. Students can take workshops over several quarters, and enroll in one unit of 191 for the quarter they plan to complete the practicum.
2. *Human Biology Synthesis (by application):* This sequence should be taken for 2-3 units in Autumn (HUMBIO 192A Human Biology Synthesis), Winter (HUMBIO 192W Human Biology Synthesis) and/or Spring (HUMBIO 192S Human Biology Synthesis) for 6 units total, letter grade. The sequence is designed for students to expand upon the work of their area of concentration. It allows students the opportunity to craft a culminating, creative work of scholarship based on a synthesis of personal and academic interests, including service projects. The work must be exhibited during senior year.
3. *Honors in Human Biology (by application):* HUMBIO 194 Honors also satisfies the Capstone requirement.
4. Non-Human Biology activities that fulfill the Capstone requirement:
   a. Notation in Science Communication
   b. Interdisciplinary Honors

Breadth and Depth Requirement

These courses inform the student's chosen area of concentration topic. The student selects courses for these two requirement categories in consultation with the advising staff, who approve the final course selections. A Human Biology area of concentration topic generally falls within one (or a combination of 2) of the following areas of emphasis:

- Environment and Environmental Policy
- Health and Health Policy
- Human Performance
- Human Development
- Biomedical Science and Biocomputation
- Brain and Behavior
- Ethics and Medical Humanities
- Evolution

Upper-Division Requirement

Students must take three Human Biology upper-division courses numbered 100 to 189. These courses should be used to explore subjects outside the depth requirement. One upper-division course may be taken satisfactory/no credit. Each course must be taken for a minimum of 3 units. Minimum grade requirement for upper-division courses is 'C-'. All non-laboratory advanced HUMBIO courses (those numbered 100 to 189) fulfill the Human Biology upper-division requirement. A list of Overseas Studies courses that satisfy upper-division requirements can be found on the Overseas tab (p. 1630) of this section of this bulletin.

Honors Program

The honors program in Human Biology provides qualified majors the opportunity to work closely with faculty on an individual research project, culminating in an honors thesis. Students may begin honors research from a number of starting points including topics introduced in the core or upper-division courses; independent interests stemming from an internship experience; or collaborating with faculty from the natural, social, or behavioral sciences.

Students may apply to the honors program if they have completed the Human Biology core with a minimum GPA of 3.0, have an overall Stanford GPA of 3.2, and meet other requirements detailed in the honors handbook. Interested students should consult the Human Biology Honors website (http://humanbiology.stanford.edu/academics/honors/) and meet with the Human Biology Associate Director or student services officer.

Most honors projects involve a total of 10-15 units of course work in HUMBIO 193 and 194:

		Units
HUMBIO 193	Research in Human Biology	1-5
HUMBIO 194	Honors	1-10

Admission to the honors program is by preliminary application in early February, followed by the full application in early March of the junior year. Students planning to undertake honors begin research or preparation as early as completion of the sophomore year.

The honors thesis is normally completed by the middle of Spring Quarter of the senior year. Honors students present summaries of their research at the Human Biology Senior Symposium in May.

Human Biology also holds a Summer Honors College just prior to Autumn Quarter each year for students who have applied to the honors program. Students apply to Summer Honors College in April of the junior year.

Bachelor of Arts in Human Biology

The B.A. in Human Biology (HUMBIO) requires a minimum of 81 units in the major divided among four types of courses: fundamental program requirements, breadth requirement (20+ units), depth requirement (20+ units) and upper-division (3+ courses). The B.A. degree is designed for students who prefer a traditional liberal arts degree with a curriculum based across the natural sciences, social sciences, and humanities. The degree is suitable for a variety of career trajectories, including for

attending graduate or professional school, such as medical school. Students who plan to pursue graduate work should be aware of the admission requirements of the schools to which they intend to apply. Early planning is advisable to guarantee completion of major and graduate school requirements.

For the B.A. degree 10 or more units of the breadth requirement and five or more of the classes in the upper-division and depth requirement must come from a set of pre-approved Social Sciences and Humanities courses. For the five or more B.A. eligible courses in your Depth and Upper Division, three of those courses must be in the Depth section. Many pre-approved courses additionally satisfy University Ways of Thinking and Doing requirements, specifically Aesthetic and Interpretive Inquiry, Creative Expression, Engaging Diversity, Ethical Reasoning, and Social Inquiry. Students pursuing a B.A. degree do take courses in the natural sciences, although fewer than for the B.S. degree.

How to Declare a Major in Human Biology

Over the course of declaration, a prospective major must consult with the Human Biology advising team to obtain detailed information about the program and guidance in the development of an individual course of study. At the time the major is declared, the student submits a written statement (3-5 pages) of academic and long-term goals and the proposed list of courses satisfying the requirements for the major. The proposal is then reviewed by the student advisors who can help identify an appropriate faculty advisor.

It is important to declare in the sophomore year, and planning may begin once a student in good academic standing has passed two of six courses in the core. The program recommends that students finish the declaration process by the time they finish the HumBio core.

Degree Requirements

Course Requirements

		Units
Human Biology Core		**30**
The required core sequence introduces the biological and social sciences and, most importantly, relationships between the two. Classes meet throughout the academic year. The A and B series are designed to be taken concurrently. Students should initiate the core in Autumn Quarter of the sophomore year. Freshmen are strongly advised to wait to start the HUMBIO Core until Autumn of sophomore year. Majors must earn a minimum letter grade of 'C-' in every core course. The Human Biology core consists of the following courses:		
HUMBIO 2A	Genetics, Evolution, and Ecology	
HUMBIO 2B	Culture, Evolution, and Society	
HUMBIO 3A	Cell and Developmental Biology	
HUMBIO 3B	Environmental and Health Policy Analysis	
HUMBIO 4A	The Human Organism	
HUMBIO 4B	Behavior, Health, and Development	
Statistics		**3-5**
The statistics course must be taken for a letter grade by majors. The minimum grade requirement is 'C-'. Statistics may be chosen from courses such as:		
BIO 141	Biostatistics	
CME 106	Introduction to Probability and Statistics for Engineers	
CS 109	Introduction to Probability for Computer Scientists	
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	
EDUC 400A	Introduction to Statistical Methods in Education	
EPI 259	Introduction to Probability and Statistics for Epidemiology	
EPI 262	Intermediate Biostatistics: Regression, Prediction, Survival Analysis	
HUMBIO 88	Introduction to Statistics for the Health Sciences	
HUMBIO 89	Introduction to Health Sciences Statistics	
SOC 180B	Introduction to Data Analysis	
SOC 181B	Sociological Methods: Statistics	
STATS 116	Theory of Probability	
Capstone		**1-10**
Complete area from below:		
Human Biology Practicum		
HUMBIO 191	Human Biology Practicum	
Human Biology Synthesis		
HUMBIO 192A	Human Biology Synthesis	
HUMBIO 192W	Human Biology Synthesis	
HUMBIO 192S	Human Biology Synthesis	
Honors in Human Biology		
HUMBIO 194	Honors	
Breadth Courses		**20**
Consistent with the student's chosen area of concentration topic. This requirement allows the student to explore the topic with a broad focus. Courses may include introductory-level courses from across the University and lab courses, and may be taken for credit or letter grade. The minimum grade requirement is 'C-.'		
Depth Courses		**20**
A minimum of five courses totaling at least 20 units consistent with the student's chosen area of concentration topic. This requirement allows the student to gain expertise on on their chosen area. Courses are non-introductory and are usually numbered over 100. Three or more departments must be represented in the depth requirement. Each course must be taken for a letter grade and at least three units. The minimum grade requirement is 'C-'. Three or more courses in the Depth must be in your chosen degree option of B.A..		
Upper Division Electives		
Three courses selected from pre-approved list of social science and humanities courses		
Minimum Total Units		**81**

Students who have previously taken HUMBIO 85 Essential Statistics for Human Biology, may use it to fulfill the statistics requirement. In certain circumstances, students completing an additional major or minor in another department may submit a petition to waive the units requirement for Statistics; contact Human Biology student services for more information. Students who did not declare before September 21, 2015, may not use STATS 60 to fulfill the statistics requirement.

Additional Information

Capstone (1-10 units)

The following options fulfill the Capstone (https://humanbiology.stanford.edu/capstone/) requirement:

1. *Human Biology Practicum:* HUMBIO 191 Human Biology Practicum (1 unit total, letter grade). Allows students to integrate their academics with their community-engaged learning, research or pre-professional experiences through reflective written work and presentation. Students can take workshops over several quarters, and enroll in one unit of 191 for the quarter they plan to complete the practicum.
2. *Human Biology Synthesis (by application):* This sequence should be taken for 2-3 units in Autumn (HUMBIO 192A Human Biology

Synthesis), Winter (HUMBIO 192W Human Biology Synthesis) and/or Spring (HUMBIO 192S Human Biology Synthesis) for 6 units total, letter grade. The sequence is designed for students to expand upon the work of their area of concentration. It allows students the opportunity to craft a culminating, creative work of scholarship based on a synthesis of personal and academic interests, including service projects. The work must be exhibited during senior year.

3. *Honors in Human Biology (by application):* HUMBIO 194 Honors also satisfies the Capstone requirement.
4. Non-Human Biology activities that fulfill the Capstone requirement:
   a. Notation in Science Communication
   b. Interdisciplinary Honors

Breadth and Depth Requirement

These courses inform the student's chosen area of concentration topic. The student selects courses for these two requirement categories in consultation with the advising staff, who approve the final course selections. A Human Biology area of concentration topic generally falls within one (or a combination of 2) of the following areas of emphasis:

- Environment and Environmental Policy
- Health and Health Policy
- Human Performance
- Human Development
- Biomedical Science and Biocomputation
- Brain and Behavior
- Ethics and Medical Humanities
- Evolution

Upper-Division Requirement

Students must take three Human Biology upper-division courses numbered 100 to 189. These courses should be used to explore subjects outside the depth requirement. One upper-division course may be taken satisfactory/no credit. Each course must be taken for a minimum of 3 units. Minimum grade requirement for upper-division courses is 'C-'. All non-laboratory advanced HUMBIO courses (those numbered 100 to 189) fulfill the Human Biology upper-division requirement. A list of Overseas Studies courses that satisfy upper-division requirements can be found on the Overseas tab (p. 1630) of this section of this bulletin.

Honors Program

The honors program in Human Biology provides qualified majors the opportunity to work closely with faculty on an individual research project, culminating in an honors thesis. Students may begin honors research from a number of starting points including topics introduced in the core or upper-division courses; independent interests stemming from an internship experience; or collaborating with faculty from the natural, social, or behavioral sciences.

Students may apply to the honors program if they have completed the Human Biology core with a minimum GPA of 3.0, have an overall Stanford GPA of 3.2, and meet other requirements detailed in the honors handbook. Interested students should consult the Human Biology Honors website (http://humanbiology.stanford.edu/academics/honors/) and meet with the Human Biology Associate Director or student services officer.

Most honors projects involve a total of 10-15 units of course work in HUMBIO 193 and 194:

		Units
HUMBIO 193	Research in Human Biology	1-5
HUMBIO 194	Honors	1-10

Admission to the honors program is by preliminary application in early February, followed by the full application in early March of the junior year. Students planning to undertake honors begin research or preparation as early as completion of the sophomore year.

The honors thesis is normally completed by the middle of Spring Quarter of the senior year. Honors students present summaries of their research at the Human Biology Senior Symposium in May.

Human Biology also holds a Summer Honors College just prior to Autumn Quarter each year for students who have applied to the honors program. Students apply to Summer Honors College in April of the junior year.

Minor in Human Biology

A minor in Human Biology provides students with an introduction to the relationship between the biological and social aspects of humanity's origin, development, and future. Many of the serious problems facing humans today involve both biological and social aspects. Scientific approaches to these problems are essential, but they must be broadly conceived and placed within their proper social and cultural setting. Students with a minor in Human Biology are expected to develop a strong content background and the skills to integrate the biological and social aspects of human beings.

The Human Biology minor requires at minimum three core courses to ensure coverage of the field disciplines, while offering flexibility for students pursuing specific subplans in the fields of Global Health, Epidemiology, or Health Policy.

- The Global Health subplan introduce students to critical social perspectives, policy, and applications in global health.
- The Epidemiology subplan introduces students to epidemiological constructs and applies these methods to the study of real world public health challenges.
- The Health Policy subplan introduces students to population-level problems, interventions, and policy in public health.

Students declaring a minor in Human Biology must do so no later than two quarters prior to their intended quarter of degree conferral (for example, a student must declare a minor before the end of Autumn Quarter if graduating in the following Spring Quarter). Students who declared a minor prior to September 2018 should refer to previous guidelines and requirements for the minor and if interested in a subplan should contact HumBio Student Services by emailing humbioadvising@stanford.edu to determine eligibility. Undergraduate fields of study (subplans) are declared on Axess; these subplans appear on the transcript but not on the diploma. Students may submit a petition to declare the HumBio minor without a subplan; contact Human Biology Student Services for more information.

In order to graduate with a minor in Human Biology, undergraduates must complete the minor program of study as described here, for a total of at least 25 units, with a minimum of six courses.

Degree Requirements

Students completing a major that requires some of the HumBio Core or equivalent may submit a petition to substitute the Core requirement; contact Human Biology Student Services for more information.

Course Requirements

		Units
Human Biology Core		**15**
Complete three courses from (at least one A-side and at least one B-side class):		
HUMBIO 2A	Genetics, Evolution, and Ecology	
HUMBIO 2B	Culture, Evolution, and Society	

HUMBIO 3A	Cell and Developmental Biology	
HUMBIO 3B	Environmental and Health Policy Analysis	
HUMBIO 4A	The Human Organism	
HUMBIO 4B	Behavior, Health, and Development	
Electives		**10**
Three (3) elective courses, each 3 or more units, totaling 10 or more units, within the chosen subplan. A comprehensive list of suitable elective courses is provided below.		
Global Health Subplan Electives		
HUMBIO 114	Global Change and Emerging Infectious Disease	
HUMBIO 122M	Challenges of Human Migration: Health and Health Care of Migrants and Autochthonous Populations	
HUMBIO 124C	Global Child Health	
HUMBIO 129S	Global Public Health	
HUMBIO 129W	Health Care Systems Around the World	
HUMBIO 153	Parasites and Pestilence: Infectious Public Health Challenges	
HUMBIO 154D	Models for Understanding and Controlling Global Infectious Diseases	
HUMBIO 179B	Music and Healing	
HUMBIO 26	Designing Research-Based Interventions to Solve Global Health Problems	
AFRICAAM 41	Genes and Identity	
ANTHRO 182N	Smoke and Mirrors in Global Health	
COMPMED 84Q	Globally Emerging Zoonotic Diseases	
EARTHSYS 162	Data for Sustainable Development	
EASTASN 117	Health and Healthcare Systems in East Asia	
HISTORY 243G	Tobacco and Health in World History	
EPI 231	Epidemiology of Infectious Diseases	
EPI 237	Practical Approaches to Global Health Research	
HUMRTS 110	Global Women's Issues in Human Rights and Health	
MED 232	Global Health: Scaling Health Technology Innovations in Low Resource Settings	
PEDS 223	Human Rights and Global Health	
SOMGEN 207	Theories of Change in Global Health	
Epidemiology Subplan Electives		
HUMBIO 57	Epidemic Intelligence: How to Identify, Investigate and Interrupt Outbreaks of Disease	
HUMBIO 114	Global Change and Emerging Infectious Disease	
HUMBIO 126	Promoting Health Over the Life Course: the Science of Healthy Living	
HUMBIO 153	Parasites and Pestilence: Infectious Public Health Challenges	
HUMBIO 154B	Principles of Epidemiology	
HUMBIO 154C	Cancer Epidemiology	
HUMBIO 154D	Models for Understanding and Controlling Global Infectious Diseases	
HUMBIO 159	Genes and Environment in Disease Causation: Implications for Medicine and Public Health	
COMPMED 84Q	Globally Emerging Zoonotic Diseases	
EPI 206	Meta-research: Appraising Research Findings, Bias, and Meta-analysis	
EPI 219	Evaluating Technologies for Diagnosis, Prediction and Screening	
EPI 225	Introduction to Epidemiologic and Clinical Research Methods	
EPI 231	Epidemiology of Infectious Diseases	
EPI 259	Introduction to Probability and Statistics for Epidemiology	
EPI 261	Intermediate Biostatistics: Analysis of Discrete Data	
Health Policy Subplan Electives		
HUMBIO 120	Health Care in America: An Introduction to U.S. Health Policy	
HUMBIO 120A	American Health Policy	
HUMBIO 122A	Health Care Policy and Reform	
HUMBIO 123E	Health Economics & Policy: exploring health disparities, child health & health care spending	
HUMBIO 129W	Health Care Systems Around the World	
HUMBIO 153	Parasites and Pestilence: Infectious Public Health Challenges	
EASTASN 117	Health and Healthcare Systems in East Asia	
HRP 211	Law and Biosciences: Neuroscience	
HRP 221	Law and the Biosciences: Genetics	
HRP 249	Topics in Health Economics I	
HRP 256	Economics of Health and Medical Care	
HRP 252	Outcomes Analysis	
MS&E 292	Health Policy Modeling	
PUBLPOL 156	Health Care Policy and Reform	
PUBLPOL 231	Health Law: Finance and Insurance	
SOC 152	The Social Determinants of Health	

Additional Information

Course work completed for the Human Biology Minor must meet the following criteria:

- All courses must be taken for a letter grade.
- All courses must be completed with a minimum 'C-' grade.
- Courses used to fulfill the minor may not be used to fulfill any other department degree requirements (major or minor).
- All courses must be taken at Stanford University.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a “credit” or “no credit” grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a “credit” or “satisfactory” grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

The Program in Human Biology counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of undergraduate degree requirements that otherwise require a letter grade.

Director: Lianne Kurina

Associate Director: Katherine Preston

Director of Undergraduate Studies: Lianne Kurina

Honors Chair: Katherine Preston

Emeriti: (Professors) Carol Boggs (Biology), Donna Bouley (Comparative Medicine), Doug Brutlag (Biochemistry), William H. Durham (Anthropology), Anne Fernald (Psychology), Russell D. Fernald (Biology), Ronald Garcia (Center for Excellence), A. Dale Kaiser (Development Biology/Biochemistry) - in memoriam, Herant Katchadourian (Human Biology), Donald Kennedy (Biology) - in memoriam, Michael Marmor (Ophthalmology), Gordon Matheson (Orthopaedic Surgery/Sports Medicine), Ellen FitzSimmons Porzig (Developmental Biology), Carol Winograd (Medicine)

Professors: Julie C. Baker (Genetics), Laurence Baker (Health Research and Policy - Health Services Research), Laura Carstensen (Psychology), Tiffany Chao (Surgery - General Surgery), Rodolfo Dirzo (Biology), Heidi Feldman (Pediatrics/Developmental Behavioral Pediatrics), Paul Fisher (Neurology) - on leave (Autumn), Margaret Fuller (Developmental Biology), Garry Gold (Radiology/Musculoskeletal Imaging), Brenda Golianu (Anesthesiology, Perioperative and Pain Medicine - Pediatrics), Lawrence H. Goulder (Economics), James J. Gross (Psychology), Joachim Hallmayer (Psychiatry and Behavioral Sciences - Child and Adolescent Psychiatry and Child Development), H. Craig Heller (Biology), Jill Helms (Surgery - Plastic and Reconstructive Surgery), Richard Klein (Anthropology and Biology), Tanya Luhrmann (Anthropology), Yvonne Maldonado (Pediatrics - Infectious Diseases/Health Research and Policy), Roeland Nusse (Developmental Biology), Ruth O'Hara (Psychiatry and Behavioral Sciences/Public Mental Health and Population Sciences), Michael Ostacher (Psychiatry and Behavioral Sciences/Public Mental Health and Population Sciences), Amado Padilla (Education), Julie Parsonnet (Medicine/Infectious Diseases), Rob Reich (Political Science), Allan Reiss (Psychology and Behavior Sciences - Center for Interdisciplinary Brain Sciences Research/Radiology), Robert Sapolsky (Biology, Neurology and Neurological Sciences, Neurosurgery), Walter Scheidel (Classics and History), Sara Singer (Medicine/Primary Care and Population Health), Randall Stafford (Medicine/Stanford Center for Research in Disease Prevention), William Talbot (Developmental Biology), Shripad Tuljapurkar (Biology), Jeffrey Wine (Psychology)

Associate Professors: Michael C. Frank (Psychology), Duana Fullwiley (Anthropology), Angela Garcia (Anthropology), Jeremy Goldhaber-Fiebert (Medicine/Primary Care and Outcomes Research), Peter Kao (Medicine/Pulmonary and Critical Care Medicine), N. Grant Miller (Medicine/Primary Care and Outcomes Research), Michelle Monje-Deisseroth (Neurology), Jelena Obradovic (Education), Jonathan Pritchard (Biology and Genetics), Lee Sanders (Pediatrics - General Pediatrics), Aliya Saperstein (Sociology), Gavin Sherlock (Genetics)

Assistant Professors: Geoffrey Abrams (Orthopaedic Surgery), Jorah Dannenberg (Philosophy), Denise Gill (Music — Ethnomusicology), Roanne Kantor (English) - maternity leave, Anshul Kundaje (Genetics and Computer Science), Michelle Monje-Deisseroth (Neurology), Maria Polyakova (Health Research and Policy - Health Services Research), Maya Rossin-Slater (Health Research and Policy - Health Services Research),

Professors (Research): Christopher Gardner (Medicine - Stanford Prevention Research Center), David Lyons (Psychiatry and Behavioral Sciences/General Psychiatry and Psychology - Adult), Marcia Stefanick (Medicine - Stanford Prevention Research Center/Obstetrics and Gynecology)

Associate Professors (Research): Philippe Mourrain (Psychiatry and Behavioral Sciences — Sleep Disorder/Stanford Center for Sleep Sciences and Medicine), Karen Parker (Psychiatry and Behavioral Sciences), Lisa Goldman Rosas (Health Research and Policy - Epidemiology; Medicine/Primary Care and Population Health), Jamie Zeitzer (Psychiatry and Behavioral Sciences - Stanford Center for Sleep Sciences and Medicine)

Professors (Teaching): Donald Barr (Pediatrics - General Pediatrics), Gary Darmstadt (Pediatrics - Neonatology), Ronald Davis (Biochemistry/Genetics), David Magnus (Pediatrics/SCBE), John Oppenshaw (Medicine/Infectious Diseases), Robert Siegel (Microbiology and Immunology)

Associate Professors (Teaching): Jason Andrews (Medicine/Infectious Diseases), Catherine Heaney (Psychology/Medicine - Stanford Prevention Research Center), Lianne Kurina (Medicine/Primary Care and Population Health), Eunice Rodriguez (Pediatrics - General Pediatrics), Kristin Sainani (Health Research and Policy — Epidemiology)

Clinical Assistant Professors: Moises Gallegos (Emergency Medicine), Jason Hom (Medicine), Andrea Kussman (Orthopaedic Surgery), Daniel Mason (Psychiatry), Margaret Windy McNerney (VA Palo Alto Health Care Services), Rita Popat (Health Research and Policy — Epidemiology)

Clinical Associate Professor: Cynthia Nguyen (Psychiatry and Behavioral Sciences), Clea Sarnquist (Pediatics - Infectious Diseases)

Other Teaching Faculty and Staff: Tamar Brand-Perez, David Crane (Public Policy), Judy Chu, Sophia Colamarino (Psychiatry and Behavioral Sciences - Child and Adolescent Psychiatry and Child Development), Anne Friedlander, Renu Heller (Biology), Catherine Ley (Medicine/Infectious Diseases), Mark Mabry, Lisa Medoff, Joe Nation (Public Policy), Katherine Preston, Annette Salmeen, Piya Sorcar (Center for Health Policy and the Center for Primary Care and Outcomes Research), Jennifer Wolf (Education)

Course Associates: Abby Chen, Courtney Gao, Ginger Gramson, Sierra Maciorowski, Alessandra Marcone, Cameron Nosrat, Paul Phan, Caroline Zha

Overseas Studies Courses in Human Biology

The Bing Overseas Studies Program (http://bosp.stanford.edu) (BOSP) manages Stanford international and domestic study away programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The BOSP course search site (https://undergrad.stanford.edu/programs/bosp/explore/search-courses/) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu) or Bing Overseas Studies (http://bosp.stanford.edu).

Due to COVID-19, all BOSP programs have been suspended for Autumn Quarter 2020-21. All courses and quarters of operation are subject to change.

		Units
OSPAUSTL 10	Coral Reef Ecosystems	3
OSPAUSTL 28	Terrestrial Ecology and Conservation	3

OSPAUSTL 32	Coastal Ecosystems	3
OSPCPTWN 67	ICT4D: An Introduction to the Use of ICTs for Development	3
OSPHONGK 44	Medical Sociology	4
OSPMADRD 57	Health Care: A Contrastive Analysis between Spain and the U.S.	4
OSPMADRD 72	Issues in Bioethics Across Cultures	4
OSPPARIS 76	From Art to Medicine: The Human Body and Tissue Regeneration	3

Courses

HUMBIO 2A. Genetics, Evolution, and Ecology. 5 Units.
Introduction to the principles of classical and modern genetics, evolutionary theory, and ecology. Topics: micro- and macro-evolution, population and molecular genetics including personal genomics and CRISPR, biodiversity and ecology, emphasizing the genetics and ecology of the evolutionary process and applications to human populations. HUMBIO 2A and HUMBIO 2B are designed to be taken concurrently and exams for both sides may include material from joint module lectures. Concurrent enrollment is strongly encouraged and is necessary for majors in order to meet declaration deadlines. Please note that Human Biology majors are typically required to take the Human Biology Core Courses for a letter grade; however in academic year 20-21 majors may count courses taken for a letter grade or for Credit (CR).

HUMBIO 2B. Culture, Evolution, and Society. 5 Units.
Introduction to the evolutionary study of human diversity, the origins of social complexity, and the field of demography. Topics will include hominid evolution, population dynamics and the demographic transition, the impact of disease on societies, social theory, and patterns and consequences of inequality. HUMBIO2B, with HUMBIO3B and HUMBIO 4B, satisfies the Writing in the Major (WIM) requirement for students in Human Biology. HUMBIO 2A and HUMBIO 2B are designed to be taken concurrently and exams or quizzes for both sides may include material from joint module lectures. Concurrent enrollment is strongly encouraged and is necessary for majors in order to meet declaration deadlines. Please note that Human Biology majors are typically required to take the Human Biology Core Courses for a letter grade; however in academic year 20-21 majors may count courses taken for a letter grade or for Credit (CR).

HUMBIO 3A. Cell and Developmental Biology. 5 Units.
Principles of the biology of cells, embryonic development and pattern formation, biochemistry of energetics and metabolism, the nature of membranes and organelles, hormone action and signal transduction in normal and diseased states (diabetes, cancer, autoimmune diseases), stem cells and immunology. HUMBIO 3A and HUMBIO 3B are designed to be taken concurrently and exams for both sides may include material from joint module lectures. Concurrent enrollment is strongly encouraged and is necessary for majors in order to meet declaration deadlines. Please note that Human Biology majors are typically required to take the Human Biology Core Courses for a letter grade; however in academic year 20-21 majors may count courses taken for a letter grade or for Credit (CR).nnPrerequisite: college chemistry or completion of the HumBio Core on-line chemistry lecture series during the fall quarter.

HUMBIO 3B. Environmental and Health Policy Analysis. 5 Units.
Connections among the life sciences, social sciences, public health, and public policy. The economic, social, and institutional factors that underlie environmental degradation, the incidence of disease, and challenges facing the health care system including high spending and inequalities in access to health care. Public policies to address these problems. Topics include pollution regulation, climate change policy, biodiversity protection, health insurance, health care regulation, health disparities, and health care reform. HUMBIO 3B, with HUMBIO 2B and HUMBIO 4B, satisfies the Writing in the Major (WIM) requirement for students in Human Biology. HUMBIO 3A and HUMBIO 3B are designed to be taken concurrently and exams or quizzes for both sides may include material from joint module lectures. Concurrent enrollment is strongly encouraged and is necessary for majors in order to meet declaration deadlines. Please note that Human Biology majors are typically required to take the Human Biology Core Courses for a letter grade; however in academic year 20-21 majors may count courses taken for a letter grade or for Credit (CR).

HUMBIO 4A. The Human Organism. 5 Units.
Integrative Physiology: Neurobiology, endocrinology, and organ system function, control, and regulation. HUMBIO 4A and HUMBIO 4B are designed to be taken concurrently and exams for both sides may include material from joint module lectures. Concurrent enrollment is strongly encouraged and is necessary for majors in order to meet declaration deadlines. Please note that Human Biology majors are typically required to take the Human Biology Core Courses for a letter grade; however in academic year 20-21 majors may count courses taken for a letter grade or for Credit (CR).

HUMBIO 4B. Behavior, Health, and Development. 5 Units.
Research and theory on human behavior, health, and life span development. How biological factors and cultural practices influence cognition, emotion, motivation, personality, and health in childhood, adolescence, and adulthood. HUMBIO 4B, with HUMBIO2B and HUMBIO 3B, satisfies the Writing in the Major (WIM) requirement for students in Human Biology. HUMBIO 4A and HUMBIO 4B are designed to be taken concurrently and exams or quizzes for both sides may include material from joint module lectures. Concurrent enrollment is strongly encouraged and is necessary for majors in order to meet declaration deadlines. Please note that Human Biology majors are typically required to take the Human Biology Core Courses for a letter grade; however in academic year 20-21 majors may count courses taken for a letter grade or for Credit (CR).

HUMBIO 4Y. Practicum in Child Development. 1 Unit.
Learning about young children's physical, emotional, social, cognitive, and language development through guided observations and discussions from Bing Nursery School, Stanford's lab school for research and training in child development. Weekly guided observations and 5 discussion meetings. Pre- or corequisite: HUMBIO 4B (formerly 3B): Behavior, Health, and Development.

HUMBIO 5E. Science Education in Human Biology. 1 Unit.
In this seminar, students will learn about research on science education. They will use this knowledge to create and analyze teaching material such as section plans, exams, and problem sets. Material produced in this course will be related to the topics covered in the core course of the Program in Human Biology. Students will experience and practice various teaching styles. Prerequisitez: Human Biology Core or equivalent or consent of instructor.

HUMBIO 9. Public Service Internship Preparation. 1 Unit.
Are you prepared for your internship this summer? This workshop series will help you make the most of your internship experience by setting learning goals in advance; negotiating and communicating clear roles and expectations; preparing for a professional role in a non-profit, government, or community setting; and reflecting with successful interns and community partners on how to prepare sufficiently ahead of time. You will read, discuss, and hear from guest speakers, as well as develop a learning plan specific to your summer or academic year internship placement. This course is primarily designed for students who have already identified an internship for summer or a later quarter. You are welcome to attend any and all workshops, but must attend the entire series and do the assignments for 1 unit of credit.
Same as: EARTHSYS 9, EDUC 9, PUBLPOL 74, URBANST 101

HUMBIO 11. Meet HumBio: a lecture series introducing HumBio themes. 1 Unit.
A lecture and discussion series designed for freshmen who want to learn more about Human Biology - either the major itself or the topics within its realm - by hearing about a HumBio perspective on the public health response to the COVID-19 pandemic. Each week the class will feature a guest speaker, often a HumBio faculty member or alum, addressing three central questions: What do I do? How is it important for protecting or promoting the public¿s health? and What professional opportunities are possible for a person concentrating in my field? The course is not meant to cover a specific body of content, therefore the assignments for the class aim to build fundamental study skills. These include taking useful notes, articulating questions or ideas prompted by the presentations, connecting lecture topics with current events or journal articles, and paying full courteous attention to speakers and peers. There will be no required readings or exams.

HUMBIO 14. Understanding Connections between Food and the Environment. 1 Unit.
Globally, food systems, what we eat, where and how we grow it, play a major role in determining our impact on the environment. By considering our food choices, we can find "low hanging vegetables" for reducing our "foodprint". In this course, we will begin to explore the complex connections between food and the environment. We will begin with a discussion of "Planetary Boundaries" as a guide for understanding the limits for human alterations of the biosphere, beyond which abrupt changes could occur. We will then introduce nine topics which will be discussed in the nine weeks to follow, and how they relate to food.

HUMBIO 26. Designing Research-Based Interventions to Solve Global Health Problems. 3-4 Units.
The excitement around social innovation and entrepreneurship has spawned numerous startups focused on tackling world problems, particularly in the fields of education and health. The best social ventures are launched with careful consideration paid to research, design, and efficacy. This course offers students insights into understanding how to effectively develop, evaluate, and scale social ventures. Using TeachAids (an award-winning nonprofit educational technology social venture used in 82 countries) as a primary case study, students will be given an in-depth look into how the entity was founded and scaled globally. Guest speakers will include world-class experts and entrepreneurs in Philanthropy, Medicine, Communications, Education, and Technology. Open to both undergraduate and graduate students.
Same as: AFRICAST 135, AFRICAST 235, EDUC 135, EDUC 335, EPI 235, MED 235

HUMBIO 27. Traditional Chinese Medicine. 1 Unit.
The philosophy and history behind traditional Chinese medicine. Concepts such as Qi, Yin/Yang, meridians, Chinese organs, and the 5 elements. How these concepts are applied through techniques such as acupuncture, herbal medicine, Qi gong, and massage. How traditional Chinese medicine is understood from a scientific standpoint. Political and socioeconomic implications. Observation of an acupuncturist. Readings on the integration of Eastern and Western medicine and on traditional Chinese medicine.

HUMBIO 28. Health Impact of Sexual Assault and Relationship Abuse across the Lifecourse. 1-3 Unit.
(Human Biology students must enroll in HUMBIO 28 or AFRICAAM 28. Med/Grad students should enroll in SOMGEN 237 for 1-3 units.)
An overview of the acute and chronic physical and psychological health impact of sexual abuse through the perspective of survivors of childhood, adolescent, young and middle adult, and elder abuse, including special populations such as pregnant women, military and veterans, prison inmates, individuals with mental or physical impairments. Also addresses: race/ethnicity, gender identity, sexual orientation, and other demographic and societal factors, including issues specific to college culture. Professionals with expertise in sexual assault present behavioral and prevention efforts such as bystander intervention training, medical screening, counseling and other interventions to manage the emotional trauma of abuse. Undergraduates must enroll for 3 units.To receive a letter grade in any listing, students must enroll for 3 units. This course must be taken for a letter grade and a minimum of 3 units to be eligible for Ways credit.
Same as: AFRICAAM 28, FEMGEN 237, SOMGEN 237

HUMBIO 29A. Well-Being in Immigrant Children & Youth: A Service Learning Course. 4 Units.
This is an interdisciplinary course that will examine the dramatic demographic changes in American society that are challenging the institutions of our country, from health care and education to business and politics. This demographic transformation is occurring first in children and youth, and understanding how social institutions are responding to the needs of immigrant children and youth to support their well-being is the goal of this course.
Same as: CHILATST 177A, CSRE 177E, EDUC 177A

HUMBIO 29G. Gender and Intersectionality in Global Health. 3 Units.
Intersectional thinking is increasingly being applied to global health and other academic disciplines as a framework for understanding complex, and often seemingly intractable, challenges to health and well-being. This course explores how gender (e.g. male, female, trans*, non-binary, etc) identity and relationships intersect with other social categorizations, including age and reproductive status (particularly for women), race/ethnicity, socioeconomic class, immigration status, educational attainment, to create systemic advantages or disadvantages that may explain and/or could address poor health outcomes within and across global communities. More specifically, we will focus on intersectional and biological frameworks in the context of cultural gender norms, to explore possible reasons for differences in incidence and prevalence of a wide range of health disparities worldwide. We will also use these frameworks to explore options for health improvement, in terms of both prevention and care/treatment.

HUMBIO 44. Diagnostic Odysseys In Medicine. 1 Unit.
Medicine is rapidly evolving, with increasing emphasis on genetic testing, immunophenotyping and integration of technology to guide diagnosis. In this course, experts from Stanford and Silicon Valley will highlight exciting developments. Topics include the latest developments in genetics and genomics (including genome testing in clinical practice, direct to consumer testing, and frontiers in neurogenetics), immunophenotyping, utilization of databases to research diseases and the emerging field of machine learning and clinical decision support in optimizing diagnostic strategies. Students who wish to engage in a mentored multi-disciplinary team-based research project related to advanced diagnostic techniques can additionally enroll in MED 239.
Same as: MED 244

HUMBIO 51. Big Data for Biologists - Decoding Genomic Function. 3 Units.
Biology and medicine are becoming increasingly data-intensive fields. This course is designed to introduce students interested in human biology and related fields to methods for working with large biological datasets. There will be in-class activities analyzing real data that have revealed insights about the role of the genome and epigenome in health and disease. For example, we will explore data from large-scale gene expression and chromatin state studies. The course will provide an introduction to the relevant topics in biology and to fundamental computational skills such as editing text files, formatting and storing data, visualizing data and writing data analysis scripts. Students will become familiar with both UNIX and Python. This course is designed at the introductory level. Previous university-level courses in biology and programming experience are not required.

HUMBIO 57. Epidemic Intelligence: How to Identify, Investigate and Interrupt Outbreaks of Disease. 4 Units.
(HUMBIO students must enroll in HUMBIO 57. Med/Graduate students must enroll in EPI 247.) We will cover: the components of public health systems in the US; principles of outbreak investigation and disease surveillance; different types of study design for field investigation; visualization and interpretation of public health data, including identification and prevention of biases; and implementation of disease control by public health authorities. Students will meet with leaders of health departments of the state and the county and will be responsible for devising, testing and evaluating a field questionnaire to better understand the complexities of field research. (Formerly HRP 247).
Same as: EPI 247

HUMBIO 65. Biosocial Medicine: The Social, Psychological, and Biological Determinants of Behavior and Wellbeing. 3 Units.
Explores how social forces, psychological influences, and biological systems combine to affect human behavior in early childhood, in the educational experience, and throughout the life course. Examines how behaviors are linked to well-being. Uses a flipped classroom model, in which a series of lectures are available for students to view on-line before class. In-class time then focuses on case studies from published research. Students must enroll in HUMBIO 65 for a letter grade to be eligible for Ways credit.
Same as: EDUC 205, SOMGEN 215

HUMBIO 71A. Race in Science. 1 Unit.
What are the roles of race and racism in science, technology, and medicine? 3-course sequence; each quarter can be taken independently. Fall quarter focuses on science. What is the science of race and racism? How does race affect scientific work? Weekly guest speakers will address such issues as the psychology and anthropology of race and racism; how race, language, and culture affect education; race in environmental science and environmental justice; the science of reducing police violence; and the role of race in genomic research. Talks will take a variety of forms, from panel discussions to interviews and lectures. Weekly assignments: read a related article and participate in an online discussion.
Same as: AFRICAAM 51A, CEE 151A, COMM 51A, CSRE 51A, STS 51A

HUMBIO 71B. Race in Technology. 1 Unit.
What are the roles of race and racism in science, technology, and medicine? 3-course sequence; each quarter can be taken independently. Winter quarter focuses on technology. How do race and racism affect the design and social impact of technology, broadly defined? Can new or different technology help to reduce racial bias? Invited speakers will address the role of race in such issues as energy infrastructure, nuclear arms control, algorithmic accountability, machine learning, artificial intelligence, and synthetic biology. Talks will take a variety of forms, ranging from panel discussions to interviews and lectures. Weekly assignments: read a related article and participate in an online discussion.
Same as: AFRICAAM 51B, BIOE 91B, CEE 151B, COMM 51B, CSRE 51B, STS 51B

HUMBIO 71C. Race in Medicine. 1 Unit.
What are the roles of race and racism in science, technology, and medicine? 3-course sequence; each quarter can be taken independently. Spring quarter focuses on medicine. How do race and racism affect medical research and medical care? What accounts for health disparities among racial groups? What are the history, ethics, legal, and social issues surrounding racialized medical experiments and treatments? Invited speakers will address these and other issues. Talks will take a variety of forms: conversations, interviews, panels, and others. Weekly assignments: read a related article and participate in an online discussion.
Same as: AFRICAAM 51C, BIOE 91C, CEE 151C, CSRE 51C, STS 51C

HUMBIO 79Q. Sexuality and Society. 3 Units.
This course will explore how sexual identity, attitudes, and behaviors are shaped by the messages sent by the various agents of society such as schools, family, peers, media, and religious, medical, and political institutions. The interaction of biology, psychology, and socio-cultural factors, such as gender roles and sexual/relationship scripts will be discussed, as will the intersection of sexuality and notions of love, romance, and commitment. Critical developmental periods, such as adolescence and emerging adulthood will be examined in depth. Students will explore their own values and feelings about sexuality and come to an understanding of how their beliefs were formed. We will discuss how information about sexuality is disseminated in our society and what we can do to help ensure that such information is used in a way that promotes healthy self-conceptions, behavior, and relationships.

HUMBIO 82A. Qualitative Research Methodology. 3 Units.
This course introduces students to core concepts and methods of qualitative research. Through a variety of hands-on learning activities, readings, field experiences, class lectures and discussions, students will explore the process and products of qualitative inquiry. This course is designed particularly to support Human Biology undergraduates in designing, proposing and preparing for Honors Thesis research; students may use the course assignments and office hours to support individual research needs (e.g., proposal design, IRB protocol, pilot work).

HUMBIO 82B. Advanced Data Analysis in Qualitative Research. 3 Units.
This course is designed to support upperclass undergraduates who have collected ¿ or are collecting ¿ qualitative data in completion of Honors Thesis research. The course will review methods of qualitative data organization (field note amendment, transcription, data indexing, conceptual memo writing) and teach methods of qualitative data analysis (mutli-stage coding, data modeling, charting, use of analytic software) and examine best methods for the reporting of qualitative research. The course introduces methodologies through readings, sample data sets, and group practice; students then display learning by executing these methodologies on their own data, and reporting findings and methods.

HUMBIO 88. Introduction to Statistics for the Health Sciences. 4 Units.
Students will learn the statistical tools used to describe and analyze data in the fields of medicine and epidemiology. This very applied course will rely on current research questions and publicly available data. Students will gain proficiency with Stata to do basic analyses of health-related data, including linear and logistic regression, and will become sophisticated consumers of health-related statistical results.

HUMBIO 89. Introduction to Health Sciences Statistics. 3 Units.
This course aims to provide a firm grounding in the foundations of probability and statistics, with a focus on analyzing data from the health sciences. Students will learn how to read, interpret, and critically evaluate the statistics in medical and biological studies. The course also prepares students to be able to analyze their own data, guiding them on how to choose the correct statistical test, avoid common statistical pitfalls, and perform basic functions in R deducer. Cardinal Course certified by the Haas Center.

HUMBIO 89X. Introduction to Probability and Statistics for Epidemiology. 3 Units.
(HUMBIO students must enroll in HUMBIO 89X. Med/Graduate students must enroll in EPI 259.) Topics: random variables, expectation, variance, probability distributions, the central limit theorem, sampling theory, hypothesis testing, confidence intervals. Correlation, regression, analysis of variance, and nonparametric tests. Introduction to least squares and maximum likelihood estimation. Emphasis is on medical applications. (Formerly HRP 259).
Same as: EPI 259

HUMBIO 112. Conservation Biology: A Latin American Perspective. 3 Units.
Principles and application of the science of preserving biological diversity. Conceptually, this course is designed to explore the major components relevant to the conservation of biodiversity, as exemplified by the Latin American region. The conceptual frameworks and principles, however, should be generally applicable, and provide insights for all regions of the world. All students will be expected to conduct a literature research exercise leading to a written report, addressing a topic of their choosing, derived from any of the themes discussed in class. Prerequisite: BIO 101 or BIO 43 or HUMBIO 2A or BIO 81 and 84 or consent of instructor.
Same as: BIO 144, BIO 234

HUMBIO 113. The Human-Plant Connection. 3 Units.
The intertwined biologies of humans and plants, particularly the ways in which people and plants have imposed selection pressures and ecological change on one another. Topics include evolution and basic plant structure; plant domestication; effects of agriculture on human health and physiology; plants in traditional and contemporary diets; and human influences on plant biology through genetic manipulation and environmental change. Class meetings center on journal articles. Final project includes written and multimedia presentations. Prerequisites: HUMBIO 2A or BIO 81 and BIO 82 or consent of instructor.

HUMBIO 113S. Healthy/Sustainable Food Systems: Maximum Sustainability across Health, Economics, and Environment. 4 Units.
Focus on problems with and systems-based solutions to food system issues. Four particular settings are addressed: University, worksite, hospital, and school food. Traditional vs. disruptive food system models compared and contrasted. The goal is to determine how best to maximize sustainability across several dimensions, including health, economics, and the environment. Underlying class themes include social justice and the potential for changing social norms around food production and consumption. Discussion-based seminar. Prerequisite: Human Biology Core or Biology Foundations or consent of instructor.
Same as: CHPR 113

HUMBIO 114. Global Change and Emerging Infectious Disease. 4-5 Units.
The changing epidemiological environment. How human-induced environmental changes, such as global warming, deforestation and land-use conversion, urbanization, international commerce, and human migration, are altering the ecology of infectious disease transmission, and promoting their re-emergence as a global public health threat. Case studies of malaria, cholera, hantavirus, plague, and HIV.
Same as: EARTHSYS 114, EARTHSYS 214, ESS 213

HUMBIO 116. Climate Perspectives: Climate Science, Impacts, Policy, Negotiations, and Advocacy. 3 Units.
The course contains four main parts:Climate Science, Climate Impacts, Climate Policy, Climate Advocacy. Part I begins with a detailed introduction to climate science, including an assessment of arguments by climate science skeptics, and an examination of climate change models. Part II describes the impacts of climate change on the planet, human health, species and biodiversity, and it adds an economic perspective on the costs and benefits of responding now¿or later¿to climate change. Part II also include a discussion on climate change ethics, i.e., fairness and responsibility among individuals, nations, and generations. Part III focuses on climate policy, from the Kyoto Protocol to the Paris Accord. Part III also includes an introduction to how the public and officials have viewed climate change over time, and it explores factors that make widespread formal agreement difficult. Part IV looks forward to climate advocacy and what to expect from future of climate negotiations. Enrollment limited to students with sophomore academic standing or above. Prerequisite: Human Biology Core or Biology Foundations or consent of instructor (i.e. background in earth systems, economics, policy).
Same as: PUBLPOL 116

HUMBIO 120. Health Care in America: An Introduction to U.S. Health Policy. 4 Units.
Health policy and health care delivery from a historical and a current policy perspective. Introduces cost, quality, and access as measures of health system performance. Considers institutional aspects of health care reform and whether health care should be a right of all Americans. This course emphasizes the historical and cultural factors that have affected the evolution of our health care system in areas such as Medicaid, Medicare, and the development of managed care systems. Note: HUMBIO courses in the 120s (specifically HUMBIO 120, HUMBIO 120A, HUMBIO 120B) are designed to have complementary content and offer a variety of perspectives on the Health Care System. Upper division course with preference given to upperclassmen. Prerequisites: Human Biology Core or equivalent, or consent of instructor.

HUMBIO 120A. American Health Policy. 3 Units.
This course addresses current issues in health care reform and the policy making process. Covers current policy options for improving the health care system, as well as differing policy perspectives among those with different political views. Explores current controversies over attempts to modify the Affordable Care Act. Students discuss the feasibility, options, and ramifications of alternative proposals for health care reform. Involves student presentations, followed by discussion. Note: HUMBIO courses in the 120s (specifically HUMBIO 120, HUMBIO 120A, HUMBIO 120B) are designed to have complementary content and offer a variety of perspectives on the Health Care System. Prerequisites: Human Biology Core or equivalent, Human Biology 120, or consent of instructor.

HUMBIO 120B. The American Health Care System and Health Policy. 3 Units.
In this course you will learn about the structure and functioning of the U.S. health care system. The health care system in the U.S. has been challenged by high and rising costs, a failure to ensure universal access to care, and a need to ensure the quality of care provided to patients. We will explore in depth how our health care system works, how its structure and function contributes to the challenges we are confronting, and explore changes to the healthcare system that could help address them. The course has two main parts, the first focused on health insurance and health care financing, and the second focused on health care providers like doctors and hospitals. In addition, we bring other important topics like the Affordable Care Act, pharmaceuticals and health reforms. Note: HUMBIO courses in the 120s (specifically HUMBIO 120, HUMBIO 120A, HUMBIO 120B) are designed to have complementary content and offer a variety of perspectives on the Health Care System. Recommended Prerequisites: Human Biology Core.

HUMBIO 121E. Ethnicity and Medicine. 1-3 Unit.
Weekly lecture series. Examines the linguistic, social class, and cultural factors that impact patient care. Presentations promote culturally sensitive health care services and review contemporary research issues involving minority and underserved populations. Topics include health care inequities and medical practices of African Americans, Asians, Latinos, Native Americans, immigrants, and refugees in both urban and rural settings. 1 unit requires weekly lecture attendance, completion of required readings, completion of response questions; 2 units requires weekly lecture attendance and discussion session, completion of required readings and weekly response questions; 3 units (HUMBIO only) requires completion of a significant term paper. Students must in enroll in HUMBIO 121E for 3 units to receive a letter grade. This course must be taken for a minimum of 3 units to be eligible for Ways credit. Enrollment limited to students with sophomore academic standing or above.
Same as: EMED 121E

HUMBIO 122. Beyond Health Care: the effects of social policies on health. 3 Units.
(HUMBIO students must enroll in HUMBIO 122. Med/Graduate students must enroll in PEDS 222.) Available evidence at the national and cross-country level linking social welfare interventions and health outcomes. If and how non-health programs and policies could have an impact on positive health outcomes. Evaluation of social programs and policies that buffer the negative health impact of economic instability and unemployment among adult workers and their children. Examination of safety nets, including public health insurance, income maintenance programs, and disability insurance. Open to both undergraduate and graduate students. Prerequisites: HUMBIO 3B or equivalent, and some background in research methods and statistics, or consent of instructor.
Same as: PEDS 222

HUMBIO 122A. Health Care Policy and Reform. 5 Units.
(HUMBIO students must enroll in HUMBIO 122A. Graduate students must enroll in PUBLPOL 156.) Focuses on U.S. health care policy. Includes comparisons with health care policy in other countries and detailed examinations of Medicare, Medicaid, private insurance, the Affordable Care Act (ACA), and proposed reforms. Examines health policy efforts at state, local, and local levels. The course includes sessions on effective memo writing as well as presentation and the politics of health policy and reform efforts. Enrollment limited to students with sophomore academic standing or above. Prerequisites: Human Biology Core.
Same as: PUBLPOL 156

HUMBIO 122E. Reducing Health Disparities and Closing the Achievement Gap through Health Integration in Schools. 3 Units.
(HUMBIO students must enroll in HUMBIO 122E. Med/Graduate students must enroll in PEDS 229.) Health and education are inextricably linked. If kids aren't healthy, they won't realize their full potential in school. This is especially true for children living in poverty. This course proposes to: 1) examine the important relationship between children's health and their ability to learn in school as a way to reduce heath disparities; 2) discuss pioneering efforts to identify and address manageable health barriers to learning by integrating health and education in school environments.
Same as: EDUC 429, PEDS 229

HUMBIO 122M. Challenges of Human Migration: Health and Health Care of Migrants and Autochthonous Populations. 3 Units.
(HUMBIO students must enroll in HUMBIO 122M. Med/Graduate students enroll in PEDS 212) An emerging area of inquiry. Topics include: global migration trends, health Issues/aspects of migration, healthcare and the needs of immigrants in the US, and migrants as healthcare providers: a new area of inquiry in the US. Class is structured to include: lectures lead by the instructor and possible guest speakers; seminar, discussion and case study sessions led by students. Upper division course with preference given to upperclassmen.
Same as: PEDS 212

HUMBIO 122S. Social Class, Race, Ethnicity, and Health. 4 Units.
Examines health disparities in the U.S., looking at the patterns of those disparities and their root causes. Explores the intersection of lower social class and ethnic minority status in affecting health status and access to health care. Compares social and biological conceptualizations of race and ethnicity. Upper division course with preference given to upperclassmen. Prerequisite: Human Biology Core or Biology Foundations.
Same as: AFRICAAM 132, CSRE 122S

HUMBIO 123E. Health Economics & Policy: exploring health disparities, child health & health care spending. 4 Units.
This course addresses issues related to population health, health care, and health policy using tools from empirical and theoretical economics. We will study topics such as the demand for health care, socioeconomic disparities in population health outcomes, health insurance design, the role of competition in health care markets, determinants of health care spending, technological change in the health care sector, and pharmaceuticals and the opioid crisis. Throughout the course, we will learn about research methodology that will help us to distinguish correlation from causation, and think critically about the role of the government and public policy. The course will feature concepts from microeconomic theory, statistics, and econometrics. Prerequisites: Human Biology Core or equivalent, and statistics requirements.

HUMBIO 124C. Global Child Health. 3-5 Units.
(HUMBIO students must enroll in HUMBIO 124C. Med/Graduate students must enroll in MED 124 or PEDS 124.) This course introduces students to key challenges to the health and well being of children worldwide. We explicitly focus on child and public health problems in low- and middle-income countries (LMIC) to reflect the global burden of disease among children. We will review the scope and magnitude of the leading causes of morbidity and mortality, as well as examine regional variations. We will then identify both medical and non-medical causes, effects of, as well as interventions to address, some of the biggest child health problems. The course will also prevent an overview of the role of culture, gender, and non-state actors (NGOs, foundations, etc.) on health and health policy. Optional: The course will be taught in conjunction with an optional two-unit community engaged learning component. Please view the course syllabus for more information. Upper division course with preference given to upperclassmen. Prerequisites: Human Biology Core or equivalent or Biology Foundations.
Same as: MED 124, PEDS 124

HUMBIO 125. Current Topics and Controversies in Women's Health. 2-3 Units.
(HUMBIO students must enroll in HUMBIO 125. PhD minor in FGSS must enroll in FEMGEN 256. Med students must enroll in OBGYN 256.) Interdisciplinary. Focus is primarily on the U.S., with selected global women's health topics. Topics include: leading causes of morbidity and mortality across the life course; reproductive (e.g. gynecologic & obstetric) health issues; sexual function; importance of lifestyle (e.g. diet, exercise, weight control), including eating disorders; mental health; sexual and relationship abuse; issues for special populations. In-class Student Debates on key controversies in women's health. Guest lecturers. Undergraduates must enroll for 3 units. PhD minor in FGSS should enroll for 2 - 3 units. Med students should enroll for 2 units. To receive a letter grade in any listing, students must enroll for 3 units. This course must be taken for a letter grade and a minimum of 3 units to be eligible for Ways credit. Enrollment limited to students with sophomore academic standing or above. Undergraduate prerequisite: Human Biology Core or Biology Foundations or equivalent or consent of instructor.
Same as: FEMGEN 256, OBGYN 256

HUMBIO 126. Promoting Health Over the Life Course: the Science of Healthy Living. 3 Units.
(HUMBIO students must enroll in HUMBIO 126. Med/Graduate students must enroll in CHPR 226.) Disease prevention and health promotion topics pertinent at different stages of the life span emphasizing healthy lifestyle and reducing risk factors in both individuals and communities. Focus is on the application of behavioral science to risk reduction strategies, and the importance of health promotion as a social and economic imperative. Public and community health are emphasized. Topics include: epidemiology of chronic diseases; social determinants of health, behavior change; physical activity, nutrition, obesity and stress reduction; children, young adult, mid-life and aging health issues; health care delivery and public health system; workplace wellness; and other additional issues. Students enrolled in CHPR 226 for a letter grade must complete additional assignments appropriate for its Masters level listing. Enrollment limited to students with sophomore academic standing or above. Undergraduate prerequisites: Human Biology Core or equivalent or consent of instructor.
Same as: CHPR 226

HUMBIO 128. Community Health Psychology. 4 Units.
Social ecological perspective on health emphasizing how individual health behavior is shaped by social forces. Topics include: biobehavioral factors in health; health behavior change; community health promotion; and psychological aspects of illness, patient care, and chronic disease management. Prerequisites: HUMBIO 3B or PSYCH 1 or equivalent.
Same as: PSYCH 101

HUMBIO 128D. Systems Design In Health. 3 Units.
Good health doesn't begin the minute someone walks into a doctor's office; it begins in the places where we live, learn, work, and play. The products, services, and environments that we encounter everyday have a tremendous impact on our health. Taking a systems design-led approach developed at IDEO, we will explore public health in the context of culture, business, and design. The course will encourage students to integrate their personal perspectives with a systems-level view, paying particular attention to health equity and the role of creative leadership. Assignments will be a blend of reading and design exercises.

HUMBIO 129S. Global Public Health. 3 Units.
The class is an introduction to the fields of international public health and global medicine. It focuses on resource poor areas of the world and explores major global health problems and their relation to policy, economic development, culture and human rights. We discuss technical solutions as well as the importance of the social determinants of health, and emphasize multi-sectoral approaches to care. The course is intended to challenge all students to think globally, and is geared for students interested in exploring how their major interests cold be directed to solve global health issues. We provide opportunities for in-depth discussion and interaction with experts in the field. This course must be taken for a letter grade to be eligible for Ways credit.

HUMBIO 129W. Health Care Systems Around the World. 4 Units.
This course will explore the role of health care systems in societies around the world, identifying the common challenges facing health care systems and how different institutional structures in different countries perform in response to these challenges. We will structure the course around general conceptual frameworks related to key health system institutions (including financing, insurance, provider payment, patient cost-sharing, and the regulation of medical technology). From this foundation, we will draw on the experience of individual countries (high and low income, with heavy chronic disease and infectious disease burdens) to illustrate the function of these institutions under real-world circumstances observed around the globe. Prerequisite: Human Biology Core or Biology Foundations or equivalent or consent of instructor.
Same as: MED 129

HUMBIO 130. Human Nutrition. 4 Units.
(HUMBIO students must enroll in HUMBIO 130. CHPR master's students must enroll in CHRP 130.) The study of food, and the nutrients and substances therein. Their action, interaction, and balance in relation to health and disease. Emphasis is on the biological, chemical, and physiological processes by which humans ingest, digest, absorb, transport, utilize, and excrete food. Dietary composition and individual choices are discussed in relationship to the food supply, and to population and cultural, race, ethnic, religious, and social economic diversity. The relationships between nutrition and disease; ethnic diets; vegetarianism; nutritional deficiencies; nutritional supplementation; phytochemicals. CHPR master's students must enroll for a letter grade. Enrollment limited to students with sophomore academic standing or above. Prerequisites: Human Biology Core or Biology Foundations or consent of instructor.
Same as: CHPR 130

HUMBIO 131. Kinesiology. 4 Units.
This course covers the basic principles governing human movement with an emphasis on sports applications. The course spends roughly equal amounts of time on the applied anatomy and biology, meaning both the large and small-scale body structure and function. The applied anatomy portion includes body structure (the muscles and their connections) and mechanics (e.g. forces, torque, momentum and power), which together describe macroscopic movement. The applied biology portion includes the molecular and cellular basis of movement, mainly muscle contraction, nerve signaling, and the mechanisms of exercise damage, cramping, muscle memory, delayed-onset muscle soreness, and fatigue. nEnrollment limited to students with sophomore academic standing or above. Prerequisites: Human Biology Core or Biology Foundations or equivalent or consent of instructor.

HUMBIO 133. Human Physiology. 4 Units.
Human physiology will be examined by organ systems: cardiovascular, respiratory, renal, gastrointestinal and endocrine. Molecular and cell biology and signaling principles that underlie organ development, pathophysiology and opportunities for regenerative medicine are discussed, as well as integrative control mechanisms and fetal development. Prerequisite: Human Biology core or Biology Foundations or equivalent or consent of instructor.
Same as: BIO 112

HUMBIO 135. Exercise Physiology. 4 Units.
Explore the amazing capacity of your body to move and adapt within your everyday world. You will learn: how your body systems respond to the stress of acute exercise and adapt to chronic exercise training, how your cardiovascular system adapts to optimize oxygen delivery and utilization, how your muscles generate force and hypertrophy in response to training, and how your metabolic/biochemical pathways are regulated to support the increased energy demand of exercise. We will discuss theories on the causes of fatigue and muscle soreness, and on what limits human performance. Applied topics such as the effects of aging, gender, and environmental conditions (high altitude, heat, cold, microgravity) on your body will be emphasized in the second half of the course. Portions of the class will be taught through videos that use online lectures and engaging stories to illustrate physiology concepts. Enrollment limited to students with sophomore academic standing or above. Prerequisites: Human Biology core or Biology Foundations or equivalent, or consent of instructor.

HUMBIO 135S. Body Hacking: Applied Topics in Exercise Physiology. 3 Units.
Our increasing understanding of exercise physiology and biochemistry provide new insights into how we can "hack" the human body to increase the response to exercise training and improve human performance and health. In this discussion based course, we will explore research and training interventions that try to capitalize on this new knowledge. Science communication will also be emphasized in the class, so students will learn the fundamentals of science storytelling and mixed media presentation of ideas. Requirements of this class include participating in blogs & in-class discussions, evaluating physiology research, writing a research paper, and creating a science-based story by video or podcast to share with the class. If class is full, contact instructor for an application. Enrollment limited to 10. Prerequisites: B+ or higher in HUMBIO 135 and/or consent of instructor.

HUMBIO 139S. Sport and Exercise Medicine. 3 Units.
This is an upper division course with a common theme of injury as well as injury prevention in sport and physical activity. The topics include the treatment and evaluation of common sports injuries and illnesses for both musculoskeletal and non-musculoskeletal/medical conditions. Students will also develop critical reading and thinking skills. Classes will incorporate didactic lectures, critical analysis of sports medicine literature, as well as hand-on labs incorporating current sports medicine injury evaluation tools. Enrollment limited to students with sophomore academic standing or above. Prerequisite: Human Biology Core or Biology Foundations or equivalent or consent of instructor.

HUMBIO 140. Sex and Gender in Human Physiology and Disease. 2-3 Units.
(HUMBIO students must enroll in HUMBIO 140. PhD minor in FGSS must enroll in FEMGEN 241. Med students must enroll in MED 240.) Chromosomal, hormonal and environmental influences that lead to male and female and intersex reproductive anatomy and physiology and neuroendocrine regulation. Masculinizing and feminizing effects of endogenous and exogenous sex hormones and sociocultural factors, in particular gender identity, (social) gender norms and relationships, on the musculoskeletal, neurological, cardiovascular, immunological and other systems and tissues, e.g. adipose, skin, etc. over the lifecourse, from conception to puberty, through reproductive phases (including changes during the menstrual cycle and pregnancy up to and beyond menopause in women, and with aging in both sexes). Transgender health issues. Guest lecturers. Enrollment limited to students with sophomore academic standing or above. Prerequisites: Human Biology Core or Biology Foundations or equivalent, or consent of instructor.
Same as: FEMGEN 241, MED 240

HUMBIO 142. Adolescent Development. 4 Units.
Underlying changes and their consequences in everyday functioning. Physical, cognitive, social, and sexual development; how these changes influence the emerging sense of identity, autonomy, and intimacy. Contexts in which adolescents move such as family, friends and peers, school, and workplace. Focus is on normal development of boys and girls; attention to problem outcomes including eating disorders, depression, and teen pregnancy. Prerequisites: HUMBIO 4B or PSYCH 1 or consent of instructor.

HUMBIO 142M. Special Topics in Adolescent Mental Health. 4 Units.
Includes the study of aspects of common disorders seen in adolescent populations, such as prevalence, developmental course, gender differences, theoretical explanations, and therapeutic interventions. Topics will include mood/anxiety disorders, eating disorders, learning disabilities and ADHD, sexual risk behaviors, developmental disorders, substance abuse, and self-harm. Goals of this course include getting students to think critically about the unique mental health needs of adolescents, collaborating on devising ways to improve the way our society meets those needs, and strengthening writing and communication skills applicable to this area of inquiry. Enrollment limited to students with sophomore academic standing or above. Prerequisites: Human Biology Core or Biology Foundations or equivalent or consent of instructor.
Same as: PSYCH 142A

HUMBIO 143. Adolescent Sexuality. 4 Units.
Developmental perspective. Issues related to scientific, historical, and cultural perceptions; social influences on sexual development; sexual risk; and the limitations and future directions of research. Sexual identity and behavior, sexually transmitted diseases including HIV, pregnancy, abortion, gay and lesbian youth, sex education and condom availability in schools, mass media, exploitative sexual activity, and difficulties and limitations in studying adolescent sexuality. Legal and policy issues, gender differences, and international and historical trends. Prerequisites: Human Biology core or Biology Foundations or equivalent, or consent of instructor.

HUMBIO 144. Boys' Psychosocial Development. 4 Units.
Focuses on early childhood through young adulthood. Examines boys' lives and experiences as embedded within interpersonal relationships as well as social and cultural contexts. Includes perspectives from psychology, sociology, gender studies, and education. Upper division course with preference given to upperclassmen nPrerequisites: Human Biology Core or Developmental Psychology Biology Foundations or consent of instructor.

HUMBIO 146. Culture and Madness: Anthropological and Psychiatric Approaches to Mental Illness. 3-5 Units.
Unusual mental phenomena have existed throughout history and across cultures. Taught by an anthropologist and psychiatrist, this course explores how different societies construct the notions of "madness": What are the boundaries between "normal" and "abnormal", reason and unreason, mind and body, diversity and disease? Optional: The course will be taught in conjunction with an optional two-unit discussion section.
Same as: ANTHRO 186, ANTHRO 286, PSYC 286

HUMBIO 149. Psychological and Educational Resilience Among Children and Youth. 4-5 Units.
Theoretical, methodological, and empirical issues pertaining to the psychological and educational resilience of children and adolescents. Overview of the resilience framework, including current terminology and conceptual and measurement issues. Adaptive systems that enable some children to achieve successful adaptation despite high levels of adversity exposure. How resilience can be studied across multiple levels of analysis, ranging from cell to society. Individual, family, school, and community risk and protective factors that influence children's development and adaptation. Intervention programs designed to foster resilient adaptation in disadvantaged children's populations.
Same as: EDUC 256

HUMBIO 149L. Longevity. 4 Units.
Interdisciplinary. Challenges to and solutions for the young from increased human life expectancy: health care, financial markets, families, work, and politics. Guest lectures from engineers, economists, geneticists, and physiologists.
Same as: NENS 202, PSYCH 102

HUMBIO 151R. Biology, Health and Big Data. 3 Units.
We are living in the midst of a revolution in the accessibility and availability of biological and medical data. How can all this data be used to improve human health? In this course, students will look at case studies from diabetes and cancer research to learn how to access publicly available data ranging from gene or protein level datasets to information about clinical trials. Students will apply what they learn from the case studies to develop a research proposal and presentation on a biology-related topic of their choice. The class will have a small group workshop-type format. Students will gain skills in research methods including accessing, analyzing and presenting data. There will be exercises using the R programming language. Prior programming experience is not required. nPrerequisites: HUMBIO 2A and HUMBIO 3A or BIO 82 and BIO 83 or consent of instructor.

HUMBIO 153. Parasites and Pestilence: Infectious Public Health Challenges. 4 Units.
We will learn about parasitic and other pestilence of public health importance and how they affect billions of people worldwide. We examine the pathogenesis, clinical syndromes, complex life cycles, and the interplay among environment, vectors, hosts, and reservoirs; we explore historical contexts as it informs current interventions and programming against disease. Public health policy initiatives aimed at halting disease transmission are viewed critically through the lens of researchers, public health level initiatives, popular media (TV and movies) and individual patients with these diseases. There will be guest visitors who have experienced these diseases and we will hear from several researchers and experts working on the challenges of controlling, eliminating or even eradicating these diseases. We will become familiar with the targeted diseases of the World Health Organization tropical disease research list, including river blindness, sleeping sickness, leishmaniasis, schistosomiasis, mycobacterial disease (tuberculosis and leprosy), malaria, toxoplasmosis, dracunculiasis, and intestinal helminthes. There will be a lab section for "hands on" learning and viewing of parasites. Interactive sessions will involve teaching each other about these biological forces of nature that invade humans. Prerequisites: Human Biology Core or Biology Foundations or equivalent or consent of instructor.

HUMBIO 154B. Principles of Epidemiology. 3 Units.
Epidemiology is the study of the distribution and determinants of health and disease in human populations. In this course, students will learn about design, measures of disease occurrence and measures of association between exposures - be they environmental, behavioral or genetic - and health outcomes of interest. Students will also learn about how error, confounding and bias can impact epidemiological results. The course draws on both classic and contemporary research articles, which students will learn to critically appraise. Through lectures, problem sets, written responses to original articles and in-class discussions, students will gain a solid foundation in epidemiology. HUMBIO 154 courses can be taken separately or as a series. Upper division course with preference given to upperclassmen. Prerequisites: Human Biology Core or Biology Foundations or consent of instructor.

HUMBIO 154C. Cancer Epidemiology. 4 Units.
Clinical epidemiological methods relevant to human research in cancer will be the focus. The concepts of risk; case control, cohort, and cross-sectional studies; clinical trials; bias; confounding; interaction; screening; and causal inference will be introduced and applied. Social, political, economic, and ethical controversies surrounding cancer screening, prevention, and research will be considered. HUMBIO 154 courses can be taken separately or as a series. Enrollment limited to students with sophomore academic standing or above. Prerequisites: Human Biology core or Biology Foundations or equivalent, or instructor consent.

HUMBIO 154D. Models for Understanding and Controlling Global Infectious Diseases. 3-4 Units.
(HUMBIO students must enroll in HUMBIO 154D. Med/Graduate students must enroll in HRP 204.) This course introduces students to the dynamics of infectious diseases of global health importance, focusing on the use of mathematical models to characterize their transmission in populations. Relevant case examples of pathogens with differing natural history and transmission routes include tuberculosis, HIV, malaria, typhoid, and cholera, as well emerging infectious diseases such as Ebola and the 2019 novel coronavirus. Lectures will emphasize the theoretical basis underlying infectious disease dynamics and link them to in-class workshops and problem sets that will emphasize public health applications and will provide students with hands-on experience in creating and coding models. Students will learn the mathematical underpinnings of key topics in infectious disease transmission including herd immunity, the basic reproductive number, vaccine effects, social contact structure, host heterogeneities, and pathogen fitness. The course will teach students how to approach new questions in infectious disease transmission, from model selection, tradeoffs in model complexity or parsimony, parameterization, sensitivity and uncertainty analyses. Students will practice building models, evaluating the influence of model parameters, making predictions about disease trajectories, and projecting the impact of public health interventions. Prerequisites: HUMBIO 88 or 89 or STATS 141 or BIOSCI 141.
Same as: HRP 204

HUMBIO 158. Building Blocks for Chronic Disease. 3 Units.
Researchers have come a long way in developing therapies for chronic disease but a gap remains between current solutions and the ability to address the disease in full. This course provides an overview to the underlying biology of many of these diseases and how they may connect to each other. A "think outside of the box" approach to drug discovery is needed to bridge such a gap in solutions, and this course teaches the building blocks for that approach. Could Legoland provide the answer? This is a guest lecture series with original contributions from prominent thought leaders in academia and industry. Interaction between students and guest lecturers is expected. Students with a major, minor or coterm in Biology: 109A/209A or 109B/209B may count toward degree program but not both.
Same as: BIO 109A, BIOC 109A, BIOC 209A

HUMBIO 159. Genes and Environment in Disease Causation: Implications for Medicine and Public Health. 2-3 Units.
(Formerly HRP 238) The historical, contemporary, and future research and practice among genetics, epidemiology, clinical medicine, and public health as a source of insight for medicine and public health. Genetic and environmental contributions to multifactorial diseases; multidisciplinary approach to enhancing detection and diagnosis. The impact of the Human Genome Project on analysis of cardiovascular and neurological diseases, and cancer. Ethical and social issues in the use of genetic information. This course must be taken for a minimum of 3 units and a letter grade to be eligible for Ways credit. Prerequisites:Human Biology core or Biology Foundations or consent of instructor.
Same as: EPI 238

HUMBIO 160. Human Behavioral Biology. 5 Units.
Multidisciplinary. How to approach complex normal and abnormal behaviors through biology. How to integrate disciplines including sociobiology, ethology, neuroscience, and endocrinology to examine behaviors such as aggression, sexual behavior, language use, and mental illness.
Same as: BIO 150

HUMBIO 161. The Neurobiology of Sleep. 4 Units.
The neurochemistry and neurophysiology of changes in brain activity and conscious awareness associated with changes in the sleep/wake state. Behavioral and neurobiological phenomena including sleep regulation, sleep homeostasis, circadian rhythms, sleep disorders, sleep function, and the molecular biology of sleep. nnPreference to seniors and graduate students. nnEnrollment limited to 16.
Same as: BIO 149, BIO 249

HUMBIO 162L. The Literature of Psychosis. 3-5 Units.
One of the great gifts of literature is its ability to give us insight into the internal worlds of others. This is particularly true of that state clinicians call "psychosis." But psychosis is a complex concept. It can be terrifying and devastating for patients and families, and yet shares characteristics with other, less pathological states, such as mysticism and creativity. How then can we begin to make sense of it? In this course, we will examine the first-hand experience of psychosis. We will approach it from multiple perspectives, including clinical descriptions, works of art, and texts by writers ranging from Shakespeare, to the science fiction writer Philip K. Dick, to patients attempting to describe their experience. This class is not only for students thinking of careers in medicine, psychology or anthropology, but also readers and writers interested exploring extraordinary texts. There are no prerequisites necessary; all that is needed is a love of language and a curiosity about the secrets of other minds.
Same as: ANTHRO 82P, PSYC 82, PSYC 282

HUMBIO 163. The Opioid Epidemic: Using Neuroscience to Inform Policy and Law. 3 Units.
The opioid epidemic has become a national problem, killing 115 people per day in the United States, and contributing to the first decrease in life expectancy in this country for decades.This is an upper division undergraduate class that aims to help students understand the science of opiates, how opioid prescribing and availability led us to be in this place, and how that information might be used to create effective policy to reverse it. Students will engage didactic work and interactive discussions to stimulate critical thinking at the interface between psychology, psychiatry, addiction medicine, neuroscience, communication, law, and society. They will develop the knowledge-base and framework to critically evaluate the science behind opioid addiction and how to apply this knowledge to address the addiction epidemic. This highly interactive seminar aims to engage the students in critical thinking didactics, activities and discussions that shape their understanding of the complexity inherent to the issues surrounding addiction and increase the student's ability to more critically assimilate and interrogate information. Preference will be given to upperclassmen, especially in the HumBio program. Attendance at first class is mandatory. Enrollment limited to 20 by application only. Applications will be accepted on Sunday, February 28th at midnight, consistent with the Spring Quarter enrollment. Applications will be due on Friday, March 5th at 5:00PM. Applications will be considered in the order received. Apply here: https://app.smartsheet.com/b/form/615264add6dc475da6da583f9a41a4b0. Prerequisites: Human Biology Core or PSYC 83 or consent of instructor.

HUMBIO 164. Autism Spectrum Disorder. 3 Units.
Deficits in social communication and interaction and repetitive behaviors are the core symptoms of Autism Spectrum Disorder (ASD), a neurodevelopmental disorder that affects about 1% of all children and costs society an estimated $268B annually. This interactive seminar course will provide an overview of our understanding of ASD, from genetics through epidemiology, biology and treatment, and the many implications for society, including the principles and problems of diagnosis, its impact upon family and across the lifespan, and controversies regarding its etiology, perception and care. Preference will be given to upperclassmen, especially in the Human Biology program. Attendance at first class is mandatory. Enrollment is limited to 18 students by application only. Applications will be accepted on Tuesday, September 1st at midnight, consistent with the Autumn Quarter enrollment. Application is closed. Prerequisites: Human Biology core or BIO 82 and BIO 84 or consent of instructor.

HUMBIO 166. Food and Society: Exploring Eating Behaviors in Social, Environmental, and Policy Context. 4 Units.
(HUMBIO students must enroll in HUMBIO 166. Med/Graduate students must enroll in CHRP 166.) The material in this course is an introduction to the field and the target audience is undergraduates. It may be of interest to graduate students unfamiliar with the field. The class examines the array of forces that affect the foods human beings eat, and when, where, and how we eat them, including human labor, agriculture, environmental sustainability, politics, animal rights/welfare, ethics, policy, culture, economics, business, law, trade, and ideology, and psychology. The class addresses the impact of current policies and actions that might be taken to improve human nutrition and health; macro-scale influences on food, nutrition, and eating behavior. Enrollment limited to students with sophomore academic standing or above. Undergraduate Prerequisites: Human Biology Core or Biology Foundations or consent of instructor.
Same as: CHPR 166

HUMBIO 168. Multidisciplinary Perspectives on Guilt. 3 Units.
The seminar encompasses the personal and cultural components of guilt from multidisciplinary perspectives. At the individual level, it explores behaviors that induce guilt; their relational aspects; genesis in evolutionary and developmental terms: and its normal and pathological manifestations. The cultural section includes cross-cultural perspectives on guilt and its conceptions in Christianity, Judaism, Islam, Hinduism, Buddhism, and Confucianism; as well as in the philosophy of Aristotle, Kant, J. S Mill and Nietzsche, and culpability in the law. Derived from this material, the course will also focus on the nature of ethical reasoning and the ways we make ethical choices and judgments in our lives. Upper division course with preference given to upperclassmen.

HUMBIO 171. The Death Penalty: Human Biology, Law, and Policy. 3 Units.
Combines academic study with student participation in forensic research and case investigation, including DNA evidence, psychological and physiological development, mental and physical disabilities, and witness interviews. The philosophy, structure, and application of capital punishment in the U.S. Goal is to examine and challenge the issues involved in the death penalty from the perspective of involvement in a real case. Course not taught from a preconceived belief or political or philosophical agenda except to involve students in an intellectual challenge of policy and philosophy. Upper division course with preference given to upperclassmen.

HUMBIO 172B. Children, Youth, and the Law. 3 Units.
How the legal rights of children and adolescents in America are defined, protected, and enforced through the legal process within the context of their developmental needs and competing societal interests. Topics: origins and definitions of children's rights; adoption; custody; the juvenile justice system; education; freedom of speech; and sex. The class is interactive, using hypotheticals for discussion and analysis. A and B alternate; students may take one or both. Upper division course with preference given to upperclassmen.
Same as: PUBLPOL 172

HUMBIO 174. Foundations of Bioethics. 3 Units.
Classic articles, legal cases, and foundational concepts. Theoretical approaches derived from philosophy. The ethics of medicine and research on human subjects, assisted reproductive technologies, genetics, cloning, and stem cell research. Ethical issues at the end of life. Upper division course with preference given to upperclassmen.

HUMBIO 174A. Ethics in a Human Life. 4 Units.
Ethical questions pervade a human life from before a person is conceived until after she dies, and at every point in between. This course raises a series of ethical questions, following along the path of a person's life - questions that arise before, during, and after she lives it. We will explore distinctive questions that a life presents at each of several familiar stages: prior to birth, childhood, adulthood, death, and even beyond. We will consider how some philosophers have tried to answer these questions, and we will think about how answering them might help us form a better understanding of the ethical shape of a human life as a whole.
Same as: ETHICSOC 174, PHIL 74A

HUMBIO 176A. Medical Anthropology. 5 Units.
Emphasis is on how health, illness, and healing are understood, experienced, and constructed in social, cultural, and historical contexts. Topics: biopower and body politics, gender and reproductive technologies, illness experiences, medical diversity and social suffering, and the interface between medicine and science.
Same as: ANTHRO 82, ANTHRO 282

HUMBIO 177. Disability Literature. 3-5 Units.
This course explores literary and filmic narratives about disability in the Global South. Authors including Edwidge Danticat, Bapsi Sidhwa, and Ricardo Padilla highlight the unique aesthetic potential of what Michael Davidson calls the defamiliar body and Ato Quayson describes as aesthetic nervousness. While engaging universal issues of disability stigma, they also emphasize the specific geopolitics of disability and how people in the Global South face greater rates of impairment based on unequal exposure to embodied risk. The course particularly welcomes students with interests in fields of medicine, policy, or public health.

HUMBIO 178A. Intro to Disability Studies: Disability and Technology. 5 Units.
For a long time, disability studies has focused on the past, early representations of people with disabilities and histories of the movement for disability rights. This course turns toward the future, looking at activism and speculative fiction as critical vehicles for change. Drawing on fiction by Samuel Beckett, Muriel Rukeyser, and Octavia Butler, this course will address the question of the future through an interrogation of the relationship between disability and technology, including assistive technology, genetic testing, organ transplantation.

HUMBIO 179B. Music and Healing. 3 Units.
To what extent can sound or music heal? This interdisciplinary course asks questions about music and healing around the world, drawing on the fields of medical ethnomusicology, medical anthropology, sound studies, and music therapy. Our case studies will be multi-sited, as we interrogate sound-based healings and healing sounds from diverse cross-cultural, global, and historic perspectives. No musical background is needed to interrogate these issues. We begin with the knowledge that the social, cultural, and political contexts where definitions of music and healing are created inform sound and its various and often conflicting interpretations and meanings.
Same as: MUSIC 39B

HUMBIO 180. Human Skeletal Anatomy. 5 Units.
Study of the human skeleton (a. k. a. human osteology), as it bears on other disciplines, including medicine, forensics, archaeology, and paleoanthropology (human evolution). Basic bone biology, anatomy, and development, emphasizing hands-on examination and identification of human skeletal parts, their implications for determining an individual's age, sex, geographic origin, and health status, and for the evolutionary history of our species. Three hours of lecture and at least three hours of supervised and independent study in the lab each week.
Same as: ANTHRO 175, ANTHRO 275, BIO 174, BIO 274

HUMBIO 191. Human Biology Practicum. 1 Unit.
Restricted to Human Biology majors. For students who have undertaken supervised community-engaged service, research (e.g. HB-REX, Bio-X) or pre-professional experiences related to their Area of Concentration topic. Includes a series of six required elements done throughout Junior and Senior year. Enroll for 1 unit during your final undergraduate quarter, typically Senior Spring; contact Capstone Coordinator for exceptions. Satisfies the Capstone Requirement of the major.

HUMBIO 192A. Human Biology Synthesis. 2-3 Units.
Capstone course series for HUMBIO seniors. Expands the work of the student's Area of Concentration. The Synthesis allows students the opportunity to craft a culminating, creative work of scholarship based on a synthesis of personal and academic interests, including service projects. Students should begin their synthesis either in the third quarter of Junior year or the first quarter of Senior year.nParticipation in the HUMBIO Senior Symposium during Spring quarter is required. nStudents should enroll in either 3 units for two quarters or 2 units for three quarters. Prerequisite: acceptance into the synthesis program: https://humanbiology.stanford.edu/capstone/synthesis. Notes: Contact Samantha Cooper for Department Consent.

HUMBIO 192S. Human Biology Synthesis. 1-3 Unit.
Capstone course series for HUMBIO seniors. Expands the work of the student's Area of Concentration. The Synthesis allows students the opportunity to craft a culminating, creative work of scholarship based on a synthesis of personal and academic interests, including service projects. Students should begin their synthesis either in the third quarter of Junior year or the first quarter of Senior year.nParticipation in the HUMBIO Senior Symposium during Spring quarter is required.nStudents should enroll in either 3 units for two quarters or 2 units for three quarters. nPrerequisite: acceptance into the synthesis program: https://humanbiology.stanford.edu/capstone/synthesis. Notes: Contact Samantha Cooper for Department Consent.

HUMBIO 192W. Human Biology Synthesis. 2-3 Units.
Capstone course series for HUMBIO seniors. Expands the work of the student's Area of Concentration. The Synthesis allows students the opportunity to craft a culminating, creative work of scholarship based on a synthesis of personal and academic interests, including service projects. Students should begin their synthesis either in the third quarter of Junior year or the first quarter of Senior year. nParticipation in the HUMBIO Senior Symposium during Spring quarter is required. nStudents should enroll in either 3 units for two quarters or 2 units for three quarters.nPrerequisite: acceptance into the synthesis program: https://humanbiology.stanford.edu/capstone/synthesis. Notes: Contact Samantha Cooper for Department Consent.

HUMBIO 193. Research in Human Biology. 1-5 Unit.
Independent research conducted under faculty supervision, in junior or senior year, normally but not necessarily in pursuit of an honors project. May be taken for a maximum 3 quarters of credit. Prerequisite: Faculty approval; application available in student services office.

HUMBIO 194. Honors. 1-10 Unit.
Restricted to Human Biology majors. Completion of the honors project, normally taken in the student's final quarter. First component: the honors thesis, a final paper providing evidence of rigorous research, fully referenced, and written in an accepted scientific style. Second component: participation in the honors symposium, including a 10-minute oral presentation followed by a brief question and answer session. Prerequisites: HUMBIO 193 or HUMBIO 199 and acceptance into the honors program.

HUMBIO 197. Human Biology Internship. 1-4 Unit.
Limited to and required of Human Biology majors. A supervised field, community, or lab experience of student's choosing, pre-approved by Human Biology faculty and student advisers, and initiated at least three quarters prior to graduation. Participation in a poster session on the internship experience is required during the first quarter that the student is in residence at Stanford after completion of the internship. May be repeated for credit and a total of 4 units accumulatively. Prerequisites: Human Biology core.

HUMBIO 198. Senior Tutorial in Human Biology. 1-5 Unit.
Reading for Human Biology majors in exceptional circumstances and under sponsorship of Human Biology associated faculty. Students must apply through Human Biology student services before registering. Reading list, paper, and evaluation required. May be repeated for credit.

HUMBIO 199. Directed Reading/Special Projects. 1-4 Unit.
Human Biology majors must obtain a sponsor from the Human Biology associated faculty or the Academic Council. Non-majors and students who have not declared must obtain a sponsor only from the Human Biology associated faculty. Students must complete application in Student Services Office.

HUMBIO 200. Teaching of Human Biology. 1-5 Unit.
For upper division undergraduates and graduate students. Practical experience in teaching Human Biology or serving as an assistant in a lecture course. May be repeated for credit.

HUMAN RIGHTS

Courses offered by the Center for Human Rights and International Justice are listed under the subject code HUMRTS (https://explorecourses.stanford.edu/search/?view=catalog&academicYear=&q=HUMRTS&filter-departmentcode-HUMRTS=on&filter-coursestatus-Active=on&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&page=0) on the Stanford Bulletin's ExploreCourses web site.

The Center equips a new generation of leaders with the knowledge and skills necessary to protect and promote human rights and dignity for all. Reflecting a deep commitment to international justice and the rule of law, the Center collaborates with partners across Stanford University and beyond on innovative programs that foster critical inquiry in the classroom and in the world. Working within the School of Humanities and Sciences, the Center supports academic and professional development opportunities for undergraduates and graduate students interested in pursuing work in human rights or international justice. The Center offers career and academic advising, research opportunities, campus events, and student fellowship funding.

The Center also invites student participation in a diverse portfolio of well-established international programs. These include innovative human rights-related digital archival resource development efforts, justice-sector capacity-building programs, community-engaged learning initiatives, and international criminal trial monitoring opportunities. The Center is part of the Stanford Global Studies Division, in the School of Humanities and Sciences

The interdisciplinary minor in Human Rights ensures students receive mentorship from experienced human rights scholars and practitioners, while lending academic rigor to the scholastic experience of the undergraduates who choose this path. The minor provides structure to diverse academic offerings on human rights-related topics, encouraging students from across the University to understand how human rights are interconnected across seemingly disparate disciplines.

The Human Rights minor is open to students in any major.

To declare the Human Rights minor, students must:

1. Register your interest in the minor by completing this form (https://airtable.com/shr2fgFTQW3rvRZ0m/). This ensures that you receive all relevant communications.
2. Download and complete the minor in Human Rights course planning worksheet (http://stanford.box.com/s/g2d56gslhgjcjsvto1vbh6qbe4us0fq7/).
3. Email the completed form to Senior Program Manager Jessie Brunner (jbrunner@stanford.edu) and schedule a time to review your preliminary course plan, preferably during office hours.
4. Once the plan is approved, students can declare the minor in Axess (https://axess.stanford.edu/).

Requirements

1. Completion of a minimum of 25 units of Human Rights-related course work. Students may not double-count courses for completing major and minor requirements.
2. Gateway: HUMRTS 101 Cross-Disciplinary Perspectives on Human Rights Theory and Practice (4 units)
3. At least one course across each of three streams:
   a. Foundations
   b. Contemporary issues
   c. Practice
4. Capstone: HUMRTS 199 Capstone Project: Human Rights Minor (1-5 units)
   a. Under the supervision of an approved faculty member, students propose and complete a 3-5 unit capstone project. This should either include:
      i. a 25-page research paper on a human rights topic approved by the supervising faculty; or
      ii. an alternative culminating work requiring equivalent effort such as an original short film produced by the student, an annotated digital human rights database, a curated exhibit, or a software application designed to address human rights challenges, approved in advance by the supervising faculty.
   b. Capstone should be completed no later than week 4 of the quarter in which the student applies to graduate.
5. At least 10 of the 25 units must be completed on Stanford's campus (see the "COVID-19 Policies (p. 1642)" tab for more information on this).
6. All courses to be counted toward the minor must be taken for a letter grade, except where letter grades are not offered, as required by University policy.
7. All students must maintain a GPA of no less than 3.0 in the classes counting toward the minor.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a "credit" or "no credit" grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a "credit" or "satisfactory" grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

The Center for Human Rights counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of undergraduate degree requirements that otherwise require a letter grade.

Other Undergraduate Policies

With regard to the policy that at least 10 of 25 units for the Minor must be taken on Stanford campus, Stanford courses taken virtually during the COVID-19 pandemic count toward the 10 unit minimum.

Director: David Cohen

Associate Director: Penelope Van Tuyl

Faculty Advisory Board: JP Daughton (History), Larry Diamond (Political Science), Dan Edelstein (Division of Literatures, Cultures, and Languages), James Fearon (Political Science), Frank Fukuyama (Political Science), Katherine Jolluck (History), Tanya Luhrmann (Anthropology), Anne Firth Murray (Feminist, Gender, and Sexuality Studies), Norman Naimark (History), Josh Ober (Classics and Philosophy), David Palumbo-Liu (English and Comparative Literature), Richard Roberts (History), Beth Van Schaack (Law), Jeremy Weinstein (Political Science), Paul Wise (Medicine), Christine Min Wotipka (Education).

Courses

HUMRTS 6W. Community-Engaged Learning Workshop on Human Trafficking - Part I. 3 Units.
Considers purpose, practice, and ethics of service learning. Provides training for students' work in community. Examines current scope of human trafficking in Bay Area, pressing concerns, capacity and obstacles to effectively address them. Students work with community partners dedicated to confronting human trafficking and problems it entails on a daily basis. Must currently be enrolled in or have previously taken History 5C/105C (FemGen 5C/105C, HumBio 178H, IR 105C, CSRE 5C/105C). (Cardinal Course certified by the Haas Center).
Same as: FEMGEN 6W, HISTORY 6W

HUMRTS 7W. Community-Engaged Learning Workshop on Human Trafficking - Part II. 3 Units.
Prerequisite: HISTORY6W (FEMGEN 6W). Continuation of HISTORY 6W (FEMGEN 6W). Students will continue working on their projects with their community partners. Several class meetings and small group consultations throughout the quarter. (Cardinal Course certified by the Haas Center).
Same as: FEMGEN 7W, HISTORY 7W

HUMRTS 101. Cross-Disciplinary Perspectives on Human Rights Theory and Practice. 4 Units.
In this survey human rights course, students will learn about the principal historical and philosophical bases for the modern concept of human rights, as well as the international legal frameworks meant to protect and promote these rights. Class sessions will include a mix of seminar discussions and guest lectures by distinguished Stanford faculty from departments across the university as well as practitioners from a variety of professional fields. The course seeks to illuminate for how the distinct methodologies, assumptions, and vocabulary of particular disciplinary communities affect the way scholars and practitioners trained in these fields approach, understand, and employ human rights concepts. This course fulfills the gateway course requirement for the minor in Human Rights.nnnPlease note that whether you enroll in the morning section or the afternoon section of the course, this class is scheduled to meet for 80 minutes at a time, twice a week (M/W). The morning section runs 10:30-11:50am. The afternoon section runs 3:00-4:20pm.

HUMRTS 103. Transitional Justice, Human Rights, and International Criminal Tribunals. 3-5 Units.
(Formerly IPS 280) Historical backdrop of the Nuremberg and Tokyo Tribunals. The creation and operation of the Yugoslav and Rwanda Tribunals (ICTY and ICTR). The development of hybrid tribunals in East Timor, Sierra Leone, and Cambodia, including evaluation of their success in addressing perceived shortcomings of the ICTY and ICTR. Examination of the role of the International Criminal Court and the extent to which it will succeed in supplanting all other ad hoc international justice mechanisms and fulfill its goals. Analysis focuses on the politics of creating such courts, their interaction with the states in which the conflicts took place, the process of establishing prosecutorial priorities, the body of law they have produced, and their effectiveness in addressing the needs of victims in post-conflict societies.
Same as: ETHICSOC 280, INTLPOL 280, INTNLREL 180A

HUMRTS 106. Human Rights in Comparative and Historical Perspective. 3-5 Units.
This course examines core human rights issues and concepts from a comparative and historical perspective. In the beginning part of the course we will focus on current debates about the universality of human rights norms, considering the foundation of the international human rights regime and claims that it is a product of western colonialism, imperialism, or hegemony. We will then discuss a series of issues where the debates about universality are particularly acute: gender inequality and discrimination, sexual violence, child marriage and forced marriage more generally, and other related topics. We will also consider the way in which issues of gender-based violence arise in the context of internal and international conflicts.
Same as: CLASSICS 116, ETHICSOC 106

HUMRTS 108. Advanced Spanish Service-Learning: Migration, Asylum, and Human Rights at the Border. 1-3 Unit.
This community engaged learning workshop is open only to students who are concurrently enrolled in SPANLANG 108SL. Through the HUMRTS 108 units, students will have the opportunity to apply their advanced Spanish language skills and knowledge from the class as remote volunteers with immigrant rights advocacy organizations.nnStudents will be trained to work remotely to staff a hotline through with they can help monitor detention conditions, report abuse, and request support on behalf of detainees and their loved ones. They will also have a commitment to work on more projects such as providing interpretations or translations for attorneys or mental/health professionals working remotely with detainees or their families, and/or conducting basic internet research regarding/compilation of news articles or government reports to substantiate asylum claims or fear of persecution. This course requires permission from the instructor to enroll. Please email instructor Vivian Brates vbrates@stanford.edu to get a link to the appropriate web form. Please note that this course must be taken for a minimum of 3 units and a letter grade to be eligible for Ways credit. In AY 2020-21, a letter grade or `CR¿ grade satisfies the Ways requirement.

HUMRTS 109. Slavery, human trafficking, and the moral order: ancient and modern. 3 Units.
Slavery and trafficking in persons in the Greco-Roman world were legal and ubiquitous; today slavery is illegal in most states and regarded as a grave violation of human rights and as a crime against humanity under international law. In recent trends, human trafficking has been re-conceptualized as a form of "modern day slavery. " Despite more than a century since the success of the abolition movement, slavery and trafficking continue in the 21st century on a global scale. The only book for the course is: Peter Garnsey, Ideas of Slavery from Aristotle to Augustine, Cambridge University Press.
Same as: CLASSICS 118, CLASSICS 218

HUMRTS 110. Global Women's Issues in Human Rights and Health. 4 Units.
This course provides an overview of international women's human rights issues presented in the context of a woman's life, beginning in infancy and childhood and moving through adolescence, reproductive years, and aging. The approach to women's human rights is broad, taking into account economic and social factors and particularly the importance of women's capacities to manage their lives in the face of societal pressures and obstacles. Attention will be given to critical issues, such as: discrimination against women; poverty; unequal access to the cash economy, education, food, and health care; and violence. Issues such as maternal mortality, sexually transmitted diseases, violence in the home and in conflict and refugee situations, unequal access to economic opportunity, and sex trafficking will be discussed, with particular emphasis on promising interventions relating to the issues.

HUMRTS 112. Human Trafficking: Historical, Legal, and Medical Perspectives. 5 Units.
(Same as HISTORY 5C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution, labor exploitation, and organ trade, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning. Required weekly 50-min. discussion section, time TBD. Students interested in service learning should consult with the instructor and will enroll in an additional course.
Same as: CSRE 105C, FEMGEN 105C, HISTORY 105C, INTNLREL 105C

HUMRTS 114. Human Rights Practice and Challenges in Southeast Asia: Issues, fieldwork, career paths. 3-5 Units.
This course aims to address student interest in the practice of human rights both from the individual perspective, particularly regarding a variety of professional career paths, as well as from institutional perspectives. Courses that focus on particular human rights issues or on the broad international legal framework of human rights are core components of a human rights curriculum. This course, on the other hand, is regionally focused, practice-oriented, and addresses the ways in which human rights initiatives and projects are designed, developed, funded, implemented, and evaluated by the various actors and institutions that make up the complex landscape of human rights work. We will have several guest speakers who have successfully followed different career paths in the UN, NGOs, academia, philanthropy, and development. They also reflect engagement in a number of key areas of human rights practice: gender based violence and gender discrimination; statelessness; freedom of religion and expression in an electronic age; justice sector reform and the rule of law; business and human rights; prosecution and accountability for war crimes, genocide, and crimes against humanity.nnnThe requirements for an effective practice-oriented course dictate that it be of limited geographical scope while at the same time having a regional, and to a lesser extent, a cross-regional perspective. Accordingly, the focus of this course will be on the 10 Southeast Asian nations that make up ASEAN as a region with its own legal and institutional human rights framework. We will also consider some of the ways in which ASEAN human rights issues are connected to its neighbors and, in this case, particularly to South Asia (Rohingya) and China (human trafficking and environmental issues). nnnThe course will be structured around the following 5 main segments:nn(1) Issues: Overview of human rights challenges in ASEAN: What are the most pressing issues (and to whom); how is the human rights agenda defined at the national and regional levels; how are priorities established; what are the obstacles to effective implementation of the agenda? nn(2) Players: The roles of national and regional institutions; national NGOs and human rights activists; national human rights commissions; governmental and regional bodies; international human rights organizations; the UN and its various engaged institutions (UNDP, UNODC, UNHCHR, UNHCR, Special Mandates, Human Rights Committee, etc.); national development agencies and embassies.nn(3) Initiatives and Projects: How are broad national and ASEAN human initiatives developed? How do they come to be incorporated into specific projects (research, training and capacity building, awareness raising and education, accountability, etc.)? How are such projects developed and by whom? How are they awarded, funded and implemented? What is the role of human rights philanthropy? How are such initiatives and projects evaluated? What determines the success or failure of such projects and according to whom? nn(4) Seeking accountability for human rights abuses: case studies on trafficking; gender based violence and discrimination; ethnic, religious, or political conflict and violence. nn(5) Human rights careers at the national, regional, and international levels.

HUMRTS 115. Business, Social Responsibility and Human Rights. 3 Units.
Large corporations now routinely spend millions of dollars to protect human rights and the environment. Shell Nigeria builds hospitals and schools in the Niger Delta. Nike employs hundreds of inspectors to improve conditions for the factory workers who produce its shoes across Asia and Latin America. Social media companies have faced scandals over user privacy, hate speech, and political manipulation. Other examples abound, across industries and around the globe. nnn"Don't be evil" (Google's one-time slogan) may be one motivation for these companies, but something more mundane is also at work: many companies believe they will do well, financially, if they do good, ethically. This course considers: nn-What does it mean for a company to "do good?" Should it care? nn-When does it serve a company¿s interest to take costly action to address human rights, labor, and environmental concerns? nn-What tactics have activists used to shift public opinion, media frames, and the law, and thereby change companies' incentives? nnnWe will learn through lectures, discussion, and occasional small group exercises. Several guest speakers with experience in business, advocacy, or in between will provide additional insights.

HUMRTS 116. International Criminal Law and Its Enforcement. 3 Units.
(LAW 5003) This course will introduce students to the law, institutions, and actors that constitute the system of international justice and to the political environment in which this system is situated. Readings will map the once and future international criminal law institutions, offer an elemental analysis of international crimes and forms of responsibility as they have evolved in international law, and focus on the challenges of pursuing criminal prosecutions for international crimes. Jurisprudence from the various international and domestic tribunals will be scrutinized with an emphasis on understanding the prosecution's burden, available defenses, and sources of proof. The course will also engage new and perennial debates about the suitability of using criminal justice mechanisms to respond to mass atrocity situations and consider alternatives from the domain of transitional justice. In addition to the substance of international criminal law, this course will also serve as an introduction to international legal reasoning, law-making, and institutional design.
Same as: INTLPOL 354

HUMRTS 117. International Human rights. 3 Units.
(LAW 5010) An introduction to the theory and practice of human rights. We will examine major sources of international human rights law---including treaties, customary international law, and national law---as well as the institutions in which human rights are contested, adjudicated, and enforced. Key sites of human rights activity include multilateral organizations, like the United Nations Security Council and Human Rights Council; international, regional, and national courts and tribunals; and quasi-judicial treaty bodies, like the U.N. Committee Against Torture. This degree of jurisdictional redundancy offers an opportunity to explore questions of institutional design and interaction as well as processes of normative diffusion. The course will also consider the role of non-state actors---including non-governmental organizations, corporations, terrorist organizations, and ordinary individuals---in promoting and violating human rights. In addition to this survey of the human rights ecosystem, the course will engage some of the fundamental theoretical debates underlying the international human rights project with a focus on perennial questions of legitimacy, justiciability, compliance, and efficacy. Finally, we will explore a range of threats and challenges to the promotion of human rights---both perennial and novel---including economic under-development, terrorism, national security over-reach, patriarchy, and racism. We will read case law originating from all over the world, including the United States. Special Instructions: Students have the option to write a long research paper in lieu of the final exam with consent of instructor. Elements used in grading: Class participation; exam or final long research paper. (Formerly Law 330).
Same as: INTLPOL 355

HUMRTS 194A. Environmental Justice Colloquium. 1 Unit.
This colloquium brings the voices and vision of leading Environmental Justice (EJ) advocates to the Stanford community, in order to educate, inspire, and transform our understanding of environmental science. Environmental Justice advances a positive vision for policies and actions that fight environmental racism. EJ approaches involve centering the voices and leadership of marginalized communities in 1) ensuring equitable access to environmental benefits, and 2) preventing or mitigating the disproportionate impacts of environmental harms for all communities, regardless of gender, class, race, ethnicity, or other social positions. This colloquium highlights the work of leading EJ thinkers and practitioners, speaking from frontline organizations on a wide range of topics. These topics include acting on toxic exposures and health disparities for community resilience, climate justice and youth action, Indigenous land and water rights, green cities and Afrofuturism, food justice and intersecting social movements, queer ecologies, and more. The colloquium will host a weekly speaker, and final symposium at the end of the quarter. nnThe first meeting for this course will take place during WEEK 3.
Same as: EARTHSYS 194A, URBANST 155A

HUMRTS 196. Environmental Justice and Human Rights Lab. 1 Unit.
The Environmental Justice and Human Rights Lab is an intellectual hub and supportive learning community for students engaging in environmental justice and human rights work of any kind. Environmental justice (EJ) advances a positive vision for policies and actions that fight environmental racism, and human rights (HR) center on the notion that all people, by virtue of their existence and regardless of any given status or classification, are equally entitled to fundamental rights and protections. Our semi-structured weekly sessions will foster an open learning environment for students and peer-to-peer learning connections. Sessions will include giving and receiving feedback on capstone or community-based projects, independent research, or other relevant coursework or extracurricular activity. We also welcome students who are new to these topics and would like to learn more. We are open to students of all backgrounds and disciplines at any stage of their research or project work. Following EJ and HR principles, we seek to center local, contextualised knowledge and leadership through ethical research partnerships with community members. To do so, we follow community-based participatory research approaches and decolonizing methodologies. Examples of our work to date include 1) enabling graduate students to effectively bring EJ and HR approaches into dissertation research, 2) supporting campus leaders and directly participating in diversity, equity, and inclusion (DEI) initiatives, and 3) educating and learning from one another about critical EJ and HR scholarship and anti-racist approaches to our work. Lab interests include addressing inequitable impacts of climate change, advancing decolonial approaches to land and water management, promoting food justice, combatting human trafficking and labor exploitation, promoting fair and just immigration policies, and additional EJ and HR research topics. Note that this lab is intended as an open space for engagement. If you are unable to enroll for credit, but would still like to participate, please email humanrights@stanford.edu.
Same as: EARTHSYS 196A

HUMRTS 197. Human Rights Careers Intensive. 1 Unit.
This weekly seminar aimed at juniors, seniors, and graduate students, to support practical exploration of human rights careers. Students will meet alumni and other human rights professionals working in a variety of sectors, and get job-search ready. Each week, a guest speaker will present their unique story to the group, helping you connect your skills and undergraduate experiences at Stanford to long-term, meaningful human rights work.

HUMRTS 198. Independent Study or Directed Reading in Human Rights. 1-5 Unit.
May be repeated for credit. Students using these units toward the Minor in Human Rights must take for a letter grade. Department consent is required for enrollment. Please contact humanrights@stanford.edu indicating your plan and demonstrating agreement from the instructor.

HUMRTS 199. Capstone Project: Human Rights Minor. 1-5 Unit.
Students completing a required capstone project for the Minor in Human Rights must enroll in this course for units with their capstone adviser selected as the instructor. Students must agree with their capstone advisor how many units (3-5) their proposed capstone project is worth, and enroll accordingly. This course is open only to Human Rights Minors. Department consent is required for enrollment. Please contact handacenter@stanford.edu indicating your plan and demonstrating agreement from the your advisor.

HUMANITIES

The undergraduate minor in Humanities provides Stanford students with a broad foundation in the humanities, emphasizing literature, philosophy, and history. The program combines this general knowledge with a focus on the particular cultures of a global region and allows students to reflect on and discuss many of the critical questions that arise everywhere that human beings live together.

Minor in Humanities Requirements

Students in any field qualify for the Humanities minor by meeting the following requirements:

- A minimum of 6 HUMCORE courses completed at 3 units each.
- Courses applied to the minor must be taken for a letter grade where offered.
- A grade point average (GPA) of 2.0 or better must be achieved in each course.
- Transfer credit and AP credit do not apply to this minor.
- Courses applied toward the minor may not fulfill requirements for another degree.

The HUMCORE courses are:

		Units
Autumn Quarter		
HUMCORE 111	Texts that Changed the World from the Ancient Middle East	3-5
HUMCORE 112	Great Books, Big Ideas from Ancient Greece and Rome	3
HUMCORE 113	Order, Patterns, and Disorder in Early China	3
HUMCORE 117	Ancients and Moderns: Africa and South Asia in World Literature	3
Winter Quarter		
HUMCORE 121	Ancient Knowledge, New Frontiers: How the Greek Legacy Became Islamic Science	3
HUMCORE 122	Humanities Core: The Renaissance in Europe	3
HUMCORE 123	Beauty and Renunciation in Japan	3
Spring Quarter		
HUMCORE 131	Modernity and Novels in the Middle East	3-5
HUMCORE 134	Freedom Fighters, Terrorists, and Social Justice Warriors: Protest and Decolonization in South Asia	3
HUMCORE 135	Atlantic Folds: Indigeneity and Modernity	3

Certificate

The Humanities Interdisciplinary Program offers a certificate to students who complete a three quarter HUMCORE course sequence. To receive the certificate, the student should contact Student Services, located in Room 128, Pigott Hall, or email odunlop@stanford.edu. To receive the certificate, all courses must be for a letter grade where offered.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a “credit” or “no credit” grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a “credit” or “satisfactory” grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Minor Program Requirements

Grading

The HUMCORE minor program counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of undergraduate degree requirements that otherwise require a letter grade.

Faculty Director: Alexander Key (Associate Professor of Arabic and Comparative Literature, Director of Stanford Humanities Core)

Faculty: Vincent Barletta (Associate Professor of Comparative Literature and Iberian and Latin American Cultures), Anna Bigelow (Associate Professor of Religious Studies), Ronald Egan (Professor of East Asian Languages and Cultures), Charlotte Fonrobert (Associate Professor of Religious Studies), Blair Hoxby (Professor of English), Burcu Karahan (Lecturer in Turkish Language and Literature), Christopher B. Krebs (Associate Professor of Classics), Haiyan Lee (Professor of East Asian Languages and Cultures and Comparative Literature), Reviel Netz (Professor of Classics), Grant Parker (Associate Professor of Classics), Vered Karti Shemtov (Senior Lecturer in Hebrew Language and Literature), Eva Chernov Lokey (Senior Lecturer in Hebrew and Comparative Literature), Ariel Stilerman (Assistant Professor of East Asian Languages and Cultures)

Courses

HUMCORE 12Q. Humanities Core: Great Books, Big Ideas -- Europe, Middle Ages and Renaissance. 3-4 Units.
This three-quarter sequence asks big questions of major texts in the European and American tradition. What is a good life? How should society be organized? Who belongs? How should honor, love, sin, and similar abstractions govern our actions? What duty do we owe to the past and future? The second quarter focuses on the transition from the Middle Ages to Modernity, Europe's re-acquaintance with classical antiquity and its first contacts with the New World. Authors include Dante, Shakespeare, Machiavelli, Cervantes, and Milton. N.B. This is the second of three courses in the European track. These courses offer an unparalleled opportunity to study European history and culture, past and present. Take all three to experience a year-long intellectual community dedicated to exploring how ideas have shaped our world and future. Students who take HUMCORE 11 and HUMCORE 12Q will have preferential admission to HUMCORE 13Q (a WR2 seminar).
Same as: DLCL 12Q, FRENCH 12Q, ILAC 12Q

HUMCORE 13. Humanities Core: Great Books, Big Ideas -- Europe, Modern. 3 Units.
This three-quarter sequence asks big questions of major texts in the European and American tradition. What is a good life? How should society be organized? Who belongs? How should honor, love, sin, and similar abstractions govern our actions? What duty do we owe to the past and future? This third and final quarter focuses on the modern period, from the rise of revolutionary ideas to the experiences of totalitarianism and decolonization in the twentieth century. Authors include Locke, Mary Shelley, Marx, Nietzsche, Freud, Weber, Primo Levi, and Frantz Fanon.
Same as: DLCL 13, FRENCH 13, HISTORY 239C, PHIL 13

HUMCORE 13Q. Humanities Core: Great Books, Big Ideas -- Europe, Modern. 3-4 Units.
This three-quarter sequence asks big questions of major texts in the European and American tradition. What is a good life? How should society be organized? Who belongs? How should honor, love, sin, and similar abstractions govern our actions? What duty do we owe to the past and future? This third and final quarter focuses on the modern period, from the rise of revolutionary ideas to the experiences of totalitarianism and decolonization in the twentieth century. Authors include Locke, Mary Shelley, Marx, Nietzsche, Freud, Weber, Primo Levi, and Frantz Fanon. N.B. This is the third of three courses in the European track. These courses offer an unparalleled opportunity to study European history and culture, past and present. Take all three to experience a year-long intellectual community dedicated to exploring how ideas have shaped our world and future. Students who take HUMCORE 11 and HUMCORE 12Q will have preferential admission to HUMCORE 13Q (a WR2 seminar). **NOTE** This class meets Monday and Wednesday in room 20-22K and Fridays in room 260-113 to attend a lecture along with the other two HUMCORE courses this quarter.
Same as: DLCL 13Q, GERMAN 13Q

HUMCORE 20. Humanities Core: Dao, Virtue, and Nature -- Foundations of East Asian Thought. 3 Units.
This course explores the values and questions posed in the formative period of East Asian civilizations. Notions of a Dao ("Way") are common to Confucianism, Daoism, and Buddhism, but those systems of thought have radically different ideas about what that Dao is and how it might be realized in society and an individual's life. These systems of thought appeared first in China, and eventually spread to Korea and Japan. Each culture developed its own ways of reconciling the competing systems, but in each case the comprehensive structure of values and human ideals differs significantly from those that appeared elsewhere in the ancient world. The course examines East Asian ideas about self-cultivation, harmonious society, rulership, and the relation between human and nature with a view toward expanding our understanding of these issues in human history, and highlighting their legacies in Asian civilizations today. The course features selective readings in classics of Confucian, Daoist, and Buddhist texts that present the foundational tenets of Asian thought. N. B. This is the first of three courses in the Humanities Core, East Asian track. These courses show how history and ideas shape our world and future. Take all three to experience a year-long intellectual community dedicated to the life of the mind.
Same as: CHINA 20, JAPAN 20, KOREA 20

HUMCORE 21. Humanities Core: Love and Betrayal in Asia. 3 Units.
Why are lovers in storybooks East and West always star-crossed? Why do love and death seem to go together? For every Romeo and Juliet, there are dozens of doomed lovers in the Asian literary repertoires, from Genji's string of embittered mistresses, to the Butterfly lovers in early modern China, to the voices of desire in Koryo love songs, to the devoted adolescent cousins in Dream of the Red Chamber, to the media stars of Korean romantic drama, now wildly popular throughout Asia. In this course, we explore how the love story has evolved over centuries of East Asian history, asking along the way what we can learn about Chinese, Japanese, and Korean views of family and community, gender and sexuality, truth and deception, trust and betrayal, ritual and emotion, and freedom and solidarity from canonical and non-canonical works in East Asian literatures. N.B. This is the second of three courses in the East Asian track. These courses offer an unparalleled opportunity to study East Asian history and culture, past and present. Take all three to experience a year-long intellectual community dedicated to exploring how ideas have shaped our world and future.
Same as: CHINA 21, JAPAN 21, KOREA 21

HUMCORE 21Q. Humanities Core: Love and Betrayal in Asia. 3 Units.
Why are lovers in storybooks East and West always star-crossed? Why do love and death seem to go together? For every Romeo and Juliet, there are dozens of doomed lovers in the Asian literary repertoires, from Genji's string of embittered mistresses, to the Butterfly lovers in early modern China, to the voices of desire in Koryo love songs, to the devoted adolescent cousins in Dream of the Red Chamber, to the media stars of Korean romantic drama, now wildly popular throughout Asia. In this course, we explore how the love story has evolved over centuries of East Asian history, asking along the way what we can learn about Chinese, Japanese, and Korean views of family and community, gender and sexuality, truth and deception, trust and betrayal, ritual and emotion, and freedom and solidarity from canonical and non-canonical works in East Asian literatures. N.B. This is the second of three courses in the East Asian track. These courses offer an unparalleled opportunity to study East Asian history and culture, past and present. Take all three to experience a year-long intellectual community dedicated to exploring how ideas have shaped our world and future.
Same as: CHINA 21Q, JAPAN 21Q, KOREA 21Q

HUMCORE 22. Humanities Core: Everybody Eats: The Language, Culture, and Ethics of Food in East Asia. 3 Units.
Many of us have grown up eating "Asian" at home, with friends, on special occasions, or even without full awareness that Asian is what we were eating. This course situates the three major culinary traditions of East Asia--China, Japan, and Korea--in the histories and civilizations of the region, using food as an introduction to their rich repertoires of literature, art, language, philosophy, religion, and culture. It also situates these seemingly timeless gastronomies within local and global flows, social change, and ethical frameworks. Specifically, we will explore the traditional elements of Korean court food, and the transformation of this cuisine as a consequence of the Korean War and South Korea¿s subsequent globalizing economy; the intersection of traditional Japanese food with past and contemporary identities; and the evolution of Chinese cuisine that accompanies shifting attitudes about the environment, health, and well-being. Questions we will ask ourselves during the quarter include, what is "Asian" about Asian cuisine? How has the language of food changed? Is eating, and talking about eating, a gendered experience? How have changing views of the self and community shifted the conversation around the ethics and ecology of meat consumption?.
Same as: CHINA 118, JAPAN 118, KOREA 118

HUMCORE 33. Humanities Core: Global Identity, Culture, and Politics from the Middle East. 3 Units.
How do we face the future? What resources do we have? Which power structures hold us back and which empower us? What are our identities at college in the Bay Area? In 1850s Lebanon, Abu Faris Shidyaq faced all these same questions (except the last one; he was a Christian magazine editor). In this course we will engage with claims about identity, culture, and politics that some might say come from the "Middle East" but that we understand as global. Ganzeer's graphic novel is as much for California as it is for Egypt. Ataturk's speech is about power and identity just like Donald Trump is about power and identity. In Turkish novels and in Arabic poetry, the people we engage in this course look to their pasts and our futures. What happens next? This is the third of three courses in the Middle Eastern track. These courses offer an unparalleled opportunity to study Middle Eastern history and culture, past and present. Take all three to experience a year-long intellectual community dedicated to exploring how ideas have shaped our world and future.future.
Same as: COMPLIT 33, DLCL 33

HUMCORE 52. Global Humanities: The Grand Millennium, 800-1800. 3-4 Units.
How should we live? This course explores ethical pathways in European, Islamic, and East Asian traditions: mysticism and rationality, passion and duty, this and other worldly, ambition and peace of mind. They all seem to be pairs of opposites, but as we'll see, some important historical figures managed to follow two or more of them at once. We will read works by successful thinkers, travelers, poets, lovers, and bureaucrats written between 800 and 1900 C.E. We will ask ourselves whether we agree with their choices and judgments about what is a life well lived.
Same as: DLCL 52, HISTORY 206D, JAPAN 52

HUMCORE 111. Texts that Changed the World from the Ancient Middle East. 3-5 Units.
This course traces the story of the cradle of human civilization. We will begin with the earliest human stories, the Gilgamesh Epic and biblical literature, and follow the path of the development of law, religion, philosophy and literature in the ancient Mediterranean or Middle Eastern world, to the emergence of Jewish and Christian thinking. We will pose questions about how this past continues to inform our present: What stories, myths, and ideas remain foundational to us? How did the stories and myths shape civilizations and form larger communities? How did the earliest stories conceive of human life and the divine? What are the ideas about the order of nature, and the place of human life within that order? How is the relationship between the individual and society constituted? This course is part of the Humanities Core: https://humanitiescore.stanford.edu/.
Same as: COMPLIT 31, JEWISHST 150, RELIGST 150

HUMCORE 112. Great Books, Big Ideas from Ancient Greece and Rome. 3 Units.
This course will journey through ancient Greek and Roman literature from Homer to St. Augustine, in constant conversation with the other HumCore travelers in the Ancient Middle East, Africa and South Asia, and Early China. It will introduce participants to some of its fascinating features and big ideas (such as the idea of history); and it will reflect on questions including: What is an honorable life? Who is the Other? How does a society fall apart? Where does human subjectivity fit into a world of matter, cause and effect? Should art serve an exterior purpose? Do we have any duties to the past? This course is part of the Humanities Core: https://humanitiescore.stanford.edu/.
Same as: CLASSICS 37, DLCL 11

HUMCORE 113. Order, Patterns, and Disorder in Early China. 3 Units.
This course explores the human impulse of order-making and its limits in the specific context of Early China. Since antiquity, the Chinese civilization displayed constant efforts to understand the natural world and human society, to seek patterns from the numerous and the diverse, and to fathom individuals¿ positions in the world and the proper ways to respond to all its complexity. Such attempts manifested in a cosmology with an emphasis on the resonance between the human and the natural realms, the prescription of ideals for behaviors and morals, the persistent pursuit and celebration of refined patterns in expression, and the state¿s construction of order through policies and cultural projects of standardization. Yet, despite the efforts of order and control, there had always been a strong tendency of anarchy, unveiling how much the seemingly prevailing structures could not contain. The course will probe into ancient philosophy, dynastic histories, literature, and arts to trace these efforts of establishing order and their consequences. The materials will also lead us to contemplate the other side of the story: What was left out? What were the restrictions? What if one failed to conform? Were any advantages found in disorder? This course is part of the Humanities Core: https://humanitiescore.stanford.edu/.
Same as: CHINA 163A

HUMCORE 117. Ancients and Moderns: Africa and South Asia in World Literature. 3 Units.
How might we make sense of culturally significant texts and text equivalents? We'll compare different answers to abiding human questions, such as: Where do we come from? Why do origins matter? What role do different media (written, spoken, otherwise performed, or visual) play in conveying a sense of the past from one generation to another? In what ways is our access to such cultural productions framed by colonial histories, with their discrepant experiences and perspectives? Readings include the Ramayana; the Bhagavad-Gita; Chinua Achebe, Things Fall Apart; and Chimamanda Adichie, `The headstrong historian'. This course is part of the Humanities Core sequence.
Same as: CLASSICS 45

HUMCORE 121. Ancient Knowledge, New Frontiers: How the Greek Legacy Became Islamic Science. 3 Units.
What contributions did Arabic and Islamic civilization make to the history of science? This course will read key moments in Greek and Islamic science and philosophy and ask questions about scientific method, philosophy, and religious belief. We will read Ibn Sina (Avicenna), Ibn Haytham, and Baha al-Din al-Amili, among others. What is the scientific method and is it universal across time and place? What is Islamic rationality? What is Greek rationality? Who commits to empiricism and who relies on inherited ideas? This course is part of the Humanities Core: https://humanitiescore.stanford.edu/.
Same as: CLASSICS 47, COMPLIT 107A

HUMCORE 122. Humanities Core: The Renaissance in Europe. 3 Units.
The Renaissance in Europe saw a cultural flowering founded on the achievements of pagan antiquity, a new humanism founded on the conviction that nothing which has ever interested living men and women can wholly lose its vitality, and the foundation of the modern state. We start with those ¿Renaissance men¿ Leonardo Da Vinci, Michelangelo, and Raphael. We then turn to Martin Luther¿s rejection of Papal Rome and his erection of a competing, Protestant ideal. Montaigne and Shakespeare invent our modern sense of subjectivity before our eyes. And Machiavelli and Hobbes create a science of power politics. Each week, during the first class meeting, we will focus on these issues in Europe. During the second class meeting, we will participate in a collaborative conversation with the other students and faculty in Humanities Core classes, about other regions and issues. This course is taught in English . This course is part of the Humanities Core: https://humanitiescore.stanford.edu/.
Same as: ENGLISH 112C

HUMCORE 123. Beauty and Renunciation in Japan. 3 Units.
Is it okay to feel pleasure? Should humans choose beauty or renunciation? This is the main controversy of medieval Japan. This course introduces students to the famous literary works that created a world of taste, subtlety, and sensuality. We also read essays that warn against the risks of leading a life of gratification, both in this life and in the afterlife. And we discover together the ways in which these two positions can be not that far from each other. Does love always lead to heartbreak? Is the appreciation of nature compatible with the truths of Buddhism? Is it good to have a family? What kind of house should we build for ourselves? Can fictional stories make us better persons? Each week, during the first class meeting, we will focus on these issues in Japan. During the second class meeting, we will participate in a collaborative conversation with the other students and faculty in Humanities Core classes, about other regions and issues. This course is taught in English.
Same as: JAPAN 163A

HUMCORE 131. Modernity and Novels in the Middle East. 3 Units.
This course will investigate cultural and literary responses to modernity in the Middle East. The intense modernization process that started in mid 19th century and lingers to this day in the region caused Arabic, Persian, and Turkish literary cultures to encounter rapid changes; borders dissolved, new societies and nations were formed, daily life westernized, and new literary forms took over the former models. In order to understand how writers and individuals negotiated between tradition and modernity and how they adapted their traditions into the modern life we will read both canonical and graphic novels comparatively from each language group and focus on the themes of nation, identity, and gender. All readings will be in English translation. This course is part of the Humanities Core: https://humanitiescore.stanford.edu/.
Same as: COMPLIT 43

HUMCORE 133. Humanities Core: How to be Modern in East Asia. 3-5 Units.
Modern East Asia was almost continuously convulsed by war and revolution in the 19th and 20th centuries. But the everyday experience of modernity was structured more profoundly by the widening gulf between the country and the city, economically, politically, and culturally. This course examines literary and cinematic works from China and Japan that respond to and reflect on the city/country divide, framing it against issues of class, gender, national identity, and ethnicity. It also explores changing ideas about home/hometown, native soil, the folk, roots, migration, enlightenment, civilization, progress, modernization, nationalism, cosmopolitanism, and sustainability. All materials are in English. This course is part of the Humanities Core: https://humanitiescore.stanford.edu/.
Same as: CHINA 24, COMPLIT 44, JAPAN 24, KOREA 24

HUMCORE 134. Freedom Fighters, Terrorists, and Social Justice Warriors: Protest and Decolonization in South Asia. 3 Units.
The South Asian region comprises the contemporary nations of India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, and the Maldives. Racially, linguistically, politically, religiously, and in every way diverse, this region has also experienced the challenge of European colonialism, the effects of global climate change, the impact of rapid industrialization and urbanization, and internal conflicts within and between nations. It is also a creatively and intellectually vibrant region in which principles of non-violent resistance, award winning arts and literature, stunning natural environments, and scientific discovery are integral and celebrated. How have South Asians engaged the rapid social change of the twentieth century with decolonization and regional conflicts? What artistic and literary formations emerged from and drove the freedom movements against colonial rule and the nation forming projects that ensued? How have globalization and internal debates about national identities shaped contemporary South Asian societies?.
Same as: RELIGST 118

HUMCORE 135. Atlantic Folds: Indigeneity and Modernity. 3 Units.
The Atlantic as an infinite doubling of ancient and modern. The Atlantic as an endless, watery cloth of African, American, and European folds, unfolding and refolding through bodies and ideas: blackness, whiteness, nature, nurture, water, blood, cannibal, mother, you, and I. The Atlantic as a concept, a space, a muse, a goddess. The Atlantic as birth and burial. One ocean under God, divisible, with salt enough for all who thirst. Authors include: Paul Gilroy, Gilles Deleuze, Chimamanda Adichie, Eduardo Viveiros de Castro, Davi Kopenawa, Pepetela, Beyoncé, and José Vasconcelos. This course is part of the Humanities Core: https://humanitiescore.stanford.edu/.
Same as: COMPLIT 46

IBERIAN AND LATIN AMERICAN CULTURES

Courses offered by the Department of Iberian and Latin American Cultures, formerly the Department of Spanish and Portuguese, are listed under the subject code ILAC on the (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=ILAC&filter-catalognumber-ILAC=on) Stanford Bulletin's (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=ILAC&filter-catalognumber-ILAC=on) ExploreCourses web site (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=ILAC&filter-catalognumber-ILAC=on). For courses in Catalan, Portuguese, and Spanish language instruction with the subject codes CATLANG, PORTLANG and SPANLANG, see the "Language Center (http://www.stanford.edu/dept/registrar/bulletin/5966.htm)" section of this bulletin.

The Language Center offers a series of second- and third-year courses designed for students who grew up in homes where Spanish is spoken (heritage speakers) and who wish to develop their existing linguistic strengths. See the "Language Center (https://exploredegrees.stanford.edu/schoolofhumanitiesandsciences/languagecenter/)" section of this bulletin.

The department is a part of the Division of Literatures, Cultures, and Languages (p. 1298).

Mission of the Undergraduate Program in Iberian and Latin American Cultures

Studying Iberian and Latin American cultures at Stanford means engaging in a deep and compelling exploration of the languages, literatures, and cultures of the Iberian Peninsula, Latin America (including Brazil), and Latinx communities in the United States. To achieve the goal of training students as experts in these areas, the department balances an emphasis on literary studies with philosophical, historical, and social approaches to cultural issues. Given the focus on critical thinking, open discussion, and close textual analysis, undergraduate majors are provided excellent preparation for a large number of professional fields, including business, education, international relations, law, and medicine. The graduate program provides rigorous and highly individualized advanced training in the analysis of Iberian, Latin American (including Brazil), and Latinx literatures, and students go on to produce innovative original research and find excellent jobs, both in academe and beyond.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. oral proficiency in Catalan, Portuguese, and/or Spanish beyond the interpersonal level with presentational language abilities;
2. close reading skills of texts in Catalan, Portuguese, and/or Spanish;
3. writing proficiency in Catalan, Portuguese, and/or Spanish beyond the interpersonal level with presentational language abilities.

Bachelor of Arts in Iberian and Latin American Cultures

In this major, students engage in a thoroughly transnational and cross-linguistic study of Iberian and Latin American (including Brazil) literatures and cultures. Courses emphasize critical thinking and close textual analysis, with a focus on the deep and often understudied intersections between literature written in Catalan, Portuguese, and Spanish from the medieval period to the present day.

Bachelor of Arts in Spanish

This undergraduate program is designed for students who want to move towards fluency in reading, listening, speaking, and writing Spanish while developing a contextualized understanding of the language through linguistic and cultural study. This degree emphasizes critical use of the Spanish language in a global perspective.

Learning Outcomes (Graduate)

The purpose of the terminal M.A. program in Iberian and Latin American Cultures is for students to develop the knowledge and skills acquired as undergraduates and to prepare students for a professional career or doctoral studies. This is achieved through the completion of graduate courses in the student's major area of interest as well as in related areas.

The Ph.D. in Iberian and Latin American Cultures is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in the areas and traditions taught by the department. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to develop innovative research and to present the results of this research to the world in compelling ways.

The department offers a Bachelor of Arts in Iberian and Latin American Cultures (p. 1650) and a Bachelor of Arts in Spanish (p. 1650).

Bachelor of Arts in Iberian and Latin American Cultures

This program is designed for students who wish to engage in a transitional and cross-linguistic study of Iberian and Latin American literatures and cultures. Courses emphasize critical thinking and close textual analysis, with an emphasis on the deep and often understudied intersections between literature written in Catalan, Portuguese, and Spanish from the medieval period to the present day. Iberian and Latin American Cultures appears on the official transcript and diploma. The major in Iberian and Latin American Cultures requires:

- 60 units of coursework
- Courses cannot be duplicated for two degrees
- All courses for the major must be taken for a letter grade except those only offered for S/NC

Prerequisites

For all ILAC courses taught in Spanish, students must be able to perform ordinary classwork and complete assignments in that language. At a minimum, they must have completed SPANLANG 13C or be concurrently enrolled in that course. SPANLANG 101 The Structure of Spanish and SPANLANG 102 Composition and Writing Workshop are highly recommended.

Declaring the Major

Students declare the major in Iberian and Latin American Cultures through Axess. Students should meet with the Chair of Undergraduate Studies to discuss appropriate courses and options within the major, and to plan a course of study. The major is administered through the DLCL undergraduate student services office in Pigott Hall, Room 128.

Double Majors

The major in ILAC is designed to combine with a second major in another field and with study abroad. Students should be aware, however, that

university policy prevents one course from counting for both degree programs.

General Course Requirements

Students must complete a total of 60 units for the major. The first five requirements listed below are considered core requirements and must be taken at Stanford University. AP credit and Transfer credit from other Universities do not count towards this major.

1. A Writing in the Major (WIM) course: 5 units are required. The WIM courses for 2020-21 are ILAC 161 Modern Latin American Literature (Autumn); ILAC 136 Modern Iberian Literatures (Winter); and ILAC 157 Medieval and Early Modern Iberian Literatures (Spring).

2. Core courses in literature. All three courses must be completed. Majors are required to take these courses for 4 units.

		Units
ILAC 136	Modern Iberian Literatures	3-5
ILAC 157	Medieval and Early Modern Iberian Literatures	3-5
ILAC 161	Modern Latin American Literature	3-5

3. Core courses in culture, history, and civilization. Choose at least two of three. Majors are required to take these courses for 4 units.

		Units
ILAC 130	Introduction to Iberia: Cultural Perspectives	3-5
ILAC 131	Introduction to Latin America: Cultural Perspectives	3-5

4. Elective Courses. Elective courses can be taken within the following parameters:

- Up to 15 units of language courses (excluding conversational courses) in Spanish, Portuguese, or Catalan.
- Additional 100- or 200- level ILAC literature courses.
- Up to 15 units of pre-approved coursework from Stanford Study Abroad programs in Madrid or Santiago. A course taught abroad by a core member of the ILAC faculty does not count against this limit.
- Up to 5 units of pre-approved coursework from outside ILAC. AP credit is not accepted.
- Up to 10 units of Thinking Matters courses taught at least partially by an ILAC faculty member

5. Capstone: A senior seminar designed as a culmination to the course of study while providing reflection on the nature of the discipline. Topics vary. This seminar is open to other students, excepting frosh and sophomores. The senior seminars for 2020-21 are:

- ILAC 277 Senior Seminar: Horror, Gothic, and Fantasy in Spanish (Fall)
- ILAC 278A Senior Seminar: The Iberian Pastoral (Spring)

6. In addition to course requirements for the major, students must also take an Oral Proficiency Interview (OPI) in Catalan, Portuguese, or Spanish by contacting the Language Center two quarters prior to degree conferral.

return to top (p. 1650)

Bachelor of Arts in Spanish

This program is designed for students who want to move towards fluency in reading, listening, speaking, and writing Spanish while developing a contextualized understanding of the language through linguistic and cultural study. This degree emphasizes critical use of the language in a global perspective. Spanish appears on the official transcript and diploma. The major in Spanish requires:

- 60 units of coursework
- All coursework must be done in Spanish. If a class is taught in a language other than Spanish, then written work (e.g., final papers) must be completed in Spanish
- Courses cannot be duplicated for two degrees
- All courses for the major must be taken for a letter grade except those only offered for CR/NC
- AP credit and Transfer credit from other Universities are not accepted

Prerequisites

For all ILAC courses taught in Spanish, students must be able to perform ordinary classwork and complete assignments in that language. At a minimum, they must have completed SPANLANG 13C or be concurrently enrolled in that course. SPANLANG 101 The Structure of Spanish and SPANLANG 102 Composition and Writing WorkshopWorkshop are highly recommended.

Declaring the Major

Students declare the major in Spanish through Axess. Students should meet with the Chair of Undergraduate Studies to discuss appropriate courses and options within the major, and to plan a course of study. The major is administered through the DLCL undergraduate student services office in Pigott Hall, Room 128.

Double Majors

The Spanish major is designed to combine with a second major in another field and with study abroad. Students should be aware, however, that university policy prevents one course from counting for both degree programs.

General Course Requirements

Students must complete a total of 60 units for the major. The first four requirements listed below are core requirements and must be taken at Stanford University. Majors are required to take their selected courses for at least 4 units.

1. A Writing in the Major (WIM) course: 5 units are required. The WIM courses for 2020-21 are ILAC 161 Modern Latin American Literature (Fall); ILAC 136 Modern Iberian Literatures (Winter); andILAC 157 Medieval and Early Modern Iberian Literatures (Spring).

2. Core courses in culture, history, and civilization. Two are required.

		Units
ILAC 130	Introduction to Iberia: Cultural Perspectives	3-5
ILAC 131	Introduction to Latin America: Cultural Perspectives	3-5

3. Elective Courses. Elective courses can be taken within the following parameters:

- Additional 100- or 200-level ILAC courses. If course is taught in a language other than Spanish, written work must be completed in Spanish, as appropriate.
- Up to 15 units of pre-approved coursework from Stanford study abroad programs in Madrid or Santiago. A course abroad taught by a core member of the ILAC faculty does not count against this limit.
- Up to 5 units of pre-approved coursework from outside ILAC. AP credit is not accepted.

- Up to three courses of SPANLANG at the second year level or above, excluding conversation courses.

4. Capstone: A senior seminar designed as a culmination to the course of study while providing reflection on the nature of the discipline. Topics vary. This seminar is open to other students, excepting frosh and sophomores. The senior seminars for 2020-21 are:

- ILAC 277 Senior Seminar: Horror, Gothic, and Fantasy in Spanish (Fall)
- ILAC 278A Senior Seminar: The Iberian Pastoral (Spring)

5. In addition to the course requirements for the major, students must also take an Oral Proficiency Interview (OPI) in Spanish by contacting the Language Center two quarters prior to degree conferral.

return to top (p. 1650)

Honors Program

Students majoring in any DLCL department (i.e., Comparative Literature, French and Italian, German Studies, Iberian and Latin American Cultures, and Slavic Languages and Literatures) who have an overall grade point average (GPA) of 3.3 or above and who maintain a 3.5 (GPA) in their major courses, are eligible to participate in the DLCL's honors program.

Declaring Honors

Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty in their junior year by May 1. During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL Honors application, and an outline of planned course work for their senior year. When their applications are approved by their home department, students will request honors through Axess.

Honors theses vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40 to 90 pages not including bibliography and notes.

Honors students are encouraged to participate in the DLCL program hosted by Bing Honors College. This DLCL Honors College is designed to help students develop their projects and is offered at the end of the summer before senior year. Applications must be submitted through the Bing program. For more information, view the Bing Honors (https://undergrad.stanford.edu/programs/bhc/) web site.

Program Requirements

A minimum of 10 units total, described below, and a completed thesis is required. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15, of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

1. Spring Quarter of the junior year (optional): DLCL 189C Honors Thesis Seminar, 2-4 units S/NC, under the primary thesis adviser. Drafting or revision of the thesis proposal. The proposal is reviewed by the Chair of Undergraduate Studies and the Director of the department and will be approved or returned for submission.
2. Autumn Quarter of the senior year (required): DLCL 189A Honors Thesis Seminar, 4 units S/NC, taught by a DLCL appointed faculty member. Course focuses on researching and writing the honors thesis.
3. Winter Quarter of the senior year (required): DLCL 189B Honors Thesis Seminar, 2-4 units S/NC, under the primary thesis adviser. Focus is on writing under guidance of primary adviser.
4. Spring Quarter of the senior year (option; mandatory if not taken during junior year): DLCL 189C Honors Thesis Seminar, 2-4 units S/NC, under the primary thesis adviser. Honors essays are due to the thesis adviser and student services officer no later than 5:00 p.m. on May 15 of the terminal year.
5. Spring Quarter of the senior year (required) DLCL 199 Honors Thesis Oral Presentation, 1 unit S/NC. Enroll with primary thesis adviser.

The honors thesis in the DLCL embodies Stanford's excellence in course work and research. It is simultaneously one element of the student's intellectual legacy and part of the University's official history. The faculty considers the honors thesis to be far more than a final paper; rather, it is the product of solid research that contributes to conversations taking place within a larger scholarly community and representative of the intellectual vitality of the discipline. For all of these reasons, DLCL honors theses will be visible to future scholars researching similar questions through full online access through the Stanford Digital Repository (https://library.stanford.edu/research/stanford-digital-repository/) (SDR) and may be used as course materials for future Stanford honors preparatory courses. For similar purposes, a printed copy may also be kept in DLCL spaces. Students who wish to limit the availability or formats in which the thesis may be shared may do so by filling out the appropriate form with the DLCL student affairs officer.

return to top (p. 1650)

Minors in Spanish and Portuguese

Both the minor in Portuguese and the minor in Spanish are for students who want to combine acquisition of linguistic competence with the study of the literatures and cultures of the Lusophone or Spanish-speaking worlds.

Declaring the Minor

Students declare the minor in Spanish or the minor in Portuguese through Axess. Students should meet with the Chair of Undergraduate Studies to discuss appropriate courses and options within the minor programs, and to plan the course of study. The minors are administered through the undergraduate student services office in Pigott Hall, Room 128.

Requirements

- Each minor requires 6 courses at 3 units or more totaling a minimum of 23 units. Each course must be taken for a letter grade.
- At least two courses must be taken in the ILAC department (or with ILAC faculty abroad).
- Up to 12 units of second-year or above Spanish language (for Spanish minor) or Portuguese (for Portuguese minor) may count towards the degree, not including conversational, oral communication, business, or medical language courses.
- With the approval of the Chair of Undergraduate Studies, Independent Study courses may count towards the degree.
- Up to 10 units of pre-approved BOSP coursework
- One approved 3-5 unit course (5 units maximum) from outside ILAC or the Language Center. AP credit is not accepted.

Minor in Spanish

	Units
Required Courses: Minimum of 6 courses at 3 units each and 23 units.	**23**

1. An ILAC course with a significant Iberian component. Courses may include (but are not limited to): ILAC 130, ILAC 157, ILAC 136, ILAC 193, ILAC 278A	
2. An ILAC course with a significant Latin American component. Courses include (but are not limited to): ILAC 131, ILAC 140, ILAC 161, ILAC 277	
3. Additional coursework to complete the required 23 units and six courses.	

Minor in Portuguese

	Units
1. Two ILAC courses with a Lusophone component including ILAC 157 and ILAC 161	
2. Additional coursework to complete the required 23 units and six courses. Options include ILAC 130, ILAC 131, ILAC 136, and ILAC 278A	

Master of Arts in Iberian and Latin American Cultures

The purpose of the terminal M.A. program in Iberian and Latin American Cultures is for students to further develop the knowledge and skills acquired as undergraduates, and to prepare students for a professional career or doctoral studies. This is achieved through the completion of graduate courses in the student's major area of interest as well as in related areas. Students in this program may not apply concurrently for entrance to the Ph.D. program.

Coterminal Master of Arts in Iberian and Latin American Cultures

The coterminal degree program allows undergraduates to study for a master's degree in Iberian and Latin American Cultures while completing their bachelor's degree(s) in ILAC or a different department. The course requirements for the coterminal M.A. are the same as those for the terminal M.A., and students should be aware that University policy prevents one course from counting for both the B.A. and M.A. degrees.

University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 56)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 65)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken during or after the first quarter of the sophomore year are eligible for consideration for transfer to the graduate career; the timing of the first graduate quarter is not a factor. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate advisor be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

Degree Requirements for the Master of Arts in Iberian and Latin American Cultures

Students must complete a minimum of 45 graduate-level units, 36 of which must be taken at Stanford. All 45 units must have a letter grade of 'B' or above. Students enrolled in the terminal M.A. program must file a Program Proposal for a Master's Degree during their first quarter of enrollment. Any changes to the proposal should be reviewed and approved by the Chair of Graduate Studies.

The requirements for the terminal M.A. and coterminal M.A. are:

1. A 200-level or above course in literary or cultural theory
2. Two 200-level or above courses in Latin American (including Brazilian) or Latinx/Chicanx literature and culture
3. Two 200-level or above courses in Iberian literature and culture
4. One 300-level course in Latin American (including Brazilian) or Latinx/Chicanx literature and culture
5. One 300-level course in Iberian literature and culture
6. Enrollment in at least two graduate seminars (200- or 300- level) offered in the department each quarter
7. Intermediate-high proficiency in Portuguese or Catalan (equivalent to one year of university study).

Independent study courses (ILAC 299 Individual Work, ILAC 399 Individual Work) and crosslisted courses originating outside the department may not be used to fulfill requirements except by consent of the Chair of Graduate Studies.

Doctor of Philosophy in Iberian and Latin American Cultures

The Ph.D. in Iberian and Latin American Cultures is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis with respect to the areas and traditions taught by the department. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to develop innovative research and to present the results of this research to the world in compelling ways.

University requirements for the Ph.D. are described in the "Graduate Degrees (p. 65)" section of this bulletin. The requirements of the Ph.D. in Iberian and Latin American Cultures (ILAC) are:

1. Course Work

A total of 135 units is required for the Ph.D. During each quarter preceding advancement to TGR status, students are required to complete (for a letter grade) at least two graduate courses (200- or 300- level) offered through the department. These are taken for at least 3 units each.

All courses counted towards the 135-unit requirement for the Ph.D. must be at the graduate level.

Excess course work may be taken at the UG level, but it may not be used towards the Ph.D. requirements.

Students should make every effort to take a seminar with a core member of the faculty each quarter and one course with each faculty member of the department during the first two years of study.

Students may take independent study courses (ILAC 299, ILAC 399) only during the Summer Quarter until they reach TGR status. Any exceptions must be made in consultation with the Chair of Graduate Studies, the relevant faculty member, and/or the student's faculty adviser.

During the first three years of study, students must meet with their primary adviser and the Chair of Graduate Studies early in the Spring Quarter of each year to plan a course of study for the units to be

completed during the Summer Quarter. Students who transfer graduate units from another institution may adjust the course of study outlined below. For more details, see the Graduate Handbook that corresponds to the student's first year of enrollment.

Doctoral students in the department must take required courses for a letter grade if available, and they are expected to earn a grade of 'B +' or better in each course taken in the DLCL. Any grade of 'B' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty and the following actions may be taken:

1. the grade stands, and the student's academic performance is monitored to ensure that satisfactory progress is being made; or
2. the grade stands, and the student is required to revise and resubmit the work associated with the course; or
3. the student may be required to retake the course.

In consultation with the Chair of Graduate Studies, students in their first year choose one major field and two minor areas of study from the following:

- A1. Medieval and Early Modern Iberian Literature and Culture
- A2. Eighteenth- and Nineteenth-Century Iberian Literature and Culture
- A3. Twentieth- and Twenty-First-Century Iberian Literature and Culture
- B1. Colonial and Nineteenth-Century Latin American Literature and Culture
- B2. Twentieth- and Twenty-First-Century Latin American Literature and Culture
- B3. Luso-Brazilian Literature and Culture
- C. US Latinx Literature and Culture

Areas of Study Coursework:

- At least four graduate-level courses must be taken in the major area of study.
- Students must select one minor area from a group (A, B, C) other than that in which their major area falls.
- At least two graduate-level courses must be taken in each minor area.

1a. First Year

Students must enroll in and complete a minimum of 18 graduate units during each quarter of their first year of graduate study. Summer coursework may be required. First year required course work:

- One 200-level or above course in literary or cultural theory.
- Enrollment in the 300-level ILAC seminar offered each quarter.
- Four 200-level or above courses in ILAC. At least one in Latin American (including Brazilian or Latinx literature and culture) and at least one in Iberian literature and culture.
- Enrollment in and completion of DLCL 301 The Learning and Teaching of Second Languages.
- Intermediate-high proficiency in Portuguese or Catalan (equivalent to one year of university study) by the end of Spring Quarter.

1b. Second Year

Students must enroll in and complete a minimum of 30 graduate units during their second year, including enrollment in the 300-level ILAC seminar offered each quarter. Summer coursework may be required. Second-year students must complete at least two additional graduate seminars (200- or 300- level) offered in the department each quarter and enroll in DLCL 311 Professional Workshop during one quarter (but attend all year). All ILAC and DLCL courses must be taken for a letter grade.

1c. Third Year

Students must enroll in and complete a minimum of 30 graduate units during their third year of graduate study. Summer coursework may be required. Third-year students must enroll in and complete at least two graduate seminars (200- or 300- level) offered in the department each quarter. All DLCL courses must be taken for a letter grade.

1d. Fourth Year

Students who have not reached TGR status must enroll in and complete 15 units of graduate work during the Autumn and Winter quarters of their fourth year. All DLCL courses must be taken for a letter grade.

2. Language

All students are required to have advanced-high proficiency in English and Spanish by the time they take the comprehensive examination. In addition, students specializing in Iberian literature and culture must attain intermediate-mid proficiency in Catalan and Portuguese (equivalent to two quarters of university study for each language); for students specializing in Latin American and/or U.S. Latinx literature and culture, the level of advanced-low or (C1) proficiency in Portuguese (equivalent to four quarters of university study) must be attained. Alternatively, students may study Portuguese for three quarters and study one quarter of Catalan or a Native American language such as Nahuatl, Quechua, or Tupi. This requirement must be fulfilled before students take the comprehensive examination. Students wishing to satisfy the language requirements in Catalan and/or Portuguese may do so by passing a proficiency exam administered by the Language Center. Further explanation of the language requirements and options for satisfying them can be found in the Graduate Handbook corresponding to the first year of enrollment.

3. Examinations

All students must pass the following:

1. a qualifying exam;
2. a written and oral comprehensive examination; and
3. a University oral examination.

3a. Qualifying Examination

In the Autumn Quarter of their first year, students receive a digital reader with a selection of texts related to all areas of Iberian and Latin American literature and culture. These texts serve as the basis for the qualifying exam which is administered the first week of Autumn Quarter of the student's second year of study. During the one-hour oral examination, students meet with a faculty committee and must answer questions in English and/or in Spanish submitted by all active members of the ILAC faculty. Students who fail this examination may request to retake it during the Winter Quarter of the same year.

3b. Comprehensive Examination

This exam consists of two parts:

1. the submission of a written paper; and
2. an oral question and answer period.

It is designed for students to demonstrate intellectual competence in multiple areas of study. This exam occurs during Spring Quarter of the third year of graduate study, and it must be completed prior to the last day of instruction in that same quarter. Students with transferred credits may take this exam earlier in the third year. Students must select a major and two minor areas for the exam from the following options:

- A1. Medieval and Early Modern Iberian Literature and Culture
- A2. Eighteenth- and Nineteenth-Century Iberian Literature and Culture
- A3. Twentieth- and Twenty-First-Century Iberian Literature and Culture
- B1. Colonial and Nineteenth-Century Latin American Literature and Culture
- B2. Twentieth- and Twenty-First-Century Latin American Literature and Culture

- B3. Luso-Afro-Brazilian Literature and Culture
- C. U.S. Latinx Literature and Culture

Students must select one minor area from a group (A, B, C) other than that in which their major area falls.

The committee for the comprehensive exam consists of three ILAC professors to serve on the committee, one for each of the three examination areas chosen by the student. Students are responsible for forming their own committee.

In consultation with each member of the committee, the student must develop a list of 130 texts (approximately 60 for the major area and 35 for each of the minor areas) and should propose organizing themes in discussion with the committee as appropriate. In addition, the student must submit a 6,000-word research paper on a topic preferably related to the dissertation. This paper must be written in English. The comprehensive exam reading list and research paper must be presented to committee members and to the graduate student services coordinator at least two weeks prior to the oral portion of the comprehensive exam. The oral exam is based upon the submitted list and research paper and lasts no more than two hours.

3c. University Oral Examination

Ph.D. candidates in ILAC are required to take a University oral examination after successfully completing the comprehensive examination and before the end of the Spring Quarter of their fourth year. Students with transferred credits may take this exam earlier in the fourth year. This examination is a defense of the dissertation prospectus. During the examination, the candidate speaks for approximately 20 minutes on the proposed dissertation, the methods to be used in research, and the conclusions the candidate expects to reach. Afterward, each member of the committee, in an order established by the chair of the committee, questions the candidate further. The examination lasts no more than two hours.

The University oral examination committee must be finalized no later than the last week of the quarter during which the student successfully completes the comprehensive examination. The examination committee should include the dissertation adviser and three other members, usually from the reading committee, and a chair from outside the department, for a total of five members. All members must belong to the Academic Council. The adviser and two other members must be ILAC faculty. Once a committee and date are finalized, the student must submit the University oral examination form to the graduate student services coordinator. The members of the oral examination committee must receive copies of the dissertation prospectus no later than three weeks prior to the examination.

The dissertation prospectus should consist of approximately 10 pages (3,000 words). It must contain a title along with the following sections:

1. statement of thesis;
2. statement of project significance, both for the student's chosen sub-field(s) and the humanities at large;
3. chapter outline;
4. preliminary biography;and
5. timetable for completion.

4. Teaching

Each Ph.D. candidate must teach a minimum of five quarters of undergraduate courses; three are taught during the second year and the remaining two during the third year. Language course assignments are arranged through the Language Center. In preparation for teaching, Ph.D. candidates are required to take DLCL 301 The Learning and Teaching of Second Languages during the Spring Quarter of their first year. All students must complete one full year (three quarters) plus an additional quarter during the regular academic year of teaching in the Language Center. Students then may apply to co-teach an ILAC literature or culture course with a core ILAC faculty member or they may choose to teach another course in the Language Center to satisfy the requirement of five quarters of undergraduate teaching. Other teaching opportunities may arise but these do not satisfy the teaching requirement.

5. Ph.D. Dissertation

The doctoral dissertation should demonstrate the student's ability to carry out original research and to organize and present the results in publishable form. A copy of the completed dissertation must be submitted to each member of the reading committee at least eight weeks before the University filing deadline in the quarter during which the candidate expects to receive the Ph.D. degree. Committee members have three weeks to read the dissertation before determining whether to approve or require changes. Ph.D. dissertations must be completed and approved within five years from the date of admission to candidacy. Students taking more than five years must apply for reinstatement of candidacy, which is reviewed on a case-by-case basis.

Yearly Review

The department conducts annual reviews of each student's academic performance at the end of the Spring Quarter. All students are given feedback from the Chair of Graduate Studies, the purpose of which is to help them to identify areas of strength and potential weakness. In most cases, students are simply given constructive feedback; however, if there are more serious concerns, a student may be placed on probation with specific guidelines for addressing the problems detected. At any point during the degree program, evidence that a student is performing at a less than satisfactory level may be cause for a formal academic review of that student.

Possible outcomes of the spring review include: continuation of the student in good standing, or placing the student on probation, with specific guidelines for the period of probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: restoration to good standing; continued probation, with guidelines for necessary remedial steps; or dismissal from the program.

Candidacy

Admission to candidacy is an important decision grounded in an overall assessment of a student's ability to complete the Ph.D. program successfully. Per University policy, students are expected to complete department qualifying procedures and apply for candidacy by the end of the second year in residence.

In reviewing a student for admission to candidacy, the faculty considers a student's academic progress including but not limited to: advanced language proficiency, course work, performance on the qualifying exam, and successful completion of teaching and research assistantships. A student must also have completed at least 3 units of work with each of four ILAC Academic Council faculty members prior to consideration for candidacy.

In addition to successful completion of department prerequisites, a student is only admitted to candidacy if the faculty makes the judgment that the student has the potential to complete the requirements of the degree program successfully. Candidacy is determined by faculty vote. Failure to advance to candidacy results in the dismissal of the student from the doctoral program.

Candidacy is valid for five years and students are required to maintain active candidacy through conferral of the doctoral degree. All requirements for the degree must be completed before candidacy expires. The department conducts regular reviews of each student's academic performance, both prior to and following successful admission to candidacy. Failure to make satisfactory progress to degree may result in dismissal from the doctoral program. Additional information about

University candidacy policy is available in the Bulletin (p.) and GAP (http://gap.stanford.edu/4-6.html).

Ph.D. Minor in Iberian and Latin American Cultures

Stanford Ph.D. students wishing to earn a minor in Iberian and Latin American Cultures must complete 25 units, with a grade point average (GPA) of 3.0 or above, selected from courses numbered 200 or higher. For more information, students should speak with the ILAC Chair of Graduate Studies and develop an approved course of study. Students in the Ph.D. program in ILAC who choose a minor in another department should consult with advisers in that department.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a “credit” or “no credit” grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a “credit” or “satisfactory” grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

The Iberian and Latin American Cultures Department counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of undergraduate degree requirements that otherwise require a letter grade.

Required Courses Policy

In the academic year 2020-21, as Stanford operates on a four-quarter system, students may opt not to be enrolled in one of the four quarters of the year. Students may therefore be unable to take an ILAC core course (ILAC 130, 131, 136, 157, 161) because they are on leave during the quarter it is offered. In these cases only, the Chair of Undergraduate Studies, in consultation with the Department Director, will suggest appropriate substitute classes and approve one of them.

Graduate Degree Requirements

Grading

Doctoral students in the department must take required courses for a letter grade and are expected to earn a grade of 'B' or better in each required course. In other courses, doctoral students are expected to earn a grade of 'B' or better in each course taken for a letter grade in AY 2020-21 that will count towards their degree requirement. Any grade of 'B-' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty: while the grade will stand, the student may be required to revise and resubmit the work associated with that course. For courses taken for CR/NC, instructors will be asked to submit written assessment to the student and the department of what would be the equivalent letter grade to allow for review of satisfactory academic achievement by the DGS and department.

Graduate Advising Expectations

The Department of Iberian and Latin American Studies is committed to providing academic advising in support of graduate student scholarly and professional development. The overall goal of advising, both in the DLCL and the department, is to help graduate students make academic and career choices wisely, and think ahead, in order to craft a long-term plan for their graduate student career and beyond. When most effective, the advising relationship entails collaborative and sustained engagement by both the adviser and the advisee. As a best practice, advising expectations should be periodically discussed and reviewed to ensure mutual understanding. Both the adviser and the advisee are expected to maintain professionalism and integrity. Advising is both an academically invaluable form for the transmission of expertise, as well as a key aspect of creating a strong departmental and Stanford community.

Faculty Advisers

Faculty advisers guide students in key areas such as selecting courses, designing and conducting research, developing of teaching pedagogy, navigating policies and degree requirements, and exploring academic opportunities and professional pathways.

- Upon enrolling, students plan their work under the direction of the Chair of Graduate Studies or a faculty member designated by the program. When the student selects a more specialized adviser, the transition should involve oral or written communication between both advisers and the student concerning the student's progress, goals, and expectations. It is possible for doctoral students to choose two main advisers at the dissertation stage, provided all agree this is academically sound.
- Faculty advisers should meet with assigned students to discuss their selection of courses and to plan from a broader, longer-term perspective, including discussion of Program milestones and a basic timeline; an overview of Department and DLCL offerings beyond courses; student goals and interests and DLCL or Stanford programs that may be relevant; and (for doctoral students) how to transfer previous graduate coursework.
- Faculty advisers and graduate students should meet at least once per quarter to assess the advisee's course of study, performance over the past quarter, and plans for the next quarter, as well as longer term plans. If a student has two advisers, the student should meet at least once per quarter with each adviser and at least once per year with both advisers at the same time.
- For doctoral students, faculty should help their advisees plan for exams, research grant applications, develop research projects, and plan ahead for both the academic job market and the job search beyond academia.
- Faculty advisers should provide feedback about the student's progress to the department during the Annual Review process. For more information about the Annual Review, see the Graduate Handbook.

Graduate Students

Graduate students are active contributors to the advising relationship, proactively seeking academic and professional guidance and taking responsibility for informing themselves of policies and degree requirements for their graduate program.

- Upon enrolling, students plan their work under the direction of the Chair of Graduate Studies or a faculty member designated by the program. As the student develops a field of expertise, the student chooses a program adviser to replace the Chair of Graduate Studies role. The transition should involve oral or written communication between both advisers and the student concerning the student's progress, goals, and expectations.
- Graduate students and faculty advisers and should meet at least once per quarter to assess the advisee's course of study,

performance over the past quarter, and plans for the next quarter, as well as longer term plans. If a student has two advisers, the student should meet at least once per quarter with each adviser and at least once per year with both advisers at the same time.
- Students should consult with their advisers on all academic matters, including coursework, conference presentations and publications, research travel, and teaching plans.
- Students should provide a thorough self-evaluation each year for the annual review. For more information about the annual review, see the Graduate Handbook.

For a statement of University policy on graduate advising, see the "Graduate Advising (p. 80)" section of this bulletin.

Faculty in Iberian and Latin American Cultures

Director: Héctor Hoyos

Chair of Graduate Studies: Héctor Hoyos

Chair of Undergraduate Studies: Nicole Hughes

Professor: Joan Ramon Resina (also Comparative Literature)

Associate Professors: Vincent Barletta (also Comparative Literature), Héctor Hoyos, Lisa Surwillo

Assistant Professor: Nicole Hughes

Lecturers: Ximena Briceño

Courtesy Professors: Zephyr Frank, Roland Greene, Ramón Saldívar, Paula Moya

Courtesy Associate Professor: James A. Fox

Emeriti: (Professors) Bernard Gicovate, Mary Pratt, Jorge Ruffinelli, Sylvia Wynter, Yvonne Yarbro-Bejarano; (Professor, Teaching) María-Paz Haro

Overseas Studies Courses in Iberian and Latin American Cultures

Study Abroad Programs in Iberian and Latin American Cultures

All majors are encouraged to study abroad. To transfer credits from non-Stanford programs abroad, consult the Bing Overseas Studies Office. Course work taken abroad may be applied toward both our major and minor programs. Students planning to study abroad must consult with the Chair of Undergraduate Studies to coordinate the course work from abroad with their degree program. The maximum number of units is identified in the elective section for each major.

The Department, The Center for Latin American Studies (https://clas.stanford.edu), and the Bechtel International Center maintain information on study abroad programs. Stanford supports the options listed below and credits course work taken in academically sound programs. Students considering different options are encouraged to speak with the Director of the Department or the Chair of Undergraduate Studies.

Stanford in Santiago de Chile and Madrid, Spain

The Bing Overseas Studies Programs in Santiago de Chile and Madrid, Spain require a certain level of proficiency in Spanish. For more information, students should consult the program summary of their interested campus. Course work is primarily in Spanish. Information is available in the "Overseas Studies" section of this bulletin or at the Bing Overseas Studies web site. Internships and research opportunities may be arranged for students staying for two quarters. Admission is highly competitive.

The department also recognizes other programs, and students are encouraged to discuss their interests with the Director of the Department or with the Chair of Undergraduate Studies.

Brazil and Portugal

Students interested in study in Brazil or Portugal should contact Professor Vincent Barletta.

Bing Overseas Studies Program

The Bing Overseas Studies Program (http://bosp.stanford.edu) (BOSP) manages Stanford international and domestic study away programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The BOSP course search site (https://undergrad.stanford.edu/programs/bosp/explore/search-courses/) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu) or Bing Overseas Studies (http://bosp.stanford.edu).

Due to COVID-19, all BOSP programs have been suspended for Autumn Quarter 2020-21. All courses and quarters of operation are subject to change.

		Units
OSPMADRD 43	The Jacobean Star Way and Europe: Society, Politics and Culture	5
OSPMADRD 45	Women in Art: Case Study in the Madrid Museums	4
OSPMADRD 46	Drawing with Four Spanish Masters: Goya, Velazquez, Picasso and Dali	4
OSPMADRD 47	Cultural Relations between Spain and the United States:Historical Perceptions and Influences, 1776-2	4
OSPMADRD 55	Latin Americans in Spain: Cultural Identities, Social Practices, and Migratory Experience	4
OSPMADRD 61	Society and Cultural Change: The Case of Spain	4
OSPSANTG 14	Women Writers of Latin America in the 20th Century	4-5
OSPSANTG 20	Comparative Law & Society: Conflicts in the Structuring of Democratic Polities across Latin America	4-5
OSPSANTG 44	Introduction to Borderlands Literature of the Americas	3-5
OSPSANTG 68	The Emergence of Nations in Latin America	4-5
OSPSANTG 116X	Modernization and its Discontents: Chilean Politics at the Turn of the Century	5
OSPSANTG 118X	Artistic Expression in Latin America	5

Catalan Language Courses Courses

CATLANG 1A. Accelerated First-Year Catalan, Part 1. 5 Units.
First quarter of the two-quarter sequence. For students with knowledge of another Romance language, preferably Spanish. Emphasis is on developing beginning proficiency in interpersonal, interpretive, and presentational spheres. Prerequisite: consent of instructor.

CATLANG 2A. Accelerated First-Year Catalan, Part 2. 5 Units.
Continuation of CATLANG 1A. For students with knowledge of another Romance language, preferably Spanish. Further development of socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Completion of CATLANG 2A fulfills the University language requirement. Prerequisite: CATLANG 1A.

CATLANG 11A. Accelerated Second-Year Catalan, Part 1. 4 Units.
Continuation of CATLANG 2A. First half of the second-year sequence integrating culture and language of the Catalan-speaking world. Socially and culturally appropriate forms in narrations, descriptions, and expression of ideas and opinions. Emphasis is on oral and written proficiency in formal, informal, academic, and professional contexts. Prerequisite: CATLANG 2A.

CATLANG 12A. Accelerated Second-Year Catalan, Part 2. 4 Units.
Continuation of CATLANG 11A. Second half of the second-year sequence integrating culture and language of the Catalan-speaking world. Socially and culturally appropriate forms in narrations, descriptions, and expression of ideas and opinions. Emphasis is on oral and written proficiency in formal, informal, academic, and professional contexts. Prerequisite: CATLANG 11A.

CATLANG 199. Individual Work. 1-5 Unit.
May be repeated for credit. Prerequisite: consent of instructor.

CATLANG 395. Graduate Studies in Catalan. 1-5 Unit.
May be repeated for credit. Prerequisite: consent of instructor.

Iberian & Latin Amer. Cultures Courses

ILAC 12Q. Humanities Core: Great Books, Big Ideas -- Europe, Middle Ages and Renaissance. 3-4 Units.
This three-quarter sequence asks big questions of major texts in the European and American tradition. What is a good life? How should society be organized? Who belongs? How should honor, love, sin, and similar abstractions govern our actions? What duty do we owe to the past and future? The second quarter focuses on the transition from the Middle Ages to Modernity, Europe's re-acquaintance with classical antiquity and its first contacts with the New World. Authors include Dante, Shakespeare, Machiavelli, Cervantes, and Milton. N.B. This is the second of three courses in the European track. These courses offer an unparalleled opportunity to study European history and culture, past and present. Take all three to experience a year-long intellectual community dedicated to exploring how ideas have shaped our world and future. Students who take HUMCORE 11 and HUMCORE 12Q will have preferential admission to HUMCORE 13Q (a WR2 seminar).
Same as: DLCL 12Q, FRENCH 12Q, HUMCORE 12Q

ILAC 111Q. Texts and Contexts: Spanish/English Literary Translation Workshop. 4 Units.
This course introduces students to the theoretical knowledge and practical skills necessary to translate literary texts from Spanish to English and English to Spanish. Students will workshop and revise a translation project throughout the quarter. Topics may include comparative syntaxes, morphologies, and semantic systems; register and tone; audience; the role of translation in the development of languages and cultures; and the ideological and socio-cultural forces that shape translations.
Same as: COMPLIT 111Q, DLCL 111Q

ILAC 112Q. 2666. 3-5 Units.
The novel 2666 has been regarded as the first classic of world literature in the 21st century. At the end of this course, you will have read and studied this work in its entirety. Close to 1000 pages long, Roberto Bolaño's opus is both daunting and eminently readable¿a feast for serious readers and aspiring writers. It is a dark thriller that spans several continents, with memorable characters and unsuspected plot twists throughout. Similar to Anna Karenina or One Hundred Years of Solitude in ambition, it explores the limits of the sayable, and of the novel form. Its protagonists include vivacious young people, a lost German author, an African-American journalist in Mexico, gallivanting academics, and bodily remains. Some of its topics include literary fame and influence, exile, Cartel violence, and the legacies of World War II. Take this course if you would like to gain solid training in the art of close reading, take your Spanish to the next level, immerse yourself in deep learning, familiarize yourself with current events in Latin America, and participate in a dedicated book salon. The reading pace is very moderate (20 pages every weekday), which allows for careful consideration and readerly enjoyment. The analytical skills you gain in this seminar are also highly portable: they will serve you well in all of your future scholarly pursuits. The course combines small seminar discussion¿a staple of humanities education¿with an approximation to a fresh, contemporary text. You will present on a small section of the book, write short response papers, and engage in various creative activities. Guest speakers and archival work will complement our regular activities.

ILAC 113Q. Borges and Translation. 3-5 Units.
Borges's creative process and practice as seen through the lens of translation. How do Borges's texts articulate the relationships between reading, writing, and translation? Topics include authorship, fidelity, irreverence, and innovation. Readings will draw on Borges's short stories, translations, and essays. Taught in Spanish. Prerequisite: 100-level course in Spanish or permission of instructor.
Same as: DLCL 113Q

ILAC 115Q. From Rubber to Cocaine: Commodities in Colombian Literature. 3-5 Units.
Do you like "Narcos" on Netflix and want to learn more about the Drug Wars and its representation? Are you curious about Colombia? The present sophomore seminar serves the double purpose of introducing you to Colombian culture and of training you in sophisticated rhetorical analysis. At the end of the course you will be a better reader and writer (in Spanish, no less!). You will also have familiarity with a country that in some ways is a "meta-Latin American country," for it includes the regional cultures of the Caribbean, Pacific, Andes, plains, and Amazon jungle. We will read fascinating novels that deal with the sugar plantation economy in the 19th century, the exploitation of rubber at the onset of the 20th, and the coffee and cocaine booms leading to the present. Some things to expect: gripping, tragic love stories among the landed elites of the Pacific Coast, and among their slaves, set against the backdrop of a landscape forever transformed by agriculture (La María); dangerous adventures of city-dwellers turned jungle explorers (La Vorágine), a strike among banana workers turned supernatural catastrophe (Cien años de soledad); the criminal legacy of Pablo Escobar, a man who built an empire of coca leaf, as a symptom of broader societal problems (La parábola de Pablo). This rare course offering will allow you to gain granular knowledge about a fascinating body of literature. You will also become acquainted with an exciting method of cultural analysis called "new materialism." Taught in Spanish.

ILAC 116. Approaches to Spanish and Spanish American Literature. 4 Units.
Short stories, poetry, and theater. What analytical tools do the "grammars" of different genres call for? What contact zones exist between these genres? How have ideologies, the power of patronage, and shifting poetics shaped their production over time? Authors may include Arrabal, Borges, Cortázar, Cernuda, García Márquez, Lorca, Neruda, Rivas. Taught in Spanish. Prerequisite: 100-level course in Spanish or permission of instructor.

ILAC 119. The Memory of the Eye: Iberian Cinema from Buñuel to Almodóvar. 3-5 Units.
An introduction to Spanish, Portuguese, Basque, and Catalan cinema through films from the 1920s and 30s to the present. How film uses a visual grammar of the image to tackle social questions and construct a collective memory. This course will consider the problems of individual recollection under conditions of collective trauma and distortion of the past, exploring the relation between film and history. The course will also focus on how images can be used to explore subjectivity and the passions. We will be watching outstanding films by Luis Buñuel, Carlos Saura, Víctor Erice, Bigas Luna, Pedro Almodóvar, Miguel Gomes, Julio Medem, Ventura Pons, Iciar Bollaín, and Isabel Coixet. Students will be responsible for watching all the films, engaging in lively discussion, in preparation for which, they will be asked to consider certain issues in writing before each class. Each student will present on one of the films for about fifteen minutes. There will be one short midterm essay and one final paper "on a different film.".

ILAC 122A. Radical Poetry: The Avant-garde in Latin America and Spain. 4 Units.
The first few decades of the 20th century ushered in a dynamic literary and aesthetic renewal in Spain and Latin America. Young poets sought a radical change in response to a rapidly changing world, one marked by the horrors of World War I and the rise of a new technological urban society. This course will focus on the poetry and attendant manifestos of movements such as Creacionismo, Ultraismo, Estridentismo, Surrealismo and other -ismos. How did the European avant-garde (e.g. Futurism, Dada, and Surrealism) inform such aesthetic turns? In what ways did poetry assimilate modern visual culture while questioning established poetics? Authors may include Aleixandre, Borges, Cansino-Assens, G. Diego, G. de Torre, Huidobro, Larrea, Lorca, Maples Arce, Neruda, Tablada, and Vallejo. Taught in Spanish. Prior completion of SpanLang 102 is highly recommended.

ILAC 124. Coming of Age in Latin America. 3-5 Units.
What can a novel tell us about coming of age? How does a novel shape a character when they do not conform to social norms? This course interrogates how the coming of age novel the Bildungsroman may combine, successfully or not, a narrative of national social progress and of personal growth. We will compare and contrast short selections from 19th, 20th and 21st centuries novels, while analyzing two masterpieces in depth. Taught in Spanish.

ILAC 127. After Dictatorship: Facts, Fiction, and Justice in Latin America. 3-5 Units.
In the wake of dictatorships across twentieth-century Latin America, writers and artists (as well as laws and truth commissions) have confronted past human rights violations. Today, authors across disciplines and genres continue to grapple with past atrocities. In this course, as we examine the stories we tell about the past, we will focus on concepts such as memory, truth, and justice. What kind of truth can fiction uncover? Whose stories are either remembered or excluded? How do different types of narratives confront issues of human rights and justice? And what can these narratives teach us about issues we continue to face today? Course will be taught in Spanish with the option to write in English (majors should write in Spanish). Readings will be in Spanish (and in Portuguese with translation) and will include fictional and "true crime" narratives as well as legal/historical texts and manifestos. Authors may include Alia Trabucco Zerán, Gonzálo Eltesch, Selva Almada, Mariana Enríquez, Neusa Maria Pereira, and Julián Fuks.

ILAC 128. Spanish Literature and Language through Comics. 3-5 Units.
The course, an exploration of the graphic narrative medium in Spanish, is open to intermediate and advanced Spanish speakers. We'll analyze vignettes, sections, or chapters from both auteur and pop-culture series. These may include: Mortadelo y Filemón and Arrugas (Spain), Mafalda and El eternauta (Argentina), Ídolo and Condorito (Chile), Los once and Caminos condenados (Colombia), Vampiros en La Habana (Cuba), Virus tropical (Ecuador/ Colombia), Vivos se los llevaron (Mexico), as well as Spy vs. Spy and My Favorite Thing is Monsters (ChicanX/LatinX). Secondary sources include McCloud and Dorfman and Mattelart. The through line will be representations and instantiations of power struggles in this deceivingly naive form. Visual narratological aspects and the specificity of the medium will also be discussed at length. Language learners must enroll in the cognate course SPANLANG 103 "Concurrent Writing Support.".

ILAC 130. Introduction to Iberia: Cultural Perspectives. 3-5 Units.
The purpose of this course is to study major figures and historical trends in modern Iberia against the background of the linguistic plurality and cultural complexity of the Iberian world. We will cover the period from the loss of the Spanish empire, through the civil wars and dictatorships to the end of the Portuguese Estado Novo and the monarchic restoration in Spain. Particular attention will be given to the Peninsula's difficult negotiation of its cultural and national diversity, with an emphasis on current events. This course is designed to help prepare students for their participation in the Stanford overseas study program in Spain. Taught in Spanish.

ILAC 131. Introduction to Latin America: Cultural Perspectives. 3-5 Units.
Part of the Gateways to the World program, this is an introductory course for all things Latin American: culture, history, literature, and current events. By combining lecture and seminar formats, the class prepares you for all subsequent research on, and learning about, the region. Comparative discussion of independence movements in Mexico, Central America, the Caribbean, the Andean Region, Brazil, and the Southern Cone. Other topics vary yearly, including: representations of ethnicity and class, the Cold War, popular culture, as well as major thinkers and writers. Open to all. Recommended for students who want to study abroad in Santiago, Chile. Required for majors in Spanish or Iberian and Latin American Cultures (ILAC). In Spanish.

ILAC 132. Drug Wars: from Pablo Escobar to the Mara Salvatrucha to Iguala Mass Student Kidnapping. 3-5 Units.
This course will study the ways in which Latin American Narcos are represented in feature films, documentaries, essays, and novels. We will choose two regions and times: Pablo Escobar's Colombia (1949-1993) and current Mexico (1990-2015), including the mass students kidnappings in Iguala, México, 2014. Films: Sins of my Father (Entel, 2009); Pablo's Hippos (Lawrence Elman, 2010); True Story of Killing Pablo, David Keane (2002), Sumas y restas (Víctor Gaviria, 2003); La vida loca (Poveda, 2009), Sin nombre (Cary Fukunaga, 2009), El velador (Almada, 2011); La jaula de oro (Quemada-Díez, 2013); La bestia (Pedro Ultreras, 2010); Cartel Land (Heineman, 2015); The Missing 43 (Vice, 2015). Books: Alejandra Inzunza, José Luis Pardo, Pablo Ferri: Narco America, de los Andes a Manhattan (2015); Sergio González Rodríguez: El hombre sin cabeza (2010); Rafael Ramírez Heredia: La Mara (2004).

ILAC 132E. Introduction to Global Portuguese: Cultural Perspectives. 3-5 Units.
Portuguese is the sixth most-spoken language in the world (roughly 250 million speakers now, with expected growth to 400 million by 2050) and the most-spoken language south of the Equator. It is the official language of nation-states on four continents, making it truly global in scope. Beyond Brazil, there are tens of millions of Portuguese speakers in Africa and Europe as well as smaller communities in Asia and North America. In this course, students will learn about the cultures and communities that make up the Portuguese-speaking world, even as they learn to critique the idea of linking these communities by means of a language that became global (like Spanish and English) through violent colonial expansion. Topics include art and music, film, poetry, short story, post-colonialism, indigeneity, crioulismo, empire, diaspora, semi-peripherality, modernism. Course taught in English with optional Portuguese section.

ILAC 136. Modern Iberian Literatures. 3-5 Units.
1800 to the mid 20th century. Topics include: romanticism; realism and its variants; the turn of the century; modernism and the avant garde; the Civil War; and the first half of the 20th century. Authors may include Mariano Jose de Larra, Gustavo Adolfo Becquer, Rosalia de Castro, Benito Perez Galdos, Jacint Verdaguer, Eca de Queiros, Miguel de Unamuno, Ramon de Valle-Inclan, Antonio Machado, and Federico García Lorca. Taught in Spanish. Prerequisites: SPANLANG 13 or equivalent.

ILAC 139. Jaguars and Labyrinths: A Survey of South American Short Fiction. 3-5 Units.
10 South American short stories in 10 weeks. We will read tales of jaguars and octopuses, labyrinthic cities and eerie parks, magicians and mediums, time loops and spatial stretches. Each of the works will offer a unique insight into South American literature, history, and culture. We will focus on 20th and 21st century stories that deal with the future of techno-science, the interaction between Western and indigenous worldviews, the intersection of fiction and reality, the relation between the human and the non-human, and the ecological planetary crisis. Authors include Clarice Lispector, Roberto Bolaño, Jorge Luis Borges, Julio Cortázar, João Guimarães Rosa, Vilém Flusser, and Conceição Evaristo. Taught in English, no previous knowledge of Spanish and Portuguese required. Note: Students with a background in Portuguese and/or Spanish may use this course as a platform to enhance their linguistic proficiency and their close-reading skills in the target languages.
Same as: COMPLIT 139A

ILAC 140. Migration in 21st Century Latin American Film. 3-5 Units.
Focus on how images and narratives of migration are depicted in recent Latin American film. It compares migration as it takes place within Latin America to migration from Latin America to Europe and to the U.S. We will analyze these films, and their making, in the global context of an ever-growing tension between "inside" and "outside"; we consider how these films represent or explore precariousness and exclusion; visibility and invisibility; racial and gender dynamics; national and social boundaries; new subjectivities and cultural practices. Films include: Bolivia, Copacabana, La teta asustada, Norteado, Sin nombre, Migración, Ulises, among others. Films in Spanish, with English subtitles. Discussions and assignments in Spanish.
Same as: CHILATST 140

ILAC 145. Poets, Journalists and Collectors: Latin American Modernismo. 3-5 Units.
Discusses the different artistic avatars exercised by Latin American modernistas at the turn of the 19th Century in the context of growing capitalism, technological innovation and social transformation. We focus on how modernistas as poets, journalists and collectors explored and transgressed the limits of the individual and his/her situation. We consider topics like cosmopolitanism, dandysm, autonomy of art, and the aesthetic cultivation of the self. Authors include: Delmira Agustini, Rubén Darío, Julián del Casal, Leopoldo Lugones, José Martí, Manuel Gutierrez Nájera, José Enrique Rodó, José Asunción Silva, and Abraham Valdelomar. Spanish proficiency required.

ILAC 149. The Laboring of Diaspora & Border Literary Cultures. 3-5 Units.
Focus is given to emergent theories of culture and on comparative literary and cultural studies. How do we treat culture as a social force? How do we go about reading the presence of social contexts within cultural texts? How do ethno-racial writers re-imagine the nation as a site with many "cognitive maps" in which the nation-state is not congruent with cultural identity? How do diaspora and border narratives/texts strive for comparative theoretical scope while remaining rooted in specific local histories. Note: This course must be taken for a letter grade to be eligible for WAYS credit. In AY 2020-21, a "CR" grade will satisfy the WAYS requirement.
Same as: COMPLIT 149, CSRE 149

ILAC 156. Brevity as an Art Form. 3-5 Units.
In both literature and film, brevity has been recognize as a superior artistic form. Augusto Monterroso's "El Dinosaurio" (only one line) has been celebrated as a perfect short story, and "Bagdah Messi" (18 minutes) by Sahim Omar Kalifa) could also be considered a work of art. This course will choose no less than 20 short stories and shorts, to analyze and comment, besides a couple of books on the theory of the short literature.

ILAC 157. Medieval and Early Modern Iberian Literatures. 3-5 Units.
From roughly 1000 to 1700 CE. A survey of significant authors and works of early Iberian literatures, focusing on fictional/historical prose and poetry. Topics include lyric poetry and performance, the rise of European empire, Islam in the West, the rise of the novel, early European accounts of Africa and the Americas. Authors may include: Andalusi lyric poets, Llull, the Archpriest of Hita, Zurara, March, Rojas, Vaz de Caminha, Cabeza de Vaca, Sá de Miranda, Monte(ay)or, Teresa of Ávila, Camões, Mendes Pinto, Góngora, Sóror Violante do Céu, Sor Juana, Calderón, and Cervantes. Taught in Spanish.

ILAC 159. Don Quijote. 3-5 Units.
Focus is on a close reading of Miguel de Cervantes's prose masterpiece. Topics include: the rise of the novel, problems of authorship and meaning, modes of reading, the status of Muslim and Jewish converts in early modern Spain, the rise of capitalism, masochistic desire. Taught in Spanish. Prerequisites: SPANLANG 13 or equivalent.

ILAC 161. Modern Latin American Literature. 3-5 Units.
From independence to the present. A survey of significant authors and works of Hispanic and Brazilian Portuguese literatures, focusing on fictional prose and poetry. Topics include romantic allegories of the nation; modernism and postmodernism; avant-garde poetry; regionalism versus cosmopolitanism; indigenous and indigenist literature; magical realism and the literature of the boom; Afro-Hispanic literature; and testimonial narrative. Authors may include: Bolívar, Bello, Gómez de Avellaneda, Isaacs, Sarmiento, Machado de Assis, Darío, Martí-, Agustini, Vallejo, Huidobro, Borges, Cortázar, Neruda, Guillon, Rulfo, Ramos, García Marquez, Lispector, and Bolaño. As a Writing in the Major (WIM) course, ILAC 161 provides structured opportunities for ILAC and Spanish majors to gradually develop their scholarly writing skills in Spanish. This component of the course is optional for non-majors. Taught in Spanish.

ILAC 175. CAPITALS: How Cities Shape Cultures, States, and People. 3-5 Units.
This course takes students on a trip to major capital cities, at different moments in time: Renaissance Florence, Golden Age Madrid, Colonial Mexico City, Enlightenment and Romantic Paris, Existential and Revolutionary St. Petersburg, Roaring Berlin, Modernist Vienna, and bustling Buenos Aires. While exploring each place in a particular historical moment, we will also consider the relations between culture, power, and social life. How does the cultural life of a country intersect with the political activity of a capital? How do large cities shape our everyday experience, our aesthetic preferences, and our sense of history? Why do some cities become cultural capitals? Primary materials for this course will consist of literary, visual, sociological, and historical documents (in translation); authors we will read include Boccaccio, Dante, Sor Juana, Montesquieu, Baudelaire, Gogol, Irmgard Keun, Freud, and Borges. Note: To be eligible for WAYS credit, you must take the course for a Letter Grade.
Same as: COMPLIT 100, DLCL 100, FRENCH 175, GERMAN 175, HISTORY 206E, ITALIAN 175, URBANST 153

ILAC 178. Film and History of Latin American Revolutions and Counterrevolutions. 3-5 Units.
Note: Students who have completed HISTORY 78N or 78Q should not enroll in this course. In this course we will watch and critique films made about Latin America's 20th century revolutions focusing on the Cuban, Chilean and Mexican revolutions. We will analyze the films as both social and political commentaries and as aesthetic and cultural works, alongside archivally-based histories of these revolutions.
Same as: FILMSTUD 178, HISTORY 78, HISTORY 178

ILAC 181. Philosophy and Literature. 3-5 Units.
What, if anything, does reading literature do for our lives? What can literature offer that other forms of writing cannot? Can fictions teach us anything? Can they make people more moral? Why do we take pleasure in tragic stories? This course introduces students to major problems at the intersection of philosophy and literature. It addresses key questions about the value of literature, philosophical puzzles about the nature of fiction and literary language, and ways that philosophy and literature interact. Readings span literature, film, and philosophical theories of art. Authors may include Sophocles, Dickinson, Toni Morrison, Proust, Woolf, Walton, Nietzsche, and Sartre. Students master close reading techniques and philosophical analysis, and write papers combining the two. This is the required gateway course for the Philosophy and Literature major tracks. Majors should register in their home department.
Same as: CLASSICS 42, COMPLIT 181, ENGLISH 81, FRENCH 181, GERMAN 181, ITALIAN 181, PHIL 81, SLAVIC 181

ILAC 193. The Cinema of Pedro Almodovar. 3-5 Units.
Pedro Almodóvar is one of the most recognizable auteur directors in the world today. His films express a hybrid and eclectic visual style and the blurring of frontiers between mass and high culture. Special attention is paid to questions of sexuality and the centering of usually marginalized characters. This course studies Pedro Almodóvar's development from his directorial debut to the present, from the shock value of the early films to the award-winning mastery of the later ones. Prerequisite: ability to understand spoken Spanish. Readings in English. Midterm and final paper can be in English. Majors should write in Spanish.

ILAC 199. Individual Work. 1-12 Unit.
Open only to students in the department, or by consent of instructor.

ILAC 200E. War and the Modern Novel. 3-5 Units.
From the turn of the 19th century to well into the 20th century, novelists developed the theme of alienation and the decline of civilization. Along with the fall of centuries-old empires, World War I brought about the collapse of traditional European values and the dissociation of the subject. The aestheticizing of violence and the ensuing insecurity inaugurated the society of totally administered life, based on universal suspicion and pervasive guilt. The seminar will study narrative responses to these developments in some of the foremost authors of the 20th century from several European literatures: Knut Hamsun, Joseph Roth, Ernst Jünger, Virginia Woolf, Franz Kafka, Curzio Malaparte, Thomas Mann, Mercè Rodoreda, Antonio Lobo Antunes, and Jaume Cabré. Taught in English.

ILAC 203. Philosophies Behind Architecture: The Work of Antoni Gaudí as a Response to Modernity.. 3-5 Units.
The emergence of modern and contemporary Architecture in the West is intimately linked to the background culture that spread across the intellectual centers of Europe and the US between early nineteenth century and the Second World War. Catalan architect Antoni Gaudí (1852-1926) is a major representative of a style of architecture that asks and answers the questions posed by modernity and industrialization with an attitude of resistance. The purpose of this course is to pair these two perspectives: first, an exploration of the history of the most influential movements in Architecture and Interior Design since 1850 and the philosophies and historical events that explain their impact. Second, an elucidation of the originality and relevance of Antoni Gaudí in light of this international context. The course will combine texts by Marx, Smith, Nietzsche, Benjamin, Emerson, Walt Whitman, or Nelson Goodman with those of Cerdà, William Morris, or Adolf Loos, so as to shed light on the most representative buildings and interiors of the period: from the 1851 Crystal Palace of London to the state of La Sagrada Família in 1926, the year Gaudí died. The poles of this history will be represented by industrialization on one side, and autographic craftsmanship on the other. In particular, we will disentangle the tension between creativity and uniformization and their influence in the building of an entire artistic sensibility and culture, in architecture as in politics.
Same as: ARTHIST 203A

ILAC 211. Existentialism, from Moral Quest to Novelistic Form. 3-5 Units.
This seminar intends to follow the development of Existentialism from its genesis to its literary expressions in the European postwar. The notions of defining commitment, of moral ambiguity, the project of the self, and the critique of humanism will be studied in selected texts by Kierkegaard, Heidegger, Unamuno, Albert Camus, Jean-Paul Sartre, Simone de Beauvoir, and Joan Sales.
Same as: COMPLIT 258A, ILAC 311

ILAC 214. Colonial Mexico: Images and Power. 3-5 Units.
How did images maintain, construct, or transform political power during the conquest and colonization of Mexico? The creation and destruction of visual materials in this period had a complicated relationship with power. The pictographic codices that celebrated the expansive Aztec Empire were created after its fall; and the conquistadors' indigenous allies painted some of the most triumphalist narratives of the conquest. Friars accused indigenous peoples of "idolatry" both to justify the destruction of their images and objects, and to construct legal defenses of their humanity. Colonial authorities frequently claimed Afro-Catholic festivals were seditious. In light of such complexity, official histories that recount the top-down consolidation of royal and viceroyal power are suspiciously simple. What counter-narratives do images and other visual phenomena from this tumultuous period offer? This course introduces students to major texts from Colonial Mexico (royal chronicles, conquistadors' tales, letters, poems, festival accounts) alongside a fascinating trove of images (painted codices with Nahuatl texts, feather mosaics, and indigenous heraldry) and considers how experiences of images and spectacles were transformed into textual accounts ("ekphrasis" or the literary device of description). Taught in Spanish.
Same as: HISTORY 272, HISTORY 372B, ILAC 314

ILAC 217. Fernando Pessoa: Aesthetics as Ontology. 3-5 Units.
The poetry and prose of Fernando Pessoa (1888-1935), Portugal's greatest modern poet. As famous for his written work as for his complex understanding of selfhood, Pessoa remains a towering and largely perplexing figure even today. Class discussions will focus on close readings of Pessoa's work along with the implications of his theory of subjectivity for our understanding of modernity, aesthetics, and the self. Taught in English. Readings in Portuguese and English.

ILAC 220E. Renaissance Africa. 3-5 Units.
Literature and Portuguese expansion into Africa during the sixteenth century. Emphasis on forms of exchange between Portuguese and Africans in Morocco, Angola/Congo, South Africa, the Swahili Coast, and Ethiopia. Readings in Portuguese and English. Taught in English.
Same as: AFRICAST 220E, COMPLIT 220, ILAC 320E

ILAC 227. The Making of Modern Brazil. 3-5 Units.
This course explores vital moments in Brazil after its republican revolution of 1889 until the present. Through a cultural lens, we will study moments in Brazil's various impulses for "progress" and "modernity." Through various authors, films, artworks, and manifestos from Brazil's biggest cities to the backlands and to the Amazon, we seek to imagine contemporary Brazil from a deep understanding of its cultural and historical context. Specific areas of focus include the Modern Art Week of 1922 in Sao Paulo, the construction of Brasilia, and the rise (and fall) of Brazil in the 2010s. Taught in English, with readings available in English and Portuguese and an option for students to complete assignments in Portuguese if desired.

ILAC 233. Current Debates in Brazilian Studies. 1 Unit.
A discussion of contemporary Brazilian Studies with guest lecturers Pedro Erber (Cornell University) and Alfredo Cesar Barbosa de Melo (UNICAMP, Brazil). Class meets February 18, 19, 20, 25, 26 and 27, 2020. On February 27 there will be a cognate all-afternoon event with lectures by the instructors and additional guests speakers.

ILAC 234. Valeria Luiselli: A Mexican New Materialist?. 3-5 Units.
Award-winning Mexican Valeria Luiselli¿s (1983) novels, although thematically very different from each other, explore the tension between body and text in ways that engage with contemporary critical theory, media ecology studies and new materialist philosophies, raising important aesthetic and political questions about the representability of actual and residual boundaries. Students taking this class will both engage in a narratological examination of the novels, survey the existing secondary bibliography, and explore pertinent theoretical frameworks. Combining sentence-by-sentence analysis with well-informed speculative reflection, the goal of the class is to prepare and encourage students to formulate their own perspectives on literature¿s agency in the world. The course will be taught in Spanish and is open to intermediate and advanced Spanish speakers.

ILAC 236. Gender and Feminist Debates in Latin America. 1 Unit.
This interdisciplinary, 10 hour, 1-unit course, explores gender politics and representation in contemporary Latin American film, theory, and social movements. Seminar format, open to undergraduate and graduate students. Works may include: film: Señorita María (2017) by Rubén Mendoza (Colombia); studies by Marta Lamas (Mexico), Ana Amado (Argentina), and Sonia Corrêa (Brazil), among others. The course will be taught in Spanish at Bolivar House, 582 Alvarado Row. Schedule: The course dates are Monday, April 23 to Wednesday April, 25, 6:00-9:00pm. Instructor: Professor Moira Fradinger (Yale University), hosted by Professor Héctor Hoyos. NOTE: Professor Fradinger will also give a talk on "Antígonas: A Latin American Tradition," on Friday, April 27th, in the CLAS noon lecture series.

ILAC 238. Latin American Poetry as Witness to Self and World.. 4 Units.
Can lyric poetry engage with the political? How have political contexts shaped poetic form? In this course we will study the ways in which Latin American poetry has modified, dismissed, and drawn inspiration from the traditions of the avant-garde and politicized poetry. Authors may include Darío, Huidobro, Vallejo, Guillén, Storni, Neruda, Paz, Pizarnik, Parra, Dalton, Zurita, and Morejón.

ILAC 241. Fiction Workshop in Spanish. 3-5 Units.
Spanish and Spanish American short stories approached through narrative theory and craft. Assignments are creative in nature and focus on the formal elements of fiction (e.g. character and plot development, point of view, creating a scene, etc.). Students will write, workshop, and revise an original short story throughout the term. No previous experience with creative writing is required. Readings may include works by Ayala, Bolaño, Borges, Clarín, Cortázar, García Márquez, Piglia, Rodoreda, and others. Enrollment limited.

ILAC 242. Poetry Workshop in Spanish. 3-5 Units.
Latin American and Spanish poetry approached through elements of craft. Assignments are creative in nature and focus on the formal elements of poetry (meter, rhythm, lineation, rhetorical figures and tropes) and the exploration of lyric subgenres (e.g. ode, elegy, prose poem). Students write original poems throughout the quarter. No previous experience with creative writing is required. Prerequisite: 100-level course in Spanish or permission of instructor. Enrollment limited.

ILAC 243. Latin American Aesthetics. 3-5 Units.
As the branch of philosophy that deals with the principles of beauty and artistic taste, aesthetics is, purportedly, universal. The course interrogates its conspicuous omission of Latin American theorization and cultural production. Three thematic axes are vanguardia, colonialidad, and populismo; a central concern is aesthetic responses to precariousness. Argentine, Brazilian, Chilean, Colombian, and Cuban essayism and visual arts from the mid 20th century to the present, notably origenismo, neo-baroque, and indigenismo. In collaboration with a cognate course at UC Berkeley. Taught in Spanish.nNOTE: This course must be taken for a minimum of 3 units and a letter grade to be eligible for WAYS credit.

ILAC 249. Women and Wolves in Film and Literature. 3-5 Units.
This course deconstructs the foundational narrative that corrals women into capitalist patriarchy, together with animals. Paying close attention to interspecies bonds between canidae and homo sapiens, we study novels and films where women, wolves and dogs resist the male gaze. Ever heard of Little Red Riding Hood? What if there could be a liberating alliance between her and the wolf? Taught in Spanish.
Same as: ILAC 355

ILAC 254. Crónicas: Soccer, Pop Icons, Shipwrecks, and Populism. 3-5 Units.
In this course, Mexican scholar and writer Juan Villoro analyzes Latin American works that sit halfway between fiction and non-fiction ("crónicas"). A survey on the shifting Latin-American cultural and political landscape, and its narrative representations. Authors include Nobel-laureate Gabriel García Márquez, Elena Ponitowska, and her groundbreaking account of social movements in Mexico. Martín Camparrós (biographer of Boca Juniors),queer activist auteur Pedro Lemebel (Chile), contemporary Argentine journalist Leila Guerriero, and selections from Tomás Eloy Martínez's epochal Santa Evita.

ILAC 255. Climate Change and Latin American Naturecultures. 3-5 Units.
In this course, we will explore fundamental concepts of the environmental humanities as they relate to the inseparable natural and cultural phenomena that constitute climate change in Latin America. The course will be structured around different ecological themes¿such as, energy and extractive industries, the Amazon, the desert, the Andes, the Caribbean, urban habitats¿that will be examined through twentieth- and twenty-first-century Latin American novels, film, short story, and song. Possible authors include Gloria Anzaldúa, Macarena Gómez-Barris, Gabriel García Márquez, and José Eustasio Rivera. We will consider the ethics and politics of climate change in the Americas, how the methodologies of literary and decolonial studies can generate insights into contemporary climate change impacts in Latin America, and what role culture has in a period defined by chronic and slow-moving environmental crisis and recovery. Taught in English.

ILAC 256A. Landscapes in Latin American Cinema. 3-5 Units.
From Patagonia to the US/Mexico border, this course examines diverse cinematic visions of the Latin American continent through documentaries, fiction films, stories, and essays. We will consider different regions and time periods, including representations of dictatorship/violence, the drug trade, and cities to explore how land, nature, and humanity interact in film and to what effect. Areas of focus are the Southern Cone, Brazil, and the US/Mexico/Central America borderlands, and students will gain a solid critical understanding of how to read film.

ILAC 263. Visions of the Andes. 3-5 Units.
Themes like "people," "revolt," "community," "utopia" and "landscape" are central to 20th century Andean narrative and its accompanying critical apparatus. The course reviews major works of Andean literature to reconsider the aesthetic and intellectual legacy of modernity and modernization in the region. We discuss changes in recent literature and film. Special attention is payed to post-conflict Peru and Evo Morales' Bolivia.

ILAC 268. INDIGENISMOS REVISITED. 3-5 Units.
How are indigenous peoples represented in Mexico and Peru in the early 20th century? Why do we call that literature and visual art indigenista? What is the relationship between indigenista art, revolution and the nation? How do we examine indigenismos now?.

ILAC 269. Realismo Mágico vs. Real Maravilloso. 3-5 Units.
Two important concepts and theories realismo mágico and lo Real maravilloso have given sense and substance to Latin American literature during the last three decades. This course will focus on those concepts and on the works of Garcia Marquez and Alejo Carpentier, two key authors of modern Latin America. NOTE: Taught by professor Tom Winterbottom.

ILAC 272. New Brazilian Cinema. 3-5 Units.
This course studies cinema from Brazil with a focus on films from the last decade. We will consider how to effectively talk and write about film, particularly according to Brazil's specific historical and cultural context and from a perspective of social realism. Numerous readings and discussions will bolster our viewings of fiction films and documentaries. Directors include Kleber Mendonça Filho, Anna Muylaert, Gabriel Mascaro, Karim Aïnouz, Aly Muritiba, and Petra Costa. Taught in English; films shown with English subtitles.

ILAC 277. Senior Seminar: Horror, Gothic, and Fantasy in Spanish. 3-5 Units.
In this course we delve into stories and film where realism is put to the test. From vampires in Havana to mysterious children in Buenos Aires, we work with a constellation of writers who shape minor genres into masterpieces. We'll map the ways in which these narratives work with form (against literary or cinematic realism), affect (eliciting emotional responses), and adaptation (as translations or dislocations of genre, gender, geography, time, and modes of production). The selection includes Bombal, Quiroga, Borges, Cortázar, Lispector, Ocampo, Enríquez, Schweblin, Sandoval, and Del Toro, among others.

ILAC 278A. Senior Seminar: The Iberian Pastoral. 3-5 Units.
What does pastoral literature, with its lovesick shepherds, acts of self-immolation, and aquatic nymphs, have to teach us? For early modern Portugal and Spain, it formed a surprisingly indispensable foundation for the social. From the earliest lyric traditions to the rise of the modern novel, the pastoral is everywhere. Through a close analysis and discussion of early modern texts in Spanish and Portuguese, as well as some theoretical/philosophical texts in English, we will explore the place of the pastoral in early modern Iberia and reckon with its impact on our own sense of the past. Authors include: Bernardim Ribeiro, Francisco de Sá de Miranda, Garcilaso de la Vega, Joan Boscà, Jorge de Montemayor, Luís de Camões, Diogo Bernardes, Luis de Góngora, and Violante do Céu.

ILAC 281E. Peripheral Dreams: The Art and Literature of Miró, Dalí, and other Surrealists in Catalonia. 3-5 Units.
Why was Salvador Dalí fascinated with the architecture of Gaudí? Why did André Breton, Paul Éluard and Federico García Lorca visit Barcelona? Moreover, why did Catalonia become such an important cradle for Surrealism? Why is the (Catalan) landscape such a relevant presence in the work of Miró and Dalí? Through a critical analysis and discussion of selected works of art and literature, this seminar focuses and follows the trajectories of Miró and Dalí, from Barcelona to Paris to New York, and explores the role of their Catalan background as a potentially essential factor in their own contributions to Surrealism and the reception of their work. The course will provide the materials and guide the student to conduct research on a specific work(s) of art, architecture, literature or cinema either by Miró, Dalí or one of his peers in relation to their cultural, social and political context. The course is intended for graduate students in Iberian and Comparative Literature, Art History, Cultural Studies, and related fields. Taught in English by Jordi Falgàs i Casanovas.
Same as: ARTHIST 221E

ILAC 299. Individual Work. 1-12 Unit.
Open to department advanced undergraduates or graduate students by consent of professor. May be repeated for credit.

ILAC 303. Topics of: Early Modern Theories of History. 3-5 Units.
From the 15th to the 17th centuries, European expansion projects, especially the Iberian ones, prompted new constructions of the past, present, and future. This proliferation of history writing was complicated by the fact that the various populations of the global Iberian monarchies, particularly those of New Spain, Peru, and Brazil, did not share the same concepts of historicity or temporality. In this course, students will explore a great diversity of primary sources (chronicles, reports, annals, pictographic codices, theater, paintings, feather mosaics, murals, etc.) and discover the unexpected social memories and theories of history that they created.

ILAC 305. Rhythm: Ethics and Poetics of the Premodern. 3-5 Units.
Focus is on the notion of rhythm as a theoretical frame for the analysis of medieval and early modern Iberian poetry. Topics include Ancient Greek and modern conceptions of rhythm and the links between poetics and ethics in the medieval period and beyond. Authors include: Aeschylus, Plato, Aristoxenus, Maurice Blanchot, Paul Celan, EmmanuelnnLevinas, Arcipreste de Hita, Ausiàs March, Garcilaso de la Vega, and Luís de Camões. Taught in English.

ILAC 311. Existentialism, from Moral Quest to Novelistic Form. 3-5 Units.
This seminar intends to follow the development of Existentialism from its genesis to its literary expressions in the European postwar. The notions of defining commitment, of moral ambiguity, the project of the self, and the critique of humanism will be studied in selected texts by Kierkegaard, Heidegger, Unamuno, Albert Camus, Jean-Paul Sartre, Simone de Beauvoir, and Joan Sales.
Same as: COMPLIT 258A, ILAC 211

ILAC 314. Colonial Mexico: Images and Power. 3-5 Units.
How did images maintain, construct, or transform political power during the conquest and colonization of Mexico? The creation and destruction of visual materials in this period had a complicated relationship with power. The pictographic codices that celebrated the expansive Aztec Empire were created after its fall; and the conquistadors' indigenous allies painted some of the most triumphalist narratives of the conquest. Friars accused indigenous peoples of "idolatry" both to justify the destruction of their images and objects, and to construct legal defenses of their humanity. Colonial authorities frequently claimed Afro-Catholic festivals were seditious. In light of such complexity, official histories that recount the top-down consolidation of royal and viceroyal power are suspiciously simple. What counter-narratives do images and other visual phenomena from this tumultuous period offer? This course introduces students to major texts from Colonial Mexico (royal chronicles, conquistadors' tales, letters, poems, festival accounts) alongside a fascinating trove of images (painted codices with Nahuatl texts, feather mosaics, and indigenous heraldry) and considers how experiences of images and spectacles were transformed into textual accounts ("ekphrasis" or the literary device of description). Taught in Spanish.
Same as: HISTORY 272, HISTORY 372B, ILAC 214

ILAC 320E. Renaissance Africa. 3-5 Units.
Literature and Portuguese expansion into Africa during the sixteenth century. Emphasis on forms of exchange between Portuguese and Africans in Morocco, Angola/Congo, South Africa, the Swahili Coast, and Ethiopia. Readings in Portuguese and English. Taught in English.
Same as: AFRICAST 220E, COMPLIT 220, ILAC 220E

ILAC 321. Aljamiado Literature: Crypto-Muslim Culture in Early Modern Iberia. 3-5 Units.
The history, culture, and literature of minority Muslim communities in Spain and Portugal from 1492 to the Morisco expulsions of 1609-14. Topics include: Islam and the West; Religious minorities in Europe; Inquisition and resistance; Gender and Islam; Law and Culture. Class discussions will revolve around selected works of Aljamiado literature (students will learn to read Arabic script), and the final project will involve the partial transcription and study of a sixteenth-century Aljamiado manuscript.

ILAC 334A. Concepts of Modernity I: Philosophical Foundations. 5 Units.
In the late eighteenth century, Immanuel Kant proclaimed his epoch to be "the genuine age of criticism." He went on to develop the critique of reason, which set the stage for many of the themes and problems that have preoccupied Western thinkers for the last two centuries. This fall quarter survey is intended as an introduction to these themes and problems. The general course layout draws equal parts on Koselleck's practice of "conceptual history" (Begriffsgeschichte) and on Jameson's "cognitive mapping." After consideration of an important, if often under-appreciated precedent (the baroque), we turn our attention to the conceptual triad of subject, reason and critique, followed by that of revolution, utopia and sovereignty. Authors may include Hegel, Marx, Nietzsche, Weber, Freud, Lukács, and others. This course is the first of a two-course sequence. Priority to graduate students in MTL, ILAC, and English.
Same as: COMPLIT 334A, MTL 334A

ILAC 336. One World or Many? Representing Distance, Time, and Place in Iberian Expansion. 3-5 Units.
The travelers, missionaries, and historians that reflected on Iberian overseas expansion during the early modern period often asked themselves a crucial question: was there only one world or many? Could the New World, unknown to the ancients, be entirely detached from the rest of human history? Many of these chroniclers continued to think that the world was divided into three parts: Europe, Asia, and Africa. In their descriptions of the Americas, they drew heavily on histories and travel reports pertaining to other epochs and locales, especially contemporary Asia and ancient Rome. Local authors and artists in the New World in this period used world history and news of distant conflicts to reflect on the immediacy of their historical experience. In this course, we will consider the ways in which historians, conquistadors, missionaries, and indigenous authors in New Spain (Mexico), Brazil, and Peru contemplated themselves in the looking glass of remote times and places: from Greco-Roman Antiquity to Lutheran Germany, from the Ottoman Mediterranean to the Apocalyptic End of Times. Students will reassess the importance of this archive to early modern studies writ large and challenge the scholarly tendency to frame the Iberian Peninsula as the center and the Americas as the periphery. Primary sources will include sixteenth and seventeenth-century chronicles, reports, poetry, theater, pictographic codices, feather mosaics, and maps. Reading knowledge of Spanish and a willingness to work with Portuguese required. Course to be taught by Nicole T. Hughes.

ILAC 342. Meat. 3-5 Units.
"Carne" mistranslates as "meat," "Körper," or "chair." Does the word codify into language a certain culturally specific experience of the body and its mediation with nature? In which ways does "flesh" subordinate nonhumans? How does the theme of meat articulate natural and political histories? This advanced research seminar tackles these questions across Latin American corpora: Piñera, Eltit, Echeverría, Bolaño, Bombal, and Lispector. Theorists include: Singer, Santner, and Ortiz. Culturalist, new materialist debates on cattle and corpses. This course will be taught in Spanish.

ILAC 347. Early Modern Iberian Lyric Poetry. 3-5 Units.
Focused analysis of lyric poetry in Catalan, Portuguese, and Spanish from the fifteenth through the seventeenth centuries. Readings include poems by Ausiàs March, el marqués de Santillana, Bernardim Ribeiro, Francisco de Sá de Miranda, Garcilaso de la Vega, Luís de Camões, Diogo Bernardes, Vicent Garcia, Luis de Góngora, and Soror Violante do Céu. Ways of thinking about and thinking through poetry. Focus on poetic form, voice, figural language, performativity, empire, and the interaction of sensory registers. Taught in English with readings in Catalan, Portuguese, and Spanish.

ILAC 348. US-Mexico Border Fictions: Writing La Frontera, Tearing Down the Wall. 3-5 Units.
A border is a force of containment that inspires dreams of being overcome, crossed, and cursed; motivates bodies to climb over walls; and threatens physical harm. This graduate seminar places into comparative dialogue a variety of perspectives from Chicana/o and Mexican/Latin American literary studies. Our seminar will examine fiction and cultural productions that range widely, from celebrated Mexican and Chicano/a authors such as Carlos Fuentes (La frontera de cristal), Yuri Herrera (Señales que precederan al fin del mundo), Willivaldo Delgaldillo (La Virgen del Barrio Árabe), Américo Paredes (George Washington Gómez: A Mexico-Texan Novel), Gloria Anzaldúa (Borderlands/La Frontera: The New Mestiza), and Sandra Cisneros (Carmelo: Puro Cuento), among others, to musicians whose contributions to border thinking and culture have not yet been fully appreciated such as Herb Albert, Ely Guerra, Los Tigres del Norte, and Café Tacvba. Last but not least, we will screen and analyze Orson Welles' iconic border films Touch of Evil and Rodrigo Dorfman's Los Sueños de Angélica. Proposing a diverse and geographically expansive view of the US-Mexico border literary and cultural studies, this seminar links the work of these authors and musicians to struggles for land and border-crossing rights, anti-imperialist forms of trans-nationalism, and to the decolonial turn in border thinking or pensamineto fronterizo. It forces us to take into account the ways in which shifts in the nature of global relations affect literary production and negative aesthetics especially in our age of (late) post-industrial capitalism.
Same as: COMPLIT 348

ILAC 350. Roberto Bolaño's 2666. 3-5 Units.
Roberto Bolaño's 2666 raises questions about the representability of sovereignty, neoliberalism, gender violence, and globalization. An unlikely global classic, it has become a de rigueur referent in contemporary literary studies. Graduate students taking this class will not only engage in a narratological examination of novel, but also survey the existing secondary bibliography, including forthcoming manuscripts with special permission from the authors. The goal of the seminar is to prepare graduate students to formulate their own contributions to the state of the discipline.

ILAC 355. Women and Wolves in Film and Literature. 3-5 Units.
This course deconstructs the foundational narrative that corrals women into capitalist patriarchy, together with animals. Paying close attention to interspecies bonds between canidae and homo sapiens, we study novels and films where women, wolves and dogs resist the male gaze. Ever heard of Little Red Riding Hood? What if there could be a liberating alliance between her and the wolf? Taught in Spanish.
Same as: ILAC 249

ILAC 366. Topics of: The Yellow-Brick Road to the Spanish Nation-State. 3-5 Units.
Nation states arise historically with the transfer of rule from the king to the people, which becomes depository of the general interest. But the old patrimonial state included different peoples, some of which continued to have their own constitutions, representative chambers, and codes of law. Unifying them was a pre-requisite for the emergence of the nation state. This was achieved through a process of nation building which, for most European states, culminated in the 19th century. Not so in Spain. The recurring crises of the Spanish state through the 19th and 20th centuries, and renewed territorial problems in the 21st, reveal an unachieved national project. The seminar will discuss theories of nationalism and sovereignty, and will consider the historical attempts of the Spanish state to manage its intractable nationalities problem, with particular reference to Catalonia. In addition to the state¿s political fractures, the significance of culture for the insolubility of national identities in a single national project will be considered in some detail, as will the role of academic disciplines in furthering a cultural mandate in the sense of political power or in challenge to it.

ILAC 371. Graduate Colloquium: Explorations in Latin American History and Historiography. 4-5 Units.
Introduction to modern Latin American history and historiography, including how to read and use primary sources for independent research.
Same as: HISTORY 371

ILAC 373. Baroque Brazil. 3-5 Units.
In this course we will read texts from and about seventeenth- and eighteenth-century Brazil, with special emphasis on the baroque aesthetic in literature, art, and music. Authors include António Vieira; Gregório de Matos; Bento Teixeira; Sebastião da Rocha Pita; Nuno Marques Pereira; Manuel Botelho de Oliveira; and Frei Itaparica.nReadings in English and Portuguese. Taught in English.

ILAC 399. Individual Work. 1-12 Unit.
For Spanish and Portuguese department graduate students only. Prerequisite: consent of instructor.

ILAC 680. Curricular Practical Training. 1-3 Unit.
CPT course required for international students completing degree. Prerequisite: Comparative Literature Ph.D. candidate.

ILAC 801. TGR Project. 0 Units.
.

ILAC 802. TGR Dissertation. 0 Units.
.

Portuguese Language Courses

PORTLANG 1. First-Year Portuguese, First Quarter. 5 Units.
Emphasis is on oral comprehension and developing socially and culturally appropriate beginning speaking proficiency in interpersonal, interpretive, and presentational modes. Completion of Portlang 3 fulfills the University Foreign Language Requirement.

PORTLANG 1A. Accelerated First-Year Portuguese, Part 1. 5 Units.
Completes first-year sequence in two rather than three quarters. For students with a strong background in another Romance language, preferably Spanish. Emphasis is on developing oral comprehension and socially and culturally appropriate beginning proficiency in interpersonal, interpretive, and presentational modes. Completion of PORTLANG 2A fulfills the University's foreign language requirement.

PORTLANG 2. First-Year Portuguese, 2nd Quarter. 5 Units.
Continuation of 1.Emphasis is on strengthening socially and culturally appropriate beginning,proficiency in interpersonal, interpretive, and presentational modes.Completion of PORTLANG 3 fulfills the University's Foreign Language Prerequisite: Portlang 1 or placement test.

PORTLANG 2A. Accelerated First-Year Portuguese, Part 2. 5 Units.
Continuation of PORTLANG 1A. For students with a strong background in another Romance language, preferably Spanish. Emphasis is on developing oral comprehension and socially and culturally appropriate intermediate proficiency in interpersonal, interpretive, and presentational modes. Completion of PORTLANG 2A fulfills the University's foreign language requirement. Prerequisite: Placement Test or PORTLANG 1A or equivalent.

PORTLANG 3. First-Year Portuguese, Third Quarter. 5 Units.
Continuation of PORTLANG 2. .Emphasis is on developing socially and culturally appropriate intermediate, proficiency in interpersonal, interpretive, and presentational modes. Completion of 3 fulfills the University Foreign Language Requirement. Prerequisite: Placement Test, PORTLANG 2 or equivalent.

PORTLANG 11A. Accelerated Second-Year Portuguese, Part 1. 5 Units.
Continuation of PORTLANG 2A. Fast-paced first half of the second-year sequence. Emphasis is on developing a solid basis for socially and culturally appropriate advanced proficiency in oral and written discourse, including presentational language, and formal and informal discourse for the academic and professional contexts.Prerequisite: Placement Test, PORTLANG 2A, PORTLANG 3 or equivalent.

PORTLANG 12A. Accelerated Second-Year Portuguese, Part 2. 5 Units.
Continuation of PORTLANG 11A. Fast-paced second half of the second-year sequence. Emphasis is on strengthening socially and culturally appropriate advanced proficiency in oral and written discourse, including presentational language, and formal and informal discourse for the academic and professional contexts.nPrerequisite: Placement Test, PORTLANG 11A or equivalent.

PORTLANG 99. Language Specials. 1-5 Unit.
Prerequisite: consent of instructor.n (Staff).

PORTLANG 101. Reading Brazil. 3-4 Units.
3rd year course Expository readings, guest lectures, discussions, on current Brazilian issues. Emphasis is on strengthening and expanding socially and culturally appropriate advanced proficiency in oral and written discourse departing from texts.. Prerequisite: Placement Test, PORTLANG 12A or equivalent.

PORTLANG 102. Brazil in Text: Advanced Grammar and Composition. 3-4 Units.
3rd year course Further development of writing competence. Short expository readings, guest lectures, discussions, review of advanced structures, compositions on current Brazilian issues. Emphasis is on expanding students repertoire of structures,building paragraphs, organizing arguments, and justifying positions. May be repeated once for credit. May be repeated once for credit. Prerequisite: PORTLANG 12A or equivalent.

PORTLANG 103. Advanced Conversation: Brazil Today. 3-4 Units.
3rd year course. Reading and discussions on issues from current media sites and magazines, reading comprehension strategies and vocabulary building. Emphasis is on solidifying and expanding formal expository language. and formal and informal discourse for the academic and professional context. May be repeated once for credit. Prerequisite: PORTLANG 12A.

PORTLANG 161. Advanced Reading in Portuguese, Fourth-year Portuguese. 3-4 Units.
4th year course. Emphasis is on high-level reading comprehension leading to advanced development of communication skills for extended formal and informal discourse in Portuguese. Prerequisite: Placement Test or PORTLANG 101.

PORTLANG 162. Advanced Writing in Portuguese, Fourth-year Portuguese. 3-4 Units.
4th-year course. The course has two tracks, depending on the interest of the student: a) advanced expository writing (correspondence, technical reports, editorials, etc.) and b) creative writing (`crônicas' short stories, poems, etc.). Prerequisite: Placement Test or PORTLANG 102.

PORTLANG 163. Contemporary Issues in the Lusophone World. Fourth-Year Portuguese. 3-4 Units.
4th-year course. The class emphasizes formal presentations/discussions in Portuguese, based on contemporary issues in the lusophone world.Emphasis is on mastering high-level vocabulary/structure as well as rhetorical strategies, for appropriate use in professional settings. . Prerequisite: Placement Test or PORTLANG 103.

PORTLANG 164. Translating the Lusophone world, Fourth-Year Portuguese. 3-5 Units.
For advanced students. Literary and technical translation. Readings on theoretical topics on translation; discussion, analysis and comparison of existing translations (literary and technical); individual translation projects according to students' field of study, and discussion and analysis of those projects in class. Final translation project to be undertaken individually. Prerequisite: PORTLANG 250 or completion of 3rd year sequence.

PORTLANG 297. Directed Reading. 1-4 Unit.
Prerequisite: consent of instructor.nn (Staff).

PORTLANG 394. Graduate Studies in Portuguese Conversation. 1-3 Unit.
Prerequisite: consent of instructor.nn (Staff).

PORTLANG 395. Graduate Studies in Portuguese. 1-5 Unit.
Prerequisite: consent of instructor.n (Staff).

Spanish Language Courses

SPANLANG 1. First-Year Spanish, First Quarter. 5 Units.
First quarter of the three-quarter sequence. Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Influences shaping the production of oral and written texts in the Spanish speaking world.

SPANLANG 1A. Accelerated First-Year Spanish, Part 1. 5 Units.
Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Spanish, or those with a strong background in another Romance language. SPANLANG 2A fulfills the University Foreign Language Requirement. Prerequisite: Placement Test in Spanish or second-year placement in another Romance language.

SPANLANG 2. First-Year Spanish, Second Quarter. 5 Units.
Continuation of SPANLANG 1. Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Influences shaping the production of oral and written texts in the Spanish speaking world. Prerequisite Placement Test or SPANLANG 1.

SPANLANG 2A. Accelerated First-Year Spanish, Part 2. 5 Units.
Continuation of SPANLANG 1A. Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Spanish, or those with a strong background in another Romance language. Prerequisite: SPANLANG 1A. Fulfills the University language requirement.

SPANLANG 3. First-Year Spanish, Third Quarter. 5 Units.
Continuation of SPANLANG 2. Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Influences shaping the production of oral and written texts in the Spanish speaking world. Prerequisite: Placement Test or SPANLANG 2. Fulfills the University Foreign Language Requirement.

SPANLANG 5. Intensive First-Year Spanish. 10 Units.
Completes first-year sequence in one rather than three quarters. Completion of this course fulfills the University Foreign Language Requirement.

SPANLANG 10. Beginning Oral Communication. 2 Units.
Additional pronunciation, vocabulary, and speaking skills. May be repeated once for credit. Prerequisite: one quarter of Spanish, demonstrated oral proficiency above the novice level; may be taken concurrently with SPANLANG 2, SPANLANG 2A, or SPANLANG 3.

SPANLANG 11C. Second-Year Spanish: Cultural Emphasis, First Quarter. 4 Units.
Continuation of SPANLANG 3 or SPANLANG 2A. Sequence integrating culture and language, with emphasis on developing advanced proficiency in oral and written discourse. Targeted functional abilities include presentational and socioculturally appropriate language in formal and informal, academic, and professional contexts. `C' - track content focuses on societal and cultural components of the Spanish-speaking world. Prerequisite: Placement Test, SPANLANG 3 or SPANLANG 2A.

SPANLANG 11R. Second-Year Spanish: Emphasis on International Relations, First Quarter. 4 Units.
Continuation of SPANLANG 3 or SPANLANG 2A. Sequence integrating geopolitics and language, with emphasis on developing advanced proficiency in oral and written discourse. Targeted functional abilities include presentational and socioculturally appropriate language in formal and informal, academic, and professional contexts. `R'-track content focuses on international relations and socioeconomics of the Spanish-speaking world. Prerequisite: Placement Test, SPANLANG 2A or SPANLANG 3.

SPANLANG 11SL. Second-Year Spanish: Emphasis on Service Learning, First Quarter. 4 Units.
Continuation of SPANLANG 3 or SPANLANG 2A. Identity and community. Sequence integrating community engaged learning, culture and language with emphasis on developing advanced proficiency in oral and written discourse. Targeted functional abilities include presentational and socioculturally appropriate language in formal and informal, community and academic contexts. SL content focuses on artistic projects with Spanish-speaking youth organizations in the local community. Requires one evening off campus per week in addition to four hours of regular class time. Projects may vary from quarter to quarter (e.g., mural art, print-making, digital storytelling, etc.) but focus on themes surrounding community and youth identity. Cardinal Course (certified by Haas Center). Prerequisite: Placement Test, SPANLANG 3 or SPANLANG 2A.

SPANLANG 12C. Second-Year Spanish: Cultural Emphasis, Second Quarter. 4 Units.
Continuation of SPANLANG 11C. Sequence integrating culture and language, with emphasis on developing advanced proficiency in oral and written discourse. Targeted functional abilities include presentational and socioculturally appropriate language in formal and informal, academic, and professional contexts. "C" content focuses on societal and cultural components of the Spanish-speaking world. Prerequisite: Placement Test, SPANLANG SPANLANG 11C, 11R, 11SL, or 21B.

SPANLANG 12R. Second-Year Spanish: Emphasis on International Relations, Second Quarter. 4 Units.
Continuation of SPANLANG 11R. Sequence integrating geopolitics and language, with emphasis on developing advanced proficiency in oral and written discourse. Targeted functional abilities include presentational and socioculturally appropriate language in formal and informal, academic, and professional contexts."R" content focuses on international relations and socioeconomics of the Spanish-speaking world. Prerequisite: Placement Test, SPANLANG 11C, 11R, 11SL, or 21B.

SPANLANG 12SL. Second-Year Spanish: Emphasis on Service Learning, Second Quarter. 4 Units.
Continuation of SPANLANG 11. Identity and community. Sequence integrating community engaged learning, culture and language with emphasis on developing advanced proficiency in oral and written discourse. Targeted functional abilities include presentational and socioculturally appropriate language in formal and informal, community and academic contexts. SL content focuses on artistic projects with Spanish-speaking youth organizations in the local community. May require additional hours off campus immediately before and after class, in addition to regular class time. Projects may vary from quarter to quarter (e.g., drama and video production, environmental projects, poetry, etc.) but focus on themes surrounding community and youth identity. Cardinal Course (certified by Haas Center). Prerequisite: Placement Test, SPANLANG 11C, 11R, 11SL, or 21B.

SPANLANG 13C. Second-Year Spanish: Cultural Emphasis, Third Quarter. 4 Units.
Continuation of SPANLANG 12C. Sequence integrating culture and language, with emphasis on developing advanced proficiency in oral and written discourse. Targeted functional abilities include presentational and socioculturally appropriate language in formal and informal, academic, and professional contexts. "C" content focuses on societal and cultural components of the Spanish-speaking world. Prerequisite: Placement Test, SPANLANG 12C,12R or 12SL. Fulfills the IR major Language Requirement.

SPANLANG 13R. Second-Year Spanish: Emphasis on International Relations, Third Quarter. 4 Units.
Continuation of SPANLANG 12R. Sequence integrating geopolitics and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language, international relations, and socioeconomics of the Spanish-speaking world. Prerequisite: SPANLANG 12C,12R,12M, 12S,22B or 21SL. Fulfills the IR major Language Requirement.

SPANLANG 13SL. Second-Year Spanish: Emphasis on Service Learning, Third Quarter. 4 Units.
Continuation of SPANLANG 12. Immigration & Citizenship. Sequence integrating community engaged learning, culture and language with emphasis on developing advanced proficiency in oral and written discourse. Targeted functional abilities include presentational and socioculturally appropriate language in formal and informal, community and professional contexts. SL content focuses on immersion in civics-based service learning in the Spanish-speaking local community. Requires one evening off campus per week in addition to three hours of regular class time. Service Learning Course (certified by Haas Center). Prerequisite: Placement Test, SPANLANG 12C, 12R, 12SL,12M or 12S. Fulfills the IR major language requirement.

SPANLANG 15. Intermediate Oral Communication. 3 Units.
Emphasis is on interaction in Spanish locally and globally. Regional vocabularies and cultures at home and abroad. Interaction with local native Spanish speakers and communities.. May be repeated once for credit. Prerequisite: SPANLANG 2A, SPANLANG 3 and demonstrated oral proficiency above the low intermediate level.

SPANLANG 21B. Second-Year Spanish for Heritage Language Students, First Quarter. 4 Units.
First quarter of the three-quarter sequence.Emphasis is on ability to communicate orally and in writing. Spelling and the written accent. Goal is to understand, interpret, and analyze oral and written texts. Written language skills include rules for editing written language. Third quarter focus is on the development of written and oral styles and registers used in more formal settings. Prerequisite: Placement Test.

SPANLANG 22B. Second-Year Spanish for Heritage Language Students, Second Quarter. 4 Units.
Continuation of SPANLANG 21B. Emphasis is on ability to communicate orally and in writing. Spelling and the written accent. Goal is to understand, interpret, and analyze oral and written texts. Written language skills include rules for editing written language. Prerequisite: Placement Test, Placement Test or SPANLANG 21B.

SPANLANG 23B. Second-Year Spanish for Heritage Language Students, Third Quarter. 4 Units.
Continuation of SPANLANG 22B. Emphasis is on ability to communicate orally and in writing. Spelling and the written accent. Goal is to understand, interpret, and analyze oral and written texts.Written language skills include rules for editing written language. Third quarter focus is on the development of written and oral styles and registers used in more formal settings. Prerequisite: Placement Test or SPANLANG 22B.

SPANLANG 25B. Intensive Second-Year Spanish, Part B. 4 Units.
Same as SPANLANG 12. Continuation of 25A. Prerequisite: 25A or equivalent.

SPANLANG 25C. Intensive Second-Year Spanish, Part C. 4 Units.
Same as SPANLANG 13. Continuation of 25B. Prerequisite: 25B or equivalent.

SPANLANG 99. Language Specials. 1-5 Unit.
May be repeated for credit. Prerequisite: consent of instructor.

SPANLANG 100. Advanced Oral Communication. 3 Units.
For students who have completed second-year Spanish or who have oral skills above the intermediate level. Interactive activities require students to persuade, analyze, support opinions, and gather and interpret others' points of view. Focus is on vocabulary enrichment and idiomatic expressions. Cultural, literary, political, and journalistic readings. May be repeated once for credit. Prerequisite: SPANLANG 13 or equivalent.

SPANLANG 100S. Advanced Oral Communication. 2 Units.
For students who have completed second-year Spanish or who have oral skills above the intermediate level. Interactive activities require students to persuade, analyze, support opinions, and gather and interpret others' points of view. Focus is on vocabulary enrichment and idiomatic expressions. Cultural, literary, political, and journalistic readings. May be repeated once for credit. Prerequisite: SPANLANG 13 or equivalent.

SPANLANG 101. The Structure of Spanish. 4 Units.
Criteria and skills to analyze Spanish grammatical structure. Identification of word functions in sentences and texts, types of sentences, and terminology. Structure of nouns, adjectives, and verbs, and their relationship with meaning. The differences between Spanish grammar as a formal system and in everyday life. Students who wish to participate in the optional community engaged learning component should sign up for Spanlang 101SL (below). Prerequisite: SPANLANG 13C,13R,13SL,23B,13S or 13M.

SPANLANG 101SL. The Structure of Spanish. 4 Units.
Equivalent to Spanlang 101, integrating service learning with course material. Assignments will be modified for students enrolled under 101SL to focus on principles and practice of community-engaged learning. Students and native Spanish-speaking Stanford workers exchange oral histories and create digital stories with testimonials, advice, or remembrances that workers wish to share. Cardinal Course (certified by Haas Center). Prerequisite: SPANLANG 13C, SPANLANG 13R, SPANLANG 13SL,23B,13S or SPANLANG 13M.
Same as: Service Learning Option

SPANLANG 102. Composition and Writing Workshop. 3-5 Units.
Individual development of the ability to write in Spanish. Emphasis is on style and diction, and on preparing and writing essays on literary topics. Non-Spanish majors or minors may choose topics more closely related to their studies for projects. Students who wish to participate in the optional community engaged learning component should sign up for Spanlang 102SL (below). Prerequisite: two years of college Spanish or equivalent.

SPANLANG 102SL. Composition and Writing Workshop. 3-5 Units.
SPANLANG 102SL. Equivalent to Spanlang 102, integrating service learning with course material. Assignments will be modified for students enrolled under 102SL to focus on principles and practice of community-engaged learning. Students and native Spanish-speaking Stanford workers exchange oral histories and create digital stories with testimonials, advice, or remembrances that workers wish to share. Cardinal Course (certified by Haas Center). In 2016-2017, Spring Quarter only. Prerequisite: SPANLANG 13C, SPANLANG 13R, SPANLANG 13SL, or SPANLANG 23B.

SPANLANG 108SL. Advanced Spanish Service-Learning: Migration, Asylum & Human Rights at the Border. 3 Units.
Students develop advanced Spanish language proficiency through examination of issues surrounding current immigration and refugee crises. There will be class discussions of Central American contexts, international treaties, human rights, and U.S. immigration law. Class will include expert commentary from legal and mental health professionals, human rights specialists, migrants, and refugees. Legal, medical, and psychological implications of migration will be examined. Students should enroll in the companion course HUMRTS 108 to receive units for volunteer hours performed throughout the quarter, concurrent with class meetings and assignments. Service-learning opportunities will entail working directly with Spanish-speaking immigrant and asylum seekers in detention in the U.S. Due to COVID-19, all service-learning hours will be performed remotely. Taught entirely in Spanish. Cardinal Course (certified by Haas Center). Prerequisite: completion of SPANLANG 13, 23B or equivalent. SPANLANG 108SL is a requirement for HUMRTS 108. This course requires an application process. Please email instructor for consent.

SPANLANG 121M. Spanish for Medical Students. 2 Units.
First quarter of three-quarter series. Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on taking the medical history. Topics include anatomy, general hospital procedures, pediatrics, nutrition, and essential doctor-patient phrases when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge. Undergraduates are welcome to enroll.
Same as: HRP 280

SPANLANG 122M. Spanish for Medical Students. 2 Units.
Second quarter of three-quarter series.Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on performing a physical examination. Topics include anatomy, general hospital procedures, reproductive health, emergency medicine, and essential doctor-patient phrases when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge. Undergraduates are welcome to enroll.
Same as: HRP 281

SPANLANG 123M. Spanish for Medical Students. 2 Units.
Third quarter of three-quarter series. Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on different specialties and medical conditions. Topics include anatomy, diagnostic procedures, HIV, diabetes, hypertension, and essential doctor-patient phrases when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge. Undergraduates are welcome to enroll.
Same as: HRP 282

SPANLANG 199. Individual Reading. 1-5 Unit.
May be repeated for credit. Prerequisite: consent of instructor.

SPANLANG 199SL. Directed Service Learning. 1-2 Unit.
Students collaborate with native Spanish-speaking workers on a mutually agreed project of benefit to the workers. Past projects have included: digital storytelling¿creating podcasts using testimonials, advice, or remembrances that workers wish to share¿and Spanish-English language exchanges. Cardinal Course (certified by Haas Center). Prerequisite: Completion of SPANLANG 13C, SPANLANG 13R, SPANLANG 13SL, or SPANLANG 23B and concurrent enrollment in SPANLANG 100, SPANLANG 101, SPANLANG 102, SPANLANG 103, or SPANLANG 108SL.

SPANLANG 250. Reading Spanish. 3 Units.
Reading Spanish - For graduate students who have taken Spanish one year or more of Spanish or have superior reading proficiency in another Romance language. Emphasis is on academic texts. Fulfills University reading requirements for advanced degrees if students earn a grade of 'B.'.

SPANLANG 394. Graduate Studies in Spanish Conversation. 1-3 Unit.
Prerequisite: consent of instructor.

SPANLANG 395. Graduate Studies in Spanish. 1-5 Unit.
Prerequisite: consent of instructor.

INTERNATIONAL POLICY

Courses offered by the Ford Dorsey Master's in International Policy are listed under the subject code INTLPOL on the Stanford Bulletin's ExploreCourses web site (http://explorecourses.stanford.edu/search;jsessionid=CD85410D8306285785D60502AD7D575F/?page=0&q=ips&filter-coursestatus-Active=on&view=timeschedule&collapse=&catalog=71).

Mission

The Ford Dorsey Master's in International Policy (MIP), is an interdisciplinary program devoted to rigorous analysis of international policy issues in diplomacy, governance, cyber and international security, global health, and environmental policy. The program is designed to integrate perspectives from political science, law, economics, history, and other disciplines, while also incorporating research opportunities and a focus on implementation and administration of solutions addressing global problems. The MIP program combines a scholarly focus with practical training designed to prepare students for careers in public service and other settings where they can have an impact on international issues.

The program allows students to specialize in cyber policy and security; energy, natural resources, and the environment; governance and development; or international security. Established in 1982, and subsequently renamed as the Ford Dorsey Program in International Policy Studies (IPS) in 2007, the program was redesigned for 2018-19.

University requirements for the M.A. degree are described in the "Graduate Degrees (p. 65)" section of this bulletin.

Learning Outcomes (Graduate)

The purpose of the master's program is to help students develop knowledge and skills in preparation for professional careers in international policy and related fields. This is achieved through completion of required courses in the core curriculum and area of specialization, elective courses in primary and related areas, and the capstone course. Students are also encouraged to gain experience through a summer internship and research skills through assistantships with Stanford faculty. Graduates from the Master of Arts in International Policy will demonstrate an advanced understanding of international issues pertaining to governance, security, diplomacy, and other related areas, and will have a depth of knowledge in interpreting and analyzing qualitative and quantitative data.

Admission

To apply, or for information on graduate admission, see the Office of Graduate Admissions (https://gradadmissions.stanford.edu/) website. Applications for admission in Autumn Quarter must be filed with supporting credentials by 11:59 pm on Tuesday, January 12, 2021.

Prerequisite Course Work

The MIP program has a quantitatively rigorous core curriculum and requires University-level courses in microeconomics and macroeconomics taken either as part of a student's undergraduate education, at another accredited educational institution, or through an approved online course. In addition, while not required, the program strongly encourages applicants to complete an introductory course in statistics. An understanding of calculus may also be useful in preparation for the Research Methods course sequence. For details on the content each prerequisite course should cover, see Frequently Asked Questions (https://fsi.stanford.edu/masters-degree/faq/) on the MIP website. All prerequisite courses must be completed prior to the start of classes in late September; however, they do not need to be completed at the time of application.

Application Materials

In addition to the web-based application, applicants must submit the following materials:

- Statement of purpose on relevant personal, academic, and career plans and goals
- Official transcripts (two original sets, which are mailed to the MIP program office, and one scanned copy electronically uploaded to the online application)
  - Stanford students, and alumni with an active SUNetID and password, may request an official eTranscript to be sent from Stanford University and automatically deposited into the application; in this case, hard copies are not required.
  - *Note:* Two official hard copy transcripts are required to be sent to the MIP program office
- Three letters of recommendation
  - Please submit recommendations from academic and professional contacts who can effectively speak to your academic skills and/or professional experience, as well as your preparedness for graduate study
- Academic writing sample (written in English, 7-15 pages in length, and double-spaced)
- Resume or curriculum vitae
- Graduate Record Examination (GRE) scores are not required of MIP applicants for matriculation in Autumn Quarter 2021. However, GRE scores will be considered for applicants who are able to submit them.
  - Stanford University code for ETS is 4704.
- TOEFL scores (only required of applicants who are non-native English speakers and who did not attend undergraduate institutions where English is the language of instruction; please see Graduate Admissions (https://gradadmissions.stanford.edu/about/frequently-asked-questions/gre-and-toefl/) for additional information)

Applicants are expected to have a B.A. or B.S. degree from an accredited school.

Applicants should plan to review the A (https://fsi.stanford.edu/masters-degree/admissions/)dmissions section (https://fsi.stanford.edu/masters-degree/admissions/) of the MIP website as well as the Frequently Asked Questions (https://fsi.stanford.edu/masters-degree/faq/).

Master of Arts in International Policy

University requirements for the master's degree are described in the "Graduate Degrees (p. 65)" section of this bulletin.

See the Coterminal Master's Program (p. 1672) below for coterm information. Also see below for the Stanford MIP-Vienna School of International Studies Academic Exchange Program (p. 1672).

(The Master of Arts in International Policy program is referred to below as "MIP.")

Degree Requirements

To earn the M.A. in International Policy, students matriculating in Autumn Quarter 2020 must complete the courses listed in the curriculum below. These requirements include:

- *Core* — 31 units
  - All courses must be completed during the first year
- *Area of Specialization* — 20 units; including:

- Two required courses
- Three or more additional courses (see the "Specialization Courses (p. 1675)" tab on this page for approved options)

- *Customized Electives* — 20 units
  - Elective courses selected by the student to augment the course of study
- *Capstone* — 9 units
  - Students must enroll in the policy studio course for winter and spring in their second year
  - Students must also enroll in the field research course for spring in their second year

The minimum number of units required to graduate is 80.

See "MIP Academic Policies" below for details on the degree requirements

Students who matriculated prior to Autumn Quarter 2020-21 should review their degree requirements by visiting the University's Archived Bulletins (http://exploredegrees.stanford.edu/archive/#text).

Curriculum

		Units
Core Courses		**31**
INTLPOL 300A	International Policy Speaker Series	1
INTLPOL 300S	Leading Effective Teams	2
INTLPOL 301A	Research Methods and Policy Applications I	5
INTLPOL 301B	Research Methods and Policy Applications II	5
INTLPOL 302	The Global Economy	5
INTLPOL 306	International Relations Theory and the American Experience	5
INTLPOL 307	Policy Problem-Solving in the Real World	4
INTLPOL 308	Comparative Public Policy	4
Area of Specialization		**20**
Two required courses		
Three or more additional courses from an approved list		
Customized Electives		**20**
International Policy related courses; 100-level or above		
Practicum		**9**
INTLPOL 310	Policy Change Studio (x2)	4
INTLPOL 310A	Capstone Field Research	1
Total Units		**80**

Area of Specialization Curriculum

Students are required to choose one area of specialization from the list below and complete at least five courses within the specialization for a minimum of 20 total units. Each area of specialization has two required courses, which must be taken during the first year and prior to enrolling in subsequent courses, except when unfeasible due to core course scheduling conflicts. Additionally, each area of specialization has a list of approved courses, which can be found under the "Specialization Courses (http://exploredegrees.stanford.edu/schoolofhumanities/schoolofhumanitiesandsciences/internationalpolicy/#specializationcoursestext)" tab of this page. At least three additional courses must be taken from this list.

Area of Specialization Requirements

1. Students must select an area of specialization during Autumn Quarter of their first year of the program. The area of specialization, or subplan per University terminology, must be entered by the student in Axess (https://axess.stanford.edu).
   a. A student may change the area of specialization through the end of the first academic year although it requires approval from MIP.
   b. If a student would like to change the area of specialization (or subplan) it must be approved by the MIP Assistant Director for Academic and Student Affairs. If approved, the student must submit a formal e-Form in Axess (https://axess.stanford.edu) in order to process the change to the academic plan.
2. Students must complete the two required courses within the area of specialization, and at least three courses from a list of approved options for a minimum total of 20 units.
   a. The two required courses must be completed during the first year of the program unless there are unforeseen conflicts or other issues. Approval to complete a required specialization course during the second year of the program must be obtained from the MIP Assistant Director for Academic and Student Affairs.
   b. There are no exemptions permitted for the required courses; exceptions may apply to coterm students.
3. All courses must be taken for a letter grade.
4. Courses below 100-level do not count towards graduate degrees.

Area of Specialization Petition Process

During Autumn Quarter, as well as during late Spring Quarter and early summer, MIP will accept petitions to incorporate additional courses into the approved electives. The process will allow students to add courses to a spreadsheet for each of the areas of specialization (available on the MIP website under "Student Resources"), which will be reviewed by MIP leadership and the subject-matter faculty leaders. For each review period, the timeline for the submission of petitions will be provided in writing.

The process requires students to submit detailed course information, including syllabi and a rationale for inclusion. Courses that are approved will be tagged for addition to the "Specialization Courses (http://exploredegrees.stanford.edu/schoolofhumanities/schoolofhumanitiesandsciences/internationalpolicy/#specializationcoursestext)" tab of this page.

The criteria for inclusion will include a review of a course's substantive fit within the specialization; rationale submitted by the student; recency and consistency of offering; graduate offering (i.e., course number generally 200-level and above); letter grade option (except GSB/LAW/SoM); and teaching evaluations. Of note, skills courses that could apply to multiple areas of specialization will generally be considered Customized Electives, which is a separate degree requirement.

Area of Specialization Required Courses

		Units
Cyber Policy and Security		
INTLPOL 268	Hack Lab	3
INTLPOL 321	Fundamentals of Cyber Policy and Security	4-5
Energy, Natural Resources, and the Environment		
Complete two of the following courses		
CEE 207A	Understanding Energy	3-5
GSBGEN 336	Energy Markets and Policy	3
INTLPOL 272	Empirical Methods in Sustainable Development	3-5
Governance and Development		
ECON 118	Development Economics	5
INTLPOL 220	Comparative Political Economy of Development	3
International Security		
INTLPOL 240	Contemporary Issues in International Security	4

INTLPOL 340	Technology, Innovation and Modern War: Keeping America's Edge in an Era of Great Power Competition	4

MIP Academic Policies

The University's general requirements, applicable to all graduate degrees at Stanford, are listed in the "Graduate Degrees (p. 67)" section of this bulletin. In addition, the MIP-specific degree requirement academic policies are listed below.

Core Courses

All core courses must be completed during the first year of the program. The only exemption is for coterm, dual, or joint degree students who have conflicts with courses in their other degree program. In this instance, prior approval from MIP is required to move a core course to the second year. Note the additional guidance on first-year core courses:

- INTLPOL 301A and INTLPOL 301B are a sequenced series. Students are required to enroll in the first course (301A) during Autumn Quarter and the second course (301B) during Winter Quarter.
- Students are required to enroll in INTLPOL 300A and INTLPOL 302 for Autumn Quarter.
- Students are required to enroll in INTLPOL 306 for Winter Quarter.
- Students are required to enroll in INTLPOL 300S, INTLPOL 307 , and INTLPOL 308, for Spring Quarter.

Customized Electives

Students are permitted to take a wide range of courses in order to augment their area of interest. The purpose of the customized electives is to provide students the opportunity to explore the many academic offerings across campus and to give them the ability to tailor their courses in a suitable manner. These courses must be related to international policy, broadly understood. Students may choose to: enroll in additional courses in their area of specialization; build their own sub-specialization (e.g., area studies, computational social science certificate); enroll in language courses; explore a second area of specialization; or combine diverse courses to supplement their academic focus. Please note that courses below 100-level and activity units do not count towards graduate degrees. There are additional academic policies listed that pertain to grading basis, maximum units of undergraduate courses that can be applied to the degree, and directed reading units.

Capstone

Students enroll in INTLPOL 310 for both Winter Quarter and Spring Quarter of the second year of the program. Additionally, students enroll in INTLPOL 310A , which is the field research component, in Spring Quarter of the second year of the program.

Directed Readings

Students may arrange directed reading courses to be applied towards the Areas of Specialization or Customized Electives if the current course offerings do not meet particular research or study needs. Directed reading courses are independent study projects students may undertake with Stanford faculty members. Once the student has identified a faculty member to support his or her studies, the student must submit the directed reading proposal (https://fsi.stanford.edu/masters-degree/content/mip-student-forms/) for review by the MIP Assistant Director for Academic and Student Affairs. Directed reading proposals must be submitted no later than the end of the second week of the quarter. MIP reviews the directed reading proposal and renders a decision no later than two days prior to the Final Study List Deadline. If approved, the MIP academic services team will create a section number for the specific instructor so the student can enroll in the course. The course is listed as INTLPOL 299 and the section number corresponds to the instructor (e.g., INTLPOL 299 - 02 (Stoner, Kathryn). There are important restrictions for directed readings:

1. Students can apply a maximum of 15 directed reading units towards the MIP degree requirements.
   a. This includes a maximum of five units of directed reading towards the Area of Specialization. Exceptions can be requested up to a total of eight units, however approval beyond the five units will reduce the number of directed reading units that can be applied towards the Customized Electives.
   b. Additionally, students may apply no more than 10 units of directed reading towards the Customized Electives.
2. Students may receive credit for a maximum of 5 units per directed reading course.
3. Students must receive a letter grade for the directed reading course.

Degree Progress, Academic Standing, and Grade Requirements

MIP students must maintain a minimum 3.0 cumulative GPA to remain in good academic standing. Similarly, a minimum 3.0 cumulative GPA is required for conferral of the M.A. degree. Failure to remain in good academic standing due to not meeting the GPA requirement or making insufficient degree progress will result in being placed on academic probation (which could ultimately result in dismissal from the university).

All courses applied towards degree requirements for the M.A. in International Policy must be taken for a letter grade. The only exceptions are:

- INTLPOL 300A (only offered as S/NC).
- 1-2 unit courses that are only offered as S/NC.
  - No more than six S/NC units may be applied towards the degree.
- Courses taken in the Law School, the School of Medicine, or the Graduate School of Business where a letter grade is not an available option.
  - Pre-approval is required from the MIP student services team in order to apply a non-letter grade course from Law, Medicine, or the Graduate School of Business toward the MIP degree.
- If a student wishes to apply a S/NC course towards the area of specialization elective units, prior approval from MIP is required. Credit will not be granted retroactively.

Additional Grade Requirements

Students who receive an incomplete grade (denoted as "I") are required to complete the course on a shorter timeline than University policy. The following completion schedule applies:

- Autumn and Winter Quarters: Incomplete grades must be completed no later than June 30 of the same academic year.
- Spring Quarter: Incomplete grades must be completed no later than August 30 of the same academic year.
- Summer Quarter: Incomplete grades must be completed no later than December 30 of the same calendar year.

Students are also responsible for coordinating the completion of the course with the instructor(s) as well as keeping the Assistant Director for Academic and Student Affairs apprised of progress.

Students who have three or more incomplete grades (denoted as "I"), or who have incomplete grades in multiple quarters, will be placed on academic probation unless there is a rationale due to personal or health reasons that is accompanied by documentation from Counseling and Psychological Services (https://vaden.stanford.edu/caps/), the Office of Accessible Education (https://oae.stanford.edu/), or Vaden Health Center (https://vaden.stanford.edu/).

Additional Academic Requirements

1. All graduate degree candidates must submit a Master's Degree Program Proposal in Spring Quarter of the first year of study. See "Graduate Advising (p. 1677)" in this bulletin for additional information. Submission of the Program Proposal requires scheduling a 30-minute advising session with the MIP Academic Services Team to review degree progress and outline course work that needs to be completed in subsequent quarters in order to graduate. The University requires each student to have a program proposal on file with the academic program in order for the student to apply to graduate. Failure to complete this process will result in a hold being placed on the student's account.
2. In order to graduate, students must apply for graduation in Axess (https://axess.stanford.edu). Additionally, students will need to submit a final, completed Program Proposal during the quarter of study in which they have applied to graduate. This also requires submission of an explanation for the customized electives completed (1-2 paragraphs). The deadline is the second week of the intended graduation quarter.
3. A maximum of 20 undergraduate units can be applied towards the MIP degree, i.e., courses numbered between 100-199. The exceptions are History and Political Science, which list undergraduate courses at the 100 and 200-level. Per University policy, courses below 100 do not count towards graduate degrees.
4. Units from language courses may only be applied towards the 20 units of Customized Electives. English proficiency courses for international students do not count towards the MIP degree requirements. Students are advised to review the details on Customized Electives (p. 1671) to clearly understand the academic policies that apply, in particular that courses below 100 do not count towards any graduate degree. Students who hope to apply language courses below the 100-level towards the MIP degree requirements should discuss options with the Stanford Language Center (https://language.stanford.edu/), including enrolling in courses numbered 395. Students should also confirm their language course enrollment with the Assistant Director for Academic and Student Affairs sufficiently in advance of the Final Study List deadline for a given quarter.
5. Activity units do not apply towards the MIP degree requirements.

Coterminal Master's Program

Undergraduates at Stanford may apply for admission to the coterminal master's program in International Policy when they have earned a minimum of 120 units toward graduation, including Advanced Placement and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. MIP has one application deadline per year in early January for matriculation in Autumn Quarter of the same calendar year.

Students must submit the Coterminal Online Application (https://applyweb.com/stanterm/). Applications must be filed together with supporting materials by 11:59 pm on Tuesday, January 12, 2021.

In addition to the web-based application, coterminal applicants must submit the following supporting materials:

- Two letters of recommendation from University faculty
- Academic writing sample of at least seven double-spaced pages (but no more than 15 pages)
- Statement of purpose focusing on relevant personal, academic, and career plans and goals
- Resume
- Unofficial Stanford transcript

Note: The GRE exam is not required for coterminal applicants to the MIP program.

MIP Coterm Degree Requirements

To earn the M.A. in International Policy, coterm students matriculating in Autumn Quarter 2019 must complete the courses listed in the curriculum below. These requirements include:

- *Core courses* — 31 units
- *Area of specialization* — 14 units; including:
  - Two required courses
  - One or more additional courses (see "Specialization Courses (p. 1675)" for approved options)
- *Capstone courses* — 9 units

The minimum number of units required for a coterm in MIP to graduate is 54.

University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 56)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 65)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate advisor be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

Exchange Program

Stanford MIP-Vienna School of International Studies Academic Exchange

The Stanford MIP-Vienna School of International Studies Academic Exchange is an Autumn Quarter exchange program between the Ford Dorsey Master's in International Policy and the Diplomatische Akademie Wien – Vienna School of International Studies (DA). Two second-year students from each institution are selected by application to receive fellowships to spend Autumn Quarter in an academic exchange at the other institution where they take courses as full-time students, pursue extracurricular activities, and participate in the academic life of the host institution.

MIP students participating in the exchange program must complete all requirements listed in the M.A. curriculum. However, the minimum number of Stanford units required to graduate will be 65. In addition to the minimum requirement of 65 units, students must complete, at minimum, the equivalent of 15 units (4 or more full-time courses) at the DA. MIP students selected for the exchange must submit their list of

chosen DA courses to the MIP academic services team for approval, no later than the end of the first week of classes in autumn.

Students who are considering applying to the academic exchange program should assess how the courses taken at the DA will fit into their degree requirements.

While on exchange at the DA, MIP students' status will be listed as active but they are not considered enrolled at Stanford. In addition, MIP students receive an academic transcript from the DA for Autumn Quarter. Hence, there is no reference to the exchange on a MIP student's Stanford transcript.

For further information, please see the Stanford-Vienna Academic Exchange (https://fsi.stanford.edu/masters-degree/content/stanford-vienna-exchange/) section of the MIP website.

Joint Degree Programs

Up to a maximum of 45 units, or one year, of the University residency requirement can be credited toward both graduate degree programs (i.e., the joint degree may require up to 45 fewer units than the sum of the individual degree unit requirements). For example, an M.A./M.P.P. has a three-year residency requirement, one year less than what is required for the separate degrees. The reduced requirement recognizes the subject matter overlap between the fields comprising the joint degree.

Juris Doctor and Master of Arts in International Policy (J.D./M.A.)

Students may choose to pursue a joint J.D./M.A. in International Policy degree. The joint degree program combines the strengths of the Law School and MIP. Prospective students interested in this joint degree program may apply concurrently to both the Stanford Law School (SLS) and the MIP program. Two separate application forms are required and applicants must submit LSAT scores to the Law School and GRE scores to MIP.

Academic Policies

The joint J.D. requires 111 units and the M.A. in International Policy requires 54 units. Joint students must complete the MIP core curriculum, area of specialization (14 units), and capstone. Students who originate their studies in the Stanford Law School may complete the required statistics sequence in Law instead of completing the INTLPOL sequence although it is not advisable. Note that there is generally one statistical course in Law instead of the two-course sequence in INTLPOL, and it does not sufficiently cover topics important for the MIP capstone course, so students who proceed with this option may be at a disadvantage. Approval from MIP is required to pursue this sequence. Any additional units that students need to complete would fall into the area of specialization. Additionally, the customized electives are not required for joint J.D. students who first matriculate at the law school; in some instances, they may not be required for students who matriculate into MIP.

How to Apply

Students already enrolled at SLS may apply to the joint J.D./M.A. in International Policy program no later than the end of the second year of Law School. Applications are due no later than Tuesday, January 12, 2021 by 11:59 pm PST. The MIP program makes admissions decisions based on the student's original application materials, which the student must have sent from the School of Law to MIP.

Submission of the following is required for consideration:

- Joint Degree Application Form (available from the MIP website (http://ips.stanford.edu/joint_program/))
- Law School Joint Degree Petition (details available on the SLS Joint Degree Application Process (https://law.stanford.edu/apply/how-to-apply/joint-degree-application-process/) webpage)
- Graduate Program Authorization Petition (submitted via Axess (http://axess.stanford.edu/))
- Tuition Agreement for Students with Multiple Programs (available for on the eForms portal on Axess)
- Current resume or curriculum vitae
- LSAT scores are sufficient (GRE scores are not required)

For further information, see the "J (p. 70)oint Degree Programs (p. 70)" section of this bulletin, the University Registrar's site (https://registrar.stanford.edu/students/graduate-degree-progress/joint-degree-program-information/), and the SLS' Joint and Cooperative Degree Programs (https://law.stanford.edu/education/degrees/joint-degrees-within-stanford-university/#slsnav-established-joint-degrees) website.

Master of Public Policy and Master of Arts in International Policy (M.P.P./M.A.)

The M.P.P./M.A. in International Policy joint degree program allows students to pursue study in both the Public Policy and International Policy (MIP) programs in three academic years of residence. Students that participate in this program gain depth of knowledge in both international and domestic policy issues.

Academic Policies

A joint degree is regarded by the University as distinct from either of its component degrees, and requirements for the joint degree differ from the sum of the requirements for the individual degrees. Joint students must complete 90 units for the M.P.P. and 80 units for the M.A. in International Policy. Up to a maximum of 45 units, or one year, of the University residency requirement can be credited toward both graduate degree programs (i.e., the joint degree requirements may contain up to 45 units less than the sum of the individual degree unit requirements). The M.P.P./M.A. in International Policy has a three-year residency requirement, one year less than the sum of the requirements for the separate degrees. This recognizes that there is a subject matter overlap between the fields comprising the joint degree.

The Public Policy Program strives to encourage an intellectual, professional, and social community among its students. For this reason, joint degree students are strongly encouraged to devote one year of full-time study at Stanford entirely to the Public Policy Program, rather than spacing Public Policy courses throughout their graduate careers.

How to Apply

Admission to the joint degree program requires admission to and matriculation in MIP as well as consent of that program. MIP students should consult the MIP Assistant Director for Academic and Student Affairs to express interest. Prospective applicants to Stanford should contact the MIP Recruitment and Admissions Manager.

Applications for graduate study in Public Policy are only accepted from:

1. students currently enrolled in any Stanford graduate or undergraduate degree program
2. from external applicants seeking a joint degree, or
3. from Stanford alumni who have graduated within the past five years.

To be considered for matriculation beginning in Autumn Quarter 2021-22, all application materials must be submitted by early April 2021 (visit the Public Policy website (https://publicpolicy.stanford.edu/academics/graduate/admissions/stanford-seniors-and-alumni/) for details). Please contact Public Policy directly if you are interested in applying since they set their own application deadlines and processes.

External applicants for joint degrees must apply to the department or school offering the other graduate degree (i.e., Ph.D., M.D., M.A., M.S., M.B.A., or J.D.), indicating an interest in the joint degree program; applicants admitted to the other degree program are then evaluated for admission to the M.P.P. or M.A. program. Applicants who are admitted to MIP may apply once they have received admission to the program but prior to matriculation in autumn quarter. They may also apply during the first or second year of the MIP program.

Details on the joint degree curriculum can be found on the Public Policy (https://publicpolicy.stanford.edu/academics/graduate/joint-degree-programs/) website.

For further information, see the "Joint Degree Programs (p. 70)" section of this bulletin and the University Registrar's site (https://registrar.stanford.edu/students/graduate-degree-progress/joint-degree-program-information/).

Dual Degree Programs

Students who have attended Stanford for at least one term and who are currently enrolled may apply to add a second degree program. The first step in the process is to consult with the primary degree program as well as the degree program to which the student is considering applying to add. Admissions and application requirements vary by graduate program. If a secondary degree program admits a student then she/he/they must submit a Graduate Program Authorization Petition to add the new degree program that will be pursued concurrently with the existing program.

It is important that the attempt to add degree programs be made while the student is enrolled. Otherwise, a new Application for Graduate Admission must be submitted and an application fee paid. Similarly, enrollment must be continuous if a new degree program is added after completion of an existing program. Summer quarter enrollment is optional for students who intend to begin a new degree program in the Autumn quarter, provided that they have been enrolled the prior Spring quarter.

Graduate Program Authorization Petitions are filed electronically in Axess (https://axess.stanford.edu/) and approved by the current and the new department. In addition, petitions from international students are routed to the Bechtel International Center for review. Upon all approvals, the student's record automatically updates with the requested changes.

MIP offers two dual degree programs that feature a more formalized course of study.

Master of Business Administration and Master of Arts in International Policy (M.B.A./M.A.)

The dual degree is designed for students who want to work at the intersection of business and the state both in the U.S. and abroad. Prospective students interested in this dual degree program may apply concurrently to both the Stanford Graduate School of Business and the MIP program. Two separate applications are required and applicants must submit GRE scores with each application.

Academic Policies

Completing this combined course of study requires approximately three academic years, depending on the student's background and quantitative preparation. Admissions processes for both programs are completely independent of each other and units from courses can only be applied to one degree or the other, not both. Students enrolled in this dual degree program are required to complete 90 units for the M.B.A. and 54 units for the M.A. in International Policy. Please contact the MBA Program office and MIP Assistant Director for Academic and Student Affairs for details.

How to Apply

Students already enrolled at the Stanford Graduate School of Business may apply to the M.B.A./M.A. in International Policy dual degree program no later than the end of the first year. The MIP program has one annual application deadline by which applications are due no later than 11:59 pm PST on Tuesday, January 12, 2021. Applicants from the Graduate School of Business must request to have their original application sent to MIP for review. Additionally, submission of the following is required for consideration:

- Dual Degree Application Form (available from the MIP website (http://ips.stanford.edu/joint_program/))
- Stanford Official Transcript
- Graduate Program Authorization Petition (submitted via Axess (http://axess.stanford.edu/))
- Tuition Agreement for Students with Multiple Programs (available for on the eForms portal on Axess)

Master of Science in Environment and Resources and Master of Arts in International Policy (M.S./M.A.)

The dual degree with the Emmett Interdisciplinary Program in Environment and Resources (E-IPER) provides MIP students the opportunity to deepen their understanding of the science, technology and engineering that underlies current environmental problems. This understanding, integrated with their professional education in International Policy, provides a unique lens for future leaders and innovators to influence and solve the world's most challenging environmental and sustainability problems.

For the dual degree, students must meet the University's minimum requirements for their M.A. degree and also complete an additional 45 units for the M.S. in Environment and Resources. Completion of the M.S. typically requires at least three quarters of study in addition to the time required for the student's M.A. degree. For additional information, see the E-IPER website (https://pangea.stanford.edu/eiper/).

Academic Policies

Dual degree students must meet the University's minimum requirements for both the M.S. and M.A.; course units may not be counted towards both degrees. The M.S. in Environment and Resources requires a minimum of 45 units while the M.A. in International Policy requires a minimum of 80 units. In general, students will likely complete the dual degree program in nine academic quarters, however, there are uncommon instances in which it may be possible to complete it in as few as seven. The M.S. degree can be conferred separately from the M.A., however it may be beneficial to maintain both careers in order to transfer courses between the two programs.

How to Apply

Students pursuing the dual degree must obtain approval from MIP and E-IPER to ensure their dual MS Program Plan meets the curricular expectations of both programs. As a first step, MIP students should plan to discuss their interest with the MIP Assistant Director for Academic and Student Affairs. They should also plan to meet with the E-IPER Joint M.S. Student Services Officer.

Applications from first-year MIP students are due annually in Winter Quarter. In exceptional cases, second-year MIP students may apply to E-IPER. These students must demonstrate their interest in and commitment to the M.S. degree by completing or enrolling in a minimum of nine units of E-IPER related coursework by the time of their application. This minimum requirement does not guarantee admission. The application deadline is January 31, 2021 for the 2020-21 Academic Year.

For application information, see the Admissions (https://earth.stanford.edu/eiper/joint-ms-admissions/) page on the E-IPER website (https://earth.stanford.edu/eiper/).

Area of Specialization Curriculum

The Ford Dorsey Master's in International Policy (MIP) offers four areas of specialization:

- Cyber Policy and Security (CYBER)
- Energy, Natural Resources, and the Environment (ENRE)
- Governance and Development (GOVDEV)
- International Security (ISEC)

Each specialization is guided by one -or more- major research centers at the Freeman Spogli Institute for International Studies at Stanford. This collaboration provides MIP students with exposure to cutting-edge research on global policy issues. Students are required to choose one area of specialization and complete at least five courses within the specialization for a minimum of 20 total units. Each area of specialization requires the completion of two required courses (indicated on the Master's tab), and at least three elective courses from an approved list, as shown below. Due to the recent changes in the MIP program curriculum, the following specialization elective course lists may be updated over the course of the academic year.

Cyber Policy and Security

		Units
COMM 257	Information Control in Authoritarian Regimes	4-5
CS 106A	Programming Methodology	3-5
CS 181	Computers, Ethics, and Public Policy	4
CS 182	Ethics, Public Policy, and Technological Change	5
CS 251	Cryptocurrencies and blockchain technologies	3
EARTHSYS 262	Data for Sustainable Development	3-5
INTLPOL 200	The Social & Economic Impact of Artificial Intelligence	1
INTLPOL 221	Politics of Data: Algorithmic Culture, Big Data, and Information Waste	3-4
INTLPOL 225	Technology Policy, Innovation, and Startup Ecosystems: Japan and Comparative Perspectives	3
INTLPOL 251	Cybersecurity: A Legal and Technical Perspective	2
INTLPOL 252	Cyber Risk: A Multidisciplinary Approach	2-3
INTLPOL 253	AI and Rule of Law: A Global Perspective	2-3
INTLPOL 257	Technology & Public Purpose: Practical Solutions for Innovation's Public Dilemmas	4-5
INTLPOL 258	Psychology, Influence, and Propaganda	4
INTLPOL 259	Research Topics in Technology and National Security	1-3
INTLPOL 259A	Research Seminar on Cybersecurity: Automotive Safety, Security, and Privacy	2-4
INTLPOL 268D	Online Open Source Investigation	3-4
INTLPOL 269	Cyber Law: International and Domestic Legal Frameworks for Cyber Policy	2
INTLPOL 323	Free Speech, Democracy and the Internet	2-3
INTLPOL 361	Foundations of Internet Speech Platform Regulation	3
INTLPOL 362	Data: Privacy, Property and Security	3
INTLPOL 363	Confronting Misinformation Online: Law and Policy	2
LAW 4039	Regulating Artificial Intelligence	3
LAW 4048	Regulating Internet Speech Platforms	2-3
MS&E 297	"Hacking for Defense": Solving National Security issues with the Lean Launchpad	3-4

Energy, Natural Resources, and the Environment

		Units
CEE 207A	Understanding Energy	3-5
CEE 207S	Understanding Energy - Essentials	3-4
CEE 218X	Shaping the Future of the Bay Area	3-5
CEE 218Y	Shaping the Future of the Bay Area	3-5
CEE 241C	Global Infrastructure Projects Seminar	1-2
CEE 257	Sustainable Finance and Investment Seminar	1
CEE 263D	Air Pollution and Global Warming: History, Science, and Solutions	3
CEE 265D	Water and Sanitation in Developing Countries	1-3
CEE 265E	Adaptation to Sea Level Rise and Extreme Weather Events	3
CEE 273S	Electricity Economics	3
CS 325B	Data for Sustainable Development	3-5
EARTHSYS 159	Economic, Legal, and Political Analysis of Climate-Change Policy	5
EARTHSYS 185	Feeding Nine Billion	4-5
EARTHSYS 206	World Food Economy	5
EARTHSYS 243	Environmental Advocacy and Policy Communication	3
EARTHSYS 288	Social and Environmental Tradeoffs in Climate Decision-Making	1-2
ECON 155	Environmental Economics and Policy	5
ECON 251	Natural Resource and Energy Economics	2-5
ENERGY 271	Energy Infrastructure, Technology and Economics	3
ENVRES 222	Climate Law and Policy	3
ENVRES 226	Energy Law	3
ENVRES 240	Environmental Decision-Making and Risk Perception	1-3
ENVRES 380	Innovating Large Scale Sustainable Transformations/Collaborating for the Future	3-4
HISTORY 303E	Infrastructure & Power in the Global South	4-5
INTLPOL 266	Managing Nuclear Waste: Technical, Political and Organizational Challenges	3
INTLPOL 271	Climate Politics: Science and Global Governance	3-4
INTLPOL 272	Empirical Methods in Sustainable Development	3-5
INTLPOL 358	Business, Social Responsibility, and Human Rights	3
INTLPOL 371	Policy Practicum: Assessing the Impact of China's Global Infrastructure Spending on Climate Change	2-3
LAW 2503	Energy Law	3
LAW 2504	Environmental Law and Policy	3
LAW 2508	The Business of Water	2
LAW 2513	Climate: Politics, Finance, and Infrastructure	2-3

LAW 7823	International Negotiation: Solving Intractable Conflict	3
MS&E 243	Energy and Environmental Policy Analysis	3
PUBLPOL 265F	Environmental Governance and Climate Resilience	3

Governance and Development

		Units
AFRICAST 235	Designing Research-Based Interventions to Solve Global Health Problems	3-4
CEE 265D	Water and Sanitation in Developing Countries	1-3
COMM 230A	Digital Civil Society	3
CS 325B	Data for Sustainable Development	3-5
EARTHSYS 262	Data for Sustainable Development	3-5
EASTASN 289K	Korea and the World	3
ECON 246	Labor Economics I	2-5
EDUC 306A	Economics of Education in the Global Economy	5
HISTORY 303E	Infrastructure & Power in the Global South	4-5
INTLPOL 203	Trade and Development	3-5
INTLPOL 204A	Microeconomics for Policy	4-5
INTLPOL 204B	Economic Policy Analysis for Policymakers	4-5
INTLPOL 207	Economics of Corruption	3-5
INTLPOL 214	Refugees in the Twenty-first Century	3-5
INTLPOL 215	Special Topics: State-Society Relations in the Contemporary Arab World-Key Concepts and Debates	5
INTLPOL 218	Political Mobilization and Democratic Breakthroughs	3-5
INTLPOL 224	Economic Development and Challenges of East Asia	3-5
INTLPOL 225	Technology Policy, Innovation, and Startup Ecosystems: Japan and Comparative Perspectives	3
INTLPOL 227	Finance, Corporations, and Society	4
INTLPOL 230	Democracy, Development, and the Rule of Law	3-5
INTLPOL 231B	Understanding Russia: Its Power and Purpose in a New Global Order	5
INTLPOL 238	Social Movements in the Post Spring Arab World	4
INTLPOL 239	State responses to the COVID-19 pandemic in the Arab world	3
INTLPOL 242	American Foreign Policy: Interests, Values, and Process	5
INTLPOL 244	U.S. Policy toward Northeast Asia	4
INTLPOL 253	AI and Rule of Law: A Global Perspective	2-3
INTLPOL 257	Technology & Public Purpose: Practical Solutions for Innovation's Public Dilemmas	4-5
INTLPOL 280	Transitional Justice, Human Rights, and International Criminal Tribunals	3-5
INTLPOL 281	Global Poverty and the Law	3
INTLPOL 290	Practical Approaches to Global Health Research	1-3
INTLPOL 291	Theories of Change in Global Health	3-4
INTLPOL 323	Free Speech, Democracy and the Internet	2-3
INTLPOL 350	International Law	4
INTLPOL 351	Law of Democracy	3
INTLPOL 352	State Building and the Rule of Law Seminar	3
INTLPOL 353	Policy Practicum: Human Rights & International Justice	3-5
INTLPOL 355	International Human rights	3
INTLPOL 357	Transitional Justice	3
INTLPOL 358	Business, Social Responsibility, and Human Rights	3
INTNLREL 123	The Future of the European Union: Challenges and Opportunities	5
LAW 5036	Law and Ethics of War	2
MED 271	Global Biodesign: Medical Technology in an International Context	1
POLECON 680	Foundations of Political Economy	4
POLECON 683	Political Development Economics	3
POLISCI 110G	Governing the Global Economy	5
POLISCI 147	Comparative Democratic Development	5
POLISCI 147P	The Politics of Inequality	5
POLISCI 325L	Law and the New Political Economy	3-5
POLISCI 347G	Governance and Poverty	3-5
POLISCI 348S	Latin American Politics	3-5
POLISCI 441L	Grad Seminar on Middle Eastern Politics	3-5
SOC 217B	Chinese Politics and Society	3-5
STRAMGT 325	Formation of Impact Ventures	3
STRAMGT 345	Taking Social Innovation to Scale	3
STRAMGT 584	Assessing High Impact Business Models in Emerging Markets	2

International Security

		Units
EASTASN 243	Taiwan's Democratic Evolution	3-5
EASTASN 289K	Korea and the World	3
HISTORY 303E	Infrastructure & Power in the Global South	4-5
HISTORY 349	Bodies, Technologies, and Natures in Africa	4-5
INTLPOL 210	The Politics of International Humanitarian Action	3-5
INTLPOL 213	International Mediation and Civil Wars	3-5
INTLPOL 214	Refugees in the Twenty-first Century	3-5
INTLPOL 217	The Future of Global Cooperation	3-4
INTLPOL 221	Politics of Data: Algorithmic Culture, Big Data, and Information Waste	3-4
INTLPOL 231B	Understanding Russia: Its Power and Purpose in a New Global Order	5

SOC 309	Nations and Nationalism	3-5

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a “credit” or “no credit” grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a “credit” or “satisfactory” grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Graduate Degree Requirements

Grading

International Policy counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of graduate degree requirements that otherwise require a letter grade. Instructors are required to track progress so that students may demonstrate that they are maintaining a high standard of academic performance. Students should proactively engage with their instructors on course progress and performance. If there are concerns, students should discuss them with the instructor and MIP Assistant Director for Academic and Student Affairs.

Graduate Advising Expectations

International Policy (MIP) is committed to providing academic advising in support of graduate student scholarly and professional development. When most effective, this advising relationship entails collaborative and sustained engagement by both the adviser and the advisee. As a best practice, advising expectations should be periodically discussed and reviewed to ensure mutual understanding. Both the adviser and the advisee are expected to maintain professionalism and integrity. Graduate students are active contributors to the advising relationship, proactively seeking academic and professional guidance and taking responsibility for informing themselves of policies and degree requirements for their graduate program.

Each student in the MIP program is assigned a faculty adviser as well as a program adviser and a career adviser. The faculty adviser, who is assigned in September of the student's first quarter of matriculation, is identified based on a student's interests and area of specialization. The expectation is that students meet with their faculty advisers on a quarterly basis, at minimum. Please note that it is the student's responsibility to schedule the advising meetings. In addition to the faculty adviser, the program adviser (i.e., MIP Assistant Director for Academic and Student Services) advises all students in the program by providing guidance and support on degree requirements and progress, academic policy interpretation and enforcement, degree program support, personal support, and other matters as needed. The career adviser (i.e., MIP Career Services and Alumni Affairs Manager) provides support on internships, careers, and professional development.

To expand, faculty advisers guide students in key areas such as exploring academic opportunities and professional pathways, understanding and interpreting the university ecosystem, and identifying ways to pursue one's interests at Stanford. MIP students should view the faculty adviser as an entry point to their interests, and they are actively encouraged to meet broadly with other faculty as well.

Academic progress and student completion of program requirements and milestones are monitored by MIP Assistant Director for Academic and Student Affairs. MIP students (including coterminal, dual, and joint degree students) are required to submit a program proposal to the department during spring quarter of their first year of enrollment in the program. This time frame is different from general University policy. The program proposal, which is a formal milestone, establishes a student's individual program of study to meet University and department degree requirements. Students must amend the proposal formally if their plans for meeting degree requirements change. The form is available on the MIP website (https://fsi.stanford.edu/masters-degree/). Additional information on the Master’s Program Proposal is available in the “Graduate Degrees (p. 65)” section of this bulletin.

Additionally, the program adheres to the advising guidelines and responsibilities listed by the Office of the Vice Provost for Graduate Education (https://vpge.stanford.edu/academic-guidance/advising-mentoring/) (VPGE) and in the Graduate Academic Policies (https://gap.stanford.edu/handbooks/gap-handbook/chapter-3/subchapter-3/page-3-3-1/) (GAP).

Courses

INTLPOL 200. The Social & Economic Impact of Artificial Intelligence. 1 Unit.
Recent advances in computing may place us at the threshold of a unique turning point in human history. Soon we are likely to entrust management of our environment, economy, security, infrastructure, food production, healthcare, and to a large degree even our personal activities, to artificially intelligent computer systems. The prospect of "turning over the keys" to increasingly autonomous systems raises many complex and troubling questions. How will society respond as versatile robots and machine-learning systems displace an ever-expanding spectrum of blue- and white-collar workers? Will the benefits of this technological revolution be broadly distributed or accrue to a lucky few? How can we ensure that these systems are free of algorithmic bias and respect human ethical principles? What role will they play in our system of justice and the practice of law? How will they be used or abused in democratic societies and autocratic regimes? Will they alter the geopolitical balance of power, and change the nature of warfare? The goal of CS22a is to equip students with the intellectual tools, ethical foundation, and psychological framework to successfully navigate the coming age of intelligent machines.
Same as: CS 22A

INTLPOL 203. Trade and Development. 3-5 Units.
(Formerly IPS 203) This course analyzes the role of international trade in the development experience of countries. Amongst the topics covered are the instruments of trade policy, the developmental impact of trade liberalization/protectionism, and trade policy formulation, with particular attention to the political economy of trade policy. Given the current international trade environment, students will also debate the rise of trade protectionism, as well as discuss policies to enhance the benefits (winners) and address the costs (losers) of trade liberalization. The purpose of the course is to equip students with the tools to analyze international trade issues, propose policies, and assess the feasibility of policy implementation, particularly in the context of trade as a development strategy. Students will also dissect several common myths about international trade, such as the recent populist message that "trade deficits are bad." In addition, the "In the News" segment in class will discuss and analyze current events in areas relevant to the course.
Prerequisites: ECON 1.

INTLPOL 204A. Microeconomics for Policy. 4-5 Units.
Microeconomic concepts relevant to decision making. Topics include: competitive market clearing, price discrimination; general equilibrium; risk aversion and sharing, capital market theory, Nash equilibrium; welfare analysis; public choice; externalities and public goods; hidden information and market signaling; moral hazard and incentives; auction theory; game theory; oligopoly; reputation and credibility. Undergraduate Public Policy students may take PublPol 51 as a substitute for the Econ 51 major requirement. Economics majors still need to take Econ 51.
Prerequisites: ECON 50 and MATH 51 or equiv.
Same as: PUBLPOL 51, PUBLPOL 301A

INTLPOL 204B. Economic Policy Analysis for Policymakers. 4-5 Units.
This class provides economic and institutional background necessary to conduct policy analysis. We will examine the economic justification for government intervention and illustrate these concepts with applications drawn from different policy contexts. The goal of the course is to provide you with the conceptual foundations and the practical skills and experience you will need to be thoughtful consumers or producers of policy analysis. Prerequisites: ECON 102B or PUBLPOL 303D.
Same as: PUBLPOL 301B

INTLPOL 207. Economics of Corruption. 3-5 Units.
(Formerly IPS 207) This course applies economic tools to understanding and analyzing the developmental impact and determinants of corruption, as well as policy initiatives to address corruption. In addition to theories of corruption, students evaluate several case studies, randomized experiments, and empirical evidence, including from Argentina, Botswana, Brazil, China, Guatemala, India, Indonesia, Mexico, Uganda, the United Kingdom, and the United States. The "Corruption in the News" section supplements the class material.

INTLPOL 207B. Public Policy and Social Psychology: Implications and Applications. 4 Units.
Theories, insights, and concerns of social psychology relevant to how people perceive issues, events, and each other, and links between beliefs and individual and collective behavior will be discussed with reference to a range of public policy issues including education, public health, income and wealth inequalities, policing and climate change, Specific topics include: situationist and subjectivist traditions of applied and theoretical social psychology; social comparison, dissonance, and attribution theories; stereotyping and stereotype threat, and sources of intergroup conflict and misunderstanding; challenges to universality assumptions regarding human motivation, emotion, and perception of self and others; also the general problem of producing individual and collective changes in norms and behavior.
Same as: PSYCH 216, PUBLPOL 305B

INTLPOL 210. The Politics of International Humanitarian Action. 3-5 Units.
(Formerly IPS 210) The relationship between humanitarianism and politics in international responses to civil conflicts and forced displacement. Focus is on policy dilemmas and choices, and the consequences of action or inaction. Case studies include northern Iraq (Kurdistan), Bosnia, Rwanda, Kosovo, and Darfur. In addition to class attendance, each student will meet with the instructor for multiple one-on-one sessions during the quarter.

INTLPOL 213. International Mediation and Civil Wars. 3-5 Units.
(Formerly IPS 213) This graduate seminar will examine international mediation efforts to achieve negotiated settlements for civil wars over the last two decades. Contending approaches to explain the success or failure of international mediation efforts will be examined in a number of cases from Africa (Sudan, Sierra Leone, Burundi), the Balkans (Bosnia, Macedonia), and Asia (Cambodia, Indonesia/Aceh). In addition to class attendance, each student will meet with the instructor for multiple one-on-one sessions during the quarter. Satisfies the IPS Policy Writing Requirement.

INTLPOL 214. Refugees in the Twenty-first Century. 3-5 Units.
(Formerly IPS 214) The focus of this graduate seminar is policy dilemmas in international responses to massive population movements. In 2015 and 2016 hundreds of thousands of persons from the Middle East (particularly Syria) and Africa fled their home countries and attempted to cross into Europe by sea. In September 2016, the United Nations General Assembly unanimously adopted the "New York Declaration for Refugees and Migrants". This political declaration aims to improve the international response to large movements of refugees and migrants, including protracted refugee situations. One of the many challenges confronting this multilateral diplomatic undertaking is that the definition of the word "refugee" is contested, as is the process to determine who is a refugee. This course will provide an immersive examination of the causes and consequences of refugee movements. This course is a seminar that requires full student attendance and participation. A focus of the course is to develop the skills of students in writing policy memos. Students will meet with the instructor for multiple one-on-one sessions on their policy memos.

INTLPOL 215. Special Topics: State-Society Relations in the Contemporary Arab World-Key Concepts and Debates. 5 Units.
(Formerly IPS 215) This course looks at key concepts pertaining to state-society relations in the Arab world as they have evolved in regional intellectual and political debates since the 1990s. Citizenship, minority rights, freedom of expression, freedom of association, the rule of law, government accountability, independence of the judiciary, civil-military relations, and democratic transition will be among the concepts discussed.
Same as: POLISCI 215A

INTLPOL 217. The Future of Global Cooperation. 3-4 Units.
As threats to peace and security emerge, should states respond unilaterally, build ad hoc coalitions of the willing, or work through multilateral institutions? What are the benefits and risks of global cooperation? This seminar interrogates these questions by examining the role that international organizations play in responding to global threats in the modern era. The first section focuses on the advent of the modern global institutional architecture, considering its historical context, theoretical underpinnings, sources of legitimacy and power (or lack thereof), and the role of regional, subnational, and nongovernmental actors. The second section weighs the efficacy of global institutions in responding to transnational crises by delving into recent case studies, including the Syrian war, the Paris Climate Accord, the Iran Nuclear Deal, the 2014-2016 Ebola outbreak in West Africa, and the COVID-19 pandemic. The final section explores the future of the liberal world order and its institutions, and considers alternative models of global cooperation. Students should enroll for three units. Those who wish to receive an additional unit of credit must write a long policy memo. See syllabus for details. Enrollment is capped. Course is cross-listed with LAW 5039.
Same as: PUBLPOL 217

INTLPOL 218. Political Mobilization and Democratic Breakthroughs. 3-5 Units.
Mass political mobilization occurs in both democracies and autocracies. Sometimes political protests, demonstrations, and acts of nonviolence civic resistance undermine autocracies, produce democratic breakthroughs, or generate democratic reforms. Other times, they do not. This course explores why, first examining the original causes of mobilization, and then understanding why some movements succeed and others fail. The first sessions of the course will review theories of revolution, social movements, and democratization. The remainder of the course will do deep dives into case studies, sometime with guest lecturers and participants from these historical moments. Cases to be discussed will likely include the U.S. civil rights movement (1960s), Iran (1978 and 2009), Chile (1988), Eastern Europe (1989), China/Hong Kong (1989, 2011, 2019), USSR/Russia (1991 & 2011), South Africa (1990s), Serbia (2000), Egypt and Arab Spring (2011), Ukraine (2004 and 2013), and Black Lives Matter (2000s).
Same as: POLISCI 242G, POLISCI 342G

INTLPOL 220. Comparative Political Economy of Development. 3 Units.
Review of how nations develop politically and economically. Theories of state development, the role of institutions, inequality and societal divisions, the impact of natural resources, the consequences of corruption, and the effect of globalization on the world's poor. The seminar introduces the key theories relevant to state-building generally, and strengthening the rule of law in particular. Bridges theory and practice.

INTLPOL 221. Politics of Data: Algorithmic Culture, Big Data, and Information Waste. 3-4 Units.
(Formerly IPS 221) This course examines the role of data and algorithms in politically significant phenomena such as fake news,Twitter bots, prediction markets, racial profiling, autonomous robotic weapons, cryptocurrencies, and hacked elections. Readings are drawn from science & technology studies, information science, anthropology, communication, media studies, legal theory, sociology, and computer science, with additional contributions from psychology and philosophy. Non-technical, but minimal familiarity with computers and data analysis is assumed. Assignments include reading logs, a midterm exam, and a term paper. NOTE: Enrollment priority will be given to graduate students, with a preference for MIP students. Undergraduate enrollment is limited to seniors, with priority given to STS majors.

INTLPOL 224. Economic Development and Challenges of East Asia. 3-5 Units.
(Formerly IPS 224) This course explores East Asia's rapid economic development and the current economic challenges. For the purpose of this course, we will focus on China, Japan, and Korea. The first part of the course examines economic growth in East Asia and the main mechanisms. In this context, we will examine government and industrial policy, international trade, firms and business groups, and human capital. We will discuss the validity of an East Asian model for economic growth. The second part of the course focuses on the current economic challenges confronting these countries, such as, political economy, human capital, inequality, and entrepreneurship and innovation. Readings will come from books, journal articles, reports, news articles, and case studies. Many of the readings will have an empirical component and students will be able to develop their understanding of how empirical evidence is presented in articles. Prerequisites: INTPOL 301B, Polisci150A(355A), Econ 102B or equivalent courses that cover regression analysis.
Same as: ECON 124

INTLPOL 225. Technology Policy, Innovation, and Startup Ecosystems: Japan and Comparative Perspectives. 3 Units.
This course asks big questions and provides detailed analysis about how governments, policies, and politics can shape technologies, innovation, and startup ecosystems through closely examining Japan¿s political economy in a comparative perspective. The experience of Japan¿s technological advances, historical trajectories of innovation, along with its recent struggles and maturing startup ecosystem are introduced through scholarship about governing and shaping markets, analyses of the Silicon Valley ecosystem, and numerous specific cases of policy areas, technologies, and firms. There are no prerequisites for this course. Each class session will consist of lecture material and active discussion.

INTLPOL 227. Finance, Corporations, and Society. 4 Units.
Both "free market capitalism" and democracy are in crisis around the world. This interdisciplinary course will help you understand the issues by exploring the interactions between the financial system, corporations, governments, and broader society. Topics include basic financial decisions of individuals and corporations, consumer finance (including mortgages, student loans, insurance and savings), financial markets and firms, corporations and their governance, the role of disclosures and regulations, political economy and government institutions, and the role of the media. We will discuss current events and policy debates regularly throughout the course. The approach will be rigorous and analytical but not overly mathematical. Visitors with relevant experience will enrich the discussion.
Same as: ECON 143, POLISCI 127A, PUBLPOL 143

INTLPOL 230. Democracy, Development, and the Rule of Law. 3-5 Units.
This course explores the different dimensions of development - economic, social, and political - as well as the way that modern institutions (the state, market systems, the rule of law, and democratic accountability) developed and interacted with other factors across different societies around the world. The class will feature additional special guest lectures by Francis Fukuyama, Larry Diamond, Michael McFaul, Anna Grzymala-Busse, and other faculty and researchers affiliated with the Center on Democracy, Development, and the Rule of Law. Undergraduate students should enroll in this course for 5 units. Graduate students should enroll for 3.
Same as: INTNLREL 114D, POLISCI 114D, POLISCI 314D

INTLPOL 231B. Understanding Russia: Its Power and Purpose in a New Global Order. 5 Units.
Russia presents a puzzle for theories of socio-economic development and modernization and their relationship to state power in international politics. The collapse of the Soviet Union in 1991 brought into being the new Russia (or Russian Federation) as its successor in international politics. Russia suffered one of the worst recessions and experienced 25 years of halting reform. Despite these issues, Russia is again a central player in international affairs. Course analyzes motivations behind contemporary Russian foreign policy by reviewing its domestic and economic underpinnings. Examination of concept of state power in international politics to assess Russia's capabilities to influence other states' policies, and under what conditions its leaders use these resources. Is contemporary Russia strong or weak? What are the resources and constraints its projection of power beyond its borders? What are the determinants of state power in international politics in the twenty-first century? Includes lectures, readings, class discussions, films and documentaries.
Same as: POLISCI 213C, REES 231B

INTLPOL 232. Foreign Policy Decision Making in Comparative Perspective. 3 Units.
This seminar will examine how countries and multilateral organizations make decisions about foreign and international policy. The hypothesis to be explored in the course is that individuals, bureaucracies, and interest groups shape foreign policy decisions. That hypothesis will be tested against other more structural explanations of how countries behave in the international system. After a brief review of the academic literature in the first part of the course, the seminar will focus on several cases studies of foreign policy decision-making by the United States, China, Russia, Iran, and North Korea, as well as the United Nations and NATO. This seminar is intended for masters students and fourth-year undergraduates. NOTE: Please send a one-page document to Bronte Kass, bkass@stanford.edu, by March 9th with the following information: full name, class year, major, contact email, which version of the course you want to enroll in (e.g., POLISCI or INTLPOL). In the document, please also outline previous associated coursework and/or relevant experience and your interest in enrolling in the seminar. Application results will be announced on March 20th. Any questions related to this course or office hours with Professor McFaul should be directed to Mahlorei Bruce-Apalis at mahlorei@stanford.edu.
Same as: POLISCI 242, POLISCI 342

INTLPOL 233. Presidential Decision Making in Wartime. 3 Units.
This course will analyze how presidents approach the most consequential matters of war and peace. It will discuss how presidents oversee military operations once initiated. It will consider how presidents can avoid embarking on objectives that are unlikely to succeed at reasonable cost.
Same as: A Practitioner's Handbook

INTLPOL 236. American Grand Strategy. 3 Units.
This course examines the origin and practice of American grand strategy in foreign affairs. The course will cover the making of American grand strategy and focus on applying these models to evaluate trends in American foreign policy after World War II. The course will also explore alternative approaches to grand strategy from the perspective of China and Russia, ¿great power competitors¿ that the Trump administration has sought to define as a focal point for U.S. foreign policy. Throughout the quarter, we will consider the merits and risks of a ¿grand strategy¿ approach to the world after the end of the Cold War, and whether it is realistic in a hyper-partisan era to agree on bipartisan principles for America¿s proper role in the world. We will aim to develop such a set of principles. Enrollment priority will be given to graduate students.

INTLPOL 238. Social Movements in the Post Spring Arab World. 4 Units.
This course analyzes the role of social movements such as labor movements, student unions, women¿s movements, and human rights groups in shaping political realities in the Arab world after the brief period of democratic uprisings 2011-2013. It develops an in depth understanding of the challenges facing social movements in a social environment shaped by patriarchal values and in a political landscape driven by autocratic governments.

INTLPOL 239. State responses to the COVID-19 pandemic in the Arab world. 3 Units.
The emergence of the Covid-19 crisis has brought to light the long-term governance challenges confronting states in the Arab region. The ongoing efforts on the part of Arab governments to contain the outbreak and contend with its social and economic repercussions highlight a host of fundamental structural and institutional flaws in the dominant governance frameworks in the Arab region. At the same time, they highlight new patterns of political contestation between governments and various social forces, as well as among important bureaucratic and state actors. In some Arab countries, governments have lacked transparency and attempted to control public debates about the pandemic by silencing independent media outlets whenever their coverage contradicted official narratives. Elsewhere, pubic pressures have compelled some governments to abandon their initially secretive approaches in favor of a more transparent handling of the pandemic. This course seeks to analyze state responses to the pandemic in the Arab world, highlighting differences between countries such as Egypt, Saudi Arabia, and Tunisia.

INTLPOL 240. Contemporary Issues in International Security. 4 Units.
This seminar examines crucial foreign policy and defense-related challenges. Emphasis is on understanding how the recent past produced today's challenges and evaluating alternative strategies intended to overcome them. Topics include great power competition; terrorism and other transnational threats; security dynamics in South Asia and the Middle East; nuclear proliferation; disruptive technologies; and the interrelated problem set associated with climate change and environmental protection as well as energy, water, food, and health security. Students are expected to engage actively in class discussions, present on select course topics and write short weekly reflections. Enrollment priority will be given to students in the Master's in International Policy.

INTLPOL 241S. International Security in a Changing World. 3 Units.
This class examines the most pressing international security problems facing the world today: nuclear crises, non-proliferation, insurgencies and civil wars, terrorism, and climate change. Alternative perspectives - from political science, history, and STS (Science, Technology, and Society) studies - are used to analyze these problems.nn nnThe IPS241S listing is open to students enrolled via the Stanford Center for Professional Development only. It has been adapted to be available to online students. This class does NOT include the two-day international negotiation simulation.

INTLPOL 242. American Foreign Policy: Interests, Values, and Process. 5 Units.
(Formerly IPS 242) This seminar will examine the tension in American foreign policy between pursuing U.S. security and economic interests and promoting American values abroad. The course will retrace the theoretical and ideological debates about values versus interests, with a particular focus on realism versus liberalism. The course will examine the evolution of these debates over time, starting with the French revolution, but with special attention given to the Cold War, American foreign policy after September 11th, and the Obama administration. The course also will examine how these contending theories and ideologies are mediated through the U.S. bureaucracy that shapes the making of foreign policy. ** NOTE: The enrollment of the class is by application only. Please provide a one page double-spaced document outlining previous associated coursework and why you want to enroll in the seminar to Anna Coll (acoll@stanford.edu) by February 22nd. Any questions related to this course can be directed to Anna Coll.
Same as: GLOBAL 220, POLISCI 217A

INTLPOL 244. U.S. Policy toward Northeast Asia. 4 Units.
(Formerly IPS 244) This course offers a case-study approach to an examination of contemporary U.S. policy towards Japan, Korea, and China. It will look at the historical evolution of U.S. foreign policy and the dynamics and drivers of US policy in Northeast Asia. It will examine selected dimensions of US-China relations, US-Japan relations, and relations and policy toward South and North Korea. It will also discuss US relations with Russia and Taiwan. The class will focus on the cases of US security policy in the region, economic and trade policy, and human rights and democracy policy. Each week the class will combine lectures with student presentations in a seminar-style setting. Grades will be based on oral presentations, and on midterm and final take-home exams.

INTLPOL 244D. Asia-Pacific Transformation. 4 Units.
Post-WW II transformation in the Asia-Pacific region, with focus on the ascent of Japan, the development of newly industrialized capitalist countries (S. Korea and Taiwan), the emergence of socialist states (China and N. Korea), and the changing relationship between the U.S. and these countries.
Same as: SOC 167A, SOC 267A

INTLPOL 246. China's Foreign Policies: Objectives, Instruments, and Impacts. 4 Units.
(Formerly IPS 246) China is a global actor and its foreign policies are designed to protect and advance increasingly diverse interests in every country and region. Some interests and policies are common to all regions and have remained relatively stable over time; others are tailored to meet specific objectives and respond to the perceptions, objectives, and demands of particular countries. This course will help you to understand the domestic and international drivers and shapers of China¿s foreign policies and actions and how they have changed as China has become more developed, more prosperous, and more deeply integrated into the international system.

INTLPOL 247. Verification for 21st Century Arms Control Treaties. 3 Units.
Strong monitoring and verification are at the heart of an effective arms control treaty. The better we can monitor, the better we can verify that treaty obligations are met and nobody is cheating. Arms control monitoring is stuck in the past, however, with tools and methods unchanged from the first nuclear negotiations in the 1970s. Meanwhile, other international regimes have gone ahead, with environmental and resource management treaties making big strides in the use of ubiquitous sensing and other new technologies. This course will explore how to bring these innovations to the arms control arena and create treaties for the 21st century.

INTLPOL 250. International Conflict Resolution. 2 Units.
(Formerly IPS 250) (Same as LAW 5009; formerly Law 656) This seminar examines the challenges of managing and resolving intractable political and violent intergroup and international conflicts. Employing an interdisciplinary approach drawing on social psychology, political science, game theory, and international law, the course identifies various tactical, psychological, and structural barriers that can impede the achievement of efficient solutions to conflicts. We will explore a conceptual framework for conflict management and resolution that draws not only on theoretical insights, but also builds on historical examples and practical experience in the realm of conflict resolution. This approach examines the need for the parties to conflicts to address the following questions in order to have prospects of creating peaceful relationships: (1) how can the parties to conflict develop a vision of a mutually bearable shared future; (2) how can parties develop trust in the enemy; (3) how can each side be persuaded, as part of a negotiated settlement, to accept losses that it will find very painful; and (4) how do we overcome the perceptions of injustice that each side are likely to have towards any compromise solution? We will consider both particular conflicts, such as the Israeli-Palestinian conflict and the South African transition to majority rule, as well as cross-cutting issues, such as the role international legal rules play in facilitating or impeding conflict resolution, the ways intragroup dynamics affect intergroup conflict resolution efforts, and the role of criminal accountability for atrocities following civil wars. Special Instructions: Section 01: Grades will be based on class participation, written assignments, and a final exam. Section 02: Up to five students, with consent of the instructor, will have the option to write an independent research paper for Research (R) credit in lieu of the written assignments and final exam for Section 01. After the term begins, students (max 5) accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor.
Same as: PSYCH 383

INTLPOL 251. Cybersecurity: A Legal and Technical Perspective. 2 Units.
(Formerly IPS 251) This class will use the case method to teach basic computer, network, and information security from technology, law, policy, and business perspectives. Using real world topics, we will study the technical, legal, policy, and business aspects of an incident or issue and its potential solutions. The case studies will be organized around the following topics: vulnerability disclosure, state sponsored sabotage, corporate and government espionage, credit card theft, theft of embarrassing personal data, phishing and social engineering attacks, denial of service attacks, attacks on weak session management and URLs, security risks and benefits of cloud data storage, wiretapping on the Internet, and digital forensics. Students taking the class will learn about the techniques attackers use, applicable legal prohibitions, rights, and remedies, the policy context, and strategies in law, policy and business for managing risk. Grades will be based on class participation, two reflection papers, and a final exam. Special Instructions: This class is limited to 65 students, with an effort made to have students from Stanford Law School (30 students will be selected by lottery) and students from Computer Science (30 students) and International Policy Studies (5 students). Elements used in grading: Class Participation (20%), Written Assignments (40%), Final Exam (40%). Cross-listed with the Law School (Law 4004) and International Policy Studies (IPS course number TBD).
Same as: CS 203

INTLPOL 252. Cyber Risk: A Multidisciplinary Approach. 2-3 Units.
Our businesses, critical infrastructure and governments are under attack. Cyberattacks can be extremely complex or equally simple and reckless. Because of the unique attributes of cyberattacks, new risk management approaches are required to properly manage the cyber threat. Organizations must incorporate cyber risk management into business continuity planning. Technical security tools are useful, but not enough to protect organizations from cyber threats. Non-technical tools such as cyber insurance and the emerging field of defensive social engineering can complement technical solutions. Cyber metrics are essential to measuring and managing an organization¿s risk exposure and cyber defense budget. Policy and law is still emerging and extremely important for managing cyber risk. We will explore all these topics through this highly interactive course.

INTLPOL 253. AI and Rule of Law: A Global Perspective. 2-3 Units.
Advances in machine learning, big data, networked communications, and computing are transforming our world and fueling calls for regulation. This course--a joint venture of a Stanford law professor and a former Member of the European Parliament and leading voice on tech regulation--offers a global perspective on the profound legal and governance challenges posed by the new digital technologies. Students will emerge with an understanding of how tech is reshaping the global distribution of political authority, rights, and resources, the existing state of law and regulation in the U.S., Europe, China, and elsewhere, and the new democratic governance models that are emerging in response. Each class session will feature one or more distinguished speakers from around the world drawn from the ranks of government officials, judges, activists, and academics who work in the fields of human rights, privacy, free speech, trade, and national security. There are no course prerequisites, whether in law or otherwise. Students will be responsible for one-page responses to each week's readings and a research paper to be turned in at the spring paper deadline. Students can take the course for 2 or 3 units, depending on research paper length. This class is cross-listed with LAW 4050, and undergraduates and graduates are eligible to take it. Stanford Non-Law students may enroll in INTLPOL 253 directly in Axess. Non-law students wishing to enroll in LAW 4050 should complete the Non-Law Student Add Request form available at https://law.stanford.edu/education/courses/non-law-students/ for a permission number to enroll. Elements used in grading: Attendance, Class Participation, Written Assignments, Final Paper.

INTLPOL 256. Technology and National Security: Past, Present, and Future. 3-4 Units.
Explores the relation between technology, war, and national security policy from early history to modern day, focusing on current U.S. national security challenges and the role that technology plays in shaping our understanding and response to these challenges. Topics include the interplay between technology and modes of warfare; dominant and emerging technologies such as nuclear weapons, cyber, sensors, stealth, and biological; security challenges to the U.S.; and the U.S. response and adaptation to new technologies of military significance.
Same as: MS&E 193, MS&E 293

INTLPOL 257. Technology & Public Purpose: Practical Solutions for Innovation's Public Dilemmas. 4-5 Units.
The arc of innovative progress has reached an inflection point. Technological innovation has brought immeasurable benefits to billions through improved health, productivity, and convenience. Yet as recent events have shown, unless we actively manage their risks to society, ranging from privacy concerns, to rogue AI and gene editing, to massive potential job losses, to keeping up with China and others -- new technologies may also bring unforeseen destructive consequences. We will begin with a brief history of successful and unsuccessful governance of far reaching technological changes in the past. We then turn to key technologies and the dilemmas each create, in particular: digital/social media (privacy, truth, and election interference); AI/big data (algorithmic bias, etc); the coming biotech revolution (gene editing, bio weapons); driverless cars and car-less drivers: the future of work; and the role of China and other competitors. This class is designed for advanced students in international and public policy, or any technical discipline. The goal is to have a thoughtful exchange of ideas and you do not need prior expertise in any of these topics. We will have some fantastic guest speakers, and each class will be divided into understanding the problem, and thinking about some solutions. Enrollment will be limited to 20. You will learn to think and write like a policymaker tackling these novel concerns.

INTLPOL 258. Psychology, Influence, and Propaganda. 4 Units.
Propaganda has been a tool of statecraft since humans first organized themselves into societies. How do tools such as these convince people to change their attitudes, beliefs or behavior? What factors affect the psychological process related to social influence and persuasion? And how does the increasing importance of digital media as an information source affect these processes? This course will address these issues by focusing on the ways in which misleading and/or patently false information spread in today's information ecosystem, often as a result of foreign adversaries' efforts to shape public perception through the use of propaganda as well as coordinated bot networks and Internet trolls.

INTLPOL 259. Research Topics in Technology and National Security. 1-3 Unit.
Research on technology and national security, especially including but not limited to cyber conflict and information warfare, nuclear weapons, emerging technologies with relevance to national security. Student and faculty member will agree on one or more topics for research, and student will prepare a topic-relevant paper of approximately 4000 words per unit. A longer paper on one topic or two or three shorter papers on different topics are acceptable. May be repeated for credit.

INTLPOL 259A. Research Seminar on Cybersecurity: Automotive Safety, Security, and Privacy. 2-4 Units.
The course will explore the safety, security and privacy implications of the automobile. The modern automobile is a computer on wheels, with processors, sensors and networked connectivity managing hundreds of safety-critical functions. Automation will further drive the evolution of cars from the analog, mechanically-operated vehicles of the 20th century to the digital, AI-driven automobile of the 21st century. Overall, digitization has made cars safer, greener, and more enjoyable to ride in. But this digitization also introduces new risks. Cybersecurity vulnerabilities can expose vehicle occupants, commuters and pedestrians to safety and privacy risks. In addition to the physical, economic and psychological harms experienced by victims of cybersecurity attacks and intrusions, such attacks could undermine consumer and policy-maker confidence in the trustworthiness of digitally-dependent vehicles. The automotive industry and government regulators are in the formative stages of developing regulatory and governance frameworks for these risks, which may have broader implications for regulatory policy concerning digital technologies generally. Students will accompany the instructor on a deep dive into the regulatory, business, and geopolitical dimensions of the automobile. Each student will be expected to use the course to produce a publication-quality research paper on a relevant topic of their choosing (in consultation with the instructor), with mentorship from the instructor and peer support from fellow classmates. (Students may register for 2-4 units with increased research paper word count per unit. 10 slots, graduate students only, undergraduates by permission of instructor.) Note: Topic of course may change from year-to-year. Update in Winter Quarter 2021.

INTLPOL 266. Managing Nuclear Waste: Technical, Political and Organizational Challenges. 3 Units.
(Formerly IPS 266) The essential technical and scientific elements of the nuclear fuel cycle, focusing on the sources, types, and characteristics of the nuclear waste generated, as well as various strategies for the disposition of spent nuclear fuel - including reprocessing, transmutation, and direct geologic disposal. Policy and organizational issues, such as: options for the characteristics and structure of a new federal nuclear waste management organization, options for a consent-based process for locating nuclear facilities, and the regulatory framework for a geologic repository. A technical background in the nuclear fuel cycle, while desirable, is not required.
Same as: GEOLSCI 266

INTLPOL 268. Hack Lab. 3 Units.
(Formerly IPS 268) This course aims to give students a solid understanding of the most common types of attacks used in cybercrime and cyberwarfare. Taught by a long-time cybersecurity practitioner, a recovering cyberlaw litigator, and a group of hearty, motivated TAs, each session will begin with a lecture covering the basics of an area of technology and how that technology has been misused in the past. Students will then complete a lab section, with the guidance of the instructor and assistants, where they attack a known insecure system using techniques and tools seen in the field. Each week, there will be a second lecture on the legal and policy impacts of the technologies and techniques we cover. By the end of the course, students are expected to have a basic understanding of some of the most common offensive techniques in use today as well as a comprehensive overview of the most important aspects of cyberpolicy and law. No computer science background is required. All students must have access to a Windows, Mac OS X or Linux laptop.

INTLPOL 268D. Online Open Source Investigation. 3-4 Units.
This course is a practical introduction to online open source investigation -- internet research using free and publicly available information. The course will cover domain investigations, social media research, strategies for geolocation and chronolocation (placing videos or images at a point in time), image verification, and research on individuals. We will discuss the discovery process, i.e. identifying potentially inauthentic information in the first place. Students will learn best practices related to archiving and note taking. The goal of the course is to prepare students for online open source research in jobs in the public sector, with technology companies, human rights organizations, and other research and advocacy groups.

INTLPOL 269. Cyber Law: International and Domestic Legal Frameworks for Cyber Policy. 2 Units.
(Formerly IPS 269) Was Russia's interference in the 2016 U.S. elections an act of war? When do cyber attacks constitute a use of force? Is sovereignty in cyberspace different than in other domains, and can states meaningfully defend their sovereignty in cyberspace? Is hacking back against cyber thieves the legal equivalent of defending one's own property? How should states respond to cyber espionage and information operations, and what legal options are available? This course explores the domestic and international law of cyberspace and its application to significant practical challenges. It also addresses broader legal policy questions, including the extent to which law acts as a constraint on state and non-state actors in cyberspace, whether the application of existing law to cyber activities is sufficient or new laws and norms are needed, and how they could be developed. Policy and law students are welcome; no previous legal knowledge is required. Please note that the course will run 10 minutes longer per class session than listed due to American Bar Association requirements for the Stanford Law School. (Cross-listed with LAW 4035.).

INTLPOL 271. Climate Politics: Science and Global Governance. 3-4 Units.
(Formerly IPS 271) Provides a unique perspective on contemporary debates about climate change through a study of their long history. After some background about climate science and a look at how people thought about climate in the 18th, 19th, and early 20th centuries, we explore the co-evolution of climate science and climate politics from World War II to the present. The approach is to examine a series of political issues and debates that established human effects on the global atmosphere as serious problems. We then focus on the UN Framework Convention on Climate Change, the 2015 Paris Agreement, and the future of international climate policy. Assignments include in-class presentations and a policy brief.
Same as: HISTORY 202J

INTLPOL 272. Empirical Methods in Sustainable Development. 3-5 Units.
The determinants of human well-being over the short and long-run, including the role of environmental factors in shaping development outcomes. A focus on the empirical literature across both social and natural sciences, with discussion and assignments emphasizing empirical analysis of environment-development linkages, application of methods in causal inference, and data visualization.
Same as: ESS 268

INTLPOL 274. International Urbanization Seminar: Cross-Cultural Collaboration for Sustainable Urban Development. 4-5 Units.
(formerly IPS 274) Comparative approach to sustainable cities, with focus on international practices and applicability to China. Tradeoffs regarding land use, infrastructure, energy and water, and the need to balance economic vitality, environmental quality, cultural heritage, and social equity. Student teams collaborate with Chinese faculty and students partners to support urban sustainability projects. Limited enrollment via application; see internationalurbanization.org for details. Prerequisites: consent of the instructor(s).
Same as: CEE 126, EARTHSYS 138, URBANST 145

INTLPOL 280. Transitional Justice, Human Rights, and International Criminal Tribunals. 3-5 Units.
(Formerly IPS 280) Historical backdrop of the Nuremberg and Tokyo Tribunals. The creation and operation of the Yugoslav and Rwanda Tribunals (ICTY and ICTR). The development of hybrid tribunals in East Timor, Sierra Leone, and Cambodia, including evaluation of their success in addressing perceived shortcomings of the ICTY and ICTR. Examination of the role of the International Criminal Court and the extent to which it will succeed in supplanting all other ad hoc international justice mechanisms and fulfill its goals. Analysis focuses on the politics of creating such courts, their interaction with the states in which the conflicts took place, the process of establishing prosecutorial priorities, the body of law they have produced, and their effectiveness in addressing the needs of victims in post-conflict societies.
Same as: ETHICSOC 280, HUMRTS 103, INTNLREL 180A

INTLPOL 281. Global Poverty and the Law. 3 Units.
(Formerly IPS 281) With more than a billion people living on less than $2 a day, global poverty is one of the biggest challenges currently facing humanity. Even though those who suffer the most are located in the developing world, many of the policies, economic opportunities, and legal actions that offer the biggest potential for global poverty alleviation are made in the United States. This course will provide an introduction to the study of global poverty. What causes poverty? Why have some parts of the developing world done better at alleviating poverty than other parts? Can the world ever be free of poverty, as the World Bank's official motto suggests? And most importantly, what can aspiring lawyers do to improve the condition of the world's impoverished? These are some of the questions this course is designed to address. This course is designed especially for future lawyers and policymakers who seek a deeper understanding of the developing world. After a brief overview that will familiarize students with the major concepts and empirical debates in poverty and development studies, we will examine a variety of 'causes' of poverty, from poor governance to lack of economic opportunity to the role of society. Since this course is just as much about what can be done, we shall also consider applied approaches to poverty alleviation. These types of interventions include political/legal reforms such as anti-corruption initiatives, 'rule of law' interventions, right to information programs, privatization, and community-driven development models; economic solutions such as cash transfers and microfinance; and technological approaches such as new methods for measuring policy impact and the application of new technologies for state identification and distribution programs. In addition to more typical scholarly readings, students will review poverty alleviation policy proposals and contracts made by various stakeholders (academics, NGOs, states, international bodies, etc.). Grading is based on participation, a presentation of research or a proposal, and, in consultation with the professor, a research paper. The research paper may be a group project (Section 01) graded MP/R/F or an individual in-depth research proposal either of which could be the basis for future field research (Section 02) graded H/P/R/F. Students approved for Section 01 or Section 02 may receive R credit. After the term begins, students accepted into the course can transfer from Section 01 into Section 02 with consent of the instructor. Automatic grading penalty waived for research paper. This course is taught in conjunction with the India Field Study component (Law 5026). Students may enroll for this course alone or for both this course and Law 5026 with consent of the instructor (12 students will come to India). See Law 5026 for application instructions. CONSENT APPLICATION: To apply for this course, students must complete and submit a Consent Application Form available on the SLS website (Click Courses at the bottom of the homepage and then click Consent of Instructor Forms). See Consent Application Form for instructions and submission deadline. Cross-listed with LAW 5025.

INTLPOL 285. The United States, China, & Global Security. 2 Units.
This graduate-level seminar will be taught simultaneously on the campuses of Stanford University and Peking University and will feature a lecture series in which prominent American and Chinese scholars provide presentations that focus on key global security issues. The course content will highlight topics relevant to current U.S.- China relations and their respective roles in Asian and global security. Proposed lecture topics include: an introduction to U.S.- China relations; finance, trade, and investment; cyber security; nonproliferation; maritime security; terrorism; and energy and the environment. Hosted jointly by Stanford University and Peking University, enrollment will be limited to 20 students at each campus and, at Stanford, will be restricted to graduate students and undergraduates with senior standing. Enrollment is competitive, so potential students must complete an application by March 12, 2018 at 5pm: https://web.stanford.edu/dept/CEAS/EASTASN285.fb.
Same as: EASTASN 285

INTLPOL 290. Practical Approaches to Global Health Research. 1-3 Unit.
(Formerly IPS 290 and HRP 237) How do you come up with an idea for a useful research project in a low resource setting? How do you develop a research question, prepare a concept note, and get your project funded? How do you manage personnel in the field, complex cultural situations, and unexpected problems? How do you create a sampling strategy, select a study design, and ensure ethical conduct with human subjects? This course takes students through the process of health research in under-resourced countries from the development of the initial research question and literature review to securing support and detailed planning for field work. Students progressively develop and receive weekly feedback on a concept note to support a funding proposal addressing a research question of their choosing. Aimed at graduate students interested in global health research, though students of all disciplines interested in practical methods for research are welcome. Undergraduates who have completed 85 units or more may enroll with instructor consent. Sign up for 1 unit credit to participate in class sessions or 3 units to both participate in classes and develop a concept note.
Same as: EPI 237, MED 226

INTLPOL 291. Theories of Change in Global Health. 3-4 Units.
Open to graduate students studying in any discipline whose research work or interest engages global health. Upper-class undergraduates who have completed at least one of the prerequisite courses and who are willing to commit the preparatory time for a graduate level seminar class are welcome. The course undertakes a critical assessment of how different academic disciplines frame global health problems and recommend pathways toward improvements. Focuses on evaluating examples of both success and failure of different theories of change in specific global health implementations. Prerequisites: ECON 118, CEE 265D, HUMBIO 129S or HUMBIO 124C.
Same as: SOMGEN 207

INTLPOL 298. Practical Training. 1-3 Unit.
(Formerly IPS 298) Students obtain internship in a relevant research or industrial activity to enhance their professional experience consistent with their degree program and area of specialization. Prior to enrolling, students are required to submit a concise proposal to the MIP assistant director outlining the proposed project and work activities. After the internship, students are required to submit a three-page summary of the work completed, skills learned, and reflection of the professional growth gained as a result of the internship. The summary should also include relevance to the degree program. Meets the requirements for Curricular Practical Training for students on F-1 visas. Student is responsible for arranging own internship. Limited to International Policy (INTLPOL) students only. May be repeated for credit.

INTLPOL 299. Directed Reading. 1-5 Unit.
(Formerly IPS 299) Directed reading in International Policy. Course is open to students from all degree programs. To be considered for enrollment, interested students must first submit the International Policy Directed Reading Proposal (https://fsi.stanford.edu/masters-degree/student-resources), which is due no later than the second Friday of the academic quarter in which they would like to enroll. Proposal requires signature of the advising instructor (email confirmation or e-signature) and should be sent to jjachter@stanford.edu. If approved, a directed reading section will be created for the instructor (if s/he does not already have a section). May be repeated for credit.

INTLPOL 300. Policy Seminar for MIP. 1 Unit.
(Formerly IPS 300) Seminars and speaker series offered by programs and centers at the Freeman Spogli Institute for International Studies. Quarterly, students must attend a minimum of eight sessions that are relevant to their area of specialization. Details on speaker series and colloquia available on course Canvas site. Required for, and limited to, second-year students in International Policy (i.e., Class of 2020). May be repeated for credit.

INTLPOL 300A. International Policy Speaker Series. 1 Unit.
Presentations on international policy topics by Freeman Spogli Institute for International Studies faculty and guests. Includes discussion with students. Required for first-year M.A. students in International Policy. Optional for second-year M.A. students in International Policy (to be taken in place of INTLPOL 300). Enrollment is limited to MIP students.

INTLPOL 300J. International Policy Journal. 1 Unit.
Edit and publish the Stanford International Policy Review (SIPR). Editors can receive credit for their work. Must be approved as an editor and must receive approval from faculty advisor before enrolling. Course is available to second-year MIP students who are editors for autumn and spring quarters. Course is limited to spring quarter for first-year MIP students.

INTLPOL 300S. Leading Effective Teams. 2 Units.
In this interactive course students will develop practical skills for leading effective teams, and will apply their learning in group projects (1st year) and in their capstone (2nd year). Topics include understanding of group development stages and different work styles, setting and tracking group norms, developing mutual accountability mechanisms to ensure productivity, creating efficient decision making processes, resolving conflict, and leveraging cultural diversity. Enrollment limited to first-year Master's in International Policy (MIP) students.

INTLPOL 301A. Research Methods and Policy Applications I. 5 Units.
This course provides a conceptual and applied introduction to quantitative social sciences methodology. We will discuss the formal statistical formulation and practical applications of techniques of statistical data analysis. Concepts covered include basics of probability, estimation theory, statistical inference, ANOVA, correlation, and regression analysis. Students will gain practical experience analyzing their own data and interpreting results. We will devote substantial time to "learning by doing" using statistics software. Students will use the Stata programming language to learn the basics of programming, generate data, manipulate real-world datasets, and conduct statistical analysis. Core course so enrollment is limited to MIP students.

INTLPOL 301B. Research Methods and Policy Applications II. 5 Units.
We will build on the basic knowledge of statistical methods from the previous quarter to further develop fundamentals for the design, implementation and interpretation of policy-relevant research. We will discuss the statistical formulation and practical applications of linear regression analysis, the assumptions of OLS models, and how to check and address violations of these assumptions. We will consider models for dichotomous and categorical dependent variables including logit and problt regression. We will also discuss specialized topics including causal inference strategies (such as fixed effects, instrumental variables, and regression discontinuity), missing data, and data reduction techniques such as factor analysis. Students will conduct their own empirical research using quantitative analysis. Once again, we will make extensive use of Stata software. Core course so enrollment is limited to MIP students.

INTLPOL 302. The Global Economy. 5 Units.
This course examines the economic inter-connectedness of nations. Among the topics covered are the causes and consequences of current account imbalances, exchange rate determination, monetary unification, financial and currency crises, and contagion. In addition, the course includes an assessment of key global financial institutions, such as the International Monetary Fund, and the global effort to reform the international financial architecture. The goal of the course is to equip students with the tools to analyze international macroeconomic issues, events, and policies. Students will analyze economic data of countries with a view to assessing the economic health and vulnerabilities of countries. They will propose policies to address the identified economic vulnerabilities, and will assess the feasibility of policy implementation. In addition, the "In the News" segment in class will discuss and analyze current events in areas relevant to the course. (This course was formerly IPS 202.) Enrollment limited to Master's in International Policy (MIP) students.

INTLPOL 305. International Relations Theory and Practice in the 21st Century. 5 Units.
A review of major theoretical approaches to international relations including realism, liberalism, constructivism, and domestic politics and an examination of major episodes including the first world war, second world war, Cold War, US and Soviet interventions, and terrorism.

INTLPOL 306. International Relations Theory and the American Experience. 5 Units.
This course provides students with a theoretical and practical overview of the key elements of U.S. foreign policy, with a particular focus on the challenges, dilemmas, and constraints faced by contemporary U.S. decision makers in the executive branch. It is divided into three sections. The first discusses U.S. strategy from the founding of the republic to the present day. The second describes the major elements of national power used to advance U.S. interests and objectives: force, economic instruments, intelligence, and diplomacy. The third focuses on the key processes and constraints affecting national security policy, including bureaucratic politics and the interagency process, civil-military relations, constraints imposed by the U.S. Congress, and the role of outside influences (public opinion, interest groups, think tanks, and the media). Enrollment is limited to students in International Policy (MIP).

INTLPOL 307. Policy Problem-Solving in the Real World. 4 Units.
(Formerly IPS 216) This course introduces students to the MIP Policy Problem-Solving Framework that will be used in their second-year capstone. It will present both conceptual frameworks and concrete cases that help students define public problems, analyze potential solutions, and design implementation strategies for bringing about change in real-world situations. Required MIP core curriculum; enrollment from non-MIP students will be extremely limited and require consent from the instructor.

INTLPOL 308. Comparative Public Policy. 4 Units.
This course provides analytic tools and case studies to understand the policy making process in developing countries. Public policies in realms such as the regulation of financial markets, infrastructure investment, poverty relief programs, and public health systems are analyzed through the lens of a comparative institutionalist perspective, grounded in case studies from Africa, Asia, and Latin America. Required MIP core curriculum. Enrollment is limited to Master's in International Policy (MIP) students.

INTLPOL 310. Policy Change Studio. 4 Units.
Collaboration with real-world partners to define solutions to pressing policy problems. Students work in teams and are guided by the teaching team, along with project-specific advice from a faculty mentor and an external advisor. Students may also travel in order to collect data and meet with stakeholders. The capstone course takes place winter and spring quarters of the second year and revolves around a cutting-edge policy-making framework. Drawing from methods learned in the core courses, each group will work through the framework in parallel, analyzing their problem, developing a solution, and navigating a successful implementation. (Enrollment limited to second-year International Policy students.).

INTLPOL 310A. Capstone Field Research. 1 Unit.
Students travel with their policy change studio teams to collaborate with partner organizations, gather data, perform assessments, and analyze in-country aspects of their capstone project. (Limited to International Policy students enrolled concurrently in INTLPOL 310: Policy Change Studio.).

INTLPOL 321. Fundamentals of Cyber Policy and Security. 4-5 Units.
This course will provide an introduction to fundamental issues in cyber policy and security. It will focus on the way that cyber issues impact people and organizations across sectors - from government and law to business, tech, and others - and how people and organizations can and should approach the myriad cyber challenges. This is not a technical or computer science course and no technical background nor prerequisites are necessary. In the first part of the course, we will introduce cyber policy and security fundamentals. The second part of the course will explore cyber policy and security aspects related to economics, psychology, law, warfare, international relations, critical infrastructure, privacy, and innovation. The third part of the course will be focused mostly on a number of case studies designed to simulate the challenges faced by policy-makers and executive-level decision makers. This course is heavily discussion-based and so attendance is required. Assignments will consist of three short papers and a take-home final exam. All graduate students are welcome to enroll, especially those in the international policy, law, and business programs. Undergraduate enrollment only by permission of instructor.

INTLPOL 323. Free Speech, Democracy and the Internet. 2-3 Units.
(LAW 7082) This course will cover contemporary challenges to democracy presented by the Internet. Topics will include disinformation, polarization, hate speech, media transformation, election integrity, and legal regulation of internet platforms in the U.S. and abroad. Guest speakers from academia and industry will present on these topics in each class session, followed by a discussion. Students will be responsible for one-page papers each week on the readings and a research paper to be turned in at the fall paper deadline. Students can take the seminar for either 2 or 3 units, depending on the research paper length. This class is limited to 30 students, with an effort made to have students from SLS (20 students will be selected by lottery) and 10 non-law students by consent of instructor. Elements used in grading: Attendance, Class Participation, Written Assignments, Final Paper. Cross-listed with COMM 153B/ 253B.

INTLPOL 340. Technology, Innovation and Modern War: Keeping America's Edge in an Era of Great Power Competition. 4 Units.
This course explores how technology advances in areas like Cyber, Space, AI, Machine Learning, and Autonomy will create new types of military systems that will be deployed in modern conflicts, and the new operational concepts, organization and strategies that will emerge from these technologies. The course develops an appreciation that innovation in military systems throughout history has followed a repeatable pattern: technology innovation > new weapons > experimentation with new weapons/operational concepts > pushback from incumbents > first use of new operational concepts. Students will apply course concepts and learning to identify opportunities for the U.S. to maintain its technological edge and compete more effectively in this era of great power rivalry. The course builds on concepts presented in MS&E 193/293: Technology and National Security and provides a strong foundation for MS&E 297: Hacking for Defense.
Same as: MS&E 296

INTLPOL 350. International Law. 4 Units.
(LAW 5013) This course provides a general introduction to international law and its role in today's complex and interdependent world. We will begin by considering fundamental questions about the nature of international law, such as: the origins of international law in the sovereign equality of states; the sources of international law (including treaties and customary international law); the subjects of international law; principles of state responsibility; the bases upon which states may exercise jurisdiction; and the global governance challenges arising from the absence of assured mechanisms for the interpretation or enforcement of international law. We will then examine the operation of international law in the U.S. legal system. In the second half of the course, we will look at a series of contemporary international law topics and issues, including international human rights law, the law governing coercion and the use of armed force, the law of armed conflict, international environmental law, and international criminal law. Throughout, we will consider current issues and problems arising in the international arena and the extent to which international law affects the behavior of states. This course provides a general grounding in public international law and a foundation for more advanced or specialized international law courses. Elements used in grading: Class participation, optional paper, and final exam. (Formally Law 479).

INTLPOL 351. Law of Democracy. 3 Units.
(LAW 7036) This course is intended to give students a basic understanding of the themes in the legal regulation of elections and politics. We will cover all the major Supreme Court cases on topics of voting rights, reapportionment/redistricting, ballot access, regulation of political parties, campaign finance, and the 2000 presidential election controversy. The course pays particular attention to competing political philosophies and empirical assumptions that underlie the Court's reasoning while still focusing on the cases as litigation tools used to serve political ends. Elements used in grading: Class participation and final exam. Cross-listed with Comm 361 Polisci 327C. (Formerly Law 577).

INTLPOL 352. State Building and the Rule of Law Seminar. 3 Units.
(LAW 5103) This Seminar is centrally concerned with bridging theory and practice. The seminar introduces the key theories relevant to state-building generally, and strengthening the rule of law in particular. This course explores the multidisciplinary nature of development --- through readings, lectures, guest lectures, case studies, and seminar discussions --- and asks how lawyers fit in and contribute to the process? The set of developing countries considered within the scope of this workshop is broad. It includes, among others, states engaged in post-conflict reconstruction, e.g., Cambodia, Timor Leste, Rwanda, Iraq, Sierra Leone; states still in conflict, e.g., Afghanistan, Somalia; the poorest states of the world that may not fall neatly into the categories of conflict or post-conflict, e.g., Nepal, Haiti; least developed states that are not marked by high levels of violent conflict at all, e.g., Bhutan; and more developed states at critical stages of transition, e.g., Tunisia, Georgia, Hungary. Grading is based on participation, a presentation of research or a proposal, and, in consultation with the professor, a research paper. The research paper may be a group project or an individual in-depth research proposal, either of which could be the basis for future field research. CONSENT APPLICATION: The seminar is open by consent to up to sixteen (16) JD, SPILS, and LLM students, and graduate students from other departments within Stanford University. This course is taught in conjunction with the India Field Study component (Law 5026). Students may enroll for this course alone or for both this course and Law 5026 with consent of the instructor (12 students will come to India). To apply for this course, students must complete and submit a Consent Application Form available on the SLS website (Click Courses at the bottom of the homepage and then click Consent of Instructor Forms). See Consent Application Form for instructions and submission deadline. (Formerly Law 259).

INTLPOL 353. Policy Practicum: Human Rights & International Justice. 3-5 Units.
(LAW 807R) Atrocities continue to ravage our planet--in Syria, Iraq, Myanmar/Burma, North Korea, and Yemen, to name a few. And yet, the international community is increasingly divided when it comes to advancing the project of international justice. Lab will support several multilateral, civil society, and non-governmental organizations institutions in their effort to move justice processes forward. Full course details available at https://law.stanford.edu/courses/policy-practicum-human-rights-international-justice/.nnCONSENT APPLICATION: To apply for this course, students must complete and submit a Consent Application Form available on the SLS website (Click Courses at the bottom of the homepage and then click Consent of Instructor Forms). See Consent Application Form for instructions and submission deadline.

INTLPOL 354. International Criminal Law and Its Enforcement. 3 Units.
(LAW 5003) This course will introduce students to the law, institutions, and actors that constitute the system of international justice and to the political environment in which this system is situated. Readings will map the once and future international criminal law institutions, offer an elemental analysis of international crimes and forms of responsibility as they have evolved in international law, and focus on the challenges of pursuing criminal prosecutions for international crimes. Jurisprudence from the various international and domestic tribunals will be scrutinized with an emphasis on understanding the prosecution's burden, available defenses, and sources of proof. The course will also engage new and perennial debates about the suitability of using criminal justice mechanisms to respond to mass atrocity situations and consider alternatives from the domain of transitional justice. In addition to the substance of international criminal law, this course will also serve as an introduction to international legal reasoning, law-making, and institutional design.
Same as: HUMRTS 116

INTLPOL 355. International Human rights. 3 Units.
(LAW 5010) An introduction to the theory and practice of human rights. We will examine major sources of international human rights law---including treaties, customary international law, and national law---as well as the institutions in which human rights are contested, adjudicated, and enforced. Key sites of human rights activity include multilateral organizations, like the United Nations Security Council and Human Rights Council; international, regional, and national courts and tribunals; and quasi-judicial treaty bodies, like the U.N. Committee Against Torture. This degree of jurisdictional redundancy offers an opportunity to explore questions of institutional design and interaction as well as processes of normative diffusion. The course will also consider the role of non-state actors---including non-governmental organizations, corporations, terrorist organizations, and ordinary individuals---in promoting and violating human rights. In addition to this survey of the human rights ecosystem, the course will engage some of the fundamental theoretical debates underlying the international human rights project with a focus on perennial questions of legitimacy, justiciability, compliance, and efficacy. Finally, we will explore a range of threats and challenges to the promotion of human rights---both perennial and novel---including economic under-development, terrorism, national security over-reach, patriarchy, and racism. We will read case law originating from all over the world, including the United States. Special Instructions: Students have the option to write a long research paper in lieu of the final exam with consent of instructor. Elements used in grading: Class participation; exam or final long research paper. (Formerly Law 330).
Same as: HUMRTS 117

INTLPOL 356. Human trafficking: Law and Policy. 3 Units.
(LAW 5034) Taking an historical and comparative perspective, this course will introduce students to the international, domestic, foreign, and sub-national law governing the many manifestations of human trafficking (including legal prohibitions on forced labor and modern forms of slavery, sexual exploitation, organ trafficking, and child soldiering). We will also explore the diplomatic and policy tools employed by state and local governments to tackle this phenomenon. Class sessions will be comprised of a combination of lectures, seminar discussions, and guest speakers. Students have the option of completing a research paper or a take-home final exam. The first eight weeks of the course will coincide with the first eight weeks of winter quarter and will be conducted at Stanford Law School. Enrollment in the Thailand field study option is limited to 12 students (See Law 5035 for application instructions and deadline). Elements used in grading: Attendance, Class Participation, Written Assignments; Final Exam, or Final Research Paper.

INTLPOL 357. Transitional Justice. 3 Units.
The political, social, and legal problems confronting societies after periods of mass human rights violations or war have attracted increasing attention from policymakers and scholars in the last three decades. This course will examine the legacies of atrocities and the institutions and processes that governments and citizens most often use to address them, comparing approaches from across the globe. South Africa's Truth and Reconciliation Commission; the prosecution of Chile's former dictator, Augusto Pinochet; Argentina's reparations to victims of its military regime; and the International Criminal Court are among the best-known policy responses to those problems. In addition, non-legal interventions---such as the Berlin Holocaust Memorial and Nelson Mandela's many symbolic gestures toward reconciliation with white South Africans---may have important social and political effects. In addition to initiatives at the national and international levels, we will devote some attention to transitional justice at the local level. A recurring theme throughout the course will be the connections between atrocities and transitional justice measures intended to address them, on the one hand, and economic justice and development, on the other. Special Instructions: Students have the option to write a long research paper in lieu of the final exam with consent of instructor. Elements used in grading: Class Participation, Written Assignments; Final Exam or Final Paper.

INTLPOL 358. Business, Social Responsibility, and Human Rights. 3 Units.
Large corporations now routinely spend millions of dollars to protect human rights and the environment. Shell Nigeria builds hospitals and schools in the Niger Delta. Nike employs hundreds of inspectors to improve conditions for the factory workers who produce its shoes across Asia and Latin America. Technology companies such as Facebook have scrambled to fend off the threat of new regulation since the Cambridge Analytica revelations. Other examples abound, across industries and around the globe. "Don't be evil" (Google's former motto) may be one motivation for these companies, but something more mundane is also at work: many companies believe they will do well, financially, if they do good, ethically. This course examines questions that lawyers in large law firms, corporations, NGOs, and government agencies regularly confront: --What does it mean for a company to "do good"? Should it care? --When does it serve a company's interest to take costly action to address human rights, labor, and environmental concerns? --What tactics have activists used to shift public opinion, media frames, and the law, and thereby change companies' incentives? We will learn through seminar-style discussion, lectures, role play, and small group exercises. Several guest speakers with experience in business, advocacy, or in between will provide insights from their experiences on the ground. Special Instructions: Students have the option to write a long research paper in lieu of the final exam with consent of instructor. Elements used in grading: Class Participation, Written Assignments; Final Exam or Final Paper. Cross-listed with the Law School (LAW 1047).

INTLPOL 361. Foundations of Internet Speech Platform Regulation. 3 Units.
(LAW 4051) Internet platforms like Google and Facebook play an enormous role in our online speech and information environment today. Review of laws that shape platforms' decisions about online content with primary focus on intermediary liability laws like the Digital Millennium Copyright Act (DMCA), Communications Decency Act Section 230 (CDA 230), and EU's eCommerce Directive. Majority of course material will be from the U.S., but some will explore international models and in particular recently enacted laws in the EU. Important themes include Constitutional and human rights constraints on intermediary liability laws; legal limits (or lack thereof) on platforms' enforcement of privatized speech rules under their Community Guidelines or Terms of Service; global enforcement of national laws requiring platforms to remove content; and tensions between goals of intermediary liability law and those of privacy, competition, and other legal frameworks. Students encouraged to think pragmatically about legal, operational, and product design choices platforms may make in response to particular laws, drawing on instructor's experience handling such questions as Associate General Counsel at Google. Open to law students and students in the Master's in International Policy (MIP) program. Enrollment cap at 35 students (25 students from SLS admitted by lottery; up to 10 from MIP admitted by instructor consent).

INTLPOL 362. Data: Privacy, Property and Security. 3 Units.
The collection, use and marketing of personal data are ubiquitous in the digital age. This seminar will explore the diverse legal regimes regulating personal data--including privacy, property and security--and the imperfect nature of their protections. Legal rules are rapidly evolving to address, if not resolve, the inevitable conflicts between privacy, property and security in relation to personal data. Laws have been enacted and new ones are under consideration at the national, state and even municipal levels, as well as around the world. Norms are emerging to guide these conflicts in the operation of business. Technology is evolving that can facilitate the protection, or accelerate the exploitation, of personal data. At the heart of all these developments is the question, who owns and controls personal data in the digital age. The same piece of data may in different hands raise different expectations. As an example, A may have a privacy expectation that her purchase from an online marketplace is no one's business but her own. B, the app that served as intermediary between the buyer and seller, may have a property or contract expectation that it owns the metadata and other information about A's buying habits. C, a government agency, may have a security interest in collecting or unearthing the details of A's purchase of particular items. This same triad of interests is implicated across a wide variety of highly sensitive personal data, such as location information, facial recognition and medical results. This seminar will explore these data rules, norms, technologies and conflicts through three sessions of lecture and interactive exercises addressed to privacy, property and security, respectively; four sessions devoted to presentations from leading representatives of consumer, corporate and government interests, with questioning by students in the class; and two sessions devoted to discussion of student answers to problem sets, focusing on an exploration of the privacy-property-security conflict and on forward-looking solutions to the protection of personal data. Elements used in grading: Attendance, class participation, final research paper. CONSENT APPLICATION: To apply for this course, students must complete and submit a Consent Application Form available on the SLS website (Click Courses at the bottom of the homepage and then click Consent of Instructor Forms). See Consent Application Form for instructions and submission deadline. Non-law students will also need to submit the Non-Law Student Registration Information Form (Non-Law Student Registration Information). Cross-listed with LAW 4046.

INTLPOL 363. Confronting Misinformation Online: Law and Policy. 2 Units.
This course will examine contemporary challenges and trade-offs for tech law and policy decision-making presented by false information online. Topics will include policy and regulatory responses to election misinformation; medical misinformation; the spread of misinformation in armed conflict and situations of widespread human rights violations; and conspiracy theories and rumors in the areas of science, climate, religion, and politics. Along with the faculty, guest speakers from academia and industry thought leaders will present on these topics, followed by a discussion. In addition, students will analyze real-world dilemmas confronting policymakers through practical case studies and will assume the role of a policymaker as part of each class. Finally, this course will explore regulatory, policy, technological, and other solutions to enhance the integrity of the online information ecosystem and address the growing problem of false information online. Special Instructions: Up to five Law students, with the consent of the instructors, will have the option to write an independent research paper for Law School Research (R) credit. For students in this section (02), the research paper will replace the Final Policy Memo. All other elements used in grading will apply. Students taking the course for R credit can take the course for either 2 or 3 units, depending on the paper length. Elements used in grading: Attendance, Class Participation, Written Assignments; Final Policy Memo or Final Research Paper. Non-law students will also need to submit the Non-Law Student Registration Information Form (Non-Law Student Registration Information). Cross-listed with LAW 4053.

INTLPOL 371. Policy Practicum: Assessing the Impact of China's Global Infrastructure Spending on Climate Change. 2-3 Units.
(LAW 807O) Client: Steyer-Taylor Center for Energy Policy and Finance. China is investing in massive foreign-infrastructure construction, notably in emerging economies. Whether that infrastructure is high-carbon or low-carbon will largely determine the future of climate change. In this policy lab, students will advance research that is underway toward two sorts of deliverables: a data-analysis and data-visualization tool to map players, financing structures, and carbon emissions from Chinese-financed infrastructure projects; and a written account of how Chinese-financed infrastructure is playing out in those countries. Research will involve close interaction with officials at key infrastructure-financing institutions in China and around the world. Graduate students from any discipline at Stanford are invited to apply. Data-analysis skills, energy-finance understanding, and proficiency in Mandarin are useful skills for this work but are not required. To apply, submit Consent Application Form available on Stanford Law School website. Form includes instructions and submission deadline. See LAW listing for full description.

INTLPOL 801. TGR Project. 0 Units.
(Formerly IPS 801).

INTLPOL 802. TGR Dissertation. 0 Units.
(Formerly IPS 802).

INTERNATIONAL RELATIONS

Courses offered by the Program in International Relations (IR) are listed under the subject code INTNLREL (https://explorecourses.stanford.edu/search/?view=catalog&academicYear=&q=INTNLREL&filter-departmentcode-INTNLREL=on&filter-coursestatus-Active=on&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&page=0) on the Stanford Bulletin's ExploreCourses web site.

Mission of the Program in International Relations

The Program in International Relations (IR) offers an interdisciplinary undergraduate major, minor and honors program allowing students to explore how global, regional and domestic factors influence relations between actors on the world stage. The program equips students with the skills and knowledge necessary to analyze choices and challenges that arise in this arena. IR majors pursue study in world politics, including courses in Political Science, Economics, History, languages, and other fields focusing on issues such as international security, political economy, economic development, and democratization. The major prepares students for careers in government and the corporate sector, and for admission into graduate programs including, but not exclusive to law, business, economics, and political science.

Learning Outcomes (Undergraduate)

The program expects its undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Program in International Relations. Students are expected to demonstrate:

1. understanding of core knowledge necessary to understand contemporary world politics.
2. ability to analyze international issues and draw correct inferences using qualitative and/or quantitative analysis.
3. ability to write clearly and persuasively, communicating ideas clearly.
4. ability to evaluate theory and critique research within the discipline.

Bachelor of Arts in International Relations

In the undergraduate major program, students focus on political, economic, and cultural relations among peoples and states in the modern world. Students majoring in IR will pursue a course of study that includes classes in Political Science, Economics, History, languages and other fields. IR majors may focus on a range of issues including international security, international trade and finance, political and economic development as well as history, politics and culture of other countries and world regions. All IR majors must spend at least one quarter studying abroad and show proficiency in a foreign language.

Minor in International Relations

In the undergraduate minor program, students will also focus on political, economic, and cultural relations among peoples and states in the modern world. Students minoring in IR will pursue a condensed course of study that includes classes in Political Science, Economics, History, languages, and other fields. IR minors may focus on a range of issues including international security, international trade and finance, political and economic development as well as history, politics and culture of other countries and world regions. IR minors are not required to study abroad or show proficiency in a foreign language.

Honors Program

The International Relations honors program offers qualified students the opportunity to conduct a major independent research project under faculty guidance. Such a project requires a high degree of initiative and dedication, significant amounts of time and energy, and demonstrated skills in research and writing.

In their junior year, students should consult with prospective honors advisors, choose the courses that provide academic background in their areas of inquiry, and demonstrate an ability to conduct independent research. Students can also select to complete an Interdisciplinary honors thesis with other programs on campus.

Prerequisites for participation include a 3.5 grade point average (GPA), a strong overall academic record, good academic standing, successful experience in writing a research paper, and submission of an acceptable thesis proposal. Students should submit their honors thesis proposal late in Winter Quarter of the junior year; please check with the IR office for the exact deadline. Students are required to enroll in INTNLREL 200A International Relations Honors Field Research, in Spring Quarter of their junior year and should consider participating in Bing Honors College (https://undergrad.stanford.edu/programs/bhc/). In their senior year, honors students must enroll in INTNLREL 200B International Relations Honors Seminar in Autumn Quarter, INTNLREL 200C IR Honors Thesis Writing in Winter Quarter, and in research units through INTNLREL 198 Senior Thesis each quarter of their senior year (Autumn, Winter, and Spring) with their faculty advisor. Honors students present a formal defense of their theses in mid-May. Students must receive at least a grade of 'B+' in order to graduate with honors in International Relations.

Coterminal Programs in Related Fields

It is possible for students majoring in International Relations to work simultaneously for a coterminal master's degree in a number of related fields. Coterminal students should consult advisers in both departments or programs to ensure that they fulfill the degree requirements in both fields. For information on the M.A. program in International Policy, see the "International Policy (p. 1669)" section of this bulletin. University requirements for the coterminal M.A. are described in the "Coterminal Degree (p. 56)s" section of this bulletin. See also the Registrar's Coterminal Degree Programs (https://registrar.stanford.edu/students/coterminal-degree-programs/) pages.

Bachelor of Arts in International Relations

The International Relations (IR) major is designed to provide students with an interdisciplinary education of both foundational skills and specific knowledge necessary to analyze contemporary international relations.

Suggested Preparation for the Major

Prospective International Relations majors are advised to consider Thinking Matters courses that relate to international relations to satisfy a major requirement. Also recommended is any introductory seminar taught by International Relations affiliated faculty through Stanford Introductory Studies.

Degree Requirements

Students interested in majoring in International Relations are encouraged to declare during their sophomore year, but no later than the beginning of their junior year to ensure timely completion of the program. They are urged to discuss their plans with the undergraduate student services officer as early as possible, and to take recommended preparatory courses for the major in their freshman and sophomore years. To declare the major, students must fill out the Declaration of Major in Axess; choose a faculty advisor; and submit completed and acceptable program proposal forms to the Director of the Program in International Relations (IR). It is recommended that students meet with their faculty advisor at least once per academic year to discuss progress towards degree completion. Quarterly meetings are highly encouraged. Students completing a double major, or who have a minor, are also required to file a Major-Minor and Multiple Major Course Approval Form (https://

stanford.box.com/MajMin-MultMaj/) by the Final Study List deadline for the term in which the student intends to graduate.

With the exception of foreign language courses used to satisfy the two-year language requirement, which may be taken for CR/NC, all IR major courses, listed below, must be taken for a letter grade of 'C' or better. Transfer courses from universities outside of Stanford must receive a 'B-' or better to count towards degree requirements. Up to five units of Directed Reading can be counted towards major requirements. Up to three non-Stanford courses, for a maximum of fifteen units, may be counted towards degree requirements. Request for transfer credit, including course syllabi and official transcripts, should be submitted to the undergraduate student services officer, and to the Office of the Registrar's external credit evaluation section. Approval of such courses toward the major is at the discretion of the Faculty Director.

Students majoring in International Relations must complete a minimum of 70 units (30 units of core courses as well as 40 units of specialization courses). As part of the core curriculum, IR majors must take an Introductory economics course.

Students who took courses in previous years that are not featured in the below table should consult the Stanford Bulletin for the years in which the courses were taken.

Core Courses (30 units):

		Units
Required Courses:		
International Politics:		5
POLISCI 101	Introduction to International Relations	
Comparative Governance (Select one of the following):		5
HISTORY 102	History of the International System since 1914	
POLISCI 104	Introduction to Comparative Politics	
POLISCI 114D	Democracy, Development, and the Rule of Law	
American Foreign Policy (Select one of the following):		5
INTNLREL 154	The Cold War: An International History	
INTNLREL 168	America as a World Power in the Modern Era	
INTNLREL 168A	American Interventions, 1898-Present	
INTNLREL 173	Presidents and Foreign Policy in Modern History	
INTNLREL 174	Diplomacy on the Ground: Case Studies in the Challenges of Representing Your Country	
POLISCI 110C	America and the World Economy	
POLISCI 110D	War and Peace in American Foreign Policy	
POLISCI 110G	Governing the Global Economy	
POLISCI 214R	Challenges and Dilemmas in American Foreign Policy	
Introductory Economics (Select one of the following):		5
ECON 1	Principles of Economics	
ECON 50	Economic Analysis I	
ECON 51	Economic Analysis II	
ECON 52	Economic Analysis III	
Skills Classes (Select one of the following):		5
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	
POLISCI 150A	Data Science for Politics	
STATS 60	Introduction to Statistical Methods: Precalculus	
STATS 101	Data Science 101	
Applied Economics Courses (Select one of the following):		5
ECON 106	World Food Economy	
ECON 111	Money and Banking	
ECON 118	Development Economics	
ECON 124	Economic Development and Challenges of East Asia	
ECON 125	Economic Development, Microfinance, and Social Networks	
ECON 126	Economics of Health and Medical Care	
ECON 127	Economics of Health Improvement in Developing Countries	
ECON 131	The Chinese Economy	
ECON 141	Public Finance and Fiscal Policy	
ECON 143	Finance, Corporations, and Society	
ECON 149	The Modern Firm in Theory and Practice	
ECON 150	Economic Policy Analysis	
ECON 155	Environmental Economics and Policy	
ECON 162	Games Developing Nations Play	
ECON 165	International Finance	
ECON 166	International Trade	
EDUC 306A	Economics of Education in the Global Economy	
HISTORY 200E	Doing Economic History	
INTLPOL 207	Economics of Corruption	
INTNLREL 110C	America and the World Economy	
INTNLREL 118S	Political Economy of International Trade and Investment	
INTNLREL 123	The Future of the European Union: Challenges and Opportunities	
INTNLREL 147	Political Economy of the Southern Cone Countries of South America	
OSPBER 82	Globalization and Germany	
OSPFLOR 26	Economics of the EU	
OSPMADRD 54	Contemporary Spanish Economy and the European Union	
OSPPARIS 91	The Future of Globalization: Economics, Politics and the Environment	
OSPSANTG 119X	The Chilean Economy: History, International Relations, and Development Strategies	
POLISCI 110C	America and the World Economy	
POLISCI 110G	Governing the Global Economy	
POLISCI 110X	America and the World Economy	
POLISCI 213R	Political Economy of Financial Crisis	
POLISCI 218S	Political Economy of International Trade and Investment	
POLISCI 241A	Political Economy of Development	
SIW 103	Economic Growth and Development Patterns, Policies, and Prospects	
SOC 114	Economic Sociology	
Total Units		30

Specialization Courses (40 units):

The eleven specializations are:

1. Africa
2. Comparative International Governance
3. East and South Asia
4. Economic Development/World Economy
5. Environment, Energy, and Natural Resources

6. Europe (East and West) & Russia
7. International History and Culture
8. International Security
9. Latin America and Iberian Studies
10. Middle East and Central Asia
11. Social Development/Human Well-Being

Students must take 40 units of specialization courses in order to meet the 70 units required for the major. 20-25 units must be from the student's primary specialization; 15-20 units from the secondary specialization. Functional specializations are not declared on Axess nor are they printed on the diploma or transcript.

The following courses are approved for each functional specialization.

Africa

Crosslisted courses may appear in the list below multiple times. Crosslisted courses may only be taken once for credit.

		Units
AFRICAAM 49S	African Futures: Nationalism, Pan-Africanism, and Beyond	5
AFRICAAM 133	Literature and Society in Africa and the Caribbean	4
AFRICAAM 145B	Africa in the 20th Century	5
AFRICAST 111	Education for All? The Global and Local in Public Policy Making in Africa	3-5
AFRICAST 112	AIDS, Literacy, and Land: Foreign Aid and Development in Africa	3-5
AFRICAST 127	African Art and Politics, c. 1900 - Present	4
AFRICAST 132	Literature and Society in Africa and the Caribbean	4
AFRICAST 135	Designing Research-Based Interventions to Solve Global Health Problems	3-4

Additional Policies/Requirements:

- At least one course must be an upper-division seminar or colloquium.
- At least one writing intensive course designated as Writing in the Major (WiM) for International Relations.
- All courses must be taken for a letter grade, and a minimum grade of 'C' is required for courses to count towards major requirements.
- Completion of one quarter of academic study overseas, either through the Stanford Overseas Studies Program or an approved non-Stanford program. Non-Stanford programs must be pre-approved by the IR office before the student enrolls in the program.
- All IR majors must demonstrate proficiency in a foreign language by either completing two years of course work (second-year, third-quarter) or passing a proficiency exam. Foreign language units do not count towards the major.
- Upon approval, a maximum of 15 non-Stanford units may be applied to the major for credit.

Independent Study/Honors

		Units
INTNLREL 197	Directed Reading in International Relations	1-5
INTNLREL 198	Senior Thesis	2-10
INTNLREL 200A	International Relations Honors Field Research	3
INTNLREL 200B	International Relations Honors Seminar	3
INTNLREL 200C	IR Honors Thesis Writing	1

Honors Program

The International Relations honors program offers qualified students the opportunity to conduct a major independent research project under faculty guidance. Such a project requires a high degree of initiative and dedication, significant amounts of time and energy, and demonstrated skills in research and writing.

In their junior year, students should consult with prospective honors advisers, choose the courses that provide academic background in their areas of inquiry, and demonstrate an ability to conduct independent research. Students can also select to complete an Interdisciplinary honors thesis with other programs on campus.

Prerequisites for participation include a 3.5 grade point average (GPA), a strong overall academic record, good academic standing, successful experience in writing a research paper, and submission of an acceptable thesis proposal. Students should submit their honors thesis proposal in the Winter Quarter of the junior year; check with IR office for the exact deadline. Students are required to enroll in INTNLREL 200A International Relations Honors Field Research, in the Spring Quarter of their junior year and should consider participating in Bing Honors College (https://undergrad.stanford.edu/programs/bhc/). In their senior year, honors students must enroll in INTNLREL 200B International Relations Honors Seminar in Autumn Quarter, INTNLREL 200C IR Honors Thesis Writing in Winter Quarter, and in research units through INTNLREL 198 Senior Thesis each quarter of their senior year (Autumn, Winter, and Spring) with their faculty adviser. Honors students present a formal defense of their theses in mid-May. Students must receive at least a grade of 'B+' in order to graduate with honors in International Relations. For more information, refer to the International Relations (http://internationalrelations.stanford.edu/) website.

Minor in International Relations

A minor in International Relations (IR) is intended to provide an interdisciplinary background allowing a deeper understanding of contemporary international issues. To declare the IR minor, students must complete the application for a minor in Axess and complete the IR Minor Declaration and Course Proposal form and submit this to the IR office. Students completing a minor are also required to file a Major-Minor and Multiple Major Course Approval Form (https://stanford.box.com/MajMin-MultMaj/) by the Final Study List deadline for the term in which the student intends to graduate.

Students complete the minor by taking 30 units from the IR curriculum that do not duplicate with the student's major (or, if applicable, any other minor), including the following:

		Units
Core Course (Select one of the following):		5
World Politics		
POLISCI 101	Introduction to International Relations	
Comparative Governance		
INTNLREL 102	History of the International System since 1914	
INTNLREL 114D	Democracy, Development, and the Rule of Law	
American Foreign Policy		
INTNLREL 110C	America and the World Economy	
INTNLREL 110D	War and Peace in American Foreign Policy	
INTNLREL 154	The Cold War: An International History	
INTNLREL 168	America as a World Power in the Modern Era	
INTNLREL 168A	American Interventions, 1898-Present	
INTNLREL 173	Presidents and Foreign Policy in Modern History	
INTNLREL 174	Diplomacy on the Ground: Case Studies in the Challenges of Representing Your Country	
POLISCI 110G	Governing the Global Economy	
POLISCI 214R	Challenges and Dilemmas in American Foreign Policy	
Specialization Coursework (See below)		20
Any IR Course (pre-approved or petitioned)		5
Total Units		30

Complete at least **20 units** in one of the following specializations below.

- Africa
- Comparative International Governance
- East and South Asia
- Economic Development/World Economy
- Environment, Energy, and Natural Resources
- Europe (East and West) & Russia
- International History and Culture
- International Security
- Latin America and Iberian Studies
- Middle East and Central Asia
- Social Development/Human Well-Being

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a “credit” or “no credit” grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a “credit” or “satisfactory” grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

The Program in International Relations counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of undergraduate degree requirements that otherwise require a letter grade.

Other Undergraduate Policies

While the program hopes that all IR majors have an opportunity to study abroad, it understands that program disruptions due to COVID-19 may make that difficult, if not impossible. The program is committed to ensuring that cancellations and travel risks due to COVID-19 do not prevent IR majors from graduating. For IR majors whose study abroad plans have been affected by program disruptions, the program will arrange appropriate accommodations, including waiving the requirement if necessary.

If a student has difficulty completing an undergraduate degree requirement due to the COVID-19 pandemic (e.g., study abroad requirement), the student should consult with the associate director to identify academic options to fulfill degree requirements.

Director: Kenneth Schultz (Political Science).

Faculty Committee: Kyle Bagwell (Economics), Judith L. Goldstein (Political Science), Norman Naimark (History), Kenneth Scheve (Political Science), Kenneth Schultz (Political Science), Kathryn Stoner (Freeman Spogli Institute), Michael Tomz (Political Science).

Affiliated Faculty: Lisa Blaydes (Political Science), Gordon Chang (History), David Cohen (Classics), Larry J. Lewis (History), Pawel Lutomski (International Relations), Abbas Milani (Hoover Institution, Iranian Studies), Alice Lyman Miller (Hoover Institution), Thomas O'Keefe (International Relations), Bertrand Patenaude (International Relations), Robert Rakove (International Relations), Scott Rozelle (Freeman Spogli Institute for International Studies), Margaret Sena (El Centro Chicano), Beth Van Schaack (Stanford Law School), Stephen Stedman (Political Science), Harold Trinkunas (Freeman Spogli Institute for International Studies), Gil-Li Vardi (International Relations, History).

Overseas Studies Courses in International Relations

The Bing Overseas Studies Program (http://bosp.stanford.edu) (BOSP) manages Stanford international and domestic study away programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The BOSP course search site (https://undergrad.stanford.edu/programs/bosp/explore/search-courses/) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu) or Bing Overseas Studies (http://bosp.stanford.edu).

Due to COVID-19, all BOSP programs have been suspended for Autumn Quarter 2020-21. All courses and quarters of operation are subject to change.

Courses

INTNLREL 5C. Human Trafficking: Historical, Legal, and Medical Perspectives. 3 Units.

(Same as History 105C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution, labor exploitation, and organ trade, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning. Required weekly 50-min. discussion section, time TBD. Students interested in service learning should consult with the instructor and will enroll in an additional course.
Same as: CSRE 5C, FEMGEN 5C, HISTORY 5C

INTNLREL 33SI. Myths and Realities of U.S.-China Relations. 2 Units.
This course introduces students to the U.S.-China relationship through a weekly speaker series followed by student-led discussions. Speakers from academia and industry will explore topics such as the business environment of China, the politics of the Sino-American dynamic, and technological growth in China. The purpose of the course is to tackle the myths and misconceptions surrounding U.S.-China relations, and build in students a strong foundational understanding of the multiple facets of the bilateral relationship. Students will be exposed to a variety of issues and will be able to explore a topic of interest through a capstone presentation at the end of the course.

INTNLREL 60Q. United Nations Peacekeeping. 3 Units.
Focus is on an examination of United Nations peacekeeping, from its inception in 1956 in the wake of the Suez Crisis, to its increasingly important role as an enforcer of political stability in sub-Saharan Africa. Examines the practice of "classic" peacekeeping as it developed during the Cold War, the rise and fall of "second-generation" peacekeeping, and the reemergence of a muscular form of peacekeeping in sub-Saharan Africa more recently. Topics include the basic history of the United Nations since 1945, he fundamentals of the United Nations Charter, and the historical trajectory of U.N. peaeckeeping and the evolving arguments of its proponents and critics over the years.
Same as: PEDS 60Q

INTNLREL 61Q. Food and security. 3 Units.
The course will provide a broad overview of key policy issues concerning agricultural development and food security, and will assess how global governance is addressing the problem of food security. At the same time the course will provide an overview of the field of international security, and examine how governments and international institutions are beginning to include food in discussions of security.
Same as: EARTHSYS 61Q, ESS 61Q

INTNLREL 62Q. Mass Atrocities: Reckoning and Reconciliation. 3 Units.
Imagine you live in a country in which a delusional dictator imprisons untold masses in labor and concentration camps, and kills millions of them. Imagine you live in another country, in which one ethnic group slaughters the other. Imagine you live in yet another country in which a racial white minority terrorizes and violently discriminates against a huge majority of black population. Or, imagine you live in a country in which members of one group engage in an "ethnic cleansing" of their former neighbors.nnNow imagine this: Some big political change comes to each of these societies, and the perpetrators lose their power and are finally stopped from committing any more crimes and atrocities. Now comes the time to decide how to bring about justice for the past wrongs. It is also a question of how to come to terms with the terrible past. How to remember it? How to confront it? How to judge the perpetrators? How to identify them? How to punish them appropriately if at all? Also, is it possible to ever reconcile with the former oppressors and enemies? Maybe even to forgive them? If so, under what circumstances? What is necessary for such reconciliation? What if some of the victims were also perpetrators?nnThe scenarios mentioned above are real ones¿they happened in Germany, Rwanda, South Africa, Bosnia, and elsewhere. In this IntroSem we will explore the social, political, and legal arrangements societies debated about, negotiated, and used to deal with the atrocities of the past. We will assess their utility in the process of ¿transitional justice.¿ We will scrutinize crimes tribunals and truth commissions, and inquire whether they enabled the victims to gain a sense of justice and fairness. Likewise, we will consider under what conditions those victims might ever be capable of a genuine reconciliation.

INTNLREL 63Q. International Organizations and Accountability. 3 Units.
International organizations (IOs), like the IMF, the World Bank, the United Nations, and others, have been widely criticized as insufficiently accountable. For example, some argue that states are not able to control IOs whose bureaucracies have grown out of control and run amok, while others argue that the real problem is that communities most impacted by IO activities, such as those receiving World Bank loans or UN peacekeeping operations, are least able to influence their activities. Still others contend that the voting rules by which states control IOs are outdated and should be reformed to remedy these problems.nnThrough readings, discussions and case studies, students will learn about a range of international organizations in order to better understand what they do and how they are supposed to be controlled. In addition, we will evaluate the critiques of IO accountability that come from the right and the left, as well as the North, South, East and West, and will analyze different mechanisms of accountability, both formal and informal. Students will have the opportunity to research and present on specific international organizations and accountability mechanisms.

INTNLREL 64Q. Leadership and International Organizations. 3 Units.
What do intergovernmental organizations like the United Nations, the World Food Program, the United Nations High Commission for Refugees actually do? Do these organizations simply act on the interests of the governments that comprise them? Or do they have some autonomy to pursue their own programs, plans, and priorities? Does leadership of these organizations matter for their performance? What dilemmas do the leaders or intergovernmental organizations face as they try to satisfy governments while serving people in need all over the world? This course will get at these questions through examining the lives, careers and choices of leaders of major international organizations over the last thirty years. Reading assignments will include memoirs and biographies of leaders of international organizations, as well as analytical and empirical studies of international organizations. We plan on inviting former and current leaders of international organizations to visit the seminar.

INTNLREL 76. Protagonists in Policy. 1 Unit.
Interested in learning from activists, academics, and politicians about the different ways you can be an agent of change and affect public policy? This course presents a lecture/discussion series in which students will have the opportunity to engage with influential speakers to discover and learn more about timely topics relating to policy, government, and international affairs. Speakers will be selected in cooperation with the Policy Dinners Committee, a branch of Stanford in Government.
Same as: POLISCI 76

INTNLREL 82. The Ending of World War I: Three Perspectives. 2 Units.
This course is required for those students who will be taking the BOSP Overseas Seminar, The Ending of the First World War and the Shaping of the 20th Century. Enrollment is limited to students who will be taking the overseas seminar, or are waitlisted for the seminar.nnThis course has three learning goals: 1.) to provide historical background on the war and the events and processes leading up to the ending of the war; 2.) to help students formulate possible research topics for the Overseas Seminar; and 3.) to acquaint the students with archival research in preparation for their time in London. The course will be taught from the perspectives of military history, political science, and literature. Each week we will meet to discuss the reading material.

INTNLREL 101Z. Introduction to International Relations. 4 Units.
Approaches to the study of conflict and cooperation in world affairs. Applications to war, terrorism, trade policy, the environment, and world poverty. Debates about the ethics of war and the global distribution of wealth.
Same as: POLISCI 101Z

INTNLREL 102. History of the International System since 1914. 5 Units.
After defining the characteristics of the international system at the beginning of the twentieth century, this course reviews the primary developments in its functioning in the century that followed. Topics include the major wars and peace settlements; the emergence of Nazism and Communism; the Cold War; decolonization; and globalization. The role of international institutions and international society will also be a focus as will the challenges of climate change, inequality, migration, and terrorism.
Same as: HISTORY 102

INTNLREL 103F. The Changing Face of War: Introduction to Military History. 3-5 Units.
Introduces students to the rich history of military affairs and, at the same time, examines the ways in which we think of change and continuity in military history. How did war evolve from ancient times, both in styles of warfare and perceptions of war? What is the nature of the relationship between war and society? Is there such a thing as a Western way of war? What role does technology play in transforming military affairs? What is a military revolution and can it be manufactured or induced? Chronologically following the evolution of warfare from Ancient Greece to present day so-called new wars, we will continuously investigate how the interdependencies between technological advances, social change, philosophical debates and economic pressures both shaped and were influenced by war. Students satisfying the WiM requirement for the major in International Relations, must enroll in INTNLREL 103F course listing.
Same as: HISTORY 3F, HISTORY 103F

INTNLREL 105C. Human Trafficking: Historical, Legal, and Medical Perspectives. 5 Units.
(Same as HISTORY 5C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution, labor exploitation, and organ trade, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning. Required weekly 50-min. discussion section, time TBD. Students interested in service learning should consult with the instructor and will enroll in an additional course.
Same as: CSRE 105C, FEMGEN 105C, HISTORY 105C, HUMRTS 112

INTNLREL 110C. America and the World Economy. 5 Units.
Examination of contemporary US foreign economic policy. Areas studied: the changing role of the dollar; mechanism of international monetary management; recent crises in world markets including those in Europe and Asia; role of IMF, World Bank and WTO in stabilizing world economy; trade politics and policies; the effects of the globalization of business on future US prosperity. Political Science majors taking this course for WIM credit should enroll in POLISCI 110C.
Same as: POLISCI 110C, POLISCI 110X

INTNLREL 110D. War and Peace in American Foreign Policy. 3-5 Units.
The causes of war in American foreign policy. Issues: international and domestic sources of war and peace; war and the American political system; war, intervention, and peace making in the post-Cold War period. Political Science majors taking this course to fulfill the WIM requirement should enroll in POLISCI 110D for 5 units. International Relations majors taking this course should enroll in INTNLREL 110D for 5 units. SCPD students should enroll for 3 units.
Same as: AMSTUD 110D, POLISCI 110D, POLISCI 110Y

INTNLREL 114D. Democracy, Development, and the Rule of Law. 3-5 Units.
This course explores the different dimensions of development - economic, social, and political - as well as the way that modern institutions (the state, market systems, the rule of law, and democratic accountability) developed and interacted with other factors across different societies around the world. The class will feature additional special guest lectures by Francis Fukuyama, Larry Diamond, Michael McFaul, Anna Grzymala-Busse, and other faculty and researchers affiliated with the Center on Democracy, Development, and the Rule of Law. Undergraduate students should enroll in this course for 5 units. Graduate students should enroll for 3.
Same as: INTLPOL 230, POLISCI 114D, POLISCI 314D

INTNLREL 118S. Political Economy of International Trade and Investment. 5 Units.
How domestic and international politics influence the economic relations between countries. Why do governments promote or oppose globalization? Why do countries cooperate economically in some situations but not others? Why do countries adopt bad economic policies? Focus on the politics of international trade and investment. Course approaches each topic by examining alternative theoretical approaches and evaluate these theories using historical and contemporary evidence from many geographical regions around the world. Prerequisites: ECON 1A, ECON 1B, and a statistics course.
Same as: POLISCI 218S

INTNLREL 122. Introduction to European Studies. 5 Units.
This course offers an introduction to major topics in the study of historical and contemporary Europe. We focus on European politics, economics and culture. First, we study what makes Europe special, and how its distinct identity has been influenced by its history. Next, we analyze Europe's politics. We study parliamentary government and proportional representation electoral systems, and how they affect policy. Subsequently, we examine the challenges the European economy faces. We further study the European Union and transatlantic relations.
Same as: POLISCI 213E

INTNLREL 123. The Future of the European Union: Challenges and Opportunities. 5 Units.
First, this course analyzes the EU's greatest challenge, preserving the monetary union, and discusses the political and economic reforms needed to achieve that goal. In this context the course also studies the fiscal and budgetary polices of the EU. Second, the course discusses the EU's role in global politics, its desire to play a more prominent role, and the ways to reach that objective. Third, the course analyzes the EU's institutional challenges in its efforts to enhance its democratic character.

INTNLREL 124. Immigration Issues in Europe. 4-5 Units.
This course will consider responses to mass migration in Europe and its contribution to a radicalized political landscape. Sampling immigrant integration policies from Germany, Sweden, Denmark, France, Britain, Hungary, Poland, and Italy will help us examine public discourse on cultural and civic assimilation of mostly Muslim immigrants. Issues such as security and counterterrorism, as well as obstacles to cooperation with countries outside the EU (Turkey, Libya), will be included.

INTNLREL 135A. International Environmental Law and Policy: Oceans and Climate Change. 4-5 Units.
This seminar offers an introduction to International Environmental Law, with a strong emphasis on oceans and climate change, its underlying principles, how it is developed and implemented, and the challenges of enforcing it. We will focus on oceans and climate change, exploring the United Nations Law of the Sea Convention (UNCLOS) and the United Nations Framework Convention for Climate Change (UNFCCC). We will explain why these agreements are described as ¿umbrella conventions¿ and how new conventions like the Paris Agreement fit within them. There will be guest speakers, a negotiation simulation, and a legal design sprint focused on re-imagining International Environmental Law.

INTNLREL 136R. Introduction to Global Justice. 4 Units.
This course explores the normative demands and definitions of justice that transcend the nation-state and its borders, through the lenses of political justice, economic justice, and human rights. What are our duties (if any) towards those who live in other countries? Should we be held morally responsible for their suffering? What if we have contributed to it? Should we be asked to remedy it? At what cost? These are some of the questions driving the course. Although rooted in political theory and philosophy, the course will examine contemporary problems that have been addressed by other scholarly disciplines, public debates, and popular media, such as immigration and open borders, climate change refugees, and the morality of global capitalism (from exploitative labor to blood diamonds). As such, readings will combine canonical pieces of political theory and philosophy with readings from other scholarly disciplines, newspaper articles, and popular media.

INTNLREL 140A. International Law and International Relations. 4-5 Units.
International law, as a body of law, performs multiple, competing functions. It serves the interests, and seeks to limit the actions, of state actors. It is also a political rhetoric captured by the oppressed, and a foundation for activism and resistance. The purpose of this seminar is to illuminate this malleable nature of international law, to explain its foundational principles and sources, and to evaluate the contours of its role as law and discourse. Questions that will accompany us throughout this seminar include: What is the character of international legal rules? Do they matter in international politics? How effective are they? What potential and what limitations do they have? In addition to exploring such questions against the backdrop of theories of international relations, we will consider several topics which bring tensions between international law and international relations to the fore, such as use of force, human rights, and international criminal law.

INTNLREL 140C. The U.S., U.N. Peacekeeping, and Humanitarian War. 4-5 Units.
The involvement of U.S. and the UN in major wars and international interventions since the 1991 Gulf War. The UN Charter's provisions on the use of force, the origins and evolution of peacekeeping, the reasons for the breakthrough to peacemaking and peace enforcement in the 90s, and the ongoing debates over the legality and wisdom of humanitarian intervention. Case studies include Croatia and Bosnia, Somalia, Rwanda, Kosovo, East Timor, and Afghanistan. *International Relations majors taking this course to fulfill the WiM requirement should enroll in INTNLREL 140C for 5 units.
Same as: HISTORY 201C, INTNLREL 140X

INTNLREL 140X. The U.S., U.N. Peacekeeping, and Humanitarian War. 4-5 Units.
The involvement of U.S. and the UN in major wars and international interventions since the 1991 Gulf War. The UN Charter's provisions on the use of force, the origins and evolution of peacekeeping, the reasons for the breakthrough to peacemaking and peace enforcement in the 90s, and the ongoing debates over the legality and wisdom of humanitarian intervention. Same as: HISTORY 201C, INTNLREL 140C

INTNLREL 141A. Camera as Witness: International Human Rights Documentaries. 5 Units.
Rarely screened documentary films, focusing on global problems, human rights issues, and aesthetic challenges in making documentaries on international topics. Meetings with filmmakers.

INTNLREL 142. Challenging the Status Quo: Social Entrepreneurs Advancing Democracy, Development and Justice. 3-5 Units.
This seminar is part of a broader program on Social Entrepreneurship at CDDRL in partnership with the Haas Center for Public Service. It will use practice to better inform theory. Working with three visiting social entrepreneurs from developing and developed country contexts students will use case studies of successful and failed social change strategies to explore relationships between social entrepreneurship, gender, democracy, development and justice. It interrogates current definitions of democracy and development and explores how they can become more inclusive of marginalized populations. This is a service learning class in which students will learn by working on projects that support the social entrepreneurs' efforts to promote social change. Students should register for either 3 OR 5 units only. Students enrolled in the full 5 units will have a service-learning component along with the course. Students enrolled for 3 units will not complete the service-learning component. Limited enrollment. Attendance at the first class is mandatory in order to participate in service learning.
Same as: AFRICAST 142, AFRICAST 242, CSRE 142C

INTNLREL 143. State and Society in Korea. 4 Units.
20th-century Korea from a comparative historical perspective. Colonialism, nationalism, development, state-society relations, democratization, and globalization with reference to the Korean experience.
Same as: SOC 111, SOC 211

INTNLREL 145. Genocide and Humanitarian Intervention. 4 Units.
The course, traces the history of genocide in the 20th century and the question of humanitarian intervention to stop it, a topic that has been especially controversial since the end of the Cold War. The pre-1990s discussion begins with the Armenian genocide during the First World War and includes the Holocaust and Cambodia under the Khmer Rouge in the 1970s. Coverage of genocide and humanitarian intervention since the 1990s includes the wars in Bosnia, Rwanda, Kosovo, the Congo, and Sudan. The final session of the course will be devoted to a discussion of the International Criminal Court and the separate criminal tribunals that have been tasked with investigating and punishing the perpetrators of genocide.

INTNLREL 146A. Energy and Climate Cooperation in the Western Hemisphere. 4 Units.
The seminar provides an overview of the current political dynamics in each of the major fossil fuel producing countries in the Western Hemisphere and its impact on local energy exploration and production. It also explores the potential for expanding existing or developing new renewable energy resources throughout the Americas, and impacts on the local environment, food prices, and land use issues. The course examines the feasibility of integrating energy markets and establishing initiatives to reduce greenhouse gas emissions at the regional and hemispheric level. The seminar focuses on Chile, a country that lacks significant petroleum and natural gas reserves and has traditionally been a major user of coal. Accordingly, the country has been at the forefront of efforts to facilitate the regional integration of energy markets and develop renewable and non-traditional energy resources. The course concludes with a discussion of the Energy and Climate Partnership of the Americas or ECPA, launched by the Obama administration at the Fifth Summit of the Americas in Trinidad in April 2009, and China¿s increasing role in Latin America¿s energy sector.

INTNLREL 147. Political Economy of the Southern Cone Countries of South America. 5 Units.
This seminar examines the economic and political development of the five countries that make up South America's Southern Cone (i.e., Argentina, Brazil, Chile, Paraguay, and Uruguay) as well as Bolivia (which was historically part of the sub-region and with which today it has close commercial ties). In particular, the course focuses on the era of Import Substitution Industrialization (ISI), explores the reasons why that model of economic development eventually collapsed and how this contributed to the rise of military dictatorships, looks at the return to democratic rule and the adoption of market-oriented economic policies, and concludes with a discussion of the contemporary situation.

INTNLREL 154. The Cold War: An International History. 5 Units.
Though it ended twenty years ago, we still live in a world shaped by the Cold War. Beginning with its origins in the mid-1940s, this course will trace the evolution of the global struggle, until its culmination at the end of the 1980s. Students will be asked to ponder the fundamental nature of the Cold War, what kept it alive for nearly fifty years, how it ended, and its long term legacy for the world. As distinguished from the lecture taught in previous quarters, this class will closely investigate ten major Cold War battlegrounds over the quarter. Selected case studies will include: the division of Germany, Iran in the 1950s, Cuba, Vietnam, the Six Day War, the Chilean coup, sub-Saharan Africa, Afghanistan, Central America, and the Eastern European revolutions of 1989. Students will be asked to consult a combination of original documents and recent histories.
Same as: HISTORY 166C

INTNLREL 160. United Nations Peacekeeping. 4 Units.
This seminar is devoted to an examination of United Nations peacekeeping, from its inception in 1956 in the wake of the Suez Crisis, to its increasingly important role as an enforcer of political stability in sub-Saharan Africa. We will look at the practice of "classic" peacekeeping as it developed during the Cold War, with the striking exception of the Congo Crisis of 1960; the rise and fall of so-called "second-generation peacekeeping"¿more accurately labeled "peace enforcement"¿in the early 1990s in Bosnia and Somalia; and the reemergence in recent years of a muscular form of peacekeeping in sub-Saharan Africa, most notably in Congo in 2013.nStudents will learn the basic history of the United Nations since 1945 and the fundamentals of the United Nations Charter, especially with respect to the use of force and the sovereignty of member states. While the course does not attempt to provide comprehensive coverage of the historical details of any particular peacekeeping mission, students should come away with a firm grasp of the historical trajectory of U.N. peacekeeping and the evolving arguments of its proponents and critics over the years.nEach session of the course is structured around the discussion of assigned readings. Students are expected to complete the readings before class and to come to class prepared to participate in discussions. Each student will serve as rapporteur for one of the assigned readings, providing a critical summary of the reading in question and helping to stimulate the discussion to follow. The instructor will occasionally begin a session with brief introductory remarks (no more than ten minutes) to provide historical context about one or another topic. Required coursework includes two short papers whose particular topic and guidelines will be announced in class.

INTNLREL 168. America as a World Power in the Modern Era. 5 Units.
This course will examine the modern history of American foreign relations, from the turn of the twentieth century to the present. Beginning with the fateful decision to go to war with Spain, it will examine the major crises and choices that have defined the "American Century." Our study of U.S. foreign relations will consider such key factors as geopolitics, domestic politics, bureaucracy, psychology, race, and culture. IR majors taking this course to fulfill the IR WIM requirement should enroll in INTNLREL168W.
Same as: HISTORY 152K, INTNLREL 168W

INTNLREL 168A. American Interventions, 1898-Present. 5 Units.
This class seeks to examine the modern American experience with limited wars, beginning with distant and yet pertinent cases, and culminating in the war in Iraq. Although this class will examine war as a consequence of foreign policy, it will not focus primarily on presidential decision making. Rather, it will place wartime policy in a broader frame, considering it alongside popular and media perceptions of the war, the efforts of antiwar movements, civil-military relations, civil reconstruction efforts, and conditions on the battlefield. We will also examine, when possible, the postwar experience.
Same as: HISTORY 259E, HISTORY 359E

INTNLREL 168W. America as a World Power in the Modern Era. 5 Units.
This course will examine the modern history of American foreign relations, from the turn of the twentieth century to the present. Beginning with the fateful decision to go to war with Spain, it will examine the major crises and choices that have defined the "American Century." Our study of U.S. foreign relations will consider such key factors as geopolitics, domestic politics, bureaucracy, psychology, race, and culture. Same as: HISTORY 152K, INTNLREL 168

INTNLREL 173. Presidents and Foreign Policy in Modern History. 5 Units.
Nothing better illustrates the evolution of the modern presidency than the arena of foreign policy. This class will examine the changing role and choices of successive presidential administrations over the past century, examining such factors as geopolitics, domestic politics, the bureaucracy, ideology, psychology, and culture. Students will be encouraged to think historically about the institution of the presidency, while examining specific case studies, from the First World War to the conflicts of the 21st century.
Same as: HISTORY 261G

INTNLREL 174. Diplomacy on the Ground: Case Studies in the Challenges of Representing Your Country. 5 Units.
The tragic death of Ambassador Chris Stevens has recently highlighted the dangers of diplomacy in the modern era. This class will look at how Americans in embassies have historically confronted questions such as authoritarian rule, human rights abuses, violent changes of government, and covert action. Case studies will include the Berlin embassy in the 1930s, Tehran in 1979, and George Kennan's experiences in Moscow, among others. Recommended for students contemplating careers in diplomatic service. *IR majors taking this course to fulfill the IR WIM requirement should enroll in INTNLREL174. As space is limited, first-year students must obtain the instructor's prior consent before enrolling.
Same as: HISTORY 252B

INTNLREL 175. American Empire in the Pacific. 3 Units.
This course will provide an interdisciplinary overview of the history and current state of American empire in the Pacific Islands. Through the lenses of law, history, and anthropology, the course will chart the progression of the American empire, beginning with early colonization, through World War II and the Cold War, to present day, including modern challenges facing communities affected by U.S. imperialism, decolonization movements, and the intersection of empire and climate change. Themes include cultural imperialism, militarization and experimentation, human rights and global ethics, and social and environmental justice.

INTNLREL 179. Major Themes in U.S.-Latin America Diplomatic History. 5 Units.
This seminar provides an overview of the most important events and initiatives that have characterized the relationship of the United States of America with its neighbors to the south, including Mexico, the Caribbean (especially Cuba, Haiti, and the Dominican Republic), Central America, and South America since the proclamation of the Monroe Doctrine in the early 19th century until the Obama Administration. In particular, the course examines the motivations for the Theodore Roosevelt Corollary to the Monroe Doctrine and the resulting period of blatant interventionism known as "Dollar Diplomacy," the Good Neighbor Policy of Franklin Delano Roosevelt, the brutal Cold War period, as well as policies pursued by the Clinton, George W. Bush, and Obama administrations, such as the Free Trade Area of the Americas (FTAA) and the Energy and Climate Partnership of the Americas (ECPA). The seminar explores not only what motivated U.S. policy makers and how their polices were implemented (and explains why they either succeeded or failed), but also discusses the impacts on individual countries and/or the region as a whole and the long-term consequences whose repercussions are still being felt today. The course also examines the major features of the inter-American system from the Pan American Union to the creation of the Organization of American States (OAS) and its continued relevancy in light of new institutional frameworks such as the Community of Latin American and Caribbean States (CELAC) and the Union of South American Nations (UNASUR) that exclude the United States of America.

INTNLREL 180A. Transitional Justice, Human Rights, and International Criminal Tribunals. 3-5 Units.
(Formerly IPS 280) Historical backdrop of the Nuremberg and Tokyo Tribunals. The creation and operation of the Yugoslav and Rwanda Tribunals (ICTY and ICTR). The development of hybrid tribunals in East Timor, Sierra Leone, and Cambodia, including evaluation of their success in addressing perceived shortcomings of the ICTY and ICTR. Examination of the role of the International Criminal Court and the extent to which it will succeed in supplanting all other ad hoc international justice mechanisms and fulfill its goals. Analysis focuses on the politics of creating such courts, their interaction with the states in which the conflicts took place, the process of establishing prosecutorial priorities, the body of law they have produced, and their effectiveness in addressing the needs of victims in post-conflict societies.
Same as: ETHICSOC 280, HUMRTS 103, INTLPOL 280

INTNLREL 182. The Great War. 5 Units.
The First World War provided a prototype for a new, horrific kind of war. It catalyzed the emergence of modern means of warfare and the social mechanisms necessary to sustain the industrialized war machine. Killing millions, it became the blueprint for the total war that succeeded it. It also brought about new social and political orders, transforming the societies which it mobilized at unprecedented levels.n nThis course will examine the military, political, economic, social and cultural aspects of the conflict. We will discuss the origins and outbreak of the war, the land, sea and air campaigns, the war's economic and social consequences, the home fronts, the war's final stages in eastern and western Europe as well as non-European fronts, and finally, the war's impact on the international system and on its belligerents and participants' perceptions of the new reality it had created.

INTNLREL 183. The Modern Battle. 5 Units.
The purpose of this seminar is to examine the evolution of modern warfare by closely following four modern battles/campaigns. For this purpose the seminar offers four mock staff rides, facilitating highly engaged, well-researched experience for participants. In a mock staff ride, students are assigned roles; each student is playing a general or staff officer who was involved in the battle/campaign. Students will research their roles and, during the staff ride, will be required to explain "their" decisions and actions. Staff rides will not deviate from historical records, but closely examine how decisions were made, what pressures and forces were in action, battle outcomes, etc. This in-depth examination will allow students to gain a deeper understanding of how modern tactics, technology, means of communications, and the scale of warfare can decide, and indeed decided, campaigns. We will will spend two weeks preparing for and playing each staff ride. One meeting will be dedicated to discussing the forces shaping the chosen battle/campaign: the identity and goals ofnthe belligerents, the economic, technological, cultural and other factors involved, as well as the initial general plan. The second meeting will be dedicated to the battle itself. The four battles will illustrate major developments in modern warfare.
Same as: HISTORY 206C

INTNLREL 189. PRACTICAL TRAINING. 1-3 Unit.
Students obtain internship in a relevant research or industrial activity to enhance their professional experience consistent with their degree program and area of concentration. Prior to enrolling students must get internship approved by the director. At the end of the quarter, a three page final report must be supplied documenting work done and relevance to degree program. Meets the requirements for Curricular Practical Training for students on F-1 visas. Student is responsible for arranging own internship. Limited to declared International Relations students only who are non-US citizens. May be repeated for credit.

INTNLREL 197. Directed Reading in International Relations. 1-5 Unit.
Open only to declared International Relations majors.n (Staff).

INTNLREL 198. Senior Thesis. 2-10 Units.
Open only to declared International Relations majors with approved senior thesis proposals.

INTNLREL 200A. International Relations Honors Field Research. 3 Units.
For juniors planning to write an honors thesis during senior year. Initial steps to prepare for independent research. Professional tools for conceptualizing a research agenda and developing a research strategy. Preparation for field research through skills such as data management and statistics, references and library searches, and fellowship and grant writing. Creating a work schedule for the summer break and first steps in writing. Prerequisite: acceptance to IR honors program.

INTNLREL 200B. International Relations Honors Seminar. 3 Units.
Second of two-part sequence. For seniors working on their honors theses. Professional tools, analysis of research findings, and initial steps in writing of thesis. How to write a literature review, formulate a chapter structure, and set a timeline and work schedule for the senior year. Skills such as data analysis and presentation, and writing strategies. Prerequisites: acceptance to IR honors program, and 199 or 200A. * Course satisfies the WiM requirement for International Relations majors who are accepted into the IR Honors program.

INTNLREL 200C. IR Honors Thesis Writing. 1 Unit.
Mandatory seminar for International Relations Honors Students who are writing their Honors Thesis. INTNLREL 200A and 200B are prerequisites.

INTNLREL 202. Original Research in International Relations. 5 Units. This new course offers IR majors an opportunity to conduct in-depth, original research and write an original research paper on a topic of their choosing within a single quarter. It is ideally suited for students who have a question that has intrigued them and that they would like to answer through original research. Through this course, students will narrow their interests into a clear research question, develop a research design, review relevant literature that addresses this question, conduct original empirical research and produce a final research paper. The course is designed for IR majors, and thus has an interdisciplinary focus and embraces methodological diversity. It may also be petitioned to count towards the IR major.

JEWISH STUDIES

The Taube Center for Jewish Studies investigates all aspects of Jewish culture, history, religion, literature, language and education from biblical times to the present. Courses are offered on the undergraduate and graduate levels in a program complemented by a full range of guest lectures, conferences, and symposia. The Center annually sponsors the Donald and Robin Kennedy Undergraduate Award for the best undergraduate essay on any theme in Jewish Studies, the Dr. Bernard Kaufman Undergraduate Research Award in Jewish Studies awarded to an undergraduate engaged in research on Jews in modernity, and the Koret Award for best essay written in Hebrew by an undergraduate. In alternate years, the Center sponsors the Nelee Langmuir Award for a student working in the field of Modern European History with a preference given to work on the Holocaust, and the Short Story Contest which awards the top three stories written on a Jewish theme.

Graduate students must apply and enroll in the program through the departments of English, History, Comparative Literature, Religious Studies, or the School of Education, and meet the requirements of those departments. All graduate students in the University with an academic interest in Jewish Studies are encouraged to participate in the Colloquium for Jews, Judaism and Jewish Culture, an ongoing opportunity to share work and meet with faculty and visiting scholars. For more information about graduate studies in Jewish Studies, contact the Center manager or Director.

Undergraduate Program in Jewish Studies

An undergraduate program in Jewish Studies is offered through Comparative Studies in Race and Ethnicity (CSRE) (p. 1224). It is interdisciplinary in that it that draws together a wide range of disciplines including history, literary studies, religious studies, gender studies, education, and other fields. Through its courses and extracurricular programs, the Taube Center seeks to introduce students to the ideas and experience of the Jewish people over its entire history, from the biblical period to the Holocaust and contemporary Israeli culture.

Undergraduates interested in completing a major or minor in Jewish Studies should visit the "Comparative Studies in Race and Ethnicity (CSRE) (p. 1235)" section of this bulletin for program descriptions and courses.

Writer-in-residence: Maya Arad

Courses

JEWISHST 4. What Didn't Make It into the Bible. 4 Units.
Over two billion people alive today consider the Bible to be sacred scripture. But how did the books that made it into the bible get there in the first place? Who decided what was to be part of the bible and what wasn't? How would history look differently if a given book didn't make the final cut and another one did? Hundreds of ancient Jewish and Christian texts are not included in the Bible. "What Didn't Make It in the Bible" focuses on these excluded writings. We will explore the Dead Sea Scrolls, Gnostic gospels, hear of a five-year-old Jesus throwing temper tantrums while killing (and later resurrecting) his classmates, peruse ancient romance novels, explore the adventures of fallen angels who sired giants (and taught humans about cosmetics), tour heaven and hell, encounter the garden of Eden story told from the perspective of the snake, and learn how the world will end. The course assumes no prior knowledge of Judaism, Christianity, the bible, or ancient history. It is designed for students who are part of faith traditions that consider the bible to be sacred, as well as those who are not. The only prerequisite is an interest in exploring books, groups, and ideas that eventually lost the battles of history and to keep asking the question "why." In critically examining these ancient narratives and the communities that wrote them, you will investigate how religions canonize a scriptural tradition, better appreciate the diversity of early Judaism and Christianity, understand the historical context of these religions, and explore the politics behind what did and did not make it into the bible.
Same as: CLASSICS 9N, RELIGST 4

JEWISHST 4N. A World History of Genocide. 3-5 Units.
Reviews the history of genocide from ancient times until the present. Defines genocide, both in legal and historical terms, and investigates its causes, consequences, and global dimensions. Issues of prevention, punishment, and interdiction. Main periods of concern are the ancient world, Spanish colonial conquest; early modern Asia; settler genocides in America, Australia, and Africa; the Armenian genocide and the Holocaust; genocide in communist societies; and late 20th century genocide.
Same as: HISTORY 4N

JEWISHST 5. Biblical Greek. 3-5 Units.
This is a one term intensive class in Biblical Greek. After quickly learning the basics of the language, we will then dive right into readings from the New Testament and the Septuagint, which is the ancient Greek translation of the Hebrew Bible. No previous knowledge of Greek required. If demand is high for a second term, an additional quarter will be offered in the Spring.
Same as: CLASSICS 6G, RELIGST 171A

JEWISHST 5B. Biblical Greek. 3-5 Units.
This is a continuation of the Winter Quarter Biblical Greek Course. Pre-requisite: CLASSICS 6G or a similar introductory course in Ancient Greek.
Same as: CLASSICS 7G

JEWISHST 5G. Intensive Biblical Greek. 8 Units.
Equivalent to two quarters of Biblical Greek (CLASSICS 6G, 7G). Students will learn the core of New Testament Greek with the goal of learning to accurately translate and read the New Testament. Students will read one-third of the Gospel of John during the course and will be well-prepared to read the Greek New Testament independently after the course. Focus on knowledge of key vocabulary and grammar needed to read the Greek Bible with ease. No previous knowledge of Greek required. Course does not fulfill the Stanford language requirement.
Same as: RELIGST 171X

JEWISHST 18N. Religion and Politics: Comparing Europe to the U.S.. 3-4 Units.
Interdisciplinary and comparative. Historical, political, sociological, and religious studies approaches. The relationship between religion and politics as understood in the U.S. and Europe. How this relationship has become tense both because of the rise of Islam as a public religion in Europe and the rising influence of religious groups in public culture. Different understandings and definitions of the separation of church and state in Western democratic cultures, and differing notions of the public sphere. Case studies to investigate the nature of public conflicts, what issues lead to conflict, and why. Why has the head covering of Muslim women become politicized in Europe? What are the arguments surrounding the Cordoba House, known as the Ground Zero Mosque, and how does this conflict compare to controversies about recent constructions of mosques in Europe? Resources include media, documentaries, and scholarly literature.
Same as: RELIGST 18N

JEWISHST 19N. Everyone Eats: Food, Religion and Culture. 3 Units.
Food is one of the most essential aspects of the human experience. The decisions and choices we make about food define who we have been, who we are now, and who we want to become. In this seminar we will study how food habits have shaped religious traditions, and vice versa, how religious traditions have shaped food ways. Some traditions are centered around food regiments such as the dietary laws, derived from biblical law that shapes Jewish and Christian tradition very differently. Indeed, many religious and ethical thinkers, as well as anthropologists, have interpreted the meanings of the dietary laws very differently. Further, in many religious traditions the killing of animals and consumption of meat is deeply fraught. We will explore the history of food practices and their contemporary impact; the connections between food, religion, and identity; the meanings that religious thinkers and anthropologists have attributed to food habits; as well as the creative translations of religious traditions into contemporary food ethics by various social movements and groups, predominantly in the U.S.
Same as: CSRE 19N, RELIGST 19N

JEWISHST 37Q. Zionism and the Novel. 3 Units.
At the end of the nineteenth century, Zionism emerged as a political movement to establish a national homeland for the Jews, eventually leading to the establishment of the State of Israel in 1948. This seminar uses novels to explore the changes in Zionism, the roots of the conflict in the Middle East, and the potentials for the future. We will take a close look at novels by Israelis, both Jewish and Arab, in order to understand multiple perspectives, and we will also consider works by authors from the North America and from Europe. NOTE: To satisfy a WAYS requirement, this course must be taken for at least 3 units. In AY 2020-21, a 'CR' grade will satisfy the WAYS requirement.
Same as: COMPLIT 37Q

JEWISHST 39S. The Other Side: Ethnography and Travel Writing through Jewish, Christian and Muslim Eyes. 3 Units.
In an age of reality television and social media, we are bombarded with snapshots of the exotic, monstrous, and bizarre. Yet despite their quantity, these images pale in comparison to the qualities of terror, wonder and curiosity that ancient travelers evoked in their encounters with foreign lands and peoples. Early ethnographers, too, painstakingly explored the beliefs and practices of unfamiliar peoples sometimes very close to home. This course surveys their most vivid writings, from ancient Greece to the colonization of the New World, focusing on the relation between fascination with the other and the author's own religious imagination. In particular, it introduces the contributions of Jewish travelers and ethnographers to this history, which has often been written from the standpoint of imperial, ecclesiastical or colonial power. It stresses literary continuities across three general periods (ancient, medieval, and colonial), showing how remarkably consistent patterns of identification spring from diverse encounters.

JEWISHST 53. Exploring Jewish Spirituality. 4 Units.
It was once accepted as fact that Judaism is, at its core, a rational religion devoid of any authentic mystical tradition. But the past century of scholarship has reversed this claim, demonstrating that the spiritual life has been integral to Judaism's vital heart since ancient times. This yearning for a direct immediate experience of God's Presence, a longing to grasp the mysteries of the human soul and know the inner dynamics of the Divine realm, has taken on many different forms across the centuries.
This course will introduce students to the major texts--from theological treatises to poems and incantations--and core ideas of Jewish mysticism and spirituality, tracking their development from the Hebrew Bible to the dawn of modernity. Close attention will be paid to the historical context of these sources, and we will also engage with broader methodological approaches--from phenomenology to philology--regarding the academic study of religion and the comparative consideration of mysticism in particular.
This course assumes no prior background of Judaism or any other religious traditions. All readings will be made available in English. Students are, however, invited to challenge themselves with the "optional/advanced" readings of sources both primary and secondary. Pending interest, students with facility in the original languages (Hebrew or Aramaic) will be given the opportunity to do so.
Same as: RELIGST 53

JEWISHST 85B. Jews in the Contemporary World: The American Jewish Present & Past in Popular Culture, Film, & TV. 3 Units.
(HISTORY 85B is 3 units; HISTORY 185B is 5 units.) Who are American Jews as depicted in popular media-- film, television, etc.-- since the Second World War? How are their religion, politics, mores, and practices represented and what ways, if at all, do such portraits reflect historical trends among Jews and society in general? What can be learned from film or tv about Jewish identity, notions of Jewish power and powerlessness, communal cohesiveness and assimilation, sexuality and the wages of intermarriage or race?.
Same as: CSRE 85B, HISTORY 85B, REES 85B

JEWISHST 86. Exploring the New Testament. 4 Units.
To explore the historical context of the earliest Christians, students will read most of the New Testament as well as many documents that didn't make the final cut. Non-Christian texts, Roman art, and surviving archeological remains will better situate Christianity within the ancient world. Students will read from the Dead Sea Scrolls, explore Gnostic gospels, hear of a five-year-old Jesus throwing divine temper tantrums while killing (and later resurrecting) his classmates, peruse an ancient marriage guide, and engage with recent scholarship in archeology, literary criticism, and history.
Same as: CLASSICS 43, RELIGST 86

JEWISHST 86Q. Blood and Money: The Origins of Antisemitism. 4-5 Units.
For over two millennia, Jews and Judaism have been the object of sustained anxieties, fears, and fantasies, which have in turn underpinned repeated outbreaks of violence and persecution. This course will explore the development and impact of antisemitism from Late Antiquity to the Enlightenment, including the emergence of the Blood libel, the association between Jews and moneylending, and the place of Judaism in Christian and Islamic theology. No prior background in history or Jewish studies is necessary. Prerequisite: PWR 1.
Same as: HISTORY 86Q

JEWISHST 101A. First-Year Hebrew, First Quarter. 5 Units.
In the first-year program, students acquire essential Hebrew through abundant opportunities to interact in the language in meaningful ways. The students learn to function appropriately in the language in a variety of social and cultural contexts.
Same as: AMELANG 128A

JEWISHST 101B. First-Year Hebrew, Second Quarter. 5 Units.
Continuation of AMELANG 128A. Prerequisite: Placement Test, AMELANG 128A.
Same as: AMELANG 128B

JEWISHST 101C. First-Year Hebrew, Third Quarter. 5 Units.
Continuation of AMELANG 128B. Prerequisite: Placement Test, AMELANG 128B. Fulfill the University Foreign Language Requirement.
Same as: AMELANG 128C

JEWISHST 102A. Second-Year Hebrew, First Quarter. 4 Units.
Continuation of AMELANG 128C. Sequence integrating culture and language. Emphasis is on proficiency in oral and written discourse including presentational language and socio culturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: Placement Test, First Year Hebrew .
Same as: AMELANG 129A

JEWISHST 102B. Second-Year Hebrew, Second Quarter. 4 Units.
Continuation of AMELANG 129A. Sequence integrating culture and language. Emphasis is on proficiency in oral and written discourse including presentational language and socio culturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: Placement Test, Hebrew 129A.
Same as: AMELANG 129B

JEWISHST 102C. Second-Year Hebrew, Third Quarter. 4 Units.
Continuation of AMELANG 129B. Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socio culturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: placement Test, Hebrew129B.
Same as: AMELANG 129C

JEWISHST 103A. Third-Year Hebrew, First Quarter. 3 Units.
Continuation of AMELANG 129C. Prerequisite: Placement Test, AMELANG 129C.
Same as: AMELANG 130A

JEWISHST 104. Hebrew Forum. 1-3 Unit.
Intermediate and advanced level. Biweekly Hebrew discussion on contemporary issues with Israeli guest speakers. Vocabulary enhancement. Focus on exposure to academic Hebrew. May be repeat for credit up to 4 times.
Same as: AMELANG 131A

JEWISHST 104A. First-Year Yiddish, First Quarter. 4 Units.
Reading, writing, and speaking.
Same as: AMELANG 140A

JEWISHST 104B. First-Year Yiddish, Second Quarter. 4 Units.
Continuation of AMELANG 140A. Prerequisite: AMELANG.
Same as: AMELANG 140B

JEWISHST 104C. First-Year Yiddish, Third Quarter. 4 Units.
Continuation of AMELANG 140B. Prerequisite: AMELANG 140B. Fulfills the University Foreign Language Requirement.
Same as: AMELANG 140C

JEWISHST 105. Hebrew Forum. 2-4 Units.
Intermediate and advanced level. Biweekly Hebrew discussion on contemporary issues with Israeli guest speakers. Vocabulary enhancement. Focus on exposure to academic Hebrew. May repeat for credit.
Same as: AMELANG 131B

JEWISHST 106. Reflection on the Other: The Arab Israeli Conflict in Literature and Film. 3-5 Units.
How literary works outside the realm of Western culture struggle with questions such as identity, minority, and the issue of the Other. How the Arab is viewed in Hebrew literature, film and music and how the Jew is viewed in Palestinian works in Hebrew or Arabic (in translation to English). Historical, political, and sociological forces that have contributed to the shaping of these writers' views. Guest lectures about the Jew in Palestinian literature and music. Note: To be eligible for WAYS credit, you must take course for a Letter Grade.
Same as: AMELANG 126, COMPLIT 145

JEWISHST 107A. Biblical Hebrew, First Quarter. 2 Units.
Establish a basic familiarity with the grammar and vocabulary of Biblical Hebrew and will begin developing a facility with the language. Students that are enrolled in this course must also enroll in Beginning Hebrew. This course requires no prior knowledge of Hebrew and will begin with learning the alphabet. By the end of the year, students will be able to translate basic biblical texts, will be familiar with common lexica and reference grammars, and will have sufficient foundational knowledge to enable them to continue expanding their knowledge either in a subsequent course or own their own.
Same as: RELIGST 170A

JEWISHST 107B. Biblical Hebrew, Second Quarter. 2 Units.
Continuation of 170A.

JEWISHST 107C. Biblical Hebrew, Third Quarter. 4 Units.
Continuation of 170B.
Same as: AMELANG 170C

JEWISHST 120. Sex and Gender in Judaism and Christianity. 3 Units.
What role do Jewish and Christian traditions play in shaping understandings of gender differences? Is gender always imagined as dual, male and female? This course explores the variety of ways in which Jewish and Christian traditions - often in conversation with and against each other - have shaped gender identities and sexual politics. We will explore the central role that issues around marriage and reproduction played in this conversation. Perhaps surprisingly, early Jews and Christian also espoused deep interest in writing about 'eunuchs' and 'androgynes,' as they thought about Jewish and Christian ways of being a man or a woman. We will examine the variety of these early conversations, and the contemporary Jewish and Christian discussions of feminist, queer, trans- and intersex based on them.
Same as: FEMGEN 130, RELIGST 130

JEWISHST 123. Muslims, Jews, and Christians: Conflict, Coexistence, and Collaboration. 4 Units.
Relationships between Muslims, Jews, and Christians today are informed by a multitude of complex and often painful histories. These faith traditions emerged out of deep and sustained engagement with one another sharing theological and ethical principles, and revering many of the same figures and there have been many periods of rich and productive interaction. Yet there have also been areas of dissension and conflict, and periods when theological, social, or political disagreement devolved into violence and oppression. In recent times (especially following the Holocaust and the establishment of the modern State of Israel), religious, political, and intellectual leaders of Muslim, Jewish, and Christian communities, in the U.S. and around the world, have recognized the need to forge deeper and more meaningful relationships with one another. Knowledge and understanding of the perspectives that different communities and individuals bring to bear on their entangled past, present, and future are a critical part of efforts to resolve intransigent conflicts and advance mutual interests. This course explores some of the most significant moments of interaction through literature and art, polemic and dialogue that have shaped engagements between Muslims, Jews, and Christians throughout history, and examines both prospects and pitfalls for engagement in the present and future.
Same as: RELIGST 133

JEWISHST 125. Modern Jewish Mysticism: Devotion in a Secular Age. 4 Units.
The twentieth-century was a time of tremendous upheaval and unspeakable tragedy for the Jewish communities of Europe. But the past hundred years were also a period of great renewal for Jewish spirituality, a renaissance that has continued into the present day. Beginning with the writings of the Safed Renaissance, the Sabbateanism, and the Hasidic masters, our course will focus on key thinkers in the 19th and 20th centuries, including: Hillel Zeitlin, Martin Buber, Abraham Isaac Kook, Abraham Joshua Heschel, and Arthur Green. Drawing upon essays, homilies, and poems, we will examine the ways in which their works re-cast and reinterpret the Jewish tradition in answer to the singular questions and challenges modernity. We will mark the development of their thinking against the two World Wars, the Holocaust, and the complex and multi-faceted processes of secularization. We will also consider the theological project of modern Jewish mystics in dialogue with modern Jewish philosophers (such as Hermann Cohen, Franz Rosenzweig, and Emmanuel Levinas) as well as modern philosophers and scholars informed by Christianity (from William James to Charles Taylor). This course argues that the processes of sacralization, of reclaiming a life of mystical devotion, are best understood as a unique response to Jewish modernity rather than a retreat to past modalities of religion. In seeking to prove this point, we will explore writers whose work emerged in and engaged with different social and cultural domains. We will investigate their writings with an eye to issues such as power and identity, and will draw upon their works in charting the intersection of mysticism, literature, language and experience. Throughout our readings, we will keep our eye on the sustained impact of feminism on Jewish mysticism in the second half of the twentieth century. This course is structured as a seminar, and our class discussions will be rooted in the primary sources. It assumes no prior background of Judaism or any other religious traditions. All readings will be made available in English.
Same as: RELIGST 165

JEWISHST 127D. Readings in Talmudic Literature. 1 Unit.
Readings of Talmudic texts. Some knowledge of Hebrew is preferred, but not necessary. The goal of the ongoing workshop is to provide Stanford students with the opportunity to engage in regular Talmud study, and to be introduced to a variety of approaches to studying Talmudic texts and thought.
Same as: JEWISHST 227D, RELIGST 170D

JEWISHST 127E. Readings in Talmudic Literature Advanced. 1 Unit.
Readings of the talmudic texts. Knowledge of Hebrew is required. The ongoing seminar is designed to study the making of the talmudic sugya (unit of discourse), along with classic commentaries. Students will consider some of the recent developments in the academic study of Talmudic literature, introduced by the instructor. The goal of the ongoing seminar is to provide Stanford students and faculty with the opportunity to engage in regular Talmud study, and to be introduced to a variety of approaches to studying Talmudic texts. Meeting time and location TBA. May be repeated for credit.
Same as: JEWISHST 227E, RELIGST 170E

JEWISHST 128. Women and Gender in Early Judaism and Christianity. 4 Units.
Beginning with the Hebrew Bible and New Testament, we will explore female figures in early Jewish and Christian literatures, such as Eve, Ruth, Mary, and Junia. Based on this, we will probe the prescriptions for female comportment in early Judaism and Christianity placing these literary prescriptions in conversation with material evidence related to women, such as for example the Babatha archive. We will analyze the politics of patriarchy in ancient discourse, and examine, among other topics, efforts by Christian clergy to silence female prophets in the second and third centuries CE. The bulk of the course will be devoted to the formative years of both Judaism and Christianity in Late Antiquity. This course assumes no prior knowledge of Judaism, Christianity, the Bible, or ancient history. It is designed for students who are part of faith traditions that consider the Bible to be sacred, as well as those who are not. Ancient readings in this course will be supplemented by modern scholarship in classics, early Christian studies, gender studies, queer studies, and the history of sexuality.
Same as: RELIGST 128

JEWISHST 129. Sacred Words: Jewish Thought and the Question of Language. 4 Units.
Jews have long been referred as the people of the book, but they might better be referred to as the people of the word. Drawing upon texts from the Hebrew Bible to the works of modern Hebrew writers like of Hayyim Nahman Bialik and Amoz Oz, this seminar will chart the development of Jewish thinking on language over the past two millennia. We will explore issues such as: the idea of canonization; oral versus written language; the nature and possibility of translation; the origins of language; notions of negative theology; mystical approaches to the word; the rebirth of Hebrew as a spoken and cultural language; and the limits of language after the Holocaust. This course will also bring Jewish thought into dialogue with contemporary philosophical reflections on issues of language. Modern explorations of language will prove an interesting way of deepening our understanding of the Jewish thinkers on one hand, and enriching contemporary intellectual discourse on the other.
Same as: RELIGST 169

JEWISHST 129A. Milk and Honey, Wine and Blood: Food, Justice, and Ethnic Identity in Jewish Culture. 4 Units.
This course examines Jewish culture and the food practices and traditions that have shaped and continue to shape it. Students learn to prepare a variety of meals while studying about the historical and literary traditions associated with them, such as the dietary `laws¿ and the long history of their interpretation, as well as the cultivation of eating as devotional practice in Jewish mystical traditions. We will explore how regional foods the world over contribute to the formation of distinct Jewish ethnic identities, and how these traditions shape contemporary Jewish food ethics. The course includes guest visits by professional chefs and food writers, and field trips to a local winery.
Same as: RELIGST 129

JEWISHST 130VP. Introduction to Social Demography: A Comparative Approach (Israel & US). 3 Units.
In this class we will learn about Israel's unique demographic structure and we will compare it to the US and other countries. Reading materials include general theories as well as research published in scholarly journals. In the first half of this class we will review basic demographic concepts (mortality, fertility and migration), and we will apply them to the Israeli context, with comparisons between different social groups in Israel and with comparison to the US. We will also review basic demographic theories (theories of population change) and apply them to different countries. nnIn the second half of the class we will focus on demography of the family. We will ask how fertility, marriage and divorce differ for different population groups in Israel and the US, and we will tie family processes to current theories of gender and family change. We will also learn how demographic processes may be related to the reproduction of poverty, and inequality.
Same as: SOC 119VP

JEWISHST 131VP. Poverty and Inequality in Israel and the US: A Comparative Approach. 3 Units.
Poverty rates in Israel are high and have been relatively stable in recent decades, with about one fifth of all households (and a third of all children) living below the poverty line. In this class we will learn about poverty and inequality in Israel and we will compare with the US and other countries.nnIn the first few weeks of this class we will review basic theories of poverty and inequality and we will discuss how theories regarding poverty have changed over the years, from the "culture of poverty" to theories of welfare state regimes. We will also learn about various ways of measuring poverty, material hardship, and inequality, and we will review the methods and data used.nnIn the remaining weeks of the class we will turn to substantive topics such as gender, immigration, ethnicity/nationality, welfare policy, age, and health. Within each topic we will survey the debates within contemporary scholarship and we will compare Israel and the US. Examination of these issues will introduce students to some of the challenges that Israeli society faces today.
Same as: CSRE 120P, SOC 120VP

JEWISHST 132. Between Nation-Building and Liberalization: The Welfare State in Israel. 3 Units.
According to one commentator, the political economy of Israel is characterized by embedded illiberalism. In the context of a national and territorial conflict, the Israeli state fostered comprehensive nation-building projects (such as immigration absorption), via employment and social protection schemes. This course surveys the distinctive development of the Israeli welfare state in comparative perspective, and analyzes its particular politics and outcomes in the form of inclusion but also exclusion of different populations from full citizenship. The course will follow a chronological path from the pre-state crystallization of national welfare institutions to the current neo-liberalization trend that seems to undermine collectivist projects and advance the re-commodification of citizenship. Throughout the course we will discuss issues such as: the role of labor and nationalism in the design of social policy, the production of national, ethnic and gender inequality, and the dynamics of change and continuity following heightened liberalization and internationalization since the 1980s. The course exposes students to key issues of the sociology of the welfare state with particular emphasis on the development and role of the state in a deeply conflicted society, using the Israeli experience. At the conclusion of the course students are expected to understand how welfare state institutions reflect but also reproduce societal schisms and conflicts, and be familiar with central aspects of Israeli politics past and present.
Same as: SOC 102

JEWISHST 132A. Social Inequality in Israel. 3 Units.
Like the US, Israel is a nation of immigrants. Israel additionally shares with the US vast economic, ethnic/racial and gender gaps, which are shaped and are being shaped by the demographic diversity characterizing its society. The course will provide a comparative framework for analyzing social inequality in Israel. We will start by reviewing essential concepts and theories in the study of social stratification. We will then review the main cleavages characterizing Israeli society, while comparing them to gaps in other advances societies and particularly the US. We will focus on class, gender and ethnicity as the main distinctions and will examine their implications for differences in life chances in several domains across the life course. We will conclude with a discussion of possible scenarios for change, which are relevant to both Israel and the US. Throughout the course, we will study critical thinking techniques and will use them for analyzing issues that are central for the analysis of social inequality in Israel and elsewhere.
Same as: CSRE 132A, SOC 102A

JEWISHST 132D. Sociology of Jewishness. 3-5 Units.
Examines the place of the Jewish people in society throughout various locales and historical periods to understand how interactions among Jews and with other groups have shaped Jewish identities. Topics include modernism, the Holocaust, Israel/nationhood, race/ethnicity, intermarriage, and assimilation. Uses theoretical, empirical, and historical material from multiple social scientific fields of study and explores the study of Judaism from several major sociological lenses.
Same as: CSRE 132J, SOC 132J

JEWISHST 132VP. Family and Society: A Comparative Approach (Israel & the US). 3 Units.
Families are changing: Non-marital partnerships such as cohabitation are becoming more common, marriage is delayed and fertility is declining. In this class we will learn about how families are changing in Israel and we will compare with the US and other countries. Reading materials include general theories as well as research published in scholarly journals. nnAfter reviewing general theories and major scholarly debates concerning issues of family change, we will turn to specific family processes and compare Israel, the US and other countries. We will ask how family transitions may differ for different population groups and at different stages of the life course, and we will tie family processes to current theories of gender. nnWe will cover a wide range of topics, from marriage and marital dissolution to cohabitation, LAT and remarriage. We will also discuss changes in women's labor force participation and how it bears on fertility, parenthood and household division of labor. Within each substantive topic we will survey the debates within contemporary scholarship and we will compare Israel and the US.
Same as: SOC 121VP, SOC 221VP

JEWISHST 133. Sociology of Citizenship. 3 Units.
Not only a legal status, citizenship forms a major concern for political sociologists interested in questions of membership, exclusion, redistribution, and struggles over the boundaries of collective identity. Citizenship is in essence membership in a political community that entails rights and duties, and structures a tripartite relationship between the individual, community and state. The institutions of citizenship include formal and bureaucratic rules of eligibility ¿ but also informal institutions such as identity and belonging. Throughout the course, students are exposed to key issues of the sociology of citizenship such as the historically different paths of men, women, minority groups and immigrants into citizenship, the contested development of rights and duties, the regulation of population, as well as insurgency and collective attempts to rearticulate the terms of the ¿contract¿ with the state. Israel, the USA, France and Germany are used as empirical illustrations. At the conclusion of the course students will know how to utilize the analytic framework of citizenship in order to analyze a wide range of political phenomena in contemporary societies.
Same as: SOC 103

JEWISHST 133A. WELFARE, WORK AND POVERTY.. 3 Units.
Early theorists of the welfare state described it as a reaction to the emergence of needs and interests of specific social groups during processes of economic development and change. Later theorists countered that the welfare state does not merely react to social cleavages during times of economic change but rather works to actively shape them, in line with worldviews or the interests of dominant group members. Adopting the latter approach, the goal of this course is to provide the tools and knowledge necessary for a critical evaluation of the social services provided to Israeli citizens and their impact on social and economic inequalities. The course will survey various approaches to the understanding of the goals of the welfare state. A comparative and historical account of the development of the welfare state will be presented, while highlighting recent developments, such as the increase in poverty rates and the aging of the population. During the course, we will examine the diverse needs that are served by the welfare state, as well as major dilemmas associated with the provision of services. Throughout the course, we will study critical thinking techniques and will use them for analyzing issues that are central for the development of social policies in Israel and the US.
Same as: CSRE 133J, SOC 103A

JEWISHST 139. Rereading Judaism in Light of Feminism. 4 Units.
During the past three decades, Jewish feminists have asked new questions of traditional rabbinic texts, Jewish law, history, and religious life and thought. Analysis of the legal and narrative texts, rituals, theology, and community to better understand contemporary Jewish life as influenced by feminism.
Same as: FEMGEN 139

JEWISHST 143. Literature and Society in Africa and the Caribbean. 4 Units.
This course explores texts and films from Francophone Africa and the Caribbean in the 20th and 21st centuries. The course will explore the connections between Sub-Saharan Africa, the Maghreb and the Caribbean through both foundational and contemporary works while considering their engagement with the historical and political contexts in which they were produced. This course will also serve to improve students' speaking and writing skills in French while sharpening their knowledge of the linguistic and conceptual tools needed to conduct literary analysis. The diverse topics discussed in the course will include national and cultural identity, race and class, gender and sexuality, orality and textuality, transnationalism and migration, colonialism and decolonization, history and memory, and the politics of language. Readings include the works of writers and filmmakers such as Djibril Tamsir Niane, Léopold Senghor, Aimé Césaire, Albert Memmi, Patrick Chamoiseau, Leonora Miano, Leila Slimani, Dani Laferrière and Ousmane Sembène. Taught in French. Students are highly encouraged to complete FRENLANG 124 or to successfully test above this level through the Language Center. This course fulfills the Writing in the Major (WIM) requirement.
Same as: AFRICAAM 133, AFRICAST 132, COMPLIT 133A, COMPLIT 233A, CSRE 133E, FRENCH 133

JEWISHST 144B. Poetic Thinking Across Media. 4 Units.
Even before Novalis claimed that the world must be romanticized, thinkers, writers, and artists wanted to perceive the human and natural world poetically. The pre- and post-romantic poetic modes of thinking they created are the subject of this course. Readings include Ecclestias, Zhaozhou Congshen, Montaigne, Nietzsche, Kafka, Benjamin, Arendt, and Sontag. This course will also present poetic thinking in the visual arts–from the expressionism of Ingmar Bergman to the neo-romanticism of Gerhard Richter.

JEWISHST 147A. The Hebrew Bible in Literature. 3-5 Units.
Close reading of major biblical stories and poems that influenced modern literature written in English and Hebrew. Hebrew texts will be read in translation to English. Each class will include a section from the Hebrew Bible as well as a modern text or film based on the biblical story/poem. Discussion of questions such as: the meaning and function of myths and the influence of the Hebrew Bible on the development of literary styles and genres.
Same as: JEWISHST 347A

JEWISHST 147B. The Hebrew and Jewish Short Story. 3-5 Units.
Short stories from Israel, the US and Europe including works by Agnon, Kafka, Keret, Castel-Bloom, Kashua, Singer, Benjamin, Freud, biblical myths and more. The class will engage with questions related to the short story as a literary form and the history of the short story. Reading and discussion in English. Optional: special section with readings and discussions in Hebrew. Note: To be eligible for WAYS credit, you must take the course for a Letter Grade. In AY 2020-21, a 'CR' grade will satisfy the WAYS requirement.
Same as: COMPLIT 127B

JEWISHST 148. Writing Between Languages: The Case of Eastern European Jewish Literature. 1-5 Unit.
Eastern European Jews spoke and read Hebrew, Yiddish, and their co-territorial languages (Russian, Polish, etc.). In the modern period they developed secular literatures in all of them, and their writing reflected their own multilinguality and evolving language ideologies. We focus on major literary and sociolinguistic texts. Reading and discussion in English; students should have some reading knowledge of at least one relevant language as well. ***This course must be taken for a minimum of 3 units and a letter grade to be eligible for Ways credit***.
Same as: JEWISHST 348, SLAVIC 198, SLAVIC 398

JEWISHST 150. Texts that Changed the World from the Ancient Middle East. 3-5 Units.
This course traces the story of the cradle of human civilization. We will begin with the earliest human stories, the Gilgamesh Epic and biblical literature, and follow the path of the development of law, religion, philosophy and literature in the ancient Mediterranean or Middle Eastern world, to the emergence of Jewish and Christian thinking. We will pose questions about how this past continues to inform our present: What stories, myths, and ideas remain foundational to us? How did the stories and myths shape civilizations and form larger communities? How did the earliest stories conceive of human life and the divine? What are the ideas about the order of nature, and the place of human life within that order? How is the relationship between the individual and society constituted? This course is part of the Humanities Core: https://humanitiescore.stanford.edu/.
Same as: COMPLIT 31, HUMCORE 111, RELIGST 150

JEWISHST 155D. Jewish American Literature and Film. 5 Units.
From its inception, Jewish-American literature has taken as its subject as well as its context the idea of Jewishness itself. Jewish culture is a diasporic one, and for this reason the concept of Jewishness differs from country to country and across time. What stays remarkably similar, though, is Jewish self-perception and relatedly Jewish literary style. This is as true for the first-generation immigrant writers like Isaac Bashevis Singer and Anzia Yezierska who came to the United States from abroad as it is for their second-generation children born in the United States, and the children of those children. In this course, we will consider the difficulties of displacement for the emigrant generation and their efforts to sustain their cultural integrity in the multicultural American environment. We'll also examine the often comic revolt of their American-born children and grandchildren against their (grand-)parents nostalgia and failure to assimilate. Only by considering these transnational roots can one understand the particularity of the Jewish-American novel in relation to mainstream and minority American literatures. In investigating the link between American Jewish writers and their literary progenitors, we will draw largely but not exclusively from Russia and the countries of Eastern Europe.
Same as: AMSTUD 145D, ENGLISH 145D, REES 145D

JEWISHST 155J. The Jewish-American Novel: Diaspora, Privilege, Anxiety, Comedy. 4-5 Units.
Jews are sometimes referred to as 'the people of the book.' Would Portnoy's Complaint count as a book that constitutes Jewish-American peoplehood? What about Fear of Flying? This seminar introduces students to influential Jewish-American novels (and some short stories and film) from the late nineteenth century to the present day. These works return time and again to questions of diaspora, race, queer social belonging, and the duty to a Jewish past, mythical or real. Through close readings of short stories and novels coupled with secondary readings about Jewish-American history and culture, we will explore how American Jewishness is constructed differently in changing historical climates. What makes a text Jewish? What do we mean by Jewish humor and Jewish seriousness? How do Jewish formulations of gender and power respond to Jews' entrance into the white American mainstream? As we read, we'll think through and elaborate on models of ethnicity, privilege, sexuality, and American pluralism. Authors include Cahan, Yezierska, Singer, Roth, Bellow, Malamud, Ozick, Mailer, Jong, and Englander.
Same as: AMSTUD 145J, ENGLISH 145J

JEWISHST 185B. Jews in the Contemporary World: The American Jewish Present & Past in Popular Culture, Film, & TV. 4-5 Units.
(HISTORY 185B is 5 units; HISTORY 85B IS 3 units.) Who are American Jews as depicted in popular media -- film, television, etc. -- since the Second World War? How are their religion, politics, mores, and practices represented and what ways, if at all, do such portraits reflect historical trends among Jews and society in general? What can be learned from film or tv about Jewish identity, notions of Jewish power and powerlessness, communal cohesiveness and assimilation, sexuality and the wages of intermarriage or race?.
Same as: CSRE 185B, HISTORY 185B, HISTORY 385C, REES 185B, SLAVIC 183

JEWISHST 186. Jews in Trump's America and Before. 5 Units.
This class considers the notion of American Jewish exceptionalism through the lens of Trump's America. The social and economic success of American Jewry over the last 350 years is remarkable, yet Jews continue to find their position in American society called into question. This course moves between past and present and will consider key moments in American Jewish life with a particular emphasis on contemporary currents, including post-liberal identity politics, Israel, and the rise of white supremacy.
Same as: HISTORY 286F

JEWISHST 199B. Directed Reading in Yiddish, Second Quarter. 1-5 Unit.
For intermediate or advanced students. May be repeated for credit.

JEWISHST 205. Reading Hebrew, First Quarter. 2-4 Units.
Introduction to Hebrew literature through short stories and poetry by notable Israeli writers. In Hebrew. Prerequisite: one year of Hebrew or equivalent.

JEWISHST 211. Out of Eden: Deportation, Exile, and Expulsion from Antiquity to the Renaissance. 4-5 Units.
This course examines the long pedigree of modern deportations and mass expulsions, from the forced resettlements of the ancient world to the expulsion of Jews from Spain in 1492, and from the outlawry of Saga-era Iceland to the culture of civic exile in Renaissance Italy. The course focuses on Europe and the Mediterranean from antiquity to the early modern period, but students are welcome to venture beyond these geographical and chronological boundaries for their final papers.
Same as: HISTORY 211, HISTORY 311

JEWISHST 215. Understanding Jews. 1-2 Unit.
This discussion-based course will give students an opportunity to explore the constellation of religious, ethnic, national, cultural, artistic, spiritual, and political forces that shape Jewish life in the 21st century. Drawing on historical documents, classical texts, and contemporary events, this course will give students from any background an opportunity to ask hard questions, deepen their own understandings, and challenge their conceptions of what makes Jewish life ¿Jewish.¿ No matter where you went for Sunday school ¿ church, synagogue, the woods, or nowhere at all ¿ this course is a chance to question what you know, and interrogate how you came to know what you know about Jews, Judaism, and Jewish culture.
Same as: AMSTUD 215

JEWISHST 221C. Aramaic Texts. 1-5 Unit.
Readings in Aramaic/Syriac with special focus on grammar and syntax of ancient texts.
Same as: JEWISHST 321C, RELIGST 221C, RELIGST 321C

JEWISHST 221D. Readings in Syriac Literature. 2-5 Units.
In recent years, there has been growing interest in the works of Syriac speaking Christians in antiquity and beyond. This course offers an introduction to the Syriac language, including its script, vocabulary and grammar, and a chance to read from a selection of foundational Syriac Christian texts.
Same as: JEWISHST 321D, RELIGST 221D, RELIGST 321D

JEWISHST 226E. The Holocaust: Insights from New Research. 4-5 Units.
Overview of the history of the Holocaust, the genocide of European Jews. Explores its causes, course, consequences, and memory. Addresses the events themselves, as well as the roles of perpetrators and bystanders, dilemmas faced by victims, collaboration of local populations, and the issue of rescue. Considers how the Holocaust was and is remembered and commemorated by victims and participants alike. Uses different kinds of sources: scholarly work, memoirs, diaries, film, and primary documents.
Same as: CSRE 226D, CSRE 326D, HISTORY 226D, HISTORY 326D, JEWISHST 326D

JEWISHST 227D. Readings in Talmudic Literature. 1 Unit.
Readings of Talmudic texts. Some knowledge of Hebrew is preferred, but not necessary. The goal of the ongoing workshop is to provide Stanford students with the opportunity to engage in regular Talmud study, and to be introduced to a variety of approaches to studying Talmudic texts and thought.
Same as: JEWISHST 127D, RELIGST 170D

JEWISHST 227E. Readings in Talmudic Literature Advanced. 1 Unit.
Readings of the talmudic texts. Knowledge of Hebrew is required. The ongoing seminar is designed to study the making of the talmudic sugya (unit of discourse), along with classic commentaries. Students will consider some of the recent developments in the academic study of Talmudic literature, introduced by the instructor. The goal of the ongoing seminar is to provide Stanford students and faculty with the opportunity to engage in regular Talmud study, and to be introduced to a variety of approaches to studying Talmudic texts. Meeting time and location TBA. May be repeated for credit.
Same as: JEWISHST 127E, RELIGST 170E

JEWISHST 240. The Yiddish Story. 3-5 Units.
The Yiddish language is associated with jokes, folktales, and miracle legends, as well as modern stories. This class traces the development of Yiddish literature through these short oral and written forms, following Jewish writers out of the East European market town to cities in the Soviet Union, Israel, and especially the United States. We conclude with stories written in other languages about Yiddish writers. Readings include Sholem Aleichem, I. L. Peretz, Isaac Bashevis Singer, Esther Singer-Kreitman, Cynthia Ozick, and Dina Rubina. Readings in English; optional discussion section for students who read Yiddish.
Same as: AMSTUD 240Y

JEWISHST 242G. Myth and Modernity. 3-5 Units.
Masters of German 20th- and 21st-Century literature and philosophy as they present aesthetic innovation and confront the challenges of modern technology, social alienation, manmade catastrophes, and imagine the future. Readings include Nietzsche, Freud, Rilke, Musil, Brecht, Kafka, Doeblin, Benjamin, Juenger, Arendt, Musil, Mann, Adorno, Celan, Grass, Bachmann, Bernhardt, Wolf, and Kluge. Taught in English. Note for German Studies grad students: GERMAN 322 will fulfill the grad core requirement since GERMAN 332 is not being offered this year. NOTE: Enrollment requires Professor Eshel's consent. Please contact him directly at eshel@stanford.edu and answer these 2 questions: "Why do you want to take this course?" and "What do you think you can add to the discussion?" Applications will be considered in the order in which they were received. Enrollment is limited to 20 students.
Same as: COMPLIT 222A, GERMAN 222, GERMAN 322, JEWISHST 342

JEWISHST 243A. Hannah Arendt: Facing Totalitarianism. 3-5 Units.
Like hardly any other thinker of the modern age, Hannah Arendt's thought offers us timeless insights into the fabric of the modern age, especially regarding the perennial danger of totalitarianism. This course offers an in-depth introduction to Arendt's most important works in their various contexts, as well as a consideration of their reverberations in contemporary philosophy and literature. Readings include Arendt's The Origin of Totalitarianism, The Human Condition, Between Past and Future, Men in Dark Times, On Revolution,Eichmann in Jerusalem, and The Life of the Mind, as well as considerations of Hannah Arendt's work by Max Frisch, Jürgen Habermas, Seyla Benhabib, Judith Butler, Giorgio Agamben, and others. Special attention will be given to Arendt's writings on literature with an emphasis on Kafka, Brecht, Auden, Sartre, and Camus. This course will be synchronously conducted, but will also use an innovative, Stanford-developed, online platform called Poetic Thinking. Poetic Thinking allows students to share both their scholarly and creative work with each other. Based on the newest technology and beautifully designed, it greatly enhances their course experience.
Same as: COMPLIT 353B, GERMAN 253, GERMAN 353

JEWISHST 249. The Algerian Wars. 3-5 Units.
From Algiers the White to Algiers the Red, Algiers, the Mecca of the Revolutionaries in the words of Amilcar Cabral, this course offers to study the Algerian Wars since the French conquest of Algeria (1830-) to the Algerian civil war of the 1990s. We will revisit the ways in which the war has been narrated in literature and cinema, popular culture, and political discourse. A special focus will be given to the Algerian War of Independence (1954-1962). The course considers the racial representations of the war in the media, the continuing legacies surrounding the conflict in France, Africa, and the United States, from Che Guevara to the Black Panthers. A key focus will be the transmission of collective memory through transnational lenses, and analyses of commemorative events and movies. nReadings from James Baldwin, Assia Djebar, Albert Camus, Frantz Fanon, Mouloud Feraoun. Movies include "The Battle of Algiers," "Days of Glory," and "Viva Laldjérie." nTaught in English.
Same as: CSRE 249, FRENCH 249, HISTORY 239G

JEWISHST 265. Jewish Law: Introduction and Topics. 2 Units.
This course will provide an overview of the field of Jewish Law and will seek to provide a few case studies of topics in Jewish Law. All the readings are in English and this course presupposes no background in Jewish Law. Jewish Law is the world's oldest complex legal systems with distinct and idiosyncratic approaches to family, commercial, ritual and many other areas of law. It also has developed an elaborate "conflicts of law" sub-literature focusing on when should Jewish Law apply and when should some other legal system apply, reflecting the long history of the Jewish community in the diaspora as a minority. In this course, we will consider how Jewish law approaches a number of specific topics and we will ponder as well the proper interaction between Jewish law and secular legal norms, Jewish Law and changes in technology, Jewish law and sovereignty, Jewish Law and Bioethics and Jewish law and Family. Other topics will be added as we all see fit. Students who are interested in making a presentation on an area of their choice are welcome to do so. The course will seek to include an optional supplementary "field trip" to see a rabbinical court in action in California. The Learning Outcomes provided by this court include the following: Students who take this course will: 1. Exhibit knowledge and understanding of key concepts in substantive law, procedural law, and legal thought in Jewish Law. 2. Demonstrate facility with legal analysis and reasoning in the Jewish Legal tradition and will demonstrate the ability to conduct legal research in Jewish Law. After the term begins, students accepted into the course can transfer, with consent of the instructor, from section (01) into section (02), which meets the R requirement. Elements used in grading: Attendance, Class Participation, Final Paper. Cross-listed with the Law School (LAW 5038).

JEWISHST 281K. Departures: Late Ottoman Displacements of Muslims, Christians, and Jews, 1853-1923. 5 Units.
In the late nineteenth and early twentieth centuries, millions of people moved into and out of the Ottoman Empire, sometimes voluntarily and sometimes under extremely violent circumstances. More often than not, they moved in groups that were religiously defined. This course examines how these developments shaped the future of the modern Middle East, Balkans, and beyond. Questions include: How did migration and the idea of the nation shape each other? What does it mean to call a group or a migration "religious"? Why did certain types of diversity become a "problem," in the eyes of the state? What caused these population displacements? What can this topic teach us about today's mass migrations?.
Same as: HISTORY 281K

JEWISHST 282. Circles of Hell: Poland in World War II. 5 Units.
Looks at the experience and representation of Poland's wartime history from the Nazi-Soviet Pact (1939) to the aftermath of Yalta (1945). Examines Nazi and Soviet ideology and practice in Poland, as well as the ways Poles responded, resisted, and survived. Considers wartime relations among Polish citizens, particularly Poles and Jews. In this regard, interrogates the traditional self-characterization of Poles as innocent victims, looking at their relationship to the Holocaust, thus engaging in a passionate debate still raging in Polish society.
Same as: HISTORY 228, HISTORY 328, JEWISHST 382

JEWISHST 282K. The Holocaust and Its Aftermath. 4-5 Units.
This seminar gives an overview over different aspects of the history of the Holocaust and its aftermath and will examine key issues in recent Holocaust historiography and questions of memory and representation. Special emphasis is put on the nature of the historian's task, as viewed through the lens of historians of the Holocaust, as well as to the significance of the Holocaust in history and how it has changed over time. The course will confront students with historiographical texts and historical documents, with photography and film, works of scholarship and art.
Same as: HISTORY 202K, HISTORY 302K, JEWISHST 382K

JEWISHST 284C. Genocide and Humanitarian Intervention. 3 Units.
Open to medical students, graduate students, and undergraduate students. Traces the history of genocide in the 20th century and the question of humanitarian intervention to stop it, a topic that has been especially controversial since the end of the Cold War. The pre-1990s discussion begins with the Armenian genocide during the First World War and includes the Holocaust and Cambodia under the Khmer Rouge in the 1970s. Coverage of genocide and humanitarian intervention since the 1990s includes the wars in Bosnia, Rwanda, Kosovo, the Congo and Sudan.
Same as: HISTORY 224C, HISTORY 324C, JEWISHST 384C, PEDS 224

JEWISHST 285C. The Immigrant in Modern America. 5 Units.
The 2016 presidential election propelled the topic of immigration to the center of public attention. This is not the first time, however, that questions of immigration and what it means to be an American have revealed deep divisions within the U.S. This course explores the reception of immigrants in modern America, including differing views toward immigration; how immigrants help shape ideas about the American nation; and the growth of state bureaucracy and policing apparatus as a response.
Same as: HISTORY 285C

JEWISHST 286D. Yours in Struggle: African Americans and Jews in the 20th Century U.S.. 5 Units.
This colloquium explores the history of African Americans and Jews in 20th century US beginning with Jewish immigration from Eastern Europe and the Great Migration to America's urban centers. It considers the geographical and economic tensions that developed between two minority groups living in close proximity; the appropriation of black culture; Jewish claims to whiteness and performance of blackness; intercommunal relations during the Civil Rights movement; the breakdown of the black-Jewish alliance in the late 1960s; and the lingering ramifications of this shift today.
Same as: HISTORY 286D

JEWISHST 287S. Research Seminar in Ottoman and Middle East History. 4-5 Units.
Student-selected research topics. May be repeated for credit.
Same as: HISTORY 481, JEWISHST 481

JEWISHST 288C. Jews of the Modern Middle East and North Africa. 5 Units.
This course will explore the cultural, social, and political histories of the Jews of the Middle East and North Africa (MENA) from 1860 to present times. The geographic concentration will range from Morocco to Iran, Iraq to Turkey, and everywhere in between. Topics include: Jewish culture and identity in Islamic contexts; the impacts of colonialism, westernization, and nationalism; Jewish-Muslim relations; the racialization of MENA Jews; the Holocaust; the experience and place of MENA Jews in Israel; and "Jews of Color.".
Same as: HISTORY 288C

JEWISHST 291X. Learning Religion: How People Acquire Religious Commitments. 4 Units.
This course will examine how people learn religion outside of school, and in conversation with popular cultural texts and practices. Taking a broad social-constructivist approach to the variety of ways people learn, this course will explore how people assemble ideas about faith, identity, community, and practice, and how those ideas inform individual, communal and global notions of religion. Much of this work takes place in formal educational environments including missionary and parochial schools, Muslim madrasas or Jewish yeshivot. However, even more takes place outside of school, as people develop skills and strategies in conversation with broader social trends. This course takes an interdisciplinary approach to questions that lie at the intersection of religion, popular culture, and education. May be repeat for credit.
Same as: AMSTUD 231X, EDUC 231, RELIGST 231X

JEWISHST 297X. American Jewish History: Learning to be Jewish in America. 2-4 Units.
This course will be a seminar in American Jewish History through the lens of education. It will address both the relationship between Jews and American educational systems, as well as the history of Jewish education in America. Plotting the course along these two axes will provide a productive matrix for a focused examination of the American Jewish experience. History students must take course for at least 3 units.
Same as: AMSTUD 279X, EDUC 279, HISTORY 288D, RELIGST 279X

JEWISHST 299A. Directed Reading in Yiddish, First Quarter. 1-5 Unit.
Directed Reading in Yiddish, First Quarter.

JEWISHST 301. Colloquium on Jews, Judaism, and Jewish Culture. 1 Unit.
An interdisciplinary graduate student colloquium for Stanford graduate students interested in Jewish Studies.

JEWISHST 321C. Aramaic Texts. 1-5 Unit.
Readings in Aramaic/Syriac with special focus on grammar and syntax of ancient texts.
Same as: JEWISHST 221C, RELIGST 221C, RELIGST 321C

JEWISHST 321D. Readings in Syriac Literature. 2-5 Units.
In recent years, there has been growing interest in the works of Syriac speaking Christians in antiquity and beyond. This course offers an introduction to the Syriac language, including its script, vocabulary and grammar, and a chance to read from a selection of foundational Syriac Christian texts.
Same as: JEWISHST 221D, RELIGST 221D, RELIGST 321D

JEWISHST 326D. The Holocaust: Insights from New Research. 4-5 Units.
Overview of the history of the Holocaust, the genocide of European Jews. Explores its causes, course, consequences, and memory. Addresses the events themselves, as well as the roles of perpetrators and bystanders, dilemmas faced by victims, collaboration of local populations, and the issue of rescue. Considers how the Holocaust was and is remembered and commemorated by victims and participants alike. Uses different kinds of sources: scholarly work, memoirs, diaries, film, and primary documents.
Same as: CSRE 226D, CSRE 326D, HISTORY 226D, HISTORY 326D, JEWISHST 226E

JEWISHST 342. Myth and Modernity. 3-5 Units.
Masters of German 20th- and 21st-Century literature and philosophy as they present aesthetic innovation and confront the challenges of modern technology, social alienation, manmade catastrophes, and imagine the future. Readings include Nietzsche, Freud, Rilke, Musil, Brecht, Kafka, Doeblin, Benjamin, Juenger, Arendt, Musil, Mann, Adorno, Celan, Grass, Bachmann, Bernhardt, Wolf, and Kluge. Taught in English. Note for German Studies grad students: GERMAN 322 will fulfill the grad core requirement since GERMAN 332 is not being offered this year. NOTE: Enrollment requires Professor Eshel's consent. Please contact him directly at eshel@stanford.edu and answer these 2 questions: "Why do you want to take this course?" and "What do you think you can add to the discussion?" Applications will be considered in the order in which they were received. Enrollment is limited to 20 students.
Same as: COMPLIT 222A, GERMAN 222, GERMAN 322, JEWISHST 242G

JEWISHST 347A. The Hebrew Bible in Literature. 3-5 Units.
Close reading of major biblical stories and poems that influenced modern literature written in English and Hebrew. Hebrew texts will be read in translation to English. Each class will include a section from the Hebrew Bible as well as a modern text or film based on the biblical story/poem. Discussion of questions such as: the meaning and function of myths and the influence of the Hebrew Bible on the development of literary styles and genres.
Same as: JEWISHST 147A

JEWISHST 348. Writing Between Languages: The Case of Eastern European Jewish Literature. 1-5 Unit.
Eastern European Jews spoke and read Hebrew, Yiddish, and their co-territorial languages (Russian, Polish, etc.). In the modern period they developed secular literatures in all of them, and their writing reflected their own multilinguality and evolving language ideologies. We focus on major literary and sociolinguistic texts. Reading and discussion in English; students should have some reading knowledge of at least one relevant language as well. ***This course must be taken for a minimum of 3 units and a letter grade to be eligible for Ways credit***.
Same as: JEWISHST 148, SLAVIC 198, SLAVIC 398

JEWISHST 382. Circles of Hell: Poland in World War II. 5 Units.
Looks at the experience and representation of Poland's wartime history from the Nazi-Soviet Pact (1939) to the aftermath of Yalta (1945). Examines Nazi and Soviet ideology and practice in Poland, as well as the ways Poles responded, resisted, and survived. Considers wartime relations among Polish citizens, particularly Poles and Jews. In this regard, interrogates the traditional self-characterization of Poles as innocent victims, looking at their relationship to the Holocaust, thus engaging in a passionate debate still raging in Polish society.
Same as: HISTORY 228, HISTORY 328, JEWISHST 282

JEWISHST 382K. The Holocaust and Its Aftermath. 4-5 Units.
This seminar gives an overview over different aspects of the history of the Holocaust and its aftermath and will examine key issues in recent Holocaust historiography and questions of memory and representation. Special emphasis is put on the nature of the historian's task, as viewed through the lens of historians of the Holocaust, as well as to the significance of the Holocaust in history and how it has changed over time. The course will confront students with historiographical texts and historical documents, with photography and film, works of scholarship and art.
Same as: HISTORY 202K, HISTORY 302K, JEWISHST 282K

JEWISHST 384C. Genocide and Humanitarian Intervention. 3 Units.
Open to medical students, graduate students, and undergraduate students. Traces the history of genocide in the 20th century and the question of humanitarian intervention to stop it, a topic that has been especially controversial since the end of the Cold War. The pre-1990s discussion begins with the Armenian genocide during the First World War and includes the Holocaust and Cambodia under the Khmer Rouge in the 1970s. Coverage of genocide and humanitarian intervention since the 1990s includes the wars in Bosnia, Rwanda, Kosovo, the Congo and Sudan.

LANGUAGE CENTER

The Stanford Language Center oversees all language instruction at Stanford. The center's charge is to guarantee that Stanford language programs are of the highest quality; to develop and administer achievement and proficiency tests needed to implement the language requirement; to provide technical assistance and support to the graduate students, lecturers, and faculty who deliver Stanford's language instruction; and to take leadership in research and development efforts in language learning. The Language Center is a unit within the Division of Literatures, Cultures, and Languages (p. 1298).

Courses

Courses offered by the Language Center are listed under the following subject codes on the Stanford Bulletin's ExploreCourses web site:

- AMELANG (African and Middle Eastern Languages and Literatures) (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=AMELANG&filter-catalognumber-AMELANG=on)
- ARABLANG (Arabic Language) (https://explorecourses.stanford.edu/search/?view=catalog&catalog=71&page=0&q=ARABLANG&filter-catalognumber-ARABLANG=on&filter-coursestatus-Active=on)
- CATLANG (Catalan Language) (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=CATLANG&filter-catalognumber-CATLANG=on)
- CHINLANG (Chinese Language) (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=CHINLANG&filter-catalognumber-CHINLANG=on)
- EFSLANG (English for Foreign Students) (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=EFSLANG&filter-catalognumber-EFSLANG=on)
- FRENLANG (French Language) (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=FRENLANG&filter-catalognumber-FRENLANG=on)
- GERLANG (German Language) (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=GERLANG&filter-catalognumber-GERLANG=on)
- ITALLANG (Italian Language) (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=ITALLANG&filter-catalognumber-ITALLANG=on)
- JAPANLNG (Japanese Language) (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=JAPANLNG&filter-catalognumber-JAPANLNG=on)
- KORLANG (Korean Language) (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=KORLANG&filter-catalognumber-KORLANG=on)
- PORTLANG (Portuguese Language) (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=PORTLANG&filter-catalognumber-PORTLANG=on)
- SLAVLANG (Slavic Language) (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=SLAVLANG&filter-catalognumber-SLAVLANG=on)
- SPANLANG (Spanish Language) (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=SPANLANG&filter-catalognumber-SPANLANG=on)
- SPECLANG (Special Language) (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=SPECLANG&filter-catalognumber-SPECLANG=on)
- TIBETLNG (Tibetan Language) (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=TIBETLNG&filter-catalognumber-TIBETLNG=on)

Beginning-Level, First-Year Courses

Beginning-level, first-year language courses require no previous knowledge of the language. The beginning-level sequence emphasizes development of the full range of language skills, reading, listening comprehension, the use of grammatical structures, and oral and written communication, through a variety of learning themes. Individual, small group, interactive work and multimedia-based activities reinforce language skills and provide the platform for adapting the curriculum to specific student learning goals. Cultural awareness is a strong component of the curriculum.

Intermediate-Level, Second-Year Courses

Intermediate-level, second-year language courses require completion of the beginning sequence, corresponding placement or consent of the program coordinator. The intermediate-level sequence focuses on continuous mastery and development of skills that help students to converse and present accurately and more fluently, incorporate more advanced grammatical structures in their oral and written work, use idiomatic expressions in the right context, and read and write more sophisticated compositions. Curricular objectives and enhanced cultural understanding are built into the courses through a multimodal approach.

Advanced-Level, Third-Year Courses

Advanced-level, third-year language courses require completion of the intermediate-year sequence, corresponding placement, or consent of the program coordinator. The advanced-level sequence focuses on accurate understanding and use of structures through authentic texts and multimedia materials, and readings from various genres. Individual learning goals and student proficiency are taken into account to provide a learning environment that helps students become more autonomous learners.

Proficiency in Foreign Language Notation

A student who demonstrates levels of achievement equivalent to those expected at the end of the third quarter of the third year of study in a language may be awarded the notation "proficiency in" that language on the official transcript. Successful candidates tend to have completed the third year or beyond of language study at Stanford and spent considerable time studying abroad in the foreign language.

In order to receive the proficiency notation and for it to appear on the official transcript, the student must complete the following oral and written requirements according to the timeline below. The notation is available only for languages where external assessment is offered through Language Testing International. Successful completion of the oral component is required before proceeding with the written component.

Both oral and written components must be completed no later than the quarter preceding the graduating quarter.

For more information visit https://language.stanford.edu/ or contact languagecenter@stanford.edu.

Application and Oral Component: Two quarters prior to graduation

1. Notify the Language Center via email of the intent to pursue the notation and request an official Oral Proficiency Interview (OPI). Since this is a formal interview conducted according to national academic and professional standards, at least two quarters of lead time are essential for scheduling.
2. Complete the 30-minute Oral Proficiency Interview as scheduled through the Language Center and conducted by a certified OPI tester. The interview must take place no later than one quarter prior to graduation and be administered on campus
3. Receive an official rating of Advanced Low or higher on the Foreign Service Institute/American Council on the Teaching of Foreign Languages (FSI/ACTFL) scale of oral proficiency, except in the non-cognate languages which require a minimum rating of Intermediate High. Students who do not meet the minimum level for the notation will nonetheless receive an official OPI rating, which carries national recognition of their oral proficiency.

Writing Component: One quarter prior to graduation

1. Once approved to continue with the writing component, schedule a Writing Proficiency Test (WPT) through the Language Center. As an official writing assessment, the 90-minute exam must take place no later than one quarter prior to graduation and as soon as possible after the interview. The WPT is administered on campus and rated by a certified WPT rater.
2. Receive an official rating of Advanced Low or higher on the Foreign Service Institute/American Council on the Teaching of Foreign Languages (FSI/ACTFL) scale of writing proficiency, except in the non-cognate languages which require a minimum rating of Intermediate High. Students who do not meet the minimum level for the notation will nonetheless receive an official WPT rating, which carries national recognition of their writing proficiency.

Proficiency Notation Timetable

1. Graduating Spring/Summer: Apply Autumn; interview Autumn/Winter; writing Winter.
2. Graduating Autumn: Apply Winter; interview Winter/Spring; writing Spring.
3. Graduating Winter: Apply Spring; interview Spring/Autumn; writing Autumn.

Overseas Studies Courses in the Language Center

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu) web site or the Bing Overseas Studies (http://bosp.stanford.edu) web site. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

African and Middle Eastern Languages and Literatures Program

The African and Middle Eastern Languages and Literatures Program offers classes in Hebrew, Persian, Swahili, Turkish, and African languages not regularly taught at Stanford. Based on current funding and student requests, the courses planned for the 2020-21 academic year are listed in the ExploreCourses (http://explorecourses.stanford.edu) section of this Bulletin under the AMELANG (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=AMELANG&filter-catalognumber-AMELANG=on) program. Additional languages may still be offered upon request, provided funding is available. Requests for the 2021-22 academic year should be made by Spring Quarter of this year to the AME program office by email to khalil@stanford.edu (ebernhar@stanford.edu).

First-, second-, and third-year each refer to the yearly sequence of language study. Letter suffixes refer to the quarter within the sequence: "A" courses (1st Quarter) are typically taught in Autumn; "B" courses (2nd Quarter), in Winter; and "C" courses (3rd Quarter) in Spring. Courses are 4 or 5 units as listed. In some circumstances, a beginning or intermediate course may be offered in alternate years. Language courses may not be repeated for credit, and must be taken in sequence.

Fulfilling the Language Requirement in AME

Students can fulfill the language requirement by taking an African or Middle Eastern language. At least 12 units are needed to complete the requirement. Students who have taken courses in the relevant language at another institution, or have previous knowledge of the language, can request to be tested. Tests are comprised of two parts, written and oral. Students must display completion of first-year level proficiency in the requested language to fulfill the requirement. Testing is guaranteed only for languages currently offered. Students planning to take a test must contact the AME program coordinator no later than the Spring Quarter of their sophomore year. To submit a request for language testing, or to request that a language be taught, and for further information on the program, see the African and Middle Eastern Language Program (https://www.stanford.edu/dept/lc/language/courses/africanMidEastern/) web site.

Special Language Program

The Special Language Program (SLP) offers foreign languages not otherwise taught at Stanford. Based on current funding and student requests, the courses planned for the 2020-21 academic year are listed in the ExploreCourses (http://explorecourses.stanford.edu/) section of this Bulletin under the Special Languages (SPECLANG) Program; however, not every course listed is taught. Additional languages may still be offered upon request, provided funding is available. Requests for the 2021-22 academic year should be made by Spring Quarter of this year at the Special Language Program office (eprionas@stanford.edu).

First-year courses are offered for 4 or 5 units, as listed. First-, second-, and third-year each refer to the yearly sequence of language study. Letter suffixes refer to the quarter within the sequence: "A" courses (1st Quarter) are typically taught in Autumn; "B" courses (2nd Quarter), in Winter; and "C" courses (3rd Quarter) in Spring. In some circumstances, a beginning or intermediate course may be offered in alternate years. Language courses may not be repeated for credit, and must be taken in sequence. For additional information, see the Special Language Program (http://www.stanford.edu/dept/SLP/) website.

Fulfilling the Language Requirement in Special Language Program

Students can fulfill the language requirement by taking courses offered by the Special Language Program. At least 12 units are needed to complete the requirement. Students who have already taken courses in the relevant language at another institution, or who have previous knowledge of the language, can request to be tested. Tests are comprised of written and oral parts. A student must display completion of first-year level proficiency in the requested language in order to fulfill the requirement. Testing is guaranteed only for these languages currently offered. Students planning to take a test must contact the Special Language Program no later than the Spring Quarter of sophomore year. To submit a request for language testing, or to request that a language be taught, and for further information on the program, contact the Special Language Program office (eprionas@stanford.edu). (eprionas@stanford.edu)

Minors in the Division of Literatures, Cultures, and Languages (DLCL)

The Division of Literatures, Cultures, and Languages (p. 1298), of which the Language Center is a part, offers the following minors that may be of interest to foreign language students. For more information, consult the contact specified in the relevant minor following.

Minor in Modern Languages

Academic Advisor: Elizabeth Bernhardt-Kamil

The Division of Literatures, Cultures, and Languages offers an undergraduate minor in Modern Languages that permits students to demonstrate strength in two distinct modern languages and their literatures. The minor draws upon courses housed within the DLCL, East Asian Languages and Cultures, the Stanford Language Center, and the Special Language Program.

Declaring the Minor

Students declare the minor in Modern Languages through Axess. The minor program is administered by the DLCL undergraduate student support office located in Pigott Hall, room 128 and may be contacted at odunlop@stanford.edu. Plans for completing the minor must be approved by through the student support office.

Minor Program

- Students enrolled in the Modern Languages minor must take 6 courses of 3 units or more, for a total of 22 units minimum.
- Students will study two modern languages, Language A and Language B.
  - Language A: two intermediate-level or higher courses, for 8 units minimum, and one literature course of 3-5 units.
  - Language B: two intermediate-level or higher courses, for 8 units minimum, and one literature course of 3-5 units.

Requirements

- Stanford Language Center courses and BOSP language courses must be second-year level or beyond.
- Literature courses from BOSP programs are pre-approved for the minor.
- Literature courses taught by Stanford faculty (Academic Council members) will be approved with permission of the Program Administrator.
- Language courses may not include conversational, oral communication, business, or medical language courses.
- Advanced Placement and transfer credits may not be applied to the minor.
- All courses must be taken for a letter grade.
- Coursework may not duplicate work counted toward other majors or minors. By University policy, no more than 36 units may be required in this minor.

Minor in Translation Studies

Faculty Director: Alexander Key

Minor Adviser: Cintia Santana

The Division of Literatures, Cultures, and Languages, in cooperation with East Asian Languages and Cultures and the English Department, teaches undergraduates to develop and apply their foreign language knowledge to the production and analysis of translations. The minor is designed to give students majoring in a variety of fields the tools to consider the practical and theoretical issues brought up by translation as an aesthetic, cultural, and ethical practice.

Declaring the Minor

Students will declare the minor in Axess, and then contact the minor adviser, Cintia Santana (csantana@stanford.edu). The program is administered by the DLCL student services office located in Pigott Hall, room 128.

Requirements

Students must take a minimum of 6 courses for 3 units or more and a minimum of 23 units for a letter grade, in fulfillment of the following requirements:

	Units
1. Prerequisite: Complete or test out of a first-year course in the language of interest.	
2. Core course: At least 4 units in a Translation Studies core course: ENGLISH/DLCL 293 or FRENCH 185 or Comparative Literature 228/ JAPAN 123/223.	4
3. Language study: At least 8 units, second year or beyond (not including conversation/oral communication) and/or relevant literature courses taught in the target language. OSP and transfer units may be considered in consultation with the minor adviser.	8
4. Literature study: At least 7 units in relevant literature courses at the 100-level or above, taught in a DLCL department, East Asian Languages and Cultures, or Classics, and determined in consultation with the minor adviser. For students interested in translation from English into another language, appropriate literature courses in the English department may be substituted.	7
5. Electives: At least 4 units in a creative writing course, or a course that foregrounds translation in departments such as Anthropology, any DLCL department, English, East Asian Languages and Cultures, Classics, Linguistics (e.g., LINGUIST 130A), or Computer Science (e.g., CS 124), determined in consultation with the minor adviser.	4
6. Final Project: Students must also complete a capstone project: a significant translation and/or translation studies project (e.g. 20 pages of prose, 10 poems, or similar appropriate amount to be determined in consultation with the minor adviser). This work may be carried out under the supervision of an instructor in a required course or as an independent study.	
Total Units	23

Minor in Middle Eastern Languages, Literatures, and Cultures

Faculty Director: Alexander Key

The undergraduate minor in Middle Eastern Languages, Literatures, and Cultures (MELLAC) has been designed to give students majoring in a variety of departments an opportunity to gain a substantial introduction to Arabic, Hebrew, Persian, Turkish, Middle Eastern, and African languages, and to the cultures and civilizations of the Middle East and Africa.

Declaring the Minor

Contact the faculty director, Alexander Key (akey@stanford.edu), before declaring the minor in Axess. The minor is administered through the DLCL undergraduate student support office in Pigott Hall, room 128.

Minor Program Overview

The minor in Middle Eastern Languages, Literatures, and Cultures (MELLAC) has five tracks. Coursework in each track may not duplicate work counted toward other majors or minors.

Minor in Middle Eastern Languages, Literatures, and Cultures: Arabic Track

The minor track requirements are:

- Minimum of 24 units total for this minor track.
- Completion of six ARABLANG courses at the third and fourth year levels, excluding conversation and colloquial courses. All courses must be taken for a letter grade.
- Up to 5 units of transfer credit may count towards this minor, subject to approval of the faculty director.
- Students must test for proficiency in Arabic through the Language Center by Winter Quarter of their senior year. Students should minimally receive a notation of intermediate-high. Those requiring outside tutoring are advised to seek resources available through the DLCL student services office in Pigott Hall 128, odunlop@gmail.com.
- All courses must be approved by the faculty director.

Minor in Middle Eastern Languages, Literatures, and Cultures: Hebrew Track

The minor track requirements are:

- Minimum of 32 units total for this minor track.
- Minimum of 3 HEBREW language classes. Students may test out of this requirement with the approval of the faculty director.
- Minimum of 20 units of Hebrew literature and culture courses, one of which must be listed in COMPLIT. The Hebrew Forum may count towards this requirement with the approval of the faculty director.
- All courses must be approved by the faculty director.

Minor in Middle Eastern Languages, Literatures, and Cultures: African Languages, Literatures and Cultures Track

Requirements for the minor are:

- Minimum 32 units for this minor track.
- Three AMELANG language classes in an African language.
- All three courses must be in the same language.
- 20 additional units from relevant literature and culture courses, one of these courses must be a COMPLIT course.
- Other relevant courses are listed under AFRICAST.
- The faculty director may approve some upper-level language classes to count towards the 20 additional units.
- All courses must be approved by the faculty director.

Minor in Middle Eastern Languages, Literatures, and Cultures: Persian Track

The minor track requirements are:

- Minimum of 30 units total for this minor track.
- Completion of 20 units of Persian courses listed in AMELANG.
- Completion of 10 units of Persian courses listed in COMPLIT.
- All courses must be approved by the faculty director.

Minor in Middle Eastern Languages, Literatures, and Cultures: Turkish Track

The minor track requirements are:

- Minimum 30 units total for this minor track.
- 15 units of Turkish courses listed in AMELANG.
- 15 units of Turkish courses listed in COMPLIT.
- All courses must be approved by the faculty director.

Certificate in Language Program Management

Faculty Director: Elizabeth Bernhardt

Programs in contemporary foreign language teaching preparation entail a knowledge base that has grown over the past 30 years, rooted in data from an explosion of linguistic as well as applied linguistic research.

In tandem with the Language Center's primary focus on learning research and theory, which graduate students explore in the teaching preparation program, the Language Program Management certificate focuses on developing the professional leadership and academic skills necessary for a career that includes the coordination and management of language learning.

The program funds summer internships which enable the completion of a certificate in Language Program Management and are intended to help Stanford graduate students prepare themselves for such work in complement to their literary studies. The certificate program is not declared on Axess and does not appear on the transcript or diploma.

Prerequisites

1. Foreign language acquisition: Oral Proficiency Interview (OPI) rating of at least advanced mid
2. Academic and professional development:
    - DLCL 301 The Learning and Teaching of Second Languages
    - Modified Oral Proficiency Interview (MOPI) Assessment workshop (2 days)
    - Limited OPI Tester Certification (average 6 months)
    - Teaching of three first-year language courses through the Language Center

These are generally met by the end of a graduate student's second year in the PhD program. Once meeting these criteria, the student may be admitted to the Program.

Requirements

Upon admission to the program, students must complete the following:

1. DLCL 302 The Learning and Teaching of Second-Language Literatures: a course designed to focus student attention on the development of oral language proficiency through the upper levels and emphasize the need for upper register speaking and writing for literature learning and teaching.
2. OPI workshop (additional 2 days of training at the Advanced and Superior levels): this workshop is the extension of the MOPI. It focuses on upper register performance on the FSI-ACTFL scale.

Hosted by either the Language Center, regional workshop, or at the national meeting of the ACTFL.

3. Completion of Writing Proficiency Familiarization workshop (Winter Quarter): Workshop conducted by a certified writing tester and structured in parallel to the MOPI/OPI assessment paradigm.
4. DLCL 303 Language Program Management (Summer Quarter): an administrative internship including, but not limited to, experiences with the following:

    - Shadow faculty and staff in select areas of administration and supervision within the Language Center and DLCL
    - Placement testing and student advisement
    - Technology in teaching and learning
    - Processes for teacher observation and feedback
    - Procedures in staff supervision and human resources
    - Course scheduling, budgeting, staffing, and searches
    - Interface with external programs (e.g., BOSP, Bechtel, VPTL)

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a "credit" or "no credit" grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a "credit" or "satisfactory" grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

As always, language courses at Stanford may be taken with the CR/NC grading basis, if so offered, to fulfill the undergraduate language requirement.

Director: Elizabeth Bernhardt

Associate Director: Joan Molitoris

African and Middle Eastern Languages
Coordinator: Khalil Barhoum

Lecturers: Ameneh Shervin Emami (Persian), Saadet Ebru Ergul (Turkish), Samuel Mukoma (Swahili), Gallia Porat (Hebrew), Vered Shemtov (Sr. Lecturer in Jewish Language & Literature)

Arabic Language
Coordinator: Khalid Obeid

Lecturers: Khalil Barhoum (Sr. Lecturer), Thoraya Boumehdi, Ramzi Salti

Catalan Language
Coordinator: Joan Molitoris (Associate Director, Language Center)

Chinese Language
Coordinator: Chao Fen Sun (Professor, East Asian Languages and Cultures)

Lecturers: Marina Chung, Sik Lee Dennig, Michelle DiBello, Nina Lin, Le Tang, Huazhi Wang, Hong Zeng, Youping Zhang, Xiaofang Zhou

English for Foreign Students
Coordinator: Kristopher Geda

Lecturers: Robyn Brinks Lockwood, Kenneth Romeo, Constance Rylance, Seth Streichler, Dominic Wang

French Language
Coordinator: Marie Lasnier

Lecturers: Maria Comsa, Heather Howard, Alix Mazuet, Vera Shapirshteyn

German Language
Coordinator: Paul Nissler

Lecturer: Patric Di Dio Di Marco

Italian Language
Coordinator: Professor Elizabeth Bernhardt (Director of the Language Center)

Lecturers: Marta Baldocchi, Alessandra McCarty, Giovanni Tempesta

Japanese Language
Coordinator: Yoshiko Matsumoto (Professor, East Asian Languages and Cultures)

Lecturers: Momoyo Kubo Lowdermilk, Emiko Yasumoto Magnani, Momoe Saito Fu, Yasuko Matsumoto, Yoshiko Tomiyama

Korean Language
Coordinator: Hee-Sun Kim

Lecturers: Hannah Yoon, HyeYeon Kim

Portuguese Language
Coordinator and Senior Lecturer: Lyris Wiedemann

Lecturer: Agripino Silveira

Slavic Language
Coordinator: Eugenia Khassina

Lecturers: Rima Greenhill (Sr. Lecturer)

Spanish Language
Coordinator: Alice Miano

Lecturers: Vivian Brates, Citlalli del Carpio, Irene Corso, Joan Molitoris (Associate Director, Language Center), Carimer Ortiz Cuevas, Kara Sanchez, Ana Maria Sierra, María Cristina Urruela, Ana Vivancos, Tom Winterbottom, Hae-Joon Won

Special Language Program
Coordinator: Eva Prionas, Modern Greek Language and Literature

Lecturers: Cathy Haas (ASL), Sonia Taneja (Hindi)

Tibetan Language Program

Lecturer and Coordinator: Robert W. Clark

Overseas Studies Courses in the Language Center

The Bing Overseas Studies Program (http://bosp.stanford.edu) (BOSP) manages Stanford international and domestic study away programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The BOSP course search site (https://undergrad.stanford.edu/programs/bosp/explore/search-courses/) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu) or Bing Overseas Studies (http://bosp.stanford.edu).

Due to COVID-19, all BOSP programs have been suspended for Autumn Quarter 2020-21. All courses and quarters of operation are subject to change.

Overseas Studies Courses in Chinese

		Units
Course offerings in the Hong Kong program will be listed here when they are available.		

Overseas Studies Courses in French

		Units
OSPPARIS 22P	Intermediate French I	4
OSPPARIS 23P	Intermediate French II	4

Overseas Studies Courses in German

		Units
OSPBER 1Z	Accelerated German: First and Second Quarters	8
OSPBER 2Z	Accelerated German, Second and Third Quarters	8
OSPBER 3B	German Language and Culture	7
OSPBER 21B	Intermediate German	4

African & Middle Eastern Lang Courses

AMELANG 15T. Intermediate to Advanced Turkish Conversation. 2 Units. Students develop communicative skills while discussing real-life issues, current events and cultural topics. The goal is to use culturally appropriate forms in formal and informal conversations, expressing emotions, feelings, and ideas in social and academic contexts. Pronunciation, vocabulary building, presentational language and daily readings are stressed. Students lead class discussions and prepare short presentations. Prerequisite: consent of instructor.

AMELANG 16. Advanced Readings in Turkish. 2 Units. This course will familiarize students whose command of the Turkish language is beyond First Year Turkish (Prereq. Amelang 184/Amelang 84 or placement exam) Students will increase their fluency especially in reading and oral comprehension besides in all communication skills, they will also expand their knowledge of grammar, diverse registers and idioms through extensive readings from literary texts, with practice in conversation and composition. Texts will include, prose and poetry pieces from contemporary Turkish literature, media and historical documents.

AMELANG 44A. Accelerated First-Year Persian. 5 Units. First part of the accelerated first-year sequence. AMELANG 44A and 44B complete the first year in two quarters rather than three quarters. Fulfills the University Language requirement. Goal is to engage in interactions with Persian speakers using socially and culturally appropriate forms. Emphasis is on the accelerated development of language proficiency, listening comprehension, reading and writing skills through conversational practice and in-class/online writing activities. Discussion of culture and social life is integrated into daily language learning activities through authentic materials and students will be interacting and integrating different aspects of language and culture live and virtually.

AMELANG 44B. Accelerated First-Year Persian, Part B. 5 Units. Second part of the accelerated first-year sequence. AMELANG 44A and 44B complete the first year in two quarters rather than three quarters. Fulfills the University Language requirement. Goal is to engage in interactions with Persian speakers using socially and culturally appropriate forms. Emphasis is on the accelerated development of language proficiency, listening comprehension, reading and writing skills through conversational practice and in-class/online writing activities. Discussion of culture and social life is integrated into daily language learning activities through authentic materials and students will be interacting and integrating different aspects of language and culture live and virtually. Prerequisite: Amelang 84A or placement test.

AMELANG 45A. Accelerated Second-Year Persian. 5 Units. First part of the accelerated second-year sequence. AMELANG 45A/ B. The course is designed for students who have previous knowledge of Persian Language and who are interested in learning more about Persian speaking cultures, history, poetry, social life, literature and artistic trends. Emphasis will be put on listening, speaking, reading and writing through communicative activities, enabling the students to perform the various tasks in the target language. This class is designed to complete the Intermediate, second year requirements, in two quarters rather than three quarters and students must have previous knowledge on Persian language and culture. Prerequisite: They must have completed the first year requirements or have exceeded the first year placement test at Stanford or its equivalent.

AMELANG 45B. Accelerated Second-Year Persian, Part B. 5 Units.
Second part of the accelerated second-year sequence. AMELANG 45A/BThe course is designed for students who have previous knowledge of Persian Language and who are interested in learning more about Persian speaking cultures, history, poetry, social life, literature and artistic trends. Emphasis will be put on listening, speaking, reading and writing through communicative activities, enabling the students to perform the various tasks in the target language. This class is designed to complete the Intermediate, second year requirements, in two quarters rather than three quarters and students must have previous knowledge on Persian language and culture. They must have completed the first year requirements or have exceeded the first year placement test at Stanford or its equivalent.

AMELANG 70A. Accelerated First-Year Swahili, Part 1. 5 Units.
First quarter of the two-quarter accelerated sequence. For students with little or no prior experience studying Swahili. Students acquire beginning proficiency in Swahili at an accelerated pace through intensive listening, speaking, reading, and writing, with special insight into Swahili-speaking cultures. Emphasis is on authentic materials and active use of the language in real-world contexts in order to develop functional abilities. Completion of AMELANG 70B fulfills the University foreign language requirement.

AMELANG 70B. Accelerated First-Year Swahili part, Part 2. 5 Units.
Continuation of AMELANG 70A. Completes the first-year sequence in two rather than three quarters. Students develop first-year proficiency in Swahili at an accelerated pace through active language use and participation in Swahili-speaking practices. Emphasis is on development of speaking, listening, reading, and writing through authentic materials and appropriate cultural contexts. Fulfills the University foreign language requirement. Prerequisite: AMELANG 70A or consent of instructor.

AMELANG 71A. Accelerated Second-Year Swahili, Part 1. 4 Units.
Accelerated Second-Year Swahili, Part 1. Accelerated Swahili second year is the third part of the accelerated sequence. It is designed for students who have prior experience studying Swahili. Completion of accelerated first year Swahili , or equivalent is a prerequisite. Students acquire proficiency in Swahili at an accelerated pace through intensive listening, speaking, reading, and writing, with special insight into Swahili-speaking cultures. Emphasis is on authentic materials and active use of the language in real-world contexts in order to develop functional abilities.

AMELANG 71B. Accelerated Second-Year Swahili, Part 2. 4 Units.
It is designed for students who have prior experience in studying Swahili. Completion of second year accelerated part two Swahili , or equivalent is a prerequisite. Students acquire proficiency in Swahili at an accelerated pace through intensive listening, speaking, reading, and writing, with special insight into Swahili-speaking cultures. Emphasis is on authentic materials and active use of the language in real-world contexts in order to develop functional abilities.

AMELANG 84A. Accelerated First-Year Turkish, Part 1. 5 Units.
First part of the accelerated first-year sequence. AMELANG 84A and 84B complete the first year in two quarters rather than three quarters. Fulfills the University Language requirement.nnGoal is to engage in interactions with Turkish speakers using socially and culturally appropriate forms. Emphasis is on the accelerated development of language proficiency, listening comprehension, reading and writing skills through conversational practice and in-class/online writing activities. Discussion of culture and social life is integrated into daily language learning activities through authentic materials.

AMELANG 84B. Accelerated First-Year Turkish, Part 2. 5 Units.
Second part of the accelerated first-year sequence. AMELANG 84A and 84B complete the first year in two rather than three quarters. AMELANG 84B (Accelerated First-Year Turkish, Part 2) fulfills the University language requirement.nGoal is to engage in interactions with Turkish speakers using socially and culturally appropriate forms. Emphasis is on the accelerated development of language proficiency, listening comprehension, reading and writing skills through conversational practice and in-class/online writing activities. Discussion of culture and social life is integrated into daily language learning activities through authentic materials.

AMELANG 99. Undergraduate Directed Reading. 1-3 Unit.
This course does not fulfill the University language requirement.

AMELANG 100A. First-Year Amharic, First Quarter. 4 Units.
.

AMELANG 100B. First-Year Amharic, Second Quarter. 4 Units.
Continuation of AMELANG 100A. Prerequisite AMELANG 100A.

AMELANG 100C. First-Year Amharic, Third Quarter. 4 Units.
Continuation of AMELANG 100B. Prerequisite AMELANG 100B. Fulfills the University Foreign Language Requirement.

AMELANG 101A. Second-Year Amharic, First Quarter. 4 Units.
Continuation of AMELANG 100C.Prerequisite: AMELANG 100C.

AMELANG 101B. Second-Year Amharic, Second Quarter. 4 Units.
Continuation of AMELANG 101A. Prerequisite AMELANG 101A.

AMELANG 101C. Second-Year Amharic, Third Quarter. 4 Units.
Continuation of AMELANG 101B. Prerequisite: AMELANG 101B.

AMELANG 106A. First-Year Swahili, First Quarter. 5 Units.
This is a five-unit introductory Swahili language course for students who have little or no previous experience in studying the Swahili language. The primary focus is on developing communicative skills in Swahili through listening, speaking , reading and writing basic grammatical structures, with special insight into the Swahili culture.nThe course emphasizes the development of communicative functionality and competence through active language use; hence, classes will be geared towards real experience in spoken Swahili. This makes class participation an essential component of the course.

AMELANG 106B. First-Year Swahili, Second Quarter. 5 Units.
Continuation of AMELANG 106A. This is a five-unit introductory Swahili language course for students who have little or no previous experience in studying the Swahili language.nThe primary focus is on developing communicative skills in Swahili through listening, speaking , reading and writing basic grammatical structures, with special insight into the Swahili culture.nThe course emphasizes the development of communicative functionality and competence through active language use; hence, classes will be geared towards real experience in spoken Swahili. This makes class participation an essential component of the course.

AMELANG 106C. First-Year Swahili, Third Quarter. 5 Units.
Continuation of AMELANG 106B. Prerequisite: AMELANG 106B. Fulfills the University foreign language requirement.

AMELANG 107A. Second-Year Swahili, First Quarter. 4 Units.
Continuation of AMELANG 106C. Prerequisite: AMELANG 106C.

AMELANG 107B. Second-Year Swahili, Second Quarter. 4 Units.
Continuation of AMELANG 107A. Prerequisite: AMELANG 107A.

AMELANG 107C. Second-Year Swahili, Third Quarter. 4 Units.
Continuation of AMELANG 107B. Prerequisite: AMELANG 107B.

AMELANG 108A. Third-Year Swahili, First Quarter. 4 Units.
Continuation of AMELANG 107C. Prerequisite: AMELANG 107C.

AMELANG 108B. Third-Year Swahili, Second Quarter. 4 Units.
Continuation of AMELANG 108A. Prerequisite: AMELANG 108A.

AMELANG 108C. Third-Year Swahili, Third Quarter. 4 Units.
Continuation of AMELANG 108B. Prerequisite: amelang 108B or consent of instructor.

AMELANG 126. Reflection on the Other: The Arab Israeli Conflict in Literature and Film. 3-5 Units.
How literary works outside the realm of Western culture struggle with questions such as identity, minority, and the issue of the Other. How the Arab is viewed in Hebrew literature, film and music and how the Jew is viewed in Palestinian works in Hebrew or Arabic (in translation to English). Historical, political, and sociological forces that have contributed to the shaping of these writers' views. Guest lectures about the Jew in Palestinian literature and music. Note: To be eligible for WAYS credit, you must take course for a Letter Grade.
Same as: COMPLIT 145, JEWISHST 106

AMELANG 128A. First-Year Hebrew, First Quarter. 5 Units.
In the first-year program, students acquire essential Hebrew through abundant opportunities to interact in the language in meaningful ways. The students learn to function appropriately in the language in a variety of social and cultural contexts.
Same as: JEWISHST 101A

AMELANG 128B. First-Year Hebrew, Second Quarter. 5 Units.
Continuation of AMELANG 128A. Prerequisite: Placement Test, AMELANG 128A.
Same as: JEWISHST 101B

AMELANG 128C. First-Year Hebrew, Third Quarter. 5 Units.
Continuation of AMELANG 128B. Prerequisite: Placement Test, AMELANG 128B. Fulfill the University Foreign Language Requirement.
Same as: JEWISHST 101C

AMELANG 129A. Second-Year Hebrew, First Quarter. 4 Units.
Continuation of AMELANG 128C. Sequence integrating culture and language. Emphasis is on proficiency in oral and written discourse including presentational language and socio culturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: Placement Test, First Year Hebrew .
Same as: JEWISHST 102A

AMELANG 129B. Second-Year Hebrew, Second Quarter. 4 Units.
Continuation of AMELANG 129A. Sequence integrating culture and language. Emphasis is on proficiency in oral and written discourse including presentational language and socio culturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: Placement Test, Hebrew 129A.
Same as: JEWISHST 102B

AMELANG 129C. Second-Year Hebrew, Third Quarter. 4 Units.
Continuation of AMELANG 129B. Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socio culturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: placement Test, Hebrew129B.
Same as: JEWISHST 102C

AMELANG 130A. Third-Year Hebrew, First Quarter. 3 Units.
Continuation of AMELANG 129C. Prerequisite: Placement Test, AMELANG 129C.
Same as: JEWISHST 103A

AMELANG 131A. Hebrew Forum. 1-3 Unit.
Intermediate and advanced level. Biweekly Hebrew discussion on contemporary issues with Israeli guest speakers. Vocabulary enhancement. Focus on exposure to academic Hebrew. May be repeat for credit up to 4 times.
Same as: JEWISHST 104

AMELANG 131B. Hebrew Forum. 2-4 Units.
Intermediate and advanced level. Biweekly Hebrew discussion on contemporary issues with Israeli guest speakers. Vocabulary enhancement. Focus on exposure to academic Hebrew. May repeat for credit.
Same as: JEWISHST 105

AMELANG 133B. The African Forum, Second Quarter. 1 Unit.
.

AMELANG 133C. The African Forum, Third Quarter. 1 Unit.
.

AMELANG 134A. First-Year Igbo, First Quarter. 4 Units.
.

AMELANG 134B. First-Year Igbo, Second Quarter. 4 Units.
Continuation of AMELANG 134A. Prerequisite: AMELANG 134A.

AMELANG 134C. First-Year Igbo, Third Quarter. 4 Units.
Continuation of AMELANG 134B. Prerequisite: AMELANG 134B. Fulfills University Foreign Language requirement.

AMELANG 135A. Second-Year Igbo, First Quarter. 4 Units.
Continuation of AMELANG 134C. Prerequisite: AMELANG 134C.

AMELANG 135B. Second-Year Igbo, Second Quarter. 3 Units.
Continuation of AMELANG 135A. Prerequisite: AMELANG 135A.

AMELANG 135C. Second-Year Igbo, Third Quarter. 4 Units.
Continuation of AMELANG 135B. Prerequisite: AMELANG 135B.

AMELANG 137A. Second-Year Xhosa, First Quarter. 4 Units.
Continuation of AMELANG 136C. Prerequisite: AMELANG 136C or consent of instructor.

AMELANG 137B. Second-Year Xhosa, Second Quarter. 4 Units.
Continuation of AMELANG 137A. Prerequisite: AMELANG 137A or consent of instructor.

AMELANG 137C. Second-Year Xhosa, Third Quarter. 4 Units.
Continuation of AMELANG 137B. Prerequisite: AMELANG 137B or consent of instructor.

AMELANG 140A. First-Year Yiddish, First Quarter. 4 Units.
Reading, writing, and speaking.
Same as: JEWISHST 104A

AMELANG 140B. First-Year Yiddish, Second Quarter. 4 Units.
Continuation of AMELANG 140A. Prerequisite: AMELANG.
Same as: JEWISHST 104B

AMELANG 140C. First-Year Yiddish, Third Quarter. 4 Units.
Continuation of AMELANG 140B. Prerequisite: AMELANG 140B. Fulfills the University Foreign Language Requirement.
Same as: JEWISHST 104C

AMELANG 141A. Second-Year Yiddish, First Quarter. 4 Units.
Continuation of AMELANG 140C. Prerequisite: AMELANG 140C.

AMELANG 141B. Second-Year Yiddish, Second Quarter. 4 Units.
Continuation of AMELANG 141A. Prerequisite: AMELANG 141A.

AMELANG 141C. Second-Year Yiddish, Third Quarter. 4 Units.
Continuation of AMELANG 141B. Prerequisite: AMELANG 141B.

AMELANG 142B. Third -Year Yiddish, Second Quarter- Reading and Writing about Yiddish Literature. 4 Units.
The focus of 142 A - C will be on the development of Yiddish literature. The course will look at the changes in literary technique from the first literary experiments in the 16th century all the way to contemporary Yiddish writing. Historical and cultural forces which shaped Yiddish writing will be discussed, thereby placing Yiddish culture within a broader European context. Course material will include fiction, poetry, and critical prose, focusing on specific challenges for contemporary students in the language and cultural settings of works discussed. Assignments will combine exercises that review essential grammatical principles with written work in Yiddish that analyze classroom readings. Learning materials include as broad a range of sources as possible (written, recorded, spoken, sung), including contemporary realia from the religious and secular worlds. Prerequisite: 142A.

AMELANG 144A. First-Year Modern Persian, First Quarter. 5 Units.
One-year sequence. Modern Persian for beginners; concentrates on rapidly developing basic skills in speaking, reading, writing, and understanding modern Persian. Strong emphasis is on the links between language and culture. The course is based on a fully integrated multimedia program. Students will learn the language with an emphasis on communicative and interactive classroom activities.

Continuation of AMELANG 145C. Prerequisite: Placement Test, AMELANG 145C.

AMELANG 146B. Third-Year Persian, Second Quarter. 4 Units.
Continuation of AMELANG 146A. Prerequisite: Placement Test, AMELANG 146A.

AMELANG 146C. Third-Year Persian, Third Quarter. 4 Units.
Continuation of AMELANG 146B. Prerequisite: Placement Test, AMELANG 146B.

AMELANG 153. Introduction to Twi. 1 Unit.
Introduction to the Twi language especially designed for Center for African Studies students going to Ghana in the Summer.

AMELANG 153A. First-Year Twi, First Quarter. 4 Units.
Twi is the extensively spoken dialect of Akan, the ethnic group of Ghana in West Africa. Being the largest ethnic group of the country Akans have spread Twi in almost all major areas of Ghana. Therefore, it has become pragmatic for non-Ghanaians to acquire Twi if they are to visit Ghana and engage in communication with majority of Ghanaians. This course is the first/second of three levels in the acquisition of basic Akan cultural expressions in Twi. Its goal is to build a strong foundation for cultural awareness and familiarization with the Akan cultural components that support effective communication and social interaction in Ghana. We will emphasize three out of the five structural levels of the culture: language (phonetics/tones/pronunciation and grammar/vocabulary), ethical norms, indigenous food/dishes, and music & dance. We will also learn some Akan cultural points and worldview. Class lesson format will include role-plays and oral presentations.

AMELANG 153B. First-Year Twi, Second Quarter. 4 Units.
Continuation of AMELANG 153A. Prerequisite: AMELANG 153A.

AMELANG 153C. First-Year Beginning Twi, Third Quarter. 4 Units.
Continuation of AMELANG 153B. Prerequisite: AMELANG 153B. Fulfills the University Foreign Language Requirement.

AMELANG 154A. Second-Year Twi, First Quarter. 4 Units.
Continuation of AMELANG 153C. Prerequisite: AMELANG 153C.

AMELANG 154B. Second-Year Twi, Second Quarter. 4 Units.
Continuation of AMELANG 154A. Prerequisite: AMELANG 154A.

AMELANG 154C. Second-Year Twi, Third Quarter. 4 Units.
Continuation of AMELANG 154B. Prerequisite: AMELANG 154B.

AMELANG 170C. Biblical Hebrew, Third Quarter. 4 Units.
Continuation of 170B.
Same as: JEWISHST 107C

AMELANG 185A. Second-Year Turkish, First Quarter. 5 Units.
Continuation of AMELANG 184C. Designed for students with previous knowledge of Turkish who wish to learn in depth about Turkish culture, history, social life, literature, cuisine and artistic trends. Emphasis on developing intermediate proficiency in reading, writing, listening and speaking. Class discussions and activities aim to enable students to perform various tasks in the target language. Authentic materials such as Cantopop and movie clips are incorporated in the courses and Internet tools are used to enhance learning. There is also an optional field trip to a karaoke bar, a dim sum restaurant, or a Cantonese community every quarter to experience Cantonese culture. In addition, students work on common pronunciation and grammatical errors due to influences from Mandarin. Cantonese-Chinese characters will also be taught. Prerequisite: CHINLANG 15M or consent of instructor.

CHINLANG 17. Beginning Conversational Cantonese, Third Quarter. 2 Units.
Continuation of CHINLANG 16. This is the third of the 3-course series on beginning Cantonese. The primary objective of the beginning series is to help students build up a repertoire of vocabulary and basic grammatical structures so that they can: (a) introduce themselves in an informal social situation, (b) engage in simple transactions, (c) converse about themselves, their friends and families, and (d) talk about activities in daily lives. Authentic materials such as Cantopop and movie clips are incorporated in the courses and Internet tools are used to enhance learning. There is also an optional field trip to a karaoke bar, a dim-sum restaurant, or a Cantonese community every quarter to experience Cantonese culture. Prerequisite: CHINLANG 16 or consent of instructor.

CHINLANG 17M. Beginning Conversational Cantonese for Mandarin Speakers, Third Quarter. 2 Units.
Continuation of CHINLANG 16M. This is the third of the 3-course series on beginning Cantonese for Standard Modern Chinese speakers. The primary objective of the beginning series is to help students build up a repertoire of vocabulary so that they can: (a) introduce themselves in an informal social situation, (b) engage in simple transactions, (c) converse about themselves, their friends and families, and (d) talk about activities in daily lives. Authentic materials such as Cantopop and movie clips are incorporated in the courses and Internet tools are used to enhance learning. There is also an optional field trip to a karaoke bar, a dim sum restaurant, or a Cantonese community every quarter to experience Cantonese culture. In addition, students work on common pronunciation and grammatical errors due to influences from Mandarin. Cantonese-Chinese characters will also be taught. Prerequisite: CHINLANG 16M or consent of instructor.

CHINLANG 18. Intermediate Cantonese Conversation, First Quarter. 2 Units.
Continuation of CHINLANG 17. This is the first of the 3-course series on intermediate Cantonese. The primary objective of the intermediate series is to help students acquire the vocabulary: (a) to engage in conversations about less concrete topics, (b) to give directions and instructions, and (c) to carry out transactions in linguistically unfamiliar situations. Students will work on more complex grammar that allows them to express their ideas in a variety of sentence structures. Authentic materials such as Cantopop, movies, and news clips are incorporated in the courses and Internet tools are used to enhance learning. There is also an optional field trip to a karaoke bar, a dim sum restaurant, or a Cantonese community every quarter to experience Cantonese culture. Prerequisite: CHINLANG 17.

CHINLANG 19. Intermediate Conversational Cantonese, Second Quarter. 2 Units.
Continuation of CHINLANG 18. This is the second of the 3-course series on intermediate Cantonese. The primary objective of the intermediate series is to help students acquire the vocabulary: (a) to engage in conversations about less concrete topics, (b) to give directions and instructions, and (c) to carry out transactions in linguistically unfamiliar situations. Students will work on more complex grammar that allows them to express their ideas in a variety of sentence structures. Authentic materials such as Cantopop, movies, and news clips are incorporated in the courses and Internet tools are used to enhance learning. There is also an optional field trip to a karaoke bar, a dim sum restaurant, or a Cantonese community every quarter to experience Cantonese culture. Prerequisite: CHINLANG 18 or consent of instructor.

CHINLANG 20. Intermediate Conversational Cantonese, Third Quarter. 2 Units.
Continuation of CHINLANG 19. This is the third of the 3-course series on intermediate Cantonese. The primary objective of the intermediate series is to help students acquire the vocabulary: (a) to engage in conversations about less concrete topics, (b) to give directions and instructions, and (c) to carry out transactions in linguistically unfamiliar situations. Students will work on more complex grammar that allows them to express their ideas in a variety of sentence structures. Authentic materials such as Cantopop, movies, and news clips are incorporated in the courses and Internet tools are used to enhance learning. There is also an optional field trip to a karaoke bar, a dim sum restaurant, or a Cantonese community every quarter to experience Cantonese culture. Prerequisite:Cantonese Proficiency Tests on Coursework, CHINLANG 19 or consent of instructor.

CHINLANG 20A. Cantonese Through Films, First Quarter. 2 Units.
This is the first of a series of courses that targets intermediate and low-advanced students interested in expanding their Cantonese repertoire to include vocabulary, grammar, and culture for talking about movies, current events, and topics of interest to them. Students watch authentic Cantonese movies, TV dramas, news clips, and documentaries. They engage in discussions about topics relevant to them, such as history and identity of Chinese Americans. There is also an optional field trip to a karaoke bar, a dim sum restaurant, or a Cantonese community every quarter to experience Cantonese culture. Prerequisite: "Cantonese Proficiency Test or CHINLANG 20.

CHINLANG 20B. Cantonese Through Films, Second Quarter. 2 Units.
Continuation of CHINLANG 20A. This is the second of a series of courses that targets intermediate and low-advanced students interested in expanding their Cantonese repertoire to include vocabulary, grammar, and culture for talking about movies, current events, and topics of interest to them. Students watch authentic Cantonese movies, TV dramas, news clips, and documentaries. They engage in discussions about topics relevant to them, such as history and identity of Chinese Americans. There is also an optional field trip to a karaoke bar, a dim sum restaurant, or a Cantonese community every quarter to experience Cantonese culture. Prerequisite: CHINLANG 20A or consent of instructor.

CHINLANG 20C. Cantonese Through Films, Third Quarter. 2 Units.
Continuation of CHINLANG 20B. This is the third of a series of courses that targets intermediate and low-advanced students interested in expanding their Cantonese repertoire to include vocabulary, grammar, and culture for talking about movies, current events, and topics of interest to them. Students watch authentic Cantonese movies, TV dramas, news clips, and documentaries. They engage in discussions about topics relevant to them, such as history and identity of Chinese Americans. There is also an optional field trip to a karaoke bar, a dim sum restaurant, or a Cantonese community every quarter to experience Cantonese culture. Prerequisite: CHINLANG 20B or consent of instructor.

CHINLANG 21. Second-Year Modern Chinese, First Quarter. 5 Units.
Continuation of CHINLANG 3. Listening, speaking, reading, writing. Daily sections may be set at the beginning of the quarter to suit schedule requirements. Prerequisite: Placement Test, CHINLANG 3.

CHINLANG 21B. Second-Year Modern Chinese for Bilingual Students, First Quarter. 3 Units.
Continuation of CHINLANG 3B. For students with advanced comprehension and speaking skills, but lacking equivalent knowledge of grammar, reading, and writing Chinese characters. Equivalent to CHINLANG 21. Prerequisite: Placement Test, CHINLANG 3B.

CHINLANG 22. Second-Year Modern Chinese, Second Quarter. 5 Units.
Continuation of CHINLANG 21. Listening, speaking, reading, writing. Daily sections may be set at the beginning of the quarter to suit schedule requirements. Prerequisite: Placement Test, CHINLANG 21.

CHINLANG 22B. Second-Year Chinese for Bilingual Students, Second Quarter. 3 Units.
Continuation of CHINLANG 21B. For students with advanced comprehension and speaking skills, but lacking equivalent knowledge of grammar, reading, and writing Chinese characters. Prerequisite: Placement Test, CHINLANG 21B .

CHINLANG 23. Second-Year Modern Chinese, Third Quarter. 5 Units.
Continuation of CHINLANG 22. Listening, speaking, reading, writing. Daily sections may be set at the beginning of the quarter to suit schedule requirements. Prerequisite: Placement Test, CHINLANG 22.

CHINLANG 23B. Second-Year Chinese for Bilingual Students, Third Quarter. 3 Units.
Continuation of CHINLANG 22B. For students with advanced comprehension and speaking skills, but lacking equivalent knowledge of grammar, reading, and writing Chinese characters. Prerequisite: Placement Test, CHINLANG 22B.

CHINLANG 27. Intermediate Chinese Conversation, First Quarter. 2 Units.
First quarter of the three-quarter sequence. For students with basic conversational skills in Standard Modern Chinese. Emphasis is on developing learners' communicative competence in Chinese by means of language practices, oral reports, discussions and group projects. Development of functional language skills for daily communication on topics related to school life, Chinese culture and society.Prerequisite: CHINLANG 3 or consent of instructor.

CHINLANG 28. Intermediate Chinese Conversation, Second Quarter. 2 Units.
Continuation of CHINLANG 27. For students with basic conversational skills in Standard Modern Chinese. Emphasis is on developing learners communicative competence in Chinese by means of language practices, oral reports, discussions and group projects. Development of functional language skills for daily communication on topics related to school life, Chinese culture and society. Prerequisite: CHINLANG 27 or consent of instructor.

CHINLANG 29. Intermediate Chinese Conversation, Third Quarter. 2 Units.
Continuation of CHINLANG 28. For students with basic conversational skills in Standard Modern Chinese. Emphasis is on developing learners' communicative competence in Chinese by means of language practices, oral reports, discussions and group projects. Development of functional language skills for daily communication on topics related to school life, Chinese culture and society. Prerequisite: CHINLANG 28 or consent of instructor.

CHINLANG 31E. Accelerated Beginning Mandarin for Engineering Students, First Quarter. 4 Units.
Restricted to engineering students participating in the China Internship Program. . Grad students enroll in CHINLANG 331E.

CHINLANG 41. Intermediate-to-Advanced Chinese Conversation, First Quarter. 2 Units.
Repeatable once for units. Prerequisite: CHINLANG 23.

CHINLANG 42. Intermediate-to-Advanced Chinese Conversation, Second Quarter. 2 Units.
Continuation of CHINLANG 41. Repeatable once for units. Prerequisite: CHINLANG 23.

CHINLANG 43. Intermediate-to-Advanced Chinese Conversation, Third Quarter. 2 Units.
Continuation of CHINLANG 42. Repeatable once for units. Prerequisite: CHINLANG 23.

CHINLANG 51. Chinese Calligraphy. 2 Units.
Introductory course on Chinese calligraphy. Practice writing Chinese characters with a brush, emphasizing regular/standard script and the composition of the characters. May be repeated for credit.Prerequisite CHINLANG 2 or consent of instructor.

CHINLANG 99. Language Specials. 1-5 Unit.
Prerequisite: consent of instructor.nn (Staff).

CHINLANG 101. Third-Year Modern Chinese, First Quarter. 5 Units.
Continuation of CHINLANG 23. Written and spoken styles of modern Chinese. Reading and discussion of authentic writings on cultural topics; newspaper reports, radio, and TV broadcasts and films; online Chinese software and email network to facilitate study. Prerequisite: Placement Test, CHINLANG 23.

CHINLANG 101B. Third-Year Modern Chinese for Bilingual Students, First Quarter. 3 Units.
Continuation of CHINLANG 23B. Equivalent to CHINLANG 101. For students with advanced listening and speaking abilities, but lacking equivalent knowledge in reading and writing. Prerequisite: Placement Test, CHINLANG 23B.

CHINLANG 102. Third-Year Modern Chinese, Second Quarter. 5 Units.
Continuation of CHINLANG 101. Written and spoken styles of modern Chinese. Reading and discussion of authentic writings on cultural topics; newspaper reports, radio, and TV broadcasts and films; online Chinese software and email network to facilitate study. Prerequisite: Placement Test, CHINLANG 101.

CHINLANG 102B. Third-Year Modern Chinese for Bilingual Students, Second Quarter. 3 Units.
Continuation of CHINLANG 101B. Equivalent to CHINLANG 102. For students with advanced listening and speaking abilities, but lacking equivalent knowledge in reading and writing. Prerequisite: Placement Test, CHINLANG 101B.

CHINLANG 103. Third-Year Modern Chinese, Third Quarter. 5 Units.
Continuation of CHINLANG 102. Written and spoken styles of modern Chinese. Reading and discussion of authentic writings on cultural topics; newspaper reports, radio, and TV broadcasts and films; online Chinese software and email network to facilitate study Prerequisite: Placement Test, CHINLANG 102.

CHINLANG 103B. Third-Year Modern Chinese for Bilingual Students, Third Quarter. 3 Units.
Continuation of CHINLANG 102B. Equivalent of CHINLANG 103. For students with advanced listening and speaking abilities, but lacking equivalent knowledge in reading and writing. Prerequisite: CHINLANG 102B.

CHINLANG 121. Advanced Chinese Conversation, First Quarter. 2 Units.
Continuation of CHINLANG 29. This is the first quarter of a three-quarter sequence designed for students who have completed Third-year Chinese, or its equivalent, and wish to continue to develop their speaking and listening skills. Content for the course is drawn from a wide variety of current multimedia materials. Topics include general interest and social issues, international relations, and others that lend themselves to lively and in-depth discussion. New grammatical structures and vocabulary will be regularly introduced, with occasional written assignments to support students, development of conversational skills. Placement Test, CHINLANG 103.

CHINLANG 122. Advanced Chinese Conversation, Second Quarter. 2 Units.
Continuation of CHINLANG 121. Second quarter of Advanced Conversational Chinese. It is designed for students who have completed Third-year Chinese, or its equivalent, and wish to continue to develop their speaking and listening skills. Content for the course is drawn from a wide variety of current multimedia materials. Topics include general interest and social issues, international relations, and others that lend themselves to lively and in-depth discussion. New grammatical structures and vocabulary will be regularly introduced, with occasional written assignments to support students, development of conversational skills. Prerequisite: CHINLANG 121.

CHINLANG 123. Advanced Chinese Conversation, Third Quarter. 2 Units.
Continuation of CHINLANG 122. Third quarter of Advanced Conversational Chinese. It is designed for students who have completed Third-year Chinese, or its equivalent, and wish to continue to develop their speaking and listening skills. Content for the course is drawn from a wide variety of current multimedia materials. Topics include general interest and social issues,international relations, and others that lend themselves to lively and in-depth discussion. New grammatical structures and vocabulary will be regularly introduced, with occasional written assignments to support development of conversational skills. Prerequisite: Chinlang 122.

CHINLANG 125. Chinese through Modern Fiction. 3 Units.
Increasing Chinese language proficiency through reading original modern Chinese literary masterpieces covered in Chingen 133/233, including prominent modern Chinese writers such as Lu Xun, Shen Congwen, Ding Ling, Zhang Ailing and Yu Hua. Students will gain Chinese language skills and enhance their understanding of Chinese culture. Enrollment in Chingen 133/233 is not required but encouraged. Prerequisite: Chinlang 103,Chinlang 103B or equivalent (proved by placement test result). Same as: CHINLANG 225

CHINLANG 131. Business Chinese, First Quarter. 3-4 Units.
This is the first course in the Business Chinese series. It focuses on expanding students¿ economic and business-related vocabulary and improving their practical language skills in business communications with Chinese-speaking communities. Students will work on a variety of authentic materials, including newspaper and journal articles, TV news and film clips, as well as commentaries from social media. Prerequisite: CHINLANG 103 or equivalent.

CHINLANG 132. Business Chinese, Second Quarter. 3-4 Units.
Continuation of CHINLANG131. This is the second course in the Business Chinese series. It focuses on expanding students¿ economic and business-related vocabulary and improving their practical language skills in business communications with Chinese-speaking communities. Students will work on a variety of authentic materials, including newspaper and journal articles, TV news and film clips, as well as commentaries from social media.Prerequisite: Chinlang 131 or consent of instructor.

CHINLANG 133. Business Chinese, Third Quarter. 3-4 Units.
Continuation of CHINLANG132. This is the third course in the Business Chinese series. It focuses on expanding students economic and business-related vocabulary and improving their practical language skills in business communications with Chinese-speaking communities. Students will work on a variety of authentic materials, including newspaper and journal articles, TV news and film clips, as well as commentaries from social media. Prerequisite: CHINLANG 132.

CHINLANG 199. Individual Reading. 1-5 Unit.
.

CHINLANG 200. Directed Reading. 1-5 Unit.
May be repeated for credit. Prerequisite: consent of instructor.

CHINLANG 211. Fourth-Year Modern Chinese, First Quarter. 5 Units.
Continuation of CHINLANG 103. This is the first quarter of a three-quarter sequence designed for students with advanced-level proficiency in Chinese. Discussions are based on short stories, essays and newspaper articles, and academic journal articles. Emphasis is on social and cultural issues in contemporary China. Students will learn speed-reading techniques and explore more subtle distinctions in Chinese language use, such as formal vs. informal styles and word choice, toward developing a more sophisticated understanding and command of the language. Having completed one year of study at this level, students will acquire sufficient skills in reading, writing, and speaking on various topics of personal or academic interest more effectively and accurately. Prerequisite: placement test, CHINLANG 103.

CHINLANG 211B. Fourth- Year Modern Chinese for Bilingual Students, First Quarter. 3 Units.
Continuation of CHINLANG 103B. This is the first quarter of a three-quarter sequence designed for bilingual students with advanced-level proficiency in Chinese. Discussions are based on short stories, essays and newspaper articles, along with related media materials. Emphasis is on social and cultural issues in contemporary China. Students will learn speed-reading techniques and explore more subtle distinctions in Chinese language use, such as formal vs. informal styles and word choice, toward developing a more sophisticated understanding and command of the language. Having completed one year of study at this level, students will acquire sufficient skills in reading, writing, and speaking on various topics of personal or public interests more effectively and accurately. Prerequisite: CHINLANG 103B.

CHINLANG 212. Fourth-Year Modern Chinese, Second Quarter. 5 Units.
Continuation of CHINLANG 211. Second quarter of fourth year Chinese. Discussions are based on short stories, essays and newspaper articles, and academic journal articles. Emphasis is on social and cultural issues in contemporary China. Students will learn speed-reading techniques and explore more subtle distinctions in Chinese language use, such as formal vs. informal styles and word choice, toward developing a more sophisticated understanding and command of the language. Having completed one year of study at this level, students will acquire sufficient skills in reading, writing, and speaking on various topics of personal or academic interest more effectively and accurately. Prerequisite: Placement Test, CHINLANG 211.

CHINLANG 212B. Fourth-Year Modern Chinese for Bilingual Students, Second Quarter. 3 Units.
Continuation of CHINLANG 211B. Second quarter of Fourth Year Chinese for bilingual students. Discussions are based on short stories, essays and newspaper articles, along with related media materials. Emphasis is on social and cultural issues in contemporary China. Students will learn speed-reading techniques and explore more subtle distinctions in Chinese language use, such as formal vs. informal styles and word choice, toward developing a more sophisticated understanding and command of the language. Having completed one year of study at this level, students will acquire sufficient skills in reading, writing, and speaking on various topics of personal or public interests more effectively and accurately. Prerequisite: CHINLANG 211B.

CHINLANG 213. Fourth-Year Modern Chinese, Third Quarter. 5 Units.
Continuation of CHINLANG 212. Third quarter of Fourth Year Chinese. Discussions are based on short stories, essays and newspaper articles, and academic journal articles. Emphasis is on social and cultural issues in contemporary China. Students will learn speed-reading techniques and explore more subtle distinctions in Chinese language use, such as formal vs. informal styles and word choice, toward developing a more sophisticated understanding and command of the language.Having completed one year of study at this level, students will acquire sufficient skills in reading, writing, and speaking on various topics of personal or academic interest more effectively and accurately. Prerequisite: Placement Test, CHINLANG 212.

CHINLANG 213B. Fourth-Year Modern Chinese for Bilingual Students, Third Quarter. 3 Units.
Continuation of CHINLANG 212B. Third quarter of Fourth Year Chinese for bilingual students. Discussions are based on short stories, essays and newspaper articles, along with related media materials. Emphasis is on social and cultural issues in contemporary China. Students will learn speed-reading techniques and explore more subtle distinctions in Chinese language use, such as formal vs. informal styles and word choice, toward developing a more sophisticated understanding and command of the language. Having completed one year of study at this level, students will acquire sufficient skills in reading, writing, and speaking on various topics of personal or public interests more effectively and accurately. Prerequisite: CHINLANG 212B.

CHINLANG 225. Chinese through Modern Fiction. 3 Units.
Increasing Chinese language proficiency through reading original modern Chinese literary masterpieces covered in Chingen 133/233, including prominent modern Chinese writers such as Lu Xun, Shen Congwen, Ding Ling, Zhang Ailing and Yu Hua. Students will gain Chinese language skills and enhance their understanding of Chinese culture. Enrollment in Chingen 133/233 is not required but encouraged. Prerequisite: Chinlang 103,Chinlang 103B or equivalent (proved by placement test result). Same as: CHINLANG 125

CHINLANG 231A. Fifth-Year Modern Chinese: Current Issues, First Quarter. 2 Units.
One of the two components of fifth-year Chinese, first quarter: A content focuses on politics, the economy, technology and society. Sequence facilitates advanced training in listening, speaking, reading and writing. Targeted functional abilities include presentational and sociocultural appropriate language in formal and informal, academic, and professional contexts. Students can take Chinlang 231A alone for 2 units, or take 231A concurrently with Chinlang 231B for 4 units.

CHINLANG 231B. Fifth-Year Modern Chinese: Cultural Texts, First Quarter. 2 Units.
One of the two components of fifth-year Chinese, first quarter: 'B' content includes cultural and literary texts in the form of dramas, fictional pieces, poetry, essays, TV shows and films. Sequence facilitates advanced training in listening, speaking, reading and writing. Targeted functional abilities include presentational and socioculturally appropriate language in formal and informal, academic, and professional contexts. Students can take 231B alone for 2 units, or take 231B concurrently with 231A for 4 units. Prerequisite: Placement Test, CHINLANG 213, or CHINLANG 213B.

CHINLANG 232A. Fifth-Year Modern Chinese: Current Issues, Second Quarter. 2 Units.
One of the two components of fifth-year Chinese, second quarter: 'A' content focuses on politics, the economy, technology and society. Sequence facilitates advanced training in listening, speaking, reading and writing. Targeted functional abilities include presentational and socioculturally appropriate language in formal and informal, academic, and professional contexts. Students can take 232A alone for 2 units, or take 232A concurrently with 232B for 4 units. Prerequisite: Placement Test, CHINLANG 231A, or CHINLANG 231B.

CHINLANG 232B. Fifth-Year Modern Chinese: Cultural Texts, Second Quarter. 2 Units.
One of the two components of fifth-year Chinese, second quarter: 'B' content includes cultural and literary texts in the form of dramas, fictional pieces, poetry, essays, TV shows and films. Sequence facilitates advanced training in listening, speaking, reading and writing. Targeted functional abilities include presentational and socioculturally appropriate language in formal and informal, academic, and professional contexts. Students can take 232B alone for 2 units, or take 232B concurrently with 232A for 4 units. Prerequisite: Placement Test, CHINLANG 231B, or CHINLANG 231A.

CHINLANG 233A. Fifth-Year Modern Chinese: Current Issues, Third Quarter. 2 Units.
One of the two components of fifth-year Chinese, third quarter: 'A' content focuses on politics, the economy, technology and society. Sequence facilitates advanced training in listening, speaking, reading and writing. Targeted functional abilities include presentational and socioculturally appropriate language in formal and informal, academic, and professional contexts. Students can take 233A alone for 2 units, or take 233A concurrently with 233B for 4 units. Prerequisite: Placement Test, CHINLANG 232A, or CHINLANG 232B.

CHINLANG 233B. Fifth-Year Modern Chinese: Cultural Texts, Third Quarter. 2 Units.
One of the two components of fifth-year Chinese, third quarter: 'B' content includes cultural and literary texts in the form of dramas, fictional pieces, poetry, essays, TV shows and films. Sequence facilitates advanced training in listening, speaking, reading and writing. Targeted functional abilities include presentational and socioculturally appropriate language in formal and informal, academic, and professional contexts. Students can take 233B alone for 2 units, or take 233B concurrently with 233A for 4 units. Prerequisite: Placement Test, CHINLANG 232B, or CHINLANG 232A.

CHINLANG 251. Chinese for Academic Discussion and Reading. 2 Units.
This course is designed to provide an opportunity for PhD students, as well as Masters or senior undergraduate students with specific academic projects to practice, improve, and refine their Chinese skills. Students will share with the class reading materials related to their academic research projects, and take the leading role in related class discussion. They will additionally write about their research topics and present their research ideas and discoveries to the class. We hope these practices can help students communicate more effectively in a Chinese academic environment, and allow them to improve the presentation skills they will use at Chinese-speaking academic conferences. This course is repeatable. Prerequisite: 213/213B or equivalent and approval of instructor (Email instructor for permission).

CHINLANG 331E. Accelerated Beginning Mandarin for Engineering Students, First Quarter. 2-4 Units.
Restricted to graduate engineering students participating in the China Internship Program.

CHINLANG 394. Graduate Studies in Chinese Conversation. 1-2 Unit.
Prerequisite: consent of instructor.

CHINLANG 395. Graduate Studies in Chinese. 1-5 Unit.
Prerequisite: consent of instructor.

English for Foreign Students Courses

EFSLANG 197. Directed Study. 1-3 Unit.
.

EFSLANG 397. Directed Study. 1-3 Unit.
.

EFSLANG 683R. Workshop in Reading and Vocabulary for International Students. 1-2 Unit.
(1-2 units). Provides support in the development of English reading skills for academic purposes, including work on comprehension, speed, and critical interpretation, along with strategies for improving vocabulary. Students taking the course for 2 units will have additional individual assignments and a 50-minute tutorial each week. Limited to visiting undergraduates and students in the High School Summer College program.

EFSLANG 683S. Workshop in Oral Communication for International Students. 1-2 Unit.
(1-2 units) Provides support in the development of listening and speaking skills in English, including academic listening, small group discussion, oral presentation, and intercultural communication. Students taking the course for 2 units will have additional individual assignments and a 50-minute tutorial each week. Limited to visiting undergraduates and students in the High School Summer College program.

EFSLANG 683W. Workshop in Written Communication for International Students. 1-2 Unit.
Provides support in the development of English writing skills for non-natives. Writing assignments are negotiated with the instructor and may include practice in composition, SAT or TOEFL writing, and writing university application essays and statements of purpose. Students taking the course for 2 units will have additional individual assignments and a 50-minute tutorial each week. Limited to visiting undergraduates and students in the High School Summer College program.

EFSLANG 684C. Communicating in the Sciences and Engineering. 1-2 Unit.
Provides instruction and practice for international students in essential spoken and written skills to succeed in the sciences and engineering in both academics and industry. Students develop their ability to communicate effectively across the English-speaking world with both scientists and engineers as well as with others outside their fields. Students taking the course for 2 units will have additional individual assignments and a weekly 50-minute tutorial. Intended for visiting undergraduates and students in the High School Summer College program. Graduate students may attend by permission.

EFSLANG 684D. Effective Negotiation and Persuasion. 1-2 Unit.
Provides for learning, practicing, and refining essential debate and discussion skills, abilities in high demand in both academia and industry and central to effective negotiation and persuasion. The course provides practice and feedback in class and covers a range of words, phrases and discourse structures for improving English proficiency and functioning effectively in academic and industry contexts as well as familiarity with commonly accepted interactional patterns. Students taking the course for 2 units will have additional individual assignments and a weekly 50-minute tutorial. Intended for visiting undergraduates and students in the High School Summer College program. Graduate students may attend by permission.

EFSLANG 687X. American Language and Culture: Silicon Valley First Session. 3 Units.
Closed enrollment. Intensive English language and U.S. culture program. Enrollment limited to 14.

EFSLANG 687Y. American Language and Culture: Silicon Valley, Second Session. 3 Units.
Closed enrollment. Intensive English language and U.S. culture program. Enrollment limited to 14. Course may be repeated once.

EFSLANG 688. Intensive English and Academic Orientation for Foreign Graduate Students. 6 Units.
Goal is to prepare incoming international graduate students for full-time study. Academic orientation and instruction in academic writing, listening, discussion, oral presentation, and spoken usage. Enrollment limited to 14. Course may be repeated once.

EFSLANG 688A. Intensive Spoken English. 3 Units.
For current graduate students. Includes work on listening, oral presentation, discussion, and conversational interaction. May fulfill any two of the following EFS requirements, subject to approval by the EFS Coordinator: EFSLANG 690A, 690B, 691, 693B.

EFSLANG 688B. Intensive Academic Writing. 3 Units.
For current graduate students. Focus on academic writing, with some work in reading and vocabulary development. Engineering, science, humanities, and social science students prepare a research paper; business students write one or more case studies. Fulfills requirement for EFSLANG 697 or 698A, subject to approval by the EFSLANG coordinator.

EFSLANG 688V. Intensive English and Academic Orientation for Stanford Visiting Scholars. 5 Units.
Goal is to improve English proficiency and introduce the university environment. Writing, pronunciation, listening, discussion, oral presentation, and spoken usage. Enrollment limited to 14.

EFSLANG 689B. Building Communication Skills through Improvisation. 1 Unit.
Focus on building a range of English communication skills through improvisation activities. Participants explore theatrical techniques that teach collaboration, spontaneity, team building, storytelling, and confident public speaking with connections to academic, professional, and personal situations. No previous improvisation or theater experience necessary.

EFSLANG 689E. Learning English on Your Own. 1 Unit.
Independent English language learning. Learning strategies and objectives, setting and maintaining practice schedules, and evaluating progress. Focus is on exploiting web-based resources. Individual meetings.

EFSLANG 689H. American Humor. 1 Unit.
Analysis of jokes, humorous stories, and situations through modern media. Practice in advanced listening comprehension and English idioms.

EFSLANG 689L. Living in the USA. 1 Unit.
Life and relationships outside the University classroom. Goal is to familiarize international students with the cultural expectations and forms of language use in a variety of situations in the University community and in other social situations.

EFSLANG 689P. Pronunciation. 1 Unit.
The sounds of English, and stress, intonation, and rhythm patterns important to natural-sounding speech.

EFSLANG 689S. Exploring Silicon Valley Language and Culture. 1 Unit.
Focus on developing communicative skills in the context of Silicon Valley with its unique culture and language patterns. Through analysis and discussion of language and content from authentic materials, such as popular blogs and videos, students gain familiarity with local norms for interacting with the people who live and work in this region. Includes topics relevant to entrepreneurs, tech professionals, and students as well as a short individual project. Intended for both new and continuing international graduate students.Undergraduate and visiting high school students may attend with permission.

EFSLANG 689T. Interacting in California's Vineyard Culture. 1 Unit.
Focuses on communicative skills in the context of California's renowned wine culture. Emphasis on the language of wine using appropriate terminology, and interacting knowledgeably with restaurant and retail wine staff. Topics include learning the fundamentals of vineyard techniques, varietal characteristics, tasting techniques, drinking and ordering etiquette. Course is co-taught by a wine expert and an ESL instructor. Class consists of a short interactive lecture, a communicative activity such as role playing, and a tasting of four specially selected wines. Participants must be at least 21 years old. Fee.

EFSLANG 689V. Vocabulary and Idiom. 1 Unit.
Building vocabulary for academic success. Idiomatic language, and what idioms and metaphors reflect about American culture. Enrollment limited to 14.

EFSLANG 689W. Working in the USA. 1 Unit.
The language and culture of the workplace. Goal is to familiarize international students with the cultural expectations of situations in the business setting and in social situations related to business.

EFSLANG 690A. Interacting in English. 1-3 Unit.
Strategies for communicating effectively in social and academic settings. Informal and formal language used in campus settings, including starting and maintaining conversations, asking questions, making complaints, and contributing ideas and opinions. Simulations and discussions, with feedback on pronunciation, grammar, and usage.

EFSLANG 690B. Academic Discussion. 1-3 Unit.
Skills for effective participation in classroom settings, seminars, and research group meetings. Pronunciation, grammar, and appropriateness for specific tasks. Feedback on language and communication style. May be repeated once for credit. Prerequisite: EFSLANG 690A or consent of instructor.

EFSLANG 690C. Advanced Interacting in English. 1-3 Unit.
Communication skills for extended discourse such as storytelling and presenting supported arguments. Development of interactive listening facility and overall intelligibility and accuracy. Goal is advanced fluency in classroom, professional and social settings. Identification of and attention to individual patterned errors. May be repeated once for credit. Prerequisite: EFSLANG 690B or consent of instructor. Enrollment limited to 14.

EFSLANG 691. Oral Presentation. 1-3 Unit.
For advanced graduate students. Practice in academic presentation skills; strategy, design, organization, and use of visual aids. Focus is on improving fluency and delivery style, with videotaping for feedback on language accuracy and usage. May be repeated once for credit.

EFSLANG 691S. Oral Presentation. 2 Units.
For advanced graduate students. Practice in academic presentation skills; strategy, design, organization, and use of visual aids. Focus is on improving fluency and delivery style, with video recording for feedback on language accuracy and usage. Fulfills the requirement for EFSLANG 691.

EFSLANG 692. Speaking and Teaching in English. 1-3 Unit.
This course is an opportunity for international students to develop their oral communication and teaching skills to be a course assistant, teaching assistant, or instructor, especially those planning an academic career in an English-speaking context. It focuses on understanding the culture of the classroom and on developing clarity and communicative effectiveness through periodic micro-teaching presentations and role plays simulating typical teaching situations, including short lectures, problem set and review sessions, office hours, discussion leading, and student project consultations. Extensive feedback is provided on comprehensibility and accuracy along with development of interpersonal and intercultural communication skills. The instructor will meet with students regularly throughout the quarter for one-on-one tutorials. May be repeated once for credit.

EFSLANG 693A. Listening Comprehension. 1-3 Unit.
This course focuses on strategies for effective listening to university lectures and other academic content, such as seminars and group discussions. It extends beyond listening for main ideas and details, providing practice in identifying discourse markers common in academic settings and in recognizing and accommodating implied information, hesitations, and reduced forms, such as contractions. It also covers challenging areas such as processing numbers and adapting to unfamiliar vocabulary. Listening practice is complemented by instruction in effective note-taking and study strategies to retain and review comprehended information. Additionally, the course has a significant discussion component, giving students the opportunity to interpret what they hear to develop a deeper and more critical understanding of the content and to link that understanding to their own spoken English production and interaction. Materials include recorded lectures from Stanford faculty and other relevant sources.

EFSLANG 693B. Advanced Listening Comprehension, and Vocabulary Development. 1-3 Unit.
Listening strategies and vocabulary for understanding English in academic and non-academic contexts. Discussion and interpretation of communicative intent. Computer-based and video exercises across a range of genres; individual project. May be repeated once for credit. Prerequisite: EFSLANG 693A or consent of instructor.

EFSLANG 693R. Graduate Reading and Vocabulary Development. 1-3 Unit.
Strategies for improving graduate and professional academic reading comprehension and critical analysis. Focus on applying specific techniques for different reading purposes. Expansion of both general and field-specific academic vocabulary and idioms. Includes individual reading projects.

EFSLANG 694. English for Business, Industry and Professional Life. 1-3 Unit.
For advanced graduate students. Task-based practice of language appropriate for professional settings in industry and related teamwork. Simulation of the roles of manager, applicant, subordinate, and coworker. Prerequisite: EFSLANG 693A, or consent of instructor. Enrollment limited to 14.

EFSLANG 695A. Pronunciation and Intonation. 1-3 Unit.
This course provides training in recognizing and practicing American English sounds, stress, and intonation patterns in connected speech in order to improve comprehension and enhance intelligibility in a variety of settings. After receiving an individualized analysis of speech patterns, students engage in directed practice both with online software and in class, receiving immediate feedback. Through these in-class activities and practice assignments, students will improve their ability to pronounce English clearly and to self-monitor and self-correct. The instructor will meet with students regularly throughout the quarter for one-on-one tutorials. Enrollment limited to 12.

EFSLANG 695B. Advanced Pronunciation and Intonation. 1-3 Unit.
Continuation of EFSLANG 695A, focusing on American English sounds, stress, rhythm, and intonation patterns. Emphasis is on self-monitoring, integrated with short presentations. Biweekly tape assignments and tutorials. Enrollment limited to 14. May be repeated for credit three times. Prerequisite: EFSLANG 695A.

EFSLANG 695S. Pronunciation and Intonation. 2 Units.
Recognition and practice of American English sounds, stress, and intonation patterns for greater comprehension and intelligibility. Analysis of problem areas. Biweekly tape assignments and tutorials. Fulfills the requirement for EFSLANG 695A.

EFSLANG 696. Understanding American Humor. 1-3 Unit.
Recognizing rhetorical devices, jokes, and character types common to spoken humor in film and television programs. Crosscultural discussion. Prerequisite: EFSLANG 690B, EFSLANG 693B or consent of the instructor. Repeatable once for credit. Enrollment limited to 14.

EFSLANG 697. Gateway to Graduate Writing. 1-3 Unit.
Focus is on improving grammatical accuracy and vocabulary, building fluency, and learning the structure and conventions of English correspondence, reports, and short academic papers. Enrollment limited to 14.

EFSLANG 698A. Writing Academic English. 1-3 Unit.
Strategies and conventions for graduate writing. Emphasis is on fluency, organization, documentation, and appropriateness for writing tasks required in course work. May be repeated once for credit.

EFSLANG 698B. Advanced Graduate Writing. 1-3 Unit.
Focus on clarity, accuracy, and appropriate style. For graduate students experienced in English writing and currently required to write for courses and research. Class meetings and individual conferences. Prerequisite: EFSLANG 698A. May be repeated once for credit.

EFSLANG 698C. Writing and Presenting Research. 1-3 Unit.
For advanced graduate students completing major research projects. Revising and editing strategies for preparing papers, conference abstracts, and poster presentations. Practice adapting written and oral presentational content and style to different audiences. Students present their research and receive instructor and peer feedback, with regular individual tutorials in addition to class work. Enrollment limited to 12. May be repeated twice for credit. Prerequisite: Students required by the EFS Placement Exam to take EFSLANG 691, 697, 698A, or 698B may not enroll in 698C until those requirements have been fulfilled. Others may sign up directly.

EFSLANG 698S. Writing Academic English. 2 Units.
Strategies and conventions for graduate writing. Emphasis is on fluency, organization, documentation, and appropriateness for writing tasks required in course work and in producing research papers. Fulfills the requirement for EFSLANG 698A.

EFSLANG 699W. Individual Writing Projects. 1 Unit.
This tutorial-based course is aimed as a follow-up to EFSLANG writing courses to support a students' continuing growth as writers in their fields. It provides weekly individual meetings with an EFS instructor of around 50 minutes on one or more major writing projects, such as qualifying papers, grant proposals, papers for publication, or dissertation chapters. The meetings are structured around the student's individual writing needs. During the sessions, students receive detailed feedback on organization, style, and grammar, along with training on how to revise and edit more effectively. Space is limited, and priority is given to those who have completed one or more of the following ENGR 202W or EFSLANG 688, 698A, 698B, or 698C. Others will be considered if space remains. For information on how to apply, see http://efs.stanford.edu or email kgeda@stanford.edu. Students with outstanding EFS writing requirements must complete them before applying.

EFSLANG 701. Online Coaching: Writing. 1 Unit.
This short course allows intensive work on a single written text of the student's choice. Students produce two drafts of their text (1000-2000 words) and meet individually with the instructor to receive substantive feedback; additionally, they review exercises and live video lessons to improve their accuracy in written English. The course meets online over three weeks. Students with requirements in EFSLANG 697, 698A, or 698B must complete them before enrolling in 701.

EFSLANG 702. Online Coaching: Presentation. 1 Unit.
This short course provides focused instruction in delivering effective oral presentations. Students create two recorded presentations and meet individually with the instructor to discuss detailed feedback; additionally, they gain proficiency with Zoom technology and strategies for improved audience engagement. The course meets online over three weeks and is recommended for those who have already taken EFSLANG 691. Students with requirements in EFSLANG 690A, 690B, or 691 must complete them before enrolling in 702. nNote: Section 1 meets in weeks 2, 3, and 4. Section 2 meets in weeks 7, 8, and 9.

EFSLANG 703. Online Coaching: Accent Reduction. 1 Unit.
This short course provides focused instruction and practice on speaking English in personal, academic, and professional situations with greater clarity and effectiveness. Using an online approach with students selecting the times to work through the materials, they learn the key sound patterns of North American English, focusing on word stress, linking, rhythm, intonation and prosody. Over the five-week course, students improve their speaking clarity through the use of short video lectures, dictation exercises, and practice with an online pronunciation software package. They also receive individualized pronunciation coaching from the instructor via weekly 20-minute tutorials. Students with a requirement in EFSLANG 695A must complete it before enrolling: a prior course in pronunciation for others is recommended but not required.

French Language Courses

FRENLANG 1. First-Year French, First Quarter. 5 Units.
Proficiency-based. Development of discourse appropriate in French and Francophone contexts. Prerequisite: no previous exposure to French.

FRENLANG 1A. Accelerated First-Year French, Part 1. 5 Units.
Completes first-year language sequence in two rather than three quarters. Recommended for students with previous knowledge of French who place into FRENLANG 1A on the placement test, or those who are familiar with another Romance language.Prerequisite: Placement Test.or consent of coordinator.

FRENLANG 2. First-Year French, Second Quarter. 5 Units.
Continuation of FRENLANG 1. Proficiency-based. Development of discourse appropriate in French and Francophone contexts. Recent placement Test, completion of FRENLANG 1 or consent of French coordinator.

FRENLANG 2A. Accelerated First-Year French, Part 2. 5 Units.
Continuation of FRENLANG 1A. Completes first-year accelerated language sequence in two rather than three quarters. Fulfills the University foreign language requirement. Prerequisite: completion of FRENLANG 1A or recent Placement Test.

FRENLANG 3. First-Year French, Third Quarter. 5 Units.
Continuation of FRENLANG 2 . Proficiency-based. Development of discourse appropriate in French and Francophone contexts. Prerequisite: Recent Placement test, completion of FRENLANG 2 or consent of French coordinator. Fulfills the University language requirement.

FRENLANG 5. Intensive First-Year French. 10 Units.
Accelerated 1st year course. Completes first-year sequence in one rather than three quarters. Completion of this course fulfills the University Foreign Language Requirement.

FRENLANG 15. Intermediate French Oral Communication. 3 Units.
Intermediate conversation.For students who have completed FRENLANG 1A or 2. Emphasis is on speaking skills, pronunciation, vocabulary in the context of current events and news in the French and Francophone world. May be repeated once for credit. For students who have completed Frenlang 1A or Frenlang 2 or received consent of French coordinator.

FRENLANG 20B. French Cinema. 2 Units.
Second-year French conversation based on films. Intermediate-level speaking skills and advanced-level functions. Themes include: French filmmakers, stars, and trends. Required film viewing in and outside class in French. May be repeated once for credit. Prerequisite: FRENLANG 21C or equivalent.

FRENLANG 21C. Second-Year French: Cultural Emphasis, First Quarter. 4 Units.
Sequence integrating culture and language. Emphasis is on intermediate proficiency in oral and written discourse including presentational language and socio culturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequiste: Completion of Frenlang 1 2A or Frenlang 3, recent placement test or consent of French coordinator.

FRENLANG 22C. Second-Year French: Cultural Emphasis, Second Quarter. 4 Units.
Continuation of FRENLANG 21C. Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socio culturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequiste: Completion of Frenlang 21C,recent placement test or consent of French coordinator.

FRENLANG 23C. Second-Year French: Cultural Emphasis, Third Quarter. 4 Units.
Continuation of FRENLANG 22C. Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socio culturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequiste: Completion of Frenlang 22C, recent placement test or consent of French coordinator.

FRENLANG 30. Intermediate/Advanced French Conversation. 2 Units.
For students who have completed Frenlang 2A ,3 or have placed into Frenlang 21C with recent placement. Prerequiste: Completion of Frenlang 2A, Frenlang 3 or recent placement into Frenlang 21C.

FRENLANG 120. Advanced French Oral Communication. 3 Units.
Speaking skills and functions including narration, description, supporting opinions, and hypothesizing about current events and issues in France. May be repeated once for credit. Prerequisites: FRENLANG 22C or 23C or equivalent.

FRENLANG 120S. Advanced French Conversation. 2 Units.
Speaking skills and functions including narration, description, supporting opinions, and hypothesizing about current events and issues in France. May be repeated once for credit. Prerequisites: FRENLANG 21C, 22C or 23C or equivalent.

FRENLANG 124. Advanced French: Composition, Writing, and Presentation. 4-5 Units.
This bridge course prepares students for transitioning to literature classes that are taught in French. Emphasis is on the development of speaking, writing, and presenting at the advanced level. Students will review and master the difficulties of French through the study of various types of literary texts and through analysis of current events in the francophone world. Required for students majoring or minoring in French. Prerequisite: FRENLANG¿23C, recent placement test or consent of the French coordinator.

FRENLANG 127. Acting in French. 3-4 Units.
This course aims to enhance students' French diction and enunciation while improving their oral and written discourse. Students will work with theatrical texts, discuss various ways to stage them, explore basic acting and improvisation techniques, and participate in a theatrical production. All class activities and assignments are in French. Prerequisite: Frenlang 3 or Fr2A. 3-4 units.

FRENLANG 199. Language Specials. 1-5 Unit.
Prerequisite: consent of instructor.

FRENLANG 205A. Intensive First-Year French for Stanford Grads, Part A. 3-5 Units.
Equivalent to FRENLANG 5A. For Stanford graduate students only. Accelerated. Written exercises, compositions, conversational practice, and daily work. Stanford graduate students restricted to 9 units may take 205A,B,C for a total of 9 units or 2 of the courses for a total of 9 units.

FRENLANG 205B. Intensive First-Year French for Stanford Grads, Part B. 3-5 Units.
Equivalent to FRENLANG 5B. For Stanford graduate students only. Continuation of 205A. Accelerated. Written exercises, compositions, conversational practice, and daily work . Prerequisite 205B or equivalent. Stanford graduate students restricted to 9 units may take 205A,B,C for a total of 9 units or 2 of the courses for a total of 9 units. Prerequisite 205A or equivalent.

FRENLANG 205C. Intensive First-Year French for Stanford Grads - Part C. 3-5 Units.
Equivalent to FRENLANG 5B. For Stanford graduate students only. Continuation of 205B. Accelerated. Written exercises, compositions, conversational practice, and daily work. Stanford graduate students restricted to 9 units may take 205A,B,C for a total of 9 units or 2 of the courses for a total of 9 units. Prerequisite 205B or equivalent.

FRENLANG 250. Reading French. 4 Units.
For seniors or graduate students seeking to meet the University reading requirement for advanced degrees. Reading strategies for comprehension of secondary literature for academic research. Fulfills the University foreign language requirement for advanced degrees if student earns a grade of 'B.' Prerequisite: one year or reading proficiency in another Romance language.

FRENLANG 394. Graduate Studies in French Conversation. 1-3 Unit.
Prerequisite: consent of the instructor.

FRENLANG 395. Graduate Studies in French. 1-5 Unit.
Prerequisite: consent of instructor.

German Language Courses

GERLANG 1. First-Year German, First Quarter. 5 Units.
First-quarter of three-quarter First-Year Gerlang sequence. Emphasis is on developing beginning proficiency in interpersonal, interpretive, and presentational spheres.Prerequisite: no experience with German or Placement.

GERLANG 1A. Accelerated First-Year German, Part1. 5 Units.
First-quarter of two-quarter accelerated First-Year sequence. Some experience with learning foreign language recommended. Emphasis is on developing beginning proficiency in interpersonal, interpretive, and presentational spheres.Prerequisite: Placement or consent of instructor.

GERLANG 2. First-Year German, Second Quarter. 5 Units.
Continuation of GERLANG1. Further development of socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres.Prerequisite: Placement, GERLANG1.

GERLANG 2A. Accelerated First-Year German, Part 2. 5 Units.
Continuation of Gerlang 1A. Second-quarter of two quarter accelerated First-Year sequence. Further development of socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres.Completion of Gerlang 2A fulfills the University language requirement.Prerequisite: Gerlang 1A or Placement.

GERLANG 3. First-Year German, Third Quarter. 5 Units.
Continuation of GERLANG2. Further development of socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Completion of Gerlang 3 fulfills the University language requirement. Prerequisite: Placement or GERLANG2.

GERLANG 5. Intensive First-Year German. 10 Units.
Accelerated 1st year course. Completes first-year sequence in one rather than three quarters. Completion of this course fulfills the University Foreign Language Requirement.

GERLANG 10. Elementary German for Seniors and Graduate Students. 4 Units.
Intensive. For students who need to acquire reading ability in German for the Ph.D. or for advanced research in their own field. 250 fulfills Ph.D. reading exam.

GERLANG 20C. Advanced German Conversation. 1 Unit.
Informal 1-unit course for students interested practicing advanced-level conversation. Most appropriate for students who are taking GERLANG21or higher, advanced heritage speakers, and students looking to practice professional German. Emphasis on discussion of cultural topics including politics, exploring media and news, and student interests. Attendance is required to receive course credit.

GERLANG 20G. Fashion Through FIlm. 1 Unit.
Modern German Fashion nA film-based foray into several aspects of the history of modern German fashion. Topics from class to class will be somewhat sporadic, spanning the origins of traditional German attire, subcultural youth styles in Germany throughout the 20th century, and prominent German figures in the global fashion industry such as designer Karl Lagerfeld and photographer Helmut Newton, among others. May be repeat for credit.

GERLANG 20R. German Conversation through Drama. 1 Unit.
Want to practice your German by playing improvisation games, reading dialogues and performing short scenes? In this German conversation course, for students anywhere from intermediate to advanced, we'll read scenes from Friedrich Dürrenmatt's Die Physiker, a hilarious dark comedy from the 1960's about three "scientists" in an insane asylum who want to save the world from the nuclear danger of scientific progress. We'll work through the play, discussing the broader issues and performing for each other different interpretations of important scenes. This is a great way to practice reading and speaking in German, learn new vocab, and play around with a fascinating, cold-war era text that has a lot to say about scientific ethics today.

GERLANG 20T. Teaching German Conversation. 1 Unit.
(AU).

GERLANG 21. Second-Year German, First Quarter. 4 Units.
Continuation of GERLANG3. Sequence integrating culture and language of the German-speaking world. Socially and culturally appropriate forms in narrations, descriptions, and expression of ideas and opinions. Emphasis is on oral and written proficiency in formal, informal, academic, and professional contexts. Prerequisite: Placement or GERLANG3.

GERLANG 21S. Intermediate German. 4 Units.
Reading short stories, and review of German structure. Discussions in German, short compositions, videos. Prerequisite: one year of college German; or two years high school German or equivalent, or AP German.

GERLANG 21W. Intermediate German I: German for Business and International Relations. 4 Units.
Equivalent to 21, but focus is on business and the political and economic geography of Germany. CDs and videos. For students planning to do a business internship in a German-speaking country. Prerequisite: placement test, 3.

GERLANG 22. Second-Year German, Second Quarter. 4 Units.
Continuation of GERLANG21. Sequence integrating culture and language of the Catalan-speaking world. Socially and culturally appropriate forms in narrations, descriptions, and expression of ideas and opinions. Emphasis is on oral and written proficiency in formal, informal, academic, and professional contexts. Prerequisite: Placement or GERLANG21.

GERLANG 22W. Intermediate German II: German for Business and International Relations. 4-5 Units.
Equivalent to 22, but continuation of 21W. Recommended for students planning to do a business internship in a German-speaking country. Prerequisite: placement test,21, 21W.

GERLANG 23. Second Year German, Third Quarter. 4 Units.
Continuation of GERLANG22. Sequence integrating culture and language of the Catalan-speaking world. Socially and culturally appropriate forms in narrations, descriptions, and expression of ideas and opinions. Emphasis is on oral and written proficiency in formal, informal, academic, and professional contexts. Prerequisite: Placement or GERLANG22.

GERLANG 99. Language Specials. 1-5 Unit.
Prerequisite: consent of instructor.

GERLANG 199. Individual Reading. 1-5 Unit.
Prerequisite: consent of instructor.

GERLANG 210. Elementary German for Graduate Students. 3-4 Units.
Restricted to Stanford graduate students. Prerequisite: consent of instructor.

GERLANG 250. Reading German. 4 Units.
For undergraduates and graduate students with a knowledge of German who want to acquire reading proficiency. Readings from scholarly works and professional journals. Recommended for students who need to pass the Ph.D. reading exam. Fulfills University reading requirement for advanced degrees if student earns a grade of 'B'(note requirement may vary depending on academic department)Prerequisite: one year of German or instructor ¿s consent.

GERLANG 395. Graduate Studies in German. 1-5 Unit.
Prerequisite: consent of instructor.

GERLANG 399. Independent Study. 1-5 Unit.
Prerequisite: consent of instructor.

Courses

Italian Language Courses

ITALLANG 1. First-Year Italian, First Quarter. 5 Units.
All-in-Italian communicative and interactive approach. Emphasis is on the development of appropriate discourse in contemporary cultural contexts. Interpretation of authentic materials, written and oral presentations, and plenty of conversational practice. Language lab, multimedia, and online activities.

ITALLANG 1A. Accelerated First-Year Italian, Part 1. 5 Units.
Accelerated sequence that completes first-year Italian in two rather than three quarters. For students with previous knowledge of Italian or with a strong background in another Romance language. Prerequisite: advanced proficiency or AP/SAT in another Romance language; or Italian placement test.

ITALLANG 2. First-Year Italian, Second Quarter. 5 Units.
Continuation of ITALLANG 1. All-in-Italian communicative and interactive approach. Emphasis is on the development of appropriate discourse in contemporary cultural contexts. Interpretation of authentic materials, written and oral presentations, and plenty of conversational practice. Language lab, multimedia, and online activities. Prerequisite: Itallang 1 or placement test.

ITALLANG 2A. Accelerated First-Year Italian, Part 2. 5 Units.
Continuation of ITALLANG 1A. Accelerated sequence that completes first-year Italian in two rather than three quarters. For students with previous knowledge of Italian or with a strong background in another Romance language. Prerequisite: Placement Test or ITALLANG 1A. Fulfills the University language requirement.

ITALLANG 3. First-Year Italian, Third Quarter. 5 Units.
Continuation of ITALLANG 2. All-in-Italian communicative and interactive approach. Emphasis is on the development of appropriate discourse in contemporary cultural contexts. Interpretation of authentic materials, written and oral presentations, and plenty of conversational practice. Language lab, multimedia, and online activities. Prerequisite: Itallang 2 or placement test. Fulfills the University language requirement.

ITALLANG 20. Intermediate Oral Communication: Italy Today. 3 Units.
Second-year conversational and presentational skills developed through exposure to movie clips, slide shows, and other authentic multimedia materials. Guest lectures on Italian culture including opera, pop music, wine, and food culture. Preview of the Florentine experience with Florence returnees sharing their experiences in Italy. Prerequisite: ITALLANG 2A, ITALLANG 3. Repeatable for credit twice.

ITALLANG 21. Second Year Italian, First Quarter. 4 Units.
Continuation of 3 or Italian 2A . Second-Year Italian, First Quarter - Sequence integrating culture and language in the development of socioculturally appropriate discourse. Authentic materials include news and film clips, video and audio files, and short stories. Reading, writing, listening, and speaking competence based on cross cultural understanding. Prerequisite: Placement Test, ITALLANG 3.

ITALLANG 21A. Accelerated Second-Year Italian, Part 1. 5 Units.
Continuation of ITALLANG 2A or Italian 3. For students going to Florence. Completes second-year sequence in two rather than three quarters. Prerequisite: placement test, ITALLANG 2A, ITALLANG 3.

ITALLANG 22. Second-Year Italian, Second Quarter. 4 Units.
Continuation of ITALLANG 21. Sequence integrating culture and language in the development of socioculturally appropriate discourse. Authentic materials include news and film clips, video and audio files, and excerpts from short stories. Reading, writing, listening, and speaking competence based on cross-cultural understanding. Prerequisite: Placement Test, ITALLANG 21 or equivalent.

ITALLANG 22A. Accelerated Second-Year Italian, Part 2. 5 Units.
Continuation of ITALLANG 21A or OSPFLOR 21F (for Florence returnees). Part 2 of a second-year sequence in two rather than three quarters. Satisfies the foreign language requirement for International Relations majors. Prerequisite: Placement Test, ITALLANG 21A or OSPFLOR 21F.

ITALLANG 23. Second-Year Italian, Third Quarter. 3-4 Units.
Continuation of ITALLANG 22. Sequence integrating culture and language in the development of socioculturally appropriate discourse. Authentic materials include news and film clips, video and audio files, and short stories. Reading, writing, listening, and speaking competence based on cross cultural understanding. Prerequisite: Placement Test, ITALLANG 22 or equivalent. Satisfies the foreign language requirement for International Relations majors.

ITALLANG 60C. Italian Cooking. 1 Unit.
Welcome to Italian Cooking! In this class you will learn classic Italian recipes andntechniques to carry with you through your culinary explorations. Our goal is that you will gain confidence to go out and cook Italian dishes by yourself, with or without recipes.In each class you will prepare a different dish with a small group, learn the techniques involved in the preparation, and enjoy the result of your hard work.nThe class is taught in English.

ITALLANG 99. Language Specials. 1-5 Unit.
Prerequisite: consent of instructor.

ITALLANG 102. Advanced Oral Communication: Modern Cinema. 3 Units.
For Florence returnees or those who have completed second-year Italian. Use of movies by Italian film directors such as Benigni, Moretti, Salvatores, Soldini, and Tornatore to improve communication skills and review language functions. Emphasis is on presentation, conversation, and debate. Prerequisite: placement test, 101.

ITALLANG 113. Italian Cultural Studies. 3 Units.
Literary texts, news reports, comic books, film reviews, music lyrics, and sociological surveys used to examine Italy's language, culture, and society today. Advanced grammatical analysis and reading comprehension. Prerequisite: second-year Italian or equivalent.

ITALLANG 114. Composition, Writing, and Presentation. 3 Units.
Students learn to develop advanced proficiency in their writing and oral reports through examination and practice of three modes of communication (Interpretive, Interpersonal and Presentational). Textual and grammatical analysis of online material, audio, video, and literary texts that center on cultural and sociolinguistic aspects of the Italian speaking world. Prerequisite: Placement Test, second-year Italian or equivalent.

ITALLANG 115. Academic and Creative Writing. 3 Units.
Students develop an increasingly sophisticated level of writing and cultural awareness in argumentative, expository, and creative writing. Identification and analysis of textual elements and narrative style, such as register, formal structure, expressive language, when and how to break rules for effect. Written, oral, and visual texts serve as a springboard for students¿ own production. Prerequisite: Placement Test, second-year Italian or equivalent.

ITALLANG 126. Italy and Italians Today. 1-2 Unit.
An introduction to Italian culture for residents of La Casa Italiana. Past topics have included: Italian Comedy; Contemporary Italy through Film; Italian Food Culture; Eight Great Italians; Regional Italy; European Italy. Enrollment restricted to residents of La Casa Italiana except with prior approval of the instructor. Taught in English. May be repeated for credit.

ITALLANG 250. Reading Italian. 4 Units.
For seniors or graduate students seeking to meet the University reading requirement for advanced degrees. Reading strategies for comprehension of secondary literature for academic research. Fulfills the University foreign language requirement for advanced degrees if student earns a grade of 'B.' Prerequisite: one year of Italian or reading proficiency in another Romance language.

ITALLANG 394. Graduate Studies in Italian Conversation. 1-3 Unit.
Prerequisite: consent of instructor.nn (Staff).

ITALLANG 395. Graduate Studies in Italian. 1-5 Unit.
Prerequisite: consent of instructor.n (Staff).

Japanese Language Courses

JAPANLNG 1. First-Year Japanese Language, Culture, and Communication, First Quarter. 5 Units.
First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. 72 kanji characters will be taught.

JAPANLNG 1A. Accelerated First- Year Japanese, Part 1. 5 Units.
Speaking, reading, writing, and listening. First-year sequence enables students to converse, write and read essays on topics such as personal history, experiences, familiar people. Completes first-year sequence in two rather than three quarters.

JAPANLNG 2. First-Year Japanese Language, Culture, and Communication, Second Quarter. 5 Units.
Continuation of 1. First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. Students are expected to master 177 kanji characters by completing this course. Prerequisite: placement test, Japanlng 1.

JAPANLNG 2A. Accelerated First-Year Japanese, Part 2. 5 Units.
Speaking, reading, writing, and listening. . First-year sequence enables students to converse, write and read essays on topics such as personal history, experiences, familiar people. Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Japanese. Completes the Foreign Language Requirement.

JAPANLNG 3. First-Year Japanese Language, Culture, and Communication, Third Quarter. 5 Units.
Continuation of Japanlng 2. First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. Students are expected to master 300 kanji characters by completing the course. Fulfills University Foreign Language Requirement. Prerequisite: placement test, Japanlng 2. http://japanese.stanford.edu/.

JAPANLNG 4A. First -Year Japanese Language Essentials, First Quarter. 3 Units.
For students who want to build communication skills in limited time. Online listening exercises, audiovisual materials, kanji exercises. See http://japanese.stanford.edu/.

JAPANLNG 4B. First-Year Japanese Language Essentials, Second Quarter. 3 Units.
Continuation of JAPANLNG 4A. For students who want to build communication skills in limited time. Online listening exercises, audiovisual materials, kanji exercises. Prerequisite: Placement Test, JAPANLNG 4A . See http://japanese.stanford.edu/.

JAPANLNG 4C. First-Year Japanese Language Essentials, Third Quarter. 3 Units.
Continuation of JAPANLNG 4B. For students who want to build communication skills in limited time. Online listening exercises, audiovisual materials, kanji exercises. Prerequisite: Placement Test, JAPANLNG 4B. See http://japanese.stanford.edu/.

JAPANLNG 11A. Intermediate Japanese Conversation, First Quarter. 2 Units.
Goal of the course is to converse in Japanese with more confidence. Develops oral proficiency through building solid basic sentence patterns and increasing vocabulary in order to gain ability to speak about greater variety of topics with more detail. Class activities include role play and mini skits for practical use of Japanese. Prerequisite: JAPANLNG 3 or consent of instructor.

JAPANLNG 11B. Intermediate Japanese Conversation, Second Quarter. 2 Units.
Continuation of JAPANLNG 11A.Goal of the course is to converse in Japanese with more confidence. Develops oral proficiency through building solid basic sentence patterns and increasing vocabulary in order to gain ability to speak about greater variety of topics with more detail. Class activities include role play and mini skits for practical use of Japanese. Prerequisite: JAPANLNG 11A or consent of instructor.

JAPANLNG 11C. Intermediate Japanese Conversation, Third Quarter. 2 Units.
Goal of the course is to converse in Japanese with more confidence. Develops oral proficiency through building solid basic sentence patterns and increasing vocabulary in order to gain ability to speak about greater variety of topics with more detail. Class activities include role play and mini skits for practical use of Japanese. Prerequisite: JAPANLNG 11B or consent of instructor.

JAPANLNG 14A. Second-Year Japanese Language Essentials, First Quarter. 3 Units.
Continuation of JAPANLNG 4C. For students who want to build communication skills in limited time. Prerequisite: JAPANLNG 4C. See http://japanese.stanford.edu/?page_id=89.

JAPANLNG 14B. Second-Year Japanese Language Essentials, Second Quarter. 3 Units.
Continuation of JAPANLNG 14A. For students who want to build communication skills in limited time. Prerequisite: JAPANLNG 14A. See http://japanese.stanford.edu/.

JAPANLNG 14C. Second-Year Japanese Language Essentials, Third Quarter. 3 Units.
Continuation of JAPANLNG 14B. For students who want to build communication skills in limited time. Prerequisite: JAPANLNG 14B. See http://japanese.stanford.edu/.

JAPANLNG 15. Japanese Calligraphy. 2 Units.
Practice in writing Japanese characters with brush and ink emphasizing basic writing style. Learn stroke order and structure of characters to improve handwriting. May be repeated for credit. Prerequisite: JAPANLNG1 or consent of instructor.

JAPANLNG 21. Second-Year Japanese Language, Culture, and Communication, First Quarter. 5 Units.
Goal is to further develop and enhance spoken and written Japanese in order to handle advanced concepts such as comparison and contrast of two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include authentic materials such as newspaper articles, and essays. Prerequisite: Placement Test, JAPANLNG 3. See http://japanese.stanford.edu/.

JAPANLNG 22. Second-Year Japanese Language, Culture, and Communication, Second Quarter. 5 Units.
Continuation of JAPANLNG 21. Goal is to further develop and enhance spoken and written Japanese in order to handle advanced concepts such as comparison and contrast of two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include authentic materials such as newspaper articles, and essays. Prerequisite: Placement Test, JAPANLNG 21. See http://japanese.stanford.edu/?page_id=23.

JAPANLNG 23. Second-Year Japanese Language, Culture, and Communication, Third Quarter. 5 Units.
Goal is to further develop and enhance spoken and written Japanese in order to handle advanced concepts such as comparison and contrast of two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include authentic materials such as newspaper articles, and essays. Prerequisite: 22. http://japanese.stanford.edu/.

JAPANLNG 31A. Intermediate to Advanced Conversation, First Quarter. 2 Units.
Oral proficiency through role play, oral presentations, and discussion. Recommended for those who have participated in BOSP in Kyoto. May be taken concurrently with JAPANLNG 21, 22, and 23. Prerequisite: 3K, or consent of instructor. See http://japanese.stanford.edu/.

JAPANLNG 31B. Intermediate to Advanced Conversation, Second Quarter. 2 Units.
Continuation of JAPANLNG 31A. Oral proficiency through role play, oral presentations, and discussion. Recommended for those who have participated in BOSP in Kyoto. . May be taken concurrently with JAPANLNG 21, 22, and 23. Prerequisite: JAPANLNG 31A, or consent of instructor. See http://japanese.stanford.edu/.

JAPANLNG 31C. Intermediate to Advanced Conversation, Third Quarter. 2 Units.
Continuation of JAPANLNG 31B. Oral proficiency through role play, oral presentations, and discussion. Recommended for those who have participated in BOSP in Kyoto program. May be taken concurrently with JAPANLNG 21, 22, and 23. Prerequisite: JAPANLNG 31B. See http://japanese.stanford.edu/.

JAPANLNG 99. Language Specials. 1-5 Unit.
Prerequisite: consent of instructor.n (Staff).

JAPANLNG 100. Reading in Japanese. 1 Unit.
Goal is to advance Japanese proficiency through reading in Japanese on topics you are interested in. You will read and write journals about the booklets, magazines, periodicals, and manga you choose. Research shows that this type of reading activity further enhances learners' proficiency (accuracy, vocabulary, writing, and cultural literacy). Prerequisite: Japanlng 2, but all levels are welcome.

JAPANLNG 101. Third-Year Japanese Language, Culture, and Communication, First Quarter. 5 Units.
Goal is to express thoughts and opinions in paragraph length in spoken and written forms. Materials include current Japanese media and literature for native speakers of Japanese. Cultural and social topics related to Japan and its people. Prerequisite: Placement Tests, JAPANLNG 23. See http://japanese.stanford.edu/.

JAPANLNG 102. Third-Year Japanese Language, Culture, and Communication, Second Quarter. 5 Units.
Continuation of 101. Goal is to express thoughts and opinions in paragraph length in spoken and written forms. Materials include current Japanese media and literature for native speakers of Japanese. Cultural and social topics related to Japan and its people. Prerequisite: 101. See http://japanese.stanford.edu/.

JAPANLNG 103. Third-Year Japanese Language, Culture, and Communication, Third Quarter. 5 Units.
Continuation of 102. Goal is to express thoughts and opinions in paragraph length in spoken and written forms. Materials include current Japanese media and literature for native speakers of Japanese. Cultural and social topics related to Japan and its people. Prerequisite: 102. See http://japanese.stanford.edu/.

JAPANLNG 111A. Advanced Japanese Conversation, First Quarter. 2 Units.

Students will engage in in-depth discussion and exploration of social and cultural issues, expand the repertoire of vocabulary, and practice on advanced language skills. Topics may vary depending on student interests. Prerequisite: JAPANLNG 23.

JAPANLNG 200. Directed Reading. 1-5 Unit.
Prerequisite: 213 and consent of instructor.

JAPANLNG 211. Fourth-Year Japanese, First Quarter. 3-5 Units.
Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: JAPANLNG 103. See http://japanese.stanford.edu/?page_id=263.

JAPANLNG 212. Fourth-Year Japanese, Second Quarter. 3-5 Units.
Continuation of JAPANLNG 211. Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: JAPANLNG 211. See http://japanese.stanford.edu/?page_id=263.

JAPANLNG 213. Fourth-Year Japanese, Third Quarter. 2-4 Units.
Continuation of JAPANLNG 212. Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: JAPANLNG 212. See http://japanese.stanford.edu/?page_id=263.

JAPANLNG 320. Intensive Second-Year Japanese for Stanford Graduate Students. 9 Units.
Equivalent to 21, 22, 23 combined or 20. Stanford Grads only. See http://japanese.stanford.edu/?page_id=323.

JAPANLNG 394. Graduate Studies in Japanese Conversation. 1-3 Unit.
Prerequisite: consent of instructor. (Staff).

JAPANLNG 395. Graduate Studies in Japanese. 1-5 Unit.
Prerequisite: consent of instructor. (Staff).

Korean Language Courses

KORLANG 1. First-Year Korean, First Quarter. 5 Units.
First quarter of three-quarter sequence. Emphasis is on the development of beginning proficiency in interpersonal, interpretive, and presentational spheres. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language.

KORLANG 1A. Accelerated First-Year Korean, Part 1. 5 Units.
KORLANG 1A and 2A complete the sequence in two rather than 3 quarters. Recommended for students with previous knowledge of Korean. Students acquire beginning proficiency in Korean at an accelerated pace through intensive speaking, reading, listening, and writing. Prerequisite: Placement test or consent of instructor.

KORLANG 2. First-Year Korean, Second Quarter. 5 Units.
Continuation of KORLANG1. Emphasis is on the development of beginning proficiency in interpersonal, interpretive, and presentational spheres. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language. Prerequisite: Prerequisite: Placement Test, KORLANG 1.

KORLANG 2A. Accelerated First-Year Korean, Part 2. 5 Units.
Continuation of KORLANG 1A. Recommended for students with previous knowledge of Korean. Emphasis is on the further development of beginning proficiency through intensive speaking, reading, listening, and writing. Completion of KORLANG 2A fulfills the University Language Requirement. Prerequisite: Placement Test or KORLANG 1A.

KORLANG 3. First-Year Korean, Third Quarter. 5 Units.
Continuation of KORLANG2. Emphasis is on the development of beginning proficiency in interpersonal, interpretive, and presentational spheres. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language. Completion of KORLANG 3 fulfills the University language requirement.Prerequisite: Placement test or KORLANG2.

KORLANG 21. Second-Year Korean, First Quarter. 4 Units.
Continuation of KORLANG 3 or KORLANG 2A. More complex sentences and grammatical patterns. Conversation in daily situations such as making a polite request or suggestion, reading simple texts, and Korean culture. Prerequisite: Placement Test, KORLANG 3.

KORLANG 21A. Accelerated Second-Year Korean, Part 1. 5 Units.
Continuation of KORLANG 2A or 3. Completes second-year sequence in two rather than three quarters. Students acquire intermediate proficiency in Korean at an accelerated pace through intensive speaking, reading, listening, and writing. Prerequisite: Placement test, KORLANG 2A or KORLANG 3.

KORLANG 22. Second-Year Korean, Second Quarter. 4 Units.
Continuation of KORLANG 21. More complex sentences and grammatical patterns. Conversation in daily situations such as making a polite request or suggestion, reading simple texts, and Korean culture. Prerequisite: Placement Test, KORLANG 21.

KORLANG 22A. Accelerated Second-Year Korean, Part 2. 5 Units.
Continuation of KORLANG 21A. Part 2 of a second-year sequence in two rather than three quarters.Emphasis is on the further development of intermediate proficiency through intensive speaking, reading, listening, and writing. Prerequisite: Placement test or KORLANG 21A.

KORLANG 23. Second-Year Korean, Third Quarter. 4 Units.
Continuation of KORLANG 22. More complex sentences and grammatical patterns. Conversation in daily situations such as making a polite request or suggestion, reading simple texts, and Korean culture. Prerequisite: Placement Test or KORLANG 22.

KORLANG 101. Third-Year Korean, First Quarter. 4 Units.
Continuation of KORLANG 23. Materials about Korean culture and society. Proficiency in interpersonal, interpretive, and presentational communication. Vocabulary, reading, and aural/oral skills. Prerequisite: Placement test, KORLANG 23, or KORLANG 22A.

KORLANG 102. Third-Year Korean, Second Quarter. 4-5 Units.
Continuation of KORLANG 101. Materials about Korean culture and society. Proficiency in interpersonal, interpretive, and presentational communication. Vocabulary, reading, and aural/oral skills. Prerequisite: Placement Test or KORLANG 101.

KORLANG 103. Third-Year Korean, Third Quarter. 4-5 Units.
Continuation of KORLANG 102. Materials about Korean culture and society. Proficiency in interpersonal, interpretive, and presentational communication. Vocabulary, reading, and aural/oral skills. Prerequisite: Placement Test, or KORLANG 102.

KORLANG 130. Reading Korean. 1-2 Unit.
Goal is to advance Korean proficiency through reading in Korean on topics you are interested in. You will read and write journals about the booklets, magazines, articles, periodicals you choose. This reading activity further enhances learner's proficiency and cultural literacy. May be repeated up to 4 times. Prerequisite: placement test or KORLANG 103.

KORLANG 200. Directed Reading in Korean. 1-5 Unit.
Prerequisite: consent of instructor.n (Staff).

KORLANG 211. Fourth-Year Korean, First Quarter. 4 Units.
Continuation of 103. Advanced and intellectual speaking and writing skills. Vocabulary, discussion, and presentation based on readings on topics such as Korean culture, history, economy, politics, multimedia, newspaper articles, and magazines. Prerequisite: 103 or consent of instructor.

KORLANG 212. Fourth-Year Korean, Second Quarter. 4 Units.
Continuation of 211. Advanced and intellectual speaking and writing skills. Vocabulary, discussion, and presentation based on readings on topics such as Korean culture, history, economy, politics, multimedia, newspaper articles, and magazines. Prerequisite: 103 or consent of instructor.

First quarter of a three-quarter beginning sequence. Distance learning combined with periodic on-site instruction, conducted primarily in Cherokee. Course emphasizes developing effective communication at a basic level, covering grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening in everyday situations.nCherokee culture.

SPECLANG 100B. First-Year Cherokee, Second Quarter. 4 Units.
Continuation of SPECLANG 100A. Distance learning combined with periodic on-site instruction, conducted primarily in Cherokee. Course emphasizes continued development of effective communication at a basic level, covering grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening in everyday situations. Cherokee culture. Prerequisite: SPECLANG100A or placement test.

SPECLANG 100C. First-Year Cherokee, Third Quarter. 4 Units.
Continuation of SPECLANG 100B. Distance learning combined with periodic on-site instruction, conducted primarily in Cherokee. Course emphasizes developing effective communication at a basic level, covering grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening in everyday situations. Cherokee culture. Prerequisite: SPECLANG 100B or consent of instructor. Completion of 100C fulfills the University language requirement.

SPECLANG 101A. First-Year Nahuatl, First Quarter. 4 Units.
First quarter of a three-quarter beginning sequence. Distance learning combined with periodic on-site instruction, conducted primarily in Nahuatl. Course emphasizes developing effective communication at a basic level, covering grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening in everyday situations. Nahuatl culture.Some knowledge of Spanish is useful.

SPECLANG 101B. First-Year Nahuatl, Second Quarter. 4 Units.
Continuation of SPECLANG101A. Distance learning combined with periodic on-site instruction,conducted primarily in Nahuatl. Course emphasizes continued development of effective communication at a basic level, covering grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening in everyday situations. Nahuatl culture. Some knowledge of Spanish is useful. Prerequisite: SPECLANG101 A or placement test.

SPECLANG 101C. First-Year Nahuatl, Third Quarter. 4 Units.
Continuation of SPECLANG 101B. Distance learning combined with periodic on-site instruction, conducted primarily in Nahuatl. Course emphasizes continued development of effective communication at a basic level, covering grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening in everyday situations. Nahuatl culture. Some knowledge of Spanish is useful. Prerequisite: SPECLANG101B or placement test.Completion of 101C fulfills the University Foreign Language Requirement.

SPECLANG 102A. Second-Year Nahuatl. 4 Units.
Distance learning combined with periodic on-site instruction, conducted primarily in Nahuatl. Continuation of SPECLANG 101 sequence integrating language and culture, with emphasis on developing proficiency in oral and written discourse. Targeted functional abilities include socio culturally appropriate language in formal contexts. Prerequisite: Placement Test, SPECLANG101 A,B,C.

SPECLANG 102B. Second -Year Nahuatl, Second quarter. 4 Units.
Distance learning combined with periodic on-site instruction, conducted primarily in Najuatl. Continuation of SPECLANG102A sequence integrating language and culture, with emphasis on developing proficiency in oral and written discourse. Targeted functional abilities include presentational and socio culturally appropriate language in formal and informal contexts. Prerequisite: Placement Test or SPECLANG102A.

SPECLANG 102C. Second Year Nahuatl, Third Quarter. 4 Units.
Distance learning combined with periodic on-site instruction, conducted primarily in Nahuatl. Continuation of SPECLANG102B sequence integrating language and culture, with emphasis on developing proficiency in oral and written discourse. Targeted functional abilities include presentational and socio culturally appropriate language in formal and informal contexts. Prerequisite: Placement Test, SPECLANG102B.

SPECLANG 103A. Third- year Nahuatl- First Quarter. 4 Units.
Distance learning combined with periodic on-site instruction, conducted in Najuatl.Course focuses on developing advanced proficiency in oral and written Nahuatl. Emphasis on functional abilities that integrate language and culture in formal, informal, academic and professional contexts. Prerequisite- Placement test or Speclang 102C.

SPECLANG 103B. Third- Year Nahuatl, Second Quarter. 4 Units.
Distance learning combined with periodic on-site instruction, conducted in Najuatl.nCourse focuses on developing advanced proficiency in oral and written Nahuatl. Emphasis on functional abilities that integrate language and culture in formal, informal, academic and professional contexts.

SPECLANG 103C. Third- Year Nahuatl,Third Quarter. 4 Units.
Distance learning combined with periodic on-site instruction, conducted in Najuatl.nCourse focuses on developing advanced proficiency in oral and written Nahuatl. Emphasis on functional abilities that integrate language and culture in formal, informal, academic and professional contexts.

SPECLANG 107. Reading Sanskrit. 2-4 Units.
Focus of this class is the practice of reading Sanskrit. Different texts are read each term, selected largely to fit the needs and interests of the students. Knowledge of Sanskrit grammar required. This course does not fulfill the University Language Requirement. Repeatable for credit up to 12 units.

SPECLANG 108A. Second-Year Cherokee, First Quarter. 4 Units.
The course is the first in a three-quarter sequence of second-year language courses. It focuses on communicating in the language while students are developing more advanced skills in describing, narrating in all time frames, making comparisons and expressing opinions. The course uses written and oral materials within informal and formal contexts and emphasizes a deeper understanding of the Cherokee culture. Prerequisite: First Year Cherokee sequence or recent placement test.

SPECLANG 108B. Second Year Cherokee,Second Quarter. 4 Units.
The course is the second in a three-quarter sequence of second-year language courses. It focuses on communicating in the language while students are developing more advanced skills in describing, narrating in all time frames, making comparisons and expressing opinions. The course uses written and oral materials within informal and formal contexts and emphasizes a deeper understanding of the Cherokee culture. Prerequisite: Speclang 108A or recent placement test.

SPECLANG 108C. Second Year Cherokee, Third Quarter. 4 Units.
The course is the third in a three-quarter sequence of second-year language courses. It focuses on communicating in the language while students are further developing more advanced skills in describing, narrating in all time frames, making comparisons and expressing opinions. The course uses written and oral materials within informal and formal contexts and emphasizes a deeper understanding of the Cherokee culture. Prerequisite: Speclang 108B or recent placement test.

This is the second course in a three-quarter sequence of first year language courses. It focuses on further introducing Khmer in the context of formal and informal communication. The course content centers on topics of daily life activities and emphasizes descriptions of self and community, short narratives, expression of feelings and simple questions and answers. Khmer culture is an essential part of the course. Prerequisite: SPECLANG 125A or a placement test.

SPECLANG 125C. First-Year Khmer,Third Quarter. 4 Units.
This is the third course in a three-quarter sequence of first year language courses. It focuses on further introducing Khmer in the context of formal and informal communication. The course content centers on topics of daily life activities and emphasizes descriptions of self and community, short narratives, expression of feelings and simple questions and answers. Khmer culture is an essential part of the course.nPrerequisite: SPECLANG 125B or a placement test.nThe completion of this course fulfills the University language requirement.

SPECLANG 126A. First-Year Dutch, First Quarter. 4 Units.
This is the first year first quarter course in a three quarter sequence. Speaking, reading, writing, and listening. Authentic materials. Interactive approach with emphasis varying according to student goals. The cultural context in which Dutch is spoken.

SPECLANG 126B. First-Year Dutch, Second Quarter. 4 Units.
This is the first year second quarter course in a three quarter sequence. Expansion on Speaking, reading, writing, and listening. Authentic materials. Interactive approach with emphasis varying according to student goals. The cultural context in which Dutch is spoken.Prerequisite: SPECLANG126A.

SPECLANG 126C. First-Year Dutch,Third Quarter. 4 Units.
This is the first year third quarter in a three quarter sequence. Further expansion on speaking, reading, writing, and listening skills Authentic materials. Interactive approach with emphasis varying according to student goals. Cultural context in which Dutch is spoken.Prerequisite SPECLANG 126B or placement test.

SPECLANG 128A. Second-Year Dutch. 4 Units.
Second Year first quarter Dutch is the first course in a three quarter sequence. The course integrates language and culture with an emphasis on developing proficiency in oral and written discourse. Targeted functional abilities include presentational and socio-culturally appropriate language in formal and informal contexts. Prerequisisite: Speclang 126C or a placement test.

SPECLANG 128B. Second-Year Dutch, Second Quarter. 4 Units.
Second Year second quarter Dutch is the second course in a three quarter sequence. The course integrates language and culture with an emphasis on further developing proficiency in oral and written discourse. Targeted functional abilities include presentational and socio-culturally appropriate language in formal and informal contexts. Prerequisisite: Speclang128B or placement test.

SPECLANG 128C. Second-Year Dutch,Third Quarter. 4 Units.
Second Year third quarter Dutch is the third course in a three quarter sequence. The course integrates language and culture with an emphasis on further developing proficiency in oral and written discourse. Targeted functional abilities include presentational and socio-culturally appropriate language in formal and informal contexts. Prerequisisite: 128B or placement test.

SPECLANG 129A. First-Year Ukrainian, First Quarter. 4 Units.
This is the first year first quarter course in a three quarter sequence. Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Ukrainian culture.

SPECLANG 129B. First-Year Ukrainian, Second Quarter. 4 Units.
This is the first year second quarter course in a three quarter sequence. Expansion on Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Ukrainian culture. Prerequisite SPECLANG129A or placement test.

SPECLANG 129C. First-Year Ukrainian, Third Quarter. 4 Units.
Continuation of SPECLANG 129B. Prerequisite: SPECLANG 129B. Completion of this course fulfills the language requiremet.

SPECLANG 130A. Second-Year Ukrainian, First Quarter. 4 Units.
Second Year first quarter Ukrainianis the first course in a three quarter sequence. The course integrates language and culture with an emphasis on developing proficiency in oral and written discourse. Targeted functional abilities include presentational and socio-culturally appropriate language in formal and informal contexts. Prerequisite: Speclang 129C or placement test.

SPECLANG 130B. Second-Year Ukrainian, Second Quarter. 4 Units.
Second Year Second Quarter Ukrainian is the second course in a three quarter sequence. The course integrates language and culture with an emphasis on further developing proficiency in oral and written discourse. Targeted functional abilities include presentational and socio-culturally appropriate language in formal and informal contexts.nPrerequisite SPECLANG130A or placement test.

SPECLANG 130C. Second-Year Ukrainian, Third Quarter. 4 Units.
Second Year Third Quarter Ukrainian is the second course in a three quarter sequence. The course integrates language and culture with an emphasis on further developing proficiency in oral and written discourse. Targeted functional abilities include presentational and socio-culturally. appropriate language in formal and informal contexts. Prerequisite SPECLANG130B or placement test.

SPECLANG 131A. Third-Year Ukrainian, First Quarter. 4 Units.
Continuation of SPECLANG 130C. Prerequisite: SPECLANG 130C.

SPECLANG 132A. First-Year Slovenian, First Quarter. 4 Units.
First quarter of the first year, in a three-quarter sequence. Students learn to use basic vocabulary, grammatical structures, and sentence patterns through speaking, reading, writing, and listening. Introduction to Slovenia and its cultures.

SPECLANG 132B. First-Year Slovenian, Second Quarter. 4 Units.

SPECLANG 186B. First-Year Serbo-Croatian, Second Quarter. 4 Units.
Continuation of SPECLANG 186A. Prerequisite: SPECLANG 186A.

SPECLANG 186C. First-Year Serbo-Croatian, Third Quarter. 4 Units.
Continuation of SPECLANG 186B. Prerequisite: SPELANG 186B.

SPECLANG 188B. Third-Year Serbo-Croatian, Second Quarter. 4 Units.
Continuation of SPECLANG 188A. Prerequisite: SPECLANG 188A.

SPECLANG 189A. First-Year Hawaiian, First Quarter. 4 Units.
First Year first quarter Hawaiian is the first course in a three quarter sequence. Focus on speaking writing and listening while developing students communicative skills in Hawaiian. Interactive approach emphasizing the ability to express concepts related to daily activities within traditional Hawaiian cultural contexts.

SPECLANG 189B. First-Year Beginning Hawaiian, Second Quarter. 4 Units.
Continuation of SPECLANG 189A.First Year Second Quarter Hawaiian is the second course in a three quarter sequence. Focus on speaking writing and listening while further developing students communicative skills in Hawaiian. Interactive approach emphasizing the ability to express concepts related to daily activities within traditional Hawaiian cultural contexts. Prerequisite SPECLANG 189A or placement test.

SPECLANG 189C. First-Year Hawaiian, Third Quarter. 4 Units.
Continuation of SPECLANG 189B. First Year Third Quarter Hawaiian is the third course in a three quarter sequence. Focus on speaking writing and listening while further developing students communicative skills in Hawaiian. Interactive approach emphasizing the ability to express concepts related to daily activities within traditional Hawaiian cultural contexts.Prerequisite SPECLANG 189B or placement testn Fulfills the University Foreign Language Requirement.

SPECLANG 190A. Second-Year Hawaiian, First Quarter. 4 Units.
Continuation of SPECLANG 189C. nThe course is the first in a three-quarter sequence of second-year language courses. It focuses on communicating in the language while students are developing more advanced skills in describing, narrating in all time frames, making comparisons and expressing opinions. The course uses written and oral materials within informal and formal contexts and emphasizes a deeper understanding of the Hawaiian culture. Prerequisite: First Year Hawaiian sequence or placement test.

SPECLANG 190B. Second-Year Hawaiian, Second Quarter. 4 Units.
Continuation of SPECLANG 190A. The course is the second in a three-quarter sequence of second-year language courses. It focuses on communicating in the language while students are further developing more advanced skills in describing, narrating in all time frames, making comparisons and expressing opinions. The course uses written and oral materials within informal and formal contexts and emphasizes a deeper understanding of the Hawaiian culture. Prerequisite: First Year Hawaiian sequence or recent placement test.

SPECLANG 190C. Second-Year Hawaiian, Third Quarter. 4 Units.
Continuation of SPECLANG 190B. nThe course is the third in a three-quarter sequence of second-year language courses. It focuses on communicating in the language while students are further developing more advanced skills in describing, narrating in all time frames, making comparisons and expressing opinions. The course uses written and oral materials within informal and formal contexts and emphasizes a deeper understanding of the Hawaiian culture. Prerequisite: First Year Hawaiian sequence or placement test.

SPECLANG 192A. First-Year Kazakh, First Quarter. 4 Units.
First Year Kazakh First Quarter is the first course in a three quarter sequence.Focus on speaking writing and listening while developing students communicative skills in Kazakh. Interactive approach emphasizing the ability to express concepts related to daily activities within traditional Kazakh cultural contexts.

SPECLANG 192B. First-Year Kazakh, Second Quarter. 4 Units.
Continuation of SPECLANG 192A. nFirst Year Kazakh Second Quarter is the second course in a three quarter sequence.Focus on speaking writing and listening while developing students communicative skills in Kazakh. Interactive approach emphasizing the ability to express concepts related to daily activities within traditional Kazakh cultural contexts.Prerequisite: SPECLANG 192A or placement test.nnnPrerequisite: SPECLANG 192A.

SPECLANG 192C. First-Year Kazakh, Third Quarter. 4 Units.
Continuation of SPECLANG 192B. First Year Kazakh Third Quarter is the third course in a three quarter sequence. Focus on speaking writing and listening while further developing students communicative skills in Kazakh. Interactive approach emphasizing the ability to express concepts related to daily activities within traditional Kazakh cultural contexts.Prerequisite SPECLANG 192B or placement test.

SPECLANG 193A. Second-Year Kazakh, First Quarter. 4 Units.
Continuation of SPECLANG 192C. Second Year first quarter Kazakh is the first course in a three quarter sequence. The course integrates language and culture with an emphasis on developing proficiency in oral and written discourse. Targeted functional abilities include presentational and socio-culturally appropriate language in formal and informal contexts. Prerequisite: SPECLANG192C or placement test.

SPECLANG 193B. Second-Year Kazakh, Second Quarter. 4 Units.
Continuation of SPECLANG 193A. Second Year second quarter Kazakh is the second course in a three quarter sequence. The course integrates language and culture with an emphasis on developing proficiency in oral and written discourse. Targeted functional abilities include presentational and socio-culturally appropriate language in formal and informal contexts. Prerequisite: SPECLANG 193A or placement test.

SPECLANG 193C. Second-Year Kazakh, Third Quarter. 4 Units.
Continuation of SPECLANG 193B. Second Year Third quarter Kazak his the third course in a three quarter sequence. The course integrates language and culture with an emphasis on developing proficiency in oral and written discourse. Targeted functional abilities include presentational and socio-culturally appropriate language in formal and informal contexts. Prerequisite SPECLANG193B or placement test.

SPECLANG 194A. Third-Year Kazakh, First Quarter. 4 Units.
Continuation of SPECLANG 193C. Prerequisite: SPECLANG 193C.

SPECLANG 194B. Third-Year Kazakh, Second Quarter. 3 Units.
Continuation of SPECLANG 194A. Prerequisite SPECLANG 194A.

SPECLANG 194C. Third-Year Kazakh, Third Quarter. 3 Units.
Continuation of SPECLANG 194B. Prerequisite: SPECLANG 194B.

SPECLANG 198A. Second Year K'iche', 1st quarter. 4 Units.
This is a the first quarter of a second year course in K'iche' taught as a sequence, in three quarters. It uses an eclectic pedagogical approach to help students master and expand vocabulary necessary for their conversational activities and for developing all four language skills: reading, writing, speaking, and listening. The textbook is supplemented by audiovisual materials and authentic readings.

SPECLANG 198B. Second Year K'iche', 2nd quarter. 4 Units.
This is a the second quarter of a second year course in K'iche' taught as a sequence, in three quarters. It uses an eclectic pedagogical approach to help students master and expand vocabulary necessary for their conversational activities and for developing all four language skills: reading, writing, speaking, and listening. The textbook is supplemented by audiovisual materials and authentic readings.

SPECLANG 198Q. Modern Greece in Film and Literature. 3-5 Units.
Preference to sophomores. Cultural and literary highlights. Filmmakers include Kakoyannis, Dassen, Boulmetis, Angelopoulos, and Scorsese; readings from Eugenides, Gage, Kavafis, Kazantzakis, Samarakis, Seferis, and Elytis.

SPECLANG 199A. Third Year K'iche, First Quarter. 4 Units.
This is a long distance course. It is designed to develop reading competence in K'iche'. Focus on advanced level in reading K'iche' authentic materials pertinent to history, literature and culture. Emphasis is on vocabulary building, reading comprehension, and translation. Previous knowledge of the language is required.

SPECLANG 199B. Third Year K'iche'. 4 Units.
This is a long distance course. It is designed to develop reading competence in K'iche'. Focus on advanced level in reading K'iche' authentic materials pertinent to history, literature and culture. Emphasis is on vocabulary building, reading comprehension, and translation. Previous knowledge of the language is required.

SPECLANG 199C. Third Year K'iche', Third Quarter. 4 Units.
This is a long distance course. It is designed to develop reading competence in K'iche'. Focus on advanced level in reading K'iche' authentic materials pertinent to history, literature and culture. Emphasis is on vocabulary building, reading comprehension, and translation. Previous knowledge of the language is required.

SPECLANG 215. Modern Greek for Heritage Learners. 3-4 Units.
The course is designed with focus on advancing communication skills and proficiency while building on previous linguistic and cultural knowledge. Emphasis is given on current events and topics of general interest, from personal to social and professional. Students work individually and collaboratively to communicate in oral as well as written form by using authentic texts, films and web based audiovisual materials. Instructor's consent required.

SPECLANG 215A. Modern Greek for Heritage Language Learners, First Quarter. 2-4 Units.
The first course in the three quarter sequence for Modern Greek Heritage Learners focuses on advancing communication skills and proficiency while building on previous linguistic and cultural knowledge. Emphasis on current events and topics of general interest, from personal to social and professional. Students work individually and collaboratively to communicate in oral as well as written forms by using authentic texts, films and web based audiovisual materials. Prerequisite Placement test.

SPECLANG 215B. Modern Greek for Heritage Language Learners, Second Quarter. 2-4 Units.
The second course in the three quarter sequence for Modern Greek Heritage Learners focuses on advancing communication skills and proficiency while building on previous linguistic and cultural knowledge. Emphasis on current events and topics of general interest, from personal to social and professional. Students work individually and collaboratively to communicate in oral as well as written forms by using authentic texts, films and web based audiovisual materials. Prerequisite SPECLANG 215A or Placement test.

SPECLANG 215C. Modern Greek for Heritage Language Learners, Third Quarter. 2-4 Units.
Continuation of SPECLANG 215B. The third course in the sequence for Modern Greek Heritage Learners focuses on advancing communication skills and proficiency while building on previous linguistic and cultural knowledge. Emphasis on current events and topics of general interest, from personal to social and professional. Students work individually and collaboratively to communicate in oral as well as written forms by using authentic texts, films and web based audiovisual materials. Prerequisite: SPECLANG 215B or Placement test nnnnPrerequisite: SPECLANG 215A.

SPECLANG 218A. Beginning Urdu, First Quarter. 5 Units.
First Year Urdu will introduce students to the Urdu alphabet (Nastaliq script); to pronunciation and intonation; to basic conversation patterns; and to the elements of spelling, reading, and writing in Urdu. It will cover basic grammar of modern standard Urdu. As part of this course, students will learn popular Urdu songs, watch films and video clips, and become familiar with culture of Urdu speaking people. They will also have exciting opportunities to make their own audio and video recordings to improve their pronunciation, work with Web-based and multi-media materials, and to go on one or more field trips. By the end of year, students will have acquired a basic vocabulary of 800-1000 words, and will be able to generate and interpret several types of simple sentences in simple conversation as well as write in a variety of communication contexts.

SPECLANG 218B. Beginning Urdu, Second Quarter. 4 Units.
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Urdu culture.

SPECLANG 218C. Beginning Urdu, Third Quarter. 4 Units.
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Urdu culture.

SPECLANG 219A. Intermediate Urdu, First Quarter. 4 Units.
.

SPECLANG 219B. Intermediate Urdu, Second Quarter. 4 Units.
(Staff).

SPECLANG 224A. Third-Year Vietnamese, First Quarter. 4 Units.
Third Year First Quarter Vietnamese is the first course in a three quarter sequence. Focus of the course is on developing communication and presentation skills in Vietnamese using a variety of topics and different contexts. Authentic audio visual material and use of level appropriate pedagogy tools enhance functional linguistic abilities. Culture is an essential part of the course. Prerequisite 151C or placement test.

SPECLANG 224B. Third-Year Vietnamese, Second Quarter. 4 Units.
Continuation of SPECLANG 224A. Third Year Second Quarter Vietnamese is the second course in a three quarter sequence. Focus of the course is on developing communication and presentation skills in Vietnamese using a variety of topics and different contexts. Authentic audio visual material and use of level appropriate pedagogy tools further enhance functional linguistic abilities. Culture is an essential part of the course. Prerequisite224A or placement testnnnPrerequisite: SPECLANG 224A or consent of instructor.

SPECLANG 224C. Third-Year Vietnamese, Third Quarter. 4 Units.
Continuation of SPECLANG 224B. Third Year Third Quarter Vietnamese is the third course in a three quarter sequence. Focus of the course is on developing communication and presentation skills in Vietnamese using a variety of topics and different contexts. Authentic audio-visual material and use of level appropriate pedagogy tools further enhance functional linguistic abilities. Culture is an essential part of the course. Prerequisite: 224B or placement test.

SPECLANG 226A. Second Year Khmer, First Quarter. 4 Units.
Second Year Khmer is intended for students who can already speak Khmer at a "survival" level (discuss topics such as home, family, food, traveling, work, health) and have basic knowledge of the writing system (able to read short narratives, simple folk tales; and write letters and other types of information based on personal experience). In this course, the first of a three-quarter sequence, students will learn to discuss topics such as Khmer Buddhism, proverbs, and news media using more formal language and educated vocabulary. They will also learn to read (and write about) increasingly sophisticated texts including folk tales and newspaper articles. Prerequisite: SPECLANG 125C or a placement test.

SPECLANG 226B. Second Year Khmer, Second Quarter. 4 Units.
SPECLANG 226B Second Year second quarter Khmer is the second course in a three quarter sequence. We'll focus on a spoken and written overview of Khmer history, with the goal of participating in discussions of history with educated native speakers. Students will also begin to read a Khmer novel, and design and research an independent study project. Prerequisite: Second year first quarter Khmer or placement test.

SPECLANG 226C. Second Year Khmer, Third Quarter. 4 Units.
Second Year third quarter Khmer is the final course in a three quarter sequence. Students will finish reading and discussing a Khmer novel, be introduced to traditional Khmer poetry, and finish the independent study project begun in Winter quarter, including making an oral presentation of their research in Khmer. Emphasis will be on formal grammar and vocabulary in both spoken and written applications. Prerequisite: Second year second quarter Khmer. No new students will normally be allowed to join the course this quarter.

SPECLANG 229A. Beginning Pashto, First Quarter. 5 Units.
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Pashto culture.

SPECLANG 229B. Beginning Pashto, Second Quarter. 5 Units.
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Pashto culture.

SPECLANG 230A. Intermediate Pashto, First Quarter. 4 Units.
.

SPECLANG 233C. Second-Year Slovenian, third Quarter. 4 Units.
.

SPECLANG 239A. Second-Year Uzbek, First Quarter. 3 Units. Continuation of SPECLANG 238C. Prerequisite: SPECLANG 228C or consent of instructor. Fulfills the University Foreign Language Requirement.

SPECLANG 239B. Second-Year Uzbek, Second Quarter. 3 Units. Continuation of SPECLANG 239A. Prerequisite: SPECLANG 239A or consent of instructor.

SPECLANG 239C. Second-Year Uzbek, Third Quarter. 3 Units. Continuation of SPECLANG 239B. Prereauisite: SPECLANG 239B or consent of instructor.

SPECLANG 240A. Third-Year Uzbek, First quarter. 3 Units. Continuation of SPECLANG 239C. Prerequisite; SPECLANG 239C or consent of instructor.

SPECLANG 247A. First-Year Lakota, First Quarter. 4 Units. First Year Lakota First Quarter is the first course in a three quarter sequence. Focus on speaking writing and listening while developing communicative skills in Lakota.Interactive approach emphasizing the ability to express concepts related to daily activities within traditional Lakota cultural contexts.

SPECLANG 247B. First-Year Lakota, Second Quarter. 4 Units. Continuation of SPECLANG 247A. First Year Lakota Second Quarter is the second course in a three quarter sequence. Focus on speaking writing and listening while further developing communicative skills in Lakota Interactive approach emphasizing the ability to express concepts related to daily activities within traditional. Prerequisite SPECLANG247A or placement test.

SPECLANG 247C. First-Year Lakota, Third Quarter. 4 Units. Continuation of SPECLANG 247B. First Year Lakota Third Quarter is the third course in a three quarter sequence.Focus on speaking writing and listening while further developing communicative skills in Lakota Interactive approach emphasizing the ability to express concepts related to daily activities within traditional. Prerequisite: SPECLANG 247B or placement test.nFulfills the University Foreign Language Requirement.

SPECLANG 248A. Second-Year Lakota, First Quarter. 4 Units. Continuation of 247 ABC. Focus on speaking writing and listening while developing students' communicative skills in Lakota. Interactive approach emphasizing the ability to express concepts on a variety of social and cultural topics within traditional Lakota cultural contexts. Prerequisite: SPECLANG 247C or placement test.

SPECLANG 248B. Second-Year Lakota. 4 Units. prerequisite-speclang 248A Focus on speaking writing and listening while developing students communicative skills in Lakota. Interactive approach emphasizing the ability to express concepts on a variety of social and cultural topics within traditional Lakota cultural contexts.nPrerequisite: SPECLANG 248A or placement test.

SPECLANG 248C. Second-Year Lakota, third Quarter. 4 Units. Continuation of 248B. Focus on displaying an increased ability in reinforcing and expanding the scope of communication in Lakota, including all skills. Emphasis on engagement in a wide range of context-specific and culturally appropriate interactions in Lakota. Prerequisite: SPECLANG 248B or placement test.

SPECLANG 250A. First-Year Romanian, First Quarter. 4 Units. First Year Romanian First Quarter is the first course in a three quarter sequence. Focus on introducing Romanian in the context of formal and informal communication. Emphasis on topics of daily life activities and descriptions of self and community, short narratives, expression of feelings and simple questions and answers. Romanian culture is an essential part of the course.

SPECLANG 250B. First-Year Romanian, Second Quarter. 4 Units. Continuation of SPECLANG 250A. First Year Romanian Second Quarter is the second course in a three quarter sequence Focus on further introducing Romanian in the context of formal and informal communication. Emphasis on topics of daily life activities and descriptions of self and community, short narratives, expression of feelings and simple questions and answers. Romanian culture is an essential part of the course.Prerequisite: SPECLANG 250A or placement test.

SPECLANG 250C. First-Year Romanian, Third Quarter. 4 Units. Continuation of SPECLANG 250B. First Year Romanian Third Quarter is the third course in a three quarter sequence. Focus on further introducing Romanian in the context of formal and informal communication. Emphasis on topics of daily life activities and descriptions of self and community, short narratives,expression of feelings and simple questions and answers. Romanian culture is an essential part of the course.Prerequisite SPECLANG 250B or placement test. Completion of this course fulfills the University Language Requirement.

SPECLANG 251A. Second-Year Romanian, First Quarter. 3 Units. Continuation of SPECLANG 250C. Prerequisite: SPECLANG 250C or consent of instructor. Fulfills the University Foreign Language Requirement.

SPECLANG 251B. Second-Year Romanian, Second Quarter. 3 Units. Continuation of SPECLANG 251A. Prerequisite: SPECLANG 251A or consent of instructor.

SPECLANG 251C. Second-Year Romanian, Third Quarter. 3 Units. Continuation of SPECLANTG 251B. Prerequisite: SPECLANG 251B or consent of instructor.

SPECLANG 252A. Third-Year Romanian, First Quarter. 4 Units. The course focuses on advancing skills of previous years. Emphasis on communication within personal, academic and professional contexts. Students use specific tools that allow for better accuracy and fluency. Topics broaden from the concrete to the abstract while a thematic approach becomes the platform for introducing cultural practices and perspectives. Continuation of SPECLANG 251C. Prerequisite: SPECLANG 251C or consent of instructor.

SPECLANG 252C. Third-Year Romanian, Thrid Quarter. 4 Units. Continuation of SPECLANG 252B. Prerequisite: SPECLANG 252B or consent of instructor.

SPECLANG 254C. Third-Year Hungarian, Third Quarter. 3 Units. Continuation of SPECLANG 254B. Prerequisite: SPECLANG 254B or consent of instructor.

SPECLANG 255A. Fourth-Year Albanian, 1st quarter. 4 Units. Continuation of SPECLANG 106C.

SPECLANG 255B. Fourth-Year Albanian, 2nd quarter. 4 Units. Continuation of SPECLANG 255A.

SPECLANG 255C. Fourth-Year Albanian, 3rd Quarter. 4 Units. Continuation of 255B.

SPECLANG 260A. Third-Year Modern Greek, First Quarter. 4 Units. Third Year Modern Greek First Quarter is the first course in a three quarter sequence. Focus of the course is on developing communication and presentation skills in Modern Greek using a variety of topics and different contexts. Authentic audio-visual material and use of level appropriate pedagogy tools enhance functional linguistic abilities. Culture is an essential part of the course. Prerequisite: SPECLANG 171C or placement test.

SPECLANG 260B. Third-Year Modern Greek, Second Quarter. 4 Units.
Third Year Modern Greek Second Quarter is the second course in a three quarter sequence.Focus of the course is on developing more advanced communication and presentation skills in Modern Greek using a variety of topics and different contexts. Authentic audio-visual material and use of level appropriate pedagogy tools enhance functional linguistic abilities. Culture is an essential part of the course. Prerequisite 260Aor placement test.

SPECLANG 260C. Third-Year Modern Greek, Third Quarter. 4 Units.
Third Year Modern Greek Third Quarter is the third course in a three quarter sequence. Focus of the course is on developing more advanced communication and presentation skills in Modern Greek using a variety of topics and different contexts. Authentic audio-visual material and use of level appropriate pedagogy tools enhance functional linguistic abilities. Culture is an essential part of the course. Prerequisite 260B or placement test.

SPECLANG 264A. Advanced Czech Conversation, First Quarter. 1-4 Unit.
Repeatable once for credit.

SPECLANG 265A. Third-Year Hungarian, First Quarter. 3 Units.
Continuation of SPECLANG 182C. Prerequisite completion of SPECLANG 182C or consent of instructor.

SPECLANG 265B. Third-Year Hungarian, Second Quarter. 4 Units.
Continuation of SPECLANG 265A. Prerequisite completion of SPECLANG 265A or consent of instructor.

SPECLANG 265C. Third-Year Hungarian, Third Quarter. 4 Units.
Continuation of SPECLANG 265B. Prerequisite completion of SPECLANG 265B or consent of instructor.

SPECLANG 273. Reading in Hungarian. 4 Units.
The purpose of the class is to deepen students' reading abilities of a variety of original Hungarian text for research purposes. Prerequisite: completing the three years Hungarian language sequence or proving equivalent knowledge based on language testing.

SPECLANG 275A. Third-Year Quechua, First Quarter. 4 Units.
This is a third year first quarter course in Quechua language and culture, offered as a three quarter sequence. The course focuses on developing fluency and accuracy as students immerse in the use of the language in a range of situations. The course uses a thematic approach. Topics integrate elements of Quechua culture, review of relevant grammar concepts, and opportunities to use the language in real-world cultural contexts.

SPECLANG 275B. Third-Year Quechua. 4 Units.
This is a third year course in Quechua language and culture, offered as a three quarter sequence. The course focuses on developing fluency and accuracy as students gain practice in the use of the language in a range of situations. The course uses a thematic approach. Topics integrate elements of Quechua culture, review of relevant grammar concepts, and opportunities to use the language in real-world cultural contexts.

SPECLANG 275C. Third-Year Quechua, Third Quarter. 4 Units.
This is a third year course in Quechua language and culture, offered as a three quarter sequence. The course focuses on developing fluency and accuracy as students gain practice in the use of the language in a range of situations. The course uses a thematic approach. Topics integrate elements of Quechua culture, review of relevant grammar concepts, and opportunities to use the language in real-world cultural contexts.

SPECLANG 297. Directed Reading. 1-5 Unit.
Prerequisite: consent of instructor.- For Grad students only.

SPECLANG 395. Graduate Studies in Special Language. 1-5 Unit.
Prerequisite: consent of instructor.

Tibetan Language Courses

TIBETLNG 1. First-Year Tibetan, First Quarter. 4 Units.
Grammar, reading, and composition. Tibetan culture and the Tibetan view of reality.

TIBETLNG 2. First Year Tibetan, Second Quarter. 4 Units.
Continuation of 1.

TIBETLNG 3. First Year Tibetan, Third Quarter. 4 Units.
Continuation of 2. Fulfills the University Foreign Language Requirement.

TIBETLNG 11. Second Year - First-Quarter. 4 Units.
Continuation of 3.

TIBETLNG 12. Second Year Tibetan, Second-Quarter. 4 Units.
Continuation of 11.

TIBETLNG 13. Intermediate Tibetan, Third-Quarter. 4 Units.
Continuation of 12.

TIBETLNG 21. Intermediate/Advanced Tibetan, First Quarter. 4 Units.
.

TIBETLNG 23. Intermediate/Advance Tibetan, Third Quarter. 4 Units.
.

TIBETLNG 199. Individual Work. 1-5 Unit.
May be repeated for credit. Prerequisite: consent of instructor.

TIBETLNG 395. Graduate Studies in Tibetan. 1-5 Unit.
May be repeated for credit. Prerequisite: consent of instructor.

LATIN AMERICAN STUDIES

Courses offered by the Interdisciplinary Program in Latin American Studies are listed under the subject code LATINAM on the Stanford Bulletin's ExploreCourses web site (https://explorecourses.stanford.edu).

The Center for Latin American Studies (CLAS) supports research and teaching in all fields of study as they relate to Latin America. Academic programs encourage interdisciplinary approaches and draw on the expertise of nearly sixty active affiliated faculty members representing Stanford's various schools and departments. Stanford University Libraries' substantial Latin American collections are valuable resources for students, faculty, and visiting researchers alike. Each year CLAS hosts a number of Tinker Visiting Professors, highly distinguished Latin American and Iberian scholars who come to Stanford to teach a course in their field of specialization. The Center for Latin American Studies maintains a highly active public events calendar and provides funding to students and faculty for a variety of research, teaching, internship, and conference activities. The Center is a U.S. Department of Education Title VI National Resource Center for Latin America.

The program offers two academic programs in Latin American Studies: an undergraduate minor and a master of arts degree.

Undergraduate Programs in Latin American Studies

Stanford Global Studies offers a minor with a Latin American Studies Specialization. Although there is no undergraduate major in Latin American Studies, students may concentrate on Latin America through other departmental and interdisciplinary degree programs, such as Anthropology (p. 947), History (p. 1549), Political Science (p. 1938), Iberian and Latin American Cultures (p. 1650), or International Relations (p. 1691). Interested students should consult the relevant departmental web sites and sections of this bulletin for further information.

Undergraduates can obtain a coterminal M.A. degree in Latin American Studies while concurrently working on their undergraduate major by applying during the regular admissions cycle no later than their senior year.

Financial Aid

Each summer, CLAS awards grants to a small number of undergraduates to complete internships in Latin America. Applications include a proposal, academic transcript, and letters of recommendation. Students from any department are eligible to apply. See Funding (https://clas.stanford.edu/funding/students/) section in the Center for Latin American Studies (http://las.stanford.edu) website.

Students in undergraduate programs who enroll in Portuguese, Quechua, or Nahuatl language during the academic year may be eligible for Summer Foreign Language and Area Studies (FLAS) (https://clas.stanford.edu/funding/students/stanford-undergraduate-students/flas-fellowships-undergraduate-students/) fellowships. Recipients of FLAS fellowships must be American citizens or permanent residents. For detailed program information and eligibility, see the Center for Latin American Studies (http://las.stanford.edu/) website.

Graduate Programs in Latin American Studies

The one-year master's program in Latin American Studies is designed for students who have experience working, living, or studying in Latin America or Iberia and little prior course work on Latin America.

Stanford University does not offer a Ph.D. program in Latin American Studies; however, doctoral candidates may concentrate on Latin America through other departmental programs, such as Anthropology (p. 947), History (p. 1549), Political Science (p. 1938), or Iberian and Latin American Cultures (p. 1650). Interested applicants should consult the relevant departmental web sites and sections of this bulletin for admissions information and further details.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Latin American Studies and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization. In addition, students acquire methodology tools such as data analysis and management, visualization, and geographic information system (GIS).

Admission

The application deadline for the 2020-21 academic year is December 2, 2020. Applicants submit an online application, including a 2-3 page double-spaced statement of purpose, resumé or CV, 10-15 page double-spaced academic writing sample in English, and three letters of recommendation. In addition, all applicants must submit two sets of official transcripts. The GRE general test scores are optional, and no longer a requirement. TOEFL scores are required of applicants whose first language is not English or who did not earn a degree from an undergraduate institution where English is the primary language of instruction. For information on University graduate admissions and to access the online application, visit the Office of Graduate Admissions (http://gradadmissions.stanford.edu) website.

Applicants must meet the University admission requirements, have a working knowledge of Spanish, Portuguese, or an indigenous language of Latin America (e.g., Quechua or Nahuatl) at the university third-year level or higher, and have experience working, living, or studying in Latin America or Iberia prior to admission.

CLAS takes a broad approach to evaluating applications for admission. As important as grades are the applicant's essay, letters of recommendation, academic writing sample, and the experiences and goals conveyed through the personal statement and resume/CV.

Students interested in pursuing the joint degree program in Latin American Studies and Law (J.D.) or a dual degree in Latin American Studies and Business (M.B.A.) or Medicine (M.D.) must apply to each program separately and be accepted by both. Details about the joint and dual degree programs can be found in the "Master's (p. 1765)" tab in this section.

Financial Aid

The Center for Latin American Studies provides several graduate fellowships as well as limited course assistantships with the Tinker Visiting Professors each quarter. US and international MA in Latin American Studies applicants are encouraged to apply. See Funding (https://clas.stanford.edu/funding/students/) section in the Center for Latin American Studies (http://las.stanford.edu) website.

MA in Latin American Studies applicants who plan to enroll in Portuguese, Quechua, or Nahuatl language and area or international studies courses may be eligible for Academic Year and Summer Foreign Language and Area Studies (FLAS) fellowships, sponsored by the US Department of Education. Recipients of FLAS fellowships must be American citizens or permanent residents. Applicants to the M.A. program who can demonstrate financial need have priority in the FLAS fellowship competition; in recent years CLAS has also awarded FLAS fellowships to students enrolled in the Professional Schools. For detailed program information and eligibility, see Funding (https://clas.stanford.edu/funding/students/) section in the Center for Latin American Studies (http://las.stanford.edu) website.

CLAS awards Working Group grants to graduate students across the University who wish to organize events such as lectures, speaker series, symposia, exchange of working papers, and collaborative research efforts. For detailed program information and eligibility, see Funding (https://clas.stanford.edu/funding/students/) section in the Center for Latin American Studies (http://las.stanford.edu) website.

CLAS has a limited number of awards for graduate students to conduct field research work in Latin America or to present their Latin American related research in a conference. Please see Funding (https://clas.stanford.edu/funding/students/) section in the Center for Latin American Studies (http://las.stanford.edu) website

The Knight-Hennessy Scholars program awards full funding to pursue a graduate education at Stanford to students from all disciplines, with additional opportunities for leadership training and collaboration across fields.

Apply to Knight-Hennessy Scholars (https://knight-hennessy.stanford.edu/admission/apply-now/) by **October 14, 2020 at 1:00 p.m. Pacific Time**, and to the Latin American Studies MA Program by **November 11, 2020 at 11:59 p.m. Pacific Time**.

COVID-19-Related Degree Requirement Changes

For information on how the Global Studies with Latin American Studies Specialization minor requirements have been affected by the pandemic, see the "COVID-19 Policies tab (p. 1520)" in the "Stanford Global Studies" section of this bulletin. For University-wide policy changes related to the pandemic, see the "COVID-19 and Academic Continuity (p. 5)" section of this bulletin.

Minor in Global Studies with Latin American Studies Specialization

The minor in Global Studies, Latin American Studies (LAS) specialization, consists of a core set of courses surveying the history, politics, society, ecology, and culture of the Latin American region; advanced language training; and in-depth course work.

Students from any major interested in applying for admission to the minor in Global Studies, Latin American Studies (LAS) specialization, should consult Stanford Global Studies and the Center for Latin American Studies (CLAS (https://clas.stanford.edu/academics/undergraduate-minor/)). Students who wish to complete the minor must declare online (through Axess (http://axess.stanford.edu)) and submit a proposal of course work no later than the second quarter of the junior year. The minor must be completed by the second quarter of the senior year. Units taken for a student's major cannot be double-counted towards the minor.

Students consult with their minor adviser to develop individual programs. The minor is especially well-suited for undergraduates who plan to make service, research, or study abroad in Latin America a part of their Stanford experience.

The Global Studies Minor with Specialization in Latin American Studies is open to students in any major.

Upon completion of all requirements, final certification of the minor is made by the Center for Latin American Studies subcommittee on undergraduate programs. The minor and the specialization appear on the transcript but they do not appear on the diploma.

Declaring the Global Studies Minor with Latin American Studies Specialization

To declare the Global Studies minor with Latin American Studies specialization, students must:

1. Set up an appointment with the CLAS associate director to discuss your academic plan.
2. Declare the Global Studies minor and subplan in Axess (http://axess.stanford.edu).

Requirements

1. Students may not double-count courses for completing major and minor requirements. Completion of 28 units as follows:
   a. GLOBAL 101 Critical Issues in Global Affairs (3 units)
   b. A 5-unit course surveying Latin America, either ILAC 131 Introduction to Latin America: Cultural Perspectives or an approved substitute. For further information contact a CLAS undergraduate adviser at latinamerica@stanford.edu.
   c. 20 additional units in courses which together comprise a coherent focus on a theoretical problem or issue of the region, such as but not limited to
      i. culture and identity
      ii. political economy
      iii. sustainable development.
   d. At least 15 of the 28 units must be completed at Stanford.
   e. All courses to be counted toward the minor must be taken for a letter grade, except where letter grades are not offered.
2. Foreign Language Requirement. The minimum requirement for completion of the minor in Global Studies with Latin American Studies Specialization is advanced proficiency in Spanish or Portuguese by one of the following:
   a. Completion of seven quarters of college-level study of Spanish or Portuguese.
   b. Completion of a course taught in Spanish or Portuguese at the 100-level or higher, with a letter grade of 'B' or higher. This may be a course on Spanish or Portuguese language or literature, or some other subject.
   c. Achievement of the advanced proficiency level on the ACTFL scale in a test administered by the Stanford Language Center. Contact the Stanford Language Center (p. 1722) for test dates and procedures.
3. Students may work with the subplan advisor to develop a capstone project to count towards the unit fulfillment of the minor. Projects may include (but are not limited to):

   1. Research with units through directed reading under the supervision of the subplan advisor.

      - Research may take place at Stanford or during a relevant study abroad program, and options may include regional fieldwork, creative arts projects, short films, etc.

   2. Advanced language study beyond the subplan minimum requirement with units through directed reading under the supervision of the subplan advisor.

      - Intensive language training may take place at Stanford, off-campus, or overseas.

Students may propose other projects related to their subplan.

Course List

For a representative, rather than comprehensive, list of courses that count towards the minor, see the Related Courses (p. 1525) tab in this section of the Bulletin. Other courses may also fulfill the requirements;

students should consult their Latin American Studies minor adviser concerning which courses might fulfill minor requirements.

Master of Arts in Latin American Studies

The Master of Arts in Latin American Studies is an interdisciplinary program. The curriculum consists of a core set of courses surveying the history, politics, society, ecology, and culture of the Latin American region; advanced language training; and in-depth course work. In consultation with a faculty adviser, students select a course of study suited to their individual interests.

Coterminal Master's Degrees in Latin American Studies

Undergraduates at Stanford may apply for admission to the coterminal master's program in Latin American Studies when they have earned a minimum of 120 units toward graduation, including advanced placement and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree.

The application deadline for the 2021-22 academic year is December 2, 2020. Prospective students who are applying to the Knight-Hennessy Scholars program (https://knight-hennessy.stanford.edu/admission/apply-now/) must apply to the scholars program by October 14, 2020 at 1:00 p.m. Pacific Time, and to the Latin American Studies MA Program by November 11, 2020 at 11:59 p.m. Pacific Time.

Coterminal applicants must submit:

- the Coterminal Online Application (https://applyweb.com/stanterm/)
- a 2-3 page double-spaced statement of purpose
- a resumé or CV
- a 10-15 page double-spaced academic writing sample in English
- three letters of recommendation
- a Stanford transcript
- GRE general test scores (optional)

Coterminal applicants must have a minimum cumulative GPA of 3.5 and a working knowledge of Spanish or Portuguese at a university third-year level or higher.

University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 56)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 65)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate advisor be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

Degree Requirements

University requirements for the master's degree are described in the "Graduate Degrees General Requirements (p. 65)" section of this bulletin.

The program requires completion of a minimum of 45 graduate units. Each student is assigned a faculty adviser who works with the student to develop a customized program of study. All courses for the M.A. degree must be at the 100-level or higher, with at least half being at the 200-level or higher.

Candidates to the M.A. in Latin American Studies must complete the following:

		Units
Required Courses		
a. Culture and Society		
HISTORY 371	Graduate Colloquium: Explorations in Latin American History and Historiography (students must register for 5 units)	5
b. Political Economy		
POLISCI 348S	Latin American Politics	5
c. Environment, Ecology, and Sustainability		
HISTORY 378	The Historical Ecology of Latin America	5
Seminar Requirement: once per quarter.		**3**
LATINAM 200	Seminar on Contemporary Issues in Latin American Studies	
Total Units		18

1. Core courses (15 units): one core 5-unit course in each of three fields of specialization: Culture and Society; Political Economy; and Environment, Ecology, and Sustainability. See above for courses offered this year.
2. *Related courses (15 units):* three courses (5 units each) from the fields of specialization listed in '1' above. For approved courses, see the "Related Courses (p. 1767)" tab in this section.
3. *Elective courses (9-15 units):* three elective courses (3-5 units each) from across the University's offerings, selected with guidance and approval from the faculty adviser.
4. *Language requirement:* at least 3 units of course work on a second Latin American language. Students proficient in both Spanish and Portuguese might take either an advanced fourth-year language course in either Spanish or Portuguese or a first-year indigenous language of Latin America (i.e. Quechua or Nahuatl); students proficient in only Spanish or only Portuguese must take a basic course in a second Latin American spoken language in which they are not already proficient. Up to 6 units of foreign language coursework may be applied toward the M.A. degree. All foreign language coursework must be taken at the 100-level or higher. English as a Foreign Language (EFS) courses do not count towards the language requirement, nor towards the total amount of required units.
5. *Seminar requirement:* 3 units (1 per quarter) of LATINAM 200 Seminar on Contemporary Issues in Latin American Studies.
6. *Final Capstone Research Paper or Thesis:* students must write a capstone research paper or a thesis. Student writing a thesis may register for LATINAM 398 Master's Thesis for up to 10 units of thesis research under the guidance of an Academic Council faculty member. Students writing a capstone research paper may register for a Directed Study or comparable course for up to 3 units under the guidance of an Academic Council faculty member. Thesis units may be counted toward the elective field unit requirements (requirement number 3, above).
7. *Grade requirements:* All courses to be counted toward the M.A. must be taken for a letter grade and earn a 'B-' or better. M.A. candidates must maintain a cumulative GPA of 3.0 or higher. The only exceptions

are LATINAM 200, Law School Courses, and courses in the Graduate School of Business (GSB).

Joint Degree Program in Latin American Studies and Law

The joint degree program in Latin American Studies and Law allows students to pursue the M.A. degree in Latin American Studies concurrently with the Doctor of Jurisprudence (J.D.) degree, with a significant number of courses that may apply to both degrees. It is designed to train students interested in a career in teaching, research, or the practice of law related to Latin American legal affairs. Students must apply separately to the Latin American Studies M.A. program and to the Stanford School of Law and be accepted by both. Completing this combined course of study requires approximately four academic years, depending on the student's background and level of language training. For more information, see the "Joint Degree Programs (p.)" section of this bulletin and consult with the program offices for the two programs.

Dual Master's Degree with Medicine or Business

Stanford offers dual degree programs that grant an M.A. degree in Latin American Studies and a Master of Business Administration degree or a Medical Doctor degree. Students must apply separately to and be accepted by both the Latin American Studies M.A. program and the Graduate School of Business or School of Medicine.

For further information, contact a CLAS adviser at latinamerica@stanford.edu

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a “credit” or “no credit” grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a “credit” or “satisfactory” grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

The Center for Latin American Studies counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of undergraduate degree requirements that otherwise require a letter grade.

Graduate Degree Requirements

Grading

The master's program in Latin American Studies counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of graduate degree requirements that otherwise require a letter grade provided that the instructor affirms that the work was done at a 'B-' or better level.

Graduate Advising Expectations

The Program in Latin American Studies is committed to providing academic advising in support of graduate student scholarly and professional development. When most effective, this advising relationship entails collaborative and sustained engagement by both the adviser and the advisee. As a best practice, advising expectations should be periodically discussed and reviewed to ensure mutual understanding. Both the adviser and the advisee are expected to maintain professionalism and integrity.

Faculty advisers guide students in key areas such as selecting courses, designing and conducting research, and exploring academic opportunities and professional pathways. Program administrative staff are available for advising students on program policies and degree requirements, as well as course selection.

Graduate students are active contributors to the advising relationship, proactively seeking academic and professional guidance and taking responsibility for informing themselves of policies and degree requirements for their graduate program.

For a statement of University policy on graduate advising, see the "Graduate Advising (p. 80)" section of this bulletin.

Director of the Center: Alberto Díaz-Cayeros

Associate Director: Elizabeth Sáenz-Ackermann

Director of Graduate Studies: Alberto Díaz-Cayeros

Tinker Visiting Professor: Irma Alicia Velásquez Nimatuj

Latin American Studies Related Courses

The following courses may be used to satisfy requirements for the M.A in Latin American Studies or minor in Stanford Global Studies, Latin American Studies specialization. Consult the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu/) web site for full course descriptions and class schedules.

Not all of these courses are offered every year.

When selecting courses from this list, note the following:

1. Overseas Studies courses, denoted by the subject code OSPSANTG, apply only to the undergraduate minor program and are not options for M.A. students.
2. Courses with numbers ending in the letter N or Q are Introductory Seminars for undergraduates and are not options for M.A. students. Courses ending in N give preference to freshmen; courses ending in Q give preference to sophomores.
3. All courses to be counted toward the master's must be taken at the 100-level or higher.
4. All courses to be counted toward the master's must be taken for a letter grade.
5. For the M.A. degree, related courses must be taken for 5 units each. M.A. elective courses may be taken for 3-5 units each.
6. Some courses have prerequisites or special enrollment requirements. Students are responsible for making sure they have completed any prerequisites and/or secured an instructor's permission, as needed.

Culture and Society

Courses related to the Culture and Society field of specialization include:

		Units
AMSTUD 271	Mexicans in the United States	5
ANTHRO 100D	Chavin de Huantar Research |Seminar	3-5
ANTHRO 153	Asylum: Knowledge, Politics, and Population	3-5
ANTHRO 181	Religion and Science in the Amazon and Elsewhere	5
ANTHRO 206A	Incas and their Ancestors: Peruvian Archaeology	3-5
ANTHRO 212B	Biology, Culture and Social Justice in Latin America: Perspectives from Forensic Anthropology	5
ANTHRO 281	Religion and Science in the Amazon and Elsewhere	5
ARCHLGY 100D	Chavin de Huantar Research |Seminar	3-5
CHILATST 111	Curander@s, remedios y espiritualidad: Chican@/Latin@ healing practices	3-5
CHILATST 140	Migration in 21st Century Latin American Film	3-5
CHILATST 173	Mexican Migration to the United States	3-5

Overseas Studies Courses in Latin American Studies

The Bing Overseas Studies Program (http://bosp.stanford.edu) (BOSP) manages Stanford international and domestic study away programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The BOSP course search site (https://undergrad.stanford.edu/programs/bosp/explore/search-courses/) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu) or Bing Overseas Studies (http://bosp.stanford.edu).

Due to COVID-19, all BOSP programs have been suspended for Autumn Quarter 2020-21. All courses and quarters of operation are subject to change.

		Units
OSPSANTG 14	Women Writers of Latin America in the 20th Century	4-5
OSPSANTG 29	Sustainable Cities: Comparative Transportation Systems in Latin America	5
OSPSANTG 30	Short Latin American Fiction of the 20th Century	4-5
OSPSANTG 58	Global Change in Chile	5
OSPSANTG 62	Topics in Chilean History	4-5
OSPSANTG 68	The Emergence of Nations in Latin America	4-5
OSPSANTG 71	Santiago: Urban Planning, Public Policy, and the Built Environment	5
OSPSANTG 85	Marine Ecology of Chile and the South Pacific	5
OSPSANTG 116X	Modernization and its Discontents: Chilean Politics at the Turn of the Century	5
OSPSANTG 118X	Artistic Expression in Latin America	5
OSPSANTG 119X	The Chilean Economy: History, International Relations, and Development Strategies	5

Courses

LATINAM 92. Volunteers in Latin America: Pre-Field Reading and Discussion. 1 Unit.
A pre-field seminar for students participating in the Volunteers in Latin America summer program in Quito, Ecuador. The seminar will introduce students to topics of international service, youth development, and the issues and challenges surrounding street children in Ecuador. The seminar seeks to provide participants with a cultural, socioeconomic, and political context in which to understand the experiences they will have when in Ecuador. Through discussions, guest speaker presentations, and readings, students will develop insights and further questions that will help them to be more confident, reflective, and empathetic participants in their in-country service learning experience. Course enrollment is restricted to those students that have committed to the summer program.

LATINAM 177A. Mapping Poverty, Colonialism and Nation Building in Latin America. 3-5 Units.
This course is an introduction to the mapping of colonial and early independent Latin America, as a lens through which students may learn about the process of colonization, state building, and the legacies on those processes on poverty and underdevelopment today. Historical maps are analyzed both as GIS data sources, and as interpretative lenses through which we can glimpse the way human settlements and activity reveal social, political and economic dynamics whose legacies are still present today.

LATINAM 177B. Mapping Poverty, Colonialism and Nation Building in Latin America-Part B. 1 Unit.
This course is an introduction to the mapping of colonial and early independent Latin America, as a lens through which students may learn about the process of colonization, state building, and the legacies on those processes on poverty and underdevelopment today. Historical maps are analyzed both as GIS data sources, and as interpretative lenses through which we can glimpse the way human settlements and activity reveal social, political and economic dynamics whose legacies are still present today.

LATINAM 197. Directed Individual Research. 1-10 Unit.
For students engaged in interdisciplinary work that cannot be arranged by department. May be repeated for credit. Prerequisite: consent of instructor.

LATINAM 200. Seminar on Contemporary Issues in Latin American Studies. 1 Unit.
Guest scholars present analyses of major Latin American themes. Restricted to students enrolled in the Latin American Studies MA program.

LATINAM 207. Spanish in Science/Science in Spanish. 2 Units.
For graduate and undergraduate students interested in the natural sciences and the Spanish language. Students will acquire the ability to communicate in Spanish using scientific language and will enhance their ability to read scientific literature written in Spanish. Emphasis on the development of science in Spanish-speaking countries or regions. Course is conducted in Spanish and intended for students pursuing degrees in the sciences, particularly disciplines such as ecology, environmental science, sustainability, resource management, anthropology, and archeology.
Same as: BIO 208, EARTHSYS 207

LATINAM 210. Everyday Economic Life Among Brazil's Urban Poor. 1 Unit.
This course focuses on the challenges and opportunities experienced by Brazil's urban poor as they access consumer and financial markets.

LATINAM 248. Racial and Gender Inequalities in Latin America. 3-5 Units.
This course explores the intersection between racial and gender inequalities in Latin America focusing on the historical pattern of racism, sexism and discrimination, and on the political and social changes that have enabled Afro-descendants and women to achieve social rights in some countries of the region such as Brazil, Colombia, Ecuador, and Uruguay. The first part of this course introduces the struggle of political movements taking into consideration the historical process of race and gender discrimination. It will address not only the history of blacks¿ and women's movements in the 20th century, but also racism and sexism as cultural and institutional elements that configure inequality in those countries. Socio-economic indicators, race and gender-based violence, and political participation will be analyzed. The second part of this course examines the most recent discourses about women and afro-descendant rights, and their political framework. It evaluates how they have changed public opinion, laws and the social, institutional and political environment of Latin America. Finally, this course discusses the ability of Afro-descendants and women movements to navigate in the current political climate and advance their rights.nCourse will be taught in Portuguese.

LATINAM 264VP. Indigenous resistance and contradictions in Latin America. 3-5 Units.
This seminar examines Indigenous People knowledge through community resistance, social movements and how globalization impacts in their lives. The objective is to achieve an in-depth appreciation of Indigenous resistance through some countries of Latin American and how it will vary according to each country and circumstances. Students will analyze path-breaking documents that marked these histories. Issues explored include indigenous epistemologies, impacts of globalization on women, tension between global ideologies versus indigenous worldviews, global indigenous migration, and partnerships with human rights movements. Reading and discussions will be in English and Spanish.

LATINAM 266VP. A Critical Review of Guatemala's Indigenous Movements. 3-5 Units.
This seminar will explore five moments of the Maya Movement and the relationship between the ¿traditional¿ movements and the two new indigenous trends, to shed light on the complexities of indigenous organization in the XXI century. The goal of the course is to help students understand the intricacies of indigenous lives by understanding how internal transformations of their ways of organizing and struggling impact the Guatemalan State. Reading and discussions will be in English and Spanish.

LATINAM 268VP. Democracy, crisis and disease: Covid-19 and Indigenous People in Latin America.. 3-5 Units.
Amplified by the racism and inequality inherent to the Latin American states, the COVID-19 pandemic has taken a significant toll in the health and lives of indigenous peoples of the region. Alongside the pandemic, indigenous communities face a crisis of governance and democracy that has led to the rise of authoritarian measures meant to suppress dissent, processes of organization and autonomy. As COVID-19, poverty, inequality, racism, violence, and extractive projects continue to encroach on indigenous lives, this course will analyze a query posed by indigenous peoples: that perhaps coronavirus is not the cause of the crisis, but rather, it is the harvest of what the capitalist system has sown throughout centuries.

LATINAM 299. Independent Study or Directed Reading. 1-10 Unit.
Independent Study or Directed Reading for graduate students in Latin American Studies.

LATINAM 397. Graduate Writing Seminar for Latin American Studies: The Eco¿s Guide. 1-2 Unit.
The design of this seminar is based on Umberto Eco¿s How to Write a Thesis and has been adapted to aid students in fulfilling their MA in Latin American Studies capstone research paper or thesis requirement.

LATINAM 398. Master's Thesis. 1-10 Unit.
Restricted to students writing a master's thesis in Latin American Studies. May be repeated for credit.

LATINAM 801. TGR Project. 0 Units.
TGR Project for approved students in Latin American Studies.

LINGUISTICS

Courses offered by the Department of Linguistics are listed under the subject code LINGUIST on the (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=LINGUIST&filter-catalognumber-LINGUIST=on) Stanford Bulletin's (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=LINGUIST&filter-catalognumber-LINGUIST=on) ExploreCourses web site (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=LINGUIST&filter-catalognumber-LINGUIST=on).

Linguistics is the study of language as a fundamental human activity. Linguists consider language as a cultural, social, and psychological phenomenon and seek to determine what is universal to all languages and what is specific to individual languages, how language varies across individuals and communities, how it is acquired, how it changes, and how it is processed by humans and machines. Linguistics is an inherently interdisciplinary field that links the humanities, the social sciences, and the other cognitive sciences, as well as computer science, education, and hearing and speech sciences.

The department offers courses at the undergraduate and graduate levels. Some focus on analyzing structural patterns of sounds (phonetics and phonology), meanings (semantics and pragmatics), words (morphology), sentences (syntax). Others examine how these structures vary over time (historical linguistics), or over individuals and social groups (sociolinguistics), or how language is processed and learned by humans (psycholinguistics and language acquisition) or by computers (computational linguistics).

A variety of open forums provide for the discussion of linguistic issues, including colloquia and regularly scheduled workshops in computational linguistics, phonetics and phonology, psycholinguistics, semantics and pragmatics, sociolinguistics, and syntax and morphology.

Mission of the Undergraduate Program in Linguistics

The mission of the undergraduate program in Linguistics is to provide students with basic knowledge in the principal areas of linguistics (phonetics, phonology, morphology, syntax, semantics, pragmatics, historical linguistics, sociolinguistics, psycholinguistics, and computational linguistics) and the skills to do more advanced work in these subfields. Courses in the major also involve interdisciplinary work with connections to other programs including anthropology, communication, computer science, education, foreign languages, psychology, and symbolic systems. The program provides students with excellent preparation for further study in graduate or professional schools as well as careers in business, government agencies, social services, and teaching.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. By the end of the program, students are expected to be able to:

1. formulate theoretically interesting and tractable research questions;
2. find and collect information relevant to answering their research questions;
3. bring linguistic theory to bear in analyzing and evaluating information;
4. articulate the questions and outcomes of the process described in 1-3; and
5. engage with peers in an intellectual community around linguistic issues.

Graduate Programs in Linguistics

The department offers an M.A., Ph.D., and Ph.D. minor in Linguistics. For admissions information, please see the Department of Linguistics admissions page (https://linguistics.stanford.edu/degree-programs/graduate-admissions/). The GRE is not required.

Learning Outcomes (Graduate)

The purpose of the master's program is to develop students' knowledge and skills in Linguistics and to prepare them for a professional career or doctoral studies. This is achieved through completion of courses, including course work in an area of specialization within the field, and experience with independent research.

The Ph.D. is conferred upon candidates who have demonstrated the ability to conduct substantive, independent research in Linguistics. Through completion of advanced coursework and rigorous methodological and analytical training, the doctoral program prepares students to make original contributions to knowledge in linguistics, to articulate the results of their work, and to demonstrate its significance to linguistics and related fields.

Cognitive Science

Linguistics is participating with the departments of Philosophy and Psychology in an interdisciplinary program in Cognitive Science for doctoral students. The program is intended to provide an interdisciplinary education as well as a deeper concentration in linguistics. Students who complete the Linguistics and Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Linguistics.

To receive this designation, students must complete 30 units of approved course work. The 30 units cannot include courses counted elsewhere towards the Ph.D. Courses may be drawn from the participating departments, as well as from other departments, as long as their content is appropriate to the designation. At least 18 of the 30 units must be from outside the student's major department and must include course work in at least two other departments. The majority of the courses taken towards the 30 units of coursework must be taken for a letter grade and should be completed with at least a 'B'. Special topic seminars are excluded in favor of more foundational courses.

Linguistics Course Catalog Numbering System

Courses numbered under 100 are designed primarily for pre-majors. Courses with 100-level numbers are designed for undergraduate majors and minors; a limited number of 100-level units may apply to a master's or Ph.D. minor. Those with numbers 200 and above are primarily for graduate students, but with consent of the instructor some of them may be taken for credit by qualified undergraduates. At all levels, the final two digits of the course number indicate a special area, as follows:

Number	Special Area
00-04	General
05-09	Phonetics
10-14	Phonology
15-19	Morphology
20-29	Syntax
30-39	Semantics, Pragmatics, Discourse
40-49	Language Acquisition, Psycholinguistics
50-62	Sociolinguistics, Language Variation, Change

63-73	Language and Culture, Structure of a Language
74-79	Methods, Mathematical Linguistics, Statistics
80-89	Computational Linguistics
90-99	Directed Work, Theses, Dissertations

Bachelor of Arts in Linguistics

The Department of Linguistics offers a Bachelor of Arts in Linguistics. Eligible students may also pursue a Bachelor of Arts with Honors (p. 1772). The department also offers a minor in Linguistics (p. 1774).

The undergraduate major stresses the study of language both as a fundamental human faculty and as a changing social institution. At the core of the program is a set of departmental courses on the nature of human language; the major also draws on courses offered by other departments and programs.

The Linguistics major cuts across the humanities and the social and physical sciences. It provides a solid general education as a background for advanced studies in such disciplines as anthropology, cognitive science, communication, computer science, education (language, literacy, and culture), hearing and speech sciences, languages, law, linguistics, philosophy, and psychology.

Degree Requirements

Requirements for the B.A. include at least 55 units of course work; at least 28 of these units must be in Linguistics. Of the 55 units required for the major, no more than 12 units may be below the 100-level and a maximum of 3 courses, totaling no more than 8 units, may be taken on a credit/no credit basis (CR/NC). All required courses must be taken for a letter grade of 'C-' or better.

Course Requirements

		Units
Gateway Course		**1**
LINGUIST 196	Introduction to Research for Undergraduates (to be taken Winter Quarter, junior year)	1
Capstone Course		**2-3**
LINGUIST 197A	Undergraduate Research Seminar	2-3
Core Courses		**6-8**
Select at least one course each from two of the following three areas:		
Phonetics and Phonology		
LINGUIST 105	Phonetics	
or LINGUIST 205	Phonetics	
LINGUIST 110	Introduction to Phonology	
Morphology and Syntax		
LINGUIST 116A	Introduction to Word-Formation	
LINGUIST 121A	The Syntax of English	
LINGUIST 121B	Crosslinguistic Syntax (WIM)	
Semantics and Pragmatics		
LINGUIST 130A	Introduction to Semantics and Pragmatics (WIM)	
or LINGUIST 230A	Introduction to Semantics and Pragmatics	
LINGUIST 130B	Introduction to Lexical Semantics	
LINGUIST 230B	Advanced Semantics	
LINGUIST 232A	Lexical Semantics	
Breadth Courses		**2-8**
Select at least one course each from two of the following four areas:		
Historical Linguistics and Language Change		
LINGUIST 160	Introduction to Language Change	
LINGUIST 260A	Historical Morphology and Phonology	
LINGUIST 260B	Historical Morphosyntax	
Sociolinguistics		
LINGUIST 150	Language and Society	
LINGUIST 156	Language, Gender, & Sexuality	
LINGUIST 157	Sociophonetics	
or LINGUIST 257	Sociophonetics	
LINGUIST 250	Sociolinguistic Theory and Analysis	
Psycholinguistics		
LINGUIST 35	Minds and Machines	
LINGUIST 140	Learning to Speak: An Introduction to Child Language Acquisition	
LINGUIST 145	Introduction to Psycholinguistics	
Computational Linguistics		
LINGUIST 180	From Languages to Information	
or LINGUIST 280	From Languages to Information	
LINGUIST 188	Natural Language Understanding	
or LINGUIST 288	Natural Language Understanding	
LINGUIST 278	Programming for Linguists	
LINGUIST 284	Natural Language Processing with Deep Learning	
Depth Courses		**6-8**
Select at least two 200-level Linguistics courses, taken for 3-4 units each. See ExploreCourses for current options.		
Other Course Requirements		**27-36**
The remaining units may be in Linguistics or in related fields, and should form a coherent program of study. Majors should discuss this course work with faculty and get specific approval from the Linguistics Director of Undergraduate Studies for courses outside the department.		
Total Units		**55**

Language Requirement

Linguistics majors must have competence in at least one language other than English as part of their understanding of the field of linguistics and its study. This requirement is fulfilled by completion of six quarters of language coursework at Stanford or by certification of equivalent proficiency through the Language Center (https://web.stanford.edu/dept/lc/language/) or the relevant department (see University requirements). Language courses do not count toward the total of 55 required units for the major. Majors may petition to be exempted from the language requirement if they have grown up speaking a language other than English and can use it for everyday purposes and for linguistic analysis.

Honors Program

Students who wish to undertake a more intensive program of study, including independent research, should pursue departmental honors. Students should apply for honors by the end of Spring Quarter of their junior year. As part of the application, the student must write a research proposal describing the honors project, which must be approved by the project advisor. Approval for honors depends on the number of courses in the major that students have taken for a letter grade by the start of the third quarter of the junior year. For students who have completed at least 28 units for a letter grade in fulfillment of major requirements, only those maintaining a grade point average of 3.3 (B+) or better in these courses are eligible for honors. Students who have taken fewer than 28 units in the major for a letter grade must receive an endorsement

from both a faculty member in the Department of Linguistics who will supervise or co-supervise the honors project and a second Department of Linguistics faculty member who can attest to the student's qualifications for carrying out honors research.

Honors students complete a total of 65 units including the 55 units for the major, plus 10 additional units of Independent Study and Honors Research. In addition, they must complete an honors thesis based on research conducted with a project advisor, who must be a member of the Linguistics faculty, and a secondary faculty reader, who may, with the approval of the Linguistics Director of Undergraduate Studies, be a member of another department. In the Autumn Quarter of the senior year, honors students enroll in LINGUIST 199 Independent Study, to work closely with one of their advisors on the research project. In Winter and Spring quarters, honors students enroll in LINGUIST 198 Honors Research, with the student's project advisor for close supervision of the honors thesis. The thesis must be submitted in final, acceptable, form by May 15. The thesis topic is presented orally at a department Honors Colloquium late in Spring Quarter.

return to top of page (p. 1772)

Joint Major Program in Linguistics and Computer Science

The joint major program (JMP) was discontinued at the end of the academic year 2018-19. Students may no longer declare this program. All students with declared joint majors are permitted to complete their degree; faculty and departments are committed to providing the necessary advising support.

See the "Joint Major Program (p. 33)" section of this bulletin for a description of University requirements for the JMP. See also the Undergraduate Advising and Research JMP (https://majors.stanford.edu/more-ways-explore/joint-majors-csx/) web site and its associated FAQs.

Students completing the JMP receive a B.A.S. (Bachelor of Arts and Science).

Linguistics Major Requirements in the Joint Major Program

See the "Computer Science Joint Major Program (p. 714)" section of this bulletin for details on Computer Science requirements.

All majors must take at least 50 units of course work in Linguistics and related fields, with no more than 12 units below the 100 level and at least 8 units above the 200 level. No more than two courses may be taken on a credit/no credit basis (CR/NC). All required courses must be taken for a letter grade of C- or better.

Students in the joint major must take LINGUIST 180/CS 124 as one of these breadth courses. Students may count LINGUIST 180/CS 124 towards both major requirements as long as the units are not double-counted. If LINGUIST 180/CS 124 is required for both Linguistics and a student's specific CS track, Linguistics works with the student to identify another course (possibly independent study for 3-4 units) that would benefit the academic plan. (In this scenario, LINGUIST 180/CS 124 fulfills major requirements in both Linguistics and CS, but the units are only counted towards CS; additional units of work would be identified in Linguistics to meet the unit requirements.)

Within the 50-unit total, students in the joint major are encouraged to sign up for independent study units as part of completing the integrative capstone project. The expectation is that this project is supervised by a Linguistics faculty member. The specific number of units varies and is decided by the student and faculty adviser.

Different from Linguistics majors, CS + Linguistics joint majors are not required to display competence in a language other than English and therefore are not required to complete the equivalent of six quarters of language study.

Required Courses for the Joint Major:

Gateway Course

		Units
LINGUIST 196	Introduction to Research for Undergraduates (to be taken Autumn Quarter, junior year)	1

Capstone Course

		Units
LINGUIST 197A	Undergraduate Research Seminar (to be taken Winter Quarter, senior year)	2-3

Core Courses

		Units
Select at least one course each from two of the following three areas:		
Phonetics and Phonology		
LINGUIST 105	Phonetics	4
or LINGUIST 205A	Phonetics	
LINGUIST 110	Introduction to Phonology	4
Morphology and Syntax		
LINGUIST 120	Introduction to Syntax	4
LINGUIST 121A	The Syntax of English	4
LINGUIST 121B	Crosslinguistic Syntax	4
LINGUIST 222A	Foundations of Syntactic Theory I	3-4
Semantics and Pragmatics		
LINGUIST 130A	Introduction to Semantics and Pragmatics	4
or LINGUIST 230A	Introduction to Semantics and Pragmatics	
LINGUIST 130B	Introduction to Lexical Semantics	3-4
LINGUIST 230B	Advanced Semantics	2-4
LINGUIST 232A	Lexical Semantics	2-4

Breadth Courses

Select LINGUIST 180/280 plus at least one additional breadth course:		
LINGUIST 180	From Languages to Information	3-4
or LINGUIST 280	From Languages to Information	
Historical Linguistics and Language Change		
LINGUIST 160	Introduction to Language Change	2-4
LINGUIST 260A	Historical Morphology and Phonology	2-4
LINGUIST 260B	Historical Morphosyntax	2-4
Sociolinguistics		
LINGUIST 150	Language and Society	3-4
LINGUIST 156	Language, Gender, & Sexuality	4
LINGUIST 157	Sociophonetics	1-4
or LINGUIST 257	Sociophonetics	
LINGUIST 250	Sociolinguistic Theory and Analysis	3-4
Psycholinguistics		
LINGUIST 35	Minds and Machines	4
LINGUIST 140	Learning to Speak: An Introduction to Child Language Acquisition	4
LINGUIST 145	Introduction to Psycholinguistics	4

Depth Courses

Select at least two 200-level Linguistics courses, taken for 4 units each (for a total of at least 8 units). See ExploreCourses for current options.

Dropping a Joint Major Program

To drop the joint major, students must submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program (https://stanford.box.com/change-UG-program/). Students may also consult the Student Services Center (http://studentservicescenter.stanford.edu/) with questions concerning dropping the joint major.

Transcript and Diploma

Students completing a joint major graduate with a B.A.S. degree. The two majors are identified on one diploma separated by a hyphen. There will be a notation indicating that the student has completed a "Joint Major." The two majors are identified on the transcript with a notation indicating that the student has completed a "Joint Major."

Minor in Linguistics

Requirements for the minor include at least 28 units of course work in Linguistics and related fields, approved in advance by the Linguistics Director of Undergraduate Studies. All courses must be taken for at least 3 units. No more than two courses may be taken on a credit/no credit basis (CR/NC). All required courses must be taken for letter grade of 'C-' or better. The courses counting towards the minor must be units beyond those needed to satisfy the student's major course of study.

Degree Requirements

		Units
Required Course		**4**
LINGUIST 1	Introduction to Linguistics	4
Core Courses		**11-12**
Select one course each from two of the three areas below:		
Phonetics and Phonology		
LINGUIST 105	Phonetics	
or LINGUIST 205	Phonetics	
LINGUIST 110	Introduction to Phonology	
Morphology and Syntax		
LINGUIST 116A	Introduction to Word-Formation	
LINGUIST 121A	The Syntax of English	
LINGUIST 121B	Crosslinguistic Syntax	
Semantics and Pragmatics		
LINGUIST 130A	Introduction to Semantics and Pragmatics	
LINGUIST 130B	Introduction to Lexical Semantics	
Select one of the following:		
LINGUIST 150	Language and Society	
or, in advance consultation with the Linguistics Director of Undergraduate Studies, a course in historical linguistics or the history of a language.		
Electives		**12-13**
Remaining courses are to be determined in advance consultation with the Linguistics Director of Undergraduate Studies. Students are encouraged to take at least one 200-level Linguistics course. Students may also choose to do independent work with a faculty member of their choice.		
Total Units		**28**

Master of Arts in Linguistics

The University's basic requirements for the M.A. degree are discussed in the "Graduate Degrees (https://exploredegrees.stanford.edu/graduatedegrees/)" section of this bulletin.

The Department of Linguistics occasionally admits graduate students already enrolled at Stanford for the M.A. degree.

Degree Requirements

1. *Courses*—Individual programs should be worked out in advance with an adviser in Linguistics keeping the following requirements and guidelines in mind. The master's degree requires the completion of 45 units; at least 36 of these must be in Linguistics. The course work must include one introductory graduate-level course in each of the areas of syntax (LINGUIST 222A Foundations of Syntactic Theory I), semantics (LINGUIST 230A Introduction to Semantics and Pragmatics orLINGUIST 232A Lexical Semantics), and phonetics/phonology (LINGUIST 205A Phonetics orLINGUIST 210A Phonology), as well as four courses in the student's area of specialization. If the student can make a compelling case, the department may allow up to 9 of the 45 units to be in a department other than Linguistics. Courses from outside the department must have clear linguistic content or contribute methodological knowledge that facilitates the thesis project; furthermore, if the student is simultaneously enrolled in a degree program in another department, not all of these 9 units can be earned in that department. No more than two courses should be at the 100 level. The majority of the courses taken towards the 45 units of degree program course work must be taken for a letter grade. The three required courses and the four courses constituting the specialization should all be completed with at least a 'B' and taken for 4 units. The overall course work grade point average (GPA) must be at least 3.0 (B).
2. *Thesis or Thesis Project*—A research paper supervised by a committee of two faculty (normally fulfilled by up to 6 units of LINGUIST 398 Directed Research).

Coterminal Master's Degree Program in Linguistics

The Department of Linguistics admits a limited number of Stanford undergraduates to the coterminal master's degree program. Students are required to submit to the department a complete application, which includes a statement of purpose identifying a thesis topic, a Stanford transcript, three letters of recommendation (at least one of which must be from a faculty member in Linguistics), and a proposed course of study (worked out in advance with a Linguistics adviser). Applicants for the coterminal master's degree may apply as early as their eighth quarter and no later than early in the eleventh quarter of undergraduate study. Decisions on admission to the coterminal degree program rest with the Graduate Admissions Committee of the Department of Linguistics.

University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 56)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 65)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate advisor be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

Doctor of Philosophy in Linguistics

The following requirements are in addition to the basic University requirements for the degree sought; see the "Graduate Degrees (p. 65)" section of this bulletin. Students should review the department's Department of Linguistics Ph.D. Handbook (https://linguistics.stanford.edu/department-resources/) for further particulars concerning these requirements.

1. *Courses*—a minimum of 135 units of graduate work beyond the bachelor's degree, or 90 units beyond the master's degree. The core course requirements detailed in the Department of Linguistics Ph.D. Handbook guarantee that each student covers a sufficient set of subareas within the field. Students must maintain a satisfactory record in the number and distribution of units completed. The overall course work GPA must be at least 3.0 (B), and all core courses should be completed with at least a 'B'.
2. *Language*—each student must demonstrate an explicit in-depth knowledge of the structure of at least one language other than Standard English, by writing a research paper on that language.
3. *Research*—each student is expected to complete two substantial qualifying papers. The deadline for completion of the first qualifying paper is the end of Autumn Quarter of the second year; the deadline for completion of the second qualifying paper is the end of Autumn Quarter of the third year. The subject matter of the two papers, although it may be related (for example, about the same language), must be clearly distinct. The requirement is fulfilled by one quarter LINGUIST 395 Research Workshop (1-2 units), and by oral discussion of each paper with a committee of at least three faculty members selected by the faculty with input from the student.
4. *Candidacy*—each student must apply for candidacy for the Ph.D. by the end of the sixth academic year quarter, normally the Spring Quarter of the second year. Departmental prerequisites for candidacy include: (i) completion of a prescribed portion of the core course requirement (see item 1 above), (ii) completion of one qualifying paper (see item 3 above), and (iii) having an approved plan for completing the language requirement (see item 2 above).
   At the end of the academic year, the department faculty reviews each applicant and votes on whether to admit that student to candidacy. A student is only admitted to candidacy if, in addition to the student's fulfilling the department prerequisites, the faculty makes the judgment that the student has the ability to complete the remaining stages of the Ph.D. program at a level of superior quality. Students who are not admitted to candidacy are terminated from the program; at the department's discretion, they may be allowed to complete any requirements that remain for the master's degree and receive this degree.
5. *Teaching*—at least three quarters serving as a teaching assistant in Linguistics courses.
6. *Dissertation*—
   a. appointment of a dissertation committee.
   b. an approved written dissertation proposal is required by the end of Autumn Quarter of the fourth year.
   c. oral discussion of the dissertation proposal with an augmented dissertation committee by the end of Spring Quarter of the fourth year.
   d. passing a University oral examination on the dissertation and related areas which includes a public presentation of the dissertation research.
   e. dissertation (up to 15 units of LINGUIST 399 Dissertation Research).

Ph.D. Minor in Linguistics

1. *Units*—the student must complete 30 units of course work in Linguistics. At least 20 units must be graduate courses at the 200 level or above; 10 units may be at the 100 level or above, but in no event may they be below the 100 level.
2. *Introductory Courses*—The coursework for the minor must include one introductory course in each of phonetics/phonology, syntax, and semantics/pragmatics; these requirements are typically fulfilled by:
   - Phonetics/Phonology: LINGUIST 105/205A Phonetics LINGUIST 210A Phonology or LINGUIST 110 Introduction to Phonology
   - Syntax: LINGUIST 121A The Syntax of English or LINGUIST 121B Crosslinguistic Syntax or LINGUIST 222A Foundations of Syntactic Theory
   - Semantics/Pragmatics: LINGUIST 130A/230A Introduction to Semantics and Pragmatics or LINGUIST 130B Introduction to Lexical Semantics or LINGUIST 232A Lexical Semantics.
3. *Courses submitted for the minor* may not be double-counted in satisfaction of degree requirements for the student's doctoral or any other program. Individual programs should be worked out in advance with the student's Ph.D. minor adviser in Linguistics. The majority of the courses taken toward the 30 units of coursework must be taken for a letter grade. These should include the three required introductory courses, which should all be completed with at least a 'B' and taken for 4 units. The overall course work grade point average (GPA) must be at least 3.0 (B).
4. *Research Project (optional)*—the student may elect to present a paper which integrates the subject matter of linguistics into the student's field of specialization.
5. The Department of Linguistics does not require that the student's Linguistics adviser serve on the student's University oral examination committee

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a "credit" or "no credit" grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a "credit" or "satisfactory" grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

The Department of Linguistics counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards

satisfaction of undergraduate degree requirements that otherwise require a letter grade.

Graduate Degree Requirements

Grading

During academic year 2020-21, Ph.D. students may take up to three of the basic courses (those in Groups I-III and LINGUIST 200) for CR/NC, and have those count toward the program requirements if they receive a grade of 'CR'. Students may choose whether to take advantage of this option, and if so, which three courses they will use.

All other required courses should still be taken for a letter grade, and the department standard for basic courses and LINGUIST 200 applies to them: students should earn a grade of 'B' or above in order for those courses to count toward program requirements.

Graduate Advising Expectations

The department is committed to providing academic advising in support of each graduate student's scholarly and professional development. The advising relationship should entail collaborative engagement by both the adviser and the advisee. Faculty advisers guide students in key areas such as selecting courses, designing and conducting research, navigating degree requirements, exploring academic and professional opportunities, and preparing for their post-Ph.D. careers. Graduate students are active contributors to the advising relationship, proactively seeking academic and professional guidance and taking responsibility for informing themselves of policies and degree requirements for the Ph.D. program. An important part of the advisee-adviser relationship is that students learn to advocate for themselves; this includes discussing expectations for the adviser/advisee relationship with the adviser and revisiting these expectations periodically to ensure mutual understanding.

Advisers and Advising Meetings

A department faculty member serves as the Graduate Studies Adviser (GSA). Typically, the GSA keeps track of the general degree progress of all M.A. and Ph.D. students, offers advice on meeting department and University milestones, coordinates departmental advising and TA assignments, and approves special petitions.

Ph.D. Students

Each student has an individual adviser (also referred to as a second adviser in the pre-candidacy stage), usually chosen based on shared research interests, who advises on coursework, training in research methodologies, research projects, and professional development. Entering students are assigned a second adviser for their first two quarters in the program. The second adviser helps first year students make the transition to graduate school and take the initial steps towards their long-term goals. Beginning with Spring Quarter of the first year, the student's current Qualifying Paper Committee Chair serves as the second adviser. On completion of these papers, the student chooses a faculty member as Chair of their dissertation Reading Committee; this faculty member becomes the main adviser. Throughout their graduate career, students are also encouraged to consult with other faculty, including the members of their Qualifying Paper and Reading Committees.

In order to meet the department's advising expectations, twice a year each student and their adviser meet for a holistic, structured discussion of the student's recent progress, short-term plans, and longer-term academic and professional goals and to discuss the steps that the student should take to meet these objectives. The GSA usually joins the discussion with students in the earlier stages of the Ph.D. program. Students who receive department Summer funding are also expected to fill out a Summer Commitments Agreement that lays out their activities, priorities and goals for the summer, and to discuss these with their adviser.

Students are expected to meet regularly with their advisers and to keep them informed about their academic progress. Each student and their adviser should mutually agree on the frequency of these meetings when the advising relation begins and reassess their frequency at the start of every quarter.

M.A. Students

At the start of graduate study, each student is assigned a faculty member as an M.A. program adviser, chosen based on shared research interests and the student's proposed M.A. thesis area. Usually this faculty member serves in this role for the duration of the M.A. program. Besides advising the student on the M.A. thesis, the adviser provides guidance on the student's overall path through the M.A. program. Students are expected to meet with their advisers at least once each quarter and to keep them informed about their academic progress. The precise meeting frequency should be mutually agreed upon and reassessed quarterly; it depends on the student's stage in the program.

Additional resources

The Department of Linguistics Ph.D. Handbook provides additional information. Students are also encouraged to familiarize themselves with the Policies and Best Practices for Advising Relationships at Stanford. Additional resources on advising are offered by VPGE. For a statement of University policy on graduate advising, see the "Graduate Advising" section of the Bulletin.

Faculty

Emeriti: (Professors) Joan Bresnan, Eve V. Clark, Kenji Hakuta, Shirley Brice Heath, Philip L. Hubbard (Senior Lecturer, Language Center), Martin Kay, William R. Leben, Stanley Peters, John R. Rickford, Elizabeth C. Traugott, Thomas A. Wasow

Chair: Christopher Potts

Director of Graduate Studies/Graduate Studies Adviser: Vera Gribanova

Director of Undergraduate Studies: Robert Podesva

Professors: Cleo Condoravdi, Penelope Eckert (emerita in Winter), Daniel Jurafsky (on leave in Autumn), Paul Kiparsky (on leave in AY 2020-21), Beth Levin, Christopher Manning, Christopher Potts

Associate Professors: Arto Anttila (on leave in Spring), Vera Gribanova, Robert Podesva, Meghan Sumner

Assistant Professors: Judith Degen, Boris Harizanov, Daniel Lassiter

Courtesy Professors: Yoshiko Matsumoto, James McClelland, Chao Fen Sun

Courtesy Associate Professors: Michael C. Frank, Noah Goodman, Miyako Inoue, Jonathan Rosa

Lecturers: Katherine HIlton

Adjunct Professors: Jared Bernstein, Ronald Kaplan, Lauri Karttunen, Paul Kay, Annie Zaenen, Arnold Zwicky

Courses

LINGUIST 1. Introduction to Linguistics. 4 Units.
This introductory-level course is targeted to students with no linguistics background. The course is designed to introduce and provide an overview of methods, findings, and problems in eight main areas of linguistics: Phonetics, Phonology, Morphology, Syntax, Semantics, Pragmatics, Psycholinguistics, and Sociolinguistics. Through lectures, in-class activities, and problem sets, you will come away with an overview of various linguistic phenomena, a sense of the diversity across languages, skills of linguistic analysis, an awareness of connections between these linguistics and applications of linguistics more broadly, and a basis for understanding the systematic, but complex nature of human language. While much of the course uses English to illuminate various points, you will be exposed to and learn to analyze languages other than English. By the end of the course, you should be able to explain similarities and differences of human languages, use basic linguistic terminology appropriately, apply the tools of linguistic analysis to problems and puzzles of linguistics, understand the questions that drive much research in linguistics, and explain how understanding linguistics is relevant for a variety of real-world phenomena.

LINGUIST 5N. What's Your Accent? Investigations in Acoustic Phonetics. 3 Units.
Preference to freshmen. Phonetic variation across accents of English; experimental design; practical experience examining accents of seminar participants; acoustic analysis of speech using Praat.

LINGUIST 10N. Experimental Phonetics. 4 Units.
Everyday, we face variation in language. As readers, we see words printed in different fonts, sizes, and typefaces, typically static on a page. As listeners, we hear a speech signal riddled with variation. We are exposed to words, but a single word is produced differently each time it is uttered. These words stream by listeners at a rate of about 5 syllables per second, further complicating the listeners' task. How listeners map a speech signal into meaning despite massive variation is an issue central to linguistic theory. The field of experimental phonetics investigates how listeners take words that often vary drastically and understand them as quickly and adeptly as they do. This class introduces students to acoustic and auditory phonetics. As a class, we will carry out a project in experimental phonetics aimed at understanding how different realizations of words are able to be understood by listeners. Throughout the course, students will read background literature, become familiar with the Stanford Linguistics Lab, and learn to use software integral to the design, data collection, and data analysis of experiments. Each week, we will have two meetings,one in a seminar setting and one in the lab.

LINGUIST 21N. Linguistic Diversity and Universals: The Principles of Language Structure. 3 Units.
The human capacity for language is able to support a staggering diversity of languages. But is anything possible in a human language, and is there anything that is common to all languages? Looking past the vast surface differences, linguists have discovered deep commonalities among the languages of the world as well as strict limits on the observed variation and on what a possible human language is. In this seminar, we will seek to uncover the building blocks of language and the laws that govern their interactions. Our goal will be to reach an understanding of the ways in which languages are systematically alike and different, as well as of the nature of language in general. We will investigate a variety of topics, including crosslinguistic differences and similarities with respect to word order, the grammatical structure of questions, and how languages mark subjects and objects. We will explore the structure of both sentences and words, identifying and studying their fundamental properties. In this pursuit, we will rely on data from a range of languages, such as English, Navajo, Zulu, and many others. This seminar will teach you how to view language as an object of scientific study, introducing you to central concepts and methods of linguistics (with a particular emphasis on syntax) along the way. It will give you the tools to describe and analyze even unfamiliar languages, and will teach you to construct explicit hypotheses about how language works and to test them empirically. There are no prerequisites for this course and no experience with linguistics will be assumed; the course is Socratically taught and there will be no textbook.

LINGUIST 30N. Linguistic Meaning and the Law. 3 Units.
We will investigate how inherent properties of language, such as ambiguity, vagueness and context-dependence, play into the meaning of a legal text, and how the meaning of a law can remain invariant while its range of application can change with the facts and with our discovery of what the facts are. Our focus will be on the perspective linguistic analysis brings to legal theory, addressing current controversies surrounding different conceptions of `textualism¿ and drawing on well-known examples of legal reasoning about language in cases of identity fraud, obstruction of justice and genocide.

LINGUIST 35. Minds and Machines. 4 Units.
(Formerly SYMSYS 100). An overview of the interdisciplinary study of cognition, information, communication, and language, with an emphasis on foundational issues: What are minds? What is computation? What are rationality and intelligence? Can we predict human behavior? Can computers be truly intelligent? How do people and technology interact, and how might they do so in the future? Lectures focus on how the methods of philosophy, mathematics, empirical research, and computational modeling are used to study minds and machines. Students must take this course before being approved to declare Symbolic Systems as a major. All students interested in studying Symbolic Systems are urged to take this course early in their student careers. The course material and presentation will be at an introductory level, without prerequisites. If you have any questions about the course, please email symsys1staff@gmail.com.
Same as: CS 24, PHIL 99, PSYCH 35, SYMSYS 1, SYMSYS 200

LINGUIST 40S. Lab in Scientific and Critical Thinking: The Emergence of Language. 2-4 Units.
This course introduces students to the basic skills of critical thinking and provides a venue to apply these skills to a controversial topic: the emergence of human language. We discuss the following questions: what is language? Do animals have it? How did humans begin to talk? How do children learn to speak? In discussing these questions, we cover the basics of the scientific method and critical thinking. Students practice how to read scientific articles, find their main claims, differentiate between factual and theoretical claims, assess the evidence supporting the factual claims, and critically evaluate the arguments. Students practice small scale data collection, hypothesis formation, and hypothesis testing as part of their final project. We discuss the problems that researchers face in each of these phases of research.

LINGUIST 44N. Living with Two Languages. 3 Units.
Preference to freshmen. The nature of bi- and multilingualism with emphasis on the social and educational effects in the U.S. and worldwide, in individual versus society, and in child and adult. The social, cognitive, psycholinguistic, and neurological consequences of bilingualism. Participation in planning and carrying out a research project in language use and bilingualism.

LINGUIST 47N. Languages, Dialects, Speakers. 3 Units.
Preference to freshmen. Variation and change in languages from around the world; language and thought; variation in sound patterns and grammatical structures; linguistic and social structures of variation; how languages differ from one another and how issues in linguistics connect to other social and cultural issues; the systematic study of language.

LINGUIST 51S. Language, Society, and Media. 3 Units.
How do people use language to construct identities and achieve interactional goals? How is that language use represented, circulated, and discussed in the media? This course will explore the way that language operates in society with a particular focus on popular and new media. The media, as both a platform for the display and dissemination of linguistic creativity as well as a site for explicit commentary about language, is ripe for analysis of both language use and language attitudes. To do this, we'll examine specific contexts: how public figures, actors, and corporations use language in movies, television, and advertising, and how individuals use language in new media (e.g. YouTube) and on social media (e.g. Twitter). We'll discuss the function of linguistic variation in the construction, recognition, and circulation of social types and conventionalized notions about language.

LINGUIST 52N. Spoken Sexuality: Language and the Social Construction of Sexuality. 3 Units.
The many ways language is used in the construction of sexuality and sexual identity. How language is used as a resource for performing and perceiving sexual identity. Drawing on linguistic analyses of pronunciation, word choice, and grammar, questions such as: Is there a gay accent? Why isn't there a lesbian accent? How do transgendered people modify their linguistic behavior when transitioning? How are unmarked (heterosexual) identities linguistically constructed? Sexuality as an issue of identity, as well as of desire. Iconic relations between elements of language such as breathy voice quality and high pitch, and aspects of desire such as arousal and excitement. How language encodes ideologies about sexuality; how language is used to talk about sexuality in public discourses about gay marriage and bullying, as well as in personal narratives of coming out. How language encodes dominant ideologies about sexuality, evident in labels for sexual minorities as well as terminology for sex acts. Discussions of readings, explorations of how sexuality is portrayed in popular media, and analyses of primary data. Final research paper on a topic of student choice.
Same as: FEMGEN 52N

LINGUIST 53N. Language and Adolescence. 3 Units.
Adolescents are arguably the most creative age group in our society. They are the leaders in linguistic change, introducing innovations that eventually spread to the entire population. Not only do adolescents create new speech styles such as "valley girl" and "cholo", and new forms such as the quotative "I'm like", they also accelerate the phonetic changes that differentiate regional and ethnic dialects. This seminar will explore the diversity and creativity of adolescent language, and the role of adolescents in linguistic and social change.

LINGUIST 54N. Social Bias and Earwitness Memory. 3 Units.
As individuals, we would like to believe that we are free from biases and that we are somehow immune to acting on the social biases that we have been socialized to since birth. We would like to believe that we can report experiences accurately, recalling events as they truly happened. But, memory is faulty and stereotypes and social biases are pervasive. And, at a level beneath our own control, these biases slip in and influence our memory of events. Eyewitness memory, and the inaccuracy and unreliability of eyewitnesses, is a perfect example of this. But, what about the things we hear? Speech carries a great deal of information; packets of co-varying cues we have been raised to recognize categorically, informing us about a talker¿s race, accent, emotion, and gender. We have, through our ears, information about events that occur. And, we have in our minds, stereotyped expectations about how various groups of people behave and what various groups of people might say. In this course, we will explore how these two types of information (e.g., the percept of what is actually heard vs. our stereotypes about who is likely to have said what) clash together and influence ¿earwitness memory¿. We will read and critique journal articles, blogs, and popular science articles, think about the reliability of memory for auditory events, and we will work together to develop three well-designed thought experiments that address questions at the heart of this issue. Along the way, we will learn a bit about the acoustics of speech, social variation in speech, speech perception and spoken word recognition, memory, and experimental design and analysis. Students in this course should be committed to reading the assignments, sharing their ideas about the readings (without concern for ¿being right¿), and think creatively about ways we can explore the idea of earwitness memory together. While this is a one-quarter course, my goal is to pursue our thought experiments collaboratively, with any interested students in subsequent quarters.

LINGUIST 55N. Language in the City. 3 Units.
Language communicates a great deal more than the meaning of our words. Our regional accents, for example, offer clues about where we grew up. And even though accents are usually labeled in geographical terms, their symbolic meanings extend far beyond mere coordinates on a map. When we hear a New Yorker, we not only wonder whether they¿re from Brooklyn, but also conjecture about the kind of person they are: they might prefer to walk down the street quickly over strolling, they might enjoy lively conversations where people talk over one another, and they might tend to express their opinions bluntly. This seminar explores the linguistic practices and social meaning of accents spoken in San Francisco. nClass participants will collectively choose a neighborhood in San Francisco for in-depth examination. Through a series of field trips (once every two or three weeks), students will document the varieties of English spoken by lifelong residents of the neighborhood. Field assignments will consist primarily of observation and audio-recorded interviews. Interviews will serve as data for linguistic analysis (transcription, quantitative analysis of a linguistic feature of interest) throughout the term. Linguistic patterns will be analyzed in relation to salient social issues in the community, which will be identified in both interview content and historical records.nUpon completing the seminar, students will have (a) learned how to treat language as an object of scientific analysis, (b) developed an understanding of the social ramifications of linguistic practice, (c) gained fieldwork skills in general and interviewing skills in particular, and (d) come to appreciate the diversity of experiences in an urban community near Stanford.

LINGUIST 55S. Language, Speech, and Social interaction. 3 Units.
We use language to communicate every day, but we take its complex and dynamic nature for granted. This introduction to Linguistics will ask students to rethink their assumptions about language and communication as it approaches the field with a special focus on speech and social interactions. The course is grounded in the production and perception of speech sounds: its physiological basis, its acoustic signal form, and its cognitive process of perception. From this foundation, the course will move on to explore how the subtle variation and change of sounds is used to construct identity, foster relationships, and shape community. We will also investigate how exciting linguistic research sheds light on important contemporary social debates and on speech technology. Throughout the course, students will supplement readings, exercises, and discussion with lab sessions that will teach them how to manipulate and analyze speech sound recordings. Their accumulated theoretical and practical knowledge will find its expression in an intensive research project drawing on social media data. There is no prerequisite for this course.

LINGUIST 61S. Language Evolution and Change. 2-3 Units.
Every human culture has a sophisticated, systematic means of communication which we call "language". Why? What makes languages the way they are, and what makes them keep changing over time? In this course, we will explore proposed explanations for language evolution and their connections to language change. In doing so, we will address a major roadblock in scientific inquiry: how do you study something you can't directly observe? Language evolution left no fossils behind, so how can different proposed explanations for it be evaluated? We will examine the argumentation behind different proposed explanations and the various methodologies that have been used to support them. Students will put to practice the knowledge and critical thinking skills gained from this course by developing and workshopping their own research project proposals. Students taking the course for 3 units will be expected to complete a project proposal and peer review in addition to the regular assignments.

LINGUIST 63N. The Language of Comics. 3 Units.
This seminar will explore language as represented in cartoons and comics such as Bizarro, Dilbert and Zits, how we interpret it, and why we find comics funny. We will explore and analyze language play, genderspeak and teenspeak; peeving about usage; new and spreading usages.

LINGUIST 65. African American Vernacular English. 3-5 Units.
Vocabulary, pronunciation and grammatical features of the systematic and vibrant vernacular English [AAVE] spoken by African Americans in the US, its historical relation to British dialects, and to English creoles spoken on the S. Carolina Sea Islands (Gullah), in the Caribbean, and in W. Africa. The course will also explore the role of AAVE in the Living Arts of African Americans, as exemplified by writers, preachers, comedians and actors, singers, toasters and rappers, and its connections with challenges that AAVE speakers face in the classroom and courtroom. Service Learning Course (certified by Haas Center). UNITS: 3-5 units. Most students should register for 4 units. Students willing and able to tutor an AAVE speaking child in East Palo Alto and write an additional paper about the experience may register for 5 units, but should consult the instructor first. Students who, for exceptional reasons, need a reduced course load, may request a reduction to 3 units, but more of their course grade will come from exams, and they will be excluded from group participation in the popular AAVE Happenin at the end of the course.
Same as: AFRICAAM 21, CSRE 21, LINGUIST 265

LINGUIST 66. Vernacular English and Reading. 4-5 Units.
Discusses some of the literature on the relation between use of vernacular English varieties (e.g. African American Vernacular English, Chicano English) and the development of literacy (especially in Standard English). But our primary focus is on improving the reading skills of African American and Latino students in local schools through the Reading Road program developed at the University of Pennsylvania. Students must commit to tutoring one or more elementary students weekly, using the program. L65 AAVE recommended, but not required.
Same as: LINGUIST 266

LINGUIST 67S. The Role of Language in Perception and Cognition. 3 Units.
One of the driving questions in linguistics involves the relationship between language and cognition: what do the properties of language tell us about the nature of our thinking and reasoning? Whorf's theory of linguistic relativism, made famous in popular science, suggests that the structures and patterns of the language(s) we speak constrain the way we think. This hypothesis, and the data that motivated it, have been the subject of much debate in the linguistic literature over the past few decades.This course introduces methods and ideas in modern linguistics through the lens of this debate. We first discuss Whorf's original hypothesis, and then examine arguments and data for strong and weak interpretations of linguistic relativism. We look at data from languages that differ structurally and conceptually from English, including languages that divide the colour spectrum differently, languages that lack numerals beyond the low single digits, and languages that use geographical coordinate systems (north, south, etc) instead of speaker-oriented ones (left, right). We consider how to use these differences to investigate a potential connection between language and cognitive capacities, focusing on understanding and critiquing recent research and experimental work in these areas.

LINGUIST 83Q. Translation. 3 Units.
Preference to Sophomores. What is a translation? The increased need for translations in the modern world due to factors such as tourism and terrorism, localization and globalization, diplomacy and treaties, law and religion, and literature and science. How to meet this need; different kinds of translation for different purposes; what makes one translation better than another; why some texts are more difficult to translate than others. Can some of this work be done by machines? Are there things that cannot be said in some languages?.

LINGUIST 105. Phonetics. 4 Units.
Phonetics is the systematic study of speech. In this class, we will learn about the physical gestures and timing involved in the articulation of spoken language and about the resulting acoustic signal that is decoded into linguistic units by the human auditory system. The class is structured into two parts: A practical lab component, and a class component. This course highlights both the complexity of the physical nature of producing spoken language, and the highly variable acoustic signal that is interpreted by listeners as language. By the end of this course, you should: (1) Understand the process of preparing an utterance to articulating it; (2) Understand the basic acoustic properties of speech; (3) Provide detailed phonetic transcriptions of speech; (4) Produce and understand the gestures involved in nearly all of the world's speech sounds, and (5) Understand the ways this knowledge can be used to advance our understanding of spoken language understanding by humans and machines. We will be using the software program Praat (https://www.fon.hum.uva.nl/praat/) weekly, beginning on the first day of class. Please download the program and have it installed on your computer before class begins.
Same as: LINGUIST 205A

LINGUIST 106. Introduction to Speech Perception. 4 Units.
Basics of acoustic phonetics and audition. What do listeners perceive when they perceive speech. Examine current research including: the categorical perception of speech, cross-language speech perception, infant speech perception. Theoretical questions of interest to speech perception researchers and experimental methods used in the field.

LINGUIST 110. Introduction to Phonology. 4 Units.
Introduction to the sound systems of the world's languages, their similarities and differences. Theories that account for the tacit generalizations that govern the sound patterns of languages. Prerequisite: Linguist 1.

LINGUIST 112. Seminar in Phonology: Stress, Tone, and Accent. 4 Units.
Stress, tone, and accent systems vary widely, sometimes even within closely related language groups. Adding to their linguistic allure are their interactions with morphology and syntax, and with one another. Stress, tone, and accent are often also closely linked to phonological quantity and syllable structure. nnThis course will survey the different behaviors of stress, tone, and accent systems in the languages of the world. Decades of work on this topic has led to fundamental changes in how we represent phonological structure. While we will analyze a few systems deeply in order to get at the heart of the topic, an even bigger aim will be breadth of coverage. The result will be a better empirical grasp of the underpinnings of the typology of accentual systems.

LINGUIST 116. Morphology. 4 Units.
A survey of words including their structures, pronunciations, meanings, and syntactic possibilities in a wide sampling of languages to provide a laboratory for investigating the nature of morphology.

LINGUIST 116A. Introduction to Word-Formation. 3-4 Units.
This course provides an introduction to word formation in the world¿s languages. It investigates the notion of word, the internal structure of words, the relation between a word's structure and its meaning, and processes for forming new words. Data will be drawn from a range of languages with an emphasis on English. Prerequisites: One of Linguist 1, 110, 121A, 121B, 130A, or 130B, or permission of instructor.

LINGUIST 120. Introduction to Syntax. 4 Units.
Grammatical constructions, primarily English, and their consequences for a general theory of language. Practical experience in forming and testing linguistic hypotheses, reading, and constructing rules.

LINGUIST 121A. The Syntax of English. 4 Units.
A data-driven introduction to the study of generative syntax through an in-depth investigation of the sentence structure of English. Emphasis is on central aspects of English syntax, but the principles of theory and analysis extend to the study of the syntax of other languages. The course focuses on building up syntactic argumentation skills via the collective development of a partial formal theory of sentence structure, which attempts to model native speaker knowledge. Satisfies the WIM requirement for Linguistics and the WAY-FR requirement. Prerequisites: none (can be taken before or after Linguistics 121B). The discussion section is mandatory.

LINGUIST 121B. Crosslinguistic Syntax. 4 Units.
A data-driven introduction to the study of syntax through the investigation of a diverse array of the world's languages, including but not limited to English. Emphasis is on understanding how languages are systematically alike and different in their basic sentence structure. The course focuses on building up syntactic argumentation skills via the collective development of a partial formal theory of sentence structure, which attempts to model native speaker knowledge. Satisfies the WIM requirement for Linguistics and the WAY-FR requirement. Prerequisites: none (can be taken before or after Linguistics 121A). The discussion section is mandatory.

LINGUIST 127. Linguistic Meaning and Legal Interpretation. 3-4 Units.
This course applies analytical concepts from semantics and pragmatics to the interpretation of legal texts. It critically examines methods and theories of legal interpretation, such as 'textualism', 'intentionalism', 'originalism'. Prerequisites: LINGUIST 130A/230A, or PHIL 181/281, or permission of instructor.
Same as: LINGUIST 227

LINGUIST 130A. Introduction to Semantics and Pragmatics. 4 Units.
Linguistic meaning and its role in communication. Topics include logical semantics, conversational implicature, presupposition, and speech acts. Applications to issues in politics, the law, philosophy, advertising, and natural language processing. Those who have not taken logic, such as PHIL 150 or 151, should attend section. Prerequisites: LINGUIST 1, SYMSYS 1 (LINGUIST 35), consent of instructor, or graduate standing in Linguistics.
Same as: LINGUIST 230A

LINGUIST 130B. Introduction to Lexical Semantics. 3-4 Units.
Introduction to basic concepts and issues in the linguistic study of word meaning. We explore grammatical regularities in word meaning and the relation between word meaning and the conceptual realm. The questions we address include the following. How is the meaning of a word determined from its internal structure? How can simple words have complex meanings? What is a possible word? How does a word's meaning determine the word's syntactic distribution and what kind of reasoning does it support? What kind of information belongs to the lexical entry of a word? The course will show that the investigation of the linguistic and semantic structure of words draws on the full resources of linguistic theory and methodology. Prerequisites: Symsys 1, Linguist 35, or equivalent or permission of the instructor. Linguist 130A is not a prerequisite for this course.

LINGUIST 130C. Logic Laboratory. 1 Unit.
Typically taken in conjunction with 130A/230A.
Same as: LINGUIST 230E

LINGUIST 132. Lexical Semantic Typology. 3-4 Units.
This course surveys how languages express members of the basic conceptual categories entity, event, property, and spatial relation. It examines strategies languages use to name members of these categories, and factors that might influence the choices languages make. Relatedly, it explores similarities and differences among languages in the sets of words they have to express notions within various conceptual domains. Restricted to undergraduates. Prerequisites: Linguist 121A, 121B, 130A, or 130B, or permission of the instructor.

LINGUIST 134A. The Structure of Discourse: Theory and Applications. 2-4 Units.
This course examines the linguistic structure of discourse, with a particular emphasis on learning to identify the emergent structures of spontaneous conversations. Specific topics include: narrative structure; turn-taking; discourse markers; face and politeness; inference and implicature; discourse coherence; reference; intertextuality; stance-taking; and framing. Class-time is split between hands-on data analysis and the discussion of both recent and foundational research on conversation. Throughout the class discussions and data analysis projects, students will also explore how the structure of discourse is shaped by cognition, social identities, interpersonal relationships, and cultural contexts.nnPrerequisites: Prior coursework in linguistics or permission of the instructor.
Same as: LINGUIST 234

LINGUIST 140. Learning to Speak: An Introduction to Child Language Acquisition. 4 Units.
None of us were born talking. We all had to learn it. How did we do that? We start the journey by looking at the perception of sounds before birth. We follow infants as they discover the sounds of their native languages. We talk about how the infant mind breaks the speech stream into words, phrases, and sentences; how it makes sense of language and uses it to convey thoughts and feelings. We finish by discussing how the majority of children in the world learn two or more languages at once. The course content will introduce you to major topics in child language acquisition. Assignments will help you develop skills in collecting, analyzing, and reporting empirical data. The class project involves collecting data from children at the Bing Nursery school on campus as well as the analysis of a large dataset of children's speech online. Class discussion and projects focus on giving you a hands-on experience with critical and scientific thinking.

LINGUIST 141. Language and Gesture. 4 Units.
History of work on gesture, gestural systems associated with particular languages/cultures, and with specific activities - music, sports, traffic management, stock exchanges, etc. Examination of how gesture is represented in painting and animation, and the role it plays in early adult-child interaction.

LINGUIST 142. Heritage Languages. 3-4 Units.
The linguistic and cultural properties of Heritage languages, which are partially acquired and supplanted by a dominant language in childhood. Topics: Syntactic, phonological and morphological properties of heritage languages, implications from experimental HL research for language universals, cultural vs. linguistic knowledge, the role of schooling in HL competence, influence of the dominant language on the HL, and pedagogical issues for HL learners in the classroom.
Same as: LINGUIST 242

LINGUIST 143. Sign Languages. 4 Units.
The linguistic structure of sign languages. How sign languages from around the world differ, and what properties they share. Accents and dialects in sign languages. How sign languages are similar to and different from spoken languages. How and why sign languages have emerged.

LINGUIST 145. Introduction to Psycholinguistics. 4 Units.
How do people do things with language? How do we go from perceiving the acoustic waves that reach our ears to understanding that someone just announced the winner of the presidential election? How do we go from a thought to spelling that thought out in a sentence? How do babies learn language from scratch? This course is a practical introduction to psycholinguistics -- the study of how humans learn, represent, comprehend, and produce language. The course aims to provide students with a solid understanding of both the research methodologies used in psycholinguistic research and many of the well-established findings in the field. Topics covered will include visual and auditory recognition of words, sentence comprehension, reading, discourse and inference, sentence production, language acquisition, language in the brain, and language disorders. Students will conduct a small but original research project and gain experience with reporting and critiquing psycholinguistic research.
Same as: LINGUIST 245A, PSYCH 140

LINGUIST 148. Language of Advertising. 4 Units.
A good ad takes the language we all share and manipulates it in creative, sometimes unique ways to influence our thoughts and our behavior. This course explores the range of techniques that advertisers use to express propositions that we consumers will notice, enjoy, and accept. Because advertising is quick to pick up on new trends, tracing the changes over the past century will allow us to re-experience the huge shifts in culture and media that have happened since then. The most effective advertisers understand us really well. Their choice of words, structure, image, and sometimes sound together form a careful composition. By taking apart some great past ads, we'll indirectly be looking at ourselves, as seen by the advertiser. Many of the techniques in ads are adapted from our own normal linguistic behavior. For example, think of how you adjust your vocabulary and tone to the person you're talking to, whether a friend, a professor, or a parent. This lecture course will include weekly input from students, who will present examples to form the basis for discussion and discovery.

LINGUIST 150. Language and Society. 3-4 Units.
This course explores the social life of spoken language. Students learn to address the following big questions about language and society: Why do languages vary across different time periods, locations, and social groups? What do our opinions about the way other people speak tell us about society? How do our social identities and goals influence the way we speak? And how do we use language to alter our social relationships? In addition to weekly reading responses, students complete two projects during the quarter: a transcription of spoken interaction and a quantitative analysis of linguistic variation. Students taking the course for four units write a literature review and project proposal for their final papers. Students taking the course for three units complete a shorter final paper that aims to improve public awareness about sociolinguistics.

LINGUIST 150E. Who Speaks Good English. 4 Units.
Many people have strong beliefs that there are right and wrong ways of speaking, good and bad versions of their language. These norms are reinforced explicitly in the education system, and implicitly in the ways that people talk about language or see it portrayed in media. Students will learn about the history, development, and linguistic structure of three language varieties that are sometimes characterized by non-linguists as "bad English": Singaporean English, Jamaican Creole, and African American Vernacular English. By critically examining public discourses about these language varieties and learning to identify their systematic patterns of grammatical structure, students will discover that popular ideas about "good" and "bad" English are rooted in the narratives that surround language, not linguistic fact.

LINGUIST 152. Sociolinguistics and Pidgin Creole Studies. 2-4 Units.
Introduction to pidgins and creoles, organized around the main stages in the pidgin-creole life cycle: pidginization, creolization, and decreolization. Focus is on transformations in the English language as it was transported from Britain to Africa, Asia, the Caribbean, and the Pacific. Resultant pidginized and creolized varieties such as Nigerian Pidgin English, Chinese Pidgin English, New Guinea Tok Pisin, Suriname Sranan, and the creole continua of Guyana, Jamaica, and Hawaii. Also French, Dutch, Portugese, Chinook, Motu, and Sango.
Same as: LINGUIST 252

LINGUIST 153. Language, Power & Politics. 3-4 Units.
The integral role language plays in politics; how power operates in linguistic practices and political interaction. Critical examination of how language is used to articulate, maintain and subvert relations of power in society, emphasizing language in the media, the political rhetoric associated with war, and the construction of `truth¿ in politics. The role of ethnographic analysis in aiding sociolinguistic understandings of how social actors use and (re)interpret political language.

LINGUIST 155K. Seminar in Sociolinguistics: Applied Sociolinguistics -- Tryna Make a Difference. 3-4 Units.
In this new course, we will explore how sociolinguistic research and principles can be used to make a positive difference in society, especially for speakers of vernacular varieties, who are often stymied in schools, courtrooms, job searches, doctor¿s visits, apartment searches and so on. We will focus especially on language and the law, and language in education, drawing on some brand new texts, but also on recent and ongoing research and experimentation at Stanford and elsewhere. (Our schedule will include some visiting lecturers from other universities.).
Same as: LINGUIST 255K

LINGUIST 156. Language, Gender, & Sexuality. 4 Units.
The role of language in the construction of gender, the maintenance of the gender order, and social change. Field projects explore hypotheses about the interaction of language and gender. No knowledge of linguistics required.
Same as: FEMGEN 156X

LINGUIST 157. Sociophonetics. 1-4 Unit.
The study of phonetic aspects of sociolinguistic variation and the social significance of phonetic variation. Acoustic analysis of vowels, consonants, prosody, and voice quality. Hands-on work on collaborative research project. Prerequisite: 105, 110 or equivalent, or consent of instructor.
Same as: LINGUIST 257

LINGUIST 159. American Dialects. 2-4 Units.
What is a dialect, and who speaks one? This course will focus on the fundamentals of linguistic study and dialectology through examinations of regional, social and ethnic dialects in the United States. The course will examine dialect variation on many linguistic levels, from variation in individual words (pop v. soda) to variation in how vowels are pronounced. Historical development of U.S. dialects, linguistic change, perceptual dialectology, and prestige and stigma of dialects will be discussed. Students will participate in real variation research to gain experience with quantitative data in examining the influence of social factors on dialect variation.

LINGUIST 160. Introduction to Language Change. 2-4 Units.
Principles of historical linguistics:, the nature of language change. Kinds and causes of change, variation and diffusion of changes through populations, differentiation of dialects and languages, determination and classification of historical relationships among languages, the reconstruction of ancestral languages and intermediate changes, parallels with cultural and genetic evolutionary theory, and implications of variation and change for the description and explanation of language in general. Prerequisite: introductory course in linguistics.

LINGUIST 167. Languages of the World. 3-4 Units.
The diversity of human languages, their sound systems, vocabularies, and grammars. Tracing historical relationships between languages and language families. Parallels with genetic evolutionary theory. Language policy, endangered languages and heritage languages. Classification of sign languages.

LINGUIST 168. Introduction to Linguistic Typology. 3-4 Units.
This course covers the foundations of the linguistic subfield concerned with comparing and classifying world languages. The course provides an overview of the analytic tools which may be used to identify and classify a language based on its phonological, morphological, and syntactic properties, and explores the major ways in which languages may be similar or different in these domains. Students will acquire a useful toolkit for studying novel, unusual, and typologically diverse linguistic data, and for conducting fieldwork on understudied languages. Prerequisites: Linguist 110, 121A, 121B, 130A, 130B, or permission of the instructor.

LINGUIST 173. The Structure of Russian. 2-4 Units.
A synchronic overview of contemporary standard Russian, including its sound system, word formation and grammatical structure. Emphasis is on problems presented by Russian for current linguistic theory. The acquisition of Russian as a first language.
Same as: LINGUIST 273

LINGUIST 180. From Languages to Information. 3-4 Units.
Extracting meaning, information, and structure from human language text, speech, web pages, social networks. Introducing methods (regex, edit distance, naive Bayes, logistic regression, neural embeddings, inverted indices, collaborative filtering, PageRank), applications (chatbots, sentiment analysis, information retrieval, question answering, text classification, social networks, recommender systems), and ethical issues in both. Prerequisites: CS106B.
Same as: CS 124, LINGUIST 280

LINGUIST 188. Natural Language Understanding. 3-4 Units.
Project-oriented class focused on developing systems and algorithms for robust machine understanding of human language. Draws on theoretical concepts from linguistics, natural language processing, and machine learning. Topics include lexical semantics, distributed representations of meaning, relation extraction, semantic parsing, sentiment analysis, and dialogue agents, with special lectures on developing projects, presenting research results, and making connections with industry. Prerequisites: one of LINGUIST 180/280, CS 124, CS 224N, or CS 224S.
Same as: CS 224U, LINGUIST 288, SYMSYS 195U

LINGUIST 192. Language Testing. 3 Units.
Performance with language (speaking, reading, writing, listening, translating or interpreting) is used to measure a person's proficiency or achievement level in the language. Language performance is also used to measure other human characteristics, including psycho-social states and traits. The course will review basic methods in language measurement and cover their use as applied in education, psychology, and commerce. Topics include both traditional and automatic methods for assessing speaking, reading, writing, affect, and language disorders. Students will develop, apply, and evaluate a language test.
Same as: LINGUIST 292A

LINGUIST 195A. Undergraduate Research Workshop. 1 Unit.
Designed for undergraduates beginning or working on research projects in linguistics. Participants present and receive feedback on their projects and receive tips on the research and writing process.

LINGUIST 196. Introduction to Research for Undergraduates. 1 Unit.
Introduction to linguistic research via presentations by Stanford linguistics faculty and graduate students. Open to undergraduate students interested in linguistics. Required for linguistics majors.

LINGUIST 197A. Undergraduate Research Seminar. 2-3 Units.
Senior capstone seminar. Joint readings in an annually varying topic, exploring the implications and importance of linguistic research for other domains of knowledge or practice.

LINGUIST 198. Honors Research. 1-15 Unit.
.

LINGUIST 199. Independent Study. 1-15 Unit.
.

LINGUIST 200. Foundations of Linguistic Theory. 4 Units.
Restricted to Linguistics Ph.D. students. Theories that have shaped contemporary linguistics; recurrent themes and descriptive practice. Strong background in Linguistics or permission of instructor.

LINGUIST 200C. Foundations of Linguistic Theory: Categories and Concepts. 3-4 Units.
This course investigates foundational issues and recurrent themes in linguistics related to the notions of category and concept. It will review traditional approaches to these notions and consider how they have shaped more recent developments in our understanding. Possible topics include: the world-to-word mapping, the relation between cognitive and grammatical categories, arbitrariness vs. regularity in the grammatical properties of words, and the nature of lexical categories. The discussion will be grounded in lexical semantics, but students will have an opportunity to examine how categorization figures in other areas of linguistics. Restricted to Linguistics Ph.D. students.nnPrerequisites: Graduate-level background in Linguistics or permission of instructor.

LINGUIST 205A. Phonetics. 4 Units.
Phonetics is the systematic study of speech. In this class, we will learn about the physical gestures and timing involved in the articulation of spoken language and about the resulting acoustic signal that is decoded into linguistic units by the human auditory system. The class is structured into two parts: A practical lab component, and a class component. This course highlights both the complexity of the physical nature of producing spoken language, and the highly variable acoustic signal that is interpreted by listeners as language. By the end of this course, you should: (1) Understand the process of preparing an utterance to articulating it; (2) Understand the basic acoustic properties of speech; (3) Provide detailed phonetic transcriptions of speech; (4) Produce and understand the gestures involved in nearly all of the world's speech sounds, and (5) Understand the ways this knowledge can be used to advance our understanding of spoken language understanding by humans and machines. We will be using the software program Praat (https://www.fon.hum.uva.nl/praat/) weekly, beginning on the first day of class. Please download the program and have it installed on your computer before class begins.
Same as: LINGUIST 105

LINGUIST 205B. Advanced Phonetics. 2-4 Units.
In this course, we will read and discuss literature relating broadly to issues of attention in speech perception. This course will illuminate the complexity of speech perception, identify where we are as a field in understanding human behavior with respect to speech perception, pinpoint specific areas of research that might be informed by considering attention, and to understand the impact an attentional component in current models would have on the structure and organization of language and on our current understanding of linguistic experience.

LINGUIST 207. Seminar in Phonetics: The perception and recognition of clear and casual speech.. 2-4 Units.
Through readings and discussion, we will focus on two questions in this seminar:n(1) Is the balance of top-down versus bottom-up information different when processing careful vs. casual speech?n(2) What provides more information to a listener - Half of a clearly-articulated word, or an entire reduced word?nThis is not a project-based seminar, but the seminar is linked to an ongoing research project, and we will use that project to ground how a researcher might go about addressing the above questions. We will refer to our in-progress project to provide concrete examples of (a) testable, theoretically-grounded hypotheses, (b) appropriately matched methods/design, (c) benefits/costs of different types of statistical methods, and (d) supported vs. speculative accounts. The seminar is heavily based on reading and discussion, but will be supplemented by the practical issues associated with a related project. At the end of the seminar, students will have a basic understanding of the literature related to the topic, what gaps/inconsistencies exist in that work, and how to pursue those gaps, if interested. A research proposal is required at the end of the quarter.

LINGUIST 207A. Advanced Phonetics. 3 Units.
In this seminar, we will work collaboratively on a research project in spoken word recognition and/or memory, that is sensitive to current issues dealing with phonetic variation. We will choose one of four clearly delineated questions and work as a team throughout the quarter to complete the project. With this structure, everyone will gain hand-on experience in experimental design, stimulus development, experimental setup, data collection, and data analysis.

LINGUIST 207L. Phonetics Research Lab. 1 Unit.
Regular meetings of the members of the Phonetics Lab.

LINGUIST 208. Memory for Spoken Words. 3 Units.
Research on memory for spoken words altered the course of much research in phonetics and psycholinguistics since the 1990s. In 2019, though, we are facing three main issues: (1) Much work was unmoved by this seminal work, carrying assumptions that need to be clearly thought through and addressed, (2) We still have no clear grasp of all the intricacies and predictions of this earlier work, and (3) Redundancy in research exists, where parts of our field appear to be caught in a loop. This seminar will be reading and discussion based, focusing on work related to each of these three points. Students will be expected to read two papers a week (one course paper, and one paper cited within that work) to bring us to a clear picture of past work. In addition, the final project involves close collaboration between each student and me, to arrive at a novel and feasible study proposal that addresses one of these three issues, with the expectation that the study will be conducted in the Spring and/or Summer quarters.

LINGUIST 210A. Phonology. 3-4 Units.
Introduction to phonological theory and analysis based on cross-linguistic evidence. Topics: phonological representations including features, syllables, metrical structure; phonological processes; phonological rules and constraints; phonological typology and universals; the phonology/morphology interface; Optimality Theory and Harmonic Grammar.

LINGUIST 210B. Advanced Phonology. 2-4 Units.
New developments in phonological theory, in particular Optimality Theory, primarily on the empirical basis of stress, syllable structure, prosodic organization, and phonological variation.

LINGUIST 211. Metrics. 1-4 Unit.
Principles of versification from a linguistic point of view. Traditional and optimality-theoretic approaches. The canonical system of English metrics, and its varieties and offshoots. The typology of metrical systems and its linguistic basis. Meter and performance.

LINGUIST 212B. Seminar in Phonology. 1-4 Unit.
May be repeated for credit.

LINGUIST 213. Corpus Phonology. 3-4 Units.
An introduction to constructing and using phonologically annotated corpora to test phonological hypotheses. Hands-on experience in corpus manipulation and phonological modeling.

LINGUIST 214. Phonology Workshop. 1-2 Unit.
May be repeated for credit.

LINGUIST 215. Corpus Phonology: Sentence Prosody. 2-4 Units.
Prosodic prominence at the sentence level from phonological, syntactic, and discourse perspectives. The course combines lectures with hands-on corpus work, with the opportunity to develop joint projects.

LINGUIST 216. Morphology. 2-4 Units.
Major contemporary approaches to morphology. Word-based vs. morpheme-based morphol- ogy. Realizational vs. generative morphology. Affix ordering and morphological constituency. The mirror principle. The morphology/syntax boundary and the lexicalist hypothesis. Compound- ing: synthetic and phrasal compounds, incorporation. Prosodic morphology. The semantics of inflection and derivation. Feature decomposition of inflectional categories: markedness, blocking, underspecification. Gaps and periphrasis. Inheritance hierarchies. Valence-changing operations. This is a 4-unit course. May be taken for fewer units with prior approval of the instructor.

LINGUIST 217. Morphosyntax. 2-4 Units.
The role of morphology in grammar: how word structure serves syntax in the expression of meaning. Lexical semantics, Theta-roles, argument structure, and grammatical relations. Licensing: case, agreement, word order, and their interaction.

LINGUIST 218. Seminar on Morphological Theories. 2-4 Units.
Word formation and the lexicon: empirical generalizations and theoretical approaches. Lexicalist and Distributed Morphology. How words are built and interpreted: constituency and headedness, morpheme order and scope, the mirror principle, bracketing paradoxes, the hierarchy of functional categories. Paradigms, blocking, gaps, periphrasis, syncretism. Locality, head movement vs. selection, constraints on allomorphy, incorporation, polysynthesis, cliticization and prosodic re-ordering phenomena.

LINGUIST 222A. Foundations of Syntactic Theory I. 3-4 Units.
The roles of the verb and the lexicon in the determination of sentence syntax and their treatment in modern grammatical theories. Empirical underpinnings of core phenomena, including the argument/adjunct distinction, argument structure and argument realization, control and raising, operations on argument structure and grammatical function changing rules. Motivations for a lexicalist approach rooted in principles of lexical expression and subcategorization satisfaction. Prerequisite: Linguist 121A, Linguist 121B, or permission of instructor.

LINGUIST 222B. Foundations of Syntactic Theory II. 3-4 Units.
The nature of unbounded dependency constructions such as constituent questions, topicalization, relative clauses, and clefts, among others. Topics include A-bar movement, constraints on extraction, successive cyclicity, as well as variation in the way unbounded dependencies are established crosslinguistically. Prerequisite: 222A.

LINGUIST 222C. Foundations of Syntactic Theory III - Topics. 3-4 Units.
This course introduces contemporary approaches to syntactic theory. Focus is on a few central topics of current interest such as ellipsis, binding, locality, movement, case and agreement, among others. Prerequisites: Linguist 222B or permission of the instructor.

LINGUIST 223. Introduction to Minimalist Syntax. 3-4 Units.
Introduces the basics of Minimalist architecture and structure-building operations, with attention to the communication of syntax with the phonological and semantic interfaces. Topics include phrase structure, locality and phases, phrasal and head movement, functional categories, and features. A previous graduate-level syntax course, or permission of the instructor required.

LINGUIST 225. Seminar in Syntax. 2-4 Units.
Seminar on advanced topics in syntax. Topics may vary from year to year. May be repeated for credit.

LINGUIST 225A. Seminar in Syntax: Ellipsis. 1-4 Unit.
Diverse kinds of elliptical utterances. The fundamental problems in grammatical analysis of ellipsis (primary focus: English). The clarification of key data relating to current theoretical controversies. May be repeated for credit.

LINGUIST 225B. Seminar in Syntax: Syntax/Phonology Interface. 2-4 Units.
The nature of the syntax-phonology interface. To what extent does syntax influence phonology and in what ways does phonology influence syntax? Topics may include: word order and linearization, second-position effects, prosodic structure and the prosodic hierarchy, sentential stress, ellipsis, focus, allomorphy, among others. May be repeated for credit. Prerequisites: Linguistics 222A (Foundations of Syntactic Theory I) and Linguistics 210A (Phonology), or permission of the instructor.

LINGUIST 225D. Seminar in Syntax: Advanced Topics. 2-4 Units.
Seminar on advanced topics in syntax. Topics may vary from year to year. Prerequisites: LINGUIST 222A and 222B, or permission of instructor. May be repeated for credit.

LINGUIST 225S. Syntax and Morphology Research Seminar. 1 Unit.
Presentation of ongoing research in syntax and morphology. May be repeated for credit.

LINGUIST 227. Linguistic Meaning and Legal Interpretation. 3-4 Units.
This course applies analytical concepts from semantics and pragmatics to the interpretation of legal texts. It critically examines methods and theories of legal interpretation, such as 'textualism', 'intentionalism', 'originalism'. Prerequisites: LINGUIST 130A/230A, or PHIL 181/281, or permission of instructor.
Same as: LINGUIST 127

LINGUIST 230A. Introduction to Semantics and Pragmatics. 4 Units.
Linguistic meaning and its role in communication. Topics include logical semantics, conversational implicature, presupposition, and speech acts. Applications to issues in politics, the law, philosophy, advertising, and natural language processing. Those who have not taken logic, such as PHIL 150 or 151, should attend section. Prerequisites: LINGUIST 1, SYMSYS 1 (LINGUIST 35), consent of instructor, or graduate standing in Linguistics.
Same as: LINGUIST 130A

LINGUIST 230B. Advanced Semantics. 2-4 Units.
The primary goal of this course is to cover advanced topics in semantics and pragmatics that are central to research in those fields. The course is aimed at advanced graduate students who plan to do research in semantics, pragmatics, or philosophy of language. Prerequisites: LINGUIST 130A/230A or permission from instructor.

LINGUIST 230C. Advanced Topics in Semantics & Pragmatics. 1-4 Unit.
We focus on a topic in the meaning and use of linguistic expressions to explore a number of central issues in semantics and pragmatics. These include quantification, binding, referentiality, presupposition, pragmatic inferences, context-dependency, indexicality, and systems of dynamic interpretation. Prerequisites: LINGUIST 230B or permission of the instructor.

LINGUIST 230E. Logic Laboratory. 1 Unit.
Typically taken in conjunction with 130A/230A.
Same as: LINGUIST 130C

LINGUIST 230P. Advanced Pragmatics. 2-4 Units.
The primary goal of this course is to cover advanced topics in pragmatics that are central to research in those fields. The course is aimed at advanced graduate students who plan to do research in semantics, pragmatics, or philosophy of language. Prerequisites: LINGUIST 130A/230A or permission of instructor.

LINGUIST 232A. Lexical Semantics. 2-4 Units.
Introduction to issues in word meaning, focused primarily around verbs. Overview of the core semantic properties of verbs and the organization of the verb lexicon. Approaches to lexical semantic representation, including semantic role lists, proto-roles, and causal and aspectual theories of event conceptualization. Prerequisite: Linguist 130A, Linguist 130B, or permission of instructor.

LINGUIST 232B. Seminar in Lexical Semantics: Unaccusativity. 1-4 Unit.
A general introduction to the phenomenon of unaccusativity, followed by in-depth exploration of several facets of this phenomenon, chosen according to participant's interests. Potential topics include: an assessment of proposed semantic determinants of unaccusativity, the linguistic representation of unaccusativity, its crosslinguistic manifestations, and case studies of unaccusative phenomena (e.g. auxiliary selection, resultatives, the causative alternation, psych-verbs, weather verbs). These topics may be approached from theoretical, typological, psycholinguistic, and acquisition perspectives. May be repeated for credit with different content. Prerequisite: Linguist 232A or permission of the instructor.

LINGUIST 234. The Structure of Discourse: Theory and Applications. 2-4 Units.
This course examines the linguistic structure of discourse, with a particular emphasis on learning to identify the emergent structures of spontaneous conversations. Specific topics include: narrative structure; turn-taking; discourse markers; face and politeness; inference and implicature; discourse coherence; reference; intertextuality; stance-taking; and framing. Class-time is split between hands-on data analysis and the discussion of both recent and foundational research on conversation. Throughout the class discussions and data analysis projects, students will also explore how the structure of discourse is shaped by cognition, social identities, interpersonal relationships, and cultural contexts.nnPrerequisites: Prior coursework in linguistics or permission of the instructor.
Same as: LINGUIST 134A

LINGUIST 235. Semantic Fieldwork. 2-4 Units.
Techniques for evidence from less well-studied languages within formal semantic theory. Semantic phenomena, and techniques for investigating them, including scope, quantifiers, pronouns, focus, tense, aspect, mood, evidentiality, and information structure. Practical work on a language.

LINGUIST 236. Seminar in Semantics: Conditionals. 2-4 Units.
Discussion of the semantics and pragmatics of conditionals with a focus on recent developments in linguistics, analytic philosophy, and cognitive psychology.

LINGUIST 237. Seminar in Semantics: Gradation & Modality. 1-4 Unit.
Discussion of major semantic theories of modality and gradation, with special attention to empirical and logical issues that arise from the study of gradable modals.

LINGUIST 239. Semantics and Pragmatics Research Seminar. 1-2 Unit.
Presentation of ongoing research in semantics. May be repeated for credit.

LINGUIST 241. Language Acquisition II. 4 Units.
Pragmatics and acquisition. May be repeated for credit.

LINGUIST 242. Heritage Languages. 3-4 Units.
The linguistic and cultural properties of Heritage languages, which are partially acquired and supplanted by a dominant language in childhood. Topics: Syntactic, phonological and morphological properties of heritage languages, implications from experimental HL research for language universals, cultural vs. linguistic knowledge, the role of schooling in HL competence, influence of the dominant language on the HL, and pedagogical issues for HL learners in the classroom.
Same as: LINGUIST 142

LINGUIST 245A. Introduction to Psycholinguistics. 4 Units.
How do people do things with language? How do we go from perceiving the acoustic waves that reach our ears to understanding that someone just announced the winner of the presidential election? How do we go from a thought to spelling that thought out in a sentence? How do babies learn language from scratch? This course is a practical introduction to psycholinguistics -- the study of how humans learn, represent, comprehend, and produce language. The course aims to provide students with a solid understanding of both the research methodologies used in psycholinguistic research and many of the well-established findings in the field. Topics covered will include visual and auditory recognition of words, sentence comprehension, reading, discourse and inference, sentence production, language acquisition, language in the brain, and language disorders. Students will conduct a small but original research project and gain experience with reporting and critiquing psycholinguistic research.
Same as: LINGUIST 145, PSYCH 140

LINGUIST 245B. Methods in Psycholinguistics. 4 Units.
Over the past ten years, linguists have become increasingly interested in testing theories with a wider range of empirical data than the traditionally accepted introspective judgments of hand-selected linguistic examples. Consequently, linguistics has seen a surge of interest in psycholinguistic methods across all subfields. This course will provide an overview of various standard psycholinguistic techniques and measures, including offline judgments (e.g., binary categorization tasks like truth-value judgments, Likert scale ratings, continuous slider ratings), response times, reading times, eye-tracking, ERPs, and corpus methods. Students will present and discuss research articles. Students will also run an experiment (either a replication or an original design, if conducive to the student¿s research) to gain hands-on experience with experimental design and implementation in html/javascript and Mechanical Turk; data management, analysis, and visualization in R; and open science tools like git/github.
Same as: SYMSYS 195L

LINGUIST 246. Foundations of Psycholinguistics. 4 Units.
Basic readings in language processing and language use, with a historical dimension; discussion each week in class of the relevant papers.

LINGUIST 247. Seminar in Psycholinguistics: Advanced Topics. 2-4 Units.
Adaptation to speaker variability in language use has receivednincreasing attention in recent years from linguists and psychologistsnalike, who have recognized that, though long ignored, it poses a problemnfor static theories of language. The course will present a broad surveynof recent work in this area across levels of linguistic representation,nincluding phonetic, lexical, syntactic, prosodic, and semanto-pragmaticnadaptation. We will discuss the cognitive underpinnings of adaptationnand its relation to priming and learning, compare adaptation in varyingndomains, and consider the implications for theories of language andncommunication. The course will be organized primarily around discussionnof assigned readings. Students will develop a research proposal relevantnto issues in adaptation. May be repeated for credit. Prerequisite: LINGUIST 145 or background in any subfield of linguistics.
Same as: PSYCH 227

LINGUIST 247L. Alps Research Lab. 1 Unit.
Regular meetings of members of the Alps Lab.

LINGUIST 248. Seminar in Developmental Psycholinguistics. 4 Units.
Children's acquisition of word meaning, with particular emphasis on socio-pragmatic approaches vs. a priori constraints. Consideration of differences in acquisition by syntactic category (nouns versus verbs), by semantic domain, and by conversational frame, in considering how children build up a lexical repertoire.

LINGUIST 249. Language Processing. 2-4 Units.
Understanding spoken or written language requires the rapid, incremental processing of novel compositional structures, as well as the integration of the incoming language stream with multiple sources of information, such as the prior discourse, physical context, social information, etc. How are humans able to efficiently accomplish this task? To address this question, this course will consider principles of sentence and discourse processing that guide language understanding and features of sentence & discourse structure that facilitate comprehension. Specific topics are likely to include reference processing, memory & forgetting, individual differences in comprehension ability, the role of context, and computational models of language comprehension.

LINGUIST 249L. Workshop on Incremental Language Processing. 1 Unit.
Language is processed incrementally over time. This has consequences for language comprehension, production, acquisition, and change, all of which occur at different timescales. What is the role of time in language? The class will be based around visiting lectures by major researchers in this area, along with meetings to prepare for their visits by discussing key readings. May be repeated for credit.
Same as: PSYCH 249L

LINGUIST 250. Sociolinguistic Theory and Analysis. 3-4 Units.
Methods of modeling the patterned variation of language in society. Emphasis is on variation, its relation to social structure and practice, and its role in linguistic change. Intersection between quantitative and qualitative analysis, combining insights of sociology and linguistic anthropology with quantitative linguistic data. Prerequisite: graduate standing in Linguistics or consent of instructor.

LINGUIST 251. Sociolinguistic Field Methods. 3-5 Units.
Strengths and weaknesses of the principal methods of data collection in sociolinguistics.

LINGUIST 252. Sociolinguistics and Pidgin Creole Studies. 2-4 Units.
Introduction to pidgins and creoles, organized around the main stages in the pidgin-creole life cycle: pidginization, creolization, and decreolization. Focus is on transformations in the English language as it was transported from Britain to Africa, Asia, the Caribbean, and the Pacific. Resultant pidginized and creolized varieties such as Nigerian Pidgin English, Chinese Pidgin English, New Guinea Tok Pisin, Suriname Sranan, and the creole continua of Guyana, Jamaica, and Hawaii. Also French, Dutch, Portugese, Chinook, Motu, and Sango.
Same as: LINGUIST 152

LINGUIST 253. Race, Ethnicity, and Language: Racial, Ethnic, and Linguistic Formations. 3-5 Units.
Language, as a cultural resource for shaping our identities, is central to the concepts of race and ethnicity. This seminar explores the linguistic construction of race and ethnicity across a wide variety of contexts and communities. We begin with an examination of the concepts of race and ethnicity and what it means to be "doing race," both as scholarship and as part of our everyday lives. Throughout the course, we will take a comparative perspective and highlight how different racial/ethnic formations (Asian, Black, Latino, Native American, White, etc.) participate in similar, yet different, ways of drawing racial and ethnic distinctions. The seminar will draw heavily on scholarship in (linguistic) anthropology, sociolinguistics and education. We will explore how we talk and don't talk about race, how we both position ourselves and are positioned by others, how the way we talk can have real consequences on the trajectory of our lives, and how, despite this, we all participate in maintaining racial and ethnic hierarchies and inequality more generally, particularly in schools.
Same as: ANTHRO 320A, CSRE 389A, EDUC 389A

LINGUIST 254. Race, Ethnicity, and Language: Writing Race, Ethnicity, and Language in Ethnography. 3-4 Units.
This methods seminar focuses on developing ethnographic strategies for representing race, ethnicity, and language in writing without reproducing the stereotypes surrounding these categories and practices. In addition to reading various ethnographies, students conduct their own ethnographic research to test out the authors' contrasting approaches to data collection, analysis, and representation. The goal is for students to develop a rich ethnographic toolkit that will allow them to effectively represent the (re)production and (trans)formation of racial, ethnic, and linguistic phenomena.
Same as: ANTHRO 398B, EDUC 389B

LINGUIST 255A. Seminar in Sociolinguistics: California Dialectology. 2-4 Units.
This seminar organizes and analyzes data gathered by the Voices of California project. This year, we will be working with the data from Amador County. May be repeated for credit.

LINGUIST 255B. Sociolinguistics Classics and Community Studies. 3-5 Units.
This course discusses some of the major community studies in sociolinguistics (e.g. Labov in NYC, Wolfram in Detroit, Trudgill in Norwich, Milroy in Belfast, and a selection of others up to the present) and the work of other classic sociolinguistic figures (e.g. Romaine, Hymes) who contributed in other ways. Our goal is to reach a deep understanding and critique of their methods, findings and ideas, to improve our own research and our responses to new developments in the field.

LINGUIST 255C. Seminar in Sociolinguistics: Sociogrammar. 2-4 Units.
Seminar style course exploring the literature on sociolinguistic variation in morphology and syntax from the 1960s to the present, and its implication for (socio)linguistic theory, especially in relation to (and in contrast with) socio-phonetics.

LINGUIST 255D. Seminar in Sociolinguistics: Character Types in Sociolinguistics. 1-4 Unit.
Figures of personhood, personas, character types, and stereotypes in the study of linguistic variation. What are the significant differences among these types? Are these social types merely the vehicles through which social meanings travel or do they constitute the meanings themselves?.

LINGUIST 255E. Seminar in Sociolinguistics: Stylistic Landscapes. 2-5 Units.
The study of the role of language in the stylistic construction of personae has progressed significantly over the past decade. We know that patterns of association of these personae ramp up to construct the major macro-social categories such as gender, age, class, ethnicity, hence patterns across their linguistic styles correlate with these categories. We have yet, though, to theorize how that patterning takes place on the ground. This seminar will explore ways to theorize the stylistic landscape. nPrerequisites: 105/205 and 250, or consent of instructor.

LINGUIST 255F. Seminar in Sociolinguistics: Classics in Sociolinguistics. 1-4 Unit.
Figures of personhood, personas, character types, and stereotypes in the study of linguistic variation. What are the significant differences among these types? Are these social types merely the vehicles through which social meanings travel or do they constitute the meanings themselves?.

LINGUIST 255G. Seminar in Sociolinguistics: Language & Embodiment. 1-4 Unit.
Topics vary by quarter. This course examines the role of the body (beyond speech articulators) in language use. Topics will include gesture, facial expression, physical stance, and hexis. Readings will be drawn from a variety of fields outside of linguistics. May be repeated for credit.

LINGUIST 255H. Seminar in Sociolinguistics: Iconicity. 3-5 Units.
The nature of iconicity in language, with a focus on the role of sound symbolism in sociolinguistic variation.

LINGUIST 255I. Seminar in Sociolinguistics: Class Stratification of the California Vowel Shift in Sacramento. 2-4 Units.
Models of the role of socioeconomic class in the spread of sound change are based on studies in cities that have had a stable English-speaking population for several centuries. The question underlying this seminar is whether this model applies to California, whose dialect is in the early stages of development and whose cities have, for example, no major industrial history. We will use data from the Voices of California fieldsite in Sacramento to examine the role of class in the California Vowel Shift.

LINGUIST 255J. Seminar in Sociolinguistics: Style. 3-4 Units.
.

LINGUIST 255K. Seminar in Sociolinguistics: Applied Sociolinguistics -- Tryna Make a Difference. 3-4 Units.
In this new course, we will explore how sociolinguistic research and principles can be used to make a positive difference in society, especially for speakers of vernacular varieties, who are often stymied in schools, courtrooms, job searches, doctor¿s visits, apartment searches and so on. We will focus especially on language and the law, and language in education, drawing on some brand new texts, but also on recent and ongoing research and experimentation at Stanford and elsewhere. (Our schedule will include some visiting lecturers from other universities.).
Same as: LINGUIST 155K

LINGUIST 255L. Seminar in Sociolinguistics: Multiracial Identity in Variation Studies. 1-4 Unit.
This course confronts the challenge of investigating linguistic variation among multiracial speakers. Hands-on individual and collaborative projects using the voices of California corpus. Prerequisite: Linguistics 258 or equivalent, no exceptions.

LINGUIST 257. Sociophonetics. 1-4 Unit.
The study of phonetic aspects of sociolinguistic variation and the social significance of phonetic variation. Acoustic analysis of vowels, consonants, prosody, and voice quality. Hands-on work on collaborative research project. Prerequisite: 105, 110 or equivalent, or consent of instructor.
Same as: LINGUIST 157

LINGUIST 257L. Interactional Phonetics Research Lab. 1 Unit.
Sociophonetic, discourse-analytic, and computational approaches to social interaction. Meetings consist of presentations of research, discussions of readings, and collaborative research project work. Prerequisites: Linguist 250, Linguist 258, or Linguist 258A.

LINGUIST 258. Analysis of Variation. 1-4 Unit.
The quantitative study of linguistic variability in time, space, and society emphasizing social constraints in variation. Hands-on work with variable data. Prerequisites: 105/205 and 250, or consent of instructor.

LINGUIST 258A. Variation and Social Meaning. 2-4 Units.
The social meaning of linguistic variation. Approaches to investigating social meaning, encoding meaning across different levels of language, the structure of meaning and theories of indexicality, the role of meaning in language change.

LINGUIST 260A. Historical Morphology and Phonology. 2-4 Units.
Sound change and analogical change in the perspective of linguistic theory. Internal and comparative reconstruction. Establishing genetic relationships.

LINGUIST 260B. Historical Morphosyntax. 2-4 Units.
Morphological and syntactic variation and change. Reanalysis, grammaticalization. The use of corpora and quantitative evidence. This is a 4-unit course. May be taken for fewer units with prior approval of the instructor.

LINGUIST 264. English Transplanted, English Transformed: Pidgins and Creoles. 2-4 Units.
English varieties around the world, including white vernacular dialects and creole, pidgin, and indiginized Englishes. Emphasis is on the historical circumstances of origin, linguistic characteristics, and social setting in colonial and postcolonial societies. Theoretical issues pertaining to language contact, language shift, and pidgin and creole formation.

LINGUIST 265. African American Vernacular English. 3-5 Units.
Vocabulary, pronunciation and grammatical features of the systematic and vibrant vernacular English [AAVE] spoken by African Americans in the US, its historical relation to British dialects, and to English creoles spoken on the S. Carolina Sea Islands (Gullah), in the Caribbean, and in W. Africa. The course will also explore the role of AAVE in the Living Arts of African Americans, as exemplified by writers, preachers, comedians and actors, singers, toasters and rappers, and its connections with challenges that AAVE speakers face in the classroom and courtroom. Service Learning Course (certified by Haas Center). UNITS: 3-5 units. Most students should register for 4 units. Students willing and able to tutor an AAVE speaking child in East Palo Alto and write an additional paper about the experience may register for 5 units, but should consult the instructor first. Students who, for exceptional reasons, need a reduced course load, may request a reduction to 3 units, but more of their course grade will come from exams, and they will be excluded from group participation in the popular AAVE Happenin at the end of the course.
Same as: AFRICAAM 21, CSRE 21, LINGUIST 65

LINGUIST 266. Vernacular English and Reading. 4-5 Units.
Discusses some of the literature on the relation between use of vernacular English varieties (e.g. African American Vernacular English, Chicano English) and the development of literacy (especially in Standard English). But our primary focus is on improving the reading skills of African American and Latino students in local schools through the Reading Road program developed at the University of Pennsylvania. Students must commit to tutoring one or more elementary students weekly, using the program. L65 AAVE recommended, but not required.
Same as: LINGUIST 66

LINGUIST 267. Panini. 2-4 Units.
Panini's "Astadhyayi", the most complete generative grammar of any language yet written, is the source of many of the principles and formal techniques of modern linguistic theory. Remarkably, in Pa 'n.ini's work these emerge just from jointly maximizing empirical coverage and minimizing description length. We review the overall organization of his grammar and its motivation, the levels of representation, the types of rules and constraints, and the principles that govern their application and interaction. Among the specific aspects of the analysis that we will examine are the thematic role-based syntax, the lexicalist analysis of word-formation and inflection, and the stratally organized phonology. Course is 4 units. May be taken for fewer units with prior approval from instructor.

LINGUIST 271. Structure of Basque. 2-4 Units.
Introduction to key topics in Basque morphology, syntax, semantics and how they bear on current theoretical debates. Topics covered may include basic clause structure and word order, case-marking and ergativity, the expression of motion and location.

LINGUIST 272. Structure of Finnish. 2-4 Units.
Central topics in Finnish morphology, syntax, and semantics and how they bear on current theoretical debates. Topics: clause structure; case; aspect; word order.

LINGUIST 272A. Structure of Slavic. 2-4 Units.
Central topics in the syntax, morphology, and phonology of Slavic languages and how they bear on current theoretical debates. Prerequisites: Linguistics 222A (Foundations of Syntactic Theory I) and Linguistics 210A (Phonology).

LINGUIST 273. The Structure of Russian. 2-4 Units.
A synchronic overview of contemporary standard Russian, including its sound system, word formation and grammatical structure. Emphasis is on problems presented by Russian for current linguistic theory. The acquisition of Russian as a first language.
Same as: LINGUIST 173

LINGUIST 274A. Linguistic Field Methods I. 3-4 Units.
Practical training in the collection and analysis of linguistic data from native speakers of a language largely unknown to the investigator. Documentation of endangered languages. Research goals, field trip preparation, ethics (including human subjects, cooperation with local investigators, and governmental permits), working in the community, technical equipment, and analytical strategies. Emphasis is on the use of recording devices and computers in collection and analysis. Students are strongly encouraged to make a commitment to both 274A and 274B in the same year. Prerequisites: One course in phonetics or phonology and syntax, or permission of the instructor. Open to undergraduates with permission of instructor only.

LINGUIST 274B. Linguistic Field Methods II. 3-4 Units.
Continuation of 274A, with a focus on student projects in a targeted language. Prerequisite: 274A or consent of instructor. Graduate students are strongly encouraged to make a commitment to both 274A and 274B in the same year. For full credit, students are expected to work privately with the consultant outside of class time.

LINGUIST 275. Probability and Statistics for linguists. 2-4 Units.
Introduction to probability and statistical inference, with a focus on conceptual and practical issues relevant to theoretical, experimental, and corpus linguistics. Data analysis and modeling using R. Course project will involve reproducing a published modeling result or statistical analysis in full detail.

LINGUIST 276. Quantitative Methods in Linguistics. 2-4 Units.
Introduction to methods for collecting and analyzing quantitative linguistic data, with a primary focus on the use of corpora in exploring theoretical questions in various areas of linguistics. Topics include the access and retrieval of corpus data (including web-based corpora), data annotation, and statistical modeling. Practical experience with R, Python scripting, and setting up online experiments through Amazon Mechanical Turk.

LINGUIST 278. Programming for Linguists. 1-4 Unit.
Computer programming techniques for collecting and analyzing data in linguistic research. Introduction to the UNIX, regular expressions, and Python scripting. Hands-on experience gathering, formatting, and manipulating corpus, field, and experimental data, combining data from multiple sources, and working with existing tools. Knowledge of computer programming not required.

LINGUIST 280. From Languages to Information. 3-4 Units.
Extracting meaning, information, and structure from human language text, speech, web pages, social networks. Introducing methods (regex, edit distance, naive Bayes, logistic regression, neural embeddings, inverted indices, collaborative filtering, PageRank), applications (chatbots, sentiment analysis, information retrieval, question answering, text classification, social networks, recommender systems), and ethical issues in both. Prerequisites: CS106B.
Same as: CS 124, LINGUIST 180

LINGUIST 281. Computational Models of Linguistic Formalism. 1-4 Unit.
This seminar will explore the computational properties of a small set of formalisms from phonology, morphology, syntax, and semantics, the choice depending on the interests of the participants. Possible topics include, but are not limited to, finite-state techniques, Optimality Theory, Unification-based grammar, Montague Grammar, Sound change, Corpus-based exploration, and Translation.

LINGUIST 284. Natural Language Processing with Deep Learning. 3-4 Units.
Methods for processing human language information and the underlying computational properties of natural languages. Focus on deep learning approaches: understanding, implementing, training, debugging, visualizing, and extending neural network models for a variety of language understanding tasks. Exploration of natural language tasks ranging from simple word level and syntactic processing to coreference, question answering, and machine translation. Examination of representative papers and systems and completion of a final project applying a complex neural network model to a large-scale NLP problem. Prerequisites: calculus and linear algebra; CS124, CS221, or CS229.
Same as: CS 224N, SYMSYS 195N

LINGUIST 285. Spoken Language Processing. 2-4 Units.
Introduction to spoken language technology with an emphasis on dialogue and conversational systems. Deep learning and other methods for automatic speech recognition, speech synthesis, affect detection, dialogue management, and applications to digital assistants and spoken language understanding systems. Prerequisites: CS124, CS221, CS224N, or CS229.
Same as: CS 224S

LINGUIST 286. Information Retrieval and Web Search. 3 Units.
Text information retrieval systems; efficient text indexing; Boolean, vector space, and probabilistic retrieval models; ranking and rank aggregation; evaluating IR systems; text clustering and classification; Web search engines including crawling and indexing, link-based algorithms, web metadata, and question answering; distributed word representations. Prerequisites: CS 107, CS 109, CS 161.
Same as: CS 276

LINGUIST 287. Extracting Social Meaning and Sentiment. 3 Units.
Methods for extracting social meaning (speaker perspectives, emotions and attitudes) from text and speech. Topics include sentiment analysis and summarization, detection of deception, sarcasm, emotion, and personality.nnAnalysis of meaning-bearing characteristics of the speaker and topic, including text, discourse, prosodic and other cues. Prerequisite: CS 124 or 221 or 229 or permission of instructors.

LINGUIST 288. Natural Language Understanding. 3-4 Units.
Project-oriented class focused on developing systems and algorithms for robust machine understanding of human language. Draws on theoretical concepts from linguistics, natural language processing, and machine learning. Topics include lexical semantics, distributed representations of meaning, relation extraction, semantic parsing, sentiment analysis, and dialogue agents, with special lectures on developing projects, presenting research results, and making connections with industry. Prerequisites: one of LINGUIST 180/280, CS 124, CS 224N, or CS 224S.
Same as: CS 224U, LINGUIST 188, SYMSYS 195U

LINGUIST 289. Topics in Computational Linguistics: Computational Models of Language Change. 3-4 Units.
Topics in computational models of language change. Vector semantic models of change in word meaning, word sentiment, and word innovation, computational models of syntactic change and sound change, and models of language evolution like the interated learning paradigm. Prerequisites: LINGUIST 288, LINGUIST 230A, LINGUIST 250, and either LINGUIST 205A or 210A. Or consent of instructor.

LINGUIST 289L. Computational Linguistics Research Lab. 1 Unit.
Regular meetings of the members of the Computational Research Lab.

LINGUIST 292A. Language Testing. 3 Units.
Performance with language (speaking, reading, writing, listening, translating or interpreting) is used to measure a person's proficiency or achievement level in the language. Language performance is also used to measure other human characteristics, including psycho-social states and traits. The course will review basic methods in language measurement and cover their use as applied in education, psychology, and commerce. Topics include both traditional and automatic methods for assessing speaking, reading, writing, affect, and language disorders. Students will develop, apply, and evaluate a language test.
Same as: LINGUIST 192

LINGUIST 294. Linguistic Research Discussion Group. 1 Unit.
Restricted to first-year Linguistics Ph.D. students.

LINGUIST 390. M.A. Project. 1-6 Unit.
.

LINGUIST 391A. Curricular Practical Training. 1 Unit.
Educational opportunities in research and development labs in industry. Qualified linguistics students engage in internship work and integrate that work into their academic program. Students register during the quarter they are employed and complete a research report outlining their work activity, problems investigated, results, and follow-on projects they expect to perform. Course may be repeated for credit.

LINGUIST 393. Summer Research Activity. 1-8 Unit.
Restricted to Linguistics Ph.D. students. May be repeated for credit.

LINGUIST 394. TA Training Workshop. 1 Unit.
For second-year graduate students in Linguistics.

LINGUIST 395. Research Workshop. 1-2 Unit.
Restricted to Linguistics Ph.D. students. Student presentations of research toward qualifying papers. May be repeated for credit.

LINGUIST 395C. Summer Research Workshop. 1-2 Unit.
Restricted to Linguistics Ph.D. students. May be repeated for credit. Student presentations of ongoing research plus professional development sessions.

LINGUIST 395D. Linguistics Writing Group. 1 Unit.
Restricted to Linguistics Ph.D. students. May be repeated for credit. Meets weekly to support student writing projects.

LINGUIST 396. Research Projects in Linguistics. 2-3 Units.
Mentored research project for first-year graduate students in linguistics.

LINGUIST 397. Directed Reading. 1-15 Unit.
.

LINGUIST 398. Directed Research. 1-15 Unit.
.

LINGUIST 399. Dissertation Research. 1-15 Unit.
.

LINGUIST 802. TGR Dissertation. 0 Units.
.

MASTER OF LIBERAL ARTS

Courses offered by the Master of Liberal Arts Program are listed under the subject code MLA on the (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=MLA&filter-catalognumber-MLA=on) Stanford Bulletin's (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=MLA&filter-catalognumber-MLA=on) ExploreCourses web site (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=MLA&filter-catalognumber-MLA=on).

Program Description

The Master of Liberal Arts (MLA) program aims to provide a flexible, interdisciplinary program for returning adult students who seek a broad education in the liberal arts. Begun in 1991, the underlying premise of the MLA program is that knowledge gained through an interdisciplinary course of study leads to intellectual independence and satisfaction not always found in discipline-based programs of study. The goals of the MLA program are to develop advanced critical thinking, to foster intellectual range and flexibility, and to cultivate an individual's ability to find the connections among different areas of human thought: art, history, literature, music, philosophy, political science, science, and theology.

The program is designed with part-time students in mind: seminars meet in the evening, and students complete the degree in 4-5 years. All master's seminars are taught by members of the Stanford faculty. Seminar size is limited to 20 students.

Learning Outcomes (Graduate)

The purpose of the Master of Liberal Arts Program is to address subjects that cross disciplinary boundaries; to develop an understanding of the strength and the shortcomings of disciplinary evaluation; to help students to refine their skills in writing, research, critical thinking, collaborative work, and collegial discussion. While students are not being groomed for academic careers, graduates of the program have used their experience to gain acceptance into Ph.D. programs at Stanford and elsewhere. Students who complete the MLA program are well positioned to advance in careers that require the careful analytical and rhetorical training they receive. This training is achieved through the completion of four foundations courses, which together emphasize the program's goals as stated above; seven seminars that offer a more specific engagement with interdisciplinary subject matter; and a master's thesis, accomplished under the direction of a Stanford faculty member who is expert in the subject of the thesis.

Degree Requirements

Candidates for the MLA degree must complete a minimum of 50 units of course work with at least a grade point average of 3.3 (B+). These units must include a three-quarter foundation course (equal to 12 units total), one 4-unit core introductory seminar for second-year students, at least seven 4-unit MLA seminars, and a 6-unit master's thesis. Students must also fulfill distribution requirements in each of the following areas: humanities; social science or social policy; and science, engineering, or medicine.

Foundation Course

During the Autumn, Winter, and Spring quarters following admission to the program, a three quarter foundation course is required of all students, MLA 101A Foundations I, MLA 101B Foundations II: the Middle Ages and Renaissance., MLA 101C Foundations III: the Enlightenment through Modernism. The purpose of this course sequence is to lay the groundwork for the interdisciplinary, intercultural studies the student will shortly undertake. The foundation course introduces students to the broad framework of history, literature, philosophy, political science, and art.

Core Seminar

During the first quarter of the second year, students take the core introductory seminar, MLA 102 An Introduction to Interdisciplinary Graduate Study. This seminar prepares students for interdisciplinary graduate work at Stanford. Students concentrate on writing a critical graduate paper, conducting library research, presenting the results of their research, and productively participating in a collaborative seminar.

MLA Seminars

Students are required to take at least seven MLA seminars of 4 units each. Each MLA course requires a substantial seminar paper. Students are encouraged to use these papers as a way to investigate new fields of interest, as well as a way to develop different perspectives on issues in which they have an ongoing interest.

Master's Thesis

The MLA program culminates in the master's thesis. Students approaching the end of the program write a thesis, approximately 75-100 pages in length, that evolves out of work they have pursued during their MLA studies. The thesis is undertaken with the prior approval of the MLA program, and under the supervision of a Stanford faculty member. During the process of writing the thesis, students are members of a thesis-in-progress course, which meets regularly to provide peer critiques, motivation, and advice. Each student presents the penultimate draft of the thesis to a colloquium of MLA faculty and students, in preparation for revising and submitting the final draft to the adviser and to the MLA program.

Enrollment Requirements

MLA students must enroll for each academic year from the time of original matriculation until conferral of the degree. To remain active, students must either:

1. complete a minimum of two courses (eight units) in one academic year, defined as from the beginning of Autumn Quarter through the end of the following Summer Quarter; or,
2. be actively working on their thesis and regularly attend a minimum of three quarters of the thesis-in-progress meetings from the time the student enrolls in thesis-in-progress through graduation.

Timeline for Completion

All requirements for the Master of Liberal Arts degree must be completed within five years after the student's first term of enrollment in the program. If extraordinary circumstances prevent completion within five years, a student may submit a written petition for a maximum one-year extension to the Associate Dean and Director. This petition is reviewed by a committee which makes a recommendation to the Director; the final decision is at the discretion of the Director. To be considered, the petition must be submitted on or before May 1 of the student's fifth year in the program.

Registration

Master of Liberal Arts students enroll in courses through Stanford's Axess (http://axess.stanford.edu/) system.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a "credit" or "no credit" grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a "credit" or "satisfactory" grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Graduate Degree Requirements

Grading

The MLA Program counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of graduate degree requirements that otherwise require a letter grade, provided that the instructor affirms that the work was done at a 'B-' or better level.

Foundations/Core Courses

The MLA Program requires that students successfully complete (earn a B- or better) each Foundations course before moving on to the next Foundations or Core course. If students choose to take a Foundations or the Core course for CR/NC, student work must be at a B- or better level to fulfill the requirement.

MLA students should consult the 2020-21 MLA Student Handbook for detailed grading policies. The handbook is available on the MLA website.

For a statement of University policy on graduate advising, see the "Graduate Advising" section of this bulletin.

The MLA Program has an advising program that is created to respond to student need as well as the unique nature of this student group. That is to say, the MLA student group is diverse in age, experience, expectation, and availability. The program has determined that important gateway moments in the program (finishing core courses and entering the seminar track, preparation of the thesis prospectus, work on thesis) require cohort advising meetings. Individual academic advising, however, is best accomplished one-on-one, between student and adviser, at a mutually convenient time and place. The advising structure has two stages: Pre-thesis Advising and Thesis Advising.

Pre-thesis Advising begins just before matriculation and lasts until the student has been assigned a thesis adviser.

- Specific pre-thesis academic advising sessions occur before students begin the program, at the conclusion of their foundations course year, as they begin to choose their seminars, and as they begin to contemplate their thesis topics. The dates for these sessions are published well before the events, and students recognize the importance of attending; when exceptional circumstances keep students away, the program offers make-up sessions in person or by phone or video call.
- Entering students are also assigned a faculty adviser as they enter the program. They are encouraged to meet with the adviser during the first year to establish a relationship with the faculty member. Once they begin to choose seminars and to move toward thesis subject matter, the program encourages students to contact their adviser once a quarter, before they sign up for the following quarter, for a meeting.

Year 1

Incoming students meet individually with the Associate Dean and Director in July, prior to starting the program. This meeting provides an opportunity to talk about student and program expectations, to clarify the administrative specifics of the program, and to pass on information about the resources available to the student. This meeting also constitutes an open invitation for students to consult the Associate Dean and Director throughout their time in the program. Before this meeting, students are sent the *MLA Student Handbook* for their perusal.

In October of their first year, students are assigned a Stanford faculty adviser, from among the members of the MLA Faculty Advisory Committee. These advisers are familiar with MLA program policies and the MLA curriculum; they also are familiar with the *MLA Student Handbook*. This adviser works with students throughout Foundations, Core, and seminar classes, until they are assigned a thesis adviser.

In their first year, students should plan to reach out to their adviser at least once. The meeting (or meetings) during their first year provide an opportunity to get to know the adviser before the students and adviser begin meeting regularly during the second year.

Students meet with the Associate Dean and Director again in June at the completion of their first year. This meeting provides an opportunity to go over how the year went, and discuss concerns or challenges the student is having.

Year 2

During Autumn Quarter, second-year students are taking their final core course. One session of that course begins an hour early, and addresses the students' move into seminar choice. The Associate Dean and Director and the Chair of the Faculty Advisory Committee conduct the meeting; faculty who will be offering seminars through the rest of the academic year are invited to the session. This meeting takes place just prior to enrollment opening for Winter Quarter.

Students are encouraged to consult with their faculty adviser prior to enrolling in courses Autumn, Winter, Spring, and summer quarters of the second year to keep the adviser informed of their choices, to discuss program expectations and upcoming responsibilities. These meetings can be held in person, by phone, or over email. Students are expected to initiate these quarterly meetings.

Year 3

Students are advised to contact their faculty adviser each quarter as they continue their seminar work.

Early in Winter Quarter of their third year, students meet as a group with the Associate Dean and Director, and the writing instructor. This meeting is an orientation for students as they begin to think about their thesis topic, and move into the next stage of the degree program. They receive a substantial binder of policies and advice to consult through their thesis-writing.

As students reach the end of their seminars and begin thinking about thesis topics, they begin a conversation with the Associate Dean and Director and the Chair of the Faculty Advisory Committee about their thesis direction and potential faculty they should speak with as they are writing their prospectus. Students are introduced to and encouraged to consult individual faculty members whose expertise can guide the students' building of the prospectus.

Thesis Advising, End of Year 3 and Beyond

The MLA Faculty Advisory committee responds in writing to each students' prospectus, approving it, deferring approval, or rejecting it. In each case, the response brings together the considered advice of the committee as to next steps for the student.

Once students have an approved prospectus, the MLA Faculty Advisory committee assigns them a Stanford faculty adviser.

Students with approved prospectuses (or those who are close to having their prospectuses approved) attend a day-long thesis workshop, held every summer. The MLA writing consultant and instructor directs the workshop; the Chair of the Faculty Advisory Committee, the Faculty Writing Consultant, and the Associate Dean and Director attend, along

with representative faculty advisers and recent graduates. The thesis workshop is intended to give provide insight into working with a thesis adviser, to help students to take maximum advantage of class and instructor feedback in the weekly thesis workshops, to address the necessary work of researching and then shaping and focusing the thesis, to inform students about the practices and expectations of the weekly Thesis-in-Progress sessions and of thesis presentations, and generally to illuminate some of the ups and downs of thesis-writing. (The summer thesis workshop is intended for all students who are working on their theses, not only those who are beginning their work.)

As soon as their prospectus is approved, students become a part of the thesis working group, MLA 398 MLA Thesis in Progress. The thesis-in-progress group meets weekly and includes all MLA students who are working on their theses; it is led by the MLA writing instructor; the MLA faculty writing consultant and the Associate Dean and Director attend most meetings. The meetings provide a time for peer feedback and support as well as guidance from the writing consultants.

Associate Dean and Director: Linda Paulson

Director of Graduate Studies: Linda Paulson

Participating Faculty: Jonathan Berger (Music), Jay Bhattacharya (Medicine), James Campbell (History), William Chace (English, emeritus), James Daughton (History), Gerald Dorfman (Hoover Institution, Political Science), William Durham (Anthropology), Michele Elam (English), Paula Findlen (History), Hester Gelber (Religious Studies, emerita), Albert Gelpi (English, emeritus), Barbara Gelpi (English, emerita), Jonathan Gienapp (History), Denise Gigante (English), Robert Gregg (Religious Studies, emeritus), Heather Hadlock (Music), Allyson Hobbs (History), Ari Kelman (Education), Nancy Kollmann (History), Pavle Levi (Film and Media), James Lock (Medicine), Ivan Lupic (English), Marsh McCall (Classics, emeritus), Ana Minian (History), Paula Moya (English), Thomas Mullaney (History), Alexander Nemerov (Arts), Kathryn Olivarius (History), David Palumbo-Liu (Comparative Literature), Grant Parker (Classics), Rush Rehm (Drama, Classics), John Rick (Anthropology), David Riggs (English, Emeritus), Jessica Riskin (History), Eric Roberts (Engineering, emeritus), Paul Robinson (History, emeritus), Thomas Sheehan (Religious Studies), Robert Siegel (Microbiology and Immunology), Peter Stansky (History, emeritus), Stephen Stedman (Freeman Spogli Institute for International Studies), Barton Thompson (Law), Elaine Treharne (Humanities), Peter Vitousek (Biology), Michael Wilcox (Anthropology), Caroline Winterer (History), Yvonne Yarbro-Bejarano (Latin American Cultures).

Courses

MLA 101A. Foundations I. 4 Units.
Required of and limited to first-year MLA students. First of three quarter foundation course. Introduction to the main political, philosophical, literary, and artistic trends that inform the liberal arts vision of the world and that underlie the MLA curriculum.

MLA 101B. Foundations II: the Middle Ages and Renaissance.. 4 Units.
Required of and limited to first-year MLA students. Second of three quarter foundation course. Introduction to the main political, philosophical, literary, and artistic trends that inform the liberal arts vision of the world and that underlie the MLA curriculum.

MLA 101C. Foundations III: the Enlightenment through Modernism. 4 Units.
Required of and limited to first-year MLA students. First of three quarter foundation course. Introduction to the main political, philosophical, literary, and artistic trends that inform the liberal arts vision of the world and that underlie the MLA curriculum.

MLA 102. An Introduction to Interdisciplinary Graduate Study. 4 Units.
Limited to and required of second-year MLA students. Historical, literary, artistic, medical, and theological issues are covered. Focus is on skills and information needed to pursue MLA graduate work at Stanford: writing a critical, argumentative graduate paper; conducting library research; expectations of seminar participation. Readings include Homer, Thucydides, Camus, Mann, Kushner, and sacred, scientific, and historical writings.

MLA 262. The Economics of Life and Death. 4 Units.
.

MLA 295. The American Enlightenment. 4 Units.
.

MLA 298. Heretics, Prostitutes, and Merchants: The Venetian Empire. 4 Units.
.

MLA 300. Oxford Summer Programme. 2-4 Units.
.

MLA 305. Russia Encounters the Enlightenment: The Art, Culture, and Politics. 4 Units.
.

MLA 322. Coffee, Sugar, and Chocolate: Commodities and Consumption in World History. 120--1800. 4 Units.
.

MLA 326. Nature through Photography. 4 Units.
.

MLA 338. William Blake: A Literary and Visual Exploration of the Illuminated Poetry. 4 Units.
.

MLA 339. The Human Predicament in Three Masterpieces. 4 Units.
.

MLA 341. Aesthetics of Dissent in Contemporary Iran. 4 Units.
.

MLA 342. The Human Story in the Archives. 4 Units.
.

MLA 344. Making and Unmaking Apartheid: Topics in South African History. 4 Units.
.

MLA 347. Rome: From Pilgrimage to the Grand Tour. 4 Units.
.

MLA 348. Modern Iranian Politics Through Modern Iranian Art and Literature. 4 Units.
.

MLA 350. From Literature to Opera. 4 Units.
.

MLA 351. The Civil Rights Movement in History and Memory. 4 Units.
.

MLA 352. Virus in the News. 4 Units.
.

MLA 353. The Fourth R: Religion, Education and Schooling in America. 4 Units.
.

MLA 354. Intimations of Mortality. 4 Units.
.

MLA 355. Dante and the Poets. 4 Units.
Dante Alighieri has had a profound influence on literary tradition. Among his more active respondents were the poets. While the Romantic poets found inspiration in his blend of lyric and epic, of romance and dream vision, of allegorical pilgrimage and spiritual autobiography, pre-Raphaelite poets such as Christina and Dante Gabriel Rossetti (named after the Italian national poet) explored his use of gender dynamics, poetic authority, and the obsessive nature of love poetry. T.S. Eliot was, as always, a mixed bag, and at the same time as he was critical of a poet like William Blake, who illustrated all of The Divine Comedy and who was in his illuminated poetry in the visionary Dantean tradition of world-making, used The Inferno as the basis for his own deep psychological explorations in poems like ¿The Love Song of J. Alfred Prufrock.¿ Prophetic poets like Percy Bysshe Shelley and John Keats found themselves turning to Dante in their own dying attempts at epic, those masterful fragments The Triumph of Life and The Fall of Hyperion, respectively. This course will explore the lasting legacy of Dante as a poet of melancholy, alienation, and redemption in the visual and verbal artwork he inspired.

MLA 356. Film Analysis. 4 Units.
.

MLA 357. Historic Journeys to Sacred Places. 4 Units.
.

MLA 358. The Intersection of Medicine, Science, Public Policy, and Ethics: Cancer as a Case Study. 4 Units.
.

MLA 359. The Big Shift: Demographic and Social Change in America. 4 Units.
.

MLA 398. MLA Thesis in Progress. 0 Units.
Group meetings provide peer critiques, motivations, and advice under the direction of the Associate Dean.

MLA 399. MLA Thesis Final Quarter. 6 Units.
Students write a 75-100 page thesis that evolves out of work they pursued during their MLA studies.

MATHEMATICAL AND COMPUTATIONAL SCIENCE

Courses offered by Mathematical and Computational Science program are listed under the subject code MCS on the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu/) website.

This interdisciplinary undergraduate degree program in MCS is sponsored by Stanford's departments of Statistics, Mathematics, Computer Science, and Management Science & Engineering, providing students with a core of mathematics basic to all the mathematical sciences and an introduction to concepts and techniques of computation, optimal decision making, probabilistic modeling, and statistical inference.

Utilizing the faculty and courses of the departments listed above, this major prepares students for graduate study or employment in the mathematical and computational sciences or in those areas of applied mathematics which center around the use of computers and are concerned with the problems of the social and management sciences. A biology option is offered for students interested in applications of mathematics, statistics, and computer science to the biological sciences (bioinformatics, computational biology, statistical genetics, neurosciences); and in a similar spirit, an engineering and statistics option.

Undergraduate Mission Statement for Mathematical and Computational Science

The mission of the Mathematical and Computational Science Program is to provide students with a core of mathematics basic to all the mathematical sciences and an introduction to concepts and techniques of computation, optimal decision making, probabilistic modeling and statistical inference. The program is interdisciplinary in its focus, and students are required to complete course work in mathematics, computer science, statistics, and management science and engineering. A computational biology track is available for students interested in biomedical applications. The program prepares students for careers in academic, financial and government settings as well as for study in graduate or professional schools.

Learning Outcomes

The program expects undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to be able to demonstrate:

1. understanding of principles and tools of statistics.
2. command of optimization and its applications and the ability to analyze and interpret problems from various disciplines.
3. an understanding of computer applications emphasizing modern software engineering principles.
4. an understanding of multivariate calculus, linear algebra, and algebraic and geometric proofs.

Bachelor of Science in Mathematical and Computational Science

The Program in Mathematical and Computational Science (MCS) offers a Bachelor of Science in Mathematical and Computational Science. Eligible students may also pursue a Bachelor of Science with Honors (p. 1797). The department also offers a minor in Mathematical and Computational Science (p. 1798).

Suggested Preparation for the Major

Students ordinarily would have taken two of the required Math courses (MATH 51 Linear Algebra, Multivariable Calculus, and Modern Applications/MATH 52 Integral Calculus of Several Variables/MATH 53 Ordinary Differential Equations with Linear Algebra) and one of the required Statistics core courses (STATS 116 Theory of Probability, STATS 191 Introduction to Applied Statistics) before declaring MCS during their freshman or sophomore year.

How to Declare the Major

To declare the major, a student should first meet with an MCS peer advisor to create a proposed study plan and then with the MCS student services officer to discuss the major. Students ordinarily have taken two of the required MATH 50 series courses and a core Statistics course prior to declaration. Once the student has created a proposed study plan, they should connect with the MCS student services officer and declare the major through Axess. Students should have an overall grade point average (GPA) of 3.0 to declare.

Degree Requirements

- The student must have a grade point average (GPA) of 3.0 or better in all course work used to fulfill the major requirement.
- At least three quarters before graduation, majors must file with their advisor a plan for completing degree requirements.
- All courses used to fulfill major requirements must be taken for a letter grade with the exception of courses offered satisfactory/no credit only.
- Students who earn less than a 'C+' in STATS 116 Theory of Probability or STATS 200 Introduction to Statistical Inference must repeat the course.
- Only one MCS core course can be substituted by filing a petition with their advisor (with the exception of STATS 200 Introduction to Statistical Inference which cannot be substituted). The Course Substitution Form (https://mcs.stanford.edu/sites/mcs/files/media/file/mcs-course-sub-1819.pdf)must be submitted the quarter prior to enrolling in the course.
- Course transfer credit is subject to department evaluation and to the Office of the Registrar's external credit evaluation. These courses may result in a replacement course for MCS required course or may establish placement in a higher-level course. Transfer requests must first be submitted to Student Services Center prior to being evaluated by your advisor. Submit the MCS Program Transfer Credit Form (https://mcs.stanford.edu/academicsmajor/transfer-credit-mcs-declared-students/) to the student services office.
- Students may take their three electives courses for credit (CR).
- Students may be granted a one-time exception to take a core course for credit (CR) with the exception of STATS 116 and STATS 200.
- The University requires students to complete at least one approved writing-intensive course in each of their majors. See the Hume Center for Writing and Speaking (https://undergrad.stanford.edu/tutoring-support/hume-center/writing/undergraduate-students/writing-major-resources/) web site for a full description of the WIM (https://undergrad.stanford.edu/programs/pwr/courses/writing-major/)requirement.

Course Requirements

		Units
Mathematics (MATH)		**28**
Single-variable calculus or AP credit. [1]		
MATH 19	Calculus	3
MATH 20	Calculus	3
MATH 21	Calculus	4
Students may choose one of the following sequences:		15
Multivariable Calculus and Linear Algebra		
MATH 51	Linear Algebra, Multivariable Calculus, and Modern Applications	
MATH 52	Integral Calculus of Several Variables	
MATH 53	Ordinary Differential Equations with Linear Algebra	
Modern Mathematics: Continuous Methods (a proof-oriented sequence)		
MATH 61CM	Modern Mathematics: Continuous Methods	
MATH 62CM	Modern Mathematics: Continuous Methods	
MATH 63CM	Modern Mathematics: Continuous Methods	
Modern Mathematics: Discrete Methods (a proof-oriented sequence)		
MATH 61DM	Modern Mathematics: Discrete Methods	
MATH 62DM	Modern Mathematics: Discrete Methods	
MATH 63DM	Modern Mathematics: Discrete Methods	
Select one of the following:		3
MATH 104	Applied Matrix Theory	
MATH 113	Linear Algebra and Matrix Theory	
Computer Science (CS)		**22-25**
CS 103	Mathematical Foundations of Computing	5
CS 106A	Programming Methodology	5
and either		
CS 106B	Programming Abstractions	5
or CS 106X	Programming Abstractions	
Select two of the following:		7-10
CME 108	Introduction to Scientific Computing	
CS 107	Computer Organization and Systems	
CS 154	Introduction to the Theory of Computation	
CS 161	Design and Analysis of Algorithms	
CS 181W	Computers, Ethics, and Public Policy	
CS 182W	Ethics, Public Policy, and Technological Change	
Management Science and Engineering (MS&E)		**7-11**
MS&E 211X	Introduction to Optimization (Accelerated)	3-4
MS&E 221	Stochastic Modeling	3
Or select three of the following:		9-11
MS&E 111	Introduction to Optimization	
MS&E 121	Introduction to Stochastic Modeling	
MS&E 211	Introduction to Optimization	
MS&E 213	Introduction to Optimization Theory	
MS&E 221	Stochastic Modeling	
MS&E 251	Introduction to Stochastic Control with Applications	
Statistics (STATS)		**10-11**
STATS 116	Theory of Probability	3-4
or MATH 151	Introduction to Probability Theory	
STATS 200	Introduction to Statistical Inference	4
Select one of the following:		3
STATS 191	Introduction to Applied Statistics	
STATS 203	Introduction to Regression Models and Analysis of Variance	
Writing in the Major (WIM)		**3-5**
Choose one from the MCS-designated WIM courses to fulfill the Writing in the Major requirement:		
MATH 109	Applied Group Theory	
MATH 110	Applied Number Theory and Field Theory	
MATH 120	Groups and Rings	
MATH 171	Fundamental Concepts of Analysis	
CS 181W	Computers, Ethics, and Public Policy	
CS 182W	Ethics, Public Policy, and Technological Change	
STATS 155	Modern Statistics for Modern Biology	
WIM courses offered by other majors may be used in cases of specific concentrations (e.g. biology, decision theory). Advisor approval required.		
Mathematical and Computational Science Approved Electives		**9**
Choose three courses in Mathematical and Computational Science 100-level or above, at least 3 units each from two different departments.		
Choose three electives:		
ECON 102C	Advanced Topics in Econometrics	
ECON 140	Introduction to Financial Economics	
ECON 160	Game Theory and Economic Applications	
ECON 179	Experimental Economics	
EE 261	The Fourier Transform and Its Applications	
EE 263	Introduction to Linear Dynamical Systems	
EE 278	Introduction to Statistical Signal Processing	
EE 282	Computer Systems Architecture	
EE 364A	Convex Optimization I	
EE 364B	Convex Optimization II	
MS&E 220	Probabilistic Analysis	
MS&E 223	Simulation	
MS&E 226	Fundamentals of Data Science: Prediction, Inference, Causality	
MS&E 251	Introduction to Stochastic Control with Applications	
MS&E 334	Topics in Social Data	
MATH 104	Applied Matrix Theory	
MATH 106	Functions of a Complex Variable	
MATH 107	Graph Theory	
MATH 108	Introduction to Combinatorics and Its Applications	
MATH 113	Linear Algebra and Matrix Theory	
MATH 114	Introduction to Scientific Computing	
MATH 115	Functions of a Real Variable	
MATH 116	Complex Analysis	
MATH 131P	Partial Differential Equations	
MATH 136	Stochastic Processes	
MATH 158	Basic Probability and Stochastic Processes with Engineering Applications	
MATH 159	Discrete Probabilistic Methods	
MATH 171	Fundamental Concepts of Analysis	
MATH 172	Lebesgue Integration and Fourier Analysis	
PHIL 151	Metalogic	
STATS 100	Mathematics of Sports	
STATS 101	Data Science 101	

STATS 202	Data Mining and Analysis
STATS 206	Applied Multivariate Analysis
STATS 207	Introduction to Time Series Analysis
STATS 208	Bootstrap, Cross-Validation, and Sample Re-use
STATS 215	Statistical Models in Biology
STATS 216	Introduction to Statistical Learning
STATS 217	Introduction to Stochastic Processes I
STATS 218	Introduction to Stochastic Processes II
STATS 219	Stochastic Processes
STATS 240	Statistical Methods in Finance
STATS 270	A Course in Bayesian Statistics
For Computer Science (CS), electives can include courses not taken as units under the CS list above and the following:	
CME 206	Introduction to Numerical Methods for Engineering
CME 211	Software Development for Scientists and Engineers
CME 302	Numerical Linear Algebra
CS 108	Object-Oriented Systems Design
CS 110	Principles of Computer Systems
CS 140	Operating Systems and Systems Programming
CS 143	Compilers
CS 157	Computational Logic
CS 161	Design and Analysis of Algorithms
CS 194	Software Project
CS 221	Artificial Intelligence: Principles and Techniques
CS 223A	Introduction to Robotics
CS 225A	Experimental Robotics
CS 228	Probabilistic Graphical Models: Principles and Techniques
CS 229	Machine Learning
CS 243	Program Analysis and Optimizations
CS 246	Mining Massive Data Sets
CS 248	Interactive Computer Graphics
Electives that are not offered this year, but may be offered in subsequent years, are eligible for credit toward the major.	
With the advisor's approval, courses other than those listed or offered by the sponsoring departments may be used to fulfill part of the elective requirement. Courses must provide skills relevant to the MCS degree and do not overlap courses in the student's program. Depending on student's interests, these may be in fields such as, biology, economics, electrical engineering, industrial engineering, and medicine, are otherwise relevant to a mathematical sciences major.	
Total Units	**76-89**

[1] Students who scored a 5 on both the Calculus AB and BC advanced placement exams (total of 10 units) can be waived out of MATH 19 Calculus, MATH 20 Calculus, MATH 21 Calculus; See also the Registrar's Advanced Placement (https://registrar.stanford.edu/students/transfer-credit/advanced-placement/) web site (AP (https://registrar.stanford.edu/students/transfer-credit-and-advanced-placement/advanced-placement/ap-credit-chart/) or IB (https://registrar.stanford.edu/students/transfer-credit-and-advanced-placement/advanced-placement/ib-credit-chart/) exams). Students who place out of MATH 19, 20, and 21 are required to take additional Math classes as discussed with MCS student services and the student's faculty advisor.

Mathematical and Computational Science Tracks

MCS program has designed three tracks to allow majors to pursue their interests in fields where applied mathematics and statistical analysis is utilized. Declared MCS majors are not required to choose a track. These tracks are not declared in Axess and are not printed on the transcript or diploma.

Biology Track

Students in the Biology track take the introductory courses for the Mathematics and Computational Science major with the following allowable substitutions as electives.

		Units
STATS/BIO 141	Biostatistics [1]	5
Allowable Elective Course Substitutions:		
Take three courses from Foundational Biology Core:		10
BIO 82	Genetics	
BIO 83	Biochemistry & Molecular Biology	
BIO 84	Physiology	
BIO 85	Evolution	
BIO 86	Cell Biology	
Or take two courses from the Biology core and one of the following:		3-4
BIO 104	Advance Molecular Biology: Epigenetics and Proteostasis	
BIO 133	(no longer offered)	
BIO 144	Conservation Biology: A Latin American Perspective	
BIO 183	Theoretical Population Genetics (offered alternate years)	
BIO 230	Molecular and Cellular Immunology	
Honors students select the following three courses:		1-4
STATS 155	Modern Statistics for Modern Biology	
BIO 113	Fundamentals of Molecular Evolution	
BIO 146	Genes and Disease (no longer offered)	
The following courses are no longer offered, but may be used by students who completed them in fulfillment of this requirement: BIO102, 160A & 160B		

[1] STATS 141 (https://explorecourses.stanford.edu/search/?view=catalog&filter-coursestatus-Active=on&page=0&catalog=&academicYear=&q=stats141&collapse=): Biostatis (BIO 141) can replace STATS 191 Introduction to Applied Statistics or STATS 203 Introduction to Regression Models and Analysis of Variance from the major's Statistics core requirement.

Engineering Track

Students in the Engineering track take the introductory courses for the Mathematics and Computational Sciences major with the following allowable substitutions.

		Units
With consent of an MCS advisor, MATH 51, MATH 52, MATH 53 series may be substituted for CME 100, CME 102, CME 104. Depending on the exact material taught in relevant years, an additional math course may be necessary [1]		15
CME 100	Vector Calculus for Engineers	
CME 102	Ordinary Differential Equations for Engineers	

CME 104/ ENGR 155B	Linear Algebra and Partial Differential Equations for Engineers	
STATS 116 may be replaced by:		3-5
STATS 110	Statistical Methods in Engineering and the Physical Sciences	
STATS 191/STATS 203 may be replaced by:		3-4
STATS 202	Data Mining and Analysis	
Allowable Elective Course Substitutions:		**9**
Select one of the following:		3-4
MATH 106	Functions of a Complex Variable	
MATH 108	Introduction to Combinatorics and Its Applications	
MATH 116	Complex Analysis	
PHIL 151	Metalogic	
Select two of the following:		3-5
ENGR 15	Dynamics	
ENGR 20	Introduction to Chemical Engineering	
ENGR 25B		
ENGR 40	(no longer offered)	
ENGR 50	Introduction to Materials Science, Nanotechnology Emphasis	
ENGR 105	Feedback Control Design	

[1] Only MCS majors pursuing the engineering track may petition their advisor to substitute the required Math series for CME courses listed above.

Statistics Track

Students in the Statistics track take the introductory courses for the Mathematics and Computational Sciences major with the following additional courses - (87 units total)

Required:

		Units
Additional Courses for the Statistics Track:		**9**
STATS 217	Introduction to Stochastic Processes I	
Advanced CS, such as:		3
CS 246	Mining Massive Data Sets	
Advanced MS&E, such as:		3
MS&E 220	Probabilistic Analysis	
or		
MS&E 223	Simulation	
Allowable Elective Course Substitutions:		**9**
Select three of the following:		
STATS 202	Data Mining and Analysis	
STATS 206	Applied Multivariate Analysis	
STATS 207	Introduction to Time Series Analysis	
STATS 208	Bootstrap, Cross-Validation, and Sample Re-use	
STATS 216	Introduction to Statistical Learning	
STATS 219	Stochastic Processes	
STATS 270	A Course in Bayesian Statistics	

Honors Program

The honors program is designed to encourage a more intensive study of mathematical sciences than the B.S. program. Students interested in honors should consult with their faculty advisor as soon as possible to allow more opportunities in course planning and concentration area. The honors program allows for a capstone experience, building upon the student's current academic knowledge and strengthening their understanding in a specific field of study/concentration. Honors work may be concentrated in fields such as biological sciences and medicine, environment, physics, sports analytics, investment science, AI/machine learning, etc.

Students are required to submit an MCS Honors Proposal Form (https://mcs.stanford.edu/sites/g/files/sbiybj9376/f/mcs_honors_proposal_form_2019-20.pdf) describing the concentration for honors work, including the courses they intend to use, by the final study list deadline two quarters prior to the expected degree conferral quarter. The honors final report is due no later than the last day of classes of the quarter the student expects to graduate. More information can be found on the MCS Honors Website. (https://mcs.stanford.edu/academics/honors/)

In addition to meeting all requirements for the B.S., the student must:

1. Maintain a GPA of at least 3.5 in all major coursework.
2. Students should complete 15 units of graduate level coursework. Included in these 15 units can be any of the following:
   a. Related research from a 199 course
   b. Participation for credit in a small group seminar
   c. Directed reading
3. Complete a final report which should:
   a. Include their name, degree and the title of their work.
   b. Be typed with 12pt font, single-spaced, minimum 1 page (no longer than 2 pages) with a one-inch margin at the top and bottom of each page.
   c. Explain a theme between the student's coursework, their interests, and how they relate to MCS.
   d. Describe how each course selected added to the student's knowledge and understanding in the chosen area of concentration.
   e. The student's work must demonstrate in-depth learning of a topic or shared idea in the breadth of the MCS major (examples are on MCS webpage), and all students are held to Stanford's Honor Code (https://communitystandards.stanford.edu/policies-and-guidance/honor-code/).

		Units
Suggested electives for students pursuing honors:		
CME 206	Introduction to Numerical Methods for Engineering	3
CS/STATS 229	Machine Learning	3-4
CS 248	Interactive Computer Graphics	3-4
EE 364A	Convex Optimization I	3
MATH 171	Fundamental Concepts of Analysis	3
MATH 172	Lebesgue Integration and Fourier Analysis	3
MATH 205A	Real Analysis	3
STATS 202	Data Mining and Analysis	3
STATS 216	Introduction to Statistical Learning	3
STATS 217	Introduction to Stochastic Processes I	3

return to top of page (p. 1794)

Minor in Mathematical and Computational Science

The minor in Mathematical and Computational Science is intended to provide an experience of the four constituent areas: Mathematics, Computer Science, Management Science and Engineering, and Statistics. The minor consists of nine courses for a minimum of 32 units. A grade point average (GPA) of 2.75 is required for courses fulfilling the minor. All courses for the minor must be taken for a letter grade, if offered.

Degree Requirements

		Units
Mathematics (MATH)		**3-5**
Select one of the following:		
MATH 51	Linear Algebra, Multivariable Calculus, and Modern Applications	
MATH 104	Applied Matrix Theory	
Computer Science (CS)		**10**
Select two of the following:		
CS 106A	Programming Methodology	5
and either		
CS 106B	Programming Abstractions	5
or CS 106X	Programming Abstractions	
Management Science and Engineering (MS&E)		**3-4**
Select one of the following:		
MS&E 211	Introduction to Optimization	
MS&E 221	Stochastic Modeling	
Statistics (STATS)		**7**
Select two of the following:		
STATS 116	Theory of Probability	4
and either		
STATS 191	Introduction to Applied Statistics	3-4
or STATS 200	Introduction to Statistical Inference	
Electives		**9**
The minor requires three courses, two of which must be in different departments.		
Select three of the following:		
CME 108	Introduction to Scientific Computing	
CS 103	Mathematical Foundations of Computing	
CS 107	Computer Organization and Systems	
CS 154	Introduction to the Theory of Computation	
CS 161	Design and Analysis of Algorithms	
ECON 160	Game Theory and Economic Applications	
EE 261	The Fourier Transform and Its Applications	
MS&E 211	Introduction to Optimization	
MS&E 212	Mathematical Programming and Combinatorial Optimization	
MS&E 221	Stochastic Modeling	
MS&E 251	Introduction to Stochastic Control with Applications	
MATH 104	Applied Matrix Theory	
MATH 106	Functions of a Complex Variable	
MATH 108	Introduction to Combinatorics and Its Applications	
MATH 109	Applied Group Theory	
MATH 110	Applied Number Theory and Field Theory	
MATH 115	Functions of a Real Variable	
MATH 131P	Partial Differential Equations	
MATH 171	Fundamental Concepts of Analysis	
PHIL 151	Metalogic	
STATS 191	Introduction to Applied Statistics	
STATS 200	Introduction to Statistical Inference	
STATS 202	Data Mining and Analysis	
STATS 203	Introduction to Regression Models and Analysis of Variance	
STATS 217	Introduction to Stochastic Processes I	
Other upper-division courses appropriate to the program major may be substituted with consent of MCS program director. Undergraduate majors in the constituent programs may not count courses in their own departments.		
Total Units		**32-34**

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a "credit" or "no credit" grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a "credit" or "satisfactory" grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

The MCS program counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of undergraduate degree requirements and minor that otherwise require a letter grade.

Faculty

Director: Professor Guenther Walther

Associate Director: Professor Chiara Sabatti

Faculty Advisers: Assistant Professor John Duchi, Professor Bradley Efron, Associate Professor David Rogosa, Assistant Professor Johan Ugander, Assistant Professor Scott Linderman

Steering Committee: Takeshi Amemiya (Economics, emeritus), Emmanuel Candès (Mathematics, Statistics), Brian Conrad (Mathematics), Richard Cottle (Management Science and Engineering, emeritus), John Duchi (Electrical Engineering & Statistics), Darrel Duffie (Economics & GSB), Bradley Efron (Statistics), Peter Glynn (Management Science and Engineering), Ramesh Johari (Management Science and Engineering), Percy Liang (Computer Science & Statistics), Parviz Moin (Mechanical Engineering), George Papanicolaou (Mathematics), David Rogosa (Education & Statistics), Chiara Sabatti (Biomedical Data Science & Statistics), David Siegmund (Statistics), Jonathan Taylor (Statistics), Brian White (Mathematics)

Courses

MCS 198. Practical Training. 1 Unit.
For students majoring in Mathematical and Computational Science only. Students obtain employment in a relevant industrial or research activity to enhance their professional experience. Students may enroll in Summer Quarters only and for a total of three times. Students must first notify their MCS adviser before enrolling in their course section, and must submit a one-page written final report summarizing the knowledge/experience gained upon completion of the internship in order to receive credit.

MATHEMATICS

Courses offered by the Department of Mathematics are listed under the subject code MATH on the (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=MATH&filter-catalognumber-MATH=on) Stanford Bulletin's (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=MATH&filter-catalognumber-MATH=on) ExploreCourses web site (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=MATH&filter-catalognumber-MATH=on).

The Department of Mathematics offers programs leading to the degrees of Bachelor of Science, Master of Science, and Doctor of Philosophy in Mathematics, and also participates in the program leading to the B.S. in Mathematical and Computational Science, and the M.S. and Ph.D. degree programs offered through the Institute for Computational & Mathematical Engineering.

Mission of the Undergraduate Program in Mathematics

The mission of the undergraduate program in Mathematics is to provide students with a broad understanding of mathematics encompassing logical reasoning, generalization, abstraction, and formal proof. Courses in the program teach students to create, analyze, and interpret mathematical models and to communicate sound arguments based on mathematical reasoning and careful data analysis. The mathematics degree prepares students for careers in the corporate sector, tech industry, government agencies, and for graduate programs in mathematics.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. problem solving skills,
2. the ability to formulate proofs and to structure mathematical arguments,
3. the ability to communicate mathematical ideas via extended written presentation.

Advanced Placement in Mathematics

Students can receive units of advanced placement credit for single-variable calculus, depending on their scores on the CEEB Advanced Placement Examination or the IB Exam. See the the "Advanced Placement (p. 38)" section of this bulletin.

Those who have not studied single-variable calculus or have studied it partially but are not ready to begin with multivariable calculus (MATH 50-series) should begin at the single-variable course recommended by the math placement diagnostic.

Students who are ready to study multivariable calculus (based on prior courseswork or exams, or recommended by the math placement diagnostic) should begin with one of the following courses:

		Units
MATH 51	Linear Algebra, Multivariable Calculus, and Modern Applications	5
MATH 52	Integral Calculus of Several Variables	5
MATH 53	Ordinary Differential Equations with Linear Algebra	5

The above sequence supplies the necessary mathematics background for most majors in science and engineering. It also provides a solid foundation for the major or minor in Mathematics, or in Mathematical and Computational Science.

Bachelor of Science in Mathematical and Computational Science

The Department of Mathematics participates with the departments of Computer Science, Management Science and Engineering, and Statistics in a program leading to a B.S. in Mathematical and Computational Science. See the "Mathematical and Computational Science (p. 1794)" section of this bulletin.

Introductory and Undergraduate Courses

The department offers a year-long sequence in single-variable calculus: MATH 19, MATH 20, and MATH 21.

There are three options for studying multivariable mathematics:

1. MATH 51, MATH 52, and MATH 53 cover differential and integral calculus in several variables, linear algebra, and ordinary differential equations. These topics are taught in an integrated fashion and emphasize applications. MATH 51 covers differential calculus in several variables and introduces matrix theory and basic linear algebra; MATH 52 covers integral calculus in several variables and vector analysis; MATH 53 studies further topics in linear algebra and applies them to ordinary differential equations. This sequence is strongly recommended for incoming freshmen who have mastered single-variable calculus.
2. The sequence MATH 61CM, MATH 62CM, and MATH 63CM (Modern Mathematics: Continuous Methods) covers the material of the Math 50 series at a much more advanced level with an emphasis on rigorous proofs and conceptual arguments.
3. The sequence MATH 61DM, MATH 62DM, and MATH 63DM (Modern Mathematics: Discrete Methods) covers the same linear algebra material as the Math 60CM series and otherwise focuses on topics in discrete mathematics, algebra, and probability theory at an advanced level with an emphasis on rigorous proofs.

Learning Outcomes (Graduate)

The master's degree is conferred upon candidates who have developed advanced knowledge and skills in Mathematics. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Mathematics. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Mathematics and to interpret and present the results of such research.

Bachelor of Science in Mathematics

The following department requirements are in addition to the University's basic requirements for the bachelor's degree.

Students wishing to major in Mathematics must satisfy the following requirements and complete a minimum of 64 units:

1. Department of Mathematics courses totaling at least 49 units credit; among these at least eight courses worth at least 3 units

each numbered above 63. Such courses must be taken for a letter grade. For the purposes of this requirement, STATS 116 Theory of Probability, PHIL 151 Metalogic, and PHIL 152 Computability and Logic count as Department of Mathematics courses.

2. Additional units taken from Department of Mathematics courses numbered 101 and above or from approved courses in other disciplines with significant mathematical content, totaling at least 15 units credit. At least 9 of these units must be taken for a letter grade.
3. The Department of Mathematics adviser can be any member of the department's faculty.
4. To receive the department's recommendation for graduation, a student must have been enrolled as a major in the Department of Mathematics for a minimum of two full quarters, including the quarter immediately before graduation.

Students with an Advanced Placement score of 5 in BC math may receive 10 units credit and fulfill requirement '1' by taking at least 39 units of Department of Mathematics courses. Students with an Advanced Placement score of at least 4 in BC math or 5 in AB math may receive 8 units credit and fulfill requirement '1' by taking at least 41 units of Department of Mathematics courses.

Freshman and sophomore introductory seminar courses may be counted among the choice of courses under item '1'. Other variations of the course requirements laid down above (under items '1' and '2') may, in some circumstances, be allowed. For example, students transferring from other universities may be allowed credit for some courses completed before their arrival at Stanford. However, at least 24 units of the 49 units under item '1' above and 9 of the units under item '2' above must be taken at Stanford. In all cases, approval for variations in the degree requirements must be obtained from the department's Director of Undergraduate Studies. The policy of the Mathematics Department is that no courses other than the MATH 60 series and below may be double-counted toward any other University major or minor.

Proof Writing

For students who are not experienced with writing mathematical proofs, this crucial skill can be learned by taking any one of the following courses: MATH 110 Applied Number Theory and Field Theory, MATH 113 Linear Algebra and Matrix Theory, or MATH 115 Functions of a Real Variable (after finishing the chosen calculus sequence).

Preparation for Graduate School:

It is to be emphasized that the above regulations are minimum requirements for the major; students contemplating graduate work in mathematics are strongly encouraged to include the courses MATH 116 Complex Analysis, MATH 120 Groups and Rings, MATH 121 Galois Theory, MATH 147 Differential Topology or MATH 148 Algebraic Topology, and MATH 171 Fundamental Concepts of Analysis in their selection of courses, and in addition, take at least three Department of Mathematics courses over and above the minimum requirements laid out under items '1' and '2' above, including at least one 200-level course. Such students are also encouraged to consider the possibility of taking the honors program.

Sample Course Plans

To help develop a sense of the type of course selection (under items '1' and '2' above) that would be recommended for math majors with various backgrounds and interests, see the following examples. These represent only a few of a very large number of possible combinations of courses that could be taken in fulfillment of the Mathematics major requirements:

Example 1: for students with both pure and applied interests

		Units
Single-variable calculus: AP Credit, (MATH 19, MATH 20, MATH 21)		8-10
Multivariable calculus: (MATH 51, MATH 52, MATH 53)		15
MATH 104	Applied Matrix Theory	3
or MATH 113	Linear Algebra and Matrix Theory	
MATH 106	Functions of a Complex Variable	3
MATH 109	Applied Group Theory	3
MATH 110	Applied Number Theory and Field Theory	3
MATH 115	Functions of a Real Variable	3
Plus any selection of at least eight of the following courses, including three Department of Mathematics courses:		26
MATH 107	Graph Theory	
MATH 108	Introduction to Combinatorics and Its Applications	
MATH 131P	Partial Differential Equations	
MATH 143	Differential Geometry	
MATH 144	Introduction to Topology and Geometry	
MATH 147	Differential Topology	
MATH 148	Algebraic Topology	
MATH 152	Elementary Theory of Numbers	
MATH 161	Set Theory	
CME 108	Introduction to Scientific Computing	
ECON 50	Economic Analysis I	
PHYSICS 41	Mechanics	
PHYSICS 43	Electricity and Magnetism	
PHYSICS 45	Light and Heat	
STATS 116	Theory of Probability	
or MATH 151	Introduction to Probability Theory	
Total Units		64-66

The courses from other departments are only meant as examples; there are many suitable courses in several departments that can be taken to fulfill part or all of requirement '2'.

Example 2: for students with strong theoretical interest and considering graduate school in math

		Units
Single-variable calculus: AP Credit, (MATH 19, MATH 20, MATH 21)		8-10
Select one of the following multivariable calculus sequences:		15
Math 50 Series: (MATH 51, MATH 52, MATH 53). These courses are not proof-oriented.		
Math 60CM Series: (MATH 61CM, MATH 62CM, MATH 63CM). This proof-oriented sequence is called Modern Mathematics: Continuous Methods		
Math 60DM Series: (MATH 61DM, MATH 62DM, MATH 63DM). This proof-oriented sequence is called Modern Mathematics: Discrete Methods		
MATH 101	Math Discovery Lab	3
MATH 106	Functions of a Complex Variable	3
or MATH 116	Complex Analysis	
MATH 113	Linear Algebra and Matrix Theory	3
MATH 120	Groups and Rings	3
MATH 171	Fundamental Concepts of Analysis	3
Plus 24-26 units of math courses numbered 121 or higher (the logic courses PHIL 151 and PHIL 152 are considered to be such courses), including at least one algebra course, one analysis course, and one geometry/topology course. (See the description of the honors program below)		26
Total Units		64-66

In addition, those contemplating eventual graduate work in Mathematics should consider including at least one graduate-level math course such as MATH 205A Real Analysis, MATH 210A Modern Algebra I, or MATH 215A Algebraic Topology or MATH 215B Differential Topology. Such students should also consider the possibility of entering the honors program.

Example 3: for students interested in applied math

Students desiring significant computational and/or financial and/or statistical components are encouraged to also consider the Mathematics and Computational Science program.

		Units
Single-variable calculus: AP Credit, (MATH 19, MATH 20, MATH 21)		8-10
Select one of the following multivariable calculus sequences:		15
Math 50 Series (MATH 51, MATH 52, MATH 53). These courses are not proof-oriented.		
Math 60 Series (MATH 61DM, MATH 62DM, MATH 63DM). This proof-oriented sequence is called Modern Mathematics: Discrete Methods		
MATH 104	Applied Matrix Theory	3
MATH 106	Functions of a Complex Variable	3
MATH 107	Graph Theory	3
MATH 108	Introduction to Combinatorics and Its Applications	3
MATH 109	Applied Group Theory	3
MATH 110	Applied Number Theory and Field Theory	3
MATH 115	Functions of a Real Variable	3
MATH 131P	Partial Differential Equations	3
STATS 116	Theory of Probability	3
or MATH 151	Introduction to Probability Theory	
Plus at least 12 units of additional courses in applied mathematics, including, for example, suitable courses from the departments of Physics, Computer Science, Economics, Engineering, and Statistics.		14
Total Units		64-66

Honors Program

This option is intended for students who have strong theoretical interests and abilities in mathematics. The goal is to give students a thorough introduction to the main branches of mathematics. The honors program requires a senior thesis, which can involve either original research or expository work on advanced topics in mathematics. This option provides an excellent background with which to enter a Master's or Ph.D. program in Mathematics. Students completing the honors program are awarded a B.S. in Mathematics with Honors.

It is recommended that either sequence (MATH 61CM, MATH 62CM, MATH 63CM) or (MATH 61DM, MATH 62DM, MATH 63DM) be taken in the freshman year. To graduate with a B.S. in Mathematics with Honors, the following conditions apply in addition to the usual requirements for math majors:

1. The selection of courses under items '1' and '2' above must contain:

		Units
MATH 116	Complex Analysis	3
MATH 120	Groups and Rings	3
MATH 171	Fundamental Concepts of Analysis	3

And must also include seven additional 3-unit Math courses numbered 121 or higher. (The logic courses PHIL 151 Metalogic and PHIL 152 Computability and Logic can also be used.) These seven courses must include at least:

		Units
One Algebra Course:		
MATH 121	Galois Theory	3
MATH 122	Modules and Group Representations	3
MATH 152	Elementary Theory of Numbers	3
MATH 154	Algebraic Number Theory	3
One Analysis Course:		
MATH 136	Stochastic Processes	3
MATH 151	Introduction to Probability Theory	3
MATH 155	Analytic Number Theory	3
MATH 172	Lebesgue Integration and Fourier Analysis	3
MATH 173	Theory of Partial Differential Equations	3
MATH 175	Elementary Functional Analysis	3
One Geometry/Topology Course:		
MATH 143	Differential Geometry	3
MATH 144	Introduction to Topology and Geometry	3
MATH 145	Algebraic Geometry	3
MATH 147	Differential Topology	3
MATH 148	Algebraic Topology	3

2. All courses counting towards the honors requirements (MATH 116, MATH 120, MATH 171, all 7 additional Math courses used to fulfill the major requirement, and MATH 197) must be taken for a letter grade.
3. Students must have an average GPA of at least a 3.3 across all math classes counting towards the major at the time of applying for honors to be eligible for acceptance into the honors program, as well as upon graduation to graduate with honors.
4. Majors interested in honors can apply in winter quarter of their junior year at the earliest, and no later than the last day of classes in the spring quarter of junior year.
5. Students in the honors program must write a senior thesis. In order to facilitate this, the student must, by the end of the junior year, choose an undergraduate thesis adviser from the Department of Mathematics faculty and map out a concentrated reading program under the direction and guidance of the adviser. This will occur when the student applies for honors. During the senior year, the student must enroll in MATH 197 Senior Honors Thesis with his/her adviser for a total of 6 units (recommended to be spread over three quarters), and work toward completion of the thesis under the direction and guidance of the thesis adviser. The thesis may contain original material, or be a synthesis of work in current or recent research literature. The 6 units of credit for MATH 197 Senior Honors Thesis are required in addition to the 64 units required of the major. (See the major requirements at the top of the page.)
6. The deadline for the senior thesis final draft is the Monday of week 8 of the student's graduation quarter.

In addition to the minimum requirements laid out above, it is strongly recommended that students take at least one graduate-level course (that is, at least one course in the 200 plus range). MATH 205A Real Analysis, MATH 210A Modern Algebra I, and MATH 215A Algebraic Topology or MATH 215B Differential Topology are especially recommended in this context.

Students with questions about the honors program should see the department's director of undergraduate studies.

Computer Science Theory/Discrete Mathematics Subplan

There are two pathways to achieve a Mathematics B.S. degree:

- The Mathematics bachelor's degree, or
- The Mathematics bachelor's degree with the Computer Science Theory/Discrete Mathematics subplan.

The following requirements refer to the Mathematics Bachelor's degree with the Computer Science Theory/Discrete Mathematics Subplan. Students who are interested in the Mathematics Bachelor's degree should see the Bachelor's tab (p. 1800).

The Computer Science Theory/Discrete Mathematics subplan is declared on Axess; it appears on the transcript and the diploma.

Computer Science Theory/Discrete Mathematics Subplan Description

This subplan is intended for students wishing for a strong and deep background in the area of computer science theory and mathematics. The subplan could prepare students for graduate work in either area, as well as for other careers requiring particular strength in this type of thinking. The emphasis of this subplan is on theory. Students interested in a combination of mathematics and computer science more generally should consider the Bachelor of Science in Mathematical and Computational Science. Depending on their interests, students are also encouraged to consider the regular Mathematics major, the Computer Science major, and in particular, the Computer Science Theory track of the Computer Science major.

Course Requirements

The subplan requires a minimum of 64 units as outlined in requirements 1 and 2 of the Bachelor of Science in Mathematics; see the Bachelor's tab (p. 1800). The selection of courses for the 64 total units must contain the required courses listed in the chart below. For the purposes of the subplan, the required Computer Science Department courses can count toward either the 49 units of Math Department courses or the 15 additional units. All required courses must be taken for a letter grade. It is highly recommended to complete the MATH 60DM sequence, although it is not required.

		Units
Required Courses		
Required Math Courses		
MATH 106	Functions of a Complex Variable	3
or MATH 116	Complex Analysis	
MATH 120	Groups and Rings	3
MATH 171	Fundamental Concepts of Analysis	3
Required CS Theory Courses		
CS 154	Introduction to the Theory of Computation	3-4
CS 161	Design and Analysis of Algorithms	3-5
Additional Math Courses		
Two of the following:		6-8
MATH 61DM	Modern Mathematics: Discrete Methods	
MATH 107	Graph Theory	
MATH 108	Introduction to Combinatorics and Its Applications	
One of the following:		3-5
MATH 151	Introduction to Probability Theory	
MATH 230A	Theory of Probability I	
STATS 116	Theory of Probability	
Two of the following:		6
MATH 113	Linear Algebra and Matrix Theory	
MATH 152	Elementary Theory of Numbers	
MATH 154	Algebraic Number Theory	
MATH 155	Analytic Number Theory	
MATH 159	Discrete Probabilistic Methods	
MATH 161	Set Theory	
Additional CS Theory Courses:		
Four of the following:		12-13
CS 167		
CS 168	The Modern Algorithmic Toolbox	
CS 254	Computational Complexity	
CS 255	Introduction to Cryptography	
CS 261	Optimization and Algorithmic Paradigms	
CS 265	Randomized Algorithms and Probabilistic Analysis	
CS 268	Geometric Algorithms	
Total Units		42-50

Minor in Mathematics

To qualify for the minor in Mathematics, a student should complete, for a letter grade, at least six Department of Mathematics courses numbered 51 or higher, totaling a minimum of 24 units. For the purposes of this requirement, STATS 116 Theory of Probability, PHIL 151 Metalogic, and PHIL 152 Computability and Logic count as Department of Mathematics courses. No other courses from outside the Department of Mathematics may be used towards the minor in Mathematics.

It is recommended that these courses include:

		Units
Math Minor		
MATH 51	Linear Algebra, Multivariable Calculus, and Modern Applications	5
or MATH 61CM	Modern Mathematics: Continuous Methods	
or MATH 61DM	Modern Mathematics: Discrete Methods	
MATH 52	Integral Calculus of Several Variables	5
or MATH 62CM	Modern Mathematics: Continuous Methods	
or MATH 62DM	Modern Mathematics: Discrete Methods	
MATH 53	Ordinary Differential Equations with Linear Algebra	5
or MATH 63CM	Modern Mathematics: Continuous Methods	
or MATH 63DM	Modern Mathematics: Discrete Methods	
Plus three additional MATH courses		9
Total Units		24

At least 12 of the units applied toward the minor in Mathematics must be taken at Stanford. The policy of the Mathematics Department is that no courses other than the MATH 50/60 series and below may be double-counted toward any other University major or minor.

Master of Science in Mathematics

The University's basic requirements for the master's degree are discussed in the "Graduate Degrees (p. 65)" section of this bulletin. Students should pay particular attention to the University's course requirements for graduate degrees.

University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 56)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 65)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the

graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken three quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate advisor be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

The following are specific departmental requirements:

Candidates must complete an approved course program of 45 units of courses beyond the department requirements for the B.S. degree, of which at least 36 units must be Mathematics Department courses, taken for a letter grade. The Mathematics Department courses must include at least 18 units numbered 200 or above. The candidate must have a grade point average (GPA) of 3.0 (B) over all course work taken in Mathematics, and a GPA of 3.0 (B) in the 200-level courses considered separately. Course work for the M.S. degree must be approved during the first quarter of enrollment in the program by the department's Director of Graduate Studies.

The Financial Mathematics M.S. degree program is no longer offered through the School of Humanities and Sciences. The Institute for Computational and Mathematical Engineering (ICME (https://icme.stanford.edu/)) now offers a master's degree track in Mathematical and Computational Finance (p. 781).

Doctor of Philosophy in Mathematics

The University's basic requirements for the doctorate (residence, dissertation, examinations, etc.) are discussed in the "Graduate Degrees (p. 65)" section of this bulletin. The following are specific departmental requirements.

To be admitted to candidacy, the student must have successfully completed 27 units of graduate courses (that is, courses numbered 200 and above). In addition, the student must pass qualifying examinations given by the department.

Beyond the requirements for candidacy, the student must complete a course of study approved by the Graduate Affairs Committee of the Department of Mathematics and submit an acceptable dissertation. In accordance with University requirements, Ph.D. students must complete a total of 135 course units beyond the bachelor's degree. These courses should be Department of Mathematics courses or approved courses from other departments. The course program should display substantial breadth in mathematics outside the student's field of application. The student must receive a grade point average (GPA) of 3.0 (B) or better in courses used to satisfy the Ph.D. requirement. In addition, the student must pass the Department area examination and the University oral examination.

Experience in teaching is emphasized in the Ph.D. program. Each student is required to complete nine quarters of such experience. The nature of the teaching assignment for each of those quarters is determined by the department in consultation with the student. Typical assignments include teaching or assisting in teaching an undergraduate course or lecturing in an advanced seminar.

For further information concerning degree programs, fellowships, and assistantships, inquire of the department's student services office.

Ph.D. Minor in Mathematics

Requirements for the Ph.D. Minor in Mathematics are:

		Units
Complete both of the following Sequences: [1, 2]		
Sequence 1		
MATH 106	Functions of a Complex Variable	3
or MATH 116	Complex Analysis	
MATH 131P	Partial Differential Equations	3
Sequence 2		
MATH 113	Linear Algebra and Matrix Theory	3
MATH 120	Groups and Rings	3
or MATH 152	Elementary Theory of Numbers	
Additional Courses		
21 units of 200-level MATH courses [3]		21
Total Units		33

1. The 100-level courses may have been completed during undergraduate study, and their equivalents from other universities are acceptable.
2. A third coherent sequence designed by the student, subject to the approval of the graduate committee, may be considered as a substitute for Sequence 1 or 2.
3. The 200-level courses must be taken at Stanford and approved by the Department of Mathematics Ph.D. minor adviser.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a "credit" or "no credit" grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a "credit" or "satisfactory" grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

Math courses taken during Spring 2020 or during the 2020-21 academic year that ordinarily count toward the Math major will still be valid if taken S/NC (Spring 2020) or CR/NC (2020-21). These will not count against the limit of 6 CR/NC elective units that may be applied towards the major.

Graduate Degree Requirements

Grading

The Mathematics Department has not changed its policy concerning 'CR' (credit) or 'S' (satisfactory) grades in degree requirements requiring a letter grade for academic year 2020-21.

Graduate Advising Expectations

The Department of Mathematics is committed to providing academic advising in support of graduate student scholarly and professional development. When most effective, this advising relationship entails collaborative and sustained engagement by both the adviser and the advisee. As a best practice, advising expectations should be periodically discussed and reviewed to ensure mutual understanding. Both the adviser and the advisee are expected to maintain professionalism and integrity.

Faculty advisers guide students in key areas such as selecting courses, designing and conducting research, developing of teaching pedagogy, navigating policies and degree requirements, and exploring academic opportunities and professional pathways.

Graduate students are active contributors to the advising relationship, proactively seeking academic and professional guidance and taking responsibility for informing themselves of policies and degree requirements for their graduate program.

For a statement of University policy on graduate advising, see the "Graduate Advising (p. 80)" section of this bulletin.

Emeriti: Gregory Brumfiel, Gunnar Carlsson, Robert Finn, Yitzhak Katznelson, Harold Levine, Jun Li, Tai-Ping Liu, R. James Milgram, Donald Ornstein, Richard Schoen, Leon Simon, Ralph L. Cohen

Chair: Rafe Mazzeo

Director of Graduate Studies: Jan Vondrák

Director of Undergraduate Studies: Brian Conrad

Professors: Daniel Bump, Emmanuel Candès, Sourav Chatterjee, Brian Conrad, Amir Dembo (on leave Spring 2021), Persi Diaconis, Yakov Eliashberg, Jacob Fox, June Huh, Steven Kerckhoff (on leave Winter 2021), Eugenia Malinnikova, Ciprian Manlescu, Rafe Mazzeo, Eleny Ionel, George Papanicolaou (on leave Spring 2021), Lenya Ryzhik, Kannan Soundararajan, Richard Taylor (on leave Spring 2021), Ravi Vakil, András Vasy, Brian White (on leave Spring 2021), Lexing Ying

Professor (Teaching): Tadashi Tokieda

Associate Professor: Jan Vondrák, Jonathan Luk

Assistant Professors: Otis Chodosh

Courtesy Professors: Moses Charikar, Renata Kallosh, Andrea Montanari

Adjunct Professors: Brian Conrey, David Hoffman

Szegö Assistant Professors: Perry Kleinhenz, Matthew Kwan, Joonhyun La, Zhenkun Li, Chao Ma, Hunter Spink, Steve Trettel, Umut Varolgunes, Sara Venkatesh

Senior Lecturer: Mark Lucianovic

Lecturers: Pawel Grzegrzolka, Gene Kim, Christine Taylor, Wojciech Wieczorek

Courses

MATH 19. Calculus. 3 Units.
Introduction to differential calculus of functions of one variable. Review of elementary functions (including exponentials and logarithms), limits, rates of change, the derivative and its properties, applications of the derivative. Prerequisites: trigonometry, advanced algebra, and analysis of elementary functions (including exponentials and logarithms). You must have taken the math placement diagnostic (offered through the Math Department website) in order to register for this course.

MATH 19A. Calculus, ACE. 1 Unit.
Additional problem solving session for Math 19 guided by a course assistant. Concurrent enrollment in Math 19 required. Application required: https://engineering.stanford.edu/students-academics/equity-and-inclusion-initiatives/undergraduate-programs/additional-calculus.

MATH 20. Calculus. 3 Units.
The definite integral, Riemann sums, antiderivatives, the Fundamental Theorem of Calculus. Integration by substitution and by parts. Area between curves, and volume by slices, washers, and shells. Initial-value problems, exponential and logistic models, direction fields, and parametric curves. Prerequisite: Math 19 or equivalent. If you have not previously taken a calculus course at Stanford then you must have taken the math placement diagnostic (offered through the Math Department website) in order to register for this course.

MATH 20A. Calculus, ACE. 1 Unit.
Additional problem solving session for Math 20 guided by a course assistant. Concurrent enrollment in Math 20 required. Application required: https://engineering.stanford.edu/students-academics/equity-and-inclusion-initiatives/undergraduate-programs/additional-calculus.

MATH 21. Calculus. 4 Units.
Review of limit rules. Sequences, functions, limits at infinity, and comparison of growth of functions. Review of integration rules, integrating rational functions, and improper integrals. Infinite series, special examples, convergence and divergence tests (limit comparison and alternating series tests). Power series and interval of convergence, Taylor polynomials, Taylor series and applications. Prerequisite: Math 20 or equivalent. If you have not previously taken a calculus course at Stanford then you must have taken the math placement diagnostic (offered through the Math Department website) in order to register for this course.

MATH 21A. Calculus, ACE. 5 Units.
Students attend one of the regular MATH 21 lectures with a longer discussion section of two hours per week instead of one. Active mode: students in small groups discuss and work on problems, with a TA providing guidance and answering questions. Application required: https://forms.gle/BZJqJTawa5PUqe9E7.

MATH 51. Linear Algebra, Multivariable Calculus, and Modern Applications. 5 Units.
This course provides unified coverage of linear algebra and multivariable differential calculus, and the free course e-text connects the material to many fields. Linear algebra in large dimensions underlies the scientific, data-driven, and computational tasks of the 21st century. The linear algebra portion includes orthogonality, linear independence, matrix algebra, and eigenvalues with applications such as least squares, linear regression, and Markov chains (relevant to population dynamics, molecular chemistry, and PageRank); the singular value decomposition (essential in image compression, topic modeling, and data-intensive work in many fields) is introduced in the final chapter of the e-text. The multivariable calculus portion includes unconstrained optimization via gradients and Hessians (used for energy minimization), constrained optimization (via Lagrange multipliers, crucial in economics), gradient descent and the multivariable Chain Rule (which underlie many machine learning algorithms, such as backpropagation), and Newton's method (an ingredient in GPS and robotics). The course emphasizes computations alongside an intuitive understanding of key ideas. The widespread use of computers makes it important for users of math to understand concepts: novel users of quantitative tools in the future will be those who understand ideas and how they fit with examples and applications. This is the only course at Stanford whose syllabus includes nearly all the math background for CS 229, which is why CS 229 and CS 230 specifically recommend it (or other courses resting on it). For frequently asked questions about the differences between Math 51 and CME 100, see the FAQ on the placement page on the Math Department website. Prerequisite: Math 21 or the math placement diagnostic (offered through the Math Department website) in order to register for this course.

MATH 51A. Linear Algebra, Multivariable Calculus, and Modern Applications, ACE. 6 Units.
Students attend one of the regular MATH 51 lectures with a longer discussion section of four hours per week instead of two. Active mode: students in small groups discuss and work on problems from a worksheet distributed 2 or 3 days in advance, with a TA providing guidance and answering questions. Application required: https://forms.gle/7Bexo81r9YcZYRW1A.

MATH 52. Integral Calculus of Several Variables. 5 Units.
Iterated integrals, line and surface integrals, vector analysis with applications to vector potentials and conservative vector fields, physical interpretations. Divergence theorem and the theorems of Green, Gauss, and Stokes. Prerequisite: 51 or equivalents.

MATH 52A. Integral Calculus of Several Variables, ACE. 1 Unit.
Additional problem solving session for Math 52 guided by a course assistant. Concurrent enrollment in Math 52 required. Application required: https://engineering.stanford.edu/students-academics/equity-and-inclusion-initiatives/undergraduate-programs/additional-calculus.

MATH 53. Ordinary Differential Equations with Linear Algebra. 5 Units.
Ordinary differential equations and initial value problems, systems of linear differential equations with constant coefficients, applications of second-order equations to oscillations, matrix exponentials, Laplace transforms, stability of non-linear systems and phase plane analysis, numerical methods. Prerequisite: 51 or equivalents.

MATH 53A. Ordinary Differential Equations with Linear Algebra, ACE. 1 Unit.
Additional problem solving session for Math 53 guided by a course assistant. Concurrent enrollment in Math 53 required. Application required: https://engineering.stanford.edu/students-academics/equity-and-inclusion-initiatives/undergraduate-programs/additional-calculus.

MATH 56. Proofs and Modern Mathematics. 3 Units.
How do mathematicians think? Why are the mathematical facts learned in school true? In this course students will explore higher-level mathematical thinking and will gain familiarity with a crucial aspect of mathematics: achieving certainty via mathematical proofs, a creative activity of figuring out what should be true and why. This course is ideal for students who would like to learn about the reasoning underlying mathematical results, but at a pace and level of abstraction not as intense as Math 61CM/DM, as a consequence benefiting from additional opportunity to explore the reasoning. Familiarity with one-variable calculus is strongly recommended at least at the AB level of AP Calculus since a significant part of the course develops some of the main results in that material systematically from a small list of axioms. We also address linear algebra from the viewpoint of a mathematician, illuminating notions such as fields and abstract vector spaces. This course may be paired with Math 51; though that course is not a pre- or co-requisite.

MATH 61CM. Modern Mathematics: Continuous Methods. 5 Units.
This is the first part of a theoretical (i.e., proof-based) sequence in multivariable calculus and linear algebra, providing a unified treatment of these topics. Covers general vector spaces, linear maps and duality, eigenvalues, inner product spaces, spectral theorem, metric spaces, differentiation in Euclidean space, submanifolds of Euclidean space as local graphs, integration on Euclidean space, and many examples. The linear algebra content is covered jointly with Math 61DM. Students should know 1-variable calculus and have an interest in a theoretical approach to the subject. Prerequisite: score of 5 on the BC-level Advanced Placement calculus exam, or consent of the instructor.

MATH 61DM. Modern Mathematics: Discrete Methods. 5 Units.
This is the first part of a theoretical (i.e., proof-based) sequence in discrete mathematics and linear algebra. Covers general vector spaces, linear maps and duality, eigenvalues, inner product spaces, spectral theorem, counting techniques, and linear algebra methods in discrete mathematics including spectral graph theory and dimension arguments. The linear algebra content is covered jointly with Math 61CM. Students should have an interest in a theoretical approach to the subject. Prerequisite: score of 5 on the BC-level Advanced Placement calculus exam, or consent of the instructor.nnThis sequence is not appropriate for students planning to major in natural sciences, economics, or engineering, but is suitable for majors in any other field (such as MCS ("data science"), computer science, and mathematics).

MATH 62CM. Modern Mathematics: Continuous Methods. 5 Units.
A proof-based introduction to manifolds and the general Stokes' theorem. This includes a treatment of multilinear algebra, further study of submanifolds of Euclidean space (with many examples), differential forms and their geometric interpretations, integration of differential forms, Stokes' theorem, and some applications to topology. Prerequisites: Math 61CM.

MATH 62DM. Modern Mathematics: Discrete Methods. 5 Units.
This is the second part of a proof-based sequence in discrete mathematics. This course covers topics in elementary number theory, group theory, and discrete Fourier analysis. For example, we'll discuss the basic examples of abelian groups arising from congruences in elementary number theory, as well as the non-abelian symmetric group of permutations. Prerequisites: 61DM or 61CM.

MATH 63CM. Modern Mathematics: Continuous Methods. 5 Units.
A proof-based course on ordinary differential equations. Topics include the inverse and implicit function theorems, implicitly-defined submanifolds of Euclidean space, linear systems of differential equations and necessary tools from linear algebra, stability and asymptotic properties of solutions to linear systems, existence and uniqueness theorems for nonlinear differential equations, behavior of solutions near an equilibrium point, and Sturm-Liouville theory. Prerequisite: Math 61CM.

MATH 63DM. Modern Mathematics: Discrete Methods. 5 Units.
Third part of a proof-based sequence in discrete mathematics. The first half of the quarter gives a fast-paced coverage of probability and random processes with an intensive use of generating functions. The second half treats entropy, Shannon¿s coding theorem, game theory, probabilistic methods in solving non-probabilistic problems; some of these topics may vary from year to year. nnPrerequisite: Math 61DM or 61CM.

MATH 70SI. The Game of Go: Strategy, Theory, and History. 1 Unit.
Strategy and mathematical theories of the game of Go, with guest appearance by a professional Go player.

MATH 80Q. Capillary Surfaces: Explored and Unexplored Territory. 3 Units.
Preference to sophomores. Capillary surfaces: the interfaces between fluids that are adjacent to each other and do not mix. Recently discovered phenomena, predicted mathematically and subsequently confirmed by experiments, some done in space shuttles. Interested students may participate in ongoing investigations with affinity between mathematics and physics.

MATH 87Q. Mathematics of Knots, Braids, Links, and Tangles. 3 Units.
Preference to sophomores. Types of knots and how knots can be distinguished from one another by means of numerical or polynomial invariants. The geometry and algebra of braids, including their relationships to knots. Topology of surfaces. Brief summary of applications to biology, chemistry, and physics.

MATH 101. Math Discovery Lab. 3 Units.
MDL is a discovery-based project course in mathematics. Students work independently in small groups to explore open-ended mathematical problems and discover original mathematics. Students formulate conjectures and hypotheses; test predictions by computation, simulation, or pure thought; and present their results to classmates. No lecture component; in-class meetings reserved for student presentations, attendance mandatory. Admission is by application: http://math101.stanford.edu. Motivated students with any level of mathematical background are encouraged to apply. WIM.

MATH 104. Applied Matrix Theory. 3 Units.
Linear algebra for applications in science and engineering: orthogonality, projections, spectral theory for symmetric matrices, the singular value decomposition, the QR decomposition, least-squares, the condition number of a matrix, algorithms for solving linear systems. MATH 113 offers a more theoretical treatment of linear algebra. MATH 104 and ENGR 108 cover complementary topics in applied linear algebra. The focus of MATH 104 is on algorithms and concepts; the focus of ENGR 108 is on a few linear algebra concepts, and many applications. Prerequisites: MATH 51 and programming experience on par with CS 106.

MATH 106. Functions of a Complex Variable. 3 Units.
Complex numbers, analytic functions, Cauchy-Riemann equations, complex integration, Cauchy integral formula, residues, elementary conformal mappings. (Math 116 offers a more theoretical treatment.) Prerequisite: 52.

MATH 107. Graph Theory. 3 Units.
An introductory course in graph theory establishing fundamental concepts and results in variety of topics. Topics include: basic notions, connectivity, cycles, matchings, planar graphs, graph coloring, matrix-tree theorem, conditions for hamiltonicity, Kuratowski's theorem, Ramsey and Turan-type theorem. Prerequisites: 51 or equivalent and some familiarity with proofs is required.

MATH 108. Introduction to Combinatorics and Its Applications. 3 Units.
Topics: graphs, trees (Cayley's Theorem, application to phylogony), eigenvalues, basic enumeration (permutations, Stirling and Bell numbers), recurrences, generating functions, basic asymptotics. Prerequisites: 51 or equivalent.

MATH 109. Applied Group Theory. 3 Units.
Applications of the theory of groups. Topics: elements of group theory, groups of symmetries, matrix groups, group actions, and applications to combinatorics and computing. Applications: rotational symmetry groups, the study of the Platonic solids, crystallographic groups and their applications in chemistry and physics. Honors math majors and students who intend to do graduate work in mathematics should take 120. WIM. Prerequisite: Math 51.

MATH 110. Applied Number Theory and Field Theory. 3 Units.
Number theory and its applications to modern cryptography. Topics: congruences, finite fields, primality testing and factorization, public key cryptography, error correcting codes, and elliptic curves, emphasizing algorithms. Includes an introduction to proof-writing. WIM. Prerequisite: Math 51.

MATH 113. Linear Algebra and Matrix Theory. 3 Units.
Algebraic properties of matrices and their interpretation in geometric terms. The relationship between the algebraic and geometric points of view and matters fundamental to the study and solution of linear equations. Topics: linear equations, vector spaces, linear dependence, bases and coordinate systems; linear transformations and matrices; similarity; eigenvectors and eigenvalues; diagonalization. Includes an introduction to proof-writing. (Math 104 offers a more application-oriented treatment.) Prerequisites: Math 51.

MATH 114. Introduction to Scientific Computing. 3 Units.
Introduction to Scientific Computing Numerical computation for mathematical, computational, physical sciences and engineering: error analysis, floating-point arithmetic, nonlinear equations, numerical solution of systems of algebraic equations, banded matrices, least squares, unconstrained optimization, polynomial interpolation, numerical differentiation and integration, numerical solution of ordinary differential equations, truncation error, numerical stability for time dependent problems and stiffness. Implementation of numerical methods in MATLAB programming assignments. Prerequisites: MATH 51, 52, 53; prior programming experience (MATLAB or other language at level of CS 106A or higher).
Same as: CME 108

MATH 115. Functions of a Real Variable. 3 Units.
The development of real analysis in Euclidean space: sequences and series, limits, continuous functions, derivatives, integrals. Basic point set topology. Includes introduction to proof-writing. Prerequisite: 21.

MATH 116. Complex Analysis. 3 Units.
Analytic functions, Cauchy integral formula, power series and Laurent series, calculus of residues and applications, conformal mapping, analytic continuation, introduction to Riemann surfaces, Fourier series and integrals. (Math 106 offers a less theoretical treatment.) Prerequisites: 52, and 115 or 171.

MATH 118. Mathematics of Computation. 3 Units.
Notions of analysis and algorithms central to modern scientific computing: continuous and discrete Fourier expansions, the fast Fourier transform, orthogonal polynomials, interpolation, quadrature, numerical differentiation, analysis and discretization of initial-value and boundary-value ODE, finite and spectral elements. Prerequisites: MATH 51 and 53.

MATH 120. Groups and Rings. 3 Units.
Recommended for Mathematics majors and required of honors Mathematics majors. Similar to 109 but altered content and more theoretical orientation. Groups acting on sets, examples of finite groups, Sylow theorems, solvable and simple groups. Fields, rings, and ideals; polynomial rings over a field; PID and non-PID. Unique factorization domains. WIM.

MATH 121. Galois Theory. 3 Units.
Field of fractions, splitting fields, separability, finite fields. Galois groups, Galois correspondence, examples and applications. Prerequisite: Math 120 and (also recommended) 113.

MATH 122. Modules and Group Representations. 3 Units.
Modules over PID. Tensor products over fields. Group representations and group rings. Maschke's theorem and character theory. Character tables, construction of representations. Prerequisite: Math 120. Also recommended: 113.

MATH 131P. Partial Differential Equations. 3 Units.
An introduction to PDE; particularly suitable for non-Math majors. Topics include physical examples of PDE's, method of characteristics, D'Alembert's formula, maximum principles, heat kernel, Duhamel's principle, separation of variables, Fourier series, Harmonic functions, Bessel functions, spherical harmonics. Students who have taken MATH 171 should consider taking MATH 173 rather than 131P. Prerequisite: 53.

MATH 136. Stochastic Processes. 3 Units.
Introduction to measure theory, Lp spaces and Hilbert spaces. Random variables, expectation, conditional expectation, conditional distribution. Uniform integrability, almost sure and Lp convergence. Stochastic processes: definition, stationarity, sample path continuity. Examples: random walk, Markov chains, Gaussian processes, Poisson processes, Martingales. Construction and basic properties of Brownian motion. Prerequisite: STATS 116 or MATH 151 or equivalent. Recommended: MATH 115 or equivalent. http://statweb.stanford.edu/~adembo/math-136/.
Same as: STATS 219

MATH 137. Mathematical Methods of Classical Mechanics. 3 Units.
Newtonian mechanics. Lagrangian formalism. E. Noether's theorem. Oscillations. Rigid bodies. Introduction to symplectic geometry. Hamiltonian formalism. Legendre transform. Variational principles. Geometric optics. Introduction to the theory of integrable systems. Prerequisites: 51, 52, 53, or 61CM, 62CM, 63CM.

MATH 138. Celestial Mechanics. 3 Units.
Mathematically rigorous introduction to the classical N-body problem: the motion of N particles evolving according to Newton's law. Topics include: the Kepler problem and its symmetries; other central force problems; conservation theorems; variational methods; Hamilton-Jacobi theory; the role of equilibrium points and stability; and symplectic methods. Prerequisites: 53, and 115 or 171.

MATH 143. Differential Geometry. 3 Units.
Geometry of curves and surfaces in three-space and higher dimensional manifolds. Parallel transport, curvature, and geodesics. Surfaces with constant curvature. Minimal surfaces.

MATH 144. Introduction to Topology and Geometry. 3 Units.
Point set topology, including connectedness, compactness, countability and separation axioms. The inverse and implicit function theorems. Smooth manifolds, immersions and submersions, embedding theorems. Prerequisites: Math 61CM, or Math 51 and familiarity with linear algebra and analysis arguments at the level of 113 and 115 respectively.

MATH 145. Algebraic Geometry. 3 Units.
An introduction to the methods and concepts of algebraic geometry. The point of view and content will vary over time, but include: affine varieties, Hilbert basis theorem and Nullstellensatz, projective varieties, algebraic curves. Required: 120. Strongly recommended: additional mathematical maturity via further basic background with fields, point-set topology, or manifolds.

MATH 147. Differential Topology. 3 Units.
Introduction to smooth methods in topology including tranvsersality, intersection number, fixed point theorems, as well as differential forms and integration. Prerequisites: Math 62CM or Math 144.

MATH 148. Algebraic Topology. 3 Units.
Fundamental group, covering spaces, Euler characteristic, homology, classification of surfaces, knots. Prerequisite: 109 or 120.

MATH 151. Introduction to Probability Theory. 3 Units.
A proof-oriented development of basic probability theory. Counting; axioms of probability; conditioning and independence; expectation and variance; discrete and continuous random variables and distributions; joint distributions and dependence; Central Limit Theorem and laws of large numbers. nPrerequisite: Either Math 61CM or Math 52, and Math 115 or equivalent.

MATH 152. Elementary Theory of Numbers. 3 Units.
Euclid's algorithm, fundamental theorems on divisibility; prime numbers; congruence of numbers; theorems of Fermat, Euler, Wilson; congruences of first and higher degrees; quadratic residues; introduction to the theory of binary quadratic forms; quadratic reciprocity; partitions.

MATH 154. Algebraic Number Theory. 3 Units.
Properties of number fields and Dedekind domains, quadratic and cyclotomic fields, applications to some classical Diophantine equations. Prerequisites: 120 and 121, especially modules over principal ideal domains and Galois theory of finite fields.

MATH 155. Analytic Number Theory. 3 Units.
Introduction to Dirichlet series and Dirichlet characters, Poisson summation, Gauss sums, analytic continuation for Dirichlet L-functions, applications to prime numbers (e.g., prime number theorem, Dirichlet's theorem). Prerequisites: Complex analysis (Math 106 or 116), Math 152 (or comparable familiarity with the Euclidean algorithm, multiplicative group modulo n, and quadratic reciprocity), and experience with basic analysis arguments.

MATH 158. Basic Probability and Stochastic Processes with Engineering Applications. 3 Units.
Calculus of random variables and their distributions with applications. Review of limit theorems of probability and their application to statistical estimation and basic Monte Carlo methods. Introduction to Markov chains, random walks, Brownian motion and basic stochastic differential equations with emphasis on applications from economics, physics and engineering, such as filtering and control. Prerequisites: exposure to basic probability.
Same as: CME 298

MATH 159. Discrete Probabilistic Methods. 3 Units.
Modern discrete probabilistic methods suitable for analyzing discrete structures of the type arising in number theory, graph theory, combinatorics, computer science, information theory and molecular sequence analysis. Prerequisite: STATS 116/MATH 151 or equivalent. Typically in alternating years.

MATH 161. Set Theory. 3 Units.
Informal and axiomatic set theory: sets, relations, functions, and set-theoretical operations. The Zermelo-Fraenkel axiom system and the special role of the axiom of choice and its various equivalents. Well-orderings and ordinal numbers; transfinite induction and transfinite recursion. Equinumerosity and cardinal numbers; Cantor's Alephs and cardinal arithmetic. Open problems in set theory. Prerequisite: students should be comfortable doing proofs.

MATH 171. Fundamental Concepts of Analysis. 3 Units.
Recommended for Mathematics majors and required of honors Mathematics majors. Similar to 115 but altered content and more theoretical orientation. Properties of Riemann integrals, continuous functions and convergence in metric spaces; compact metric spaces, basic point set topology. Prerequisite: 61CM or 61DM or 115 or consent of the instructor. WIM.

MATH 172. Lebesgue Integration and Fourier Analysis. 3 Units.
Similar to 205A, but for undergraduate Math majors and graduate students in other disciplines. Topics include Lebesgue measure on Euclidean space, Lebesgue integration, L^p spaces, the Fourier transform, the Hardy-Littlewood maximal function and Lebesgue differentiation. Prerequisite: 171 or consent of instructor.

MATH 173. Theory of Partial Differential Equations. 3 Units.
A rigorous introduction to PDE accessible to advanced undergraduates. Elliptic, parabolic, and hyperbolic equations in many space dimensions including basic properties of solutions such as maximum principles, causality, and conservation laws. Methods include the Fourier transform as well as more classical methods. The Lebesgue integral will be used throughout, but a summary of its properties will be provided to make the course accessible to students who have not had 172 or 205A. In years when Math 173 is not offered, Math 220 is a recommended alternative (with similar content but a different emphasis). Prerequisite: 171 or equivalent.

MATH 175. Elementary Functional Analysis. 3 Units.
Linear operators on Hilbert space. Spectral theory of compact operators; applications to integral equations. Elements of Banach space theory. Prerequisite: 115 or 171.

MATH 177. Geometric Methods in the Theory of Ordinary Differential Equations. 3 Units.
Hamiltonian systems and their geometry. First order PDE and Hamilton-Jacobi equation. Structural stability and hyperbolic dynamical systems. Completely integrable systems. Perturbation theory.

MATH 193. Polya Problem Solving Seminar. 1 Unit.
Topics in mathematics and problem solving strategies with an eye towards the Putnam Competition. Topics may include parity, the pigeonhole principle, number theory, recurrence, generating functions, and probability. Students present solutions to the class. Open to anyone with an interest in mathematics.

MATH 197. Senior Honors Thesis. 1-6 Unit.
Honors math major working on senior honors thesis under an approved advisor carries out research and reading. Satisfactory written account of progress achieved during term must be submitted to advisor before term ends. May be repeated 3 times for a max of 9 units. Contact department student services specialist to enroll.

MATH 198. Practical Training. 1 Unit.
Only for undergraduate students majoring in mathematics. Students obtain employment in a relevant industrial or research activity to enhance their professional experience. Students submit a concise report detailing work activities, problems worked on, and key results. May be repeated for credit up to 3 units. Prerequisite: qualified offer of employment and consent of department. Prior approval by Math Department is required; you must contact the Math Department's Student Services staff for instructions before being granted permission to enroll.

MATH 199. Reading Topics. 1-3 Unit.
For Math majors only. Undergraduates pursue a reading program under the direction of a Math faculty member; topics limited to those not in regular department course offerings. Credit can fulfill the elective requirement for Math majors. Departmental approval required; please contact the Student Services Specialist for the enrollment proposal form at least 2 weeks before the final study list deadline. May be repeated for credit. Enrollment beyond a third section requires additional approval.

MATH 205A. Real Analysis. 3 Units.
Basic measure theory and the theory of Lebesgue integration. Prerequisite: 171 or equivalent.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 205B. Real Analysis. 3 Units.
Point set topology, basic functional analysis, Fourier series, and Fourier transform. Prerequisites: 171 and 205A or equivalent.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 205C. Real Analysis. 3 Units.
Continuation of 205B.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 210A. Modern Algebra I. 3 Units.
Basic commutative ring and module theory, tensor algebra, homological constructions, linear and multilinear algebra, canonical forms and Jordan decomposition. Prerequisite: 121 and 122 or equivalent.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 210B. Modern Algebra II. 3 Units.
Continuation of 210A. Topics in field theory, commutative algebra, algebraic geometry, and finite group representations. Prerequisites: 210A, and 121 or equivalent.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 210C. Lie Theory. 3 Units.
Topics in Lie groups, Lie algebras, and/or representation theory. Prerequisite: math 210B. May be repeated for credit.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 215A. Algebraic Topology. 3 Units.
Topics: fundamental group and covering spaces, basics of homotopy theory, homology and cohomology (simplicial, singular, cellular), products, introduction to topological manifolds, orientations, Poincare duality. Prerequisites: 113, 120, and 171.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 215B. Differential Topology. 3 Units.
Topics: Basics of differentiable manifolds (tangent spaces, vector fields, tensor fields, differential forms), embeddings, tubular neighborhoods, integration and Stokes' Theorem, deRham cohomology, intersection theory via Poincare duality, Morse theory. Prerequisite: 215AnnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 215C. Differential Geometry. 3 Units.
This course will be an introduction to Riemannian Geometry. Topics will include the Levi-Civita connection, Riemann curvature tensor, Ricci and scalar curvature, geodesics, parallel transport, completeness, geodesics and Jacobi fields, and comparison techniques. Prerequisites 146 or 215BnnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 216A. Introduction to Algebraic Geometry. 3 Units.
Algebraic varieties, and introduction to schemes, morphisms, sheaves, and the functorial viewpoint. May be repeated for credit. Prerequisites: 210AB or equivalent.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 216B. Introduction to Algebraic Geometry. 3 Units.
Continuation of 216A. May be repeated for credit.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 216C. Introduction to Algebraic Geometry. 3 Units.
Continuation of 216B. May be repeated for credit.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 217C. Complex Differential Geometry. 3 Units.
Complex structures, almost complex manifolds and integrability, Hermitian and Kahler metrics, connections on complex vector bundles, Chern classes and Chern-Weil theory, Hodge and Dolbeault theory, vanishing theorems, Calabi-Yau manifolds, deformation theory.

MATH 220. Partial Differential Equations of Applied Mathematics. 3 Units.
First-order partial differential equations; method of characteristics; weak solutions; elliptic, parabolic, and hyperbolic equations; Fourier transform; Fourier series; and eigenvalue problems. Prerequisite: Basic coursework in multivariable calculus and ordinary differential equations, and some prior experience with a proof-based treatment of the material as in Math 171 or Math 61CM.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.
Same as: CME 303

MATH 221A. Mathematical Methods of Imaging. 3 Units.
Image denoising and deblurring with optimization and partial differential equations methods. Imaging functionals based on total variation and l-1 minimization. Fast algorithms and their implementation.
Same as: CME 321A

MATH 221B. Mathematical Methods of Imaging. 3 Units.
Array imaging using Kirchhoff migration and beamforming, resolution theory for broad and narrow band array imaging in homogeneous media, topics in high-frequency, variable background imaging with velocity estimation, interferometric imaging methods, the role of noise and inhomogeneities, and variational problems that arise in optimizing the performance of array imaging algorithms.
Same as: CME 321B

MATH 226. Numerical Solution of Partial Differential Equations. 3 Units.
Hyperbolic partial differential equations: stability, convergence and qualitative properties; nonlinear hyperbolic equations and systems; combined solution methods from elliptic, parabolic, and hyperbolic problems. Examples include: Burger's equation, Euler equations for compressible flow, Navier-Stokes equations for incompressible flow. Prerequisites: MATH 220 or CME 302.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.
Same as: CME 306

MATH 227. Partial Differential Equations and Diffusion Processes. 3 Units.
Parabolic and elliptic partial differential equations and their relation to diffusion processes. First order equations and optimal control. Emphasis is on applications to mathematical finance. Prerequisites: MATH 136/ STATS 219 (or equivalents) and MATH 131P + MATH 115/171 or MATH 173 or MATH 220.

MATH 228. Stochastic Methods in Engineering. 3 Units.
The basic limit theorems of probability theory and their application to maximum likelihood estimation. Basic Monte Carlo methods and importance sampling. Markov chains and processes, random walks, basic ergodic theory and its application to parameter estimation. Discrete time stochastic control and Bayesian filtering. Diffusion approximations, Brownian motion and an introduction to stochastic differential equations. Examples and problems from various applied areas. Prerequisites: exposure to probability and background in analysis.
Same as: CME 308, MS&E 324

MATH 228A. Probability, Stochastic Analysis and Applications. 3 Units.
The basic limit theorems of probability theory and their application to maximum likelihood estimation. Basic Monte Carlo methods and importance sampling. Markov chains and processes, random walks, basic ergodic theory and its application to parameter estimation. Discrete time stochastic control and Bayesian filtering. Diffusion approximations, Brownian motion and basic stochastic differential equations. Examples and problems from various applied areas. Prerequisites: exposure to probability and background in analysis.

MATH 230A. Theory of Probability I. 3 Units.
Mathematical tools: sigma algebras, measure theory, connections between coin tossing and Lebesgue measure, basic convergence theorems. Probability: independence, Borel-Cantelli lemmas, almost sure and Lp convergence, weak and strong laws of large numbers. Large deviations. Weak convergence; central limit theorems; Poisson convergence; Stein's method. Prerequisites: STATS 116, MATH 171.
Same as: STATS 310A

MATH 230B. Theory of Probability II. 3 Units.
Conditional expectations, discrete time martingales, stopping times, uniform integrability, applications to 0-1 laws, Radon-Nikodym Theorem, ruin problems, etc. Other topics as time allows selected from (i) local limit theorems, (ii) renewal theory, (iii) discrete time Markov chains, (iv) random walk theory,n(v) ergodic theory. http://statweb.stanford.edu/~adembo/stat-310b. Prerequisite: 310A or MATH 230A.
Same as: STATS 310B

MATH 230C. Theory of Probability III. 3 Units.
Continuous time stochastic processes: martingales, Brownian motion, stationary independent increments, Markov jump processes and Gaussian processes. Invariance principle, random walks, LIL and functional CLT. Markov and strong Markov property. Infinitely divisible laws. Some ergodic theory. Prerequisite: 310B or MATH 230B. http://statweb.stanford.edu/~adembo/stat-310c/.
Same as: STATS 310C

MATH 231. Mathematics and Statistics of Gambling. 3 Units.
Probability and statistics are founded on the study of games of chance. Nowadays, gambling (in casinos, sports and the Internet) is a huge business. This course addresses practical and theoretical aspects. Topics covered: mathematics of basic random phenomena (physics of coin tossing and roulette, analysis of various methods of shuffling cards), odds in popular games, card counting, optimal tournament play, practical problems of random number generation. Prerequisites: Statistics 116 and 200.
Same as: STATS 334

MATH 232. Topics in Probability: Percolation Theory. 3 Units.
An introduction to first passage percolation and related general tools and models. Topics include early results on shape theorems and fluctuations, more modern development using hyper-contractivity, recent breakthrough regarding scaling exponents, and providing exposure to some fundamental long-standing open problems. Course prerequisite: graduate-level probability.

MATH 233A. Topics in Combinatorics. 3 Units.
A topics course in combinatorics and related areas. The topic will be announced by the instructor.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 233B. Topics in Combinatorics. 3 Units.
A topics course in combinatorics and related areas. The topic will be announced by the instructor.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 233C. Topics in Combinatorics. 3 Units.
A topics course in combinatorics and related areas. The topic will be announced by the instructor.

MATH 234. Large Deviations Theory. 3 Units.
Combinatorial estimates and the method of types. Large deviation probabilities for partial sums and for empirical distributions, Cramer's and Sanov's theorems and their Markov extensions. Applications in statistics, information theory, and statistical mechanics. Prerequisite: MATH 230A or STATS 310. Offered every 2-3 years. http://statweb.stanford.edu/~adembo/large-deviations/.
Same as: STATS 374

MATH 235A. Topics in combinatorics. 3 Units.
This advanced course in extremal combinatorics covers several major themes in the area. These include extremal combinatorics and Ramsey theory, the graph regularity method, and algebraic methods.

MATH 235B. Modern Markov Chain Theory. 3 Units.
This is a graduate-level course on the use and analysis of Markov chains. Emphasis is placed on explicit rates of convergence for chains used in applications to physics, biology, and statistics. Topics covered: basic constructions (metropolis, Gibbs sampler, data augmentation, hybrid Monte Carlo); spectral techniques (explicit diagonalization, Poincaré, and Cheeger bounds); functional inequalities (Nash, Sobolev, Log Sobolev); probabilistic techniques (coupling, stationary times, Harris recurrence). A variety of card shuffling processes will be studies. Central Limit and concentration.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 235C. Topics in Markov Chains. 3 Units.
Classical functional inequalities (Nash, Faber-Krahn, log-Sobolev inequalities), comparison of Dirichlet forms. Random walks and isoperimetry of amenable groups (with a focus on solvable groups). Entropy, harmonic functions, and Poisson boundary (following Kaimanovich-Vershik theory).

MATH 236. Introduction to Stochastic Differential Equations. 3 Units.
Brownian motion, stochastic integrals, and diffusions as solutions of stochastic differential equations. Functionals of diffusions and their connection with partial differential equations. Random walk approximation of diffusions. Prerequisite: 136 or equivalent and differential equations.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 237. Default and Systemic Risk. 3 Units.
Introduction to mathematical models of complex static and dynamic stochastic systems that undergo sudden regime change in response to small changes in parameters. Examples from materials science (phase transitions), power grid models, financial and banking systems. Special emphasis on mean field models and their large deviations, including computational issues. Dynamic network models of financial systems and their stability.

MATH 237A. Topics in Financial Math: Market microstructure and trading algorithms. 3 Units.
Introduction to market microstructure theory, including optimal limit order and market trading models. Random matrix theory covariance models and their application to portfolio theory. Statistical arbitrage algorithms.

MATH 238. Mathematical Finance. 3 Units.
Stochastic models of financial markets. Forward and futures contracts. European options and equivalent martingale measures. Hedging strategies and management of risk. Term structure models and interest rate derivatives. Optimal stopping and American options. Corequisites: MATH 236 and 227 or equivalent.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.
Same as: STATS 250

MATH 239. Computation and Simulation in Finance. 3 Units.
Monte Carlo, finite difference, tree, and transform methods for the numerical solution of partial differential equations in finance. Emphasis is on derivative security pricing. Prerequisite: 238 or equivalent.

MATH 243. Functions of Several Complex Variables. 3 Units.
Holomorphic functions in several variables, Hartogs phenomenon, d-bar complex, Cousin problem. Domains of holomorphy. Plurisubharmonic functions and pseudo-convexity. Stein manifolds. Coherent sheaves, Cartan Theorems A&B. Levi problem and its solution. Grauert's Oka principle. Prerequisites: MATH 215A and experience with manifolds. NOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 244. Riemann Surfaces. 3 Units.
Riemann surfaces and holomorphic maps, algebraic curves, maps to projective spaces. Calculus on Riemann surfaces. Elliptic functions and integrals. Riemann-Hurwitz formula. Riemann-Roch theorem, Abel-Jacobi map. Uniformization theorem. Hyperbolic surfaces. (Suitable for advanced undergraduates.) Prerequisites: MATH 106 or MATH 116, and familiarity with surfaces equivalent to MATH 143, MATH 146, or MATH 147.

MATH 245A. Topics in Algebraic Geometry. 3 Units.
Topics of contemporary interest in algebraic geometry. May be repeated for credit.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 245B. Topics in Algebraic Geometry. 3 Units.
May be repeated for credit.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 245C. Topics in Algebraic Geometry. 3 Units.
May be repeated for credit.

MATH 246. Topics in number theory: L-functions. 3 Units.
The Riemann Zeta function and Dirichlet L-functions, zero-free regions and vertical distribution of the zeros, primes in arithmetic progressions, the class number problem, Hecke L-functions and Tate's thesis, Artin L-functions and the Chebotarev density theorem, Modular forms and Maass forms.nnPrerequisites: Algebraic Number Theory.

MATH 248. Introduction to Ergodic Theory. 3 Units.
Topics may include 1) subadditive and multiplicative ergodic theorems, 2) notions of mixing, weak mixing, spectral theory, 3) metric and topological entropy of dynamical systems, 4) measures of maximal entropy. Prerequisites: Solid background in "Measure and Integration" (Math 205A) and some functional analysis, including Riesz representation theorem and Hahn-Banach theorem (Math 205B).

MATH 249A. Topics in number theory. 3 Units.
Topics of contemporary interest in number theory. May be repeated for credit.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 249B. Topics in Number Theory. 3 Units.
NOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 249C. Topics in Number Theory. 3 Units.
NOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 256A. Partial Differential Equations. 3 Units.
The theory of linear and nonlinear partial differential equations, beginning with linear theory involving use of Fourier transform and Sobolev spaces. Topics: Schauder and L2 estimates for elliptic and parabolic equations; De Giorgi-Nash-Moser theory for elliptic equations; nonlinear equations such as the minimal surface equation, geometric flow problems, and nonlinear hyperbolic equations.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 256B. Partial Differential Equations. 3 Units.
Continuation of 256A.

MATH 257A. Symplectic Geometry and Topology. 3 Units.
Linear symplectic geometry and linear Hamiltonian systems. Symplectic manifolds and their Lagrangian submanifolds, local properties. Symplectic geometry and mechanics. Contact geometry and contact manifolds. Relations between symplectic and contact manifolds. Hamiltonian systems with symmetries. Momentum map and its properties. May be repeated for credit.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 257B. Symplectic Geometry and Topology. 3 Units.
Continuation of 257A. May be repeated for credit.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 257C. Symplectic Geometry and Topology. 3 Units.
Continuation of 257B. May be repeated for credit.

MATH 258. Topics in Geometric Analysis. 3 Units.
May be repeated for credit.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 262. Applied Fourier Analysis and Elements of Modern Signal Processing. 3 Units.
Introduction to the mathematics of the Fourier transform and how it arises in a number of imaging problems. Mathematical topics include the Fourier transform, the Plancherel theorem, Fourier series, the Shannon sampling theorem, the discrete Fourier transform, and the spectral representation of stationary stochastic processes. Computational topics include fast Fourier transforms (FFT) and nonuniform FFTs. Applications include Fourier imaging (the theory of diffraction, computed tomography, and magnetic resonance imaging) and the theory of compressive sensing. NOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.
Same as: CME 372

MATH 263A. Topics in Representation Theory: Affine Lie Algebras and Modular Forms. 3 Units.
Kac-Moody Lie algebras are infinite-dimensional Lie algebras whose theory is remarkably similar to finite-dimensional semisimple Lie algebras. Affine Lie algebras are the most important special case.We will develop some of the Kac-Moody theory, such as the Kac-Weyl character formula, before specializing to affine Lie algebras. Ideas from physics give a multiplication called fusion on the irreducible integrable representations of fixed level. Kac and Peterson showed that the characters and related "string functions" of these representations are modular forms, and the transformation properties of these theta functions of fixed level encode important information about the fusion ring. NOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc. May be repeated for credit.

MATH 263B. Crystal Bases: Representations and Combinatorics. 3 Units.
Crystal Bases are combinatorial analogs of representation theorynof Lie groups. We will explore different aspects of thesenanalogies and develop rigorous purely combinatorial foundations.

MATH 263C. Topics in Representation Theory. 3 Units.
Conformal Field Theory is a branch of physics with origins in solvable lattice models and string theory. But the mathematics that it has inspired has many applications in pure mathematics.nWe will give an introduction to this theory with related representation theories of the Virasoro and affine Lie algebras, and vertex operators.nnPrerequisites: we will not assume any particular knowledge from physics, but some knowledge of Lie algebras will be helpful.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.nnnMay be repeated for credit.

MATH 269. Topics in symplectic geometry. 3 Units.
May be repeated for credit.

MATH 270. Geometry and Topology of Complex Manifolds. 3 Units.
Complex manifolds, Kahler manifolds, curvature, Hodge theory, Lefschetz theorem, Kahler-Einstein equation, Hermitian-Einstein equations, deformation of complex structures. May be repeated for credit.

MATH 271. The H-Principle. 3 Units.
The language of jets. Thom transversality theorem. Holonomic approximation theorem. Applications: immersion theory and its generaliazations. Differential relations and Gromov's h-principle for open manifolds. Applications to symplectic geometry. Microflexibility. Mappings with simple singularities and their applications. Method of convex integration. Nash-Kuiper C^1-isometric embedding theorem.

MATH 272. Topics in Partial Differential Equations. 3 Units.
NOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 273. Topics in Mathematical Physics. 3 Units.
Covers a list of topics in mathematical physics. The specific topics may vary from year to year, depending on the instructor's discretion. Background in graduate level probability theory and analysis is desirable.
Same as: STATS 359

MATH 275. Topics in Applied Mathematics: A World of Flows II. 3 Units.
The purpose of this course is to show beautiful surprises and instructive paradoxes in a maximal diversity of fluid phenomena, and to understand them with minimal models. The prerequisites are fluency in the so-called "mathematical methods", plus ability to think physics at the advanced undergraduate level. The content will be the same as that of winter 2019 (but different from that of winter 2020). nnNOTE: Undergraduates must obtain instructor permission and pass a test to enroll. Undergraduates interested in taking the course should contact the instructor no later than the first week of class, providing information about performance in prior coursework.

MATH 280. Evolution Equations in Differential Geometry. 3 Units.
.

MATH 282A. Low Dimensional Topology. 3 Units.
The theory of surfaces and 3-manifolds. Curves on surfaces, the classification of diffeomorphisms of surfaces, and Teichmuller space. The mapping class group and the braid group. Knot theory, including knot invariants. Decomposition of 3-manifolds: triangulations, Heegaard splittings, Dehn surgery. Loop theorem, sphere theorem, incompressible surfaces. Geometric structures, particularly hyperbolic structures on surfaces and 3-manifolds. May be repeated for credit up to 6 total units.

MATH 282B. Homotopy Theory. 3 Units.
Homotopy groups, fibrations, spectral sequences, simplicial methods, Dold-Thom theorem, models for loop spaces, homotopy limits and colimits, stable homotopy theory. May be repeated for credit up to 6 total units.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 282C. Fiber Bundles and Cobordism. 3 Units.
Possible topics: principal bundles, vector bundles, classifying spaces. Connections on bundles, curvature. Topology of gauge groups and gauge equivalence classes of connections. Characteristic classes and K-theory, including Bott periodicity, algebraic K-theory, and indices of elliptic operators. Spectral sequences of Atiyah-Hirzebruch, Serre, and Adams. Cobordism theory, Pontryagin-Thom theorem, calculation of unoriented and complex cobordism. May be repeated for credit up to 6 total units.

MATH 283A. Topics in Topology. 3 Units.
Topics of contemporary interest in topology. NOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 284. Topics in Geometric Topology. 3 Units.
Incompressible surfaces, irreducible manifolds, prime decomposition, Morse theory, Heegaard diagrams, Heegaard splittings, the Thurston norm, sutured manifold theory, Heegaard Floer homology, sutured Floer homology.

MATH 286. Topics in Differential Geometry. 3 Units.
Topics of contemporary interest in differential geometry. May be repeated for credit.nnNOTE: Undergraduates require instructor permission to enroll. Undergraduates interested in taking the course should contact the instructor for permission, providing information about relevant background such as performance in prior coursework, reading, etc.

MATH 298. Graduate Practical Training. 1 Unit.
Only for mathematics graduate students. Students obtain employment in a relevant industrial or research activity to enhance their professional experience. Students submit a concise report detailing work activities, problems worked on, and key results. May be repeated for credit up to 3 units. Prerequisite: qualified offer of employment and consent of department. Prior approval by Math Department is required; you must contact the Math Department's Student Services staff for instructions before being granted permission to enroll.

MATH 301. Advanced Topics in Convex Optimization. 3 Units.
Modern developments in convex optimization: semidefinite programming; novel and efficient first-order algorithms for smooth and nonsmooth convex optimization. Emphasis on numerical methods suitable for large scale problems arising in science and engineering. Prerequisites: convex optimization (EE 364), linear algebra (Math 104), numerical linear algebra (CME 302); background in probability, statistics, real analysis and numerical optimization.
Same as: CME 375

MATH 305. Applied mathematics through toys and magic. 3 Units.
This course is a series of case-studies in doing applied mathematics on surprising phenomena we notice in daily life. Almost every class will show demos of these phenomena (toys and magic) and suggest open projects. The topics range over a great variety and cut across areas traditionally pigeonholed as physics, biology, engineering, computer science, mathematics ¿ but, instead of developing sophisticated mathematics on simple material, our aim is to extract simple mathematical understanding from sophisticated material which, at first, we may not yet know how to pigeonhole. In each class I will try to make the discussion self-contained and to give everybody something to take home, regardless of the background.

MATH 355. Graduate Teaching Seminar. 1 Unit.
Required of and limited to first-year Mathematics graduate students.

MATH 360. Advanced Reading and Research. 1-10 Unit.
.

MATH 382. Qualifying Examination Seminar. 1-3 Unit.
.

MATH 391. Seminar on Logic & Formal Philosophy. 2-4 Units.
Research seminar for graduate students working in logic and formal philosophy. Presentations on contemporary topics by seminar participants and outside visitors. Maybe be repeated for credit.
Same as: PHIL 391

MATH 802. TGR Dissertation. 0 Units.
.

MEDIEVAL STUDIES

The Division of Literatures, Cultures, and Languages (https://exploredegrees.stanford.edu/schoolofhumanitiesandsciences/divisionofliteraturesculturesandlanguages/) offers a Medieval Studies minor in conjunction with the Stanford Center for Medieval and Early Modern Studies (CMEMS). CMEMS is a multidisciplinary community working together to produce new perspectives on medieval and early modern studies. The mission of CMEMS is to promote innovative research and foster a lively dialogue among faculty, students, librarians, and research affiliates, to rethink the nature of the field across time, space, and disciplinary boundaries, and to explore the significance of these earlier periods for our understanding of today's world.

There are a number of programs and courses related to medieval and early modern studies. To learn more, see the center's web site (http://cmems.stanford.edu/)

COVID-19-Related Degree Requirement Changes

For information on how the Minor in Medieval Studies requirements have been affected by the pandemic, see the "COVID-19 Policies tab (p. 1305)" in the "Division of Literatures, Cultures, and Languages" of this bulletin. For University-wide policy changes related to the pandemic, see the "COVID-19 and Academic Continuity (p. 5)" section of this bulletin.

Minor in Medieval Studies

Faculty Director: Marisa Galvez

The Division of Literatures, Cultures, and Languages offers an undergraduate minor in Medieval Studies. The minor in Medieval Studies:

- provides Stanford students with the historical knowledge and framework through which to view globalism;
- embeds the study of medieval culture in a coherent framework that resonates with contemporary issues of community building, the virtual world and mobility;
- and promotes an innovative cross-disciplinary and skill-based approach to Medieval Studies.

Declaring the Minor

Students should declare the minor in Medieval Studies in Axess. The undergraduate program is administered by the DLCL student services office located in Pigott Hall, room 128.

Requirements

Students in any major field qualify for the minor by meeting the following requirements:

- Students complete 6 courses courses of 3 units or more for a total of 25 units.
- The 6 courses must include an introductory core course taken for 5 units.

		Units
ARTHIST 106	Byzantine Art and Architecture, 300-1453 C.E.	5
DLCL 204	Digital Humanities Across Borders	3-5
HISTORY 115D	Europe in the Middle Ages, 300-1500	3-5

- Electives may be selected from a large number of offerings in a variety of disciplines according to student interests, but they must follow a coherent course of study. This course of study must be approved by the Undergraduate Faculty Director. Courses are relevant to the major in departments across the University including English, East Asian Studies, History, Religious Studies, Music, Comparative Literature, German, French, Italian, Iberian and Latin American Cultures, and Slavic Languages and Literatures, and Classics.
- Up to 5 units may be taken in a medieval language, such as (but not limited to) Old English, Old Norse, Medieval Latin, Old French, Middle High German, Classical Arabic.
- Appropriate courses offered through BOSP may count toward this minor.
- No transfer credit may be used toward the Medieval Studies minor, and course work in this minor may not duplicate work counted toward other majors or minors.
- Advanced placement credit and transfer credit do not apply to this minor.
- All courses must be taken for a letter grade.

Instructions:

Click on the Edit pencil to getstarted.Delete this "Instructions" block when you have finished editing...just click inside the blue box to select and then clickdelete.Do not delete the block immediatelybelow.This block of general University information isrequired.Replace ENTER ANY GENERAL DEPARTMENT/PROGRAM TEXT HERE with any general department/program text, or just delete theline.This might include something generic about support, or instructions on who to contact,etc.If you department has not decided what to do, replace this line with text such as "The department is in the process of making decisions concerning COVID-19 policies and will update this tab when those decisions have been made." Then delete the remaining text below asrelevant.Undergraduate and graduategrading:Pick one statement and delete the others, or enter your owntext.You can add to the text also, perhaps to include reference to whom the student should contact,etc.Also, replace DEPARTMENTorPROGRAM with the name of your own department or program, e.g., Department ofBiology.Enter any additional policies under "Other..." or delete the header if there are no additionalpolicies.When done, save, and send toworkflow.Contact Stephen by Slack (arod) if you have questions, or come to our Bulletin officehours:https://asconfluence.stanford.edu/confluence/display/SASLL/Stanford+Bulletin+2020-21.Note that you will be able to edit this content as new informationdevelops.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a "credit" or "no credit" grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a "credit" or "satisfactory" grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

The Medieval Studies minor counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of undergraduate degree requirements that otherwise require a letter grade.

Affiliated Faculty: Cécile Alduy (French and Italian), Keith Baker (History), Vincent Barletta (Iberian and Latin American Cultures and Comparative

Literature), John Bender (English), Karol Berger (Music), Carl Bielefeldt (Religious Studies), George H. Brown (English, Emeritus), Steven Carter (East Asian Languages and Cultures), Terry Castle (English), Giovanna Ceserani (Classics), Carolyn Lougee Chappell (History), David Como (History), Graciela De Pierris (Philosophy), Rowan Dorin (History), Dan Edelstein (French and Italian) Ronald Egan (Asian Languages), Elaine Fisher (Religious Studies), Fiona Griffiths (History), Paula Findlen (History), Charlotte Fonrobert (Religious Studies), James Fox (Anthropology), Michael Friedman (Philosophy), Marisa Galvez (French and Italian), Denise Gigante (English), Roland Greene (Comparative Literature and English) Avner Greif (Economics), Fiona Griffiths (History) Hans Ulrich Gumbrecht (Emeritus, Comparative Literature and French and Italian, Emeritus), Heather Hadlock (Music), Paul Harrison (Religious Studies), Robert Harrison (French and Italian), Tamar Herzog (History), Blair Hoxby (English), Nicole Hughes (Iberia and Latin American Cultures and Comparative Literature), Amalis Kessler (Law School), Alexander Key (Comparative Literature), Nancy S.Kollmann (History), Mark E. Lewis (History), Emanuele Lugli (Art History), William Mahrt (Music), Reviel Netz (Classics),David Palumbo-Liu (Comparative Literature) Grant Parker (Classics) Patricia Parker (English), Bissera Pentcheva (Art and Art History), Sarah Prodan (Italian), Jack Rakove (History), Jessica Riskin (History), Ian Robertson (Anthropology) Orrin W. Robinson (German Studies, Emeritus), David Riggs (English, Emeritus), Jesse Rodin (Music), Nancy Ruttenburg (English), Behnam Sadeki (Religious Studies), Londa Schiebinger (History), Krish Seetah (Anthropology), Matthew Sommer (History), Carolyn Springer (French and Italian, Emeritus), Kathryn Starkey (German Studies), Laura Stokes (History), Melinda Takeuchi (East Asian Languages and Cultures) Elaine Treharne (English),Blakey Vermeule (English), Richard Vinograd (Art and Art History), Richard White (History), Karen Wigen (History), Caroline Winterer (History), Allen Wood (Philosophy), Ali Yaycioglu (History), Lee H. Yearley (Religious Studies), Yiqun Zhou (East Asian Languages and Cultures)

MODERN THOUGHT AND LITERATURE

Courses offered by the Program in Modern Thought and Literature are listed under the subject code MTL on the (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=MTL&filter-catalognumber-MTL=on) Stanford Bulletin's (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=MTL&filter-catalognumber-MTL=on) ExploreCourses web site (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=MTL&filter-catalognumber-MTL=on).

The program in Modern Thought and Literature admits students for the Ph.D. and a limited number for a coterminal B.A./M.A. Program.

Graduate Programs in Modern Thought and Literature

Modern Thought and Literature (MTL) is an interdisciplinary humanities graduate program advancing the study of critical issues in the modern world. Since 1971, MTL students have helped to redefine the cutting edge of many interdisciplinary fields and to reshape the ways in which disciplinary scholarship is understood and practiced. MTL graduates are leaders in fields such as American studies, ethnic studies, film studies, social and cultural studies, and women's studies, as well as English and comparative literature.

The program trains students to understand the histories and methods of disciplines and to test their assumptions. It considers how disciplines shape knowledge and, most importantly, how interdisciplinary methods reshape objects of study. MTL students produce innovative analyses of diverse texts, forms, and practices, including those of literature, history, philosophy, anthropology, law, and science; film, visual arts, popular culture, and performance; and material culture and technology.

Each student constructs a unique program of study suited to his or her research. Students have focused on such areas as gender and sexuality; race and ethnicity; science, technology, and medicine; media and performance; legal studies; and critical and social theory. The program's affiliated faculty is drawn from fields throughout the humanities and humanistic social sciences, as well as from education and law. As interdisciplinary study is impossible without an understanding of the disciplines under consideration, each student is expected to master the methods of literary analysis and to gain a foundation in a second field or discipline.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in interdisciplinary literary studies and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in interdisciplinary literary studies. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of interdisciplinary literary studies and to interpret and present the results of such research.

Master of Arts

The Master of Arts is available to students who are admitted to the doctoral program and have not been awarded an M.A. previously. Students are not admitted into the program for the purpose of earning a terminal Master of Arts degree. Candidates for the Ph.D. who satisfy the committee of their progress and satisfactorily complete 45 units of course work forming a coherent program of study, may apply for an M.A. in Modern Thought and Literature.

Coterminal Master's Program in Modern Thought and Literature

Each year, one or two undergraduates who are exceptionally well prepared in literature and whose undergraduate course work includes a strong interdisciplinary component, may petition to be admitted to the program for the purpose of completing a coterminal M.A. degree. Admission to this program is granted only on condition that in the course of working on their master's degrees they do not apply to enter the Ph.D. program in Modern Thought and Literature. The deadline for application is February 15 or the first business day following, if the 15th falls on a weekend or holiday.

To apply, applicants submit:

1. An unofficial grade transcript from Axess.
2. An Application for Admission to Coterminal Masters' Program (http://registrar.stanford.edu/pdf/CotermApplic.pdf).
3. A statement giving the reasons the student wishes to pursue this program and its place in his or her future plans. This statement should pay particular attention to the reasons why the student could not pursue the studies he or she desires in some other way.
4. An initial plan of study listing, quarter by quarter, each course by name, units, and instructor, to be taken in order to fulfill the requirements for the degree for a total of 45 units, including at least 20 units of advanced work in one literature, and at least 20 units of advanced work in a coherent interdisciplinary program of courses taken in non-literature departments. Students may include appropriate coursework taken during the two quarters prior to the quarter of expected matriculation in the program. Except in unusual cases, this will mean courses taken in the autumn and winter quarters of the year of application for admission. (Changes in the course list are to be expected.)
5. A writing sample of critical or analytical prose, 20 pages maximum.
6. Two letters of recommendation from members of the faculty who know the applicant well and who can speak directly to the question of his or her ability to do graduate-level work.
7. A designated adviser from among the Stanford faculty; normally one letter of recommendation will be from this faculty member.

University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 56)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 65)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken two quarters prior to the first graduate quarter, or later, are eligible for consideration for transfer to

the graduate career. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate advisor be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

Degree Requirements

The candidate for the M.A. must complete at least 45 units of graduate work, to be divided in the following manner:

1. The introductory seminar, MTL 334A Concepts of Modernity I: Philosophical Foundations, 5 units; in the event of a scheduling conflict students may substitute MTL 334B Concepts of Modernity II: Culture, Aesthetics, and Society in the Age of Globalization, with the director's prior permission.
2. At least 20 units of advanced course work in literature, to be approved by the director.
3. At least 20 units of advanced course work in a coherent and individually arranged interdisciplinary program, to be approved by the director.

Doctor of Philosophy in Modern Thought and Literature

University requirements for the Ph.D. are discussed in the "Graduate Degrees (p. 65)" section of this bulletin.

Applicants for the Ph.D. program can visit the program's website (https://mtl.stanford.edu) for additional information. Online graduate applications are available at the Office of Graduate Admissions (http://gradadmissions.stanford.edu/) web site. The GRE (Graduate Record Examination) is not required for application to the program. All applicants must submit the following as part of their application: statement of purpose, three letters of recommendation, and a writing sample of a maximum of about 7000 words, or two shorter papers of a similar combined length. Graduate students in Modern Thought and Literature begin study in Autumn Quarter of each academic year; there are no mid-year admissions.

A candidate for the Ph.D. degree in Modern Thought and Literature must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the B.A. degree. He or she is expected to complete at least 18 courses of graduate work in addition to the dissertation. Students may spend one year of graduate study abroad.

Requirements for the Ph.D. in Modern Thought and Literature are:

1.

		Units
MTL 334A	Concepts of Modernity I: Philosophical Foundations	5
MTL 334B	Concepts of Modernity II: Culture, Aesthetics, and Society in the Age of Globalization (Offered in 2016-17 as MTL 334)	5
MTL 334C	Introduction to Interdisciplinary Studies	3

2. A coherent program of eight courses of advanced work in literary studies to be worked out with the adviser, of which at least six must be regularly scheduled courses in literature. Courses in the teaching of composition, independent study, or thesis registration may not be counted among these six courses; ENGLISH 396L Pedagogy Seminar I, MTL 399 Reading for Orals, MTL 802 TGR Dissertation may not be counted toward these requirements under any circumstances. Petitions to modify this requirement to substitute a course from a non-literature department for one or more of the required eight literature courses must be approved by the MTL Committee in Charge.
3. Eight courses of advanced work in non-literature departments, the core of which is completion of either a departmental minor or an interdepartmental concentration, typically consisting of six courses. Departmental minors are available from a number of departments in the humanities and social sciences, including the departments of Anthropology, Art and Art History, Communication, History, Philosophy, Political Science, Religious Studies, Sociology, and Theater and Performance Studies (see the relevant information in those sections of this bulletin). Alternatively, students may opt to join interdisciplinary Ph.D. minors in either Comparative Studies in Race and Ethnicity or in Feminist, Gender, and Sexuality Studies. Individually designed concentrations may be approved by petition to the director. In addition to the required six courses in a minor or a concentration, two additional courses from non-literature departments are chosen in consultation with the student's academic adviser. At the end of the first year, each student must submit to the director a preliminary statement of approximately 1500 words outlining the scope and coherence of the interdisciplinary focus, either as it relates to the departmental minor or to the interdepartmental concentration. In either case, the student should note the relevance of any proposed coursework to the overall program (see #7 below). Course restrictions noted above in # 2 also apply.
4. *Qualifying Paper:* This certifies that students are likely to be able to undertake the quality of research, sustained argumentation, and cogent writing demanded in a doctoral dissertation. The qualifying paper must be a substantial revision of a seminar paper written at Stanford during the first year and should embody a substantial amount of independent research, develop an intellectual argument with significant elements of original thinking, and demonstrate the ability to do interdisciplinary work. Each paper is evaluated by two or three readers (designated before the end of the first year of graduate study), one of whom must be a member of the Committee in Charge or have been a member within the previous five years. Qualifying papers must be submitted to the program office no later than the end of the third week of the fifth quarter of enrollment, normally, Winter Quarter of the second year.
5. *Teaching* is an essential part of the program. One quarter is normally undertaken in conjunction with the Department of English. The second quarter may be undertaken in conjunction with any department or program within the university. Although students have some flexibility in arranging for teaching appointments, program approval is required in order to assure that each experience provides appropriate and useful training.
6. Students must demonstrate, before the beginning of the second year of study, a reading knowledge of one foreign language and, by Spring Quarter of the third year, a reading knowledge of one other foreign language. Reading knowledge means the ability to make a genuine scholarly use of the language: that is, to read prose of ordinary difficulty. Students may not take the University oral examination before completion of the foreign language requirement.
7. *Candidacy:* At the end of the second year, students apply for candidacy. The decision to advance a student to candidacy is a judgment of the faculty. The student is only admitted to candidacy if, in addition to the student's fulfilling departmental prerequisites, the faculty makes the judgment that the student has the potential to successfully complete the requirements of the degree program. The following qualifications are required before candidacy can be certified:
   - the earlier submission of a satisfactory qualifying paper;
   - demonstration of a reading knowledge of one foreign language;

- satisfactory progress in course work;
- a list of courses applicable to the degree, distinguishing between courses appropriate to the literary component and courses appropriate to the non-literary component;
- designation of a departmental minor or an interdisciplinary concentration; and,
- the submission of a statement outlining the scope and coherence of the interdisciplinary component of the program in relation to the literary component, and noting the relevance of the course work to that program.

8. *Annual Review:* The program and progress of each student must be approved by the Committee in Charge at the end of each academic year. First-year students will submit the preliminary interdisciplinary statement along with the first year-end report (see #3 above).
9. *University Oral Examination:* This examination, covering the student's areas of concentration, is normally taken in the third year of graduate study. It is a two-hour oral examination administered by four faculty members specializing in the student's areas of concentration, and a chair from another department. The exam is based on a substantial reading list prepared by the student in conjunction with the faculty committee and designed to cover the areas of expertise pertinent to the student's dissertation project.
10. *Dissertation Proposal and Colloquium:* Within one quarter after the University oral examination, the student writes up the dissertation proposal. The recommended length for the dissertation proposal is 5 pages double-spaced (with a maximum length of 8 pages). It should contain (additionally) a full bibliography. The proposal is submitted to the program director and the dissertation committee for approval. After completion of one chapter of the dissertation, the student sets up a meeting with the dissertation committee for one hour to discuss the work accomplished in the first chapter and plans for completing the rest of the dissertation.
11. *Dissertation:* The fourth and fifth years are devoted to the dissertation, which should be a substantial and original contribution acceptable to the Committee in Charge of Modern Thought and Literature. The subject is drawn from the literature of specialization and the area of nonliterary studies. The dissertation project will conclude with a two-hour defense. The first hour is open to the public and includes a brief presentation of the dissertation project on the part of the Ph.D. candidate. The second hour is reserved to the candidate and his/her Dissertation Committee.

Ph.D. Minor in Feminist, Gender, and Sexuality Studies

The Program in Modern Thought and Literature sponsors a Ph.D. minor in Feminist, Gender, and Sexuality Studies. The Ph.D. minor is administered by the Program in Feminist, Gender, and Sexuality Studies. (p. 1436)

Ph.D. Minor in Comparative Studies in Race and Ethnicity

The Program in Modern Thought and Literature sponsors a Ph.D. minor in Comparative Studies in Race and Ethnicity. The Ph.D. minor is administered by the Program in Comparative Studies in Race and Ethnicity.

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a “credit” or “no credit” grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a “credit” or “satisfactory” grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Graduate Degree Requirements

Grading

The Program in Modern Thought and Literature counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of graduate degree requirements that otherwise require a letter grade provided that the instructor affirms that the work was done at a 'B-' or better level.

Other Graduate Policies

The Program in Modern Thought and Literature will provide extensions to program milestones during the 2020-21 academic year, as needed. The Program Director, Director of Graduate Studies, advisors and Academic Services Administrator will work with individual students to determine what flexibility is needed.

Graduate Advising Expectations

The Program in Modern Thought and Literature is committed to providing academic advising in support of graduate student scholarly and professional development. When most effective, this advising relationship entails collaborative and sustained engagement by both the adviser and the advisee.

Faculty advisers guide students in key areas such as selecting courses, designing and conducting research, developing of teaching pedagogy, navigating policies and degree requirements, and exploring academic opportunities and professional pathways.

Upon arrival, incoming MTL Ph.D. students are assigned first-year faculty advisers who help students select classes with the student’s academic interests as well as the program requirements in mind. Advising arrangements are made for coterminal M.A. students at the time of their admission to the program.

Prior to advancement to TGR status, all Ph.D. students should also meet with the Director of Graduate Studies (DGS) each quarter to discuss overall progress. After reaching TGR status, students should check in with the DGS at least once a year.

As a best practice, advising expectations should be periodically discussed and reviewed to ensure mutual understanding. For both Ph..D and M.A. students, at least two consultations per quarter with the DGS and the primary adviser are highly recommended to foster an effective advising relationship. Both the adviser and the advisee are expected to maintain professionalism and integrity.

Graduate students are active contributors to the advising relationship, proactively seeking academic and professional guidance and taking responsibility for informing themselves of policies and degree requirements for their graduate program.

After the first year of study, when Ph.D. students have a better sense of their academic trajectories, they may choose to change advisers with the approval of the director and the DGS.

For a statement of University policy on graduate advising, see the "Graduate Advising (https://exploredegrees.stanford.edu/graduatedegrees/#advisingandcredentialstext)" section of this bulletin.

Director: Héctor Hoyos

Director of Graduate Studies: Tom Mullaney

Committee in Charge: Michaela Bronstein, Shelley Fisher Fishkin (on leave autumn, winter), Héctor Hoyos (Chair), Roanne Kantor, Elizabeth Kessler, Charles Kronengold, Marci Kwon, Bernadette Meyler, Ana Minian, Tom Mullaney, Karla Oeler, Vaughn Rasberry, José David Saldívar, Matthew Smith

Affiliated Faculty: Lanier Anderson *(Philosophy)*, Russell Berman *(German Studies)*, Jennifer Brody *(Theater & Performance Studies),* Michaela Bronstein *(English)*, Scott Bukatman *(Art & Art History)*, Gordon Chang *(History)*, Adrian Daub *(German Studies)*, Jean-Pierre Dupuy *(French & Italian)*, Paulla Ebron *(Anthropology)*, Harry Elam *(Theater & Performance Studies)*, Michele Elam *(English)*, Amir Eshel *(German Studies, Comparative Literature),* Shelley Fisher Fishkin *(English)*, Zephyr Frank *(History)*, Estelle Freedman *(History)*, Duana Fullwiley (*Anthropology),* Thomas Hansen *(Anthropology)*, David Hills *(Philosophy),* Héctor Hoyos *(Iberian & Latin American Cultures)*, Lochlain Jain (*Anthropology*), Tomas Jimenez *(Sociology)*, Roanne Kantor *(English)*, Elizabeth Kessler *(American Studies)*, Matthew Kohrman *(Anthropology)*, Charles Kronengold (*Music*), Marci Kwon *(Art & Art History)*, Joshua Landy *(French & Italian, Comparative Literature)*, Pavle Levi *(Art & Art History)*, Helen Longino *(Philosophy)*, Douglas McAdam *(Sociology)*, Mark McGurl *(English)*, Alison McQueen *(Political Science)*, Jisha Menon *(Theater & Performance Studies)*, Lynn Meskell *(Anthropology)*, Ana Minian *(History)*, Paula Moya *(English)*, Tom Mullaney *(History)*, Alex Nemerov (*Art & Art History*), David Palumbo-Liu *(Comparative Literature),* Peggy Phelan *(Theater & Performance Studies)*, Robert Proctor *(History)*, Vaughn Rasberry *(English)*, Robert Reich *(Political Science),* Jessica Riskin *(History),* José David Saldívar *(Comparative Literature)*, Ramón Saldívar *(English, Comparative Literature),* Londa Schiebinger *(History)*, Matthew Smith *(German Studies, Theater and Performance Studies)*, Sharika Thiranagama (*Anthropology*), Fred Turner *(Communication)*, Ban Wang *(East Asian Languages and Cultures),* Gail Wight *(Art & Art History)*, Alex Woloch *(English)*

Courses

MTL 200. Curricular Practical Training. 1-3 Unit.
.

MTL 299. Edgework: New Directions in the Study of Culture. 1-3 Unit.
Workshop. Required of first-year students in the doctoral program. Methodologies of different disciplines, the possibility and difficulty of interdisciplinary work within these disciplines, and their connection with the individual projects of students in Modern Thought and Literature. May be repeated for credit.

MTL 334A. Concepts of Modernity I: Philosophical Foundations. 5 Units.
In the late eighteenth century, Immanuel Kant proclaimed his epoch to be "the genuine age of criticism." He went on to develop the critique of reason, which set the stage for many of the themes and problems that have preoccupied Western thinkers for the last two centuries. This fall quarter survey is intended as an introduction to these themes and problems. The general course layout draws equal parts on Koselleck's practice of "conceptual history" (Begriffsgeschichte) and on Jameson's "cognitive mapping." After consideration of an important, if often under-appreciated precedent (the baroque), we turn our attention to the conceptual triad of subject, reason and critique, followed by that of revolution, utopia and sovereignty. Authors may include Hegel, Marx, Nietzsche, Weber, Freud, Lukács, and others. This course is the first of a two-course sequence. Priority to graduate students in MTL, ILAC, and English.
Same as: COMPLIT 334A, ILAC 334A

MTL 334B. Concepts of Modernity II: Culture, Aesthetics, and Society in the Age of Globalization. 5 Units.
Emphasis on world-system theory, theories of coloniality and power, and aesthetic modernity/postmodernity in their relation to culture broadly understood.
Same as: COMPLIT 334B, ENGLISH 334B

MTL 334C. Introduction to Interdisciplinary Studies. 3 Units.
Our course serves both as an introduction to graduate studies and as an introduction to interdisciplinary practice for entering PhD students in MTL at Stanford. Required for first-year graduate students, our course examines major historical and theoretical approaches to the interdisciplinary humanities via engagement with the living application of these approaches on campus. Additionally, we attend to contemporary debates about PhD study, higher education, and issues of professional development. At the end of the class you will have a clearer sense of the scholar you want to become and on concrete ways to develop your interests, navigate faculty mentor-grad relations, department cultures, and life-work balance. Non MTL graduate students will be accepted only with permission from the instructors.

MTL 390. Qualifying Paper. 1-5 Unit.
Preparation and writing of the qualifying paper for the Ph.D. in Modern Thought and Literature. nn (Staff).

MTL 398. Graduate Independent Study. 1-15 Unit.
Students pursue a special subject of investigation under supervision of a member of the committee or another faculty member. May be repeated for credit.

MTL 399. Reading for Orals. 1-15 Unit.
Reading in preparation for the University Oral Examination. May be repeated for credit.

MTL 801. TGR Project. 0 Units.
.

MTL 802. TGR Dissertation. 0 Units.
.

MUSIC

Courses offered by the Department of Music are listed under the subject code MUSIC on the Stanford Bulletin's ExploreCourses (http://explorecourses.stanford.edu/CourseSearch/search/?view=catalog&catalog=&page=0&q=MUSIC&filter-catalognumber-MUSIC=on) web site.

Mission of the Department of Music

The Department of Music at Stanford brings together music-making and scholarly research in composition, conducting, performance, music history, ethnomusicology, music theory, cognitive science, intermedia, and computer-based technologies.

Departmental activities serve a broad and diverse constituency on campus and in local communities, with an abundance of courses, concerts, performance opportunities, research projects, workshops, and lectures throughout the year. Ensembles from a variety of world cultures are open to all students: orchestras, jazz and chamber ensembles, taiko, guzheng, steelpan, and several choral groups. Many of the faculty have affiliations with other departments, programs, and interdisciplinary centers, such as Computer Science, Electrical Engineering, Art and Art History, German Studies, Neuroscience, Symbolic Systems, Comparative Studies in Race and Ethnicity, and Islamic Studies. Alumni include faculty in universities and conservatories around the world, researchers in the technologies of music and acoustics, members of major orchestras, soloists, chamber musicians, and sound artists, composers and arrangers in contemporary, film and game music.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. The department's aim is to educate students to be:

1. artists and scholars who research, interpret, and create music in an informed and thoughtful way.
2. literate in fundamentals of music, aesthetics, and historical thought.
3. prepared to engage in musical and scholarly discourse.
4. sensitive to cultural and historical perspectives in thinking about music analytically and critically.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Music, including concentration in the fields of Composition, Music History, Computer-Based Music Theory and Acoustics, or Music, Science, and Technology, and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge and practice of Music and to interpret and present the results of such work in appropriate venues and publications.

The Doctor of Philosophy (Ph.D.) is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Ethnomusicology, Musicology, or Computer-Based Music Theory and Acoustics, based at the Center for Computer Research in Music and Acoustics (CCRMA).

The Doctor of Musical Arts (D.M.A.) in Composition is conferred upon candidates who have demonstrated substantial abilities in creating new musical works as demonstrated by their completed works under the supervision of composition faculty.

Bachelor of Arts in Music

The Department of Music offers a Bachelor of Arts in Music. Students have the option of pursuing one of eleven possible subplans associated with the major. Eligible students may also be awarded a Bachelor of Arts with Honors (p. 1826). The department also offers a minor in Music (p. 1827).

Suggested Preparation for the Major

Recommended prerequisites for students without prior experience in reading music in standard Western notation. The appropriate level of entry into music theory coursework is determined by a placement evaluation on the first day of instruction.

		Units
Suggested Preparation for the Major:		
MUSIC 19A	Introduction to Music Theory	3
MUSIC 19B	Intermediate Music Theory	3

Requirements for the minimum levels of proficiency in each instrument for private instruction are posted on the department's Lessons (http://music.stanford.edu/ensembles-lessons/lessons/) website.

Students should allow more than two years for completion of the major, in part because of sequential courses with prerequisite requirements. Early planning is especially important for students who plan to double-major, study abroad or pursue any of the concentrations described below. Music majors should attempt to complete sequential courses in the order below.

Degree Requirements

The undergraduate major in Music is based on a course of study that combines breadth of musical experiences across multiple dimensions with depth in a chosen area, allowing students to develop an array of tools as part of their aesthetic and musical formation. Theory, performance, history, cultural contextualization, technology, and science all contribute to a curricular foundation for all majors. Of the required 62 units, 42 comprise the shared foundation. The remaining 20 minimum required units can be devoted either to an area of focus, including Composition, Conducting, Performance, Music History, Ethnomusicology, Music Theory, MST (Music, Science, & Technology), or to broadly based exploration. Mentorship under the guidance of a faculty advisor is an indispensable component of this 20-unit requirement.

Students with little or no prior musical literacy who wish to pursue the music major (or minor) can take gateway classes (specifically MUSIC 19A and 19B) aimed at providing basic skills. All required courses for the B.A. in Music must be taken for a letter grade. Electives above the minimum number of required courses may be taken credit/no credit.

Majors must complete 62 units to meet the general requirements for a Bachelor of Arts in Music, and must achieve a minimum GPA of 2.0 in all coursework.

MUSIC 21 - 23 should be completed no later than Autumn Quarter junior year.

Students pursuing multiple concentrations must fulfill all the requirements of each.

Prospective majors are required to choose a faculty advisor and submit a course plan. (Course plans and advisor agreement forms are available from the undergraduate student services officer.) It is recommended

that students schedule a consultation meeting with the undergraduate student services officer as early as possible to plan a program of study.

Course Requirements

All required courses for the B.A. in Music must be taken for a letter grade, as must all courses taken toward concentration requirements. Electives may be taken credit/no credit. Upper Division History Courses (MUSIC 141 - 148) taken for at least 4 units satisfy the Writing In the Major (WIM) requirement).

		Units
Lower Division Theory/Ear Training		
Take 6 courses for at least 12 units		12
MUSIC 21	Elements of Music I	
MUSIC 22	Elements of Music II	
MUSIC 23	Elements of Music III	
MUSIC 24A	Ear Training I	
MUSIC 24B	Ear Training II	
MUSIC 24C	Ear Training III	
Piano Proficency Exam		
See "Optional Coursework" for introductory piano proficiency course sequence		
Ear Training Exit Exam		
See "Proficiency Exams" for information about the ear training exit examination		
Lower Division History		
Take 3 courses		
MUSIC 40	Music History to 1600	4
MUSIC 41	Music History 1600-1830	4
MUSIC 42	Music History Since 1830	4
Upper division History & Analysis		
Take 3 courses, one of each Analysis and History, plus one by choice		12
1. Upper Division Analysis Courses		
MUSIC 122A	Counterpoint	
MUSIC 122B	Analysis of Tonal Music	
MUSIC 122C	Introduction to 20th-Century Composition	
2. Upper Division History Courses		
MUSIC 141: Studies in Music of the Renaissance		
MUSIC 142: Studies in Music of the Baroque		
MUSIC 143: Studies in Music of the Classical Period		
MUSIC 144: Studies in Music of the Romantic Period		
MUSIC 145: Studies in Western Art Music Since 1900		
MUSIC 146: Studies in Ethnomusicology		
MUSIC 147: Studies in Music, Media, and Popular Culture		
MUSIC 148: Studies in Performance Practice		
Performance		
Take 3 units		3
MUSIC 126A	Thoroughbass Accompaniment	1-3
MUSIC 130B	Elementary Instrumental Conducting	2
MUSIC 130C	Elementary Choral Conducting	2
MUSIC 156	"sic": Improvisation Collective	
MUSIC 157	Cardinal Calypso--Steelpan Ensemble	
MUSIC 159	Early Music Singers	
MUSIC 160	Stanford Symphony Orchestra	
MUSIC 161 Stanford Wind Symphony (anything in the 161 series except for 161D)		
MUSIC 162	Symphonic Chorus	
MUSIC 163	Memorial Church Choir	
MUSIC 165	Chamber Chorale	
MUSIC 167	University Singers	
MUSIC 171	Chamber Music	
MUSIC 172/272 - Keyboard Instruments		
MUSIC 173/273 - Voice		
MUSIC 174/274 - String Instruments		
MUSIC 175/275 - Wind Instruments		
MUSIC 176/276 - Brass Instruments		
MUSIC 177/277 - Percussion		
MUSIC 181	Jazz Combos	
MUSIC 183A	German Art Song Interpretation	
MUSIC 183B	French Art Song Interpretation	
MUSIC 183C	Interpretation of Musical Theater Repertoire	
MUSIC 183D	Musical Theater	
MUSIC 183E	Singing for Musicals	
MUSIC 184A	Editing and Performing Early Music	
MUSIC 184B	Topics on the Musical Stage	
MUSIC 184C	Dramatic Vocal Arts: Songs and Scenes Onstage	
See "Optional Coursework" for introductory instrumental and voice course sequences		
Composition/MST/MUSIC 127		
Take 3 units		3
MUSIC 20C	Jazz Arranging and Composition	
MUSIC 101	Introduction to Creating Electronic Sounds	
MUSIC 112	Film Scoring	
MUSIC 113	Introduction to Instrumental Composition	
MUSIC 120E	Advanced Jazz Improvisation	
MUSIC 123A	Undergraduate Seminar in Composition: Rhythmic Design	
MUSIC 123B	Undergraduate Seminar in Composition: Pitch Design	
MUSIC 123C	Undergraduate Seminar in Composition: World Music	
MUSIC 124A	Songwriters Workshop	
MUSIC 124B	Songwriters Workshop	
MUSIC 125	Individual Undergraduate Projects in Composition	
MUSIC 127A	Instrumentation and Orchestration	
MUSIC 127B	Advanced Orchestration	
MUSIC 127C	Band Arranging	
MUSIC 128	Stanford Laptop Orchestra: Composition, Coding, and Performance	
MUSIC 155	Intermedia Workshop	
MUSIC 192A	Foundations of Sound-Recording Technology	
MUSIC 192B	Advanced Sound Recording Technology	
MUSIC 192C	Session Recording	
MUSIC 220A	Fundamentals of Computer-Generated Sound	
MUSIC 220B	Compositional Algorithms, Psychoacoustics, and Computational Music	
MUSIC 220C	Research Seminar in Computer-Generated Music	
MUSIC 220D	Research in Computer-Generated Music	
MUSIC 223B	Sonic Experiments in Composition	
MUSIC 250A	Physical Interaction Design for Music	

MUSIC 250C	Interaction - Intermedia - Immersion	
MUSIC 256A	Music, Computing, Design: The Art of Design	
MUSIC 256B	Music, Computing, Design II: Virtual and Augmented Reality for Music	
Concentration		**20**
Courses taken to fulfill Core Breadth requirements may not be double-counted towards the fulfillment of concentration requirements.		
Total Units		67-69

Optional Coursework

		Units
Piano Proficiency		
MUSIC 12A	Introductory Piano Class	1
MUSIC 12B	Introductory Piano Class	1
MUSIC 12C	Introductory Piano Class	1
Voice Introductory Course Sequence		
MUSIC 65A	Voice Class I	1
MUSIC 65B	Voice Class II	1
Piano Introductory Course Sequence		
MUSIC 12A	Introductory Piano Class	1
MUSIC 72A	Intermediate Piano Class	1
Guitar Introductory Course		
MUSIC 74C	Classical Guitar Class	1

Proficiency Exams

- *Piano Proficiency:* Majors are required to pass a piano proficiency examination as part of the music theory core (MUSIC 21 Elements of Music I, MUSIC 22 Elements of Music II, MUSIC 23 Elements of Music III). The examination is given in the first two weeks of MUSIC 21. Students who do not pass the piano proficiency examination are required to enroll in either MUSIC 12A Introductory Piano Class, MUSIC 12B Introductory Piano Class, or MUSIC 12C Introductory Piano Class concurrently with the music theory core until they are able to pass the examination. The examination consists of scales and arpeggios, performance of a simple tune to be set by the examiner, sight-reading, and the performance of prepared pieces. Download additional information regarding the proficiency examination (http://exploredegrees.stanford.edu/schoolofhumanitiesandsciences/music/pianoprofexaminfo_0.pdf).
- *Ear Training Exit Exam:* in conjunction with the music theory series, majors are required to pass an aural skills proficiency examination administered at the end of their junior year. This assesses the ability to transcribe, represent, and reproduce music vocally and at the keyboard, and must be passed before June of the senior year. The exam is scheduled once a year in Spring Quarter for a date and time in Braun Music Center announced a few weeks ahead of time by the ear training advisor. Visit the Music website for additional information about ear training (https://music.stanford.edu/academics/undergraduates/current/major/).

Subplans

Subplans (concentrations) are offered in eleven areas: Composition; Conducting; Music, Science, and Technology; Musicology and Ethnomusicology; Musicology/Ethnomusicology and Performance; Performance in Keyboard Studies; Performance in String Studies; Performance in Vocal Studies; Performance in Woodwind, Brass, and Percussion Studies; Theory; and a self-designed concentration. Subplans are declared in Axess, and appear on the student's transcript and diploma. Guidelines and application information are explained the "Declare a Concentration (https://music.stanford.edu/academic-programs/undergraduate/current-undergraduates/major/declare-concentration/)" pages of the department website. In order to complete requirements in a timely manner, students are urged to select this option no later than the beginning of the junior year. Students pursuing multiple concentrations must fulfill all the requirements of each. Requests to declare a concentration must be approved by the undergraduate student services officer in Music.

Composition Subplan

		Units
Courses taken to fulfill Core Breadth requirements may not be double-counted towards the fulfillment of concentration requirements.		
Composition Seminar		
Enroll in each course for a minimum of 1 unit		2
MUSIC 123A	Undergraduate Seminar in Composition: Rhythmic Design	
MUSIC 123B	Undergraduate Seminar in Composition: Pitch Design	
Orchestration		
Choose one of the following		3
MUSIC 127A	Instrumentation and Orchestration	
MUSIC 127B	Advanced Orchestration	
Individual composition lessons		
Enroll in MUSIC 125 a minimum of three times		3
MUSIC 125	Individual Undergraduate Projects in Composition	
Computer Music		
Complete at least 4 units from the following		4
MUSIC 101	Introduction to Creating Electronic Sounds	
MUSIC 155	Intermedia Workshop	
MUSIC 192A	Foundations of Sound-Recording Technology	
MUSIC 192B	Advanced Sound Recording Technology	
MUSIC 192C	Session Recording	
MUSIC 220A	Fundamentals of Computer-Generated Sound	
MUSIC 220B	Compositional Algorithms, Psychoacoustics, and Computational Music	
MUSIC 220C	Research Seminar in Computer-Generated Music	
MUSIC 223B	Sonic Experiments in Composition	
MUSIC 223D	Sound Practice: Embodiment and the Social	
MUSIC 250A	Physical Interaction Design for Music	
MUSIC 250C	Interaction - Intermedia - Immersion	
MUSIC 256A	Music, Computing, Design: The Art of Design	
MUSIC 256B	Music, Computing, Design II: Virtual and Augmented Reality for Music	
Concentration Electives		
Complete at least 6 units from the following		6
MUSIC 20C	Jazz Arranging and Composition	
MUSIC 112	Film Scoring	
MUSIC 122A	Counterpoint	
MUSIC 122B	Analysis of Tonal Music	
MUSIC 122C	Introduction to 20th-Century Composition	
MUSIC 123C	Undergraduate Seminar in Composition: World Music	

MUSIC 127B	Advanced Orchestration	
MUSIC 128	Stanford Laptop Orchestra: Composition, Coding, and Performance	
MUSIC 155	Intermedia Workshop	
MUSIC 156	"sic": Improvisation Collective	
MUSIC 160B	Stanford New Ensemble	
MUSIC 161B	Jazz Orchestra	
MUSIC 161E	Stanford Afro-Latin Jazz Orchestra	
MUSIC 192A	Foundations of Sound-Recording Technology	
MUSIC 192B	Advanced Sound Recording Technology	
MUSIC 192C	Session Recording	
MUSIC 220A	Fundamentals of Computer-Generated Sound	
MUSIC 220B	Compositional Algorithms, Psychoacoustics, and Computational Music	
MUSIC 220C	Research Seminar in Computer-Generated Music	
MUSIC 223B	Sonic Experiments in Composition	
MUSIC 250A	Physical Interaction Design for Music	
MUSIC 250C	Interaction - Intermedia - Immersion	
MUSIC 251	Psychophysics and Music Cognition	
MUSIC 256A	Music, Computing, Design: The Art of Design	
MUSIC 256B	Music, Computing, Design II: Virtual and Augmented Reality for Music	
Capstone experience: recital		
MUSIC 198	Concentrations Project	2
Total Units		20

Conducting Subplan

		Units
Courses taken to fulfill Core Breadth requirements may not be double-counted towards the fulfillment of concentration requirements.		
Conducting Course Requirement		
Complete at least 10 units from among the following courses in these two groups		10
1. Complete one of the following		
MUSIC 130B	Elementary Instrumental Conducting	
MUSIC 130C	Elementary Choral Conducting	
MUSIC 136	Intermediate Conducting: Music Since 1900	
2. Complete all of the following for a total of 8 units		
MUSIC 230	Advanced Orchestral Conducting	
MUSIC 231	Advanced Choral Conducting *	
*Conducting concentrators with instrumental focus take MUSIC 230 twice and MUSIC 231 once; those with choral focus take MUSIC 231 twice and MUSIC 230 once. The total unit count for MUSIC 230/231 is thus 6 units		
Concentration Theory/Analysis/Ear-Training Requirement		
Complete at least 5 units from among the following courses in these two groups		5
1. Complete any of these courses that were not taken to fulfill the Core Requirement		
MUSIC 122A	Counterpoint	
MUSIC 122B	Analysis of Tonal Music	
MUSIC 122C	Introduction to 20th-Century Composition	
2. Complete this course for at least 1 unit		
MUSIC 129	Advanced Ear-Training/Musicianship *	
*MUSIC 129 is offered for 1 or 2 units. Conducting concentrators must take it for 1 unit to fulfill the Conducting Concentration requirement, but are strongly urged to take it for 2 units, if possible.		
Concentration Performance Requirement		
Complete three quarters in any combination of these ensembles, 1 unit per quarter; these Performance units are in addition to the 3 units that satisfy the Core Breadth Performance requirement.		3
MUSIC 159	Early Music Singers	
MUSIC 160	Stanford Symphony Orchestra	
MUSIC 160A	Stanford Philharmonia	
MUSIC 161A	Stanford Wind Symphony	
MUSIC 161B	Jazz Orchestra	
MUSIC 162	Symphonic Chorus	
MUSIC 163	Memorial Church Choir	
MUSIC 165	Chamber Chorale	
MUSIC 167	University Singers	
MUSIC 171	Chamber Music	
Or another ensemble (with advisor's permission)		
Capstone experience: recital		
MUSIC 198	Concentrations Project	2
Total Units		20

Music, Science, and Technology (MST) Subplan

		Units
Courses taken to fulfill Core Breadth requirements may not be double-counted towards the fulfillment of concentration requirements.		
Complete all the following courses for a minimum of 4 units per course		
MUSIC 220A	Fundamentals of Computer-Generated Sound	4
MUSIC 220B	Compositional Algorithms, Psychoacoustics, and Computational Music	4
MUSIC 220C	Research Seminar in Computer-Generated Music *	4
MUSIC 251	Psychophysics and Music Cognition	4
*Capstone project to be completed in MUSIC 220C.		
Complete one of the following for a minimum of 4 units.		4
MUSIC 256A	Music, Computing, Design: The Art of Design	
MUSIC 320A	Introduction to Audio Signal Processing Part I: Spectrum Analysis	
MUSIC 320B	Introduction to Audio Signal Processing Part II: Digital Filters	
Total Units		20

Musicology and Ethnomusicology Subplan

		Units
Courses taken to fulfill Core Breadth requirements may not be double-counted towards the fulfillment of concentration requirements.		
Complete at least 10 units from among the following courses*		10
MUSIC 141: Studies in Music of the Renaissance		
MUSIC 142: Studies in Music of the Baroque		
MUSIC 143: Studies in Music of the Classical Period		

MUSIC 144: Studies in Music of the Romantic Period		
MUSIC 145: Studies in Western Art Music Since 1900		
MUSIC 146: Studies in Ethnomusicology		
MUSIC 147: Studies in Music, Media, and Popular Culture		
MUSIC 148: Studies in Performance Practice		
Any upper-level, writing-intensive course, plus relevant courses outside the department, is possible, in consultation with the advisor.		
*These courses must cover at least two historical periods. At least one of these courses must be taken in the Department of Music.		
Complete 6 units of concentration electives in any music-related course		6
In consultation with the advisor, language courses, too, can count toward concentration electives. Students are strongly encouraged to attain proficiency in at least one language relevant to their research interests.		
Capstone project: Thesis		
Complete 4 units of MUSIC 198		4
MUSIC 198	Concentrations Project	
Total Units		20

Musicology/Ethnomusicology and Performance Subplan

		Units
Courses taken to fulfill Core Breadth requirements may not be double-counted towards the fulfillment of concentration requirements.		
Complete at least 10 units from among the following courses*		10
MUSIC 141: Studies in Music of the Renaissance		
MUSIC 142: Studies in Music of the Baroque		
MUSIC 143: Studies in Music of the Classical Period		
MUSIC 144: Studies in Music of the Romantic Period		
MUSIC 145: Studies in Western Art Music Since 1900		
MUSIC 146: Studies in Ethnomusicology		
MUSIC 147: Studies in Music, Media, and Popular Culture		
MUSIC 148: Studies in Performance Practice		
Any upper-level, writing-intensive course, plus relevant courses outside the department, is possible, in consultation with the advisor.		
*These courses must cover at least two historical periods. At least one of these courses must be taken in the Department of Music.		
Complete at least 6 units from among the following courses		6
MUSIC 156	"sic": Improvisation Collective	
MUSIC 159-171: Large and small ensembles		
MUSIC 172A/272A Piano		
MUSIC 182	Diction for Singers	
MUSIC 183A	German Art Song Interpretation	
MUSIC 183B	French Art Song Interpretation	
MUSIC 183C	Interpretation of Musical Theater Repertoire	
MUSIC 183D	Musical Theater	
MUSIC 183E	Singing for Musicals	
MUSIC 184A	Editing and Performing Early Music	
MUSIC 184B	Topics on the Musical Stage	
MUSIC 184C	Dramatic Vocal Arts: Songs and Scenes Onstage	
MUSIC 184D	Creating a Musical	
In consultation with the advisor, the student can choose any performance course. Students are strongly encouraged to attain proficiency in at least one language relevant to their research interests.		
Capstone project: Thesis		
Complete 4 units of MUSIC 198		4
MUSIC 198	Concentrations Project	
Total Units		20

Performance in Keyboard Studies Subplan

		Units
Courses taken to fulfill Core Breadth requirements may not be double-counted towards the fulfillment of concentration requirements.		
Solo and Ensemble Techniques		
Complete all of the following		
Private lessons: Complete six quarters for at least 1 unit per quarter		6
MUSIC 172/272 Piano, Fortepiano, Harpsichord or Organ		
Small, unconducted ensemble: enroll in MUSIC 171 a minimum of three times		3
MUSIC 171	Chamber Music	
Thoroughbass		1
MUSIC 126A	Thoroughbass Accompaniment	
Complete one of the following		1
MUSIC 160C	Stanford Baroque Soloists	
MUSIC 170	Collaborative Piano	
MUSIC 183A	German Art Song Interpretation	
MUSIC 183B	French Art Song Interpretation	
Aural and analytical skills especially pertinent to performance		
Complete all of the following		
MUSIC 122D	Analysis for Performance	2
MUSIC 129K	Advanced Keyboard Musicianship	2
Awareness of repertoire and cultural history		
MUSIC 155A	Piano Literature (enroll a minimum of three times)	3
Capstone Project: Senior Keyboard Recital		
The capstone project consists of an adjudicated solo recital supported by program preparation, program notes supervised by musicology faculty member, and dress rehearsal.		
MUSIC 198	Concentrations Project	2
Total Units		20

Performance in String Studies Subplan

		Units
Courses taken to fulfill Core Breadth requirements may not be double-counted towards the fulfillment of concentration requirements.		
Solo and Ensemble Techniques		
Complete all of the following		
Private lessons: Complete six quarters for at least 1 unit per quarter		6
MUSIC 174/274 Piano, Fortepiano, Harpsichord or Organ		
Chamber Music		
Complete six quarters*		6
MUSIC 171	Chamber Music	
*Chamber Music refers to a small, unconducted ensemble. Up to 2 units in MUSIC 160B or 160C may also apply toward the Chamber Music requirement		

Aural and analytical skills especially pertinent to performance		
Complete all of the following		
MUSIC 122D	Analysis for Performance	2
MUSIC 129	Advanced Ear-Training/Musicianship	2
Large, conducted ensemble		
Complete at least 2 units from among the following		
MUSIC 160	Stanford Symphony Orchestra	1
MUSIC 160A	Stanford Philharmonia	1
Capstone Project: Senior String Recital		
The capstone project consists of an adjudicated solo recital supported by program preparation, program notes supervised by musicology faculty member, and dress rehearsal.		
MUSIC 198	Concentrations Project	2
Total Units		20

Performance in Vocal Studies Subplan

		Units
Courses taken to fulfill Core Breadth requirements may not be double-counted towards the fulfillment of concentration requirements.		
Private Lessons		
Complete six quarters for at 2 units per quarter		12
MUSIC 173/273 Voice		
Voice Repertoire		
Complete three courses for 1 unit among the following		3
Aural and analytical skills especially pertinent to performance		
MUSIC 182	Diction for Singers	
MUSIC 183A	German Art Song Interpretation	
MUSIC 183B	French Art Song Interpretation	
MUSIC 183C	Interpretation of Musical Theater Repertoire	
Voice Pedagogy		
MUSIC 60	How We Sing: The Voice, How It Functions, and the Singer's Mind	1
Vocal Stage Performance		
Complete one course for 2 units among the following		2
MUSIC 184A	Editing and Performing Early Music	
MUSIC 184B	Topics on the Musical Stage	
MUSIC 184C	Dramatic Vocal Arts: Songs and Scenes Onstage	
Capstone Project		
MUSIC 198	Concentrations Project	2
Total Units		20

Performance in Woodwind, Brass, and Percussion Studies Subplan

		Units
Courses taken to fulfill Core Breadth requirements may not be double-counted towards the fulfillment of concentration requirements.		
Develop solo and ensemble techniques: 15 units		
Complete six quarters for 1 unit per quarter		6
MUSIC 175/275 Woodwinds		
MUSIC 176/276 Brass		
MUSIC 177/277 Percussion		
Complete at least 6 total units from among the following		6
MUSIC 160	Stanford Symphony Orchestra	
MUSIC 160A	Stanford Philharmonia	
MUSIC 160B	Stanford New Ensemble	
MUSIC 161A	Stanford Wind Symphony	
MUSIC 161B	Jazz Orchestra	
MUSIC 161D	Stanford Brass Ensemble	
Complete at least 3 units		3
MUSIC 171	Chamber Music	
Analysis Skills for Performance		
Complete all of the following		
MUSIC 6F	Art is My Occupation: Professional Development in Music	1
MUSIC 122D	Analysis for Performance	2
Capstone Project		
MUSIC 198	Concentrations Project	2
Total Units		20

Theory Subplan

		Units
Courses taken to fulfill Core Breadth requirements may not be double-counted towards the fulfillment of concentration requirements.		
Complete one course from among the following		4
MUSIC 122A	Counterpoint	
MUSIC 122B	Analysis of Tonal Music	
MUSIC 122C	Introduction to 20th-Century Composition	
Complete one course from among the following		4
MUSIC 140		
MUSIC 141: Studies in Music of the Renaissance		
MUSIC 142: Studies in Music of the Baroque		
MUSIC 143: Studies in Music of the Classical Period		
MUSIC 144: Studies in Music of the Romantic Period		
MUSIC 145: Studies in Western Art Music Since 1900		
MUSIC 146: Studies in Ethnomusicology		
MUSIC 147: Studies in Music, Media, and Popular Culture		
Complete one course from among the following		2
MUSIC 126A	Thoroughbass Accompaniment	
MUSIC 127A	Instrumentation and Orchestration	
MUSIC 129	Advanced Ear-Training/Musicianship	
MUSIC 129K	Advanced Keyboard Musicianship	
Complete one course for at least 3 units from among the following		3
MUSIC 184A	Editing and Performing Early Music	
MUSIC 251	Psychophysics and Music Cognition	
MUSIC 269	Research in Performance Practices	
Complete one course from among the following		3
MUSIC 18A	Jazz History: Ragtime to Bebop, 1900-1940	
MUSIC 18B	Jazz History: Bebop to Present, 1940-Present	
Concentration Electives		
Choose any 2 units in a music-related course		2
Capstone project: Thesis		
MUSIC 198	Concentrations Project	2
Total Units		20

Self-Designed Subplan

The self-designed music major allows the student to choose the courses to take beyond the shared 42-unit core. They develop a focus area in consultation with the Program Advisor. They are allocated 16 units

toward courses in this focus area; the remaining 4 units are reserved for the capstone project (see below).

If necessary for the focus area, 3 of the 16 units may be taken outside the Music Department, with the permission of the advisor.

Focus areas may center on courses in established areas of the department for which there is no existing subplan (e.g., jazz, musical theater), or they may delineate a path that moves across different programs within the department. Focal areas may have a creative or critical emphasis, or take a blended approach. The 16 units in the focus area should provide a spur and grounding for the 4-unit capstone project.

		Units
Courses taken to fulfill Core Breadth requirements may not be double-counted towards the fulfillment of concentration requirements.		
Take 16 units in a focal area in consultation with the Program Advisor		16
Capstone Project		
Take 4 units of independent study in support of a thesis		4
MUSIC 199	Independent Study	
Total Units		20

Capstone project guidelines

Beginning ideally in the junior year, students should choose one or two capstone advisors, and plan regular meetings to develop a capstone project. If a student has two capstone advisors, one may be a faculty member outside the Music Department.

The capstone can be understood as a culmination of the 16 units of coursework in the focus area.

Where possible the student should, beginning in Spring Quarter of the junior year, allocate 1 or 2 units per quarter to independent studies, for a total of 4 units by graduation. Otherwise the units can spread over as few as two quarters.

Advising meetings should take place at least twice per quarter, and at least three times per quarter during the two quarters leading up to graduation.

Capstone projects may take a variety of forms. In consultation with the capstone advisor(s), the student determines whether the project culminates in creative work, an academic paper or other research output, a recital or lecture-recital, or a mix.

Additional Information

Overseas Study or Study Abroad

Courses in Music are often available at Stanford overseas programs, especially in Berlin, Paris, Florence, and Oxford. See the “Overseas Studies Program” section of this bulletin for this year’s listings. Music majors and minors should talk to the Department of Music undergraduate administrator prior to going overseas.

Honors

Honors in Music are awarded by the faculty to majors who have produced an independent project of exceptional quality through a concentration. Students who wish to pursue honors must declare their concentration(s) by May 31 of their junior year (see the undergraduate student services officer for concentration-specific requirements). To receive honors, students must also have earned an overall GPA of 3.6 or higher and a GPA of 3.7 or higher in courses required for the Music major. Honors are conferred through faculty adjudication. For students concentrating in multiple areas, a single jury will be convened.

return to top (p. 1820)

Joint Major Program in Music and Computer Science

The joint major program (JMP) was discontinued at the end of the academic year 2018-19. Students may no longer declare this program. All students with declared joint majors are permitted to complete their degree; faculty and departments are committed to providing the necessary advising support.

See the "Joint Major Program (p. 33)" section of this bulletin for a description of University requirements for the JMP. See also the Undergraduate Advising and Research JMP (https://majors.stanford.edu/more-ways-explore/joint-majors-csx/) web site and its associated FAQs.

Students completing the JMP receive a B.A.S. (Bachelor of Arts and Science).

Music Major Requirements in the Joint Major Program

Because the Joint Major Program is new and experimental, some changes to the following may occur. Questions concerning a concentration project in addition to the basic requirements for a Joint Major in Music and Computer Science should be directed to the Department of Music student services office in Braun Music Center, Room 101.

See the "Computer Science Joint Major Program (p. 714)" section of this bulletin for details on Computer Science requirements.

Students majoring in the joint major program in Computer Science and Music must complete the following:

1. Music Theory

		Units
MUSIC 21	Elements of Music I	3
MUSIC 22	Elements of Music II	3
MUSIC 23	Elements of Music III	3
MUSIC 24A	Ear Training I	1
MUSIC 24B	Ear Training II	1
MUSIC 24C	Ear Training III	1
Total Units		12

Students enrolled in 21, 22, or 23 must concurrently enroll in an ear-training and musicianship lab, MUSIC 24A, 24B, or 24C.

Additional Music Theory Requirements

- *Piano Proficiency:* Majors are required to pass a piano proficiency examination as part of the music theory core (MUSIC 21 Elements of Music I, MUSIC 22 Elements of Music II, MUSIC 23 Elements of Music III). The examination is given in the first two weeks of MUSIC 21. Students who do not pass the piano proficiency examination are required to enroll in either MUSIC 12A Introductory Piano Class, MUSIC 12B Introductory Piano Class, or MUSIC 12C Introductory Piano Class concurrently with the music theory core until they are able to pass the examination. The examination consists of scales and arpeggios, performance of a simple tune to be set by the examiner, sight-reading, and the performance of prepared pieces. For additional information about this requirement, see Piano Proficiency Examination (http://exploredegrees.stanford.edu/schoolofhumanitiesandsciences/music/pianoprofexaminfo_0.pdf).
- *Ear Training Elective:* In addition to the theory requirements listed above, majors must successfully complete one unit of an ear training elective course from the list below:

		Units
MUSIC 20B	Advanced Jazz Theory	3
MUSIC 65A	Voice Class I	1

MUSIC 126A	Thoroughbass Accompaniment	1-3
MUSIC 127A	Instrumentation and Orchestration	3
MUSIC 127B	Advanced Orchestration	3
MUSIC 129	Advanced Ear-Training/Musicianship	1-2
Or any course upon approval of the Ear Training adviser		
MUSIC 130A	Introduction to Conducting	3

- *Ear Training Exit Exam:* in conjunction with the music theory series, majors are required to pass an aural skills proficiency examination administered at the end of their junior year. This assesses the ability to accurately transcribe, represent, and reproduce music vocally and at the keyboard, and must be passed before June of the senior year.

2. Music History

		Units
Select 2 of 3 from the list below		8
MUSIC 40	Music History to 1600	4
MUSIC 41	Music History 1600-1830	4
MUSIC 42	Music History Since 1830	4

3. Analysis

		Units
MUSIC 122B	Analysis of Tonal Music	4

4. Computing and Music

		Units
MUSIC 220A	Fundamentals of Computer-Generated Sound	4
MUSIC 256A	Music, Computing, Design: The Art of Design	4
Total Units		8

5. WIM

		Units
One WIM-designated course must be taken for a minimum of 4 units. The course below is recommended, but can be replaced with any Music WIM course depending on student's area of interest.		
MUSIC 251	Psychophysics and Music Cognition	4
Total Units		4

6. Electives

		Units
Students must submit 12 unit elective course plan to the JMP faculty adviser for approval no later than the beginning of the junior year. MUSIC 220B and MUSIC 250A are recommended, but elective course plan can consist of any courses from list below, or other Music department course(s) with permission of adviser.		12
MUSIC 122A	Counterpoint	4
MUSIC 122C	Introduction to 20th-Century Composition	4
MUSIC 128	Stanford Laptop Orchestra: Composition, Coding, and Performance	4
MUSIC 150		3
MUSIC 220B	Compositional Algorithms, Psychoacoustics, and Computational Music	4
MUSIC 220C	Research Seminar in Computer-Generated Music	4
MUSIC 250A	Physical Interaction Design for Music	4
MUSIC 256B	Music, Computing, Design II: Virtual and Augmented Reality for Music	4

7. Applied Music

Students may elect to take either of the following to fulfill the applied music requirement:

7.1 Lesson and Ensemble Study

- 6 units of individual studies in performance, MUSIC 172/272-177/277 and
- 5 quarters totaling 5 units of work in one or more of the department's ensembles or chamber music groups. To fulfill the ensemble requirement, Music majors need at least three quarters of participation in the department's traditional large ensembles (MUSIC 159-167) with the exception of students whose primary instrument is guitar, harp, or keyboard, who need to participate at least one quarter in the ensembles above, but who may fulfill the rest of the requirement with chamber music.

7.2 Sound Recording

- 1 quarter (3 units) of MUSIC 192A Foundations of Sound-Recording Technology
- 1 quarter (3 units) of MUSIC 192B Advanced Sound Recording Technology
- 5 units of MUSIC 192C Session Recording

8. Capstone Project

		Units
MUSIC 220D	Research in Computer-Generated Music (3 units taken in conjunction with CS Capstone)	3

9. Optional Concentrations

Students who would also like to complete an additional capstone project in Performance, Conducting, Composition, Music History and Theory, or Music, Science, and Technology must consult the Department of Music student services office in Braun Music Center, Room 101 to submit a proposal for an optional concentration.

Dropping a Joint Major Program

To drop the joint major, students must submit the Declaration or Change of Undergraduate Major, Minor, Honors, or Degree Program (https://stanford.box.com/change-UG-program/). Students may also consult the Student Services Center (http://studentservicescenter.stanford.edu/) with questions concerning dropping the joint major.

Transcript and Diploma

Students completing a joint major graduate with a B.A.S. degree. The two majors are identified on one diploma separated by a hyphen. There will be a notation indicating that the student has completed a "Joint Major." The two majors are identified on the transcript with a notation indicating that the student has completed a "Joint Major."

Minor in Music

The Music minor allows students to explore music through a flexible program of study. The minor can focus on Composition, History, Music, Science & Technology (MST), Performance/Conducting, or Theory, or on areas not currently served by the major, such as Ethnomusicology, Jazz, or Musical Theater. The minor can also focus on musical aspects of a non-Music major such as American Studies, Anthropology, Area Studies, Computer Science, CSRE, TAPS, etc. Courses used to fulfill the minor may not be used to fulfill any other department degree requirements (major or minor).

Minor Requirements — 24 units total for the minor

Within the minimum 24-unit requirement:

1. All courses must be taken for a letter grade, except where letter grades are not offered.

2. 6 courses must be for 3 units each or more.
3. Students must complete at least 3 units of coursework in 3 of the following 5 areas:
    - Composition (https://explorecourses.stanford.edu/search/?view=catalog&filter-coursestatus-Active=on&page=0&catalog=&academicYear=&q=MUSIC%3A%3AUGComp&collapse=)
    - History/Ethnomusicology (https://explorecourses.stanford.edu/search/?view=catalog&filter-coursestatus-Active=on&page=0&catalog=&academicYear=20192020&q=MUSIC%3A%3Aminorhistethno&collapse=)
    - MST/Computer Music (https://explorecourses.stanford.edu/search/?view=catalog&filter-coursestatus-Active=on&page=0&catalog=&academicYear=&q=MUSIC%3A%3Aminormst&collapse=)
    - Performance/Conducting (https://explorecourses.stanford.edu/search/?q=MUSIC%3a%3aminorperfcond&view=catalog&page=0&filter-coursestatus-Active=on&collapse=&academicYear=20192020)
    - Theory (https://explorecourses.stanford.edu/search/?view=catalog&filter-coursestatus-Active=on&page=0&catalog=&academicYear=20192020&q=MUSIC%3A%3ATheory&collapse=)

The elective units may be fulfilled in either breadth or depth in any area(s) desired, and may be selected from any of the Department of Music's courses. Prospective minors are required to choose a faculty adviser and submit a course plan. Course plans and adviser agreement forms are available from the undergraduate student services officer.

The Department of Music has adopted the above requirements for students declaring the minor starting September 2019. Students who declared a Music minor prior to September 2019 should refer to previous guidelines and requirements for the minor below. If interested in changing to the new requirements, contact the undergraduate student services officer.

Minor Requirements prior to September 2019

The Music minor provides students with a core of essential Music courses in the disciplines that establish both a foundation for informed appreciation of music and a basis for more advanced study, should the student wish to pursue it. Two options are available for the minor: General Music and Music, Science, and Technology.

Total of 36 units required course work as delineated in each of the two options below, and passage of the piano proficiency and ear training examinations. To fulfill Music minor requirements, courses must be taken for a letter grade.

- **Piano Proficiency**: minors are required to pass a piano proficiency examination as part of the music theory core (MUSIC 21 Elements of Music I, MUSIC 22 Elements of Music II, MUSIC 23 Elements of Music III). The examination is given in the first two weeks of MUSIC 21. Students who do not pass the piano proficiency examination are required to enroll in either MUSIC 12A Introductory Piano Class, MUSIC 12B Introductory Piano Class, or MUSIC 12C Introductory Piano Class concurrently with the music theory core until they are able to pass the examination. The examination consists of scales and arpeggios, performance of a simple tune to be set by the examiner, sight-reading, and the performance of prepared pieces. Download additional information regarding the proficiency examination (http://exploredegrees.stanford.edu/schoolofhumanitiesandsciences/music/pianoprofexaminfo_0.pdf).
- **Ear Training Exit Exam:** in conjunction with the music theory series, minors are required to pass an aural skills proficiency examination administered at the end of their junior year. This examination tests the ability to accurately transcribe, represent, and reproduce music vocally and at the keyboard, and must be passed before June of the senior year.

Required Courses: General Music

1. Theory

		Units
MUSIC 21	Elements of Music I	3
MUSIC 22	Elements of Music II	3
MUSIC 23	Elements of Music III	3
MUSIC 24A	Ear Training I	1
MUSIC 24B	Ear Training II	1
MUSIC 24C	Ear Training III	1

Students enrolled in 21, 22, or 23 must concurrently enroll in an ear-training and musicianship lab, MUSIC 24A, 24B, or 24C.

2.History

		Units
MUSIC 40	Music History to 1600	4
MUSIC 41	Music History 1600-1830	4
MUSIC 42	Music History Since 1830	4

3. Applied: Ensemble

Two quarters, 2 units total.

4. Applied: Individual

Two quarters at 3 units per quarter, 6 units total.

5. WIM, 4 units

		Units
4 units in any course numbered Music 140-149, except MUSIC 140G, or MUSIC 251. Offerings in 2018-2019 include:		
MUSIC 142K	Studies in Music of the Baroque: Handel the Cosmopolitan	4-5
MUSIC 145K	Studies in Western Art Music Since 1900: Concepts of New Music	4
MUSIC 147K	Studies in Music, Media, and Popular Culture: Music and Urban Film	4
MUSIC 149J		4
MUSIC 251	Psychophysics and Music Cognition	4

Required Courses: Music, Science and Technology

1. Theory

		Units
MUSIC 21	Elements of Music I	3
MUSIC 22	Elements of Music II	3
MUSIC 23	Elements of Music III	3
MUSIC 24A	Ear Training I	1
MUSIC 24B	Ear Training II	1
MUSIC 24C	Ear Training III	1
MUSIC 150		
MUSIC 220A	Fundamentals of Computer-Generated Sound	2-4
MUSIC 220B	Compositional Algorithms, Psychoacoustics, and Computational Music	2-4

2. Applied

		Units
MUSIC 192A	Foundations of Sound-Recording Technology	3
MUSIC 192B	Advanced Sound Recording Technology	3
MUSIC 192C	Session Recording (two quarters, 3 units total)	1-2

Alternatively, students pursuing the MST minor may elect to fulfill the applied music requirement with ensemble units and individual lessons as described in the Applied requirements for the General Music minor above.

3. WIM, 4 units

		Units
MUSIC 251	Psychophysics and Music Cognition	4

Performance Certificate Program for Non Music Majors

As a locus of great academic and artistic depth and diversity, the Department of Music's performance programs have long engaged students who, even though they are not music majors, are serious and dedicated to furthering their skills in music performance. The Certificate in Music Performance program provides a select cohort of these students the opportunity for further recognition of their artistic achievement.

This program is open by audition to undergraduate students who already demonstrate a high degree of accomplishment in their area of music performance, study privately with one of the Department of Music's faculty, and who wish to bolster their performance studies with coursework that may be drawn from the Department of Music's other areas of academic focus: history, theory, computer music, and composition. The Certificate in Music Performance is issued by the Department of Music and will not appear on any University record, including the student's transcript.

Admission

Students are admitted to the Certificate in Music Performance program based on an audition adjudicated by Department of Music faculty at the beginning of Winter Quarter. To request an audition, the student should speak with the private lesson instructor and the Department of Music's undergraduate student services officer. Email ugmusicinquiries@lists.stanford.edu for additional information. At the time of the audition, students must have already declared a major outside of music.

Requirements

Once admitted into the program, students must complete a course plan to be approved by department faculty based on the requirements below.

1. Performance

- A minimum of six quarters of individual lessons of private instruction and/or vocal performance (MUSIC 172/272-177/277). Any quarters of instruction taken prior to admission into the program may also count towards these requirements. Requirements for the minimum levels of proficiency in each instrument for private instruction are posted on the department's web site (https://music.stanford.edu/ensembles-lessons/lessons/). All six quarters of lesson study must be in the same instrument area.
- A minimum of six quarters of ensemble experience in the Department of Music's ensembles and chamber groups. For students whose primary instrument area is guitar, keyboard or harp, at least one quarter of ensemble experience must be in one of the department's traditional large ensembles (MUSIC 159-167, MUSIC 184). The remaining ensemble requirements may be filled with chamber music (MUSIC 171). Keyboard students may also take MUSIC 171 Chamber Music, MUSIC 171 Chamber Music, and MUSIC 171 Chamber Music to fulfill this requirement. All non-keyboard, guitar or harp students must successfully complete three quarters in the department's traditional large ensembles (MUSIC 159-167, MUSIC 184), and three quarters in conductor-less, small ensembles such as chamber music or jazz combos MUSIC 171 Chamber Music. MUSIC 156 "sic": Improvisation Collective may count for up to two of the ensemble unit requirements. Any quarters of ensemble taken prior to admission into the program may also count towards these requirements.

2. Music Theory

Students are required to complete one course in music theory (MUSIC 21 Elements of Music I, MUSIC 22 Elements of Music II, or MUSIC 23 Elements of Music III). For the purposes of the Performance Certificate, the student may elect to take these courses on a Credit/No Credit grading basis. However, students must also pass the associated piano proficiency exam (http://exploredegrees.stanford.edu/schoolofhumanitiesandsciences/music/pianoprofexaminfo_0.pdf) and take one course in ear training.

3. Elective Courses

Six or more total units in Music, dependent upon course plan document submitted following acceptance into the program.

4. Final Project

To complete the Performance Certificate, students must enroll in a 4-unit MUSIC 199 Independent Study or 4-unit MUSIC 198 Concentrations Project and complete a final, performance-based capstone project. Students must pass faculty adjudication, and, in addition, complete a writing project (essay or program notes) pre-approved by the lesson instructor. Students should refer to the Department of Music website's Recitals-at-a-Glance (https://sites.stanford.edu/music-dept/venues-spaces/reserve/recitals/) page for reservation deadlines and calendar links.

Master of Arts in Music

University requirements for the M.A. are described in the "Graduate Degrees (p. 65)" section of this bulletin.

The Department of Music accepts M.A. applications into the Music, Science, and Technology program. The M.A. in Music, Science, and Technology is available to current Stanford undergraduates as a coterminal M.A. as well as to current Stanford graduate students and external applicants.

Music does not accept direct applications for an M.A. degree in Composition, Musicology, or Computer-Based Music Theory and Acoustics. Students admitted to doctoral programs may receive an M.A. in Composition, Musicology, or Computer-Based Music Theory and Acoustics under certain circumstances (see below).

Degree Options

All of the following fields of study are declarable as subplans in Axess via the "Declaration or Change to a Field of Student" form; they appear on the transcript and the diploma:

- Master of Arts degree (M.A.) in Music—Composition subplan.
- Master of Arts degree (M.A.) in Music—Music History subplan.
- Master of Arts degree (M.A.) in Music—Computer-Based Music Theory and Acoustics subplan.
- Master of Arts degree (M.A.) in Music—Music, Science, and Technology subplan

Degree Requirements

A minimum of 45 academic units is required for a master's degree in Music. At least half of those units must in courses with the career GR code in the Bulletin; all must be at the 100-level or higher.

No course used to fulfill degree requirements for the BA in Music may be used to fulfill degree requirements for a graduate degree in Music, unless specifically required for both degrees.

Only work that receives a grade of 'A', 'B', or 'S' (a passing grade in an instructor-mandated credit/no credit course) in Music courses numbered 100 or higher taken as a graduate student is recognized as fulfilling the advanced-degree requirements.

Courses numbered 100 or higher taken as electives in other departments may be taken for credit or letter grade.

The expectation is that a student will be able to complete the required 45 units of coursework by the end of their second year.

M.A. in Music, Science, and Technology

The M.A. in Music, Science, and Technology is the department's only terminal master's degree. This is a two-year program of 45 graduate-level units focusing on the integration of music perception, music-related signal processing and controllers, synthesis, performance, and composition. The program is designed for students who have an undergraduate music, engineering, or science degree.

Admission to the Master of Arts in Music, Science and Technology

All components of the M.A./MST application are due by the second Tuesday in December, including evidence of accomplishment (scores, recordings, and/or research papers). The Graduate Record Examination (GRE) is optional for Master's applications. Applicants who choose to take the GRE should arrange to take it well in advance of the application deadline of the second Tuesday in December to ensure that test scores are received in a timely manner. International students whose first language is not English are required to take the TOEFL exam (with certain exceptions: see the Office of Graduate Admissions (http://studentaffairs.stanford.edu/gradadmissions/) web site.)

		Units
Required Courses (units determined in consultation with advisor)		
MUSIC 201	CCRMA Colloquium	
MUSIC 220A	Fundamentals of Computer-Generated Sound	
MUSIC 251	Psychophysics and Music Cognition	
MUSIC 256A	Music, Computing, Design: The Art of Design	
MUSIC 320A	Introduction to Audio Signal Processing Part I: Spectrum Analysis	3-4
MUSIC 320B	Introduction to Audio Signal Processing Part II: Digital Filters	3-4
Electives		
The remaining units of graduate level work are determined in consultation with the student's advisor, must include three CCRMA electives, and may include courses taken outside the department.		
Capstone Project		
MA MST students can choose to pursue the Capstone project as part of their electives, by enrolling either in MUSIC 298 (MA capstone, 1-5 units per quarter, repeatable 3 times), or in a course plan devised in consultation with their advisor(s), totaling at least 6 units. The MA/MST capstone is intended to gather and focus skills acquired throughout the program toward an exploratory project aimed at bridging between your residency as a student and whatever will follow beyond your MA. For example, students interested in applied research might do design projects and/or mentored internships. For students considering going on to PhD research the capstone can be considered a more flexible form of a master's thesis, producing research and publication(s) that will strengthen your PhD application. For students wishing to continue in a DMA or another MFA program the capstone can be the core of your creative portfolio. Mentorship can include your advisor augmented, should you chose, by any other faculty member from CCRMA or in other programs.		

University Coterminal Requirements

Coterminal master's degree candidates are expected to complete all master's degree requirements as described in this bulletin. University requirements for the coterminal master's degree are described in the "Coterminal Master's Program (p. 56)" section. University requirements for the master's degree are described in the "Graduate Degrees (p. 65)" section of this bulletin.

After accepting admission to this coterminal master's degree program, students may request transfer of courses from the undergraduate to the graduate career to satisfy requirements for the master's degree. Transfer of courses to the graduate career requires review and approval of both the undergraduate and graduate programs on a case by case basis.

In this master's program, courses taken during or after the first quarter of the sophomore year are eligible for consideration for transfer to the graduate career; the timing of the first graduate quarter is not a factor. No courses taken prior to the first quarter of the sophomore year may be used to meet master's degree requirements.

Course transfers are not possible after the bachelor's degree has been conferred.

The University requires that the graduate advisor be assigned in the student's first graduate quarter even though the undergraduate career may still be open. The University also requires that the Master's Degree Program Proposal be completed by the student and approved by the department by the end of the student's first graduate quarter.

Required course work is listed above. A complete program with an individually-tailored list of electives will be formed in consultation with the student's advisor.

M.A. in Composition, Musicology, and Computer-Based Music Theory and Acoustics

A minimum of 45 academic units is required for the master's degree in Music. The Department of Music does not accept students for study only towards the M.A. degree except in the Music, Science, and Technology program, described below.

Students in the D.M.A. program in composition and the Ph.D. programs in Musicology and Computer-Based Music Theory and Acoustics who enter with a Bachelor's degree may request and received the M.A. degree in their program at any time after completing 45 units of graduate coursework and advancing to Candidacy.

A doctoral student who has completed 45 units of graduate coursework in Music, but does not advance to doctoral candidacy, may petition for a terminal M.A. in their program. A terminal M.A in Composition, Musicology and Computer-Based Music Theory and Acoustics is granted on an individual basis and at the discretion of the Music Academic Council faculty.

Doctor of Musical Arts (D.M.A.) and Doctor of Philosophy (Ph.D.) in Music

University requirements for the D.M.A and Ph.D. are described in the "Graduate Degrees" section of this bulletin. The following statements apply to all the graduate degrees described below, unless otherwise indicated.

Admission

All components of the application are due by the second Tuesday in December. Applicants are required to submit evidence of accomplishment (scores, recordings, and/or research papers, according to the proposed field of concentration) with their application. The Graduate Record Examination (GRE) is optional for doctoral applications. Applicants who choose to take the GRE should arrange to take it well in advance of the application deadline of the second Tuesday in December to ensure that test scores are received in a timely manner. International students whose first language is not English are also required to take the TOEFL exam (with certain exceptions: see the Office of Graduate Admissions (https://gradadmissions.stanford.edu/applying/starting-your-application/required-exams/exam-requirements-international-applicants/) web site).

Department Examinations

All entering doctoral graduate students are required to take and pass:

1. a proficiency examination in dictation and sight-singing; a diagnostic examination in theory (counterpoint, harmony, and analysis); AND,
2. for musicologists and composers only, a proficiency examination in piano; for ethnomusicologists, a proficiency examination in piano or another instrument; AND
3. for ethnomusicologists only, a test on musical traditions outside of Western art music; OR
4. for musicologists only, a test on history and repertoire of Western art music.

These exams are given the week before classes begin in September each year. Teaching Assistant assignments are made on the basis of diagnostic exam results.

Graduate Credit

A minimum of 135 units are required for a doctoral degree.
No course used to fulfill degree requirements for the BA in Music may be used to fulfill degree requirements for a graduate degree in Music, unless specifically required for both degrees. Only work that receives a grade of 'A,' 'B,' or 'S' (a passing grade in an instructor-mandated credit/no credit course) in music courses numbered 100 or higher taken as a graduate student is recognized as fulfilling the advanced-degree requirements. The expectation is that a student will be able to complete the required 135 units of coursework by the end of Autumn Quarter of their 4th year.

The following may be taken as electives for graduate credit:

1. any course in another department or school numbered 100 or over (with advisor's consent); OR
2. any Music course with the Career: GR code in the Bulletin. A letter grade of A, B, or S (a passing grade in an instructor-mandated credit/no credit course) is required; OR
3. Music Department group instruction (MUSIC 72A Intermediate Piano Class through MUSIC 77 Percussion Class). Enroll as MUSIC 299 Independent Study Study after consulting with instructor.

Degree Options

The following fields of study are declarable as subplans in Axess via the "Declaration or Change to a Field of Study for Graduate Students" form; they appear on the transcript and the diploma:

- **Doctor of Musical Arts degree (D.M.A.) in Composition**
  The D.M.A. is offered to a limited number of students who demonstrate substantial experience in composition, sonic and intermedial arts, with high promise of attainment in their respective fields. Breadth is given through studies in other branches of music and in relevant fields outside music, as desirable. The final project for the D.M.A.degree is a creative project, which may consist of a large-scale composition for ensemble, a series of compositions, or a substantial sonic or intermedial project.
- **Doctor of Philosophy degree (Ph.D.) in Ethnomusicology**
  Ethnomusicology at Stanford prepares students to study sound, listening, and musical practices in diverse social and cultural contexts. Intensive training in fieldwork and ethnographic methods as well as critical theory, performance studies, anthropology, and area studies are central to the program. A vital aspect of students' experience is collaboration with historical musicology, composition, Euro-American music theory, and creative music-making.
- **Doctor of Philosophy degree (Ph.D.) in Musicology**
  Musicology at Stanford prepares students for the historical and critical study of music and musical practices. Intensive training in archival, textual, analytical, and interpretive methods as well as critical theory, performance studies, and cultural studies are central to the program. A vital aspect of students' experience is collaboration with ethnomusicology, composition, and performance.
- **Doctor of Philosophy degree (Ph.D.) in Computer-Based Music Theory and Acoustics**
  The Ph.D. is offered in areas of the research of Stanford's graduate faculty: Musicology, Ethnomusicology, and Computer-Based Music Theory and Acoustics (CBMTA) at the Center for Computer Research in Music and Acoustics (CCRMA). The department seeks students who demonstrate substantial scholarship, high promise of attainment, and the ability to do independent investigation and present the results of such research in a dissertation.

Degree Requirements

Residence

The candidate must complete a minimum of 135 academic units (see Residency under the Graduate Degrees (p. 65) section of this bulletin). Doctoral candidates working on Ph.D. dissertations or Doctor of Musical Arts (D.M.A.) final projects that require consultation with faculty members continue enrollment in the University under Terminal Graduate Registration (TGR), after they have earned the required 135 academic units and have completed their Special Area Examinations.

Qualifying Examination

D.M.A. students and Ph.D. students in the Computer-Based Music Theory and Acoustics programs take a written and oral Qualifying Examination just prior to the fourth funded quarter of study.

D.M.A. students submit a Special Area Examination topic proposal by the end of their fifth quarter.

Ph.D. students in Ethnomusicology take their written and oral Qualifying Exams just prior to the eighth funded quarter of study.

Ph.D. students in Musicology take their written and oral Qualifying Exams just prior to the eighth funded quarter of study.

Admission to Doctoral Candidacy

Faculty review the doctoral student's progress and academic achievement annually. Admission to candidacy for the doctoral degree is a judgment by the faculty in the department or school of the student's potential to successfully complete the requirements of the degree program. Students are expected to complete department qualifying procedures and apply for candidacy by the end of their second year in the Ph.D. program. If the student's progress and potential are deemed sufficient to advance to Candidacy, the student must complete the Application for Candidacy for Doctoral Degree (https://stanford.box.com/s/wlcmlt9bw2ztv6r3rlphp0rwwy7iapzs/). A student who does not advance to Candidacy will be dismissed from the program.

Teaching

All students in the Ph.D. or D.M.A. degree programs, regardless of sources of financial support, are required to complete six quarters of supervised teaching (Teaching Assistantship) at half time. MUSIC 280 TA Training Course (offered in Spring Quarter and taken at the end of the first year) is required preparation for Teaching Assistants. The department may offer additional quarters of teaching to students beyond the third year, depending on teaching needs and student qualifications. Teaching Assistants are required to be present on campus during the instruction period and until their duties in exam week are fulfilled. A TA who needs to take a short absence related to professional development (no more than one week in a quarter) should ask the instructor to approve that absence at least one month before the quarter begins. Absences during midterms and finals are not acceptable.

I. Composition

The Doctor of Musical Arts (D.M.A.) degree in Composition is given breadth through collateral studies in other branches of music and in relevant studies outside music as seems desirable. In addition to degree requirements required of all doctoral graduate students and listed above, students must complete the following required courses:

		Units
Required Courses		
MUSIC 280	TA Training Course	1
MUSIC 300G	Analysis and Repertoire: Late-Romantic to Contemporary	3-4
MUSIC 305D	Analysis from a Compositional Perspective	4
MUSIC 323	Doctoral Seminar in Composition (6 quarters during the first 3 years of study) [1]	3-4
MUSIC 324	Graduate Composition Forum	1-9
MUSIC 325	Individual Graduate Projects in Composition [2]	1-5
One elective course from the CBMTA curriculum chosen from the following or similar, with advisor's approval:		
MUSIC 220A	Fundamentals of Computer-Generated Sound	
MUSIC 250C	Interaction - Intermedia - Immersion	
MUSIC 300G	Analysis and Repertoire: Late-Romantic to Contemporary	
MUSIC 251	Psychophysics and Music Cognition	
MUSIC 255	Intermedia Workshop	
MUSIC 256A	Music, Computing, Design: The Art of Design	

1. In addition to the nine required terms (to be complete in the first three years), participation in classmates' Portfolio Reviews, Area Exams, and Final Project Presentations is strongly encouraged. We find that attending others' milestone events increases student's preparedness for their own. Attendance at Final Project Presentations is particularly important; students are expected to communicate with their adviser in the case that they must miss a Final Project Presentation. Students are also encouraged to attend presentations by invited composers beyond the 9-quarter requirement.
2. Two or more quarters per year are required until advancement to candidacy. By the end of the second year the student shall have enrolled with a minimum of two different faculty members. By the end of the third year the student shall have enrolled with a minimum of three different faculty.

1. Besides those requirements listed above, candidates are expected to produce a portfolio of works demonstrating their ability to compose in a variety of forms and for the common media: vocal, instrumental, and electronic music. If possible, the works submitted are presented in public performance prepared by the composer. Annual progress is reviewed by the composition faculty, with a major portfolio review during the Autumn Quarter of the third year.
2. *Foreign Language Requirement*—At the time of advancement to candidacy, all D.M.A. students are required to have demonstrated a reading knowledge of one language other than English and the ability to translate it into idiomatic English.
3. *Special-Area Examination*—During the Winter Quarter of the fourth year of study (no later than the ninth week of classes), the DMA student completes the following: a written examination on their planned field of concentration; a one-hour presentation followed by questions in MUSIC 324 Graduate Composition Forum; a sample course syllabus; and the final project proposal.
4. *Final Project Presentation*—Required during the last quarter of residence, no later than the ninth week of classes, the purpose of the presentation is to demonstrate the ability of the candidate to organize and present the topic of their final project for public review. It should be one hour in length, followed by questions, treating aspects of the final project, followed by questions. Details regarding the D.M.A. final project presentation may be found in the Department of Music Graduate Handbook.
5. *Final Project*—Candidate's D.M.A. work culminates in a required Final Project. The final project in composition must be a substantial composition, the scope of which shall be agreed upon by the members of the committee. This may consist of a single large-scale work, or a series of compositions unified by an artistic theme or process. Typically, work on the final project encompasses several quarters.
6. *Reading Committee*—The membership of the reading committee is the principal final project advisor and a minimum of two additional members. The notice of appointment of a D.M.A. Final Project Reading Committee should be submitted to the department at the same time as the approved final project proposal and the completion of the Special Area Exam. It is the responsibility of the student, with the advice of his or her advisor, to approach appropriate faculty members and obtain their consent to serve on the reading committee. Download the D.M.A. reading committee form (https://stanford.box.com/s/5irt1a01fti7lkebpq6sr93lxvr6oqtp/); fill it out; obtain committee members' signatures; return to the graduate student administrator.
7. The faculty expect doctoral students to engage deeply with the on-campus composition community above and beyond TA requirements. This includes engagement with new music by faculty and fellow students and participation in critical discourse. We strongly encourage students to attend peers' milestone events such as Portfolio Reviews, Area Exam Presentations, and Final Project Presentations.

8. Students are expected to be in residence during their studies, to fully profit from and contribute to the Music Department. However, students may request research and artistic practice-based leaves when specific activities warrant it, as long as they do not interfere with the above stated requirements. Leave requests must be reviewed by the full composition faculty and approved by a majority, in consultation with the Department Chair. Leave requests should be made to the adviser at least two weeks before relevant University deadlines.

II. Ethnomusicology

In addition to the degree requirements required of all doctoral graduate students and listed above, students in the PhD Ethnomusicology subplan must complete the following courses:

Required Courses		
MUSIC 200A	Proseminar in Musicology and Music Bibliography	3-4
MUSIC 200B	Proseminar in Ethnomusicology	3-5
MUSIC 280	TA Training Course	1
MUSIC 300D	Music Ethnography	3-5
MUSIC 300(X)	Methods for Graduate Music Study [1]	3-5
MUSIC 310	Research Seminar in Musicology [2]	3-5
	GR-coded course in Anthropology	3-5
	GR-coded course in TAPS	3-5
	GR-coded course in global/regional/linquistic area	3-5
	GR-coded course in race/ethnicity/gender/ sexuality	3-5
	Course, lessons, or ensemble in "non-Western" musics	0-3
MUSIC 330	Musicology Dissertation Colloquium [3]	1

1 The requirement is for one 300(X) seminar of 3-4 units, in addition to MUSIC 300D Music Ethnography. A student may request to take another 310 in lieu of 300[X].

2 The requirement is for three 310 seminars of 3-5 units each, to be taken in the first three years of study.

3 The requirement is for enrollment each quarter offered during Candidacy, EXCEPT when conducting ethnographic fieldwork.

1. *Foreign Language Requirement*—By the time of advancement to Candidacy, all Ph.D. students in Ethnomusicology must demonstrate proficiency in one field language, and EITHER one “classical” language (Latin, German, Italian, French, Spanish, or Russian) OR a second field language. If one of these languages is the student's native language, the student may be exempted from an examination.
2. *Special-Area Examination*—During Autumn quarter of the fourth year of study, the student submits a dissertation proposal and takes a written and oral examination of their knowledge of musics and literature of the student’s area of concentration. The examination will also test students on the conceptual foundations of the field of Ethnomusicology, as well as a theoretical topic that is central to the student’s dissertation. The Special Area exam concludes with an oral defense of the written answers and the dissertation proposal. The Special Area exam committee comprises prospective readers of the dissertation.
3. *Reading Committee*—The dissertation reading committee is constituted according to the G.A.P., section 4.8.1 (https://gap.stanford.edu/handbooks/gap-handbook/chapter-4/subchapter-8/page-4-8-1/). It includes, at minimum: the principal dissertation advisor; a second reader from the Music faculty; a third reader from a department outside of Music. It is the responsibility of the student, with the advice of his or her advisor, to approach appropriate faculty members and obtain their consent to serve on the reading committee. The student must file a completed and signed Doctoral Dissertation Reading Committee form with the Student Services Officer at the same time as the approved dissertation proposal and the completion of the Special Area Exam.
4. *Dissertation*—After the first two years of graduate study, the student concentrates on researching and writing the dissertation. The dissertation demonstrates the student's ability to produce a work of original and excellent scholarship
5. *University Oral Examination*—When the dissertation is substantially complete, as judged by the candidate and their principal dissertation advisor, the candidate gives a public oral presentation on the research, method, and results. Immediately following the presentation, there is a closed-session examination of the candidate by a University Orals Committee constituted according to the G.A.P., section 4.7.1 (https://gap.stanford.edu/handbooks/gap-handbook/chapter-4/subchapter-7/page-4-7-1/).

III. Musicology

In addition to degree requirements required of all doctoral graduate students and listed above, students must complete the following required courses:

		Units
Required Courses		
MUSIC 200A	Proseminar in Musicology and Music Bibliography	3-4
MUSIC 200B	Proseminar in Ethnomusicology	3-5
MUSIC 280	TA Training Course	1
MUSIC 310	Research Seminar in Musicology [1]	3-5
MUSIC 330	Musicology Dissertation Colloquium [2]	1
MUSIC 300(X)	Methods for Graduate Music Study [3]	3-5

1 The requirement is for five 310 seminars of 3-5 units each, to be taken in the first three years of study.

2 Student must enroll in MUSIC 330 Musicology Dissertation Colloquium each quarter offered while they are TGR and continuing to graduation.

3 The requirement is for six 300(X) seminars of 3-4 units each, to be taken in the first two years of study.

1. *Foreign Language Requirement*—By the time of advancement to Candidacy, all Ph.D. students in Musicology must pass Ph.D. language reading examinations in German and in a second language chosen from French, Italian, or Latin. A student may petition to substitute a different second language necessary for their planned doctoral research. If one of these languages is the student's native language, the student may be exempted from an examination.
2. *Special-Area Examination*—During Autumn quarter of the fourth year of study, the student submits a dissertation proposal and takes a written examination on repertoire and scholarly literature in their proposed area of dissertation research. The Special Area exam concludes with an oral defense of the written answers and the dissertation proposal. The Special Area exam committee comprises prospective readers of the dissertation.
3. *Reading Committee*—The dissertation reading committee is constituted according to the G.A.P., section 4.8.1 (https://gap.stanford.edu/handbooks/gap-handbook/chapter-4/subchapter-8/page-4-8-1/). It includes, at minimum: the principal dissertation advisor; a second reader from the Music faculty; a third reader from Music or another department. It is the responsibility of the student, with the advice of his or her advisor, to approach appropriate faculty members and obtain their consent to serve on the reading committee. The student must file a completed and signed Doctoral Dissertation Reading Committee form with the Student Services Officer at the same time as the approved dissertation proposal and the completion of the Special Area Exam.

4. *Dissertation*—After the first two years of graduate study, the student concentrates on researching and writing the dissertation. The dissertation demonstrates the student's ability to produce a work of original and excellent scholarship.
5. *University Oral Examination*—When the dissertation is substantially complete, as judged by the candidate and their principal dissertation advisor, the candidate gives a public oral presentation on the research, method, and results. Immediately following the presentation, there is a closed-session examination of the candidate by a University Orals Committee constituted according to the G.A.P., section 4.7.1 (https://gap.stanford.edu/handbooks/gap-handbook/chapter-4/subchapter-7/page-4-7-1/).

IV. Computer-Based Music Theory and Acoustics

In addition to degree requirements required of all doctoral graduate students and listed above, students must complete the following required courses:

Required Courses		
MUSIC 220A	Fundamentals of Computer-Generated Sound [1]	4
MUSIC 220B	Compositional Algorithms, Psychoacoustics, and Computational Music [1]	4
MUSIC 220C	Research Seminar in Computer-Generated Music [1]	2-4
MUSIC 220D	Research in Computer-Generated Music [2]	1-10
MUSIC 251	Psychophysics and Music Cognition	1-5
MUSIC 280	TA Training Course	1
MUSIC 305D	Analysis from a Compositional Perspective	4
MUSIC 300G	Analysis and Repertoire: Late-Romantic to Contemporary	3-4
MUSIC 320A	Introduction to Audio Signal Processing Part I: Spectrum Analysis	3-4
MUSIC 320B	Introduction to Audio Signal Processing Part II: Digital Filters	3-4
MUSIC 341	Ph.D Dissertation [2]	1-10
MUSIC 398	PhD Dissertation Proposal [4]	1-3

1 Recommend taking this in the first year.

2 220D and 341 can be taken multiple times for 1-10 units each time, for a combined total of 9 units or more.

3 Must take in first year.

4 Recommend taking this in the third year.

1. *Foreign Language Requirement*—At the time of advancement to Candidacy, all Ph.D. students in Computer-Based Music Theory and Acoustics are required to have demonstrated a reading knowledge of one language other than English and the ability to translate it into idiomatic English.
2. *Special-Area Examination*—A written and oral examination testing the student's knowledge of music and research in the student's field of concentration is completed during the fourth year of study, no later than the last day of classes in Autumn Quarter of that year. This includes an oral defense of the dissertation proposal. The examining committee comprises prospective readers of the dissertation.
3. *Reading Committee*—The dissertation reading committee is constituted according to the G.A.P., section 4.8.1 (https://gap.stanford.edu/handbooks/gap-handbook/chapter-4/subchapter-8/page-4-8-1/). It includes, at minimum: the principal dissertation advisor; a second reader from the Music faculty; a third reader from Music or another department. It is the responsibility of the student, with the advice of his or her advisor, to approach appropriate faculty members and obtain their consent to serve on the reading committee. The student must file a completed and signed Doctoral Dissertation Reading Committee (https://stanford.box.com/docdiss-reading-committee-form/) form with the Student Services Officer at the same time as the approved dissertation proposal and the completion of the Special Area Exam.
4. *Dissertation*—After the first two years of graduate study, the student concentrates on research and writing of the dissertation. The dissertation demonstrates the student's ability to work systematically and independently to produce an essay of competent scholarship.
5. *University Oral Examination*—When the dissertation is substantially complete, as judged by the candidate and their principal dissertation advisor, the candidate gives a public oral presentation on the research, method, and results. Immediately following the presentation, there is a closed-session examination of the candidate by a University Orals Committee constituted according to the G.A.P., section 4.7.1 (https://gap.stanford.edu/handbooks/gap-handbook/chapter-4/subchapter-7/page-4-7-1/).

Doctoral Certificate in Composition

Admission

Students are admitted to the Certificate in Composition program based on a selection process adjudicated by Department of Music composition faculty at the start of the student's second year in Ph.D. program in Music. To request consideration for the Doctoral Certificate Program in Composition, the student should speak with a member of the composition faculty and the Department of Music's graduate student services officer. At the time of consideration, the student must be in good standing in the Department of Music.

Requirements

Once admitted into the program, students must complete a course plan to be approved by department faculty based on the requirements below.

		Units
MUSIC 323	Doctoral Seminar in Composition (Doctoral Seminar in Composition (3 quarters required, 2 of which must be completed by the end of the second year of the doctoral program)) [1]	9-12
MUSIC 324	Graduate Composition Forum (Graduate Composition Forum1 (3 quarters required by the end of the second year, plus 6 additional quarters, for a total of 9 quarters))	9
MUSIC 325	Individual Graduate Projects in Composition (Individual Graduate Projects in Composition (7 quarters of individual instruction in composition for any number of units, minimum of 7 units); two quarters must be taken by the end of the second year; the student must have studies with two different composition professors by the end of the second year of the doctoral program, and three different professors by the end of year three of the doctoral program)	7

[1] The Graduate Composition Forum requirement includes participating in group discussions and presentations by guest artists, attending Composition Advising Council (CAC) meetings and helping produce CAC concerts, and attending milestone events associated with the Doctoral Certificate in Composition and the DMA in Composition (i.e. portfolio reviews, special area exam presentations, and final project presentations). There is, however, no residency requirement other than completing 3 of 9 quarters of Music 324 by the end of the second year. A quarter of second-year participation in Music 324 may be deferred if there are pressing research needs or other extenuating circumstances.

Other Requirements and Opportunities

A final project presentation in the fifth year of doctoral study, with or without a written component. Co-supervision (a DCC advisor), by a composition faculty member.

Undertaking the Doctoral Certificate in Composition entitles the student to participate in the Composition Advising Council's selection of visiting ensembles. In addition, it entitles the student to engage in collaborations with, at a minimum, half the number of collaborations with artists invited by the CAC in which a typical DMA student would participate.

Optional Requirements and Expectations

Qualifying Exam: optional but recommended; to be completed no later than the first term of year three. [See Qualifying Exam information under the DMA program tab.]

Third-year Portfolio Review: optional but recommended. [See Portfolio Review information under the DMA program tab.]

COVID-19 Policies

On July 30, the Academic Senate adopted grading policies effective for all undergraduate and graduate programs, excepting the professional Graduate School of Business, School of Law, and the School of Medicine M.D. Program. For a complete list of those and other academic policies relating to the pandemic, see the "COVID-19 and Academic Continuity (p.)" section of this bulletin.

The Senate decided that all undergraduate and graduate courses offered for a letter grade must also offer students the option of taking the course for a "credit" or "no credit" grade and recommended that deans, departments, and programs consider adopting local policies to count courses taken for a "credit" or "satisfactory" grade toward the fulfillment of degree-program requirements and/or alter program requirements as appropriate.

Undergraduate Degree Requirements

Grading

The Department of Music counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of undergraduate degree requirements that otherwise require a letter grade.

Graduate Degree Requirements

Grading

The Department of Music counts all courses taken in academic year 2020-21 with a grade of 'CR' (credit) or 'S' (satisfactory) towards satisfaction of graduate degree requirements that otherwise require a letter grade provided that the instructor affirms that the work was done at a 'B' or better level.

Graduate Advising Expectations

The Department of Music is committed to providing academic advising in support of graduate student scholarly and professional development. When most effective, this advising relationship entails collaborative and sustained engagement by both the adviser and the advisee. As a best practice, advising expectations should be periodically discussed and reviewed to ensure mutual understanding. Both the adviser and the advisee are expected to maintain professionalism and integrity.

Faculty advisers guide students in key areas such as selecting courses, designing and conducting research, developing of teaching pedagogy, navigating policies and degree requirements, and exploring academic opportunities and professional pathways.

The faculty program adviser is the primary source of information for the duration of a student's graduate career. Program adviser assignments are made based on perceived best fit at the time of acceptance to a degree program. Only Academic Council Teaching Faculty ("ACTFac" – any tenure-track faculty, i.e., Assistant, Associate, and full Professors), are eligible to serve as graduate program advisers; however, non-ACTFac instructors may serve as co-advisers in conjunction with an ACTFac instructor. See the faculty listing on the Music website (https://music.stanford.edu/people/faculty/).

Graduate students are active contributors to the advising relationship, proactively seeking academic and professional guidance and taking responsibility for informing themselves of policies and degree requirements for their graduate program. Graduate students are encouraged to meet with their program adviser at least once each quarter, and are actively encouraged to communicate frequently with their advisers. It is valuable to set clear mutual expectations for the advising process, and to revisit those expectations periodically. While developing a proposal for the Ph.D. dissertation or DMA final project, the student should invite a reading committee in consultation with the program adviser and other relevant faculty.

At the start of graduate study, each student is assigned a program adviser. Should you feel it necessary to change advisers, the following procedure should be followed:

1. Discuss this with your current adviser. With their permission,
2. Solicit agreement from your proposed new adviser.
3. Email the Graduate Student Services Officer with a notification of this change; cc both your old and new advisers.

If there are problems with the advising relationship, please contact the Department Chair or the Graduate Student Services Officer.

Advising Expectations for Ph.D. Students

A student should be an active advisee and should not wait for your adviser to email. Students should arrange for meetings to discuss coursework, summer plans, quals preparation, language study, and, later, the dissertation topic, fellowship applications, and other aspects of professional development. Students should prepare for these meetings carefully, recognizing that the adviser's time is limited.

Advising Expectations for Master of Art in Music (M.S.T.) Students

The same expectations guiding the doctoral advisees guide advising relationships for master's students as well.

Stanford Advising Documents and Resources

The Office of the Vice Provost for Graduate Education (VPGE (http://vpge.stanford.edu/)) works collaboratively with Stanford's schools and departments to enhance the quality of graduate education at Stanford University. Among the many resources at their site is a set of graduate

advising resources (https://vpge.stanford.edu/academic-guidance/advising-mentoring/).

The Graduate Academic Policies and Procedures (GAP) section on advising (https://gap.stanford.edu/handbooks/gap-handbook/chapter-3/subchapter-3/page-3-3-1/) is available on the GAP website.

For a statement of University policy on graduate advising, see the "Graduate Advising (p. 80)" section of this bulletin.

Emeriti: (Professors) George Barth, Karol Berger, John M. Chowning, Brian Ferneyhough, William H. Ramsey; *(Professors, Performance)* Arthur P. Barnes, Marie Gibson

Chair: Stephen Hinton

Director of Graduate Studies: Heather Hadlock

Director of Undergraduate Studies: Charles Kronengold

Professors: Mark Applebaum, Jonathan Berger, Chris Chafe, Thomas Grey, Stephen Hinton, Julius O. Smith (on leave AW)

Associate Professors: Takako Fujioka, Heather Hadlock, Jaroslaw Kapuscinski (on leave), William P. Mahrt, Jesse Rodin, Ge Wang

Assistant Professors: Patricia Alessandrini, Denise Gill (on leave), Charles Kronengold

Professor (Teaching): Stephen M. Sano (Director of Choral Studies)

Associate Professor (Teaching): Paul Phillips (Director of Orchestral Studies)

Courtesy Professors: Paul DeMarinis, Elizabeth Erikson-DiRenzo, Doug L. James, C. Kwang Sung

Senior Lecturers: Giancarlo Aquilanti (Director of Theory; Wind Ensemble), Talya Berger (Theory), Laura Dahl (Resident Collaborative Pianist), Stephen Harrison (Cello), François Rose (Theory and Composition), Thomas Schultz (Piano), Greg Wait (Voice; Director of Vocal Studies), Frederick R. Weldy (Piano)

Lecturers: Akwasi Papa Abrefah (Steelpan), Kumaran Arul (Piano), Erika Arulanantham (Theory), Mark Brandenburg (Clarinet), Marie-Louise Catsalis (Voice), Hongchan Choi (CCRMA), Tony Clements (Tuba), Anthony Doheny (Violin), Greer Ellison (Flute, Baroque Flute), Charles A. Ferguson (Guitar), Debra Fong (Violin), Michael Galisatus (Jazz Ensemble), Russell Gavin (LSJUMB), Dawn Harms (Violin, Viola), Alexandra Hawley (Flute), David Henderson (Classical Saxophone), Wendy Hillhouse (Voice), Melody Holmes-Vedder (Flute), Kathryne Jennings (Voice), Nova Jiménez (Voice), McDowell Kenley (Trombone), Hans Kretz (SNE), Joo-Mee Lee (Violin), Mary Linduska (Voice, Summer), Murray Low (Jazz & Jazz Piano), Adam Luftman (Trumpet), Anthony Martin (Baroque Violin), Robin May (Oboe), Charles McCarthy (Jazz Saxophone), Robert Huw Morgan (University Organist, Organ), Bruce Moyer (Contrabass), Stan Muncy (Percussion), Herbert Myers (Early Winds), James Nadel (Jazz), Rufus Olivier (Bassoon), Rafael Ornes (Summer Chorus) Lawrence Ragent (French Horn), Joshua Redman (Jazz), David Rokeach (Drum Set), Robin Sharp (Violin), Annabelle Taubl (Harp), Elaine Thornburgh (Harpsichord), Josh Thurston-Milgrom (Jazz Bass), Erik Ulman (Composition, Theory), Linda Uyechi (Taiko), Rick Vandivier (Jazz Guitar), John Worley (Jazz Trumpet), Hui (Daisy) You (Gu-Zheng), Timothy Zerlang (University Carillonneur, Piano)

Adjunct Professors: Jonathan Abel (CCRMA), David Berners (CCRMA), Marina Bosi (CCRMA), Poppy Crum (CCRMA), Pierre Divenyi (CCRMA), Walter Hewlett (Computer-Assisted Research in the Humanities), Blair Kaneshiro (CCRMA), Gautham Mysore (CCRMA), Craig Sapp (Computer-Assisted Research in the Humanities), Eleanor Selfridge-Field (Computer-Assisted Research in the Humanities), Malcolm Slaney (CCRMA)

Artists-in-Residence (St. Lawrence String Quartet): Geoff Nuttall (Violin), Owen Dalby (Violin), Lesley Robertson (Viola), Christopher Costanza (Cello)

Courses

MUSIC 1. Musical Genius: Exemplars in the History of Organized Sound. 3 Units.
How does music work? A broad exploration of music as defined by three major components (i) Theories of Music (elements and parameters), (ii) Histories of Music (cultures and people), and (iii) Practitioners of Music (musicians and scholars). Lecture, discussion, guided critical listening and viewing of audio, video, and live performance, and creation of self-curated mini-projects.

MUSIC 1A. Music, Mind, and Human Behavior. 3 Units.
An introductory exploration of the question of why music is a pervasive and fundamental aspect of human existence. The class will introduce aspects of music perception and cognition as well as anthropological and cultural considerations.

MUSIC 1SI. Introduction to Indian Classical Music. 1 Unit.
This is an introductory course in the classical music of India, with emphasis on learning to listen to and appreciate Indian classical music concerts. It will cover a broad overview of the two main genres of Indian classical music - Carnatic and Hindustani. We will have several in-class demonstrations of instruments unique to the Indian classical music tradition. Class meetings will include discussions of landmark performances and artists as well as fundamentals of this music style, such as Raaga (melody), Taala (rhythm), song structure, and improvisation.

MUSIC 2A. The Symphony. 3 Units.
Symphonic literature 1750 to the present, with emphasis on developing listening skills and preparation for attending a live performance. Ability to read music not required.

MUSIC 2C. An Introduction to Opera. 3 Units.
The lasting appeal of opera as a lavishly hybrid genre from the 1600s to the present. How and why does opera set its stories to music? What is operatic singing? Who is the audience? How do words, music, voices, movement, and staging collaborate in different operatic eras and cultures? Principal works by Monteverdi, Handel, Mozart, Verdi, Wagner, Strauss, Britten, and Adams. Class studies and attends two works performed by the San Francisco Opera.

MUSIC 4SI. Interactive Introduction to North American Taiko. 1 Unit.
Taught by Stanford Taiko members. Techniques and history. No experience necessary. May be repeated for credit. This course was initiated by Mitchell Fukumoto and Stanford Taiko.

MUSIC 6F. Art is My Occupation: Professional Development in Music. 1 Unit.
Open to majors and non-majors. This course is designed for students who are considering careers in performance or the music industry to explore their personal and artistic identity. Weekly guest speakers provide real world insight on topics related to professional advancement.

MUSIC 7B. Musical Cultures of the World. 2-3 Units.
Ethnomusicologists study music in human life. Music is with us as we articulate and define social identities -- punk rocker, student, Japanese-American, member of a sorority, Catholic, radical, etc. --and as we acquire new identities through rites of passage such as weddings, graduations, and initiation ceremonies. Many of life's most intense moments are accompanied or created by music, but music can also be part of the everyday, with us as we work, move, and socialize. This course is about what music does in human life and what it means to participants. In other words, it is about the myriad ways that music makes us human. We will address musical meanings and practices in selected regions of Africa, Asia, Europe, and the Americas. As you encounter music in an increasingly connected world, this course will provide you with a new awareness of musical diversity and of the social implications of music making. To satisfy a Ways requirement, this course must be taken for at least 3 units. In AY 2020-21, a letter grade or `CR¿ grade satisfies the Ways requirement.

MUSIC 8A. Rock, Sex, and Rebellion. 3 Units.
Development of critical listening skills and musical parameters through genres in the history of rock music. Focus is on competing aesthetic tendencies and subcultural forces that shaped the music. Rock's significance in American culture, and the minority communities that have enriched rock's legacy as an expressively diverse form. Lectures, readings, listening, and video screenings. Attendance at all lectures is required.

MUSIC 11N. Harmonic Convergence: Music's Intersections with Science, Mathematics, History, and Literature. 3 Units.
Topics include music and the brain; tuning and temperament; musical form; connections between music and mathematics; and readings in history and literature with strong musical elements. Readings include "The Power of Music" (Mannes), "Musicophilia" (Sacks), "From Music to Mathematics" (Roberts), "The Kreutzer Sonata" (Tolstoy), "A Clockwork Orange" and "Honey for the Bears" (Burgess). Compositions by Bach, Mozart, Beethoven, Debussy, Schoenberg, Stravinsky, Shostakovich, and others will be studied. Goals: increased understanding of music's relationship to other fields; improved writing skills. While ability to read music is not required, students with musical ability will be encouraged to perform relevant works in class.

MUSIC 11Q. Art in the Metropolis. 3 Units.
This seminar is offered in conjunction with the annual "Arts Immersion" trip to New York that takes place over the spring break and is organized by the Stanford Arts Institute (SAI). Participation in the trip is a requirement for taking part in the seminar (and vice versa). The trip is designed to provide a group of students with the opportunity to immerse themselves in the cultural life of New York City guided by faculty and SAI staff. Students will experience a broad range and variety of art forms (visual arts, theater, opera, dance, etc.) and will meet with prominent arts administrators and practitioners, some of whom are Stanford alumni. For further details and updates about the trip, see https://arts.stanford.edu/for-students/academics/arts-immersion/new-york/.
Same as: ARTSINST 11Q, ENGLISH 11Q, TAPS 11Q

MUSIC 12A. Introductory Piano Class. 1 Unit.
(A=level 1; B=level 2; C=level 3) There is a fee for this class. Please visit http://music.stanford.edu/Academics/LessonSignups.html for class fee and signup information. Class is closed by design. Please register on the waitlist and show up on the first day of class to receive a permission number for enrollment. Preference to department majors. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 12AS. Introductory Piano Class, Level 1. 1 Unit.
Piano: Introductory Level 1 (Group; 10 students to a section) (A=Level 1; B=Level 2; C=Level 3). Class is closed by design. Please register on the wait-list and show up on the first day of class to receive a permission number for enrollment. Complete registration form available for download at: http://tinyurl.com/q43c48g. May be repeated for credit 5 times. Zero unit enrollment option available with instructor permission. See website: (http://tinyurl.com/posmuhn) for policy and procedure. By enrolling in this course you are giving consent for the video and audio recording and distribution of your image and performance for use by any entity at Stanford University.
Same as: Group

MUSIC 12AZ. Introductory Piano Class. 0 Units.
(A=level 1; B=level 2; C=level 3) There is a fee for this class. Please visit http://music.stanford.edu/Academics/LessonSignups.html for class fee and signup information. Class is closed by design. Please register on the waitlist and show up on the first day of class to receive a permission number for enrollment. Preference to department majors. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.May be repeat for credit for 0 unit and total completion allowed 99.

MUSIC 12B. Introductory Piano Class. 1 Unit.
This class is closed by design. To enroll, please sign up on the Axess waitlist and show up on the first day to receive a permission number for re-enrollment. Your place on the waitlist will be considered a reservation. If the waitlist is closed, there are no more spaces in the class. (A=level 1; B=level 2; C=level 3) There is a fee for this class. Please visit http://music.stanford.edu/Academics/LessonSignups.html for class fee and signup information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 12BS. Introductory Piano Class, Level 2. 1 Unit.
Piano: Introductory Level 2 (Group; 10 students to a section) (A=Level 1; B=Level 2; C=Level 3). Class is closed by design. Please register on the wait-list and show up on the first day of class to receive a permission number for enrollment. Complete registration form available for download at: http://tinyurl.com/q43c48g. May be repeated for credit 5 times. Zero unit enrollment option available with instructor permission. See website: (http://tinyurl.com/posmuhn) for policy and procedure. By enrolling in this course you are giving consent for the video and audio recording and distribution of your image and performance for use by any entity at Stanford University.
Same as: Group

MUSIC 12BZ. Introductory Piano Class. 0 Units.
This class is closed by design. To enroll, please sign up on the Axess waitlist and show up on the first day to receive a permission number for re-enrollment. Your place on the waitlist will be considered a reservation. If the waitlist is closed, there are no more spaces in the class. (A=level 1; B=level 2; C=level 3) There is a fee for this class. Please visit http://music.stanford.edu/Academics/LessonSignups.html for class fee and signup information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 12C. Introductory Piano Class. 1 Unit.
This class is closed by design. To enroll, please sign up on the Axess waitlist and show up on the first day to receive a permission number for re-enrollment. Your place on the waitlist will be considered a reservation. If the waitlist is closed, there are no more spaces in the class. (A=level 1; B=level 2; C=level 3.) May be repeated for credit a total of 14 times. There is a fee for this class. Please visit http://music.stanford.edu/Academics/LessonSignups.html for class fee and signup information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 12CS. Introductory Piano Class, Level 3. 1 Unit.
Piano: Introductory Level 3 (Group; 10 students to a section) (A=Level 1; B=Level 2; C=Level 3). Class is closed by design. Please register on the wait-list and show up on the first day of class to receive a permission number for enrollment. Complete registration form available for download at: http://tinyurl.com/q43c48g. May be repeated for credit 5 times. Zero unit enrollment option available with instructor permission. See website: (http://tinyurl.com/posmuhn) for policy and procedure. By enrolling in this course you are giving consent for the video and audio recording and distribution of your image and performance for use by any entity at Stanford University.
Same as: Group

MUSIC 12CZ. Introductory Piano Class. 0 Units.
This class is closed by design. To enroll, please sign up on the Axess waitlist and show up on the first day to receive a permission number for re-enrollment. Your place on the waitlist will be considered a reservation. If the waitlist is closed, there are no more spaces in the class. (A=level 1; B=level 2; C=level 3.). There is a fee for this class. Please visit http://music.stanford.edu/Academics/LessonSignups.html for class fee and signup information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 12SZ. Introductory Piano. 0 Units.
Introductory Piano (zero-unit option). Complete registration form available for download at: http://tinyurl.com/q43c48g. Zero unit enrollment option available with instructor permission. See website: (http://tinyurl.com/posmuhn) for policy and procedure. By enrolling in this course you are giving consent for the video and audio recording and distribution of your image and performance for use by any entity at Stanford University.

MUSIC 13N. Music and Politics: From Mozart to Miranda. 3 Units.
This course examines the relationship between music and politics. It will view music within an historical context, exploring how music can reflect and sometimes influence major political issues of the day. Topics will include "The Marriage of Figaro" and the French Revolution; Verdi's operas and politics in 19th-century Italy; Wagner controversies; Stravinsky and fascism; ¿Degenerate Music¿ in Nazi Germany; Shostakovich in the USSR; Radical Chic ¿ Leonard Bernstein's fundraiser for the Black Panthers; "The Death of Klinghoffer" and the Israeli-Palestinian conflict; and Hamilton and its 21st-century view of the American Revolution. The ability to read music, while beneficial, is not required.

MUSIC 14N. Women Making Music. 3 Units.
Preference to freshmen. Women's musical activities across times and cultures; how ideas about gender influence the creation, performance, and perception of music.
Same as: FEMGEN 13N

MUSIC 15N. The Aesthetics of Data. 3 Units.
Focus on visual and auditory display of data, specifically, the importance of aesthetic principles in effective data display, and the creative potential of scientific, biological, environmental and other data as inspiration for artistic expression.

MUSIC 16Q. Listening to Climate Change. 3 Units.
Today, it seems that evidence of climate change is everywhere. But, climate change is not new, nor is public consciousness of it. As early as 1840, climate change had become a subject of cultural fascination–especially for musicians and composers.nThis course will focus on five musical works from a range of time periods and traditions that reflect contemporary consciousness of and reactions to climate change. What ideas about power, race, and identity are reflected in music about the changing environment? How has the history of musical encounters with climate shaped that mode of engagement today?.

MUSIC 18A. Jazz History: Ragtime to Bebop, 1900-1940. 3 Units.
From the beginning of jazz to the war years.
Same as: AFRICAAM 18A

MUSIC 18B. Jazz History: Bebop to Present, 1940-Present. 3 Units.
Modern jazz styles from Bebop to the current scene. Emphasis is on the significant artists of each style.
Same as: AFRICAAM 18B

MUSIC 19A. Introduction to Music Theory. 3 Units.
For non-music majors and Music majors or minors unable to pass the proficiency test for entry to MUSIC 21. The fundamentals of music theory and notation, basic sight reading, sight singing, ear training, keyboard harmony; melodic, rhythmic, and harmonic dictation. Skill oriented, using piano and voice as basic tools to develop listening and reading skills.

MUSIC 19B. Intermediate Music Theory. 3 Units.
This course is an introduction to music theory geared toward students who have basic literacy skills (i.e. fundamental notation, identifying major and minor scales, keys, etc). Using musical materials from repertoire selected from campus and area concerts, and incorporating the opportunity to attend these concerts, the course will introduce elements of harmony, melody, form, orchestration and arrangement. The course is an appropriate successor to Music 19A. Students who successfully complete Music 19B can go on directly to Music 21.

MUSIC 20A. Jazz Theory. 3 Units.
Introduces the language and sounds of jazz through listening, analysis, and compositional exercises. Students apply the fundamentals of music theory to the study of jazz. Prerequisite: 19 or consent of instructor.
Same as: AFRICAAM 20A

MUSIC 20B. Advanced Jazz Theory. 3 Units.
Approaches to improvisation and composed jazz lines through listening, transcribing, analysis, and compositional exercises. Topics include: chord/scale theory, melodic minor harmony, altered chords, and substitute harmony. Prerequisite: 20A or consent of instructor.

MUSIC 20C. Jazz Arranging and Composition. 3 Units.
Jazz arranging and composition for small ensembles. Foundation for writing for big band. Prerequisite: 20A or consent of instructor.

MUSIC 21. Elements of Music I. 3 Units.
Preference to majors. Introduction to tonal theory. Practice and analysis. Diatonic harmony focusing on melodic and harmonic organization, functional relationships, voice-leading, and tonal structures. Students must concurrently enroll in an Ear-training and musicianship lab (MUSIC 24a, 24b, or 24c as appropriate). Music majors must take 4 courses in ear training, and pass an ear training exit exam in their Junior year. Enrollment limited to 40. Prerequisites: (1) Piano Proficiency Exam (must be passed within the first two weeks of the term) or MUSIC 12A (may be taken concurrently); (2) Passing grade on a basic musical skills proficiency examination on the first day of class or MUSIC 19.

MUSIC 22. Elements of Music II. 3 Units.
Preference to majors. Introduction to chromatic harmony focusing on secondary functions, modulations, harmonic sequences, mode mixture, and the Neapolitan, and augmented sixth chords. Analysis of musical forms and harmonizations complemented by harmonic and melodic dictation, sight singing, and other practical skills. Students must concurrently enroll in an Ear-training and musicianship lab (MUSIC 24a, 24b, or 24c as appropriate). Music majors must take 4 courses in ear training, and pass an ear training exit exam in their Junior year. Prerequisites: (1) MUSIC 21; (2) Piano Proficiency Exam or MUSIC 12B (may be taken concurrently).

MUSIC 23. Elements of Music III. 3 Units.
Preference to majors. Continuation of chromatic harmony and complex forms of late Romantic period. Students must concurrently enroll in an Ear-training and musicianship lab (MUSIC 24a, 24b, or 24c as appropriate). Music majors must take 4 courses in ear training, and pass an ear training exit exam in their Junior year. Prerequisites: (1) MUSIC 22; (2) Piano Proficiency Exam or MUSIC 12C (may be taken concurrently).

MUSIC 24A. Ear Training I. 1-2 Unit.
Class is closed by design. Please contact instructor Erika Arul (mailto:earul@stanford.edu) for permission to enroll. Preference to Music majors and minors.

MUSIC 24B. Ear Training II. 1-2 Unit.
Class is closed by design. Please contact instructor Erika Arul (mailto:earul@stanford.edu) for permission to enroll. Preference to Music majors and minors.

MUSIC 24C. Ear Training III. 1-2 Unit.
Class is closed by design. Please contact instructor Erika Arul (mailto:earul@stanford.edu) for permission to enroll. Preference to Music majors and minors.

MUSIC 24Z. Ear Training. 0 Units.
Class is closed by design. Please contact instructor Erika Arul (mailto:earul@stanford.edu) for permission to enroll. Preference to Music majors and minors.

MUSIC 25. Decoding Anime. 3 Units.
Anime as an artistic form often boasts highly imaginative graphics, striking music, vibrant characters, and fantastical stories. The course aims at decoding the expressive power of anime by applying a method of multimedia analysis that focuses on the interaction between its component elements: story, image, sound and music. Through close reading of works by five leading and innovative directors the students will develop tools to analyze anime and interpret it in a larger cultural context.

MUSIC 27N. The British Invasion. 3 Units.
Examination of three generations of British popular music in the `60s and `70s: the Beatles (and the Rolling Stones, the Kinks, the Who); progressive rock (art rock) as embodied in Pink Floyd, Yes, King Crimson, Genesis, and Emerson, Lake, and Palmer; the emergence of punk in its revolutionary (the Clash) and nihilistic (the Sex Pistols) forms. Among other issues, the manner in which marginal American culture (particularly African-American blues) is neglected by Americans and venerated by foreigners and the subsequent mainstream consumption of a transformed and repackaged American minority culture is discussed.

MUSIC 31N. Behind the Big Drums: Exploring Taiko. 3 Units.
Preference to Freshman. Since 1992 generations of Stanford students have heard, seen, and felt the power of taiko, big Japanese drums, at Admit Weekend, NSO, or Baccalaureate. During a time of COVID, this online version of the seminar takes students behind the taiko. Taiko is a relative newcomer to the American music scene. The contemporary ensemble drumming form, or kumidaiko, developed in Japan in the 1950s. The first North American taiko groups emerged from the Japanese American community shortly after and coincided with increased Asian American activism. In the intervening years, taiko has spread into communities in the UK, Europe, Australia, and South America. What drives the power of these drums? In this course, we explore the musical, cultural, historical, and political perspectives of taiko through readings and discussion, conversations with taiko artists, and online taiko lessons. With the taiko as our focal point, we find intersections of Japanese music, Japanese American history, and Asian American activism, and explore relations between performance, cultural expression, community, and identity.

MUSIC 32N. Sculpting with Sounds, Images, and Words. 3 Units.
Throughout history and from East to West, cultures abound in multimedia forms. Whether in Coldplay's Music Video or Fantasia, Pepsi TV adds or Wagner's opera, Miyazaki anime or traditional Noh Theater of Japan, the three modes of expression (sounds, images, and word) are interwoven in distinctive ways. What are their individual and combined powers? How can one harness them in an online context? Can Web be a stage for multimedia theater? What is unique about the poetry of intermodal metaphor? The course will be an opportunity to face these questions in creative web-based projects as well as through in-class viewing of multimedia works, analysis and debates, readings, and student presentations. The seminar will be taught at the Center for Computer Research in Music and Acoustics where students will have access to new media technologies. Prior experience in music, literature, art practice or computer programming is welcome but not required.

MUSIC 33N. Beethoven. 3 Units.
This seminar is designed as an in-depth introduction to the music of Ludwig van Beethoven. In addition to exploring the composer's principal works in a variety of genres (symphonies, piano sonatas, string quartets, opera, etc.), we will consider broader questions of biography and reception history. How have images of the composer and the fortunes of his music changed over time? How did his compositions come to define the paradigm of Western classical music? What impact has he had on popular culture? The class is open to all levels of musical expertise; the ability to read music is not a requirement. Come prepared to discover -- or rediscover -- some great music!.

MUSIC 34N. Performing America: The Broadway Musical. 3 Units.
Musical theater as a site for the construction of American identity in the twentieth century to the present. Issues of class, race, gender, and sexuality; intersections with jazz, rock, and pop; roles of lyricist, composer, director, choreographer, producer, performers. Individual shows (Showboat, Oklahoma, South Pacific, Guys and Dolls, West Side Story, Wicked, Book of Mormon, Hamilton, Dear Evan Hansen), show tunes in jazz performance, film musicals, and television. Opportunities for performance and attendance at local productions.

MUSIC 36H. Dangerous Ideas. 1 Unit.
Ideas matter. Concepts such as revolution, tradition, and hell have inspired social movements, shaped political systems, and dramatically influenced the lives of individuals. Others, like immigration, universal basic income, and youth play an important role in contemporary debates in the United States. All of these ideas are contested, and they have a real power to change lives, for better and for worse. In this one-unit class we will examine these "dangerous" ideas. Each week, a faculty member from a different department in the humanities and arts will explore a concept that has shaped human experience across time and space. Some weeks will have short reading assignments, but you are not required to purchase any materials.

MUSIC 37N. Ki ho'alu: The New Renaissance of a Hawaiian Musical Tradition. 2 Units.
Preference to freshman. A style of guitar playing originally developed in the Hawaiian Islands during the early 1800s, ki ho alu, or Hawaiian slack key guitar, is an art form that has experienced exposure and popularity in Hawai'i and worldwide. Its rise in popularity coincides with the increased awareness, dissemination, and growth of political activism directly relating to Hawaiian culture. In this on-line, synchronously-taught seminar we will explore the musical, cultural, historical, and political perspectives of Hawaiian music in general, and ki ho alu in particular, through critical listening, readings, discussion, and a conversation with guest slack key artist and 6-time Grammy winner Daniel Ho. With ki ho alu as the focus, we will learn about Hawaiian music and history, and explore the relationship between performance, cultural expression, community, and identity.

MUSIC 39B. Music and Healing. 3 Units.
To what extent can sound or music heal? This interdisciplinary course asks questions about music and healing around the world, drawing on the fields of medical ethnomusicology, medical anthropology, sound studies, and music therapy. Our case studies will be multi-sited, as we interrogate sound-based healings and healing sounds from diverse cross-cultural, global, and historic perspectives. No musical background is needed to interrogate these issues. We begin with the knowledge that the social, cultural, and political contexts where definitions of music and healing are created inform sound and its various and often conflicting interpretations and meanings.

MUSIC 40. Music History to 1600. 4 Units.
Pre- or corequisite: 21.

MUSIC 41. Music History 1600-1830. 4 Units.
Pre- or corequisite: 22.

MUSIC 42. Music History Since 1830. 4 Units.
Pre- or corequisite: 23.

MUSIC 60. How We Sing: The Voice, How It Functions, and the Singer's Mind. 1 Unit.
A weekly lecture course for singers, pianists, directors, conductors, and anyone who is interested in the art and craft of the voice. The voice is an instrument whose sounds are determined by its structure and the choices the singer makes. Students will learn how the voice works: the physiology of the instrument, breathing, resonance, and adjustments the singer makes to the instrument to produce sounds appropriate for various styles of vocal music. This course is intended for singers, pianists, conductors, musical directors and directors of groups that include singers, regardless of style or size of ensemble, with the goal of promoting excellent and healthy vocal performance. Ability to sing and/or read music is not required; this is not a voice class.
Same as: TAPS 60

MUSIC 65A. Voice Class I. 1 Unit.
Group (7 students to a section) beginning voice (A = level 1; B = level 2). May be repeated for credit. There is a fee for this class. Please visit http://music.stanford.edu/Academics/LessonSignups.html for class fees and signup information. This class is closed by design. Please register on the waitlist and show up on the first day of class to receive a permission number for enrollment. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 65AS. Voice Class 1: Beginning Voice, Level 1. 1 Unit.
Group (6 students to a section) beginning voice. By enrolling in this course you are giving consent for the video and audio recording and distribution of your image and performance for use by any entity at Stanford University.
Same as: Group

MUSIC 65AZ. Voice Class I. 0 Units.
Group (7 students to a section) beginning voice (A = level 1; B = level 2). There is a fee for this class. This class is closed by design. Please register on the Axess waitlist and show up on the first day of class to receive a permission number for enrollment.

MUSIC 74AA. Introductory Violin Class Level 1: Beginner. 1 Unit.
Open to majors and non-majors. Focus is on beginning violin skills. Topics include brief history and physics of the instrument, and survey of repertoire. There is a fee for this class. Please visit http://music.stanford.edu for class fees and signup information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 74AB. Introductory Violin Class Level 2: Intermediate. 1 Unit.
Open to majors and non-majors. Focus is on beginning violin skills. Topics include brief history and physics of the instrument, and survey of repertoire. There is a fee for this class. Please visit http://music.stanford.edu for class fees and signup information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 74AC. Introductory Violin Class Level 3: Advanced Intermediate. 1 Unit.
Open to majors and non-majors. Focus is on beginning violin skills. Topics include brief history and physics of the instrument, and survey of repertoire. There is a fee for this class. Please visit http://music.stanford.edu for class fees and signup information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 74AZ. Introductory Violin Class. 0 Units.
(74A.1=Level 1 beginners; 74A.2=Level 2 continuing) Open to majors and non-majors. Focus is on beginning violin skills. Topics include brief history and physics of the instrument, and survey of repertoire. There is a fee for this class. Please visit http://music.stanford.edu for class fees and signup information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 74C. Classical Guitar Class. 1 Unit.
May be repeated for credit a total of 14 times. There is a fee for this class. Please visit https://music.stanford.edu/ensembles-lessons/applied-music-policies/applied-music-fees-and-policies for class fee information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 74CZ. Classical Guitar Class. 0 Units.
There is a fee for this class. Please visit http://music.stanford.edu/Academics/LessonSignups.html for class fees and signup information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 74D. Harp Class. 1 Unit.
May be repeated for credit a total of 14 times. There is a fee for this class. Please visit http://music.stanford.edu/Academics/LessonSignups.html for class fees and signup information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 74DZ. Harp Class. 0 Units.
There is a fee for this class. Please visit http://music.stanford.edu/Academics/LessonSignups.html for class fees and signup information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 75B. Renaissance Wind Instruments Class. 1 Unit.
May be repeated for credit. There is a fee for this class. Please visit http://music.stanford.edu for class fees and signup information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 75BZ. Renaissance Wind Instruments Class. 0 Units.
May be repeated for credit. There is a fee for this class. Please visit http://music.stanford.edu for class fees and signup information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 76. Brass Instruments Class. 1 Unit.
May be repeated for credit a total of 14 times. There is a fee for this class. Please visit http://music.stanford.edu for class fees and signup information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 76A. Tuba Class. 1 Unit.
Basic brass techniques as they apply to the tuba including warmups, breathing, and developing a daily routine. For beginning through intermediate players. There is a fee for this class. Please visit http://music.stanford.edu/Academics/LessonSignups.html for class fees and audition information. All participants must enroll. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure. May be repeated for credit.

MUSIC 76AZ. Tuba Class. 0 Units.
Basic brass techniques as they apply to the tuba including warmups, breathing, and developing a daily routine. For beginning through intermediate players. This course includes a fee of $175 for Music majors and minors, and $200 for non Music majors. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.May be repeated for credit for 0 unit.

MUSIC 76Z. Brass Instruments Class. 0 Units.
May be repeated for credit a total of 14 times. There is a fee for this class. Please visit http://music.stanford.edu for class fees and signup information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 77. Percussion Class. 1 Unit.
May be repeated for credit a total of 14 times. There is a fee for this class. Please visit http://music.stanford.edu for class fees and signup information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 77Z. Percussion Class. 0 Units.
There is a fee for this class. Please visit http://music.stanford.edu for class fees and signup information. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure.

MUSIC 80. Russian Modernists: Stravinsky & Shostakovich. 3 Units.
An examination and comparison of the lives and music of Igor Stravinsky and Dmitri Shostakovich, two of the most important Modernist composers of the 20th century. Although both composers were Russians closely affiliated with St. Petersburg, their lives diverged dramatically, with Stravinsky pursuing an international career in the West while Shostakovich spent his entire life in the USSR after the Russian Revolution. Major compositions, including symphonies, operas, chamber music, and keyboard works, will be covered, as well as key writings by and about both composers. The ability to read music, while beneficial, is not required. This course must be taken for a letter grade to be eligible for Ways credit.

MUSIC 101. Introduction to Creating Electronic Sounds. 3-4 Units.
Introduction to Creating Electronic Sounds enables students from a wide variety of backgrounds to cultivate conceptual and technical skills within the production of electronic sound and music composition. Lectures, readings, and group discussions will examine the evolution of recording technology and industrialization as it relates to music within historical, social, and contemporary contexts. Over the course of ten weeks students will develop and produce a portfolio of creative projects, wherein the integration of one's life experiences, imagination, and musical preferences are encouraged. In addition to regular coursework, students who choose to enroll in the class for 4 units will create and publish a 12-20 minute EP according to their own musical taste and technical abilities. This course is a prerequisite for MUSIC 192A: Foundations of Sound Recording Technology. Enrollment by permission number only. No previous experience required.

MUSIC 102. The Art of Music Video: Practice and Analysis. 2-4 Units.
Making and understanding music videos and other short audiovisual genres. This course is a critical and creative exploration of music and performing bodies in moving media. Listening/viewing includes music videos from the 1980s to today, along with musicals, dance, and opera on film, experimental film and video, and segments from feature film. We'll attend to both music and image, focusing on gesture, rhythm, and affect, and considering visual parameters like décor, lighting, texture, camera movement, and editing. Requirements include choosing and documenting a live performance; producing a short audiovisual work involving post-production; several short writing assignments; and weekly reading and viewing/listening assignments. No prerequisites; no previous videomaking experience required. This course must be taken for a minimum of 3 units for Ways-AII and a letter grade to be eligible for Ways-AII credit.
Same as: MUSIC 202

MUSIC 103. Live Listening Lab. 1 Unit.
The course is a one unit, discussion-based experience for non-musicians and musicians to explore live concerts, learn how to describe their listening experiences and reflect on their aesthetic preferences. In this course, we will attend live music concerts, some as a group and some individually, and reflect critically on those multi-modal sensory and cognitive experiences. Along the way, we will build our own listening toolkits and practice communicating our personal experiences. Students attend 5 course meetings and 5 concerts.
Same as: TAPS 130M

MUSIC 112. Film Scoring. 3 Units.
Through analysis and technical exercises that involve click tracks, spotting, scoring under dialogue and picture, and the creative use of overlap cues, among others, students will learn how to develop and synchronize an engaging music score that supports visual events. Prerequisite: The students will be expected to: Know how to read and write music; Know how to create scores using a music editor such as Finale, Sibelius, among others; Be familiar with MIDI sequencing; and, Be familiar with DAW such as Logic Pro X, Pro Tools, among others.

MUSIC 113. Introduction to Instrumental Composition. 2-3 Units.
Students compose weekly exercises to improve creative fluency and develop basic control of instruments. Audio examples of diverse compositional techniques are introduced, analyzed and emulated. Prerequisite: Music 19A or Instructor's permission.

MUSIC 115. Individual Undergraduate Projects in Jazz. 1-3 Unit.
Students may pursue individual projects in jazz performance, theory, history, etc. Prerequisite: Music 20A or permission of instructor.

MUSIC 118. Musics and Appropriation Throughout the World. 3 Units.
This course critically examines musical practices and appropriation through the amplification of intersectionality. We consider musics globally through recourse to ethnomusicological literature and critical race theories. Our approach begins from an understanding that the social and political contexts where musics are created, disseminated, and consumed inform disparate interpretations and meanings of music, as well as its sounds. Our goal is to shape our ears to hear the effects of slavery, colonialism, capitalism, nationalism, class, gender difference, militarism, and activism. We interrogate the process of appropriating musics throughout the world by making the power structures that shape privileges and exclusions audible.
Same as: AFRICAAM 218, CSRE 118D

MUSIC 120D. Jazz Improvisation. 1-3 Unit.
This class will focus on developing a deeper understanding of, and capacity for, jazz improvisation -- as it relates to individual expression as well as group interaction, communication, and cohesion. In-class soloing and ensemble playing; guided listening; ear training; internalization; personalization; and an awareness of the historical evolution of the jazz improvisational language will all be emphasized. The coursework will be primarily based on actual instrumental performance and practice; with an extensive listening list; and possibly some complementary composition, transcribing, self-evaluation; reading and writing assignments. Limited enrollment: Audition required. Students auditioning for Music 120D may submit the same audition material for consideration for Music 120E and vice-versa, but they are asked to make clear that they are applying for both (or, alternatively, for just one of the two, and if so, which one.) This class will be closed to enrollment, so students wishing to enroll must join the Axess waiting list. You will then be contacted with audition instructions. By enrolling in this course you are giving consent for the video and audio recording and distribution of your image and performance for use by any entity at Stanford University.

MUSIC 120DZ. Jazz Improvisation. 0 Units.
This class will focus on developing a deeper understanding of, and capacity for, jazz improvisation -- as it relates to individual expression as well as group interaction, communication, and cohesion. In-class soloing and ensemble playing; guided listening; ear training; internalization; personalization; and an awareness of the historical evolution of the jazz improvisational language will all be emphasized. The coursework will be primarily based on actual instrumental performance and practice; with an extensive listening list; and possibly some complementary composition, transcribing, self-evaluation; reading and writing assignments. Limited enrollment: Audition required. Students auditioning for Music 120D may submit the same audition material for consideration for Music 120E and vice-versa, but they are asked to make clear that they are applying for both (or, alternatively, for just one of the two, and if so, which one.) This class will be closed to enrollment, so students wishing to enroll must join the Axess waiting list. You will then be contacted with audition instructions. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure. By enrolling in this course you are giving consent for the video and audio recording and distribution of your image and performance for use by any entity at Stanford University.

MUSIC 120E. Advanced Jazz Improvisation. 1-3 Unit.
This class will focus on broadening the participants' fluency with established improvisational languages, encouraging them to trust and develop their own unique improvisational voices, and deepening their capacities for integrating those individual voices into a collaborative musical framework -- working and playing together as a group, forging a collective identity, finding a band sound. In-class soloing and ensemble playing; guided listening; ear training; internalization; personalization; transcription, composition and arranging will all be emphasized. The coursework will be primarily based on actual instrumental performance and practice; with an extensive list of tracks to listen to and tunes to learn. The class will spend ample time focusing on the repertoire from the jazz "canon" (works by jazz masters such Ellington, Monk, Parker, Shorter, Mingus, Coltrane, Coleman, etc, as well as "standards" from the American popular songbook). Participants will be encouraged to submit for consideration by the group their own ideas for material, including, but not limited to, their own original compositions or arrangements. Limited enrollment: Audition required. Students auditioning for Music 120E may submit the same audition material for consideration for Music 120D and vice-versa, but they are asked to make clear that they are applying for both (or, alternatively, for just one of the two, and if so, which one.) All who are interested are strongly encouraged to apply, with the understanding that some priority may be given to those who have already completed Music 120D. This class will be closed to enrollment, so students who would like to enroll must join the Axess wait list. You will then be contacted with audition instructions.

MUSIC 122A. Counterpoint. 4 Units.
Analysis and composition of contrapuntal styles from the Renaissance and Baroque periods. Use of keyboard, ear training, and sight singing underlies all written work. Prerequisites: MUSIC 23 and MUSIC 24C; passing piano-proficiency examination; or, consent of instructor.

MUSIC 122B. Analysis of Tonal Music. 4 Units.
Complete movements, or entire shorter works of the 18th and 19th centuries, are analyzed in a variety of theoretical approaches. Prerequisites: MUSIC 23 and MUSIC 24C; passing piano-proficiency examination; or, consent of instructor.

MUSIC 122C. Introduction to 20th-Century Composition. 4 Units.
Contemporary works, with emphasis on music since 1945. Projects in free composition based on 20th-century models. Prerequisites: MUSIC 23 and MUSIC 24C; passing piano-proficiency examination; or, consent of instructor.

MUSIC 122D. Analysis for Performance. 2 Units.
Prerequisites: 23 or consent of instructor, successful completion of the ear-training and piano-proficiency examinations.

MUSIC 123A. Undergraduate Seminar in Composition: Rhythmic Design. 1-2 Unit.
Students compose weekly exercises to develop creative fluency and personal style. The course focuses on listening to examples, analysis and emulation of diverse compositional techniques involving rhythm.

MUSIC 123B. Undergraduate Seminar in Composition: Pitch Design. 1-2 Unit.
Students compose weekly exercises to develop creative fluency and personal style. The course focuses on listening to examples, analysis and emulation of diverse compositional techniques involving pitch.

MUSIC 123C. Undergraduate Seminar in Composition: World Music. 1-2 Unit.
The course introduces composition techniques used in traditional music from Bali, Central African Republic, India, and Japan, that the students use as inspiration to explore and develop their own composition techniques. Prerequisite: Music 19A or Instructor's permission.

MUSIC 124A. Songwriters Workshop. 1-2 Unit.
Laboratory for composers of any kind of vernacular music: singer-songwriters; folk singers; laptop dance music composers; rock and pop bands; rappers; writers of instrumentals or music with lyrics; solo artists and collaborators; etc. Compositional strategies for songwriting, overview of exemplars, discussion of aesthetic issues, and development of artistic personae. Weekly critique session for students and faculty to share work and offer feedback. Music theory and literacy not required. Aimed, however, at those with at least some experience as writers, whether casual or extensive. For bands at least half of members must be enrolled.

MUSIC 124B. Songwriters Workshop. 3 Units.
Laboratory for composers of any kind of vernacular music: singer-songwriters; folk singers; laptop dance music composers; rock and pop bands; rappers; writers of instrumentals or music with lyrics; solo artists and collaborators; etc. Compositional strategies for songwriting, overview of exemplars, discussion of aesthetic issues, and development of artistic personae. Weekly critique session for students and faculty to share work and offer feedback. Music theory and literacy not required. Aimed, however, at those with at least some experience as writers, whether casual or extensive. For bands at least half of members must be enrolled. Enrollment in 3-unit course is by permission of, and invites lessons with instructor.

MUSIC 125. Individual Undergraduate Projects in Composition. 1-3 Unit.
May be repeated for credit a total of 14 times. Prerequisites: Music123A and Music123B or Instructor's permission.

MUSIC 126A. Thoroughbass Accompaniment. 1-3 Unit.
The development of continuo techniques and skills for figured-bass realization. Performance and analysis of selected repertoire, using thoroughbass principles and exercises based on historical theoretical treatises. Prerequisite: 21.

MUSIC 127A. Instrumentation and Orchestration. 3 Units.
Individual instruments, instrumental groups within the orchestra, and combinations of groups. Arrangements from piano to orchestral music. Score analysis with respect to orchestration. Practical exercises using chamber ensembles and school orchestra. Prerequisite: 23.

MUSIC 127B. Advanced Orchestration. 3 Units.
Through analysis and writing exercises, students develop proficiency in advanced orchestration practices. The course covers techniques currently used in film scoring as well as form basis for new experimental orchestral composition.

MUSIC 127C. Band Arranging. 3 Units.
Develop skills and techniques related to arranging for marching and concert bands; emphasizes instrumentation, transposition, and voicing.

MUSIC 128. Stanford Laptop Orchestra: Composition, Coding, and Performance. 1-5 Unit.
Classroom instantiation of the Stanford Laptop Orchestra (SLOrk) which includes public performances. An ensemble of more than 20 humans, laptops, controllers, and special speaker arrays designed to provide each computer-mediated instrument with its sonic identity and presence. Topics and activities include issues of composing for laptop orchestras, instrument design, sound synthesis, programming, and live performance. May be repeated four times for credit. Space is limited; see https://ccrma.stanford.edu/courses/128 for information about the application and enrollment process. May be repeat for credit.
Same as: CS 170

MUSIC 129. Advanced Ear-Training/Musicianship. 1-2 Unit.
A course in advanced aural analysis and musicianship skills for students who have completed the Music 24 series. Topics of study include analysis by ear of large scale forms, chromatic or extended-tertian harmony, modulations to distantly related keys, chromatic or atonal melodies, modal harmony and melody, as well as alternative forms of aural analysis.

MUSIC 129K. Advanced Keyboard Musicianship. 1-2 Unit.
Score-reading at the keyboard, for pianists. Students will learn to read and reduce as necessary, score examples from a variety of ensembles, including music for strings, choir, winds, and orchestra. Practice reading associated clefs and transpositions will enable students to demonstrate short passages from ensemble repertoire effectively at the keyboard.

MUSIC 130A. Introduction to Conducting. 3 Units.
Baton techniques and rehearsal procedures. The development of coordination of the members of the body involved in conducting; fluency in beat patterns and meters; dynamics, tempi, cueing, and use of the left hand in conducting. Prerequisites: 122B and diagnostic musicianship exam given first day of class.

MUSIC 130B. Elementary Instrumental Conducting. 2 Units.
The theory, technique, and practice of instrumental conducting, with training in the art of physical gesture. Studies in clef reading, transposition, and structural analysis to develop the skills needed to read orchestral scores. Topics include baton technique; rehearsal procedure; working with soloists, singers, and composers; and conducting symphonic works as well as concertos, oratorio, opera, and Broadway musicals. Selected repertoire from the Baroque through contemporary periods will be studied and conducted in class. Prerequisite: MUSIC 130A or instructor's permission.

MUSIC 130C. Elementary Choral Conducting. 2 Units.
Techniques specific to the conducting of choral ensembles: warm-ups, breathing, balance, blend, choral tone, isolation principles, recitative conducting, preparation, and conducting of choral/orchestral works. Prerequisite: 130A.

MUSIC 132. Music Education: Then, Now, and Then Again. 3 Units.
Explores the presence and impact of music across a variety of educational settings, with a focus on the historical function of music education, the current role of music education, and potential future models of music education.
Same as: EDUC 132

MUSIC 133. Food, Text, Music: A Multidisciplinary Lab on the Art of Feasting. 3-5 Units.
Students cook a collection of unfamiliar recipes each week while learning about the cultural milieus in which they originated. The course focuses on the fourteenth and fifteenth centuries, a time of great banquets that brought together chefs, visual artists, poets, musicians, and dancers. Students read late-medieval cookbooks under the guidance of professional chefs, learn songs and poetry with the help of visiting performers, and delve into a burgeoning scholarly literature on food history and sensory experience. We will also study trade routes and food networks, the environmental impact of large-scale banquets, the science of food, and the politics of plenty. This course may count towards the Medieval component of the French major, and corresponds to DLCL 121, a course requirement for the Medieval Studies Minor. Students interested in applying for course must email the professor (jrodin@stanford.edu) by 20 September with a statement of up to 350 words that includes: (a) reasons for wanting to take the class; (b) relevant background in cooking/medieval studies/etc.; (c) stated commitment to attend all ten course meetings; and (d) any dietary restrictions/preferences.
Same as: FRENCH 166, FRENCH 266, FRENCH 366, MUSIC 333

MUSIC 136. Intermediate Conducting: Music Since 1900. 2 Units.
The art of reading and conducting scores from the Impressionist, late Romantic, and Modern periods to the present, with emphasis on orchestral and choral works that involve changing meters, advanced harmonic vocabulary, and modern instrumental and vocal practices. Topics include clef reading and transposition, baton technique, and rehearsal procedure. Prerequisite: MUSIC 130A, 130B, or 130C; or instructor's permission.

MUSIC 142K. Studies in Music of the Baroque: Handel the Cosmopolitan. 4-5 Units.
Music history seminar on the operatic, sacred, and instrumental works of G.F. Handel as examples of the diversity, cosmopolitanism, expression, formal and technical features, and social uses of music in the first half of eighteenth century. Traces Handel¿s career from his native Germany to an elite Roman circle of musical connoisseurs, and to the Italian opera company he founded in London and his transformation of Italian opera into a new genre of English oratorio. By analyzing Handel¿s works in context, we examine the aesthetic, harmonic, and dramatic principles of the major European Baroque art-music genres. Prerequisites: MUSIC 22, MUSIC 41. (WIM at 4-unit level only.).
Same as: MUSIC 242K

MUSIC 143J. Studies in Music of the Classical Period: Haydn and Mozart: Music in the Age of Enlightenment. 3-4 Units.
Music and Musicians in the Age of EnlightenmentnPrerequisites: MUSIC 22, MUSIC 41. (WIM at 4-unit level only.).
Same as: MUSIC 243J

MUSIC 144M. Robert Schumann and the Interpretation of Musical Romanticism. 3-4 Units.
The creative personality, compositions, and writings of Robert Schumann (1810-1856) as exemplars of musical Romanticism in early nineteenth century European culture. Musical "interpretation" explored through a writing focus and a performance focus. Weekly writing assignments interpret compositions as texts, performances, and cultural documents. Students study and interpret up to three works (solo piano, chamber music, art-songs) by Schumann and/or contemporary figures (Schubert, Mendelssohn, Chopin, Brahms, Clara Schumann) for in-class presentation and final lecture-recital. Prerequisites: Music 42, and Music 22 or equivalent (intermediate music theory), intermediate or higher performance ability in piano, strings, or voice. (WIM at 4-unit level only.).
Same as: MUSIC 244M

MUSIC 145K. Studies in Western Art Music Since 1900: Concepts of New Music. 4 Units.
A survey of the history of Western classical music in the twentieth century, concentrating on shifts in the concept of New Music in the first half of the century. The aim is twofold: to study in depth a representative selection of works and to develop a historiographical framework for that study. Relevant concepts to be examined include Expressionism, Neo-Classicism, New Objectivity, Serialism, Aleatoricism, and Minimalism -- all of them key terms used by music historians and critics to describe and delineate the multifaceted phenomenon of "New Music." Composers to be studied include Schoenberg, Stravinsky, Berg, Weill, Shostakovich, Reich and Glass, and others. Prerequisites: MUSIC 23, MUSIC 42. (WIM course for Music majors.).
Same as: MUSIC 245K

MUSIC 146M. New Keywords in African Sound. 3-4 Units.
This course identifies and considers new keywords for the study of contemporary African music and sound. Each week we will foster discussion around a keyword and a constellation of case studies. The sonic practices we will encounter range from South African house music to Ghanaian honk horns; from Congolese rumba bands to Tunisian trance singers; from listening to the radio in a Tanzanian homestead to making hip hop music videos on the Kenyan coast. By exploring the unexpected interconnections between contemporary African musical communities, we will discuss new keywords arising in current scholarship, including technologies like the amplifier and the hard drive, spaces like the studio and the city, and analytics like pleasure and hotness. We will also engage with established concepts for the study of postcolonial African cultures, including nationalism, cosmopolitanism, globalization, diaspora, and Pan-Africanism. This is a seminar-based course open to graduate students, upper level undergraduate students, and other students with consent of the instructor. Proficiency in music is not required. WIM at 4 units only.
Same as: AFRICAAM 146D, AFRICAST 146M, CSRE 146D, MUSIC 246M

MUSIC 146N. Transcultural Perspectives of South-East Asian Music and Arts. 2-4 Units.
This course will explore the links between aspects of South-East Asian cultures and their influence on modern and contemporary Western art and literature, particularly in France; examples of this influence include Claude Debussy (Gamelan music), Jacques Charpentier (Karnatak music), Auguste Rodin (Khmer art) and Antonin Artaud (Balinese theater). In the course of these interdisciplinary analyses - focalized on music and dance but not limited to it - we will confront key notions in relation to transculturality: orientalism, appropriation, auto-ethnography, nostalgia, exoticism and cosmopolitanism. We will also consider transculturality interior to contemporary creation, through the work of contemporary composers such as Tran Kim Ngoc, Chinary Ung and Tôn-Thât Tiêt. Viewings of sculptures, marionette theater, ballet, opera and cinema will also play an integral role. To satisfy a Ways requirement, this course must be taken for at least 3 units. In AY 2020-21, a letter grade or `CR¿ grade satisfies the Ways requirement. WIM credit in Music at 4 units and a letter grade.
Same as: COMPLIT 148, COMPLIT 267, FRENCH 260A, MUSIC 246N

MUSIC 147J. Studies in Music, Media, and Popular Culture: The Soul Tradition in African American Music. 3-4 Units.
1960s and 70s Black music, including rhythm and blues, Motown, Southern soul, funk, Philadelphia soul, and disco. Its origins in blues, gospel, and jazz to its influence on today's r&b, hip hop, and dance music. Soul's cultural influence and global reach; its interaction with politics, racism, gender, place, technology, and the economy. Synchronous and asynchronous remote learning, with class discussions, small-group activities, guest presenters, and opportunities for activism. Pre-/co-requisite (for music majors): MUSIC 22. (WIM at 4 units only.).
Same as: AFRICAAM 19, AMSTUD 147J, CSRE 147J, MUSIC 247J

MUSIC 147K. Studies in Music, Media, and Popular Culture: Music and Urban Film. 3-4 Units.
How music and sound work in urban cinema. What happens when music's capacity to transform everyday reality combines with the realism of urban films? Provides an introduction to traditional theories of film music and film sound; considers how new technologies and practices have changed the roles of music in film. Readings discuss film music, realistic cinema, urban musical practices and urban culture. Viewing includes action/adventure, Hindi film, documentary, film noir, hip hop film, the musical, and borderline cases by Jean-Luc Godard, Spike Lee, Wong Kar-Wai and Tsai Ming-Liang. Pre- or corequisite (for music majors): MUSIC 22. (WIM at 4 unit level only.).
Same as: CSRE 147D, MUSIC 247K

MUSIC 150P. The Changing World of Popular Music. 2 Units.
This course will cover changes in the business, economics, and practices of the popular music industry. It will provide a brief historical overview of the industry and its business models. The majority of the course will focus on the industry as it works today and on forces that are causing it to change rapidly. The course will feature guest artists and executives with current experience in the field, as well as project-based assignments designed to give students hands-on experience. Topics will include: economics and business models of commercial music business, music production, music distribution, marketing, leadership in the music industry and artist management.
Same as: ARTSINST 150

MUSIC 151B. Red Vest Band. 1 Unit.
A small ensemble of the Leland Stanford Junior University Marching Band open to members of the LSJUMB by audition and consent of instructor. Members perform at multiple Stanford Athletics events, multiple community events, and travel to some away and post-season games. Weekly rehearsals focus on introduction of new student arrangements and the LSJUMB's repertoire of rock, funk, and traditional styles. May be repeated for credit a total of 12 times.

MUSIC 151BZ. Red-Vest Band. 0 Units.
A small ensemble of the Leland Stanford Junior University Marching Band open to members of the LSJUMB by audition and consent of instructor. Members perform at multiple Stanford Athletics events, multiple community events, and travel to some away and post-season games. Weekly rehearsals focus on introduction of new student arrangements and the LSJUMB's repertoire of rock, funk, and traditional styles. May be repeated for credit a total of 12 times.

MUSIC 151C. Stanford University Ragtime Ensemble. 1 Unit.
Performance ensemble of twelve musicians (5 winds, 5 strings, drums, piano) playing repertoire by Scott Joplin and other ragtime composers. The make-up of the ensemble is based on the Red Back Book arrangements of Joplin rags for flute/piccolo, clarinet, cornet (trumpet), trombone, tuba, 2 violins, viola, cello, double bass, drums, and piano.

MUSIC 151CZ. Stanford University Ragtime Ensemble. 0 Units.
Performance ensemble of twelve musicians (5 winds, 5 strings, drums, piano) playing repertoire by Scott Joplin and other ragtime composers. The make-up of the ensemble is based on the Red Back Book arrangements of Joplin rags for flute/piccolo, clarinet, cornet (trumpet), trombone, tuba, 2 violins, viola, cello, double bass, drums, and piano.

MUSIC 151D. Orchestra Online. 1-2 Unit.
An inquiry into orchestral music, through videos, recordings, and readings, with live discussions with prominent individuals from the musical world. Topics may also include opera, musical theatre, and other non-orchestral aspects of music. All classes will be recorded and available to all participants in order to make it possible for anyone to take the course, even if they have a conflict with the meeting time or reside in a time zone that precludes them from participating in the live sessions.

MUSIC 151DZ. Orchestra Online. 0 Units.
An inquiry into orchestral music, through videos, recordings, and readings, with live discussions with prominent individuals from the musical world. Topics may also include opera, musical theatre, and other non-orchestral aspects of music. All classes will be recorded and available to all participants in order to make it possible for anyone to take the course, even if they have a conflict with the meeting time or reside in a time zone that precludes them from participating in the live sessions.

MUSIC 152B. Black Music Revealed: Black composers, performers, and themes from the 18th century to the present. 3 Units.
Online seminar on the achievements of Black composers and performers in ragtime, jazz, and classical music, from Chevalier de Saint-Georges, whose music influenced Mozart, and George Bridgetower, for whom Beethoven composed his "Kreutzer" Sonata, to Anthony Davis's opera "The Central Park Five". Students will examine issues of cultural borrowing in operas by Mozart and Verdi, and shows like Showboat and Porgy and Bess. Guest speakers will include composers and performers. Students will work together in groups to produce materials on course topics in coordination with the African American Museum & Library at Oakland. (Cardinal Course certified by the Haas Center).
Same as: CSRE 152B

MUSIC 153A. Network Performance Practice. 2-4 Units.
JackTrip software, developed at Stanford, provides the means for ultra-low-latency, uncompressed sound transmission for live music-making. Remote ensemble rehearsals, coaching, music lessons, jamming and concert broadcasting during the COVID-19 pandemic are making use of the technology. The open-source project has developed rapidly in the past 6 months, especially in its ability to support large ensembles of home-to-home connections. The course will cover recent features, history and theory of JackTrip and engage in a series of practical, participatory performance sessions. Students will learn the software and related network and audio principles with a focus on intuition building and ear training. Course participants will work from home and be able to use CCRMA facilities remotely. The course can be audited or coordinated with another course.
Same as: ARTSINST 141

MUSIC 153AZ. Network Performance Practice. 0 Units.
JackTrip software, developed at Stanford, provides the means for ultra-low-latency, uncompressed sound transmission for live music-making. Course participants will work from home and be able to use CCRMA facilities remotely. The course can be audited or coordinated with another course.

MUSIC 153B. Internet Ensemble Tech Force. 1 Unit.
This course inaugurates an Internet Ensemble Tech Force which is needed urgently worldwide and locally to support music ensembles going online. Calling it urgent is not an exaggeration. We can provide a valuable service and that's the purpose of the course. Course participants will quickly come up to speed on low-latency audio collaboration technology and will then pair with ensembles interested in using it. Ensemble rehearsals, coaching and concert broadcasting are planned for the quarter. 153B participants will work from home and be able to use CCRMA facilities remotely. The course can be audited or coordinated with another course. Let's help make group playing possible during this public health challenge.
Same as: ARTSINST 141B

MUSIC 154A. Sound Art I. 4 Units.
Acoustic, digital and analog approaches to sound art. Familiarization with techniques of listening, recording, digital processing and production. Required listening and readings in the history and contemporary practice of sound art. (lower level).
Same as: ARTSTUDI 131

MUSIC 154E. Creative Agency in the Pandemic World. 3 Units.
Distributed workshop for creative invention and artistic collaboration within radical pandemic constraints. Students imagine, design, and explore emergent creative strategies for art-making under quarantine conditions. Small art projects--in ANY artistic medium--will be made every two weeks, some collaborative. By reframing sub-optimal working conditions as super-optimal, participants create a modest canon of pieces that serve as a manual for sustaining creative vibrancy during stressful periods. Weekly synchronous conversation about artistic strategies and an overview of historical artistic constraints (both necessitated and voluntarily adopted); breakout group collaborations; consultations with professor; sharing of work; mutual critique, support, and mentorship.

MUSIC 155. Intermedia Workshop. 3-4 Units.
Students develop and produce intermedia works. Musical and visual approaches to the conceptualisation and shaping of time-based art. Exploration of sound and image relationship. Study of a wide spectrum of audiovisual practices including experimental animation, video art, dance, performance, non-narrative forms, interactive art and installation art. Focus on works that use music/sound and image as equal partners. Limited enrollment. Prerequisites: consent of instructors, and one of FILMPROD 114, ARTSTUDI 131, 138, 167, 177, 179, or MUSIC 123, or equivalent. May be repeated for credit.
Same as: ARTSTUDI 239, MUSIC 255

MUSIC 155A. Piano Literature. 1 Unit.
An exploration of the repertoire for piano and keyboards, providing experience with and context for this literature while engaging practical, technical and analytical features of the works. Each quarter will cover focused areas defined by time, place, composer, stylistic tradition, formal type, etc. Students will perform works in class, as well as listen to and compare performances through videos and recordings. Assignments include reading, listening, and a final project. Prerequisite: Private lesson proficiency level in piano, or consent of instructor.
Same as: MUSIC 255A

MUSIC 155AZ. Piano Literature. 0 Units.
An exploration of the repertoire for piano and keyboards, providing experience with and context for this literature while engaging practical, technical and analytical features of the works. Each quarter will cover focused areas defined by time, place, composer, stylistic tradition, formal type, etc. Students will perform works in class, as well as listen to and compare performances through videos and recordings. Assignments include reading, listening, and a final project. Prerequisite: Private lesson proficiency level in piano, or consent of instructor.

MUSIC 155S. String Literature. 1 Unit.
An exploration of the repertoire for stringed instruments, providing experience with and context for this literature while engaging practical, technical and analytical features of the works. Each quarter will cover focused areas defined by time, place, composer, stylistic tradition, formal type, etc. Students will perform works in class, as well as listen to and compare performances through videos and recordings. Assignments include reading, listening, and a final project. Prerequisite: Private lesson proficiency level in piano, or consent of instructor.
Same as: MUSIC 255S

MUSIC 156. "sic": Improvisation Collective. 1 Unit.
Small ensemble devoted to learning trans-idiomatic improvisation techniques and composing indeterminate pieces in a workshop setting. One major concert. Prerequisite: access to an instrument. Improvisational experience and conventional instrumental virtuosity not required. May be repeated for credit for a total of 3 times.

MUSIC 156Z. "sic": Improvisation Collective. 0 Units.
Small ensemble devoted to learning trans-idiomatic improvisation techniques and composing indeterminate pieces in a workshop setting. One major concert. Prerequisite: access to an instrument. Improvisational experience and conventional instrumental virtuosity not required. May be repeated for credit for a total of 3 times.

MUSIC 157. Cardinal Calypso--Steelpan Ensemble. 1 Unit.
This course introduces students to steelpan as an instrument and as a culture. Over the course of the year students will gain fundamental knowledge of the pitched percussion instrument, background knowledge of the culture of Trinidad and Tobago that created this instrument, and the opportunity to expand and share that knowledge through rehearsals, lecture topics/discussion, performances, and guest performers. Soca and Calypso music are genres of focus, but we will cover a diverse range of other genres as well.

MUSIC 157Z. Cardinal Calypso -- Steelpan Ensemble. 0 Units.
This course introduces students to steelpan as an instrument and as a culture. Over the course of the year students will gain fundamental knowledge of the pitched percussion instrument, background knowledge of the culture of Trinidad and Tobago that created this instrument, and the opportunity to expand and share that knowledge through rehearsals, lecture topics/discussion, performances, and guest performers. Soca and Calypso music are genres of focus, but we will cover a diverse range of other genres as well.

MUSIC 159. Early Music Singers. 1 Unit.
Small choir specializing in Medieval, Renaissance, and early Baroque vocal music. One major concert per quarter. May be repeated for credit for a total of 15 times. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure. By enrolling in this course you are giving consent for the video and audio recording and distribution of your image and performance for use by any entity at Stanford University.

MUSIC 159J. Performance as Analysis: Late-Medieval Music in Action. 1-3 Unit.
This experimental course channels embodied musical knowledge into text-based analysis. Centered around a group of Italian manuscripts recently deposited at Stanford (the Burke Collection), Part I features an intensive period of workshops and rehearsals: working with members of Cut Circle (http://cutcircle.org) as well as specialists in computer science and art history, students prepare a concert to be held during Week 2 of the quarter. In Part II (Weeks 3--4) students perform "embodied analysis," channeling their experiences performing into deepening engagement with the repertoire. Regular meetings conclude after Week 5; a paper is due in Week 7. Prerequisites: good sight-singing skills; at least one quarter's experience in MUSIC 165 (Chamber Chorale) or an ensemble of a similar caliber. By enrolling in this course you are giving consent for the video and audio recording and distribution of your image and performance for use by any entity at Stanford University. All meetings at Green Library Rotunda except Weeks 3-5 meetings which will be in Braun 131. Week 1: Mon 6 January: 4:30 - 7:00; Wed 8 January: 4:30 - 7:00; Fri 10 January; Sat 11 and Sun 12 January: 2:30 - 6pm; Week 2: Tues 14 January: 4:30 - 7:00; Wed 15 January: 5:30pm call for 7:30p concert; Weeks 3-5: Tues/Thurs, 3:00-4:30, Braun 131; Weeks 6-10: No class meeting.

MUSIC 159Z. Early Music Singers. 0 Units.
Small choir specializing in Medieval, Renaissance, and early Baroque vocal music. One major concert per quarter. May be repeated for credit for a total of 15 times for 0 unit. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure. By enrolling in this course you are giving consent for the video and audio recording and distribution of your image and performance for use by any entity at Stanford University.

MUSIC 160. Stanford Symphony Orchestra. 1 Unit.
Large symphony orchestra (ca. 100 members) that rehearses two evenings per week (M/Th) and performs repertoire primarily from the Classical Period to the present. Usually prepares 1-2 programs per quarter, and presents 2-3 performances each quarter in Bing Concert Hall. Enrollment based on audition; for audition information, please refer to the Stanford Orchestra website at https://web.stanford.edu/group/sso/cgi-bin/orchestras/how-to-join/auditions/. May be taken for credit up to 15 times. Zero-unit enrollment option (MUSIC 160Z) available with instructor permission. See website (orchestra.stanford.edu) for further information. By enrolling in this course you are giving consent for the video and audio recording and distribution of your image and performance for use by any entity at Stanford University.

MUSIC 160A. Stanford Philharmonia. 1 Unit.
Chamber orchestra (ca. 45 members) that rehearses one evening per week (Tu) and performs repertoire primarily from the Baroque Period to the present. Usually prepares 1-2 programs per quarter, and presents 1-2 performances each quarter in Bing Concert Hall. Enrollment based on audition; for audition information, please refer to the Stanford Orchestra website at https://web.stanford.edu/group/sso/cgi-bin/orchestras/how-to-join/auditions/. May be taken for credit up to 15 times. Zero-unit enrollment option (MUSIC 160AZ) available with instructor permission. See website (orchestra.stanford.edu) for further information. By enrolling in this course you are giving consent for the video and audio recording and distribution of your image and performance for use by any entity at Stanford University.

MUSIC 160AZ. Stanford Philharmonia. 0 Units.
Chamber orchestra (ca. 45 members) that rehearses one evening per week (Tu) and performs repertoire primarily from the Baroque Period to the present. Usually prepares 1-2 programs per quarter, and presents 1-2 performances each quarter in Bing Concert Hall. Enrollment based on audition; for audition information, please refer to the Stanford Orchestra website at https://web.stanford.edu/group/sso/cgi-bin/orchestras/how-to-join/auditions/. By enrolling in this course you are giving consent for the video and audio recording and distribution of your image and performance for use by any entity at Stanford University.

MUSIC 160B. Stanford New Ensemble. 1 Unit.
Performing compositions of the 20th century, recent works of this century, and new works by Stanford faculty and student composers. Musicians collaborate with composers and artists visiting and performing at Stanford. One concert per quarter. Admission and enrollment based on audition. For audition and contact information, please refer to the SSO/SPO/SNE website at (http://www.stanford.edu/group/sso/cgi-bin/wordpress/member-login/). All participants must register. May be repeated for credit a total of 14 times. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure. By enrolling in this course you are giving consent for the video and audio recording and distribution of your image and performance for use by any entity at Stanford University.

MUSIC 160BZ. Stanford New Ensemble. 0 Units.
Performing compositions of the 20th century, recent works of this century, and new works by Stanford faculty and student composers. Musicians collaborate with composers and artists visiting and performing at Stanford. One concert per quarter. Admission and enrollment based on audition. For audition and contact information, please refer to the SSO/SPO/SNE website at (http://www.stanford.edu/group/sso/cgi-bin/wordpress/member-login/). All participants must register. May be repeated for credit a total of 14 times. Zero unit enrollment option available with instructor permission. See website: (http://music.stanford.edu) for policy and procedure. By enrolling in this course you are giving consent for the video and audio recording and distribution of your image and performance for use by any entity at Stanford University.

MUSIC 160C. Stanford Baroque Soloists. 1 Unit.
